Opinion

[*908] ORDER DENYING MOTION TO DISMISS

Re: Dkt. No. 52

This case involves Invisalign, the popular dental aligner that dentists sell patients to straighten their teeth. According to the plaintiffs, the company that makes Invisalign has a monopoly in the aligner market as well as the market for scanners that are used to produce aligners. The company has allegedly engaged in a multifaceted scheme to stifle competition in these markets—a scheme that has achieved its intended result of entrenching the company's monopoly power, reducing consumer choice in both markets, and preserving its ability to charge supracompetitive prices for aligners and scanners. Although the complaint could have done a better job of explaining aspects of the alleged scheme, and although not every aspect of the alleged scheme gives rise to an antitrust claim on its own, the totality of the conduct does—if the plaintiffs are able to prove that it actually occurred—violate the antitrust **[**3]** laws. In fact, one aspect of the alleged scheme, the termination of an agreement with another scanner company, amounts to an antitrust violation even when it is considered in isolation. Accordingly, the motion to dismiss the complaint is denied.

I

Aligners are transparent, removable mouthpieces that slip over and straighten teeth. To order aligners for a patient, a dental practice must send an aligner manufacturer some sort of image or imprint of the patient's teeth and jaws. Historically, dental practices used silicon molds to fit an aligner to a patient's teeth, but handheld scanners that take digital images of jaws and teeth have emerged as a more accurate and efficient tool. Aligner manufacturers use the images to create custom aligners. Patients typically undergo multiple scans and use multiple sets of aligners to shift their teeth over time, with the aligners being adjusted as their teeth move. This case arises out of Align Technology's sale of its aligner as well as its scanner for making that aligner. The aligner is called "Invisalign," and the scanner is called "iTero."

The plaintiffs are two dental practices, both of which use iTero scanners to offer Invisalign to their patients. **[**4]** City Smiles is a practice located in Chicago, Illinois. VIP Dental Spas is a practice with offices in Los Angeles and Beverly Hills, California. Both City Smiles and VIP Dental Spas allegedly purchased an iTero to scan patients' teeth for Invisalign orders—orders they regularly made from Align from 2015 onward. The plaintiffs allege that the prices they paid for these aligners and scanners were artificially inflated due to an anticompetitive scheme that Align implemented in response to new competition in the aligner market. That scheme, they allege, was orchestrated to monopolize both the scanner and aligner markets. The following is a description of the allegations in the plaintiffs' complaint. At this stage, the Court is required to assume the truth of these allegations, so long as they are adequately articulated and not contradicted by any document that the complaint relies upon.

According to the plaintiffs, for years, Align faced little competition in the aligner market and enjoyed large profit margins on Invisalign, thanks in large part to its patents. Although some key patents have **[*909]** expired and other aligner companies have attempted to break into the market, Align still allegedly **[**5]** controls roughly 90 percent of that market. During this time, Invisalign has become synonymous with aligners generally, and the product is considered a "must have" for dental practices that offer aligners.

The plaintiffs allege that Align has also come to dominate the scanner market to the point that iTero accounts for roughly 80 percent of that market. The complaint defines the relevant scanner market with reference to scanners that are designed specifically to produce images for making aligners, excluding scanners that perform other functions but can also be used to produce images for aligner manufacturers. Align's only competitor in this aligner-specific scanner market is 3Shape. 3Shape sells a scanner called "Trios."

The plaintiffs allege that Align designed its iTero scanner so that, for practical purposes, it can only be used to order Invisalign. According to the complaint, iTero creates scans in a specialized format rather than in the standard file format used by other aligner companies, which means that a dental practice wishing to order another company's aligners using iTero would have to undertake the expensive and time-consuming task of converting the iTero scans into a compatible **[**6]** format. Thus, according to the plaintiffs, a dental practice with an iTero scanner cannot realistically use that scanner to order any type of aligner besides Invisalign.

On the flip side, if a dental practice wishes to offer Invisalign to patients, it is allegedly limited as a practical matter to using the iTero scanner to generate those orders. Align will fill orders for Invisalign from dental practices that use a limited number of preapproved multi-use scanners (i.e., scanners not specifically designed to generate images for aligners), but the complaint does not treat those scanners as viable substitutes. And although the complaint provides little information about the differences between multi-use scanners and aligner-specific scanners, Align does not (for purposes of this motion to dismiss) challenge the plaintiffs' definition of the scanner market. Meanwhile, the only other scanner that is aligner-specific—3Shape's Trios—cannot be used to order Invisalign because Align will not accept scans from Trios.

That was not always the case. In December 2015, Align and 3Shape entered an "interoperability agreement" and built an interface that allowed dentists to use Trios scans to order Invisalign. **[**7]** Align allegedly entered this agreement to increase Invisalign sales, including from dental practices that were already using the Trios scanner. But the plaintiffs allege that this arrangement ultimately fell apart because 3Shape was unwilling to help Align develop a stranglehold on the aligner market. Even as Align was finalizing the 2015 interoperability agreement with 3Shape, it was allegedly lobbying 3Shape to modify the agreement so that the Trios scanner could only be used to order Invisalign. 3Shape allegedly refused to make the Trios scanner exclusive in this way, so the agreement ultimately permitted Trios to generate orders for aligners made by other companies. But, according to the complaint, Align continued to try to alter the arrangement. The plaintiffs describe a February 2016 meeting, during which Align allegedly conveyed that 3Shape would need to treat Align as the "preferred partner" for aligners to continue the collaboration. The plaintiffs also describe a November 2016 meeting, during which Align allegedly asked 3Shape to enter a joint venture that would allow Align to control Trios. The plaintiffs allege that, although 3Shape consistently rejected these demands, **[**8]** Align continued to insist that 3Shape join some sort of venture that would exclude Align's **[*910]** competitors in the aligner market. Eventually, Align announced that it would terminate the interoperability agreement with 3Shape. The announcement came in December 2017—roughly two and a half years after the arrangement was established. Thus, beginning in January 2018, dental practices with only the Trios scanner were no longer able to order Invisalign for their patients.

And that, according to the plaintiffs, left dental practices in the position where they remain today: where iTero, as a practical matter, is the only scanner for offering aligners. The plaintiffs allege that this is, in part, thanks to the nature of scanner purchases. While scanners are essential for dental practices selling aligners, practices typically do not purchase more than one scanner because scanners are large capital investments meant to last several years. The plaintiffs also allege that, in the rare case that a dental practice owns more than one scanner, that practice tends to use only one scanner brand (either Align's or 3Shape's) due to the cost of maintaining multiple software subscriptions and the time and expense **[**9]** of training personnel to use different scanners and software programs. According to the complaint, because Invisalign dominates the aligner market and is a "must have" for dental practices, iTero is left as the only sensible scanner option. And as dental practices invest in iTero, the investment creates a long-term dependence on Invisalign, since that is the only aligner for which iTero is designed to make scans.

The termination of the interoperability agreement reflected something of a change in philosophy for Align. In 2015, before Align entered the agreement with 3Shape (and before its key patents expired), Align's then-Chief Operating Officer told industry analysts that the company preferred having multiple scanners generate orders for Invisalign:

> No one wants to have to redesign, start over, buy multiple pieces of equipment if they can have greatest utility from a scanner . . . . So, we believe what we hear from our customers is they don't want to be forced to buy a system from you for the pleasure of offering Invisalign to their patients and other therapies we may have down the road. So we feel actually very strongly . . . . There's no reason for us not to act in complementary **[**10]** ways because it's good for the customer. So in our minds, we don't need to own the channel. We don't need to have exclusivity. In fact, we want probably more high-quality scanners that can make it easier to do Invisalign and other chair-side procedures that we have the unique capabilities to fulfill.

According to the plaintiffs, terminating the agreement with 3Shape is contrary to this goal, as it eliminated the only other high-quality scanner for Align's customers. Moreover, the plaintiffs allege that Align's termination of the interoperability agreement represented a significant short-term sacrifice of "many millions of dollars" in revenue for Align.

While the plaintiffs commonly refer to Align as having "terminated" the interoperability agreement, they note that the agreement was actually worldwide and that Align did not stop filling orders generated by Trios scanners for Invisalign in other countries. They allege that the reason for terminating the agreement only in the United States was based on Align's relative market shares: because Align has less power in the aligner markets in other countries, it cannot force customers to use iTero by preventing Trios scanners from generating **[**11]** orders for Invisalign, but it can do that in the United States due to Invisalign's dominance and prominence.

The plaintiffs allege that—concurrent with the establishment of a system where **[*911]** a dental practice wanting to offer Invisalign was left with little choice but to use an iTero scanner, and where a practiceusing an iTero scanner had little choice but to refrain from offering any aligner other than Invisalign—Align began executing various contracts that committed dental practices to using its products and blocked competitors in both the aligner and scanner markets.

First, in late 2017, Align launched the Fusion Program. According to the plaintiffs, 3Shape's Trios scanner and Align's iTero scanner are typically sold at similar list prices. But the plaintiffs allege that, under the Fusion Program, Align drops the price of iTero by $10,000 in exchange for a dental practice's commitment to making a minimum number of Invisalign orders during the next three years. The plaintiffs allege that, if a dental practice fails to order the minimum number of aligners, it incurs back-end penalties that could be as large as the entire $10,000 discount. The complaint does not describe the program's minimum **[**12]** Invisalign order requirements, but it does allege that they are so high that dental practices must stop ordering other aligners and focus all their energy on selling Invisalign. According to the plaintiffs, Align's scanner and aligner competitors are unable to compete with this offer: 3Shape would lose one third of its scanner revenue if it discounted Trios to match iTero's price; and other aligner manufacturers would have to offer below-cost prices to offset Align's iTero discount.[1]

Second, in mid-2018, Align entered multiyear contracts with two of the nation's largest dental service organizations (DSOs), Heartland Dental and Aspen Dental. DSOs provide business support to independent dental practices, including by managing purchase contracts with suppliers. According to the complaint, Heartland Dental and Aspen Dental agreed to work only with Align in providing its member offices with both scanners and aligners. The complaint's description of the contracts focuses mainly on the scanner component. Heartland Dental, the nation's largest DSO with more than 850 supported dental offices, allegedly agreed to place iTero scanners in 90 percent of those offices by the end of 2018, which resulted **[**13]** in the industry's single-largest scanner deployment. At the same time, Align allegedly contracted with Aspen Dental, another of the nation's largest DSOs with nearly 700 locations, to equip each Aspen location with an iTero scanner. The plaintiffs allege that these DSO contracts enabled Align to rapidly increase its share in the scanner market. However, they do not explain the size of these deals relative to the overall scanner market. They also do not say much about the contracts' impact in the aligner market.

Third, also in 2018, Align changed its discount program, the Advantage Program. The plaintiffs allege that the Advantage **[*912]** Program is a tiered discount program that conditions a dental practice's prices for Invisalign on its ability to maintain certain levels of Invisalign orders over time. According to the plaintiffs, before 2018, the pricing criteria focused on a dental practices' number of "lifetime" cases. The plaintiffs don't explain this term, but presumably it means the number of orders over the entire history of the dental practice. But Align allegedly changed the criteria to focus on the number of orders submitted in the previous six months, and then again more recently, **[**14]** on the number of orders submitted in the previous twelve months. The plaintiffs allege that, to get

---

[1] It's worth noting that this part of the complaint is difficult to understand. On the one hand, the complaint alleges that dental practices with the iTero scanner are stuck ordering Invisalign because iTero does not, as a practical matter, facilitate orders for other companies' aligners. If that is true, then one wonders if the Fusion Program's purchase requirements should have any effect on a practice's decision to order aligners from other companies, except in the situation where a practice uses both Align's iTero and 3Shape's Trios (which the complaint alleges is quite unusual). Moreover, although the complaint alleges that Align is offering a $10,000 discount on the iTero scanner, it does not allege how significant a discount this is as a matter of percentage. These are just a couple examples of ambiguities in the allegations relating to Align's contractual arrangements with dental offices—ambiguities that, as explained in Section II.A, prevent the Court from concluding that any one contractual arrangement alone constitutes an antitrust violation.

competitive prices for Invisalign, dental practices must place a very high number of Invisalign orders and have a strong incentive to forego ordering other aligners until they do so.[2]

II

Section 2 of the Sherman Act makes it unlawful to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations . . . ." *15 U.S.C. § 2*. To state an unlawful monopolization claim, a plaintiff must allege "(1) [p]ossession of monopoly power in the relevant market; (2) willful acquisition or maintenance of that power; and (3) causal antitrust injury." *SmileCare Dental Group v. Delta Dental Plan of California, Inc., 88 F.3d 780, 783 (9th Cir. 1996)*.

The complaint summarizes the plaintiffs' monopolization claim as follows: "Align was able to use its monopoly power in the Aligner market to drive 3Shape out of the scanner market, and then to use its increased monopoly power in the scanner market to maintain its monopoly power in the aligner market. In this way, Align's ability to leverage both its scanner and aligner monopolies to prevent competition in both markets has enabled it to maintain or increase **[**15]** its monopoly power in both markets and to charge supracompetitive prices for both its aligners and its scanners."

Align does not dispute that the plaintiffs have adequately alleged the first element of a *section 2* claim—possession of monopoly power in the aligner and scanner markets. And as previously mentioned, Align does not, at least for purposes of this motion to dismiss, challenge the plaintiffs' definition of the scanner market as consisting only of scanners designed exclusively to produce scans for aligners. But Align contends that the complaint does not adequately allege the next two elements—that Align engaged in the willful acquisition or maintenance of monopoly power in those markets and that the plaintiffs suffered antitrust injury as a result.

A

The "willful acquisition or maintenance of monopoly power" is a difficult concept to pin down. Courts often distinguish it from "growth or development as a consequence of a superior product, business acumen, or historic accident.'" *Verizon Communications Inc. v. Law Offices of Curtis v. Trinko, LLP, 540 U.S. 398, 407, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*. Courts also frequently equate "willful acquisition or maintenance of monopoly power" with "anticompetitive conduct," even though the latter phrase is no more precise. *Id.* ("The possession **[**16]** of monopoly **[*913]** power will not be found unlawful unless it is accompanied by an element of anticompetitive conduct."). Anticompetitive conduct, the courts say, "is behavior that tends to impair the opportunities of rivals and either does not further competition on the merits or does so in an unnecessarily restrictive way." *Cascade Health Solutions v. PeaceHealth, 515 F.3d 883, 894 (9th Cir. 2008)* (citing *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 605, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985))*; *see* *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 482-83, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)* ("The second element of a *§ 2* claim is the use of monopoly power 'to foreclose competition, to gain a competitive advantage, or to destroy a competitor.'" (quoting *United States v. Griffith, 334 U.S. 100, 107, 68 S. Ct. 941, 92 L. Ed. 1236 (1948)))*; *Image Technical Services, Inc. v. Eastman Kodak Co., 125 F.3d 1195, 1208 (9th Cir. 1997)*.

Sometimes, a monopolist's singular activity will amount to an antitrust violation on its own. But other times, a series of activities will combine to create an antitrust violation even if no one activity is sufficiently "anticompetitive" in isolation. *See, e.g., City of Anaheim v. Southern California Edison Co., 955 F.2d 1373, 1376, 1378 (9th Cir. 1992)* ("[I]t would not be proper to focus on specific individual acts of an accused monopolist while refusing to consider their overall combined effect."); *Twin City Sportservice, Inc. v. Finley & Co., Inc., 676 F.2d 1291, 1302 (9th Cir. 1982)*; *see also* *Free FreeHand Corp. v. Adobe Systems Inc., 852 F. Supp. 2d 1171, 1180 (N.D. Cal. 2012)*; *Tele Atlas N.V. v. NAVTEQ Corp.*, 2008 WL 4911230, at *1 (N.D. Cal. Nov. 13, 2008) (citing *Continental Ore Co. v.*

[2] As noted earlier with respect to the Fusion Program, it's not clear why the Advantage Program's allegedly aggressive numbers-based pricing criteria is problematic if it's true, as the plaintiffs allege elsewhere, that a dental practice with an iTero scanner is effectively limited to ordering Invisalign anyway.

Union Carbide & Carbon Corp., 370 U.S. 690, 698-99, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)). And sometimes, an activity is so innocuous that it adds nothing to a plaintiff's *section 2* claim because it is simply not anticompetitive. *See, e.g., Free FreeHand, 852 F. Supp. 2d at 1184*.

Some of the conduct alleged in the complaint—specifically, the termination of the interoperability agreement with 3Shape, **[**17]** the Fusion Program involving a scanner discount that locks dental practices into purchasing Invisalign aligners for several years, and the contracts with DSOs to offer only Align products to and place iTero scanners in dental practices within those organizations—combine to constitute a *section 2* violation. Indeed, the termination of the interoperability agreement, as alleged in the complaint, amounts to a *section 2* violation on its own. The Fusion Program and DSO contracts, at least in the context of Align's alleged monopoly power and its overall course of conduct, are problematic from an antitrust standpoint. They might well be said to "impair the opportunities of rivals" in a way that does not "further competition on the merits." *Cascade Health, 515 F.3d at 894*. Although the complaint does not include enough information about these two programs to state a standalone claim, at a minimum they combine with the termination of the interoperability agreement (and with each other) to strengthen the plaintiffs' assertion of anticompetitive conduct by a monopolist. On the other hand, the plaintiffs' allegations regarding Align's Advantage Program suggest that it is essentially a system for providing short-term volume discounts—too innocuous **[**18]** to add anything to the plaintiffs' *section 2* claim.

1. The interoperability agreement. Even a firm with monopoly power has no general duty to engage in a joint marketing venture with a competitor. But in certain circumstances, a monopolist's termination of a cooperative venture can give rise to liability under the Sherman Act as a refusal to deal. *Aspen Skiing Co.,* ***[*914]*** *472 U.S. at 601*; *see also Lorain Journal Co. v. United States, 342 U.S. 143, 72 S. Ct. 181, 96 L. Ed. 162 (1951)*. The Ninth Circuit has described a refusal to deal as involving the following: (1) the "unilateral termination of a voluntary and profitable course of dealing," (2) a refusal to sell "even if compensated at retail price," and (3) a refusal to provide "products that were already sold in a retail market to other customers." *MetroNet Services v. Qwest, 383 F.3d 1124, 1131 (9th Cir. 2004)*; *see Federal Trade Commission v. Qualcomm Inc., 969 F.3d 974, 993-94 (9th Cir. 2020)*. But the termination of a relationship will only violate *section 2* if "the only conceivable rationale or purpose" of the termination "is to sacrifice short-term benefits in order to obtain higher profits in the long run from the exclusion of competition." *Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171, 1184 (9th Cir. 2016)*; *Qualcomm, 969 F.3d at 994*; *see also Trinko, 540 U.S. at 409*. "When a legitimate business justification supports a monopolist's exclusionary conduct, that conduct does not violate *[section 2*] of the Sherman Act." *Image Technical, 125 F.3d at 1212*.

The parties dispute whether the plaintiffs adequately allege that the "only conceivable rationale or purpose" behind **[**19]** the termination was anticompetitive. They do. The allegations in the complaint create a strong inference that the only conceivable reason for terminating the agreement with 3Shape was to stifle competition in both the aligner and scanner markets. The complaint alleges that the agreement resulted in tens of thousands of Invisalign orders for Align. And, given the price of each Invisalign order, Align sacrificed millions of dollars in short-term profits by terminating the agreement. According to the complaint, the sacrifice only made economic sense if Align expected the termination to result in long-term gains from an eventual enhancement of monopoly power. The plaintiffs explain in detail how the termination would run 3Shape out of the scanner market by compelling dentists to acquire the iTero scanner, which in turn would effectively compel dentists to focus primarily or exclusively on selling Invisalign, thus entrenching the company's monopoly power in both markets.

Economics aside, the complaint's allegations regarding Align's prior conduct with 3Shape also create a strong inference that the termination was intended to be anticompetitive. The complaint describes Align's repeated efforts **[**20]** to cajole 3Shape into preventing its Trios scanner from being used for any type of aligner other than Invisalign. And after 3Shape repeatedly refused, Align ended the agreement. This sequence of events strongly suggests that Align's decision to sacrifice short-term profits by terminating the agreement was calculated to accomplish a result that 3Shape previously refused to help Align achieve: the entrenchment of Invisalign's monopoly power in the aligner market. *See Trinko, 540 U.S. at 409* (noting that, at the pleading stage, allegations should "shed[] . . . light upon the motivation of [the defendant's] refusal to deal—upon whether it[] . . . [was] prompted not by competitive zeal but by anticompetitive malice"). Overall, the allegations about the termination are sufficient to raise a reasonable expectation that discovery will reveal evidence of illegal conduct. *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 556, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.

Align's primary response is that the complaint fails to rule out other possible explanations for the termination. There is a general version and a specific version of this argument. In the general version, Align asserts that an antitrust plaintiff must, in the complaint itself, list other **[*915]** potential rationales for the refusal to deal and explain **[**21]** why each of them could not conceivably explain the defendant's actions. That can't be right. The cases Align cites on this issue involve summary judgment or trials, where courts often inquire whether an antitrust plaintiff presented sufficient evidence to refute an alternative rationale for the refusal to deal. *Aerotec, 836 F.3d at 1184*; *Qualcomm, 969 F.3d at 993-97*; *MetroNet, 383 F.3d at 1130-34*. Align has cited no case—nor can the Court find one—holding antitrust plaintiffs to this type of burden at the pleading stage. *Creative Copier Servs. v. Xerox Corp., 344 F. Supp. 2d 858, 867 (D. Conn. 2004)* ("It is not required to allege the negative of every possible justification Xerox may offer for its conduct."); *see* SmileCare, 88 F.3d at 786 ("[T]he existence of valid business reasons is ordinarily a question of fact . . . ."); *Free FreeHand, 852 F. Supp. 2d at 1182*.

The specific version of Align's argument goes something like this: (i) the complaint alleges that Align has enjoyed patent protection for its products and that it has aggressively asserted its patent rights; (ii) the Court can take judicial notice of the fact that Align sued 3Shape for patent infringement around the time it terminated the agreement with 3Shape; and (iii) the best inference from the complaint and judicially noticeable material is that Align terminated the agreement with 3Shape because of the infringement. Therefore, according **[**22]** to Align, its patent justification precludes the plaintiffs from plausibly alleging that the "only conceivable purpose" for the termination was anticompetitive.

But the response to this specific argument is largely the same—it raises an issue for summary judgment or trial, not for a motion to dismiss. The mere fact that Align filed a patent infringement suit against 3Shape is not a basis for dismissing a claim alleging that the termination of the interoperability agreement violates *section 2*. That's especially true because the patent lawsuit raises more questions than answers. If Align doesn't want to do business with an infringer of its patents, why does it continue to do business with 3Shape in other countries? Does the patent infringement suit have merit, or is it brought in retaliation for 3Shape's refusal to comply with Align's ongoing pressure make the Trios scanner exclusive to Invisalign? How did it come about that Align discovered the alleged patent infringement right around the time that 3Shape was refusing to make its scanner exclusive to Invisalign? And given the number of patent lawsuits between Align and 3Shape, is it appropriate to conclude anything from just one of these lawsuits **[**23]** without a deeper analysis and more detailed timeline?

It may well be that Align has good answers to these questions, and that the existence of the patent dispute is indeed a legitimate rationale for the agreement's termination. But at this stage, the existence of the patent suit against 3Shape does not render implausible the otherwise highly plausible allegation that the only conceivable reason Align terminated the interoperability agreement was to stifle competition and entrench its monopoly power.

2. The Advantage Program, Fusion Program, and DSO contracts. The plaintiffs allege that the Advantage Program, Fusion Program, and DSO contracts are examples of "de facto exclusive dealing arrangements." At its simplest, "exclusive dealing" involves an agreement between a seller and a buyer where the buyer agrees to purchase only the seller's product and refrains from doing business with the seller's competitors. *Allied Orthopedic, 592 F.3d at 996*; *see* Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961). A firm **[*916]** might, for instance, offer discounts or rebates that are conditioned on exclusivity. *See, e.g.,* United Shoe Machinery Corp. v. United States, 258 U.S. 451, 457, 42 S. Ct. 363, 66 L. Ed. 708 (1922); *see also* Aerotec, 836 F.3d at 1182. Section 2 is implicated when a seller has monopoly power, and its exclusive dealing arrangements prevent the seller's rivals from competing. *Allied Orthopedic, 592 F.3d at 996*.

But even without an explicit **[**24]** agreement of exclusivity, a monopolist can violate *section 2* by entering arrangements that have the "practical effect" of preventing buyers from doing business with the monopolist's competitors. *Tampa Electric, 365 U.S. at 327*; *see, e.g.,* United Shoe, 258 U.S. at 457. For example, quantity discount programs can amount to exclusive dealing when they are "extreme." *See* Aerotec, 836 F.3d at 1181; *see also* Allied Orthopedic, 592 F.3d at 996-97. Such arrangements are commonly called "de facto" exclusive dealing.

See, e.g., *Aerotec, 836 F.3d at 1182*; 14 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶¶ 1800a3, 1807a (4th ed. 2019).[3]

The Ninth Circuit has articulated a couple of principles for assessing whether a contract is "exclusive." First, "the short duration and easy terminability of [] agreements negate substantially their potential to foreclose competition" because "a competing manufacturer need only offer a better product or a better deal" to get its own contracts. *Omega Environmental, Inc. v. Gilbarco, Inc., 127 F.3d 1157, 1164 (9th Cir. 1997)*. Second, "exclusive dealing arrangements imposed on distributors rather than end-users are generally less cause for anticompetitive concern" because "[i]f competitors can reach the ultimate consumers of the product by employing existing or potential alternative channels of distribution, it is unclear whether [exclusive **[**25]** dealing arrangements] foreclose from competition any part of the relevant market." *Id. at 1162-63*; *see also* *PNY Technologies, Inc. v. SanDisk Corp., 2014 U.S. Dist. LEXIS 58108, 2014 WL 1677521, at *4 (N.D. Cal. Apr. 25, 2014)*; *Church & Dwight Co., Inc. v. Mayer Laboratories, Inc., 868 F. Supp. 2d 876, 903 (N.D. Cal. 2012)*, *vacated in part on other grounds*, *2012 U.S. Dist. LEXIS 68681, 2012 WL 1745592 (N.D. Cal. May 16, 2012)*.

But it is not enough for an exclusive arrangement—de facto or explicit—to foreclose competition in some relatively inconsequential portion of the market. To rise to the level of a *section 2* violation, an arrangement must "substantially" foreclose market opportunities for the monopolist's competitors. *Allied Orthopedic, 592 F.3d at 996*; *Qualcomm, Inc., 969 F.3d at 1003*. "That is to say, the opportunities for other traders to enter into or remain in that market must be significantly limited . . . ." *Tampa Electric, 365 U.S. at 328*. To determine whether foreclosure is "substantial," courts "weigh the probable effect of the contract **[*917]** on the relevant area of effective competition, taking into account the relative strength of the parties, the proportionate volume of commerce involved in relation to the total volume of commerce in the relevant market area, and the probable immediate and future effects which pre-emption of that share of the market might have on effective competition therein." *Id. at 329*; *see also* *Twin City, 676 F.2d at 1298, 1304* (holding that a contract restricting as little as 24% of the relevant market resulted in a cognizable foreclosure under section 1, which typically requires a higher level **[**26]** of foreclosure than *section 2*); *CollegeNet, Inc. v. Common Application, Inc., 355 F. Supp. 3d 926, 952-53 (D. Or. 2018)* (noting that, under *section 2*, foreclosing about 30% of the market suffices as substantial).

As a preliminary matter, the plaintiffs' allegations regarding Align's Advantage Program do not add anything to their antitrust theory. As described in the complaint, the program is essentially a system for providing short-term (one year) volume discounts. Simply alleging that "dental practices must maintain a very high prescribing level of Invisalign in order to offer competitive prices to patients" is insufficient to raise an inference that the arrangement amounts to an "extreme" quantity discount or is otherwise anticompetitive. *See* *Allied Orthopedic, 592 F.3d at 997*. Accordingly, the program (at least as alleged) does not contribute to the plaintiffs' *section 2* claim.

The DSO contracts with Aspen Dental and Heartland Dental, on the other hand, raise antitrust concerns. They can be understood as requirement contracts: Align contracted with the DSOs to fill their aligner and scanner needs entirely across multiple years, and the DSOs agreed to work exclusively with Align. DSO-member practices rely on their DSO to procure supplies. While not spelled out by the complaint, one can reasonably infer from the allegations that **[**27]** it is difficult for a member practice to contract outside its DSO to buy unsupported products. Accordingly, if these DSOs are only offering Align's aligner and scanner, as the complaint alleges, their member practices only

[3] It's not clear that arrangements involving an aggregation of discounts across multiple related products raise exclusive dealing concerns. *See* ***Cascade Health, 515 F.3d at 909***. *But see* Areeda & Hovenkamp, *supra* ¶ 1807b2. Nevertheless, such multiproduct discounts can raise antitrust concerns when they exclude equally efficient rivals that produce only one competing product because the rivals would have to give a much larger discount to compensate customers for the forsaken discount on products that they do not sell. Areeda & Hovenkamp, *supra* ¶ 1807b2; *see* ***Cascade Health, 515 F.3d at 909*** ("[T]he primary anticompetitive danger posed by a multiproduct bundled discount is that such a discount can exclude a rival who is equally efficient at producing the competitive product simply because the rival does not sell as many products as the bundled discounter."); *see also LePage's, Inc. v. 3M*, *324 F.3d 141 (3d Cir. 2003)* (en banc), *cert. denied*, ***542 U.S. 953, 124 S. Ct. 2932, 159 L. Ed. 2d 835 (2004)***.

have meaningful access to Align's aligner and scanner. *See* Pro Search Plus, LLC v. VFM Leonardo Inc., 2013 U.S. Dist. LEXIS 169856, 2013 WL 6229141, at *6 (C.D. Cal. Dec. 2, 2013).

The Fusion Program also raises antitrust concerns: Align's discount on its iTero scanner (tied to Invisalign purchases) means that equally efficient aligner manufacturers may find it impossible to compensate for a lost iTero discount since they do not produce scanners. *See Cascade Health, 515 F.3d at 909* ("[T]he primary anticompetitive danger posed by a multiproduct bundled discount is that such a discount can exclude a rival who is equally efficient at producing the competitive product simply because the rival does not sell as many products as the bundled discounter."). The plaintiffs allege rival aligner companies cannot compete because they would have to offer below-cost aligner prices to offset a forsaken iTero discount. The plaintiffs also allege that the program has left 3Shape in a difficult position. Matching iTero's discounted price would allegedly require 3Shape to sacrifice a third of its revenue. Thus, 3Shape's Trios is not **[**28]** only tied to less desirable aligners but also is more expensive.

Both contracts must also be understood in light of the allegations describing the nature of scanner and aligner purchases. According to the complaint, scanners are large capital investments that last several years and do not lend themselves to a second purchase—especially not from a different company. Thus, at this stage, it is safe to assume that those in the Fusion Program as well as DSO-member dental **[*918]** practices will not soon purchase 3Shape's Trios and therefore will be unable to order anything but Invisalign. Furthermore, while both programs operate on dental practices rather than aligner end-users (patients ordering aligners from their dentists), anticompetitive concerns remain because the complaint suggests that aligner companies do not sell to individuals directly: dentists appear to be the only channel for distribution. Accordingly, considered in their totality, the plaintiffs' allegations—combined with a series of inferences in their favor—suggest that both contracts stifle competition and commit dental practices to a monopolist's products.

Nevertheless, the allegations about these arrangements—even considered together—do **[**29]** not state a section 2 claim on their own. As discussed throughout this ruling, the complaint omits information in some areas, and is vague in other areas. Moreover, although the complaint portrays both the DSO contracts and the Fusion Program as exclusive (a conclusion that seems dubious as to the latter), it does not adequately allege that foreclosure of market opportunity for competitors is "substantial" within the meaning of antitrust doctrine. One might speculate that the DSO contracts have a meaningful impact in the scanner market given that Heartland Dental and Aspen Dental are two of the nation's largest DSOs and given that just one of the contracts "represents the industry's single-largest scanner deployment." Indeed, the complaint alleges that the contracts enabled Align to rapidly increase its market share in the scanner market, thereby pushing out 3Shape. One might also assume that the Fusion Program's incentives for dental practices to buy iTero and order Invisalign would cause a significant decline in 3Shape's market share. And with a decline in the major mode of production for other aligners, one might expect the market share of competing aligner companies to fall as well. The **[**30]** plaintiffs' allegations that various other aligner manufacturers have attempted but failed to gain a foothold in the aligner market support such an assumption. But neither the high-level allegations regarding the impressive nature of the DSO scanner deployments nor the vague allegations regarding rapid increases or decreases in market shares are sufficient for inferring that the foreclosure is in fact *substantial*. For example, the complaint does not even estimate the percentage of the market represented by Heartland Dental and Aspen Dental. Thus, the exclusive dealing allegations cannot be understood as a section 2 violation on their own. Instead, they are best understood as combining with the refusal-to-deal allegations to make a strong overall section 2 claim in both the scanner and aligner markets. *But see* 3Shape Trios A/S v. Align Technology, Inc., 2020 U.S. Dist. LEXIS 221845, 2020 WL 6938054, at *2 (D. Del. Nov. 25, 2020) (holding that a similar complaint adequately alleged that the DSO contracts resulted in substantial foreclosure).

B

To state a federal antitrust claim, a plaintiff must allege "loss or damage 'of the type the antitrust laws were designed to prevent and that flows from that which makes defendants' acts unlawful.'" Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 113, 107 S. Ct. 484, 93 L. Ed. 2d 427 (1986) (quoting Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)). In general, "[a]ntitrust injury requires the plaintiff to have suffered **[**31]** its injury in the market where competition is being restrained." American Ad Management, Inc. v. General Telephone Co. of California, 190 F.3d 1051, 1057 (9th Cir. 1999). The plaintiffs allege that they suffered injury by paying overcharges when they purchased Invisalign and iTero at prices inflated by Align's scheme, but **[*919]** Align contends that their allegations are inadequate for pleading injury in both the aligner and scanner markets.

1. Injury in the aligner market. Align stresses that, absent basic details about the timing of the plaintiffs' aligner purchases, the complaint fails to plausibly allege that the plaintiffs suffered injury from the scheme. According to Align, since part of the class period predates the allegedly anticompetitive scheme, there is a possibility that the plaintiffs' Invisalign orders occurred before prices were artificially inflated. But the complaint states that the dental practices regularly purchased Invisalign throughout the class period, which extends until today. Especially given the complaint's allegations regarding the prominence of Invisalign and its allegations that both dental practices own iTero scanners, it is easy to infer that City Smiles and VIP Dental Spas ordered Invisalign during the alleged scheme.

2. Injury in the scanner market. According **[**32]** to the complaint, City Smiles purchased an iTero scanner during the class period at an artificially inflated price, and VIP Dental Spas purchased an iTero scanner from Align in 2018, also at a price that was artificially high. Align submits extrinsic evidence to dispute these allegations. First, it submits City Smiles's iTero purchase contract to show that the purchase occurred before Align's allegedly anticompetitive conduct began. Second, Align submits an iTero purchase agreement between someone called "Sherwin Matian" and Align. Matian is the sole shareholder of VIP Dental Spas. Align argues that, while Matian (as an individual) purchased an iTero, VIP Dental Spas did not. Align contends that these purchase agreements are incorporated by reference because the plaintiffs' claims depend on their purchasing an iTero at an inflated price, and neither plaintiff has disputed the documents' authenticity.

Align is correct that the Court can consider the contracts, but they only defeat the allegations of antitrust injury in the scanner market as to City Smiles, not VIP Dental Spas. The complaint does not explicitly mention the contracts, but the plaintiffs' scanner claim "depends on" a valid **[**33]** antitrust injury—indeed, that's a required element of a *section 2* claim. The plaintiffs allege that their scanner injury arose from purchasing an iTero scanner directly from Align at an inflated price, and they have not disputed the authenticity of the documents. *See, e.g., Knievel v. ESPN, 393 F.3d 1068, 1076-77 (9th Cir. 2005)*; *see also Khoja v. Orexigen Therapeutics, Inc., 899 F.3d 988, 1002 (9th Cir. 2018)*; *U.S. v. Ritchie, 342 F.3d 903, 907 (9th Cir. 2003)*. Since City Smiles purchased its iTero scanner in 2016—before the alleged anticompetitive conduct began—that conduct could not have inflated the price of City Smiles's iTero. The plaintiffs do not argue otherwise. But for VIP Dental Spas, the name on Align's purchase agreement does not alone establish that VIP Dental Spas is an improper plaintiff. As a practical matter, that VIP Dental Spas's sole owner, Matian, is listed on the agreement seems immaterial—one might imagine that small business owners regularly purchase items on behalf of their business. Relatedly, as a legal matter, it seems quite plausible—and Align does not dispute—that Matian purchased the scanner as an agent for the corporation, giving VIP Dental Spas antitrust standing as a direct purchaser. *In re Cathode Ray Tube (CRT) Antitrust Litigation, 2016 U.S. Dist. LEXIS 102408, 2016 WL 7805628, at *14-15 (N.D. Cal. Aug. 4, 2016)*.

Accordingly, Align's arguments regarding antitrust injury do not require dismissal of either defendant. Both dental practices have adequately alleged **[**34]** antitrust injury in their purchase of aligners, and one of them has adequately alleged antitrust injury in its purchase of a scanner.

[*920] III

The motion to dismiss is denied. Align must file an answer within 14 days. The case management conference scheduled for April 21 is continued until May 12, 2021, and an updated joint case management statement is due 7 days before the conference.

IT IS SO ORDERED.

HN1[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

Normally, when lawsuits settle the defendant pays the plaintiff. That makes sense as the defendant is the party accused of wrongdoing. But when a generic drug is poised to enter the market and threaten the monopoly enjoyed by a brand-name pharmaceutical, federal law can incentivize a different type of settlement. The Hatch-Waxman Act delays the entry of the generic drug if the brand-drug manufacturer files a patent infringement suit against the generic. Those patent suits are sometimes settled with the brand-drug plaintiff paying the allegedly-infringing generic. In return for the payment, the generic agrees to delay its market entry beyond the date when the FDA would allow it to compete. The result is an extension of the brand drug's monopoly.

HN3[] Defenses, Experimental Use & Testing

To bring competition to the drug market, the Hatch-Waxman Act promotes entry for generics. Rather than undergoing the lengthy and costly approval process that a new drug faces, generics can file an Abbreviated New Drug Application with the Food and Drug Administration. *21 U.S.C.S. § 355(j)*. If the generic drug is biologically equivalent to a brand drug the FDA has already approved, then the generic can essentially piggy-back on the pioneer's approval efforts. *21 U.S.C.S. § 355(j)(2)(A)(i)-(iv)*. The Act offers an additional carrot to the first generic applicant: it can market its generic drug for 180 days without competition from any other generic manufacturer. *21 U.S.C.S. § 355(j)(5)(B)(iv)*.

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Experimental Use & Testing

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

Business & Corporate Compliance > ... > Infringement Actions > Infringing Acts > Making & Manufacturing Infringement

HN4[] Defenses, Experimental Use & Testing

If the brand manufacturer asserts a patent in its initial drug application, then the generic manufacturer must certify in its application that the patent is invalid or that its drug will not infringe the patent. *21 U.S.C.S. § 355(j)(2)(A)(vii)(IV)*. If the brand manufacturer disagrees (it likely will), it may file a patent infringement suit. *35 U.S.C. § 271(e)(2)(A)*. And if it does so within 45 days, the FDA is stayed from approving the generic application until either 30 months have passed or the patent litigation concludes. *21 U.S.C. § 355(j)(5)(B)(iii)*. This delay for the first generic's entry also postpones the potential entry of other generics. They must wait for the same 30-month stay and then for the expiration of the first generic's 6-month exclusivity period before entering the market.

Patent Law > Infringement Actions > Defenses > Statute of Limitations

HN5[] Defenses, Statute of Limitations

If the patent suit against the first generic settles, the brand manufacturer no longer faces an immediate threat of competition from new generic entrants. The 30-month statutory stay restarts if the brand maker brings a patent suit against another generic that wishes to enter the market. *21 U.S.C.S. § 355(j)(5)(B)(iii)*. Plus, any subsequent generic is not entitled to the exclusivity period.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Federal Food, Drug & Cosmetic Act

Trademark Law > ... > Infringement Actions > Defenses > Genericness

HN6[] **Agriculture & Food, Federal Food, Drug & Cosmetic Act**

The features of the Hatch-Waxman Act—the period of exclusivity for the first generic; the 30-month stay of the generic's FDA application when the brand maker sues for infringement; and the reduced incentive a subsequent generic has to challenge the brand maker's patent—can lead the brand maker to pay large sums for delaying entry of the first generic maker.

Administrative Law > Judicial Review > Standards of Review > De Novo Standard of Review

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN7[] **Standards of Review, De Novo Standard of Review**

Courts review the FTC's ruling, not the administrative law judges. Any legal conclusions are reviewed de novo, though the courts are to give some deference to the FTC's informed judgment that a particular commercial practice is to be condemned as unfair.

Administrative Law > Judicial Review > Standards of Review > Substantial Evidence

HN8[] **Standards of Review, Substantial Evidence**

The findings of the FTC as to the facts, if supported by evidence, shall be conclusive. *15 U.S.C.S. § 45(c)*. That statutory command is essentially identical to the substantial-evidence standard that often governs judicial review of agency factfinding. Substantial evidence is such relevant evidence as a reasonable mind might accept as adequate to support a conclusion. Courts must accept findings supported by such evidence even if suggested alternative conclusions may be equally or even more reasonable and persuasive. This deferential review should be no more searching than if they were evaluating a jury's verdict.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN9[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

A reverse payment settlement is a settlement of patent litigation in which the patentholder gives the alleged infringer cash or other valuable services or property and the alleged infringer agrees not to market its allegedly infringing product until some later date. These horizontal agreements unlawfully restrain trade, *15 U.S.C.S. § 1*, if they cause anticompetitive effects that outweigh any procompetitive benefits.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN10[] Per Se Rule Tests, Manifestly Anticompetitive Effects

The rule-of-reason inquiry uses a burden-shifting framework. The initial burden is on the FTC to show anticompetitive effects. If the FTC succeeds in doing so, the burden shifts to a competitor to demonstrate that the restraint produced procompetitive benefits.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN11[] Per Se Rule Tests, Manifestly Anticompetitive Effects

If the FTC fails to demonstrate a less restrictive alternative way to achieve the procompetitive benefits, the court must balance the anticompetitive and procompetitive effects of the restraint. If the anticompetitive harms outweigh the procompetitive benefits, then the agreement is illegal.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN12[] Per Se Rule Tests, Manifestly Anticompetitive Effects

In an antitrust context, the first question is whether the agreement caused anticompetitive effects or created the potential for anticompetitive effects. Such effects may be proved indirectly, with proof of market power plus some evidence that the challenged restraint harms competition.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN13[] Per Se Rule Tests, Manifestly Anticompetitive Effects

Anticompetitive effects are those that harm consumers. Eliminating potential competition is, by definition, anticompetitive. Indeed, paying a potential competitor not to compete is so detrimental to competition that normally it is a per se violation of the antitrust laws.

Trademark Law > ... > Infringement Actions > Defenses > Genericness

HN14[] **Defenses, Genericness**

A brand maker's paying a generic to delay entry in effect amounts to a purchase by the patentee of the exclusive right to sell its product, a right it already claims, but would lose if the patent litigation were to continue and the patent were held invalid or not infringed by the generic product.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN15[] **Inequitable Conduct, Anticompetitive Conduct**

If a patent is valid, then unlike traditional market allocation agreements, a settlement that allows generic entry after the FDA's approval of the drug but still earlier than the patent expiration date may result in more competition than would have existed absent the settlement.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN16[] **Inequitable Conduct, Anticompetitive Conduct**

The likelihood of a reverse payment bringing about anticompetitive effects depends upon its size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification.

Civil Procedure > ... > Costs & Attorney Fees > Attorney Fees & Expenses > Reasonable Fees

HN17[] **Attorney Fees & Expenses, Reasonable Fees**

A large reverse payment might be justified if it represents avoided litigation costs or fair value for services.

Patent Law > ... > Specifications > Definiteness > Precision Standards

HN18[] **Definiteness, Precision Standards**

The size of the unexplained reverse payment can provide a workable surrogate for a patent's weakness, all without forcing a court to conduct a detailed exploration of the validity of the patent itself.

Torts > Wrongful Death & Survival Actions > Survival Actions

HN19[] **Wrongful Death & Survival Actions, Survival Actions**

A large reverse payment itself would normally suggest that the patentee has serious doubts about the patent's survival.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN20[] **Standing, Requirements**

A large and unjustified reverse-payment can show that the parties perceived weakness with the patent that would have made earlier entry likely. And that fact, in turn, suggests that the payment's objective is to maintain supracompetitive prices to be shared among the patentee and the challenger rather than face what might have been a competitive market—the very anticompetitive consequence that underlies the claim of antitrust unlawfulness.

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

HN21[] **Inequitable Conduct, Anticompetitive Conduct**

It is a basic antitrust principle that the impact of an agreement on competition is assessed as of the time it was adopted. That approach also makes sense in reverse payment cases.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN22[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

A restraint is unreasonable when any procompetitive benefits it produces could be reasonably achieved through less anticompetitive means.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN23[] **Tying Arrangements, Sherman Act Violations**

The less-restrictive-alternative standard applies across a range of antitrust claims and is included in model antitrust jury instructions. The idea is that it is unreasonable to justify a restraint of trade based on a purported benefit to competition if that same benefit could be achieved with less damage to competition.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN24[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Focusing on the existence of less restrictive alternatives may allow courts to avoid difficult balancing of anticompetitive and procompetitive effects and to smoke out anticompetitive effects or pretextual justifications for the restraint. When a less restrictive alternative exists, a party's decision to nonetheless engage in conduct that harms consumers likely results from a desire to gain from the resulting consumer harm. The question, in short, is whether the good could have been achieved equally well with less bad.

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN25[] **Standards of Review, Questions of Fact & Law**

In an anti-trust context, the existence of a viable less restrictive alternative is ordinarily a question of fact.

Evidence > Burdens of Proof > Allocation

HN26[] **Burdens of Proof, Allocation**

But leading scholars have recognized that other parties' actual experience in analogous situations can help establish the feasibility or practicality of a less restrictive alternative.

Civil Procedure > Settlements > Settlement Agreements > Validity of Agreements

HN27[] **Settlement Agreements, Validity of Agreements**

In the context of the less-restrictive-alternative, the question is whether there was evidence that would allow a reasonable factfinder to conclude that a no-payment settlement was feasible.

Opinion by: GREGG COSTA

Opinion

[*487] GREGG COSTA, *Circuit Judge*:

HN1[] Normally, when lawsuits settle the defendant pays the plaintiff. That makes sense as the defendant is the party accused of wrongdoing.

But when a generic drug is poised to enter the market and threaten the monopoly enjoyed by a brand-name pharmaceutical, federal law can incentivize a different type of settlement. **[**3]** The Hatch-Waxman Act delays the entry of the generic drug if the brand-drug manufacturer files a patent infringement suit against the generic. Those patent suits are sometimes settled with the brand-drug plaintiff paying the allegedly-infringing generic. In return for the payment, the generic agrees to delay its market entry beyond the date when the FDA would allow it to compete. The result is an extension of the brand drug's monopoly.

Given the counterintuitive flow of money in this scenario—to, rather than **[*488]** from, the alleged wrongdoer—such deals are called "reverse payment settlements." The Supreme Court has held that these settlements that extend the brand drug's monopoly can have anticompetitive effects that violate the antitrust laws. *FTC v. Actavis, 570 U.S. 136, 158, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*. ***HN2***[] Reverse payment settlements, however, are not automatically invalid; they are subject to the rule of reason. *Id. at 159*.

In its first post-*Actavis* reverse payment case, the Federal Trade Commission charged Impax Laboratories with antitrust violations for accepting payments ultimately worth more than $100 million to delay the entry of its generic drug for more than two years. The resulting administrative hearing included testimony from 37 witnesses and over **[**4]** 1,200 exhibits. Based on that record, the Commission conducted a rule-of-reason analysis and unanimously concluded that Impax violated ***antitrust law***.

On appeal, we face a narrower task: determining whether the Commission committed any legal errors and whether substantial evidence supported its factual findings. Concluding that the Commission's ruling passes muster on both fronts, we DENY the petition for review.

I.

A.

Anyone who buys pharmaceuticals knows that generic drugs are cheaper than their brand counterparts. The first generic to enter the market typically costs 10 to 25 percent less than the branded drug; those discounts grow to between 50 and 80 percent once other generics enter.

HN3[] To bring competition to the drug market, the Hatch-Waxman Act promotes entry for these generics. *Actavis, 570 U.S. at 142*. Rather than undergoing the lengthy and costly approval process that a new drug faces, generics can file an Abbreviated New Drug Application with the Food and Drug Administration. *Id. at 142*; *21 U.S.C. § 355(j)*. If the generic drug is biologically equivalent to a brand drug the FDA has already approved, then the generic can essentially "piggy-back on the pioneer's approval efforts." *Actavis, 570 U.S. at 142*; *21 U.S.C. § 355(j)(2)(A)(i)-(iv)*. The Act offers an additional carrot to the first **[**5]** generic applicant: it can market its generic drug for 180 days without competition from any other generic manufacturer. *Actavis, 570 U.S. at 143-44*; *21 U.S.C. § 355(j)(5)(B)(iv)*. During this period of exclusivity, the newly approved generic only faces competition from the brand drug or a generic sold by the brand manufacturer. *Actavis, 570 U.S. at 143-44*. In effect, the statute allows a duopoly during those 180 days. A first-to-file generic often realizes most of its profits, potentially "several hundred million dollars," during this initial six-month period. *Id. at 143* (quoting C. Scott Hemphill, *Paying for Delay: Pharmaceutical Patent Settlement as a Regulatory Design Problem*, *81 N.Y.U. L. Rev. 1553, 1579 (2006)*).

Generic entry is not so easy when there is a patent for the brand drug. The Hatch-Waxman Act also addresses this common situation. ***HN4***[] If the brand manufacturer asserts a patent in its initial drug application, then the generic manufacturer must certify in its application that the patent is invalid or that its drug will not infringe the patent. *21 U.S.C. § 355(j)(2)(A)(vii)(IV)*. If the brand manufacturer disagrees (it likely will), it may file a patent infringement suit. *35 U.S.C. § 271(e)(2)(A)*. And if it does so within 45 days, the FDA is stayed from approving the generic application until either 30 months have passed or the patent **[*489]** litigation concludes. **[**6]** *21 U.S.C. § 355(j)(5)(B)(iii)*; *see also* *Actavis, 570 U.S. at 143* (describing these procedures). This delay for the first generic's entry also postpones the potential entry of other generics. They must wait for the same 30-month stay and then for the expiration of the first generic's 6-month exclusivity period before entering the market.

What happens if the patent suit against the first generic settles? The brand manufacturer no longer faces an immediate threat of competition from new generic entrants. ***HN5***[] The 30-month statutory stay restarts if the brand maker brings a patent suit against another generic that wishes to enter the market. *Actavis, 570 U.S. at 155* (citing *21 U.S.C. § 355(j)(5)(B)(iii)*). Plus, any subsequent generic is not entitled to the exclusivity period. *Id.* That greatly reduces the potential benefit of challenging the brand maker's patent. *Id.* (noting that subsequent generics "stand to win significantly less than the first if they bring a successful" challenge to the patent).

HN6[] These features of the Hatch-Waxman Act—the period of exclusivity for the first generic; the 30-month stay of the generic's FDA application when the brand maker sues for infringement; and the reduced incentive a subsequent generic has to challenge the brand maker's patent—can lead the brand maker to pay **[**7]** large sums for delaying entry of the first generic maker. *Actavis, 570 U.S. at 155* (recognizing that these Hatch-Waxman "features together mean that a reverse payment settlement with the first filer . . . 'removes from consideration the most motivated challenger, and the one closest to introducing competition'" (quoting Hemphill, *Paying for Delay, supra, at 1586*)).

B.

The facts of this case show those incentives in action. The drug at issue is a type of oxymorphone, which is an opioid. Endo, the brand-name drug maker in this case, started selling an extended-release formulation of oxymorphone called Opana ER in 2006. An extended-release pain reliever provides medication to the bloodstream over several hours, as opposed to immediate-release opioids which are short-acting. When it entered the market, Opana ER was the only extended-release version of oxymorphone.

In late 2007, Impax filed the first application to market generic extended-release oxymorphone. The application did not result in prompt approval of the generic, however, because Endo held patents for Opana ER that would not expire until 2013. Endo sued Impax for patent infringement in January 2008, delaying any FDA approval of the generic for 30 months—until June 2010—unless the litigation **[**8]** concluded earlier.

Early settlement talks failed, with Endo rejecting Impax's proposed entry dates of January 2011, July 2011, December 2011, or January 2012.

The June 2010 expiration of the Hatch-Waxman stay loomed. Delaying Impax's entry beyond the stay period would save Endo millions. Endo had projected that generic entry would cut Opana ER sales by 85 percent within three months and cost it $100 million in revenue within six months.

But extending the period in which it could sell Opana ER without competition was just one of Endo's priorities. The drug maker had something else in the works: It planned to move consumers to a new brand-name drug that would not face competition for years. Endo would remove the original Opana ER from the market, replace **[*490]** it with a crush-resistant version of the drug, and obtain new patents to protect the reformulated drug. While Impax's generic would still eventually reach the market, it would not be therapeutically equivalent to Endo's new branded drug and thus pharmacists would not be able to automatically substitute the generic when filling prescriptions. This automatic substitution of brand drug prescriptions, promoted by state laws, is the primary **[**9]** driver of generic sales. So, if Endo succeeded in switching consumers to its reformulated drug, which would be just different enough from the original formulation to preclude substitution, the market for Impax's generic would shrink dramatically, preserving Endo's monopoly profits.

The success of this "product hop"[1] depended on the reformulated Opana ER reaching the market sufficiently in advance of Impax's generic entry to allow patients to move away from the original drug before pharmacists started substituting the generic version. This transition period to the reformulated drug would take roughly six to nine months. A successful transition to the reformulated Opana ER before generic entry would mean millions to Endo. The company projected that the reformulated Opana ER would generate about $200 million in annual sales by 2016 if the market transitioned to the new drug before the generic entered. But if the generic launched first, then 2016 sales of the new formulation would fall to $10 million.

The date when Impax could start selling its generic was thus critical. The FDA tentatively approved Impax's application in May **[**10]** 2010. The Hatch-Waxman stay would expire the next month. There were signs that Impax was planning to launch its generic soon thereafter.[2]

With the possible launch date for generic entry imminent, Endo restarted settlement negotiations just three days after the FDA's tentative approval of the generic. The parties settled the patent litigation in June 2010, just a few days after the patent trial began and less than a week before the FDA fully approved Impax's application.

C.

Under the settlement, Impax agreed to delay launching its generic until January 1, 2013—two and a half years after Impax otherwise could have entered "at-risk." In turn, Endo agreed to not market its own generic version of extended-release oxymorphone until Impax's 180-day Hatch-Waxman exclusivity period concluded in July 2013. Additionally, Endo agreed to pay Impax a credit if sales revenues for the original formulation of Opana ER fell by more than 50 percent between the dates of settlement and Impax's entry. This credit served as an insurance policy for Impax, preserving the value of the settlement in case Endo undermined the generic oxymorphone market by transitioning consumers to the reformulated Opana ER. Endo **[**11]** also provided Impax with a broad license to Endo's existing and future patents covering extended-release oxymorphone. Finally, Endo and Impax agreed to collaboratively develop a new Parkinson's disease treatment, with Endo **[*491]** paying Impax $10 million immediately and up to $30 million in additional payments contingent on achieving sufficient development and marketing progress.

Impax's delayed entry allowed Endo to execute the product hop. In March 2012, Endo introduced its reformulated drug and withdrew the original drug. It publicly stated that the original drug was unsafe, though the FDA later disagreed that safety concerns motivated the withdrawal. Predictably, the market for the original Opana ER shriveled. So Endo had to pay Impax $102 million in credits. Endo subsequently succeeded in securing additional patents, and in 2015 and 2016 secured injunctions that prevented all manufacturers, including Impax, from

---

[1] Product hopping can itself be anticompetitive. *See generally* *New York ex rel. Schneiderman v. Actavis PLC, 787 F.3d 638, 643 & n.2, 652-59 (2d Cir. 2015)*; Alan Devlin, *Exclusionary Strategies in the Hatch-Waxman Context*, *2007 Mich. St. L. Rev. 631, 657 - 673* (crediting Professor Hovenkamp with the "product hop" term).

[2] If Impax entered the market before resolution of the patent litigation, it would risk paying any damages for its sales in the event Endo later proved infringement. This is called "at risk" entry. *See* *In re Lipitor Antitrust Lit., 868 F.3d 231, 241 (3d Cir. 2017)*.

marketing generic versions of the reformulated drug. But in 2017, the FDA asked Endo to voluntarily withdraw the reformulated Opana ER from the market due to safety concerns, and it did.

For its part, Impax began marketing original formulation generic oxymorphone in January 2013, **[**12]** despite the damaged market Endo left behind. Because of the injunctions Endo secured against other generics and because Endo eventually withdrew the reformulated Opana ER from the market, Impax's generic is the only extended-release oxymorphone available to consumers today.

D.

The FTC brought separate actions against Endo and Impax alleging that the settlement was an unfair method of competition under the FTC Act and an unreasonable restraint on trade under the Sherman Act. Endo settled. Impax fought the charge and successfully argued that the case should proceed in an administrative proceeding rather than in federal district court where the Commission had first filed.

An administrative law judge determined that the agreement restricted competition but was nevertheless lawful because its procompetitive benefits outweighed the anticompetitive effects. Reviewing both the facts and law *de novo*, *16 C.F.R. § 3.54(a)*, the Commission reached a different conclusion. It found that Impax had failed to show that the settlement had any procompetitive benefits. Moreover, it determined that the purported benefits Impax identified could have been achieved through a less restrictive agreement. The Commission did not impose **[**13]** any monetary sanctions. It did not even invalidate Impax's agreements with Endo or other drug makers. Instead, it issued a cease-and-desist order enjoining Impax from entering into similar reverse payment settlements going forward.

Impax now petitions for review of the FTC's order.

II.

HN7[] We review the Commission's ruling, not the ALJ's. *N. Tex. Specialty Physicians v. FTC, 528 F.3d 346, 354 (5th Cir. 2008)*; *cf.* *Shaikh v. Holder, 588 F.3d 861, 863 (5th Cir. 2009)* (noting that we review the decision of the BIA in immigration cases). DAVIS, FEDERAL STANDARDS OF REVIEW § 15.04 (same); Robert L. Stern, *Review of Findings of Administrators, Judges and Juries: A Comparative Analysis*, 58 HARV. L. REV. 70, 84-86 (1944) (analyzing Justice Jackson's opinion in *Pace*).

III.

HN9[] A reverse payment settlement is a settlement of patent litigation in which the patentholder gives the alleged infringer cash or other valuable services or property and the alleged infringer agrees not to market its allegedly infringing product until some later date. *See* *Actavis, 570 U.S. at 140*. These horizontal agreements unlawfully restrain trade, *see* 15 U.S.C. § 1, if they cause anticompetitive effects that outweigh any procompetitive benefits.[3] *See* Actavis, 570 U.S. at 156-59.

HN10[] This rule-of-reason inquiry uses a burden-shifting framework. *See* Ohio v. Am. Express, 138 S. Ct. 2274, 2284, 201 L. Ed. 2d 678 (2018). The initial burden is on the FTC to show anticompetitive effects. *Id.* If the FTC succeeds in doing so, the burden shifts to Impax to demonstrate that the restraint produced procompetitive benefits. *Id.* If Impax successfully proves procompetitive benefits, then the FTC can demonstrate that any procompetitive effects could be **[**15]** achieved through less anticompetitive means. *Id.* **HN11**[] Finally, if the FTC fails to demonstrate a less restrictive alternative way to achieve the procompetitive benefits, the court must balance the anticompetitive and procompetitive effects of the restraint. *Apani Sw., Inc. v. Coca-Cola Enters., Inc., 300 F.3d 620, 627 (5th Cir. 2002)*. If the anticompetitive harms outweigh the procompetitive benefits, then the agreement is illegal. *Id.*

A.

HN12[] The first question is whether the agreement caused anticompetitive effects or "created the potential for anticompetitive effects." *Doctor's Hosp. of Jefferson, Inc. v. Se. Med. All., Inc., 123 F.3d 301, 310 (5th Cir. 1997)*; *accord* *Retractable Techs, Inc. v. Becton Dickinson & Co., 842 F.3d 883, 895 (5th Cir. 2016)* (noting that an antitrust plaintiff must show that a restraint "had the potential to eliminate, or did in fact eliminate, competition"); *see also* *Actavis, 570 U.S. at 157* (noting that the "relevant anticompetitive harm" of a reverse payment settlement is "prevent[ing] the risk of competition"). Such effects may be proved "indirectly," with "proof of market power **[*493]** plus some evidence that the challenged restraint harms competition."[4] *Am. Express Co., 138 S. Ct. at 2284*.

Anticompetitive effects are those that harm consumers. Think increased prices, decreased output, or lower quality goods. *Id.* **HN13**[] Eliminating potential competition is, by definition, anticompetitive. *See, e.g.*, *United States v. Falstaff Brewing Corp., 410 U.S. 526, 532-33, 93 S. Ct. 1096, 35 L. Ed. 2d 475 (1973)* (acquiring potential competitor was anticompetitive both because of current **[**16]** pressure of potential entry and potentially beneficial effects of future entry). Indeed, paying a potential competitor not to compete is so detrimental to competition that normally it is a *per se* violation of the antitrust laws. *See* *Palmer v. BRG of Ga., Inc., 498 U.S. 46, 48-49, 111 S. Ct. 401, 112 L. Ed. 2d 349 (1990)*; *see also* *Blue Cross & Blue Shield United of Wis. v. Marshfield Clinic, 65 F.3d 1406, 1415 (7th Cir. 1995)* (Posner, C.J.) (suggesting that market allocation agreements are even more pernicious than price-fixing agreements because the former eliminates all forms of competition); Joshua P. Davis & Ryan J. McEwan, *Deactivating Actavis: The Clash Between the Supreme Court and (Some) Lower Courts, 67 Rutgers U.L. Rev. 557, 559 (2015)* (calling "an agreement between horizontal competitors not to compete, the *bête noir* of ***antitrust law***").

Actavis concluded that, in contrast to the typical horizontal agreement to divvy up markets, reverse payment settlements might produce both anti-and procompetitive effects. **HN14**[] On the one hand, a brand maker's paying a generic to delay entry "in effect amounts to a purchase by the patentee of the exclusive right to sell its product, a right it already claims but would lose if the patent litigation were to continue and the patent were held invalid or not infringed by the generic product." *570 U.S. at 153-54*. In fact, reverse payment settlements may restrict competition even more than typical market allocation agreements because delaying entry of the first generic **[**17]** does not just eliminate one competitor—it prolongs the "bottleneck" that delays entry of other generic competitors. *In re Nexium (Esomeprazole) Antitrust Lit., 842 F.3d 34, 41 (1st Cir. 2016)*. But the existence of patent—a lawful monopoly if valid—points in the other direction. **HN15**[] If the patent is valid, then unlike traditional market allocation agreements, a settlement that allows generic entry after the FDA's approval of the drug

---

[3] Reverse-payment settlements are also sometimes called "pay for delay" agreements. *See* *FTC v. Watson Pharms., Inc., 677 F.3d 1298, 1301 (11th Cir. 2012)*, *rev'd sub nom.* *FTC v. Actavis, 570 U.S. 136, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*. Following the Supreme Court's lead, we use the term "reverse payment."

[4] The FTC required that showing of market power to show potential anticompetitive effect under *Actavis*. Impax does not argue that it lacked market power—it held a patent after all—so we need not address that issue further.

but still earlier than the patent expiration date may result in more competition than would have existed absent the settlement. Actavis, 570 U.S. at 154. Given the potentially countervailing impacts of reverse payment settlements, the Supreme Court applied the rule of reason rather than automatic invalidity. Id. at 159.

At this first step of the rule-of-reason analysis, we are just focused on the anticompetitive side of the equation. *Actavis* held that a "large and unjustified" reverse payment creates a likelihood of "significant anticompetitive effects." Id. at 158. **HN16**[] "[T]he likelihood of a reverse payment bringing about anticompetitive effects depends upon its size, its scale in relation to the payor's anticipated future litigation costs, its independence from other services for which it might represent payment, and the lack of any other convincing justification." Id. at 159.

[*494] In many reverse **[**18]** payment cases, the central dispute is whether there was in fact a reverse payment. HERBERT HOVENKAMP ET AL. IP & ANTITRUST: AN ANALYSIS OF ANTITRUST PRINCIPLES APPLIED TO INTELLECTUAL PROPERTY LAW § 16.01 (2018 Supp.); *see, e.g.,* In re Loestrin 24 Fe Antitrust Litig., 814 F.3d 538, 550-51 (1st Cir. 2016) (citing numerous post-*Actvavis* case addressing whether nonmonetary benefits to a generic are reverse payments). The settling party will often contend that any settlement payments are for services rather than for delayed entry. *Id.* That is not the case here. Impax has not challenged the ALJ's original determination "that a large reverse payment helped induce settlement or that the payment was linked to the January 2013 entry date."

That concession makes sense in light of the valuable consideration Impax received in exchange for delaying entry.[5] We will note two significant items. First, Endo committed to not market an authorized generic, which increased Impax's projected profits by $24.5 million. *See* King Drug Co. of Florence, 791 F.3d 388, 394 (3d Cir. 2015) (holding that brand manufacturer commitments to not market a generic drug during the 180-day exclusivity period are "payments" under *Actavis*); *see also* Loestrin 24 Fe Antitrust Litig., 814 F.3d at 549-53 (explaining that *Actavis* recognized that a reverse **[**19]** payment could include more than just an exchange of money). Second, Endo would pay Impax credits for the shrunken market the latter would inherit if, as expected, Endo timely executed the product hop to the reformulated Opana ER. The $102 million Endo ultimately paid is likely a good approximation of the parties' expected value for these credits. The size of these payments is comparable to other cases where courts have inferred anticompetitive effect. *See* In re Wellbutrin XL Antitrust Lit. Indirect Purchaser Class, 868 F.3d 132, 162 (3d Cir. 2017) (holding that $233 million paid to three generic manufacturers is large under *Actavis*); Nexium, 842 F.3d at 50, 54 (acknowledging jury finding that a $300-$690 million payment was large); *accord* Actavis, 570 U.S. at 145 (brand manufacturer agreed to pay three generic manufacturers $12 million, $60 million, and an estimated $171-270 million over nine years).

The Commission rejected the argument that just showing a large payment was enough to establish anticompetitive harm. It reasoned that "[e]stablishing that the payment is not otherwise justified is necessary for demonstrating that the payment is purchasing an exclusive right and preventing the risk of competition." *See also* Actavis, 570 U.S. at 158 (stating that "a reverse payment, where large and *unjustified*, can bring with it the risk of significant **[**20]** anticompetitive effects" (emphasis added)).

But the Commission correctly found no such justification. **HN17**[] A large reverse payment might be justified if it represents "avoided litigation costs or fair value for services." Id. at 156. That is not the case here. The FTC estimated the settlement saved Endo only $3 million in litigation expenses, an amount in the ballpark of the typical cost for litigating pharmaceutical patents. *See* FED. TRADE COMM'N, AUTHORIZED GENERIC DRUGS: SHORT-TERM EFFECTS AND LONG-TERM IMPACT 111-12 & n.27 (2011) (estimating average costs in the $5-10 million range based on research from Morgan Stanley); Michael R. Herman, **[*495]** Note, *The Stay Dilemma: Examining Brand and Generic Incentives for Delaying the Resolution of Pharmaceutical Patent Litigation*, 111 Colum. L. Rev. 1788, 1795 n.41 (2011) (noting that litigation expenses can bring the costs of generic entry to about $10 million). Nor did the agreement involve any services that the generic would provide to Endo that could otherwise justify the large payment. Only the services associated with the Parkinson's collaboration could plausibly provide an appropriate basis for the payments. But even assuming that the collaboration is relevant and that the $10 million

[5] The Commission also considered the payments to Impax for the Parkinson's research and the licenses Endo granted Impax.

Parkinson's **[**21]** research agreement constituted payment for services, over $100 million of Endo's payment remains unjustified.

This large and unjustified payment generated anticompetitive effects. The Commission explained that there "was a real threat of competition from Impax" snuffed out by Endo's agreement to make the reverse payments. The FDA had just approved Impax's generic, allowing it to sell the drug. Impax had taken steps to do so, even though its market entry would be "at risk" of infringement liability. Endo's known product-hop plans increased Impax's incentive to quickly enter the market. The Commission thus had substantial evidence to conclude that the reverse payments replaced the "possibility of competition with the certainty of none."

Impax argues that the Commission needed to do more at this first stage of the rule of reason. Its principal attack on the finding of anticompetitive effect is that the Commission needed to evaluate "the patent's strength, which is the expected likelihood of the brand manufacturer winning the litigation." Impax reasons that if it was highly likely that Endo would win the patent suit, then the reverse payment was not anticompetitive because it allowed the **[**22]** generic to enter the market before the patent expired.

We disagree that *Actavis* requires the Commission to assess the likely outcome of the patent case in order to find anticompetitive effects. The fact that generic competition was possible, and that Endo was willing to pay a large amount to prevent that risk, is enough to infer anticompetitive effect. *Actavis, 570 U.S. at 157*. In fact, *Actavis* squarely rejected Impax's argument: ***HN18***[] "[T]he size of the unexplained reverse payment can provide a workable surrogate for a patent's weakness, all without forcing a court to conduct a detailed exploration of the validity of the patent itself." *Id. at 158*; *see also* *id. at 157* ("[I]t is normally not necessary to litigate patent validity to answer the antitrust question."); *id. at 158* (reiterating that a court can assess the anticompetitiveness of a reverse payment "without litigating the validity of the patent"); *id. at 159* (stating yet again that the Commission need not "litigate the patent's validity" to establish anticompetitive effects). ***HN19***[] The idea is that a large reverse payment "itself would normally suggest that the patentee has serious doubts about the patent's survival." *Id. at 157*; *see also* HOVENKAMP, *supra*, § 16.01[D] (explaining that a sizeable reverse payment "raise[s] a strong inference **[**23]** that that the parties believed ex ante that there was a significant chance that the patent was invalid").

Consider this settlement. If the parties thought Endo was highly likely to win the infringement suit, then Impax would have been happy with a deal giving it nothing more than entry months in advance of the likely-valid patent's expiration. *Cf.* *In re Cipro Cases I & II, 61 Cal. 4th 116, 187 Cal. Rptr. 3d 632, 348 P.3d 845, 865 (Cal. 2015)* (noting that a settlement postponing market **[*496]** entry, but not accompanied by a reverse payment, would be a "fair approximation" of the strength of the patent suit). Reverse payments potentially worth nine figures would have been a windfall. The need to add that substantial enticement indicates that at least some portion of that payment is "for exclusion beyond the point that would have resulted, on average, from simply litigating the case to its conclusion." *Id. at 867*; *see also* *In re Aggrenox Antitrust Lit., 94 F. Supp. 3d 224, 240-41 (D. Conn. 2015)* (explaining that a plaintiff need not prove that the patent was weak because ***HN20***[] a "large and unjustified reverse-payment" can show that the parties perceived weakness with the patent that would have made earlier entry likely). "And that fact, in turn, suggests that the payment's objective is to maintain supracompetitive prices to be shared among the patentee and the challenger rather **[**24]** than face what *might have been* a competitive market—the very anticompetitive consequence that underlies the claim of antitrust unlawfulness." *Actavis, 570 U.S. at 157* (emphasis added).[6]

Impax also argues that the settlement does not look anticompetitive in hindsight. After all, since the settlement Endo has obtained more patents for Opana ER and proven their validity in court. On top of that, the product hop ended up failing once Endo had to take reformulated Opana ER off the market due to safety concerns. So Impax's generic is now the only version of Opana ER on the market.

---

[6] In addition to crediting these economic implications of a large reverse payment, the Supreme Court recognized the difficulty of trying a patent case within an antitrust case. *Actavis, 570 U.S. at 157* (discussing the Eleventh Circuit's concern with "litigat[ing] patent validity" in an antitrust case, but explaining that is not needed for antitrust scrutiny). An Eleventh Circuit colleague apparently familiar with Cajun cuisine called this the "turducken" problem. *Watson, 677 F.3d at 1315*.

HN21[] But it is a basic antitrust principle that the impact of an agreement on competition is assessed as of "the time it was adopted." *See* *Polk Bros. v. Forest City Enters., 776 F.2d 185, 189 (7th Cir. 1985)* (Easterbrook, J.); *see also* FTC & DOJ, ANTITRUST GUIDELINES FOR COLLABORATIONS AMONG COMPETITORS § 2.4 (2000) (stating that the agencies "assess the competitive effects of a relevant agreement as of the time of possible harm to competition"). That approach also makes sense in reverse payment cases. *Valley Drug Co. v. Geneva Pharms., 344 F.3d 1294, 1306 (11th Cir. 2003)* (refusing to consider postagreement invalidation of patent because "reasonableness of agreements under the antitrust laws are to be judged at the time the agreements are entered into"); *Cipro, 348 P.3d at 870* ("Just as later invalidation **[**25]** of a patent does not prove an agreement when made was anticompetitive, later evidence of validity will not automatically demonstrate an agreement was procompetitive."); 12 PHILLIP E. AREEDA & HERBERT HOVENKAMP, ***ANTITRUST LAW*** ¶ 2046e1, at 399 (4th ed. 2019) (explaining that the "reasonableness of a patent settlement agreement cannot be made to depend on an *ex post* determination" of validity or infringement).

So the focus is on the following facts as they existed when the parties adopted the settlement. Endo agreed to make large payments to the company that was allegedly infringing its patents. In exchange, Impax agreed to delay entry of its generic drug until two-and-a-half years after the FDA approved the drug. Neither the saved costs of forgoing a trial nor any services Endo received justified these payments. Substantial evidence supports the **[*497]** Commissions' finding that the reverse payment settlement threatened competition.

B.

The next rule-of-reason question is whether Impax can show procompetitive benefits. *Am. Express, 138 S. Ct. at 2284*. The Commission concluded it could not. Although the ALJ had recognized that the settlement's license and covenant-not-to-sue provisions benefited competition, the Commission concluded **[**26]** that these procompetitive effects did not flow from the challenged restraint—the reverse payments themselves. As a result, the Commission did not treat Impax's ability to enter the market nine months before the patents expired, and the protection Impax secured against other patents Endo might obtain, as benefits to be weighed against the anticompetitive effects of the reverse payments. After the Commission concluded that the reverse payments lacked any procompetitive benefits, it followed that they "constitute[d] an unreasonable restraint of trade."

The parties and amici vigorously contest the Commission's finding of "no nexus" between the restraint and the procompetitive benefits Impax asserts. That dispute turns largely on how to define the restraint. Is it limited to the reverse payments or does it extend to the entire settlement agreement?

We need not resolve this question because of an alternative ruling the Commission made. Although the Commission found the reverse payments generated no procompetitive benefits, it went on to assume *arguendo* that Impax could connect the settlement's purported procompetitive effects to the challenged restraint. Even if that was so, the Commission **[**27]** determined that "Impax could have obtained the proffered benefits by settling without a reverse payment for delayed entry—which is a practical, less restrictive alternative." If we conclude that substantial evidence supported this finding of a less restrictive alternative, we can also assume that Impax has proven procompetitive benefits. So we will turn to our review of the "less restrictive alternative" finding.

C.

HN22[] A restraint is unreasonable when any procompetitive benefits it produces "could be reasonably achieved through less anticompetitive means." *Am. Express, 138 S. Ct. at 2284*; *see generally* 11 AREEDA & HOVENKAMP, *supra*, ¶ 1913, at 395-402; C. Scott Hemphill, *Less Restrictive Alternatives in* ***Antitrust Law***, *116 Colum. L. Rev. 927, 937-42 (2016)*. The concept traces back to then-Circuit Judge Taft's opinion in *United States v. Addyston Pipe & Steel Co. Hemphill, Less Restrictive, supra, at 938 & n.53* (citing *85 F. 271, 282 (6th Cir. 1898)* (holding that a restraint of trade is unenforceable unless it is "ancillary to the main purpose of a lawful contract[] and *necessary* to protect the covenantee['s] . . . enjoyment of the legitimate fruits of the contract" (emphasis added))). ***HN23***[] The less-restrictive-alternative standard applies across a range of antitrust claims and is included in model antitrust jury instructions. *Id. at 929, 938 & n.50* (citing ABA SECTION OF ***ANTITRUST LAW***, MODEL JURY INSTRUCTIONS IN **[**28]**

CIVIL ANTITRUST CASES A-10 (2005)).[7] The idea is that it is unreasonable to justify a restraint of trade based on a purported benefit to competition if that same benefit could be achieved with less damage to competition. **HN24**[] Focusing on the **[*498]** existence of less restrictive alternatives may allow courts to avoid difficult balancing of anticompetitive and procompetitive effects and to "smoke out" anticompetitive effects or pretextual justifications for the restraint. *Hemphill, Less Restrictive, supra, at 947-63*. When a less restrictive alternative exists, a party's decision to nonetheless engage in conduct "that harms consumers" likely results from a desire "to gain from the resulting consumer harm." *Id. at 968*. The question, in short, is whether "the good [could] have been achieved equally well with less bad." *Id. at 929*.

Actavis recognizes the possibility of less restrictive alternatives to reverse payment settlements. The Court noted that parties to pharmaceutical patent litigation "may, as in other industries, settle in other ways, for example, by allowing the generic manufacturer to enter the patentee's market prior to the patent's expiration, without . . . paying the challenger to stay out prior to **[**29]** that point." *570 U.S. at 158*; *see also* 12 AREEDA & HOVENKAMP, *supra*, ¶ 2046c2, at 381-82 (observing that *Actavis* recognizes "that there are better, less anticompetitive ways to settle these disputes").

The Commission found that Impax could have achieved just as much and likely more good (an entry date even earlier than 2013) without the bad (Endo's agreement not to sell a competing generic during the exclusivity period and to pay credits to Impax for the decline of the Opana ER market while Endo executed the product hop). The Commission explained that "[h]olding everything else equal, Impax's acceptance of payment would normally be expected to result in a later entry date than what Impax would have accepted based on the strength of the patents alone." To support its view that Impax could have entered into a settlement without reverse payments that would have resulted in greater generic competition, the Commission relied on industry practice, economic analysis, expert testimony, and adverse credibility findings discounting the testimony of Impax's lead settlement negotiator.

HN25[] "[T]he existence of a viable less restrictive alternative is ordinarily a question of fact." 11 AREEDA & HOVENKAMP, *supra*, ¶ 1913b, at 398; *accord* *O'Bannon v. NCAA, 802 F.3d 1049, 1074 (9th Cir. 2015)* (applying clear-error review **[**30]** to district court's finding of less restrictive alternative). So the substantial deference we owe the Commission's factfinding kicks in, in particular on its determination that a no-payment settlement was feasible.

Impax nonetheless tries to lodge legal objections to the finding of a less restrictive alternative. First, it argues that the Commission only recognized what it considers an equally restrictive alternative—the possibility of a settlement with the same entry date but no reverse payments. But the Commission recognized the feasibility of no-payment settlements with both the same[8] or an earlier entry date. Its ultimate ruling relied on an agreement with an earlier entry date as a less restrictive alternative: "A no-payment settlement allowing *pre-2013 generic entry* would have been a practical alternative for both Impax and Endo, but they chose instead to **[*499]** exchange sizeable payment for *a later* entry date." (emphasis added). Impax does not dispute that an agreement with an earlier entry date would be less restrictive.

Impax does argue that the Commission "flipped the burden of proof" in finding that such a less restrictive settlement was feasible. We disagree. The Commission concluded **[**31]** that there was a "strong showing" of the possibility of less restrictive settlement, and only then asked whether Impax had rebutted that evidence. That is a normal way of evaluating whether a plaintiff has met its burden of persuasion.

---

[7] The Fifth Circuit Pattern Jury Instructions does not include circuit-specific antitrust instructions, but refer courts and parties to two sources, including the ABA Antitrust Section's proposed instructions. FIFTH CIRCUIT PATTERN JURY INSTRUCTIONS (CIVIL CASES) § 6 (2020).

[8] Even if Impax's entry date were the same in a no-payment settlement, the arrangement would be less anticompetitive than the actual agreement because it would not include Endo's "payment" of not selling a generic competitor during Impax's six-month exclusivity period. Thus, in a no-payment settlement, there would have been greater price competition during at least those six months. In any event, because the Commission's ultimate finding relied on the feasibility of a no-payment settlement with an earlier entry date, we only consider that agreement as a less restrictive alternative.

So we turn to whether substantial evidence supports the Commission's conclusion that Complaint Counsel had established a less restrictive alternative. First is the fact that most settlements between brand and generic makers do not include reverse payments. The Commission relied on an expert witness who analyzed industry practice and studies showing that from 2004-2009 "only 30 percent of the patent settlements filed with the FTC involved both compensation from the branded firm to the generic firm and restrictions on generic entry." In recent years, reverse payment settlements may have become even rarer; over 80 percent of brand-generic settlements reached within the year following *Actavis* did not include a reverse payment.

Impax suggests this evidence of industry practice is not probative of whether it had the opportunity to enter in a no-payment settlement. ***HN26***[] But leading scholars have recognized that other parties' "actual experience in analogous situations" **[**32]** can help establish the feasibility or practicality of a less restrictive alternative. 11 AREEDA & HOVENKAMP, *supra*, ¶ 1913b, at 398; *accord* Hemphill, *Less Restrictive, supra, at 984* ("One useful indicia of practicality is that the alternative has been implemented by this or other firms in similar circumstances."); *see also* *Ind. Fed'n of Dentists, 476 U.S. at 454* (recognizing the FTC's expertise about commercial practices). Showing that the alternative is "rooted in real commercial experience" may be especially compelling as the defendant often will not want to acknowledge its willingness to enter into an arrangement that would not have included "the illicit profits arising from an anticompetitive effect." *Id. at 984-85*; *see also* Kevin B. Soter, Note, *Causation in Reverse Payment Antitrust Claims*, *70 Stan. L. Rev. 1295, 1336 (2018)* (raising concerns about rules that would "tell[] defendants that all they need to do to avoid liability is to insist in settlement talks that the only agreement they would make is an illegal one").

And the Commission did not rely on industry practice alone. It acknowledged but refused to credit the trial testimony of Impax's chief negotiator, who said that Endo was "adamant about preventing pre-2013 entry."[9] The Commission noted that this resolute trial testimony was inconsistent with the witness's **[**33]** prior statements that he could not remember discussing pre-2013 entry dates with Endo. In that earlier testimony, the negotiator said he could not remember if "Impax ever 'tried to get a date earlier than January of 2013'" or whether "Endo ever told Impax that it would 'not settle the litigation' with an entry date before 2013." Doubts about the negotiator's newfound certainty allowed the Commission not just to reject his testimony but also to treat it as evidence of the possibility of pre-2013 entry. *See* *Reeves v. Sanderson Plumbing Prods., Inc., 530 U.S. 133, 147, 120 S. Ct. 2097, 147 L. Ed. 2d 105 (2000)* (discussing **[*500]** the "general principle of evidence law that the factfinder is entitled to consider a party's dishonesty about a material fact as 'affirmative evidence of guilt'"). The Commission further noted that while early on Impax had unsuccessfully sought entry dates during 2011 and even January 2012, a significant time gap exists between those proposed entry dates and the 2013 entry date in the final agreement. The professed failure to consider other possible 2012 entry dates thus casts doubt on the notion that an agreement with pre-2013 entry was unachievable.[10]

Finally, economics support the Commission's finding that Endo **[**34]** would have entered into a settlement with an earlier entry date if it could have could have kept the more than $100 million it ended up paying Impax. Hemphill, *Less Restrictive, supra, at 984* (recognizing that a plaintiff could use "expert testimony based on economic theory" to show a likelihood that the parties would have entered into a less restrictive alternative). If everything has a price, then those large payments were the price for Impax's delayed entry. *King Drug, 791 F.3d at 405 n.23*; *Cipro, 348 P.3d at 871*. Such "fairly obvious" observations can show the feasibility of a less restrictive alternative. 11 AREEDA & HOVENKAMP, *supra*, ¶ 1913b, at 398; *see also* *Ind. Fed'n of Dentists, 476 U.S. at 454* (holding that deference is due FTC's assessment of business practices).

---

[9] The Commission's consideration of this testimony further dispels Impax's claim that the Commission did not find a settlement with an *earlier* entry date to be a viable alternative.

[10] The case-specific nature of this aspect of the FTC's ruling undermines Impax's concern that the agency's decision would invalidate all reverse payment settlements. So does the FTC's enforcement record. During the first fifteen years of this century, the agency challenged only 6 of the 1336 brand/generic settlements entered into during that period. FTC BUREAU OF COMPETITION, OVERVIEW OF AGREEMENTS FILED IN FY 2016, at 4.

Three evidentiary legs—industry practice, credibility determinations about settlement negotiations, and economic analysis—thus supported the Commission's conclusion that Endo would have agreed to a less restrictive settlement. 11 AREEDA & HOVENKAMP, *supra*, ¶ 1914c, at 410 (stating that a finding of less restrictive alternative should be based on alternatives "that are either quite obvious or a proven success"). As for Impax's side of things, of course it would have preferred the settlement that paid it over $100 million. But any reluctance Impax had to agree to a no-payment settlement **[**35]** based on a "desire to share in monopoly rents" cannot undermine the Commission's finding that a less restrictive settlement was viable. *See* Hemphill, *Less Restrictive, supra, at 984-85*; *see also* *Soter, supra, at 1336*.

Our question is not whether the Commission could have reached a different result on the less-restrictive-alternative question. ***HN27***[] It is whether there was evidence that would allow a reasonable factfinder to conclude that a no-payment settlement was feasible. *Ind. Fed'n of Dentists, 476 U.S. at 454*; *see also* *Ripley v. Chater, 67 F.3d 552, 555 (5th Cir. 1995)* (noting that substantial evidence can even be less than a preponderance). Because there was more than enough evidence to support that unanimous view of the Commissioners, we must uphold their view that a less restrictive alternative was viable. And that means the reverse payment settlement was an agreement to preserve and split monopoly profits that was not necessary to allow generic competition before the expiration of Endo's patent. As a result, Impax agreed to an unreasonable restraint of trade.

The petition for review is DENIED.

HN1[] **Complaints, Requirements for Complaint**

N.C. Gen. Stat. § 7A-45.4(c) requires that the Notice of Designation as a Complex Business Case shall, in good faith and based on information reasonably available, succinctly state the basis of designation. As a result, the court may consider all materials reasonably necessary to rule on an opposition to designation. For a case to be certified as a mandatory complex business case, the pleading upon which designation is based must raise a material issue that falls within one of the categories specified in *§ 7A-45.4*.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN2[] **Trade Practices & Unfair Competition, State Regulation**

Designation as a complex business case under *N.C. Gen. Stat. § 7A-45.4(a)(3)* is proper if the action involves a material issue related to disputes involving ***antitrust law***, including disputes arising under N.C. Gen. Stat. ch. 75 that do not arise solely under *N.C. Gen. Stat. § 75-1.1* or N.C. Gen. Stat. ch. 75, art. 2.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN3[] **Trade Practices & Unfair Competition, State Regulation**

While it is true that the plaintiff is the master of its complaint and free to choose which causes of action it will bring, designation as a complex business case may be appropriate if disputes within the scope of *N.C. Gen. Stat. § 7A-45.4(a)* have not been expressly pleaded but must necessarily be resolved in order to litigate the claims that have been asserted.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Civil Procedure > ... > Diversity Jurisdiction > Amount in Controversy > Determination

HN4[] **Trade Practices & Unfair Competition, State Regulation**

N.C. Gen. Stat. § 7A-45.4(b)(2) provides that an action described in *§ 7A-45.4(a)(1)*, *(2)*, *(3)*, *(4)*, *(5)*, or *(8)* in which the amount in controversy computed in accordance with *N.C. Gen. Stat. § 7A-243* is at least five million dollars shall be designated as a mandatory complex business case by the party whose pleading caused the amount in controversy to equal or exceed five million dollars.

Judges: [*1] Louis A. Bledsoe, III, Chief Business Court Judge.

Order by: Louis A. Bledsoe, III

Order

ORDER ON OPPOSITION TO DESIGNATION AS A COMPLEX BUSINESS CASE

1. **THIS MATTER** is before the Court on Plaintiff Maxwell Foods, LLC's ("Maxwell") Opposition to Designation as a Complex Business Case (the "Opposition"). (Opp'n Designation Complex Bus. Case [hereinafter "Opp'n"], ECF No. 17.)

2. Maxwell initiated this action on 13 August 2020, asserting claims for breach of contract and breach of duty of good faith and fair dealing against Defendant Smithfield Foods, Inc. ("Smithfield"). (*See* Compl. ¶¶ 82-112, ECF No. 3.) Smithfield timely removed the case to the United States District Court for the Eastern District of North Carolina on 11 September 2020. (*See* Notice Removal, ECF No. 5.) Maxwell filed a motion to remand the case to state court on 9 October 2020, which the District Court granted on 22 February 2021. (*See* Order, ECF No. 6.) Maxwell then filed an Amended Complaint on 1 March 2021, asserting claims for breach of contract and unfair and deceptive trade practices under *N.C.G.S. § 75-1.1* against Smithfield. (*See* Am. Compl. ¶¶ 94-132, ECF No. 7.)

3. Smithfield timely filed a Notice of Designation (the "NOD") on 5 March 2021, asserting **[*2]** that this action involves a dispute under *N.C.G.S. §§ 7A-45.4(a)(3)* and *(b)(2)* and thus must be designated as a mandatory complex business case. (Notice Designation 1-2 [hereinafter "NOD"], ECF No. 9.)

4. On 8 March 2021, the action was designated as a mandatory complex business case by the Honorable Paul Newby, Chief Justice of the Supreme Court of North Carolina, (Designation Order, ECF No. 1), and assigned by the undersigned to the Honorable Adam M. Conrad, Special Superior Court Judge for Complex Business Cases, (Assignment Order, ECF No. 2).

5. Maxwell timely filed the Opposition on 25 March 2021, contending that designation of this action as a mandatory complex business case is not proper under either ground stated in the NOD. (Opp'n 1-2, 7-10.) Smithfield filed its Response to Opposition (the "Response") on 9 April 2021. (Resp. Opp'n Designation [hereinafter "Resp."], ECF No. 18.) The matter is now ripe for determination.

6. *Section 7A-45.4(c)* ***HN1***[] requires that "[t]he Notice of Designation shall, in good faith and based on information reasonably available, succinctly state the basis of designation[.]" As a result, "the Court may consider all materials reasonably necessary to rule on an opposition to designation." *In re Summons Issued to Target Corp. & Affiliates, 2018 NCBC LEXIS 185, at *3 (N.C. Super. Ct. Dec. 4, 2018)*.

7. "For a case **[*3]** to be certified as a mandatory complex business case, the pleading upon which designation is based must raise a material issue that falls within one of the categories specified in *section 7A-45.4*." *Composite Fabrics of Am., LLC v. Edge Structural Composites, Inc., 2016 NCBC LEXIS 11, at *25 (N.C. Super. Ct. Feb. 5, 2016)*.

8. ***HN2***[] Designation under *section 7A-45.4(a)(3)* is proper if the action involves a material issue related to "[d]isputes involving ***antitrust law***, including disputes arising under *Chapter 75 of the General Statutes* that do not arise solely under *G.S. 75-1.1* or *Article 2 of Chapter 75 of the General Statutes*."

9. According to the Amended Complaint, Maxwell was a major producer in the U.S. hog industry and a former supplier to Smithfield, the largest processor of pork in the world. (*See* Am. Compl. ¶¶ 7, 10, 16.) Maxwell and Smithfield entered into a Production Sales Agreement (the "PSA") on 5 December 1994, in which Maxwell agreed to sell hogs to Smithfield and Smithfield agreed to purchase hogs from Maxwell. (*See* Am. Compl. ¶ 16.) The parties executed a written amendment (the "Amendment") to the PSA on 6 December 1994. (*See* Am. Compl. ¶ 28.) Maxwell alleges that Smithfield has violated the terms of the PSA and Amendment by failing to (i) give Maxwell the same economic incentives and benefits given to other major swine suppliers; (ii) negotiate in good faith with Maxwell to find a substitute basis for determining the purchase **[*4]** price for Maxwell's hogs when the PSA's pricing formula was no longer economically viable; and (iii) purchase all of the hogs produced by Maxwell up to a certain monthly cap. (*See* Am. Compl. ¶¶ 60-68, 70-75, 81-83, 94-121.) Maxwell further alleges that Smithfield has used its status as the dominant—indeed the monopoly—pork processor in the Southeast to manipulate the pricing mechanism in the PSA and provide other major hog suppliers with better economic terms and incentives, thereby driving Maxwell out of the hog business and benefiting Smithfield's affiliated hog producers. (*See* Am. Compl. ¶¶ 86-93, 122-32.)

10. Maxwell argues that designation under *7A-45.4(a)(3)* is improper because it "has not alleged an antitrust claim under either state or federal law." (Opp'n 7.) Maxwell further contends that because the Amended Complaint asserts "several breach of contract claims and an additional claim 'solely under *G.S. 75-1.1*' to recover damages for Smithfield's unfair trade practices against Maxwell[,]" (Opp'n 2), the action "falls expressly outside the ambit of [s]ection *7A-45.4(a)(3)*[,]" (Opp'n 7).

11. ***HN3***[] The Court disagrees. While it is true that the "plaintiff is the master of its complaint and free **[*5]** to choose which causes of action it will bring[,]" *UNOX, Inc. v. Conway, 2019 NCBC LEXIS 41, at *6 (N.C. Super. Ct. June 28, 2019)*, this Court has previously recognized that "designation as a complex business case may be appropriate if disputes within the scope of *section 7A-45.4(a)* have not been expressly pleaded but must necessarily be resolved in order to litigate the claims that have been asserted[,]" *Mkt. Am., Inc. v. Doyle, 2016 NCBC LEXIS 182, at *4, 2016 NCBC Order 5 (N.C. Super. Ct. Feb. 29, 2016)*.

12. Such is the case here. Designation is based on the Amended Complaint, and the NOD provides ample support for Smithfield's assertion that Maxwell's *section 75-1.1* claim is premised on antitrust allegations. (*See* NOD 3-5; *see also* Am. Compl. ¶¶ 7-13, 16, 87-90, 93, 122-26.) As Smithfield notes in its Response, "Maxwell alleges that Smithfield violated [s]ection 75-1.1 by abusing its alleged monopoly power and dominant market position to manipulate national hog prices, favor its vertically-integrated producers, and force Maxwell out of business." (Resp. 6.) Although Maxwell correctly notes that designation is improper where the claim arises "solely under *G.S. 75-1.1*," (*see* Opp'n 7), unlike the cases that Maxwell cites in its Opposition, a close reading of the Amended Complaint reveals that Maxwell has "otherwise invoked state or federal ***antitrust law***" by alleging that Smithfield's monopolistic misconduct **[*6]** serves as the basis for its claim under *section 75-1.1*. *Cf.* *Vertical Crop Consultants, Inc. v. Brick St. Farms LLC, 2021 NCBC LEXIS 3, at *3, 2021 NCBC Order 1 (N.C. Super. Ct. Jan. 12, 2021)* (declining to designate under *(a)(3)* where "the Complaint does not contain a claim for trade secret misappropriation or otherwise invoke state or federal ***antitrust law***"); *Pinsight Tech., Inc. v. Driven Brands, Inc., 2020 NCBC LEXIS 23, at *4, 2020 NCBC Order 9 (N.C. Super. Ct. Feb. 20, 2020)* (declining to designate under *(a)(3)* where plaintiff has "not alleged trade secret misappropriation, a Chapter 75 claim other than one under *section 75-1.1*, or otherwise involved state or federal ***antitrust law***"); *Charah v. Sequoia Servs. LLC, 2019 NCBC LEXIS 87, at *2, 2019 NCBC Order 14 (N.C. Super. Ct. May 30, 2019)* (declining to designate under *(a)(3)* where plaintiff's claim arises solely under *section 75-1.1* and plaintiff does not "allege or contend that the current action involves consideration and application of federal or state ***antitrust law***"). Because there exists a material issue of ***antitrust law*** that must be resolved to litigate Maxwell's claim arising under *section 75-1.1*, designation under *section 7A-45.4(a)(3)* is proper.

13. ***HN4***[] Designation under *section 7A-45.4(b)(2)* is also appropriate. That section provides that "[a]n action described in *subdivision (1)*, *(2)*, *(3)*, *(4)*, *(5)*, or *(8) of subsection (a)* of this section in which the amount in controversy computed in accordance with *G.S. 7A-243* is at least five million dollars ($5,000,000) shall be designated as a mandatory complex business case by the party whose pleading caused the amount in controversy to equal or exceed five million dollars ($5,000,000)." **[*7]** Maxwell alleges that Smithfield's conduct has "cost Maxwell tens of millions of dollars already and is causing Maxwell to incur additional substantial losses every day." (Am. Compl. ¶ 91.) For the reasons discussed above, this case is properly designated under *section 7A-45.4(a)(3)*, and because the Amended Complaint establishes that the amount in controversy exceeds five million dollars, the Court concludes that this action qualifies for "mandatory mandatory" designation under *section 7A-45.4(b)(2)*.

14. **WHEREFORE**, the Court hereby **ORDERS** that the Opposition is **OVERRULED**. This action involves a material issue related to "[d]isputes involving ***antitrust law***, including disputes arising under *Chapter 75 of the General Statutes* that do not arise solely under *G.S. 75-1.1* or *Article 2 of Chapter 75 of the General Statutes*[ ]" and shall proceed as a mandatory complex business case before the Honorable Adam M. Conrad.

SO ORDERED, this the 13th day of April, 2021.

/s/ Louis A. Bledsoe, III

HN1[] **Sherman Act, Claims**

To state a price-fixing conspiracy claim under § 1 of the Sherman Act, plaintiffs must plead enough factual matter (taken as true) to suggest that an agreement was made. To meet this requirement and state a plausible claim to relief, an allegation of parallel conduct and a bare assertion of conspiracy will not suffice. The parallel conduct must be placed in a context that raises a suggestion of a preceding agreement. The same is true for antitrust claims brought under Connecticut and California law. *Conn. Gen. Stat. § 35-44b* provides that it is the intent of the General

Assembly that in construing *Conn. Gen. Stat. §§ 35-24 to 35-46*, inclusive, the courts of this state shall be guided by interpretations given by the federal courts to federal antitrust statutes *Conn. Gen. Stat. § 35-26* was patterned after federal ***antitrust law*** and that, as directed by *§ 35-44b*, the court would analyze a *§ 35-26* claim based upon the law governing claims under Sherman Act § 1. In antitrust actions brought under the Cartwright Act, courts look to interpretations of its federal law counterpart, the Sherman Antitrust Act.

Opinion

[*412] SUMMARY ORDER

UPON DUE CONSIDERATION WHEREOF, IT IS HEREBY ORDERED, ADJUDGED, AND DECREED that the judgment entered on September 30, 2020, is **AFFIRMED**.

Spinner Consulting LLC ("Spinner") appeals from the dismissal of its complaint alleging that Stone Point Capital LLC ("Stone Point"), a private equity firm, participated in a conspiracy to fix the price of certain bankruptcy support services. Spinner alleges that Stone Point caused one of its funds to acquire a controlling stake in Bankruptcy Management Solutions, Inc. ("BMS"), in order to participate in a previously established horizontal price-fixing conspiracy between BMS and its competitors in the bankruptcy support services market, and that Stone Point subsequently directed BMS's continued participation in the alleged conspiracy. We **[**2]** assume the parties' familiarity with the underlying facts, procedural history, and arguments on appeal, to which we refer only as necessary to explain our decision to affirm.

HN1[] To state a price-fixing conspiracy claim under section one of the Sherman Act, plaintiffs must plead "enough factual matter (taken as true) to suggest that an agreement was made." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 556, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*.[1] To meet this requirement and state a "plausible" claim to relief, "an allegation of parallel conduct and a bare assertion of conspiracy will not suffice." *Id.* The parallel conduct "must be placed in a context that raises a suggestion of a preceding agreement." *Id. at 557*. The same is true for antitrust claims brought under Connecticut and California law. *See* *Conn. Gen. Stat. § 35-44b* ("It is the intent of the General Assembly that in construing *sections 35-24 to 35-46*, inclusive, the courts of this state shall be guided by interpretations given by the federal courts to federal antitrust statutes."); *Reserve Realty, LLC v. Windemere Reserve, LLC, 335 Conn. 174, 185-86, 229 A.3d 708 (2020)* (explaining that *§ 35-26* "was patterned after federal ***antitrust law***" and that, as directed by *Conn. Gen. Stat. § 35-44b*, the court would analyze a *§ 35-26* claim based upon the law governing claims under *Sherman Act* § 1); *Name.Space, Inc. v. Internet Corp. for Assigned Names & Numbers, 795 F.3d 1124, 1131 n.5 (9th Cir. 2015)* (affirming dismissal of *Cartwright Act* claim based upon proper dismissal of Sherman Act horizontal conspiracy claim **[**3]** because "the analysis under the Cartwright Act is identical to that under the Sherman Act"); *In re Auto. Antitrust Cases I & II, 1 Cal. App. 5th 127, 204 Cal. Rptr. 3d 330, 351 n.15 (Cal. Ct. App. 2016)* ("In antitrust actions brought under the Cartwright Act, we look to interpretations of its federal law counterpart, the *Sherman Antitrust Act* . . . .").

---

[1] Unless otherwise indicated, this Summary Order omits internal quotation marks, alterations, citations, and footnotes in text quoted from caselaw.

On de novo review, we conclude that Spinner's complaint fails to plausibly allege Stone Point's participation in a horizontal price-fixing conspiracy. Spinner's complaint is devoted almost entirely to **[*413]** describing the conduct of BMS and its competitors. It outlines a price-fixing conspiracy allegedly begun by BMS and its competitors sometime before 2011, and claims that Stone Point learned of and chose to join the conspiracy by acquiring BMS between May 2016 and April 2017. Spinner's primary non-conclusory allegation regarding Stone Point is that Stone Point directed BMS to continue using the pricing model purportedly established as part of the conspiracy between BMS and its competitors—and which had been in place for approximately six years before Stone Point's acquisition of BMS.[2]

Even assuming *arguendo* that Spinner plausibly alleged **[**4]** that this pricing model was established in a conspiracy involving BMS and its competitors, Stone Point's later support for continuing that pricing model—by then established in the market—amounts at most to an allegation of parallel conduct. Beyond this allegation, Spinner's complaint does little more than make "a bare assertion" of Stone Point's participation in the purported conspiracy. *Twombly, 550 U.S. at 556*. Accordingly, the complaint fails to state a horizontal price-fixing claim against Stone Point under either federal or state law.

* * *

We have considered Spinner's remaining arguments on appeal and find in them no basis for reversal. According, the judgment of the district court is **AFFIRMED**.

Opinion

ORDER DENYING DEFENDANT'S PARTIAL MOTION TO DISMISS PLAINTIFF'S FIRST AMENDED COMPLAINT

(ECF No. 16)

Defendant moves to dismiss two counts alleged in Plaintiff's First Amended Complaint ("FAC") for failing to state claims upon which relief can be granted. (Mot. to Dismiss FAC ("Motion" or "Mot."), ECF No. 16.) Plaintiff opposes, and Defendant replies. (ECF Nos. 17, 18.) The Court finds the Motion suitable for determination on the papers submitted and without oral argument. *See Fed. R. Civ. P. 78(b)*; CivLR 7.1(d)(1). For the reasons stated below, the Court **DENIES** Defendant's Motion.

I. BACKGROUND

A. Factual Background

This action arises from Defendant's **[*2]** decision to suspend Plaintiff's access to funds from his Bank of America line of credit due to its erroneous belief that Plaintiff had filed for bankruptcy. (ECF No. 15.) Specifically, Plaintiff claims that on January 8, 2020, Defendant sent a form letter to Plaintiff suspending his access because it had received notification of a bankruptcy filing by or against Plaintiff. (FAC ¶ 19.) Five days later during a phone call with Defendant, Plaintiff learned that Defendant "had matched him to a bankruptcy filed in Mobile, Alabama by a William E. Brooks," whose Social Security number contained the same last four digits as Plaintiff's. (FAC ¶ 22.)

Plaintiff states he has never filed for bankruptcy and has never lived in Alabama. (FAC ¶¶ 21, 23.) Further, he states that his middle name is "Norman," and "he consistently uses the generational suffix 'III[,]'" both of which are not present in the public record of the Alabama bankruptcy filing, which uses the filer's full middle name "Eugene." (FAC ¶¶ 23-24.) In addition, Plaintiff alleges that the public bankruptcy record at issue also does not list any Bank of America accounts. (FAC ¶ 25.)

Plaintiff alleges that he "disputed the accuracy of [Defendant's] **[*3]** association of the Alabama bankruptcy with him and his credit accounts," but Defendant "nevertheless reported to the consumer credit reporting agencies that Plaintiff had filed for bankruptcy" and that the bankruptcy action included his Bank of America line of credit. (FAC ¶¶ 26-27.) Plaintiff states he contacted the agencies to inform them that he had not filed for bankruptcy, and each agency contacted Defendant as required by law. (FAC ¶ 30.) However, Plaintiff claims Defendant thereafter "failed to conduct a reasonable reinvestigation of the disputed bankruptcy information." (FAC ¶ 31.)

Defendant also sent a letter to Plaintiff on January 27, 2020 stating that it had accurately reported the bankruptcy. (FAC ¶ 35.) Plaintiff states that he spoke to Defendant many times after receiving this letter to resolve the issue and Defendant represented it would correct the misreporting. (FAC ¶¶ 36-37.)

As a result of Defendant's purported conduct, Plaintiff claims his credit score "dropped substantially," he was denied financing for a personal loan, and he suffered emotional distress. (FAC ¶¶ 28, 38-39.)

B. The FAC and Defendant's Partial Motion to Dismiss

In his FAC, Plaintiff brings allegations **[*4]** on behalf of himself under the *Fair Credit Reporting Act ("FCRA")*, the *California Consumer Credit Reporting Agencies Act ("CCRAA")*, and the California Unfair Competition Law ("UCL"). In Count I, Plaintiff alleges that Defendant's inaccurate reporting and disclosures constituted unlawful, unfair, and fraudulent business practices under the UCL. (FAC ¶¶ 50-56.) In Count II, Plaintiff claims that Defendant violated the CCRAA by furnishing the erroneous information that Plaintiff's line of credit was involved in a bankruptcy to credit reporting agencies, "despite having reason to know that the alleged bankruptcy was filed by a person other the consumer account holder." (FAC ¶ 60.)[1] Plaintiff's third count, which Defendant does not seek to dismiss, requests remedies under the FCRA for Defendant's failure to correct the error. (FAC ¶ 65.)

Defendant argues that Count I and Count II should be dismissed because Plaintiff has failed to allege facts sufficient to state a violation of either the CCRAA or the UCL. As to the CCRAA claim, Defendant contends that the matching first and last names and last four digits of the Social Security number defeats Plaintiff's argument that Bank of America "knew **[*5]** or had reason to know" its attribution of the bankruptcy to Plaintiff and subsequent reporting was inaccurate. (Mem. of P. & A. in supp. of Mot. ("Mem. of P. & A.") at 4-5, ECF No. 16-1.) Relatedly, Defendant contends Plaintiff's unlawful practices claim under the UCL cannot be maintained without a predicate CCRAA claim, again arguing that Defendant "relied on ample criteria" to match the bankruptcy filer to Plaintiff and characterizing the resulting misidentification as "an extraordinary coincidence." (*Id.* at 6.) Defendant also states that because its bankruptcy monitoring procedures reasonably rely on common indicators and benchmarks, they

[1] Plaintiff alleges the CCRAA violations and UCL violations on behalf of himself and two putative classes. (FAC ¶ 40.)

outweigh any alleged harm to Plaintiff under the "unfair" prong of the UCL. (*Id.* at 7.) In opposition, Plaintiff maintains that Defendant's "failure to use all of the publicly available personal identifying information" available in the bankruptcy records was unreasonable under the CCRAA and suffices to state an unlawful and/or unfair practice under the UCL. (*See* Opp'n to Def.'s Mot. to Dismiss ("Opp'n") at 1, 3, 9-10, ECF No. 17.)

II. LEGAL STANDARD

A motion to dismiss pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure* tests the legal sufficiency of the claims asserted in the complaint. *Fed. R. Civ. P. 12(b)(6)*; *Navarro v. Block, 250 F.3d 729, 731 (9th Cir. 2001)*. The court **[*6]** must accept all factual allegations pleaded in the complaint as true and must construe them and draw all reasonable inferences from them in favor of the nonmoving party. *Cahill v. Liberty Mutual Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996)*. To avoid a *Rule 12(b)(6)* dismissal, a complaint need not contain detailed factual allegations, rather, it must plead "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim has "facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Twombly, 550 U.S. at 556*). "Where a complaint pleads facts that are 'merely consistent with' a defendant's liability, it stops short of the line between possibility and plausibility of 'entitlement to relief.'" *Iqbal, 556 U.S. at 678* (quoting *Twombly, 550 U.S. at 557*).

"[A] plaintiff's obligation to provide the 'grounds' of his 'entitle[ment] to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555* (quoting *Papasan v. Allain, 478 U.S. 265, 286, 106 S. Ct. 2932, 92 L. Ed. 2d 209 (1986)* (alteration in original)). A court need not accept "legal conclusions" as true. *Iqbal, 556 U.S. at 678*. Despite the deference the court must pay to the plaintiff's allegations, it is not proper for the court to assume that "the [plaintiff] can prove facts that **[*7]** [he or she] has not alleged or that defendant[] ha[s] violated the...laws in ways that have not been alleged." *Associated Gen. Contractors of Cal., Inc. v. Cal. State Council of Carpenters, 459 U.S. 519, 526, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)*.

III. ANALYSIS

A. CCRAA Claim

The provision of the CCRAA at issue is *Cal. Civ. Code § 1785.25(a)*, which prohibits the furnishing of information "on a specific transaction or experience to any consumer credit reporting agency if the person knows or should know the information is incomplete or inaccurate." "The statutory term 'should have known' imparts a test of reasonableness." *Holmes v. NCO Fin. Services, Inc., 538 F. App'x 765, 766 (9th Cir. 2013)* (citing *Shultz v. Dep't of Army, 886 F.2d 1157, 1160 (9th Cir. 1989))*. "The critical question . . . is thus whether a reasonable [furnisher] . . . would have known" that the furnished information was incomplete or inaccurate. *Id.*

Here, Plaintiff alleges that publicly available information about the bankruptcy revealed that the filer was a different person than Plaintiff and, as such, Defendant's failure to review this information raises a colorable claim that it should have known Plaintiff was not the subject of the bankruptcy. Defendant argues that these factual allegations do not, as a matter of law, suffice to state a violation of the CCRAA. (Mot. at 3-4.)

The Court disagrees. Plaintiff's allegation that Defendant's failure to cross-check identities in bankruptcy using all available information **[*8]** states, at minimum, a claim that Defendant negligently violated the CCRAA. *See Pastrano v. Ditech Fin., LLC, No. EDCV 18-00659-ABM (RWx), 2018 U.S. Dist. LEXIS 117128, 2018 WL 3343606, at *5 (C.D. Cal. July 3, 2018)* (finding sufficient to state a claim the allegation that defendant should have known plaintiff was not a joint obligor on a loan "because it had the relevant documents in its possession"); *see also Cortez*

v. Trans Union, LLC, 617 F.3d 688, 723 (3d Cir. 2010) (finding violation of FCRA where TransUnion did not exercise sufficient care to match information in its records with information on federal list of "Specially Designated Nationals & Blocked Persons List")[2] ; Williams v. First Advantage LNS Screening Sols, Inc., 238 F. Supp. 3d 1333, 1343-44 (N.D. Fla. 2017) (finding FCRA violation where defendant failed to implement procedures using all available personal identifying information, including middle names, "woefully insufficient" and warranting punitive damages) *aff'd in relevant part*, 947 F.3d 735, 745-46 (11th Cir. 2020). Accepting as true Plaintiff's allegation that Defendant failed to properly consider all information available to it, the Court finds it plausibly alleges that Defendant should have known the information was inaccurate under § 1785.25(a). *See* Iqbal, 556 U.S. at 678.

Moreover, dismissal of the CCRAA claim requires this Court to definitively conclude that Defendant's actions, as stated, were reasonable. *See* Holmes, 538 F. App'x at 766. This inquiry is ill-suited for determination at the pleading **[*9]** stage. Rather, such determinations require the Court to consider evidence regarding what information defendants had or should have had access to at the time of reporting, which, at the earliest, occurs at summary judgment. *See, e.g.*, Holmes, 538 F. App'x at 766 (denying summary judgment where evidence supported an inference that defendant could have discovered its regular access to essential information was obstructed before reporting); Griffin v. Navient Sols., Inc., No. 15-CV-1818 DMS (DHB), 2016 U.S. Dist. LEXIS 136241, 2016 WL 5719831, at *5 (S.D. Cal. Sept. 30, 2016) (weighing evidence on summary judgment to determine whether defendant "had no knowledge, and no reasonable basis on which it 'should have known'" that reported information was inaccurate); Jones v. Pennsylvania Higher Educ. Assistance Agency, No. CV 16-00107-RSWL-AFMx, 2017 U.S. Dist. LEXIS 115215, 2017 WL 4594078, at *9 (C.D. Cal. July 24, 2017) (same).[3]

Thus, the Court finds that Plaintiff's allegations about Defendant's conduct state a colorable CCRAA violation and survive 12(b)(6) scrutiny. Accordingly, the Court finds Defendant's arguments in support of dismissing Count II of the FAC without merit.

B. UCL Claim

Under California law, unfair competition is defined as "unlawful, unfair or fraudulent business practice and unfair, deceptive, untrue or misleading advertising." Cal. Bus. & Prof. Code § 17200. "Because section 17200 is written in the disjunctive, **[*10]** it establishes three varieties of unfair competition—acts or practices which are unlawful, or unfair or fraudulent. A practice is prohibited as unfair or deceptive even if not unlawful or vice versa." Lippitt v. Raymond James Fin. Servs. Inc., 340 F.3d 1033, 1043 (9th Cir. 2003); *see also* Lee v. Pep Boys-Manny Moe & Jack of Cal., 186 F. Supp. 3d 1014, 1034 (N.D. Cal. 2016) ("Under the unfairness prong of the UCL, a practice may be deemed unfair even if not specifically proscribed by some other law.").

Defendant moves to dismiss on the basis that Plaintiff has failed to adequately allege the predicate CCRAA claim necessary for an "unlawful practices" claim and has not stated a viable claim for unfair practices because Defendant's bankruptcy monitoring process ensures compliance with the automatic stay requirement and includes "the most reliable indicators of a person's identity[.]" (Mem. of P. & A. at 6-7.) The Court easily disposes of the first argument because, as stated above, Plaintiff has sufficiently stated a CCRAA claim against Defendant. As to the second, the Court also finds that the FAC adequately pleads a claim for unfair practices under the UCL.

---

[2] "[B]ecause the CCRAA is substantially based on the Federal Fair Credit Reporting Act, judicial interpretation of the federal provisions is persuasive authority and entitled to substantial weight when interpreting the California provisions." ***Carvalho v. Equifax Info. Servs., LLC, 629 F.3d 876, 889 (9th Cir. 2010)*** (quotations omitted).

[3] In some cases, courts have expressly held that questions of reasonableness should be reserved for trial. *See* ***Gorman v. Wolpoff & Abramson, LLP, 584 F.3d 1147, 1157 (9th Cir. 2009)*** ("summary judgment is generally an inappropriate way to decide questions of reasonableness because the jury's unique competence in applying the 'reasonable man' standard is thought ordinarily to preclude summary judgment") (quotations omitted); *see also* Cortez, 617 F.3d at 710 ("the reasonableness of a credit reporting agency's procedures is normally a question for trial unless the reasonableness or unreasonableness of the procedures is beyond question").

The UCL does not define "unfair," and California courts follow two different definitions of the term in consumer cases. *See* *Davis v. HSBC Bank Nev., N.A., 691 F.3d 1152, 1169 (9th Cir. 2012)* (quoting *Lozano v. AT & T Wireless Servs., Inc., 504 F.3d 718, 735 (9th Cir. 2007))*. The first test finds "unfair conduct" where a practice **[*11]** "offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers." *S. Bay Chevrolet v. Gen. Motors Acceptance Corp., 72 Cal. App. 4th 861, 886-87, 85 Cal. Rptr. 2d 301 (1999)* (quotations omitted). Under this analysis, courts engage in a balancing test in which they "weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim[.]" *Id. at 886*. Finding this test "too amorphous," the California Supreme Court developed a second definition of "unfair practices" as "conduct that threatens an incipient violation of an ***antitrust law***[] or violates the policy or spirit of one of those laws" and required "any finding of unfairness to competitors under section 17200 be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*. While the second test did not originally apply to consumer actions, "some courts have extended the *Cel-Tech* definition to consumer actions, while others have applied the old balancing test[.]" *Davis, 691 F.3d at 1170*.

In the FAC, Plaintiff relies on the balancing test, claiming that Defendant's practice of matching consumers to bankruptcies "based on insufficient criteria" inflicts harm on consumers that "vastly outweighs any legitimate utility [the practice] **[*12]** possibly could have." (FAC ¶¶ 53-54.) Specifically, Plaintiff alleges that Defendant's practices are "unfair" under the UCL because its failure to consider all available evidence leads to false attributions of bankruptcy, which in turn improperly denies consumers access to credit by lowering their credit scores, wastes consumers' time by requiring them to resolve the issue, and causes emotional distress. (FAC ¶¶ 28, 39, 53; Opp'n at 9.) Plaintiff further alleges these harms outweigh any claimed utility. (FAC ¶ 54.)

The Court finds that this allegation suffices to state that Defendant's practices are unfair practices under the balancing test. *See* *S. Bay Chevrolet, 72 Cal. App. 4th 886-87*; *see also* *Hawkins v. Kroger Co., No. 15-CV-2320 JM (BLM), 2019 U.S. Dist. LEXIS 59249, 2019 WL 1506845, at *5 (S.D. Cal. Apr. 4, 2019)* (finding that "nothing more" than the allegation that defendant's action causes harm and provides little utility was required to state a claim under the UCL's unfair prong). The actual weighing of the parties' respective interests is not appropriately resolved at the pleading stage. *See* *In re Solara Med. Supplies, LLC Customer Data Sec. Breach Litig., No. 3:19-CV-2284-H-KSC, 2020 U.S. Dist. LEXIS 80736, 2020 WL 2214152, at *12 (S.D. Cal. May 7, 2020)* (holding that the defendant's arguments against Plaintiff's unfair practices UCL claim "are better suited for a motion for summary **[*13]** judgment when the record is more fully developed"); *In re Anthem, Inc. Data Breach Litig., 162 F. Supp. 3d 953, 990 (N.D. Cal. 2016)* (holding, on a motion to dismiss, that "[w]hether Defendants' public policy violation is outweighed by the utility of their conduct under the balancing test is a question to be resolved at a later stage in this litigation"); *see also* *Puentes v. Wells Fargo Home Mort., 160 Cal. App. 4th 638, 645 n.5, 72 Cal. Rptr. 3d 903 (2008)* (noting that "[t]he issue of whether a practice is deceptive or unfair is generally a question for the trier of fact," though it "may disposed of by summary judgment on undisputed facts").

Because Plaintiff relies solely on the balancing test and the Court finds that Plaintiff can maintain the UCL claim under this theory, the Court need not reach the *Cel-Tech* test. *See, e.g.,* *In re Yahoo! Inc. Customer Data Sec. Breach Litig., No. 16-MD-02752-LHK, 2017 U.S. Dist. LEXIS 140212, 2017 WL 3727318, at *24 (N.D. Cal. Aug. 30, 2017)* (denying motion to dismiss UCL claim for unfair practices because, "at a minimum," one test for unfairness was met). Thus, the Court concludes that Plaintiff's UCL claim is adequately pled as to the unlawful and unfair prongs and rejects Defendant's arguments in favor of dismissal as to Count I of the FAC.

IV. CONCLUSION AND ORDER

For the reasons stated above, Defendant's Partial Motion to Dismiss Counts I and II of the FAC (ECF No. 16) is **DENIED**. Further, Defendant's **[*14]** September 16, 2020 Motion to Dismiss the Complaint (ECF No. 12) is **DENIED AS MOOT**. Defendant shall file an Answer to the FAC by **May 3, 2021**.

IT IS SO ORDERED.

DATED: April 19, 2021

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

When considering a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, the court must accept as true all of the complaint's factual allegations and view them in the light most favorable to the plaintiff. To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully. Where a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief. A claim is facially plausible if it allows the reasonable inference that the defendant is liable for the conduct alleged. However, the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions. Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice.

Trade Secrets Law > Employee Duties & Obligations > Right to Compete > Covenants Not to Compete

HN2[] **Right to Compete, Covenants Not to Compete**

Cal. Bus. & Prof. Code § 16600 states that, with exceptions, every contract by which anyone is restrained from engaging in a lawful profession, trade, or business of any kind is to that extent void. A restraint is described as something that significantly or materially impedes a person's lawful profession, trade, or business such that its enforcement would implicate the policies of open competition and employee mobility that animate *§ 16600*. *Section 16600* does not authorize employees to compete with former employers by stealing their confidential customer information.

Business & Corporate Compliance > ... > Trade Secrets Law > Protection of Secrecy > Duty to Safeguard

Trade Secrets Law > Misappropriation Actions > Elements of Misappropriation > Acquisition

Trade Secrets Law > Misappropriation Actions > Elements of Misappropriation > Confidentiality

Trade Secrets Law > Misappropriation Actions > Elements of Misappropriation > Improper Means

Trade Secrets Law > Trade Secret Determination Factors > Economic Value

HN3[] **Protection of Secrecy, Duty to Safeguard**

The California Uniform Trade Secrets Act provides a cause of action for misappropriation of trade secrets. *Cal. Civ. Code § 3426.3*. Misappropriation includes acquisition of a trade secret of another by a person who knows or has reason to know that the trade secret was acquired by improper means. *Cal. Civ. Code § 3426.1(b)(1)*. Misappropriation also includes the use of a trade secret by someone who knows or has reason to know that the trade secret was misappropriated or derived from a person who owed a duty to maintain the trade secret's secrecy. *§ 3426.1(b)(2)*. A trade secret is information (including a compilation of information) that (1) derives economic value from not being generally known to the public or to other persons and is the subject of efforts that are reasonable under the circumstances to maintain its secrecy. *§ 3426.1(d)*.

Business & Corporate Compliance > ... > Trade Secrets Law > Federal Versus State Law > Uniform Trade Secrets Act

Trade Secrets Law > Federal Versus State Law > Common Law

Trade Secrets Law > Civil Actions > Defenses > Statute of Limitations

Trade Secrets Law > Misappropriation Actions > Elements of Misappropriation > Disclosures

Trade Secrets Law > ... > Remedies > Damages > Costs & Attorney Fees

HN4[] **Trade Secrets, Uniform Trade Secrets Act**

The California Uniform Trade Secrets Act contains a preemption provision. The preemption provision expressly allows contractual and criminal remedies, whether or not based on trade secret misappropriation but at the same time, *Cal. Civ. Code § 3426.7* implicitly preempts alternative civil remedies based on trade secret misappropriation. Accordingly, claims are preempted where they are based entirely on the same factual allegations that form the basis of a trade secrets claim. But claims are not preempted if they are not based on allegations that constitute a misappropriation of trade secrets. *Cal. Civ. Code § 3426.7(b)(2)*.

Torts > ... > Contracts > Intentional Interference > Elements

HN5[] Intentional Interference, Elements

To state a claim for intentional interference with a contract, a plaintiff must allege 1) the existence of a valid contract between plaintiff and a third party; 2) the defendant's knowledge of the contract; 3) the defendant's intentional acts designed to induce a breach or disruption of the contractual relationship; 4) actual breach or disruption of the contractual relationship; and 5) resulting damage.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN6[] Motions to Dismiss, Failure to State Claim

A plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do, and the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions. Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN7[] Intentional Interference, Elements

To state a claim for intentional interference with prospective economic advantage, a plaintiff must allege 1) an existing economic relationship or one containing the probability of future economic benefit; 2) knowledge by the defendant of the relationship; 3) acts by defendant designed to disrupt the relationship; 4) actual disruption of the relationship; 5) damages proximately caused by the acts of the defendant. In addition, the act must be wrongful by some legal measure other than the fact of interference itself. Thus, the plaintiff must allege that the defendants' conduct was independently wrongful. An act is independently wrongful if it is unlawful, that is, if it is proscribed by some constitutional, statutory, regulatory, common law, or other determinable legal standard.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN8[] Trade Practices & Unfair Competition, State Regulation

The California Business & Professions Code prohibits any unlawful, unfair or fraudulent business act or practice. *Cal. Bus. & Prof. Code § 17200*. By proscribing any unlawful business practice, *§ 17200* borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable. However, a practice may be deemed unfair even if not specifically proscribed by some other law. The word unfair means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

Judges: BETH PHILLIPS, CHIEF UNITED STATES DISTRICT JUDGE.

Opinion by: BETH PHILLIPS

Opinion

ORDER AND OPINION GRANTING IN PART DEFENDANTS' MOTIONS TO DISMISS

This MDL arises from a dispute between two companies in the equipment rental industry. Generally, Ahern Rentals, Inc. ("Ahern") alleges that EquipmentShare.com, Inc. ("EquipmentShare") has been hiring away its employees and in the course of doing so it (and the employees) committed various torts and other wrongful acts.

Ahern filed this suit in the Eastern District of California against EquipmentShare and two of Ahern's former employees who later worked for EquipmentShare, Matthew Allen and Derrick Torres. The case was assigned to the Honorable Morrison C. England, Jr., United States District Judge for that District. On June 29, 2020, Judge England granted Defendants' Motions to Dismiss but allowed Ahern twenty days to file an amended complaint. Ahern filed its First Amended Complaint on July 20, 2020. Defendants filed Motions to Dismiss, but the case was transferred to the MDL before the motions were fully briefed. After **[*17]** they became fully briefed, the undersigned granted the motions in part and denied them in part. (Doc. 25.)[1] As relevant to the matters now before the Court, that Order dismissed federal and state claims alleging misappropriation of trade secrets and state claims alleging intentional interference with contracts and intentional interference with prospective economic advantage, and held that all other claims stated a claim for which relief could be granted. The trade secret claims were dismissed with prejudice because Ahern "failed to heed Judge England's recommendations with respect to" pleading them properly but the claims for intentional interference with contracts and intentional interference with prospective economic advantage were dismissed without prejudice. (Doc. 25, p. 20.)[2]

Ahern filed its Second Amended Complaint, (Doc. 238), which reasserts the claims the Court did not dismiss and attempts to replead the two intentional interference claims. EquipmentShare has filed a Motion to Dismiss, seeking dismissal of the intentional interference claims and one claim that the Court previously declined to dismiss. Allen and Torres have filed their own Motion to Dismiss, seeking dismissal **[*18]** of the intentional interference claims

---

2 All page numbers are those generated by the Court's CM/ECF system.

and another claim that the Court previously declined to dismiss. For the reasons discussed below, both EquipmentShare's motion, (Doc. 279), and the Allen/Torres motion, (Doc. 280) are **GRANTED IN PART** and **DENIED IN PART**.

I. BACKGROUND

As stated earlier, both Ahern and EquipmentShare are in the equipment rental industry. (Doc. 238, ¶ 10.) Allen served as a sales representative for Ahern from June 4, 2002 to June 3, 2019, and Torres worked as an Ahern branch manager from July 11, 2013 to February 2, 2016. (*Id.* at ¶¶ 8, 9.) Both Allen and Torres subsequently went to work for EquipmentShare.

During their employment with Ahern, Allen and Torres had access to "Ahern Confidential Information" to perform their duties as Ahern employees. (*Id.* at ¶¶ 27, 28.) Ahern Confidential Information consists of:

> Ahern's customer lists, Ahern's equipment prices for particular customers, Ahern's customer pricing strategies, Ahern's customer relationship management ("CRM") information relating to its clients such as identities and preferences for customer decision makers, Ahern's project pricing structures, Ahern's actual and prospective employee rosters, Ahern's internal **[*19]** compensation strategies regarding incentive plans and payouts, Ahern's internal human resources policies and practices, Ahern's internal details and evaluations of staff,—including strengths and weaknesses—Ahern's records of customer communications (including logs), and Ahern's competitive business techniques[.]

(*Id.* at ¶ 21.) Ahern Confidential Information "is non-public information" that "is not generally known in the industry or publicly available" and this confidentiality "enables Ahern to generate great economic benefit from Ahern Confidential Information." (*Id.*) Ahern also takes steps to limit access, use and dissemination of Ahern Confidential Information. (*E.g., id.* at ¶¶ 22-23, 31.) Ahern Confidential Information is comprised of, and collectively constitutes, trade secrets. (*Id.* at ¶¶ 25-26.)

Ahern claims that Allen and Torres took and retained Ahern Confidential Information. (*Id.* at ¶¶ 33-35, 40.) All three Defendants then "use[d] Ahern Confidential Information against Ahern so as to cause damage to Ahern's business operations, client relationships, and market share. At the same time Defendants attempted to use Ahern Confidential Information to sow discord and insecurity among **[*20]** Ahern's employees . . . ." (*Id.* at ¶ 38; *see also id.* at ¶¶ 39-42.) However, allegations about these incidents are very limited and will be discussed in Part II of this Order. Other allegations from the Second Amended Complaint will also be discussed as necessary.

As stated earlier, the Second Amended Complaint reasserts the claims the Court did not dismiss and attempts to replead the two intentional interference claims. Specifically, the Second Amended Complaint contains the following nine counts:

- Count I — Breach of Contract against Torres;
- Count II — Intentional Interference With Contract against all Defendants;
- Count III — Intentional Interference with Prospective Economic Advantage against all Defendants;
- Count IV — Breach of Fiduciary Duty against Torres;
- Count V — Breach of the Duty of Loyalty against Allen and Torres;
- Count VI — Breach of the Duty of Loyalty (California Faithless Servant Doctrine) against Allen and Torres;
- Count VII — Unfair Business Practices in violation of the *California Business and Professions Code § 17200 et seq.*, against all Defendants;
- Count VIII — Violation of *California Penal Code § 502*, against Allen and Torres; and
- Count IX — Accounting against all Defendants.[3]

[3] "Accounting" is a remedy and not a cause of action.

EquipmentShare has filed a Motion to Dismiss, seeking dismissal **[*21]** of Counts II, III and VII. Allen and Torres have filed their own Motion to Dismiss, seeking dismissal of Counts I, II and III. The Court resolves the parties' arguments below.

II. DISCUSSION

Defendants bring this motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)*. ***HN1***[] When considering a motion to dismiss under *Rule 12(b)(6)*, the Court "must accept as true all of the complaint's factual allegations and view them in the light most favorable to the Plaintiff[ ]." *Stodghill v. Wellston School Dist., 512 F.3d 472, 476 (8th Cir. 2008)*.

> To survive a motion to dismiss, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. . . . The plausibility standard is not akin to a probability requirement, but it asks for more than a sheer possibility that a defendant has acted unlawfully. Where a complaint pleads facts that are merely consistent with a defendant's liability, it stops short of the line between possibility and plausibility of entitlement to relief.

Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009) (quotations and citations omitted). A claim is facially plausible if it allows the reasonable inference that the defendant is liable for the conduct alleged. *E.g*., *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*; *Horras v. American Capital Strategies, Ltd., 729 F.3d 798, 801 (8th Cir. 2013)*. However, "the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable **[*22]** to legal conclusions. Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Iqbal, 556 U.S. at 678*.

A. Count I - Breach of Contract against Torres

The Second Amended Complaint alleges that during his employment with Ahern, Torres entered into an agreement "in which he agreed to safeguard Ahern Confidential property . . . and would safeguard Ahern information and not transfer information improperly." (Doc. 238, at ¶ 45.) Count I alleges that Torres breached this agreement by (1) accessing Ahern's computer network and emailing "at least one internal Ahern document to his personal e-mail account," (2) taking possession of other information, and (3) using information taken from Ahern for his personal benefit. (*Id.* at 47.)

These are the same allegations that were presented to support the breach of contract claim in the Amended Complaint. Torres sought dismissal, contending that the pleading was inadequate; the Court disagreed. (Doc. 25, p. 5.) Torres now seeks dismissal for a different reason: he now argues that the breach of contract claim is barred by *§ 16600 of the California Business and Professions Code*.[4] The Court disagrees.

HN2[] *Section 16600* states that, with exceptions that are not relevant here, "every contract by which anyone **[*23]** is restrained from engaging in a lawful profession, trade, or business of any kind is to that extent void." However, the contract provisions that form the basis for Count I do not restrain Torres's ability to engage in a lawful profession, trade, or business — they require him to take certain actions, and refrain from taking certain actions, with respect to Ahern's property/information. *See* *Golden v. California Emergency Physicians Med. Grp., 896 F.3d 1018, 1021-24 (9th Cir. 2018)* (discussing *§ 16600* at length and describing a "restraint" as something that "significantly or materially impedes a person's lawful profession, trade, or business [such] that its enforcement would implicate the policies of open competition and employee mobility that animate *section 16600*."). The provision at issue here does not implicate *§ 16600*. *See* *Neville v. Chudacoff, 160 Cal. App. 4th 1255, 1270, 73 Cal. Rptr. 3d 383 (2008)* ("*Section 16600* does not authorize employees to compete with former employers by stealing their confidential customer information.").

---

4 Torres occasionally refers to the statute number as 16660, but this appears to be a typographical error.

Torres contends that the California Court of Appeals' decision in *AMN Healthcare, Inc. v. AYA Healthcare Servs., Inc., 28 Cal. App. 5th 923, 239 Cal. Rptr. 3d 577 (2018)*, "is directly on point." (Doc. 280, p. 10.) There, an employer (AMN Healthcare) sued, *inter alia*, former employees for breaching a contract provision barring them from soliciting the departure of other AMN Healthcare employees. Torres contends that "[t]he basis for Ahern's breach of contract **[*24]** claim against [him] is identical to the basis for the plaintiff's claims in *AMN Healthcare*; namely, that a former employee, i.e., Torres, is improperly competing with Ahern by using Ahern's confidential information in connection with his employment at EquipmentShare." (Doc. 280, p. 11.) But this is not true — Count I does not allege Torres breached a contract by soliciting employees or customers, nor is it any way based on Torres's solicitation of employees or customers. *AMN Healthcare* is inapplicable and *§ 16600* provides no basis for dismissing Count I.

B. Count II — Intentional Interference With Contract

Count II alleges that Defendants intentionally interfered with Ahern's contractual relationships with customers. Defendants contend that the claim must be dismissed because (1) it is preempted by the California Uniform Trade Secrets Act, ("CUTSA"), and (2) the Second Amended Complaint does not allege facts that plausibly demonstrate Defendants intentionally interfered with contracts. The Court agrees with both contentions.

1. Preemption Under CUTSA

In summary, Defendants' preemption argument is that (1) Count II is based on the misappropriation of Ahern's trade secrets, (2) CUTSA provides the **[*25]** exclusive remedy for misappropriations of trade secrets, so (3) Count II is preempted. To address this argument, the Court begins by examining CUTSA.

HN3[] CUTSA provides a cause of action for misappropriation of trade secrets. *CAL. CIV. CODE § 3426.3*. Misappropriation includes "[a]cquisition of a trade secret of another by a person who knows or has reason to know that the trade secret was acquired by improper means." *Id. § 3426.1(b)(1)*. Misappropriation also includes the use of a trade secret by someone who knows or has reason to know that the trade secret was misappropriated or derived from a person who owed a duty to maintain the trade secret's secrecy. *Id. § 3426.1(b)(2)*. A trade secret is information (including a compilation of information) that (1) "[d]erives economic value . . . from not being generally known to the public or to other persons" and "[i]s the subject of efforts that are reasonable under the circumstances to maintain its secrecy." *Id. § 3426.1(d)*.

HN4[] CUTSA also contains a preemption provision. *K.C. Multimedia, Inc. v. Bank of Am. Tech. & Operations, Inc., 171 Cal. App. 4th 939, 954, 90 Cal. Rptr. 3d 247 (2009)* (citing *Cal. Civ. Code § 3426.7*). The preemption provision "expressly allows contractual and criminal remedies, whether or not based on trade secret misappropriation [but] at the same time, *§ 3426.7* implicitly preempts alternative civil remedies based on trade secret misappropriation." **[*26]** *Id.* Accordingly, claims are preempted where they are "based entirely on the same factual allegations that form the basis of [a] trade secrets claim." *Id. at 955* (quotation omitted). But claims are not preempted if they are not based on allegations that constitute a misappropriation of trade secrets. *Cal. Civ. Code § 3426.7(b)(2)*.

Defendants describe Count II as alleging that they intentionally interfered with Ahern's contracts by using Ahern's misappropriated trade secrets, so they contend that Count II is preempted by CUTSA. Ahern does not dispute that Count II would be preempted if Defendants' description of Count II is accurate but contends that Count II is based on other, different conduct. So the critical question is: what conduct forms the basis for Count II? The only insight Count II itself provides is that

> Plaintiff is informed and believes, and on that basis alleges, that Defendants intentionally and knowingly disrupted and interfered with Ahern's contractual relationships with customers (including McKinley Equipment Corp. and Nationwide Electrical Contractors), and knew that their conduct was certain or substantially certain to disrupt Ahern's contractual relationship with its customers.

(Doc. 238, at ¶ 52.) Count **[*27]** II does not explain *how* Defendants "disrupted and interfered" with Ahern's contractual relationships; it just asserts, in conclusory fashion, that they did.

As discussed in Part I, the Second Amended Complaint's general allegations repeatedly accuse Defendants of taking and using Ahern Confidential Information to injure Ahern's business relationships — but Ahern Confidential Information constitutes a trade secret under CUTSA. In describing Ahern Confidential Information, the Second Amended Complaint alleges all of the facts necessary to make it a trade secret under *§ 3426.1(d)*: it is non-public information that generates economic value from being non-public, and Ahern takes active steps to preserve it secrecy. (*Id.* at ¶¶ 21-23, 31.) The Second Amended Complaint also explicitly attaches the label "trade secret" to Ahern Confidential Information. (*Id.* at ¶¶ 25-26.) Thus, if Count II is based on anything, it is based on Defendants' alleged use of misappropriated trade secrets — which means that it is preempted by CUTSA.

As stated above Ahern contends that Count II is based on conduct unrelated to misappropriation of trade secrets, but for support it relies on allegations made in the context of completely **[*28]** different counts. The Court does not believe that Ahern can (as it is attempting to do) support the viability of Count II by relying on allegations made specifically for Count V; that is not a fair or logical way to read or interpret Count II. Moreover, the allegations Ahern points to from other counts do not support Count II or clarify that Defendants tortiously interfered with Ahern's contracts with customers by means other than using misappropriated trade secrets. For instance:

• In Count V (breach of duty of loyalty) the Second Amended Complaint alleges that Allen and Torres "use[d] other forms of non-trade secret Ahern property to facilitate their personal benefit and not the benefit of Ahern, and in fact with the intent of using it against Ahern's interest." (*Id.* at ¶ 75.) But Ahern does not (1) identify the non-trade secret property Allen and Torres allegedly used or (2) allege that any Defendant used non-trade secret information to interfere with Ahern's contracts.

• That paragraph also alleges that Allen and Torres "solicit[ed] Ahern Employees to leave Ahern and go to work for ES, with the intention of diverting not only key employees, but also diverting business opportunities **[*29]** and client relationships away from Ahern." (*Id.*) While this allegation may plausibly suggest a breach of the duty of loyalty Allen and Torres owed to Ahern, it does not plausibly suggest conduct that supports a claim for intentional interference with contracts. And it says nothing about EquipmentShare.

• In Count VII (unfair business practices) Ahern alleges that Defendants "engaged in a scheme to interfere with Ahern's contracts and economic advantage, to sow discord among Ahern's employees through a disparaging solicitation campaign, and to take market share and personnel from Ahern through the use of former employees who acted against Ahern while still employed by Ahern." (*Id.* ¶ 86.) This alleges conduct directed to Ahern's contracts with employees and does not describe any conduct that interfered with Ahern's contracts with customers.

• In Count VII Ahern also alleges that Defendants "conspired and acted . . . to interfere with Ahern's existing business relationships with its employees and customers." (*Id.* ¶ 87.) But this allegation does not establish what means were utilized, much less demonstrate that the means utilized were anything other than the use of Ahern Confidential Information **[*30]** (i.e., trade secrets) as alleged in the Second Amended Complaint's general allegations.

The best possible interpretation of Count II is that Defendants allegedly used misappropriated trade secrets to interfere with Ahern's contracts with its customers. This claim is preempted by CUTSA, so Count II must be dismissed.

2. Sufficiency of the Allegations

Defendants argue that Count II must be dismissed even if it is not preempted because it is not adequately pleaded. Ahern contends that Count II satisfies the requirements of *Iqbal* and *Twombly*. The Court agrees with Defendants.

Portions of the Court's preemption discussion are also relevant on this issue. ***HN5***[] To state a claim for intentional interference with a contract, Ahern must allege "1) the existence of a valid contract between plaintiff and a third party; 2) the defendant's knowledge of the contract; 3) the defendant's intentional acts designed to induce a breach or disruption of the contractual relationship; 4) actual breach or disruption of the contractual relationship; and 5) resulting damage." *AccuImage Diagnostics Corp. v. Terarecon, Inc., 260 F. Supp. 2d 941, 956 (N.D. Cal. 2003)* (*citing Quelimane Co. v. Stewart Title, 19 Cal. 4th 26, 77 Cal. Rptr. 2d 709, 960 P.2d 513, 530 (Cal. 1998)*). But Count II fails to allege several of these elements in sufficient detail to satisfy *Iqbal* and *Twombly*. First, Count II alleges, in **[*31]** conclusory fashion, "that Defendants intentionally and knowingly disrupted and interfered with Ahern's contractual relationships with customers (including McKinley Equipment Corp. and Nationwide Electrical Contractors)," (Doc. 238, ¶ 52), but this is just a formulaic recitation of the tort's third element and is therefore insufficient. ***HN6***[] "[A] plaintiff's obligation to provide the grounds of his entitlement to relief requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do," *Twombly, 550 U.S. at 555* (cleaned up), and "the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions. Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Iqbal, 556 U.S. at 678*. Count II only reiterates the third element — unless, of course, one looks outside of Count II. But doing so brings Ahern right back to the difficulty in identifying the conduct of Defendants that Count II is based on. For the reasons discussed in Part II(B)(1):

• Count II cannot be based on Defendants' use of misappropriated trade secrets,

• the conduct described in paragraph 75 in connection **[*32]** with Count V does not satisfy the pleading requirements for Count II because it does not describe any conduct Defendants took with respect to Ahern's contracts with customer contracts (or any conduct by EquipmentShare),

• the conduct described in paragraph 86 in connection with Count VII also does not involve Ahern's contracts with customers, and

• the conduct described in paragraph 87 in connection with Count VII is just as conclusory as Count II itself.

For these reasons, Count II does not adequately allege that Defendants engaged in intentional acts designed to induce a breach or disruption Ahern's contractual relationship with customers.

Count II also does not adequately allege the fourth element, which requires that there be an actual breach or disruption in Ahern's contractual relationship with a customer. In dismissing this claim as it appeared in the First Amended Complaint, the Court held the pleading was insufficient because it did "not specify any actual contracts with customers . . . that were interfered with or affected by Defendants." (Doc. 25, p. 10.) Count II now states that Defendants "disrupted and interfered with" Ahern's contractual relationships with . . . McKinley **[*33]** Equipment Corp. and Nationwide Electrical Contractors," (Doc. 238, ¶ 52), but this is another inadequate conclusion. Were the contracts terminated? Were the contracts breached? Count II provides no information that plausibly suggests disruption or interference occurred; it simply declares that such occurred and in that way it does not "nudge the claim across the line from conceivable to plausible" as required by *Iqbal* and *Twombly*. *McDonough v. Anoka County, 799 F.3d 931, 945 (8th Cir. 2015)* (quotation omitted); *see also* *Iqbal, 556 U.S. at 680*.

3. Conclusion

For these reasons, the Court concludes that Count II is preempted by CUTSA because it is based on the use of misappropriated trade secrets. Even if it is not preempted, Count II fails to adequately allege the third and fourth elements for the tort of intentional interference with contract. Accordingly, Count II is dismissed with prejudice.

C. Count III — Intentional Interference with Prospective Economic Advantage

Defendants' arguments regarding Count III are similar to their arguments with respect to Count II: that the claim for interference with prospective economic advantage must be dismissed because it is preempted by CUTSA and is not adequately pleaded. As with Count II, the Court agrees with Defendants.

Count III contends that **[*34]** Defendants interfered with Ahern's business relationships and potential economic benefits involving Ahern customers and employees. (Doc. 238, ¶ 56.) It first contends that Torres and Allen committed the tort by using "Confidential Information to target Ahern's customers and undercut Ahern's pricing," (*id.*, ¶ 57), but (1) nothing indicates what "Confidential Information" is or that it is different from Ahern Confidential Information and (2) customer lists and pricing information were specifically included in the definition of Ahern Confidential Information. Thus, to this extent, Count III is preempted by CUTSA.

The remaining aspects of Count III fail to satisfy the pleading requirements of *Iqbal* and *Twombly*. As the Court explained with respect to this claim as it appeared in the First Amended Complaint:

> ***HN7***[] To state a claim for intentional interference with prospective economic advantage, Ahern must allege "1) an existing economic relationship or one 'containing the probability of future economic benefit'; 2) knowledge by the defendant of the relationship; 3) acts by defendant designed to disrupt the relationship; 4) actual disruption of the relationship; 5) damages proximately caused by **[*35]** the acts of the defendant." *AccuImage Diagnostics Corp., 260 F. Supp. 2d at 956* (*citing* *Della Penna v. Toyota Motor Sales, U.S.A., 11 Cal. 4th 376, 45 Cal. Rptr. 2d 436, 902 P.2d 740, 743 n.1 & 750-51 (Cal. 1995))*. In addition, "the act must be wrongful by some legal measure other than the fact of interference itself." *Id.* (*citing* *Della Penna, 902 P.2d at 751*). Thus, Ahern must allege that Defendants' conduct was "independently wrongful." *Id.* (*citing* *Bed, Bath & Beyond of La Jolla, Inc. v. La Jolla Vill. Square Venture Partners, 52 Cal. App. 4th 867, 881, 60 Cal. Rptr. 2d 830 (1997))*. An act is "independently wrongful" if it is "unlawful, that is, if it is proscribed by some constitutional, statutory, regulatory, common law, or other determinable legal standard." *Edwards v. Arthur Andersen LLP, 44 Cal. 4th 937, 81 Cal. Rptr. 3d 282, 189 P.3d 285, 290 (Cal. 2008)*.

(Doc. 25, pp. 10-11.) And in dismissing this claim from the First Amended Complaint, the Court stated, *inter alia*, that "Ahern ha[d] not alleged that Defendant's conduct was independently wrongful." (*Id.*, p. 11.) Nonetheless, Ahern has simply alleged that "Defendants solicited Ahern employees and customers unfairly using disparaging tactics intended to disrupt and impair Ahern's relationships with its customers," (Doc. 238, ¶ 58), which is the same allegation that the Court found insufficient when it considered this claim before. The Court adheres to its conclusion.

For these reasons, Count V is dismissed with prejudice.

D. Count VII — Unfair Business Practices in violation of the *California Business and Professions Code § 17200*

EquipmentShare argues that Count VII fails to adequately allege a violation of California's **[*36]** Business & Professions Code. The argument is similar to one the Court rejected when it reviewed the First Amended Complaint, and the Court rejects it again.

HN8[] The California Business & Professions Code prohibits "any unlawful, unfair or fraudulent business act or practice." *Cal. Bus. & Prof. Code § 17200*. "By proscribing 'any unlawful' business practice, *section 17200* borrows violations of other laws and treats them as unlawful practices that the unfair competition law makes independently actionable." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 539-40 (Cal. 1999)* (quotations omitted). However, "a practice may be deemed unfair even if not specifically proscribed by some other law." *Id.* The word "unfair" means "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Scripps Clinic v. Superior Court, 108 Cal. App. 4th 917, 939, 134 Cal. Rptr. 2d 101 (2003)* (*citing* *Cel-Tech, 973 P.2d at 544*).

Like the First Amended Complaint, the Second Amended Complaint alleges that Defendants:

> (1) disparaged Ahern to its current employees and customers,
>
> (2) prepared to "compete with Ahern and [used] Ahern's internal systems under the false pretenses of being loyal employees of Ahern and acting in Ahern's best interests," and **[*37]**

(3) failed to "disclose key facts to Ahern, which Allen and Torres were under a duty to disclose[.]"

(Doc. 238, ¶ 89.) Count VII also alleges (as did the First Amended Complaint) that Defendants engaged in this conduct to "interfere with Ahern's contracts and economic advantage, to sow discord among Ahern's employees through a disparaging solicitation campaign, and to take market share and personnel from Ahern through the use of former Ahern employees who acted against Ahern while still employed by Ahern." (*Id.* at ¶ 88.)

In challenging this claim in the First Amended Complaint, EquipmentShare argued that these allegations failed to satisfy the requirement that they engage in unlawful or wrongful conduct. The Court rejected that argument, (Doc. 25, pp. 14-15 & n.7), and EquipmentShare does not explain why the Court should revisit is ruling. The Court discerns no reason to do so; EquipmentShare's arguments are rejected for the reasons previously stated.[5]

III. CONCLUSION

EquipmentShare's Motion to Dismiss, (Doc. 279), and Allen's and Torres's Motion to Dismiss, (Doc. 280), are **GRANTED IN PART** and **DENIED IN PART**. Counts II and III are dismissed with prejudice.

IT IS SO ORDERED.

/s/ Beth Phillips **[*38]**

BETH PHILLIPS, CHIEF JUDGE

UNITED STATES DISTRICT COURT

DATE: April 21, 2021

---

[5] In its Reply Suggestions, EquipmentShare argues that Count VII is preempted by CUTSA. The Court also rejected this argument previously, (Doc. 25, pp. 16-18), and the Court adheres to that decision insofar as Count VII is predicated on actions unrelated to Ahern Confidential Information.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Under *Fed. R. Civ. P. 12(b)(6)*, a defendant may move to dismiss for failure to state a claim upon which relief can be granted. A plaintiff must state enough facts to state a claim to relief that is plausible on its face. A claim has facial plausibility if the plaintiff pleads facts that allow the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

In resolving a *Fed. R. Civ. P. 12(b)(6)* motion under Twombly, the court must follow a two-pronged approach. First, the court must accept all well-pleaded factual allegations as true, but threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice. Nor must the court accept as true a legal conclusion couched as a factual allegation. Second, assuming the veracity of well-pleaded factual allegations, the court must determine whether they plausibly give rise to an entitlement to relief. This determination is context-specific, requiring the court to draw on its experience and common sense, but there is no plausibility where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct.

Evidence > Judicial Notice > Adjudicative Facts > Facts Generally Known

Evidence > Judicial Notice > Adjudicative Facts > Public Records

Evidence > Judicial Notice > Adjudicative Facts > Verifiable Facts

HN3[] **Adjudicative Facts, Facts Generally Known**

Under *Fed. R. Evid. 201*, the court may take judicial notice of matters of public record if the facts are not subject to reasonable dispute. *Fed. R. EvId. 201(b)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN4[] **Motions to Dismiss, Failure to State Claim**

Even if a document is not attached to a complaint, it may be incorporated by reference into a complaint if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim. The defendant may offer such a document, and the district court may treat such a document as part of the complaint, and thus may assume that its contents are true for purposes of a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*.

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Indispensable Parties

Civil Procedure > ... > Joinder of Parties > Compulsory Joinder > Necessary Parties

HN5[] **Compulsory Joinder, Indispensable Parties**

Fed. R. Civ. P. 12(b)(7) permits dismissal for failure to join a party pursuant to *Fed. R. Civ. P. 19*, and in order to determine whether dismissal is appropriate, the court must determine whether the absent party is required. *Fed. R. Civ. P. 19(a)*. A party is required in two scenarios: (1) when complete relief is impossible without the absent party; or (2) when the absent party claims a legally protected interest in the action such that (i) disposition of the action may impair or impede the person's ability to protect that interest or (ii) leave any of the persons already parties subject to a substantial risk of incurring multiple or otherwise inconsistent obligations. *Fed. R. Civ. P. 19(a)*.

Business & Corporate Compliance > ... > Causes of Action Involving Trademarks > Infringement Actions > Determinations

Trademark Law > Causes of Action Involving Trademarks > Infringement Actions > Burdens of Proof

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > Standing

HN6[] **Infringement Actions, Determinations**

To establish standing to sue for trademark infringement under the Lanham Act, a plaintiff must show that he or she is either (1) the owner of a federal mark registration, (2) the owner of an unregistered mark, or (3) a nonowner with a cognizable interest in the allegedly infringed trademark.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

Business & Corporate Compliance > ... > Likelihood of Confusion > Factors for Determining Confusion > Comparison of Advertising

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Advertising > Elements of False Advertising

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN7[] **False Advertising, Lanham Act**

A plaintiff suing under the Lanham Act for false advertising ordinarily must show economic or reputational injury flowing directly from the deception wrought by the defendant's advertising.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN8[] **Trade Practices & Unfair Competition, State Regulation**

In order to have standing to assert a *Cal. Bus. & Prof. Code § 17200* claim, the plaintiff must (1) establish a loss or deprivation of money or property sufficient to qualify as injury in fact, i.e., economic injury, and (2) show that economic injury was the result of, i.e., caused by, the unfair business practice or false advertising that is the gravamen of the claim.

Business & Corporate Compliance > ... > Causes of Action Involving Trademarks > Infringement Actions > Determinations

Trademark Law > Causes of Action Involving Trademarks > Infringement Actions > Burdens of Proof

HN9[] **Infringement Actions, Determinations**

To state a claim for trademark infringement, a plaintiff must allege two elements: first, that the plaintiff owns a valid and protectible trademark; and second, that a defendant used, in commerce, a similar mark without authorization in a manner that is likely to cause consumer mistake, confusion, or deception.

Antitrust & Trade Law > Consumer Protection > False Advertising > Lanham Act

Trademark Law > ... > Particular Subject Matter > Geographic Terms > Terms Ineligible for Protection

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Advertising > Elements of False Advertising

HN10[] **False Advertising, Lanham Act**

The Lanham Act prohibits a person from misrepresenting the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities in commercial advertising or promotion. A false advertising claim requires a showing that: (1) the defendant made a false statement either about the plaintiff's or its own product; (2) the statement was made in commercial advertisement or promotion; (3) the statement actually deceived or had the tendency to deceive a substantial segment of its audience; (4) the deception is material; (5) the defendant caused its false statement to enter interstate commerce; and (6) the plaintiff has been or is likely to be injured as a result of the false statement, either by direct diversion of sales from itself to the defendant, or by a lessening of goodwill associated with the plaintiff's product.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Designation of Origin > Elements of False Designation of Origin

HN11[] **False Designation of Origin, Elements of False Designation of Origin**

To prevail on a false designation of origin claim, a plaintiff must show that the defendant used in commerce any word, term, name, symbol, or device that is likely to cause confusion, or to cause mistake, or to deceive as to the affiliation, connection, or association of defendant with plaintiff, or as to the origin, sponsorship, or approval of his goods by plaintiff.

Torts > ... > Fraud & Misrepresentation > Nondisclosure > Elements

HN12[] **Nondisclosure, Elements**

The elements of a claim for fraudulent concealment are: (1) the defendant concealed or suppressed a material fact; (2) the defendant was under a duty to disclose the fact to the plaintiff; (3) the defendant intentionally concealed or suppressed the fact with the intent to defraud the plaintiff; (4) the plaintiff was unaware of the fact and would not have acted as he did if he had known of the concealed or suppressed fact; and (5) as a result of the concealment or suppression of the fact, the plaintiff sustained damage.

Torts > ... > Compensatory Damages > Types of Losses > Economic Losses

Torts > ... > Fraud & Misrepresentation > Negligent Misrepresentation > Remedies

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Remedies

HN13[] **Types of Losses, Economic Losses**

Under the economic loss doctrine, tort claims are barred where they are based on the same facts and damages as a breach of contract claim. The economic loss doctrine precludes recovery for purely economic loss due to disappointed expectations, unless the plaintiff can demonstrate harm above and beyond a broken contractual promise. The weight of authority counsels in favor of applying the economic loss doctrine to fraudulent concealment. The economic loss doctrine bars recovery in tort for the same loss that emanates from a broken contractual promise.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Torts > Business Torts > Unfair Business Practices > Elements

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN14[] **State Regulation, Claims**

California's Unfair Competition Law (UCL) prohibits any unlawful, unfair, or fraudulent business act or practices. *Cal. Bus. & Prof. Code § 17200 et seq.* To prevail on a UCL claim, a plaintiff must make a twofold showing: he or she must demonstrate injury in fact and a loss of money or property caused by unfair competition.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN15[] **Trade Practices & Unfair Competition, State Regulation**

In the context of *Cal. Bus. & Prof. Code § 17200*, unfair means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN16[] **Trade Practices & Unfair Competition, State Regulation**

It is well-established that where a claim of an unfair act or practice is predicated on public policy, the public policy which is a predicate to the action must be tethered to specific constitutional, statutory or regulatory provisions.

Opinion

CIVIL MINUTES - GENERAL

Proceedings: [IN CHAMBERS] Order Regarding Motion to Dismiss

Defendant DFO Global Performance Commerce Ltd. (formerly DBA Direct Focus Online Ltd.) ("DFO Global") filed a motion to dismiss the Second Amended Complaint ("SAC") of Plaintiff Agency Y LLC ("Agency Y"). Mot., Dkt. No. 39. Agency Y opposed the motion. Opp'n., Dkt. No. 40. DFO Global Replied. Reply, Dkt. No. 43.

For the following reasons, the Court **GRANTS** the motion with leave to amend.

I. BACKGROUND

The following facts are alleged in Agency Y's SAC.

On September 3, 2016, Tim Burd ("Burd"), based on his expertise and reputation in the internet marketing field, created a Facebook Business Manager Account at the highest setting, (5,000 ad accounts). SAC, Dkt. No. 38 ¶ 12. The usual number of ad accounts is around 2-10 per Business Manager. Id. Burd is a high profile internet marketing expert and owner of a service mark application for "Tim Burd" (App. No. 90230756) who attracts high-end clients that routinely spend in the $100,000 a month range. Id.

Later in 2016, **[*2]** Burd and Sean Brown ("Brown") founded Agency Y and created a successful brand under the service mark "AGENCY Y" to promote its internet marketing services via its website at "www.agencyy.com." Id. ¶ 13. Burd and Brown are the original owners of well-established common law service mark rights to Agency Y in connection with lead generation for online ads and internet marketing. Id. Since 2016, clients have placed confidence and trust in the services offered under the Agency Y brand that created goodwill in the Agency Y mark. Id. ¶ 14.

In December 2016, Agency Y registered www.agencyy.com through the registrar GoDaddy (the "Domain"), which has been an important mechanism through which Agency Y has interacted with its clients. Id. ¶ 16. Agency Y invested substantial time, effort, and resources in promoting and marketing its services through Agency Y. As a result, the mark in connection with these services was valuable with considerable goodwill. Id. ¶ 17. In 2017 alone, Agency Y expended approximately $700,000 on the marketing, advertising, and promotion of services offered under the AGENCY Y mark. Id. ¶ 18 From 2016 to 2020, Agency Y participated in numerous regional and global conferences **[*3]** to market and promote its services under the AGENCY Y mark. Id. ¶ 19. Agency Y's mark is distinctive to both the consuming public and Agency Y's trade. Id. ¶ 22. In 2017 alone, Agency Y generated over $750,000 in Year-1 revenue under its Agency Y mark. Id. Clients understood that the Agency Y services originated from Agency Y and Burd, and based on the strength of the Agency Y brand, Year 1 revenue, and Burd's reputation, the business could easily have sold for a substantial sum. Id.

During the period of December 2016 to February 2019, the Agency Y mark and services received significant coverage in various media, including from well-known publishers and media outlets such as Facebook and Instagram, and received substantial promotion from Facebook groups, name brand recognition with Burd, word of mouth marketing, and personal referrals.Id. ¶ 24. Burd heavily promoted Agency Y through interviews, podcasts, seminars, speaking events at conferences, and paid sponsorships. Id. In early 2020, Burd participated in multiple Agency Y promotion videos in DFO Global's San Diego office. Id.

In November 2017, Agency Y entered into an agreement (the "Agreement") with DFO Global. Id. ¶ 25. During the **[*4]** course of this initial Agreement, Agency Y remained the owner of the Agency Y service mark and all goodwill associated with it. Id. DFO Global's principal, Bruce Cran ("Cran"), promised to drive and grow the Agency Y business once it was under the DFO Global umbrella. Id.

For approximately two years thereafter, Agency Y believed that the parties coexisted within the parameters of the Agreement. Id. ¶ 26. In reality, once DFO Global took over day-to-day management, DFO Global began the process of taking control of Agency Y's customers and business, including the service mark and associated goodwill, which involved, among other things, falsifying ownership in a U.S. federal service mark application in violation of federal law. Id. ¶ 27. DFO Global withheld this information about the Agency Y mark with an ongoing intent to deceive and manipulate Agency Y into assigning its IP rights. Id. DFO Global intended to claim ownership, acquire the business created by Burd through the Agency Y brand, and divert it to DFO Global's new company: Amasa. Id. ¶ 28. In essence, DFO Global was surreptitiously destroying the Agency Y brand, all before Agency Y realized the extent of the betrayal. Id.

In February **[*5]** 2019, in an Addendum to the Agreement insisted on by DFO Global and Cran (while withholding material facts from Agency Y and Burd), Agency Y assigned to DFO Global the IP assets to the AGENCY Y brand including the AGENCY Y mark and the www.agencyy.com domain (with Burd still holding a leadership role in Agency Y). Id. ¶29.

During this time, Burd assisted DFO Global with bringing in a client only to witness DFO Global fire the client and take the client's business model. Id. ¶ 30. Burd was appalled at DFO Global's blatant disregard for the client and misuse of Burd's reputation, and he insisted that DFO Global apologize to the client and promise to grow the brand or return the brand to Agency Y (as it was not worth ruining Agency Y's or Burd's reputations). Id. Because of Agency Y's concerns about DFO Global's poor performance, the parties entered into a Second Addendum to the Agreement that, among other things, outlined Burd's and DFO Global's obligations and included a clause for returning the Agency Y IP assets to Agency Y. Id.

The Second Addendum states in pertinent part: "... if Agency Y has shown positive growth in terms of number of employees and clients, this Agreement shall remain **[*6]** effective in accordance with this Agreement as amended. Otherwise, this Agreement shall be terminated, and the Company shall assign back to Agency Y any and all rights, title and interest to the IP Assets as contemplated in Section 8 herein as amended." Id. ¶ 31 Agency Y and Burd later observed that its brand was suffering damage to its business reputation with decreased goodwill associated with its mark, meaning that customers were less likely to select Agency Y and instead take their business elsewhere. Id.

Later, DFO Global requested a lower commission, and Agency Y denied this request but instead proposed a buy-out at market value. Id. ¶ 32. In response, on May 28, 2020, DFO Global's counsel sent a letter to Agency Y advising of a perceived breach of contract for failure to provide leads and that such breach required rectification. Id. This was followed by a May 29, 2020 letter reminding Agency Y of its obligations under the Agreement, as amended. Id. Also on May 29, 2020, Cran sent a letter to Agency Y supporting the breach of contract theory, cancelling the contract, and then ostensibly retracting the prior statements to make a proposal to continue the relationship on virtually **[*7]** the same terms provided for in the Agreement, as amended. Id. ¶ 32.

On June 3, 2020, Burd requested clarification about the return of the IP assets, to which Cran replied that DFO Global owns Agency Y and the registered mark for Agency Y, and that the Agreement, as amended, does not provide for the return of the IP. Id. ¶ 34. Cran again suggested that the parties continue the relationship without a formal contract. Id. On June 4, 2020, Agency Y provided an in-depth response to the series of letters and emails correcting Cran's mistaken view that the Agreement, as amended, did not address the return of the IP. Id. ¶¶ 35-36. Agency Y invoked Section 3(c) of the Second Addendum and demanded return of the IP assets immediately. Id.

_ DFO Global's counsel replied on June 10, 2020 and incorrectly stated that it had already served notice of termination and therefore Agency Y's claim to invoke *Section 3(c)* was not relevant. Id. ¶ 37. DFO Global's statement that payments would terminate at the end of the contract were also not correct, as Section 3(b) still remained in effect and states that despite termination, Section 2 along with other Sections survive termination. Id.

Unbeknownst to Agency Y and in **[*8]** violation of the Agreement, DFO Global fraudulently applied for a United States service mark registration for Agency Y with the USPTO on October 2, 2018 (Application No. 88/139,137). Id. ¶ 38. DFO Global's filing of the service mark was only possible because of the fraud it perpetrated. Id. ¶ 39. Agency Y would never have entered into the Agreement or either Addendum had it known of DFO Global's intentions. Id.

Upon applying for registration with the USPTO, DFO Global was required to sign a declaration indicating, among other things, that it was the owner of the mark. Id. ¶ 40. Furthermore, DFO Global was warned that willful false statements and the like are punishable by fine or imprisonment, or both, under *18 U.S.C. § 1001*, and that willful false statements may jeopardize the validity of the application or submission or any registration resulting therefrom. Id.

As soon as Agency Y discovered the unauthorized registration, it gathered the necessary information and submitted a petition to cancel the registration on June 26, 2020. Id. ¶ 46. The Cancellation proceeding is in process. Id. After the filing of the unauthorized application, DFO Global continued to divest itself of the contract with Agency **[*9]** Y with the intent to deceive consumers to move to DFO Global's new company, Amasa Id. ¶ 47. With Agency Y out of the way, DFO intended to divert Agency Y's high-end clients to its own company website, www.agencyamasa.com, and in the process destroy the AGENCY Y brand. Id. As of August 29, 2020, the DFO Global website ("www.dfo.global") displayed Agency Y in the "About Us" section, and clicking on the link for more information about Agency Y diverted to the AMASA website. Id. ¶ 49. After the filing of the Complaint, DFO Global removed all traces of Agency Y from the DFO Global website and partially restored the Agency Y website. Id.

_On June 22, 2020, DFO Global made an announcement about a rebranding initiative before the parties had an opportunity to discuss the proper distribution of the IP assets. Id. ¶ 52. DFO Global withheld material facts when it withheld information about the pending "rebranding." Id. The announcement contains many false statements with the intent to deceive clients into thinking that Agency Y and Burd were affiliated with and approved of the alleged rebranding to Amasa. Id. ¶ 53. On January 27, 2021, DFO Global, without permission, changed the Burd-originated **[*10]** Facebook Business Manager ad account to Amasa with a dead link to www.agencyy.com that leads to a defunct website. Id. ¶ 50. Lack of a functioning website for an internet business is a death knell. Id. Another misleading public document about Agency Y and Amasa is a "PitchBook" profile, which improperly merges Agency Y with Amasa. Id. ¶ 56. Still another misleading and incomplete profile is the Agency Y "LinkedIn" page, which states that Agency Y is "powered by" DFO Global and lists Burd as an employee. Id. ¶ 57.

Agency Y's SAC alleges nine causes of action against DFO Global, for: (1) Federal Trademark Infringement; (2) Federal Unfair Competition; (3) Fraudulent Concealment; (4) Violation of California Unfair Competition Law; (5) Common Law Trademark Infringement; (6) Common Law Unfair Competition; (7) Breach of Contract; (8) Breach of Implied Covenant of Good Faith and Fair Dealing; (9) Violation of Anti-Cybersquatting Consumer Protection Act.

II. Legal Standard

A. Motion to Dismiss

HN1[] Under *Rule 12(b)(6)*, a defendant may move to dismiss for failure to state a claim upon which relief can be granted. A plaintiff must state "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim **[*11]** has "facial plausibility" if the plaintiff pleads facts that "allow[] the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

HN2[] In resolving a 12(b)(6) motion under Twombly, the Court must follow a two-pronged approach. First, the Court must accept all well-pleaded factual allegations as true, but "[t]hreadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Iqbal, 556 U.S. at 678*. Nor must the Court "'accept as true a legal conclusion couched as a factual allegation.'" *Id. at 678-80* (quoting *Twombly, 550 U.S. at 555*). Second, assuming the veracity of well-pleaded factual allegations, the Court must "determine whether they plausibly give rise to an entitlement to relief." *Id. at 679*. This determination is context-specific, requiring the Court to draw on its experience and common sense, but there is no plausibility "where the well-pleaded facts do not permit the court to infer more than the mere possibility of misconduct." Id.

B. Request for Judicial Notice

HN3[] Under *Federal Rule of Evidence 201*, the Court may take judicial notice of matters of public record if the facts are not "subject to reasonable dispute." *Lee v. City of Los Angeles, 250 F.3d 668, 688-89 (9th Cir. 2001)*; see *Fed. R. EvId. 201(b)*.

III. Discussion

A. Incorporation By Reference

DFO Global first asks the **[*12]** Court to incorporate by reference the parties' Agreement and the two Addenda to the Agreement, because Agency Y refers extensively to these documents in its SAC. See Mot., Dkt. No. 39 at 4. DFO Global also seeks judicial notice of the Agency Y Facebook Page, LinkedIn page, and a video by Burd that is "currently available on the Facebook page." Id. Agency Y does not appear to oppose this request.

HN4[] "Even if a document is not attached to a complaint, it may be incorporated by reference into a complaint if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim. The defendant may offer such a document, and the district court may treat such a document as part of the complaint, and thus may assume that its contents are true for purposes of a motion to dismiss under *Rule 12(b)(6)*." *United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)*(citations omitted).

The Court agrees with DFO Global that Agency Y relies extensively on the Agreement and its two Addenda in its SAC. See, e.g., SAC ¶¶ 25, 29, 31-36; 38-39; 41; 124-136. Agency Y also refers to the Agency Y Facebook and LinkedIn pages. Accordingly, the Court **GRANTS** the request with reepect to the the Agreement between the parties, the First and Second Addenda **[*13]** to the Agreement, and the Facebook and LinkedIn pages. However, the the Court **DENIES** the request with respect to the Burd video, as the Court does not find that it is incorporated by reference in the complaint.

B. Request for Judicial Notice

DFO Global seeks judicial notice of what it has marked as "Exhibit 3," which is described as "information gathered from the United States Patent and Trademark Office. . .." RJN, Dkt. No. 39-4, at 2. DFO Global explains that it "seeks to have the Court take judicial notice of document [sic] related to the application for the Tim Burd mark." Id. Agency Y objects to the RJN, arguing that "the information provided in DFO's Exhibit 3 is not actually a document from the USPTO and the information provided is incomplete," and that "[t]here is a significant dispute as to the contents of the 'alleged' document that DFO is attempting to interpose via judicial notice." See RJN Opp'n., Dkt. No. 41, at 4.

The Court finds that the proposed document is not clearly enough a true and correct copy of the USPTO's records to be considered a matter of public record with the facts not "subject to reasonable dispute." See Lee 250 F.3d, 688-89 (9th Cir. 2001); see also *Fed. R. EvId. 201(b)*. Accordingly, the Court **DENIES** the RJN **[*14]** with respect to Exhibit 3.

C. Motion to Dismiss

i. Causes of Action with Respect to the Burd Mark—Standing

DFO Global argues that Agency Y lacks standing to sue for Burd's damaged reputation or trademark rights because Burd is not a plaintiff in this case. Mot., Dkt. No. 39, at 5. Accordingly, DFO Global seeks dismissal of the allegations within the trademark infringement, false designation of origin, false advertising, and unfair competition claims that center on Burd's alleged harm. Id.

Agency Y argues in opposition that DFO Global's motion as it relates to the Burd allegations results in two possibilities:

> First, Plaintiff can independently pursue its claims without Burd pursing [sic] his own claims against DFO, and DFO has no recourse, since that is not the basis for a Rule 12(b)(1) or Rule 12(b)(6) attack. Alternatively, if Plaintiff cannot independently pursue its claims without Burd, then what DFO is arguing in essence is that Burd is an indispensable party, in which case the ground for dismissal is Rule 12(b)(7), failure to join a party under Rule 19, which sets forth the requirements for joinder.
> Opp'n., Dkt. No. 40, at 13.

The Court finds Agency Y's argument on this point to be unavailing. Regarding the first possibility, the **[*15]** Court agrees that Agency Y can certainly pursue its claims against DFO Global without Burd, but as DFO Global points out in reply, Agency Y "must nevertheless still allege harm to itself." Reply, Dkt. No. 43, at 4. This, therefore, does not cure a standing defect. Regarding the second possibility, DFO Global argues that Burd is neither a necessary nor an indispensable party under *Fed. R. Civ. P. 12(b)(7)*. Id. The Court agrees. ***HN5***[] *Rule 12(b)(7)* permits dismissal for failure to join a party pursuant to *Rule 19*, and in order to determine whether dismissal is appropriate, the Court must determine whether the absent party is "required." See *EEOC v. Peabody Western Coal Co., 400 F.3d 774, 779 (9th Cir. 2005)*; see also *Fed. R. Civ. P. 19(a)*. A party is "required" in two scenarios: (1) when complete relief is impossible without the absent party; or (2) when the absent party claims a legally protected interest in the action such that (i) disposition of the action may "impair or impede" the person's ability to protect that interest or (ii) leave any of the persons already parties subject to a substantial risk of incurring multiple or otherwise inconsistent obligations. *Fed. R. Civ. P. 19(a)*. The Court finds that Burd is not indispensable because complete relief as to the current parties—Agency Y and DFO Global—is possible without joining Burd. **[*16]** *Rule 12(b)(7)* is not invoked merely because Burd's absence may result in future litigation. Accordingly, the Court will address DFO Global's arguments with respect to standing as the claims relate to the Burd Mark.

1. Trademark Infringement and False Designation of Origin

DFO Global addresses Agency Y's first and second causes of action—for trademark infringement and false designation of origin—together because the standing inquiries with respect to both claims is the same. Mot., Dkt. No. 39, at 6.

HN6[] "To establish standing to sue for trademark infringement under the Lanham Act, a plaintiff must show that he or she is either (1) the owner of a federal mark registration, (2) the owner of an unregistered mark, or (3) a nonowner with a cognizable interest in the allegedly infringed trademark." *Halicki Films, LLC v. Sanderson Sales & Mktg., 547 F.3d 1213, 1225 (9th Cir. 2008)*. DFO Global argues that Agency Y fails to satisfy the first two tests under Halicki Films because the SAC states that the Burd Mark is not registered and Agency Y is not the owner of the mark or the filer of the application. Mot., Dkt. No. 39, at 6. DFO Global goes on to argue that Agency Y fails to satisfy the third alternative element of the Halicki Films test because the pleading fails to identify how Burd's relationship **[*17]** to Agency Y rises to a "cognizable" or "commercial" interest in the Burd Mark. Id., at 7.

The Court agrees with DFO Global that Agency Y has not shown a commercial interest sufficient to confer standing to sue for infringement, as Agency Y has neither pled that it has a royalty or license for exclusive use of the mark, nor has it shown that it is the assignee of the Burd Mark. See *Spin Master, Ltd. v. Zobmondo Entm't, LLC, No. CV 06-3459 ABC PLAX, 2011 U.S. Dist. LEXIS 94905, 2011 WL 3714772, at *6 (C.D. Cal. Aug. 22, 2011)*; *Ultrapure Sys., Inc. v. Ham—Let Grp., 921 F.Supp. 659, 665-66 (N.D. Cal. 1996)*. In short, Agency Y has not alleged that it "personally" suffered a commercial injury separate and apart from any injury Burd suffered as a result of DFO Global's allegedly infringing acts as to the Burd Mark. Accordingly, the Court **GRANTS** the motion to dismiss the trademark infringement and false designation of origin claims insofar as they relate to the Burd Mark for lack of standing with leave to amend.

2. False Advertising

Next, DFO Global argues that the Court should dismiss Agency Y's false advertising claim related to the Burd Mark for lack of standing. Mot., Dkt. No. 39, at 8. Specifically, DFO Global argues that the SAC merely alleges that DFO Global's allegedly false advertising caused Burd injury, and that Agency Y should be able to sue for his harm. Id., at 9 (citing SAC ¶ 59).

HN7[] A plaintiff suing **[*18]** under the Lanham Act for false advertising "ordinarily must show economic or reputational injury flowing directly from the deception wrought by the defendant's advertising[.]" *Lexmark Intern., Inc. v. Static Control Components, Inc., 572 U.S. 118, 133, 134 S. Ct. 1377, 188 L. Ed. 2d 392 (2014)*. The Court does not find that Agency Y has adequately alleged such an injury to itself. Instead, the Court finds that the SAC refers exclusively to Burd's harm as a result of the alleged false advertising. Accordingly, the Court agrees with DFO Global that Agency Y lacks standing to bring this false advertising claim, and thus **GRANTS** the motion to dismiss the false advertising claim insofar as it relates to the Burd Mark with leave to amend.

3. Unfair Competition Law

DFO Global argues that Agency Y's Unfair Competition Law ("UCL") claim, which centers in part on the Burd Mark, is predicated on the improper trademark infringement, false designation of origin, and false advertising claims, and that it therefore cannot survive. Mot., Dkt. No. 39, at 9. Further, DFO Global argues, Agency Y has not demonstrated that it has standing to bring a UCL claim on behalf of DFO Global's alleged use of the Burd Mark for the same reasons addressed in the previous two sections. Id.; see also supra.

HN8[] The Court agrees. In order to **[*19]** have standing to assert a *Section 17200* claim, the plaintiff must "(1) establish a loss or deprivation of money or property sufficient to qualify as injury in fact, i.e., economic injury, and (2) show that economic injury was the result of, i.e., caused by, the unfair business practice or false advertising that is the gravamen of the claim." *Kwikset Corp. v. Superior Court, 51 Cal.4th 310, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011)*. As noted above, Agency Y has not alleged that it (rather than Burd) has been harmed by the allegedly infringing activities. Accordingly, the Court **GRANTS** the motion to dismiss the UCL claim insofar as it relates to the Burd Mark, because Agency Y has failed to demonstrate standing and the requisite injury.

ii. Causes of Action with respect to the Agency Y Mark

1. Trademark Infringement

DFO Global next argues that the Court should dismiss Agency Y's trademark infringement claim as it relates to the Agency Y Mark on the ground that it is inconsistent with and barred by the parties' contracts. Mot., Dkt. No. 27, at 10.

HN9[] To state a claim for trademark infringement, a plaintiff must allege two elements: first, that the plaintiff owns a valid and protectible trademark; and second, that a defendant used, in commerce, a similar mark without authorization in a manner that **[*20]** is likely to cause consumer mistake, confusion, or deception. *So. Cal. Darts Ass'n v. Zaffina, 762 F.3d 921, 929 (9th Cir. 2014)*.

DFO Global argues that Agency Y's trademark infringement claim, based on DFO Global's allegedly unauthorized use of the Agency Y mark, is subject to dismissal because the Agreement makes it clear the DFO Global was entitled to use the mark from the date of the Agreement until Agency Y invoked section 3(c) of the Second Addendum. Mot., Dkt. No. 39, at 11. Further, DFO Global states that Agency Y's claims for unauthorized use even after the emergence of the contractual dispute (post-June 2020) must also be dismissed because a contractual dispute over the ownership and use of assets does not give rise to infringement claims simply because the assets are intellectual property. Id. In effect, DFO Global argues that while the contract at issue involved and referred to the use and ownership of trademark rights, this case ultimately is not a trademark dispute but rather is a straightforward contract dispute. Id.

Agency Y does not appear to respond directly to DFO Global's argument regarding the trademark infringement claim as it relates to the Agency Y Mark. In any event, the Court agrees with DFO Global, and once again dismisses **[*21]** the trademark infringement claim with respect to the Agency Y mark as inconsistent with the contract. Accordingly, the Court **GRANTS** the motion to dismiss the trademark infringement claim as it relates to the Agency Y mark, with leave to amend

2. False Designation of Origin/ False Advertising

DFO Global next asks the Court to dismiss Agency Y's false designation of original, false advertising, and common law unfair competition claims. Mot., Dkt. No. 39, at 10.

HN10[] The Lanham Act "prohibits a person from misrepresenting the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities in commercial advertising or promotion." *Alfasigma USA, Inc. v. First Databank, Inc., 398 F. Supp. 3d 578, 590 (N.D. Cal. 2019)* (citing *15 U.S.C. § 1125(a)(1)(B)*). A false advertising claim requires a showing that: (1) the defendant made a false statement either about the plaintiff's or its own product; (2) the statement was made in commercial advertisement or promotion; (3) the statement actually deceived or had the tendency to deceive a substantial segment of its audience; (4) the deception is material; (5) the defendant caused its false statement to enter interstate commerce; and (6) the plaintiff has been or is likely to be injured as a result of **[*22]** the false statement, either by direct diversion of sales from itself to the defendant, or by a lessening of goodwill associated with the plaintiff's product. *Jarrow Formulas, Inc. v. Nutrition Now, Inc., 304 F.3d 829, 835 n.4 (9th Cir. 2002)*.

The SAC alleges false advertising premised on allegations that (1) DFO Global's filing of the Agency Y mark with the USPTO in the name of DFO Global was false (SAC ¶ 76); and (2) the Pitchbook profile was false (Id. ¶ 56).

Regarding the USPTO Ffiling, the Court finds that Agency Y's SAC suffers from the same defects as did its FAC. Just as before, any unlawfulness regarding DFO Global's filing with the USPTO is based on Section 8(d) of the Agreement, which provides that DFO Global is not the owner Agency Y mark. SAC ¶ 41. Agency Y also again pleads that DFO Global's filing of the service mark was a violation of the Agreement. Id. ¶ 127. As such, the Court once again finds that any damages resulting from the USPTO filing would be breach of contract damages, so the economic loss doctrine bars this tort claim.

Regarding the Pitchbook Profile, Agency Y claims that it contained false statements (SAC ¶ 56), but fails to allege how the Pitchbook profile is "commercial advertisement or promotion" or that DFO Global made the statements. **[*23]** See Mot., Dkt. No. 39, at 13. For the same reasons, DFO Global seeks dismissal of the remainder of the claim (having to do with "allegations regarding the LinkedIn, Facebook, and website") on the grounds that these claims do not discuss the nature, characteristics, qualities, or geographic origin of th services. Id. The Court agrees, and finds that Agency Y's allegations are insufficient to state a claim for false advertising.

DFO Global also asks the Court to dismiss Agency Y's claim for false designation of origin as it relates to the Agency Y Mark. See Mot. Dkt. No. 39, at 13. ***HN11***[] "To prevail on a false designation of origin claim, a plaintiff must show that the defendant 'used in commerce any word, term, name, symbol, or device ...' that is 'likely to cause confusion, or to cause mistake, or to deceive as to the affiliation, connection, or association of [d]efendant with [p]laintiff, or as to the origin, sponsorship, or approval of his goods by [p]laintiff.'" *Blizzard Entm't, Inc. v. Blizzard Sports Ctr., Inc., 2018 U.S. Dist. LEXIS 224178, 2018 WL 7448915, at *5 (C.D. Cal. Nov. 2, 2018)*. Agency Y's false designation claim appears to be centered on: (1) Agency Y's LinkedIn and Facebook pages and DFO's website (SAC ¶ 57-58, 71-72); (2) a Facebook Business Manger designation (SAC ¶ 60); and (3) a June 22, 2020 announcement **[*24]** (SAC ¶ 52-55; 69-70).

With respect to the LinkedIn and Facebook pages and DFO Global's Website, Agency Y asserts that it is an improper "identifier of source" to state that "Agency Y is powered by DFO Global." See SAC ¶ 57. Agency Y also takes issue with the fact that DFO Global's website included Agency Y in the "About Us" section up until August 29, 2020. Id. ¶ 49. However, as DFO Global points out, the Agreementbetween the parties called for DFO Global to "grow and promote the AGENCY Y brand." See SAC ¶ 25. Pursuant to the Agreement, Agency Y assigned, granted, and transferred to DFO Global Agency Y's entire business (the right, title, and interest in the Agency Y brand and Domain and all of the goodwill associated therewith). Given that the business performed under the Agency Y brand included its social media accounts, per the Agreement, Agency Y was, in fact, "powered by" DFO Global, which DFO Global had the right to promote.

On the issue of the Facebook Business Manager designation, Agency Y alleges that DFO Global "changed the Business Manager designation on the Agency Y Facebook ad account from Agency Y to Amasa." SAC ¶ 60. However, the Court finds that Agency Y fails to allege **[*25]** how changing the information on a Facebook Business Manager Account would be seen by consumers or how it would be likely to cause confusion. As DFO Global points out, "the screenshot Plaintiff includes of the business account clearly shows it to be an internal page displaying information to an account administrator, not a consumer. . . A 'designation' on a Facebook account is just that; an internal designation that is not client or consumer-facing." Mot., Dkt. No. 39, at 17. Accordingly, the Court does not find that these allegations amount to a well-plead claim for false designation.

Finally, Agency Y alleges that on June 22, 2020, DFO Global made an announcement that Agency Y was "rebranding" as Amasa. See SAC ¶ 52. However, the Court does not find that Agency Y has alleged that this "rebranding" was false or likely to cause consumer confusion. As DFO Global notes, even if Agency Y is able to prevail on its breach of contract theory and is found to own the Agency Y Mark, in announcing the rebrand, DFO Global ensure that its consumers knew where the services were coming from.

> DFO did exactly what a former licensee would be permitted to do at the conclusion of a trademark license: it **[*26]** identified to the public that instead of offering its products or services under the prior mark, such services would instead be offered under a new mark. This accurately, rather than falsely, designates source, and informed consumers that such services will emanate from DFO, whether previously under the Agency Y Mark or subsequently under the Amasa Mark.

Mot., Dkt. No. 39, at 18. Accordingly, the Court does not see how this allegation can properly state a claim for false designation of origin.

As such, the Court **GRANTS** the motion to dismiss with respect to the false advertising, false designation of origin, and common law unfair competition claims, with leave to amend.

3. Fraudulent Concealment

DFO Global next argues that Agency Y's fraudulent concealment claims should be dismissed. Mot., Dkt. No. 39, at 19. Agency Y's allegations regarding fraudulent concealment are: (1) that DFO Global concealed its filing of the Agency Y Mark application and (2) that it had a "plan to destroy Agency Y's business." SAC ¶¶ 82-86.

HN12[] The elements of a claim for fraudulent concealment are: (1) the defendant concealed or suppressed a material fact; (2) the defendant was under a duty to disclose the fact to the **[*27]** plaintiff; (3) the defendant intentionally concealed or suppressed the fact with the intent to defraud the plaintiff; (4) the plaintiff was unaware of the fact and would not have acted as he did if he had known of the concealed or suppressed fact; and (5) as a result of the concealment or suppression of the fact, the plaintiff sustained damage. *Hahn v. Mirda, 147 Cal. App. 4th 740, 748, 54 Cal. Rptr. 3d 527 (2007)*.

HN13[] DFO Global asserts that the first claim should be dismissed because it is barred by the economic loss doctrine under which tort claims are barred where they are based on the same facts and damages as a breach of contract claim. Mot., Dkt. No. 39, at 19. The economic loss doctrine "precludes recovery for 'purely economic loss due to disappointed expectations,' unless the plaintiff 'can demonstrate harm above and beyond a broken contractual promise.'" *Silcox v. State Farm Mut. Auto. Ins. Co., No. 14-cv-2345-AJB-MDD, 2014 U.S. Dist. LEXIS 176297, 2014 WL 7335741, at *7 (S.D. Cal. Dec. 22, 2014)* (citations omitted). "[T]he weight of authority counsels in favor of applying the economic loss doctrine to fraudulent concealment . . . ." *Rattagan v. Uber Techs., Inc., No. 19-CV-01988-EMC, 2020 U.S. Dist. LEXIS 150342, 2020 WL 4818612, at *8 (N.D. Cal. Aug. 19, 2020)* (citing cases). The Court agrees with DFO Global that the economic loss doctrine bars recovery in tort for the same loss that emanates from a broken contractual promise.

Regarding the alleged intent to **[*28]** destroy Agency Y's business, DFO Global argues that these allegations are "nothing more than disguised breach of contract claim[s] for failure to grow and promote the brand." Mot., Dkt. No. 39, at 20. The Court agrees that these allegations are insufficient to show intent to destroy the Agency Y brand as is required under the heightened 9(b) pleading standard. Even if Agency Y alleges that it was fraudulently induced to enter into the Addendum, it cannot reasonably argue that DFO Global was concealing its intent to do the very thing that the Addendum allowed. Accordingly, the Court **GRANTS** the motion to dismiss the fraudulent concealment claims as they relate to the Agency Y Mark, with leave to amend.

iv. *Unfair Competition Claims*

DFO Global next argues that Agency Y's claims under the unlawful, unfair, and fraudulent prongs of California's Unfair Competition Law ("UCL") must be dismissed. Mot., Dkt. No. 39, at 21.

HN14[] California's UCL prohibits "any unlawful, unfair, or fraudulent business act or practices." *Cal. Bus. & Prof. Code §17200, et. seq.* To prevail on a UCL claim, a plaintiff must "make a twofold showing: he or she must demonstrate injury in fact and a loss of money or property caused by unfair competition." *Peterson v. Cellco P'ship, 164 Cal. App. 4th 1583, 1590, 80 Cal. Rptr. 3d 316 (4th Dist. 2008)*.

1. Unlawful **[*29]** Prong

DFO Global points out that Agency Y's contention of unlawful behavior under the UCL is based on the fact that DFO Global adopted and registered the Agency Y mark with the USPTO and engaged in conduct that violated the Lanham Act as asserted in the second and third causes of action. SAC ¶ 94. Thus, the UCL claim is premised on Agency Y's Lanham Act and fraudulent concealment causes of action, which as discussed above, cannot survive. The Court agrees.

Accordingly, the Court **GRANTS** the motion to dismiss the UCL claim based on the unlawful prong, with leave to amend.

2. Unfair Prong

DFO Global next argues for the dismissal of Agency Y's UCL claim under the "unfair" prong. Mot., Dkt. No. 39, at 21. ***HN15***[] In the context of *section 17200*, "unfair...means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)*.

The Court finds that, like the FAC, the SAC fails to specifically explicate what public policy DFO Global violated through its allegedly unfair actions. Agency Y has not cured its deficiency, instead **[*30]** vaguely alleging that DFO's actions "offend[] an established public policy." SAC ¶ 96. Because there is no further detail or explanation as to what public policy Agency Y claims has been violated, the Court cannot allow this claim to stand. ***HN16***[] It is well-established that "where a claim of an unfair act or practice is predicated on public policy, . . . Cel—Tech [requires] that the public policy which is a predicate to the action must be 'tethered' to specific constitutional, statutory or regulatory provisions." *Graham v. Bank of Am., N.A., 226 Cal. App. 4th 594, 613, 172 Cal. Rptr. 3d 218 (2014)*.

Accordingly, the Court **GRANTS** the motion to dismiss the UCL claim with respect to the "unfair" prong, with leave to amend.

3. Fraudulent Prong

Finally, DFO Global argues that Agency Y's claim under the UCL for fraudulent behavior must be dismissed. Mot., Dkt. No. 39, at 22. Specifically, DFO Global states that Agency Y's fraudulent prong claim is based on "actions, claims, nondisclosures, and misleading statements, as alleged herein, as well as its willful use of the AGENCY Y mark." Id. (citing SAC ¶ 100). DFO Global points out, though, that none of these allegations is sufficient to meet the *Rule 9* heightened pleading standard for fraud, and that this claim is also barred by the economic **[*31]** loss doctrine. Id.

The Court agrees that the fraudulent prong is not properly plead according to the heightened *Rule 9* pleading standard. Further, the Court finds that this claim is barred by the economic loss doctrine. Accordingly, the Court **GRANTS** the motion to dismiss the UCL claim as it relates to the fraudulent prong, with leave to amend.

IV. Conclusion

For the foregoing reasons, the Court **GRANTS** the motion with leave to amend. The Court finds that oral argument will not be helpful in this matter. *Fed. R. Civ. P. 78*; L-R 7-15. Accordingly, the Court VACATES the hearing set for April 26, 2021.

IT IS SO ORDERED.

Hobart-Mayfield, Inc. v. Nat'l Operating Comm. on Stds. for Ath. Equip.

United States District Court for the Eastern District of Michigan, Southern Division

April 22, 2021, Decided; April 22, 2021, Filed

Case No. 19-cv-12712

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 12(b)(6) allows a court to make an assessment as to whether the plaintiff has stated a claim upon which relief may be granted. To withstand a motion to dismiss pursuant to *Rule 12(b)(6)*, a complaint must comply with the pleading requirements of *Fed. R. Civ. P. 8(a)(2)*. *Rule 8(a)(2)* requires a short and plain statement of the claim showing that the pleader is entitled to relief, to give the defendant fair notice of what the claim is and the grounds upon which it rests. To meet this standard, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] Motions to Dismiss, Failure to State Claim

When considering a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss, a court must construe the complaint in a light most favorable to the plaintiff and accept all of his factual allegations as true. While courts are required to accept the factual allegations in a complaint as true, the presumption of truth does not apply to a claimant's legal conclusions. Therefore, to survive a motion to dismiss, a plaintiff's pleading for relief must provide more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN3[] Sherman Act, Claims

Section 1 of the Sherman Act, 15 U.S.C.S. § 1, prohibits contracts or conspiracies in restraint of trade or commerce among the several states. Only unreasonable restraints of trade are considered in violation of the Sherman Act. Thus, to establish a violation of *Section 1*, a plaintiff must demonstrate that there is: (1) an agreement, which may be in the form of a contract, combination, or conspiracy; (2) affecting interstate commerce; (3) that imposes an unreasonable restraint of trade.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Types of Evidence > Circumstantial Evidence

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN4[] Sherman Act, Claims

To plead unlawful agreement, a plaintiff may allege either an explicit agreement to restrain trade, or sufficient circumstantial evidence tending to exclude the possibility of independent conduct. But under either approach, the facts alleged must plausibly suggest, rather than be merely consistent with, an agreement to restrain trade in violation of the Sherman Act.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN5 [] **Sherman Act, Claims**

A plaintiff must plead more than parallel conduct to maintain a claim under *Section 1* of the Sherman Act, *15 U.S.C.S. § 1*; parallel conduct, even conduct consciously undertaken, needs some setting suggesting the agreement necessary to make out a claim under *Section 1*; without that further circumstance pointing toward a meeting of the minds, an account of a defendant's commercial efforts stays in neutral territory. An allegation of parallel conduct is thus much like a naked assertion of conspiracy in a *Section 1* complaint: it gets the complaint close to stating a claim, but without some further factual enhancement it stops short of the line between possibility and plausibility of entitlement to relief.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Types of Evidence > Circumstantial Evidence

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN6 [] **Sherman Act, Claims**

A plaintiff must provide sufficient circumstantial evidence to maintain a parallel conduct claim under *Section 1* of the Sherman Act, *15 U.S.C.S. § 1*, also called plus factors, that tend to exclude the possibility of independent conduct. The Sixth Circuit has provided various plus factors that a district court may employ in its analyses, including (1) whether the defendants' actions, if taken independently, would be contrary to their economic self-interest; (2) whether defendants have been uniform in their actions; (3) whether defendants have exchanged or have had the opportunity to exchange information relative to the alleged conspiracy; and (4) whether defendants have a common motive to conspire.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN7 [] **Sherman Act, Claims**

Mere presence on either a board or at a trade association meeting, without further factual allegations, does not amount to a conspiracy claim under *Section 1* of the Sherman Act, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN8[] **Sherman Act, Claims**

The Sixth Circuit has held that generic pleading, alleging misconduct against defendants without specifics as to the role each played in an alleged conspiracy under *Section 1 of the Sherman Act, 15 U.S.C.S. § 1*, is specifically rejected.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN9[] **Per Se Rule & Rule of Reason, Sherman Act**

The rule of reason inquiry provides that the test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition.

Torts > ... > Business Relationships > Intentional Interference > Elements

Torts > ... > Commercial Interference > Employment Relationships > Elements

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN10[] **Intentional Interference, Elements**

To state a claim for intentional interference with a business relationship or expectation, a plaintiff must allege the following elements: (1) the existence of a valid business relationship or expectancy; (2) knowledge of the relationship or expectancy by defendant; (3) an intentional interference by defendant inducing or causing a breach or termination of the relationship or expectancy; and (4) resulting damage to the plaintiff. The third prong, intentional interference, requires that the plaintiff demonstrate with some specificity affirmative acts by the defendant that corroborate the improper motive of the interference. Importantly, where the defendant's actions were motivated by legitimate business reasons, its actions would not constitute improper motive or interference.

Torts > ... > Business Relationships > Intentional Interference > Elements

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN11[] **Intentional Interference, Elements**

To satisfy the element of a valid business expectancy for a tortious interference claim under Michigan law, a plaintiff must show that the plaintiff had more than a subjective expectation of entering into a business relationship.

Opinion

[*641] OPINION AND ORDER GRANTING DEFENDANTS' MOTION TO DISMISS [#62]

I. INTRODUCTION

On September 16, 2019, Plaintiff Hobart-Mayfield, Inc. ("Mayfield") filed the instant action against Kranos Corporation ("Schutt Sports"), Riddell, Inc., Xenith, LLC, Gregg Hartley, Michael Oliver, Vincent Long, and Kyle Lamson (collectively referred to as the "Manufacturer Defendants") as well as the National Operating Committee on Standards for Athletic Equipment ("NOCSAE").[1] *See* ECF No. 1. Plaintiff filed an Amended Complaint on October 10, 2020. ECF No. 61. Plaintiff maintains that Defendants have unlawfully interfered with the sale of its helmet aftermarket product, the S.A.F.E.Clip, in violation **[*642]** of the Sherman Act and the Michigan Antitrust Reform Act. *Id.*

Presently before the Court is Defendants' Motion to Dismiss, filed on November 11, 2020. ECF No. 62. Plaintiff filed its Response in Opposition on December 11, 2020. ECF No. 63. Defendants' Reply was filed on December 28, 2020. ECF No. 65. The Court held a hearing on this matter on April 13, 2021. For the reasons that follow, the Court will **GRANT** Defendants' Motion to Dismiss [#62].

[**3] II. BACKGROUND

A. Factual Background

Plaintiff Hobart-Mayfield, Inc. is the marketer, distributor, and seller of a football helmet shock absorber called the "S.A.F.E.Clip." ECF No. 61, PageID.1340. The S.A.F.E.Clip is an aftermarket "add-on" product that "can be

---

[1] On December 23, 2020, Defendant Kranos Corporation, doing business as Schutt Sports, filed a Suggestion of Bankruptcy and Notice of Operation of the Automatic Stay. ECF No. 64. The Notice indicates that Defendant voluntarily filed for bankruptcy on December 18, 2020. While the Court acknowledges the petition filed in the United States Bankruptcy Court for the District of Delaware, the ultimate disposition of this case is not affected by Defendant's filing.

retrofitted to most existing helmets and facemasks" and purports to reduce the impact to the football player's helmet each time they are hit. *Id.* at PageID.1358. Mayfield was formed in 2014 and received fully patented status for the S.A.F.E.Clip in 2017. *Id.* Plaintiff states that "several generations of the S.A.F.E.Clip were extensively tested and refined" between 2016 and 2018. *Id.* Plaintiff further claims that "the use of the S.A.F.E.Clip resulted in force reductions as high as 35% per hit" after multiple rounds of helmet testing. *Id.* at PageID.1359.

The National Operating Committee on Standards for Athletic Equipment ("NOCSAE") is a nonprofit body that "develops voluntary performance and test standards for athletic equipment that are available for adoption by any athletic regulatory body." *Id.* at PageID.1350, 1424. The parties agree that the majority of football regulatory bodies require most players, from youth leagues to the **[**4]** NFL, to use football helmets and facemasks that comply with NOCSAE standards. *Id.* Plaintiff contends that under this structure, equipment that does not meet NOCSAE standards "are almost entirely excluded from the respective markets for football helmets and football helmet Add-ons." *Id.* at PageID.1356.

Plaintiff states that NOCSAE enters into licensing agreements with certain football helmet manufacturers, including Defendants Riddell, Schutt Sports, and Xenith, which allows them to utilize NOCSAE-trademarked logos and phrases. *Id.* at PageID.1371. Plaintiff alleges that these Defendants together control nearly one hundred percent of the relevant football helmet and Add-on or replacement part market. *Id.*

NOCSAE published various press releases, some from 2013 and others from 2018, that relate to the certification of helmets with Add-on products attached. The 2013 press releases states in relevant part:

> The addition of an item(s) to a helmet previously certified without those item(s) creates a new untested model. Whether the add-on product changes the performance or not, the helmet model with the add-on product is no longer "identical in every aspect" to the one originally certified by the **[**5]** manufacturer.
> When this happens, the manufacturer which made the original certification has the right, under the NOCSAE standards, to declare its certification void. It also can decide to engage in additional certification testing of the new model and certify the new model with the add-on product, but it is not required to do so.

Id. at PageID.1522 (emphasis added). Thus, the addition of an Add-on product to a previously NOCSAE-certified helmet would create a new untested—and uncertified—helmet model. *Id.* However, the 2013 **[*643]** press release statements did specify that "[c]ompanies which make add-on products for football helmets have the right to make their own certification of compliance with NOCSAE standards on a helmet model, but . . . the certification and responsibility for the helmet/third-party product combination would become theirs, (not the helmet manufacturer)." *Id.*

The 2018 press release statements addressed a different position on this issue, providing now that:

> The addition of an item(s) to a helmet previously certified without the item(s) creates a new untested model. Whether the add-on product improves the performance or not, the helmet model with the add-on product is no longer **[**6]** "identical in every aspect" to the one originally certified by the manufacturer.
> ....
> When this happens, the helmet manufacturer has the right, under the NOCSAE standards, to declare its certification void. It may elect to allow the certification to remain unaffected, or it may also decide to engage in additional certification testing of the new model and certify the new model with the add-on product, but it is not required to do so.

Id. at PageID.1525. This release indicates that third party add-on manufacturers could no longer independently acquire NOCSAE certification for the helmets with Add-on products.

Plaintiff thus alleges that the Manufacturer Defendants' right to declare its NOCSAE certification void constitutes an unreasonable restraint on trade that interferes with sales of the S.A.F.E.Clip. Plaintiff points specifically to the licensing agreements between NOCSAE and the Manufacturer Defendants as evidence of a conspiracy to exclude the S.A.F.E.Clip from the market. ECF No. 61, PageID.1367. These licensing agreements, Plaintiff claims, "are unreasonably anticompetitive because all of NOCSAE's legitimate standard setting objectives could be served with less restrictive licensing **[**7]** terms." *Id.* These allegations form the basis for Plaintiff's claims for violations of the Sherman Act and Michigan Antitrust Reform Act as well as tortious interference with a business relationship or expectancy by all Defendants. *Id.*

B. Procedural Background

Plaintiff filed its initial Complaint against Defendants on September 16, 2019. *See* ECF No. 1. Pursuant to multiple stipulations, Defendants were granted additional time to respond to the Complaint. *See* ECF Nos. 5, 10, 20. Defendants subsequently moved to dismiss Plaintiff's Complaint in late 2019 and early 2020. ECF Nos. 18, 31. The dismissal motions were fully briefed following a stipulated extension of time for Plaintiff to file its Response. *See* ECF No. 25.

On October 19, 2020, this Court granted Plaintiff's Motion for Leave to File an Amended Complaint and consequently mooted Defendants' outstanding Motions to Dismiss. *See* ECF No. 60. Defendants now move to dismiss Plaintiff's First Amended Complaint.

III. Legal Standard

HN1[] *Federal Rule of Civil Procedure 12(b)(6)* allows the court to make an assessment as to whether the plaintiff has stated a claim upon which relief may be granted. *See* *Fed. R. Civ. P. 12(b)(6)*. To withstand a motion to dismiss pursuant to *Rule 12(b)(6)*, a complaint must comply with the pleading **[**8]** requirements of *Federal Rule of Civil Procedure 8(a)(2)*. *See* *Ashcroft v. Iqbal, 556 U.S. 662, 677-78, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*. *Rule 8(a)(2)* requires "a short and plain statement of the claim showing that the pleader is entitled **[*644]** to relief, in order to give the defendant fair notice of what the . . . claim is and the grounds upon which it rests." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 555, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)* (quotation marks omitted) (quoting *Fed. R. Civ. P. 8(a)(2)*; *Conley v. Gibson, 355 U.S. 41, 47, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957))*. To meet this standard, a complaint must contain sufficient factual matter, accepted as true, to "state a claim to relief that is plausible on its face." *Twombly, 550 U.S. at 570*; *see also* *Iqbal, 556 U.S. at 678-80* (applying the plausibility standard articulated in *Twombly*).

HN2[] When considering a *Rule 12(b)(6)* motion to dismiss, the Court must construe the complaint in a light most favorable to the plaintiff and accept all of his factual allegations as true. *Lambert v. Hartman, 517 F.3d 433, 439 (6th Cir. 2008)*. While courts are required to accept the factual allegations in a complaint as true, *Twombly, 550 U.S. at 556*, the presumption of truth does not apply to a claimant's legal conclusions. *See* *Iqbal, 556 U.S. at 678*. Therefore, to survive a motion to dismiss, the plaintiff's pleading for relief must provide "more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Ass'n of Cleveland Fire Fighters v. City of Cleveland, 502 F.3d 545, 548 (6th Cir. 2007)* (quoting *Twombly, 550 U.S. at 555*) (internal citations and quotations omitted).

IV. Discussion

Plaintiff asserts six counts against Defendants: (1) Violation of the Sherman Act and the **[**9]** Michigan Antitrust Reform Act by all Defendants (Count I); (2) Conspiracy to Restrain Trade in violation of the Sherman Act and the Michigan Antitrust Reform Act by all Defendants (Count II); (3) Tortious Interference with a Business Relationship or Expectancy by Schutt Sports (Count III); (4) Tortious Interference with a Business Relationship or Expectancy by Riddell (Count IV); (5) Tortious Interference with a Business Relationship or Expectancy by Xenith (Count V); and (6) Tortious Interference with a Business Relationship or Expectancy by NOCSAE (Count VI). The Court will address the claims in their relative pairings below.

A. Count I

HN3[] Section 1 of the Sherman Act prohibits contracts or conspiracies "in restraint of trade or commerce among the several States." 15 U.S.C. § 1; *see* Ohio v. Am. Express Co., 138 S. Ct. 2274, 2283, 201 L. Ed. 2d 678 (2018).[2] The Supreme Court has emphasized that only *unreasonable* restraints of trade are considered in violation of the Sherman Act. *Id.* Thus, in order to establish a violation of Section 1, a plaintiff must demonstrate that there is: (1) an agreement, which may be in the form of a contract, combination, or conspiracy; (2) affecting interstate commerce; (3) that imposes an unreasonable restraint of trade. *See* White and White, Inc. v. American Hospital Supply Corp., 723 F. 2d 495, 504 (6th Cir. 1983); *see also* United States v. Blue Cross Blue Shield of Michigan, 809 F. Supp. 2d 665, 671 (E.D. Mich. 2011).

HN4[] "To plead unlawful agreement, **[**10]** a plaintiff may allege either an explicit agreement to restrain trade, or 'sufficient circumstantial evidence tending to exclude the possibility of independent conduct.'" **[*645]** Watson Carpet & Floor Covering, Inc. v. Mohawk Indus., Inc., 648 F.3d 452, 457 (6th Cir. 2011) (quoting In re Travel Agent Comm'n Antitrust Litig., 583 F.3d 896, 907 (6th Cir. 2009)). But "[u]nder either approach, the facts alleged must 'plausibly suggest[],' rather than be 'merely consistent with,' an agreement to restrain trade in violation of the Sherman Act." *Id.*

In its first claim, Plaintiff alleges that the licensing agreements between the Manufacturer Defendants and Defendant NOCSAE permit unreasonable restraints on trade regarding the certifications of helmets with Add-on products attached. ECF No. 61, PageID.1408. However, Plaintiff clarifies in its Response brief that Count I is based not just on the licensing agreements, but also "on terms NOCSAE added beyond the four corners of the initial agreements themselves." ECF No. 63, PageID.1618. Plaintiff's assertion is accordingly reliant on the difference between the 2013 and 2018 NOCSAE press releases and the lost ability for Add-on manufacturers to independently obtain NOCSAE helmet certification. *Id.* Defendants oppose this argument, maintaining instead that the licensing agreements were never amended and contain standard provisions **[**11]** that do not unreasonably restrain trade with Add-on product manufacturers. *See* ECF No. 65, PageID.1938-39.

During the hearing on this matter, the parties disagreed about the characterization of a third NOCSAE document, this time from 2015. *See* ECF No. 61, PageID.1455. Defendants state that the NOCSAE policy changed not in 2018 but "three years earlier in 2015, when it began requiring all certifications of compliance with NOCSAE standards to be made by an American National Standards Institute accredited product-certification body . . . and thereby eliminated the self-certification option." ECF No. 62, PageID.1590. Plaintiff acknowledges this document, but maintains that the 2013 policy regarding Add-on manufacturer NOCSAE certifications was viable until the 2018 press release expressly removed that language.

The ultimate resolution of this Count, however, does not hinge on whether NOCSAE's policy regarding Add-on manufacturer certifications changed in 2015 or 2018. Plaintiff's first Count is deficient because it has not demonstrated that the licensing agreements themselves, or the impact of the 2013, 2015, or 2018 NOCSAE-related documents, were unreasonable restraints on trade. The change **[**12]** in policy reflected the omission of the Add-on manufacturer certification—but did not impact what the Manufacturer Defendants could or could not do with NOCSAE certifications. As Plaintiff's First Amended Complaint notes, the Manufacturer Defendants always had "the right, under NOCSAE standards, to declare its certification void" in 2013. ECF No. 61, PageID.1365. Defendants are correct to emphasize that neither the form agreements nor the press statements "require that any action be taken with respect to add-ons, much less require their exclusion." ECF No. 65, PageID.1938.

Plaintiff thus fails to meet the *Watson Carpet* standard demonstrating "either an explicit agreement to restrain trade, or 'sufficient circumstantial evidence tending to exclude the possibility of independent conduct.'" 648 F.3d at 457. In *Watson Carpet*, the plaintiff sufficiently alleged that the defendants actively worked together to design a plan and exclude the plaintiff from the market by making false and public accusations about the plaintiff's business and unilaterally refusing to sell any of its products in the market. *See* id. at 455 (describing how the defendants falsely

[2] "Because the Michigan Anti-Trust statute and the Sherman Anti-Trust Act mirror each other, [the court] appl[ies] the same analysis to both the federal and state anti-trust claims." Am. Council of Certified Podiatric Physicians & Surgeons v. Am. Bd. of Podiatric Surgery, Inc., 323 F.3d 366, 368 n.1 (6th Cir. 2003).

claimed that the plaintiff "used drugs, sold drugs, cheated **[**13]** his customers, **[*646]** slept with his employees, had financial problems, had trouble with the IRS, and was in the mob," while also instructing employees to "keep [the p]laintiff from getting the sale, even if it meant losing money on the sale.").

Here, Plaintiff's claims in the First Amended Complaint fall far short of this standard—there are no allegations of any communication, agreement, or conspiratorial conduct between Defendants about the policy change or any of the Manufacturer Defendants' licensing agreements. *See* *In re Travel Agent Comm'n Antitrust Litig., 583 F.3d at 907* (quoting *Monsanto Co. v. Spray—Rite Service Corp., 465 U.S. 752, 768, 104 S. Ct. 1464, 79 L. Ed. 2d 775 (1984))* ("[T]here must be direct or circumstantial evidence that reasonably tends to prove that the defendant and others had a conscious commitment to a common scheme designed to achieve an unlawful objective."). Further, Defendants emphasize that these license agreements applied to "sports equipment manufacturers" more broadly, including helmets and other equipment for baseball, softball, ice hockey, lacrosse, and polo. ECF No. 62, PageID.1588. Plaintiff's allegations do not adequately explain how these widely used licensing agreements are evidence of a conspiracy specifically executed by football helmet manufacturers.

Plaintiff additionally fails to **[**14]** demonstrate how the certification policy modification was unreasonable in light of Defendants' competing and valid interests in maintaining their brand credibility and helmet safety standards. Thus, Count I does not provide sufficient evidence beyond mere speculation that demonstrates a conspiracy derived from the licensing agreements and the NOCSAE press releases. The Court will accordingly grant Defendants' Motion as to Count I.

B. Count II

In its second claim, Plaintiff argues that Defendants have engaged in an overarching conspiracy "to decertify any football helmets to which consumers have applied helmet Add-ons *regardless* of whether the helmet and Add-on collectively meet[] NOCSAE standards" in violation of *Section 1* of the Sherman Act. ECF No. 61, PageID.1410 (emphasis in original). This allegation is purportedly supported by various circumstantial factors that establish Defendants' involvement in unlawful, parallel conduct to restrain trade. In response, Defendants argue that the majority of Plaintiff's arguments are boilerplate allegations devoid of the requisite detail to survive a dismissal motion. See ECF No. 62, PageID.1593. Defendants further maintain that the circumstantial evidence **[**15]** supports their position and emphasizes their independent concerns about the S.A.F.E.Clip product's safety.

HN5[] A plaintiff must plead more than parallel conduct to maintain their claim; as described in *Twombly*, "parallel conduct, even conduct consciously undertaken, needs some setting suggesting the agreement necessary to make out a *§ 1* claim; without that further circumstance pointing toward a meeting of the minds, an account of a defendant's commercial efforts stays in neutral territory." *550 U.S. at 557*. "An allegation of parallel conduct is thus much like a naked assertion of conspiracy in a *§ 1* complaint: it gets the complaint close to stating a claim, but without some further factual enhancement it stops short of the line between possibility and plausibility of "entitle[ment] to relief." *Id.* (internal quotations omitted).

HN6[] Accordingly, a plaintiff must provide sufficient circumstantial evidence, also called "plus factors," that tend to exclude the possibility of independent conduct. *In re Travel Agent Comm'n Antitrust Litig.,* ***[*647]*** *583 F.3d at 907*. The Sixth Circuit has provided various "plus factors" that a district court may employ in its analyses, including "(1) whether the defendants' actions, if taken independently, would be contrary to their economic self-interest; **[**16]** (2) whether defendants have been uniform in their actions; (3) whether defendants have exchanged or have had the opportunity to exchange information relative to the alleged conspiracy; and (4) whether defendants have a common motive to conspire." *Id.*

Here, Plaintiff's second Count relies heavily on the allegation that Defendants are voiding, or threatening to void, their helmet NOCSAE certifications if third-party Add-on products are attached, even when the combined product passes the required NOCSAE testing standards. *See* ECF No. 63, PageID.1621-22. Plaintiff supports its claim by noting that Zuti, a non-party Add-on manufacturer, purportedly developed faceguards that pass NOCSAE certification standards with Defendant Riddell's helmets. *See* ECF No. 61, PageID.1387. But even with this certification, "Riddell nevertheless still voids its helmet certifications if the helmets are used with a Zuti faceguard." *Id.* This is an example, Plaintiff argues, of the ongoing conspiracy to entirely exclude all Add-on products like the S.A.F.E.Clip from the market.

As Defendants point out, however, the claims in the First Amended Complaint must derive from Mayfield's experiences; allegations as to other **[**17]** Add-on products, such as the Zuti faceguard, cannot be substituted to form the basis of Plaintiff's own claims. Plaintiff's claims must therefore "stand or fall on its allegations relating to Mayfield and the S.A.F.E.Clip." ECF No. 62, PageID.1596. When asked about this during the hearing, Plaintiff conceded that First Amended Complaint contains no allegations stating that Mayfield submitted evidence to the Manufacturer Defendants that demonstrated its product, the S.A.F.E.Clip, complied with NOCSAE standards. While the product underwent various rounds of testing between 2016 and 2018, it is not pled that Defendants (1) knew whether or not Plaintiff's product was NOCSAE-compliant; (2) received information about Plaintiff's most recent testing results; or (3) voided or threatened to void their NOCSAE-compliance with the S.A.F.E.Clip product attached. Without these facts, Plaintiff does no more than speculate that its product *would* be rejected even if it were in full compliance with NOCSAE standards—but mere speculation does not survive the pleading requirements established under *Twombly*.

In an attempt to illustrate additional "plus factors" indicating Defendants' broader conspiracy, **[**18]** Plaintiff also points to specific communications between Defendants Schutt and Xenith in 2018 about testing an older model—the only one seemingly available to them—of the S.A.F.E.Clip. ECF No. 61, PageID.1391. While the email states that the product failed certain testing performed independently by both Schutt and Xenith, Plaintiff highlights that this communication between the parties was in purported violation of nondisclosure agreements. *Id.* But the Court is not persuaded that this exchange evinces an attempt by Defendants to "coordinate their opposition to the product and further lessen competition from Mayfield Athletics and other Add-on manufacturers." *Id.* at 1392. To the contrary, the communication plainly illustrates that Defendants found that an older version of the S.A.F.E.Clip failed NOCSAE compliance—which Plaintiff does not dispute. The Court agrees with Defendants that it was "only natural" for the Manufacturer **[*648]** Defendants to individually reject the use of a product that changed their helmets absent ironclad assurance as to its safety, especially considering the potential for serious head injuries and concussions. *See* ECF No. 62, PageID.1585. Thus, without more, this claim does not **[**19]** "invest[] either the action or inaction alleged with a plausible suggestion of conspiracy." *Twombly, 550 U.S. at 565*.

The additional circumstantial factors Plaintiff provides similarly fail to rise above the level of speculation with neutral, parallel conduct. For example, Plaintiff references the Manufacturer Defendants' purported control of the NOCSAE board and the potential for collusion where "Defendants routinely attended trade association meetings." ECF No. 63, PageID.1627. ***HN7***[] But mere presence on either a board or at a trade association meeting, without further factual allegations, does not amount to a conspiracy claim. *See, e.g., In re Elevator Antitrust Litig., 502 F.3d 47, 50 (2d Cir. 2007)* (the allegation "is in entirely general terms without any specification of any particular activities by any particular defendant; it is nothing more than a list of theoretical possibilities . . . ."). Additionally, exhibits to the First Amended Complaint reveal that NOCSAE's board contains representation from at least ten different organizations, not just football helmet manufacturers. *See* ECF No. 61, PageID.1424-25 (listing, for example, the American Medical Society for Sports Medicine and the National Athletic Trainers Association as additional NOCSAE board members).

Thus, **[**20]** without more information, such as (1) when conspiratorial communication and conduct occurred between Defendants; (2) which Defendants communicated with one another to influence NOCSAE policy; or (3) how Defendants acted in concert to unilaterally exclude the S.A.F.E.Clip from the market, the Court cannot find Plaintiff's second Count sufficient to withstand dismissal. Instead, the First Amended Complaint largely contains bare legal conclusions or allegations of unilateral conduct that remain in neutral territory and does not rise to the level of conspiratorial action. *See* ECF No. 62, PageID.1578. ***HN8***[] The Sixth Circuit has routinely dismissed cases on similar grounds, holding that "[g]eneric pleading, alleging misconduct against defendants without specifics as to the role each played in the alleged conspiracy, was specifically rejected by *Twombly*." *Total Benefits Plan. Agency, Inc. v. Anthem Blue Cross & Blue Shield, 552 F.3d 430, 436 (6th Cir. 2008)* (specifying that "nowhere did

Plaintiffs allege when Defendants joined the [] conspiracy, where or how this was accomplished, and by whom or for what purpose.").

Further, during the hearing, the parties both discussed whether Defendants were acting contrary to their respective economic interests by declining to adopt the S.A.F.E.Clip to their **[**21]** helmets. Plaintiff argued that "NOCSAE has an economic interest in maintaining safety standards by certifying helmet/Add-on combinations when testing data establishes that they reduce risks," and that the policy change reflected in the 2018 press release contradicts this interest. ECF No. 63, PageID.1626. But Defendants do not dispute that both NOCSAE and the Manufacturer Defendants share this strong economic interest in maintaining safety standards and engaging with NOCSAE-compliant Add-ons. Instead, as discussed *supra*, Plaintiff fails to allege that it ever provided Defendants with a NOCSAE-compliant S.A.F.E.Clip.

Consequently, Defendants are not acting contrary to their economic interests by adhering to publicly available safety standards and ensuring that their credibility as **[*649]** institutional and market actors are maintained. As Defendants note, it was prudent for them to decline to use the S.A.F.E.Clip at this juncture because helmet manufacturers have an equally "strong incentive and moral imperative to control the quality of their products . . . [i]f they do not, safety is compromised, and they subject themselves to negative press and liability." ECF No. 62, PageID.1585. Given these **[**22]** competing objectives, Plaintiff's Count II fails to plead sufficient "plus factors" of circumstantial evidence demonstrating an overarching conspiracy here.

Finally, while Plaintiff has not met the standards to plead a conspiracy, the Court also notes its agreement with Defendants' assertion that the First Amended Complaint does not contain adequate facts to establish either a *per se* violation of ***antitrust law*** or a violation under the rule of reason. *See* ECF No. 62, PageID.1597. Neither Count I or II allege that Defendants "boycott[ed] suppliers or customers in order to discourage them from doing business with a competitor," a general requirement for *per se* violations. *Re/Max Int'l, Inc. v. Realty One, Inc., 173 F.3d 995, 1013 (6th Cir. 1999)* (quoting *F.T.C. v. Indiana Fed'n of Dentists, 476 U.S. 447, 458, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986))*. Given Defendants' competing interests in safety and standards adherence, this case clearly does not involve "agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality." *Lie v. St. Joseph Hosp. of Mount Clemens, Mich., 964 F.2d 567, 569 (6th Cir. 1992)*.

HN9[] Plaintiff's argument fails under the rule of reason inquiry as well, which provides that the "test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress **[**23]** or even destroy competition." *Indiana Fed'n of Dentists, 476 U.S. at 458* (quoting *Bd. of Trade of City of Chicago v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918))*. As the Court has discussed, Plaintiff has failed to demonstrate how NOCSAE's policy change unreasonably restrained trade or fostered an anticompetitive market. The First Amended Complaint fails to rise above the level of mere speculation, especially with regard to the S.A.F.E.Clip specifically. Without this evidence, Plaintiff cannot adequately plead a violation of ***antitrust law*** under the rule of reason either.

Accordingly, the Court will also dismiss Plaintiff's Count II.

C. Counts III-VI

Plaintiff's remaining Counts allege that Defendants individually and intentionally interfered with Mayfield's "ongoing business relationships and business expectancies with football teams, football players, football equipment distributors, and other purchasers of football equipment throughout the United States." ECF No. 61, PageID.1410-11. Defendants collectively deny Plaintiff's claims, arguing instead that Plaintiff fails to establish any malicious conduct by Defendants or any valid business expectancies that could maintain Counts III through VI. *See* ECF No. 62, PageID.1598-99.

HN10[] In order to state a claim for intentional interference with a business relationship **[**24]** or expectation, a plaintiff must allege the following elements: (1) the existence of a valid business relationship or expectancy; (2)

knowledge of the relationship or expectancy by defendant; (3) an intentional interference by defendant inducing or causing a breach or termination of the relationship or expectancy; and (4) resulting damage to the plaintiff. *Badiee v. **[*650]** Brighton Area Sch., 265 Mich. App. 343, 365-66, 695 N.W.2d 521 (2005)*. The third prong, intentional interference, requires that the plaintiff demonstrate with some specificity "affirmative acts by the defendant that corroborate the improper motive of the interference." *BPS Clinical Lab. v. Blue Cross & Blue Shield of Michigan, 217 Mich. App. 687, 699, 552 N.W.2d 919, 925 (1996)* (citing *Feldman v. Green, 138 Mich. App. 360, 369, 360 N.W.2d 881 (1984))*. Importantly, "[w]here the defendant's actions were motivated by legitimate business reasons, its actions would not constitute improper motive or interference." *Id.* (citing *Michigan Podiatric Medical Ass'n v. Nat'l Foot Care Program, Inc., 175 Mich. App. 723, 736, 438 N.W.2d 349 (1989))*.

Here, Plaintiff's remaining claims fail on two separate grounds: Plaintiff does not adequately allege either (1) the existence of valid business relationships or expectancies by Mayfield, or (2) improper motive or interference by Defendants. First, the First Amended Complaint contains only speculation about future business relationships that were desired, but not acquired, by Mayfield. Plaintiff alleges, for example, that various football teams—including **[**25]** teams at Georgetown University and various Michigan and Wisconsin high schools—declined to purchase S.A.F.E.Clips for fear that the product would void the helmets' warranties. *See* ECF No. 61, PageID.1404-05. ***HN11***[] But to satisfy the element of a "valid business expectancy" under Michigan law, a plaintiff "must show that they had more than a 'subjective expectation of entering into a [business] relationship.'" *Saab Auto. AB v. Gen. Motors Co., 953 F. Supp. 2d 782, 789 (E.D. Mich. 2013)* (Drain, J.), *aff'd*, *770 F.3d 436 (6th Cir. 2014)*. As in *Saab*, Plaintiff presents no facts "that indicate that any of the various agreements were close to or in the process of being negotiated or approved." *Id.* Plaintiff thus fails to meet its initial burden in the tortious interference analysis.

Additionally, even accepting Plaintiff's factual allegations as true, Mayfield does not establish how any of the Defendants acted intentionally to harm Plaintiff in a manner not "motivated by legitimate business reasons." *Id.; see also* *Badiee v. Brighton Area Sch., 265 Mich. App. 343, 365-66, 695 N.W.2d 521 (2005)*. Mayfield "must allege that the interferer did something illegal, unethical or fraudulent," and it has not done so here. *Dalley v. Dykema Gossett, 287 Mich. App. 296, 324, 788 N.W.2d 679, 696 (2010)*. To the contrary, Defendants have emphasized their prioritization of safety and credibility in the helmet manufacturing space. *See* ECF No. 62, PageID.1599. Plaintiff's **[**26]** First Amended Complaint contains no allegations that the newest generation of the S.A.F.E.Clip met NOCSAE certification standards, was provided to Defendants, and was nevertheless rejected by the Manufacturer Defendants. Without this critical claim, Plaintiff cannot sufficiently allege that Defendants acted either maliciously or improperly in this case.

Accordingly, Plaintiff has not met its burden to withstand a dismissal motion as to its tortious interference claims. Counts III through VI will therefore be dismissed.

V. Conclusion

For the reasons discussed herein, Defendants' Motion to Dismiss [#62] is **GRANTED**.

IT IS SO ORDERED.

Opinion

MEMORANDUM OPINION AND ORDER

Catherine C. Eagles, District Judge.

The plaintiffs, Brian Williams, Mike Gustafson, Maricol De Leon, and Jairo Da Costa, lost their homes in three separate foreclosure sales and allege they received lower prices because of a bid-rigging conspiracy organized by the defendants. They seek to certify a nationwide Sherman Act class and a North Carolina subclass of similarly situated individuals who lost their homes in foreclosure proceedings **[*2]** where a member of the defendant organization, The Estates, was the highest bidder. The plaintiffs have not affirmatively demonstrated that the antitrust element of "impact" can be proven at trial with common evidence and have thus failed to meet the predominance requirement of *Rule 23(b)(3)*. The only evidence the plaintiffs provided on this point is untimely and it would be unfairly prejudicial to the defendants to consider it. The motion for class certification and the motion for leave to file the declaration of Dr. DeForest McDuff will both be denied.

I. Facts

For purposes of the motion for class certification, the Court makes the following findings of fact. Additional facts are set forth as appropriate during discussion of the class action requirements.

The Estates solicit individuals and businesses across North Carolina to become members of its organization. Doc. 104 at ¶ 19. The Estates maintains a database of properties in foreclosure and assists members and their related entities who wish to bid on these properties. *Id.* at ¶¶ 19-21. Members pay a monthly user fee to access the database, as well as an "acquisition fee" for any property acquired through the database, and they must split any profits **[*3]** with The Estates. *Id.* at ¶ 22. Membership in The Estates also requires members to use real estate agents, brokers, and closing attorneys selected or approved by The Estates. *Id.* at ¶¶ 26-27. Members must establish separate companies to participate in each foreclosure sale. *Id.* at ¶ 28.

The plaintiffs allege and have offered significant evidence that members in The Estates network agree that no more than one member may bid on a given property in a foreclosure sale. *Id.* at ¶¶ 33, 36-37; Doc. 104-8 at 2; Doc. 65 at ¶¶ 4-5. Members interested in a property indicate their desire to bid on that property, whereupon an Estates "acquisition assistant" determines who among the interested members will be allowed to submit a bid on the property. Doc. 104 at ¶¶ 39-41,43. The member chosen to bid on a particular property then sets up a limited liability company for the sole purpose of making the bid. *Id.* at ¶ 42. Next, an acquisition assistant, acting on behalf of the member and the newly formed LLC, attends the foreclosure sale and bids on the property. *Id.* at ¶¶ 43-44, 48; Doc. 65 at ¶ 6.

The named plaintiffs owned homes in North Carolina that were sold in foreclosure proceedings to an Estates member, **[*4]** or to an entity created by an Estates member, using the services provided by The Estates. Doc. 104 at ¶ 3; *see, e.g.*, Doc. 1-6; Doc. 1-12.

II. The Pending Class Certification Motion

The Court denied the plaintiffs' first motion for class certification, Doc. 56, without prejudice to a renewal after discovery. Doc. 70. The parties presented a scheduling plan, Doc. 72, which the Magistrate Judge approved. Doc. 73. Following discovery limited to class certification issues, the plaintiffs filed this renewed motion for class certification, Doc. 86, and a motion to amend the complaint. Doc. 85. The Court granted the motion to amend, Doc. 103, and will treat the amended complaint, Doc. 104, as the operative complaint for purposes of evaluating the renewed motion for class certification. Doc. 86.

The amended complaint identifies over 100 prospective class members in North Carolina, South Carolina, and Texas, with the potential for more.[1] Doc. 104 at ¶ 97(a). The renewed motion for class certification asks the Court to

---

[1] The numbers of potential class members provided by the named plaintiffs are not completely consistent across filings, but they fall within a fairly narrow range. The amended complaint alleges that 137 prospective class members have been identified from documents produced by the defendants. Doc. 104 at ¶ 97; Doc. 81-1 (showing around 101 foreclosed North Carolina properties); Doc. 87-2 (showing 15 foreclosed Texas and South Carolina properties purchased by an Estates member). In one brief, the plaintiffs assert the existence of 120 North Carolina plaintiffs, six South Carolina plaintiffs, and nine Texas plaintiffs—totaling only 135. Doc. 87 at 7. In another, this number shifts to 144 total plaintiffs across the three states, Doc. 100 at 4, but the exhibits filed to support this number, Docs. 100-1, 100-2, 100-3, show that many of the identified North Carolina properties were

certify this group into two classes. Doc. 86 at ¶¶ 2-3. First, the plaintiffs ask the Court to certify a nationwide class seeking redress for their claims under the Sherman Act. This **[*5]** class would be defined as:

> All persons and entities whose properties were sold through foreclosure proceedings at which a Member of the Estates was the high bidder and at which the Estates placed the bid deposit on their behalf.

Id. at ¶ 2; *see* Doc. 104 at ¶ 95. Second, the plaintiffs seek to certify a subclass to pursue North Carolina state law claims. This North Carolina subclass would be defined as:

> All persons and entities whose properties were sold through foreclosure proceedings in North Carolina at which a Member of the Estates was the high bidder and at which the Estates placed the bid deposit on their behalf who have standing to bring North Carolina state law claims.

Doc. 86 at ¶ 3; *see* Doc. 104 at ¶ 95. This subclass would pursue both a state antitrust claim under *N.C. Gen. Stat. § 75-1* and a state unjust enrichment claim. Doc. 86 at ¶ 3.

III. Class Action Requirements

"The class action is an exception to the usual rule that litigation is conducted by and on behalf of the individual named parties only." *Comcast Corp. v. Behrend, 569 U.S. 27, 33, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)* (cleaned up). To certify a class, the plaintiffs "must affirmatively demonstrate [their] compliance" with *Federal Rule of Civil Procedure 23*. *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 350, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*. "*Rule 23* does not set forth a mere pleading standard." *Id.* The plaintiffs "must be prepared **[*6]** to prove that there are *in fact* sufficiently numerous parties, common questions of law or fact, etc." *Id.*

As a threshold matters, *Rule 23* requires the proposed class members to be readily identifiable and the proposed class representatives to be members of the proposed class. *See* *Fed. R. Civ. P. 23(a)*; *EQT Prod. Co. v. Adair, 764 F.3d 347, 358 (4th Cir. 2014)* (recognizing "implicit threshold" requirements). The plaintiffs must then establish that the class satisfies all four enumerated requirements of *Rule 23(a)* and fits into at least one of the three subsections of *Rule 23(b)*. *Comcast Corp., 569 U.S. at 33*. The Court must rigorously assess the proffered evidence, *Gariety v. Grant Thornton, LLP, 368 F.3d 356, 359 (4th Cir. 2004)*, but has "a wide range of discretion" in evaluating whether the *Rule 23* requirements have been met. *Windham v. Am. Brands, Inc., 565 F.2d 59, 65 (4th Cir. 1977)* (cleaned up); *see* *Reiter v. Sonotone Corp., 442 U.S. 330, 345, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)* (noting that district courts "have broad power and discretion vested in them" as to the "certification and management of potentially cumbersome" class actions). Where necessary, the Court must "resolve a genuine legal or factual dispute relevant to determining the requirements." *In re Hydrogen Peroxide Antitrust Litig., 552 F.3d 305, 320 (3d Cir. 2008)*. Here, the plaintiffs rely on *Rule 23(b)(3)*, *see* Doc. 87 at 28, which requires that common issues predominate and that a class action is the superior method for resolution of the issues. *Fed. R. Civ. P. 23(b)(3)*.

The predominance requirement is satisfied when "questions of law or fact common to the members **[*7]** of the class predominate over any questions affecting only individual members." *Gariety, 368 F.3d at 362*; *see also* *Fed. R. Civ. P. 23(b)(3)*. "An individual question is one where members of a proposed class will need to present evidence that varies from member to member, while a common question is one where the same evidence will suffice for each member to make a prima facie showing or the issue is susceptible to generalized, class-wide proof." *Tyson Foods, Inc. v. Bouaphakeo, 577 U.S. 442, 453, 136 S. Ct. 1036, 194 L. Ed. 2d 124 (2016)* (cleaned up).

IV. Analysis

---

owned by the same person or entity, *see, e.g.*, Doc. 100-1 at 2 (showing Kiraboltam, LLC as owner of four foreclosed properties), likely lowering the 144-class-member estimate.

The Court need not discuss all the requirements that the plaintiffs have met, which are many. The plaintiffs have failed to show that the antitrust element of impact can be proven by common class-wide proof, which means that they cannot show that common issues predominate. Without predominance, the motion must be denied.

The predominance inquiry begins "with the elements of the underlying cause of action." *Erica P. John Fund, Inc. v. Haliburton Co., 563 U.S. 804, 809, 131 S. Ct. 2179, 180 L. Ed. 2d 24 (2011)*. To establish a private antitrust claim, a plaintiff must prove three elements: (1) a violation of the antitrust laws here, *15 U.S.C. § 1* and *N.C. Gen. Stat. § 75-1*; (2) individual injury, or impact, resulting from that violation; and (3) measurable damages. *See Deiter v. Microsoft Corp., 436 F.3d 461, 467 (4th Cir. 2006)*; *In re Titanium Dioxide Antitrust Litig., 284 F.R.D. 328, 344 (D. Md. 2012)*. "In antitrust cases, impact often is critically important for the purpose of evaluating *Rule 23(b)(3)*'s predominance requirement because it is an **[*8]** element of the claim that may call for individual, as opposed to common, proof." *In re Hydrogen Peroxide, 552 F.3d at 311*.

Two of the elements require little discussion. If the defendants engaged in an illegal bid-rigging conspiracy to suppress the price of properties purchased through foreclosure sales, that bid-rigging conspiracy is a *per se* antitrust violation.[2] *United States v. Joyce, 895 F.3d 673, 677 (9th Cir. 2018)* ("Bid rigging is . . . *a per se* violation of the Sherman Act."). "Such agreements or practices are conclusively presumed to be unreasonable because of their pernicious effect on competition and lack of any redeeming virtue." *See id. at 676* (cleaned up). Whether the defendants so conspired "can be resolved for each class member in a single hearing" and does not "turn[] on a consideration of the individual circumstances of each class member." *Thorn v. Jefferson-Pilot Life Ins., 445 F. 3d 311, 319 (4th Cir. 2006)* (cleaned up). The evidence is common to all class members and will not require individualized evidence. *See Hayes v. Wal-Mart Stores, Inc., 725 F.3d 349, 359 (3d Cir. 2013)*.

Conversely, as the plaintiffs admit, "there is an individualized component to the damages suffered by the class." Doc. 87 at 22; *see Deiter, 436 F.3d at 467* (discussing the requirement that the plaintiffs must establish measurable damages); *In re Titanium Dioxide, 284 F.R.D. at 348* (same). But individual questions as to damages do not necessarily defeat an antitrust class **[*9]** certification. *See, e.g., Gunnells v. Healthplan Servs., Inc., 348 F.3d 417, 429 (4th Cir. 2003)* ("[T]he need for individualized proof of damages alone will *not* defeat class certification."); *Soutter v. Equifax Info. Servs., 307 F.R.D. 183, 214 (ED. Va. 2015)* (noting that courts will typically certify a class if "common questions predominate regarding liability").

The plaintiffs' plan to address the third element, antitrust injury or "impact" from the bid-rigging conspiracy, requires more discussion. A *per se* antitrust violation only means the ***antitrust law*** has been violated; it "does not indicate whether a private plaintiff has suffered antitrust injury and thus whether he may recover damages under *§ 4* of the *Clayton Act*." *Atl. Richfield Co. v. USA Petrol. Co., 495 U.S. 328, 342, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*. At the class certification stage, the plaintiffs must show that antitrust impact is "capable of proof at trial through evidence that is common to the class rather than individual to its members" in order to meet the predominance requirement. *In re Hydrogen Peroxide, 552 F.3d at 311-12*; *accord Bell Atl. Corp. v. AT & T Corp., 339 F.3d 294, 302 (5th Cir.2003)* ("[W]here fact of damage cannot be established for every class member through proof common to the class, the need to establish antitrust liability for individual class members defeats *Rule 23(b)(3)* predominance.").

Whether a class member has suffered an "injury-in-fact" as a result of the antitrust violation alleged here is a question of fact with obvious individual **[*10]** components. *See Cordes & Co. Fin. Servs., Inc. v. A.G. Edwards & Sons, Inc., 502 F.3d 91, 106 (2d Cir. 2007)* (discussing the "familiar factual question" of whether the plaintiff suffered an "injury-in-fact"); *In re Titanium Dioxide, 284 F.R.D. at 344 n.13* (same). The price obtained for a piece of residential real estate at a foreclosure sale would ordinarily be affected by many factors specific to the piece of property, including the amount of the mortgage and other pending liens, the location, and the extent of needed

---

[2] *See, e.g., United States v. W.F. Brinkley & Son Constr. Co., 783 F.2d 1157, 1160 (4th Cir. 1986)* (holding that bid rigging is *a per se* antitrust violation); *ITCO Corp. v. Michelin Tire Corp., Commercial Div., 722 F.2d 42, 48 (4th Cir. 1983)* ("[P]roof of conduct violative of the Sherman Act is proof sufficient to establish a violation of the *North Carolina Unfair Trade Practices Act*.").

repairs. The price would also typically be affected by external influences like the state of the economy, opportunities for profitable resale, and the number of bidders at foreclosure. The Estates did not control the market for foreclosure properties, and unlike some price-fixing or bid-rigging schemes, there is no obvious reason to think that the agreement resulted in a lower price at every single foreclosure. For example, for any particular class property, only one Estates member may have been interested, or there may have been several other non-Estates bidders who raised the price so high that any agreement between defendants was essentially irrelevant.

Despite the obvious individual issues, the plaintiffs barely addressed antitrust impact; indeed, in their briefs in support of their initial motion, **[*11]** *see* Doc. 57 at 29-30; Doc. 66 at 16-17, and their renewed motion, *see* Doc. 87 at 28-30; Doc. 100 at 8-9, the plaintiffs devoted little more than a page to the entire predominance inquiry. The plaintiffs touched on impact in their discussion of *Rule 23(a)(2)* commonality, where they correctly noted that a civil antitrust claim requires an additional showing of an "injury causally linked to an illegal presence in the market." Doc. 87 at 20-21. But other than asserting that the defendants' "scheme was highly organized and impacted dozens of foreclosure auctions," *id.* at 21, they did not explain how they intend to establish at trial, using common proof, that every foreclosure auction in which an Estates member was the winning bidder caused antitrust injury to a class member.

The plaintiffs seem to assume that the existence of the bid-rigging scheme is enough to show injury. But proof that the conspiracy exists is not the same as proof that each class member was injured-in-fact by that conspiracy. *Atl. Richfield Co., 495 U.S. at 342*.

Whether antitrust impact can be shown by common proof is, as the Court has already highlighted, "critically important for the purpose of evaluating *Rule 23(b)(3)*'s predominance requirement." *In re Hydrogen Peroxide, 552 F.3d at 311*. At the certification stage the Court **[*12]** must rigorously assess "the available evidence and the method or methods by which plaintiffs propose to use the evidence to prove impact at trial." *Id. at 312*. The plaintiffs' initial briefings and submissions did not meet this requirement.

In response to the Court's request for supplemental briefing directed to the predominance issue and antitrust impact, Doc. 133, the plaintiffs filed a brief, Doc. 144, and a separate motion for leave to file a declaration from an expert economist, Dr. DeForest McDuff, setting forth a summary of how impact and damages could be proven with common evidence. Doc. 145 (motion); Doc. 145-1 (Dr. McDuff's declaration). The defendants reiterated their concerns over the individual issues related to causation and noted that they would be significantly prejudiced if the Court considered Dr. McDuff's declaration. Doc. 148 at 4-6; Doc. 149; Doc. 150 at ¶¶ 1-2.

Under the joint discovery plan and scheduling order, the plaintiffs did not envision expert testimony would be necessary at this stage, and expert disclosure was not scheduled to begin until after class certification. *See* Doc. 72 at 4 (agreeing to complete expert discovery within seven months, and disclosure within **[*13]** 90 days, of the Court's ruling on class certification); Doc. 73 (approving the discovery schedule). There is nothing to show that the defendants had any notice of Dr. McDuff's report until it was filed in response to the Court's request for a short supplemental brief. There is also significant authority suggesting that the Court must conduct a *Daubert* analysis when challenged expert testimony is necessary to meet the requirements for class certification.[3] Dr. McDuff's

---

[3] No controlling precedent dictates whether a district court must conduct a *Daubert* analysis at the class certification stage or how focused or full that analysis should be. *See* *Childress v. JPMorgan Chase & Co., No. 5:16-CV-298-BO, 2019 U.S. Dist. LEXIS 110396, 2019 WL 2865848, *2-3 (E.D.N.C. July 2, 2019)*; 3 *Newberg on Class Actions* § 7:24 (5th ed. Dec. 2020 Update). The Supreme Court has suggested that *Daubert* likely applies to challenged expert testimony at this stage, *Dukes, 564 U.S. at 354*, but the courts of appeals have taken different approaches to the issue. *Compare* *In re Blood Reagents Antitrust Litig., 783 F.3d 183, 187 (3d Cir. 2015)* (requiring a district court to rule on challenges to an expert's qualifications if the expert's report is "critical to class certification"), *and* *Am. Honda Motor Co. v. Allen, 600 F.3d 813, 815-16 (7th Cir. 2010)* (same), *with* *In re Zurn Pex Plumbing Prod. Liab. Litig., 644 F.3d 604, 612 (8th Cir. 2011)* (approving a certification order without a full *Daubert* analysis and explaining the impracticalities of requiring a district court to consider the admissibility of evidence at the class certification stage), *and* *Sali v. Corona Reg'l Med. Ctr., 909 F.3d 996, 1006 (9th Cir. 2018)* (finding a district court abused its discretion by only reviewing admissible evidence in its class certification analysis). The Court has previously found the rationale

declaration is quite short, with little detail, and it raises many questions about his methodology and otherwise.[4] The defendants have had no opportunity to depose Dr. McDuff about his findings or methods. Nor have they had time or opportunity to locate and consult an expert of their own, much less to offer contradictory expert opinion testimony.

The late addition of this expert testimony to establish one of the clear requirements for class certification would be unfairly prejudicial to the defendants. The motion for leave to file Dr. McDuff's report **[*14]** will therefore be denied as untimely and as unfairly prejudicial to the defendants.

Without Dr. McDuff's testimony, the plaintiffs have not offered a sufficient plan to provide a common method of proving antitrust impact at trial. Without a common method to prove impact at trial, an individual assessment of whether and how the defendants' scheme affected each class member's foreclosure sale will be required—in addition to individual issues of damages. *See* discussion *supra*. Given these individual issues, common questions of law and fact do not predominate, and the motion for class certification will be denied.

V. Other Matters

In the amended complaint, Doc. 104, the plaintiffs named over 100 additional defendants who were alleged to be a part of the bid-rigging conspiracy organized by The Estates. Many of these defendants have nothing to do with the claims of the named plaintiffs and only have to do with the claims of putative class members. It seems appropriate, then, that the defendants who are unrelated to the foreclosures of the named plaintiffs should be dismissed.

The parties shall immediately meet and confer. No later than May 10, 2021, the parties shall file a joint submission containing **[*15]** a list of the specific defendants that the parties agree should be removed from the case in light of the class certification decision. If there are disagreements as to certain defendants, the parties shall suggest an appropriate way to address and resolve the issue.

It is **ORDERED**:

1. That the plaintiffs' motion for leave to file declaration of DeForest McDuff, Doc. 145, is **DENIED**;

2. That the plaintiffs' second motion to certify class, Doc. 86, is **DENIED**; and
3. That the parties shall meet, confer, and then file a joint submission on or before May 10, 2021, identifying which defendants are unrelated to the claims of the named plaintiffs and the best mechanism for dismissing the claims against them.

This the 22nd day of April, 2021.

in *In re Blood Reagents* and *Am. Honda Motor Co.* to be persuasive. *See* Krakauer v. Dish Network, LLC, No. 1:14-CV-333, 2015 U.S. Dist. LEXIS 118858, 2015 WL 5227693, at *5 (M.D.N.C. Sept. 8, 2015).

[4] While Dr. McDuff's testimony might be sufficient to find a common method of proving antitrust impact at trial, that is not a sure thing. To provide an example, it appears that his "but-for" method only works if at least two Estates members expressed an interest in bidding on a particular property. *See* Doc. 145-1 at 19-22 (determining a "but-for winning bid" for each property as a partial function of "Additional Estates bidders" who expressed interest in a property but did not ultimately participate in the bidding process because of the alleged conspiracy). But what about members of the class whose properties were only ever subject to one expression of interest from an Estates member? And wouldn't this require individual proof to determine whether more than one Estates member was interested?

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss under *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim upon which relief can be granted tests the legal sufficiency of a claim. When determining whether a claim has been stated, the Court accepts as true all well-pled factual allegations and construes them in the light most favorable to the plaintiff. However, the Court need not accept as true allegations that contradict matters properly subject to judicial notice or allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences. While a complaint need not contain detailed factual allegations, it must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A claim is facially plausible when it allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. However, it is one thing to be cautious before dismissing an antitrust complaint in advance of discovery, but quite another to forget that proceeding to antitrust discovery can be expensive. As such, a district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed. On a motion to dismiss, the Court's review is limited to the face of the complaint and matters judicially noticeable.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN2[] Amendment of Pleadings, Leave of Court

A district court ordinarily must grant leave to amend unless one or more of the Foman factors is present: (1) undue delay, (2) bad faith or dilatory motive, (3) repeated failure to cure deficiencies by amendment, (4) undue prejudice to the opposing party, or (5) futility of amendment. It is the consideration of prejudice to the opposing party that carries the greatest weight. However, a strong showing with respect to one of the other factors may warrant denial of leave to amend.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Mistake

HN3[] Heightened Pleading Requirements, Fraud Claims

Claims sounding in fraud are subject to the heightened pleading requirements of *Fed. R. Civ. P. 9(b)*, which require that a plaintiff alleging fraud must state with particularity the circumstances constituting fraud. *Fed. R. Civ. P. 9(b)*. To satisfy the heightened standard under *Rule 9(b)*, the allegations must be specific enough to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge and not just deny that they have done anything wrong. Thus, claims sounding in fraud must allege an account of the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentations. A plaintiff must set forth what is false or misleading about a statement, and why it is false. However, intent, knowledge, and other conditions of a person's mind need not be stated with particularity, and may be alleged generally. *Fed. R. Civ. P. 9(b)*.

Evidence > Judicial Notice > Adjudicative Facts > Facts Generally Known

Evidence > Judicial Notice > Adjudicative Facts > Public Records

Evidence > Judicial Notice > Adjudicative Facts > Verifiable Facts

HN4[] Adjudicative Facts, Facts Generally Known

Courts may take judicial notice of matters either that are generally known within the trial court's territorial jurisdiction or that can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned. *Fed. R. Evid. 201(b)*. Specifically, a court may take judicial notice: (1) of matters of public record, (2) that the market was aware of information contained in news articles, and (3) publicly accessible websites whose accuracy and authenticity is not subject to dispute.

Antitrust & Trade Law > Clayton Act > Claims

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > Clayton Act > Defenses

Antitrust & Trade Law > Sherman Act > Defenses

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN5[] Clayton Act, Claims

The injury rule applies to antitrust cases. The ordinary Clayton Act rule, applicable in private antitrust treble damages actions, holds a cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business. Courts do not require a plaintiff to actually discover its antitrust claims before the statute of limitations begins to run. The statute of limitations under the Sherman Act is four years.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN6[] Sherman Act, Defenses

To state a continuing violation of the antitrust laws in the Ninth Circuit, a plaintiff must allege that a defendant completed an overt act during the limitations period that meets two criteria: 1) It must be a new and independent act that is not merely a reaffirmation of a previous act; and 2) it must inflict new and accumulating injury on the plaintiff.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

Governments > Legislation > Statute of Limitations > Equitable Estoppel

Evidence > Burdens of Proof > Allocation

Governments > Legislation > Statute of Limitations > Tolling

HN7[] Tolling of Statute of Limitations, Fraudulent Concealment

A statute of limitations may be tolled if the defendant fraudulently concealed the existence of a cause of action in such a way that the plaintiff, acting as a reasonable person, did not know of its existence. The plaintiff carries the burden of pleading and proving fraudulent concealment.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

Torts > ... > Fraud & Misrepresentation > Nondisclosure > Elements

Torts > ... > Statute of Limitations > Tolling > Equitable Estoppel

HN8[] Tolling of Statute of Limitations, Fraudulent Concealment

To plead fraudulent concealment, the plaintiff must allege that: (1) the defendant took affirmative acts to mislead the plaintiff; (2) the plaintiff did not have actual or constructive knowledge of the facts giving rise to its claim; and (3) the plaintiff acted diligently in trying to uncover the facts giving rise to its claim. Thus, a fraudulent concealment defense requires a showing both that the defendant used fraudulent means to keep the plaintiff unaware of his cause of action, and also that the plaintiff was, in fact, ignorant of the existence of his cause of action. The plaintiff is deemed to have had constructive knowledge if it had enough information to warrant an investigation which, if reasonably diligent, would have led to discovery of the fraud. It is enough that the plaintiff should have been alerted to facts that, following duly diligent inquiry, could have advised it of its claim. Moreover, allegations of fraudulent concealment must be pled with particularity. Although it is generally inappropriate to resolve the fact-intensive allegations of fraudulent concealment at the motion to dismiss stage, plaintiffs nevertheless must allege specific factual allegations of fraudulent concealment to survive a motion to dismiss. Conclusory statements are not enough.

Governments > Legislation > Statute of Limitations > Tolling

HN9[] **Statute of Limitations, Tolling**

If a plaintiff has actual or constructive knowledge of the facts giving rise to his claim, then fraudulent concealment does not apply.

Governments > Legislation > Statute of Limitations > Equitable Estoppel

Governments > Legislation > Statute of Limitations > Time Limitations

HN10[] **Statute of Limitations, Equitable Estoppel**

The failure to own up to illegal conduct is not sufficient for fraudulent concealment, and to find otherwise would effectively nullify the statute of limitations in cases.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Mistake

HN11[] **Heightened Pleading Requirements, Fraud Claims**

To plead fraudulent concealment in accordance with *Fed. R. Civ. P. 9(b)*, plaintiffs must allege an account of the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentations.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

HN12[] **Tolling of Statute of Limitations, Fraudulent Concealment**

In the context of fraudulent concealment, diligent inquiry is required where facts exist that would excite the inquiry of a reasonable person, and diligence must be pled with particularity.

Opinion

ORDER GRANTING MOTION TO DISMISS

Three web developers—Reveal Chat Holdco LLC ("Reveal Chat"), USA Technology and Management **[*4]** Services, Inc. ("Lenddo"), and Beehive Biometric, Inc. ("Beehive") (collectively "Plaintiffs")—have brought this lawsuit against Defendant Facebook, Inc. ("Facebook") for removing access to a set of application programming interfaces ("APIs") in 2015 that Plaintiffs relied on for their mobile applications. *See* Am. Compl., ECF 62. Plaintiffs allege that Facebook's removal of these APIs was part of an elaborate scheme that violates *Section 2 of the Sherman Act*. *See id.* The Court previously found that Plaintiffs' claims were time-barred and granted them leave to amend their complaint. *See* Order ("Prior MTD order"), ECF 61. Facebook has again filed a motion to dismiss that includes the threshold issue of whether Plaintiff's claims are time-barred. *See* Mot., ECF 71. Plaintiffs oppose this motion. *See* Opp'n, ECF 73. The Court held a two-hour oral argument on December 3, 2020, giving Plaintiffs ample opportunity to discuss the viability of their claims. *See* Min Entry, ECF 78. For the reasons detailed below, the Court GRANTS Facebook's motion.

I. BACKGROUND

Plaintiffs allege that between 2004 and 2010, Facebook vanquished a number of rivals in order to emerge as the dominant social network in the United **[*5]** States. Am. Compl. ¶ 76. "By 2010, Facebook stood alone as the dominant player in the newly emergent market for social data (the 'Social Data Market')—a market in which Facebook's own users provided Facebook with a constant stream of uniquely valuable information, which Facebook in turn monetized through the sale of social data (for example, through advertising, monetizing APIs, or other forms of commercializing access to Facebook's network)." Am. Compl. ¶ 90. Facebook sold access to social data to developers and sold advertisements targeting Facebook's network of engaged and active users. Am. Compl. ¶ 91. Because user data made Facebook's network more valuable and thus attracted more customers, which then led to more data and more customers, a feedback loop emerged. Am. Compl. ¶¶ 92-95. Data provided by users made Facebook's network more valuable, thereby attracting more users to the network. Am. Compl. ¶ 92. A barrier to entry emerged from this feedback loop—to compete with Facebook, a new entrant would have to rapidly replicate both the breadth and value of the Facebook network by building its own vast network and duplicating the active user engagement on the same massive scale. **[*6]** Am. Compl. ¶ 95. Plaintiffs allege that this "Social Data Barrier to Entry" allows Facebook to control and increase prices in the Social Data and Social Advertising Markets without the pressures of price competition from existing competitors or new entrants. Am. Compl. ¶ 96.

In 2012, Facebook coined the term "Open Graph" "to describe a set of tools developers could use to traverse Facebook's network of users, including the social data that resulted from user engagement." Am. Compl. ¶ 131. Open Graph contained a set of APIs, which "allowed those creating their own social applications to query the Facebook network for information." Am. Compl. ¶ 132. Beginning in the fall of 2011, to allegedly address the threat posed by mobile applications, Facebook devised a scheme to attract third-party developers to build for their platform and then remove access to the APIs that were central to these applications. Am. Compl. ¶ 157. For example, the "Friends API" allowed third-party developers to search through a user's friends, as well as their friends of friends. Am. Compl. ¶ 158. Plaintiffs consider the Friends API, News Feed API, and certain Messaging APIs the "Core APIs." Am. Compl. ¶ 5. Without **[*7]** access to this data, third-party applications "would be abruptly left with none of the social data they needed to function." Am. Compl. ¶ 159. By August 2012, Facebook planned to prevent competitive third-party applications from buying social data from Facebook. Am. Compl. ¶ 167. Facebook even identified direct, horizontal competitors in the Social Data and Social Advertising Markets. Am. Compl. ¶ 168. In November 2012, Facebook announced that it would block competitors or require full data reciprocity for continued access to its data. Am. Compl. ¶ 176. Plaintiffs allege that Facebook's statements from September 2011 through April 2014 about the functionality of the Core APIs were false, half-truths that created a duty to speak fully and truthfully about the Core APIs. Am. Compl. ¶ 450.

In April 2014, Facebook announced that it would remove access to several "rarely used" APIs, including the Friends and News Feed APIs. Am. Compl. ¶ 242. Plaintiffs allege that these APIs were in fact quite popular and relied on by tens of thousands of third-party applications. Am. Compl. ¶ 243. After this announcement and through the full removal of the APIs in April 2015, Facebook entered into Whitelist **[*8]** and Data Sharing Agreements with certain third-party developers that allowed continued access to the Friends or News Feed APIs and included a provision acknowledging that the covered APIs were not available to the general public. Am. Compl. ¶¶ 247-248. These agreements "were only offered in exchange for massive purchases of Facebook's social data through mobile advertising and/or through the provision of the developer's own social data back to Facebook (so-called 'reciprocity')." Am. Compl. ¶ 249. Plaintiffs allege that Facebook covered up the real reason for the removal of the APIs—while Facebook publicly stated that the change was made to give users more control over their data, Plaintiffs allege that the real reason for the change was to kill applications that were competitive or potentially competitive with Facebook. Am. Compl. ¶¶ 461-62, 469. Plaintiffs allege that they first learned that Facebook's purported reasons for the removal of the APIs was false on November 6, 2019, when NBC News posted a trove of internal Facebook documents seized by the United Kingdom Parliament that allegedly showed that Facebook internally viewed the purported withdrawal as lacking any legitimate **[*9]** business or technical justification and that the scheme had a broad impact on competition. Am. Compl. ¶ 475.

A. Reveal Chat

Plaintiff Reveal Chat[1] was a dating platform whose business model was to consume social data through Facebook's APIs to provide match-making services and create a platform from which it could sell advertising. Am. Compl. ¶ 21. Reveal Chat learned in late 2014 that Facebook had slated APIs it relied on for removal. Am. Compl. ¶ 24. In 2015, Reveal Chat allegedly contacted Facebook "to determine if there was a way forward." Am. Compl. ¶ 25. Facebook allegedly referred Reveal Chat to its official policy documents and developer documentation, which suggested that the APIs were being removed for user control and privacy reasons. Am. Compl. ¶ 25. Reveal Chat then allegedly "contacted acquaintances that worked at Facebook to get more clarity as to the APIs and to determine whether [Reveal Chat] could obtain an exemption from the decision." Am. Compl. ¶ 26. Reveal Chat never obtained an exception and accepted Facebook's explanation that the APIs were being removed due to user privacy concerns. Am. Compl. ¶ 27. One of Reveal Chat's founders reviewed Facebook's blog post in **[*10]** December 2018, which responded to documents released as part of a United Kingdom Parliament investigation that again allegedly misled him into believing the APIs had been removed due to user privacy and control concerns. Am. Compl. ¶ 30. Reveal Chat alleges that it did not and could not learn the true reasons for the removal of the APIs until November 6, 2019, when internal Facebook documents were publicly released. Am. Compl. ¶ 31.

B. Lenddo

Plaintiff Lenddo developed a mobile application that used social data to assess a user's creditworthiness based on studies showing that a person's network of associations is predictive as to credit risk, fraud, and likelihood of loan repayment. Am. Compl. ¶¶ 32-33. Lenddo's business model was based on consuming social data from Facebook. Am. Compl. ¶ 39. Lenddo learned in April 2015 that Facebook was eliminating the Core APIs and the Messaging APIs for all companies that were not given exemptions. Am. Compl. ¶ 43. On April 23, 2015, Lenddo entered a developer ticket, seeking to obtain an exemption from the new policy. Am. Compl. ¶ 44. Lenddo alleges it communicated with Facebook's Neil Hiltz and Simon Cross, and Cross informed Lenddo that it could **[*11]** not have access to the Core APIs and the Messaging APIs because the its application was credit-related and was part of a business that provided credit. Am. Compl. ¶¶ 45-46. Lenddo alleges that this explanation is false, as Royal Bank of Canada had allegedly obtained an exemption after having purchased large amounts of advertising from Facebook. Am. Compl. ¶ 47. Lenddo allegedly spoke with other developers, reviewed documentation from Facebook, and spoke to "other acquaintances at Facebook" and concluded that Facebook's policy change was for legitimate reasons. Am. Compl. ¶ 48. Lenddo alleges that it did not and could not learn the true reasons for the removal of the APIs until 2019 when internal Facebook documents were publicly released. Am. Compl. ¶ 52.

C. Beehive

Plaintiff Beehive had devised an algorithm that would analyze a user's social connections and interactions to determine whether the individual's identification was authentic and thus establish whether a Facebook user was a real person. Am. Compl. ¶¶ 55-56. Beehive targeted its product to dating sites, and as a result, the dating sites saw immediate increases in reliability of users on their platforms and a significant drop **[*12]** in fraud risk. Am. Compl. ¶ 58. Beehive's business was halted in 2015 when it discovered that Facebook was removing the APIs, including the Friends and News Feed APIs, that Beehive's business depended on for its functionality. Am. Compl. ¶ 60. Beehive sought an exemption from Facebook but never received a response. Am. Compl. ¶ 61. "Beehive sought an

---

[1] Reveal Chat is the successor in interest to Reveal Chat, Inc. (f/k/a LikeBright, Inc.), pursuant to an April 2015 merger between Reveal Chat and Reveal Chat, Inc. Am. Compl. ¶ 18. The Court will refer to this company both pre- and post-merger as Reveal Chat.

exemption from Facebook but received no answer. Beehive then contacted an acquaintance that worked at Facebook, who advised them that they would never receive an exemption." Am. Compl. ¶ 61. Beehive allegedly spoke to other developers, read documentation by Facebook, and viewed developer message boards and did not find any explanation other than the one Facebook had offered regarding user privacy for the API removals. Am. Compl. ¶ 63. Beehive alleges that it did not and could not learn the true reasons for the removal of the APIs until 2019 when internal Facebook documents were publicly released. Am. Compl. ¶ 65.

D. Prior Order Granting Facebook's Motion to Dismiss

This Court previously granted a motion to dismiss filed by Facebook on July 8, 2020. *See* Prior MTD Order; *see also* *Reveal Chat Holdco, LLC v. Facebook, Inc., 471 F. Supp. 3d 981 (N.D. Cal. 2020)*. The Court found as a matter of law that Plaintiffs' claims **[*13]** were time-barred by the four-year statute of limitations for antitrust claims and that Plaintiffs had not adequately pled fraudulent concealment in part because they had not plausibly alleged they were without actual or constructive knowledge of the facts giving rise to their claims. Prior MTD Order 10, 14. The Court found that, "[t]o allege fraudulent concealment, Plaintiffs must establish that 'its failure to have notice of its claim was the result of [Facebook's] affirmative conduct.'" Prior MTD Order 9 (quoting *Conmar Corp. v. Mitsui & Co. (U.S.A.), 858 F.2d 499, 505 (9th Cir. 1988))*. The Court found that Plaintiffs had notice as of April 30, 2014, that access to the Friends and News Feed APIs would be removed, and Plaintiffs had notice of the Whitelist and Data Sharing Agreements in September 2015 via an article published in the Wall Street Journal. Prior MTD Order 10. "Thus, at the very least, Plaintiffs had constructive knowledge of the facts that give rise to their claims." Prior MTD Order 10. The Court also found that Facebook's decision to keep "tightly underwraps" the "real reason for the removal of the APIs" is not affirmative conduct that necessarily tolls the statute of limitations. Prior MTD Order 10.

The Court further found that Plaintiffs **[*14]** had failed to allege how they had acted diligently in trying to uncover facts giving rise to their claims. Prior MTD Order 10-11. "Here, the publicly available facts regarding Facebook's allegedly anticompetitive conduct would excite the inquiry of a reasonable person, and therefore Plaintiffs must plead diligence with particularity. They have failed to do so here." Prior MTD Order 11. The Court granted Plaintiffs leave to amend on the issue of fraudulent concealment, which if applicable, would toll the statute of limitations. Prior MTD Order 14.

II. LEGAL STANDARD

A. *Rule 12(b)(6)*

HN1[] "A motion to dismiss under *Federal Rule of Civil Procedure 12(b)(6)* for failure to state a claim upon which relief can be granted 'tests the legal sufficiency of a claim.'" *Conservation Force v. Salazar, 646 F.3d 1240, 1241-42 (9th Cir. 2011)* (quoting *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001))*. When determining whether a claim has been stated, the Court accepts as true all well-pled factual allegations and construes them in the light most favorable to the plaintiff. *Reese v. BP Exploration (Alaska) Inc., 643 F.3d 681, 690 (9th Cir. 2011)*. However, the Court need not "accept as true allegations that contradict matters properly subject to judicial notice" or "allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)* (internal quotation marks and citations omitted). While a complaint need not contain **[*15]** detailed factual allegations, it "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. A claim is facially plausible when it "allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* "However, as the Supreme Court has noted precisely in the context of private antitrust litigation, 'it is one thing to be cautious before dismissing an antitrust complaint in advance of discovery, but quite another to forget that proceeding to antitrust discovery can be expensive.'" *Feitelson v. Google Inc., 80 F. Supp. 3d 1019, 1025 (N.D. Cal. 2015)* (quoting *Twombly, 550 U.S. at 558-59*). "As such, 'a district court must retain the power to insist upon some specificity in pleading before allowing a potentially massive factual controversy to proceed.'" *Feitelson, 80 F. Supp. 3d at 1025-26* (quoting *Associated Gen. Contractors of Cal., Inc. v. Carpenters, 459 U.S. 519, 528 n.17, 103 S. Ct. 897, 74 L. Ed. 2d 723 (1983)* *quoted with approval in* *Twombly, 550 U.S. at 559*). On a motion to dismiss, the Court's review is limited to the face of the complaint and matters judicially noticeable. *MGIC Indem. Corp. v. Weisman, 803 F.2d 500, 504 (9th Cir. 1986)*; *N. Star Int'l v. Ariz. Corp. Comm'n, 720 F.2d 578, 581 (9th Cir. 1983)*.

HN2[] In deciding whether to grant leave to amend, the Court must consider the factors set forth by the Supreme Court in *Foman v. Davis, 371 U.S. 178, 83 S. Ct. 227, 9 L. Ed. 2d 222 (1962)*, and discussed at length by the Ninth Circuit in *Eminence Capital, LLC v. Aspeon, Inc., 316 F.3d 1048 (9th Cir. 2009)*. A district court ordinarily must grant leave to amend unless one or more of the *Foman* factors is **[*16]** present: (1) undue delay, (2) bad faith or dilatory motive, (3) repeated failure to cure deficiencies by amendment, (4) undue prejudice to the opposing party, or (5) futility of amendment. *Eminence Capital, 316 F.3d at 1052*. "[I]t is the consideration of prejudice to the opposing party that carries the greatest weight." *Id.* However, a strong showing with respect to one of the other factors may warrant denial of leave to amend. *Id.*

B. *Rule 9(b)*

HN3[] Claims sounding in fraud are subject to the heightened pleading requirements of *Federal Rule of Civil Procedure 9(b)*, which require that a plaintiff alleging fraud "must state with particularity the circumstances constituting fraud." *Fed. R. Civ. P. 9(b)*; *see also* *Kearns v. Ford Motor Co., 567 F.3d 1120, 1124 (9th Cir. 2009)*. To satisfy the heightened standard under *Rule 9(b)*, the allegations must be "specific enough to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge and not just deny that they have done anything wrong." *Semegen v. Weidner, 780 F.2d 727, 731 (9th Cir. 1985)*. Thus, claims sounding in fraud must allege "an account of the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentations." *Swartz v. KPMG LLP, 476 F.3d 756, 764 (9th Cir. 2007)* (per curiam) (citation omitted). "A plaintiff must set forth what is false or misleading about a statement, **[*17]** and why it is false." *In re GlenFed, Inc. Sec. Litig., 42 F.3d 1541, 1548 (9th Cir. 1994)* (en banc), *superseded by statute on other grounds as stated in* *SEC v. Todd, 642 F.3d 1207, 1216 (9th Cir.2011)*. However, "intent, knowledge, and other conditions of a person's mind" need not be stated with particularity, and "may be alleged generally." *Fed. R. Civ. P. 9(b)*.

III. DISCUSSION

A. Request for Judicial Notice

Defendants request judicial notice of three documents: the Complaint in *Six4Three, LLC v. Facebook, Inc*, No. CIV 533328 (San Mateo Cnty. Super. Ct. April 10, 2015), *see* Ex. 1, State Court Complaint, ECF 71-2; a September 21, 2015 *Wall Street Journal* article, *Facebook's Restrictions on User Data Cast a Long Shadow, see* Ex. 2, Data Sharing Article, ECF 71-3; and an October 20, 2020 *Wall Street Journal* article, *Snapchat Nears 250 Million Daily Users as Advertisers Lift Spending on Platform, see* Ex. 1, Snapchat Article, ECF 74-2. ***HN4***[] Courts may take judicial notice of matters either that are "generally known within the trial court's territorial jurisdiction" or that "can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned." *Fed. R. Evid. 201(b)*. "Specifically, a court may take judicial notice: (1) of matters of public record, (2) that the market was aware of information contained in news articles, **[*18]** and (3) publicly accessible websites whose accuracy and authenticity is not subject to dispute." *In re Facebook, Inc. Sec. Litig., 405 F. Supp. 3d 809, 827 (N.D. Cal. 2019)* (internal citations and quotation marks omitted). Plaintiffs do not object to judicial notice of these documents. The Court grants Defendants' request and finds the state court complaint judicially noticeable as a publicly available court document, *see* *Reyn's Pasta Bella, LLC v. Visa USA, Inc., 442 F.3d 741, 746 n.6 (9th Cir. 2006)* and the *Wall*

Street Journal articles judicially noticeable "as an indication of what information was in the public realm at the time," *see Von Saher v. Norton Simon Museum of Art at Pasadena, 592 F.3d 954, 960 (9th Cir. 2010)*.

B. Statute of Limitations

Facebook argues that Plaintiffs' claims are time-barred, as the Court found in its prior order, and the amendments do not cure the identified deficiencies in the pleading. Mot. 4-5. Plaintiffs chose to not address this threshold issue until the last section of their brief and argue that there is an intra-circuit split as to whether a "discovery rule" or an "injury rule" applies to antitrust claims, and if this Court chooses the discovery rule, then Plaintiffs' claims have not accrued. Opp'n 20-21.

HN5[] The Court disagrees with Plaintiffs and finds that the Supreme Court and Ninth Circuit have clearly stated that the injury rule applies to antitrust cases. *See Klehr v. A.O. Smith Corp., 521 U.S. 179, 188, 117 S. Ct. 1984, 138 L. Ed. 2d 373 (1997)* (finding that the ordinary **[*19]** *Clayton Act* rule, applicable in private antitrust treble damages actions holds "a cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business.") (quoting *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971))*; *Hexcel Corp. v. Ineos Polymers, Inc., 681 F.3d 1055, 1060 (9th Cir. 2012)* ("We do not require a plaintiff to actually discover its antitrust claims before the statute of limitations begins to run.") (citing *Beneficial Standard Life Ins., Co. v. Madariaga, 851 F.2d 271, 274-75 (9th Cir. 1988))*. The statute of limitations under the *Sherman Act* is four years. *Hexcel, 681 F.3d at 1057* (citing *15 U.S.C. § 15b*). To the extent that Plaintiffs are seeking injunctive relief, the Court reiterates its previous finding that "the doctrine of laches applies to the instant case", Prior MTD Order 7, and the same "four-year statute of limitations in *15 U.S.C. § 15b* furnishes a guideline for computation of the laches period." Prior MTD Order 7 (quoting *Samsung Elecs. Co. v. Panasonic Corp., 747 F.3d 1199, 1205 (9th Cir. 2014))*.

Plaintiffs admit that they had notice of their injury by April 30, 2015 when the Core APIs that their businesses relied on were withdrawn. Am. Compl. ¶¶ 6, 13, 245.[2] Plaintiffs did not commence this lawsuit until January 16, 2020. *See* Compl., ECF 1. Therefore, Plaintiffs' claims are time barred unless the Sherman Act statute of limitations is properly tolled. The Court finds that it is not.

Continuing Violation

Plaintiffs argue that Facebook's conduct **[*20]** restarted the statute of limitations under the "continuing violation" doctrine. Opp'n 21-22. Plaintiffs argue that Facebook continued to operate its Onavo spyware to spy on mobile application users as part of its scheme to prevent the advent of a rival social advertising platform or generator of social data. Opp'n 21. This allegedly prevented Snapchat from evolving into a viable platform that would allow Plaintiffs to reacquire the social data they needed for their original business models, as Facebook "cloned" Snapchat's functionality in 2016. Opp'n 21-22. Plaintiffs also argue that Facebook continued to operate under Whitelist and Data Sharing Agreements that allowed some companies to continue having access to the necessary APIs in exchange for social data sharing or advertising purposes. Opp'n 22.

Facebook argues that Plaintiffs did not allege in their complaint that Facebook's purported "cloning" of Snapchat's features caused them injury. Reply 4, ECF 74. Facebook argues that since Plaintiffs were already allegedly excluded from the social data market as of April 2015, when they lost access to the Core APIs, Plaintiffs have failed to plead how any alleged cloning in 2016 somehow **[*21]** worsened their pre-existing injury or constituted a new injury. Reply 4. Facebook also argues that the continued existence of the Data Sharing Agreements, which Plaintiff had notice of by September 2015, do not establish a continuing violation. Reply 4.

---

[2] Plaintiffs do not allege that they signed any Whitelist or Data Sharing Agreements with Facebook, but they had notice of those agreements by September 2015. *See* Prior MTD Order 10; Ex. 2, Data Sharing Article, ECF 71-3.

HN6[] "To state a continuing violation of the antitrust laws in the Ninth Circuit, a plaintiff must allege that a defendant completed an overt act during the limitations period that meets two criteria: 1) It must be a new and independent act that is not merely a reaffirmation of a previous act; and 2) it must inflict new and accumulating injury on the plaintiff." *Samsung Elecs. Co. v. Panasonic Corp., 747 F.3d at 1202 (9th Cir. 2014)*; *accord* *Oliver v. SD-3C LLC, 751 F.3d 1081, 1086 (9th Cir. 2014)* (stating limitations begins to run from date of each "new overt act causing injury").

Here, Plaintiffs were allegedly injured when they were excluded from the social data market by virtue of losing access to the Core APIs by April 30, 2015. Am. Compl. ¶¶ 6, 13, 245 The Court has reviewed the allegations concerning Facebook cloning Snapchat features, *see* Am. Compl. ¶¶ 311-12 and agrees with Facebook that Plaintiffs have not pled facts demonstrating that this alleged cloning inflicted any new and accumulating injury on Plaintiffs beyond their pre-existing injury **[*22]** via exclusion in April 2015. Accordingly, these allegations do not constitute a "continuing violation."

The Court also agrees with Facebook that the relevant act concerning the Data Sharing Agreements occurred in April 2015, the latest start date Plaintiffs allege for the agreements. Am. Compl. ¶¶ 247, 256. Accordingly, the continued existence of these Data Sharing Agreements does not constitute new and independent acts that restart the statute of limitations. *See* *Ryan v. Microsoft Corp. ("Ryan II"), 147 F. Supp. 3d 868, 884 (N.D. Cal. 2015)* (where the defendant entered into an allegedly unlawful contract prior to the limitations period, the defendant still must take an unlawful 'new and independent act that is not merely a reaffirmation of a previous act' during the limitations period.") (citing *Pace Indus. v. Three Phoenix Co., 813 F.2d 234, 237 (9th Cir.1987))*.

In conclusion, the Court does not find that the continuing violation doctrine applies here to toll the statute of limitations. Plaintiffs already received an opportunity to amend their complaint to properly plead this theory, and they have not suggested that a third attempt would be more productive than the first two. The Court finds that further amendment would be futile and accordingly dismisses this theory with prejudice.

Fraudulent [*23] Concealment

Plaintiffs argue that the doctrine of fraudulent concealment applies to toll the statute of limitations in this case. Opp'n 22-25. Plaintiffs allege that Facebook had a duty to speak fully and truthfully about its plans for removing the APIs, and Facebook affirmatively lied about the real reasons for removing the APIs. Opp'n 22-24. Plaintiffs also argue that, if the Court finds that "facts exist that would excite the inquiry of a reasonable person" regarding Facebook's misconduct, they were diligent in trying to discover the misconduct. Opp'n 25. Facebook argues that Plaintiffs have not cured the deficiencies the Court identified in its prior order finding that the doctrine of fraudulent concealment does not apply. Mot. 5-11, Reply 5-8. Specifically, Facebook argues that Plaintiffs have not pled affirmative acts Facebook took to mislead them Mot. 5-11. Facebook argues that Plaintiffs knew of their injuries by April 2015, and the fact that they were allegedly unaware of Facebook's motives for the removal of the APIs does not impact the fraudulent concealment analysis. Mot. 6, 8-9. Facebook also argues that Plaintiffs have not adequately alleged that they were diligent after **[*24]** learning of their injuries. Mot. 11.

HN7[] "A statute of limitations may be tolled if the defendant fraudulently concealed the existence of a cause of action in such a way that the plaintiff, acting as a reasonable person, did not know of its existence." *Hexcel, 681 F.3d at 1060*. "The plaintiff carries the burden of pleading and proving fraudulent concealment." *Id.* (brackets and internal quotation marks omitted). *HN8*[] "To plead fraudulent concealment, the plaintiff must allege that: (1) the defendant took affirmative acts to mislead the plaintiff; (2) the plaintiff did not have 'actual or constructive knowledge of the facts giving rise to its claim'; and (3) the plaintiff acted diligently in trying to uncover the facts giving rise to its claim." *In re Animation Workers Antitrust Litig. ("Animation Workers II"), 123 F. Supp. 3d 1175, 1194 (N.D. Cal. 2015)* (quoting *Hexcel, 681 F.3d at 1060*)). Thus, "[a] fraudulent concealment defense requires a showing both that the defendant used fraudulent means to keep the plaintiff unaware of his cause of action, and also that the plaintiff was, in fact, ignorant of the existence of his cause of action." *Wood v. Santa Barbara Chamber of Commerce, Inc., 705 F.2d 1515, 1521 (9th Cir. 1983)*. "The plaintiff is deemed to have had constructive knowledge if it had enough information to warrant an investigation which, if reasonably diligent, **[*25]** would have led to discovery of the fraud." Beneficial Standard Life Ins. Co. v. Madariaga, 851 F.2d 271, 275 (9th Cir. 1988). "It is enough that the plaintiff should have been alerted to facts that, following duly diligent inquiry, could have advised it of its claim." Hexcel, 681 F.3d at 1060 (internal quotation marks omitted).

"Moreover, allegations of fraudulent concealment must be pled with particularity." Ryan II, 147 F. Supp. 3d at 885. "Although it is generally inappropriate to resolve the fact-intensive allegations of fraudulent concealment at the motion to dismiss stage, Plaintiffs nevertheless must allege specific factual allegations of fraudulent concealment to survive a motion to dismiss," Garrison v. Oracle Corp. ("Garrison II"), 159 F. Supp. 3d 1044, 1073 (N.D. Cal. 2016) (granting a motion to dismiss with prejudice and finding that plaintiffs had failed to adequately plead fraudulent concealment). "Conclusory statements are not enough." Conmar Corp., 858 F.2d at 502.

HN9[] In *Hexcel*, the Ninth Circuit emphasized that if a plaintiff has actual or constructive knowledge of the facts giving rise to his claim, then fraudulent concealment does not apply. Hexcel, 681 F.3d at 1060. Plaintiffs do not attempt to contest that they knew of their alleged exclusion by Facebook by April 30, 2015, when Facebook removed access to the Core APIs. Rather, Plaintiffs argue that without the knowledge of Facebook's true motives **[*26]** for removing the APIs, they could not know they were injured. **HN10**[] However, the "failure to own up to illegal conduct" is not sufficient for fraudulent concealment, "and to find otherwise 'would effectively nullify the statute of limitations in these cases.'" Garrison II, 159 F. Supp. 3d at 1077 (quoting Pocahontas Supreme Coal Co. v. Bethlehem Steel Corp., 828 F.2d 211, 218-19 (4th Cir. 1987)); *see also* Conmar, 858 F.2d at 505 (citing favorably Pocahontas, 828 F.2d at 218); In re Animation Workers Antitrust Litig. ("Animation Workers I"), 87 F. Supp. 3d 1195, 1216 (N.D. Cal. 2015) ("That Defendants did not affirmatively disclose the details of their allegedly unlawful conspiracy to Plaintiffs is neither surprising nor sufficient to constitute 'affirmative steps to mislead.'")[3] (citing Conmar, 858 F.2d at 505)). Under Hexcel, what is important is the facts that give rise to Plaintiffs' claims. The critical fact was losing access to the Core APIs in April 2015.

The Court finds the primary cases Plaintiffs rely on, Animation Workers II and In re Glumetza Antitrust Lit., 2020 U.S. Dist. LEXIS 39649, 2020 WL 1066934, at *6 (N.D. Cal. Mar 5, 2020), distinguishable from this case. As Facebook notes, these cases involve allegations of illegal price-fixing, a different antitrust violation than what Plaintiffs have alleged here. Both cases allege a conspiracy, which is also absent in this case. These different factual scenarios are meaningful in terms of evaluating whether Plaintiffs have sufficiently pled fraudulent concealment. **[*27]** The Court agrees with Facebook that "In a price-fixing case, concealing the reasons a price is set at a given level obscures not only the defendant's intent but also the fact that a potential plaintiff has been injured at all—i.e., that prices are the result of collusion rather than market forces." Mot. 8. Here, by contrast, the injury of lost API access was clear to Plaintiffs when it occurred. *See* Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* ¶ 320a (4th ed., last updated Sept. 2020) ("[I]n the typical refusal to deal, tying, or exclusive dealing case, the injured party and likely plaintiff has virtually immediate knowledge of the unlawful act.").

The Court also finds that Plaintiffs have failed to plead affirmative conduct on the part of Facebook with the requisite particularity that Rule 9(b) requires. **HN11**[] "[T]o plead fraudulent concealment in accordance with Rule 9(b), Plaintiffs must allege an account of the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentations." Garrison II, 159 F. Supp 3d at 1075 (internal quotation and citation omitted). Many of the statements cited by Plaintiffs were not made **[*28]** to these particular Plaintiffs. *See, e.g.*, Am. Compl. ¶¶ 464-65 (statements to developers at Microsoft and Airbiquity); Am. Compl. ¶ 466 (statements to unspecified, unnamed developers). Statements made before Plaintiffs were allegedly injured in April 2015 necessarily cannot toll the statute of limitations, *see* Am. Compl. ¶¶ 459-60. Plaintiffs also allege a "code of silence"

[3] The Court acknowledges that the *Animation Workers* plaintiffs were ultimately able to plead sufficient facts to establish fraudulent concealment at the motion to dismiss stage after Judge Koh gave them one opportunity to amend their complaint. *See* Animation Workers II, 123 F. Supp 3d at 1193-1205. Even under *Animation Workers II*, the facts pled by Plaintiffs after their opportunity to amend are not sufficient to plausibly plead fraudulent concealment.

internally at Facebook, Am. Compl. ¶¶ 454-58, but this Court has already rejected Plaintiffs' attempts to rely on Facebook's private actions as affirmative misconduct that specifically misled them. Prior MTD Order 9-10.

Plaintiffs allege that Facebook misrepresented the real goal of the API withdrawal in an April 30, 2015 blog post, Am. Compl. ¶ 467, but Plaintiffs do not allege that any of them read or relied on this statement. The March 26, 2018 statement of senior executive Ime Archibong, Am. Compl. ¶ 472, suffers from the same deficiency. Plaintiffs also refer to unspecified Facebook "documentation and FAQ," publicized by Facebook employee Simon Cross on an unspecified message board on an unspecified date, that was false and misleading, Am. Compl. ¶ 468, but this type of allegation is wholly insufficient under **[*29]** *Rule 9(b)*. *See* *Animation Workers I, 87 F. Supp. 3d at 1217* ("Plaintiffs offer no specific facts showing the 'who, what, where, when' of these alleged incomplete or materially false statements.") (citing *Swartz v. KPMG LLP, 476 F.3d 756, 764 (9th Cir. 2007)* (per curiam)). Plaintiffs' allegations that Reveal Chat and Beehive "frequented those sources of information as a matter of course" and read the posts and accepted the pretextual reason for the API removal, Am. Compl. ¶ 471, is not the type of allegation of fraud "specific enough to give defendants notice of the particular misconduct which is alleged to constitute the fraud charged so that they can defend against the charge." *Garrison II, 159 F. Supp 3d at 1075* (citing *Swartz, 476 F.3d at 764*). Defendants also allege that December 5, 2018 blog post by Facebook misrepresented the reasons for the API withdrawal and Data Sharing Agreements, and this post was read by one of the founders of Reveal Chat. Am. Compl. ¶¶ 30, 474. However, the Complaint does not specifically identify this founder, or how many founders Reveal Chat and its predecessor company claim. These allegations are significantly less particular than those held sufficient in *Animation Workers II*, where those plaintiffs alleged facts such as "Lucasfilm made 'affirmative efforts to eliminate a paper trail regarding its code-named 'DNR' **[*30]** agreements,' including a requirement that "all discussions of 'DNR' needed to be conducted over the phone ... [i]f you see an email forward to Steve and one of our lawyers." *123 F. Supp. 3d at 1201*. Despite a previous warning from the Court that the alleged affirmative acts need to be specifically pled, *see* Prior MTD Order 9-10, Plaintiffs have still not cured this deficiency.

Finally, Plaintiffs have failed to plead their diligence in trying to uncover the facts giving rise to its claim with particularity. ***HN12***[] "Diligent inquiry is required where facts exist that would excite the inquiry of a reasonable person," and diligence must be pled with particularity. *Glumetza, 2020 U.S. Dist. LEXIS 39649, 2020 WL 1066934, at *6* (citing *Conmar, 858 F.2d at 502, 504)*. Allegations such as "[Reveal Chat] then contacted *acquaintances that worked at Facebook* to get more clarity as to the APIs and to determine whether [Reveal Chat] could obtain an exemption from the decision," Am. Compl. ¶ 26 (emphasis added) fall woefully short of the particularity required to plead diligence. Beehive likewise "contacted an *acquaintance that worked at Facebook*, who advised them that they would never receive an exemption." Am. Compl. ¶ 61 (emphasis added). Lenddo alleges that it spoke with Facebook's Simon Cross and Neil Hiltz about **[*31]** an exemption to the policy withdrawing access to the Core APIs, and Cross told them they would not be receiving an exemption. Am. Compl. ¶¶ 44-46, 476. Plaintiff has not pled how seeking an exemption to a policy constitutes diligence in attempting to determine if the API withdrawal was unlawful. Plaintiffs also claim they read two Facebook blog posts from 2015 and 2018 and unspecified message board posts, but "[o]nce [parties] had clear knowledge of their claims, it was not reasonable for them to rely on reassuring comments from [Defendant]." *Volk v. D.A. Davidson & Co., 816 F.2d 1406, 1416 (9th Cir. 1987)* (citation omitted). Accordingly, the Court finds that Plaintiffs have failed to plead sufficient facts alleging they acted diligently in trying to uncover the facts giving rise to their claim.

Conclusion

The Court is mindful that resolution of statute of limitations challenges are generally deferred until a presentation of a more developed record, but this is one of the rare cases where Plaintiffs' entire theory of liability is based on completed acts by Facebook beyond the limitations period. By their own pleading, Plaintiffs have exposed the tardiness of their claims, their knowledge of their injury, and the absence of diligence. Thus, the Court **[*32]** finds that the four-year statute of limitations applies to this case, and Plaintiffs have not adequately pled a tolling theory under the continuing violation or fraudulent concealment doctrines. The Court put Plaintiffs on notice in its first order granting Facebook's motion to dismiss that "allegations of fraudulent concealment must be pled with particularity." Prior Order 8 (citing *Ryan II, 147 F. Supp. 3d at 885*). Despite this notice, Plaintiffs' allegations are wholly inadequate to meet the pleading standard for fraud claims under *Rule 9(b)*. Given Plaintiffs' adequate notice of the need to plead with particularity and their continued failure to do so, the Court finds that further amendment would be futile and will GRANT Facebook's motion to dismiss WITH PREJUDICE.

C. Facebook's Remaining Arguments

Facebook argues several other grounds for dismissal, including that Plaintiffs have not plausibly alleged an antitrust injury and have failed to state a claim establishing a violation of *Section 2 of the Sherman Act*. Mot. 11-25. However, because this case is being dismissed under the statute of limitations, the Court need not reach these arguments.

IV. ORDER

For the foregoing reasons, IT IS HEREBY ORDERED that Facebook's motion to dismiss **[*33]** is GRANTED WITH PREJUDICE.

Dated: April 26, 2021

BETH LABSON FREEMAN

United States District Judge

JUDGMENT

The amended complaint of Plaintiffs Reveal Chat HoldCo LLC, USA Technology and Management Services, Inc. (d/b/a Lenddo USA), and Beehive Biometric, Inc. (a/k/a Beehive ID) having been dismissed without leave to amend and the action having been dismissed with prejudice,

it is hereby ORDERED and ADJUDGED that Plaintiffs Reveal Chat HoldCo LLC, USA Technology and Management Services, Inc. (d/b/a Lenddo USA), and Beehive Biometric, Inc. (a/k/a Beehive ID) take nothing by this action and that judgment is entered for Facebook, Inc. and against Plaintiffs Reveal Chat HoldCo LLC, USA Technology and Management Services, Inc. (d/b/a Lenddo USA), and Beehive Biometric, Inc. (a/k/a Beehive ID).

HN1[] **Summary Judgment, Burdens of Proof**

Summary judgment is proper where the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law. Fed. R. Civ. P. 56(a). The moving party has the burden of demonstrating the absence of a genuine issue of material fact for trial. The burden on the moving party may be discharged by showing—that is, pointing out to the district court--that there is an absence of evidence to support the nonmoving party's case. The moving party must affirmatively show the absence of such evidence in the record, either by deposition testimony, the inadequacy of documentary evidence, or by any other form of admissible evidence. The moving party has no burden to negate or disprove matters on which the opponent will have the burden of proof at trial. The facts are construed in the light most favorable to the party opposing the motion.

Importantly, a mere scintilla of evidence will be insufficient to defeat a properly supported motion for summary judgment.

Civil Rights Law > Protection of Rights > Procedural Matters > Claim Accrual

Governments > Legislation > Statute of Limitations > Time Limitations

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN2[] **Remedies, Damages**

The statute of limitations begins to run when a defendant commits an act that injures a plaintiff's business. Both the United States Court of Appeals for the Ninth Circuit and the United States Supreme Court have long assumed as a basic principle of ***antitrust law*** that antitrust claims accrue at the time of injury. The plaintiff's knowledge is generally irrelevant to accrual.

Antitrust & Trade Law > Sherman Act > Claims

Governments > Legislation > Statute of Limitations > Time Limitations

HN3[] **Sherman Act, Claims**

A plaintiff's Sherman Act claim begins to accrue on the date on which injury occurs.

Antitrust & Trade Law > Sherman Act > Defenses

Civil Rights Law > Protection of Rights > Procedural Matters > Continuing Violations

Labor & Employment Law > ... > Title VII Discrimination > Statute of Limitations > Continuing Violations

Torts > ... > Statute of Limitations > Begins to Run > Continuing Violations

Governments > Legislation > Statute of Limitations > Extensions & Revivals

HN4[] **Sherman Act, Defenses**

Under the continuing violations doctrine, each overt act that is part of the antitrust violation and that injures the plaintiff starts the statutory period running again. (A continuing violation is one in which the plaintiff's interests are repeatedly invaded and a cause of action arises each time the plaintiff is injured.). In the United States Ninth Circuit, an overt act restarts the statute of limitations if it: (1) is a new and independent act that is not merely a reaffirmation of a previous act,; and (2) inflicts new and accumulating injury on the plaintiff. The effect of a continuing violation is to restart the statute of limitations.

Opinion

CIVIL MINUTES - GENERAL

Proceedings: IN CHAMBERS - COURT ORDER

On January 21, 2021 defendants Hawthorne Airport, LLC, Advanced Air, LLC, David Wehrly, and Levi Stockton ("Defendants") filed a Motion to Dismiss. (Dkt. No. 29 ("Mot.").) Plaintiffs Hawthorn Hangar Operations, L.P., and Dan Wolfe ("Plaintiffs") filed an Opposition (Dkt. No. 33) and Defendants filed a Reply (Dkt. No. 37.) Plaintiffs filed a Request to Strike Defendants' Reply (Dkt. No. 40) and Defendants filed a Request to Strike Plaintiffs' Request (Dkt. No. 41).

On February 26, 2021, **[*2]** the Court provided notice to the parties that it was converting Defendants' Motion to Dismiss into a *Rule 56* Summary Judgment Motion on the issue of whether Plaintiffs' antitrust claims are barred by the statute of limitations. (Dkt. No. 47.) In its Order, the Court noted that several of the documents attached to the parties' Motion to Dismiss, Opposition, and Reply were not proper documents for judicial notice, and included facts that the Court could not rely on in deciding a *Rule 12(b)(6)* motion. (Id.) The Court further noted that, pursuant to *Federal Rule of Civil Procedure 12(d)*, a Court may convert a *Rule 12(b)(6)* motion to dismiss into a *Rule 56* motion for summary judgment. (Id. citing *Fed. R. Civ. P. 12(d)* ("If, on a motion under *Rule 12(b)(6)* or *Rule 12(c)*, matters outside the pleading are presented to and not excluded by the court, the motion must be treated as one for summary judgment under *Rule 56*. All parties must be given a reasonable opportunity to present all the material that is pertinent to the motion.")).

The Court provided Plaintiffs with an opportunity to file a supplemental opposition by March 12, 2021, and for Defendants to file a reply by March 19, 2021. (Id.) On March 12, 2021, Plaintiffs filed their Opposition. (Dkt. No. 54 ("Pl.'s Supp. Opp.").) On March 19, 2021, Defendants filed their **[*3]** Reply. (Dkt. No. 58 ("Def.'s Supp. Reply").) Pursuant to *Rule 78 of the Federal Rules of Civil Procedure* and *Local Rule 7-15*, the Court finds this matter appropriate for decision without oral argument.

I. Background

Plaintiffs brought this case against Defendants and the City of Hawthorne[1], alleging Defendants "conspired among themselves to restrain interstate commerce at the Hawthorne Municipal Airport," and that "[w]ith the complicity of the City, [Defendants] have acquired a de facto monopoly over all ground leases and aviation services at the airport." (Dkt. No. 1 ("Compl.") ¶ 1.) Plaintiffs allege Defendants have "attempted to prevent Plaintiffs from engaging in competing fuel sales at the airport." (Id. ¶ 10.)

As alleged in Plaintiffs' Complaint, in 2005, "the City of Hawthorne entered into a master ground lease with [d]efendant Hawthorn Airport, LLC for thirty-five years with two . . . renewal options for *sections 1*, *2*, *4*, *5*, *6*, *7*, *9*, and *11*." (Id. ¶ 14.) Hawthorne Airport LLC was also "given the option to lease the remaining *sections 3*, *8*, and *10*."

[1] The Court granted the City of Hawthorne's Motion to Dismiss without leave to amend on March 12, 2021. (Dkt. No. 55.)

(Id.) Hawthorne Airport LLC "exercised the option to lease *sections 3*, *8*, and *10* and has therefore acquired from the City a constructive exclusive right [over] the entire aircraft non movement area of the airport." (Id.) Plaintiffs allege **[*4]** that "by being the master lease holder, [Hawthorne Airport LLC,] Wehrly, and Stockton are able to exclude from the airport any business seeking to compete with the services they and [defendant Advanced Air, LLC] provide." (Id.)

As alleged in Plaintiffs' Complaint, in 2009, plaintiff Wolfe and defendant Wehrly, entered into a Purchase/Sale Agreement to "purchased the former Northrop headquarters property adjacent to the airport." (Id. ¶ 17.) "The Northrop parcel included a large hangar and two existing 15,000 gallon underground fuel tanks that were previously used by Northrop to fuel its aircraft." (Id. ¶18.)

According to Plaintiffs, defendant Wehrly "sought to preserve his monopoly through the insertion in the Purchase/Sale Agreement [of] restrictive covenants which sought to limit Wolfe's ability to sell fuel to the general public." (Id.) "In August of 2009 Hawthorne Hangar Operations L.P. was formed as a partnership between Wehrly and Wolfe to purchase the Northrop property." (Id. ¶ 19.) Section 10.4 of the Purchase/Sale Agreement contains a fuel restriction stating "Buyer covenants and agrees that Buyer shall not use the fuel tanks located on the Real Property for any purpose other than fueling **[*5]** and refueling of (i) airplanes, helicopters and other equipment owned or directly managed by Buyer . . . ."

"In 2014, [plaintiff] Wolfe sought to buy out [defendant] Wehrly's partnership interest in [Hawthorne Hangar Operations L.P.] . . . because Wehrly refused to proceed with the renovation of the fuel facility." (Id. ¶ 25.) Wehrly allegedly agreed to be bought out, but insisted that the fueling restriction be made part of the buyout agreement, which Wolfe refused. (Id.) In order to avoid a "forced sale, a compromise was reached where a provision was inserted into the buyout agreement" in which Wolfe allegedly "simply acknowledge[d] that [the fueling restriction]" was part of the Purchase/Sale Agreement. (Id.) "After the 2014 buyout, Wolfe expended $1.2 million to make the fuel farm operational." (Id. ¶ 26.)

According to Plaintiffs, Defendants allegedly continued their conspiracy to restrain fuel competition by erecting a fence that was "intended to obstruct and hinder [Hawthorne Hangar Operations L.P.'s'] fueling operations." (Id. 28.) According to the undisputed facts submitted by the parties in their supplemental briefing, in 2009 there was a fence located between the Hawthorne Hangar **[*6]** Airport Property and Defendant/ Hawthorne Airport, LLC's leasehold just north of the Hawthorne Hangar Airport property. (Def.'s Supp. Reply at 1, Decl. of L. Stockton at ¶¶ 11-13.) The pre-existing fence was a "chain link" type fence with "slats and support poles that were cemented into the ground." (Id. ¶ 5.) In 2016, this pre-existing fence was removed by Plaintiffs. (Id.; see also Pls.' Supp. Opp., Decl. of Dan Wolfe at ¶ 7 (Plaintiffs "removed" "open-corral areas" because Plaintiffs "didn't need any outdoor fenced-in area for storage," and removal was "approved without [Plaintiffs'] fuel farm refurbishment project." "Building a tall unnecessary fence with no openings in its entire length formed a three sided very dangerous trap."). Defendant Hawthorne Airport LLC demanded that Plaintiffs replace the pre-existing fence. On April 28, 2017, after Plaintiffs did not put up a new fence, Defendant Hawthorne Airport LLC put up a new fence. (Def.'s Supp. Reply, Decl. of L. Stockton ¶ 28.)

In their Complaint, Plaintiffs bring claims for: (1) violation of *15 U.S.C. section 1*, conspiracy to restrain interstate commerce (fuel sales), (2) violation of *15 U.S.C. section 2*, for unlawful attempt to monopolize fuel sales and airport **[*7]** services, (3) declaratory relief that section 10.4 (the fuel restriction section of the Purchase/Sale Agreement) is void by operation of *California Business & Professions Code Section 16600*, and (4) nuisance and abatement. Defendants now ask the Court to find on summary judgment that Plaintiffs' *Sherman Act* claims (claims 1 and 2) are barred by the statute of limitations.

II. Legal Standard

HN1[] Summary judgment is proper where "the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." *Fed. R. Civ. P. 56(a)*. The moving party has the burden of demonstrating the absence of a genuine issue of material fact for trial. *Anderson v. Liberty Lobby, Inc.,* 477 U.S. 242, 256, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986). "[T]he burden on the moving party may be discharged by 'showing'—that is, pointing out to the district court—that there is an absence of evidence to support the nonmoving party's case." Celotex Corp. v. Catrett, 477 U.S. 317, 325, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986); see also Musick v. Burke, 913 F.2d 1390, 1394 (9th Cir. 1990). The moving party must affirmatively show the absence of such evidence in the record, either by deposition testimony, the inadequacy of documentary evidence, or by any other form of admissible evidence. See Celotex, 477 U.S. at 322. The moving party has no burden to negate or disprove matters on which the opponent will have the burden of proof at trial. See id. at 325. The facts are construed "in the light most favorable to the **[*8]** party opposing the motion." Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986). Importantly, a "mere 'scintilla' of evidence will be insufficient to defeat a properly supported motion for summary judgment.'" Fazio v. City & County of San Francisco, 125 F.3d 1328, 1331 (9th Cir. 1997) (quoting Anderson, 477 U.S. at 249, 252).

III. Discussion

In their original Motion to Dismiss, Defendants argued in part that the statute of limitations has run on Plaintiffs' Sherman Act claims because all of the alleged antitrust acts occurred more than four years ago. In particular, Defendants argued Plaintiffs' Sherman Act claims began to run in 2009 when Plaintiffs and Defendants entered into the Purchase/Sale Agreement which contained a restrictive covenant on Plaintiffs' fuel sales. According to Defendants, it was at this time that any alleged injury to Plaintiffs' potential fuel sales operations occurred.

In response, Plaintiffs argue that the statute of limitations did not begin to run until February of 2017. Plaintiffs argue they were not injured in 2009 because they did not intend to sell fuel on their property in 2009, and that under the accrual exception they were not injured until 2017 when they decided they wanted to sell fuel on their property. (Dkt. No. 54, Pls. Opp. to Motion to Dismiss at 5.)

In addition, Plaintiffs argue that under the continuing **[*9]** violation doctrine, the April 2017 erection of the fence blocking Plaintiffs' property constitutes a continuing violation which kept the statute of limitations from running. (Dkt. No. 54 at 2.) According to Plaintiffs, this fence was part of Defendants' continuing effort to prevent Plaintiffs from competing with Defendants' fuel sales.

A. Sherman Act Statute of Limitations

Plaintiffs' claims under the Sherman Act are subject to a four year statute of limitations. See15 U.S.C. § 15(b). ***HN2***[] The statute of limitations begins to run "when a defendant commits an act that injures a plaintiff's business." Zenith Radio Corp. v. Hazeltine Research Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971); see also In re Animation Workers Antitrust Litig., 87 F. Supp. 3d 1195, 1209 (N.D. Cal. Apr. 3, 2015) ("[B]oth the Ninth Circuit and U.S. Supreme Court have long assumed as a basic principle of ***antitrust law*** that antitrust claims accrue at the time of injury.") "[T]he plaintiff's knowledge is generally irrelevant to accrual." Beneficial Standard Life Insurance Co. v. Madariaga, 851 F.2d 271, 274-75 (9th Cir. 1988).

1. When Plaintiffs' Sherman Act Claims Accrued

In their supplemental Opposition, Plaintiffs argue that the "accrual exception" applies to their Sherman Act claims, and that under this exception, the statute of limitations did not begin to run until February 14, 2017. ***HN3***[] A plaintiff's Sherman Act claim begins to accrue on "the date on which injury occurs." In re Animation Workers Antitrust Litig., 87 F. Supp. 3d at 1209.

According to Plaintiffs, **[*10]** February of 2017 is when Plaintiffs first decided they wanted to sell fuel on their property and this is when Defendants first attempted to assert the restrictive covenant that injured Plaintiffs. (Dkt. No. 54 at 5.) Plaintiffs argue they had "no intention of engaging in competing fuel sales at the time of the [2009 Purchase/Sale Agreement]." Instead, "[a]ll that [plaintiff] Wolfe wanted to do at the time was to be able to fuel his own aircraft." (Id.) However, "due to the cost of restoring the fueling facility, [plaintiff] Wolfe changed his mind and decided to operate a fueling [facility] as a means of recovering these costs." (Id.) According to Plaintiffs, "it was only then, that Wolfe decided to enter the market and was adversely impacted by the . . . restrictive covenant." (Id.)

As the Court previously found, "Plaintiffs were injured in 2009 when Plaintiffs entered into the Purchase/Sale Agreement for the Northrop Property." (See Dkt. No. 55 at 4.) As the Court previously stated, Plaintiffs' allege that defendant Wehrly's motivation in entering into the agreement with Plaintiffs was to continue Wehrly's and the other defendants' monopoly and control over the airport property, which **[*11]** was granted to them by the City in the 2005 Master Lease Agreement and option to lease the remaining airport parcels. (Id.) Wehrly "further sought to preserve his monopoly through the insertion in the 2009 Purchase/Sale Agreement of restrictive covenants which sought to limit Wolfe's ability to sell fuel to the general public." (Id.) Plaintiffs were eventually forced to buy out Wehrly's interest in the Northrop property because Wehrly refused to develop the fuel facility and destroy the alleged monopoly granted to him by the City. Because an antitrust claim accrues "when a defendant commits an act that injured a plaintiff's business," Plaintiffs' antitrust claims against Defendants accrued in 2009 when Defendants committed the act of injuring Plaintiffs' potential fuel business by inserting the fuel restriction in the 2009 Purchase/Sale Agreement.

While Plaintiffs argue in their supplemental Opposition that Wolfe did not intend to sell fuel on his property until 2017 and therefore was not injured until 2017, the evidence submitted in support of this Motion directly contradicts Plaintiffs' argument. For example, in April of 2017, plaintiff Dan Wolfe sent an email to Levi Stockton stating **[*12]** he intended to sell fuel on the property in 2009, but thought it would be easier to challenge the fuel restriction after the Purchase/Sale Agreement was finalized. (See Def.'s Supp. Reply Ex. C ("They fraudulently inserted a bogus fabricated covenant (10.4) into our original purchase agreement. . . . At the time, just before closing, I didn't want to take the chance of screwing up the purchase. I also believed that it would be easy later to prove the wrong doing. . . . To counter the bogus, deceitful actions by Hoonie and David, BEFORE I put my money into escrow to close the sale, I presented Davis with a Partnership Agreement clearly outlining our shared ([Hawthorne Hangar Operation's]) intentions to sell fuel to 'outside tenants, invitees and visitors."))

Because there is no genuine dispute that Plaintiffs were injured in 2009, the Court finds as a matter of law that Plaintiffs' Sherman Act claims accrued in 2009. Thus, absent some other exception, the statute of limitations on Plaintiffs' Sherman Act claims expired four years later in 2013.

B. Continuing Violation Exception

Plaintiffs next argue that a new fence erected in 2017 constitutes a "continuing violation" that continued the **[*13]** statute of limitations for Plaintiffs' antitrust claims. ***HN4***[] Under the "continuing violations" doctrine, "each overt act that is part of the [antitrust] violation and that injures the plaintiff . . . starts the statutory period running again." *Klehr, 521 U.S. at 189*; *Pace Indus. v. Three Phoenix Co., 813 F.2d 234, 237 (9th Cir. 1987)* ("A continuing violation is one in which the plaintiff's interests are repeatedly invaded and a cause of action arises each time the plaintiff is injured."). In the Ninth Circuit, an overt act restarts the statute of limitations if it: (1) "is a new and independent act that is not merely a reaffirmation of a previous act,"; and (2) "inflict[s] new and accumulating injury on the plaintiff." *Pace, 813 F.3d at 237*. "The effect of a continuing violation is to restart the statute of limitations." *Airweld, Inc. v. Airco, Inc., 742 F.3d 1184, 1190 (9th Cir. 1984)*.

The undisputed facts show that in 2009 there was a fence located on the property where Plaintiffs allege a new fence was constructed. (Def.'s Supp. Reply at 1, Decl. of L. Stockton at ¶¶ 11-13.) The pre-existing fence was a "chain link" type fence with slats and support poles that were cemented into the ground." (Id. ¶ 5.) In 2016, this pre-existing fence was removed by Plaintiffs. (Id.; see also Plaintiffs' Supp. Opp., Decl. of Dan Wolfe at ¶ 7 (Plaintiffs "removed" "open-corral **[*14]** areas" because Plaintiffs "didn't need any outdoor fenced-in area for storage," and removal was "approved without [Plaintiffs'] fuel farm refurbishment project.") Thus, the fence erected in 2017 was not a new and independent act, but was rather a reaffirmation of a previous act - namely replacing a fence Plaintiffs had previously taken down.

In their Opposition, Plaintiffs argue that the "fences that [Hawthorne Hangar Operations] removed were not security fences." (Pl.'s Supp. Opp., Decl. of Dan Wolfe at ¶ 7.) Dan Wolfe's declaration states that there was "never, at least while [Hawthorne Hangar Operations] has been in existence, been an Airport Boundary Security Fence." However, the issue is not whether there was an "Airport Boundary Security Fence." The issue is whether there existed prior to 2017 a fence similar to the one Defendants erected in 2017. Based on the undisputed facts, the answer to that question is yes, there was a fence similar to the one Defendants erected, but it was removed by Plaintiffs in 2016.

The Court finds as a matter of law that the continuing violations exception does not apply to Plaintiffs' Sherman Act claims, because the fence erected in 2017 was not a **[*15]** new and independent act, and did not inflict a new and independent accumulating injury on Plaintiffs. The fence was simply erected to replace a fence that Plaintiffs earlier had taken down. Because the statute of limitations began to run on Plaintiffs' Sherman Act claims in 2009, and the continuing violations exception does not apply to Plaintiffs' Sherman Act claims, the Court finds as a matter of law that the statute of limitations on Plaintiffs' Sherman Act claims ran in 2013. Thus, Plaintiffs' Sherman Act claims brought against Defendants in 2020 are barred by the statute of limitations.

Conclusion

For the foregoing reasons, the Court finds as a matter of law that Plaintiffs' Sherman Act claims are barred by the statute of limitations. Plaintiffs' Sherman Act claims are dismissed with prejudice. The Court declines to exercise supplemental jurisdiction over Plaintiffs' remaining claims for (1) declaratory relief that section 10.4 is void, and (2) nuisance and abatement. See *28 U.S.C. § 1367(c)* (A federal court may decline to exercise supplemental jurisdiction if "the district court has dismissed all claims over which it has original jurisdiction.") Plaintiffs' claims for (1) declaratory relief and (2) nuisance **[*16]** and abatement are dismissed without prejudice. Defendants' Petition to Compel Arbitration of the Third Cause of Action of the Complaint (Dkt. No. 32) is denied as moot. The Court will issue a judgment consistent with this Order.

IT IS SO ORDERED.

JUDGMENT

Pursuant to the Court's March 12, 2021 Order granting defendant the City of Hawthorne's Motion to Dismiss and the Court's April 27, 2021 Order granting defendants Hawthorne Airport LLC, Advanced Air LLC, David Wehrly, and Levi Stockton's (together with the City of Hawthorne, "Defendants") Motion for Summary Judgment, it is HEREBY ORDERED, ADJUDGED, AND DECREED that

1. Judgment is entered in favor of Defendants and against Plaintiffs Hawthorne Hangar Operations, L.P. and Dan Wolfe ("Plaintiffs"); and

2. Plaintiffs take nothing and Defendants are entitled to their costs of suit pursuant to *Federal Rule of Civil Procedure 54*.

Evidence > Judicial Notice > Adjudicative Facts > Public Records

Evidence > Judicial Notice > Adjudicative Facts > Verifiable Facts

HN1[] **Motions to Dismiss, Failure to State Claim**

Generally, district courts may not consider material outside the pleadings when assessing the sufficiency of a complaint under Fed. R. Civ. P. 12(b)(6). However, a court may take judicial notice of matters of public record, and of documents whose contents are alleged in a complaint and whose authenticity no party questions, but which are not physically attached to the pleading, overruled on other grounds by Fed. R. Evid. 201. A judicially noticed fact must be one not subject to reasonable dispute in that it is either (1) generally known within the territorial jurisdiction of the trial court or (2) capable of accurate and ready determination by resort to sources whose accuracy cannot reasonably be questioned. Rule 201(b).

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Evidence > Judicial Notice > Adjudicative Facts > Verifiable Facts

HN2[] False Advertising, State Regulation

Judicial notice is proper over websites and images of packaging in consumer protection advertising actions.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Evidence > Judicial Notice > Adjudicative Facts > Verifiable Facts

HN3[] Motions to Dismiss, Failure to State Claim

Unlike rule-established judicial notice, incorporation-by-reference is a judicially created doctrine that treats certain documents as though they are part of the complaint itself. The doctrine prevents plaintiffs from selecting only portions of documents that support their claims, while omitting portions of those very documents that weaken — or doom — their claims. The Ninth Circuit has noted that there is a policy concern underlying the rule: preventing plaintiffs from surviving a Fed. R. Civ. P. 12(b)(6) motion by deliberately omitting references to documents upon which their claims are based. Even if a document is not attached to a complaint, it may be incorporated by reference into a complaint if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim. Incorporation-by-reference allows a court to treat such a document as part of the complaint, and thus may assume that its contents are true for purposes of a motion to dismiss under Rule 12(b)(6). While a court unlike judicial notice may assume an incorporated document's contents are true for purposes of a motion to dismiss under Rule 12(b)(6) it is improper to assume the truth of an incorporated document if such assumptions only serve to dispute facts stated in a well-pleaded complaint.

Civil Procedure > Pleading & Practice > Motion Practice > Content & Form

HN4[] Motion Practice, Content & Form

Courts can use incorporation-by-reference to consider exhibits containing printouts taken from websites that plaintiffs refer to and use to support their allegations.

Civil Procedure > Pleading & Practice > Motion Practice > Content & Form

HN5[] Motion Practice, Content & Form

Plaintiffs may not select only portions of documents that support their claims, while omitting portions of those very documents that weaken — or doom — their claims.

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Evidence > Burdens of Proof > Allocation

HN6[] Standing, Burdens of Proof

A Fed. R. Civ. P. 12(b)(1) motion to dismiss allows for dismissal of an action for lack of subject matter jurisdiction. Subject matter jurisdiction must exist when the action is commenced. Further, subject matter jurisdiction may be challenged at any stage in the litigation. Rule 12(h)(3). The party seeking federal jurisdiction bears the burden to establish jurisdiction. A party may challenge standing in a Rule 12(b)(1) motion given standing pertains to a federal court's subject-matter jurisdiction under Article III.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

HN7[] **Motions to Dismiss, Failure to State Claim**

A facial attack on jurisdiction asserts that the allegations in a complaint are insufficient to invoke federal jurisdiction, whereas a factual attack disputes the truth of the allegations that would otherwise confer federal jurisdiction. In resolving a facial challenge to jurisdiction, a court accepts the allegations of the complaint as true and draws all reasonable inferences in favor of the plaintiff. In resolving a factual attack, a court may examine extrinsic evidence without converting the motion to dismiss into a motion for summary judgment, and a court need not accept the allegations as true.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > Jurisdiction Over Actions

HN8[] **Entitlement as Matter of Law, Genuine Disputes**

A Fed. R. Civ. P. 12(b)(1) motion is not appropriate for determining jurisdiction where issues of jurisdiction and substance are intertwined. A court may not resolve genuinely disputed facts where the question of jurisdiction is dependent on the resolution of factual issues going to the merits. When there is an entanglement, determination of the jurisdictional issue should be determined on either a motion going to the merits or at trial. Unless the summary judgment standard is met, the disputed jurisdictional fact must be determined at trial by the trier of fact.

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Constitutional Law > ... > Case or Controversy > Standing > Elements

Evidence > Burdens of Proof > Allocation

Civil Procedure > ... > Justiciability > Standing > Injury in Fact

HN9[] **Standing, Burdens of Proof**

Article III standing requires a plaintiff to have (1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision. The party invoking federal jurisdiction bears the burden to establish standing.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN10[] **Class Actions, Certification of Classes**

District Courts in California are split on the issue of whether standing inquiries can be deferred until after class certification, but they note a trend that courts can address standing at the pleadings stage and dismiss claims brought under state laws that have no connection to the named plaintiffs.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Preliminary Considerations > Justiciability > Standing

HN11[] **Prerequisites for Class Action, Adequacy of Representation**

The United States District Court for the Southern District of California agrees with the growing trend that courts can address the issue of Article III standing at the pleading stage and dismiss claims asserted under the laws of states in which no plaintiff resides or has purchased products. Even in circumstances where courts have found they have discretion to defer standing questions until after class certification, the standing inquiry can be addressed when plaintiffs bring claims from states where they do not have a connection. Indeed, if a complaint includes multiple claims, at least one named class representative must have Article III standing to raise each claim. The United States Supreme Court has insisted that a plaintiff must demonstrate standing separately for each form of relief sought. The fact that an action is a putative class action does not excuse plaintiffs' obligation to show standing for each claim asserted.

Civil Procedure > ... > Justiciability > Standing > Burdens of Proof

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN12[] **Standing, Burdens of Proof**

A plaintiff must demonstrate constitutional standing separately for each form of relief requested. In applying the standing framework to a plaintiff seeking injunctive relief, the plaintiff must demonstrate that she or he has suffered or is threatened with a concrete and particularized legal harm, coupled with a sufficient likelihood that he will again be wronged in a similar way. The likelihood of further harm requires a real and immediate threat of repeated injury. Past wrongs constitute evidence of a real and immediate threat of repeated injury; however, past wrongs do not in themselves amount to a real and immediate threat of injury necessary to make out a case or controversy.

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

HN13[] **False Advertising, State Regulation**

In the false advertising context, the Ninth Circuit has held that a previously deceived consumer may have standing to seek an injunction against false advertising or labeling, even though the consumer now knows or suspects that the advertising was false at the time of the original purchase, because the consumer may suffer an actual and imminent, not conjectural or hypothetical threat of future harm. The Ninth Circuit emphasized that knowledge of a label's falsity does not equate to knowledge that it will remain false in the future.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN14[] Motions to Dismiss, Failure to State Claim

A Fed. R. Civ. P. 12(b)(6) motion to dismiss tests the sufficiency of the complaint. A pleading must contain a short and plain statement of the claim showing that the pleader is entitled to relief. Fed. R. Civ. P. 8(a)(2). However, plaintiffs must also plead enough facts to state a claim to relief that is plausible on its face. Fed. R. Civ. P. 12(b)(6). The plausibility standard demands more than a formulaic recitation of the elements of a cause of action, or naked assertions' devoid of further factual enhancement. Instead, the complaint must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN15[] Motions to Dismiss, Failure to State Claim

In reviewing a motion to dismiss under Fed. R. Civ. P. 12(b)(6), courts must assume the truth of all factual allegations and must construe them in the light most favorable to the nonmoving party. The court need not take legal conclusions as true merely because they are cast in the form of factual allegations. Similarly, conclusory allegations of law and unwarranted inferences are not sufficient to defeat a motion to dismiss.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN16[] Motions to Dismiss, Failure to State Claim

In determining the propriety of a Fed. R. Civ. P.12(b)(6) dismissal, courts generally may not look beyond the complaint for additional facts. A court may, however, consider certain materials — documents attached to the complaint, documents incorporated by reference in the complaint, or matters of judicial notice — without converting the motion to dismiss into a motion for summary judgment. However, courts are not required to accept as true conclusory allegations which are contradicted by documents referred to in the complaint.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Mistake

HN17[] Heightened Pleading Requirements, Fraud Claims

Allegations of fraud or mistake require the pleading party to state with particularity the circumstances constituting fraud or mistake. Fed. R. Civ. P. 9(b). The context surrounding the fraud must be specific enough to give defendants notice of the particular misconduct so that they can defend against the charge and not just deny that they have done anything wrong. Averments of fraud must be accompanied by the who, what, when, where, and how of the misconduct charged. A party alleging fraud must set forth more than the neutral facts necessary to identify the transaction.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN18[] Amendment of Pleadings, Leave of Court

Where dismissal is appropriate, a court should grant leave to amend unless the plaintiff could not possibly cure the defects in the pleading.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN19[] **Trade Practices & Unfair Competition, State Regulation**

The California Consumers Legal Remedies Act (CLRA), Cal Civ. Code §§ 1750-1784, prohibits unfair methods of competition and unfair or deceptive acts or practices undertaken by any person in a transaction intended to result or that results in the sale or lease of goods or services to any consumer. Cal. Civ. Code §§ 1770(a), 1760. Specifically, the CLRA prohibits, among other things, representing that goods or services have characteristics, ingredients, uses, benefits, or quantities that they do not have; representing that goods or services are of a particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another; advertising goods or services with intent not to sell them as advertised; and representing that the subject of a transaction has been supplied in accordance with a previous representation when it has not. Cal. Civ. Code § 1770(a)(5), (7), (9), (16).

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Business & Corporate Compliance > ... > Computer & Internet Law > Privacy & Security > State Regulation

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN20[] **Trade Practices & Unfair Competition, State Regulation**

The California False Advertising Law (FAL), Cal. Bus. & Prof. Code §§ 17500-17606, prohibits unfair, deceptive, untrue, or misleading advertising, and the United States District Court for the Southern District of California has previously concluded that a product's packaging may form the basis of an FAL claim. In particular, the FAL forbids the dissemination of any statement concerning property or services that is untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading. Cal. Bus. & Prof. Code § 17500.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN21[] **State Regulation, Claims**

The California Unfair Competition Law (UCL), Cal. Bus. & Prof. Code §§ 17200-17210, prohibits any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising. Cal. Bus. &

Prof. Code § 17200. The UCL provides a separate theory of liability under each of the three prongs: unlawful, unfair, and fraudulent. The UCL expressly incorporates the California False Advertising Law's prohibition on unfair advertising as one form of unfair competition. Additionally, a violation of the California Consumers Legal Remedies Act (CLRA) also violates the UCL.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN22[] **Complaints, Requirements for Complaint**

Regardless of standing problems, separate claims should not be lumped together into one cause of action. Fed. R. Civ. P. 10(b).

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN23[] **Heightened Pleading Requirements, Fraud Claims**

Where fraud is not a necessary element of a cause of action, a plaintiff may opt to allege that the defendant engaged in fraud. In cases where a plaintiff alleges a unified course of fraudulent conduct and relies on the conduct, the claim sounds or is grounded in fraud, and the pleading of that claim as a whole must satisfy the particularity requirement of Fed. R. Civ. P. 9(b). However, in cases where the plaintiff opts to not allege a unified course of fraudulent conduct and alleges a mix of some fraudulent and nonfraudulent conduct, only the allegations of fraud are subject to Rule 9(b)'s heightened pleading requirements.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN24[] **Heightened Pleading Requirements, Fraud Claims**

To determine whether a plaintiff met the particularity requirements of Fed. R. Civ. P. 9(b), a court examines the complaint to determine whether plaintiff plead the the who, what, when, where, and how of the misconduct charged.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

HN25[] **Heightened Pleading Requirements, Fraud Claims**

Fed. R. Civ. P. 9(b) has three purposes: (1) to provide defendants with adequate notice to allow them to defend the charge and deter plaintiffs from the filing of complaints as a pretext for the discovery of unknown wrongs; (2) to protect those whose reputation would be harmed as a result of being subject to fraud charges; and (3) to prohibit plaintiffs from unilaterally imposing upon the court, the parties and society enormous social and economic costs absent some factual basis.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

HN26[] State Regulation, Claims

A plaintiff alleging claims under the California Consumers Legal Remedies Act (CLRA), California False Advertising Law (FAL), or California Unfair Competition Law (UCL), must allege actual reliance. A plaintiff alleging false advertising or misrepresentation to consumers must show that the misrepresentation was an immediate cause of the injury-producing conduct. However, a plaintiff is not required to allege that the challenged misrepresentations were the sole or even the decisive cause of the injury-producing conduct.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN27[] Motions to Dismiss, Failure to State Claim

Collective allegations can survive a motion to dismiss.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Claims

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN28[] State Regulation, Claims

To state a claim under the California Consumers Legal Remedies Act (CLRA), California False Advertising Law (FAL), or the fraudulent prong of the California Unfair Competition Law (UCL), a plaintiff must allege that the defendant's purported misrepresentations are likely to deceive a reasonable consumer. Because the same standard for fraudulent activity governs all three statutes, courts often analyze the three statutes together. These laws prohibit not only advertising which is false, but also advertising which, although true, is either actually misleading or which has a capacity, likelihood or tendency to deceive or confuse the public.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Securities Law > ... > Elements of Proof > Materiality > Puffery

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN29[] Trade Practices & Unfair Competition, State Regulation

A reasonable consumer is the ordinary consumer acting reasonably under the circumstances. Likely to deceive implies more than a mere possibility that the advertisement might conceivably be misunderstood by some few consumers viewing it in an unreasonable manner. Rather, the phrase indicates that the ad is such that it is probable that a significant portion of the general consuming public or of targeted consumers, acting reasonably in the circumstances, could be misled. In determining whether a statement is misleading under the statute, the primary evidence in a false advertising case is the advertising itself. However, generalized, vague, and unspecified assertions constitute mere puffery upon which a reasonable consumer could not rely, and hence are not actionable under the California Unfair Competition Law (UCL), California False Advertising Law (FAL), or the California Consumers Legal Remedies Act (CLRA). Under the reasonable consumer test, the Ninth Circuit has emphasized that it is a rare situation in which granting a motion to dismiss is appropriate because it raises questions of fact.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN30[] **Deceptive & Unfair Trade Practices, State Regulation**

In assessing a product, whether a reasonable consumer would be deceived often depends on the circumstances. Substantial, nonfunctional empty space may be a factor that could plausibly mislead a reasonable consumer. The reasonable consumer is neither the most vigilant and suspicious of advertising claims nor the most unwary and unsophisticated, but instead is the ordinary consumer within the target population.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN31[] **Deceptive & Unfair Trade Practices, State Regulation**

To some degree, consumers may reasonably rely on the size of the packaging and believe that it accurately reflects the amount she is purchasing. Even if a product's packaging accurately displays its weight, it does not mean that the way in which the product was packaged may not be misleading. However, the inquiry does not end with merely relying on a package's size. Reasonable consumers also rely on serving size and product yield information as well as the feel of the package to inform their purchasing decisions.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN32[] **Motions to Dismiss, Failure to State Claim**

What is relevant at the motion to dismiss stage is not what a reasonable consumer actually believes, but whether plaintiff has plausibly pleaded facts indicating what a reasonable consumer could believe. Also at this stage, a court must construe plaintiffs' allegations in the light most favorable to them.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > False Advertising > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN33[] **Trade Practices & Unfair Competition, State Regulation**

The California Unfair Competition Law (UCL), California False Advertising Law (FAL), and the California Consumers Legal Remedies Act (CLRA), are designed to prohibit not only advertising which is false, but also advertising which, although true, is either actually misleading or which has a capacity, likelihood or tendency to deceive or confuse the public. Cal. Civ. Code § 1760. Further, § 1770(a)(9) does not include the word "representation;" rather, it merely makes unlawful advertising goods or services with intent not to sell them as advertised. Construing the CLRA liberally as required by statute, Cal. Civ. Code § 1760, the the United States District Court for the Southern District of California finds that exaggerated box size and slack fill allegations can form the basis for a CLRA claim.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > Fraud Claims

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN34[] **Heightened Pleading Requirements, Fraud Claims**

Allegations of fraud upon information and belief typically do not satisfy Fed. R. Civ. P. 9(b)'s heightened pleading requirements.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN35[] **Complaints, Requirements for Complaint**

A court does not accept as true allegations contradicted by documents attached to or referred to in the complaint, matters subject to judicial notice, unwarranted deductions of fact, or unreasonable inferences.

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Distribution, Processing & Storage

HN36[] **Agriculture & Food, Distribution, Processing & Storage of Food & Agricultural Products**

The fact that the FDA regulates the use of the term "healthy" implies that consumers rely on health-related claims on food products in making purchasing decisions.

Evidence > Weight & Sufficiency

HN37[] **Evidence, Weight & Sufficiency**

The Ninth Circuit has stated that Williams stands for the proposition that if a defendant commits an act of deception, the presence of fine print revealing the truth is insufficient to dispel that deception.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN38[] **Complaints, Requirements for Complaint**

A court does not accept as true allegations contradicted by documents attached to or referred to in the complaint, matters subject to judicial notice, unwarranted deductions of fact, or unreasonable inferences.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN39[] **Trade Practices & Unfair Competition, State Regulation**

The unlawful prong of the California Unfair Competition Law (UCL) is essentially an incorporation-by-reference provision. Accordingly, when a statutory claim fails, a derivative UCL claim also fails.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN40[] **Trade Practices & Unfair Competition, State Regulation**

The California Fair Packaging and Labeling Act (CFPLA) states that food containers cannot be made, formed, or filled as to be misleading. Cal. Bus. & Prof. Code § 12606.2(b). The statute further provides that a container that does not allow the consumer to fully view its contents shall be considered to be filled as to be misleading if it contains nonfunctional slack fill. Slack fill is the difference between the actual capacity of a container and the volume of product contained therein. Nonfunctional slack fill is the empty space in a package that is filled to substantially less than its capacity for reasons other than any one or more of the safe harbor provisions. § 12606.2(c). District courts in California are split as to whether the safe harbor provisions are affirmative defenses or or whether their inapplicability is an element that must be pled.

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Consumer Protection > Deceptive Labeling & Packaging > State Regulation

HN41[] **Trade Practices & Unfair Competition, State Regulation**

As a plaintiff's online purchases, the California Fair Packaging and Labeling Act (CFPLA) provides that there is no nonfunctional slack fill where the mode of commerce does not allow the consumer to view or handle the physical container or product. Cal. Bus. & Prof. Code § 12606.2(c)(8). The CFPLA itself provides that it is to be interpreted consistently with federal law. § 12606.2(e).

Business & Corporate Compliance > ... > Computer & Internet Law > Privacy & Security > State Regulation

HN42[] **Privacy & Security, State Regulation**

The plain language of Cal. Bus. & Prof. Code § 12606.2(c)(8) prevents online purchases from falling under nonfunctional slack fill because online shopping does not allow a consumer to be in contact with the physical container or product. However, 21 U.S.C.S. § 343(d) and federal regulation 21 C.F.R. § 100.100 do not contain the mode of commerce requirement found in Cal. Bus. & Prof. Code § 12606.2(c)(8). Thus, by the terms of Cal. Bus. & Prof. Code § 12606.2(f), the mode of commerce requirement is not operative. § 12606.2(f).

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

HN43[] **Trade Practices & Unfair Competition, State Regulation**

As to the unfair prong of the California Unfair Competition Law (UCL), the California Supreme Court has defined unfair conduct in competitor cases to mean conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition. However, the California Supreme Court has not established a test to determine whether a business practice is unfair in consumer cases.

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > Federal Trade Commission Act

Antitrust & Trade Law > Consumer Protection > Deceptive & Unfair Trade Practices > State Regulation

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > Federal Trade Commission Act

Antitrust & Trade Law > ... > Trade Practices & Unfair Competition > State Regulation > Scope

Antitrust & Trade Law > Federal Trade Commission Act > Scope

HN44[] **Deceptive & Unfair Trade Practices, Federal Trade Commission Act**

After the California Supreme Court's decision in Cel-Tech, the California Courts of Appeal have created a split of authority through applying three different tests for unfairness in consumer cases. The first test requires that the public policy which is a predicate to a consumer unfair competition action under the unfair prong of the the California Unfair Competition Law (UCL) must be tethered to specific constitutional, statutory, or regulatory provisions. The second test asks whether the alleged business practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers and requires the court to weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim. The third test draws on the unfair definition in the Federal Trade Commission Act and requires that (1) the consumer injury must be substantial; (2) the injury must not be outweighed by any countervailing benefits to consumers or competition; and (3) it must be an injury that consumers themselves could not reasonably have avoided. (first and then.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Express Warranties

HN45[] **Types of Contracts, Express Warranties**

Plaintiffs must allege the applicable law to determine whether they plead a sufficient claim. Even if the basic elements of breach of express warranties are unlikely to differ much from state to state, there may be (and likely are) differences from state to state regarding issues such as applicable statute of limitations and various equitable defenses. Plaintiffs cannot remedy the pleading defect through argument in their opposition brief.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Express Contracts

Contracts Law > Remedies > Equitable Relief > Quantum Meruit

Contracts Law > Remedies > Restitution

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Quasi Contracts

HN46[] **Types of Contracts, Express Contracts**

In California, there is not a standalone cause of action for unjust enrichment, which is synonymous with restitution. When a plaintiff alleges unjust enrichment, a court may construe the cause of action as a quasi-contract claim seeking restitution. It is well settled that an action based on an implied-in-fact or quasi-contract cannot lie where there exists between the parties a valid express contract covering the same subject matter.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Express Contracts

HN47[] **Types of Contracts, Express Contracts**

Under California law, there cannot be a claim based on quasi contract where there exists between the parties a valid express contract covering the same subject matter.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > Immaterial Matters

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > Irrelevant Matters

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > Redundant Matters

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > Scandalous Matters

HN48[] **Motions to Strike, Immaterial Matters**

A Fed. R. Civ. P. 12(f) motion to strike allows a court to strike from a pleading an insufficient defense or any redundant, immaterial, impertinent, or scandalous matter. For the purposes of this rule, immaterial matter is that which has no essential or important relationship to the claim for relief or the defenses being pleaded. Impertinent matter consists of statements that do not pertain, and are not necessary, to the issues in question. In order to show that a defense is insufficient, the moving party must demonstrate that there are no questions of fact, that any questions of law are clear and not in dispute, and that under no set of circumstances could the defense succeed. The purpose of a Rule 12(f) motion is to avoid the expenditure of time and money that must arise from litigating spurious issues by dispensing with those issues prior to trial. Motions to strike are generally disfavored, unless it is clear that the matter to be stricken could have no possible bearing on the subject matter of the litigation.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

HN49[] **Judges, Discretionary Powers**

Ultimately, the decision about whether to strike allegations is a matter within a court's discretion.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > Immaterial Matters

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > Redundant Matters

HN50[] Motions to Strike, Immaterial Matters

Reading Fed. R. Civ. P. 12(f) as a means to dismiss some or all of a pleading would create a redundancy within the Federal Rules of Civil Procedure because a Rule 12(b)(6) motion (or a motion for summary judgment at a later stage in the proceedings) already serves such a purpose.

Opinion

[*1117] ORDER GRANTING IN PART AND DENYING IN PART DEFENDANT'S MOTION TO DISMISS AND DENYING DEFENDANT'S MOTION TO STRIKE

[Doc. No. 44]

Ty Stewart and twenty-two other Plaintiffs (collectively, "Plaintiffs") bring this putative class action against Kodiak Cakes, LLC ("Defendant"). *See* Doc. No. 37 ("FAC"). Plaintiffs assert six causes of action premised on two main issues with Defendant's products: "(1) non-functional slack fill and (2) deceptive marketing **[**2]** practices." *Id.* ¶ 3. Defendant moves to dismiss each cause of action for lack of standing and failure to state a claim pursuant to *Federal Rules of Civil Procedure 12(b)(1)* and *12(b)(6)* and moves to strike several allegations from the First Amended Complaint ("FAC") pursuant to *Federal Rule of Civil Procedure 12(f)*. *See* Doc. No. 44. Plaintiffs filed an opposition to Defendant's motion, and Defendant replied. *See* Doc. Nos. 62, 65. The Court found the matter suitable for determination on the papers and without oral argument pursuant to *Federal Rule of Civil Procedure 78(b)* and Civil *Local Rule 7.1.d.1*. *See* Doc. No. 66. For the reasons set forth below, the Court **GRANTS IN PART and DENIES IN PART** Defendant's motion to dismiss and **DENIES** Defendant's motion to strike.

I. BACKGROUND[1]

Defendant "manufactures, markets, advertises, and sells a line of packaged breakfast and snack products," including pancake and waffle mixes. FAC ¶ 1. Plaintiffs' **[*1118]** action arises from two overarching issues with Defendant's products: (1) "nonfunctional slack fill," which is the empty space in a package that serves no purpose, and (2) deceptive marketing statements. *See id.* 3, 5-6, 10.

As to nonfunctional slack fill, Plaintiffs allege Defendant packages its products in a manner that "conceals the amount of the product actually contained in the package and misleads **[**3]** consumers into believing there is more

[1] Because this matter is before the Court on a motion to dismiss, the Court must accept as true the allegations set forth in the complaint. *See* *Hosp. Bldg. Co. v. Trs. Of Rex Hosp., 425 U.S. 738, 740, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976)*.

product inside the packaging than there actually is." *Id.* ¶ 6. In particular, Plaintiffs claim less than half of the packaging is full and thus misrepresents the amount of product within each package. *Id.* ¶¶ 7, 83, 85.

As to deceptive marketing statements, Plaintiffs allege Defendant makes five types of misleading statements in advertising its products. *Id.* ¶ 10. Plaintiffs allege that Defendant misleadingly labels and advertises its products as having "no preservatives" as well as being "free of artificial additives," "non-GMO," "healthy," and "protein-packed." *See* FAC ¶¶ 10, 63, 97-126, 127-31, 132-48. Plaintiffs aver that Defendant's marketing strategy is designed to lure consumers to purchase their products because of these deceptive statements. *Id.* ¶ 13.

Plaintiffs allege that they relied on Defendant's misleading packaging and advertising when purchasing Defendant's products. *Id.* ¶ 14. Plaintiffs seek to rectify these problems. In doing so, Plaintiffs bring six causes of action against Defendant: (1) "violation of the consumer protection acts of all 50 states (and the District of Columbia)" on behalf of the nationwide class; (2) violation **[**4]** of the *California Consumers Legal Remedies Act ("CLRA"), Cal Civ. Code §§ 1750-1784*, on behalf of the California class; (3) violations of the California Unfair Competition Law ("UCL"), *Cal. Bus. & Prof. Code §§ 17200-17210*, on behalf of the California class; (4) violation of the California False Advertising Law ("FAL"), *Cal. Bus. & Prof. Code §§ 17500-17606*; (5) breach of express warranty on behalf of the nationwide class; and (6) "restation based on quasi-contract and unjust enrichment" on behalf of the nationwide class. *Id.* ¶¶ 161-222.

Defendant moves to dismiss the causes of action on the grounds that Plaintiffs lack standing under *Rule 12(b)(1)* and fail to state a claim under *Rule 12(b)(6)* as well as moves to strike allegations from the FAC under *Rule 12(f)*. *See* Doc. No. 44 at 2.[2]

II. Request for Judicial Notice and Incorporation-by-Reference

As an initial matter, Defendant requests the Court to consider fifty-eight exhibits—comprising various product packaging labels and high-resolution "proofs" of the labels—pursuant to the judicial notice and incorporation-by-reference doctrines. *See* Doc. Nos. 44-2, 65-1. Plaintiffs object to Defendant's request. *See* Doc. No. 62-1. Before delving into the substance of the motion to dismiss, the Court addresses the request and objection.

Defendant argues that the **[**5]** Court should take judicial notice of the product labels because Plaintiffs' claims are based on them. *See* Doc. No. 44-2 at 5. Defendant reasons that all six causes of action "rely on product labeling and marketing [Plaintiffs] allege is misleading." *Id.* Noting that Plaintiffs allege five misleading terms and pursue claims against most of Defendant's products, Defendant asserts that all of the proffered product labels "are at issue and **[*1119]** effectively incorporated by reference." *Id.* Plaintiffs respond that judicial notice is improper for two main reasons: the labels are not generally known in this district and are subject to dispute. *See* Doc. No. 62-1 at 4. As to the latter point, Plaintiffs argue that the labels are subject to dispute because the labels are unauthenticated; the high-resolution images are from unknown sources, appear to be internal documents, and distort what consumers actually see; Defendant failed to explain the labels' relevancy; and the labels inappropriately dispute Plaintiffs' allegations. *See id.* at 4-7. Additionally, Plaintiffs respond that incorporation-by-reference is improper because they challenge the labels' authenticity. *Id.* at 9.

The Court proceeds by determining whether it **[**6]** can consider the exhibits under the separate doctrines of judicial notice and incorporation-by-reference. *See* *Khoja v. Orexigen Therapeutics, Inc., 899 F.3d 988, 998 (9th Cir. 2018)* ("Both of these procedures permit district courts to consider materials outside a complaint, but each does so for different reasons and in different ways.").

A. Request for Judicial Notice

[2] All citations to electronically filed documents refer to the pagination assigned by the CM/ECF system.

1. Legal Standard

HN1[] "Generally, district courts may not consider material outside the pleadings when assessing the sufficiency of a complaint under *Rule 12(b)(6)* . . . ." *Khoja, 899 F.3d at 998* (citing *Lee v. City of Los Angeles, 250 F.3d 668, 688 (9th Cir. 2001)*, *overruled on other grounds by Galbraith v. County of Santa Clara, 307 F.3d 1119, 1125-26 (9th Cir. 2002))*. However, "a court may take judicial notice of matters of public record," *id. at 999* (quoting *Lee, 250 F.3d at 689*), and of "documents whose contents are alleged in a complaint and whose authenticity no party questions, but which are not physically attached to the pleading," *Branch v. Tunnell, 14 F.3d 449, 454 (9th Cir. 1994)*, *overruled on other grounds by Galbraith, 307 F.3d at 1125-26*; *see also Fed. R. Evid. 201*. A judicially noticed fact must be one not subject to reasonable dispute in that it is either (1) generally known within the territorial jurisdiction of the trial court or (2) capable of accurate and ready determination by resort to sources whose accuracy cannot reasonably be questioned. *Fed. R. Evid. 201(b)*; *see* also *Khoja, 899 F.3d at 999* (quoting *Fed. R. Evid. 201(b)*).

2. Discussion

Plaintiffs raise the specter of an authenticity dispute as to the labeling and high-resolution **[**7]** "proof" specifications. *See* Doc. No. 62-1 at 4-6. However, Plaintiffs do not detail how they are inauthentic, inaccurate, or disputed; instead, they merely question the manner in which they are presented before the Court. *See Brown v. Hain Celestial Grp., Inc., 913 F. Supp. 2d 881, 893 (N.D. Cal. 2012)* (noting that authenticity objections to judicial notice usually can be surmounted). Therefore, Plaintiffs do not genuinely question the authenticity of the exhibits.

As to the proofs specifically, Plaintiffs submit a declaration in support of their objection that attaches an exhibit containing a spreadsheet. Vasquez Decl., Doc. No. 62-2 ¶¶ 2-4. The attached spreadsheet "contains links to images of the revisions to product labels for products at issue from 2015 through 2020." *Id.* ¶ 3. The signed declaration states that the documents were produced by Defendant in response to Plaintiffs' request for "all versions of the packaging and product labels for the products at issue in this case." *Id.* ¶ 2. The links reveal high-resolution proof images, which appear to have overlap with Defendant's attached exhibits. *See* Vasquez Decl., Exh. 1, Doc. No. 62-3 at 2. Thus, to **[*1120]** the extent there is any genuine authenticity dispute over the high-resolution "proof" specifications, **[**8]** Plaintiffs resolve it.

However, Plaintiffs' objections to the high-resolution proof specifications have some merit. These two-dimensional, flattened proofs distort what consumers see when viewing the three-dimensional products and do not represent how the products are advertised in their final product. *See Tsan v. Seventh Generation, Inc., No. 15-cv-00205-JST, 2015 U.S. Dist. LEXIS 149042, 2015 WL 6694104, at *3 (N.D. Cal. Nov. 3, 2015)*; *Brown, 913 F. Supp. 2d at 893*. Moreover, these proofs do not appear to fall under Plaintiffs' false or misleading advertising allegations, and the Court did not need to rely on these exhibits to rule on the instant motion. Additionally, there are instances where the proofs do not match the final advertised packaging supplied by Defendant. *Compare, e.g.*, Doc. No. 44-3 at 1-2 (Buttermilk Flapjack and Waffle Milk packaging as advertised), *with, e.g.*, Doc. No. 44-3 at 3 (Buttermilk Flapjack and Waffle Milk packaging in proof-form). Therefore, the Court ultimately declines to take judicial notice over the high-resolution proof specifications.

Aside from the high-resolution proof specifications, the labels have a link to their respective product pages on Defendant's website, and Defendant supplies their webpage where the publicly available images can be found. *E.g.* ***[**9]*** , Doc. No. 44-3 at 1 (providing the Buttermilk Flapjack and Waffle Mix product label); *see* Doc. No. 44-2 at 4 ("These exhibits consist of publicly-available images from Kodiak's website, https://kodiakcakes.com/."). As already noted, Plaintiffs do not genuinely dispute the accuracy or authenticity of the labels found on Defendant's website. ***HN2***[] Judicial notice is proper over websites and images of packaging in consumer protection advertising actions. *See Loomis v. Slendertone Distribution, Inc., 420 F. Supp. 3d 1046, 1063 (S.D. Cal. 2019)* (taking judicial notice sua sponte over printouts from the defendant's website and Amazon.com listing); *Hadley v. Kellogg Sales Co., 243 F. Supp. 3d 1074, 1087 (N.D. Cal. 2017)* (quoting *Kanfer v. Pharmacare US, Inc., 142 F. Supp. 3d 1091, 1098-99 (S.D. Cal. 2015))* (taking judicial notice of Raisin Bran during the alleged class period);

Gustavson v. Wrigley Sales Co., 961 F. Supp. 2d 1100, 1113 n.1 (N.D. Cal. 2013) (taking judicial notice of packaging labels that the complaint quoted and referenced and screenshots taken from a website and referenced in the complaint); *Brazil v. Dole Food Co., 935 F. Supp. 2d 947, 963 n.4 (N.D. Cal. 2013)* (taking judicial notice of packaging labels of the defendant's products). Therefore, the Court takes judicial notice over the labeling taken from Defendant's website but is mindful that the product labels may have changed over the course of the alleged class periods. Accordingly, the Court's grant of judicial notice is limited: it does not extend to prejudice Plaintiffs' allegations that pertain **[**10]** to time periods where Defendant's proffered labels were not used or nonwebsite advertising. Additionally, in examining the exhibits, the Court remains mindful of the risk of over-extending the judicial notice doctrine to avoid a "premature dismissal[] of a plausible claim[]." *Khoja, 899 F.3d at 998*.

Accordingly, the Court **GRANTS in part and DENIES in part** Defendant's request for judicial notice. The Court **GRANTS** Defendant's request as it pertains to the labeling taken from Defendant's website. The Court **DENIES** Defendant's request as it pertains to the high-resolution proof specifications.

B. Incorporation by Reference

1. Legal Standard

> ***HN3***[] Unlike rule-established judicial notice, incorporation-by-reference is a **[*1121]** judicially created doctrine that treats certain documents as though they are part of the complaint itself. The doctrine prevents plaintiffs from selecting only portions of documents that support their claims, while omitting portions of those very documents that weaken—or doom—their claims.

Khoja, 899 F.3d at 1002 (citing *Parrino v. FHP, Inc., 146 F.3d 699, 706 (9th Cir. 1998)*, *superseded by statute on other grounds as recognized in* *Abrego Abrego v. Dow Chem. Co., 443 F.3d 676, 681-82 (9th Cir. 2006))*. The Ninth Circuit has noted that there is a "policy concern underlying the rule: Preventing plaintiffs from surviving a *Rule 12(b)(6)* motion by deliberately omitting **[**11]** references to documents upon which their claims are based." *Parrino, 146 F.3d at 706*; *see also* *Khoja, 899 F.3d at 1003* ("[T]he incorporation-by-reference doctrine is designed to prevent artful pleading by plaintiffs."). "Even if a document is not attached to a complaint, it may be incorporated by reference into a complaint if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim." *United States v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)*; *see also* *Knievel v. ESPN, 393 F.3d 1068, 1076 (9th Cir. 2005)* ("The rationale of the 'incorporation by reference' doctrine applies with equal force to internet pages as it does to printed material."). Incorporation-by-reference allows a court to "treat such a document as part of the complaint, and thus may assume that its contents are true for purposes of a motion to dismiss under *Rule 12(b)(6)*." *Ritchie, 342 F.3d at 908*. While a court "unlike judicial notice . . . 'may assume an incorporated document's contents are true for purposes of a motion to dismiss under *Rule 12(b)(6)*' . . . it is improper to assume the truth of an incorporated document if such assumptions only serve to dispute facts stated in a well-pleaded complaint." *Khoja, 899 F.3d at 1003* (quoting *Marder v. Lopez, 450 F.3d 445, 448 (9th Cir. 2006))*.

2. Discussion

As with their objection to the Court taking judicial notice over the labels and proofs, Plaintiffs raise the specter of an authenticity dispute. *See* **[**12]** Doc. No. 62-1 at 8. However, as already noted, Plaintiffs merely question the manner in which the exhibits are presented before the Court and do not genuinely question the authenticity of the exhibits. Although they focus on the physical printouts, Plaintiffs' objections do not appear to question the genuineness of Defendant's publicly available website.

However, the Court finds the high-resolution proof specifications are not proper for incorporation-by-reference because Plaintiffs do not refer to the proofs in their FAC, and the proofs do not form the basis of Plaintiffs' claims.

Although the proofs may be similar in appearance and have some relation to the ultimate packaging that was presented to consumers, Plaintiffs' claims pertain to the final product packaging as presented in stores or online. *See, e.g.*, FAC ¶¶ 17, 19, 21, 23, 27, 29, 31, 33, 35, 37, 39, 61, 64. Furthermore, as mentioned above, there are instances where the proofs do not match the final advertised packaging supplied by Defendant. *Compare, e.g.*, Doc. No. 44-3 at 1-2 (Buttermilk Flapjack and Waffle Milk packaging as advertised), *with, e.g.*, Doc. No. 44-3 at 3 (Buttermilk Flapjack and Waffle Milk packaging in proof-form). **[**13]** Thus, the Court declines to consider the proofs under the incorporation-by-reference doctrine.

Aside from the high-resolution proof specifications and the authentication objection, the labels found on Defendant's website are subject to incorporation-by-reference. **[*1122]** ***HN4***[] Courts can use incorporation-by-reference to consider exhibits containing printouts taken from websites that plaintiffs refer to and use to support their allegations. *See* *Loomis, 420 F. Supp. 3d at 1063-64*. The labels are taken from Defendant's website. *E.g.*, Doc. No. 44-3 at 1 (providing the Buttermilk Flapjack and Waffle Mix product label); *see* Doc. No. 44-2 at 4 ("These exhibits consist of publicly-available images from Kodiak's website, https://kodiakcakes.com/."). Plaintiffs refer extensively to Defendant's online advertising, and online advertising forms a basis of their claims. *See, e.g.*, FAC ¶¶ 17, 23, 37, 39, 64 ("This advertising and marketing included statements made on Kodiak Cakes' online store, on Kodiak Cakes' social media profiles on Instagram and Facebook, on the Kodiak Cakes website and blog, on Amazon and/or on the *Shark Tank* episode that aired on ABC."); *see also* *Ritchie, 342 F.3d at 908* ("Even if a document is not attached to a complaint, it may be incorporated **[**14]** by reference into a complaint if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim."). Plaintiffs' FAC includes at least two inserted pictures taken from Defendant's online store. *See* FAC ¶ 64. ***HN5***[] Plaintiffs may not "select[] only portions of documents that support their claims, while omitting portions of those very documents that weaken—or doom—their claims." *Khoja, 899 F.3d at 1002* (citing *Parrino, 146 F.3d at 706*). Therefore, the Court considers the advertising on Defendant's website as a proper subject of incorporation-by-reference to the extent that the labels are not a means to "short-circuit the resolution of a well-pleaded claim" by "serv[ing] to dispute facts stated in a well-pleaded complaint." *Khoja, 899 F.3d at 1003*.

Accordingly, the Court considers the advertising on Defendant's website and other online marketing under the incorporation-by-reference doctrine. The Court declines to consider the high-resolution proof specifications under incorporation-by-reference.

III. Motion to Dismiss for Lack of Standing

A. Legal Standard

HN6[] A *Rule 12(b)(1)* motion to dismiss allows for dismissal of an action for lack of subject matter jurisdiction. Subject matter jurisdiction must exist when the action is commenced. *Morongo Band of Mission Indians v. California State Bd. of Equalization, 858 F.2d 1376, 1380 (9th Cir. 1988)*. Further, **[**15]** subject matter jurisdiction may be challenged "at any stage in the litigation." *Arbaugh v. Y&H Corp., 546 U.S. 500, 506, 126 S. Ct. 1235, 163 L. Ed. 2d 1097 (2006)*; *see also* *Fed. R. Civ. P. 12(h)(3)* ("If the court determines at any time that it lacks subject-matter jurisdiction, the court must dismiss the action."). The party seeking federal jurisdiction bears the burden to establish jurisdiction. *Kokkonen v. Guardian Life Ins. Co. of Am., 511 U.S. 375, 377, 114 S. Ct. 1673, 128 L. Ed. 2d 391 (1994)* (citing *McNutt v. Gen. Motors Acceptance Corp., 298 U.S. 178, 182-83, 56 S. Ct. 780, 80 L. Ed. 1135 (1936)*). A party may challenge standing in a *Rule 12(b)(1)* motion given standing "pertain[s] to a federal court's subject-matter jurisdiction under Article III." *White v. Lee, 227 F.3d 1214, 1242 (9th Cir. 2000)*.

HN7[] A *facial* attack on jurisdiction asserts that the allegations in a complaint are insufficient to invoke federal jurisdiction, whereas a *factual* attack disputes the truth of the allegations that would otherwise confer federal jurisdiction. *Safe Air for Everyone v. Meyer, 373 F.3d 1035, 1039 (9th Cir. 2004)*. In resolving a facial challenge to jurisdiction, a court accepts the allegations of the complaint as true and draws all reasonable inferences in favor of the plaintiff. *Doe v. Holy See, 557 F.3d 1066, 1073* **[*1123]** *(9th Cir. 2009)* (quoting *Wolfe v. Strankman, 392 F.3d*

358, 362 (9th Cir. 2004)). In resolving a factual attack, a court may examine extrinsic evidence "without converting the motion to dismiss into a motion for summary judgment," and a court need not accept the allegations as true. Safe Air for Everyone, 373 F.3d at 1039 (citing Savage v. Glendale Union High Sch., Dist. No. 205, Maricopa County, 343 F.3d 1036, 1039 n.2 (9th Cir. 2003)); *see also* Land v. Dollar, 330 U.S. 731, 735 n.4, 67 S. Ct. 1009, 91 L. Ed. 1209 (1947) ("[W]hen a question of the District Court's jurisdiction is raised . . . the court may inquire **[**16]** by affidavits or otherwise, into the facts as they exist.").

HN8[] However, a Rule 12(b)(1) motion is "not appropriate for determining jurisdiction . . . where issues of jurisdiction and substance are intertwined. A court may not resolve genuinely disputed facts where 'the question of jurisdiction is dependent on the resolution of factual issues going to the merits.'" Roberts v. Corrothers, 812 F.2d 1173, 1177 (9th Cir. 1987) (quoting Augustine v. United States, 704 F.2d 1074, 1077 (9th Cir. 1983)). When there is an entanglement, determination of the jurisdictional issue should be determined "on either a motion going to the merits or at trial." Augustine, 704 F.2d at 1077. Unless the summary judgment standard is met, the disputed jurisdictional fact "must be determined at trial by the trier of fact." *Id.*

B. Discussion

Defendant argues that Plaintiffs lack standing for several reasons: (1) they lack standing to bring claims based on laws of states where they do not reside and (2) they lack standing to seek injunctive relief. *See* Doc. No. 44-1 at 18, 38. In raising its standing challenges, Defendant brings a facial attack to subject matter jurisdiction.

HN9[] Article III standing requires a plaintiff to have "(1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable **[**17]** judicial decision." Spokeo, Inc. v. Robins, 136 S. Ct. 1540, 1547, 194 L. Ed. 2d 635 (2016) (first citing Lujan v. Defs. of Wildlife, 504 U.S. 555, 560-61, 112 S. Ct. 2130, 119 L. Ed. 2d 351 (1992); and then citing Friends of the Earth, Inc. v. Laidlaw Env't Servs. (TOC), Inc., 528 U.S. 167, 180-81, 120 S. Ct. 693, 145 L. Ed. 2d 610 (2000)). The party invoking federal jurisdiction bears the burden to establish standing. *Id.* The Court addresses Defendant's standing challenges in turn.

1. Standing to Assert Nationwide Class Claims

Defendant argues that the twenty-three Plaintiffs, who reside in eleven states, lack standing to assert a nationwide class claim. *See* Doc. No. 44-1 at 19; Doc. No. 65 at 8-9. Plaintiffs respond that this argument attempts to prematurely address class certification issues at the pleadings stage. *See* Doc. No. 62 at 22. Plaintiffs clarify that they "seek to apply the laws of each state in which the unnamed plaintiffs reside." *Id.* at 23.

HN10[] District Courts in California are split on the issue of whether standing inquiries can be deferred until after class certification, but they note a trend that courts can address standing at the pleadings stage and dismiss claims brought under state laws that have no connection to the named plaintiffs. Soo v. Lorex Corp., No. 20-cv-01437-JSC, 2020 U.S. Dist. LEXIS 164664, 2020 WL 5408117, at *10 (N.D. Cal. Sept. 9, 2020) ("While the Ninth Circuit has not definitively answered whether named plaintiffs have standing to pursue class claims under the common laws of states to which the named plaintiffs have no **[**18]** connection, district courts in this Circuit **[*1124]** routinely hold that they do not."); Senne v. Kansas City Royals Baseball Corp., 114 F. Supp. 3d 906, 921 (N.D. Cal. 2015) (noting the split); *see also* Schertzer v. Bank of Am., N.A., 445 F. Supp. 3d 1058, 1072, 1072 n.3 (S.D. Cal. 2020) (providing examples and finding that there is a "growing trend" among California district courts to address standing at the pleadings stage and dismiss claims "under the laws of states in which no plaintiff resides or has purchased products"); Mercado v. Audi of Am., LLC, No. ED CV18-02388 JAK (SPx), 2019 U.S. Dist. LEXIS 231689, 2019 WL 9051000, at *14 (C.D. Cal. Nov. 26, 2019) ("The Ninth Circuit has not directly addressed this question in the context of multistate claims."); In re Carrier IQ, Inc., 78 F. Supp. 3d 1051, 1068 (N.D. Cal. 2015) ("Given the prevalence of nationwide class actions, it is perhaps surprising that there is no Ninth Circuit precedent specifically deciding this question.").

Plaintiffs bring three causes of action on behalf of a nationwide class: "violation of the consumer protection acts of all 50 states (and the District of Columbia)," breach of express warranty, and "restation based on quasi-contract and unjust enrichment." FAC ¶¶ 161-78, 211-16, 217-22; *see also id.* ¶ 149. However, the named Plaintiffs are from only eleven states. *See id.* at ¶¶ 16-68.

HN11[] The Court agrees with the growing trend that courts can "address the issue of Article III standing at the pleading stage and dismiss claims asserted under the **[**19]** laws of states in which no plaintiff resides or has purchased products." *Schertzer, 445 F. Supp. 3d at 1072*. Even in circumstances where courts have found they have discretion to defer standing questions until after class certification, the standing inquiry can be addressed when Plaintiffs bring claims from states where they do not have a connection. *See In re Carrier IQ, Inc., 78 F. Supp. 3d at 1074, 1075*; *see also Senne, 114 F. Supp. 3d at 924* (agreeing with the reasoning of *In re Carrier IQ, Inc.*). Indeed, "[i]f a complaint includes multiple claims, at least one named class representative must have Article III standing to raise each claim." *Mercado, 2019 U.S. Dist. LEXIS 231689, 2019 WL 9051000, at *15* (quoting *Los Gatos Mercantile, Inc v. E.I. DuPont De Nemours & Co., No. 13-cv-01180-BLF, 2014 U.S. Dist. LEXIS 133540, 2014 WL 4774611, at *4 (N.D. Cal. Sept. 22, 2014))*; *see also Soo, 2020 U.S. Dist. LEXIS 164664, 2020 WL 5408117, at *11* (quoting *Jones v. Micron Tech. Inc., 400 F. Supp. 3d 897, 909 (N.D. Cal. 2019))* (stating that standing must be shown for each claim and distinguishing the facts from *Melendres v. Arpaio, 784 F.3d 1254 (9th Cir. 2015))*; *In re Glumetza Antitrust Litig., No. C 19-05822 WHA, 2020 U.S. Dist. LEXIS 39649, 2020 WL 1066934, at *10 (N.D. Cal. Mar. 5, 2020)* (same).[3] The Supreme Court has insisted that "a plaintiff must demonstrate standing separately **[*1125]** for each form of relief sought." *DaimlerChrysler Corp. v. Cuno, 547 U.S. 332, 352, 126 S. Ct. 1854, 164 L. Ed. 2d 589 (2006)* (quoting *Friends of the Earth, Inc., 528 U.S. at 185*). The fact that this action is a putative class action does not excuse Plaintiffs' obligation to show standing for each claim asserted. *See Spokeo, Inc., 136 S. Ct. at 1547 n.6* (quoting *Simon v. E. Kentucky Welfare Rts. Org., 426 U.S. 26, 40 n.20, 96 S. Ct. 1917, 48 L. Ed. 2d 450 (1976))* ("That a suit may be a class action . . . adds nothing to the question of standing, for even named plaintiffs who represent a class 'must **[**20]** allege and show that they personally have been injured, not that injury has been suffered by other, unidentified members of the class to which they belong.'"). No named Plaintiff alleges a connection to forty of the jurisdictions where they do not reside or have not purchased Defendant's products. Therefore, the Court finds Plaintiffs lack standing to bring claims under the laws of the states where they do not reside or did not purchase the at-issue products.

Even if the Court found that it had discretion to defer the standing issue until after class certification, the Court would decline to exercise its discretion. *See In re Carrier IQ, Inc., 78 F. Supp. 3d at 1074-75*. Plaintiffs reside in eleven jurisdictions but raise claims from fifty-one jurisdictions. The forty claims from jurisdictions without a named Plaintiff is vast when compared to the mere eleven claims from jurisdictions with a named Plaintiff. The Court has reservations about subjecting Defendant "to the expense and burden of nationwide discovery without Plaintiffs first securing actual plaintiffs who clearly have standing and are willing and able to assert claims under these state laws." *Id. at 1074*; *see also* ***[**21]*** *Soo, 2020 WL 2020 U.S. Dist. LEXIS 164664, 2020 WL 5408117, at *10*; *Jones, 400 F. Supp. 3d at 909*; *cf*. *Fed. R. Civ. P. 1*.

Accordingly, the Court **GRANTS** Defendant's *Rule 12(b)(1)* motion to dismiss and **DISMISSES** with leave to amend the causes of action under the laws of states where named Plaintiffs do not reside or did not purchase the at-issue products.

---

[3] The Court finds Plaintiffs' reliance on *Melendres v. Arpaio, 784 F.3d 1254 (9th Cir. 2015)*, distinguishable—and thus unavailing—for the reasoning outlined by several recent district court cases. *See Soo, 2020 U.S. Dist. LEXIS 164664, 2020 WL 5408117, at *10-11*; *In re Glumetza Antitrust Litig., No. C 19-05822 WHA, 2020 U.S. Dist. LEXIS 39649, 2020 WL 1066934, at *10* ("The short distinction is that *Melendres* did not address the circumstance here, where plaintiffs raise claims under several jurisdictions where they were not harmed. The legal distinction, though, is that the named plaintiffs in *Melendres* asserted the same constitutional injury as the class; they just alleged different circumstances."); *Jones, 400 F. Supp. 3d at 909* ("Unlike the instant case, *Melendres* did not confront a situation where named plaintiffs brought claims under the laws of multiple states where they did not reside and where they were not injured: in *Melendres*, all plaintiffs alleged that they suffered the same constitutional injury, only in different factual circumstances. Here, because Plaintiffs bring claims under the laws of multiple states (some antitrust and some not), Plaintiffs technically invoke different legally protected interests.").

2. Standing to Seek Injunctive Relief

Defendant argues Plaintiffs lack standing to seek injunctive relief because they do not allege that they intend to repurchase Defendant's products. *See* Doc. No. 44-1 at 39; *see also* Doc. No. 44-1 at 25-26; Doc. No. 65 at 26. Plaintiffs respond that they sufficiently show a likelihood of reinjury, which can be remedied by injunctive relief. *See* Doc. No. 62 at 43; *see also* Doc. No. 62 at 35-36. Plaintiffs contend that their request is not defeated merely because they have discovered the deceptive packaging because the packaging remains misleading. *See* Doc. No. 62 at 43.

HN12[] "A plaintiff must demonstrate constitutional standing separately for each form of relief requested." *Davidson v. Kimberly-Clark Corp., 889 F.3d 956, 967 (9th Cir. 2018)* (citing *Friends of the Earth, Inc., 528 U.S. at 185*). In applying the standing framework to a plaintiff seeking injunctive relief, the plaintiff must demonstrate that she or he "has suffered or is threatened with a 'concrete and particularized' legal harm, coupled with 'a sufficient likelihood that he **[**22]** will again be wronged in a similar way.'" *Bates v. United Parcel Serv., Inc., 511 F.3d 974, 985 (9th Cir. 2007)* (citation omitted) (first quoting *Lujan, 504 U.S. at 560*; and then quoting *City of Los Angeles v. Lyons, 461 U.S. 95, 111, 103 S. Ct. 1660, 75 L. Ed. 2d 675 (1983))*. The likelihood of further harm requires "a 'real and immediate threat of repeated injury.'" *Id.* (quoting *O'Shea v. Littleton, 414 U.S. 488, 496, 94 S. Ct. 669, 38 L. Ed. 2d 674 (1974))*. Past wrongs constitute evidence of "a real and **[*1126]** immediate threat of repeated injury"; however, "[p]ast wrongs do not in themselves amount to a real and immediate threat of injury necessary to make out a case or controversy." *Id.* (first quoting *O'Shea, 414 U.S. at 496*; and then quoting *Lyons, 461 U.S. at 103*); *see also* *Lujan, 504 U.S. at 564* (quoting *Lyons, 461 U.S. at 102*) ("Past exposure to illegal conduct does not in itself show a present case or controversy regarding injunctive relief . . . if unaccompanied by any continuing, present adverse effects.").

HN13[] In the false advertising context, the Ninth Circuit has held that

> a previously deceived consumer may have standing to seek an injunction against false advertising or labeling, even though the consumer now knows or suspects that the advertising was false at the time of the original purchase, because the consumer may suffer an "actual and imminent, not conjectural or hypothetical" threat of future harm.

Davidson, 889 F.3d at 969 (quoting *Summers v. Earth Island Inst., 555 U.S. 488, 493, 129 S. Ct. 1142, 173 L. Ed. 2d 1 (2009))*. The Ninth Circuit emphasized that knowledge of a label's falsity "does not equate to knowledge that it will **[**23]** remain false in the future." *Id. Davidson* noted that "the threat of future harm may be the consumer's plausible allegations that she will be unable to rely on the product's advertising or labeling in the future, and so will not purchase the product although she would like to" or "may be the consumer's plausible allegations that she might purchase the product in the future, despite the fact it was once marred by false advertising or labeling, as she may reasonably, but incorrectly, assume the product was improved." *Id. at 969-70*. Ultimately, the *Davidson* court held the plaintiff bringing UCL, FAL, and CLRA causes of action had standing to pursue injunctive relief where she adequately alleged an imminent or actual threat of future harm because the plaintiff

> alleged that she "continues to desire to purchase wipes that are suitable for disposal in a household toilet"; "would purchase truly flushable wipes manufactured by [Defendant] if it were possible"; "regularly visits stores . . . where [Defendant's] 'flushable' wipes are sold"; and is continually presented with [Defendant's] flushable wipes packaging but has "no way of determining whether the representation 'flushable' is in fact true."

Id. at 970-71 (recognizing **[**24]** this conclusion was a "close question").

Here, Plaintiffs allege that "[they] have an intention to purchase the products in the future if the products are truthfully labeled and not misleadingly filled." FAC ¶ 159. At this stage of the proceedings, the Court must presume the truth of Plaintiffs' allegations and construe the allegations in their favor. *See Davidson, 889 F.3d at 971* (citing *Daniels-Hall v. Nat'l Educ. Ass'n, 629 F.3d 992, 998 (9th Cir. 2010))*. Plaintiffs allege that they intend to purchase Defendant's products if labeling and filling issues are resolved. *See* FAC ¶ 159. Plaintiffs' allegations are more concrete than claiming that they would merely "consider" buying Defendant's products. *See* *Lanovaz v. Twinings N. Am., Inc., 726 F. App'x 590, 591 (9th Cir. 2018)* (holding that the plaintiff's "would 'consider buying'" allegations and a mere intent to purchase the defendant's products in the future were insufficient to sustain Article III standing); *Loomis, 420 F. Supp. 3d at 1077* (finding that vague "would consider purchasing" allegations coupled with the speculative nature of the at-issue product ever achieving its claimed representations was insufficient to sustain Article III standing).

[*1127] However, as to Plaintiffs' theory of misleading slack fill packaging, Plaintiffs' allegations do not show a likelihood of further harm. The Ninth Circuit noted that the facts in **[**25]** *Davidson* presented a "close question," *Davidson, 889 F.3d at 971*, "implying that standing was unlikely in cases where the threat of future harm was weaker," *Jackson v. Gen. Mills, Inc., No. 18-cv-2634-LAB (BGS), 2019 U.S. Dist. LEXIS 162447, 2019 WL 4599845, at *5 (S.D. Cal. Sept. 23, 2019)*. "Whatever other customers might know or not know, however, [plaintiffs are] on notice of facts in [their] own complaint. If [they] choose[] to ignore them and rely on box size alone, [their] reliance would not be reasonable." *Jackson v. Gen. Mills, Inc., No. 18-cv-2634-LAB (BGS), 2020 U.S. Dist. LEXIS 157898, 2020 WL 5106652, at *6 (S.D. Cal. Aug. 28, 2020)*. Unlike in *Davidson* where the plaintiff had no way to determine whether the representation of the wipes being "flushable" was in fact true in the future, *Davidson, 889 F.3d at 971-72*, the exaggerated size of Defendant's packaging can be checked easily by Plaintiffs. In the future, Plaintiffs can cross-check their previous disappointing purchases by examining the undisputed net weight on the face of Defendant's product and the serving size in cylindrical cups and servings per container on the nutrition facts label. *See, e.g.*, Doc. No 44-8 at 2 (Strawberry Chocolate Chip Flapjack and Waffle Mix); *Power Cakes: Strawberry Chocolate Chips*, Kodiak Cakes, https://kodiakcakes.com/products/strawberry-dark-chocolate-power-cakes (same). If there is a change in the weight or quantity **[**26]** within the same sized box, Plaintiffs will be able to determine whether the box-to-mix ratio continues to be exaggerated.[4] Therefore, Plaintiffs do not establish Article III standing to assert their claim for injunctive relief based on their theory of misleading slack fill packaging. *See Jackson, 2020 U.S. Dist. LEXIS 157898, 2020 WL 5106652, at *6*; *Jackson, 2019 U.S. Dist. LEXIS 162447, 2019 WL 4599845, at *5-6*; *Cordes v. Boulder Brands USA, Inc., No. CV 18-6534 PSG (JCx), 2018 U.S. Dist. LEXIS 217534, 2018 WL 6714323, at *4 (C.D. Cal. Oct. 17, 2018)*.

Plaintiffs' theory of misleading marketing statements faces similar hurdles. Plaintiffs allege that Defendant markets its products as having "no preservatives" as well as being "free of artificial additives," "non-GMO," "healthy," and "protein-packed." *See* FAC ¶¶ 10, 93-148. Similar to their slack-fill allegations, Plaintiffs do not dispute the veracity of the nutrition facts or ingredient labeling on the products. Rather, they complain about this marketing language found on the product's packaging and online. In the future, as with their slack fill theory, Plaintiffs can check the nutrition facts or ingredient labeling to assess if the products still contain preservatives; artificial additives; unhealthy levels of fat, cholesterol, sugar, and vitamins; or insufficient protein. Therefore, Plaintiffs do not establish Article III standing **[**27]** to assert their claim for injunctive relief based on their theory of misleading "no preservatives," "free of artificial additives," "healthy," and "protein-packed" marketing statements.

On the other hand, Plaintiffs face an injury of being unable to rely upon Defendant's "non-GMO" marketing statements in deciding whether to purchase the product in the future. *See Davidson, 889 F.3d at 971-72*. Unlike the other alleged forms of deception, Plaintiffs cannot check the undisputed serving size, net weight, nutrition facts, or ingredient list on the products to determine if the at-issue ingredients are genetically modified. Plaintiffs **[*1128]** face an injury of being unable to rely upon Defendant's "non-GMO" marketing statements in deciding whether to purchase the product in the future. *See id.* Pursuant and similar to *Davidson*, Plaintiffs show a concrete injury that subjects Plaintiffs to an imminent or actual threat of future harm. *See id. at 971-72*. Therefore, Plaintiffs establish Article III standing to assert their claim for injunctive relief based on their theory of misleading "non-GMO" marketing statements. *See id. at 972*.

Accordingly, the Court **GRANTS in part and DENIES in part** Defendant's *Rule 12(b)(1)* motion to dismiss Plaintiffs' claims for injunctive **[**28]** relief. The Court **GRANTS** the motion and **DISMISSES** without leave to amend Plaintiffs' claim for injunctive relief as to their theory of misleading slack fill packaging and the "no preservatives,"

---

[4] The concern that other customers might benefit from an injunction and have standing does not mean Plaintiffs have standing. *See Jackson, 2020 U.S. Dist. LEXIS 157898, 2020 WL 5106652, at *6*; *see also Spokeo, Inc., 136 S. Ct. at 1547 n.6* (quoting *Simon, 426 U.S. at 40 n.20*).

"free of artificial additives," "healthy," and "protein-packed" marketing statements. The Court **DENIES** the motion as to Plaintiffs' theory of "non-GMO" marketing statements.

C. Conclusion

For the foregoing reasons, the Court **GRANTS in part and DENIES in part** Defendant's motion to dismiss brought under *Rule 12(b)(1)*.

IV. Motion to Dismiss for Failure to State a Claim

A. Legal Standard

HN14[] A *Rule 12(b)(6)* motion to dismiss tests the sufficiency of the complaint. *Navarro v. Block, 250 F.3d 729, 732 (9th Cir. 2001)*. A pleading must contain "a short and plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. However, plaintiffs must also plead "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*; *see also* *Fed. R. Civ. P. 12(b)(6)*. The plausibility standard demands more than a "formulaic recitation of the elements of a cause of action," or "'naked assertions' devoid of 'further factual enhancement.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Twombly, 550 U.S. at 555, 557)*. Instead, the complaint "must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself **[**29]** effectively." *Starr v. Baca, 652 F.3d 1202, 1216 (9th Cir. 2011)*.

HN15[] In reviewing a motion to dismiss under *Rule 12(b)(6)*, courts must assume the truth of all factual allegations and must construe them in the light most favorable to the nonmoving party. *Cahill v. Liberty Mut. Ins. Co., 80 F.3d 336, 337-38 (9th Cir. 1996)* (citing *Nat'l Wildlife Fed'n v. Espy, 45 F.3d 1337, 1340 (9th Cir. 1995))*. The court need not take legal conclusions as true merely because they are cast in the form of factual allegations. *Roberts, 812 F.2d at 1177* (quoting *W. Min. Council v. Watt, 643 F.2d 618, 624 (9th Cir. 1981))*. Similarly, "conclusory allegations of law and unwarranted inferences are not sufficient to defeat a motion to dismiss." *Pareto v. FDIC, 139 F.3d 696, 699 (9th Cir. 1998)*.

HN16[] In determining the propriety of a *Rule 12(b)(6)* dismissal, courts generally may not look beyond the complaint for additional facts. *See* *Ritchie, 342 F.3d at 907-08*. "A court may, however, consider certain materials—documents attached to the complaint, documents incorporated by reference in the complaint, or matters of judicial notice—without converting the motion to dismiss into a motion for summary judgment." *Id. At 908*; *see also* *Lee, 250 F.3d at 688*. "However, [courts] are not required to accept as true conclusory allegations which are contradicted by documents **[*1129]** referred to in the complaint." *Steckman v. Hart Brewing, Inc., 143 F.3d 1293, 1295-96 (9th Cir. 1998)* (citing *In re Stac Electronics Securities Litigation, 89 F.3d 1399, 1403 (9th Cir. 1996))*.

HN17[] Additionally, allegations of fraud or mistake require the pleading party to "state with particularity the circumstances constituting fraud or mistake." *Fed. R. Civ. P. 9(b)*. The context surrounding the fraud must "be 'specific **[**30]** enough to give defendants notice of the particular misconduct . . . so that they can defend against the charge and not just deny that they have done anything wrong.'" *Kearns v. Ford Motor Co., 567 F.3d 1120, 1124 (9th Cir. 2009)* (quoting *Bly—Magee v. California, 236 F.3d 1014, 1019 (9th Cir. 2001))*. "'Averments of fraud must be accompanied by "the who, what, when, where, and how" of the misconduct charged.' A party alleging fraud must 'set forth more than the neutral facts necessary to identify the transaction.'" *Kearns, 567 F.3d at 1124* (citation omitted) (first quoting *Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1106 (9th Cir. 2003)*; and then quoting *In re GlenFed, Inc. Sec. Litig., 42 F.3d 1541, 1548 (9th Cir. 1994)*, *superseded by statute on other grounds*).

HN18[] Where dismissal is appropriate, a court should grant leave to amend unless the plaintiff could not possibly cure the defects in the pleading. *Knappenberger v. City of Phoenix, 566 F.3d 936, 942 (9th Cir. 2009)* (quoting *Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000))*.

B. Discussion

Defendant challenges each of Plaintiffs' causes of action. *See* Doc. No. 44 at 2. The Court proceeds by addressing whether Plaintiffs state a viable claim for each cause of action.

1. Consumer Protection Causes of Action

Given that the Court has dismissed the causes of action under the laws of states where named Plaintiffs do not reside or did not purchase the at-issue products, *see supra* Section III.B.1, Plaintiffs' California consumer protection causes of action under the CLRA, UCL, and FAL remain as well as their non-dismissed claims **[**31]** in the first cause of action. These causes of action arise from Plaintiffs' nonfunctional slack fill and deceptive marketing allegations.

HN19[] The CLRA prohibits "unfair methods of competition and unfair or deceptive acts or practices undertaken by any person in a transaction intended to result or that results in the sale or lease of goods or services to any consumer." *Cal. Civ. Code § 1770(a)*; *see also id. § 1760*. Specifically, the CLRA prohibits, among other things, "[r]epresenting that goods or services have . . . characteristics, ingredients, uses, benefits, or quantities that they do not have"; "[r]epresenting that goods or services are of a particular standard, quality, or grade, or that goods are of a particular style or model, if they are of another"; "[a]dvertising goods or services with intent not to sell them as advertised"; and "[r]epresenting that the subject of a transaction has been supplied in accordance with a previous representation when it has not." *Id. § 1770(a)(5)*, *(7)*, *(9)*, *(16)*.

HN20[] "The FAL prohibits unfair, deceptive, untrue, or misleading advertising, and this Court has previously concluded that a product's packaging may form the basis of an FAL claim." *Ebner v. Fresh, Inc., 838 F.3d 958, 967 n.2 (9th Cir. 2016)* (emphasis omitted). In particular, the FAL forbids the dissemination **[**32]** of any statement concerning property or services that "is untrue or misleading, and which is known, or which by the exercise of reasonable care **[*1130]** should be known, to be untrue or misleading." *Cal. Bus. & Prof. Code § 17500*.

HN21[] The UCL prohibits "any unlawful, unfair or fraudulent business act or practice and unfair, deceptive, untrue or misleading advertising." *Cal. Bus. & Prof. Code § 17200*. The UCL provides a separate theory of liability under each of the three prongs: "unlawful," "unfair," and "fraudulent." *See Cel-Tech Commc'ns, Inc. v. Los Angeles Cellular Tel. Co., 20 Cal. 4th 163, 83 Cal. Rptr. 2d 548, 973 P.2d 527, 540 (Cal. 1999)* (quoting *Podolsky v. First Healthcare Corp., 50 Cal. App. 4th 632, 58 Cal. Rptr. 2d 89, 98 (1996))* ("Because Business and Professions Code *section 17200* is written in the disjunctive, it establishes three varieties of unfair competition—acts or practices which are unlawful, or unfair, or fraudulent."); *see also Davis v. HSBC Bank Nevada, N.A., 691 F.3d 1152, 1168 (9th Cir. 2012)* (same). "The UCL expressly incorporates the FAL's prohibition on unfair advertising as one form of unfair competition." *Hinojos v. Kohl's Corp., 718 F.3d 1098, 1103 (9th Cir. 2013)*. Accordingly, any violation of the FAL also violates the UCL. *Williams v. Gerber Prods. Co., 552 F.3d 934, 938 (9th Cir. 2008)* (quoting *Kasky v. Nike, Inc., 27 Cal. 4th 939, 119 Cal. Rptr. 2d 296, 45 P.3d 243, 250 (Cal. 2002))*. Additionally, a violation of the CLRA also violates the UCL. *See Hadley, 243 F. Supp. 3d at 1089* (first citing *In re Tobacco II Cases, 46 Cal. 4th 298, 93 Cal. Rptr. 3d 559, 207 P.3d 20, 29 n.8 (Cal. 2009)*; and then citing *Consumer Advocs. v. Echostar Satellite Corp., 113 Cal. App. 4th 1351, 8 Cal. Rptr. 3d 22, 29 (Ct. App. 2003))*. Plaintiffs bring their UCL cause of action under all three prongs. *See* FAC ¶¶ 196-98.

The Court begins by addressing Defendant's objection to the framing of Plaintiffs' first cause of action. The Court then examines the CLRA, FAL, and the **[**33]** fraudulent UCL prong together under *Rule 9(b)* and the "reasonable consumer test." The Court then finally addresses the remaining unlawful and unfair UCL prongs.

i. Nationwide Class Claims

Defendant argues that Plaintiffs' first cause of action—for violation of the consumer protection acts of all fifty states and the District of Columbia—is not a cognizable claim under *Federal Rules of Civil Procedure 8* and *10*. *See* Doc. No. 44-1 at 19; *see also* Doc. No. 65 at 9. Defendant asserts that Plaintiffs cannot mix these separate consumer protection causes of action and fold them into a single cause of action. *Id.* Plaintiffs respond that Defendant elevates form over substance over an issue "that can be readily repleaded." Doc. No. 24 at 44.

Based on lack of Article III standing, the Court has dismissed the causes of action under the laws of states where named Plaintiffs do not reside or did not purchase the at-issue products. *See supra* Section III.B.1. ***HN22***[] Regardless of the standing problems, separate claims should not be lumped together into one cause of action. *See* *Swafford v. Int'l Bus. Machines Corp., 383 F. Supp. 3d 916, 932 n.4 (N.D. Cal. 2019)* (finding it improper for the plaintiff to assert a cause of action for violations of the California Labor Code and California Civil Code); *In re Nexus 6P Prods. Liab. Litig., 293 F. Supp. 3d 888, 908 (N.D. Cal. 2018)* ("[C]auses of action should **[**34]** not group together multiple sources of law; rather, Plaintiffs should plead separate causes of actions for each source of law, whether federal or state."); *Saling v. Royal, No. 2:13-cvv-1039-TLN-EFB PS, 2015 U.S. Dist. LEXIS 120087, 2015 WL 5255367, at *4 (E.D. Cal. Sept. 9, 2015)* (finding a cause of action titled "Intrusion into Seclusion (Privacy) Under Equal Protection"—which referenced the *Equal Protection Clause* and cited the *Fourth* and *Fourteenth Amendment of the US Constitution* as well as the California Constitution—was **[*1131]** improper to the extent the plaintiff attempted to assert multiple causes of action under one count); *see also* *Fed. R. Civ. P. 10(b)*.

Regardless of potential overlap between the state statutes, *see* FAC ¶ 166, Plaintiffs do not cite to any authority that permits this Court to mix together the statutes of fifty-one separate jurisdictions into a single consumer protection cause of action. Undercutting their own position, Plaintiffs provide separate causes of action for their California CLRA, UCL, and FAL causes of action. *See* FAC ¶¶ 179-210. Even if there are similarities between the vast list of statutes, Plaintiffs have not shown the degree of overlap in terms of the statutes' substantive or procedural requirements. In sum, the Court declines to conflate the statutes of fifty-one jurisdictions into a single cause of action.

Accordingly, the Court **[**35]** **GRANTS** Defendant's motion and **DISMISSES** Plaintiffs' first cause of action with leave to amend. If Plaintiffs wish to file a second amended complaint, the Court directs Plaintiffs to separate their allegations of various state statute violations into separate causes of action.

ii. The *Rule 9(b)* Heightened Pleading Standard and Parallels between the CLRA, UCL, and FAL

Defendant argues that Plaintiffs do not satisfy *Rule 9(b)*. *See* Doc. No. 44-1 at 16; *see also* Doc. No. 65 at 13. In particular, Defendant argues that Plaintiffs do not allege facts about their purchases, the terms they relied on for specific products, when they saw the terms, or how the terms were false or misleading to them. *See* Doc. No. 44-1 at 16-17; *see also* Doc. No. 65 at 13. Plaintiffs respond that *Rule 9(b)*'s requirements "may not even be necessary." *See* Doc. No. 62 at 18 (quoting *Moore v. Mars Petcare US, Inc., 966 F.3d 1007, 1019 n.11 (9th Cir. 2020))*. Regardless, Plaintiffs contend that they allege the required specificity, arguing that (1) the "who" is Defendant; (2) the "what" is nonfunctional slack fill and the five misleading marketing claims; (3) the "when" is January 1, 2015 through the class period; (4) the "where" is Defendant's product labels and advertising; and (5) the "how" is packaging that violates **[**36]** slack fill laws, the misleading advertising, and Plaintiffs' reliance on the advertising to buy products they would not have purchased or would have paid a lower price for the products. *Id.* at 18-19 (citing FAC ¶¶ 6, 10, 16, 69, 149, 63-64, 82-148).

As a threshold issue, the Court addresses whether Rule 9(b) applies to Plaintiffs' allegations.[5] **HN23**[] Where fraud is not a necessary element of a cause of action, a plaintiff may opt to allege that the defendant engaged in fraud. *See* Vess, 317 F.3d at 1103. In cases where a plaintiff alleges "a unified course of fraudulent conduct" and relies on the conduct, the claim sounds or is grounded in fraud, and "the pleading of that claim as a whole must satisfy the particularity requirement of Rule 9(b)." Id. 1103-04; *see also* Kearns, 567 F.3d at 1125 (citing Vess, 317 F.3d at 1103-04). However, in cases where the plaintiff opts to not allege a unified course of fraudulent conduct and alleges a mix of some fraudulent and nonfraudulent conduct, "only the allegations **[*1132]** of fraud are subject to Rule 9(b)'s heightened pleading requirements." Id. at 1104.

Here, Plaintiffs' own allegations defeat their argument. Plaintiffs aver that Defendant engaged in a unified course of fraudulent conduct. As an initial matter, the words "fraud or fraudulent" occur throughout the FAC. *See,* ***[**37]*** *e.g.*, FAC ¶¶ 9, 92, 155, 165, 166, 175, 198, 199, 202; *see also* Vess, 317 F.3d at 1105 ("Fraud can be averred by specifically alleging fraud, or by alleging facts that necessarily constitute fraud (even if the word 'fraud' is not used)."). Plaintiffs refer to the nonfunctional slack fill as a fraudulent practice. *See id.* ¶ 92; *see also id.* ¶ 8 (referring the practice as "deceptive and misleading"). Plaintiffs allege that Defendant uses this "false and misleading" practice to "deceive" consumers, and they imply Defendant used slack fill to intentionally mislead consumers. *Id.* ¶ 83; *see id.* ¶ 87. Plaintiffs further refer to Defendant's marketing representations as "unfair competition or unfair, unconscionable, deceptive, or fraudulent acts." *Id.* ¶ 165; *see also id.* ¶¶ 166, 198. Plaintiffs emphasize that Defendant's marketing "is designed to cause consumers to purchase [Defendant's] products *because of* these deceptive messages." *Id.* ¶ 13; *see also id.* ¶ 111 (alleging that Defendant "intentionally" uses certain misrepresentative claims to take advantage of health trends); *id.* ¶ 168 (alleging that Defendant intended for Plaintiffs to rely on its representations).

Plaintiffs weave allegations of fraud throughout **[**38]** the FAC.[6] Regardless of whether Plaintiffs' causes of action require pleading fraud, Plaintiffs allege Defendant engaged in a fraudulent course of conduct, which triggers Rule 9(b). *See* Kearns, 567 F.3d at 1125 (citing Vess, 317 F.3d at 1103) ("While fraud is not a necessary element of a claim under the CLRA and UCL, a plaintiff may nonetheless allege that the defendant engaged in fraudulent conduct."); *see also* Brice Yingling v. eBay, Inc., No. C 09-01733 JW, 2009 U.S. Dist. LEXIS 131776, 2010 WL 11575080, at *2 (N.D. Cal. Mar. 10, 2010) (citing Hovsepian v. Apple, Inc., No. 08-5788 JF (PVT), 2009 U.S. Dist. LEXIS 131776, 2009 WL 2591445, at *2 (N.D. Cal. Aug. 21, 2009)) ("Rule 9(b)'s heightened pleading standards apply to claims for violations of the CLRA, FAL, and UCL where such claims are based on a fraudulent course of conduct."). Accordingly, the Court finds that Plaintiffs' pleading must satisfy the particularity requirement of Rule 9(b). *See* Kearns, 567 F.3d at 1125-26; *see also Davidson, 889 F.3d at 964* (citing Kearns, 567 F.3d at 1125) ("Because [the plaintiff's] common law fraud, CLRA, FAL, and UCL causes of action are all grounded in fraud, the FAC must satisfy the traditional plausibility standard of Rules 8(a) and 12(b)(6), as well as the heightened pleading requirements of Rule 9(b).").

The Court now turns to whether Plaintiffs meet the particularity requirement of Rule 9(b). **HN24**[] To do so, the Court examines the FAC to determine whether Plaintiffs plead the "'the who, what, when, where, and how' of the misconduct charged." Kearns, 567 F.3d at 1124 (quoting **[**39]** Vess, 317 F.3d at 1106).

---

[5] Plaintiffs rely on a Ninth Circuit footnote to support their argument. *See* Doc. No. 62 at 18 (quoting Moore, 966 F.3d at 1019 n.11). In *Moore*, the Ninth Circuit applied Rule 9(b) and found the plaintiffs satisfied Rule 9(b). *See* Moore, 966 F.3d at 1019-20. The court questioned the applicability of Rule 9(b) "given that a defendant can violate the UCL, FAL, and CLRA by acting with mere negligence." Id. at 1019 n.11. Although the Court noted that Rule 9(b) "may" not apply, the plaintiffs did not raise this issue and the court did not decide the issue. *Id.*

[6] Additionally, in opposing Defendant's argument that they did not sufficiently plead a claim under ***Cal. Civ. Code § 1770(a)(9)***, Plaintiffs argue that they did sufficiently plead an intent to defraud. *See* Doc. No. 62 at 23 n.6 (citing FAC ¶¶ 11, 168, 186-87). In rebutting Defendant's motion, Plaintiffs also refer to the violation of the consumer protection acts as "Plaintiffs' consumer *fraud* claims." Id. at 26 (emphasis added).

Plaintiffs allege that the "who" is Defendant. *See, e.g.*, FAC ¶¶ 3, 6, 10, 163, 185, 196-98, 205, 215, 218. The "what" concerns two overarching issues with Defendant's products: (1) nonfunctional **[*1133]** slack fill and (2) deceptive marketing statements. *See id.* ¶ 3. Regarding the nonfunctional slack fill, the "what" is that Defendant fills several of its products with substantially less than the container's capacity and the packaging leads consumers to believe the box contains more of the product. *See id.* ¶ 7; *see also id.*, Exh. A (providing a "misrepresentation chart" that details Defendant's products and the alleged misrepresentations for each product). As to the marketing claims, the "what" is that Defendant makes five false or misleading statements on its products: "no preservatives," "free of artificial additives," "non-GMO," "healthy," and "protein-packed." *Id.* ¶¶ 10, 13, 14; *see also id.*, Exh. A. The "when" is Plaintiffs' alleged class period: January 1, 2015 through the date class notice is issued. *Id.* ¶ 149. Further, whereas some of the named Plaintiffs allege to have bought Defendant's products "over the past few years," *e.g., id.* ¶ 17; *see also* ¶¶ 25, 27, 29, 33, 35, 37, 39, **[**40]** 41, 43, 45, 47, 49, 51, 53, 55, 57, 59, 61, other named Plaintiffs allege a more specific date, *e.g., id.* ¶ 19 ("in or around August 2019"); *see also id.* ¶¶ 21, 23; *id.*, Ex. B at 75, 80 (providing specific purchase dates for Plaintiffs Anna Altomare and Ty Stewart in Plaintiffs' CLRA violation notice). The "where" is Defendant's product packaging and advertising, which included "statements made on Kodiak Cakes' online store, on Kodiak Cakes' social media profiles on Instagram and Facebook, on the Kodiak Cakes website and blog, on Amazon and/or on the Shark Tank episode that aired on ABC." *Id.* ¶¶ 63-64. Additionally, although some Plaintiffs allege to have bought products in a specific county, chain store, or unspecified location, *e.g., id.* ¶ 19; *see also* ¶¶ 25, 27, 29, 31, 35, 41, 43, 45, 47, 49, 51, 53, 55, 57, 59, 61, other Plaintiffs allege to have bought products at a specific store or online, *e.g., id.* ¶ 17 ("Mr. Stewart purchased [Defendant's] products . . . at various stores in San Diego County, most frequently the Target store located at 3245 Sports Arena Blvd, San Diego, CA 92110, and online through Kodiak Cakes' online store."); *see also* ¶¶ 21, 23, 33, 37, 39.

Plaintiffs allege **[**41]** the "how" differently based on the underlying theories. Regarding the nonfunctional slack fill theory, the "how" is that Defendant misrepresents the products' quantities through filling their opaque product boxes with less than half of product for no functional purpose. *Id.* ¶¶ 6-9, 82-85. Regarding the marketing statements theory, the "how" is that Defendant misrepresents the naturalness, healthiness, and nutritiousness of its products. Plaintiffs allege that Defendant misrepresents the natural[7] claims because its products contain "non-natural, synthetic and/or artificial substances," such as monocalcium phosphate, sodium bicarbonate, sodium acid pyrophosphate ("SAPP"), citric acid, and xanthan gum. *Id.* ¶ 119; *see also id.* ¶¶ 122-24. Plaintiffs further add that the several products contain genetically modified ingredients, such as "soy lecithin, soy protein, and corn starch." *Id.* ¶ 120. Plaintiffs allege that the health claims are misleading because consumers interpret "healthy" foods as having "low levels of fat, cholesterol and sugar and contain a certain level of vitamins and nutrients," but Defendant's products do not meet those standards. *Id.* ¶¶ 139-41 (citing *21 C.F.R. § 101.65(d)(2)*). Plaintiffs allege **[**42]** that **[*1134]** the nutrient claims are misleading because consumers interpret "protein-packed" foods as having "high" amounts or constituting an "excellent source" of protein, which means at least ten grams of protein per serving; however, many of Defendant's products contain only two to eight grams per serving. *Id.* ¶¶ 128-31 (first citing *21 C.F.R. § 101.54*; and then citing *21 C.F.R. § 101.9(c)(7)(iii)*). Plaintiffs claim that they relied upon these misrepresentations by purchasing Defendant's products and that they would not have purchased or paid as much if they knew the products did not have the claimed characteristics. *See id.* ¶¶ 63-67; *see also id.* ¶¶ 16, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60.

HN25[] *Rule 9(b)* has three purposes:

> (1) to provide defendants with adequate notice to allow them to defend the charge and deter plaintiffs from the filing of complaints "as a pretext for the discovery of unknown wrongs"; (2) to protect those whose reputation would be harmed as a result of being subject to fraud charges; and (3) to "prohibit plaintiffs from unilaterally imposing upon the court, the parties and society enormous social and economic costs absent some factual basis."

---

[7] The Court notes that Plaintiffs' FAC takes issue with statements of "no preservatives," "free of artificial additives," and "non-GMO," which Plaintiffs collectively refer to as "natural claims." *See* FAC ¶¶ 10, 97, 115; *id.*, Exh. A. Despite referring to "all-natural" statements, Plaintiffs do not allege that "all-natural" is a misrepresentation or otherwise at-issue in this action.

Kearns, 567 F.3d at 1125 (quoting In re Stac Elecs. Sec. Litig., 89 F.3d at 1405). Here, Plaintiffs plead **[**43]** with the requisite specificity that upholds the purpose behind Rule 9(b). Although the alleged timeframe spans several years for some Plaintiffs, they generally outline how the products misled them, and Plaintiffs list the products at issue along with the nonfunctional slack fill or misrepresentation associated with each one. *See* FAC, Exh. A. The Court finds that Plaintiffs have provided adequate notice to Defendant in a manner that shows the suit is not merely a fishing expedition for unknown wrongs; does not harm Defendant in the same manner as a speculative, conclusory, or barebones complaint; and does not impose upon the Court, the parties, or society the cost of baseless litigation at this stage of the action.

Defendant's arguments to the contrary are unavailing. As noted above, Plaintiffs have pleaded sufficiently the "who, what, when, where, and how" of the alleged misconduct. *See* Escobar v. Just Born Inc., No. CV 17-01826 BRO (PJWx), 2017 U.S. Dist. LEXIS 186573, 2017 WL 5125740, at *13 (C.D. Cal. June 12, 2017); Ang v. Bimbo Bakeries USA, Inc., No. 13-cv-01196-WHO, 2013 U.S. Dist. LEXIS 138897, 2013 WL 5407039, at *2-4 (N.D. Cal. Sept. 25, 2013); Clancy v. The Bromley Tea Co., 308 F.R.D. 564, 576 (N.D. Cal. 2013); Astiana v. Ben & Jerry's Homemade, Inc., No. C 10-4387 PJH, 2011 U.S. Dist. LEXIS 57348, 2011 WL 2111796, at *6 (N.D. Cal. May 26, 2011). Although the individual Plaintiffs do not directly state which of their purchased products contained which misleading **[**44]** information, the Court can easily connect the allegations when coupling the products that each Plaintiff purchased with Plaintiffs' "Per-Product Misrepresentation Chart" that pairs each product with each alleged misrepresentation and is referred to throughout the FAC. *See* Ang, 2013 U.S. Dist. LEXIS 138897, 2013 WL 5407039, at *3 ("Plaintiffs have also identified with specificity the precise representations alleged to be illegal, fraudulent and misleading, as well as the specific products on which that language is found."). *Compare* FAC ¶¶ 17, 19, 21, 23, 25, 27, 29, 31, 33, 35, 37, 39, 41, 43, 45, 47, 49, 51, 53, 55, 57, 59, 61 (listing the products purchased by named Plaintiffs), *and id.* ¶¶ 6, 12, 131, 141, 149 n.40, 164 (referring directly to the attached "Per-Product Misrepresentation Chart"), *with id.*, Exh. A (providing the "Per-Product Misrepresentation Chart"). Regardless of using judicial notice or incorporation-by-reference to examine Defendant's proffered exhibits to disprove **[*1135]** that every product contained the misrepresentations, this issue is not appropriate at the Rule 9(b) juncture where Plaintiffs allege that Defendant did make such representations and the product labels may have changed over time. *See* **[**45]** Bruton v. Gerber Prods. Co., No. 12-cv-02412-LHK, 2014 U.S. Dist. LEXIS 5493, 2014 WL 172111, at *13 (N.D. Cal. Jan. 15, 2014); Ang, 2013 U.S. Dist. LEXIS 138897, 2013 WL 5407039, at *4.

Accordingly, the Court finds that Plaintiffs meet the particularity requirement of Rule 9(b) unless otherwise noted below. *See* Moore, 966 F.3d at 1020 ("The fact that Plaintiffs placed Defendants on sufficient notice to respond to the alleged fraud reflects how their allegations meet Rule 9(b)."). The Court now turns to whether Plaintiffs satisfy Rule 8's general plausibility requirement and whether Plaintiffs state a viable claim for relief under the reasonable consumer test.

iii. The Rule 8 General Plausibility Requirement and Reliance

Before discussing the reasonable consumer test and the claim-specific requirements of Plaintiffs' causes of action, Defendant generally argues that Plaintiffs do not satisfy Rule 8's plausibility requirement. *See* Doc. No. 44-1 at 14; *see also* Doc. No. 65 at 10. In particular, Defendant asserts that the twenty-three Plaintiffs use "almost identical copy-and-paste conclusory statements." Doc. No. 44-1 at 14. Defendant contends that each Plaintiff fails to allege she or he read the product packaging and provides no information about buying experiences or price comparisons. *Id.* Defendant adds that Plaintiffs fail to allege reliance, which they claim is crucial because "not all of [Defendant's] products have all **[**46]** the purported representations that plaintiffs rely on in their FAC." *Id.* at 15. Finally, Defendant argues Plaintiffs do not explain why they continued to purchase products if they were dissatisfied with the labels or fill levels. Plaintiffs respond that facts do not become conclusions merely because allegations are shared between Plaintiffs, and they challenge Defendant's assertion that they fail to allege facts. *See* Doc. No. 62 at 12. Plaintiffs push back against the information Defendant argues is needed and contend they sufficiently allege reliance. *Id.* at 13-14, 15.

To the extent Defendant's arguments are duplicative or subsumed into the *Rule 9(b)* particularity requirement, its arguments are unavailing. As noted above, Plaintiffs have pleaded sufficiently the "who, what, when, where, and how" of the alleged misconduct. *See supra* Section IV.B.1.ii.[8] The Court declines to repeat its above analysis.

The Court now turns to whether Plaintiffs plead actual reliance and begins with the issue of Plaintiffs' shared reliance allegations. ***HN26***[] A plaintiff alleging claims under the CLRA, FAL, or UCL, must allege actual reliance. *See Moore, 966 F.3d at 1020*; *Guzman v. Polaris Indus., Inc., No. 8:19-cv-01543-JLS-KES, 2020 U.S. Dist. LEXIS 90041, 2020 WL 2477684, at *3 (C.D. Cal. Feb. 13, 2020)* (quoting **[**47]** *Stewart v. Electrolux Home Prods., Inc., No. 1:17-cv-01213-LJO-SKO, 2018 U.S. Dist. LEXIS 63078, 2018 WL 1784273, at *4 (E.D. Cal. Apr. 13, 2018))*. A plaintiff alleging false advertising or misrepresentation to consumers "'must show that the misrepresentation was an *immediate cause* of the injury-producing conduct.' However, a 'plaintiff is *not* required **[*1136]** to allege that the challenged misrepresentations were the *sole* or even the *decisive* cause of the injury-producing conduct.'" *Moore, 966 F.3d at 1020* (quoting *Kwikset Corp. v. Superior Ct., 51 Cal. 4th 310, 120 Cal. Rptr. 3d 741, 246 P.3d 877, 888 (Cal. 2011))*. In *Moore*, the Ninth Circuit determined that although the plaintiffs did not provide many facts in their "individual allegations," they "collectively allege[d]" that "as a result of the false and fraudulent prescription requirement, each Plaintiff paid more for Prescription Pet Food than each Plaintiff would have paid in the absence of the requirement, or would never have purchased Prescription Pet Food." *Id.* The court held this was sufficient to survive a motion to dismiss. *See id.*

Similarly, Plaintiffs here collectively allege that if they had known about the real nature behind the slack fill and misrepresentations, "they would not have purchased the [Defendant's] products or, alternatively, would have paid less for the Products." FAC ¶ 14; *see also id.* ¶¶ 62, 67, 92, 145-46. ***HN27***[] As in *Moore* **[**48]** , collective allegations can survive a motion to dismiss. *See Moore, 966 F.3d at 1020*; *see also id. at 1021* (quoting *Friedman v. AARP, Inc., 855 F.3d 1047, 1055 (9th Cir. 2017))* ("[A]t the motion to dismiss stage, 'actual reliance . . . is inferred from the misrepresentation of a material fact.'"). Thus, Plaintiffs' collective or identical allegations do not doom a showing of actual reliance.

In assessing whether Plaintiffs allege actual reliance across Defendant's advertising, the Court splits its analysis between the "product packaging" and "other advertising."[9] As to the packaging and as noted above, the Court can easily connect each product to its respective alleged misrepresentation. *See supra* Section IV.B.1.ii. *Compare* FAC ¶¶ 17, 19, 21, 23, 25, 27, 29, 31, 33, 35, 37, 39, 41, 43, 45, 47, 49, 51, 53, 55, 57, 59, 61 (listing the products purchased by named Plaintiffs), *and id.* ¶¶ 6, 12, 131, 141, 149 n.40, 164 (referring directly to the attached "Per-Product Misrepresentation Chart"), *with id.*, Exh. A (providing the "Per-Product Misrepresentation Chart"). Each Plaintiff alleges that she or he was "exposed to each of the Claims that were prominently displayed *on the package of the products [she or he] purchased* and in [Defendant's] marketing and advertising." *Id.* ¶¶ 16, 18, **[**49]** 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60 (emphasis added). Thus, the Court finds that Plaintiffs have alleged actual reliance on the statements found on the packaging for the products purchased by each individual Plaintiff.

As to the other advertising, each Plaintiff alleges that she or he was "exposed to each of the Claims that were prominently displayed . . . in [Defendant's] *marketing and advertising*." *Id.* ¶¶ 16, 18, 20, 22, 24, 26, 28, 30, 32, 34,

---

[8] Defendant's reliance on *Ballard v. Bhang Corp., No. EDCV 19-2329 JGB (KKx), 2020 U.S. Dist. LEXIS 188626, 2020 WL 6018939 (C.D. Cal. Sept. 25, 2020)*, is unsuccessful. In *Ballard*, the court granted a motion dismiss, requiring greater clarity as to "which chocolates [the plaintiff] bought, when he bought them, how they were advertised, and how they fell short—at the very least as to the chocolates that Plaintiff had lab-tested." *2020 U.S. Dist. LEXIS 188626, [WL] at *7*. Here, Plaintiffs have provided the requisite clarity. *See supra* Section IV.B.1.ii.

[9] The Court refers to "packaging" as both the physical packaging for Plaintiffs who purchased products in stores and the packaging images viewable online for Plaintiffs who purchased products online. The Court refers to "other advertising" as all nonpackaging advertisements found on Defendant's website, online store, blog, social media, Amazon.com pages, and *Shark Tank* episode that aired on ABC.

36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60 (emphasis added); *see also id.* ¶ 64. After their individual allegations, Plaintiffs repeat this allegation and define "advertising and marketing":

> Each of the Plaintiffs were also exposed to, read, and relied upon the Claims made about these Products through Kodiak Cakes' advertising and marketing. This advertising and marketing included statements made on Kodiak Cakes' online store, on Kodiak Cakes' social media profiles on Instagram and **[*1137]** Facebook, on the Kodiak Cakes website and blog, on Amazon and/or on the *Shark Tank* episode that aired on ABC.

Id. ¶ 64. Plaintiffs clearly aver that each Plaintiff was exposed to Defendant's advertising. **[**50]** *See id.*; *see also id.* ¶¶ 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60. However, in defining "advertising and marketing," Plaintiffs provide a wide net of what the advertising "included" and tethers the advertisement media together with a vague "and/or." *Id.* It is unclear what advertisement medium each Plaintiff relied upon. Even if Defendant did in fact make misrepresentations across these media, Plaintiffs must each still show that the misrepresentation was an immediate cause of the injurious conduct. *See* *Moore, 966 F.3d at 1020* (quoting *Kwikset Corp., 246 P.3d at 888*). Here, the causal connection between each Plaintiff and each misrepresentation across Defendant's advertising media is too tenuous and insufficiently pleaded. *See* *McCrary v. Elations Co., LLC, No. EDCV 13-0242 JGB (OPx), 2013 U.S. Dist. LEXIS 173592, 2013 WL 6403073, at *8*. ("Plaintiff alleges that the [Defendant's] website contains various misrepresentations, but the SAC does not allege that he looked at or relied on anything on Defendant's website before purchasing [the product]. Thus, Plaintiff did not actually rely on any website statements and does not have standing to bring claims based on [] those statements." (citation omitted)).

However, one Plaintiff does appear to plead actual reliance **[**51]** plausibly to one alleged deceptive statement found on the other advertising. Plaintiff Ty Stewart ("Stewart") plausibly pleads reliance on the "healthy" statement regarding Defendant's Double Dark Chocolate Muffin Mix from the online store. *See* FAC ¶¶ 64, 137; *see also infra* Section IV.B.1.iv.b.2. Stewart alleges that he purchased products on Defendant's online store. *See* FAC ¶ 17. Stewart alleges he purchased Double Dark Chocolate Muffin Mix. *Id.; see also id.* Exh. B. at 80. Plaintiffs allege the deceptive "healthy" claim was made on Defendant's online store regarding the Double Dark Chocolate Muffin Mix. *See id.* ¶¶ 64, 137. Construing Plaintiffs' allegations in the light most favorable to them, *see* *Cahill, 80 F.3d at 337-38* (citing *Nat'l Wildlife Fed'n, 45 F.3d at 1340*), the Court finds Plaintiff Stewart plausibly pleads actual reliance on the alleged "healthy" statement for the Double Dark Chocolate Muffin Mix as advertised on Defendant's online store.

Therefore, with the exception of Plaintiff Stewart and his plausible reliance on the "healthy" statement, the Court finds that Plaintiffs fail to plausibly allege actual reliance on the statements found on Defendant's other advertising.

iv. Reasonable Consumer Test and the CLRA, UCL, and FAL

HN28[] To state a claim **[**52]** under the CLRA, FAL, or the fraudulent prong of the UCL, a plaintiff must allege that the defendant's purported misrepresentations are likely to deceive a reasonable consumer. *See Ebner, 838 F.3d at 967* (citing *Williams, 552 F.3d at 938*); *see also* *Becerra v. Dr Pepper/Seven Up, Inc., 945 F.3d 1225, 1228 (9th Cir. 2019)* (citing *Williams, 552 F.3d at 938*); *Safransky v. Fossil Grp., Inc., No. 17-cv-1865-MMA (NLS), 2018 U.S. Dist. LEXIS 60946, 2018 WL 1726620, at *9 (S.D. Cal. Apr. 9, 2018)*; *Hadley, 243 F. Supp. 3d at 1089*. "Because the same standard for fraudulent activity governs all three statutes, courts often analyze the three statutes together." *Loomis, 420 F. Supp. 3d at 1080 n.7* (quoting *Hadley, 243 F. Supp. 3d at 1089*). "These laws prohibit 'not only advertising which is false, but also advertising which, although true, is either actually misleading or which has a capacity, likelihood or tendency to **[*1138]** deceive or confuse the public.'" *Hadley, 243 F. Supp. 3d at 1092* (quoting *Kasky, 45 P.3d at 250*).

HN29[] "A reasonable consumer is 'the ordinary consumer acting reasonably under the circumstances.'" *Davis, 691 F.3d at 1162* (quoting *Colgan v. Leatherman Tool Grp., Inc., 135 Cal. App. 4th 663, 38 Cal. Rptr. 3d 36, 48 (Ct. App. 2006))*. "Likely to deceive implies more than a mere possibility that the advertisement might conceivably be misunderstood by some few consumers viewing it in an unreasonable manner." *In re Sony Gaming Networks &*

Customer Data Sec. Breach Litig., 903 F. Supp. 2d 942, 967 (S.D. Cal. 2012) (quoting Lavie v. Procter & Gamble Co., 105 Cal. App. 4th 496, 129 Cal. Rptr. 2d 486, 495 (Ct. App. 2003)); *see also* Becerra, 945 F.3d at 1228 (same). Rather, "the phrase indicates that the ad is such that it is probable that a significant portion of the general consuming public or of targeted consumers, acting reasonably in the circumstances, could be misled." Lavie, 129 Cal. Rptr. 2d at 495. "In determining whether a statement is **[**53]** misleading under the statute, 'the primary evidence in a false advertising case is the advertising itself.'" Colgan, 38 Cal. Rptr. 3d at 46 (quoting Brockey v. Moore, 107 Cal. App. 4th 86, 131 Cal. Rptr. 2d 746, 756 (Ct. App. 2003)). However, "'[g]eneralized, vague, and unspecified assertions constitute "mere puffery" upon which a reasonable consumer could not rely, and hence are not actionable' under the UCL, FAL, or CLRA." In re Ferrero Litig., 794 F. Supp. 2d 1107, 1115 (S.D. Cal. 2011) (quoting Annunziato v. eMachines, Inc., 402 F. Supp. 2d 1133, 1139 (C.D. Cal. 2005)). Under the reasonable consumer test, the Ninth Circuit has emphasized that it is a "rare situation in which granting a motion to dismiss is appropriate" because "it raises questions of fact." Reid v. Johnson & Johnson, 780 F.3d 952, 958 (9th Cir. 2015); *Williams, 552 F.3d at 939*.

The Court now turns to whether Plaintiffs allege that Defendant's products are likely to deceive a reasonable consumer under their two overarching theories of liability: (1) deceptive fill level and (2) deceptive marketing statements.

a. Deceptive Fill Level

Despite Plaintiffs referring to this issue as "nonfunctional slack fill," *see* FAC ¶¶ 3, 4-9, 82-92, the substance of these allegations appears to be brought under two sub-theories: (1) consumer deception under the CLRA, FAL, and the fraud UCL prong, *see* FAC ¶¶ 6,7, 8, 62, 83, 90, 186, 198, 205, and (2) nonfunctional slack fill under the unfair or unlawful prongs of the UCL, *see id.* ¶¶ 7, 9, 62, **[**54]** 84-86, 90, 163, 196; *see also* Doc. No. 62 at 29. Given the different analysis required for these theories, the Court addresses the first sub-theory under the reasonable consumer analysis here and the second sub-theory under the unfair and unlawful UCL prongs further below. *See* Buso v. ACH Food Companies, Inc., 445 F. Supp. 3d 1033, 1037 (S.D. Cal. 2020) (discussing the two theories in turn where the plaintiff alleged the packaging was filled in a misleading manner and contained nonfunctional slack fill); Escobar, 2017 U.S. Dist. LEXIS 186573, 2017 WL 5125740, at *7, *12 (first discussing whether the plaintiff alleged facts to state a claim under the reasonable consumer analysis and then under the nonfunctional slack fill analysis); *see also infra* Section IV.B.1.v.

Defendant asserts that Plaintiffs' slack-fill theory is insufficient to state a claim for five reasons. *See* Doc. No. 44-1 at 21-26; *see also* Doc. No. 65 at 15-19. First, Defendant argues the theory fails because the boxes state how much product they contain "in weight, serving sizes, and often by final product output"; the recipes on the boxes note the yield; and the box size does not **[*1139]** correlate with the ultimate baked product amount given that the baking mixes must be combined with other ingredients. Doc. No. 44-1 at 22 (emphasis omitted). Second, Defendant asserts **[**55]** that Plaintiffs cannot claim they were deceived because they allege slack fill violations based on online purchases, which prevent the consumer from examining the box. *See id.* at 23. Third, Defendant asserts that Plaintiffs failed to allege they were barred from comparison shopping based on "price per ounce" or from picking up similar products to compare weight. *Id.* at 23, 24. Defendant claims that "[w]hen the price per ounce is indicated on the price tag of all the same products in a product category, the consumer cannot be misled." *Id.* at 23. Fourth, Defendant argues that Plaintiffs' allegation of repeated deception for every purchase is implausible because Plaintiffs would have known the fill level after the first purchase. *See id.* at 24-26. Fifth, Defendant argues the CLRA claim premised on slack fill should be dismissed because it requires a representation and Plaintiffs "do not allege an objective false representation (written or oral) that the box contains more product than it has." *Id.* at 26.

Plaintiffs respond with several arguments. *See* Doc. No. 62 at 28-36. First, Plaintiffs highlight that Defendant does not argue that the empty space is functional, which prevents dismissal of their unfair and unlawful UCL claim premised under **[**56]** Cal. Bus. & Prof. Code § 12606.2. *See id.* at 28-29. Second, Plaintiffs contend that they sufficiently allege that a reasonable consumer can be misled by a baking mix that requires cooking. *See id.* at 29-32. Third, Plaintiffs argue that slack fill allegations are sufficient when they include online purchases. *See id.* at 32. Fourth, Plaintiffs assert that they are not required to allege that they compared price per ounce or handled the product to determine weight. *See id.* at 33-34. Fifth, Plaintiffs claim that their causes of action are not limited to the initial purchase because deceptive packaging in one instance does not mitigate the deception in a subsequent instance. *See id.* at 35. Sixth, Plaintiffs contend that they allege an injury caused by the slack fill. *See id.* at 36. Seventh, Plaintiffs argue that the CLRA claim premised on slack fill is viable because product size is a misrepresentation. *See id.*

Plaintiffs allege that Defendant has a "uniform packaging scheme" across twenty-seven products where products are packaged in nontransparent, cardboard-resembling boxes and contain less than half of the boxes' capacity. FAC ¶¶ 6-7. Plaintiffs claim that within the boxes is an interior plastic bag that contains the product mix, which often amounts to only one-third the size **[**57]** of the box. *Id.* ¶ 83. Plaintiffs aver that the "deceptive packaging leads the reasonable consumer to believe that the package contains substantially more product than it actually does." *Id.* ¶ 7; *see also id.* ¶ 83.

Within their FAC, Plaintiffs include a picture comparing the opaque exterior box next to a clear interior sealed bag containing the product mix—and using a ruler to show the difference. *See id.* ¶ 7. The picture shows that the exterior box is roughly nine inches tall, the interior bag containing the product mix is about eight-and-a-half inches tall, and the content of the bag is under four inches tall. *See id.* Comparing Defendant's exterior packaging with its competitors, Plaintiffs allege that competitors sell products with "significantly more product" than Defendant, which "lead[s] consumers to the reasonable assumption that [Defendant's products] contain the same amount of mix." *Id.* ¶ 86 (emphasis omitted). For example, Plaintiffs include a picture of one of Defendant's products next to a similar sized competitor product. **[*1140]** *See id.* ¶ 86. Plaintiffs allege that Defendant's package contains 12.7 ounces of product and the competitor's product contains 32 ounces of products. ***[**58]*** *See id.* In addition, Defendant's product packaging details the product weight on the front of the box as well as the serving size—sometimes by final product output—and servings per container on the back or side of the box. *See, e.g.*, Doc. No. 44-3 at 1-2 (Buttermilk Flapjack and Waffle Mix packaging); Doc. No. 44-5 at 1-2 (Cinnamon Oat Flapjack and Waffle Mix packaging); Doc. No. 47-11 at 1-2 (Chocolate Fudge Brownie Mix packaging); Doc. No. 48-1 at 1-2 (Power Flapjacks packaging). To assess the plausibility of Plaintiffs' theory, the Court first reviews how other courts have addressed consumer deception based on unfulfilled quantity expectations.

In *Ebner v. Fresh, Inc.*, the Ninth Circuit affirmed the district court's dismissal of deceptive advertising claims. *See 838 F.3d at 961-62*. The plaintiff alleged the defendant's lip balm packaging was deceptive because it misled consumers into thinking it contained a larger quantity than it actually contained. *See id. at 962*. The plaintiff claimed the deception stemmed from a weighted metallic bottom, oversized packaging, and a screw mechanism that allowed only 75% of the product to rise to the top of the tube. *Id.* In holding that the plaintiff did not allege a plausible **[**59]** consumer deception claim, the court reasoned that the tube and accompanying box had an accurate net weight label, a reasonable consumer understands the screw prevents full advancement of the product, and some additional weight may be necessary to keep the tube upright. *See id. at 967*. Noting the "context of the high-end cosmetics market," the court added "elaborate packaging and the weighty feel of the tube is commonplace and even expected." *Id.*

In *Buso v. ACH Food Companies, Inc.*, the district court dismissed the plaintiff's consumer deception claim. *See* *445 F. Supp. 3d at 1039*. The plaintiff alleged that the defendant's cornbread mix packaging was deceptive because it contained about 50% empty space and misled consumers into thinking it contained a larger quantity than it actually contained. *Id. at 1035*. The court found that it was "unreasonable for a customer to be deceived as to the amount of product contained in the cornbread mix box" because the front of the package stated the product's net weight and the approximate number of servings per container and the back of the package indicated that "the box contains enough cornmeal mix to make 'one 8-in square "loaf" of cornbread or 12 standard cornbread muffins.'" *Id. at 1038*. The court **[**60]** noted that the packaging clearly put consumers on notice of the quantity of cornbread that could be made per box. *See id.*

In *Kennard v. Lamb Weston Holdings, Inc.*, the district court dismissed the plaintiff's consumer deception claim. *See* *No. 18-cv-04665-YGR, 2019 U.S. Dist. LEXIS 63637, 2019 WL 1586022, at *7, *11 (N.D. Cal. Apr. 12, 2019)*. The plaintiff alleged that defendant's sweet potato fries packaging was deceptive because "the container had more than 50% empty space" and misled consumers into thinking it contained a larger quantity than it actually contained. *2019*

*U.S. Dist. LEXIS 63637, [WL] at *1*. The court reasoned that the packaging disclosed the product's net weight, number of fries per serving, and the number of servings per container; additionally, the weight and serving size labels "[did] not contradict other representations or inferences from defendant's packaging." *2019 U.S. Dist. LEXIS 63637, [WL] at *5*. Court noted that "many district courts have found that where the package itself discloses the actual unit counts, a 'reasonable consumer' could not be misled." *Id.*

[*1141] In *Buso v. Vigo Importing Co.*, the district court dismissed the plaintiff's consumer deception claim. *See No. 18-cv-1328-WQH-BGS, 2018 U.S. Dist. LEXIS 201726, 2018 WL 6191390, at *5 (S.D. Cal. Nov. 28, 2018)*. The plaintiff alleged that defendant's risotto packaging was deceptive because it contained about 70% empty space and misled consumers into thinking **[**61]** it contained a larger quantity than it actually contained. *See 2018 U.S. Dist. LEXIS 201726, [WL] at *1*. The court found "there [was] no deceptive act to be dispelled." *2018 U.S. Dist. LEXIS 201726, [WL] at *4* (quoting *Ebner, 838 F.3d at 966*). The court reasoned that the label's net weight was accurate and the package was pliable, which allowed consumers to see and feel the package to assess its quantity before purchase. *2018 U.S. Dist. LEXIS 201726, [WL] at *4, *5*.

On the other hand, in *Escobar v. Just Born Inc.*, the court denied the defendant's motion to dismiss the plaintiff's consumer deception claim. *See 2017 U.S. Dist. LEXIS 186573, 2017 WL 5125740, at *1*. The plaintiff alleged that the defendant's candy products were deceptive because they contained about 46% empty space and misled consumers into thinking they contained a larger quantity than they actually contained. *See id.* The court explained that

> a reasonable consumer is not necessarily aware of a product's weight or volume and how that weight or volume correlates to the product's size. In other words, the fact that the Products' packaging accurately indicated that a consumer would receive 141 grams or 5 ounces of candy does not, on its own, indicate to a reasonable consumer that the Products' box may not be full of candy and that, instead, 35.7% of the box is empty. Rather, a reasonable consumer may believe that 141 **[**62]** grams or five ounces of candy is equivalent to an amount approximately the size of the Products' box.

*2017 U.S. Dist. LEXIS 186573, [WL] at *9*. The court found the facts distinguishable from those in *Bush*: whereas in *Bush* "the product's packaging indicated the *number* of cookies the package contained, giving the consumer a reasonable expectation of the product's contents beyond just the weight," the packaging in *Escobar* "include[d] the [p]roduct[']s net weight, and a serving size approximation in ounces and cups." *Id.* (citing *Bush v. Mondelez Int'l, Inc., No. 16-cv-02460-RS, 2016 U.S. Dist. LEXIS 174391, 2016 WL 7324990, at *2 (N.D. Cal. Dec. 16, 2016))*. The court added that the fact that a consumer can hear the rustling of a package's contents does not prevent a package from being deceptive to consumers and that "consumers may reasonably rely on the size of the packaging and believe that it accurately reflects the amount she is purchasing." *2017 U.S. Dist. LEXIS 186573, [WL] at *10*. The court further noted that the plaintiff was unable to inspect the package prior to purchase because the candy was kept behind a glass enclosure and was handed to the consumer only after purchase. *Id.*

HN30[] In assessing a product, whether a reasonable consumer would be deceived often depends on the circumstances. Substantial, nonfunctional empty space may be a factor that **[**63]** could plausibly mislead a reasonable consumer. The reasonable consumer "is neither the most vigilant and suspicious of advertising claims nor the most unwary and unsophisticated, but instead is 'the ordinary consumer within the target population.'" *Chapman v. Skype Inc., 220 Cal. App. 4th 217, 162 Cal. Rptr. 3d 864, 872 (2013)* (quoting *Lavie, 129 Cal. Rptr. 2d at 497*). The reasonable consumer does not don Sherlock Holmes garb to scrutinize an entire aisle filled with shelves of a various pancakes by comparing the exact weight of each box's content with the price across a dozen brands or shaking and manipulating each box to detect the nature of the hidden culinary treasure. Although consumers take into consideration **[*1142]** certain labels and information provided on the packaging, consumers plausibly do not perform intense word-by-word detective work for each product they toss in their shopping cart. ***HN31***[] To some degree, "consumers may reasonably rely on the size of the packaging and believe that it accurately reflects the amount she is purchasing." *Escobar, 2017 U.S. Dist. LEXIS 186573, 2017 WL 5125740, at *10*. "[E]ven if a product's packaging accurately displays its weight, it does not mean that the way in which the product was packaged may not be misleading." *Id.; Spacone v. Sanford, LP, No. CV 17-02419-BRO (MRWx), 2017 U.S. Dist. LEXIS 228377, 2017 WL 6888497, at *10 (C.D. Cal. May 11, 2017)*.

However, the inquiry does not end with merely relying on **[**64]** a package's size. Reasonable consumers also rely on serving size and product yield information as well as the feel of the package to inform their purchasing decisions. *See ACH Food Companies, Inc., 445 F. Supp. 3d at 1038* (finding that it would be unreasonable for a consumer to be deceived as to the amount of cornbread mix in the box where the net weight and number of servings per box were displayed on the front of the box and the rear label indicated that the box could yield "one 8-in square 'loaf' of cornbread or 12 standard cornbread muffins"); *Kennard, 2019 U.S. Dist. LEXIS 63637, 2019 WL 1586022, at *5* (finding that it was not plausible for a consumer to be deceived where the fry packaging disclosed the product's net weight, number of fries per serving, and the number of servings per package); *Vigo Importing Co., 2018 U.S. Dist. LEXIS 201726, 2018 WL 6191390, at *5* (finding that a reasonable consumer would not be deceived where the risotto packaging was pliable and the consumer can "see and feel the package and perceive the amount of product").

Here, the product is baking mix. Unlike the high-end cosmetics market with the widespread nature of elaborate and weighty packaging in *Ebner, see 838 F.3d at 967*, the Court is unaware that—and the parties do not argue—the pancake and other baking mixes at issue are part of a high-end market where large and weighty packages are expected. **[**65]** Indeed, Plaintiffs' slack-fill comparison between Defendant's Chocolate Chip Flapjack and Waffle Mix and a competitor's product suggests that empty space in pancake packaging is not the norm. *See* FAC ¶ 86; *see also id.* ¶ 85.

Further, whereas some labels state the final product yield after cooking or baking the mix and its ingredients, *see, e.g.*, Doc. No 44-4 at 2 (Chocolate Chip Flapjack and Waffle Mix); *see also Power Cakes: Chocolate Chips*, Kodiak Cakes, https://kodiakcakes.com/products/chocolate-chip-power-cakes (same), other labels only provide serving size in cylindrical cups and list an approximate number of those servings per container,[10] *see, e.g.*, Doc. No 44-8 at 2 (Strawberry Chocolate Chip Flapjack and Waffle Mix); *see also Power Cakes: Strawberry Chocolate Chips*, Kodiak Cakes, https://kodiakcakes.com/products/strawberry-dark-chocolate-power-cakes (same). At this stage, the Court finds it plausible that the reasonable consumer is unlikely to convert cylindrical cups plus other ingredients[11] into the approximate product yield of the finished pancakes, waffles, or other baked goods. *Cf. Escobar,* ***[*1143]*** *2017 U.S. Dist. LEXIS 186573, 2017 WL 5125740, at *9 n.4* ("In the Court's view, the reasonable consumer is unlikely to (1) make volume conversions from **[**66]** cylindrical cups to rectangular prisms; and (2) know the density of candy products, such that the printed weight of candy may be converted to approximate the volume of candy product packaged in a rectangular prism.").

At least some of the products here are distinguishable from the special consumer context and unique mechanics of a lip balm dispenser in *Ebner*, the listing of final product output information in *ACH Food Companies, Inc.* and *Kennard*, and the pliability of the packaging in *Vigo Importing Co.* Additionally, Plaintiffs' claims raise questions of fact that do not trigger the rare situation where granting a motion to dismiss is appropriate. *See Reid, 780 F.3d 952, 958* (quoting *Williams, 552 F.3d at 939*); *see also Spacone, 2017 U.S. Dist. LEXIS 228377, 2017 WL 6888497, at *10* ("The Court recognizes the admonition that whether product labeling or packaging may mislead a reasonable consumer is a factual inquiry rarely appropriate for decision on a motion to dismiss."). Therefore, the Court finds that Plaintiffs could plausibly prove that a reasonable consumer would be deceived by the size of Defendant's packaging where the opaque, nonpliable packaging does not provide information about the final product output.

---

[10] Defendant asserts in their motion that "[t]he boxes state exactly how much product is inside in weight, serving sizes, and *often by* final product output (muffins, cookies, brownies, protein balls, flapjacks/waffles etc.)." Doc. No. 44-1 at 22 (emphasis omitted and added). Defendant appears to concede that not all of its product boxes state the final product yield.

[11] For example, Defendant's pancake mixes only require water to be added. *See, e.g.*, Doc. No. 44-3 at 1-2 (Buttermilk Flapjack and Pancake Mix).

Defendant argues Plaintiffs cannot claim they were deceived **[**67]** because they allege they made online purchases and there is no nonfunctional slack fill where "[t]he mode of commerce does not allow the consumer to view or handle the physical container or product." Doc. No. 44-1 at 23 (quoting *Cal. Bus. & Prof. Code § 12606.2(c)(8)*). This argument is unavailing because this provision is from the *California Fair Packaging and Labeling Act*, which Plaintiffs allege as part of their unlawful UCL prong claim and is distinct from their fraudulent UCL prong allegations. *See* FAC ¶ 196. The Court addresses Defendant's argument as it pertains to the unlawful and unfair UCL prongs in a later section of this order. *See infra* Section IV.B.1.v. To the extent Defendant makes a similar argument to rebut Plaintiffs' consumer deception theory, it is unavailing at this stage of the litigation. The Court still finds that Plaintiffs could plausibly prove a reasonable consumer would be deceived. Although Defendant notes that online consumers do not know the box's size from looking at a picture without a physical measure of reference, *see* Doc. No. 65 at 18, the issue still remains that online consumers may reasonably rely on the packaging, along with final product yield information, to accurately reflect the **[**68]** amount of product it contains. Thus, consumers could plausibly rely on the online product's picture—without a measure of reference—to assume that the container's size bears some relation to amount of its contents. Considering Plaintiffs' allegations in the light most favorable to them, *see* *Cahill, 80 F.3d at 337-38* (citing *Nat'l Wildlife Fed'n, 45 F.3d at 1340*), consumers purchasing online products may have a stronger deception claim if they have less information about the product because they cannot visualize or handle the physical product and, thus, may be more susceptible to deceptive advertising. *Cf.* *Escobar, 2017 U.S. Dist. LEXIS 186573, 2017 WL 5125740, at *10* (noting that "common sense" reveals that a consumer may not have the opportunity to shake or manipulate a product on the shelf or behind glass to determine whether the box is full and further noting that the plaintiff alleged that the candy was kept in a "glass enclosure" and only handed to the consumer after purchase). Overall, Defendant has not persuaded the Court to differentiate the online purchase experience from the **[*1144]** in-person retail experience at the motion to dismiss stage.

Defendant also argues that Plaintiffs do not allege that they were precluded from comparison shopping and that "price per ounce" price tags allow consumers to easily **[**69]** compare products. *See* Doc. No. 44-1 at 23. In addition to not providing authority for its proposition, Defendant concedes that listing unit prices is merely "encouraged" and not mandatory in California. *See id.* at 23-24, 24 n.7 (quoting *Cal. Bus. & Prof. Code § 12655* ("It is the intent of the Legislature to *encourage* the unit pricing of all . . . packaged foods . . . offered by merchants in their places of business for sale at retail to the public. The Legislature finds that unit pricing, the price per ounce, per pound, per gallon, or the metric equivalent thereof, or per 100 square feet, or per 100 count, for which those items are offered for sale at retail, effectively informs the consumer of the comparative prices and values of commodities, and is thus useful for the formulation of intelligent consumer choices." (emphasis added))). Construing Plaintiffs' allegations in the light most favorable to them, *see* *Cahill, 80 F.3d at 337-38* (citing *Nat'l Wildlife Fed'n, 45 F.3d at 1340*), the Court assumes California Plaintiffs were not provided with price per ounce information when they selected the product. Thus, Defendant's challenge is unavailing.

Additionally, Defendant argues Plaintiffs' allegations hinder their claim that a reasonable consumer would be deceived because they knew about the slack **[**70]** fill after their first purchase yet continued to purchase Defendant's products for several years. *See* Doc. No. 44-1 at 25-26; *see also* FAC ¶¶ 16-17. ***HN32***[] However, "what is relevant at this stage is not what a reasonable consumer *actually* believes, but whether Plaintiff has plausibly pleaded facts indicating what a reasonable consumer *could* believe." *Escobar, 2017 U.S. Dist. LEXIS 186573, 2017 WL 5125740, at *10 n.5*; *Spacone, 2017 U.S. Dist. LEXIS 228377, 2017 WL 6888497, at *9 n.10*; *see also Williams, 552 F.3d at 940* (concluding that the plaintiffs "could plausibly prove that a reasonable consumer would be deceived" by the snack packaging). Also at this stage, the Court must construe Plaintiffs' allegations in the light most favorable to them. *See* *Cahill, 80 F.3d at 337-38* (citing *Nat'l Wildlife Fed'n, 45 F.3d at 1340*). Plaintiffs' allegations about continued purchases cut against their individual claims. However, reading the allegations in a favorable light, the Court finds that Plaintiffs' allegations plausibly state that they were deceived at least when they made their first purchase. *See* FAC ¶¶ 16, 89-90. This is enough at this stage of the litigation.

Finally, Defendant argues that Plaintiffs' CLRA claim must be dismissed as to their slack fill theory because the CLRA requires a representation and slack fill is not a representation. *See* Doc. No. 44-1 at 26; *see also* Doc. No. 65 at 19-20. Plaintiffs **[**71]** respond that the exaggerated box size is a representation. *See* Doc. No. 62 at 36.

Plaintiffs' CLRA cause of action alleges violations of *Cal. Civ. Code § 1770(a)(5)*, *(7)*, *(9)*, *(16)*. *See* FAC ¶ 186. ***HN33***[] The UCL, FAL, and CLRA "are designed to prohibit 'not only advertising which is false, but also advertising which, although true, is either actually misleading or which has a capacity, likelihood or tendency to deceive or confuse the public.'" *Williams, 552 F.3d at 938* (quoting *Kasky, 45 P.3d at 250*); *see also* *Cal. Civ. Code § 1760* ("This title shall be liberally construed and applied to promote its underlying purposes, which are to protect consumers against unfair and deceptive business practices and to provide efficient and economical procedures to secure such protection."). Further, unlike the other subsections Plaintiffs rely, *§ 1770(a)(9)* **[*1145]** does not include the word "representation"; rather, it merely makes unlawful "[a]dvertising goods or services with intent not to sell them as advertised." *Cal. Civ. Code § 1770(a)(9)*. Construing the CLRA liberally as required by statute, *see* *Cal. Civ. Code § 1760*, the Court finds that exaggerated box size and slack fill allegations can form the basis for a CLRA claim. *Cf.* *Escobar, 2017 U.S. Dist. LEXIS 186573, 2017 WL 5125740, at *11* (finding that the plaintiff stated a viable claim under the CLRA, FAL, and UCL based on her allegations that the defendant sold candy in misleading **[**72]** packaging that contained 46% empty space); *Spacone, 2017 U.S. Dist. LEXIS 228377, 2017 WL 6888497, at *10* (finding that plaintiff stated a viable claim under the CLRA, FAL, and UCL based on her allegations that the defendant sold glue in misleading packaging that contained 80% empty space).

Overall, without information stating how much final product a package contains or how many final products constitute a serving size with the number of servings per package, a reasonable consumer could plausibly assume that the size of an opaque, nonpliable package bears some relationship to the amount of product inside. In sum, the Court finds that Plaintiffs *could* plausibly prove that a reasonable consumer would be deceived by the size of Defendant's packaging where the packaging *does not* provide information about the final product output. However, the Court also finds that Plaintiffs *could not* plausibly prove that a reasonable consumer would be deceived by the size of Defendant's packaging where the packaging *does* provide information about the final product output. Accordingly, the Court **GRANTS in part and DENIES in part** Defendant's motion to dismiss Plaintiffs' CLRA, FAL, and the fraudulent UCL prong causes of action premised on deceptive fill level.

b. Deceptive [**73] Marketing Statements

The Court now turns to the viability of Plaintiffs' allegations that Defendant made several misleading statements in marketing its products that would deceive a reasonable consumer under the CLRA, FAL, and the fraudulent UCL prong. Plaintiffs allege that Defendant employed five misleading statements, and they organize the statements into three categories: "Natural Claims, Health Claims, and Nutrient Claims." *Id.* ¶¶ 10, 96. The Court proceeds by assessing each of the five statements within the three categories.

1. Natural Claims

Plaintiffs allege that Defendant misleadingly labels and advertises its products as having "no preservatives" as well as being "free of artificial additives" and "non-GMO." *See* FAC ¶¶ 10, 63, 97-126; *see also id.* Exh. A (providing the "Per-Product Misrepresentation Chart"). Defendant argues that Plaintiffs do not allege that "free of artificial additives" and "no preservatives" are misleading. *See* Doc. No. 44-1 at 30; *see also* Doc. No. 65 at 22. Defendant takes issue with Plaintiffs conflating the alleged statements with "all natural." *See* Doc. No. 44-1 at 30; *see also* Doc. No. 65 at 22-23. Defendant criticizes the FAC for taking issue with **[**74]** trace ingredients and not identifying the artificial additives or preservatives. *See* Doc. No. 44-1 at 30-31; *see also* Doc. No. 65 at 22. Defendant asserts that Plaintiffs could not have been misled by the presence of the minor ingredients because they are ingredients in baking soda and baking powder. *See* Doc. No. 44-1 at 31; *see also* Doc. No. 65 at 23. Further, Defendant argues that Plaintiffs fail to allege that the substances were used as a preservative or additive. *See* Doc. No. 44-1 at 31; *see also* Doc. No. 65 at 23. As to the "non-GMO" allegations, Defendant contends that reasonable consumers would not **[*1146]** be misled by "a trace or secondary ingredient." Doc. No. 44-1 at 32; *see also* Doc. No. 65 at 23. Defendant criticizes Plaintiffs for not citing studies or tests on the products and for relying on assumption that the ingredients are genetically modified. *See* Doc. No. 44-1 at 32; *see also* Doc. No. 65 at 24. Defendant argues that the alleged genetically modified ingredients are all sub-ingredients: "corn starch is a sub-ingredient of baking powder, soy [lecithin] is a sub-ingredient of chocolate chips, and soy protein is a sub-ingredient of marshmallows." *See* Doc. No. 44-1 at 33-34. **[**75]**

Plaintiffs respond that they allege "free of artificial additives" means "there was nothing non-natural, synthetic or artificial in the products" and "'no preservatives' meant that there were no chemical preservatives, none at all." Doc. No. 62 at 38-39 (emphasis omitted). Plaintiffs contend it is irrelevant that they do not allege that they never used baking powder or avoid products with similar ingredients. *See id.* at 39. Further, Plaintiffs state that it is inappropriate at this stage to challenge whether a reasonable consumer would be misled by such minor ingredients. *See id.* As to their "non-GMO" allegations, Plaintiffs argue that the statement appears on Defendant's packaging and they sufficiently allege that the products contain genetically modified ingredients. *See id.* at 40. Finally, Plaintiffs assert that they do not need to provide test results of the products. *See id.*

Plaintiffs lump together their "no preservatives" and "free of artificial additives" claims.[12] *See* FAC ¶ 99; *see also id.* ¶¶ 104-05. Plaintiffs allege that they and reasonable consumers "understand that the representation that a product is 'free of artificial additives' and contains 'no preservatives' means that none of its ingredients **[**76]** are non-natural, synthetic, artificial, or chemical preservatives." *Id.* ¶ 99. Plaintiffs aver that Defendant's baking mixes represent the following in bold: "In our [baking] mix, we use only 100% whole grains that are non-GMO and free of preservatives and artificial additives because to us, simple food is better." *Id.* ¶ 115 (emphasis omitted). Plaintiffs also allege that Defendant advertises its frozen Power Waffles "are made with only non-GMO ingredients and zero preservatives." *Id.* ¶ 116 (emphasis added). Plaintiffs further aver that many products' side or back panels state they are "[m]ade with freshly-ground whole grains and no preservatives" or "are non-GMO and free of preservatives and artificial additives because, to us, simple food is better." *Id.* ¶ 117; *see also id.* Exh. A. In particular, Plaintiffs allege that Defendant's products all contain one or more of the following substances, which are are preservatives or artificial additives: monocalcium phosphate, sodium bicarbonate, sodium acid pyrophosphate ("SAPP"), citric acid, xanthan gum, and "potentially others." *Id.* ¶ 119.

As to the "potentially others" part of the list, any unalleged preservative or artificial **[**77]** additive fails under *Rule 9(b)* for lack of specificity. The unclear, blanket allegation leaves Defendant to guess which statements across its products it will be required to defend. *Gitson v. Trader Joe's Co., No. 13-cv-01333-WHO, 2014 U.S. Dist. LEXIS 33936, 2014 WL 1048640, at *6 (N.D. Cal. Mar. 14, 2014)* (finding that the plaintiff's allegations regarding undisclosed additives failed under *Rule 9(b)*). Thus, any allegations premised **[*1147]** on unalleged preservatives or artificial additives fail under *Rule 9(b)*.

As to the remainder of the list that comprises definite substances, Plaintiffs aver that Defendant advertises at least several of its products as "free of artificial additives" or containing "no preservatives." *See* FAC ¶¶ 115-17. Plaintiffs provide a definition of "free of artificial additives" and "no preservatives." *See id.* ¶ 99. Plaintiffs allege that all of Defendant's products contain at least one of the five substances, which they claim are artificial additives or preservatives. *See id.* ¶ 119.

Defendant does not point to authority showing how these five ingredients are not artificial additives or preservatives. Instead, Defendant argues that these substances are minor and common ingredients in baking soda and baking powder. *See* Doc. No. 44-1 at 31. Defendant asserts that sodium bicarbonate **[**78]** is baking soda, SAAP is an ingredient in baking powder, and monocalcium phosphate is a leavening agent common in baked goods. *See id.* Defendant does not discuss citric acid or xanthan gum. Focusing on the ingredients' role as leavening agents, Defendant criticizes Plaintiffs for not alleging that the ingredients are used as a preservatives or additives and, relatedly, argues that they all serve a functional purpose. *See id.*

---

[12] Plaintiffs appear to conflate other statements. These include statements that Plaintiffs do not allege were part of the at-issue marketing, such as "all natural" or "synthetic." *See* FAC ¶¶ 98, 99, 102-07, 114, 199. Because Plaintiffs limit the alleged misrepresentations to specific phrases, the Court does not address whether Plaintiffs allege that other phrases support a viable claim. *See supra* note 7.

Whether these substances function as artificial additives or preservatives is an inappropriate inquiry at this stage. *Cf.* Gitson, 2014 U.S. Dist. LEXIS 33936, 2014 WL 1048640, at *4 ("[W]hether sodium citrate, citric acid, and tocopherol function as artificial flavors, chemical preservatives, or both, is inappropriate to determine at this stage of the litigation."); Ivie v. Kraft Foods Glob., Inc., No. C-12-02554-RMW, 2013 U.S. Dist. LEXIS 25615, 2013 WL 685372, at *10 (N.D. Cal. Feb. 25, 2013) ("[T]he factual determinations of whether maltodextrin is used as a sweetener and/or sodium citrate is used as a flavoring agent in this particular product, and whether a reasonable consumer would have thus been misled by the 'no artificial sweeteners or preservatives' label, are inappropriate for determination on a motion to dismiss."). Defendant does not provide support to show how the substances are not preservatives **[**79]** or additives—even if the ingredients are also leavening agents or have a functional purpose. *See* Thomas v. Costco Wholsale Corp., No. 5:12-cv-02908-EJD, 2014 U.S. Dist. LEXIS 46405, 2014 WL 1323192, at *9 (N.D. Cal. Mar. 31, 2014) (finding that the plaintiffs alleged that the defendant's "preservative free" product was misbranded and may deceive a reasonable consumer because the product contained tocopherols, despite the defendant arguing it contained "natural tocopherols"); Leonhart v. Nature's Path Foods, Inc, No. 13-cv-00492-BLF, 2014 U.S. Dist. LEXIS 164425, 2014 WL 6657809, at *6 (N.D. Cal. Nov. 21, 2014) ("Defendant's argument that tocopherol is not actually a chemical preservative presents a factual issue not appropriate for determination at the pleading stage."). Moreover, Defendant fails to address Plaintiffs' allegations concerning the presence of citric acid or xanthan gum.

The Court finds it curious how consumers of baking products would be misled by the presence of leavening agents. Nevertheless, at this stage, the Court must accept Plaintiffs' allegations as true and construe them in Plaintiffs' favor. *See* Cahill, 80 F.3d at 337-38 (citing Nat'l Wildlife Fed'n, 45 F.3d at 1340); *see also* Gitson, 2014 U.S. Dist. LEXIS 33936, 2014 WL 1048640, at *4 ("At the pleading stage I cannot second guess the truth of the plaintiffs' allegations that the identified ingredients function as artificial flavors or chemical preservatives."). The Court finds that Plaintiffs **[**80]** plausibly plead that a reasonable consumer could be misled by advertising products as not containing artificial additives or preservatives where the **[*1148]** products contain ingredients that Plaintiffs allege are additives or preservatives. *See Williams, 552 F.3d at 939* ("We disagree with the district court that reasonable consumers should be expected to look beyond misleading representations on the front of the box to discover the truth from the ingredient list in small print on the side of the box."). Thus, the Court finds Plaintiffs' claims regarding the alleged artificial additives or preservatives survive the instant motion.

The Court now examines the viability of Plaintiffs' "non-GMO"[13] allegations. Plaintiffs allege that Defendant advertises their baking mixes as "non-GMO." *See* FAC ¶¶ 115-18. Including a picture of a product, Plaintiffs claim that Defendant displays "non-GMO" in multiple places on the packaging, and it appears in "nearly every advertisement." *Id.* ¶ 118. Plaintiffs allege that products claiming to be "non-GMO" contain genetically modified ingredients, "including but not limited to soy lecithin, soy protein, and corn starch." *Id.* ¶ 120. Upon information and belief, Plaintiffs claim "these ingredients **[**81]** are synthesized, and Kodiak Cakes utilizes the synthesized form of these substances." *Id.* ¶ 121.

Plaintiffs fail to define a plausible definition, or any definition at all, of the term "non-GMO" or "GMO." *See* Pappas v. Chipotle Mexican Grill, Inc., No. 16-cv-612-MMA (JLB), 2016 U.S. Dist. LEXIS 202524, 2016 WL 11703770, at *7 (S.D. Cal. Aug. 31, 2016) (assessing whether the plaintiff plausibly defined "non-GMO" as a threshold issue before determining whether she pleaded a reasonable consumer would be misled by the defendant's description of its ingredients as non-GMO). The Court is left with only a blanket statement that the three ingredients are genetically modified. *See* FAC ¶ 120. Without a plausible definition or further allegations, the Court cannot assess *how* the at-issue ingredients are plausibly genetically modified or how a reasonable consumer would be misled. Thus, the Court finds Plaintiffs' claims regarding "non-GMO" allegations do not survive the instant motion because they lack specificity and plausibility.

In addition, Plaintiffs compound this lack of specificity by alleging on information and belief that the ingredients are "synthesized" and that Defendant uses "synthesized form of these substances." *Id.* ¶ 121. Plaintiffs fail to allege how this "synthesized" **[**82]** allegation connects to their "non-GMO" claim. ***HN34***[] Further, "allegations of fraud

---

[13] "GMO" is an acronym for "genetically modified organism." *See* FAC ¶ 109.

upon information and belief typically do not satisfy Rule 9(b)'s heightened pleading requirements." Tortilla Factory, LLC v. Health-Ade LLC, No. CV 17-9090-MWF (AFMx), 2018 U.S. Dist. LEXIS 157538, 2018 WL 6174708, at *8 (C.D. Cal. July 13, 2018); *see also* Shane v. Fla. Bottling, Inc., No. CV 17-02197 SJO (AGRx), 2017 U.S. Dist. LEXIS 141069, 2017 WL 8240786, at *3 (C.D. Cal. Aug. 9, 2017) (noting exceptions where (1) the facts are within the possession and control of the defendant or (2) the belief is based on factual information making the inference "culpably plausible"). Here, Plaintiffs do not allege or argue that this information is within the control of Defendant, the information is based on sufficient underlying information, or that they do not have the access or means to test their belief. *See* Tortilla Factory, LLC, 2018 U.S. Dist. LEXIS 157538, 2018 WL 6174708, at *8.

Finally, Plaintiffs appear to allege an open-ended list of potential substances that could be "non-GMO." *See* FAC ¶ 120 (alleging that the list of genetically modified ingredients "*includ[es] but [is] not limited to* soy lecithin, soy protein, and corn starch" (emphasis added)). As with **[*1149]** their "no preservatives" and "free of artificial additives" claims regarding "potentially other[]" ingredients, Plaintiffs do not state a claim for unalleged substances that serve as the basis for their "non-GMO" claim. **[**83]**

Accordingly, the Court **GRANTS in part and DENIES in part** Defendant's motion to dismiss Plaintiffs' CLRA, FAL, and the fraudulent prong of the UCL causes of action premised on consumer deception through advertising that contained the statements "no preservatives," "free of artificial additives," and "non-GMO." The Court **GRANTS** Defendant's motion and **DISMISSES** with leave to amend Plaintiffs' theory as it pertains to their "non-GMO" claim and any unspecified ingredients that form the basis of the three statements. The Court **DENIES** the motion as to Plaintiffs'"no preservatives" and "free of artificial additives" claim.

2. Health Claims

Plaintiffs allege that Defendant misleadingly labels and advertises its products as "healthy." *See* FAC ¶¶ 10, 63, 132-48; *see also id.* Exh. A (providing the "Per-Product Misrepresentation Chart"). Defendant argues that Plaintiffs take issue with a word on their website and blog that was never used on their boxes, and Defendant critiques Plaintiffs for not alleging that they saw or relied upon the online advertising. *See* Doc. No. 44-1 at 28; *see also* Doc. No. 65 at 21. Defendant further asserts that Plaintiffs confuse the issue by citing inapplicable FDA regulations **[**84]** because Plaintiffs fail to allege Defendant used the word "healthy" on food labels. *See* Doc. No. 44-1 at 28; *see also* Doc. No. 65 at 22. Defendant finally contends that "healthy" is merely nonactionable puffery because the word is used to show superiority to other muffins, and the word needs to be taken in context. *See* Doc. No. 44-1 at 29; *see also* Doc. No. 65 at 21-22. Plaintiffs respond that "healthy" is not puffery given that it suggests a health benefit. *See* Doc. No. 62 at 37. Rebutting Defendant's argument that "healthy" never appeared on the packaging, Plaintiffs argue that "whether the statements that Plaintiffs allege they relied actually existed on the packaging" and whether the word would deceive a reasonable consumer are issues inappropriate on a motion to dismiss. *See id.* at 38. Despite Defendant's argument, Plaintiffs argue that they alleged reliance on the term "healthy." *See id.* (citing FAC ¶¶ 63-64). Finally, Plaintiffs argue that they refer to the FDA regulations to show the benchmark for what "healthy" means to a reasonable consumer, not to show that Defendant violated the regulations. *See id.*

Plaintiffs plausibly allege that the "healthy" statement exists on Defendant's website. **[**85]** *See, e.g.*, FAC ¶¶ 64, 137, 138. Plaintiffs' FAC leaves the Court uncertain whether "healthy" is mentioned on Defendant's physical products. The products subject to judicial notice and incorporation-by-reference do not appear to bear the word "healthy." Plaintiffs noticeably do not argue that the word appeared on the product's packaging. *See* Doc. No. 62 at 38. ***HN35***[] A court does not accept as true allegations contradicted by documents attached to or referred to in the complaint, matters subject to judicial notice, "unwarranted deductions of fact, or unreasonable inferences." Seven Arts Filmed Ent. Ltd. v. Content Media Corp. PLC, 733 F.3d 1251, 1254 (9th Cir. 2013) (quoting Daniels-Hall, 629 F.3d at 998); Steckman, 143 F.3d at 1295-96 (citing In re Stac Elecs. Sec. Litig., 89 F.3d at 1403). The Court declines Plaintiffs' invitation to make the unreasonable inference or deduction that "healthy" appeared on the product packaging given their own allegations in addition to the materials subject to judicial notice and incorporation-by-reference. However, the **[*1150]** Court finds that this issue is not dispositive.

Examining the FAC in the light most favorable to Plaintiffs, only Plaintiff Stewart plausibly pleads actual reliance on the alleged "healthy" statement for the Double Dark Chocolate Muffin Mix as advertised on Defendant's online store. *See supra* Section IV.B.1.iii; *see also* FAC ¶¶ 16-17, **[**86]** 64, 137. In addition to in-store purchases, he alleges that he purchased products online, and he alleges that one of his purchases included "Double Dark Chocolate Muffin Mix." FAC ¶ 17. Plaintiffs supply a screenshot describing Defendant's Double Dark Chocolate Muffin Mix from the online store, which reads as follows:

> Kodiak Cakes Double Dark Chocolate Muffin Mix balances nutrition with the rich flavor of cocoa and semisweet chocolate chips. The easy-to-prepare muffin mix creates a moist, delicious, and *healthy* muffin you'll be glad you baked after you finish a tough workout or busy morning at the office. Crafted from all-natural ingredients and 100% whole grains, each protein-packed muffin is a nourishing treat you can feel good about indulging in.

See id. (emphasis added); *see also id.* ¶ 137. Thus, Stewart plausibly alleges that he relied upon Defendant's online advertising.[14] *See supra* Section IV.B.1.iii. Whether Stewart did indeed rely upon Defendant's online advertising is not an appropriate inquiry at this stage. The Court now turns to whether a reasonable consumer would be deceived by Defendant's use of "healthy" based on (1) the online description of Defendant's Double Dark Chocolate **[**87]** Muffin Mix and (2) a blog post.

Plaintiffs provide an alleged method to measure healthiness and compare it to Defendant's products. Plaintiffs claim that they interpret "healthy" as foods containing low levels of fat, cholesterol, and sugar and containing a certain level of vitamins and nutrients. *See* FAC ¶ 139. Plaintiffs rely upon a FDA regulation to set a benchmark for what consumers consider "healthy": "(1) At least 10% of the DV of Vitamin A, Vitamin C, calcium, iron, protein or fiber (2) Less than 60mg of cholesterol, (3) Less than 3 grams of fat[,] and (4) Less than 1 gram of saturated fat." *Id.* ¶ 140 (citing *21 C.F.R. § 101.65(d)(2)*). Plaintiffs further allege that Defendant's products do not meet these standards and are unhealthy because the products

> actually contain unhealthy levels of (1) fat and saturated fat, the consumption of which has been shown to cause heart disease and other serious health problems, (2) cholesterol, which has been shown to increase the risk of heart attack, stroke, and narrowed arteries (atherosclerosis), among other serious health problems; (3) contains high levels of sugar that can lead to heart disease, type 2 diabetes, and cancer, among other serious health conditions **[**88]** and (4) fails to meet at least 10% of the DV of Vitamin A, Vitamin C, calcium, iron, protein or fiber.

Id. ¶ 141. Defendant does not challenge the sufficiency of these allegations, arguing instead that the FDA regulation does not apply and "healthy" is puffery. *See* Doc. No. 44-1 at 28.

"[T]he questions of reliance and how the term healthy will be understood is a question of fact 'ill-suited for resolution on a motion to dismiss.'" *Hadley v. Kellogg Sales Co., 273 F. Supp. 3d 1052, 1084 (N.D.* ***[*1151]*** *Cal. 2017)* (quoting *Bruton, 2014 U.S. Dist. LEXIS 5493, 2014 WL 172111, at *11)*. "***HN36***[] The fact that the FDA regulates the use of the term 'healthy' implies that 'consumers rely on health-related claims on food products in making purchasing decisions.'" *Id.* (quoting *Bruton, 2014 U.S. Dist. LEXIS 5493, 2014 WL 172111, at *11)*. Defendant's desire for the Court to examine the context of its main selling point of "100% whole grains" and the added protein to its products is unavailing at this stage of the litigation. Many of the descriptors of the muffin mix could be considered general, vague, unspecified assertions. *Compare* FAC ¶ 64 (referring to the muffin mix as "rich flavor," "moist," and "delicious"), *with* *Hadley, 273 F. Supp. 3d at 1081* (quoting *Glen Holly Ent., Inc. v. Tektronix Inc., 343 F.3d 1000, 1015 (9th Cir. 2003))* ("'Generalized, vague, and unspecified assertions constitute "mere puffery" upon which a reasonable consumer could not rely,' and thus are not actionable under the UCL, FAL, **[**89]** or CLRA."). However, at this stage, Defendant cannot shield an actionable health-related claim by mixing it with nonactionable puffing language. The Double Dark Chocolate Muffin Mix states that it "creates . . . a healthy muffin." *See* FAC ¶¶ 64, 137. Although the context may suggest that a reasonable consumer may not be deceived, the Court finds that Plaintiffs'

---

[14] Except for Plaintiff Stewart and for the reasons noted above regarding the lack of actual reliance, Plaintiffs do not plausibly allege their "healthy" theory of liability. *See supra* Section IV.B.1.iii.

"healthy" allegations cannot completely be dismissed as a matter of law in the instant motion to dismiss as to the Double Dark Chocolate Muffin Mix. *See Hadley, 273 F. Supp. 3d at 1085* ("[T]he Court finds that the statements 'Start with a healthy spoonful,' 'Invest in your Health invest in yourself,' 'good for you,' and 'balanced breakfast' cannot be dismissed as puffery in the instant motion to dismiss."); *Bruton, 2014 U.S. Dist. LEXIS 5493, 2014 WL 172111, at *11* (finding that "As Healthy As Fresh," "Support Healthy Growth & Development," and "Nutrition for Healthy Growth & Natural Immune Support" were not puffery and plausibly pleaded to survive a motion to dismiss).

However, Plaintiffs have not sufficiently pleaded a plausible claim that a reasonable consumer would be misled by the "Healthy Living on a Budget" blog post. *See* FAC ¶ 138. As an initial matter and as already mentioned, all Plaintiffs fail to plausibly **[**90]** allege actual reliance on the statements found on Defendant's other advertising. *See supra* Section IV.B.1.iii. This includes Plaintiff Stewart who does not allege plausible facts showing that he relied on Defendant's "other advertising"—with the exception of the Double Dark Chocolate Muffin Mix from the online store. *See supra* Section IV.B.1.iii. Furthermore, the blog post is nonactionable puffery. Plaintiffs supply a tightly cropped series of two screenshots: the title of the post and a small paragraph. *See id.* The paragraph states the general difficulty of deciding "back to school breakfast ideas" and ends with stating "[b]ut now that the kids are back in school, it's even more important to have a *healthy* breakfast every morning." *Id.* (emphasis added). It appears that Plaintiffs attempt to use this blog post to allege that all of Defendant's products are deceptively marketed. This theory of liability is unavailing because there is no deceptive act to be dispelled. *See Ebner, 838 F.3d at 966*. The paragraph merely provides generalizations of breakfast and does not mention Defendant's products. The paragraph "do[es] not describe 'specific or absolute characteristics' *of the product*, but rather involve[s] **[**91]** 'generalized, vague, and unspecified assertions.'" *Hadley, 273 F. Supp. 3d at 1088* (emphasis added) (quoting *Annunziato, 402 F. Supp. 2d at 1139*). The blog post excerpt does not plausibly imply that Defendant's products are healthy. Thus, the Court finds that the blog post is merely nonactionable puffery **[*1152]** and Plaintiffs fail to allege how a reasonable consumer would be deceived.

Accordingly, the Court **GRANTS in part and DENIES in part** Defendant's motion to dismiss Plaintiffs' CLRA, FAL, and the fraudulent UCL prong causes of action premised on consumer deception through advertising that contained the statement "healthy." The Court **GRANTS** Defendant's motion and **DISMISSES** Plaintiffs' theory as it pertains to Defendant's general comments on the importance of breakfast on its blog post. Dismissal is with leave to amend to the extent Plaintiffs can show that the blog post shows a direct connection that implies Defendant's products are healthy and goes beyond mere generalizations on health and breakfast. The Court **DENIES** the motion as to the description of Defendant's Double Dark Chocolate Muffin Mix.

3. Nutrient Claims

Plaintiffs allege that Defendant misleadingly labels and advertises its products as "protein-packed." *See* FAC ¶¶ 10, 63, 127-31; *see also* ***[**92]*** *id.* Exh. A (providing the "Per-Product Misrepresentation Chart"). Defendant argues that Plaintiffs' protein allegations are implausible because the front of the box states the grams of protein in large bold font and the nutrition facts panel on the back also states the grams of protein. *See* Doc. No. 44-1 at 26-27; *see also* Doc. No. 65 at 20. Defendant further asserts that "protein-packed" is nonactionable puffery and is not equivalent to the FDA-regulated terms of "high" or "excellent." *See* Doc. No. 44-1 at 27; *see also* Doc. No. 65 at 20-21. Plaintiffs respond that Defendant incorrectly assumes that the products did represent the number of grams of protein on the front of the box. *See* Doc. No. 62 at 36. Plaintiffs also argue that "protein-packed" does not fall under nonactionable puffery "given that this phrase asserts a health benefit of high protein." *Id.* at 37. Finally, Plaintiffs ague that Defendant misconstrues their reliance on FDA-regulated terms of "high" or "excellent." *See id.* Plaintiffs explain that a reasonable consumer believes protein-packed "means that the products are high in protein (> 10 grams per serving)," which is confirmed by the FDA benchmark. *Id.*

HN37[] The Ninth Circuit has **[**93]** stated that "*Williams* stands for the proposition that *if* the defendant commits an act of deception, the presence of fine print revealing the truth is insufficient to dispel that deception." *Ebner, 838 F.3d at 966* (citing *Williams, 552 F.3d at 939*). Here, the Court finds no deceptive act to be dispelled. *See id.*

In their FAC, Plaintiffs attach numerous pictures of Defendant's products. *See* FAC ¶¶ 7, 13, 86, 118, 127. Each of these pictures show in large, bold typeface the words "protein-packed" on the front of the box. *See id.* However, each of these pictures also clearly show the number of grams of protein in roughly the same large, bold typeface on the front of the box. *See id.* Although Plaintiffs argue that this does not mean the packaging was the same for all products throughout the class period, Plaintiffs do not cite to one example where the statement "protein-packed" was not also accompanied by the number of grams of protein in bold lettering on the front of the box. ***HN38***[] As noted above, the Court does not accept as true allegations contradicted by documents attached to or referred to in the complaint, matters subject to judicial notice, "unwarranted deductions of fact, or unreasonable inferences." *Seven Arts Filmed Ent. Ltd., 733 F.3d at 1254* (quoting *Daniels-Hall, 629 F.3d at 998*); *Steckman v. Hart Brewing, Inc., 143 F.3d at 1295-96* (citing *In re Stac Elecs. Sec. Litig., 89 F.3d at 1403*). The Court **[**94]** declines Plaintiffs' invitation to accept unreasonable **[*1153]** inferences or deductions of fact in the face of the contradictory packaging pictured in their own FAC in addition to the materials subject to judicial notice and incorporation-by-reference.

Thus, the Court finds that a reasonable person would not find Defendant's use of "protein-packed" to be misleading. *Cf. Hadley, 243 F. Supp. 3d at 1101* (dismissing the plaintiff's unlawful prong UCL cause of action with prejudice where "the information concerning the amount of protein originating from milk and cereal is located directly below the allegedly misleading statement"). Even if a consumer were still uncertain on the meaning of "protein-packed" after seeing the grams of protein listed clearly on the front of the box, a reasonable consumer would be aware of the nutrition facts label on the back or side of the box as a means to clarify any uncertainty.

Accordingly, the Court **GRANTS** Defendant's motion and **DISMISSES** Plaintiffs' CLRA, FAL, and the fraudulent prong of the UCL causes of action premised on consumer deception through packaging and advertising that contained the statement "protein-packed." Dismissal is with leave to amend to the extent Plaintiffs can overcome **[**95]** the contradictory packaging pictured in their own FAC in addition to the materials subject to judicial notice and incorporation-by-reference.

4. Conclusion

Accordingly, for the reasons provided above, Court **GRANTS in part and DENIES in part** Defendant's motion to dismiss Plaintiffs' CLRA, FAL, and the fraudulent prong of the UCL causes of action premised on deceptive marketing statements.

8 v. Remaining UCL Prongs

In its motion, Defendant does not directly challenge the remaining unlawful and unfair UCL prongs and instead focuses on the fraudulent UCL prong regarding consumer deception. Defendant appears to conflate Plaintiffs' two sub-theories regarding their deceptive fill level allegations. As noted above, the analysis for these theories is distinct. *See supra* Section IV.B.1.iv.a. The Court now turns to whether Plaintiffs plead a viable claim under the unfair and unlawful prongs of the UCL.

a. Unlawful Prong

HN39[] The unlawful prong "is essentially an incorporation-by-reference provision." *Obesity Research Inst., LLC v. Fiber Research Int'l, LLC, 165 F. Supp. 3d 937, 952 (S.D. Cal. 2016)*; *see also* *Cel-Tech Commc'ns, Inc., 973 P.2d at 539-40* ("By proscribing 'any unlawful' business practice, '*section 17200* "borrows" violations of other laws and treats them as unlawful practices' that the unfair competition law makes independently actionable."). **[**96]** Accordingly, "[w]hen a statutory claim fails, a derivative UCL claim also fails." *Obesity Research Inst., LLC, 165 F. Supp. 3d at 953* (quoting *Aleksick v. 7-Eleven, Inc., 205 Cal. App. 4th 1176, 140 Cal. Rptr. 3d 796, 801 (Ct. App. 2012))*.

Here, Plaintiffs can succeed on this prong only if they plead sufficient facts to support another cause of action. *See* *Aleksick, 140 Cal. Rptr. 3d at 801*. Because Plaintiffs have pleaded sufficient facts to bolster their FAL, CLRA, and fraudulent UCL prong causes of action at least to parts of Plaintiffs' theories, *see supra* Section IV.B.1.iv.a—b, their unlawful UCL prong claim survives Defendant's motion to dismiss. *See* *Loomis, 420 F. Supp. 3d at 1085*; *Safransky, 2018 U.S. Dist. LEXIS 60946, 2018 WL 1726620, at *13*.

In addition, Plaintiffs allege a violation of the unlawful prong because of deceptive fill level, which is predicated on the California Fair Packaging and Labeling **[*1154]** Act ("CFPLA"), *Cal. Bus. & Prof. Code § 12606.2*, and federal regulation, *21 C.F.R. § 100.100*. *See* FAC ¶ 196. As noted above, this theory is distinct from Plaintiffs' deceptive fill level allegations predicated on consumer deception under the CLRA, FAL, and the fraudulent UCL prong. *See supra* Section IV.B.1.iv.a.

HN40[] The CFPLA states that food containers cannot be "made, formed, or filled as to be misleading." *Cal. Bus. & Prof. Code § 12606.2(b)*. The statute further provides the following:

> A container that does not allow the consumer to fully view its contents shall be considered to be filled as to be misleading if it contains nonfunctional **[**97]** slack fill. Slack fill is the difference between the actual capacity of a container and the volume of product contained therein. Nonfunctional slack fill is the empty space in a package that is filled to substantially less than its capacity for reasons other than any one or more of the following [safe harbor provisions] . . . .

Cal. Bus. & Prof. Code § 12606.2(c). District courts in California are split as to whether the safe harbor provisions are affirmative defenses or "or whether their inapplicability is an element that must be pled." *Jackson, 2019 U.S. Dist. LEXIS 162447, 2019 WL 4599845, at *6*; *see also* *Matic v. United States Nutrition, Inc., No. CV 18-9592 PSG (AFMx), 2019 U.S. Dist. LEXIS 131576, 2019 WL 3084335, at *6 (C.D. Cal. Mar. 27, 2019)* (detailing examples of the split).

Here, the Court does not need to resolve this split because Plaintiffs sufficiently plead that the safe harbor provisions do not apply. *See* FAC ¶¶ 83-86. Plaintiffs claim less than half of the opaque cardboard packaging is full and thus misrepresents the amount contained within each product. *See id.* ¶¶ 7, 83, 85; *id.*, Exh. A (providing the "Per-Product Misrepresentation Chart"). Plaintiffs aver that none of the functional purposes in the state or federal safe harbor provisions apply because the products "are in a powdered form that do not need slack fill to protect the contents"; "slack fill **[**98]** is not required by the machines to enclose the contents of the product"; "slack fill is not the unavoidable product settling during shipping and handling as it is much too large"; "[t]he oversized package container is not required to provide adequate space for mandatory and necessary labeling by law"; "[t]he box is not needed to prevent theft or accommodate tampering resistant devices"; and "[c]onsumers do not mix, add, shake or dispense liquids into the Slack Fill Products at issue such that slack fill is necessary." *Id.* ¶ 84. Plaintiffs highlight that Defendant's other products reveal the lack of a functional purpose because "[i]n the same size box, Kodiak sells as much as 24 ounces and as little as 12.7 ounces, with no plausible explanation for the difference in the amounts while maintaining the same size box." *Id.* ¶ 85. Plaintiffs further aver that Defendant's competitors that use similar size boxes contain significantly more product. *See id.* ¶ 86. Defendant does not argue that the empty space serves a particular function.

The Court finds that Plaintiffs allege a plausible claim under the CFPLA, which can serve as a predicate violation under the unlawful UCL prong. *See* *Matic, 2019 U.S. Dist. LEXIS 131576, 2019 WL 3084335, at *6* ("The Court **[**99]** believes that the reasonable inferences that can be drawn from these are enough to render it at least plausible that each of the other safe harbor provisions do not apply."); *see also* *Kennard, 2019 U.S. Dist. LEXIS 63637, 2019 WL 1586022, at *9* (denying the defendant's motion to dismiss plaintiff's unlawful and unfair UCL prongs predicated on the nonfunctional slack fill liability theory).

However, Defendant argues Plaintiffs cannot claim they were deceived because they allege they made online purchases **[*1155]** and there is no nonfunctional slack fill where "[t]he mode of commerce does not allow the consumer to view or handle the physical container or product." Doc. No. 44-1 at 23 (quoting *Cal. Bus. & Prof. Code § 12606.2(c)(8)*). Plaintiffs respond that federal law does not have a similar provision regarding "mode of commerce" and their UCL claim premised on violation of 21 C.F.R. § 100.100 remains viable even if their § 12606.2 predicate violation is not viable. *See* Doc. No. 62 at 33.

As a preliminary matter, Defendant's argument does not completely foreclose Plaintiffs' nonfunctional slack fill theory because some Plaintiffs allege that they purchased products in stores and online and other Plaintiffs allege that they only purchased products in stores. *See* FAC ¶¶ 17, 19, 21, 23, 27, 29, 31, 35, 37, 39, 49, 61. Thus, **[**100]** to the extent Plaintiffs allege they purchased products in stores, Plaintiffs overcome Defendant's motion to dismiss.

HN41[] As to Plaintiffs' online purchases, the CFPLA provides that there is no nonfunctional slack fill where "[t]he mode of commerce does not allow the consumer to view or handle the physical container or product." Cal. Bus. & Prof. Code § 12606.2(c)(8). "The CFPLA itself provides that it is to be interpreted consistently with federal law." Jackson, 2019 U.S. Dist. LEXIS 162447, 2019 WL 4599845, at *6; *see also* Cal. Bus. & Prof. Code § 12606.2(e). The CFPLA also states the following:

> If the requirements of this section do not impose the same requirements as are imposed by Section 403(d) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. Sec. 343(d)), or any regulation promulgated pursuant thereto, then this section is not operative to the extent that it is not identical to the federal requirements, and for this purpose those federal requirements are incorporated into this section and shall apply as if they were set forth in this section.

Cal. Bus. & Prof. Code § 12606.2(f).

HN42[] The plain language of § 12606.2(c)(8) prevents online purchases from falling under nonfunctional slack fill because online shopping does not allow a consumer to be in contact with the "*physical* container or product." Cal. Bus. & Prof. Code § 12606.2(c)(8) (emphasis added). However, 21 U.S.C. § 343(d) and federal regulation 21 C.F.R. § 100.100 do not contain the "mode of commerce" requirement **[**101]** found in Cal. Bus. & Prof. Code § 12606.2(c)(8). Thus, by the terms of § 12606.2(f), the mode of commerce requirement is "not operative." *See* Cal. Bus. & Prof. Code § 12606.2(f). Therefore, despite Defendant's argument, Plaintiffs also survive Defendant's motion to the extent they allege they purchased products online.

In sum, the Court finds that Plaintiffs plead a plausible predicate violation based on their viable FAL, CLRA, and fraudulent UCL prong causes of action. Plaintiffs also plead a plausible predicate violation based upon violation of the CFPLA. Accordingly, the Court **DENIES** Defendant's motion to dismiss Plaintiffs' unlawful UCL prong claim.

b. Unfair Prong

HN43[] As to the unfair prong, the California Supreme Court has defined "unfair" conduct in competitor cases to mean "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law, or otherwise significantly threatens or harms competition." Cel-Tech Commc'ns, Inc., 973 P.2d at 544; *see also* Drum v. San Fernando Valley Bar Ass'n, 182 Cal. App. 4th 247, 106 Cal. Rptr. 3d 46, 51 (Ct. App. 2010). However, the California Supreme Court has not established a test to determine whether a business practice is unfair in consum **[*1156]** er cases. Drum, 106 Cal. Rptr. 3d at 53; *see also* Lozano v. AT & T Wireless Servs., Inc., 504 F.3d 718, 736 (9th Cir. 2007); Cel-Tech Commc'ns, Inc., 973 P.2d at 544 n.12 (noting that the test does not relate to consumer actions).

HN44[] After the California **[**102]** Supreme Court's decision in *Cel-Tech Commc'ns, Inc.*, the California Courts of Appeal have created a split of authority through applying "three different tests for unfairness in consumer cases." Drum, 106 Cal. Rptr. 3d at 53. The first test requires "that the public policy which is a predicate to a consumer unfair competition action under the 'unfair' prong of the UCL must be tethered to specific constitutional, statutory, or regulatory provisions." *Id.* (first quoting Bardin v. DaimlerChrysler Corp., 136 Cal. App. 4th 1255, 39 Cal. Rptr. 3d 634, 636 (Ct. App. 2006); then quoting Davis v. Ford Motor Credit Co. LLC, 179 Cal. App. 4th 581, 101 Cal. Rptr. 3d 697, 708 (Ct. App. 2009); and then quoting Gregory v. Albertson's, Inc., 104 Cal. App. 4th 845, 128 Cal. Rptr. 2d

389, 395 (Ct. App. 2002)); *see also* Cel-Tech Commc'ns, Inc., 973 P.2d at 544 (requiring a finding of unfairness under the UCL be tethered to legislatively declared policy). The second test asks "whether the alleged business practice 'is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers and requires the court to weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim.'" *Id.* (first quoting Bardin, 39 Cal. Rptr. 3d at 636; and then quoting Davis, 101 Cal. Rptr. 3d at 708). The third test draws on the "unfair" definition in the Federal Trade Commission Act and requires that "(1) the consumer injury must be substantial; (2) the injury must not be outweighed by any countervailing benefits to consumers or competition; and (3) it must be an injury that consumers themselves **[**103]** could not reasonably have avoided." Id. at 54 (first quoting Davis, 101 Cal. Rptr. 3d at 710; and then quoting Camacho v. Auto. Club of S. California, 142 Cal. App. 4th 1394, 48 Cal. Rptr. 3d 770, 777 (Ct. App. 2006)).

Regardless of the test used to assess unfairness, the Court finds that Plaintiffs' allegations survive the motion to dismiss. Here, Plaintiffs sufficiently plead that Defendant violated the FAL, CLRA, fraudulent UCL prong, and unlawful UCL prong. *See supra* Section IV.B.1.iv; Section IV.B.1.v.a. Plaintiffs plausibly allege that a reasonable consumer would be deceived and that Defendant uses misleading packaging because of nonfunctional slack fill. *See* Section IV.B.1.iv.a; Section IV.B.1.v.a. Construing Plaintiffs' allegations in the light most favorable to them, these plausible allegations outweigh the utility of Defendant's current packaging or the burden that would be placed on Defendant to change its marketing. Additionally, Defendant does not directly address this prong. Accordingly, the Court **DENIES** Defendant's motion to dismiss Plaintiffs' unfair UCL prong claim.

c. Conclusion

Plaintiffs have pleaded sufficient facts to survive Defendant's motion to dismiss the unfair and unlawful UCL prongs. Accordingly, the Court **DENIES** Defendant's motion to dismiss Plaintiffs' unfair and unlawful UCL prong claims.

2. Breach [104] of Express Warranty Cause of Action**

Defendant criticizes Plaintiffs for failing to identify the applicable state law. *See* Doc. No. 44-1 at 20, 34; *see also* Doc. No. 65 at 9. Defendant further argues that Plaintiffs' warranty claim fails for the same reasons as their other claims. *See* **[*1157]** Doc. No. 44-1 at 34. Defendant adds that it is unclear whether Defendant created a warranty and Plaintiffs do not identify an explicit guarantee. *See id.* at 34-35; *see also* Doc. No. 65 at 24. Finally, Defendant asserts that Plaintiffs did not provide notice of the warranty issue. *See* Doc. No. 44-1 at 35. Plaintiffs respond they seek to recover under the laws of each state. *See* Doc. No. 62 at 25. Plaintiffs further argue that Defendant offers no reason that the marketing claims did not become part of the bargain. *See id.* at 41. Plaintiffs also argue that they issued pre-lawsuit notices and that "[n]o notice is required when claims are against a defendant in its capacity as a manufacturer, not a seller." *See id.* at 42 (citing Rosales v. FitFlop USA, LLC, 882 F. Supp. 2d 1168, 1178 (S.D. Cal. 2012)).

Plaintiffs allege their breach of express warranty claim on behalf of the nationwide class. *See* FAC ¶¶ 211-16. In their opposition brief, Plaintiffs elaborate that they "seek to recover under the laws of their 11 **[**105]** respective home states as well as seek[] redress on behalf of a nationwide class under state laws that are substantially similar." *See* Doc. No. 62 at 25. Although Plaintiffs argue in their opposition motion that they bring their warranty cause of action under laws of each individual state, *see* Doc. No. 62 at 25, they do not clearly allege the state laws that they seek to apply. Undercutting their own position, Plaintiffs list the separate laws in their first cause of action for violation of the consumer protection acts throughout the nation. *See* FAC ¶¶ 163 n.41, 166. The list appears to refer to consumer protection laws distinct from warranty laws, and Plaintiffs fail to provide similar applicable law as to their warranty claim. *Compare id.* ¶¶ 163 n.41, 166 (listing state slack-fill and consumer protection laws), *with id.* ¶¶ 211-216 (not listing a reference to an applicable state's law for breach of warranty).

HN45[] Plaintiffs must allege the applicable law to determine whether they plead a sufficient claim. *See* Augustine v. Talking Rain Beverage Co., Inc., 386 F. Supp. 3d 1317, 1333 (S.D. Cal. 2019) (dismissing under Rule 12(b)(6) the plaintiff's common law claims on behalf of a nationwide class because they failed to allege the applicable law). "Even if the basic elements of . . . breach **[**106]** of express warranties . . . are unlikely to differ much from state to state, 'there may be (and likely are) differences from state to state regarding issues such as applicable statute of limitations and various equitable defenses.'" *Id.* (quoting *In re TFT-LCD (Flat Panel) Antitrust Litig., 781 F. Supp. 2d 955, 966 (N.D. Cal. 2011))* (citing *In re Samsung Galaxy Smartphone Mktg. & Sales Practices Litig., No. 16-cv-06391-BLF, 2018 U.S. Dist. LEXIS 54850, 2018 WL 1576457, at *4 (N.D. Cal. Mar. 30, 2018))*. Plaintiffs cannot remedy the pleading defect through argument in their opposition brief. Plaintiffs fail to identify which state laws govern their breach of express warranty cause of action and, thus, fail to adequately plead their claims brought on behalf of the nationwide class. *See id.*; *In re Samsung Galaxy Smartphone Mktg. & Sales Practices Litig., 2018 U.S. Dist. LEXIS 54850, 2018 WL 1576457, at *4* (citing *In re Nexus 6P Prod. Liab. Litig., 293 F. Supp. 3d at 933*) ("[D]ue to variances among state laws, failure to allege which state law governs a common law claim is grounds for dismissal.").

Additionally, as with Plaintiffs' first cause of action, any separate state law claims should not be lumped together into one cause of action. *See supra* Section IV.B.1.i. Further, as already noted, the Court has dismissed the causes of action under laws of the states where named Plaintiffs do not reside or did not purchase **[*1158]** the at-issue products based on lack of Article III **[**107]** standing. *See supra* Section III.B.1.

Given the FAC's defects, the Court declines to address the parties' arguments as to whether Plaintiffs plead a viable breach of express warranty claim under California law. *See* *Augustine, 386 F. Supp. 3d at 1333* (not analyzing whether the California plaintiffs state a viable warranty claim under California law after finding they needed to allege the applicable law). Accordingly, the Court **GRANTS** Defendant's motion and **DISMISSES** Plaintiffs' breach of express warranty cause of action with leave to amend. If Plaintiffs wish to file a second amended complaint, the Court directs Plaintiffs to identify the applicable state laws and separate their allegations of various state law violations into separate causes of action.

3. "Restitution Based on Quasi-Contract and Unjust Enrichment" Cause of Action

Defendant asserts that a claim for "restitution based on quasi-contract and unjust enrichment" does not exist because restitution is only a remedy. *See* Doc. No. 44-1 at 35-36; Doc. No. 65 at 25. Similar to the warranty claim, Defendant argues that Plaintiffs fail to allege which law applies. *See* Doc. No. 44-1 at 20, 36; Doc. No. 65 at 9. Further, Defendant contends that a claim based on quasi-contract **[**108]** cannot stand where there is an express contract, such as Plaintiffs' direct purchases. *See* Doc. No. 44-1 at 36; Doc. No. 65 at 25. Finally, Defendant argues Plaintiffs cannot allege unjust enrichment because they purchased the products for years. *See* Doc. No. 44-1 at 36. Plaintiffs respond that restitution and unjust enrichment are viable causes of action. *See* Doc. No. 62 at 42.

Plaintiffs allege their "restitution based on quasi-contract and unjust enrichment" claim on behalf of the nationwide class. *See* FAC ¶¶ 217-22. As with their warranty claim, Plaintiffs do not clearly allege the state law that they seek to apply. Thus, Plaintiffs' claim fails for the same reasons as its warranty claim. *See supra* Section IV.B.2; *see also* *In re Samsung Galaxy Smartphone Mktg. & Sales Practices Litig., 2018 U.S. Dist. LEXIS 54850, 2018 WL 1576457* (dismissing the plaintiffs' unjust enrichment claim because it did not specify the applicable law because of potential differences between how states treat the claim), *2018 U.S. Dist. LEXIS 54850, [WL] at *4* (same); *In re Nexus 6P Prod. Liab. Litig., 293 F. Supp. 3d at 933* (same); *In re TFT-LCD (Flat Panel) Antitrust Litig., 781 F. Supp. 2d at 966* (same).

The Court now turns to separately address this claim to the extent Plaintiffs bring it under California law. ***HN46***[] "[I]n California, there is not a standalone cause of action for 'unjust enrichment,' which is synonymous **[**109]** with 'restitution.'" *Astiana v. Hain Celestial Grp., Inc., 783 F.3d 753, 762 (9th Cir. 2015)* (first citing *Durell v. Sharp Healthcare, 183 Cal. App. 4th 1350, 108 Cal. Rptr. 3d 682, 699 (Ct. App. 2010)*; and then citing *Jogani v. Superior Ct., 165 Cal. App. 4th 901, 81 Cal. Rptr. 3d 503, 511 (Ct. App. 2008))*; *see also* *Paracor Fin., Inc. v. Gen. Elec. Cap. Corp., 96 F.3d 1151, 1167 (9th Cir. 1996)* ("Under both California and New York law, unjust enrichment is an action in quasi-contract, which does not lie when an enforceable, binding agreement exists defining the rights of the parties."). "When a plaintiff alleges unjust enrichment, a court may 'construe the cause of action as a quasi-contract claim seeking restitution.'" Astiana, 783 F.3d at 762 (quoting Rutherford Holdings, LLC v. Plaza Del Rey, 223 Cal. App. 4th 221, 166 Cal. Rptr. 3d 864, 872 (Ct. App. 2014)). "[I]t is well settled that an action based on an implied-in-fact or quasi-contract cannot lie where there exists between the parties a valid express contract covering the same subject **[*1159]** matter." *See* O'Connor v. Uber Techs., Inc., No. C-13-3826 EMC, 2013 U.S. Dist. LEXIS 171813, 2013 WL 6354534, at *10 (N.D. Cal. Dec. 5, 2013) (*Lance Camper Mfg. Corp. v. Republic Indem. Co., 44 Cal. App. 4th 194, 51 Cal. Rptr. 2d 622, 628 (Cal App. 1996))*.

Here, Plaintiffs bring claims for breach of an express warranty and quasi-contract. *See* FAC ¶¶ 211-16, 217-22. To the extent Plaintiffs assert a claim under California law, the Court construes this claim as a quasi-contract claim. *See* Astiana, 783 F.3d at 762 (quoting Rutherford Holdings, LLC, 166 Cal. Rptr. 3d at 872). Plaintiffs do not respond to Defendant's argument that a quasi-contract claim cannot stand where there is an express contract. The allegations underlying Plaintiffs' express warranty claim overlap with their quasi-contract claim. *Compare* FAC ¶¶ **[**110]** 211-16, *with id.* ¶¶ 217-22. ***HN47***[] Under California law, "there cannot be a claim based on quasi contract where there exists between the parties a valid express contract covering the same subject matter." Smith v. Allmax Nutrition, Inc., No. 1:15-cv-00744-SAB, 2015 U.S. Dist. LEXIS 171897, 2015 WL 9434768, at *9 (E.D. Cal. Dec. 24, 2015) (citations omitted) (dismissing without leave to amend the plaintiff's unjust enrichment claim where he alleged damages based on a breach of express warranty over the same subject matter); *see also* Keegan v. Am. Honda Motor Co., 838 F. Supp. 2d 929, 949 (C.D. Cal. 2012) (citing A. A. Baxter Corp. v. Colt Indus., Inc., 10 Cal. App. 3d 144, 88 Cal. Rptr. 842, 848 (Ct. App. 1970)) ("An express warranty is a term of the parties' contract."). Therefore, the Court finds that Plaintiffs cannot bring a California quasi-contract claim while bringing an express warranty claim. *See* Roper v. Big Heart Pet Brands, Inc., No. 1:19-cv-00406-DAD-BAM, 510 F. Supp. 3d 903, 2020 U.S. Dist. LEXIS 244786, 2020 WL 7769819, at *15 (E.D. Cal. Dec. 30, 2020) ("Because plaintiff may not assert a quasi-contract claim while also alleging an express warranty claim, the court will grant defendant's motion to dismiss plaintiff's quasi-contract restitution claim."); *see also* Gerstle v. Am. Honda Motor Co., Inc., No. 16-cv-04384-JST, 2017 U.S. Dist. LEXIS 100580, 2017 WL 2797810, at *14 (N.D. Cal. June 28, 2017); Smith, 2015 U.S. Dist. LEXIS 171897, 2015 WL 9434768, at *9.

Accordingly, the Court **GRANTS** Defendant's motion and **DISMISSES** Plaintiffs' "restitution based on quasi-contract and unjust enrichment" cause of action with leave to amend. If Plaintiffs wish to file a second amended complaint, **[**111]** the Court directs Plaintiffs to identify the applicable state laws and separate their allegations of various state law violations into separate causes of action. Additionally, the Court **GRANTS** Defendant's motion and **DISMISSES** Plaintiffs' quasi-contract claim without leave to amend to the extent it is based under California law.

4. Equitable Relief Claims

Defendant separately argues that "Plaintiffs' claims for equitable relief fail on the ground that they do not and cannot plead that they lack an adequate remedy at law." *See* Doc. No. 44-1 at 37; *see also* Doc. No. 65 at 25-26. In doing so, Defendant relies on *Sonner v. Premier Nutrition Corp., 971 F.3d 834, 837 (9th Cir. 2020)*. *See* Doc. No. 44-1 at 37-38. Defendant asserts Plaintiffs' claims rest on overpayments, triggering an adequate monetary remedy at law. Plaintiffs respond they may pursue alternative or different types of relief. *See* Doc. No. 62 at 43 (citing Fed. R. Civ. P. 8(a)(3)). Plaintiffs fail to directly confront Defendant's *Sonner* argument. Rather, in a footnote without citing to support, Plaintiffs argue that *Sonner*'s facts "are inapposite considering the allegations and the posture of the FAC." *See id.* at 43 n.15.

[*1160] As the Court already noted in Defendant's Article III standing challenge, Plaintiffs do show future harm as to **[**112]** the "non-GMO" deceptive marketing statements. *See supra* Section III.B.2. Thus, Plaintiffs have plausibly shown that they lack an adequate remedy at law to at least some degree. The Court finds this finding sufficient to overcome Defendant's *Sonner* challenge at this stage. Additionally, unlike *Sonner*, Plaintiffs are not pursuing equitable remedies to the exclusion of a remedy at law. Accordingly, the Court declines to dismiss Plaintiffs' equitable claims at this time. *Cf.* Roper, 2020 U.S. Dist. LEXIS 244786, 2020 WL 7769819, at *9 (quoting Aerojet Rocketdyne, Inc. v. Glob. Aerospace, Inc., No. 2:17-cv-01515-KJM-AC, 2020 U.S. Dist. LEXIS 121802, 2020 WL 3893395, at *5 (E.D. Cal. July 10, 2020)) ("Although monetary damages may ultimately fully address plaintiff's harm, at this stage of the litigation there is 'an ongoing, prospective nature to [plaintiff's allegations]' given her contention that she and other future purchasers will continue to be misled.").

C. Conclusion

For the foregoing reasons, the Court **GRANTS in part and DENIES in part** Defendant's motion to dismiss brought under *Rule 12(b)(6)*.

V. Motion to Strike

A. Legal Standard

HN48[] A *Rule 12(f)* motion to strike allows a court to "strike from a pleading an insufficient defense or any redundant, immaterial, impertinent, or scandalous matter." *Fed. R. Civ. P. 12(f)*. For the purposes of this rule, "'[i]mmaterial' matter is that **[**113]** which has no essential or important relationship to the claim for relief or the defenses being pleaded." *Fantasy, Inc. v. Fogerty, 984 F.2d 1524, 1527 (9th Cir. 1993)* (quoting 5 Charles A. Wright & Arthur R. Miller, Federal Practice and Procedure § 1382, at 706-07 (1990)), *rev'd on other grounds by Fogerty v. Fantasy, Inc., 510 U.S. 517, 114 S. Ct. 1023, 127 L. Ed. 2d 455 (1994)*; *see also Whittlestone, Inc. v. Handi-Craft Co., 618 F.3d 970, 974 (9th Cir. 2010)*. "'Impertinent' matter consists of statements that do not pertain, and are not necessary, to the issues in question." *Fantasy, Inc., 984 F.2d at 1527* (quoting 5 Charles A. Wright & Arthur R. Miller, at 711); *see also Whittlestone, Inc., 618 F.3d at 974*. "In order to show that a defense is insufficient, 'the moving party must demonstrate that there are no questions of fact, that any questions of law are clear and not in dispute, and that under no set of circumstances could the defense succeed.'" *Diaz v. Alternative Recovery Mgmt., No. 12-cv-1742-MMA (BGS), 2013 U.S. Dist. LEXIS 66520, 2013 WL 1942198, at *1 (S.D. Cal. May 8, 2013)* (quoting *S.E.C. v. Sands, 902 F. Supp. 1149, 1165 (C.D. Cal. 1995))*. The purpose of a *Rule 12(f)* motion is "to avoid the expenditure of time and money that must arise from litigating spurious issues by dispensing with those issues prior to trial." *Sidney-Vinstein v. A.H. Robins Co., 697 F.2d 880, 885 (9th Cir. 1983)*. "Motions to strike are generally disfavored, unless 'it is clear that the matter to be stricken could have no possible bearing on the subject matter of the litigation.'" *Haghayeghi v. Guess?, Inc., No. 14-cv-00020 JAH-NLS, 2015 U.S. Dist. LEXIS 43243, 2015 WL 1345302, at *5 (S.D. Cal. Mar. 24, 2015)* (quoting *LeDuc v. Kentucky Cent. Life Ins. Co., 814 F. Supp. 820, 830 (N.D. Cal. 1992))*; *see also Cairns v. Franklin Mint Co., 24 F. Supp. 2d 1013, 1037 (C.D. Cal. 1998))*. In ruling on a motion to strike, the court may only consider **[**114]** the face of the pleading or matters subject to judicial notice. *See Fantasy, Inc., 984 F.2d at 1528*; *Sands, 902 F. Supp. at 1165*. "With a motion to strike, just as with a motion to dismiss, the court should view the pleading in the light most **[*1161]** favorable to the nonmoving party." *Snap! Mobile, Inc. v. Croghan, No. 18-cv-04686-LHK, 2019 U.S. Dist. LEXIS 28759, 2019 WL 884177, at *3 (N.D. Cal. Feb. 22, 2019)* (quoting *Platte Anchor Bolt, Inc. v. IHI, Inc., 352 F. Supp. 2d 1048, 1057 (N.D. Cal. 2004))*. ***HN49***[] Ultimately, the decision about whether to strike allegations is a matter within the Court's discretion. *California Dep't of Toxic Substances Control v. Alco Pac., Inc., 217 F. Supp. 2d 1028, 1033 (C.D. Cal. 2002)* (citing *Fantasy, Inc., 984 F.2d at 1528*); *see also Whittlestone, Inc., 618 F.3d at 974* (quoting *Nurse v. United States, 226 F.3d 996, 1000 (9th Cir. 2000))*.

B. Discussion

In Defendant's notice of motion, it seeks to strike the following from Plaintiffs' FAC: (1) "[e]very reference to the laws of states in which the named plaintiffs do not reside"; (2) "Plaintiffs' slack-fill theory to the extent it relies on online purchases"; (3) "[a]ny representation or liability theory to the extent the Court finds that it fails"; and (4) "[a]ll requests for equitable relief including injunctive relief and restitution." Doc. No. 44 at 2. However, Defendant fails to argue why or how these allegations should be struck under the *Rule 12(f)* legal standard in their memorandum of points and authorities. It appears that Defendant seeks to strike these allegations under the same arguments underlying its motion to dismiss.

Defendant's motion to strike is an attempt **[**115]** to have certain portions of the FAC dismissed—"actions better suited for a *Rule 12(b)(6)* motion or a *Rule 56* motion, not a *Rule 12(f)* motion." *Whittlestone, Inc., 618 F.3d at 974*. ***HN50***[] Reading *Rule 12(f)* as a means to dismiss some or all of a pleading would create a redundancy within the Federal Rules of Civil Procedure "because a *Rule 12(b)(6)* motion (or a motion for summary judgment at a later stage in the proceedings) already serves such a purpose." *Id.*

Furthermore, the Court finds that the motion to strike does not meet the *Rule 12(f)* standard. First, the four strike requests do not pertain to an insufficient defense. Second, the allegations desired to be stricken are not redundant. Third, the allegations are not immaterial because they amount to Plaintiffs' asserted causes of action. Fourth, the allegations are not impertinent because the allegations desired to be stricken pertain directly to Plaintiffs' asserted claims. Fifth, the at-issue allegations, theories, or causes of action do not appear to be scandalous. Therefore, Defendant fails to satisfy *Rule 12(f)*'s requirements to show that Plaintiffs' allegations or causes of action should be stricken from their FAC.

C. Conclusion

Accordingly, the Court **DENIES** Defendant's motion to strike. *Cf. Howe v. Target Corp., No. 20-cv-252-MMA (DEB), 2020 U.S. Dist. LEXIS 172605, 2020 WL 5630273, at *15-16 (S.D. Cal. Sept. 21, 2020)* (denying the **[**116]** defendant's motion to strike the plaintiff's request for attorneys' fees where the request was improper under *Rule 12(f)* and the defendant did not meet the *Rule 12(f)* standard).

VI. CONCLUSION

For the foregoing reasons, the Court **GRANTS in part and DENIES in part** Defendant's motion to dismiss brought under *Rule 12(b)(1)*, **GRANTS in part and DENIES in part** Defendant's motion to dismiss brought under *Rule 12(b)(6)*, and **DENIES** Defendant's motion to strike brought under *Rule 12(f)*. Plaintiffs must file an amended complaint curing the deficiencies noted herein on or before **May 17, 2021**.

IT IS SO ORDERED.

Back v. GTL

United States District Court for the Northern District of Indiana, South Bend Division

April 29, 2021, Decided; April 29, 2021, Filed

CAUSE NO. 3:19-CV-947-RLM-MGG

Reporter

2021 U.S. Dist. LEXIS 81771 *; 2021 WL 1699531

ANDREW BACK, Plaintiff, v. GTL, Defendant.

Core Terms

video game, charging, alleges, anti trust law, Sherman Act, monopoly, movies, exclusive contract, different price, general public, pro se, Robinson-Patman Act, commodities, prohibits, products, pleaded, futile, immune, prices, seller, amend, music

Counsel: [*1] Andrew Back, Plaintiff, Pro se, Bunker Hill, IN.

Judges: Robert L. Miller, Jr., UNITED STATES DISTRICT JUDGE.

Opinion by: Robert L. Miller, Jr.

Opinion

OPINION AND ORDER

Andrew Back, a prisoner without a lawyer, filed a complaint alleging that defendant GTL's contract with the Indiana Department of Correction violates ***antitrust law***. ECF 2. "A document filed *pro se* is to be liberally construed, and a *pro se* complaint, however inartfully pleaded, must be held to less stringent standards than formal pleadings drafted by lawyers." *Erickson v. Pardus, 551 U.S. 89, 94, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)* (quotation marks and citations omitted). The court must review the merits of a prisoner complaint and dismiss it if the action is frivolous or malicious, fails to state a claim, or seeks monetary relief against a defendant who is immune from such relief.

Mr. Back alleges as follows: GTL has an exclusive contract with the Department of Correction to provide prisoners with tablets that can support music, video games, and movies, among other functions. Prisoners aren't allowed to have any competing video game platforms, such as PlayStation or Xbox. ECF 2 at 2. GTL charges prisoners $8.00 per day to watch movies, $6.00 per month to play video games, and $22.16 per month to stream music. *Id.* Mr. **[*2]** Back says the selection of movies and video games is "pathetic," and the prices are "far more than the general public is charged." *Id.*

Mr. Back alleges that GTL has violated the Sherman Act, *15 U.S.C. § 2*, because its agreement with the Department of Correction prevents prisoners from using other video game systems, and so creates a monopoly for GTL. The Sherman Act prohibits only "individual and not state action," *Parker v. Brown, 317 U.S. 341, 352, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*, and this state antitrust immunity extends to private parties acting pursuant to state policy. *S. Motor Carriers Rate Conf., Inc. v. United States, 471 U.S. 48, 56, 105 S. Ct. 1721, 85 L. Ed. 2d 36 (1985)*.

In other words, a private company can't be sued under the Sherman Act for a "monopoly" that is explicitly arranged by the state.[1] *See, e.g.*, *Byrd v. Goord, No. 00 CIV. 2135 (GBD), 2005 U.S. Dist. LEXIS 18544, 2005 WL 2086321, at *5 (S.D.N.Y. Aug. 29, 2005)* (finding no Sherman Act liability for a telephone provider from its exclusive contract with a state's prisons); *McGuire v. Ameritech Servs., Inc., 253 F. Supp. 2d 988, 1010 (S.D. Ohio 2003)* (same); *see also* *Arsberry v. Illinois, 244 F.3d 558, 566 (7th Cir. 2001)* ("States and other public agencies do not violate the antitrust laws by charging fees or taxes that exploit the monopoly of force that is the definition of government. . . . Nor do the persons with whom the states contract violate the antitrust laws by becoming state concessionaires.").

Mr. Back next alleges that GTL has violated the Robinson-Patman Act by charging inflated prices for digital media. The Robinson-Patman Act **[*3]** prohibits a seller from charging different prices to different purchasers of like "commodities[2]," if it threatens to injure market competition. *15 U.S.C. § 13(a)*; *Department of Correction v. Volvo Trucks N. Am., 869 F.3d 598, 603 (7th Cir. 2017)*.

Mr. Back alleges that GTL is charging "far more money than the general public is charged" and "far more than similar, and far superior products, are charging." But there is no allegation that GTL itself is selling the same product to others for less. That other companies may offer similar products for less doesn't create a Robinson-Patman Act claim against GTL. *See* 2 Callmann on Unfair Comp., Tr. & Mono. § 7:25 (4th Ed.) (for a Robinson-Patman price discrimination claim, the commodity must be sold at different prices by the same seller).

Courts ordinarily give a *pro se* litigant a chance to replead before dismissing the case with prejudice, *Abu-Shawish v. United States, 898 F.3d 726, 738 (7th Cir. 2018)*; *Luevano v. Wal-Mart, 722 F.3d 1014, 1024-1025 (7th Cir. 2013)*, but the court isn't required to grant leave to amend where it would be futile. *Humid v. Aurora Loan Servs., 588 F.3d 420, 432 (7th Cir. 2009)* ("[C]ourts have broad discretion to deny leave to amend where . . . the amendment would be futile."). It doesn't appear that Mr. Back's allegations could support a cognizable claim.

For these reasons, this case is DISMISSED pursuant to *28 U.S.C. § 1915A*, for failure to state a plausible claim for relief.

SO ORDERED on April 29, 2021

/s/ Robert **[*4]** L. Miller, Jr.

JUDGE

UNITED STATES DISTRICT COURT

End of Document

---

[1] This immunity attaches only if the challenged restraint is "clearly articulated and affirmatively expressed as state policy" and "actively supervised" by the state. *California Retail Liquor Dealers Ass'n v. Midcal Aluminum, Inc., 445 U.S. 97, 105, 100 S. Ct. 937, 63 L. Ed. 2d 233 (1980)* (quoting *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 410, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)*). The alleged contract between GTL and the IDOC satisfies that requirement. *McGuire, v. Ameritech Servs., Inc., 253 F. Supp. 2d 988, 1007 (S.D. Ohio 2003)* (holding that this kind of arrangement "*is* the clear and articulated policy of [the state] . . . It is the State, acting through the [state agency], that solicited, implemented, and maintains" the contracted services).

[2] It is unclear whether the streaming media offered by GTL are "commodities" covered by the statute. *See* *Innomed Labs, LLC v. ALZA Corp., 368 F.3d 148, 156 (2d Cir. 2004)* (the term "commodity" is strictly construed to exclude "intangible" products or services).

Contracts Law > Defenses > Public Policy Violations

HN1[] **Defenses, Public Policy Violations**

Generally, a clear and unambiguous contract provision must be given its plain meaning unless to do so would be contrary to a clearly expressed public policy. When examining whether a contract violates public policy, the supreme court is mindful that public policy is more than a vague goal which may be used to circumvent the plain meaning of the contract. It is only when a given policy is so obviously for or against the public health, safety, morals or welfare that there is a virtual unanimity of opinion in regard to it, that a court may constitute itself the voice of the community in so declaring that the contract is against public policy.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

Trade Secrets Law > Employee Duties & Obligations > Right to Compete > Covenants Not to Compete

HN2[] **Trade Secrets & Unfair Competition, Noncompetition & Nondisclosure Agreements**

Covenants not to compete between employers and employees, which have the effect of limiting employment opportunities for employees, are enforceable provided they meet certain requirements.

Business & Corporate Compliance > ... > Contract Formation > Consideration > Adequate Consideration

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

Trade Secrets Law > Employee Duties & Obligations > Right to Compete > Covenants Not to Compete

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

HN3[] **Consideration, Adequate Consideration**

The Commonwealth has a long history of disfavoring restrictive covenants. While generally disfavored, Pennsylvania law, however, has recognized the validity and enforceability of covenants not to compete in an employment agreement, assuming adherence to certain requirements. Currently in Pennsylvania, restrictive covenants are enforceable only if they are: (1) ancillary to an employment relationship between an employee and an employer; (2) supported by adequate consideration; (3) the restrictions are reasonably limited in duration and geographic extent; and (4) the restrictions are designed to protect the legitimate interests of the employer.

Contracts Law > Defenses > Public Policy Violations

HN4[] **Defenses, Public Policy Violations**

Avoidance of contract terms on public policy grounds requires a showing of overriding public policy from legal precedents, governmental practice, or obvious ethical or moral standards.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

Labor & Employment Law > Employment Relationships > Employment Contracts > Contract Interpretation

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN5[] **Types of Contracts, Covenants**

The United States Supreme Court has stated that freedom in the making of contracts of personal employment is an elementary part of the rights of personal liberty. The Pennsylvania Supreme Court has held that the Commonwealth has a long, and virtually uniform, history of strongly disfavoring covenants in restraint of trade. While there are limited circumstances where an employment agreement containing a restrictive covenant may be enforced, consideration is crucial. That is so because employees must receive a meaningful benefit in exchange for a restriction on their rights to seek employment in their chosen fields.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

HN6[] **Types of Contracts, Covenants**

While no Pennsylvania statute applies to contractual restraints, case law makes clear that restrictive covenants are permitted only if they meet specific requirements including protection of the legitimate interests of the employer.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN7[] **Injunctions, Preliminary & Temporary Injunctions**

The supreme court's review of a trial court's order granting or denying preliminary injunctive relief is highly deferential. Accordingly, the supreme court examines the record to determine if there were any apparently reasonable grounds for the action of the court below.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Public Interest

HN8[] **Injunctions, Preliminary & Temporary Injunctions**

The supreme court will find that a trial court had apparently reasonable grounds for its denial of injunctive relief where the trial court has properly found that any one of the essential prerequisites for a preliminary injunction is not satisfied. The six essential prerequisites are: (1) the injunction is necessary to prevent immediate and irreparable harm that cannot be adequately compensated by damages; (2) greater injury would result from refusing an injunction than from granting it; (3) the injunction will restore the parties to their status as it was immediately before the alleged wrongful conduct; (4) the activity sought to be restrained is actionable, the right to relief is manifest, and the moving party must show it is likely to prevail on the merits; (5) the injunction is reasonably suited to abate the offending activity; and (6) a preliminary injunction will not harm the public interest.

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN9[] **Standards of Review, De Novo Review**

In assessing whether the common pleas court acted properly, the supreme court reviews its factual findings deferentially while resolving issues of law de novo. In that latter regard, the supreme court will interfere with the court's decision only where the rule of law relied upon was palpably erroneous or misapplied.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

Trade Secrets Law > Employee Duties & Obligations > Right to Compete > Covenants Not to Compete

Contracts Law > Defenses > Public Policy Violations

Labor & Employment Law > Employment Relationships > Employment Contracts > Contract Interpretation

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN10[] Types of Contracts, Covenants

Pennsylvania common law has treated restrictive covenants as restraints on trade that are void as against public policy unless they are ancillary to an otherwise valid contract. To determine the enforceability of a provision in restraint of trade that is ancillary, or supplementary, to the principal purpose of a contract, the supreme court employs a balancing test to determine the reasonableness of the restraint in light of the parties' interests that the restraint aims to protect and the harm to other contractual parties and the public. As part of that balancing test, courts also consider the reasonableness of the restraint's geographical scope as well as its duration of time. The reasonableness test is more stringent when examining restrictive covenants ancillary to an employment agreement than when evaluating restrictive covenants ancillary to the sale of a business.

Judges: JUSTICE MUNDY. Chief Justice Baer and Justices Saylor, Todd, Donohue, Dougherty and Wecht join the opinion.

Opinion by: MUNDY

Opinion

[*920] JUSTICE MUNDY

In this appeal we consider whether no-hire, or "no poach," provisions that are ancillary to a services contract between business entities are enforceable under the laws of this Commonwealth. For the reasons that follow, we hold the no-hire provision in this case is not enforceable, and therefore affirm the order of the Superior Court.

I.

Pittsburgh Logistics Systems, Inc. ("PLS") is a third-party logistics provider that arranges for the shipping of its customers' freight with selected trucking companies. Beemac Trucking ("Beemac")[1] is a **[*921]** shipping company that conducts non-exclusive business with PLS.

On August 30, 2010, PLS and Beemac entered into a one-year Motor Carriage Services Contract ("the Contract"), which automatically renewed on a year to year basis until either party terminated it. Contract, 8/30/10, at 2. It contained both a non-solicitation provision and **[**2]** the no-hire provision, which is the focus of this appeal. Those provisions are as follow:

> 14.3 The parties acknowledge that during the term of the Contract there may be disclosed to CARRIER [Beemac] confidential information concerning PLS' operations including, but not limited to, the names and addresses of Shippers and others who are clients of PLS, volumes of traffic and rate data. During the term of this Contract and for a period of one year after termination of this Contract, CARRIER hereby agrees that it will not, either directly or indirectly, solicit any individual Shipper or other client of PLS, back-solicit and/or transport for itself, without the involvement of PLS, any freight that CARRIER handles pursuant to this Contract or freight which first becomes known to CARRIER as a result of CARRIER'S past, present or future dealings with PLS.
>
> . . .
>
> 14.6 CARRIER agrees that, during the term of this Contract and for a period of two (2) years after the termination of this Contract, neither CARRIER nor any of its employees, agents, independent contractors or other persons performing services for or on behalf of CARRIER in connection with CARRIER'S obligations

---

[1] Although Beemac Logistics appears in the caption, no injunctive relief was ordered against it. Accordingly, it is not involved in the instant appeal.

> under this Contract will, **[**3]** directly or indirectly, hire, solicit for employment, induce or attempt to induce any employees of PLS or any of its Affiliates to leave their employment with PLS or any Affiliate for any reason.

Id. at 9-10.

While the contract was in force, Beemac hired the following four PLS employees: Michael Ceravolo, Mary Coleman, Natalie Hennings, and Racquelle Pakutz. On November 29, 2016, PLS filed an action in the Court of Common Pleas of Beaver County against Beemac alleging breach of contract, tortious interference with contract, violation of the *Pennsylvania Uniform Trade Secrets Act, 12 Pa.C.S. §§ 5301-5308*, and civil conspiracy. PLS sought injunctive relief, and on December 1, 2016, the court issued an order enjoining Beemac from employing the former PLS employees and soliciting PLS customers pending a hearing.

In a related action, on November 18, 2016, PLS sued its former employees for breach of contract, alleging they had breached the non-competition and non-solicitation provisions of their employment contracts. On November 22, 2016, the court entered an order enjoining the former employees from employment with Beemac and soliciting certain PLS customers pending a hearing.

On December 8, 9, and 13, 2016, the court held **[**4]** a consolidated hearing on both actions, and on December 22, 2016, it vacated the injunction entered against Ms. Coleman because it determined that her employment agreement was void. It also concluded that the other three employees had valid employment agreements but that the worldwide non-compete clauses in their contracts were "unduly oppressive and cannot be subject to equitable modification." Trial Court Opinion, 12/22/2016, at 10. However, the court found that the provisions of the employment agreements which precluded Mr. Ceravolo from soliciting clients of PLS for one year, and Ms. Hennings and Ms. Pakutz from soliciting **[*922]** clients of PLS for two years, were reasonable. Accordingly, the court ordered no injunctive relief against Ms. Coleman, and enjoined the other three employees only from soliciting PLS clients in accordance with their employment agreements. The order specified that the employees were not enjoined from working for Beemac.[2]

With respect to the PLS action against Beemac, the court first addressed Section 14.3 of the Contract governing non-solicitation of PLS customers:

> [R]estrictions on trade are not always favored by the courts. Indeed, the **[**5]** Pennsylvania Supreme Court acknowledged that "it has long been the rule at common law, that contracts in restraint of trade made independently of a sale of a business or contract of employment are void as against public policy regardless of the valuableness of the consideration exchanged. *Jacobson & Co. v. Int'l Env't Corp., 427 Pa. 439, 235 A.2d 612, 617 (Pa. 1967)*. However, certain restrictive covenants are valid if they are ancillary to the main purpose of the contract. *Id.* The covenant must be inserted only to protect one of the parties from the injury which, in the execution of the contract or enjoyment of its fruits, he may suffer from the unrestrained competition of the other. *Id.* The main purpose of the contract must suggest the measure of protection needed, and furnish a sufficiently uniform standard by which the validity of such a restraint may be judicially determined. *Id.* We believe that the restrictive covenant in section 14.3 of the . . . Contract meets these requirements; it was ancillary to the main purpose of the agreement, and [it] was necessary to protect PLS's interest in its customers.
>
> In the instant case, the covenant contained in section 14.3 furthered PLS's legitimate interest in preventing Bee[m]ac from cutting PLS out of the equation.

Trial Court Opinion, 12/22/16, **[**6]** at 11-12.

---

[2] The injunction entered in PLS's action against its former employees is not the subject of the instant appeal. Rather, PLS properly filed a separate appeal to the Superior Court which affirmed the trial court. ***Pittsburgh Logistics Sys., Inc. v. Ceravolo, 181 A.3d 412, 2017 Pa. Super. Unpub. LEXIS 4184, 2017 WL 5451759 (Pa. Super. 2017)***, *petition for allowance of appeal denied*, *646 Pa. 124, 183 A.3d 968 (Pa. 2018)* (per curiam).

With respect to Section 14.6, the court noted the lack of "case law in Pennsylvania on the issue of no-hire covenants between contracting companies." *Id.* at 13. It recognized that while some states have found such provisions to be void against public policy, *e.g.,* *Heyde Cos., Inc. v. Dove Healthcare LLC, 2002 WI 131, 258 Wis. 2d 28, 654 N.W.2d 830 (Wis. 2002)*, others have deemed them to be a permissible restraint on trade, *e.g.,* *H & M Commercial Driver Leasing, Inc. v. Fox Valley Containers, Inc., 209 Ill. 2d 52, 805 N.E.2d 1177, 282 Ill. Dec. 160 (Ill. 2004)*. The court concluded:

> We believe these types of no-hire contracts should be void against public policy because they essentially force a non-compete agreement on employees of companies without their consent, or even knowledge, in some cases. We believe that if an employer wishes to limit its employees from future competition, this matter should be addressed directly between the employer and employee, not between competing businesses. Moreover, in this case, such a restriction goes beyond the protected interest of PLS, which is its customers. So long as the former employee, or any employee of Bee[m]ac, does not contact former customers of PLS, for the time period in the contract, in this case one year under section 14.3 of the . . . Contract, there is **[*923]** no need to enforce the no-hire provision contained in Section 14.6. For these reasons, we do not believe PLS has a substantial likelihood of **[**7]** success on the merits of its claim under section 14.6, and we will vacate the injunction prohibiting Bee[m]ac . . . from hiring former PLS employees.

Trial Court Opinion, 12/22/16, at 13.

PLS filed an appeal to the Superior Court, which issued an *en banc* opinion on January 11, 2019, affirming the trial court. *Pittsburgh Logistics Sys. v. Beemac Trucking, LLC, 2019 PA Super 13, 202 A.3d 801 (Pa. Super. 2019)* (en banc).[3] The Superior Court recognized that pursuant to *Summit Towne Centre, Inc. v. Shoe Show of Rocky Mount, Inc., 573 Pa. 637, 828 A.2d 995, 1000 (Pa. 2003)*, it exercises a highly deferential standard of review with respect to the grant or denial of a preliminary injunction, and examines the record to determine if the trial court had any apparently reasonable grounds for its action.

The court noted:

> Here, there is no proof that the employees knew of the [no-hire] clause between the companies. While there was a restrictive covenant in the employees' contracts with PLS, the trial court determined it was unenforceable as being oppressive or an attempt to foster a monopoly, thereby demonstrating unclean hands on the part of PLS. It would be incongruous to strike the employees' restrictive covenant, finding PLS to have had unclean hands, yet allow PLS to achieve the same result via the contract between companies.

Pittsburgh Logistics Sys., 202 A.3d at 807 (citations omitted).

The court agreed with the trial court that "Paragraph 14.6 violated **[**8]** public policy by preventing non-signatories, PLS employees, from exploring alternate work opportunities in a similar business." *Id. at 808*. Furthermore, "each [motor carriage service contract] with a new carrier, results in a new restriction upon current employees[.]" *Id.* While such restrictions may be valid in a contract made between an employer and employee at the time of hiring, a new restriction must be supported by additional consideration. *Id.* Therefore, the court concluded, "[i]f additional restrictions to the agreement between employer and employee are rendered unenforceable by a lack of additional consideration, PLS should not be entitled to circumvent that outcome through an agreement with a third party." *Id.*

In a dissenting opinion, Judge Bowes observed that Section 14.6 "is a no-hire provision that binds Bee[m]ac, not a non-compete clause binding PLS's employees. In my view, the majority errs in conflating the two, as there is no basis in Pennsylvania law for treating a no-hire provision as a restrictive covenant between an employer and an employee." *Pittsburgh Logistics Sys., 202 A.3d at 810* (Bowes, J. dissenting). The dissent asserted that Section 14.6 is not:

---

[3] A panel of the Superior Court affirmed the trial court on March 26, 2018. PLS sought reargument, which the court granted on June 6, 2018.

> a back-door restrictive covenant through which an employer signs away rights of its employees **[**9]** without supplying consideration. The no-hire provision does not restrict the employees' actions, but rather is a concession from Bee[m]ac that, in exchange for its access to PLS's specialized industry knowledge and contacts through PLS's employees, Bee[m]ac would not thereafter appropriate those employees and obviate the need for PLS's services. Bee[m]ac's contract with PLS does nothing to restrict PLS's employees from seeking employment with any other company.

[*924] *Id. at 811*. Instead, the dissent opined, "[t]he proper analysis of the issue in this appeal is whether the no-hire provision in the PLS-Bee[m]ac contract is a reasonable restraint upon trade." *Id.* Upon review of cases from other jurisdictions and an unpublished opinion from a federal district court, *GeoDecisions v. Data Transfer Solutions, LLC, 2010 U.S. Dist. LEXIS 128283, 2010 WL 5014514 (M.D. Pa. Dec. 3, 2010)*, the dissent concluded the restraint on trade was indeed reasonable. *Id. at 811-13*. The dissent also noted that while the agreement "had an indirect effect on those PLS employees seeking employment away from PLS . . . [it] prohibited [them] only from seeking employment with Bee[m]ac and its affiliates who deal with PLS." *Id. at 813*. Such limitation, the dissent concluded, does not violate public policy.

We granted allowance of appeal to address the following issue: **[**10]** "Are contractual no-hire provisions which are part of a services contract between sophisticated business entities enforceable under the law of this Commonwealth?" *Pittsburgh Logistics Sys., Inc. v. Beemac Trucking, LLC & Beemac Logistics, LLC, 654 Pa. 574, 216 A.3d 1032 (Pa. 2019)* (per curiam).

II.

Due to the lack of Pennsylvania case law governing no-hire provisions, it is helpful to review the decisions from other jurisdictions on which the parties and lower courts rely. We begin with cases where the courts found such provisions unenforceable.

In *Heyde*, Greenbriar Rehabilitation (Greenbriar), a provider of rehabilitation services to nursing homes, entered into an agreement to place physical therapists at a Dove Healthcare (Dove) facility. The agreement contained a provision that Dove would not hire any Greenbriar therapists or therapist assistants for the duration of the contract and for a period of one year thereafter without the written consent of Greenbriar. If, after receiving Greenbriar's written consent Dove hired any Greenbriar therapists or therapist assistants, Dove would pay Greenbriar a fee of fifty percent of the Greenbriar employee's annual salary. On October 26, 1999, Dove terminated the agreement effective December 31, 1999. Shortly after terminating the agreement, Dove hired one current **[**11]** and three former Greenbriar employees without obtaining Greenbriar's written consent nor paying the fee outlined in the agreement.

Greenbriar filed suit against Dove on March 10, 2000, asserting that Dove breached the no-hire provision of the contract. The circuit court found for Greenbriar, awarding damages of $62,124.40 in its favor. However, as noted by the Wisconsin Supreme Court, "the court of appeals reversed the judgment of the circuit court and held that the no-hire provision was an unreasonable restraint of free trade because the employees had no knowledge of the provision and did not sign any covenant not to compete." *Heyde, 2002 WI 131, 258 Wis. 2d 28, 654 N.W.2d 830 at 833*.

The Wisconsin Supreme Court noted that restrictive covenants not to compete in employment contracts are permitted by statute but, "only if the restrictions imposed are reasonably necessary for the protection of the employer or principal. Any covenant, described in this subsection, imposing an unreasonable restraint is illegal, void and unenforceable even as to any part of the covenant or performance that would be a reasonable restraint." *W.S.A. 103.465*. "While a covenant not to compete is typically made between an employer and its employees, it is possible, **[**12]** as illustrated in this case, that a restrictive covenant may be made between employers that acts as a covenant not to compete on the employees." *Heyde, 654 N.W.2d at 834*. As summarized by the court:

> **[*925]** The *effect* of the no-hire provision is to restrict the employment of Greenbriar's employees; it is inconsequential whether the restriction is termed a "no-hire" provision between Dove and Greenbriar or a

> "covenant not to compete" between Greenbriar and its employees. Greenbriar is not allowed to accomplish by indirection that which it cannot accomplish directly.

Id. Because the no-hire provision acted as a restrictive covenant on Greenbriar's employees, the court concluded that the restrictive covenant must be necessary to protect the employee; provide a reasonable time limit; provide a reasonable territorial limit; not be harsh or oppressive to the employer; and not be contrary to public policy. *Id. at 835*. With respect to the first factor, the court held that the no-hire provision was not necessary for Greenbriar's protection because it could have protected itself through a reasonable covenant not to compete with its employees. The court noted that the one-year time limit appeared reasonable, but reached no conclusion with **[**13]** respect to the territorial limit. However, it determined the no-hire provision was harsh and oppressive to the employees because they had no knowledge of it and did not sign a non-compete. *Id. at 837*. The no-hire provision was contrary to public policy for the same reason, and because it violated "the fundamental right of a person to make choices about his or her own employment." *Id. at 836*.

The California Court of Appeal addressed no-hire contracts in *VL Systems, Inc. v. Unisen, Inc., 152 Cal. App. 4th 708, 61 Cal. Rptr. 3d 818 (Cal. Ct. App. 2007)*. VL Systems (VLS) was a provider of computer consulting services. In 2004, it entered into a contract with Star Trac to provide assistance for migrating to a new server. It estimated the work would be completed in sixteen hours.

The contract contained a provision that Star Trac would not attempt to hire VLS's personnel, and, "if, during the term of, or within twelve (12) months after the termination of the performance period of this agreement, [Star Trac] hires directly, or indirectly contracts with any of the seller's personnel for the performance of systems engineering and/or related services," VLS would be entitled to liquidated damages as detailed in the agreement. *Id. at 710*.

In April 2004, after the Star Trac contract was completed, VLS hired David Rohnow as **[**14]** a senior engineer. In July 2004, Star Trac posted an internet job listing for a director of information technology. Rohnow responded, was hired and began working for Star Trac on September 20, 2004. He had worked for VLS for twenty-two weeks.

VLS billed Star Trac for liquidated damages, which it refused to pay. VLS filed an action against Star Trac that proceeded to trial. The court determined that Star Trac breached the agreement, but concluded that the liquidated damages set forth in the contract did not bear a reasonable relation to the damage occurred. Instead, it entered judgment in favor of VLS in the amount of $28,500, which equaled 60 percent of the $47,500 salary Rohnow received from Star Trac during the amount of time he worked for VLS.

The Court of Appeal reversed. The court noted *Business and Professions Code Section 16600*, which states, "[e]xcept as provided in this chapter, every contact by which anyone is restrained from engaging in a lawful profession, trade, or business of any kind is to that extent void." *Cal. Bus. & Prof. Code § 16600*. "California courts have consistently declared this provision an expression of public policy to ensure that every citizen shall retain the right to pursue any lawful employment **[**15]** and enterprise **[*926]** of their choice." *VL Systems, 152 Cal. App. 4th at 713*. While recognizing that "[f]reedom of contract is an important principle, and courts should not blithely apply public policy reasons to void contract provisions," it noted:

> This type of contractual provision, however, may seriously impact the rights of a broad range of third parties. In this case, those third parties not only included the VLS employees who actually performed work for Star Trac under the contract, but all of those who did not, including Rohnow, who was not even employed by VLS at the time.

Id. While "[c]ourts have upheld narrowly drawn provisions which might limit the employment mobility of nonparties," *id. at 714*, the court noted that the contract at issue contains "a very broad provision covering not only solicitation by Star Trac, but all hiring, and it applies to all VLS employees, regardless of whether they worked for Star Trac or were even employed at the time." *Id. at 718*. Thus, the California Court of Appeal expressed its disapproval of an agreement between businesses that "results in a situation where the opportunities of employees are restricted without their knowledge and consent." *Id.*

Nearly seventy years ago, a Texas appellate court addressed **[**16]** the issue in *Texas Shop Towel, Inc. v. Haire, 246 S.W.2d 482 (Tx. Civ. App. 1952)*. W.S. Haire operated a business renting and delivering shop towels. On April 1, 1950, he sold the business to Texas Shop Towel. At the time of the sale, Haire had two deliverymen including Frank Bell. In exchange for $12,000, Haire agreed "that he, his agents, servants and employees" would not run a shop towel rental business in nineteen counties for a period of five years. On July 1, 1950, Bell opened a competing business.

Texas Towel initiated a lawsuit against Haire. Bell was not made a party to the action. Following a defense verdict, the appellate court affirmed, noting:

> It is one thing for an employee voluntarily to surrender his known rights; it is vastly different when an employee is placed under servitude by a contract to which he is not a party and about which he may know nothing. . . . [I]n a contract restricting trade, we do not think that an employee's individual right and freedom to contract may be traded away by a third person, even by the third party's express contract.

Id. at 484.

However, other courts have determined that similar no-hire agreements, although they are in restraint of trade, are permitted.

In *Therapy Services, Inc. v. Crystal City Nursing Center, Inc., 239 Va. 385, 389 S.E.2d 710, 6 Va. Law Rep. 1598 (Va. 1990)*, a case with certain factual similarities to *Heyde*, the Supreme **[**17]** Court of Virginia reached a different conclusion.

Therapy Services employed certified physical, occupational and speech therapists that it provided to health care facilities. In October of 1984 and December of 1985, Therapy Services entered into contracts with Crystal City Nursing Center to provide rehabilitation services to its patients. In November 1987, while ten Therapy Services employees were working for Crystal City, it informed Therapy Services that it was terminating the agreements in accordance with the contracts. Shortly thereafter, Crystal City attempted to hire the Therapy Services employees. Therapy Services sought an injunction asserting that "Crystal City breached paragraph 13 of the agreements, under which Crystal City agreed not to hire any of the staff which Therapy Services provided under the contract for the duration of the contract **[*927]** period and for six months following the termination thereof." *Id. at 711*.

At a hearing, the Therapy Services employees testified they were unaware of paragraph 13 before accepting employment with Therapy Services. Based on this testimony, the trial court determined the employees had unknowingly waived their right to seek a livelihood, and accordingly **[**18]** the agreements included in paragraph 13 were against public policy. Therefore, the court granted Crystal City's motion for summary judgment.

The Supreme Court of Virginia reversed. Recognizing this was a case where one party "agree[d] to forego the ability to hire certain people who are not parties to the contract[,]" "the contract [was] in restraint of trade and will be held void as against public policy if it is unreasonable as between the parties or is injurious to the public." *Id. at 711*.

The court agreed with Therapy Services that it had "a legitimate interest in protecting its ability to maintain professional personnel in its employ," *id. at 711-12*, "and that paragraph 13 affords fair protection to that interest." *Id. at 712*. The court then considered "whether the provision is so large as to interfere with the interest of the public." *Id.* (quotation and citation omitted). Therapy Services argued the provision only restricted the employees from working for Crystal City for six months after termination of the contract, and did not prohibit the employees from seeking work anywhere other than Crystal City. Furthermore, it asserted "the employees' lack of knowledge of the restriction is immaterial, pointing out that **[**19]** other restrictive agreements such as restrictive employment agreements and exclusive dealing arrangements impact on the interests of entities which are not parties to such agreements." *Id.*

The Virginia Supreme Court held that "[a]lthough the provision in question involves an employee's ability to secure future employment, it is neither a covenant not to compete nor a restrictive covenant between employer and employee. It is a contract between two businesses." *Id. at 711*. Accordingly, it reasoned that the contract would be void against public policy only "if it is unreasonable as between the parties or is injurious to the public." *Id.* The court concluded while "[t]he right to earn a livelihood is embraced in the constitutional concept of 'liberty[,]'" it "is conceptually and practically distinct from a claim of a right to specific employment." *Id.* Because the evidence indicated that therapists were in low supply and high demand in Northern Virginia, the court concluded they could find similar positions if they chose to leave Therapy Services' employ. Furthermore, the public interest would not be adversely impacted because the therapists could continue to work in Northern Virginia. Since the agreement **[**20]** protected the employer's interest and did not harm the employees' livelihoods nor the public, the court deemed valid the no-hire provision. *Id. at 712*.

The Illinois Supreme Court also weighed in on the issue in *H & M, supra.* H & M was in the business of providing truck drivers and related personnel to its customers. On January 10, 2000, H & M and Fox Valley entered into an agreement, paragraph 13 of which stated that for a period of one year from the termination of the contract, Fox Valley would not hire any of the drivers furnished by H & M. However, Fox Valley could hire any driver whose employment with H & M terminated at least one year prior to being hired by Fox Valley. Paragraph 13 also provided that if Fox Valley hired any driver in violation of the agreement, it would pay $15,000 per driver to H & M as liquidated damages plus costs and expenses including attorneys' fees. The length of the contract **[*928]** was indefinite until canceled by either party.

While the contract was in force, H & M provided driver James Booker to Fox Valley, and on February 11, 2000, Fox Valley hired Booker. H & M filed a complaint for breach of contract seeking damages as provided in paragraph 13. The circuit court rejected H & M's **[**21]** contention that paragraph 13 violated "public policy as it is a restraint of trade on a third party." *Id. at 1179*. The court entered judgment on the pleadings in favor of H & M in the amount of $18,747.00. The appellate court affirmed

The Supreme Court of Illinois noted that "in keeping with the principle of freedom of contract, [the court] has been reluctant to invoke its power to declare a private contract void as contrary to public policy." *Id. at 1180*. Furthermore, "[w]hether an agreement is contrary to public policy depends on the particular facts and circumstances of the case." *Id.* (citation omitted). Noting the public policy issue had "not been squarely addressed by the Illinois courts," *id. at 1182*, the court examined *Heyde* and *Therapy Services*. The court noted:

> This is not a case where the employee is arguing that he or she has been foreclosed from employment. In our view, the provision at issue restricted one employer's ability to hire former employees of the other employer. Thus, as the Virginia Supreme Court recognized [in *Therapy Services*], the contract provision acts as a restraint on trade. This court has held that "in determining whether a restraint [on trade] is reasonable it is necessary to consider **[**22]** whether enforcement will be injurious to the public or cause undue hardship to the promisor and whether the restraint imposed is greater than is necessary to protect the promisee." *Bauer v. Sawyer, 8 Ill.2d 351, 355, 134 N.E.2d 329 (1956)*.

Id. at 1183-84.

The court agreed with H & M that it had a legitimate interest in "protect[ing] its sole business asset, its drivers, from being hired away by its customers," *id. at 1184*, and that "paragraph 13 affords fair protection to that interest." *Id.* It further observed that H & M employees are not restricted from seeking employment as drivers with any employer other than Fox Valley, Fox Valley is only restricted from hiring H & M employees who had been provided to it by H & M, and that if Fox Valley wished to hire such employees, it could do so by paying liquidated damages to H & M. *Id.* In light of these facts and the lack of evidence in the record disclosing any adverse impact on the interests of the public, the court held, "paragraph 13 was not void as against public policy." *Id.*

In *GeoDecisions, supra*, the United States District Court for the Middle District of Pennsylvania also considered a no-hire provision. GeoDecisions and Data Transfer Solutions (DTS) were direct competitors in the information technology field. They agreed to team up **[**23]** on a project in California, and on May 28, 2010, entered into a mutual nondisclosure agreement. Paragraph 16 of the agreement provided, in full: "For a period of two (2) years from the date of this Agreement, neither party shall solicit for employment or employ any person employed by the other party, or otherwise encourage any person to terminate employment with such party." In October 2010, DTS extended offers of employment to twelve GeoDecisions employees, most of whom resigned their positions at GeoDecisions. GeoDecisions filed an action alleging breach of contract and seeking injunctive relief. On October 22, 2010, the court entered a temporary **[*929]** restraining order prohibiting DTS from hiring anyone employed by GeoDecisions since May 28, 2010. On December 3, 2010, the court entered a preliminary injunction to the same effect pending further order of court.

In reaching its decision, the court noted the lack of "any Pennsylvania cases squarely addressing a similar no-hire provision in an agreement between two corporations." *GeoDecisions, 2010 U.S. Dist. LEXIS 128283, 2010 WL 5014514 at *3*. The court recognized that "agreements containing such provisions are construed as contracts in restraint of trade," *id.* (citing *H & M, 805 N.E.2d at 1184*). As a restraint of trade, the **[**24]** court stated that the no-hire provision was void under Pennsylvania law unless "(1) it is ancillary to the main purpose of a lawful transaction; (2) it is necessary to protect a party's legitimate interest; (3) it is supported by adequate consideration; and (4) it is reasonably limited in both time and territory." *2010 U.S. Dist. LEXIS 128283, [WL] at *4* (citing *Volunteer Firemen's Ins. Servs., Inc. v. CIGNA Prop. & Cas. Ins. Agency, 693 A.2d 1330, 1337 (Pa. Super. 1997))*.

Analyzing whether the no-hire provision was ancillary, the court noted that "'contracts in restraint of trade made independently of a sale of a business or contract of employment are void as against public policy regardless of the valuableness of the consideration exchanged. *Jacobson [& Co., Inc. v. Int'l Env't Corp.], 427 Pa. 439, 235 A.2d [612,] 617 [(Pa. 1967)]*.'" *GeoDecisions, 2010 U.S. Dist. LEXIS 128283, 2010 WL 5014514, at *4*. Nevertheless, "[w]hile the rule appears to strictly limit the types of agreements to which restraints of trade may be ancillary, in practice courts have construed this restriction somewhat liberally." *Id.* For example, this Court "has upheld restraints of trade ancillary to sales of substantial equity interest or franchise rights." *Id.* (citing *Piercing Pagoda, Inc. v. Hoffner, 465 Pa. 500, 351 A.2d 207 (Pa. 1976)*; *Ala. Binder and Chem. Corp. v. Pa. Indus. Chem. Corp., 410 Pa. 214, 189 A.2d 180 (Pa. 1963))*. *GeoDecisions* noted that in *Jacobson*, we relied on *United States v. Addyston Pipe & Steel Co., 85 F. 271, 282 (6th Cir. 1898)*, *aff'd*, *175 U.S. 211, 20 S. Ct. 96, 44 L. Ed. 136 (1889)*, which held that a covenant in restraint of trade is permissible where it is merely ancillary to the main purpose of agreement, and "is inserted only to protect one of the **[**25]** parties from the injury which, in the execution of the contract or enjoyment of its fruits, he may suffer from the unrestrained competition of the other."

The court concluded that the instant no-hire provision satisfied the ancillary rule, because, like the one in *Therapy Services*, it did not solely "restrict a corporation's ability to hire a competitor's employees. Rather, the purpose of the arrangement was to ensure a productive temporary cooperative relationship." *GeoDecisions, 2010 U.S. Dist. LEXIS 128283, 2010 WL 5014514 at *5*. The court further found that "both DTS and GeoDecisions had a legitimate business interest in including the no-hire provision in the Agreement" as it protected the parties' confidential information and prevented the poaching of employees who had specialized knowledge. *Id.* Additionally, the court found the agreement was supported by adequate consideration and was reasonably limited in geographic scope and duration. *2010 U.S. Dist. LEXIS 128283, [WL] at *6*.

With respect to the non-parties who were affected by the no-hire provision, the court noted:

> [T]here is no evidence of record to suggest that these employees were aware that DTS was in breach of contract by extending employment offers to them. Indeed they unwittingly placed themselves at the center of this dispute **[**26]** because neither party disclosed to them even the existence of the Agreement now at issue. However, . . . parties cannot **[*930]** avoid their contractual obligations by asserting a claim of hardship on behalf of a non-party.

*2010 U.S. Dist. LEXIS 128283, [WL] at *10*. The court therefore concluded that no-hire provision was not unreasonable. *2010 U.S. Dist. LEXIS 128283, [WL] at *7*.

III.

Against this background, we turn to the arguments of the parties, beginning with PLS, which relies on *Krauss v. M.L. Claster & Sons, Inc., 434 Pa. 403, 254 A.2d 1 (Pa. 1969)*, for the proposition that "arm's-length contracts between sophisticated entities are presumptively enforceable and will not be readily ignored by the courts."

Appellant's Brief at 24. Here, the record reflects that PLS and Beemac are sophisticated parties who negotiated a mutually beneficial arm's-length agreement resulting in revenue of $561,538.13 for Beemac in the last year of the contract. *Id.* at 25. PLS asserts that it "has a legitimate business interest in protecting its employee assets [from] poaching by its business partners." *Id.* Accordingly, PLS maintains that by voiding the no-hire provision, "the Superior Court disregarded Pennsylvania public policy which counseled it to enforce the terms of the agreement that these parties who were on a level playing field negotiated in good faith and entered **[**27]** at arm's length." *Id.*

PLS explains the purpose of Section 14.6 of the Contract as follows:

> A no-hire provision is aimed at a specific carrier in PLS's logistics chain; its intent is to disincentivize the carrier from poaching that which PLS values and needs most - its employees, who by virtue of PLS's involvement in training them, develop the specialized knowledge and expertise that makes them so attractive to one who might be inclined to transact business directly with a shipper. The tool that safeguards PLS's vital and legitimate interest in protecting it from those in the logistics chain who would steal its business model by poaching its employees is a no-hire provision.

Id. at 32-33.

HN1[] PLS recognizes that courts may declare a term in a contract unenforceable as a violation of public policy. As this Court has stated:

> Generally, a clear and unambiguous contract provision must be given its plain meaning unless to do so would be contrary to a clearly expressed public policy. When examining whether a contract violates public policy, this Court is mindful that public policy is more than a vague goal which may be used to circumvent the plain meaning of the contract.
>
> . . .
>
> It is only when a given policy is so obviously **[**28]** for or against the public health, safety, morals or welfare that there is a virtual unanimity of opinion in regard to it, that a court may constitute itself the voice of the community in so declaring [that the contract is against public policy].

Eichelman v Nationwide Ins. Co., 551 Pa. 558, 711 A.2d 1006, 1008 (Pa. 1998) (citations omitted).

PLS argues that the Superior Court "did not have the authority to impose its view of preferred business practices by declaring no-hire provisions, including Section 14.6, unenforceable as a matter of law in the absence of an established public policy rationale." Appellant's Brief at 27.

PLS views Section 14.6 as a promise made by Beemac to PLS, for valuable consideration, "to forego hiring certain persons who were not parties to the Contract." *Id.* at 28. It argues that the Superior Court erred by focusing on the interests of these non-parties who are only precluded from working for Beemac and are not barred from employment with any other entity in the trucking/logistics field.

HN2[] **[*931]** Covenants not to compete between employers and employees, which have the effect of limiting employment opportunities for employees, are enforceable provided they meet certain requirements. *See Rullex Co., LLC v. Tel-Stream, Inc., 232 A.3d 620, 2020 WL 3244343 (Pa. 2020)*; *Morgan's Home Equip. Corp. v. Martucci, 390 Pa. 618, 136 A.2d 838 (Pa. 1957)*. Accordingly, PLS maintains the "Superior **[**29]** Court's conclusion that all no-hire clauses are *per se* violations of public policy because of their limiting effect on the further employment opportunities of the contracting party's employees is incongruent with established Pennsylvania law." Appellant's Brief at 33.

PLS further argues that the weight of authority from other courts supports the enforcement of reasonable no-hire provisions that are incidental to commercial agreements between business entities. Significantly, in *GeoDecisions*, the court concluded that a no-hire provision comparable to Section 14.6 served the legitimate business interests of protecting confidential information and "preventing the poaching of staff who possess DTS's and GeoDecisions's 'know-how.'" *GeoDecisions, 2010 U.S. Dist. LEXIS 128283, 2010 WL 5014514 at *5*. Furthermore, the court determined the agreement was supported by adequate consideration and the scope and duration of the no-hire provision were reasonable. *Id.* at 6-7.

PLS also cites to the decision of the Illinois Supreme Court in *H & M*, where the court held the no-hire provision was necessary for the employer, "as it protects its sole business asset, its drivers, from being hired away by its customers. If customers could hire H & M's drivers on a permanent basis, then they would **[**30]** no longer need H & M's services." *H & M, 805 N.E.2d at 1184*.

In addition, PLS relies on *Therapy Services*, where the Virginia Supreme Court held that in the absence of a no-hire provision, the plaintiff "would become an involuntary and unpaid employment agency" for its customers. *Therapy Servs., 389 S.E.2d at 712*.

Along with criticizing the Superior Court for not following *GeoDecisions, H & M, and Therapy Services*, PLS takes issue with the cases from other jurisdictions that the Superior Court relied upon when declaring the no-hire provision unenforceable. It notes that *Heyde*, "involved the interplay of the no-hire clauses and Wisconsin's statutory regimen governing employee non-competition agreements. In Wisconsin, non-competition agreements are governed by statute and are strictly construed." Appellant's Brief at 38. Moreover, while the employer did not require its employees to sign a non-competition agreement, one employee testified she, "specifically asked [employer] whether she would be bound by a non-compete agreement and was told that she would not be bound by such restrictions." *Heyde, 654 N.W.2d at 836*. Arguing that the employer in *Heyde* actively deceived an employee, and that non-compete agreements in Wisconsin are regulated by statute while they are prima **[**31]** facie enforceable in Pennsylvania, PLS maintains that the Superior Court's reliance on *Heyde* was misplaced.

PLS further asserts that the Superior Court erred in relying on *VL Systems*, arguing that the decision was not a per se rejection of no-hire provisions but rather was fact-specific. Appellant's Brief at 40. In *VL Systems*, the California Court of Appeal held that where an employee was hired by a consulting firm after the firm had completed its contract with a customer, the employee was not subject to the 12-month no-hire restriction in the consulting firm/customer contract. The court recognized, "[t]his is not a case where the happy client of a consulting firm attempts to poach an employee." *VL Systems, 152 Cal. App. 4th at 715*. In **[*932]** contrast, PLS notes that the employees hired by Beemac "were specifically targeted because of their experience and expertise at PLS, and they now specifically perform those same services for Beemac." Appellant's Brief at 40.

PLS argues that the cases relied upon by the Superior Court in support of its conclusions are distinguishable, and that "cases enforcing no-hire provisions are not only based on sound jurisprudential grounds, but are properly appreciative of the economic context and **[**32]** business realities that lead intermediary companies, like PLS, to find them necessary to further their business interests." *Id.* at 41.

In contrast, Beemac suggests that the Superior Court correctly applied Pennsylvania law regarding restraints of trade in holding that the no-hire provision violates public policy. It argues that PLS, "fails to explain why a company, already in a superior bargaining position when hiring and negotiating with employees, should be free to contract away the rights of its employees by way of contracts to which they are not parties and for which they receive no consideration." Appellee's Brief at 21.

HN3[] As recognized by this Court, this Commonwealth has a "long history of disfavoring restrictive covenants." *Socko v. Mid-Atlantic Sys. of CPA, Inc., 633 Pa. 555, 126 A.3d 1266, 1268 (Pa. 2015)*. "While generally disfavored, Pennsylvania law, however, has recognized the validity and enforceability of covenants not to compete in an employment agreement, assuming adherence to certain requirements." *Id.*

> Consistent with this legal background, currently in Pennsylvania, restrictive covenants are enforceable only if they are: (1) ancillary to an employment relationship between an employee and an employer; (2) supported by adequate consideration; (3) the restrictions **[**33]** are reasonably limited in duration and geographic extent; and (4) the restrictions are designed to protect the legitimate interests of the employer.

Id. (citations omitted).

The only other situation in which this Court has approved a provision in restraint of trade is where it is part of a contract for the sale of a business. *Id.* (citing *Morgan's, 136 A.2d at 845*). Because the no-hire provision of Section 14.6 is not ancillary to an employment relationship or the sale of a business, Beemac asserts it is presumptively void. Appellee's Brief, at 24.

HN4[] Turning to the question of public policy, this Court has held that "avoidance of contract terms on public policy grounds requires a showing of overriding public policy from legal precedents, governmental practice, or obvious ethical or moral standards." *Tayar v. Camelback Ski Corp., 616 Pa. 385, 47 A.3d 1190, 1199 (Pa. 2012)* (citation omitted). Beemac notes that because the instant matter presents an issue of first impression regarding no-hire contracts, reliance on Pennsylvania precedent is not possible. However, it avers that "governmental practice, ethical and moral standards, and persuasive decision[s] of other jurisdictions all weigh against the enforcement of no-hire restrictions." Appellee's Brief at 28.

With respect to governmental practice, **[**34]** Beemac states that recently the Department of Justice (DOJ) has taken a strong stand against no-hire restrictions. It notes that the U.S. District Court for the Western District of Pennsylvania relied on a statement of interest filed by the DOJ in determining that the plaintiffs had sufficiently alleged that the no-poach agreements were a per se violation of antitrust laws. *See In re Ry. Indus. Employee No-Poach Antitrust Litig., 395 F.Supp.3d 464, 485 (W.D. Pa. 2019)* (The court's decision . . . is supported by the government's explanation . . . that the federal agencies charged with enforcing the antitrust laws **[*933]** consider naked no-poach agreements per se violations of the Sherman Act[4] and the DOJ will proceed criminally against those who enter into those kinds of agreements.").

Beemac further notes that the DOJ submitted a similar statement of interest in *Seaman v. Duke University, No. 1:15-CV-462, 2019 U.S. Dist. LEXIS 163811, 2019 WL 4674758 (M.D.N.C. Sept. 25, 2019)*, where it was alleged that "Duke had entered into an unlawful agreement with the University of North Carolina to prevent lateral hiring of certain medical employees." *2019 U.S. Dist. LEXIS 163811, [WL] at *1*. The case ended in a settlement that "requires Duke to pay $54,500,000 and will also result in significant injunctive relief." *Id.*

Amicus curiae Josh Shapiro, Attorney General of the Commonwealth, has filed a brief **[**35]** which, *inter alia*, supports Beemac's assertion that along with the DOJ, several state attorneys general have actively focused on no-hire restrictions. In 2019, the Attorneys General of Pennsylvania and Massachusetts led a 14-state settlement with four national franchisors "to cease using 'no-poach' agreements that restrict the rights of fast food workers to move from one franchisor to another within the same restaurant chain."[5] *Amicus* Brief, at 13-14. In 2020, the Attorneys General reached a settlement with three additional national franchisors.[6]

Beemac further argues that governmental rejection of no-hire restraints "is firmly rooted in long-established ethical and moral standards." *Id.* at 32. ***HN5***[] Almost a century ago, the United States Supreme Court stated, "freedom in the making of contracts of personal employment . . . is an elementary part of the rights of personal liberty[.]" *Prudential Ins. Co. of Am. v. Cheek, 259 U.S. 530, 536, 42 S. Ct. 516, 66 L. Ed. 1044 (1922)*. This Court has held, "our Commonwealth has a long, and virtually uniform, history of strongly disfavoring covenants in restraint of trade." *Socko, 126 A.3d at 1277*. While there are **[**36]** limited circumstances where an employment agreement containing a restrictive covenant may be enforced, "consideration is crucial." *Id. at 1274*. This is so because employees must receive a meaningful benefit in exchange for a restriction on their rights to seek employment in

---

[4] *Section 1* of The Sherman Act provides, in relevant part, "Every contract . . . in restraint of trade or commerce among the several States, or with foreign nations, is declared illegal." *15 U.S.C. § 1*.

[5] Press Release, *AG Shapiro Secures Win for Workers as Four Fast Food Chains Agree to End Use of No-Poach Agreements* (March 12, 2019), https://www.attorneygeneral.gov/taking-action/press-releases/ag-shapiro-secures-win-for-workers-as-four-fast-food-chains-agree-to-end-use-of-no-poach-agreements/ (last accessed August 6, 2020).

[6] Press Release, *Three Fast Food Chains Agree to End Use of No-Poach Agreements* (March 2, 2020), https://www.mass.gov/news/three-fast-food-chains-agree-to-end-use-of-no-poach-agreements (last accessed August 6, 2020).

their chosen fields. "No-hire restrictions, however, impose a restraint, without a corresponding benefit, which is adverse to the ethical and moral standards underpinning the limited circumstances in which restraints of trade may be enforced." Appellee's Brief at 33.

Beemac also asserts that the Superior Court properly relied on decisions from other jurisdictions when refusing to enforce Section 14.6. It notes that in *Heyde*, the Wisconsin Supreme Court struck down the provision precluding a nursing home from hiring or soliciting any Greenbriar employee during the term of employment and for one year after. The court noted the no-hire provision was oppressive to the employees because they had no knowledge of it, and received no consideration for the restraint on their right to make choices about their own employment. *Heyde, 654 N.W.2d at 836*.

[*934] Beemac argues that PLS's attempt to distinguish *Heyde* because it relied on a Wisconsin statute prohibiting restrictive covenants **[**37]** in employment agreements unless they are reasonably necessary for the protection of the employer is unavailing. ***HN6***[] While no Pennsylvania statute applies to contractual restraints, case law makes clear that restrictive covenants are permitted only if they meet specific requirements including protection of "the legitimate interests of the employer." *Socko, 126 A.3d at 1274*.

Beemac also takes PLS to task for asserting that *Heyde* is distinguishable because one of the employees hired by Dove testified that when she asked Greenbriar whether she would be bound by a non-compete agreement, she was told she would not be subject to such restriction. The holding of *Heyde* is not based on the alleged deception of the employer. Rather, it was but one of several factors that led the court to conclude that the no-hire provision was unenforceable.

Along with endorsing the Superior Court's reliance on *Haire* and *VLS Systems*, Beemac criticizes the decisions from other jurisdictions cited by PLS upholding no-hire provisions. It notes that in *H & M, Therapy Services*, and *GeoDecisions*, "the courts rejected the fundamental notion that no-hire restrictions directly and substantially impact non-party employees and, instead, viewed the **[**38]** restrictions as having no material impact on employees." Appellee's Brief at 40. It further asserts these decisions fail to give due weight to the absence of consideration.

In particular, it asserts that the *GeoDecisions* court erroneously concluded that Pennsylvania courts have liberally construed the ancillary rule to enforce restraints of trade outside the employment and buy-sell contexts. *GeoDecisions, 2010 U.S. Dist. LEXIS 128283, 2010 WL 5014514*. Beemac notes that *GeoDecisions*' reliance on *Piercing Pagoda* for this proposition is misplaced because in that case we held a covenant not to compete in a franchise agreement is analogous to one in an employment contract. *Piercing Pagoda, 351 A.2d at 212*. Furthermore, in *Ala. Binder*, this Court examined a restrictive covenant in an employment agreement made in conjunction with a buy-sell agreement. *Ala. Binder, 189 A.2d at 184*. Accordingly, Beemac argues that Pennsylvania case law does not support the district court's conclusion in *GeoDecisions* that we liberally construe the ancillary rule beyond the employment or buy-sell contracts. Appellee's Brief at 45.

IV.

HN7[] Our review of a trial court's order granting or denying preliminary injunctive relief is "highly deferential." *Summit Towne Ctr., Inc. v. Shoe Show of Rocky Mount, Inc., 573 Pa. 637, 828 A.2d 995, 1000 (Pa. 2003)*. Accordingly, we "examine the record to determine if there were any apparently reasonable **[**39]** grounds for the action of the court below." *Id.* In denying the injunction, the trial court relied on its conclusion that PLS did not establish a substantial likelihood of success on the merits. ***HN8***[] "We will find that a trial court had apparently reasonable grounds for its denial of injunctive relief where the trial court has properly found that any one of the . . . essential prerequisites for a preliminary injunction is not satisfied." *Warehime v. Warehime, 580 Pa. 201, 860 A.2d 41, 46 (Pa. 2004)* (citation and quotations omitted).[7]

[7] The six essential prerequisites are: (1) the injunction is necessary to prevent immediate and irreparable harm that cannot be adequately compensated by damages; (2) greater injury would result from refusing an injunction than from granting it; (3) the injunction will restore the parties to their status as it was immediately before the alleged wrongful conduct; (4) the activity sought

HN9[] "In assessing whether the common pleas court acted properly, we review **[*935]** its factual findings deferentially while resolving issues of law *de novo*. In this latter regard, we will interfere with the court's decision only where the rule of law relied upon was palpably erroneous or misapplied." *Rullex, 232 A.3d 620, 2020 WL 3244343 at *4* (citations and quotations omitted).

HN10[] Pennsylvania common law has treated restrictive covenants as restraints on trade that are void as against public policy unless they are ancillary to an otherwise valid contract. *Socko, 126 A.3d at 1277* ("[O]ur Commonwealth has a long, and virtually uniform, history of strongly disfavoring covenants in restraint of trade."); *Morgan's, 136 A.2d at 843* ("It has long been the rule at common law, that contracts in restraint of trade made independently **[**40]** of a sale of business or contract of employment are void as against public policy regardless of the valuableness of the consideration exchanged therein."). To determine the enforceability of a provision in restraint of trade that is ancillary, or supplementary, to the principal purpose of a contract, we employ a balancing test to determine the reasonableness of the restraint in light of the parties' interests that the restraint aims to protect and the harm to other contractual parties and the public. *See Hess v. Gebhard & Co. Inc., 570 Pa. 148, 808 A.2d 912, 917-18* (discussing the development of the balancing test); *see also GeoDecisions, 2010 U.S. Dist. LEXIS 128283, 2010 WL 5014514 at *4*. As part of this balancing test, courts also consider the reasonableness of the restraint's geographical scope as well as its duration of time. *See Socko, 126 A.3d at 1274*. Similarly, the Restatement (Second) of Contracts delineates the following test, identified as "the rule of reason," for evaluating the reasonableness of ancillary restraints on competition:

> (1) A promise to refrain from competition that imposes a restraint that is ancillary to an otherwise valid transaction or relationship is unreasonably in restraint of trade if
>
> > (a) the restraint is greater than is needed to protect the promisee's legitimate interest, or
> >
> > (b) the promisee's need **[**41]** is outweighed by the hardship to the promisor and the likely injury to the public.

RESTATEMENT (SECOND) OF CONTRACTS § 188(1). Further, this Court has explained that the reasonableness test is more stringent when examining restrictive covenants ancillary to an employment agreement than when evaluating restrictive covenants ancillary to the sale of a business. *Hayes v. Altman, 438 Pa. 451, 266 A.2d 269, 271 (Pa. 1970)*.

While the enforceability of a no-hire provision ancillary to a services contract between two businesses is an issue of first impression for this Court, we will apply the foregoing reasonableness test that applies to ancillary restraints on trade.[8] Here, the no-hire provision was ancillary **[*936]** to the principal purpose of the shipping contract between PLS and Beemac. The no-hire provision is a restraint on trade because the two commercial entities agreed to limit competition in the labor market by promising to restrict the employment mobility of PLS employees. *See RESTATEMENT (SECOND) OF CONTRACTS § 186(2)* ("A promise is in restraint of trade if its performance would limit competition in any business"). PLS had a legitimate interest in preventing its business partners from poaching its employees, who had developed specialized knowledge and expertise in the logistics industry during their training at PLS. *See* PLS's Brief **[**42]** at 25, 32; *Morgan's, 136 A.2d at 846* (recognizing an employer has an interest in preventing its employees from using their specialized knowledge and skills in competition with the employer).

---

to be restrained is actionable, the right to relief is manifest, and the moving party must show it is likely to prevail on the merits; (5) the injunction is reasonably suited to abate the offending activity; and (6) a preliminary injunction will not harm the public interest. *Warehime, 860 A.2d at 46-47*.

[8] This is consistent with the United States Department of Justice's (DOJ) approach to enforcing federal ***antitrust law***. In 2016, the DOJ and Federal Trade Commission (FTC) issued guidance for human resources professionals explaining that non-ancillary no-poaching agreements between employers—short-handed as "naked" no-poach agreements—are per se illegal. DOJ/FTC Antitrust Guidance for HR Professionals (Oct. 2016), at 3, https://www.justice.gov/atr/file/903511/download. In contrast, the DOJ advised that legitimate joint ventures are not per se illegal and has advocated for the rule of reason to apply to ancillary restraints on trade. *Id.; see also* DOJ Antitrust Division Update, No-Poach Approach, 9/30/19, https://www.justice.gov/atr/division-operations/division-update-spring-2019/no-poach-approach (discussing the statement of interest the DOJ filed in cases involving no-poach agreements in fast food franchises).

However, the no-hire provision is both greater than needed to protect PLS's interest and creates a probability of harm to the public. It is overbroad because it precludes Beemac, and any of its agents or independent contractors, from hiring, soliciting, or inducing any PLS employee or affiliate for the one-year term of the contract plus two years after the contract ends. The no-hire provision precluded Beemac from hiring or soliciting all PLS employees, regardless of whether the PLS employees had worked with Beemac during the term of the contract. As the Superior Court noted, "[b]y the plain reading of the language of this restrictive provision, it was meant to have effect in the broadest possible terms." *Pittsburgh Logistics Sys., 202 A.3d at 808*.

Further, the no-hire provision creates a likelihood of harm to the public, *i.e.*, non-parties to the contract. The no-hire provision impairs the employment opportunities and job mobility of PLS employees, who are not parties to the contract, without their knowledge or consent and without providing consideration **[**43]** in exchange for this impairment. Further, the injury to PLS employees is not hypothetical. In this case, PLS enforced the no-hire provision by seeking to enjoin Beemac from employing the former PLS employees who had already left PLS and obtained employment with Beemac. If PLS was successful, the effect of its enforcement of the no-hire provision would have deprived its former employees of their current jobs and livelihoods.[9] Moreover, the no-hire provision undermines free competition in the labor market in the shipping and logistics industry, which creates a likelihood of harm to the general public. *See, e.g.*, Donald J. Polden, *Restraints on Workers' Wages and Mobility: No-Poach Agreements and the Antitrust Laws*, *59 SANTA CLARA L. REV. 579, 610* ("[T]he high percentage of U.S. workers who are subject to agreements and covenants restricting their employment opportunities are contributing to slow wage growth and rising inequality. For example, recent studies have demonstrated that worker wages are 4%-5% higher in states that do not recognize or enforce worker non-compete restraints.") (footnotes omitted). Balancing PLS's interest against the overbreadth of the no-hire provision and the likelihood of harm to the public, **[**44]** we conclude that the no-hire provision is unreasonably in restraint of trade and therefore unenforceable.

[*937] Accordingly, the order of the Superior Court is affirmed.

Chief Justice Baer and Justices Saylor, Todd, Donohue, Dougherty and Wecht join the opinion.

End of Document

[9] On December 1, 2016, the trial court granted injunctive relief precluding Beemac from employing the former PLS employees. The injunction remained in effect for three weeks, until the trial court vacated it on December 22, 2016.

HN1[] **Summary Judgment, Burdens of Proof**

Under Fed. R. Civ. P. 56(a), summary judgment may be granted only if all the submissions taken together show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law. The moving party bears the initial burden of demonstrating the absence of a genuine issue of material fact. A fact is material if it might affect the outcome of the suit under the governing law, and is genuinely in dispute if the evidence is such that a reasonable jury could return a verdict for the nonmoving party. The movant may meet the burden by showing that the nonmoving party has failed to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Movant Persuasion & Proof

HN2[] **Entitlement as Matter of Law, Appropriateness**

If a party moving for summary judgment meets his burden, the nonmoving party must set out specific facts showing a genuine issue for trial. When ruling on a summary judgment motion, the district court must construe the facts in the light most favorable to the non-moving party and must resolve all ambiguities and draw all reasonable inferences against the movant. Still, the nonmoving party must do more than simply show that there is some metaphysical doubt as to the material facts, and cannot rely on mere speculation or conjecture as to the true nature of the facts to overcome a motion for summary judgment. Furthermore, mere conclusory allegations or denials cannot by themselves create a genuine issue of material fact where none would otherwise exist.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Evidence > Inferences & Presumptions > Inferences

Civil Procedure > ... > Summary Judgment > Motions for Summary Judgment > Cross Motions

HN3[] **Entitlement as Matter of Law, Appropriateness**

When considering cross-motions for summary judgment, a court must evaluate each party's motion on its own merits, taking care in each instance to draw all reasonable inferences against the party whose motion is under consideration. In the context of antitrust cases, summary judgment is particularly favored because of the concern that protracted litigation will chill pro-competitive market forces. Although all reasonable inferences will be drawn in favor of the non-movant, those inferences must be reasonable in light of competing inferences of acceptable conduct.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

HN4[] **Sherman Act, Claims**

A tying arrangement is an agreement by a party to sell one product but only on the condition that the buyer also purchases a different, or tied, product, or at least agrees that he will not purchase that product from any other supplier. To state a tying claim under the Sherman Act, a plaintiff must prove that: (1) the sale of one product, the tying product, is conditioned on the purchase of a separate product, the tied product; (2) the seller uses actual coercion to force buyers to purchase the tied product; (3) the seller has sufficient economic power in the tying product market to coerce purchasers into buying the tied product; (4) the tie-in has anticompetitive effects in the tied market; and (5) a not insubstantial amount of interstate commerce is involved in the tied market.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN5[] **Scope, Monopolization Offenses**

The separate product element requires that the alleged tying product and tied product be separate, i.e., they must exist in separate and distinct product markets. That is because if there is no separate market for the allegedly tied product, there can be no fear of leveraging a monopoly in one market to harm competition in a second market. Courts apply a consumer demand test to determine whether two products are separate for ***antitrust law*** purposes. Two products are separate only if there is a sufficient demand for the purchase of the tied product separate from the tying product to identify a distinct product market in which it is efficient to offer the former separately from the latter. Separateness turns not on the functional relation between the products, but rather on the character of the demand for the two items. Factors relevant to whether there is separate and distinct consumer demand for the two products include, among others, the history of the products being, or not being, sold separately and the sale of the products separately in similar markets.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN6[] **Tying Arrangements, Sherman Act Violations**

Actual coercion by a seller that in fact forces a buyer to purchase a tied product is an indispensable element of a tying violation. Indeed, the essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. When such forcing is present, competition on the merits in the market for the tied item is restrained and the Sherman Act is violated. The element of actual coercion is designed to weed out the many cases where the bundling of separate products is due to consumer demand. A seller's use of strong persuasion, encouragement, or cajolery to the point of obnoxiousness to induce a buyer to buy its full line of products does not amount to actual coercion, which is present only if the seller goes beyond persuasion and conditions its buyer's purchase of one product on the purchase of another product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN7[] **Tying Arrangements, Per Se Rule**

An unremitting policy of tie-in, if accompanied by sufficient market power in the tying product to appreciably restrain competition in the market for the tied product, constitutes the requisite coercion given foreclosure of a not insubstantial volume of interstate commerce. Thus, when a seller has a policy of never offering a tying product separately from a tied product, allegations of individual coercion are unnecessary.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN8[] **Tying Arrangements, Sherman Act Violations**

Under Hill, an unremitting policy of a tie only transforms into actual coercion where the defendant has sufficient market power such that its policy can appreciably restrain competition in the market for the tied product and foreclose a not insubstantial volume of interstate commerce.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN9[] **Actual Monopolization, Monopoly Power**

An unremitting policy of a tie constitutes actual coercion if, and only if, the other elements of a tying claim, market power, separate products, and the foreclosure of a not insubstantial amount of commerce, are met. Therefore, if a plaintiff proves that a defendant has an unremitting policy of a tie that applies to all customers, the plaintiff need not present proof of individualized coercion, but must still prove the other elements of its tying claim in order to establish that the unremitting policy in itself constitutes actual coercion.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN10[] **Robinson-Patman Act, Claims**

Without market power, there is little risk of anticompetitive harm from a seller's tie-in. Market power is the ability of a single seller to raise price and restrict output. It can be shown by specific evidence of a seller's ability to control prices or exclude competitors from the market. Market share is a proxy for market power. A high market share alone, however, is insufficient to infer a seller's market power if other characteristics of the product market, such as low barriers to entry, high cross elasticity of demand, or technological developments in the industry, interfere with the seller's control of prices. Indeed, in a tying case, the best way to plead market power is to allege facts that, if proven, establish directly that the price of the tied package is higher than the price of components sold in competitive markets.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN11[] **Per Se Rule & Rule of Reason, Sherman Act**

There must be a substantial potential for impact on competition in the tied market in order to justify condemnation of an alleged tying arrangement. If only a single purchaser were forced with respect to the purchase of a tied item, the resultant impact on competition would not be sufficient to warrant the concern of ***antitrust law***. "Substantial" in this context is defined as substantial enough in terms of dollar-volume so as not to be merely de minimis. There is no magic number that definitively establishes whether a plaintiff has foreclosed a not insubstantial amount of potential sales for the tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN12[] Tying Arrangements, Sherman Act Violations

For purposes of determining whether the amount of commerce foreclosed is too insubstantial to warrant prohibition of the practice, the relevant figure is the total volume of sales tied by the sales policy under challenge, not the portion of the total accounted for by the particular plaintiff who brings suit.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN13[] Per Se Rule Tests, Manifestly Anticompetitive Effects

To prove anticompetitive effects, a plaintiff must prove that the defendants' challenged behavior had an actual adverse effect on competition as a whole in the tied product market. Anti-competitive effects may be proven directly by control of prices or exclusion of competition. If plaintiffs establish anticompetitive effects, the burden shifts to defendants to justify their tying arrangement. Assuming defendants can provide such proof, the burden shifts back to the plaintiffs to prove that any legitimate competitive benefits offered by defendants could have been achieved through less restrictive means.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN14[] Sherman Act, Claims

Antitrust injury simply means injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. To establish antitrust injury, a private litigant must prove injury in its business or property by reason of the violation and that the violation was at least a material cause of the plaintiff's injury. In other words, a plaintiff must show (1) an injury-in-fact; (2) that has been caused by the violation; and (3) that is the type of injury contemplated by the antitrust statute. The antitrust injury requirement thus ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior.

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN15[] Summary Judgment, Evidentiary Considerations

A court may only consider admissible evidence in ruling on a motion for summary judgment. At the same time, material relied on at summary judgment need not be admissible in the form presented to the district court. Rather, so long as the evidence in question will be presented in admissible form at trial, it may be considered on summary judgment. Thus, under Fed. R. Civ. P. 56(c)(2), a party may object that the material cited to support or dispute a fact cannot be presented in a form that would be admissible in evidence.

Evidence > ... > Exemptions > Statements by Coconspirators > Members of Conspiracy

HN16[] Statements by Coconspirators, Members of Conspiracy

Under Fed. R. Evid. 803(3), statements of a customer as to his reasons for not dealing with a supplier are admissible for the limited purpose of demonstrating the customer's motive, although not as evidence of the facts recited as furnishing the motives.

Evidence > ... > Statements as Evidence > Hearsay > Hearsay Within Hearsay

HN17[] Hearsay, Hearsay Within Hearsay

Each hearsay statement within multiple hearsay statements must have a hearsay exception in order to be admissible.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN18[] Remedies, Damages

To establish antitrust injury, there must be a causal connection between an antitrust violation and an injury sufficient for the trier of fact to establish that the violation was a material cause of or a substantial factor in the occurrence of damage. The fact of injury must be demonstrated with reasonable certainty and may not be speculative, and failure to satisfactorily prove that a plaintiff is injured by reason of the defendant's alleged antitrust violations is sufficient to defeat the antitrust claims.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN19[] Remedies, Damages

While antitrust plaintiffs are entitled to a relaxed standard of proof with respect to the amount of damages they suffered as a result of a defendant's conduct, the relaxed standard of proof applies to the amount of damages, not to whether the violation caused damage. That said, the amount of harm a plaintiff needs to prove to meet its burden of demonstrating antitrust injury is not high; rather, a plaintiff need only demonstrate proof of some damage flowing from the unlawful conduct; inquiry beyond that minimum point goes only to the amount and not the fact of damage. Despite the relatively low burden, relevant decisions suggest that a trivial effect on a claimant's sales is insufficient to demonstrate antitrust injury.

Antitrust & Trade Law > Procedural Matters

HN20[] **Antitrust & Trade Law, Procedural Matters**

An antitrust plaintiff need not necessarily prove that the defendant's misconduct was the sole cause of the plaintiff's alleged injury, and a plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN21[] **Sherman Act, Claims**

In addition to establishing injury-in-fact and causation, to establish antitrust injury, an antitrust plaintiff must prove that its injury is of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful. Thus, allegations of an injury to a competitor are insufficient unless accompanied by allegations of injury to competition as well.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN22[] **Standing, Requirements**

A competitor's exclusion from a market is a conventional form of antitrust injury because it is exactly the type of injury that antitrust laws were designed to prevent and flows from the competition-reducing aspect of defendant's conduct. Moreover, a competitor's loss of sales constitutes an injury of the sort protected by the antitrust laws if it stems from conduct that prevents potential customers from obtaining a desired product.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN23[] **Expert Witnesses, Daubert Standard**

Under Fed. R. Evid. 702, a court is charged with a gatekeeping obligation with respect to expert testimony: the trial judge must ensure that an expert's testimony both rests on a reliable foundation and is relevant to the task at hand.

Evidence > ... > Testimony > Expert Witnesses > Qualifications

HN24[] Expert Witnesses, Qualifications

To determine whether a witness qualifies as an expert, courts compare the area in which the witness has superior knowledge, education, experience, or skill with the subject matter of the proffered testimony.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN25[] Expert Witnesses, Daubert Standard

Under Daubert, factors relevant to determining reliability include the theory's testability, the extent to which it has been subjected to peer review and publication, the extent to which a technique is subject to standards controlling the technique's operation, the known or potential rate of error, and the degree of acceptance within the relevant scientific community. The reliability inquiry is a flexible one, and the factors to be considered depend upon the particular circumstances of the particular case at issue. When applying the gatekeeping obligation to non-scientific testimony, a district court may choose to utilize some or all of the above Daubert factors, or it may look to other indicia of reliability. In undertaking the flexible inquiry, a district court must focus on the principles and methodology employed by the expert, without regard to the conclusions the expert has reached or the district court's belief as to the correctness of those conclusions.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN26[] Expert Witnesses, Daubert Standard

When an expert opinion is based on data, a methodology, or studies that are simply inadequate to support the conclusions reached, Daubert and Fed. R. Evid. 702 mandate the exclusion of that unreliable opinion testimony. In other words, a court may conclude that there is simply too great an analytical gap between the data and the opinion proffered. Frequently, though, gaps or inconsistencies in the reasoning leading to an expert's opinion go to the weight of the evidence, not to its admissibility.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > ... > Examination > Cross-Examinations > Scope

Evidence > ... > Expert Witnesses > Credibility of Witnesses > Impeachment

HN27[] Expert Witnesses, Daubert Standard

Ultimately, a district court has the same broad latitude when it decides how to determine reliability as it enjoys in respect to its ultimate reliability determination. Moreover, vigorous cross-examination, presentation of contrary evidence and careful instruction on the burden of proof are the traditional and appropriate means of attacking shaky but admissible evidence.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN28[] Remedies, Damages

The actual amount of an antitrust plaintiff's damages need not be proven to the same degree of certainty as proving some quantum of damages, given the difficulty of accurately constructing a hypothetical world untainted by the defendant's challenged conduct. The wrongdoer is not entitled to complain that the damages cannot be measured with the exactness and precision that would be possible if the case, which he alone is responsible for making, were otherwise. Indeed, the most elementary conceptions of justice and public policy require that the wrongdoer shall bear the risk of the uncertainty which his own wrong has created. Therefore, an antitrust plaintiff need only come forward with substantial evidence from which a jury can determine the amount of damages from a just and reasonable estimate of the damage based upon relevant data. At the same time, even where a defendant by his own wrong has prevented a more precise computation, the jury may not render a verdict based on speculation or guesswork.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Torts > Remedies > Damages > Proof

HN29[] **Remedies, Damages**

A more lenient standard in proving the amount of damages should only be applied where an antitrust plaintiff puts forth proof of the defendant's wrongful acts and their tending to injure plaintiffs' business, and from evidence in the decline of prices, profits and values, not shown to be attributable to other causes.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN30[] **Expert Witnesses, Daubert Standard**

Experts have wide latitude with respect to the data on which they rely, and challenges concerning the reliability of an expert's data often present questions of weight, rather than admissibility. Nonetheless, the general principle does not divest a court of its gatekeeping obligation to ensure that an expert's testimony is based on sufficient facts or data to pass muster under Fed. R. Evid. 702.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

HN31[] **Expert Witnesses, Daubert Standard**

An expert's lack of access to reliable data does not justify use of unreliable data, and militates against admission under Daubert.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN32[] **Remedies, Damages**

The general rule is that arguments regarding the comparability or appropriateness of a particular benchmark go to the weight, not the admissibility, of a benchmarking analysis. Moreover, a benchmark need not be perfectly comparable, so long as it allows the jury to calculate a reasonable estimate of damages as required under the antitrust laws. That is particularly true where a defendant's anticompetitive conduct has rendered selection of a perfectly comparable benchmark difficult or impossible. Nonetheless, there are some circumstances under which, even applying the foregoing liberal standard, a benchmarking analysis may be so utterly deficient as to warrant its exclusion. One such circumstance is where the expert did not merely select arguably inappropriate benchmarks, but utterly failed to perform any substantive analysis of those factors most relevant to comparability.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > Clayton Act > Penalties

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN33[] **Standing, Clayton Act**

Where there is insufficient proof of the amount of damages, proof of an antitrust violation and the fact of damage is a sufficient basis for an award of nominal damages under § 4 of the Clayton Act.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN34[] **Standing, Requirements**

Typically, the inability to prove past damages does not compel a finding that the plaintiff faces no threat of antitrust injury in the future, and thus a plaintiff that fails to prove past damages may still pursue a claim for forward-looking injunctive relief. However, in certain situations, the lack of past injury may indicate that future injury is improbable.

Opinion

[*283] MEMORANDUM-DECISION AND ORDER

I. INTRODUCTION

Plaintiff AngioDynamics, Inc. ("AngioDynamics") brings this antitrust action against Defendants C.R. Bard, Inc. and Bard Access Systems, Inc. (collectively, "Bard"), asserting a claim of illegal tying in violation of *section 1 of the Sherman Act* (codified at *15 U.S.C. § 1*) under "per se" and "rule of reason" theories of liability. (Dkt. No. 1). AngioDynamics seeks treble damages, a permanent injunction, and declaratory relief. (*Id.* at 29). Presently before the Court are: (1) AngioDynamics' motion for partial summary judgment on liability and antitrust injury, (Dkt. No. 134); (2) Bard's motion for summary judgment seeking dismissal of the complaint, (Dkt. No. 133); and (3) Bard's motion in limine to preclude the trial testimony of AngioDynamics' causation **[**2]** and damages expert, Dr. Alan Frankel, (Dkt. No. 132). The Court heard oral argument on the motions on April 6, 2021. For the reasons below, both parties' motions for summary judgment are denied, and Bard's motion in limine is granted.

II. FACTS [1]

This case centers on AngioDynamics' claim that Bard's policy of only selling the proprietary stylet for its Tip Location System ("TLS") preloaded into its own peripherally inserted central catheters ("PICCs"), and refusing to sell its TLS stylet separately for use with its competitors' PICCs, constitutes an illegal tie in violation of the Sherman Act. The facts and evidence relevant to the Court's resolution of the pending motions are summarized below.

[*284] A. Background on PICCs and TLSs

1. PICC and TLS Technology

Bard and AngioDynamics compete to develop, manufacture, market, and sell vascular access medical devices, including PICCs, to hospitals and other medical care providers. (Dkt. No. 133-2, ¶¶ 1-2; Dkt. No. 134-2, ¶ 1; Dkt. No. 144-1, ¶¶ 1-2; Dkt. No. 146, ¶ 1). PICCs are long, thin, soft, flexible catheters inserted into the body through a vein, most commonly the basilica vein in the upper arm, and navigated to the distal superior vena cava, **[**3]** the large vein leading to the right atrium of the heart. (Dkt. No. 133-2, ¶¶ 3-4; Dkt. No. 134-2, ¶ 2; Dkt. No. 144-1, ¶¶ 3-4; Dkt. No. 146, ¶ 2). Clinicians use PICCs to deliver medications, fluids, and nutrients into a patient's body, sample blood, and power-inject contrast media. (Dkt. No. 133-2, ¶ 3; Dkt. No. 134-2, ¶ 3; Dkt. No. 144-1, ¶ 3; Dkt. No. 146, ¶ 3). PICCs are generally suited for patients requiring long-term intravenous medical treatment. (Dkt. No. 134-2, ¶ 3; Dkt. No. 146, ¶ 3). PICCs can be placed either at a patient's bedside by a nurse or in an interventional radiology ("IR") suite, usually by a physician. (Dkt. No. 134-2, ¶ 14; Dkt. No. 146, ¶ 14).

During placement of a PICC, clinicians often use a guidewire (also known as a "stylet") inside the PICC to stiffen it so that it can be threaded through the patient's veins. (Dkt. No. 133-2, ¶ 5; Dkt. No. 144-1, ¶ 5). After completing the PICC placement procedure, the clinician will remove the stylet from the PICC and discard it. (Dkt. No. 133-2, ¶ 5; Dkt. No. 144-1, ¶ 5). Because there are several places where a patient's veins branch before reaching the superior vena cava, clinicians sometimes route PICCs incorrectly. **[**4]** (Dkt. No. 133-2, ¶ 6; Dkt. No. 144-1, ¶ 6). In addition, sometimes clinicians get the final placement incorrect. (Dkt. No. 133-2, ¶ 7; Dkt. No. 144-1, ¶ 7). Historically, clinicians used a chest x-ray or fluoroscopy (a medical imaging technique that uses x-rays) to confirm that a PICCs' final placement was correct. (Dkt. No. 133-2, ¶¶ 7, 12; Dkt. No. 134-2, ¶ 10; Dkt. No. 144-1, ¶¶ 7, 12; Dkt. No. 146, ¶ 10).

To assist with the PICC navigation process and minimize the complications associated with incorrect PICC placement, certain companies developed TLSs. (Dkt. No. 133-2, ¶ 8; Dkt. No. 144-1, ¶ 8). TLSs can offer two key functions: pinpointing the location of the stylet as it moves through the body ("navigation") and confirming the PICC's location once it has been placed ("confirmation"). (Dkt. No. 133-2, ¶ 8; Dkt. No. 144-1, ¶ 8). A TLS may feature navigation functionality, confirmation functionality, or both. (Dkt. No. 133-2, ¶ 9; Dkt. No. 144-1, ¶ 9). Navigation technology uses magnetic tracking or Doppler technology to provide information regarding directionality of the PICC as it moves through the patient's veins, assisting clinicians in threading the PICC. (Dkt. No. 133-2, ¶ **[**5]** 10; Dkt. No. 134-2, ¶ 13; Dkt. No. 144-1, ¶ 10; Dkt. No. 146, ¶ 13). Confirmation technology enables a clinician to confirm the final location of the PICC within the superior vena cava using a patient's electrocardiographic ("ECG") waveform. (Dkt. No. 133-2, ¶ 11; Dkt. No. 134-2, ¶ 11; Dkt. No. 144-1, ¶ 11; Dkt. No. 146, ¶ 11).

---

[1] The following facts are drawn from the parties' statements of undisputed material facts and responses pursuant to *Local Rule 56.1* (formerly *Local Rule 7.1(a)(3)*), (Dkt. Nos. 133-2, 134-2, 144-1, 146), to the extent those facts are well-supported by pinpoint citations to the record, as well as the exhibits attached thereto and cited therein to the extent they could "be presented in a form that would be admissible in evidence" at trial. *Fed. R. Civ. P. 56(c)(2)*. In considering the parties' cross-motions for summary judgment, the Court "in each case constru[es] the evidence in the light most favorable to the non-moving party." *Krauss v. Oxford Health Plans, Inc., 517 F.3d 614, 621-22 (2d Cir. 2008)*.

While many clinicians now use TLSs to place PICCs because doing so is less expensive, less time consuming, and more accurate than placing PICCs without TLSs, not all clinicians use TLSs. (Dkt. No. 133-2, ¶ 12; Dkt. No. 134-2, ¶ 10; Dkt. No. 144-1, ¶ 12; Dkt. No. 146, ¶ 10). For example, physicians placing PICCs in an IR suite still typically use fluoroscopy, rather than a TLS, to confirm PICC placement. (Dkt. No. 133-2, ¶ 12; Dkt. No. 134-2, ¶ 16; Dkt. No. 144-1, ¶ 12; Dkt. No. 146, ¶ 16). There are also some hospitals in **[*285]** which nurses continue to place PICCs without navigation assistance or use chest x-rays rather than TLSs for confirmation. (Dkt. No. 133-2, ¶ 12; Dkt. No. 134-2, ¶ 17; Dkt. No. 144-1, ¶ 12; Dkt. No. 146, ¶ 17). However, a majority of PICCs placed by nurses at a patient's bedside use TLSs with navigation capabilities. (Dkt. No. 133-2, ¶ 12; Dkt. **[**6]** No. 134-2, ¶ 17; Dkt. No. 144-1, ¶ 12; Dkt. No. 146, ¶ 17).

2. PICC Purchasing Decisions

PICCs differ from each other in a variety of ways, including with respect to the material they are made from, the number of lumens (tubes or channels), the outside diameter, whether the PICC is valved (which can help prevent the backflow of blood into the PICC) or non-valved, and whether the PICC is preloaded with a TLS stylet. (Dkt. No. 133-2, ¶ 13; Dkt. No. 144-1, ¶ 13). Manufacturers typically sell PICCs in a kit that also contains various accessories, which vary depending on, among other things, whether the PICC will be placed by a nurse at the patient's bedside or by a physician in an IR suite. (Dkt. No. 133-2, ¶¶ 14-15; Dkt. No. 144-1, ¶¶ 14-15).

The process by which hospitals decide whether to purchase a particular manufacturer's PICC is "complex," "not monolithic" and "varies by hospital." (Dkt. No. 133-2, ¶¶ 15-17; Dkt. No. 144-1, ¶¶ 15-17). Depending on the hospital, various constituencies may be involved in the purchasing decision, including doctors, nurses and representatives from the supply chain, risk management and infection control departments. (Dkt. No. 133-2, ¶ 15). In some cases, **[**7]** hospitals have "value analysis committees," or "VACs," which play a role in the procurement process and consist of representatives from various hospital departments. (*Id.*). Some hospitals are part of Group Purchasing Organizations ("GPOs") or Integrated Delivery Networks ("IDNs"), which negotiate pricing for their member hospitals and have played an increasingly larger role in influencing the purchasing decisions of their member hospitals. (Dkt. No. 133-2, ¶ 16).

Hospitals consider a variety of factors when deciding whether to purchase PICCs, or particular types of PICCs, from a given supplier, including, among other things, price, quality of the PICCs, clinical outcomes, safety, PICC functionality and features (including whether they are preloaded with a TLS stylet or not, whether they are valved or not, and whether they have a flare-tip or small diameter, among other factors), the components of the kit in which the PICCs come (or the potential kit options), the breadth of a manufacturer's product portfolio, the benefits of dealing with a single vendor for multiple products, the manufacturer's clinical team and training and customer support, and the requirements of GPO and IDN contracts. **[**8]** (Dkt. No. 133-2, ¶ 17). Different hospitals may weigh and prioritize these factors differently, depending on their particular needs and concerns. (Dkt. No. 144-1, ¶¶ 15-17).

B. Relevant Competitors and their Key Products

Several companies compete in the sale of PICCs. The three largest competitors, in terms of market share, are Bard, AngioDynamics, and Teleflex Incorporated ("Teleflex"). (Dkt. No. 133-2, ¶ 21; Dkt. No. 144-1, ¶ 21). These competitors' products that are most relevant to this litigation are described below.

1. AngioDynamics' BioFlo PICCs

In 2012, AngioDynamics began selling PICCs known as BioFlo PICCs after acquiring the technology from another company. (Dkt. No. 133-2, ¶ 33; Dkt. No. 144-1, ¶ 33). BioFlo PICCs are the first PICCs in the market to use Endexo Technology, a technology designed to reduce thrombus **[*286]** accumulation (blood clots). (Dkt. No. 134-2, ¶ 4; Dkt. No. 146, ¶ 6). Thrombus accumulation is a common problem associated with PICC placement that can lead to serious complications such as deep vein thrombosis ("DVT") and pulmonary embolism ("PE"). (Dkt. No. 134-2, ¶¶ 5-6; Dkt. No. 146, ¶¶ 5-6). The parties dispute whether the clinical evidence and published literature **[**9]** establishes that BioFlo is actually effective at reducing thrombus accumulation and its resulting complications, with both parties citing record evidence in support of their respective positions. (Dkt. No. 133-2, ¶¶ 34-36; Dkt. No. 134-2, ¶¶ 4, 7; Dkt. No. 144-1, ¶¶ 34-36; Dkt. No. 146, ¶¶ 4, 7).

Bard has spent significant time, money and energy working to develop a PICC with an anti-thrombus coating, including with Endexo Technology, but has been unsuccessful. (Dkt. No. 134-2, ¶ 8; Dkt. No. 146, ¶ 8). Bard claims, however, that its FT PICC, which has a taper with a smaller diameter at the axillary arch in the arm vein where the majority of DVTs occur, has proven effective at reducing DVT rates. (Dkt. No. 146, ¶ 8).

2. Bard's TLS

Bard sells PICCs under several brand names, has been selling PICCs for decades, and sells the majority of PICCs in the U.S. (Dkt. No. 133-2, ¶ 22; Dkt. No. 144-1, ¶ 22). In 2006, Bard became the first company to develop a TLS with navigation technology, which it called the Sherlock tip navigation system. (Dkt. No. 133-2, ¶ 24; Dkt. No. 144-1, ¶ 24). In 2011, Bard received FDA approval for a tip confirmation system called Sapiens. (Dkt. No. 133-2, ¶ 24; Dkt. No. **[**10]** 144-1, ¶ 24). Then, in 2012, Bard launched the Sherlock 3CG TLS, which included both navigation and confirmation capabilities. (Dkt. No. 133-2, ¶ 24; Dkt. No. 144-1, ¶ 24). Bard's Sherlock 3CG system, which only works with Bard's special, patented proprietary stylet, is the first and only TLS to combine three technologies: (i) ultrasound technology to identify a suitable vein for inserting the PICC;[2] (ii) magnetic tracking navigation technology to monitor and guide the PICC through the venous system; and (iii) ECG technology to confirm the final location of the PICC's tip in the superior vena cava. (Dkt. No. 133-2, ¶¶ 25-26; Dkt. No. 134-2, ¶ 21; Dkt. No. 144-1, ¶¶ 25-26; Dkt. No. 146, ¶ 21).

Bard only sells its proprietary stylet pre-loaded into its PICCs; it does not sell the stylet "single sterile," i.e. as a standalone product that can be loaded into a different company's PICCs by a nurse or other medical professional at the patient's bedside. (Dkt. No. 133-2, ¶¶ 26-27, 30; Dkt. No. 134-2, ¶¶ 22-23; Dkt. No. 144-1, ¶¶ 26-27, 30; Dkt. No. 146, ¶¶ 22-23). As a result, a customer who wishes to use Bard's TLS can *only* do so by purchasing the stylet preloaded into a Bard PICC; there is **[**11]** no option to purchase a Bard TLS separately and combine it with a competitor's PICC. (Dkt. No. 133-2, ¶ 30; Dkt. No. 134-2, ¶ 22; Dkt. No. 144-1, ¶ 30; Dkt. No. 146, ¶ 22). To date, Bard has only made a single exception to its TLS policy: sales of a standalone stylet for a limited time to Cleveland Clinic, the circumstances of which are discussed further below in Section II.E.5.a *infra*. (Dkt. No. 133-2, ¶ 30; Dkt. No. 134-2, ¶ 23; Dkt. No. 144-1, ¶ 30; Dkt. No. 146, ¶ 23). While Bard does not sell its TLS stylets separately from its PICCs, it does sell its PICCs separately **[*287]** from its stylets and acknowledges that certain customers combine its PICCs with other companies' TLSs, though it does not expressly "condone the use of an alternative stylet with [its PICCs]." (Dkt. No. 134-2, ¶ 24; Dkt. No. 146, ¶ 24).

Bard executives' stated justification for its TLS policy is that loading Bard's TLS stylet into a PICC at a patient's bedside increases the risk of stylet breakage, serious patient injury, contamination of the sterile field and resulting patient infection. (Dkt. No. 133-2, ¶ 28). However, AngioDynamics challenges this justification, citing to analyses by several of its experts disputing **[**12]** that there is a clinical benefit to preloading a TLS stylet or an increased risk from loading the stylet bedside. (Dkt. No. 144-1, ¶ 28). Bard also claims that it designed its TLS stylet to be preloaded into its PICCs by trained operators in its manufacturing facilities and not by nurses at a patient's bedside, but AngioDynamics disputes this, noting that Bard has FDA approval to sell its TLS stylet single-sterile for bedside insertion, which it obtained in connection with its decision to sell Cleveland Clinic a single-sterile stylet. (Dkt. No. 133-2, ¶ 29; Dkt. No. 144-1, ¶ 29).

---

[2] While Bard's TLS system combines ultrasound with navigation and confirmation technology, "ultrasound is universally available," "there are many [ultrasound systems] in the market," and a hospital can use any ultrasound system, including Bard's or another company's, in conjunction with Bard's TLS. (Dkt. No. 146, ¶ 21).

According to AngioDynamics, aside from Bard's sales of a single-sterile stylet to Cleveland Clinic, Bard "took steps to hide the fact that it had FDA approval to sell its stylet single sterile and attempted to block customers from ordering the stylet single sterile"; Bard disagrees with this characterization, and justifies its actions by claiming that Bard "did not want to release false information to the market by suggesting that the product was available to the market broadly when in fact it was not." (Dkt. No. 133-2, ¶ 39; Dkt. No. 146, ¶ 39). AngioDynamics cites to the following record evidence:

- A Bard **[**13]** executive wrote to team members, "Fucking A. Keep on down low!" when referring to Bard's application to the FDA to sell its TLS stylet as a standalone product. (Dkt. No. 138-12, at 2).
- A Bard vice president told others at Bard that Bard's decision to make the standalone stylet available to Cleveland Clinic was "top secret[.]" (Dkt. No. 138-13, at 2).
- A Bard product manager instructed Bard employees to keep any product information about the standalone TLS stylet "private as much as possible," explaining that "[w]e don't want to publicize that we offer a standalone Sherlock 3CG option to the masses." (Dkt. No. 138-14, at 3).

- When Bard's corporate representative was asked why Bard did not want to publicize the standalone option to the masses, he testified that Bard "would not have wanted to create demand for it." (Dkt. No. 138-15, at 8). He also testified that Bard did not want to publicize the "one-off experiment with the Cleveland Clinic" because "the only reason it worked for Cleveland was because we fully understood that risk and we had a complete connectivity with the clinical management in a hospital that satisfied us we could on-board this safely," and that Bard did not want **[**14]** to "promot[e] something when it was a limited market release." (Dkt. No. 147-16, at 22-23).
- The ordering information for Bard's standalone TLS stylet was not available on Bard's computer ordering system. (Dkt. No. 138-2, at 4).

- A Bard PICC Product Manager instructed that the product code for Bard's standalone TLS stylet "should remain 'invisible' to all of our customers" except for Cleveland Clinic and "should not be published **[*288]** in any pricing catalogs, online, etc." (Dkt. No. 138-18, at 2).

3. AngioDynamics' Attempts to Acquire a TLS

Since at least 2011, AngioDynamics has attempted to develop or acquire a TLS. (Dkt. No. 133-2, ¶ 48; Dkt. No. 134-2, ¶ 52; Dkt. No. 144-1, ¶ 48; Dkt. No. 146, ¶ 52). Since then, there have been times during which AngioDynamics offered a TLS. (Dkt. No. 133-2, ¶¶ 49-50; Dkt. No. 144-1, ¶¶ 49-50). For example, from 2013 through 2016, pursuant to a license from another company, AngioDynamics sold a confirmation-only TLS called Celerity, for which it attempted to develop a navigation component. (Dkt. No. 133-2, ¶ 51; Dkt. No. 134-2, ¶ 53; Dkt. No. 144-1, ¶ 51; Dkt. No. 146, ¶ 53). However, in January 2016, when the Celerity technology was up for sale, Teleflex **[**15]** outbid AngioDynamics and acquired the technology, at which point AngioDynamics ceased its efforts to obtain FDA approval for navigation-enabled Celerity and discontinued selling Celerity aside from a small number of units from its remaining inventory. (Dkt. No. 133-2, ¶ 52; Dkt. No. 134-2, ¶ 54; Dkt. No. 144-1, ¶ 52; Dkt. No. 146, ¶ 54).[3] In addition to Celerity, AngioDynamics has offered other TLSs at times in the past, but it has never offered a TLS with both navigation and confirmation capabilities. (Dkt. No. 133-2, ¶¶ 49-50; Dkt. No. 144-1, ¶¶ 49-50). In late 2019, AngioDynamics acquired a TLS called C3 Wave, which has confirmation, but not navigation, capabilities. (Dkt. No. 133-2, ¶ 56; Dkt. No. 144-1, ¶ 56). Several AngioDynamics executives have publicly stated their belief that C3 Wave will help AngioDynamics compete in the PICC market, though deposition testimony from AngioDynamics' General Manager of Vascular Access clarified that these statements refer to the more limited

---

[3] In January 2017, Teleflex received FDA approval for a TLS that was based off the same technology that AngioDynamics would have used to develop Celerity with navigation. (Dkt. No. 144-1, ¶ 52). Several AngioDynamics executives have testified as to their frustration and disappointment that Teleflex outbid AngioDynamics for the Celerity technology, and their belief that navigation-enabled Celerity would have helped AngioDynamics compete in the PICC market. (Dkt. No. 133-2, ¶¶ 53-54; Dkt. No. 144-1, ¶¶ 53-54).

market for PICCs that use confirmation-only TLS technology, not the much larger market for PICCs that use navigation-enabled TLSs like Bard's. (Dkt. No. 133-2, ¶¶ 58-59; Dkt. No. 144-1, ¶¶ 58-59).

4. Teleflex's [**16] PICC and TLS Technology

Like Bard and AngioDynamics, Teleflex markets and sells PICCs. (Dkt. No. 133-2, ¶ 63; Dkt. No. 144-1, ¶ 63). Like Bard, but unlike AngioDynamics, it also markets and sells TLSs that provide both navigation and confirmation capabilities. (Dkt. No. 133-2, ¶ 63; Dkt. No. 144-1, ¶ 63). Unlike Bard, Teleflex historically has sold, and continues to sell, its TLSs both preloaded into its PICCs and as separate, standalone products that are compatible with third-party PICCs. (Dkt. No. 133-2, ¶ 64; Dkt. No. 134-2, ¶ 42; Dkt. No. 144-1, ¶ 64; Dkt. No. 146, ¶ 42). Therefore, hospitals that want to pair AngioDynamics' BioFlo PICCs with a navigation-enabled TLS are able to do so with Teleflex's TLSs. (Dkt. No. 133-2, ¶ 65; Dkt. No. 144-1, ¶ 65). AngioDynamics has, at times, marketed the option of pairing BioFlo with Teleflex's TLS technology to its customers, and some hospitals do utilize this option. (Dkt. No. 133-2, ¶¶ 66-67; Dkt. No. 144-1, ¶¶ 66-67).

C. Relevant Markets and the Competitors' Market Shares

The parties dispute the relevant product market for purposes of the Court's antitrust analysis. The parties appear to agree **[*289]** that PICCs constitute a distinct market from **[**17]** other types of vascular access devices; that all PICCs compete in the same market, regardless of the various distinctions between particular PICCs; and that the relevant geographic market is the United States. (Dkt. No. 144-1, ¶ 13; Dkt. No. 136-9, at 26-27, 36-37; Dkt. No. 147-13, at 13-14, 16). However, Bard contends that the only relevant product market is the market for "differentiated PICCs"—i.e. PICCs that differ from each other on a number of characteristics such as size, material, and others—and that Bard's preloaded TLS stylet is merely one way in which Bard's PICCs are differentiated, rather than a distinct product with its own market. (Dkt. No. 145, at 7-15, 17-19). AngioDynamics contends that PICCs and TLSs comprise two separate, distinct product markets. (Dkt. No. 134-1, at 14-19; Dkt. No. 152, at 7-9, 10-11).

Bard has historically captured the majority of the PICC market, with AngioDynamics and Teleflex capturing significantly smaller market shares. (Dkt. No. 133-2, ¶ 21; Dkt. No. 144-1, ¶ 21; Dkt. No. 138-78, at 2-3). [TEXT REDACTED BY THE COURT] (Dkt. No. 133-2, ¶ 21; Dkt. No. 144-1, ¶ 21).

PICCs used with TLSs constitute by far the largest segment of the PICC market. **[**18]** (Dkt. No. 133-2, ¶ 57; Dkt. No. 146, ¶ 57). The evidence cited by AngioDynamics suggests that, between 2013 and 2018, Bard sold the overwhelming majority of TLSs on the market—more than [TEXT REDACTED BY THE COURT] percent—and Bard has not offered evidence contesting that assertion. (Dkt. No. 134-2, ¶ 47; Dkt. No. 146, ¶ 47). Teleflex, the only other seller of navigation-enabled TLS stylets, sold a much smaller percentage of TLSs—only [TEXT REDACTED BY THE COURT] percent—over the same period. (Dkt. No. 134-2, ¶ 49; Dkt. No. 146, ¶ 49). Other TLSs sold today do not include navigation components and make up a negligible percentage of TLS sales. (Dkt. No. 138-20, at 25 n.107). Because Bard, which sells the majority of the TLSs, does not sell its TLS stylets single-sterile as a matter of policy, only a small percentage of all TLS stylets on the market are sold single-sterile. (Dkt. No. 146, ¶ 43). However, the percentage of stylets sold single-sterile by Teleflex, Bard's only meaningful competitor in the TLS space, is significant: between 2013 and 2018, [TEXT REDACTED BY THE COURT] of Teleflex's TLS stylets were sold separately from its PICCs. (Dkt. No. 134-2, ¶ 43; Dkt. No. 146, ¶ 43). **[**19]**

The parties dispute whether, assuming TLS stylets comprise a separate market from the PICC market, there are high barriers to entry in the TLS market that enable Bard to sustain such a high market share. AngioDynamics cites "high development costs, the requirement for FDA clearance of medical devices, and Bard's ownership of patented TLS technology" as such barriers to entry. (Dkt. No. 134-2, ¶ 50). The evidence cited by the parties on each of these issues may be summarized as follows:

• **High Development Costs**: The parties agree that both AngioDynamics and Bard have spent significant time, effort and money developing navigation-based TLSs (Bard successfully, and AngioDynamics unsuccessfully). (Dkt. No. 134-2, ¶¶ 51-52; Dkt. No. 146, ¶¶ 51-52). Bard nonetheless contests AngioDynamics' assertion that high development costs pose a significant barrier to entry, noting that AngioDynamics' own expert has identified seven different competing TLS products that have been developed by Bard's rivals in the past. (Dkt. No.146, ¶ 50).

• **FDA Approval**: AngioDynamics cites the need for FDA approval of medical products as a barrier to entry for developing a TLS with navigation. **[*290]** (Dkt. No. 134-2, ¶ 50). **[**20]** Bard points out, however, that AngioDynamics' own expert economist opined in his deposition that FDA clearance is "not [an] insurmountable" barrier, and that "[i]f you have a successful technology . . . simply getting the FDA approval shouldn't be that difficult." (Dkt. No. 146, ¶ 50).

• **Patents**: The parties agree that Bard has multiple patents on its TLS stylets. (Dkt. No. 134-2, ¶ 55; Dkt. No. 146, ¶ 55). AngioDynamics' liability expert, Professor George Alan Hay, opined that entry into the alleged TLS market is "complicated by the fact that both Teleflex's and Bard's navigation systems are patented," as this patent protection requires an entrant into the TLS market to "invent around" these companies' existing intellectual property, and "entry with a similar technology could lead to costly patent litigation, even if there is no infringement." (Dkt. No. 134-2, ¶ 56; Dkt. No. 146, ¶ 56). During his deposition, however, Dr. Hay admitted that he "ha[s] not studied the patents," does not know "which patents Bard has on tip location," and could only make general assumptions about "which specific technological features of the Bard tip location system are covered by patents." (Dkt. No. 146, **[**21]** ¶¶ 50, 56). As noted above, Dr. Hay also identified seven different TLS products developed by Bard's competitors, notwithstanding Bard's patent protection. (Dkt. No. 146, ¶ 56). Bard's corporate representative testified that "[a competitor] could easily have reverse engineered [Bard's 3CG] stylet, and they would have to change an approach to creating a magnetic field to avoid our intellectual property. But they could do that and . . . that has been done." (Dkt. No. 138-26, at 4).

D. General Explanations for AngioDynamics' Alleged Lost Sales

Citing record evidence, Bard contends that AngioDynamics has lost existing PICC business or been unable to win new PICC business because of a variety of factors other than Bard's TLS policy, including "price, contracts, quality issues, product recalls, competing technologies, incomplete product lines, lack of data, customer relationships, and product backorders." (Dkt. No. 133-2, ¶ 38). AngioDynamics does not appear to meaningfully dispute that these factors have impacted its PICC business, but it contends that Bard's TLS policy is at least one materially contributing factor to its loss of PICC sales to Bard and/or its failure to win PICC business **[**22]** from Bard. (Dkt. No. 144-1, ¶ 38). Some of the most significant factors Bard discusses with respect to the pending motions are discussed below.

1. Pricing

AngioDynamics' BioFlo PICCs are sometimes priced at a premium to other PICCs in the market at the point of sale. (Dkt. No. 133-2, ¶ 39; Dkt. No. 144-1, ¶ 39). According to Tom Aldrich, a former sales executive at AngioDynamics, AngioDynamics' former CEO believed that "customers should pay more for BioFlo than the other PICCs on the market." (Dkt. No. 133-2, ¶ 40; Dkt. No. 144-1, ¶ 40). AngioDynamics also believes that any price premium on BioFlo PICCs is justified by evidence that BioFlo PICCs' thrombus-accumulation-reducing properties result in long-term cost savings to the hospitals using them. (Dkt. No. 144-1, ¶¶ 39, 41-42). Nonetheless, AngioDynamics concedes that some hospitals are unwilling **[*291]** to pay a premium for BioFlo PICCs. (Dkt. No. 133-2, ¶ 43; Dkt. No. 144-1, ¶ 43).

AngioDynamics does not dispute that, as a result of this price premium, the combination of BioFlo PICCs with Teleflex's TLS stylets is "sometimes" more expensive than Bard's PICCs preloaded with its stylets. (Dkt. No. 133-2, ¶ 41; Dkt. No. 144-1, ¶ 41). However, **[**23]** AngioDynamics asserts that because AngioDynamics competes with

Bard and other competitors on price, its pricing of BioFlo is specific to each customer, and that therefore, its pricing of BioFlo is sometimes higher and sometimes lower than Bard's pricing of its PICCs. (Dkt. No. 144-1, ¶ 41; *see also* Dkt. No. 138-61, at 2).

2. Quality/Reputational Issues

AngioDynamics has suffered from "multiple quality issues across multiple product lines and areas." (Dkt. No. 133-2, ¶ 45; Dkt. No. 144-1, ¶ 45). As relevant to its PICC business, in 2015, AngioDynamics recalled its entire line of Morpheus PICCs due to quality issues. (Dkt. No. 133-2, ¶ 46; Dkt. No. 144-1, ¶ 46). There is evidence in the record suggesting that the Morpheus recall damaged AngioDynamics' relationship with at least some of its customers, and that these issues negatively impacted AngioDynamics' PICC sales. (Dkt. No. 133-2, ¶¶ 46-47). In internal correspondence, General Manager of Vascular Access Chad Campbell referred to a "Morpheus hangover"; Campbell testified that this merely referred to the fact that AngioDynamics had some "slow orders as [it] converted [its customers] to [its] other products," though he acknowledged that **[**24]** AngioDynamics also lost business entirely as a result of the Morpheus recall. (Dkt. No. 133-2, ¶ 46; Dkt. No. 144-1, ¶ 46; Dkt. No. 144-47, at 4). Unlike AngioDynamics, Bard has never recalled an entire line of its PICCs. (Dkt. No. 133-2, ¶ 23; Dkt. No. 144-1, ¶ 23).

3. AngioDynamics' Lack of a TLS

Because some customers value the convenience of preloaded PICCs and dealing with a single vendor, and thus prefer to purchase PICCs and TLSs from the same supplier even if they have the option to purchase them separately, (Dkt. No. 146, ¶¶ 65-66), Bard cites the fact that AngioDynamics does not offer its own TLS with both navigation and confirmation capabilities as a factor negatively impacting its PICC sales, independent of Bard's TLS policy. (Dkt. No. 133-2, ¶¶ 61-62). Bard cites to AngioDynamics' thus-far unsuccessful efforts to develop its own navigation-enabled TLS, as well as AngioDynamics' internal documents reflecting that it believes its lack of navigation-enabled TLS to be a reason for its loss of PICC market share and its difficulties competing with Bard's PICCs. (Dkt. No. 133-2, ¶¶ 48-62).

4. FDA Approval

Bard also cites regulatory issues as a factor impacting AngioDynamics' ability **[**25]** to win sales of PICCs against Bard independent of Bard's TLS policy. As discussed further below, *see* Section E.5.a *infra*, Bard first obtained FDA approval to sell its TLS stylet single-sterile in November 2014 in order to satisfy a request by Cleveland Clinic, which wanted to trial Bard's TLS with AngioDynamics' BioFlo PICCs. (Dkt. No. 133-2, ¶¶ 68-71; Dkt. No. 134-2, ¶¶ 28-29; Dkt. No. 144-1, ¶¶ 68-71; Dkt. No. 146, ¶¶ 28-29). Bard obtained FDA clearance to sell its stylet as a standalone product that could be combined with any "open-ended, nonvalved, polyurethane [PICCs]," including those sold by Bard's competitors. (Dkt. No. 133-2, ¶¶ 70-71; Dkt. No. 134-2, ¶ 29; Dkt. No. 144-1, ¶¶ 70-71; Dkt. No. 146, ¶ 29). While Bard's purpose for obtaining this FDA clearance was to accommodate Cleveland Clinic's request, the clearance it received did not limit Bard to selling its single-sterile stylet **[*292]** only to Cleveland Clinic. (Dkt. No. 134-2, ¶ 30; Dkt. No. 146, ¶ 30).

An important limitation on Bard's FDA clearance for its single-sterile stylet is that it is only approved to sell its stylet for use with competitors' *non-valved* PICCs; Bard has never sought nor obtained FDA clearance to sell **[**26]** its stylet single-sterile for use with competitors' *valved* PICCs. (Dkt. No. 133-2, ¶ 71; Dkt. No. 144-1, ¶ 71). Therefore, a hospital's use of Bard's stylet with AngioDynamics' *valved* PICCs would be considered an "off-label use," i.e. a use that is not included in the FDA's approved indication for the product. (Dkt. No. 133-2, ¶ 71; Dkt. No. 144-1, ¶ 71). Bard argues that this constitutes an independent barrier to AngioDynamics' ability to compete for customers who prefer valved PICCs, which comprise a significant percentage of both Bard's and AngioDynamics' PICC sales. (Dkt. No. 133-2, ¶¶ 72-74; Dkt. No. 144-1, ¶¶ 72-74). AngioDynamics rejects this contention, arguing that AngioDynamics or another competitor could seek FDA approval to market Bard's single-sterile stylet to such customers; that, based on its own testing of Bard's stylet with valved PICCs, AngioDynamics believes such approval could be obtained; and that in any event, the law does not prohibit medical professionals from choosing to use medical products in ways that are "off-label." (Dkt. No. 144-1, ¶ 71).

E. Customer-Specific Evidence of AngioDynamics' Alleged Lost Sales

1. Overview

A central dispute between the parties **[**27]** is whether there is evidence that specific customers would have purchased AngioDynamics' PICCs for pairing with Bard's TLS but for Bard's TLS policy. Bard concedes that "the topic of whether Bard sells Stylets separately from its PICCs and/or whether Bard would do so has arisen" in its discussions with 17 hospitals, though it claims that it has never received a formal Request for Proposal regarding a stand-alone stylet. (Dkt. No. 133-2, ¶¶ 84, 86; Dkt. No. 134-2, ¶ 40; Dkt. No. 144-1, ¶¶ 84, 86; Dkt. No. 146, ¶ 40).[4] AngioDynamics has its own list of at least 22 institutions that it believes have requested that Bard sell its stylets on a standalone basis and been refused. (Dkt. No. 133-2, ¶ 83; Dkt. No. 144-1, ¶ 83). AngioDynamics also has provided what it contends is a "non-exhaustive" list of 31 customers—including hospitals, IDNs, and GPOs—from which it claims that it "potentially" lost sales as a result of Bard's TLS policy. (Dkt. No. 133-2, ¶ 87; Dkt No. 144-1, ¶ 87).

2. Customer Requests to Bard Regarding Standalone Stylet

AngioDynamics points to a number of documents that reflect specific examples of customer inquiries to Bard regarding the possibility of purchasing a standalone **[**28]** TLS stylet to pair with AngioDynamics' or another competitor's PICCs, and of Bard preparing for such inquiries. The Court summarizes the relevant portions of these communications as follows:

> • In February 2015, in an internal email chain, a Bard employee wrote: "We need an official 'talk track' on the following subject so that everyone in Sales/Marketing/Nursing speaks with one voice on this issue. **[*293]** Not to make a big deal but it actually becomes more strategic and relevant now that Angio has a wire." (Dkt. No. 138-3, at 2). The employee was referring to the following passage from a District Manager's monthly report: "The AngioDynamics rep in Cincy is telling accounts '[Bard] got the indication to sell their wire with our BloFlo PICCs.' . . . I've coached [sales representatives] specifically how to handle with their customers if it's brought up to them. In short, our response is, 'That is not an option available at this time.'" (*Id.*).
>
> • In February 2015, another Bard employee described a phone call from a customer to a Bard clinical nurse "asking if they could get the 3CG standalone wire for there [sic] at risk patients so they could use a coated PICC." (Dkt. No. 138-5, at 2). The employee **[**29]** went on to write: "[The customer] said they had been told that the Cleveland Clinic is using a different PICC with 3CG. I will be able to squash this, but I think we will be hearing a lot of people bringing this up." (*Id.*).
> • In March 2015, Bard executives discussed the fact that a customer was "getting pressure . . . to evaluate bioflo" and "contacted [Bard personnel] about pulling a separate 3CG wire with the Bioflo PICC line." (Dkt. No. 138-75, at 2).
>
> • In March 2015, in an internal email chain, Bard personnel discussed the "talk track . . . so that [Bard personnel are] armed with the correct verbiage in case someone comes calling." (Dkt. No. 138-2, at 3). One Bard employee wrote, "If you receive any inquiries from other hospitals/customers about [the standalone stylet], please tell them that it is not currently available for purchase. If they mention Cleveland Clinic

---

[4] Bard contends that "[m]ost of the hospital communications to Bard regarding standalone stylets came from nurses, not personnel making decisions about PICC purchases," but AngioDynamics disputes this characterization, citing record evidence that the decision-making process and the personnel involved varies by hospital. (Dkt. No. 133-2, ¶ 85; Dkt. No. 144-1, ¶ 85).

specifically . . . you can tell them that Cleveland Clinic is doing an evaluation, but there are no plans to make the kit available at other facilities at the current time." (*Id.* at 2).

• In March 2015, a Value Access Coordinator from a customer reached out to a Bard Territory Manager, writing: "I did contact Supply Chain at **[**30]** Cleveland Clinic. They are using the Bard 3CG technology and separately ordered/stocked Bard 3CG stylets with 2 DIFFERENT PICC vendors (both NOT bard). So . . . there are facilities getting this single sterile 3CG stylet? Can you send me pricing on the separately stocked 3CG stylet for my comparison." (Dkt. No. 138-76, at 4).

• In March 2015, a representative of HealthTrust, a GPO, wrote to a Bard Vice President that "[i]f [Bard's single-sterile TLS stylet] is being sold to HealthTrust members, as I have been informed it is, then it needs to be added to contract." (Dkt. No. 138-7, at 2).

• In an April 2015 email, a Bard representative described a "very agitated" customer who "want[ed] something in writing stating [that the stand-alone stylet was unavailable] and the reason why," because "she has been told otherwise." (Dkt. No. 138-4, at 2).

• In April 2015, a customer contacted a Bard sales representative about "the BARD guide wire being made available separate from the PICC kit so it can be used to place any PICC," stating that the customer "would still like to try the antimicrobial PICC if possible." (Dkt. No. 138-77, at 3). In a subsequent internal email, the **[*294]** Bard employee wrote that **[**31]** "[w]e explained that there is not a coated PICC that comes with 3CG and the director stated that Cleveland Clinic utilizes our wire with [Teleflex] PICCs. I understand that this isn't going to happen, but I wanted to make sure you are aware they are taking [sic] about it." (*Id.* at 2-3). Another Bard employee wrote: "This came up today as well at Swedish . . They are telling everyone this that the clinic is using our wire. I had a call with IBC with this last week as well. Hasn't been a big deal thus far, but just an FYI on what Teleflex is doing." *(Id.* at 2).

• According to a February 2016 memo circulated among Bard personnel, a representative of a customer "tried ordering the Clinic stand alone 3CG wire," and Bard personnel "communicated [to the representative] that product is unavailable and we haven't had issues since." (Dkt. No. 138-6, at 2).

• April 2016 meeting notes written by a Bard District Manager reflect that a customer "[w]anted to know if we would sell the 3CG stylet to use with the Arrow [Teleflex] PICC," and that Bard responded: "We do not sell the Stylet by itself. Period." (Dkt. No. 138-30, at 4).

3. Bard Internal Documents

AngioDynamics also cites to internal Bard documents arguably suggesting **[**32]** that Bard employees "knew that AngioDynamics and others could not compete for PICC business in hospitals that were using Bard's TLS." (Dkt. No. 134-2, ¶ 45). For example:

• December 2014 talking points for a Bard Board of Directors presentation include the notes, "We are the only company who sells PICCs but can also provide the Ultrasound/Tip location and Tip confirmation technology and all of that is integrated," and that [TEXT REDACTED BY THE COURT] (Dkt. No. 138-11, at 2-3).

• In April 2015, a Bard employee wrote that he "th[ought] [AngioDynamics'] strategy [wa]s to pressure the market to pressure [Bard] into launching [the standalone stylet], so it will open the door for them to go after special patient populations in our 3CG [TLS] accounts and pick off 5-10%, which is better than the 0% they are getting at 3CG accounts now." (Dkt. No. 136-63, at 3; Dkt. No. 136-64, at 2).

• In July 2016, a Bard employee congratulated a sales representative on convincing Bard's "largest non-3CG nursing account nationally" to begin using Bard's 3CG stylet, commenting that "now this account is locked in with our best defense mechanism." (Dkt. No. 138-9, at 2).

• In September 2016, a Bard Strategic Accounts **[**33]** National Manager wrote: "We know AngioD is heavily focusing on our IR PICC and midline business since they obviously cannot compete with TLS and 3CG." (Dkt. No. 138-10, at 2).

4. Deposition Testimony of AngioDynamics Employees

The parties dispute whether the deposition testimony of AngioDynamics officers and employees demonstrates that AngioDynamics lost any sales to Bard as a result of Bard's TLS policy. That testimony is summarized below.

[*295] a. Tom Aldrich

Tom Aldrich worked for AngioDynamics from 2001 to 2017, and was the head salesperson in AngioDynamics' Vascular Access Group (the business segment that includes PICCs) from 2013 to 2017. (Dkt. No. 136-16, at 5-11). Aldrich testified that he "[knew] that [AngioDynamics] lost accounts as a result of our PICC line not being compatible with Bard's tip location," but did not know how many, and was only able to name one example of a customer that "might have been one that was interested in using our PICC line with the Bard tip location but [was] unable to." (*Id.* at 27-31). Aldrich also generally lacked knowledge regarding the entities on AngioDynamics' list of customers that it "potentially lost" as a result of Bard's tying policy. (*Id.* at 47-55). Aldrich did recall **[**34]** that AngioDynamics lost business from HealthTrust, a GPO, because some of the hospitals "wanted a navigation system" and AngioDynamics was "not able to convert them because they were using Bard," but he did not recall details about which hospitals within the GPO this applied to, or which individuals at those hospitals conveyed the information to him. (*Id.* at 52-54).

b. Chad Campbell

Chad Campbell is the General Manager of AngioDynamics' Vascular Access Group. (Dkt. No. 136-25, at 3-5). Campbell testified that "the number one reason [AngioDynamics loses business to Bard] is because customers prefer [Bard's] navigation and tip location" product, and are forced to use Bard's PICCs in order to gain access to that product. (Dkt. No. 136-25, at 19-23). However, he also testified that he lacked "firsthand personal information" regarding business AngioDynamics lost as a result of Bard's TLS policy, and that he has not directly communicated with any hospital regarding their interest in combining AngioDynamics' BioFlo PICCs with Bard's TLS. (Dkt. No. 144-48, at 8). His only knowledge of such lost business came "through reps, managers, heads of sales, marketing, clinical, my teammates on my team." (*Id.*). Campbell **[**35]** demurred when asked to name specific examples of a customer whose business AngioDynamics lost as a result of Bard's TLS Policy, responding that "whatever the team has produced is who" and that he could not name "anyone specifically that I've talked to from a customer standpoint." (*Id.*).

c. Scott Centea

Scott Centea is AngioDynamics' Senior Director of Global Marketing. When shown AngioDynamics' non-exhaustive list of 31 entities from which it believed it "potentially lost sales," Centea identified 21 of them that he knew AngioDynamics lost sales from "due to not having a tip location system or our PICC being able to work with the Bard tip location system." (Dkt. No. 136-30, at 6-8). When asked about the basis for his knowledge of these lost sales, he testified as follows:

> So as a corporate account manager during this time, I was responsible for helping set up contracts as well as remaining very close to the sales representatives. I was also responsible for managing some of the sales. And we would have discussions, as well as . . . quarterly business reviews and progress reports. It's never fun when we lose an account. And so they were always typically brought to my attention, or someone **[**36]** within the organization's attention, to better understand what we could have done differently to potentially save the business.

(*Id.* at 7-8).

Centea testified that AngioDynamics' sales representatives "were being asked daily, if [AngioDynamics'] BioFlo could be used with Sherlock and 3CG." (Dkt. No. 144-37, at 5). When asked whether he had **[*296]** ever had "an actual conversation where any of these accounts ever told [him] that they would rather buy [AngioDynamics'] PICC with Bard's single sterile stylet for more than Bard's PICC with Bard's Sherlock stylet," Centea testified that he has "had so many of those conversations, they all seem to run together." (Dkt. No. 136-30, at 13-14). However, because purchasing Bard's stylet single-sterile to combine with AngioDynamics' PICCs was not an option for customers, AngioDynamics was usually unable to reach the point where it could engage in discussions about the price of that option, and so Centea could not recall a situation in which a customer said that "we will, no matter what the price is, we will buy their single stylet, because it was never offered." (*Id.* at 16).

Centea specifically identified Community Health Systems and Florida Hospital as two customers with whom **[**37]** he was "pretty confident" that he "personally had a conversation" about pairing AngioDynamics' PICCs with Bard's TLS stylet. (*Id.* at 14). As to Community Health Systems, he could not "recall the exact conversation," but recounted the following details:

> [The conversation was with] either Sheila Jarrett or Marsha Hodge . . . I believe it was in person. We would hold monthly business reviews, updating them on . . . the progress of the conversion. And I believe Nicolas Abella was there as well . . . I remember Nicolas, who was their head of clinical or nursing I believe at the time, was saying that, based on some of the results, that if there was an option to receive the Bard single sterile stylet separately, that they would definitely take a look at . . . the pricing and run an economic analysis by knowing that that was what's going to be best for their accounts.

(*Id.* at 14-15). When pressed on whether the Community Health Systems representatives told him that they "would buy the Angio combined with Bard product if it was more expensive than the Bard product preloaded," Centea testified that "we never got to those conversations, because we knew that Bard was never willing to sell the single sterile stylet." **[**38]** (*Id.* at 16).

Similarly, as to Florida Hospital, Centea testified that his conversation "was one of those, well, if they do somehow decide to sell it to us, we . . . would take a look at, again, the BioFlo and the efficacy of the BioFlo and whatever price Bard was to offer, because we didn't have a price. It was really difficult to understand what the economic impact would [sic]. But if they said it was reasonable, that it would make sense for them to convert." (*Id.* at 16-17). Centea acknowledged that he "did not have conversations with specifics to the cost and/or price of what that stylet would be" and therefore did not know the price premium Florida Hospital would be willing to pay to combine AngioDynamics' PICCs with Bard's TLS. (*Id.* at 17-19).

d. William Millar

William Millar is AngioDynamics' Southeast Region Business Manager. Millar testified that, based on "a general conversation with PICC nurses and [AngioDynamics'] sales team," he understood that "there is interest out there for our technology if it can be made available with [Bard's] stylet," and that there were "definitely hypotheses going around in conversations in my field every day out there of when we're trying to offer our technologies to our solutions." **[**39]** (Dkt. No. 144-38, at 3). As one example, he testified that the Director of Supply Chain at St. Dominic's Hospital in Mississippi "had [AngioDynamics] come in to do a presentation of BioFlo, believed in the technology and we were provided the feedback that . . . we could not proceed with the trial because [St. Dominic's had] Bard 3CG in the facility **[*297]** and the nurses prefer to keep or require that technology to move forward" but that "[i]f it was made available, [St. Dominic's] would definitely consider the BioFlo technology but at this point cannot proceed . . . based on the inability of not being able to marry the Sherlock 3CG system with BioFlo PICCs." (*Id.* at 3-4). Millar also testified that facilities in the Community Health System Family told AngioDynamics that they would purchase AngioDynamics' PICCs if they had the option to pair them with Bard's 3CG TLS, but could not recall which specific facilities did so. (Dkt. No. 136-19, at 16-19).

When asked for additional examples of hospitals that would have purchased AngioDynamics' PICCs had Bard made its standalone stylet available, Millar provided the names of hospitals, which he testified was non-exhaustive, including, among others: JFK, Singing **[**40]** River, Biloxi Regional, and Christus Cabrini. (Dkt. No. 144-38, at 5-8). Millar testified that the information he had about AngioDynamics' potential lost sales came from his conversations with other AngioDynamics employees or, in some cases, hospital employees themselves. (Dkt. No. 133-2, ¶ 96; Dkt. No. 144-1, ¶ 96).

As to JFK, Millar testified that his knowledge that AngioDynamics lost business as a result of Bard's TLS policy came from conversations with either JFK's local clinical resource director or the AngioDynamics sales representative responsible for JFK; he could not recall which one. (Dkt. No. 154-4, at 16-17). He testified that AngioDynamics was the "incumbent supplier" and "the need for navigation tip location was a new initiative for [JFK]," which "changed" the "business landscape" and caused AngioDynamics to lose its PICC business when JFK opted to use Bard's TLS. (*Id.* at 16). He did not know whether JFK considered Teleflex's TLS a viable alternative solution, did not know how AngioDynamics' pricing compared to Bard's, and was not aware of whether the hospital realized any savings by switching to Bard PICCs, though he recalled that "pricing was not, to my knowledge, a decision-making **[**41]** factor into it." (*Id.* at 13-16).

As to Singing River Hospital, Millar testified that AngioDynamics was unable to win their PICC business because "they were using Bard's Sherlock device at the time and they required that stylet to place PICCs," and that hospital representatives told him that "if the technology was available to them to purchase separately . . . in order to buy our PICCs, they would consider a trial." (*Id.* at 27-28). When pressed on whether Singing River had *committed* to having a trial of the combined technologies (as opposed to merely considering it), Millar testified that the option "wasn't available so we couldn't go down the pathway of saying they would because Bard wasn't providing that opportunity for the customer to choose." (*Id.* at 28). He was unaware as to whether Singing River ever asked Bard about the possibility of a standalone stylet. (*Id.* at 28-29).

As to Biloxi Regional, Millar testified that Biloxi was an existing Bard PICC customer whose business AngioDynamics was unable to win, and that Biloxi's Director of Cardiology told him that if Bard's standalone stylet became available, Biloxi "would conduct a trial to move to our business." (*Id.* at 29-30). He testified that he had "numerous" conversations with the Director **[**42]** of Cardiology and several PICC nurses in which they conveyed that "if [the option to combine the technology] was made available and you could use that system, 'We would consider your PICCs.'" (*Id.* at 37-38). When asked whether he had reason to believe that Teleflex's TLS would not be a viable alternative for Biloxi, Millar testified that "[t]hey were already **[*298]** invested into the 3CG system — Sherlock system, and their interest was if they could maintain the — the current use of the 3CG Sherlock device and incorporate the BioFlo PICC, they would take interest in it." (*Id.* at 36).

As to Christus Cabrini, Millar testified that in the 2014-2016 timeframe, Christus was "interested in the BioFlo technology" and was "using it . . . on a couple of other platforms we have," and that AngioDynamics was "down the pathway of moving toward trial potentially based off the interest in the BioFlo." (*Id.* at 40-43). However, the nurses on the PICC team were "comfortable" with Bard's TLS, "were using that as a reliability tool for the Sherlock device, a navigation component," and "wanted that Sherlock device to continue to be used" because "that's how they were trained"; thus, because Bard's system could not be combined with AngioDynamics' **[**43]** PICCs, AngioDynamics "didn't have an offering . . . to continue down the pathway of trialing our PICCs." (*Id.*). As a result, although AngioDynamics "had a lot of meetings with them showing our technology [and] educating them on that" and "they had interest [in AngioDynamics'] technology," "that opportunity didn't come to fruition because we didn't have the Sherlock stylet available to them." (*Id.* at 42-43). Millar testified that his knowledge was based on direct, in-person conversations with the PICC team at Christus Cabrini, though he could not recall specifically who. (*Id.* at 43-44).

5. Other Evidence Regarding Specific Customers

Both parties also cite to documentary evidence—including internal correspondence among AngioDynamics and Bard employees, as well as correspondence between the parties' employees and customers—that purportedly demonstrate examples of customers switching from AngioDynamics' PICCs to Bard's PICCs or foregoing AngioDynamics' PICCs in favor of Bard's PICCs, and the reasons for those decisions. The Court summarizes this evidence below.

a. Cleveland Clinic

To date, Cleveland Clinic is the only customer to whom Bard has offered its TLS stylet as a stand-alone product. (Dkt. No. 133-2, ¶ 30; **[**44]** Dkt. No. 144-1, ¶ 30). In 2014, Cleveland Clinic began using AngioDynamics' BioFlo PICCs in an effort to lower its DVT rates, an effort which was successful. (Dkt. No. 134-2, ¶¶ 25-26; Dkt. No. 146, ¶¶ 25-26). Later that year, Cleveland Clinic made a request to Bard to purchase Bard's TLS stylet single sterile so that it could trial it with AngioDynamics' BioFlo PICCs as an alternative to Teleflex's TLS, which it was using to place the BioFlo PICCs. (Dkt. No. 133-2, ¶ 68; Dkt. No. 134-2, ¶¶ 27-28; Dkt. No. 144-1, ¶ 68; Dkt. No. 146, ¶¶ 27-28). At that time, Bard did not have FDA approval to market standalone Bard TLS stylets for pairing with other companies' PICCs, but it sought and obtained FDA approval to do so in order to accommodate Cleveland Clinic's request. (Dkt. No. 133-2, ¶¶ 70-71; Dkt. No. 134-2, ¶ 29; Dkt. No. 144-1, ¶¶ 70-71; Dkt. No. 146, ¶ 29).

Ultimately, Bard agreed to sell the standalone stylet to Cleveland Clinic for $101. (Dkt. No. 133-2, ¶ 69; Dkt. No. 134-2, ¶ 33; Dkt. No. 144-1, ¶ 69; Dkt. No. 146, ¶ 33). A Bard executive testified that Bard felt comfortable offering its standalone stylet to Cleveland Clinic, despite its general safety concerns regarding bedside **[**45]** loading of the product, because Bard felt that it "had a complete connectivity with the clinical management in a hospital that satisfied us we could on-board this safely." (Dkt. No. 146, ¶ 35 (quoting Dkt. No. 147-16, at 23)). A Bard internal weekly report indicates that Bard earned a fairly high margin **[*299]** on these sales, though Bard cites to evidence suggesting that the margin calculation does not include certain relevant costs associated with a standalone stylet (including liability, training and reputational risk costs), and that the price at which Bard sold its standalone stylet to the Celveland Clinic was a promotional price that was discounted from the price at which Bard would be willing to sell the standalone stylet to the market generally. (Dkt. No. 134-2, ¶ 48; Dkt. No. 146, ¶ 48).

Cleveland Clinic began its trial of Bard's TLS with AngioDynamics' BioFlo PICCs in early 2015, and found that, with the use of Bard's TLS, it was successfully able to place the BioFlo PICCs at the patient's bedside and confirm placement without the need for a chest x-ray. (Dkt. No. 133-2, ¶ 75; Dkt. No. 134-2, ¶ 36; Dkt. No. 144-1, ¶ 75; Dkt. No. 146, ¶ 36). However, beginning in October 2015, Cleveland **[**46]** Clinic conducted a three-month trial of Bard's FT PICC preloaded with Bard's TLS stylet, after which it chose to begin using that integrated product, rather than BioFlo, as its primary PICC product. (Dkt. No. 133-2, ¶¶ 76-77; Dkt. No. 134-2, ¶ 37; Dkt. No. 144-1, ¶¶ 76-77; Dkt. No. 146, ¶ 37). The parties dispute the reasons for Cleveland Clinic's decision, but the evidence they cite suggests that the following factors were relevant: (i) Bard agreed to sell Cleveland Clinic its integrated product at the same price it had been previously selling the stand-alone stylet, and thus the integrated product was less expensive than the combination of a BioFlo PICC and a Bard TLS stylet; (ii) Bard's PICC kit contained accessories that Cleveland Clinic's PICC team preferred; (iii) according to the head of Cleveland Clinic's PICC team, the team observed lower DVT rates using Bard's FT PICCs than with BioFlo (though AngioDynamics disputes the credibility and significance of this testimony, *see* Dkt. No. 144-1, ¶ 77); (iv) Cleveland Clinic's PICC team believed that the fact that Bard's PICCs were preloaded, which eliminated the need to load the stylet at the beside, reduced the risk of patient infection, **[**47]** a factor which "weighed heavy in the decision"; and (v) the relationship between AngioDynamics and Cleveland Clinic may have deteriorated after AngioDynamics released data concerning the results of Cleveland Clinic's use of BioFlo prematurely and without Cleveland Clinic's permission. (Dkt. No. 133-2, ¶ 77; Dkt. No. 134-2, ¶ 37; Dkt. No. 144-1, ¶ 77; Dkt. No. 146, ¶ 37).

b. University of Colorado

On April 24, 2015, a PICC team manager from the University of Colorado reached out to Bard to inquire about a standalone TLS stylet. (Dkt. No. 134-2, ¶ 78; Dkt. No. 144-1, ¶ 78). According to an email from a Bard representative, after Bard indicated a standalone stylet was not available, the customer became "very agitated" and "want[ed] something in writing stating" that the stylet was "not available as a standalone" and the reason why, because "she has been told otherwise." (Dkt. No. 136-57, at 2). Ultimately, the University of Colorado proceeded to combine AngioDynamics' PICCs with Teleflex's TLS stylets. (Dkt. No. 134-2, ¶ 79; Dkt. No. 144-1, ¶ 79).

In August 2017, the University of Colorado switched from AngioDynamics' BioFlo PICCs to Bard's preloaded PICCs. (Dkt. No. 133-2, ¶ 80; Dkt. No. **[**48]** 144-1, ¶ 80). According to an email written by an AngioDynamics employee, the decision was "based on contract savings and a corporate rebate agreement." (Dkt. No. 136-58, at 4). The email also noted that the "clinical champion for BioFlo" at the University of Colorado "has been disappointed in the [upper extremity DVT] results [from BioFlo] for the past few years and her **[*300]** data collection doesn't allow her to argue/justify the contract savings to supply chain anymore." (*Id.*). The email further referenced the fact that "[o]ther [h]ospitals within" the University's medical system were "HUGE Bard supporters," and that "[t]hey were told if University switched then [sic] the other teams could get their new equipment, if she didn't then [sic] no funding would be available for future requests this year." (*Id.* at 5).

c. Torrance Hospital

In August 2017, AngioDynamics lost its PICC business with Torrance Hospital to Bard. (Dkt. No. 133-2, ¶ 81; Dkt. No. 144-1, ¶ 81). In an email reporting on the loss, an AngioDynamics employee attributed the loss to "the discontinuance of Navigator [an audio-only tip navigation system AngioDynamics had offered] and the hospitals [sic] need for a Navigation piece for" its **[**49]** PICC placement. (Dkt. No. 136-59, at 3). The email explained that the decision "came down to ICU nurses, Administration and Radiology finding a safe and acceptable system from Bard, Teleflex or Medcomp that would allow them to place Piccs [sic] in the ICU for their patients . . . We have tried to influence the decision but in the end they chose Bard." (*Id.*). The email cited, as an additional reason for the change, the fact that Torrance Hospital received "a tremendous savings of over 15% with the change to Bard," and noted that the hospital was "never open to paying any type of premium for [AngioDynamics' BioFlo PICC] and remained steadfastly concerned about reducing acquisition costs." (*Id.*).

d. Hillcrest Medical Center

According to a 2013 internal Bard memo, in that year, AngioDynamics won the PICC business of Hillcrest Medical Center in Tulsa, Oklahoma from Bard "based on [BioFlo PICCs'] superior results during long evaluation period." (Dkt. No. 138-31, at 3). The memo noted that, at the time, Hillcrest did *not* use tip location to place PICCs, and that such non-tip-location accounts were "by far [Bard's] most vulnerable." (*Id.*).

Scott Centea testified that Hillcrest was a customer **[**50]** that had "collected data" and prepared a "poster presentation" for nursing conferences "show[ing] the efficacy of the BioFlo PICC and how it reduced . . . DVTs." (Dkt. No. 144-37, at 12-13). He also testified that he learned from other AngioDynamics employees that Hillcrest had "inquired [to Bard] about the ability or the opportunity . . . to potentially purchase a stylet from Bard" for use with AngioDynamics' PICCs after AngioDynamics had informed them that this "was an option in the market" based on Bard's selling of the stylet to Cleveland Clinic. (Dkt. No. 144-37, at 13-15).

In a February 2015 email, summarizing a three-month BioFlo trial being conducted at Hillcrest, a Bard employee wrote that Hillcrest had experienced "hemolysis and poor flow rates" with AngioDynamics' valved BioFlo PICC and "cracked/leaking hubs" with their non-valved BioFlo PICCs, and that Hillcrest ultimately "made the decision to stay with Bard Solo after having multiple issues with hemolysis." (Dkt. No. 144-29, at 2).

Later in 2015, Hillcrest decided to implement tip location and considered TLSs from Bard, Teleflex and AngioDynamics; an internal Bard memo speculated that the reason for evaluating all three **[**51]** vendors' technology, rather than merely using AngioDynamics' Celerity TLS that was available at the time, was dissatisfaction with the BioFlo PICCs' results. (Dkt. No. 138-32, at 3, 5).

In October 2015, the Clinical Resource Management Director at Ardent Health Services wrote to AngioDynamics representatives: **[*301]** "Following an extensive trial at Hillcrest Medical Center, to include a multitude of vendor product combinations, we will be standardizing to BARD PICC Lines and 3CG technology . . . I know you cannot be surprised by the decision, as currently AngioDynamics does not have similar technology." (Dkt. No. 144-12, at 2-3). In a subsequent follow-up email to Hillcrest's corporate parent, Scott Centea wrote, "This entire situation could have been avoided if Bard was willing to sell you their single sterile 3CG stylet. . . . If they were willing to offer you this product, like they have at other facilities, [then] your PICC nurses could have used the Sherlock/3CG system with our BioFlo." (Dkt. No. 138-35, at 2).

In November 2015, a Bard employee wrote, "Big win at Hillcrest to finally win PICCs back after 2 year[s] of Bioflo. Total growth should be about $700k . . . [T]hey did attest that **[**52]** they actually had used more Cathflo[, a product used to dissolve thrombus formations in or around the PICC,] while using Bioflo. They declined to evaluate Celerity, based on the fact that they didn't have an algorithm aspect like 3CG Diamon[d] and VPS did." (Dkt. No. 147-40, at 2).

e. Christus St. Patrick

In October 2014, Bard's Louisiana Territory Manager, Shane Beaudean, wrote to other Bard employees that a "Bio-Flo trial [at Christus St. Patrick] has concluded and the decision has been made to stick with Bard." (Dkt. No. 144-14, at 2). When asked for more details regarding why the hospital chose to stick with Bard, Beaudean responded:

> The PICC nurse really disliked Celerity. She said it felt like she was using 10 year old technology. She was required to screenshot a baseline P-wave, initial deflection P-wave, and max P-wave for each patient. She was instructed by the rep to do this. She really felt like this slowed her down and she missed our real-time navigation. On one patient she achieved max P and the catheter was up the U. She was instructed how to check for malpositions using our Site-Rite 6 which she really disliked due to sterility issues. The nurses hated the triple lumen **[**53]** PICC compared to ours. Nurses had problems with blood draws so much so that the Angio rep showed them "a new technique for drawing blood." They had issues with the flow rates of the PICC's [sic] to the point that the rep talked to BioMed about changing IV pump settings which they refused to do. At the end of the day, the PICC nurse felt that Bard's technology was far superior on all fronts.

(*Id.* at 2). A November 2014 email from an AngioDynamics territory manager provides a somewhat different explanation based on his own discussions with Christus St. Patrick representatives. The email says that the PICC nurse "gave us outstanding reviews on the overall performance of BioFlo" and "stated the data should reflect a switch to BioFlo," but that "one of the Executives brought up the fact that we do not have Navigation with Celerity" and "stated that Christus should look into converting once we have Navigation." (Dkt. No. 138-37, at 6). After a subsequent meeting, a different AngioDynamics employee confirmed that the PICC nurse's "feedback has been terrific regarding the performance of BioFlo," but that "as expected, [the nurse] (and Christus as a whole) enjoys the time saver and clinical benefit **[**54]** of eliminating [chest x-rays]" through TLS technology, and that Christus "advised that when we can eliminate [chest x-rays], then we can move to the next step with St Patrick as well as with Christus as a whole." (*Id.* at 4).

[*302] f. McLaren Oakland

In a March 2014 memo, a Bard employee wrote: "We have finalized a $120,000 PICC conversion [with McLaren Oakland] starting May 5th. This conversion will knock Angio D and Bioflo out of its only account in this system and gives us full compliance with Bard and 3CG. They are planning on eliminating X-Ray [with Bard TLS] on day one of placements." (Dkt. No. 144-15, at 3). In a subsequent May 2014 email describing the conversion, a Bard employee wrote that "[t]he biggest reasons for this conversion are clinical buy-in and McLaren's Corporate initiative to eliminate Chest X-Ray." (Dkt. No. 144-16, at 2). A Bard Regional Manager responded to that email, saying, "This [Bard] win brings AD's total lost business, in Michigan alone, to a staggering $880,000!!! Trust me when I say, Bioflo is a BioFLOP." (*Id.*). A spreadsheet prepared by Bard's sales team several months later reports that McLaren Oakland "has had great results going to solo from bioflo." (Dkt. No. **[**55]** 147-41, at 2).

g. Summerlin

In September 2015, an AngioDynamics territory manager wrote that the PICC Registered Nurse at Summerlin was "[o]pen to BioFlo, BUT SKEPTICAL," and listed concerns about, among other things, whether BioFlo would "do what we say it will," BioFlo's larger lumens size compared to the PICCs Summerlin was currently using, and the fact that the TLS AngioDynamics offered at the time, Celerity, did not yet have a navigation component. (Dkt. No. 147-

42, at 3). In October 2015, in connection with an upcoming trial of BioFlo PICCs with Celerity, a representative of Summerlin hospital wrote to AngioDynamics employees explaining that the PICC Nurse "has many concerns about the AngioDynamic catheters," but that "[h]is main concern is the inability to do tip navigation to prevent malpositions and the lack of some size catheters he uses." (Dkt. No. 138-42, at 3).

In his deposition, Scott Centea testified, based on his understanding from another AngioDynamics employee involved in the conversation, that Summerlin told AngioDynamics that it was "having difficulties . . . placing our BioFlo PICC without [Bard's] 3CG system," and that he believed Summerlin unsuccessfully requested **[**56]** a standalone stylet from Bard to pair with the BioFlo PICCs. (Dkt. No. 152-5, at 3-5).

In November 2015, a Bard Sales Trainer and Territory Manager wrote to other Bard employees describing his takeaways from a discussion with a PICC nurse at Summerlin Hospital who was "currently evaluating the BioFlo PICC and Celerity." (Dkt. No. 144-17, at 3). One of the "main takeaways" was that Bard's Sherlock TLS "is irreplaceable - by far this is our #1 competitive advantage - Celerity doesn't have a way to address malpositions." (*Id.*). However, the Summerlin team also expressed various other concerns about BioFlo and Celerity, including stylet stiffness, lumen sizes, cumbersomeness, and the fact that Celerity "doesn't come pre-loaded." (*Id.*). Approximately a month later, when Summerlin opted to discontinue the BioFlo evaluation, the customer provided feedback to Scott Centea in an email reflecting that "[t]he overriding concern was the lack of a navigation system" which led to "concern about inaccurate placement as well as the increased time to place and assure correct placement"; however, the customer also listed various other issues with the BioFlo/Celerity system, including TLS equipment failures, **[**57]** cumbersomeness, oozing and cracking of the PICCs (including one PICC cracking while inside a patient's body), and concerns about patient safety. (Dkt. No. 144-18, at 4). Reflecting on this feedback, another AngioDynamics employee wrote that, "[f]rom the sounds of **[*303]** it the biggest factor in them ending their trial mid-term was CELERITY . . . Definitely further supports the notion that tip location is often the deciding factor in many of our trials, and more often than not seems to trump the PICC performance and outcomes." (*Id.* at 2).

h. UHS Delaware

In May 2014, in discussing Universal Health Systems of Delaware's ("UHS Delaware") decision to purchase Bard's PICCs, a Bard National Accounts Manager wrote: "AngioDynamics/Bioflop was once again turned away as they could not compete against our clinically superior products. This is a perfect example of why we need all of our customers using 3CG technology. The proprietary technology including 3CG, HF, FT and PowerGlide help lockdown our business as our competition cannot offer these products." (Dkt. No. 138-44, at 2).

In December 2015, following a "multi site trial of AngioDynamics BioFlo and Celerity," the Value Analysis Program Director at UHS of **[**58]** Delaware, Patricia Tyrrell, wrote to a Bard National Accounts Manager: "I wanted to let you all know that the decision was made today by the PICC work group, that we will be staying with Bard. The biggest issue in moving forward was lack of navigation." (Dkt. No. 144-19, at 3). After receiving this email, the National Account Manager forwarded it to other Bard employees, writing: "All of you did a great job protecting what is yours with [TEXT REDACTED BY THE COURT] in PICC and Midline spend. Once again the significance of getting our facilities to 3CG played an important role here." (*Id.* at 2).

In subsequent correspondence between Tyrrell and Scott Centea, Centea wrote that "[t]he initial objective with this evaluation was to compare the merits of BioFlo against a non-BioFLo PICC (Bard)" but "[w]hat ended up happening is that our Celerity was being compared against 3CG Sherlock. Unfortunately, the primary objective of the evaluation was silenced rather quickly." (Dkt. No. 144-21, at 2). Tyrrell responded: "[W]hen we look [sic] PICCs again, we will again include Bioflow [sic] knowing that your navigation will be available at that time." (*Id.*).

i. Baycare

Bard emails reflect that, in 2012, Bard **[**59]** was able to capture "close to $1 million" in new PICC business from Navilyst (BioFlo's previous owner) by converting Baycare Health Systems to Bard's TLS with "help from dozens of our Clinical Specialists," which allowed the system to eliminate the use of chest x-rays for tip confirmation. (Dkt. No. 144-22, at 2). In an August 2013 email describing the conversion, a Bard employee wrote that, during Baycare's trial of Bard's TLS, Bard "strongly stressed the trial was not about [comparing PICC technology], it was about catheter tip position confirmation and eliminating X-ray," but that Bard also "just happened to have a proximal valved Picc as they were used to and if they function equally then no comparison needed." (Dkt. No. 144-23, at 2). The email also noted that Baycare "actually loved the [Bard] kit component upgrades . . . over current Navilyst" kits. (*Id.*).

Years later, in a January 2017 email from William Millar to Tom Aldrich listing "key losses and risks for Q2," Millar listed Baycare as a "$850,000 Loss due to no Tip Location/Confirmation." (Dkt. No. 144-20, at 2). In his deposition, Millar expanded on this, testifying that, based on his

> conversations with [Baycare personnel] **[**60]** . . . BayCare was interested in moving to a navigation tip location system. We conducted a trial head-to-head against Bard, our midlines versus their midlines, because at the time that was also an **[*304]** interest . . . they had clinical data outcomes proving that we had better outcomes with the BioFlo midline versus the Bard device, yet . . . they wanted tip location 3CG and they could not use our PICC lines with the Bard system, so they made the business decision to move [to] Bard PICCs and midlines from AngioDynamics because of the requirement of not being able to get provided that solution.

(Dkt. No. 138-46, at 3-4). Millar further testified that Baycare switched from AngioDynamics' midline catheters to Bard's midline catheters, even though better patient outcomes were observed with AngioDynamics' catheters, and that their stated reason was the need for Bard's TLS stylet and the inability to pair it with AngioDynamics' PICCs. (*Id.* at 5-20).

j. St. Vincent's

In an April 2016 email listing updates on PICC opportunities, Daniel Tighe, a Bard District Manager, wrote: "St. Vincent — Billings — Angio D competitive conversion . . . Scheduled for June 13th." (Dkt. No. 144-25, at 2). In a subsequent November **[**61]** 2016 memo, Tighe wrote to a sales representative: "Excellent job of converting [the St. Vincent's] account from Angio D to 3CG in the first quarter. The team seems very satisfied with 3CG." (Dkt. No. 138-40, at 2).

k. UH Cleveland

Internal Bard documents reflect that, in 2015, Bard was able to convert UH Cleveland to its TLS system, putting Bard "one step closer to OWNING Cleveland with both PICCs and Tip Confirmation." (Dkt. No. 144-26, at 3; Dkt. No. 144-27, at 3). Scott Centea testified that, after experiencing multiple complications with a particular patient using Bard's PICC lines, UH Cleveland decided to try a BioFlo PICC (which needed to be placed by a physician in the IR suite rather than at the patient's bedside, since it could not be paired with Bard's TLS), and the patient had "zero complications" with the BioFlo PICC. (Dkt. No. 144-37, at 6-11). Centea testified that a UH Cleveland representative informed an AngioDynamics representative that, following this "fantastic patient success story," UH Cleveland asked Bard whether it would be possible to buy Bard's stylet single-sterile, but Bard "said no," and therefore UH Cleveland continued purchasing Bard's PICCs with its preloaded **[**62]** stylet rather than AngioDynamics' BioFlo PICCs. (*Id.* at 7-8). Centea could not recall the specific AngioDynamics representative who relayed this information to him or the specific UH Cleveland representatives who were involved, but testified that the story was "pretty well-known because of how we worked closely with this patient," that the story became "pretty high profile testimony" regarding BioFlo's benefits, and that "a lot of people were asking within AngioDynamics, as well as other institutions," whether UH Cleveland had switched to BioFlo. (*Id.* at 10-11).

l. VA Little Rock

In a May 2014 email, in response to a question regarding whether AngioDynamics had lost or was going to lose VA Little Rock's business, Millar responded: "Lost. Bard 3CG was implemented as tip location/navigation was decided to be the requirement." (Dkt. No. 144-28, at 2). In February 2015, a Bard employee wrote that VA Little Rock "was an Angiodynamics account who used Bioflo and Navigator. To eliminate X-ray, they trialed 3CG and the Solo, changed to Bard with no increase in cathflo and less placement complications." (Dkt. No. 144-29, at 3).

III. STANDARD OF REVIEW

HN1[] Under *Rule 56(a)*, summary judgment may be granted only if all the submissions **[**63]** **[*305]** taken together "show that there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law." *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986)*; *see also* *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 247-48, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. The moving party bears the initial burden of demonstrating "the absence of a genuine issue of material fact." *Celotex, 477 U.S. at 323*. A fact is "material" if it "might affect the outcome of the suit under the governing law," and is genuinely in dispute "if the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Anderson, 477 U.S. at 248*; *see also* *Jeffreys v. City of New York, 426 F.3d 549, 553 (2d Cir. 2005)* (citing *Anderson, 477 U.S. at 248*). The movant may meet this burden by showing that the nonmoving party has "fail[ed] to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden of proof at trial." *Celotex, 477 U.S. at 322*; *see also* *Selevan v. N.Y. Thruway Auth., 711 F.3d 253, 256 (2d Cir. 2013)* (explaining that summary judgment is appropriate where the nonmoving party fails to "'come forth with evidence sufficient to permit a reasonable juror to return a verdict in his or her favor on' an essential element of a claim" (quoting *In re Omnicom Grp., Inc. Sec. Litig., 597 F.3d 501, 509 (2d Cir.2010)))*.

HN2[] If the moving party meets this burden, the nonmoving party must "set out specific facts showing a genuine issue for trial." *Anderson, 477 U.S. at 248, 250*; *see also* *Celotex, 477 U.S. at 323-24*; *Wright v. Goord, 554 F.3d 255, 266 (2d Cir. 2009)*. "When ruling on a summary judgment motion, the district **[**64]** court must construe the facts in the light most favorable to the non-moving party and must resolve all ambiguities and draw all reasonable inferences against the movant." *Dallas Aerospace, Inc. v. CIS Air Corp., 352 F.3d 775, 780 (2d Cir. 2003)*. Still, the nonmoving party "must do more than simply show that there is some metaphysical doubt as to the material facts," *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 106 S. Ct. 1348, 89 L. Ed. 2d 538 (1986)*, and cannot rely on "mere speculation or conjecture as to the true nature of the facts to overcome a motion for summary judgment," *Knight v. U.S. Fire Ins. Co., 804 F.2d 9, 12 (2d Cir. 1986)* (quoting *Quarles v. Gen. Motors Corp., 758 F.2d 839, 840 (2d Cir. 1985))*. Furthermore, "[m]ere conclusory allegations or denials . . . cannot by themselves create a genuine issue of material fact where none would otherwise exist." *Hicks v. Baines, 593 F.3d 159, 166 (2d Cir. 2010)* (quoting *Fletcher v. Atex, Inc., 68 F.3d 1451, 1456 (2d Cir. 1995))*.

HN3[] When considering cross-motions for summary judgment, a court "must evaluate each party's motion on its own merits, taking care in each instance to draw all reasonable inferences against the party whose motion is under consideration." *Hotel Emp. & Rest. Emp. Union, Local 100 of New York, N.Y. & Vicinity v. City of New York Dep't of Parks & Recreation, 311 F.3d 534, 543 (2d Cir. 2002)* (quoting *Heublein v. United States, 996 F.2d 1455, 1461 (2d Cir. 1993)* (internal quotation marks omitted)). "In the context of antitrust cases . . . summary judgment is particularly favored because of the concern that protracted litigation will chill pro-competitive market forces." *Pepsi Co, Inc. v. Coca-Cola Co., 315 F.3d 101, 104-05 (2d Cir. 2002)* (citing *Tops Mkts., Inc. v. Quality Mkts., Inc., 142 F.3d 90, 95 (2d Cir.1998))*. "Although all reasonable inferences will be drawn in favor of the non-movant, those **[**65]** inferences 'must be reasonable **[*306]** in light of competing inferences of acceptable conduct.'" *Id.* (quoting *Tops Mkts., 142 F.3d at 95*).

IV. DISCUSSION

AngioDynamics moves for summary judgment on all liability elements of its tying claim, as well as on the issue of antitrust injury, leaving the amount of damages as the only triable issue. (Dkt. No. 134). Bard moves for summary judgment seeking dismissal of the complaint, asserting that AngioDynamics has failed to raise a triable issue of fact as to antitrust injury and damages. (Dkt. No. 133). In conjunction with its motion for summary judgment, Bard moves to exclude the testimony of AngioDynamics' causation and damages expert. (Dkt. No. 132). Bard contends that if its motion is successful, AngioDynamics would have "no evidence of any damages" with which it could "create a triable issue as to damages." (Dkt. No. 133-1, at 36). The Court addresses each element in turn, and addresses Bard's motion in limine in connection with its analysis of damages.

A. Liability Elements

HN4[] "A tying arrangement is 'an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase **[**66]** that product from any other supplier.'" *Smugglers Notch Homeowners' Ass'n, Inc. v. Smugglers' Notch Mgmt. Co., Ltd., 414 F. App'x 372, 374 (2d Cir. 2011)* (quoting *Eastman Kodak Co. v. Image Tech. Servs., Inc., 504 U.S. 451, 464, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992))*. To state a tying claim under the Sherman Act, a plaintiff must prove that: (1) "the sale of one product (the tying product) is conditioned on the purchase of a separate product (the tied product)"; (2) "the seller uses actual coercion to force buyers to purchase the tied product"; (3) "the seller has sufficient economic power in the tying product market to coerce purchasers into buying the tied product"; (4) "the tie-in has anticompetitive effects in the tied market"; and (5) "a not insubstantial amount of interstate commerce is involved in the tied market." *Kaufman v. Time Warner, 836 F.3d 137, 141 (2d Cir. 2016)* (citing *E&L Consulting, Ltd. v. Doman Indus. Ltd., 472 F.3d 23, 31 (2d Cir. 2006))*.

AngioDynamics' complaint alleges that Bard has violated *section 1 of the Sherman Act* by unlawfully tying the purchase of Bard TLS stylets to the purchase of Bard PICCs. (Dkt. No. 1, ¶ 95). The "tying products"—the products over which Bard allegedly has market power—are Bard's TLSs, and the "tied products"—the products that Bard allegedly coerces buyers to purchase—are Bard's PICCs. (*Id.* ¶¶ 96-96, 104). AngioDynamics argues that based on the record evidence, there is no genuine dispute of material fact as to any of the five elements. (Dkt. No. 134).

1. Separate Products

HN5[] "The 'separate **[**67]** product' element requires that the alleged tying product and tied product be separate, *i.e.*, they must exist in separate and distinct product markets." *Kaufman, 836 F.3d at 141*. "This is because if there is no separate market for the allegedly tied product, there can be no fear of leveraging a monopoly in one market to harm competition in a second market." *Id. at 142*. Courts apply a "consumer demand test" to determine whether two products are separate for ***antitrust law*** purposes. *Id.* Two products are separate only if "there is a sufficient demand for the purchase of [the tied product] separate from [the tying product] to identify a distinct product market in which it is efficient to offer [the former] separately from [the latter]." *Jefferson Par. Hosp. Dist. No. 2 v. **[*307]** Hyde, 466 U.S. 2, 21-22, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*, *abrogated on other grounds by Ill. Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 31, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*. Separateness "turns not on the functional relation between [the products], but rather on the character of the demand for the two items." *Id. at 19*. Factors relevant to whether there is "separate and distinct consumer demand" for the two products include, among others, "the history of the products being, or not being, sold separately" and "the sale of the products separately in similar markets." *Kaufman, 836 F.3d at 142*.

AngioDynamics contends that there is no genuine dispute of material fact **[**68]** as to whether Bard's PICCs and its TLSs constitute separate products. AngioDynamics cites the following evidence in support of its position that they are separate products: (1) documentary evidence and Bard's own admissions establishing that some customers have inquired about the possibility of purchasing a standalone TLS stylet, and that one (Cleveland Clinic) actually did for a time; (2) documentary evidence reflecting Bard's efforts to avoid publicizing to customers the fact that it had obtained FDA approval to sell its TLS stylet single-sterile, and was doing so with respect to Cleveland Clinic, at least partly out of a concern that customers might demand such a product; and (3) the fact that Teleflex, Bard's only competitor that sells navigation-enabled TLSs, "has always sold its TLS Stylets separately from its

PICCs and continues to offer this option to customers today," and a significant number of its TLS customers elect that option. (Dkt No. 134-1, at 16-19; Dkt. No. 152, at 8).

In arguing that there is a genuine dispute of material fact as to the separate products element, Bard relies on the analysis of its expert, Professor Fiona Scott Morton, who opines, among other things, **[**69]** that: (1) "the total demand for a separate 3CG stylet represented by [the hospitals the parties have identified as having inquired about a standalone stylet] is at most relatively small"; (2) based on this low demand and the costs of offering a standalone stylet, "Bard would reasonably conclude that there would likely be little demand for a separate 3CG stylet at a price that would make it profitable for Bard to sell the stylet separately"; and (3) "[t]he fact that Teleflex sells a relatively small number of . . . stylets separately is not evidence that there would be enough demand for a separate 3CG stylet to induce Bard to sell it separately," including because Teleflex and Bard Stylets "are based on different technology" and the two companies "face different costs for selling them separately," rendering it "not at all unreasonable or surprising that the two firms would come to different conclusions about selling their stylets separately." (Dkt. No. 145, at 8 (quoting Dkt. No. 147-13, at 33-34); *id.* at 10-11 (quoting Dkt. No. 147-13, at 31); *id.* at 13-14 (quoting Dkt. No. 147-13, at 35)). Bard also argues that: (1) Bard's witness testimony suggests that it developed its TLS stylets to be used exclusively **[**70]** as components in Bard's PICCs and that they were "not intended or designed to be loaded in the field"; (2) AngioDynamics' witness testimony establishes that, when it tracks its "market share at the PICC level," it does not separately track market share for "disposables" like TLS stylets; (3) neither "anecdotal" examples of customer inquiries regarding a standalone stylet nor documents reflecting Bard's "prepar[ation] for the possibility that a customer might make an inquiry" establish that there was significant enough demand for Bard's TLS as a separate product to satisfy the consumer demand test, particularly where **[*308]** none of the inquiring individuals submitted a formal Request for Proposal, discussed the price they would be willing to pay for a standalone stylet, or had complete decision-making authority on behalf of their hospitals; and (4) "AngioDynamics' own economic expert . . . agreed that one must evaluate whether there would be sufficient demand for Bard's standalone stylets at a price that covered all the relevant costs of offering the product," but "has not quantified the relevant costs Bard would have to cover if it offered the standalone stylet, nor did he determine at what **[**71]** price demand for standalone stylets would dry up." (Dkt. No. 145, at 9-13).

Based on the parties' arguments and the record before it, the Court finds that Bard has raised a genuine dispute of material fact sufficient to survive summary judgment with respect to the separate products element. AngioDynamics is correct that the record evidence of customer inquiries to Bard regarding a standalone stylet and Bard's efforts to conceal knowledge of the standalone stylet in the market, as well as the fact that Bard's only significant TLS competitor offers its standalone stylet separately from its PICCs and many of its TLS customers choose to purchase it that way, constitutes strong evidence that consumer demand exists for TLSs as a separate product from PICCs. However, Bard has presented expert analysis suggesting that, whatever demand for Bard's standalone stylet may have existed in the market, it was not significant enough to make it "efficient [for Bard] to offer [TLSs] separately from [PICCs]," and thus satisfy the "consumer demand" test for purposes of ***antitrust law***. *See* *Jefferson Par., 466 U.S. at 21-22*. Because, based on the record before the Court, both parties take positions that a reasonable fact-finder could credit, **[**72]** their disputes are appropriately resolved at trial, not at the summary judgment stage.

AngioDynamics relies on *Park v. Thomson Corp., No. 05-cv-2931, 2007 U.S. Dist. LEXIS 2001, 2007 WL 119461 (S.D.N.Y. Jan. 11, 2007)* and *In re Visa Check/Mastermoney Antitrust Litigation, No. 96-cv-5238, 2003 U.S. Dist. LEXIS 4965, 2003 WL 1712568 (E.D.N.Y. Apr. 1, 2003)* for the proposition that "[w]here the items have been sold separately, distinct products exist," and argues that under this case law, the fact that Teleflex sells its TLS separately from its PICCs establishes the existence of separate products. (Dkt. No. 134-1, at 14-15; Dkt. No. 152, at 7-8). However, the Court does not read either case to suggest that Teleflex's sale of a standalone TLS establishes the existence of separate products *as a matter of law*. In *Park*, the Court found that BAR/BRI's Multistate Bar Examination ("MBE") and state-specific bar review courses constituted separate products by relying on the fact that "numerous sellers offer an MBE-only or specific-state course to buyers every year," and granted summary judgment to the plaintiff on the separate products element. *Park, 2007 U.S. Dist. LEXIS 2001, at *9-10, 2007 WL 119461, at *3*. The *In re Visa* court found that "[o]verwhelming evidence establishes that merchant demand for credit card services is distinct from merchant demand for debit card services," including **[**73]** that "those services are sold separately; many merchants would refuse to use off-line debit services if given the choice to do so; and the defendants themselves have repeatedly acknowledged in their business strategy and marketing activities the distinctive attributes of their off-line debit services compared to their credit card services." *In re Visa, 2003 U.S. Dist. LEXIS 4965, at *8-9, 2003 WL 1712568 at *2*.

[*309] The evidence here is not so clear-cut. It establishes that there are only two competitors who sell navigation-enabled TLSs—one that sells its TLS stylet as a standalone product and one that does not. It also suggests that there are genuine technological distinctions between the two companies' products that may or may not affect the price at which they would need to offer their respective stylets single-sterile in order to cover their associated costs, and consequently, the level of consumer demand for each of them as standalone products when sold at that price. (Dkt. No. 136-6, at 33-34 (describing technological differences between Teleflex and Bard stylets); Dkt. No. 147-44, ¶¶ 4-10 (same); Dkt. No. 147-13, at 35 (opining that technological differences would impact the companies' costs of selling their respective TLS stylets single-sterile, the **[**74]** price at which those single-sterile stylets would be offered, and the resulting consumer demand)).[5] While the Court agrees with the *In re Visa* court that "[t]he proper question is not whether it was more efficient for [Bard] to offer [its PICCs and TLS stylets] together, but whether the nature of the demand is such that those services could be offered separately," *In re Visa, 2003 U.S. Dist. LEXIS 4965, at *9, 2003 WL 1712568 at *3*, here (unlike in *In re Visa*) the genuine disputes of fact do not merely relate to "whether it was more efficient for [Bard] to offer [its PICCs and TLS stylets] together," but to whether the "nature of the demand" for Bard's TLS stylet (as distinct from Teleflex's TLS stylet) is such that Bard could efficiently sell the products separately at all. Therefore, the Court denies AngioDynamics' motion for summary judgment with respect to the separate products element of its claim.

2. Coercion

HN6[] "Actual coercion by the seller that in fact forces the buyer to purchase the tied product is an indispensable element of a tying violation." *Unijax, Inc. v. Champion Int'l, Inc., 683 F.2d 678, 685 (2d Cir. 1982)*. Indeed, "the essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that **[**75]** the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms." *Jefferson Par., 466 U.S. at 12*. "When such 'forcing' is present, competition on the merits in the market for the tied item is restrained and the Sherman Act is violated." *Id.* "The element of actual coercion is designed to weed out the many cases where the bundling of separate products is due to consumer demand. If a consumer ***wants*** to purchase a bundle of the alleged tying and tied products, the seller is simply satisfying consumer demand and monopolization concerns are irrelevant." *Kaufman, 836 F.3d at 142*. A seller's "use of strong persuasion, encouragement, or cajolery to the point of obnoxiousness to induce [a buyer] to buy its full line of products does not . . . amount to actual coercion," which is present only if the seller "goes beyond persuasion and conditions its [buyer's] purchase of one product on the purchase of another product." *Unijax, 683 F.2d at 685* (internal quotation marks omitted).

[*310] ***HN7***[] An "unremitting policy of tie-in, if accompanied by sufficient market power in the tying product to appreciably restrain competition in the market for the tied product constitutes the requisite coercion . . . given foreclosure of a not insubstantial volume of **[**76]** interstate commerce." *Hill v. A-T-O, Inc., 535 F.2d 1349, 1355 (2d Cir. 1976)*. Thus, when the seller has "a policy of never offering the [tying product] separately from the [tied product]," *id.*, allegations of individual coercion are unnecessary. *See* *Park, 2007 U.S. Dist. LEXIS 2001, at *11-12, 2007 WL 119461, at *4* ("When a policy of conditioned sales is demonstrated, proof of coercion on an individual basis is unnecessary."); *cf.* *Reisner v. Gen. Motors Corp., 511 F. Supp. 1167, 1177 n.21 (S.D.N.Y. 1981)* ("The 'unremitting policy of tie-in,' which under some circumstances can substitute for coercion, is appropriate only in a situation . . . where the policy was applied to all buyers." (citation omitted)), *aff'd*, *671 F.2d 91 (2d Cir. 1982)*.

---

[5] Moreover, the fact that Bard sold single-sterile stylets to Cleveland Clinic for a price at which Bard appeared to make a fairly high margin, (Dkt. No. 138-79, at 3), does not definitively resolve the question of whether sufficient demand existed to allow Bard to efficiently sell the products separately to the market at large, given the record evidence suggesting that this price was based on factors specific to Cleveland Clinic and was discounted from the price at which Bard would have been able to offer its single-sterile stylet to the market. (Dkt. No. 146, ¶ 48 (citing and summarizing record evidence)).

AngioDynamics argues that the element of coercion is met here because "Bard admits that it has a policy of only selling its TLS Stylets preloaded in its PICCs—forcing those who want to purchase Bard's TLS to also purchase its PICCs—and that it has only made one exception to that policy, for the Cleveland Clinic." (Dkt. No. 134-1, at 20-21; *see also* Dkt. No. 152, at 10). AngioDynamics also argues that "the record establishes, and Bard has admitted, that many institutions have requested to purchase Bard's TLS Stylets separately from its PICCs," and that "Bard refused these requests and has not sold its PICCs to any of these institutions—only to the Cleveland Clinic." **[**77]** (*Id.* at 21).

Bard responds that AngioDynamics "has a complete failure of proof" on the coercion element because "not a single hospital will testify that it 'either did not want [the Bard PICC] at all, or might have preferred to purchase [PICCs] elsewhere on different terms'"; to the contrary, "the only hospital that the jury will hear, Cleveland Clinic, will testify [that] it had the choice to purchase Bard's standalone stylets and use them with AngioDynamics' PICCs, but quickly decided that it preferred Bard's preloaded PICCs." (Dkt. No. 145, at 15-16 (quoting *Jefferson Par., 466 U.S. at 12*)). Bard also argues that AngioDynamics cannot satisfy the coercion element "by showing only that Bard does not offer its stylets separately from its PICCs," without any evidence that particular customers were actually coerced into purchasing the products together. (*Id.* at 16-17).

Here, it is undisputed that, with the sole exception of Cleveland Clinic for a limited period in the past, Bard has never, and does not, allow its customers to purchase its TLS stylets separately from its PICCs. In other words, as a matter of Bard's policy, customers who wish to purchase Bard's TLS stylet are forced to purchase Bard's PICCs along with it. (Dkt. No. 133-2, **[**78]** ¶¶ 26-27, 30; Dkt. No. 134-2, ¶¶ 22-23; Dkt. No. 144-1, ¶¶ 26-27, 30; Dkt. No. 146, ¶¶ 22-23). Thus, Bard's policy is precisely the type of "unremitting policy of a tie," i.e. the "policy of never offering the [tying product] separately from the [tied product]," that the Second Circuit has long held "constitutes the requisite coercion," assuming the other elements of market power and foreclosure of a not insubstantial amount of commerce are satisfied. *Hill, 535 F.2d at 1355*.

Bard's argument that AngioDynamics cannot prevail on the coercion element without proof that individual customers were coerced into purchasing the tied products together misses the mark. While Bard correctly states that the Second Circuit requires a showing of actual coercion to prevail on a tying claim, it has offered **[*311]** no rebuttal to the case law in this Circuit establishing that a "policy of never offering the [tying product] separately from the [tied product]," *Hill, 535 F.2d at 1355*, which "[is] applied to all buyers," *Reisner, 511 F. Supp. at 1177 n.21*, in itself constitutes such "actual coercion," since any customer who wants the tying product is, by definition, forced to purchase it with the tied product or not at all. *See* *Park, 2007 U.S. Dist. LEXIS 2001, at *11-12, 2007 WL 119461, at *4* ("When a policy of conditioned sales is demonstrated, proof **[**79]** of coercion on an individual basis is unnecessary."); *In re Visa, 2003 U.S. Dist. LEXIS 4965, at *7-8, 2003 WL 1712568, at *2* (holding, on a plaintiff's motion for summary judgment, that the defendants "indisputably" engaged in a tie because the defendants' "rules require merchants who accept [the tying product] to also accept [the tied product]" and "Defendants do not claim otherwise").

Bard argues that "AngioDynamics cannot meet the *Hill* standard," because *Hill* establishes that, "in addition to a policy of tying, a plaintiff must also show (i) market power in the tying market, and (ii) foreclosure of a not insubstantial amount of commerce." (Dkt. No. 145, at 17). ***HN8***[] Bard is correct that, under *Hill*, an "unremitting policy of a tie" only transforms into "actual coercion" where the defendant has sufficient market power such that its policy can "appreciably restrain competition in the market for the tied product" and "foreclos[e] a not insubstantial volume of interstate commerce." *Hill, 535 F.2d at 1355*. Indeed, without such market power, a defendant cannot actually coerce customers into purchasing its tied products, since those customers can simply purchase the desired products separately elsewhere. In its most recent discussion of the "actual coercion" element, while it did not **[**80]** address the continued validity of *Hill*, the Second Circuit took a consistent approach, noting that "the 'separate product' and 'market power' requirements are usually essential to the coercion element," since those separate elements are necessary to distinguish tying policies that result from the defendant's market power from situations where "the bundling of separate products is due to consumer demand." *Kaufman, 836 F.3d at 141-43*.

HN9[] The Court reads these cases to hold that an "unremitting policy of a tie" constitutes actual coercion if, and only if, the other elements of a tying claim—market power, separate products, and the foreclosure of a not insubstantial amount of commerce—are met. Therefore, if a plaintiff proves that a defendant has an unremitting policy of a tie that applies to all customers, the plaintiff need not present proof of individualized coercion, but must still prove the other elements of its tying claim in order to establish that that "unremitting policy" in itself constitutes "actual coercion." Here, the fact that Bard engages in an "unremitting policy of a tie" is not in dispute; given that, proof that Bard's TLS policy coerced individual customers who did not want Bard's PICCs into buying **[**81]** them is unnecessary to prove the "actual coercion" element of AngioDynamics' claim. However, the Court cannot conclude that Bard's "unremitting policy of a tie," in itself, satisfies that element unless it determines that Bard has sufficient market power, and forecloses a sufficiently "not insubstantial" amount of commerce, to transform that "unremitting policy" into "actual coercion" within the meaning of the antitrust laws. Because, as discussed below, genuine factual disputes remain as to these distinct elements of AngioDynamics' tying claim, the Court must, at this stage, deny AngioDynamics' motion for summary judgment on the actual coercion element.

3. Market Power in the Tying Product Market

With respect to the third element of AngioDynamics' tying claim—market power **[*312]** in the tying product market—the Second Circuit has explained:

> The third element at issue here—market power in the tying product—is essential to a would-be monopolist's coercion via tie-in. Without the leverage of market power, a seller's inefficient tie-in will fail because a rational consumer will buy the tying product from the seller's competitor. "As a simple example, if one of a dozen food stores in a community **[**82]** were to refuse to sell flour unless the buyer also took sugar it would hardly tend to restrain competition in sugar if its competitors were ready and able to sell flour by itself." *N. Pac. Ry. Co., 356 U.S. at 6-7, 78 S. Ct. 514*. *HN10*[] Hence, without market power, there is little risk of anticompetitive harm from the seller's tie-in.
>
> Market power is "the ability of a single seller to raise price and restrict output." *Eastman Kodak, 504 U.S. at 464, 112 S. Ct. 2072* (*quoting* *Fortner Enters., Inc. v. U.S. Steel Corp., 394 U.S. 495, 503, 89 S. Ct. 1252, 22 L. Ed. 2d 495 (1969))*. It can be shown by specific evidence of a seller's ability to control prices or exclude competitors from the market. *See* *K.M.B. Warehouse Distribs., Inc. v. Walker Mfg. Co., 61 F.3d 123, 129 (2d Cir. 1995)*. Market share is a proxy for market power. *See id.;* *Eastman Kodak, 504 U.S. at 464, 112 S. Ct. 2072*. A high market share alone, however, is insufficient to infer a seller's market power if other characteristics of the product market, such as low barriers to entry, high cross elasticity of demand, or technological developments in the industry, interfere with the seller's control of prices. *See* *Tops Mkts., Inc. v. Quality Mkts., Inc., 142 F.3d 90, 98-99 (2d Cir. 1998)* ("A court will draw an inference of monopoly power only after full consideration of the relationship between market share and other relevant market characteristics."). Indeed, in a tying case, "the best way" to plead market power is to allege facts that, if proven, "establish directly that the price of the tied package is higher than the price of **[**83]** components sold in competitive markets." *Will v. Comprehensive Accounting Corp., 776 F.2d 665, 671-72 (7th Cir. 1985)* (Easterbrook, J.).

Kaufman, 836 F.3d at 143.

AngioDynamics argues that Bard's overwhelming share of the market for TLSs establishes its market power. (Dkt. No. 134-1, at 22-23; Dkt. No. 152, at 11-12). AngioDynamics also contends that Bard's significant market share is protected by high barriers to entry in the TLS market, including high development costs, the requirement for FDA clearance of medical devices, and Bard's ownership of patented TLS technology. (Dkt. No. 134-1, at 22-23; Dkt. No. 152, at 12). Bard argues that genuine factual disputes exist as to the market power element because: (1) the parties disagree as to whether the "TLS market" is a separate and distinct relevant antitrust market, or whether the relevant market is the market for "differentiated PICCs," and AngioDynamics has not presented evidence regarding Bard's market power in the "differentiated PICC" market; and (2) even assuming the market for TLSs constitutes its own antitrust market, there are factual disputes regarding the significance of barriers to entry in the TLS market, and whether "Bard has maintained high share because it has offered a good product at a cheaper price rather than because **[**84]** of high entry barriers." (Dkt. No. 145, at 17-21).

Bard does not meaningfully dispute that it sold over the overwhelming majority of all TLSs between 2013 and 2018. (Dkt. No. 134-2, ¶ 47; Dkt. No. 146, ¶ 47). Assuming the TLS market constitutes its own antitrust **[*313]** market, this extremely high market share alone would constitute significant evidence of market power*. See, e.g.,* *In re Visa, 2003 U.S. Dist. LEXIS 4965, at *11-12, 2003 WL 1712568, at *4* (finding that market share of "nearly 60 percent" "easily qualifies as 'appreciable economic power' for purposes of the per se [tying] rule"); *Park, 2007 U.S. Dist. LEXIS 2001, at *21-22, 2007 WL 119461, at *8* (noting that "[h]ow much market power is necessary to find a *per se* illegal tying arrangement is an unsettled issue of ***antitrust law***" but that the fact that "Defendants possess an 80-90% market share might, standing alone, permit an inference of market power"); *Ortho Diagnostic Sys., Inc. v. Abbott Labs., Inc., 920 F. Supp. 455, 473 (S.D.N.Y. 1996)*, *as corrected* (Mar. 15, 1996) (holding that "a market share above 30 percent is necessary to establish the requisite [market] power" for purposes of a tying claim under *Sherman Act § 1*). However, the Court nonetheless finds that there are factual disputes that preclude summary judgment for AngioDynamics on this element.

First, for the same reasons the Court found that a genuine dispute of material fact existed as to whether **[**85]** TLSs and PICCs are separate products, the Court finds that the contrasting expert analyses by Dr. Hay and Professor Scott Morton as to whether these products constitute separate relevant antitrust markets, (Dkt. No. 136-9, at 26-35; Dkt. No. 147-13, at 13-16; Dkt. No. 138-22, at 4-6), viewed together with the record evidence as a whole, raise a genuine factual dispute as to this question.[6] Because an analysis of market power "only makes sense with reference to a particular market," *Heerwagen v. Clear Channel Commc'ns, 435 F.3d 219, 229 (2d Cir. 2006)*, the question of whether Bard has sufficient market power for purposes of AngioDynamics' tying claim must survive summary judgment as well.[7]

Second, even assuming the TLS market constitutes a distinct market, there are factual questions regarding the barriers to entry AngioDynamics identifies and their impact on Bard's market power. From the record evidence, there is little doubt that high development costs, the need for FDA approval, and patents held by Bard pose barriers for market entrants seeking to develop TLSs. (Dkt. No. 134-2, ¶¶ 50-56 **[*314]** (citing record evidence discussing these barriers to entry)). However, there are factual questions as to whether those barriers are significant enough to protect Bard's **[**86]** ability to raise price and restrict output in the TLS market, particularly given record evidence that Bard's competitors have developed TLS products in the past notwithstanding the associated development costs and Bard's patents, (Dkt. No. 146, ¶¶ 50, 56), that the price of Bard's PICCs preloaded with its TLS stylet has sometimes been *lower* than the combination of AngioDynamics' PICCs and Teleflex's TLS, (Dkt. No. 133-2, ¶¶ 39-41; Dkt. No. 144-1, ¶¶ 39-41), that [TEXT REDACTED BY THE COURT], (Dkt. No. 133-2, ¶ 21; Dkt. No. 144-1, ¶ 21), and that there is no record evidence suggesting that Bard has, in fact, raised prices or restricted output in the TLS market. These questions are best resolved by a fact-finder after development of a complete record at trial,

---

[6] Indeed, at oral argument, AngioDynamics' counsel agreed that, should the Court find a genuine dispute of material fact as to whether Bard's PICCs constitute a separate product from its TLSs, it should also find a factual dispute as to the proper market definition for purposes of the "market power" element.

[7] AngioDynamics argues that Professor Scott Morton's opinion is based on the premise that there is no separate use for TLSs independent of their use with PICCs, and that this premise is contrary to law because "[t]he Supreme Court and courts in this Circuit have repeatedly held . . . that it does not matter whether 'there is no separate use' for the tying product." (Dkt. No. 152, at 11 (citing *Park, 2007 U.S. Dist. LEXIS 2001, at *10-11, 2007 WL 119461, at *4*; *Kodak, 504 U.S. at 463*)). AngioDynamics is correct that the mere fact that two products are interdependent does not preclude a finding that they are separate products or exist in separate antitrust markets. However, Professor Scott Morton's opinion is not based merely on the fact that Bard's TLSs have no use separate from Bard's PICCs. Rather, she opines that consumers "do not evaluate the price of [a TLS] stylet in comparison with the price of other stylets," but rather "evaluate the price of that stylet paired with a PICC in comparison with other combinations of stylets and PICCs," and "choose the differentiated PICC system that best suits its needs based on the system's overall features and price." (Dkt. No. 147-13, at 15). Professor Scott Morton concludes that, "[b]ecause the relevant competition between manufacturers occurs at the differentiated PICC level and not at the TLS or TLS stylet level . . . there is not a separate relevant product market for TLSs." (*Id.* at 16).

rather than the Court on summary judgment. Therefore, the Court denies AngioDynamics' motion for summary judgment on the market power element of its claim.

4. "Not Insubstantial" Amount of Interstate Commerce

HN11[] As to the fourth element of AngioDynamics' claim, the Supreme Court has stated that there must be a substantial potential for impact on competition in the tied market in order to justify condemnation of an alleged tying arrangement. **[**87]** *Jefferson Par., 466 U.S. at 16*. "If only a single purchaser were 'forced' with respect to the purchase of a tied item, the resultant impact on competition would not be sufficient to warrant the concern of ***antitrust law***." *Id.* The Supreme Court has defined "substantial" in this context as "substantial enough in terms of dollar-volume so as not to be merely *de minimis*." *Fortner Enters., Inc. v. United States Steel Corp., 394 U.S. 495, 501, 89 S. Ct. 1252, 22 L. Ed. 2d 495 (1969)* ("*Fortner I*"). "There is no magic number that definitively establishes whether a plaintiff has foreclosed a 'not insubstantial' amount of potential sales for the tied product." *Gonzalez v. St. Margaret's House Housing Dev. Fund Corp., 880 F.2d 1514, 1518 (2d Cir. 1989)*. In *Fortner I*, the Supreme Court held that a sum of almost $200,000 is not "paltry or 'insubstantial,'" while the Second Circuit has "said that $600,000 of commerce clearly meets 'any test of substantiality.'" *Id.* (quoting *Fortner, 394 U.S. at 502*; *Yentsch v. Texaco, Inc., 630 F.2d 46, 58 (2d Cir. 1980))*.

AngioDynamics argues that, for purposes of this element, the Court should look "solely to the amount of sales processed by the tied product." (Dkt. No. 134-1, at 24; Dkt. No. 152, at 12-14). It asserts that "the data produced by Bard in the litigation shows that Bard sold over [TEXT REDACTED BY THE COURT] PICCs pre-loaded with TLS, valued at over [TEXT REDACTED BY THE COURT] during the period 2013-2018." (Dkt. No. 134-1, at 24; Dkt. No. 152, at 12). Bard **[**88]** argues that the relevant measure is not the *total volume of tied sales*, but the *amount of foreclosed sales*, i.e. the amount of sales that would have occurred but for the challenged tie (subtracting those sales in which the customer would have voluntarily chose to purchase the tied package even if they had a different option). (Dkt. No. 145, at 21-22).

HN12[] The Supreme Court has held that, "[f]or purposes of determining whether the amount of commerce foreclosed is too insubstantial to warrant prohibition of the practice . . . the relevant figure is the total volume of sales tied by the sales policy under challenge, not the portion of this total accounted for by the particular plaintiff who brings suit." *Fortner I, 394 U.S. at 502*. Clearly, then, the relevant metric is the amount of PICC sales Bard's TLS policy foreclosed with the respect **[*315]** to the *entire market*, not just AngioDynamics, and no party contends otherwise. The more difficult, and relevant, question is whether this language means that the Court should look simply to the total volume of Bard's tied sales, rather than the amount of sales that Bard's competitors actually were foreclosed from as a result of Bard's conduct. AngioDynamics cites several district **[**89]** court cases in support of its argument that the court should look solely to the total volume of tied sales, rather than the volume of sales that were actually foreclosed. *See In re Data Gen. Corp. Antitrust Litig., 490 F. Supp. 1089, 1117 (N.D. Cal. 1980)* ("In Fortner I and the earlier cases relied on therein, the Supreme Court looked solely at the total volume of the defendant's tied sales . . . Proof of actual foreclosure has never been required in order to satisfy the effect on commerce test." (citation omitted)); *In re Visa, 2003 U.S. Dist. LEXIS 4965, at *7, 2003 WL 1712568, at *2* ("In 1999 alone, merchants processed over one hundred and fifty billion dollars in sales through the defendants' off-line debit cards. This figure is 'not insubstantial.' . . . To the extent that the defendants contend that this element incorporates the need for a showing of 'foreclosure' or 'anticompetitive effect' in the tied product market, I disagree.").

However, the Second Circuit has noted that while "one might read *Fortner I* to require the district court to consider the [total amount of tied sales], we believe that the Supreme Court in *Fortner I* was primarily concerned with ascertaining the total sales lost to potential competitors due to the tying policy." *Gonzalez, 880 F.2d at 1519* (citation omitted). The *Gonzalez* court found that using the total amount of tied sales **[**90]** (in that case, mandatory meal charges collected from residents of a housing facility) "overstates the amount of commerce foreclosed because the record already indicates that many residents would continue to use the meal plan by choice," and that using only the amount of tied sales to the specific plaintiffs in the litigation "may also overstate the amount of commerce foreclosed by the mandatory meal policy because some plaintiffs would choose not to buy the product (the single, prepared meal) at all . . . for a variety of reasons; e.g., they might cook in their rooms at a lower cost." *Id. at 1518*. The Second Circuit remanded to the district court to "determine whether the impact of the alleged tying arrangement is substantial enough to warrant the protection of the antitrust laws" by "tak[ing] into consideration the actual number of people affected by the disputed policy," and noted that "[i]f the district court can ascertain [the total sales lost to potential competitors due to the tying policy], it may use that as the relevant figure." *Id. at 1519*.

Notwithstanding the somewhat ambiguous language in *Fortner I*, this Court is bound by the Second Circuit law in *Gonzalez*. Here, to estimate the amount of commerce **[**91]** foreclosed by Bard's TLS policy, AngioDynamics has simply provided its expert's valuation of the total volume of Bard's sales of PICCs preloaded with its TLS. (Dkt. No. 138-20, at 53-54). This, however, likely "overstates the amount of commerce foreclosed" by Bard's TLS policy, as it does not account for the near-certainty that at least *some* customers would have voluntarily purchased Bard's PICCs preloaded with its TLS stylet even if they had the option not to. *Gonzalez, 880 F.2d at 1518*; *cf., e.g., Park, 2007 U.S. Dist. LEXIS 2001, at *28, 2007 WL 119461, at *9* (finding that using a defendant's "total revenues" to measure the volume of commerce affected "would overstate the effect [of the alleged anticompetitive activity] because many consumers purchase the integrated BAR/BRI course by choice"). Of course, given that amounts as low as a few **[*316]** hundred thousand dollars are sufficient to find a "not insubstantial" amount of foreclosed commerce, if a fact-finder were to conclude that even a relatively small fraction of Bard's total PICC sales were actually foreclosed to competitors by its TLS policy, the fact-finder would likely have a basis to conclude that the amount of foreclosed commerce was "not insubstantial." However, as discussed below in connection with the "anticompetitive **[**92]** effects" element of AngioDynamics' claim, there are outstanding factual disputes as to whether Bard's TLS policy actually foreclosed *any* PICC sales at all. Therefore, the Court must deny AngioDynamics' motion for summary judgment on this element.[8]

5. Anticompetitive Effects[9]

HN13[] To prove anticompetitive effects, a plaintiff must prove that "the defendants' challenged behavior had an actual adverse effect on competition as a whole in the tied product market." *Geneva Pharms. Tech. Corp. v. Barr Labs., 386 F.3d 485, 506-07 (2d Cir. 2004)*. Anticompetitive effects may be proven directly by control of prices or exclusion of competition. *See Virgin Atl. Airways Ltd. v. British Airways PLC, 257 F.3d 256, 264 (2d Cir. 2001)*; *see also Yentsch, 630 F.2d at 57* (explaining that anticompetitive effects may be shown if "competitors were foreclosed from selling to [buyers] because of [the defendant's] policies"). If plaintiffs establish anticompetitive effects, the burden shifts to defendants to justify their tying arrangement. *Geneva, 386 F.3d at 507*. "Assuming defendants can provide such proof, the burden shifts back to the plaintiffs to prove that any legitimate competitive benefits offered by defendants could have been achieved through less restrictive means." *Id.*

AngioDynamics argues that Bard's TLS policy caused "substantial foreclosure in the PICC market, which harmed not only competitors but also **[**93]** the competitive environment in the PICC market." (Dkt. No. 134-1, at 25). AngioDynamics argues that, "[a]s a result of Bard's tie and its overwhelming market share in the TLS market . . .

---

[8] The Court recognizes that AngioDynamics' damages expert, Dr. Frankel, puts forth a number of estimates of AngioDynamics' lost profits that resulted from Bard's TLS policy. If proven, any one of these estimates would far exceed the low threshold to allow this Court to find that a "not insubstantial" amount of commerce has been foreclosed, without even accounting for other PICC competitors' lost sales. (Dkt. No. 132-5, at 45). However, these lost profits estimates are obviously in dispute, and given that (as discussed below) there are genuine disputes of material fact as to whether *any* of AngioDynamics' lost profits may be fairly attributed to Bard's TLS policy, these estimates cannot, at this stage, serve as a basis for granting summary judgment in AngioDynamics' favor.

[9] As they did at the motion to dismiss stage, the parties disagree on whether AngioDynamics must prove anticompetitive effects as an element of its per se claim, as distinct from its rule of reason claim. (Dkt. No. 134-1, at 24-25; Dkt. No. 145, at 22 n.26; Dkt. No. 152, at 14 & n.8). Because the Court has found that genuine disputes of material fact exist as to the other elements of AngioDynamics' claim under either a per se or rule of reason theory, a decision on this issue would not affect the Court's ultimate decision on either party's motion for summary judgment. Therefore, the Court does not address this issue.

Bard has almost entirely foreclosed competition in the largest segment of the PICC market (PICCs used with TLS)." (Dkt. No. 152, at 15). AngioDynamics also argues that Bard's policy "suppressed innovation and investment in the PICC market and frustrated customer choice." (Dkt. No. 134-1, at 26). Bard argues that: (1) customers who wish to use non-Bard PICCs with a TLS have the option to pair those PICCs with Teleflex's TLS, so Bard's PICC competitors are not entirely **[*317]** foreclosed from competing for such customers; (2) [TEXT REDACTED BY THE COURT] (3) Bard's actions have benefitted consumers in the form of lower PICC prices and higher product quality; (4) AngioDynamics has failed to establish BioFlo's technological superiority to Bard's PICCs (a basis for AngioDynamics' belief that many customers prefer BioFlo to Bard's PICCs and that Bard's TLS policy is therefore thwarting customer access to a desired product); and (4) the record belies any argument that Bard's TLS policy "suppressed innovation and **[**94]** investment in the PICC market," as both AngioDynamics and Teleflex have made significant investments in the development of innovative antithrombogenic and antimicrobial PICC technology. (Dkt. No. 145, at 22-25).

AngioDynamics' argument is facially compelling. Because Bard's policy forces any customer who wishes to use Bard's TLS stylet to pair it with Bard's PICCs, Bard's PICC competitors are effectively unable to compete for the PICC business of any customer who opts to use Bard's TLS. And because the vast majority of customers within the market segment for TLS-paired PICCs use Bard's TLS, Bard's TLS policy arguably precludes Bard's competitors from competing with Bard in by far the largest segment of the PICC market.

Nonetheless, as Bard has demonstrated, factual disputes exist as to whether Bard's TLS policy has actually foreclosed any PICC sales by Bard's competitors, given the combination of the following factors: (1) customers who wish to use a TLS stylet with a non-Bard PICC have the option to pair the non-Bard PICC with Teleflex's TLS, meaning that Bard's PICC competitors are not *entirely* foreclosed from competing with Bard even in the market segment for PICCs paired with TLSs; **[**95]** (2) record evidence suggests that customers who use Bard's PICCs preloaded with its TLS may prefer Bard's integrated product for various reasons independent of its TLS policy, including price, quality, ease of use, concerns about heightened risks to patient safety from loading a TLS stylet at the patient's bedside, the convenience of dealing with a single supplier, and preferences for Bard's PICC technology over competitors' PICC technology, including BioFlo; and (3) as discussed more fully with respect to the Court's analysis of antitrust injury, *see* Section IV.B.2. *supra*, AngioDynamics has not adduced evidence establishing beyond dispute that Bard's TLS policy caused AngioDynamics or Teleflex to lose PICC sales to Bard that they otherwise would have made.

Given these factors, a reasonable jury could find that Bard's dominance of the market segment for PICCs paired with TLSs has resulted from customers' overwhelming preference for Bard's combined PICC-TLS product over the other PICC and TLS combinations currently available, and not because Bard's TLS policy prevented Bard's PICC competitors from competing in that market segment. [TEXT REDACTED BY THE COURT]

Moreover, AngioDynamics cites **[**96]** no evidence that Bard's conduct has increased prices, reduced output or reduced product quality in the market. *Cf. MacDermid Printing Solutions LLC v. Cortron Corp., 833 F.3d 172, 182-84 (2d Cir. 2016)* (explaining that "[o]ur cases suggest that it is possible, at least in theory, to prove that a challenged action harmed competition without offering evidence of higher prices, reduced output, or reduced quality," but "in no precedential opinion in this Circuit has a plaintiff successfully proved an adverse effect on competition without offering" such evidence, though "[w]e have suggested that actions that reduce consumer choice are inherently anticompetitive"). **[*318]** And the Court agrees with Bard that AngioDynamics' claim that Bard's TLS policy suppressed innovation in the PICC market is conclusory and without support in the record.

Therefore, the Court finds that genuine disputes of material fact exist as to the anticompetitive effects element of AngioDynamics' claim, and denies AngioDynamics' motion for summary judgment on this element.

6. Liability Summary

For the foregoing reasons, the Court finds that genuine disputes of material fact exist as to each of the liability elements of AngioDynamics' claim, for purposes of both its per se and rule of reason theories. Therefore, **[**97]** the Court denies AngioDynamics' motion for summary judgment as to liability.

B. Antitrust Injury

Both parties move for summary judgment on the antitrust injury element of AngioDynamics' claim. (Dkt. No. 133-1; Dkt. No. 134-1, at 26-34). The notion of "antitrust injury" grew from the recognition that a competitor may be injured not only by prohibited anticompetitive activity, but also by competition itself, and that the antitrust laws were not intended to afford the latter injuries a remedy. *See* *Balaklaw v. Lovell, 14 F.3d 793, 797 (2d Cir. 1994)*. ***HN14***[] Antitrust injury, then, simply means "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. "To establish antitrust injury, a private litigant must 'prove . . . "injur[y] in its business or property" by reason of the violation . . . [and that] the violation was at least a material cause of the plaintiff's injury.'" *Blue Tree Hotels Inv., Ltd. v. Starwood Hotels & Resorts Worldwide, Inc., 369 F.3d 212, 220 (2d Cir. 2004)* (citations omitted, alterations in original). In other words, "a plaintiff must show (1) an injury-in-fact; (2) that has been caused by the violation; and (3) that is the type of injury contemplated by the [antitrust] statute." *Id.* The antitrust injury requirement thus ensures that a "plaintiff can recover **[**98]** only if the loss stems from a competition-*reducing* aspect or effect of the defendant's behavior." *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 344, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)*.

1. Preliminary Evidentiary Issues

Before turning to the merits of the parties' arguments, the Court must address a preliminary evidentiary issue. Throughout its briefing and its response to AngioDynamics' statement of material facts, Bard objects to certain evidence AngioDynamics relies on as inadmissible hearsay. Bard's overall argument is that, to the extent AngioDynamics cites statements from hospital employees (directly or as recounted second-hand by AngioDynamics employees), those statements are hearsay (and, in the latter case, double hearsay) and thus inadmissible. (Dkt. No. 145, at 26-30; Dkt. No. 146, ¶¶ 40(a)-(e), 59, 63-65 & "Statement of Additional Material Facts" ¶¶ 22(d), 23(c); Dkt. No. 154, at 10 & n.5, 12-13). AngioDynamics argues that this evidence is admissible under the "state of mind" exception to the hearsay rule to "show customer motive, such as a customer's reason for ceasing to do business with AngioDynamics." (Dkt. No. 144, at 29-30; Dkt. No. 152, at 19-20).

HN15[] The Court "may only consider admissible evidence" in ruling on a motion for summary judgment. *Humphrey v. Diamant Boart, Inc., 556 F. Supp. 2d 167, 173-74 (E.D.N.Y. 2008)* (citations **[**99]** omitted). At the same time, "material relied on at **[*319]** summary judgment need not be admissible in the form presented to the district court. Rather, so long as the evidence in question will be presented in admissible form at trial, it may be considered on summary judgment." *Smith v. City of New York, 697 F. App'x 88, 89 (2d Cir. 2017)* (internal quotation marks omitted). Thus, under *Rule 56(c)(2) of the Federal Rules of Civil Procedure*, "[a] party may object that the material cited to support or dispute a fact cannot be presented in a form that would be admissible in evidence."

HN16[] As the Second Circuit has long held, under *Fed. R. Evid. 803(3)*, "[s]tatements of a customer as to his reasons for not dealing with a supplier are admissible for [the] limited purpose" of demonstrating the customer's motive, "although not as evidence of the facts recited as furnishing the motives." *Herman Schwabe, Inc. v. United Shoe Machinery Corp., 297 F.2d 906, 914 (2d Cir. 1962)* (citations and internal quotation marks omitted); *see also* *Hydrolevel Corp. v. Am. Soc. Of Mech. Eng'rs, Inc., 635 F.2d 118, 128 (2d Cir. 1980)* (same); *Sleepy's LLC v. Select Comfort Wholesale Corp., 779 F.3d 191, 204 (2d Cir. 2015)* (same, outside the antitrust context); *Discover Fin. Servs. v. Visa U.S.A. Inc., No. 04-cv-7844, 2008 U.S. Dist. LEXIS 80801, at *4, 2008 WL 4560707, at *1 (S.D.N.Y. Oct. 9, 2008)* ("Defendants argue that this Court should preclude [plaintiff's] current and former executives from testifying at trial about what Citibank's executives purportedly told them . . . However, testimony concerning the motivation of customers for ceasing to deal with a business is admissible **[**100]** under the 'state of mind' exception to the hearsay rule, *Rule 803(3) of the Federal Rules of Evidence*, provided that there is otherwise admissible proof that business was lost.").

While from a different Circuit, *Callahan v. A.E.V., 182 F.3d 237 (3d Cir. 1999)*, which AngioDynamics cites, is instructive. There, the court found that the plaintiff beer retailers' deposition testimony recounting statements by their customers as to the customers' reasons for no longer purchasing beer from the plaintiffs was admissible for the purpose of proving the customers' motives, but not for the fact of lost sales; that the plaintiffs' own testimony that "they knew of customers who used to purchase beer from them, but no longer did," was admissible as "direct evidence of an actual loss of customers," but not as evidence of "the reason therefore"; and that the "plaintiffs' testimony that certain customers no longer purchased beer from them, coupled with their testimony concerning the customers' statements of their motive, which is admissible hearsay under *Rule 803(3)*, are together evidence of the fact of damage." *Id. at 252-53*.

AngioDynamics argues that "show[ing] customer motive, such as a customer's reason for ceasing to do business with AngioDynamics," is "exactly how AngioDynamics relies on" the evidence Bard challenges, **[**101]** and thus that this evidence is admissible under *Rule 803(3)*. (Dkt. No. 144, at 29). Bard offers two responses.

First, Bard argues that "PICC purchases are complicated decisions made by hospital committees comprised of many stakeholders," and that "[a]t most, AngioDynamics' evidence [of statements by particular hospital employees regarding the hospitals' motivations] constitutes speculation by hospital personnel about what drove past decisions of other decision-makers." In support of this argument, Bard primarily relies on *Amerisource Corp. v. RxUSA Int'l Inc., No. 02-cv-2514, 2009 U.S. Dist. LEXIS 6864, 2009 WL 235648 (E.D.N.Y. Jan. 30, 2009)*. In that case, the court declined to apply the state-of-mind exception to admit deposition testimony and written notes from the plaintiffs' **[*320]** executives reflecting that "employees of various non-party distributors told [them] (i) that their companies would not deal with [the plaintiff]; (ii) that their companies would not deal with [the plaintiff] until [the defendant] gave its approval; and (iii) that their companies would not deal with [the plaintiff] because [the defendant] said that [the plaintiff] was a bad credit risk." *2009 U.S. Dist. LEXIS 6864, at *2, [WL] at *1*. As relevant to Bard's argument, the court reasoned:

> Here, the declarants are salespersons for various **[**102]** non-party pharmaceutical distributors with whom [the plaintiff] sought to do business. However, credit managers rather than salespersons decided whether or not to do business with prospective customers and the declarants in this case had no authority or involvement in the decision to decline RxUSA's business. Consequently, the salespersons' states of mind and intentions are not relevant. Indeed, their statements reveal not their own intention but rather their belief or memory as to the intention of the actual decision-maker, which is explicitly excluded by *Rule 803(3)*.

*2009 U.S. Dist. LEXIS 6864, at *4, [WL] at *2*.[10] This ruling may have some applicability to certain documents or testimony AngioDynamics relies on. The parties agree that the personnel involved in PICC purchasing decisions varies by hospital and can include nurses, doctors and other professionals. (Dkt. No. 133-2, ¶¶ 15-17; Dkt. No. 144-1, ¶¶ 15-17). Given this complexity, there are factual questions as to the roles the hospital employee speakers in the evidence AngioDynamics relies on played in the decision-making processes at their hospitals, and whether their statements can be fairly construed as reflections of their hospitals' "then-existing state of mind" so as to warrant **[**103]** admission under *Rule 803(3)*. However, at this stage of the proceedings, without further factual

---

[10] The court also found that the third-party salespersons' "statements explaining why the company did not intend to do business with [the plaintiff] [were] expressly outside the state-of-mind exception" because they constituted "statement[s] of memory or belief to prove the fact remembered or believed." *2009 U.S. Dist. LEXIS 6864, at *4-5, 2009 WL 235648, at *2*. In *Amerisource*, there was "no dispute" that the hearsay statements were being offered not only to prove the third-party company's motivations, but also to prove the facts underlying those motives, i.e. "that [the defendant] said [plaintiff] was a bad credit risk." *2009 U.S. Dist. LEXIS 6864, at *3, [WL] at *1*. Here, to the extent AngioDynamics offers evidence of customers' then-existing states of mind solely to show its customers' motivations for switching away from or declining to purchase AngioDynamics' PICCs, and not for the fact of lost sales itself or the truth of the underlying facts asserted in those customers' statements, the evidence would be admissible under *Rule 803(3)* for that purpose.

development on these questions, the Court declines to find that the evidence of their statements AngioDynamics presents could not be presented in admissible form at trial.

Second, Bard argues that much of AngioDynamics' evidence "does not even quote customers directly but rather involves AngioDynamics' employees' (oftentimes, hazy) recollection of what either a hospital employee or another AngioDynamics sales representative told them about the hospital's PICC purchases." (Dkt. No. 154, at 13). ***HN17***[] As Bard correctly points out, "[e]ach hearsay statement within multiple hearsay statements must have a hearsay exception in order to be admissible." *United States v. Cruz, 894 F.2d 41, 44 (2d Cir. 1990)*. AngioDynamics does not respond to Bard's argument regarding "double hearsay."

Applying the foregoing principles, it appears to the Court that certain of the documents and deposition testimony that **[*321]** AngioDynamics relies on would be admissible at trial under *Rule 803(3)* for the limited purpose of showing AngioDynamics' customers' motivations for declining to purchase AngioDynamics' PICCs, or for switching from AngioDynamics' PICCs to Bard's PICCs. Other evidence is **[**104]** of more questionable admissibility, given the multiple layers of hearsay embedded in certain documents and testimony, as well as questions over whether certain documents truly reflect a hospital customer's "then-existing state of mind" as opposed to merely a statement of the speaker's "memory or belief to prove the fact remembered or believed." *Fed. R. Evid. 803(3)*. In the absence of fully developed briefing with respect to each piece of evidence Bard raises objections to, the Court cannot issue a formal ruling on the admissibility of each such piece of evidence at this time. Rather, applying the foregoing principles, the Court will determine whether there appears to be enough record evidence that could be presented in admissible form to raise a genuine dispute of material fact for trial with respect to antitrust injury.

2. Injury-in-Fact and Causation

a. Legal Standard

HN18[] To establish antitrust injury, "[t]here must be a causal connection between an antitrust violation and an injury sufficient for the trier of fact to establish that the violation was a 'material cause' of or a 'substantial factor' in the occurrence of damage." *Billy Baxter, Inc. v. Coca-Cola Co., 431 F.2d 183, 187 (2d Cir. 1970)*. "The fact of injury must be demonstrated with reasonable certainty and may not **[**105]** be speculative," and "failure to satisfactorily prove that a plaintiff is injured by reason of the defendant's alleged antitrust violations is sufficient to defeat the antitrust claims." *Erie Conduit Corp. v. MAPA, 102 F.R.D. 877, 879 (E.D.N.Y. 1984)* (citations omitted).

HN19[] While antitrust plaintiffs are entitled to a "relaxed standard of proof" with respect to the amount of damages they suffered as a result of a defendant's conduct, "this relaxed standard of proof applies to the amount of damages, not to whether the violation caused damage." *Hygrade Milk & Cream Co. v. Tropicana Products, Inc., No. 88-cv-2861, 1996 U.S. Dist. LEXIS 6598, at *52-54, 1996 WL 257581 at *16-17 (S.D.N.Y. May 16, 1996)* (citing *MCI Comms. Corp. v. Am. Tel. & Tele. Co., 708 F.2d 1081, 1161 (7th Cir. 1982))*. That said, the amount of harm a plaintiff needs to prove to meet its burden of demonstrating antitrust injury is not high; rather, a plaintiff need only demonstrate "proof of some damage flowing from the unlawful [conduct]; inquiry beyond this minimum point goes only to the amount and not the fact of damage." *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n.9, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*. Despite this relatively low burden, "[a]lthough there appear to be few precedents on point, the relevant decisions do suggest that a trivial effect on a claimant's sales is insufficient to demonstrate antitrust injury." *Drug Mart Pharm. Corp. v. Am. Home Prods. Corp., No. 93-cv-5148, 2012 U.S. Dist. LEXIS 115882, at *47-48, 2012 WL 3544771, at *14 (E.D.N.Y. Aug. 16, 2012)* (finding a de minimus amount of lost sales **[**106]** insufficient to establish antitrust injury in the context of a Robinson-Patman Act claim (discussing

Allen Pen Co. v. Springfield Photo Mount Co., 653 F.2d 17, 23 (1st Cir. 1981); *Hygrade Milk & Cream Co., 1996 U.S. Dist. LEXIS 6598, at *59-60, 1996 WL 257581 at *18-19))*.[11]

[*322] ***HN20***[] An antitrust plaintiff need "not necessarily [prove that the defendant's misconduct was] the sole cause" of the plaintiff's alleged injury, and "a plaintiff need not exhaust all possible alternative sources of injury in fulfilling his burden of proving compensable injury." *In re Actos End-Payor Antitrust Litig., 848 F.3d 89, 97-98 (2d Cir. 2017)* (quoting *Zenith Radio Corp., 395 U.S. at 114 n.9*); *see also* *In re Publ'n Paper Antitrust Litig., 690 F.3d 51, 66 (2d Cir. 2012)* (holding that "an antitrust defendant's unlawful conduct need not be the sole cause of the plaintiffs' alleged injuries; to prove a 'causal connection' between the defendant's unlawful conduct and the plaintiff's injury, the plaintiff need only 'demonstrate that [the defendant's] conduct was a substantial or materially contributing factor' in producing that injury" and that "the injuries alleged would not have occurred *but for* [the defendant's] antitrust violation") (citations omitted). "[R]equiring otherwise 'would effectively deny private remedies, because multiple causes always affect everyone.'" *In re Gabapentin Patent Litig., 649 F. Supp. 2d 340, 356 (D.N.J. 2009)* (quoting Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law*** ¶ 338a at 317 (2d Ed. 2000)).

b. The Parties' Arguments

Bard argues, in summary, that: **[**107]** (1) no hospital witness will testify at trial that it would have purchased an AngioDynamics PICC to pair with Bard's TLS but for Bard's TLS policy;[12] (2) the evidence AngioDynamics relies on consists only of "[s]econd-hand, self-serving, and speculative" testimony from its own executives, anecdotal documentary evidence of discussions with specific customers, and "speculative comments" in Bard's internal emails and documents; and (3) none of that evidence establishes that any customer currently using Bard's preloaded PICCs would have purchased AngioDynamics' PICCs but for Bard's TLS policy or that Bard's TLS policy was a "material cause" of any PICC sales AngioDynamics lost, given the various reasons some customers prefer to purchase Bard's preloaded product independent of its TLS policy. As to these reasons, Bard has adduced evidence that they include: (1) the lack of FDA approval for the use of Bard's standalone stylet with other companies' *valved* PICCs; (2) hospital preferences for certain characteristics that Bard's PICCs have and AngioDynamics' PICCs do not; (3) the premium that AngioDynamics charges for BioFlo PICCs relative to other PICCs in the market; (4) AngioDynamics' inability **[**108]** to definitively prove BioFlo's superiority to other PICC technology through peer-reviewed clinical trials; (5) AngioDynamics' past product recalls and the resulting damage to its reputation in the market; (6) Bard's more substantial training and clinical support programs relative to AngioDynamics'; **[*323]** (7) Bard's wider breadth of product lines relative to AngioDynamics; (8) the effect of GPO and IDN contracts on purchasing decisions; (9) possible risks to patient safety and other inconveniences of loading a TLS stylet at a patient's bedside rather than purchasing it preloaded into a PICC; (10) some customers' preference for purchasing PICCs and TLSs from a single supplier; and (11) the fact that Bard would likely need to charge a premium for its single-sterile stylet in order to compensate for its additional costs of offering that product standalone, "including liability and reputational risks Bard would face in the event of stylet breakage and patient injury." (Dkt. No. 133-1, at 12-32; Dkt. No. 145, at 25-34; Dkt. No. 154, at 6-12).

---

[11] Citing case law from other Circuits, AngioDynamics argues that the relaxed standard of proof typically applied to the *amount of damages* in antitrust cases also applies to the element of antitrust injury, and that an antitrust plaintiff need only prove a "trifle of injury" resulting from the defendant's conduct in order to satisfy this element. (Dkt. No. 134-1, at 27-29; Dkt. No. 144, at 12-13; Dkt. No. 152, at 15-16 (relying on *In re Data Gen. Corp. Antitrust Litig., 490 F. Supp. at 1117-18*; *In re K-Dur Antitrust Litig., No. 01-cv-1652, 2008 U.S. Dist. LEXIS 71772, at *21-22, 2008 WL 2660776, at *4 (D.N.J. Feb. 21, 2008)*; *Digidyne Corp. v. Data Gen. Corp., 734 F.2d 1336, 1339 n.1 (9th Cir. 1984))*). The Court applies the Second Circuit's standard for evaluating antitrust injury, as set forth above, and declines to follow the cases AngioDynamics cites to the extent they are inconsistent with that standard.

[12] Pursuant to a stipulation dated April 17, 2020, the parties agreed that neither party will call at trial any witnesses from third-party hospitals, hospital groups or representatives, except for two witnesses from Cleveland Clinic who have already been deposed. (Dkt. No. 136-27).

AngioDynamics argues, in summary, that: (1) the documentary evidence it relies on demonstrates specific (and non-exhaustive) examples in which customers declined **[**109]** to purchase AngioDynamics' PICCs, or chose to switch from AngioDynamics' PICCs to Bard's PICCs, because they had no option to pair AngioDynamics' PICCs with Bard's TLS stylet; (2) this same evidence demonstrates that, even if multiple factors were at play in any particular customer's purchasing decision, the inability to pair AngioDynamics' PICCs with Bard's TLS stylet was at least one "material factor" in that decision, which is all AngioDynamics needs to show in order to establish antitrust injury; (3) economic evidence also supports a finding of injury and causation, including that Bard sells the overwhelming majority of the TLSs on the market and that "in those segments of the PICC market where Bard's TLS is not a factor, or less of a factor," "AngioDynamics sells substantially more PICCs." (Dkt. No. 134-1, at 26-34; Dkt. No. 144, at 12-30; Dkt. No. 152, at 17-20).[13]

c. Bard's Motion for Summary Judgment

The record contains the following types of evidence that, viewed collectively and in the light most favorable to AngioDynamics for purposes of Bard's summary judgment motion, raises genuine issues of material fact as to whether AngioDynamics lost a more-than-de-minimus amount of PICC **[**110]** sales to Bard and whether Bard's TLS policy was a material cause of those lost sales: (1) evidence that Bard received inquiries from some customers regarding the possibility of purchasing a stand-alone TLS stylet to pair with AngioDynamics' or another competitor's PICCs, which Bard consistently rebuffed; (2) internal Bard communications reflecting Bard's efforts to avoid disseminating knowledge of its sale of single-sterile TLS stylets to Cleveland Clinic, at least in part out of a concern that customers would demand such an option if they knew it was available; (3) internal Bard documents which could be read to reflect the views of some Bard employees that Bard's TLS policy prevented competitors like AngioDynamics from effectively competing for some PICC customers that used Bard's TLS, including one employee's observation that being forced to sell a stand-alone TLS stylet would "open the door for [AngioDynamics]" to "pick off 5-10%" of customers currently using Bard's PICCs preloaded with its TLS, (Dkt. No. **[*324]** 136-63, at 3; Dkt. No. 136-64, at 2); (4) deposition testimony of AngioDynamics executives identifying particular PICC customers that AngioDynamics has lost to Bard; (5) deposition **[**111]** testimony from AngioDynamics executives recounting discussions with specific customers (some of which the witnesses participated in directly, and some of which they were informed about by sales representatives) in which those customers expressed interest in AngioDynamics' PICCs, but conveyed that they could not consider purchasing them because the PICCs could not be paired with Bard's TLS; (6) emails from customers explaining their reasons for choosing Bard's PICCs over AngioDynamics' PICCs, including, in some cases, because they wanted to use Bard's TLS, which could only be obtained by buying Bard's PICCs; and (7) emails from AngioDynamics or Bard employees recounting similar discussions with customers. *See* Section II.E *supra* (summarizing this record evidence in detail).

While, as Bard argues, some of AngioDynamics' evidence regarding discussions with customers appears to include multiple layers of hearsay or is otherwise of questionable admissibility, much of AngioDynamics' evidence does not suffer from these problems, and many of the "double hearsay" problems that do exist could be corrected by, for example, calling the Bard or AngioDynamics sales representatives who directly spoke with the relevant **[**112]** customers to testify at trial. *See, e.g., Smith Wholesale Co. v. R.J. Reynolds Tobacco Co.*, No. 03-cv-30, 2005 U.S. Dist. LEXIS 25184, 2005 WL 8162569, at *5[14] (E.D. Tenn. Feb. 23, 2005) (finding that a "double hearsay" problem with the plaintiff's corporate representatives' testimony about what sales representatives told them regarding

---

[13] The parties also present arguments as to whether the testimony of AngioDynamics' causation and damages expert, Dr. Frankel, is sufficient to establish injury-in-fact or causation. (Dkt. No. 133-1, at 17-24, 26-32; Dkt. No. 134-1, at 33; Dkt. No. 144, at 17, 24-26; Dkt. No. 154, at 14-16). For the reasons explained in Section IV.C.1 of this Decision, the Court is granting Bard's motion to exclude Dr. Frankel's causation opinion. Therefore, the Court does not consider Dr. Frankel's opinion in connection with its injury-in-fact or causation analysis and, consequently, does not address Bard's specific critiques of his opinion or AngioDynamics' responses here.

[14] No parallel LEXIS citation available.

conversations with customers was corrected by calling the sales representatives themselves as witnesses, and that the sales representatives' testimony was admissible under Fed. R. Evid. 803(3)). As discussed previously, *see* Section IV.B.1 *supra*, the combination of evidence that AngioDynamics did, in fact, lose PICC sales to Bard (in the form of deposition testimony from AngioDynamics witnesses and the parties' email communications) and evidence regarding customers' statements about their motivations for not purchasing, or switching away from, AngioDynamics PICCs (at least some of which is likely admissible under Fed. R. Evid. 803(3)) constitutes enough evidence that could be presented in admissible form to raise a genuine dispute of material fact that precludes summary judgment. *See, e.g.,* Callahan, 182 F.3d at 252-54, 260; Complete Entm't Res. LLC v. Live Nation Entm't, Inc., No. 15-cv-9814, 2017 U.S. Dist. LEXIS 183213, at *11 n.9, 2017 WL 6512223, at *4 n.9 (C.D. Cal. Oct. 16, 2017) (finding that "Plaintiffs' records of customer statements regarding their reasons for not using Plaintiffs' **[**113]** services" was "material from which a factfinder could decide that at least some artist-clients would have chosen Plaintiff if not for Defendants' allegedly anticompetitive conduct").[15]

[*325] Independent of its evidentiary objections, Bard also argues that the deposition testimony of AngioDynamics' witnesses is too speculative and self-serving to constitute evidence of injury or causation. (Dkt. No. 133-1, at 14-17; Dkt. No. 154, at 9-12). Bard's arguments attacking AngioDynamics' witnesses' testimony largely address the basis for their knowledge regarding certain lost opportunities they testified about, their unfamiliarity with particular "potential lost sales" AngioDynamics listed in its interrogatory responses, their failure to recall certain pertinent details of discussions with particular customers, and the inconsistency of some witnesses' recollections about particular customers with other record evidence regarding those customers' purchasing decisions. (Dkt. No. 133-1, at 14-17; Dkt. No. 154, at 10-12). While some of these arguments may have merit, **[**114]** they are questions of weight that are best resolved by a fact-finder at trial, rather than at the summary judgment stage.[16] Bard is correct that AngioDynamics witnesses cannot testify with certainty as to what a customer would have done had it had the option of pairing AngioDynamics' PICCs with Bard's TLS. However, as executives responsible for the sale of AngioDynamics' vascular access products, they can certainly testify as to their personal knowledge of PICC sales that AngioDynamics lost to Bard and what customers told them regarding their reasons for not purchasing AngioDynamics' PICCs. Thus, for summary judgment purposes, the Court finds that this testimony, when viewed

---

[15] Bard attempts to distinguish *Callahan* on the ground that *Callahan* "featured extensive [expert] economic evidence on injury and causation that bolstered the plaintiffs' testimony." (Dkt. No. 154, at 9-10). While the Court is not considering Dr. Frankel's opinion on causation, and this case is thus distinguishable from Callahan in that respect, this distinction is not dispositive. While the *Callahan* court considered the evidence before it collectively, nowhere did it suggest that the evidence would have been insufficient to raise a triable issue of fact *without* the expert analysis, and it is well-established that a plaintiff may prove antitrust injury without the use of expert evidence. *See, e.g.,* Smith Wholesale Co., 2005 U.S. Dist. LEXIS 25184, 2005 WL 8162569, at *5 ("Contrary to defendant's insistence, expert testimony is not necessarily required to prove antitrust injury if the facts and circumstances otherwise fall within the ambit of F.R.E. 701, and here they do."); Cason-Merenda v. Detroit Med. Ctr., 862 F. Supp. 2d 603, 642-43 (E.D. Mich. 2012) ("Plaintiffs correctly note that they may forge the necessary link between Defendants' alleged antitrust violations and antitrust injury without expert testimony."); Valassis Communs., Inc. v. News Corp., No. 17-cv-7378, 2019 U.S. Dist. LEXIS 27770, at *37, 2019 WL 802093, at *12 (S.D.N.Y. Feb. 21, 2019) ("Any defect in [the plaintiff's damages expert's] opinion on the amount of damages does not undermine [the plaintiff's] ability to prove the fact of injury."). Here, the Court finds that the record as it stands is sufficient to raise a genuine dispute as to injury-in-fact and causation; whether that evidence is enough to prove AngioDynamics' case is a question for trial. Bard's attempt to distinguish *Complete Entm't Resources* on the grounds that that case "concerns 'records of customer statements' rather than plaintiff's own testimony and deals with admissibility rather than sufficiency" is also inapposite. (Dkt. No. 154, at 10 n.4). Here, AngioDynamics relies on both its own witnesses' testimony and documentary evidence regarding its customers' motivations, and the court in Complete Entm't Resources was not dealing solely with admissibility, but rather was (as here) considering whether there was sufficient admissible evidence in the record to raise a triable issue of fact as to antitrust injury. *Id.*

[16] The line of cases Bard cites for the proposition that the "'isolated self-serving statements' of a plaintiff's corporate officers may not provide substantial evidence upon which a jury can rely" is inapposite, as those cases involved conclusory statements by officers that found no support in, and in many cases flatly contradicted, the evidence in the record. *See* Argus Inc. v. Eastman Kodak Co., 801 F.2d 38, 41-46 (2d Cir. 1986); Chrysler Credit Corp. v. J. Truett Payne Co., 670 F.2d 575, 581-82 (5th Cir. 1982). By contrast, the witness testimony here regarding lost sales and the reasons for those losses, as a general matter, is not inconsistent with, and finds some support in, the documentary evidence. *See* Section II.E.5 *supra* (reviewing evidence).

collectively with the record as a whole, constitutes competent evidence from which a genuine dispute of material fact can be found.[17]

[*326] Bard also spends a significant portion of its briefing attacking AngioDynamics' anecdotal examples of particular customers choosing Bard's PICCs over AngioDynamics' PICCs, arguing, with respect to each customer, that the relevant documentary evidence and deposition testimony: (1) demonstrates that the customer had numerous reasons for choosing Bard's PICCs independent of its **[**115]** TLS policy; (2) is ambiguous as to the precise reasons for the customer's purchasing decision; and/or (3) does not demonstrate that the customer would have chosen to pair AngioDynamics' PICCs with Bard's TLS if given the option to do so, particularly when accounting for other factors impacting the customer's decision. (Dkt. No. 133-1, at 20-22; Dkt. No. 145, at 26-31; Dkt. No. 154, at 6-9). Bard also more generally argues that AngioDynamics has not demonstrated that Bard's TLS policy caused AngioDynamics' injury, given the various other independent factors affecting customers' purchasing decisions. (Dkt. No. 133-1, at 25-32; Dkt. No. 145, at 25-34; Dkt. No. 154, at 6-12). The Court need not address each of Bard's arguments about each specific anecdote and relevant factor. Viewing the evidence as a whole and in the light most favorable to AngioDynamics, the Court finds that a reasonable fact-finder could conclude that the desire for Bard's TLS, which could only be purchased preloaded into Bard's PICCs, played a significant role in these customers' decision to choose Bard's PICCs over AngioDynamics' PICCs; that any customer that chose to use Bard's TLS was necessarily precluded from **[**116]** using a competitor's PICCs; that even accounting for other factors at play, at least *some* of the customers may have made a different PICC purchasing decision if given the option to pair AngioDynamics' PICCs with Bard's TLS; and that Bard's TLS policy was one material cause (even if not the *only* cause) of customers' decision not to purchase AngioDynamics' PICCs. *See* Section II.E.5 *supra* (summarizing the relevant evidence in detail). Given this, questions about the proper inferences to be drawn from particular pieces of evidence, whether Bard's TLS policy was both a but-for and material cause of each particular customer's purchasing decision in light of other factors at play, the precise significance of confounding factors independent of Bard's TLS policy, and whether the evidence sufficiently demonstrates that AngioDynamics lost more than a de minimus amount of sales as a result of Bard's TLS policy are all disputed factual questions to be resolved at trial.[18]

The Court rejects Bard's argument that Bard's internal emails and documents—and, particularly, an email from a Bard employee expressing his belief that **[*327]** AngioDynamics' strategy "[wa]s to pressure the market to pressure [Bard] into **[**117]** launching [the standalone stylet], so it will open the door for them to go after special patient populations in our 3CG [TLS] accounts and pick off 5-10%, which is better than the 0% they are getting at 3CG accounts now," (Dkt. No. 136-63, at 3; Dkt. No. 136-64, at 2)—cannot serve as evidence of injury or causation. (Dkt. No. 133-1, at 22-24). Statements by Bard's own employees regarding their beliefs about the impact of Bard's allegedly anticompetitive activity are clearly relevant to the question of whether that activity caused injury to AngioDynamics. Arguments about the proper inferences to be drawn from those statements or the weight they should be given merely raise factual disputes that are best reserved for trial.

The Court also rejects Bard's argument that AngioDynamics' failure to present any direct testimony from a hospital representative (at trial or via deposition) regarding the hospital's reasons for purchasing Bard's PICCs over

---

[17] In a similar vein, Bard also argues that customers' statements to AngioDynamics regarding their reasons for not purchasing AngioDynamics' PICCs (even if admissible to show the customers' motivations) are inherently unreliable. (Dkt. No. 133-1, at 16-17). AngioDynamics takes issue with this characterization. (Dkt. No. 144, at 18-20). These arguments concern the weight the relevant evidence should be given, and are best resolved by a fact-finder at trial rather than at the summary judgment stage.

[18] While the Court need not address each of Bard's arguments with respect to the various factors it cites, there is one argument Bard makes that the Court sees fit to briefly address. Bard argues that the failure of AngioDynamics and its damages expert to account for the fact that Bard had not obtained FDA approval to market its TLS stylet for use with competitors' valved PICCs is fatal to any claim it has with respect to valved PICC sales, citing case law for the proposition that a "regulatory or legislative bar can break the chain of causation in an antitrust case." (Dkt. No. 133-1, at 31-32 (citing *In re Wellbutrin XL Antitrust Litig., 868 F.3d 132, 165 (3d Cir. 2017)*; *In re Ciprofloxacin Hydrochloride Antitrust Litig., 261 F. Supp. 2d 188, 206 (E.D.N.Y. 2003))*. Even assuming (without deciding) that the case law Bard cites applies here, it does not defeat AngioDynamics' claim of antitrust injury; this lack of FDA approval is not a factor for the large number of AngioDynamics' PICC sales that involve non-valved PICCs.

AngioDynamics' dooms its case. (Dkt. No. 133-1, at 13-14). For the reasons explained, there is sufficient evidence in the record regarding AngioDynamics' lost sales and customers' statements about the reasons for those losses to at least raise **[**118]** a genuine issue for trial; it is for a fact-finder to decide whether that evidence is sufficient to meet AngioDynamics' burden without direct testimony from AngioDynamics' customers.[19]

Bard also argues that AngioDynamics cannot prove injury or causation because it has, at most, presented evidence that, absent Bard's TLS policy, some customers would have been willing to *conduct a trial* of AngioDynamics' PICCs with Bard's TLS and compare the pricing of AngioDynamics' PICCs with other options; AngioDynamics has not presented evidence of the price at which any current Bard TLS customer would have been willing to purchase Bard's standalone TLS stylet to combine with AngioDynamics' PICCs, nor has it shown that any current Bard TLS customer would have been willing to pay a premium for that option. (Dkt. No. 133-1, at 14, 16, 24, 28; Dkt. No. 145, at 27, 31; Dkt. No. 154, at 6-9). The Court does not find that Bard is entitled to summary judgment based on this argument. Viewed in the light most favorable to AngioDynamics, the record suggests that at least some PICC customers were interested in exploring the option of combining BioFlo PICCs with Bard's TLS, but Bard's TLS policy precluded **[**119]** them from even considering that option, thus depriving AngioDynamics of the opportunity to *even attempt to compete* with Bard for those customers on other factors relevant to hospitals' purchasing decisions, such as price and clinical effectiveness. *See, e.g.*, Section II.E.4.c-d *supra* (summarizing testimony describing such examples). Moreover, record evidence suggests that PICC pricing is a customer-specific decision, and the question of whether pricing would deter customers from pairing AngioDynamics' PICCs with Bard's TLS absent Bard's TLS policy is rife with factual disputes, including how often AngioDynamics' BioFlo PICCs are actually priced at a premium to Bard's PICCs, the size of that premium, how much of a premium Bard would charge for its single-sterile TLS stylet, the value customers **[*328]** place on BioFlo for its purported clinical benefits and long-term cost-savings, and the extent to which AngioDynamics would be able to discount its BioFlo PICCs to induce customers to switch from Bard PICCs. *See* Section II.D.1 *supra* (summarizing the evidence and the parties' disputes regarding pricing). Therefore, on this record, the Court cannot conclude as a matter of law that AngioDynamics **[**120]** cannot demonstrate a more-than-de-minimus amount of injury directly resulting from Bard's TLS policy.

The Court has carefully considered all of Bard's remaining arguments for summary judgment and finds them to be without merit. Therefore, for the foregoing reasons, the Court denies Bard's motion for summary judgment with respect to injury-in-fact and causation.

d. AngioDynamics' Motion for Summary Judgment

While AngioDynamics has raised a triable issue of fact as to injury-in-fact and causation, it has failed to establish its entitlement to summary judgment with respect to these issues. Relying on deposition testimony from its own executives, email communications from customers, and the parties' internal correspondence, AngioDynamics cites a number of specific examples of customers who purportedly chose to purchase Bard's PICCs over AngioDynamics' because they desired Bard's TLS and, due to Bard's TLS policy, had no option to pair it with AngioDynamics' PICCs. (Dkt. No. 134-1, at 29-32; Dkt. No. 144, at 9-11, 16, 22-24; Dkt. No. 152, at 17-19). However, as Bard points out, much of this evidence is ambiguous as to the precise reasons for the customers' purchasing decisions or suggests **[**121]** that numerous factors were at play in addition to Bard's TLS policy, and none of it establishes beyond dispute that any customer would have purchased AngioDynamics' PICCs to pair with Bard's TLS but for Bard's TLS policy. (Dkt. No. 133-1, at 20-22; Dkt. No. 145, at 26-31; Dkt. No. 154, at 6-9). While the Court has already found that Bard's arguments were insufficient to win its own summary judgment motion, they *are* sufficient to raise genuine factual questions as to whether Bard's TLS policy was both a but-for and material cause of a more-than-de-minimus amount of PICC sales that AngioDynamics lost to Bard.

---

[19] In a similar vein, the Court need not address the parties' arguments over whether a survey of hospitals or interviews of hospital representatives—which neither AngioDynamics nor its experts conducted—would have been appropriate in this case. (Dkt. No. 133-1, at 13, 19-20; Dkt. No. 144, at 24-25; Dkt. No. 154, at 15-16). The question for the Court is whether the record *as it stands* raises triable issues of material fact, and the Court finds that it does.

AngioDynamics' contention that AngioDynamics "sells substantially more PICCs" "in those segments of the PICC market where Bard's TLS is not a factor, or less of a factor," also does not entitle it to summary judgment; rather, this is, at most, an argument that AngioDynamics may use to support its claim at trial. (Dkt. No. 134-1, at 32-33).[20] Given other factors at play in customers' purchasing decisions—including some customers' preference for purchasing TLSs and PICCs from the same supplier, and possible differences in purchasing patterns and PICC preferences between hospitals that **[**122]** purchase PICCs for pairing with navigation-enabled TLSs and those in other segments of the PICC market, (Dkt. No. 146, at ¶ 66 (making this argument and citing record evidence))— **[*329]** the data AngioDynamics presents does not, in itself, establish beyond dispute that Bard's TLS policy is a but-for or material cause of AngioDynamics' relatively lower success with customers that use navigation-enabled TLS.

The Court has carefully considered all of AngioDynamics' remaining arguments for summary judgment and finds them to be without merit. For the foregoing reasons, the Court denies AngioDynamics' motion for summary judgment with respect to injury-in-fact and causation.

3. Type of Injury the Antitrust Laws Were Designed to Prevent

HN21[] In addition to establishing injury-in-fact and causation, to establish antitrust injury, an antitrust plaintiff must prove that its injury is "of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp., 429 U.S. at 489*. "Thus, allegations of an injury to a competitor are insufficient unless accompanied by allegations of injury to competition as well." *See Xerox Corp. v. Media Scis. Intern., Inc., 511 F. Supp. 2d 372, 380 (S.D.N.Y. 2007)*; *see also Capital Imaging Assocs., P.C. v. Mohawk Valley Med. Assocs., Inc., 996 F.2d 537, 547 (2d Cir. 1993)* ("[Plaintiff's] position is simply that it has been harmed **[**123]** as an individual competitor. It has not shown that defendants' activities have had any adverse impact on price, quality, or output of medical services offered to consumers in the relevant market."); *Daniel v. Am. Bd. of Emergency Med., 428 F.3d 408, 442-43 (2d Cir. 2005)* (holding that plaintiffs failed to demonstrate antitrust injury where their "economic expert conceded that he had performed no analysis of the consumer effect of defendants' purportedly anticompetitive conduct").

HN22[] "A competitor's '[e]xclusion from a market is a conventional form of antitrust injury' because it is 'exactly the type [of injury] that antitrust laws were designed to prevent and flows from the competition-reducing aspect of [defendant's] conduct.'" *Valassis Communs., Inc., 2019 U.S. Dist. LEXIS 27770, at *32, 2019 WL 802093, at *11* (collecting cases (quoting *Higgins v. New York Stock Exch., 755 F. Supp. 113, 116 (S.D.N.Y. 1991)*, *aff'd sub nom., Higgins v. New York Stock Exch., Inc., 942 F.2d 829 (2d Cir. 1991)))*; *Xerox Corp, 511 F. Supp. 2d at 381-82* ("This threatened injury (of direct exclusion from the marketplace) is exactly the type that antitrust laws were designed to prevent and flows from the competition-reducing aspect of [the defendant's] conduct." (collecting cases)). Moreover, a competitor's loss of sales constitutes an injury of the sort protected by the antitrust laws if "it stems from conduct that prevents potential customers from obtaining a desired product." *Id. at 382* (citing *National Assoc. of Pharmaceutical Mfrs., Inc. v. Ayerst Labs., 850 F.2d 904, 913 (2d Cir. 1988))*.

Bard argues that, even if AngioDynamics can demonstrate **[**124]** that it lost sales as a result of Bard's TLS policy, AngioDynamics has failed to show that Bard's actions harmed competition in the PICC market as a whole, such as by increasing prices or reducing output. (Dkt. No. 133-1, at 32-35; Dkt. No. 145, at 34-35; Dkt. No. 154, at 17-18). AngioDynamics responds that Bard's TLS policy has led to substantial foreclosure of competition in the PICC

---

[20] Bard objects to AngioDynamics' reliance on a chart purportedly showing AngioDynamics' share of particular PICC market segments, arguing that it "appears nowhere in Frankel's reports," was compiled by "AngioDynamics' lawyers pull[ing] numbers from three different appendices to Frankel's reports and perform[ing] additional calculations," is based on unreliable data, and was not timely disclosed as an expert opinion. (Dkt. No. 153, at 7-8 & n.4). For purposes of the parties' summary judgment motions, the Court need not decide whether or not consideration of this demonstrative is appropriate, as it finds that neither party is entitled to summary judgment whether or not the demonstrative is considered.

market, the threat of increased concentration in that market, and the restriction of consumer choice, all of which are the types of injuries the antitrust laws are aimed at. (Dkt. No. 144, at 30-34).

The Court finds that there are genuine disputes of material fact precluding summary judgment for either party on this issue. AngioDynamics' claim is that, by **[*330]** forcing customers who purchase its TLS to also purchase its PICCs, Bard effectively precludes AngioDynamics and other PICC competitors from competing in the largest segment of the PICC market. If proven true, this would be "exactly the type [of injury] that antitrust laws were designed to prevent," *Valassis Communs., Inc., 2019 U.S. Dist. LEXIS 27770, at *32, 2019 WL 802093, at *11*; *Xerox Corp, 511 F. Supp. 2d at 381-82*, and AngioDynamics "need not wait to make this claim until it is 'actually . . . driven from the market and competition is thereby lessened.'" *Id., 511 F. Supp. 2d at 381* (quoting **[**125]** *Brunswick Corp., 429 U.S. at 489 n. 14*). Moreover, there is a question as to whether Bard's TLS policy "prevents potential customers from obtaining a desired product," i.e. the combination of AngioDynamics' PICCs and Bard's TLS. *Id., 511 F. Supp. 2d at 382*. At the same time, for the reasons discussed in connection with the Court's analysis of the anticompetitive effects element of AngioDynamics' claim, *see* Section IV.A.5 *supra*, there are genuine disputes over whether the injuries AngioDynamics complains of are, in fact, a result of a "competition-reducing aspect" of Bard's conduct (i.e. Bard's purported foreclosure of competition in the PICC marketplace through its TLS policy), or are merely the result of lawful competition and many customers' preference for Bard's preloaded PICCs over the other options available to them. *Valassis Communs., Inc., 2019 U.S. Dist. LEXIS 27770, at *32, 2019 WL 802093, at *11*. Therefore, the Court denies both parties' motions for summary judgment on this issue.[21]

4. Antitrust Injury Summary

For the foregoing reasons, the Court finds that there are triable issues of fact with respect to every component of the antitrust injury element of AngioDynamics' claim. Therefore, the Court denies both parties' motions for summary judgment with respect to antitrust injury.

C. Damages/Bard's [**126] Motion to Exclude Dr. Frankel's Testimony

Bard moves to exclude the testimony of AngioDynamics' causation and damages expert, Dr. Frankel, (Dkt. No. 132), and argues that "[s]ince AngioDynamics offers no evidence of any damages other than through Dr. Frankel, the exclusion of his testimony means that AngioDynamics cannot create a triable issue as to damages." (Dkt. No. 133-1, at 36).

HN23[] Under *Rule 702 of the Federal Rules of Evidence*, the Court is charged with a "gatekeeping" obligation with respect to expert testimony: the trial judge must ensure "that an expert's testimony both rests on a reliable foundation and is relevant to the task at hand." *Daubert v.* ***[*331]*** *Merrell Dow Pharms., Inc., 509 U.S. 579, 597, 113 S. Ct. 2786, 125 L. Ed. 2d 469 (1993)*. *Rule 702* provides:

> A witness who is qualified as an expert by knowledge, skill, experience, training, or education may testify in the form of an opinion or otherwise if: (a) the expert's scientific, technical, or other specialized knowledge will help

---

[21] Bard analogizes to a Tenth Circuit case, *Suture Express, Inc. v. Owens & Minor Distribution, Inc., 851 F.3d 1029, 1044 (10th Cir. 2017)*, in which the Court observed that significant evidence of a "market that is becoming more, not less, competitive" "raise[d] questions about . . . whether it was really competition that was harmed instead of simply one competitor," and found that "[t]here is simply not enough probative evidence for a jury to find that [the defendants'] bundling practices constitute an injury of the kind the antitrust laws are intended to prevent." *Id. at 1045*. Here, while the record contains some indicia of a competitive PICC marketplace, *see* Section IV.A.5 *supra*, there is also evidence that Bard's TLS policy prevents competitors like AngioDynamics from being able to meaningfully compete for PICC customers that use Bard's TLS, and that Bard dominates the market (especially with respect to PICCs that use TLSs) to a much greater extent than any defendant in *Suture Express*. Thus, unlike in *Suture Express*, then, the evidence of robust competition notwithstanding Bard's TLS policy is not so overwhelming as to preclude a finding that Bard's actions have harmed competition in the market.

> the trier of fact to understand the evidence or to determine a fact in issue; (b) the testimony is based on sufficient facts or data; (c) the testimony is the product of reliable principles and methods; and (d) the expert has reliably applied the principles and methods to the facts of the case.

Fed. R. Evid. 702. ***HN24***[] "To determine whether a witness qualifies as an expert, **[**127]** courts compare the area in which the witness has superior knowledge, education, experience, or skill with the subject matter of the proffered testimony." *United States v. Tin Yat Chin, 371 F.3d 31, 40 (2d Cir. 2004)*.

HN25[] "Under *Daubert*, factors relevant to determining reliability include the theory's testability, the extent to which it has been subjected to peer review and publication, the extent to which a technique is subject to standards controlling the technique's operation, the known or potential rate of error, and the degree of acceptance within the relevant scientific community." *Restivo v. Hessemann, 846 F.3d 547, 575-76 (2d Cir. 2017)* (internal quotation marks omitted). The reliability inquiry is "a flexible one," *Daubert, 509 U.S. at 594*, and the factors to be considered "depend[ ] upon the particular circumstances of the particular case at issue." *Kumho Tire Co., Ltd. v. Carmichael, 526 U.S. 137, 150, 119 S. Ct. 1167, 143 L. Ed. 2d 238 (1999)*. When applying the gatekeeping obligation to non-scientific testimony, a district court may choose to utilize some or all of the above *Daubert* factors, or it may look to other indicia of reliability. *Id.*

"In undertaking this flexible inquiry, the district court must focus on the principles and methodology employed by the expert, without regard to the conclusions the expert has reached or the district court's belief as to the correctness of those conclusions." *Amorgianos v. Natl. R.R. Passenger Corp., 303 F.3d 256, 266 (2d Cir. 2002)*. "Thus, ***HN26***[] when **[**128]** an expert opinion is based on data, a methodology, or studies that are simply inadequate to support the conclusions reached, *Daubert* and *Rule 702* mandate the exclusion of that unreliable opinion testimony." *Id.* In other words, "[a] court may conclude that there is simply too great an analytical gap between the data and the opinion proffered." *Gen. Elec. Co. v. Joiner, 522 U.S. 136, 146, 118 S. Ct. 512, 139 L. Ed. 2d 508 (1997)*. "Frequently, though, 'gaps or inconsistencies in the reasoning leading to [the expert's] opinion . . . go to the weight of the evidence, not to its admissibility.'" *Restivo, 846 F.3d at 577* (quoting *Campbell ex rel. Campbell v. Metro. Prop. & Cas. Ins. Co., 239 F.3d 179, 186 (2d Cir. 2001))*.

HN27[] Ultimately, a district court has "the same broad latitude when it decides *how* to determine reliability as it enjoys in respect to its ultimate reliability determination." *Gen Elec. Co., 522 U.S. at 142*. Moreover, "[v]igorous cross-examination, presentation of contrary evidence and careful instruction on the burden of proof are the traditional and appropriate means of attacking shaky but admissible evidence." *Daubert, 509 U.S. at 596*. With this framework in mind, the Court addresses Bard's arguments for exclusion of Dr. Frankel's opinions.[22]

[*332] 1. Causation

a. Dr. Frankel's Causation Opinion

As to causation, Dr. Frankel concludes that Bard's TLS policy caused injury to AngioDynamics based on the following facts (stated in Dr. Frankel's words): **[**129]**

- Bard's dominant share of TLS devices used in the United States and the large share of PICCs placed with the assistance of TLS devices.
- The ability of manufacturers to sell TLS devices and navigation stylets separately from their PICCs, and the actual use of alternative suppliers' PICCs with a TLS when that option is available.
- The preference some customers would have had for AngioDynamics BioFlo PICCs due to BioFlo's antithrombotic[23] properties.

---

[22] In the following discussion, the Court summarizes only the portions of Dr. Frankel's opinions that are relevant to the pending motions.

- The interest expressed by customers seeking to use AngioDynamics PICCs with Bard TLS devices.
- Bard's recognition that some of its TLS customers would purchase BioFlo PICCs if Bard sold stylets separately.
- Bard's refusal to sell its stylets separately from its PICCs.

(Dkt. No. 132-5, at 13-14). To arrive at the foregoing factual predicates, Dr. Frankel reviews, interprets and draws inferences from documents and data in the record, much of which overlaps with the evidence AngioDynamics relies on in its summary judgment motion. (*Id.* at 14-23). Based on the evidence he reviews, Dr. Frankel concludes that "Bard's refusal to sell stylets separately from its PICCs harmed AngioDynamics by preventing it from selling PICCs to Bard TLS customers that otherwise **[**130]** would have preferred to use AngioDynamics PICCs for some or all of their bedside PICC placements," and that "Bard's tie enabled it to obtain a larger percentage of U.S. PICC sales than otherwise, and suppressed AngioDynamics' sales and profits." (*Id.* at 23-24).

b. Bard's Motion to Exclude Dr. Frankel's Causation Opinion

Bard moves to exclude Dr. Frankel's causation opinion, (Dkt. No. 132-5, at 13-23), on the grounds that: (1) Dr. Frankel "did no economic (or any other) analysis to determine whether Bard's conduct ***caused*** hospitals to purchase Bard's PICCs instead of AngioDynamics' PICCs, or whether hospitals would have purchased more AngioDynamics PICCs ***but for*** Bard's TLS policy," but instead "***assumes*** that the jury will find causation—the very opinion he claims to be offering"; (2) Dr. Frankel's opinion does little more than [serve] as a conduit to publish the [record] evidence, at least some of which is likely inadmissible, to the jury, adding the patina of an expert economist to mere fact information"; and (3) Dr. Frankel selectively relies on evidence that supports his opinion while ignoring evidence that contradicts it, and the evidence he relies on fails to establish that there are customers **[**131]** "who do not already purchase AngioDynamics' PICCs, who would purchase them but for the challenged conduct." (Dkt. No. 132-1, at 11-18; *see also* Dkt. No. 153, at 5-8).

AngioDynamics responds that: (1) Dr. Frankel's opinion does not assume a finding **[*333]** on *causation*, as Bard claims, but on the separate liability element of *coercion*, which is a proper assumption for a causation and damages report; (2) Dr. Frankel's opinion does not merely "'narrate' factual evidence," but "analyze[s] contemporaneous documents and data and reache[s] a conclusion based on that analysis," which is "precisely what expert economists do in antitrust litigation"; and (3) Dr. Frankel "review[s] the structure of the industry, sales data, and record evidence of Bard's conduct and applie[s] well-established economic principles to reach each of his conclusions," which is "precisely what *FRE 702* requires," and his opinion is well-supported by the evidence he relies on and the record as a whole. (Dkt. No. 143, at 13-20).

As an initial matter, the Court rejects Bard's argument that Dr. Frankel's opinion improperly assumes a conclusion. In his deposition, Dr. Frankel acknowledged that his analysis "assum[es] a finding of liability," **[**132]** i.e. "a conclusion by the fact-finder that Bard coerced some hospitals to purchase its PICCs . . . when otherwise they would have purchased Angio's PICCs," but he explicitly disavowed the suggestion that his analysis "assum[es] that Angio has suffered injury as a result of Bard's conduct," instead confirming that his analysis both "offer[s] [an] opinion [that AngioDynamics was injured by Bard's conduct]," and also "quantif[ies] the damages associated with that injury." (Dkt. No. 132-3, at 143-46). While the language Dr. Frankel and his examiner used in the deposition is somewhat imprecise, from a review of Dr. Frankel's expert report and testimony, it appears clear that his analysis presupposes a conclusion on liability, but not on the issues on which he was asked to opine, i.e. causation and damages. (Dkt. No. 132-5, at 13-23). Bard argues that the "supposed distinction [between coercion and causation] is irrelevant here because the nature of this tying claim requires that there be ***coercion*** in order for there to have been ***causation***." (Dkt. No. 153, at 5-6). However, as an expert on causation and damages rather than liability, it was appropriate for Dr. Frankel to do what he did here, **[**133]** i.e. assume a finding that Bard adopted a coercive

---

[23] While AngioDynamics disavows any claim that it markets BioFlo PICCs as having "antithrombotic" properties and clarifies that it only claims BioFlo PICCs reduce "thrombus accumulation," (Dkt. No. 144-1, ¶¶ 34-36), Dr. Frankel uses the term "antithrombotic properties" throughout his report.

tying policy, and then perform an analysis of the separate question of whether that coercive policy actually caused AngioDynamics to lose any PICC sales that it otherwise would have made.

Nonetheless, the Court agrees with Bard that Dr. Frankel's causation opinion must be excluded because it does little more than summarize record evidence (including sales and market share data and documents produced in this litigation) and lend Dr. Frankel's expert credentials to AngioDynamics' interpretation of that evidence. Dr. Frankel offers no specialized economic analysis that would assist a fact-finder in interpreting the record evidence he relies on. Rather, he recites that evidence, draws inferences that a fact-finder could glean from merely examining the evidence itself, and concludes from those inferences that the evidence establishes causation—a conclusion a fact-finder is perfectly capable of making based on the evidence without the aid of expert testimony. Such an opinion, without more, does not pass muster under *Rule 702*. *See, e.g., In re Namenda Direct Purchaser Antitrust Litig., 331 F. Supp. 3d 152, 170-72 (S.D.N.Y. 2018)* (barring expert testimony that "adds nothing to the direct evidence that cannot be elicited from fact witnesses—nothing **[**134]** other than the use of [the expert's] impressive credentials to bolster the credibility of those witnesses impermissibly");[24] *Hernandez v. Leichliter, No.* ***[*334]*** *14-cv-5500, 2016 U.S. Dist. LEXIS 19728, at *5, 2016 WL 684038, at *2 (S.D.N.Y. Feb. 18, 2016)* ("To the extent [the expert] merely repeats or recasts the testimony of [Plaintiff] in order to arrive at a theory of causation, he is not testifying as an expert witness based upon specialized knowledge, but rather is acting as a conduit for another witness's testimony in the guise of an expert's opinion.") (citation omitted); *Palazzetti Import/Export, Inc. v. Morson, No. 98-cv-722, 2001 U.S. Dist. LEXIS 9538, at *8, 2001 WL 793322, at *2-3 (S.D.N.Y. July 13, 2001)* (holding that "proposed expert testimony regarding the elements of a franchise agreement and their alleged absence here does not meet the standard of *Rule 702*" because "neither of the elements of a franchise agreement requires knowledge beyond the ken of the average juror" and there was "nothing . . . to believe that the jurors would be assisted (rather than improperly swayed) by the testimony of the expert").

This case is unlike other antitrust cases involving claims of unlawful collusion (some of which AngioDynamics cites), in which experts have been permitted to testify as to whether conduct or market conditions reflected in the record **[**135]** evidence were consistent with the existence of an anticompetitive conspiracy, on the grounds that such an analysis requires specialized knowledge outside the province of an ordinary juror. *See, e.g., U.S. Info. Sys., Inc. v. Int'l Bhd. of Elect. Workers Local Union No. 3, AFL-CIO, 313 F. Supp. 2d 213, 239-41 (S.D.N.Y. 2004)* (finding that the plaintiff's expert could not draw a legal conclusion on whether or not the defendants engaged in anticompetitive conduct, but could "point to factors that would tend to show anticompetitive conduct in a market," "indicate whether he believed those factors existed here, and what the economic significance of those factors would be," "explain how certain conduct could affect a market through the use of hypothetical statements" and "hypothesize that if certain conduct did occur, economists would expect the market to react in a particular way"); *Fleischman v. Albany Med. Ctr., 728 F. Supp. 2d 130, 151-52 (N.D.N.Y. 2010)* ("[Plaintiffs' expert] seeks to testify that the information exchanges, engaged in by the Defendant hospitals, made it easier for Defendants to form and maintain a wage agreement. This type of opinion may be helpful to the jury and is admissible."). Here, by contrast, Dr. Frankel brings no specialized economic analysis to bear in his interpretation of the record evidence. The conclusions he draws from that evidence consist of arguments **[**136]** AngioDynamics' lawyers can readily make without the aid of expert analysis, and are all well within the province of an ordinary, intelligent juror. Therefore, the Court grants Bard's motion to exclude Frankel's causation opinion.[25]

---

[24] AngioDynamics argues that *Namenda* is distinguishable because there "the Court excluded the testimony of an expert who failed to analyze contemporaneous documents and data and instead relied only on her industry experience and fact witness testimony in forming her opinion," whereas "Dr. Frankel analyzed contemporaneous documents and data and reached a conclusion based on that analysis." (Dkt. No. 143, at 19). Bard points out that this distinction ignores the fact that the *Namenda* court "excluded the expert's testimony both because the expert failed to rely on sufficient facts or data, and for a separate reason (that Bard cites)—the proposed expert testimony would simply regurgitate information that could be introduced through fact witnesses." (Dkt. No. 153, at 7 n.3). The Court agrees with Bard.

[25] Because the Court has found that Dr. Frankel's causation opinion must be excluded on the foregoing grounds, it need not address the parties' remaining arguments regarding that opinion. To the extent these arguments amount to disputes over

[*335] 2. Damages

a. Legal Standard for Antitrust Damages

The Court evaluates Bard's motion to exclude Dr. Frankel's damages opinion in light of the legal standard for proving antitrust damages. ***HN28***[] "[T]he actual amount [of an antitrust plaintiff's damages] need not be proven to the same degree of certainty as proving some quantum of damages," given the difficulty (and, at times, impossibility) of accurately constructing a hypothetical world untainted by the defendant's challenged conduct. *Drug Mart Pharm. Corp. v. Am. Home Prods. Corp., 472 F. Supp. 2d 385, 424 (S.D.N.Y. 2007)* (citing *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 562, 51 S. Ct. 248, 75 L. Ed. 544 (1931))*. The "wrongdoer is not entitled to complain that [the damages] cannot be measured with the exactness and precision that would be possible if the case, which he alone is responsible for making, were otherwise." *Story Parchment Co., 282 U.S. at 563*. Indeed, "[t]he most elementary conceptions of justice and public policy require that the wrongdoer shall bear the risk of the uncertainty which his own wrong has created." *Bigelow v. RKO Radio Pictures, 327 U.S. 251, 264-65, 66 S. Ct. 574, 90 L. Ed. 652 (1946)*, *reh'g denied*, *327 U.S. 817, 66 S. Ct. 815, 90 L. Ed. 1040 (1946)*. Therefore, an antitrust plaintiff need only "come forward with substantial **[**137]** evidence from which a jury can determine the amount of damages from a 'just and reasonable estimate of the damage based upon relevant data.'" *Drug Mart Pharm. Corp., 472 F. Supp. 2d at 424* (quoting *Bigelow, 327 U.S. at 264*); *see also, e.g., New York v. Julius Nasso Concrete Corp., 202 F.3d 82, 88 (2d Cir. 2000)* ("Where . . . there is a dearth of market information unaffected by the collusive action of the defendants, the plaintiff's burden of proving damages, is, to an extent, lightened.").

At the same time, "even where the defendant by his own wrong has prevented a more precise computation, the jury may not render a verdict based on speculation or guesswork." *SCM Corp. v. Xerox Corp., 645 F.2d 1195, 1212 (2d Cir. 1981)* (quoting *Bigelow, 327 U.S. at 264*). Moreover, ***HN29***[] a more lenient standard in proving the amount of damages should only be applied where the plaintiff puts forth "proof of defendant's wrongful acts and their tending to injure plaintiffs' business, and from evidence in the decline of prices, profits and values, ***not shown to be attributable to other causes***." *Bigelow, 327 U.S. at 264* (emphasis added); *see also* *MCI Communications Corp., 708 F.2d at 1162* ("When a plaintiff improperly attributes all losses to a defendant's illegal acts, despite the presence of significant other factors, the evidence does not permit a jury to make a reasonable and principled estimate of the amount of damages. This is precisely the type of speculation or guesswork not permitted for **[**138]** antitrust jury verdicts.") (internal marks omitted).

b. Dr. Frankel's Damages Opinion

Dr. Frankel calculates AngioDynamics' purported damages resulting from Bard's TLS policy by estimating its lost profits, using a formula that includes, among other variables, the estimated percentage of Bard's TLS-paired PICC sales that would have been won by AngioDynamics had Bard not engaged in alleged tying. For purposes of its motion in limine, Bard only challenges Dr. Frankel's methodology for determining that variable, and that is therefore where the Court focuses its discussion.

Dr. Frankel determines this percentage using a "benchmark" or "yardstick" analysis. **[*336]** As a first step, Dr. Frankel "consider[s] a number of potential indicators of AngioDynamics' prospective success at selling PICCs to users of Bard TLS devices" based on documents in the record, and selects two of these "indicators" as benchmarks to use in calculating AngioDynamics' lost profits. (*Id.* at 28-29).[26]

---

whether the record supports a finding of causation, the Court has addressed this question in resolving the parties' cross-motions for summary judgment on antitrust injury. *See* Section IV.B *supra*.

[26] At oral argument, AngioDynamics' counsel suggested that Dr. Frankel's other potential "indicators" could serve as a basis for a damages model if the Court excludes Dr. Frankel's benchmarking analysis; Bard's counsel disagreed. (Dkt. No. 187, at 64-67,

As his first benchmark ("Benchmark 1"), Dr. Frankel selects "AngioDynamics' share of PICCs used with Teleflex TLS devices." (*Id.* at 29). Dr. Frankel derives that percentage—[TEXT REDACTED BY THE COURT] percent—from an email sent by Teleflex's outside **[**139]** counsel containing a rough estimate of the percentage of its standalone stylets that are used with AngioDynamics PICCs. (*Id.* at 29-30; *see also id.* at 42 (explaining Dr. Frankel's calculation of Benchmark 1)). Dr. Frankel testified that he felt this benchmark was justified because Teleflex offers a single-sterile stylet and "Angio is able to sell PICCs that are used [TEXT REDACTED BY THE COURT] percent of the time with that system," which is an "obvious analogue to look at as a piece of information that bears on" how successful AngioDynamics would be if Bard offered a single-sterile stylet as Teleflex does. (Dkt. No. 132-3, at 232).

For his second benchmark ("Benchmark 2"), Dr. Frankel conducts "a comparison of Teleflex's share of sales of PICCs used with its own TLS devices and Teleflex's share of unguided nursing PICC sales," and "use[s] the ratio of . . . non-Teleflex shares — the non-Teleflex share of Teleflex TLS usage divided by the non-Teleflex share of unguided nursing PICCs used — as a benchmark for Bard." (Dkt. No. 132-5, at 31). This benchmark "assumes [that, absent the TLS policy,] Bard would have had the same relative increased success as Teleflex in selling PICCs for use with its own TLS devices," **[**140]** and that non-Bard PICC manufacturers "would have been relatively less successful at selling PICCs to Bard TLS users to the same extent non-Teleflex PICC manufacturers have less relative success selling PICCs to Teleflex TLS users." (*Id.*). Based on these assumptions, Dr. Frankel determines that "[d]uring the period 2013-2018 . . . [absent the TLS policy,] Bard would have sold [TEXT REDACTED BY THE COURT] percent of PICCs used with Bard TLS devices," while "[t]he remaining [TEXT REDACTED BY THE COURT] percent of PICCs—i.e., Bard TLS-guided PICCs that would not have been sold by Bard absent Bard's tie—would have been sold by the other PICC suppliers." (*Id.* at 31-32). Dr. Frankel then "allocate[s] those sales across those suppliers, including AngioDynamics, pro-rata based on their share of non-Bard unguided nursing PICCs sold in the United States." (*Id.* at 32). Using this methodology, Dr. Frankel finds that AngioDynamics "would have accounted for [TEXT REDACTED BY THE COURT] percent of U.S. PICC sales used with Bard TLS devices." (*Id.*). In his deposition testimony, Dr. Frankel described Benchmark 2 as a "more conservative alternative" to Benchmark 1, designed to account for the fact that "Bard might do particularly **[**141]** well in selling PICCs to its own customers, just as Teleflex does particularly well in selling PICCs to its TLS customers." (Dkt. No. 132-3, at 232).

Dr. Frankel testified that he "[doesn't] have a strong opinion as to which of [his benchmarks] is better." (*Id.*). He stated that his benchmark analysis is designed to "suggest[] to a jury that . . . we can't know with precision this variable because **[*337]** of [Bard's alleged anticompetitive] conduct, and there's a reasonable range spanning between these two benchmarks. And I leave it to them to make a reasonable choice or their own choice based on the best I can do, which is to present this range of outcomes." (*Id.* at 231).

c. Bard's Motion to Exclude Dr. Frankel's Damages Opinion

Bard moves to exclude Dr. Frankel's damages opinion on three grounds: (1) Dr. Frankel bases his analysis on unreliable data; (2) Dr. Frankel's analysis relies on benchmarks that have been affected and distorted by Bard's challenged conduct; and (3) Dr. Frankel failed to sufficiently analyze the comparability of his chosen benchmarks. (Dkt. No. 132-1, at 18-28). AngioDynamics generally responds that Bard's arguments regarding Dr. Frankel's benchmarking methodology go to the methodology's **[**142]** weight, not its admissibility, and do not provide grounds for exclusion. (Dkt. No. 143, at 20-31).

i. Reliability of Dr. Frankel's Data

Bard argues that Dr. Frankel's damages methodology must be excluded on the grounds that it is based on unreliable data. Specifically, the percentage of Teleflex standalone stylets used with AngioDynamics PICCs, which

---

81-82). As Bard has only moved to exclude Dr. Frankel's benchmarking analysis, the Court only addresses the issue that has been presented and briefed by the parties.

Dr. Frankel uses as the basis of both of his benchmarks, comes from the following excerpt from an email sent by Teleflex's outside counsel several days before Dr. Frankel served his expert report:

> Teleflex believes that the vast majority (in excess of [TEXT REDACTED BY THE COURT]) of non-preloaded PICCs are being sold for use with another company's stylet. Based on sales personnel input in May 2019, Teleflex roughly estimates that approximately [TEXT REDACTED BY THE COURT] of the standalone stylet sales is [sic] used with AngioDynamics catheters and approximately [TEXT REDACTED BY THE COURT] with Bard Catheters. However, Teleflex's sales data does not capture this information and accordingly Teleflex cannot confirm these estimates.

(Dkt. No. 147-23, at 3). Bard contends that this "rough[] estimate[]" is insufficiently reliable to pass muster **[**143]** under *Daubert*, given that the email does not indicate (and Dr. Frankel does not know) the time frame to which it applies, how it was determined, what information it was based on, which sales personnel contributed, or what their titles or seniority levels were. (Dkt. No. 132-1, at 25-28; Dkt. No. 153, at 12-14). AngioDynamics replies that "experts are granted wide latitude with respect to the evidence and data on which they rely"; that Dr. Frankel testified that "the Teleflex estimate is precisely the type of information on which economists typically rely"; that the estimate was "provided by Teleflex in response to subpoenas by both parties in the normal course of discovery and was accepted in satisfaction of those subpoenas by both parties"; that "Teleflex sales personnel are in the best position to estimate [the number of Teleflex TLS Stylets that are paired with AngioDynamics' PICCs] based on their daily interactions with customers in the field"; and that "Dr. Frankel undertook independent analysis to verify the accuracy of the estimate." (Dkt. No. 143, at 27-31).

HN30[] As a preliminary matter, AngioDynamics is correct that experts have wide latitude with respect to the data on which they **[**144]** rely, and challenges concerning the reliability of an expert's data often present questions of weight, rather than admissibility. *See, e.g.,* *Allen v. Dairy Farmers of Am., Inc., No. 09-cv-230, 2014 U.S. Dist. LEXIS 8343, at *27, 2014 WL 266290, at *9 (D. Vt. Jan. 23, 2014)* ("Most 'challenge[s] to the facts or data relied upon by [an expert do] not go to the admissibility of his testimony, but only to the weight of his testimony.'" (quoting *Aventis Envtl* ***[*338]*** *Sci. USA LP v. Scotts Co., 383 F. Supp. 2d 488, 514 (S.D.N.Y. 2005)))*; *Green Mountain Chrysler Plymouth Dodge Jeep v. Crombie, 508 F. Supp. 2d 295, 325 (D. Vt. 2007)* ("[L]imitations in some of the data on which [an expert] relied goes to the weight of [the expert's] testimony . . . , not its admissibility."); *Hartle v. FirstEnergy Generation Corp., No. 08-cv-1019, 2014 U.S. Dist. LEXIS 43033, at *29, 2014 WL 1317702, at *9 (W.D. Pa. Mar. 31, 2014)* ("Even if the data relied on by the expert is 'imperfect, and more (or different) data might have resulted in a 'better' or more 'accurate' estimate in the absolute sense, it is not the district court's role under Daubert to evaluate the correctness of facts underlying an expert's testimony.'" (quoting *i4i Ltd. P'ship v. Microsoft Corp., 598 F.3d 831, 856 (Fed. Cir. 2010)))*. Nonetheless, this general principle does not divest the Court of its gatekeeping obligation to ensure that an expert's testimony is "based on sufficient facts or data" to pass muster under *Rule 702*.

Bard relies heavily on *ZF Meritor, LLC v. Eaton Corp., 696 F.3d 254 (3d Cir. 2012)*, a Third Circuit case that illustrates the circumstances under which an expert's data is so unreliable as to **[**145]** warrant exclusion. In that case, the plaintiff's expert based his analysis on a one-page forecast that the company prepared to project its estimated sales volume, prices, manufacturing costs, operating expenses, and other criteria. *Id. at 291 & n.23, 292*. The expert used that forecast to "estimate[] the incremental revenues that [the plaintiff] would have earned 'but for' [the defendant's] anticompetitive conduct, and then subtracted from that figure the incremental cost that [the plaintiff] would have had to incur to achieve such incremental sales." *Id. at 291-92*. The district court excluded the expert's testimony, finding it unreliable for "rel[ying] on a one-page set of profit and volume projections without knowing the circumstances under which such projections were created or the assumptions on which they were based." *Id. at 292*. The Third Circuit affirmed, explaining that "[a]n expert's lack of familiarity with the methods and the reasons underlying [someone else's] projections virtually preclude[s] any assessment of the validity of the projections through crossexamination." *Id. at 293*. Even though the expert "was generally aware of the circumstances under which the [one-page forecast] was created and the purposes for **[**146]** which it was used," he "did not know who initially calculated the . . . figures . . . [,] did not know whether the . . . projections were calculated by [the plaintiff's] management, lower level employees at [the plaintiff], or came from some outside source . . ., [and did not] know the methodology used to create the [one-page forecast] or the assumptions on which the . . . price and volume estimates were based." *Id.* Therefore, the Third Circuit held that the district court was justified in excluding his opinion. *Id.*

AngioDynamics argues that this case is more analogous to cases in which "*ZF Meritor* has been routinely distinguished." (Dkt. No. 143, at 30 n.15). AngioDynamics relies on *Apotex, Inc. v. Cephalon, Inc., 321 F.R.D. 220 (E.D. Pa. 2017)*. In *Apotex*, like in *ZF Meritor*, the plaintiffs' expert relied on the plaintiffs' internal market share projections. *Id. at 232*. However, the court found its case distinguishable from *ZF Meritor*, in part because the expert in *Apotex* had also considered corroborating sources such as "a series of [the plaintiff's] internal projections" and "the deposition testimony of . . . [the plaintiff's] former President" who "reviewed and signed off on the market share forecasts relied upon by [the expert], and generally explained **[**147]** how they were created." *Id. at 232-33*. Thus, the court found that the *Apotex* expert was "was clearly more informed **[*339]** about how the market share projections were created than the expert in *ZF Meritor*," and concluded that "[w]hether [the expert] relied on the best data in forming his opinions is a question for the jury." *Id. at 233*. AngioDynamics also cites other cases in which courts similarly distinguished *ZF Meritor*. *See e.g., In re SemCrude L.P., 648 Fed. Appx. 205, 214 (3d Cir. 2016)* (finding expert's use of contemporaneous valuation report reliable where the expert explained his reliance on the valuation and adjusted it based on his own analysis); *Insight Equity v. Transitions Optical, Inc., 252 F. Supp. 3d 382, 396 (D. Del. 2017)* (finding expert's use of projections reliable where "the estimates were actually used in the course of business and incorporated actual sales data"); *In re Mushroom Direct Purchaser Antitrust Litig., No. 06-cv-0620, 2015 U.S. Dist. LEXIS 120892, at *67-71 n.10, 2015 WL 5767415, at *17 n.10 (E.D. Pa. July 29, 2015)* (finding expert's use of contemporaneous internal estimates reliable, because the expert had "grounded his opinion on factual evidence in the record produced by defendants").

As the cases AngioDynamics cites demonstrate, *ZF Meritor* is not the typical case; rather, it represents an extreme category of cases in which the data relied on by an expert is so patently unreliable as to render it inadmissible. However, **[**148]** the Court finds that the data Dr. Frankel relies on here falls into that category. In his deposition, Dr. Frankel acknowledged that he "know[s] no further details [about the data] other than what's in" the email, including which sales personnel the email refers to, what their "seniority" or "experience base" was, what "products they were responsible for selling or the geographic region that they knew about," the "circumstances under which the unnamed Teleflex sales personnel came up with this estimate," what Teleflex did to "aggregate and estimate" the figure, or the specific time period the data covered. (Dkt. No. 132-3, at 260-63). Dr. Frankel's ignorance as to the most basic facts underlying the data he relies on is precisely the "lack of familiarity" that the Third Circuit in *ZF Meritor* found "preclude[s] any assessment of the validity of the projections through crossexamination," and thus warrants exclusion. *ZF Meritor, 696 F.3d at 293*. The cases cited by AngioDynamics are inapposite, as each of them involved experts who could point to at least *some* corroborating information or record evidence demonstrating how the data was created or validating its reliability, which is utterly lacking here.

It is no answer **[**149]** that "Teleflex is in the best position to estimate and report this information," as Dr. Frankel asserts in his rebuttal report, (Dkt. No. 132-6, at 14), or that the data was provided by Teleflex's counsel in response to discovery subpoenas, as AngioDynamics argues, (Dkt. No. 143, at 28). Assuming that the data provided in Teleflex's counsel's email is sufficiently reliable simply because Teleflex provided it, as Dr. Frankel did here, ignores the email's numerous caveats that the data constitutes a "rough estimate" and that "Teleflex cannot confirm these estimates." (Dkt. No. 147-23, at 3). It also ignores the fact that the email provides none of the information necessary to confirm that it is suitable for use in Dr. Frankel's analysis, including such information as how the "rough estimate" was determined, what form of "sales personnel input" was used to calculate it (given that "Teleflex's sales data does not capture this information"), and whether those estimates applied to the time period Dr. Frankel examined in his analysis. (*Id.*).

AngioDynamics also attempts to distinguish *ZF Meritor* on the grounds that the data at issue in *ZF Meritor* involved profit and volume projections, whereas **[**150]** the data at issue here is "an estimate concerning **[*340]** *actual* sales" that came from "sales personnel, who have direct knowledge on which to base such an estimate." (Dkt. No. 143, at 29). This argument fails in light of Teleflex's caveats that its "sales data does not capture this information" and that it "cannot confirm these estimates." (Dkt. No. 147-23, at 3). Indeed, nothing in the information Dr. Frankel utilized indicates what "sales personnel input" means, the methodology by which this "input" was gathered from salespeople and aggregated to compute the estimates in Teleflex's counsel's email, and whether that methodology was sufficiently sound and reliable to justify the use of the estimates in a damages analysis. .

AngioDynamics further contends that the Court should accept Dr. Frankel's data, despite its limitations, because it was the best data available in this litigation, and because Dr. Frankel testified that "the Teleflex estimate is precisely the type of information on which economists typically rely." (Dkt. No. 143, at 27-28; Dkt. No. 132-3, at 261-62, 266; Dkt. No. 132-6, at 14). ***HN31***[] But it is well established that an expert's "lack of access to reliable data does not justify **[**151]** use of unreliable data, and militates against admission under Daubert." *Danley v. Bayer (In re Mirena IUD Prods. Liab. Litig.), 169 F. Supp. 3d 396, 445 (S.D.N.Y. 2016)*. And Dr. Frankel's conclusory insistence that the Teleflex data is the type that an economist would normally rely on (at least in the absence of more precise data) does not establish that the data is sufficiently reliable to allow Dr. Frankel to craft a damages estimate that is "just and reasonable" and not based on "speculation or guesswork." *Drug Mart Pharm. Corp., 472 F. Supp. 2d at 424* (citations omitted).

Finally, AngioDynamics argues that Dr. Frankel confirmed the accuracy of Teleflex's estimates by conducting an independent analysis. (Dkt. No. 143, at 28-29). Specifically, according to Dr. Frankel's rebuttal report:

> Using AngioDynamics sales data . . . I reported that in 2018 AngioDynamics sold [TEXT REDACTED BY THE COURT] non-IR PICCs to customers AngioD amics was able to identify as using Teleflex TLS devices. Those sales alone represent [TEXT REDACTED BY THE COURT] percent of Teleflex separate stylet usage in 2018.

(Dkt. No. 132-6, at 14-15). In his deposition, Frankel described the process in greater detail:

> My staff . . . asked AngioDynamics, through counsel, to give us their best available list of hospitals that they knew were using Teleflex TLSs **[**152]** and stylets to place Angio nursing PICCs. And they did their best to assemble that list for us. And then my staff went through the data. And that was a process because . . . the right hospital names in the data wasn't always obvious, and so we did our best to match those up. I think they may have been confirming the communications with Angio to make sure we were on the right track. And that generated the [TEXT REDACTED BY THE COURT] percent of stylets that that are sold separately . . . [TEXT REDACTED BY THE COURT]

(Dkt. No. 132-3, at 273-74). Thus, through this independent analysis, Frankel came to a figure of [TEXT REDACTED BY THE COURT] percent, approximately half of the figure used in Benchmark 1 and slightly higher than the figure used in Benchmark 2. (Dkt. No. 132-3, at 268-70).[27]

[*341] This independent analysis, however, does not confirm the reliability of the figure Dr. Frankel used for Benchmark 1: at most, it confirmed a figure that is only *half of* the figure he computed using Teleflex's data of questionable reliability. Dr. Frankel insists that the list of customers AngioDynamics provided is not comprehensive since AngioDynamics personnel "knew some of [the customers **[**153]** that were using Teleflex TLS stylets with AngioDynamics PICCs], but not [all] of them," meaning the actual percentage of such customers is greater than the figure he was able to confirm. (Dkt. No. 132-3, at 268). Accepting this as true, this at most establishes that the actual percentage of Teleflex TLS customers using AngioDynamics PICCs is somewhere above the figure he was able to confirm; it says nothing about what that percentage actually is, and it certainly does not validate the figure Dr. Frankel used in Benchmark 1. For the foregoing reasons, the Court finds that Dr. Frankel's benchmarking analysis is based on unreliable data for purposes of *Daubert*.

ii. Bard's Other Arguments for Exclusion

---

[27] At oral argument, the parties disputed whether the percent figure Dr. Frankel independently calculated should be reduced in order to represent the percentage of *total* (as opposed to *standalone)* Teleflex TLS stylets that are sold for use in AngioDynamics' PICCs. (Dkt. No. 185, at 44, 78-79). This issue was not addressed in the parties' briefing, and the Court does not address it here, as it makes no difference to the Court's analysis.

Bard offers two other reasons why Dr. Frankel's benchmarking analysis should be excluded under *Daubert*. First, Bard argues that Dr. Frankel's benchmarks are "tainted" by the challenged conduct. (Dkt. No. 132-1, at 18-21; Dkt. No. 153, at 8-11).[28] Second, Bard argues that Dr. Frankel "performed no analysis to ensure that Bard's customers are sufficiently similar to Teleflex's so that it is fair and reliable to assume that they would have combined their respective TLSs with AngioDynamics' PICCs **[**154]** in the same proportion"; Bard specifically points to Dr. Frankel's failure to account for the fact that Teleflex TLS users have already demonstrated "a strong preference for BioFlo, since this alternative is more expensive than a Bard preloaded PICC . . . and requires hospitals to use what Dr. Frankel alleges is an inferior TLS," whereas Bard TLS users "had the opportunity to make the same choice . . . but none decided that the purported advantages of AngioDynamics' PICCs were worth it." (Dkt. No. 132-1, at 21-25; *see also* Dkt. No. 153, at 11-12). AngioDynamics responds, in summary, that, given that: (1) Teleflex is Bard's only competitor to offer navigation-based TLS; (2) the two companies sell similar products to similar types of customers (hospitals, GPOs and IDNs), and even some of the same customers; and (3) Teleflex does *not* engage in an alleged tying scheme similar to Bard's, Teleflex's performance in the real world is the most economically reasonable comparator to use to estimate Bard's performance in a world without its TLS policy, and Bard's criticisms regarding taint and comparability are best addressed as questions of weight rather than admissibility. (Dkt. No. 143, at **[**155]** 20-27).

HN32[] As a starting premise, the general rule is that arguments regarding **[*342]** the comparability or appropriateness of a particular benchmark go to the weight, not the admissibility, of a benchmarking analysis. *See, e.g., In re Blood Reagents Antitrust Litig., MDL No. 09-2081, 2015 U.S. Dist. LEXIS 141909, at *68 n.18, 2015 WL 6123211, at *21 n.18 (E.D. Pa. Oct. 19, 2015)* ("Many courts . . . have held that the question whether plaintiffs have met their burden of proving comparability should be left to the trier of fact to resolve because comparability challenges generally involve weighing facts."); *Washington v. Kellwood Co., 105 F. Supp. 3d 293, 317 (S.D.N.Y. 2015)* ("[W]hile the evidence underlying [the expert's benchmark analysis] may, in defendant's view, be thin, questionable, or self-servingly selective, our role as gatekeeper is not to divest defendant of the task of challenging the weight of such evidence before the trier of fact."). Moreover, a benchmark need not be perfectly comparable, so long as it allows the jury to calculate a "reasonable estimate of damages" as required under the antitrust laws. *See, e.g., Fleischman, 728 F. Supp. 2d at 148* (citing *McDonough v. Toys R Us, Inc., 638 F. Supp. 2d 461, 491 (E.D. Pa. 2009))*. This is particularly true where a Defendant's anticompetitive conduct has rendered selection of a perfectly comparable benchmark difficult or impossible. *See, e.g., Dial Corp. v. News Corp., 314 F.R.D. 108, 118-19 (S.D.N.Y. 2015)* (finding arguments regarding benchmark companies' comparability go to weight, not admissibility, where, because **[**156]** the defendant "has allegedly maintained a monopoly in the market . . . since at least 2000," "creating a benchmark using [the defendant's] prices during a time of 'robust competition' is not feasible," and "the selection of perfectly comparable benchmark firms aside from [the defendant] is impossible where [the defendant's] alleged monopoly prevents comparable firms from operating within its market").

Nonetheless, there are some circumstances under which, even applying the foregoing liberal standard, a benchmarking analysis may be so utterly deficient as to warrant its exclusion. One such circumstance is where the expert did not merely select arguably inappropriate benchmarks, but utterly "failed to perform ***any*** substantive analysis of those factors most relevant to comparability." *In re Blood Reagents Antitrust Litig., 2015 U.S. Dist. LEXIS 141909, at *69, 2015 WL 6123211, at *22* (emphasis added); *see also El Aguila Food Prods., Inc. v. Gruma Corp., 131 F. App'x 450, 453 (5th Cir. 2005)* (affirming exclusion of expert testimony where the expert "made no effort to demonstrate the reasonable similarity of the plaintiffs' firms and the businesses whose earnings data he relied on as a benchmark"); *Loeffel Steel Prods., Inc. v. Delta Brands, Inc., 387 F. Supp. 2d 794, 810-17 (N.D. Ill. 2005)* (excluding expert testimony where expert used eight companies in the same "industry" as the plaintiff as

[28] As to Benchmark 1, Bard contends that "the percentage of Teleflex's stylets [paired with AngioDynamics' PICCs] would have been far lower in the but-for world because some hospitals currently using them with AngioDynamics' PICCs would have shifted to Bard's superior TLS," and thus using this figure as a benchmark overstates the percentage of Bard's TLS stylets that would be combined with AngioDynamics' PICCs in the but-for world. (Dkt. No. 132-1, at 18-21; Dkt. No. 153, at 8-11). As to Benchmark 2, Bard contends that "the higher the number of AngioDynamics PICCs paired with Teleflex TLS, the smaller the relative advantage Teleflex has in selling its PICCs to its own TLS users as compared to nurses who place PICCs without TLS, which inflates Benchmark 2." (Dkt. No. 132-1, at 20 n.15).

benchmarks but did not "consider[] such critical factors as what **[**157]** services the companies provided, their customer base, the products they sold, the geographic markets in which they operated, their prices and other critical aspects of the business" to determine whether the plaintiff's "customer base and the services and products it offered approximated those of the eight companies"). Similarly, courts have excluded benchmarking analyses that attribute all of plaintiff's claimed losses to a defendant's misconduct, without making any effort to isolate the losses actually attributable to that conduct from the impact of other significant differences between the plaintiff and the chosen benchmark. *See, e.g., Herman Schwabe, Inc. v. United Shoe Mach. Corp., 297 F.2d 906, 911 (2d Cir. 1962)* (affirming exclusion of analysis using the plaintiff-appellant's share of clicking machines in the non-shoe industry as a benchmark for sales it would have attained in **[*343]** the shoe industry but for the defendant's antitrust violations, where the expert failed to account for relevant differences between the two industries or for "entirely lawful" factors accounting for the defendant's large share of the shoe machinery market); *Weiner v. Snapple Beverage Corp., No. 07-cv-8742, 2010 U.S. Dist. LEXIS 79647, at *23, 2010 WL 3119452, at *7 (S.D.N.Y. Aug. 5, 2010)* (finding an expert's testimony unreliable where the expert did "not explain **[**158]** how his approach would isolate the impact of [the anti-competitive conduct] from the other factors that purportedly affect the price of [defendant's product] and its competitors").[29]

Here, Dr. Frankel used PICC sales by Teleflex—which is Bard's only competitor in the navigation-enabled TLS space, and which does *not* engage in anticompetitive activity—as a benchmark for the PICC sales Bard would have made had *it* not engaged in that activity. This approach at least attempts to approximate a but-for world that "[has] not been affected by [Bard's alleged] antitrust violations," *Schwab v. Philip Morris USA, Inc., 449 F. Supp. 2d 992, 1062 (E.D.N.Y. 2006)*, *rev'd sub nom., McLaughlin v. Am. Tobacco Co., 522 F.3d 215 (2d Cir. 2008)*, and to use a benchmark company that is comparable to Bard in some important ways, including the industry they compete in, the types of products they sell, and the customer base they serve, i.e. "hospitals that [] place PICCs," (Dkt. No. 132-3, at 283-94). Bard's arguments, however, raise valid questions about the reliability of Dr. Frankel's analysis, especially about whether he sufficiently considered important potential differences between the purchasing preferences of the two companies' customers that could impact the appropriateness of **[**159]** his benchmarks. The Court need not decide whether, standing alone, these issues would warrant exclusion of Dr. Frankel's opinion, or would be best addressed as questions of weight at trial. Given the Court's finding that the data on which Dr. Frankel's benchmarking analysis is based is so unreliable as to require exclusion, the Court grants Bard's motion to exclude that analysis without reaching Bard's remaining arguments.

3. Remaining Theories of Relief

While the Court excludes the benchmarking analysis that is the subject of Bard's motion in limine, the Court declines to grant Bard summary judgment on AngioDynamics' claim for damages under *Section 4 of the Clayton Act* at this time. At oral argument, the parties disagreed on whether the Court's granting of Bard's motion in limine would leave anything left of Dr. Frankel's testimony from which a jury could calculate a "just and reasonable" estimate of damages. As Bard has only moved to exclude Dr. Frankel's benchmarking analysis, and the reliability of that specific analysis is thus the only part of Dr. Frankel's analysis that is currently before the Court, the Court does **[*344]** not reach the question of whether other aspects of Dr. Frankel's analysis **[**160]** may serve as a valid basis for calculating damages. Moreover, even assuming AngioDynamics is left with no evidence from which a just

---

[29] As noted, Bard also argues that courts have excluded benchmarking analyses where it found the proposed benchmarks to be "tainted" by the alleged misconduct at issue. However, the cases Bard cites for this proposition are distinguishable, as in contrast to Dr. Frankel, the excluded experts in those cases sought to use a defendant's anticompetitive profits as a benchmark for measuring the profits a competitor plaintiff would have made but for the defendant's conduct—in essence, seeking to reap the fruit of the defendant's anticompetitive conduct to provide a windfall to the plaintiff. *See, e.g.,* ***Farmington Dowel Prod. Co. v. Forster Mfg. Co., 421 F.2d 61, 82 & n.48 (1969)***; *Admiral Theatre Corp. v. Douglas Theatre Co., 437 F. Supp. 1268, 1297-99 (D. Neb. 1977)*, *modified*, *585 F.2d 877 (8th Cir. 1978)*; *cf. In re Urethane Antitrust Litig., No. 04-cv-1616, 2012 U.S. Dist. LEXIS 181506, at *42, 2012 WL 6681783, at *6 (D. Kan. Dec. 21, 2012)* ("[C]riticisms of [an expert's] consideration of possible taint from a conspiracy of potential benchmark years go to the weight of his opinions and not their admissibility."), *aff'd 768 F.3d 1245 (10th Cir. 2014)*.

and reasonable damages estimate can be determined, this does not require dismissal of AngioDynamics' claim for damages under *Section 4 of the Clayton Act*. ***HN33***[] Where, as here, "there is insufficient proof of the amount of damages . . . proof of an antitrust violation and the fact of damage is a sufficient basis for an award of nominal damages" under *Section 4*. *Valassis Communs., Inc., 2019 U.S. Dist. LEXIS 27770, at *34-35, 2019 WL 802093, at *12* (citations omitted); *U.S. Football League v. Nat'l Football League, 842 F.2d 1335, 1377 (2d Cir. 1988)* (confirming district courts' ability to award nominal damages in antitrust cases).

Also, even if AngioDynamics does not have a viable theory by which it can quantify its past damages, this would not preclude AngioDynamics from continuing to pursue its claim for injunctive relief under *Section 16 of the Clayton Act*. ***HN34***[] "Typically, the inability to prove past damages does not compel a finding that the plaintiff faces no threat of antitrust injury in the future," and thus a plaintiff that failed to prove past damages may still pursue a claim for forward-looking injunctive relief. *Cash & Henderson Drugs, Inc. v. Johnson & Johnson, 799 F.3d 202, 215 (2d Cir. 2015)* (citing *Zenith Radio Corp., 395 U.S. at 130*). "However, in certain situations, the lack of past injury may indicate that future injury is improbable." *Id.* For example, **[**161]** where the challenged conduct has been in place long enough for potential effects to manifest themselves and there is no evidence of injury, the difference between *Clayton Act Section 4*'s requirement of actual injury and *Section 16*'s requirement of threatened injury disappears. *Drug Mart Pharmacy Corp. v. Am. Home Prods. Corp., 2007 U.S. Dist. LEXIS 93493, at *45-62, 2007 WL 4526618, at *10-15 (E.D.N.Y. Dec. 20, 2007)*. Here, the Court has found that there is sufficient evidence in the record to create triable issues of fact as to whether AngioDynamics has suffered injury as a result of an antitrust violation committed by Bard. Therefore, AngioDynamics may continue to pursue its claim for injunctive and declaratory relief.

V. CONCLUSION

For these reasons, it is hereby

ORDERED that Bard's motion in limine (Dkt. No. 132) is **GRANTED**; and it is further

ORDERED that Bard's motion for summary judgment (Dkt. No. 133) is **DENIED** in its entirety; and it is further

ORDERED that AngioDynamics' motion for summary judgment (Dkt. No. 134) is **DENIED** in its entirety.

IT IS SO ORDERED.

Opinion

Report and Recommendation

PLAINTIFF'S MOTION TO SUBSTITUTE PARTY [ECF NO. 380]

Before the Court is plaintiff's motion to substitute party. (ECF No. 380). I recommend granting the motion.

I. Background

Plaintiff brings multiple claims against the defendants, three against defendant Sheldon Adelson: (1) First Claim for Relief: Violation of *Section 2 of the Sherman Act-Monopolization, 15 U.S.C. § 2*; (2) Second Claim for Relief: Violation of *Section 2 of the Sherman Act - Attempted Monopolization, 15 U.S.C. § 2*; and (3) Fifth Claim for Relief: Violation of the Nevada Unfair Trade Practices Act - NRS 598A. (ECF No. 1). The Sun and the Review-Journal have operated under an Amended and Restated [Joint Operating] Agreement since 2005 ("JOA"), which allowed the parties to combine the two newspapers into a single-media product that separately brands the RJ and the Sun and includes the Sun as a separate newspaper located inside the Review-Journal. (*Id.*) Defendant Las Vegas Review Journal brings counter claims for monopolization and attempted monopolization, along with a claim of violation of *Section 1 of the Sherman Act, Restraint of Trade, 15 U.S.C. § 1*, and it seeks declaratory judgment regarding the invalidity of the JOA. (ECF No. 296 at 52).

Earlier this year, defendant Sheldon Adelson, the owner of the Review-Journal, passed away. On February 22, 2021, the Review Journal filed a suggestion **[*7]** of death upon the record which states that Dr. Miriam Adelson is the Special Administrator of Defendant Sheldon Adelson's Estate. (ECF No. 358). Plaintiff now moves pursuant to *Rule 25(a) of the Federal Rules of Civil Procedure*, to substitute Dr. Adelson in place of Sheldon Adelson. (ECF No. 380 at 2). The defendants do not dispute the general survivability of the Sun's Sherman Act and state law claims against defendant Adelson or the substitution of Dr. Miriam Adelson. The defendants, however, dispute the survivability of the statutory trebling of damages and fee-shifting because defendants argue that those damages are penal rather than remedial. (ECF No. 386 at 3). Plaintiff argues in its reply that the Ninth Circuit has not ruled that treble damages for antitrust violations extinguish upon the death of a defendant as a penalty under a *Rule 25*. (ECF No. 392 at 4). Plaintiff also argues that the Ninth Circuit has expressly held that treble damages in this context are remedial. (*Id.*)

II. Discussion

Rule 25(a)(1) of the Federal Rules of Civil Procedure governs substitution when one party dies during litigation. A timely motion for substitution can be granted only with respect to a claim that is not extinguished by death, where the individual seeking to be substituted is the decedent's successor **[*8]** or representative:

> If a party dies and the claim is not extinguished, the court may order substitution of the proper party. A motion for substitution may be made by any party or by the decedent's successor or representative. If the motion is not made within 90 days after service of a statement noting the death, the action by or against the decedent must be dismissed.

Rule 25(a)(1) "does not resolve the question of what law of survival of actions should be applied in this case. It simply describes the manner in which parties are to be substituted in federal court once it is determined that the applicable substantive law allows the action to survive a party's death." *Robertson v. Wegmann, 436 U.S. 584, 587 n.3, 98 S. Ct. 1991, 56 L. Ed. 2d 554 (1978)* (internal citation omitted).

Section 4 of the Clayton Act (*15 U.S.C. § 15(a)*) provides (1) a private cause of action for suits brought pursuant to sections 1 and *2 of the Sherman Act (15 U.S.C. §§ 1*, *2*) and (2) the right to treble damages, costs of suit, and reasonable attorneys' fees. See also *15 U.S.C. §15* generally. "The purpose of the Sherman Antitrust Act and of the Clayton Act is to prevent economic concentration in the American economy by keeping a large number of small competitors in business." *United States v Von's Grocery Co., 384 U.S. 270, 86 S. Ct. 1478, 16 L. Ed. 2d 555 (1966)*. Treble damages granted by *15 USCS § 15* are for redress of private injury. *United States v. Cooper Corp., 312 U.S. 600, 61 S. Ct. 742, 85 L. Ed. 1071, 1941 Trade Cas. (CCH) ¶56111, 1941 U.S. LEXIS 1088 (1941)*(superseded by statute amendment to allow the United States to also bring **[*9]** suit). When a federal statute contains no explicit statement on survival rights, the general rule under federal common law is that rights of action under federal statutes survive death if the statute is remedial, not penal. *Ex parte Schreiber, 110 U.S. 76, 80, 3 S. Ct. 423, 28 L. Ed. 65 (1884)*; see also Wright & Miller, 7C Fed. Prac. & Proc. Civ. § 1954 (3d ed.) ("It is still the rule that penal actions do not survive but courts generally have held that treble-damage provisions are remedial and that actions of that kind survive").

The Ninth Circuit has held that, "[a]n action to recover damages resulting from a violation of the Sherman Anti-Trust Act is not an action to recover a penalty." *Hicks v. Bekins Moving & Storage Co., 87 F.2d 583, 585 (9th Cir. 1937)*, citing to *Chattanooga Foundry & Pipe Works v. Atlanta, 203 U.S. 390, 397, 27 S.Ct. 65, 51 L.Ed. 241*. "Such a cause of action [Sherman Anti-Trust] does survive the death of the injured party and is assignable." *Hicks., 87 F.2d at 585*, citing to multiple sister circuit courts e.g., see *Moore v. Backus, 78 F.2d 571, 573 (7th Cir. 1935)*; *Fazakerly v. E. Kahn's Sons Co., 75 F.2d 110, 114 (5th Cir. 1935)*; *United Copper Sec. Co. v. Amalgamated Copper Co., 232 F. 574, 577 (2d Cir. 1916)*. Statutory treble damages for antitrust violations are "designed primarily as a remedy," *John Lenore & Co. v. Olympia Brewing Co., 550 F.2d 495, 498 (9th Cir. 1977)*; see also *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701, 1977-1 Trade Cas. (CCH) ¶61255, 1977 U.S. LEXIS 37 (1977)* ("[A]lthough treble damages [provided by *15 USCS § 15*] also play important role in penalizing wrongdoers and in deterring wrongdoing, [treble damages are] designed primarily as remedy.")

"It has been repeatedly held that an action for damages under the Sherman Trust is not an action for a penalty. Under **[*10]** that Act the plaintiff, if successful, is expressly entitled to treble damages" *Armstrong v. Allen B. Du Mont Labs., 137 F. Supp. 659, 664 (D. Del. 1955)*, citing to *Hicks., 87 F.2d at 585*; *Chattanooga Foundry & Pipe Works, 203 U.S. at 397*; and *Brady v. Daly, 175 U.S. 148, 156, 20 S.Ct. 62, 44 L.Ed. 109*. *Contrast:* Treble damages may be considered punitive, however, in the context of a *Rule 23(b)(3)* determination, but putative class members are not barred from seeking treble damages individually. See *Kline v. Coldwell, Banker & Co., 508 F.2d 226, 235 (9th Cir. 1974)*. Regarding the Nevada Unfair Trade Practice Act ("NUTPA" at NRS 598A), Nevada's Claim Survival Statute states that "no cause of action is lost by reason of the death of any person," and all available damages are recoverable against the executor except for those "imposed primarily for the sake of example or to punish the defendant." *NRS 41.100(1)-(2)*. The remedies afforded under NRS Chapter 598A are treble damages, attorney fees, and costs. *NRS 598A.210*.

Hicks and its progeny direct that the Sun's federal claims against deceased defendant Sheldon Adelson survive his death. The defendants' reliance on the *Kline* court's rationale that treble damages are potentially punitive under a *Rule 23(b)(3)* determination is misplaced because the *Kline* court refused to certify the class on the basis that treble damages were punitive in that situation[1] . This is not a class action. The *Kline* court made no reference to *Hicks,*

---

[1] In *Kline* the Ninth Circuit considered whether the superiority requirement of *Rule 23(b)(3)* precluded class certification of an antitrust class whose members had engaged in 400,000 to 800,000 transactions, generating excess commissions and treble damages in the amount of $1,875 per transaction, or an aggregate of at least $750,000,000 in damages. *Kline 508 F. 2d at 234* & n. 5. The court noted that although these damages were contemplated by the statute, the "amounts [were] staggering" in the class certification context. *Id.* The court also noted that comparable cases, where putative class members sought "outrageous amounts in statutory penalty cases," were similarly denied class action status. *Id. at 234*.

Hicks's progeny, or *Rule 25*. *Hicks* is good law and controls here. While the *Hicks* court did not discuss a distinction **[*11]** between a deceased plaintiff and a deceased defendant, given the remedial nature of treble damages, attorneys' fees, and costs, the *Hicks* court's rationale applies equally[2] regardless of whether the deceased litigant is the plaintiff or the defendant.

The Sun's claims for treble damages, attorneys' fees, and costs are available for both its Sherman Act and NUTPA claims. The purpose of the Sherman Act is not to punish—but to *prevent*—economic concentration in the American economy by keeping small competitors in business." See *Von's Grocery Co., 384 U.S. 270*. These claims survive the death of defendant Adelson because the treble damages, attorneys' fees, and costs provisions of both laws are primarily remedial in nature and may be enforced against the deceased defendant's estate. Under controlling Supreme Court and Ninth Circuit precedent, this is enough to conclude that the Sun's claims for treble damages, attorneys' fees, and costs against Adelson's estate should proceed. Dr. Adelson should properly be substituted in Sheldon Adelson's place and the plaintiff can proceed against Sheldon Adelson's estate. I recommend that the plaintiff's *Rule 25* motion be granted because none of the claims against Sheldon Adelson have **[*12]** been extinguished.

Accordingly,

IT IS RECOMMENDED that plaintiff's motion to substitute party (ECF No. 380) should be GRANTED.

DATED this 5th day of May 2021.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN1[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

Section 1 of the Sherman Act prohibits every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States. Put plainly, it bars (1) concerted conduct which (2) unreasonably restrains trade. An unreasonable restraint comes either as a per se violation (when surrounding circumstances make the likelihood of anticompetitive conduct so great as to render unjustified further examination) or a violation of the rule of reason, meaning the restraint's harm to competition outweighs its procompetitive effects in light of the peculiarities of the business, the nature and history of the restraint, and its reason for being. In pharmaceutical reverse-payment cases, courts apply the rule of reason.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > US Department of Justice Actions > Criminal Actions > Intent

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

HN2[] **Actual Monopolization, Claims**

Section 2 of the Sherman Act condemns every person who shall monopolize, or attempt to monopolize any part of the trade or commerce among the several States. Unlike Sherman Act § 1's prohibition of concerted restraints, § 2 prohibits unilateral (as well a multilateral) conduct, but only that which threatens to or actually monopolizes. Such violation involves the (1) possession of power in the relevant market following (2) its willful acquisition or maintenance and (3) an injury resulting from abuse or leverage of that market power. This causal-harm element emphasizes the distinction between, on the one hand, the unlawful acquisition of market power and, on the other, its development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN3[] **Actual Monopolization, Claims**

A court's threshold inquiry in a Sherman Act case asks whether defendants wielded power over the relevant market, the area of effective competition. Sherman Act § 2 carries this demand on its face; a monopolist unifies the market for a given good and wields the resulting anticompetitive power. Though less obvious a requirement of Sherman Act § 1, courts usually cannot properly apply the rule of reason without an accurate definition of the relevant market, as the analysis requires the location of defendants within the market structure to gauge the results of their anticompetitive conduct.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Evidence > Weight & Sufficiency

HN4[] **Jury Trials, Province of Court & Jury**

Ultimately, the balancing of this evidence must be left to our trier of fact.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN5[] Per Se Rule & Rule of Reason, Sherman Act

The ultimate issue in a rule of reason Sherman Act case is whether a challenged practice will produce adverse effects on price or output.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

HN6[] Per Se Rule & Rule of Reason, Per Se Violations

By the patent laws, Congress has expressly sanctioned certain conduct that would otherwise constitute even a per se violation of Sherman Act § 1. A patent grants its owner the right to exclude others from practicing the claimed invention. Now, a patent owner may let the world make, use, or sell the invention. It may, in exchange for royalty payments, license to as many producers as necessary to create a competitive market. But the patent owner may also monopolize or restrain the market for the invention. It may license only a few producers. Or just one. Indeed, a patent owner may exclude all others from practicing the invention, and may even refrain from practice itself, thereby suppressing the invention from the market entirely. Certain contexts require courts, even those presented with otherwise per se violations, to step back to the rule of reason.

Evidence > Burdens of Proof > Allocation

Patent Law > Infringement Actions > Burdens of Proof

Evidence > Inferences & Presumptions > Presumptions

HN7[] Burdens of Proof, Allocation

Courts presume a patent's validity. But courts also presume noninfringement. The patent owner always bears that burden. In other words, courts presume a producer's right to market a good unless and until shown otherwise.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Patent Law > Infringement Actions > Summary Judgment > Claim Evaluation

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN8[] Per Se Rule Tests, Manifestly Anticompetitive Effects

Patent fundamentals fit within the Sherman Act rule of reason's burden-shifting framework. After plaintiffs establish an antitrust violation, the burden falls to the defendants to offer a procompetitive rationale, which, if non-pretextual, plaintiffs must rebut. It follows, then, that to traverse a motion for summary judgment raising defendants' patents as the procompetitive justification, plaintiffs must show some evidence of noninfringement or invalidity. But noninfringement remains the baseline. Some anticompetitive conduct will fall within the scope of the patent; some will not. Whether a particular restraint lies beyond the limits of the patent monopoly is a conclusion that flows from the antitrust analysis and not its starting point.

Civil Procedure > ... > Discovery > Methods of Discovery > Expert Witness Discovery

Evidence > ... > Lay Witnesses > Opinion Testimony > Personal Perceptions

HN9[] Methods of Discovery, Expert Witness Discovery

Fed. R. Civ. P. 26(a)(2)(C) permits certain non-retained experts to testify as percipient witnesses. This usually arises in the context of a treating physician who may testify to opinions formed during the course of medical treatment, in contrast to a medical expert retained to review and opine on medical records provided by counsel and who must provide a written report.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Inferences & Presumptions > Inferences

HN10[] Sherman Act, Claims

It is generally sufficient to show with reasonable probability some causal connection between an antitrust violation and the claimed injury. A jury may conclude as a matter of just and reasonable inference from the proof of defendants' wrongful acts and their tendency to injure plaintiffs' business, and from the evidence of the effects, not shown to be attributable to other causes, that defendants' wrongful acts had caused damage to the plaintiffs. In other words, plaintiffs need not rule out all possible alternative sources of injury, but satisfy the inquiry by showing the illegality to be a material cause of the injury.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade

Antitrust & Trade Law > Sherman Act

HN11[] Regulated Practices, Price Fixing & Restraints of Trade

Overcharging is a valid antitrust injuty. Price cutting is a practice the antitrust laws aim to promote.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN12[] Conspiracy to Monopolize, Elements

Premising antitrust causation (and thus liability) on the notion that defendants must have contemplated a lawful course of action before abandoning it for the unlawful is both wrong on the law — the most elementary conceptions of justice and public policy require that the wrongdoer shall bear the risk of the uncertainty which his own wrong has created — and in reasoning — the actors have no reason to contemplate action they might have taken in the but-for world which never came to pass.

Antitrust & Trade Law > Sherman Act > Defenses

Governments > Legislation > Statute of Limitations > Time Limitations

HN13[] **Sherman Act, Defenses**

Antitrust laws impose a four-year statute of limitations. 15 U.S.C.S. § 15b.

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > Tolling

HN14[] **Statute of Limitations, Time Limitations**

A limitations period will be tolled where defendants affirmatively concealed their unlawful conduct and plaintiffs, acting reasonably, had neither actual nor constructive knowledge.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > Judgments > Summary Judgment > Entitlement as Matter of Law

HN15[] **Entitlement as Matter of Law, Appropriateness**

The determination of whether a plaintiff knew or should have known of a cause of action presents a question for the trier of fact, though diligence is tested by an objective standard. Summary judgment will be appropriate only if uncontroverted evidence irrefutably demonstrates that a plaintiff discovered or should have discovered the cause of action but failed to file a timely complaint.

Evidence > ... > Testimony > Examination > Direct Examinations

Governments > Courts

HN16[] **Examination, Direct Examinations**

The duty of candor is not simply an obligation to answer honestly when asked a direct question by the trial court. It includes an affirmative duty to inform the court when a material statement of fact or law has become false or misleading in light of subsequent events.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

HN17[] **Civil Conspiracy, Elements**

Actions in furtherance of a conspiracy are imputed to all involved until its purpose has been achieved or abandoned. Withdrawal from a conspiracy requires disavowal of the unlawful goal, an affirmative act to defeat its purpose, or definite, decisive, and positive steps to show a sufficient disassociation.

Governments > Legislation > Statute of Limitations > Time Limitations

HN18[] **Statute of Limitations, Time Limitations**

A continuing violation accrues with each overt act, which is both new and independent, not a mere reaffirmation of previous conduct, and which inflicts new and accumulating injury.

Torts > ... > Multiple Defendants > Concerted Action > Civil Conspiracy

HN19[] **Concerted Action, Civil Conspiracy**

A defendant cannot be held liable for substantive offenses committed before joining or after withdrawing from a conspiracy.

Counsel: **[*1]** For Meijer, Inc., Plaintiff (3:19-cv-05822-WHA): Adam P Merrill, Daniel Abraham Shmikler, Sperling Slater, P.C., Chicago, IL; Alberto Rodriguez, David Paul Germaine, Eamon Padraic Kelly, John Paul Bjork, Joseph M Vanek, Sperling & Slater P.C., Chicago, IL; Barry Steven Taus, PRO HAC VICE, Taus, Cebulash & Landau, LLP, New York, NY; Brett H Cebulash, PRO HAC VICE, Taus, Cebulash and Landau, New York, NY; David S. Kim, Todd Michael Schneider, Schneider Wallace Cottrell Konecky LLP, Emeryville, CA; Matthew Sinclair Weiler, Schneider Wallace Cottrell Konecky et al, Emeryville, CA; Peter St. Phillip, Uriel Rabinovitz, Lowey Dannenberg, P.C., White Plains, NY.

Judges: WILLIAM ALSUP, UNITED STATES DISTRICT JUDGE.

Opinion by: WILLIAM ALSUP

Opinion

ORDER RE SUMMARY JUDGMENT

INTRODUCTION

In a secret pharmaceutical-patent infringement settlement agreement, concealed from the district judge, brand and generic manufacturers of the type 2 diabetes **[*11]** drug Glumetza allegedly pledged not to compete with each other by agreeing to not introduce a generic version of the drug for several years. So, while generic competition should have driven drug prices *down*, the brand manufacturer instead hiked prices *up*. The generic manufacturer belatedly entered the market at premium pricing, and, as a result, the conspiring manufacturers allegedly extracted huge sums of money from consumers. In this resulting antitrust action, a certified class of direct purchasers move for partial summary judgment that our defendant brand and generic manufacturers wielded market power. For their part, defendants move for summary judgment, attacking the underlying antitrust violation and causal injury. All motions are **DENIED**.

STATEMENT

An estimated thirty million Americans suffer from type 2 diabetes. The condition, "caused by the combination of insulin resistance . . . and deficient insulin secretion," causes an alarming array of complications. Those with diabetes face nearly twice the average risk of stroke and heart disease. They may suffer foot ulcers that take months or years to heal, or may require amputation. Around forty percent suffer some degree of kidney **[*12]** disease, with one percent suffering kidney failure. In fact, "[p]ersons with diabetes make up the fastest growing group of kidney dialysis and transplant recipients in the United States." "Diabetes is the leading cause of new cases of blindness among adults aged 18-64 years." And, in 2017, diabetes was estimated to be the seventh leading cause of death in the United States. CTRS. DISEASE CTRL. & PREV., NAT'L DIABETES STATS. RPT. 12 (2020), https://www.cdc.gov/ diabetes/pdfs/data/statistics/national-diabetes-statistics-report.pdf; NAT'L INST. OF DIABETES & DIGESTIVE & KIDNEY DISEASES, DIABETES IN AMERICA, ch. 1, pp. 2-3, ch. 22, p. 1, fact sheet (3d ed. 2018), https://www.niddk.nih.gov/about-niddk/strategic-plans-reports/diabetes-in-america-3rd-edition.

Fortunately, modern medicine offers a battery of remedial medications. One such drug, metformin hydrochloride, helps control blood-sugar levels. Following approval by the Food and Drug Administration in June 2005, defendant Depomed, Inc. launched a new extended-release version of metformin in late 2006. Glumetza, introduced first in 500 mg and later in 1000 mg tablets, extended the release of metformin over a prolonged period by disbursing **[*13]** the active drug into a polymeric matrix. In the stomach, the metformin would more slowly diffuse out of the matrix and ensure its smooth delivery into the bloodstream over time, without the usual initial spike and later lull in drug level, to offer consistent blood-sugar control.

Depomed obtained several patents covering the developments embodied in Glumetza, United States Patent Nos. 6,340,475 and 6,635,280, which expired in September 2016, No. 6,488,962, which expired in June 2020, and No. 6,723,340, which will expire in October 2021. Depomed listed these patents as covering Glumetza in the FDA's "Orange Book." U.S. DEP'T HEATH & HUM. SERVS., FDA, APPROVED DRUG PRODUCTS WITH THERAPEUTIC EQUIVALENCE EVALUATIONS (41st ed. 2021), https://www.fda.gov/media/71474/download.

In 2009, defendants Lupin Pharmaceuticals, Inc. and Lupin Limited filed an Abbreviated New Drug Application with the FDA, seeking to manufacture and market generic versions of both 500 mg and 1000 mg Glumetza. Lupin certified to the FDA that Depomed's patents were either invalid or not infringed, yet Depomed sued anyway in November 2009, asserting several claims from the '475, '280, and '962 patents (it also asserted but later dropped the '340 patent). The case came before the Honorable Phyllis **[*14]** J. Hamilton of our district. Following a year of litigation, Judge Hamilton held a *Markman* hearing in January 2011 and issued a claim construction order in May. The parties fought for the rest of that year, but, before filing dispositive motions, settled in February 2012. As far as the parties told the judge, they would simply go their separate ways and Lupin would launch its generic on February 1, 2016. *Depomed, Inc. v. Lupin Pharms., Inc.*, No. C 09-05587 PJH, Dkt. No. 152 (N.D. Cal. Mar. 27, 2012). This, our plaintiffs now allege, concealed an underlying unlawful conspiracy.

* * *

Congress enacted the Drug Price Competition and Patent Term Restoration Act of 1984, more commonly known as the *Hatch-Waxman Act*, to lower pharmaceutical drug prices by speeding generics to market. In general, a pharmaceutical drug must undergo a grueling — and costly — testing regimen to obtain FDA approval to market. To ease generic entry, however, the Act permits a generic drug manufacturer to file an Abbreviated New Drug Application (ANDA) to piggyback on the approval efforts of the underlying brand-name drug that uses the same active ingredient and to which the proposed generic is biologically equivalent. **[*15]** The Act then implements a network of interlocking incentives to encourage faster introduction of these low-cost generics into the pharmaceutical market, yet still drive new drug development. *See* *FTC v. Actavis, 570 U.S. 136, 142, 133 S. Ct. 2223, 186 L. Ed. 2d 343 (2013)*; *21 U.S.C. §§ 355(j)(2)(A)(ii)*, *(iv)*.

The ANDA relieves generic drug manufacturers of a significant burden by, in practical effect, placing it on brand manufacturers. So, to ensure generics cannot immediately hop aboard and profit from a brand manufacturers' costly investment, the ANDA scheme relies on, among others, patents to temporarily exclude generic manufacturers from use of the novel drug ingredient itself or its new formulation, delivery mechanism, or form of treatment. H. Hovenkamp, *Anticompetitive Patent Settlements & the Supreme Court's Actavis Decision*, 15 MINN. J.L. SCI. & TECH.S 3, 10-11 (2014). Recognizing that the long FDA approval process would otherwise eat into a substantial portion of a patent's twenty-year term, the Act provides for up to a five-year extension of a drug patent's term. *New York ex rel. Schneiderman v. Actavis PLC, 787 F.3d 638, 644 (2d Cir. 2015)*. The Act adds a further layer to drug-patent protection, requiring an ANDA application to certify that the relevant patents have either expired or will expire before the generic reaches the market, or that the patents are **[*16]** either invalid or not infringed. *Actavis, 570 U.S. at 143*; *21 U.S.C. § 355(j)(2)(A)(vii)(I)-(IV)*.

Balancing this patent protection with its overall goal of expediting generic entry, the Act encourages generic manufacturers to challenge weak validity or infringement cases. *See* *King Drug Co. v. SmithKline Beecham Corp., 791 F.3d 388, 394 (3d Cir. 2015)*. The first generic to file an ANDA including a certification of invalidity or noninfringement (the "Paragraph IV" approach) wins 180 days of generic exclusivity, meaning that once it gains FDA approval and enters the market, the FDA can't approve any other generics during that time. This, however, doesn't stop the brand from launching its own "authorized generic" to win some market share back from the first filer, and the first filer can lose the exclusivity if fails to market promptly after a later generic filer gains FDA approval. But the exclusivity period can be "worth several hundred million dollars" to the first-filer generic and outweigh the risk of infringement suit. *Actavis, 570 U.S. at 143-44*; *In re Wellbutrin XL Antitrust Litig., 868 F.3d 132,* 144 fn. 7 (3d Cir. 2017); *See* Teva Pharm. v. Crawford, 410 F.3d 51, 55, 366 U.S. App. D.C. 203 (D.C. Cir. 2005); 21 U.S.C. § 355(j)(5)(B)(iv), (D).

To ease timely judicial resolution of ANDA patent challenges, a Paragraph IV certification operates as a technical act of patent infringement. And, to encourage prompt commencement, the Hatch-Waxman Act imposes a thirty-month stay against FDA approval of the ANDA if the patent owner sues **[*17]** within forty five days' notice of the certification. If a court resolves the infringement suit during that time, the FDA follows that result. If not, the FDA will then be free to approve the ANDA at the expiration of the statutory stay. Actavis, 570 U.S. at 143; 21 U.S.C. § 355(j)(5)(B)(iii); 35 U.S.C. § 271(e)(2)(A).

With FDA approval, a generic drug may enter the market. Though, if the infringement suit remains ongoing, the launch is commonly referred to as "at risk," given the brand manufacturer might still win a judgment of infringement, damages (perhaps enhanced for willfulness), and, where appropriate, an injunction. Wellbutrin, 868 F.3d at 168 fn. 59; 35 U.S.C. §§ 283-84. But once a generic drug makes it to market, the FDA's Orange Book broadcasts its availability to the public as an alternative to the underlying brand drug. All fifty states and the District of Columbia have some form of mandatory or permissive drug substitution law to help shift consumers from expensive brand drugs to their cheaper generics, without another visit to the doctor. *See* Schneiderman, 787 F.3d at 644-45.

This scheme is *supposed* to expedite our access to cheaper generics. But the pharmaceutical industry found a way around it. In some infringement cases, the brand manufacturer (the *patent owner*) pays the generic (the *accused infringer*) to settle. This may seem **[*18]** topsy-turvy but the patent owner actually comes out ahead. In exchange, the first-filer generic manufacturer agrees to stay off the market for a few years. So, instead of expedited generic entry, the brand maintains its monopoly and cuts the supposed-generic a share of the profits.

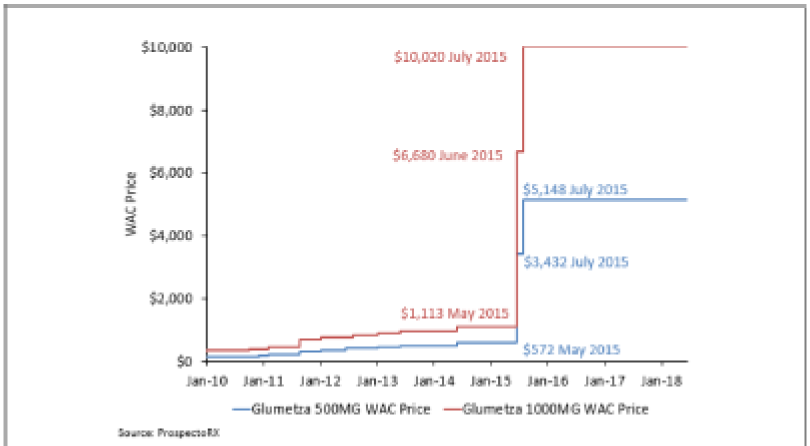
In 2013, the United States Supreme Court found that these "pay for delay" schemes can violate federal ***antitrust law***. True, a patent gives a brand drug the power to exclude competition within the bounds of the claims for its twenty-year term. But by paying the *accused infringer* to stay out of the market, the brand in essence concedes the weakness of the patent's validity or infringement case against the ANDA. Thus, the settlement suppresses generic competition and does so outside the bounds of the brand manufacturer's patent protection. *See* Actavis, 570 U.S. at 147-49, 153-58.

Our plaintiffs allege just a scheme here. The stipulated dismissal in 2012, which the parties submitted to Judge Hamilton, and which they characterized as permitting Lupin's *early* generic market entry, in fact *concealed from the judge* an extensive side agreement which preserved the brand monopoly and kept Lupin's generic Glumetza off the shelves for years.

Per the secret **[*19]** *quid pro quo*, dated February 22, 2012, Lupin agreed to walk away, leave the patents alone, and *delay* market entry of its generic Glumetza for four years, until February 1, 2016. Instead of a simple cash payment to stay away, Depomed gave Lupin something else of value — a guarantee that Depomed would not launch an authorized-generic to compete with Lupin for one year, atop the FDA-granted 180 days of market exclusivity from other generic competition. The settlement also included two clauses to protect Lupin from *other* generic competition, providing, first, that if any other manufacturer succeeded in marketing a generic Glumetza before February 2016, Lupin could market immediately, and, second, that Depomed would not license any other generic Glumetza manufacturers until at least 180 days following Lupin's market entry. These provisions undercut the incentive for any other generic manufacturer to enter the market before Lupin. But, as noted above, only the *first* of these terms, Lupin's February 2016 market entry, made it into the parties' stipulated dismissal. Crucially, as alleged, defendants did not disclose the no-authorized generic (no-AG) provision until a February 5, 2016, quarterly **[*20]** earnings call with Lupin executives.

This artificially-prolonged monopoly and synthesized duopoly proved a windfall to our defendants. Depomed had already sold its marketing rights in Glumetza to defendant Santarus, Inc., but then sold its royalty rights, estimated between $140 million and $180 million, to PDL Biopharma in October 2013 (Dkt. No. 464-1). The juiced Glumetza portfolio aided Santarus' sale to defendant Salix Pharmaceuticals for $2.6 billion in November 2013, and Salix's sale to defendant Valeant Pharmaceuticals for $14.5 billion in April 2015.

Then, in the summer of 2015, Valeant hiked the price of Glumetza on the order of 800%. *The wholesale acquisition cost of a 500 mg pill spiked from $5.72 in May to $51.48 by the end of July. In the same time, the cost of a 1000 mg pill spiked from $12.37 to $113.36*. Glumetza accounted for a three hundred fifty million dollar swell in Valeant's profits in the second half of 2015. When Lupin joined the market in February, the supposed affordable generic did so at around $45 for each 500 mg tablet. All in all, Lupin reaped to the tune of six hundred million dollars from Glumetza over the next few years.



Note: WACs are per 100-count bottle of 500 mg tablets and 90-count bottle of 1000 mg tablets.

Only adding to their spoils, defendants' **[*21]** scheme apparently dissuaded other generic manufacturers from marketing their own generic versions of Glumetza until after Lupin did. Sun Pharmaceuticals filed its ANDA in March 2011. But Depomed and marketing-partner Santarus promptly sued, and a January 2013 settlement kept Sun's generic off the market until August 2016. Watson Pharmaceuticals then filed its ANDA in March 2012. Another prompt lawsuit resulted in a November 2013 settlement keeping Watson's generic also off the market until August 2016. In the end, Watson (by then Teva Pharmaceutical Industries Ltd.) did not market its generic Glumetza until May 2017, and Sun not until July 2018.

Glumetza prices have to some extent slowly recovered, but not to pre-hike estimates. The most immediate fallout for our defendants? Bad press. So, in 2018, Depomed changed its name to Assertio Therapeutics, Inc., and Valeant changed its name to Bausch Health Companies Inc.

Plaintiffs started suing in August 2019. Ultimately, twelve cases by both direct and indirect purchasers arrived before the undersigned. An order dated March 5, 2020, largely denied defendants' motions to dismiss the direct purchasers but granted the motions in part against **[*22]** the indirect purchasers, who all subsequently dismissed. *In re Glumetza Antitrust Litig., No. C 19-05822 WHA, 2020 U.S. Dist. LEXIS 39649, 2020 WL 1066934 (N.D. Cal. Mar. 5, 2020)*. The remaining direct purchasers, several who sued as assignees of absent direct purchasers, have proceeded in two groups: (1) the direct-purchaser class, and (2) the retailer plaintiffs. An August 15 order certified the *Rule 23(b)(3)* direct-purchaser class comprising:

> All persons or entities in the United States and its territories who directly purchased Glumetza or generic Glumetza from a defendant from May 6, 2012 until the date of [the] order.

In re Glumetza Antitrust Litig., 336 F.R.D. 468 (N.D. Cal. 2020). Days prior, plaintiff Humana Inc. attempted to resurrect the slew of indirect-purchaser claims. Orders dated December 5 and February 2, 2021, rejected that ploy.

Over the past three months, our parties have filed ten *Daubert* motions and four motions for summary judgment. This order resolves the motions for summary judgment, reserves the *Daubert* motions for later, and follows full briefing and oral argument held via videoconference due to COVID-19.

ANALYSIS

HN1[] *Section 1* of the Sherman Act prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." Put plainly, it bars (1) concerted **[*23]** conduct which (2) unreasonably restrains trade. *F.T.C. v. Qualcomm Inc., 969 F.3d 974, 989 (9th Cir. 2020)*. An unreasonable restraint comes either as a *per se* violation ("when surrounding circumstances make the likelihood of anticompetitive conduct so great as to render unjustified further examination") or a violation of the rule of reason, meaning the "restraint's harm to competition outweighs its procompetitive effects" in light of the peculiarities of the business, the nature and history of the restraint, and its reason for being. *NCAA v. Bd. of Regents of Univ. Okla., 468 U.S. 85, 103-04, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*; *Tanaka v. Univ. of S. Cal., 252 F.3d 1059, 1063 (9th Cir. 2001)*; *United States v. Topco Assocs., 405 U.S. 596, 607, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*. In pharmaceutical reverse-payment cases, such as ours, we apply the rule of reason. *Actavis, 570 U.S. at 158-59*.

HN2[] *Section 2* condemns "[e]very person who shall monopolize, or attempt to monopolize . . . any part of the trade or commerce among the several States." Unlike *Section 1*'s prohibition of *concerted* restraints, *Section 2* prohibits *unilateral* (as well a multilateral) conduct, but only that which threatens to or actually monopolizes. *Alaska Airlines v. United Airlines, 948 F.2d 536, 541 (9th Cir. 1991)*. Such violation involves the (1) possession of power in the relevant market following (2) its willful acquisition or maintenance and (3) an injury resulting from abuse or leverage of that market power. This causal-harm element emphasizes the distinction between, on the one hand, the unlawful acquisition of market power and, **[*24]** on the other, its "development as a consequence of a superior product, business acumen, or historic accident." *Qualcomm, 969 F.3d at 990* (quoting *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966))*.

HN3[] Our threshold inquiry asks whether defendants wielded power over the relevant market, "the area of effective competition." *Section 2* carries this demand on its face; a monopolist unifies the market for a given good and wields the resulting anticompetitive power. Though less obvious a requirement of *Section 1*, "courts usually cannot properly apply the rule of reason without an accurate definition of the relevant market," as the analysis requires our location of defendants within the market structure to gauge the results of their anticompetitive conduct. *Ohio v. Am. Express Co., 585 U.S. ___, 138 S. Ct. 2274, 2285, 201 L. Ed. 2d 678 (2018)*; *Qualcomm, 969 F.3d at 989-92*; *Rebel Oil Co. v. ARCO, 51 F.3d 1421, 1434 (9th Cir. 1995)*.

Plaintiffs establish the antitrust violation itself via a tripart burden shift, beginning with a *prima facie* concerted restraint under *Section 1* or willful or attempted monopoly under *Section 2*. The defendant must then offer a nonpretextual procompetitive rationale for the restraint or the monopolization, which plaintiffs must either rebut or show, under *Section 1*, that a less anticompetitive means would achieve the same ends, or under *Section 2*, that the anticompetitive harm outweighs the procompetitive benefit. *See* *Qualcomm, 969 F.3d at 991*; *Image Tech. Serv. v. Eastman Kodak Co., 903 F.2d 612, 618-19 (9th Cir. 1990)*, *aff'd*, *504 U.S. 451, 112 S. Ct. 2072, 119 L. Ed. 2d 265 (1992)*.

If plaintiffs establish the antitrust **[*25]** violation, they must then prove their causal antitrust injury, *i.e.*, an injury both of the kind the antitrust laws seek to prevent and which flows from the unlawfulness of defendants' conduct, and offer a fair estimate of their damages. *Brunswick Corp. v. Pueblo Bowl-O-Mat, 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; *Bigelow v. RKO Radio Pictures, 327 U.S. 251, 264-65, 66 S. Ct. 574, 90 L. Ed. 652 (1946)*; *Qualcomm, 969 F.3d at 989-92*; *In re New Motor Vehicles Canadian Export Antitrust Litig., 522 F.3d 6, 19 fn. 18 (1st Cir. 2008)*.

This order denies plaintiffs' motion for partial summary judgment. True, a reasonable trier of fact could find that defendants wielded market power during the relevant time period. Compelling evidence illuminates classic indicators of power in the market for brand and generic Glumetza. In 2015, Bausch profitably hiked prices and reduced consumption. Lupin profitably maintained those supracompetitive prices for several years before competition with the authorized generic, Teva, and Sun finally brought prices back down. But a reasonable trier could reject these considerations in light of defendants' evidence of the cross-elasticity of demand between Glumetza and the many, and more prevalent, variants of metformin hydrochloride available to consumers.

This order also denies defendants' motions for summary judgment. A reasonable trier of fact could conclude that defendants violated the rule of reason. The challenged settlement included cross-covenants **[*26]** not to compete, one from Lupin to pause its generic Glumetza entry for four years, and the other from Assertio and Santarus to forego an authorized generic for one year. These horizontal restraints on competition mirrored classic *per se* antitrust violations. Defendants, however, contend these restraints fell within the scope of their patent rights. But given evidence calling into question the strength of defendants' infringement case, a reasonable trier of fact could find defendants' covenants exceeded those bounds.

A reasonable trier of fact could further conclude that defendants' restraint of the market delayed generic entry, stifled competition, and caused plaintiffs to pay more for brand and generic Glumetza than they would have otherwise. In the absence of the unlawful scheme, Lupin might have marketed its generic earlier via either an at-risk launch, by prevailing in the underlying suit, or by negotiating an earlier market entry date in the absence of the no-AG agreement, and other generics might have followed quickly thereafter. This earlier generic competition would have prevented or mitigated defendants' price gouging. A reasonable trier of fact could also find plaintiffs' **[*27]** suit timely and reject both Assertio and Lupin's solo defenses. Material questions abound. *Anderson v. Liberty Lobby, 477 U.S. 242, 248-49, 255, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*.

1. DEFENDANTS' MARKET POWER.

A reasonable trier of fact could find that defendants' wielded power in the market for brand and generic Glumetza. It could also find otherwise. Up front, no one doubts that the market for brand Glumetza included both its authorized generic and those by Lupin, Sun, and Teva. Drug substitution laws nationwide permit or even require pharmacies to swap these cheaper generics in place of a brand drug. *Schneiderman, 787 F.3d at 644-45, 657*; ORANGE BOOK at vii—xvi, 3-284. If our relevant market stopped there, then defendants' market power would likely follow. Until the authorized generic joined in February 2017, our defendants retained 100% market share, the FDA approval regime posed a significant barrier to market entry, and others like Sun and Teva proved unable to ramp up production until mid-2017 and 2018. *Rebel Oil Co. v. ARCO, 51 F.3d 1421, 1434 (9th Cir. 1995)*.

Our parties, however, dispute whether the relevant market also encompassed *other* variants of metformin hydrochloride, such as Glucophage, Glucophage XR, and Fortamet (including their generics). This question of fact involves a broad inquiry into "the particular structure and circumstances" of the pharmaceutical **[*28]** context and into the cross-elasticity of demand between Glumetza and its proposed substitutes, including empirical study, to determine which, if any, would have been adequate and available enough to constrain prices. *Rebel, 51 F.3d at 1434-35*; *Verizon Comm'ns Inc. v. Law Offices of Curtis V. Trinko, LLP, 540 U.S. 398, 411, 124 S. Ct. 872, 157 L. Ed. 2d 823 (2004)*; *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*; *Times-Picayune Pub. Co. v. United States, 345 U.S. 594, 612 fn. 31, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*.

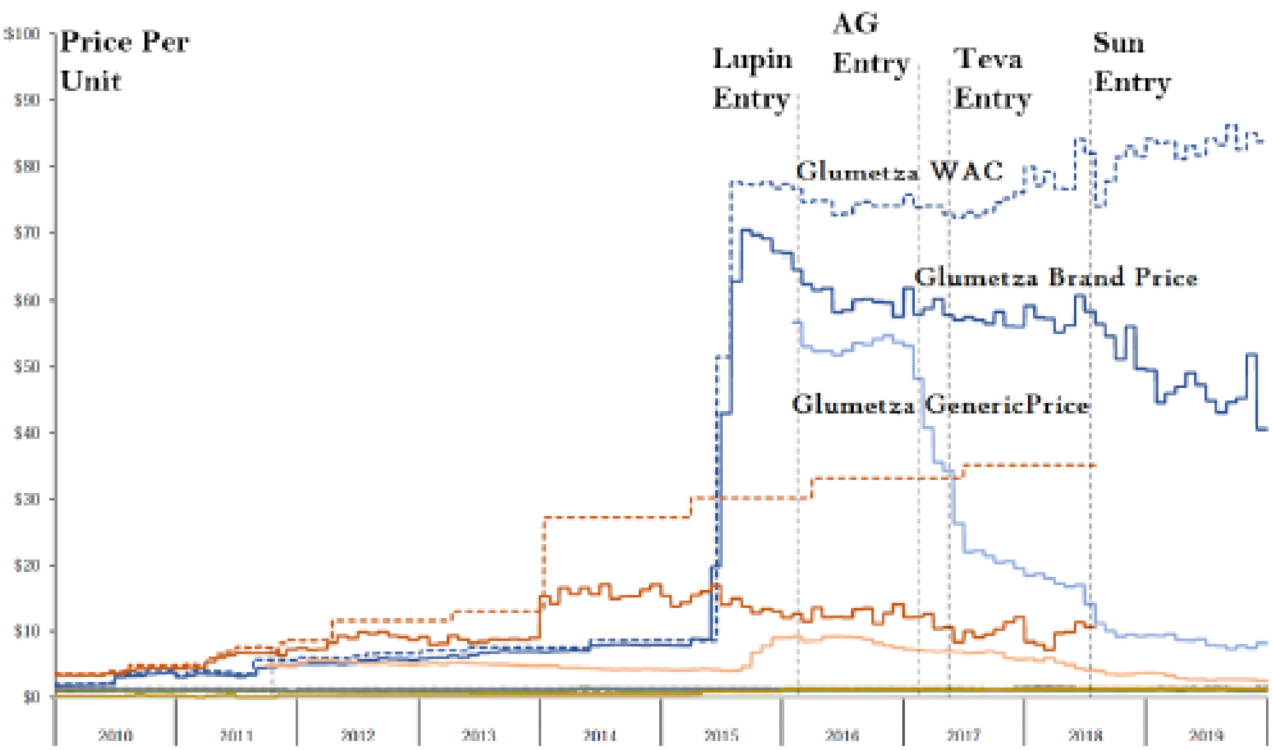
In the dysfunctional pharmaceutical market, the doctor who chooses the drug does not pay for it, and the consumer who pays does not choose. Insurance obfuscates the price the consumer sees. The prescription requirement, by corollary, limits alternatives. And, consumer "demand" for pharmaceutical drugs often manifests as degrees of desperation, because we consume these drugs to prevent illness, ease suffering, and even forestall death. *See Schneiderman, 787 F.3d at 645-47*; *Mylan Pharms. Inc. v. Warner Chilcott Pub. Ltd. Co., 838 F.3d 421, 429-30 (3d Cir. 2016)*; F.M. Scherer, *The Pharmaceutical Industry*, in I HANDBOOK OF HEALTH ECONOMICS 1300-01 (2000).

This all shifts bargaining power to the drug companies, but it only tells part of the story. Defendants' expert testimony indicates that physicians both account for price in prescribing and view Glumetza as therapeutically interchangeable with the numerous, and more prevalent, metformin variants (Glumetza has only ever accounted for about a two and a half percent share). Drug manufacturers then compete behind the scenes for preferred **[*29]** placement on health plan formularies which govern drug insurance coverage.

Both sides' experts also attack cross-elasticity empirically. Plaintiffs' expert submits studies indicating little to no cross-elasticity between Glumetza and other metformin variants. Defendants' expert presents the contrary. Plaintiffs' *Daubert* motion may narrow this battle of the experts, but the breadth of this inquiry ensures that sufficient, though perhaps lopsided, disputes will remain. ***HN4***[] Ultimately, the balancing of this evidence must be left to our trier of fact. *See Primiano v. Cook, 598 F.3d 558, 564-65 (9th Cir. 2010)*; *Provenz v. Miller, 102 F.3d 1478, 1490 (9th Cir. 1996)*.

Seeking to bypass this maze, plaintiffs offer direct evidence of defendants' market power. True enough, market power asks "whether an arrangement has the potential for genuine adverse effects on competition." Under either *Section 1* or *2*, "proof of actual detrimental effects . . . can obviate the need for an inquiry into market power." *F.T.C. v. Ind. Fed'n Dentists, 476 U.S. 447, 460-61, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986)*; *United States v. Microsoft, 253 F.3d 34, 51, 346 U.S. App. D.C. 330 (D.C. Cir. 2001)* (en banc).

Plaintiffs point to the "hallmarks of market power" — defendants' profitable maintenance of supracompetitive pricing and reduced output for several years. Bausch's 2015 price hike, which plaintiffs characterize as an 800% increase, though defendants would place the number around 275%, drove thousands of **[*30]** consumers from Glumetza to (we infer in defendants' favor) Glucophage and Fortamet, whose producers ably supplied the new demand. Meanwhile, Bausch reaped *three hundred fifty million* dollars more in profit over the latter half of 2015. Lupin joined the market at a similar premium in February 2016, quickly captured the brand consumer base, and maintained that profitable supracompetitive pricing for several years (Dkt. Nos. 493-79, 493-100). *Oltz v. St. Peter's Comm'ty Hosp., 861 F.2d 1440, 1448 (9th Cir. 1988)*; *NCAA, 468 U.S. at 85-86*; William M. Landes & Richard A. Posner, *Market Power in Antitrust Cases*, 94 HARV. L. REV. 937 (1981).



Prices & WAC of Extended-Release and Immediate-Release Metformin 2010–2019

Though the Supreme Court approved of direct proof of market power in *Indiana Federation*, there remains a broad gap between affirmance of a direct factual finding of market power versus plaintiffs' request here to take that question from the jury. Plaintiffs cite, and this order is aware of, no appellate decision stemming from *Indiana Federation* affirming the leap plaintiffs' seek. Additionally, *Indiana Federation* did, in fact, roughly define the market, emphasizing the locality of dentistry services and defendants' majority share in two specific cities. Defendants' evidence of the cross-elasticity of demand between Glumetza and other metformin variants, particularly given **[*31]**

Glumetza's small role in the broader metformin array, precludes our reliance on even a rough market definition here. *476 U.S. at 460-61*; *Oltz, 861 F.2d at 1448*.

A reasonable trier of fact could exclude other versions of metformin and include only Glumetza and its generics in our market. The reasonable trier could also find that defendants' have already wielded anticompetitive market power. ***HN5***[] But as our court of appeals has observed:

> The ultimate issue in a rule of reason case is whether a challenged practice will produce adverse effects on price or output. The only *direct* way to answer that question is to introduce evidence of actual price increases or reductions in output after the challenged practice. But even if a plaintiff is lucky enough to gather such evidence, he will face the momentous task of proving that the observed price or output effects were not attributable to any one of an infinite number of independent causes: exhaustion of raw materials, increases in labor costs, increases in the price of substitute goods, tax hikes, etc. Situations will arise where a plaintiff is able to meet this burden. But doubtless those occasions will be rare.

E.W. French & Sons, Inc. v. General Portland Inc., 885 F.2d 1392, 1404 (9th Cir. 1989) (Farris, J., concurring) (cleaned up). On this record, material questions of **[*32]** fact remain.

2. DEFENDANTS VIOLATED THE RULE OF REASON.

Armed with a finding that our relevant market encompassed Glumetza and its generics, and that defendants had power therein, a reasonable trier of fact could conclude that defendants' concealed settlement violated the rule of reason. In February 2012, faced with the prospect of Lupin's generic Glumetza entry as early as that May, our defendants conspired to allocate the market for brand and generic Glumetza between them for the foreseeable future. They first agreed to maintain Assertio and Santarus as the sole producer for four more years, delaying Lupin's generic entry until February 1, 2016. And, our brand defendants secured Lupin's assent to this delay with a covenant not to compete, the promise not to launch an authorized-generic version of Glumetza until February 1, 2017.

Following discovery, we've got the actual agreement. The terms of this exchange appear right there on its face. The delay:

> Effective upon the License Effective Date [February 1, 2016], Depomed hereby grants to Lupin, and Santarus hereby consents to and authorizes the grant to Lupin of, a fully paid up, royalty free, non-exclusive (except as otherwise provided **[*33]** herein) license with respect to the Depomed Patents.

And the payment:

> Depomed, Santarus and their Affiliates shall not, and shall not authorize any Third Party to, Market an Authorized Generic any earlier than twelve (12) months after the License Effective Date.

(Dkt. No. 493-12, §§ 3.1, 3.5). Or, in more classic antitrust terms, we have one covenant not to compete, providing four more years of Glumetza monopoly, in exchange for a second covenant not to compete, one year without marketing an authorized generic. In most cases, we could stop right here. Such naked horizontal restraints — an agreement to allocate a market, such as in time or space, between a select few competitors at the same level of the market — are a *per se* *Section 1* violation. *See* *Topco, 405 U.S. at 607-08*. The Court of Appeals for the Sixth Circuit held as much in one of the earliest appellate treatments of a pharmaceutical reverse-payment settlement. *See* *In re Cardizem CD Antitrust Litig., 332 F.3d 896, 907-08 (6th Cir. 2003)*, abrogated by *Actavis, 570 U.S. at 158-60*. Even defendants do not attempt to convince us that their agreement was not such a horizontal allocation.

But, as defendants take care to note, we have a twist. ***HN6***[] By the patent laws, Congress has expressly sanctioned certain conduct that would otherwise constitute even a *per se* violation. A patent **[*34]** grants its owner the right to exclude others from practicing the claimed invention. Now, a patent owner may let the world make, use, or sell the invention. It may, in exchange for royalty payments, license to as many producers as necessary to create a competitive market. But the patent owner may also monopolize or restrain the market for the invention. It may license only a few producers. Or just one. Indeed, a patent owner may exclude all others from practicing the invention, and may even refrain from practice itself, thereby suppressing the invention from the market entirely. 35 U.S.C. §§ 271, 283. As the Supreme Court recognized in *NCAA*, certain contexts require courts, even those presented with otherwise *per se* violations, to step back to the rule of reason. That is why here, even faced with a naked horizontal restraint, we must step back to evaluate the restraint in context to then determine whether, as defendants urge, it fell within the bounds of their patents. Actavis, 570 U.S. at 147-51, 158-59; NCAA, 468 U.S. at 100-01.

In arguing that the settlement agreement toed the line their patents drew, defendants would have us presume infringement and place the burden on plaintiffs to show otherwise. This argument runs afoul of patent fundamentals. True, we **[*35]** presume a patent's validity. *See* Microsoft Corp. v. i4i Ltd. Partnership, 564 U.S. 91, 100, 131 S. Ct. 2238, 180 L. Ed. 2d 131 (2011). But we also presume noninfringement. **HN7**[] The patent owner *always* bears that burden. In other words, we *presume* a producer's right to market a good unless and until shown otherwise. Medtronic v. Mirowski Family Ventures, 571 U.S. 191, 198-99, 203, 134 S. Ct. 843, 187 L. Ed. 2d 703 (2014).

The ANDA framework doesn't change this baseline; it illustrates it. The Paragraph IV certification just permits suit. It tells us nothing about whether the proposed generic, in fact, infringes the listed patent. Eli Lilly & Co. v. Medtronic, Inc., 496 U.S. 661, 678, 110 S. Ct. 2683, 110 L. Ed. 2d 605 (1990); Glaxo, Inc. v. Novopharm, Ltd., 110 F.3d 1562, 1569 (Fed. Cir. 1997). The FDA is free to approve a Paragraph IV ANDA one hundred eighty days after filing, and the generic manufacturer will be free to market the drug unless the brand manufacturer sues within the forty five days and triggers the thirty-month stay. But, if the stay expires without a judgment of infringement, the FDA again becomes free to approve the ANDA, and the generic manufacturer would be free to market. *See* Actavis, 570 U.S. at 143; 21 U.S.C. § 355(j)(5). At that point, it would take a preliminary injunction in the shorter term or a judgment of infringement (or the parties' joint assessment of infringement) in the longer term to take the generic off the market. In other words, the brand patents alone bar nothing. The stay does at first. But after that, a judgment of (or settlement admitting **[*36]** to) infringement must do it.

HN8[] These fundamentals fit within the rule of reason's burden-shifting framework. After plaintiffs establish an antitrust violation, the burden falls to the defendants to offer a procompetitive rationale, which, if non-pretextual, plaintiffs must rebut. It follows, then, that to traverse a motion for summary judgment raising defendants' patents as the procompetitive justification, plaintiffs, as several courts have held, must show "some evidence" of noninfringement or invalidity. *See* Wellbutrin, 868 F.3d at 165; Nexium, 842 F.3d at 63; *see also* Teikoku Pharma, 296 F. Supp. 3d at 1152-55. *But noninfringement remains our baseline*. Some anticompetitive conduct will fall within the scope of the patent; some will not. This is why the Supreme Court explained in *Actavis* that "[w]hether a particular restraint lies beyond the limits of the patent monopoly is a *conclusion* that flows from [the antitrust] analysis and not, as [both our defendants and] the Chief Justice suggest[ed], its starting point." *See* 570 U.S. at 149 (quotes omitted); Medtronic, 571 U.S. at 198-99; Qualcomm, 969 F.3d at 991.

As already stated, plaintiffs have carried their initial burden. Defendants' pay-for-delay settlement agreement contained two cross-covenants not to compete within the market for Glumetza. These horizontal restraints place the burden upon **[*37]** defendants to show they go no further than their patents authorized. Our parties appear to agree that direct evidence of the parties' mental states will suffice, given that neither offers a limitation-by-limitation analysis of Lupin's ANDA in their briefs. This, of course, follows from the Supreme Court's recognition that "it is normally not necessary to litigate patent validity" — and infringement, by context — "to answer the antitrust question." Actavis, 570 U.S. at 157. It also follows from the pivotal role that intent plays in antitrust violations. A multiparty concerted restraint certainly requires some degree of intent. *Cf.* Alaska Airlines, 948 F.2d at 540-41. And, as the Supreme Court has noted, "no monopolist monopolizes unconscious of what he is doing." Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 602, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985).

This may seem a difficult logical leap, but patents already provide a common example of an antitrust analysis which avoids any limitation-by-limitation invalidity or infringement analysis, patent licensing. The license to market a good on payment of a royalty is a horizontal restraint on production of that good. But no one would challenge ordinary patent licensing as a violation of the antitrust laws because we understand that the parties' good-faith belief of infringement (or their **[*38]** belief that's a reasonable enough possibility) places the agreement within the scope of the patent. The royalty payment from the licensee to the patent owner flows as expected and, in contrast to most restraints, a patent license *brings* a product to market. This abbreviated rule of reason justifies ordinary patent licensing without a limitation-by-limitation infringement analysis.

So too here, defendants contend, arguing that both parties believed Lupin's ANDA infringed the relevant patents. At first glance, they tell a compelling story. Lupin, defendants say, knew its ANDA infringed the patents early on. Outside counsel said such a result was likely from the beginning, and once Judge Hamilton adopted claim constructions which both undermined Lupin's invalidity argument and made a judgment of infringement very likely, Lupin saw the light and came to the bargaining table. Thus, we are to believe, defendants' challenged settlement agreement manifested an intent to *accelerate* Lupin's generic entry and ran afoul of no antitrust concerns.

Our jury would be free to reject this narrative as a pretext. Questions of fact appear on its face, starting with the glaring oddity that *only one* of our **[*39]** three defendants involved in the underlying suit, Lupin, has waived attorney-client privilege to tell its tale of certain infringement. Besides, if the patents were so valid and infringed, why did Assertio and Santarus let Lupin practice them royalty free for, depending on the patent, several months to four years? And, if both parties so strongly believed Lupin's ANDA infringed, why did they stipulate that there remained "significant risk to each of them" given Judge Hamilton "ha[d] not adjudicated Depomed's charges of patent infringement or Lupin's defenses and counterclaims[?]" *Depomed*, No. C 09-05587, Dkt. No. 152.

More important, though, defendants' telling forgets a key fact — their *actual* settlement agreement. Defendants would have us believe that *both* parties *knew* Lupin infringed and would be barred from marketing a generic Glumetza for several years. And yet, to settle the suit, our brand defendants agreed to *expedite* Lupin's generic market entry, cede a year's worth of revenue that an authorized generic could recoup from Lupin (recall, the Supreme Court has recognized that even 180 days of generic exclusivity can be worth several hundred million dollars), *and* pay three million **[*40]** dollars in Lupin's legal fees (Dkt. No. 493-12, §§ 2.5, 3.1, 3.5). In other words, defendants would have us believe that they all knew *Lupin* was going to lose — yet Lupin emerged far and away the settlement victor? Our jury could reject these facial contradictions outright. *See* Kodak, 903 F.2d at 618-19.

Contrary to *Actavis*, defendants contend that here the large and otherwise unexplained payment to Lupin cannot be taken as suggesting that Assertio and Santarus doubted their infringement case. Their first basis for this argument, that the FTC labors under a lower causation standard than does a private plaintiff, fails to explain how a different burden of antitrust *causation* would change our analysis of whether defendants *violated* the antitrust laws. Indeed, nothing in the rationale of *Actavis* turned on the identity of the FTC as the plaintiff. *In re Cipro Cases I & II, 61 Cal.4th 116, 142, 187 Cal. Rptr. 3d 632, 348 P.3d 845 (2015)*; *see also,* *United Food & Commercial Workers Local 1776 & Participating Employers Health & Welfare Fund v. Teikoku Pharma USA, 296 F. Supp. 3d 1142, 1154 (N.D. Cal. 2017)* (Judge William H. Orrick). In a similar vein, defendants say that direct evidence of *Lupin's* confidence (recall, Assertio and Santarus did not also waive attorney-client privilege here) in the infringement case displaces the use of the payment as "proxy" for their doubt. This, however, ignores the plain language of *Actavis* ***[*41]*** . An unexplained payment "suggest[s] that the patentee has serious doubts" about its infringement case. Such evidence probes defendants' states of mind just as their later, direct testimony does. *570 U.S. at 157*.

Even if our jury does not go so far as to find defendants' justification a pretext, plaintiffs *do* present evidence that defendants doubted their infringement case. At bottom, we cannot forget defendants' own explicit admission of that doubt to Judge Hamilton, acknowledging in their consent decree that "there [was] significant risk to each of them associated with the continued prosecution of [the case.]" *Depomed*, No. C 09-05587 PHJ, Dkt. No. 152. Our jury will be entitled to place a certain amount of weight upon defendants' contemporaneous admissions to a federal judge.

Plaintiffs offer several batches of evidence, but sufficient here is the noninfringement testimony of *Lupin's* expert in the underlying litigation. In a summer 2011 draft noninfringement report, never submitted due to the settlement, Dr. Kinam Park applied Judge Hamilton's claim construction and explained the two different methods of controlling the extended release of metformin. Assertio's patents claimed the "matrix" form, where **[*42]** dispersion of the active drug within a polymeric matrix controls its release. Lupin's ANDA used the other form, a "reservoir," which surrounded the active drug in a membrane or coating to control its release. Indeed, plaintiffs say, evidence of Lupin's settlement negotiation preparations shows Lupin believed and acted upon Dr. Park's noninfringement report. Earlier in the summer Lupin had drafted an opening settlement offer with a May 2014 entry date in exchange for a royalty to Assertio. After Dr. Park's initial draft report circulated, Lupin revised its draft settlement offer, deleting the royalty payments and moving up its proposed entry date more than a year to January 2013 (Dkt. No. 493-1 at ¶¶ 14-16).

Instead of responding to the merits of Dr. Park's noninfringement report, defendants attack its weight and admissibility. That Dr. Park's report was unsigned and never tested in the underlying litigation says little. *None* of the infringement or noninfringement arguments were tested in the underlying litigation, as the parties admitted in their settlement stipulation. Defendants' frustrations with Dr. Park's memory of the circumstances surrounding his report go to the weight of his **[*43]** testimony, not its admissibility. And, plaintiffs will be more than welcome to cite Lupin's prior inconsistent statements against it at trial. *Fed. R. Evid. 801*.

Defendants also contend that plaintiffs misclassified Dr. Park as a *Rule 26(a)(2)(C)* nonreporting expert. Not so. ***HN9***[] *Rule 26(a)(2)(C)* permits certain non-retained experts to testify as percipient witnesses. This usually arises in the context of a "treating physician" who may testify to opinions formed during the course of medical treatment, in contrast to a medical expert retained to review and opine on medical records provided by counsel and who must provide a written report. Here, Dr. Park will act more as a percipient witness, testifying to the circumstances surrounding and the opinions contained in his previous report. Plaintiffs have not retained Dr. Park, and he will not opine on our present record. *Rule 26* requires no new report. And, defendants cannot claim prejudice, given they have had Dr. Park's report for nearly a decade. *See* *Goodman v. Staples, 644 F.3d 817, 824-26 (9th Cir. 2011)*.

It's also worth noting the ridiculousness of defendants' attempts to exclude Dr. Park's report. Defendants tout *Lupin's* decision to waive attorney-client privilege in the underlying litigation *ad nauseum*. Aside from the fact that this ploy presents **[*44]** a facially incomplete record (Assertio and Santarus did not also waive attorney-client privilege), defendants cannot both proclaim Lupin's transparency and bury inconvenient portions of Lupin's underlying record.

In sum, on this record a reasonable trier of fact could conclude that defendants unreasonably restrained the production of Glumetza via cross-covenants not to compete and that that these restraints did not fall within the scope of their patents.

3. PLAINTIFFS' CAUSAL ANTITRUST INJURY.

Armed with the findings that defendants' settlement violated the rule of reason and that defendants' wielded market power, a reasonable trier of fact could next conclude that the settlement caused plaintiffs' antitrust injury. ***HN10***[] "It is generally sufficient to show with *reasonable probability* some causal connection between the antitrust violation and [the claimed injury.]" *Catlin v. Wash. Ener. Co., 791 F.2d 1343, 1347 (9th Cir. 1986)*. The Supreme Court has long held that a "jury [may] conclude as a matter of just and reasonable inference from the proof of defendants' wrongful acts and their tendency to injure plaintiffs' business, and from the evidence of the [effects], not shown to be attributable to other causes, that defendants' wrongful acts had caused damage **[*45]** to the plaintiffs." *Bigelow, 327 U.S. at 264*. In other words, plaintiffs need not rule out "all possible alternative sources of injury," but satisfy the inquiry by showing the illegality "to be a material cause of the injury." *Zenith Rad. Corp. v. Hazeltine Rsch., Inc., 395 U.S. 100, 114 fn. 9, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*.

Plaintiffs' claimed injury is the overcharge they actually paid compared to the price they would have paid absent the unlawful settlement. As detailed at class certification:

> Generic drugs crash brand monopolies, entering the market at significant discounts. Studies show this discount increases over time (*and* as more generics enter the market) and quickly pervades the market as the generics capture the prescription base through permissive or (often, state or locally) mandated generic-substitution at the pharmacy. And, this generic market penetration increases over time.

336 F.R.D. at 476. Delayed generic entry delays the resultant price cuts. So plaintiffs' theory of causation distills to this: defendants delayed Lupin's generic entry. Absent that delay, Lupin would have marketed a generic version of Glumetza earlier. The price-suppressing competition which (as seen above) actually played out over the last several years would have arrived sooner, cutting prices earlier. Thus, at each point in time, plaintiffs **[*46]** paid more for brand or generic Glumetza than they should have.

This certainly counts as ***HN11***[] a valid antitrust injury; "price cutting is a practice the antitrust laws aim to promote." *Cascade Health Solutions v. PeaceHealth, 515 F.3d 883, 896 (9th Cir. 2008)*. *Actavis* itself recognized the overcharge as the relevant harm. *570 U.S. at 157*. Defendants (with one exception, detailed below) concede this cognizable injury; instead they challenge the causation itself, arguing that generic competition would have come to the market no earlier than it did in reality.

Plaintiffs offer three scenarios of earlier generic competition, positing that either Lupin would have prevailed in the underlying suit, entered the market at-risk, that is, upon FDA approval following the expiration of the 30-month stay even as the underlying litigation continued, or that Lupin and our brand defendants would have agreed to an earlier entry date if their settlement agreement had not included the unlawful no-AG provision. Plaintiffs also argue that both Sun and Watson (now Teva) would have entered the market earlier on Lupin's heels, further speeding generic competition and reduced prices.

Defendants' running argument on this front is that plaintiffs can point to no evidence that defendants, or their officers, **[*47]** or any third parties contemplated any of plaintiffs' but-for scenarios. In other words, defendants would ***HN12***[] premise causation here (and thus their liability) on the notion that they must have contemplated a lawful course of action before abandoning it for the unlawful. This is both wrong on the law — "[t]he most elementary conceptions of justice and public policy require that the wrongdoer shall bear the risk of the uncertainty which his own wrong has created" — and in reasoning — our actors have no reason to contemplate action they might have taken in the but-for world *which never came to pass*. Our jury will craft the but-for world, in which defendants acted rationally and lawfully, based on measured deviation from the record. *See Bigelow, 327 U.S. at 265*; *Dolphin Tours, Inc. v. Pacifico Creative Service, Inc., 773 F.2d 1506, 1511 (9th Cir. 1985)*.

First, plaintiffs offer cogent evidence that Lupin may have marketed their generic Glumetza at risk or upon prevailing in the underlying suit. As above, defendants' patents may justify their agreement. But noninfringement remains our baseline. *See, e.g., Nexium, 842 F.3d at 63*; *Medtronic, 571 U.S. at 198-99*. With this understanding, then, this order agrees with defendants that "[t]he clear import of Nexium and WELLBUTRIN is that a plaintiff must offer some evidence of non-infringement or patent invalidity **[*48]** in order to proceed on an at-risk launch theory of causation." *Apotex, Inc. v. Cephalon, Inc., 255 F. Supp. 3d 604, 614 (E.D. Pa. 2017)* (Judge Mitchell S. Goldberg).

Again, the circumstances of the settlement itself betray defendants' doubts in the infringement case, and plaintiffs have provided direct evidence of noninfringement in Dr. Park's noninfringement analysis, this without even addressing plaintiffs' expert evaluation of Lupin's noninfringement case. Whether this and plaintiffs' other evidence of noninfringement would have supported a judgment of noninfringement, traversed a preliminary injunction, or encouraged a rational actor to market at risk presents a question of evidence weighing and balancing reserved for the jury.

We also have evidence that Lupin, if it could have outlasted Assertio and Santarus, would have pressed that advantage. Congress *designed* the ANDA scheme to encourage generic entry, especially if Lupin believed in its noninfringement case. The 180 days of generic exclusivity, often worth several hundred million dollars, would have paid Lupin's legal fees and then some. Indeed, here Lupin's actual 12-month exclusivity period generated a gross margin of over one hundred twenty million dollars (Dkt. No. 493-79 at 2).

More important, **[*49]** in thirty seven times as the first filer, plaintiffs count four times that Lupin has launched at risk, including another generic version of metformin, our active drug here. Plaintiffs also highlight that Lupin, to this point, had never quit a patent suit when it was the first ANDA filer. And, as late as *nine days* before the challenged settlement, Lupin had still been internally circulating production calendars listing a generic Glumetza launch for as early as November 2012. Evidence shows that Lupin may have been able to ramp-up its production in time for such a launch. Between October and December 2011, Lupin made three commercial-size batches of generic Glumetza, and only needed three months to produce the validation batches for its February 2016 launch (Dkt. No. 493-1 at ¶¶ 45-51).

Defendants contest this evidence, in their telling Lupin only launched at risk once, and minimize the proffered production calendars as mere placeholders carrying little weigh. But as above, plaintiffs need not show that the Lupin of our world actually contemplated a given scenario within the but-for world. In the end, whether Lupin, looking ahead to those green pastures of profit, would have pressed its **[*50]** contemporaneous noninfringement theory to victory, or at least stood firm behind it long enough to dissuade our brand defendants from further litigation, is a question for our jury.

Second, plaintiffs offer competent evidence that if their settlement had not included the unlawful no-AG provision, defendants would have agreed to an *earlier* entry date for Lupin. Defendants' attempt to reject this hypothetical bargain as speculative fails. Contrary to defendants' assertions, the California Supreme Court's discussion of the interplay between an antitrust *violation* under the state's Cartwright Act and federal patent law does not counsel otherwise and, indeed, defendants' oft-cited *Wellbutrin* agreed that juries frequently predict the outcomes of hypothetical scenarios by assessing individual or corporate motive, thought processes, and behavior. *61 Cal. 4th at 149-50*; *868 F.3d at 167 fn. 57*; *Teikoku, 296 F. Supp. 3d at 1161-62*. At bottom, this method requires no speculation. It merely asks the jury to project how rational actors in defendants' shoes would have proceeded in the absence of the unlawful settlement term. *Dolphin, 773 F.2d at 1511*.

Simply put, the February 1, 2016, generic entry date for Lupin, is not, and never was, set in stone. It was always mobile based on (among other factors) **[*51]** defendants' competing evaluations of the patent merits and their projection of the revenue they could extract from the market as Lupin's entry date shifted. If, as our jury could conclude based on the above, doubts about infringement animated our defendants' settlement, then our brand defendants paid Lupin's attorney's fees plus the amount their authorized generic could recoup in the first twelve months of generic entry in exchange for Lupin staying off the market for some amount of time. The value to Lupin of those twelve months without an authorized generic corresponded to the value to Assertio and Santarus of some number of months of their preserved monopoly. Remove the pay, remove the delay.

Though this order doubts whether plaintiffs need to provide evidence that our defendants contemplated or signaled willingness to entertain an earlier entry date (again, given plaintiffs have provided sufficient evidence for a jury to conclude defendants reached an unlawful agreement, it makes little sense to condition recovery on a showing that defendants first contemplated a lawful settlement before pursing their ultimate course) plaintiffs do offer evidence on this point. Lupin's original **[*52]** August 2011 settlement offer sought a January 1, 2013, entry date in exchange for a shorter six-month no-AG period. Our brand defendants countered with a January 1, 2018, entry date. In October, Lupin responded with the twelve month no-AG period and a January 1, 2016, entry, remarkably close to the ultimate agreement. Taken in plaintiffs favor, as we must on summary judgment, this provides direct evidence that the increase in the no-AG period extended Lupin's delay (Dkt. No. 493-1 at ¶¶ 23-24).

Plaintiffs also provide expert testimony to nail down the generic entry date our defendants would have agreed to absent the no-AG provision. Defendants seek to exclude this testimony, and we need not address it here. It suffices that plaintiffs have provided evidence above that defendants could have agreed to an earlier date absent their unlawful conduct; any more detail at this point goes to the measure of damages. *See* *Zenith, 395 U.S. at 114, fn. 9*.

Third, our record offers adequate evidence that other generics would have followed Lupin to market earlier absent the unlawful settlement. Ordinarily, the ANDA scheme encourages a first-filer generic with the prospect of 180-days of market exclusivity, and the later-filer generics **[*53]** follow. A delay by the first-filer creates a bottleneck, discouraging later-filers from leading the charge, as each faces a near certain thirty months of litigation with no exclusivity at the end to defray the risk. *See* *Actavis, 570 U.S. at 142-44*; *Wellbutrin, 868 F.3d at 144-45 fn. 7*; *Nexium, 842 F.3d 34 at 41*; *21 U.S.C. § 355(j)(5)(B)(iii)-(iv)*, *(D)*; *Cf*. Hovenkamp, *Anticompetitive Patent Settlements*, *15 Minn. J.L. Sci. & Tech.s at 7 fn. 19*.

Lupin filed the first ANDA to market a generic form of Glumetza in July 2009. Tentative FDA approval came in January 2012 and Lupin could have expected final approval in (or shortly after) May 2012 on expiration of the thirty-month stay. Instead Lupin settled with our brand defendants and did not market until February 1, 2016. In that time, Sun and Teva had filed their Paragraph IV ANDAs around March of 2011 and 2012, respectively. But after Lupin settled, the two follow-ons promptly settled themselves in January and November 2013, agreeing to August 2016 launches. Teva did not launch until May 2017, Sun not until July 2018. "[A] reverse payment settlement with the first filer . . . removes from consideration the most motivated challenger, and the one closest to introducing [generic] competition." *Actavis, 570 U.S. at 155* (quotes omitted). The just and reasonable inference being, or so our jury could find, that Lupin's bottleneck **[*54]** contributed to Sun and Teva's delay.

Defendants point to manufacturing and regulatory difficulties that delayed Teva and Sun's market entries. But the facial defect in this argument is that if Lupin marketed when it should have, and Sun and Teva followed when they should have, resolution of their difficulties would move up accordingly. Following up on this point, plaintiffs add that Sun's regulatory issues with the FDA in December 2015 would not have mattered for our purposes if it had succeeded in launching its generic Glumetza before then.

Plaintiffs further offer evidence (including expert testimony) of Sun's strong noninfringement case, arguing that Sun might have attempted to jump the line by winning a judgment of noninfringement and triggering Lupin's 75-day forfeiture clock. Now, the settlement would have let Lupin market immediately to maintain its exclusivity period, posing a major threat to Sun's early market share and ability to recoup its litigation costs. But, as defendants point out, "[p]laintiffs do not and cannot dispute that there is no evidence that either Sun or [Teva] knew about the acceleration terms" (Dkt. No. 500 at 19).

To each of these theories, defendants again **[*55]** fault plaintiffs for not pointing to evidence from Sun or Teva to the effect that either contemplated such action. But as described above, this argument rests upon the befuddling notion that our actors must have contemplated what they would have done in a but-for world which, due to defendants' antitrust violation, *never happened*. Not so. We construct the but-for world not out of whole cloth, but as a matter of reasoned deviation from the actual world based upon our changed assumption of defendants' lawful conduct. Whether those changed circumstances, within the interlocking-incentive scheme of the pharmaceutical-patent regulatory apparatus, would merely have driven rational actors in Sun and Teva's positions through the same course of conduct, just shifted forward in time, or driven one in Sun's position to pursue Lupin more aggressively, remains a question for our jury. *See* *Bigelow, 327 U.S. at 264-65*.

4. PLAINTIFFS' SUIT REMAINS TIMELY.

A reasonable trier of fact could also find plaintiffs' suit timely. ***HN13***[] Our antitrust laws impose a four-year statute of limitations. *15 U.S.C. § 15b*. The March 5 order resolving defendants' motions to dismiss found that plaintiffs had adequately alleged both defendants' continuing violations **[*56]** of the antitrust laws, permitting plaintiffs to recover (on the pleadings at least) for all Glumetza purchases from August 29, 2015, and defendants' fraudulent concealment of the scheme, permitting recovery back to the beginning. Together, defendants assail only the second finding here.

HN14[] A limitations period will be tolled where defendants affirmatively concealed their unlawful conduct and plaintiffs, acting reasonably, had neither actual nor constructive knowledge. *Hexcel Corp. v. Ineos Polymers, Inc., 681 F.3d 1055, 1060 (9th Cir. 2012)*. Defendants do not contest their affirmative concealment, but contend that facts available to plaintiffs in mid-2015 would have excited the inquiry of a reasonable person and prompted diligent investigation. *Conmar Corp. v. Mitsui & Co. (U.S.A.), Inc., 858 F.2d 499, 504 (9th Cir. 1988)*.

Specifically, defendants argue that Lupin's launch calendars and an earnings call with executives in mid-2015 informed plaintiffs of Lupin's expectation that Bausch would not launch an authorized generic for some time, exciting the line of inquiry in a reasonable person that, if diligently pursued, would have led plaintiffs to discovery of the pay-for-delay scheme. ***HN15***[] "The determination of whether a plaintiff knew or should have known of a cause of action presents a question for the trier of fact," though "diligence is **[*57]** tested by an objective standard."

Volk v. D.A. Davidson & Co., 816 F.2d 1406, 1417 (9th Cir. 1987). Summary judgment here will be appropriate "only if uncontroverted evidence irrefutably demonstrates that a plaintiff discovered or should have discovered [the cause of action] but failed to file a timely complaint." *Hexcel, 681 F.3d at 1063* (quotes omitted). Questions remain.

As early as February 2015, Lupin began distributing launch calendars to several plaintiffs (including at least H-E-B, Kroger, Walgreen, AmerisourceBergen, CVS, Cardinal Health, and Humana), indicating both Lupin's status as the first-ANDA filer on Glumetza, entitling it to the 180-days of generic exclusivity, and the expectation that there would be "no AGx [authorized generic] expected" at launch. Then, on July 5, Vinita Gupta, Lupin's CEO, announced that "Glumetza launches in February and we have a sole exclusivity for 6-months on Glumetza" (Dkt. Nos. 464-22 at 8; 464-31 at 9).

Defendants say this information provided constructive notice of the no-AG provision because plaintiffs admitted that Lupin's expectation that Bausch would not launch an authorized generic for some time was an unusual piece of knowledge. Indeed, defendants note, plaintiff Kroger *did* inquire, asking Bausch about its plans for an **[*58]** authorized generic, albeit within the four year limitations period in December 2015 (Dkt. No. 464-29). No matter, defendants assure us. If the information prompted Kroger to ask later, it should have had the same effect earlier.

A reasonable jury could reject this argument and find that plaintiffs still lacked constructive notice of their claims. Lupin knew good and well that Bausch would not launch an authorized generic for at least one year after Lupin's own generic launch because both had signed the secret side-settlement agreement. It remains difficult to overemphasize that our entire inquiry rests on the baseline that on March 26, 2012, our defendants *concealed* the existence of the no-AG provision from Judge Hamilton. *Depomed*, No. C 09-05587 PJH, Dkt. No. 151 (N.D. Cal. Mar. 26, 2012). ***HN16***[] "The duty of candor is not simply an obligation to answer honestly when asked a direct question by the trial court. It includes an affirmative duty to inform the court when a material statement of fact or law has become false or misleading in light of subsequent events." *Levine v. Berschneider, 56 Cal. App. 5th 916, 921, 270 Cal. Rptr. 3d 768 (2020)*. Defendants' omission of the material no-AG provision from their disclosure to a *federal judge* meant that the term *did not exist* ***[*59]*** . And, from that angle, the evidence that Lupin only began hinting of the no-AG provision in mid-2015 means that our defendants continued to suppress public knowledge of the no-AG provision for three years. The conceptual leap defendants propose, from "no-AG expected" to "we should investigate whether Bausch secured the Lupin settlement with a no-AG provision," would have required our plaintiffs to conclude that their regular business partners had both *misled a federal judge* and spent three years covering it up. This hazy record does not mandate that jump and, in fact, permits a jury to conclude plaintiffs did not have constructive notice of the no-AG provision.

5. Assertio's Individual Defenses Fail.

Assertio, on its own, proclaims that it washed its hands of the alleged unlawful scheme long ago, arguing that it withdrew from the conspiracy in 2013, that it committed none of the overt acts contributing to defendants' continuing violation, and that it bears no culpability for Bausch's unforeseeable price hikes.

The story goes that Assertio granted Santarus control of most marketing for Glumetza in July 2008, though the two shared price control. In August 2011, Assertio transferred all **[*60]** Glumetza commercialization rights to Santarus, including sole price control, though Assertio retained a royalty on sales. But that link severed in October 2013, when Assertio sold "substantially all its royalty interests for Glumetza" to PDL Biopharma (Dkt. No. 464 at 9-10). In other words, as Assertio tells us, the last thing it did in service of the conspiracy was sign the settlement agreement in February 2012.

On its face, this story leaves a curious omission, one highlighted by defendants' repeating chorus that the challenged settlement agreement effected no more than the patent rights granted to, who else but, Assertio. Who lists the patents as covering Glumetza in the Orange Book? Who must be present in any infringement suit to trigger the thirty-month stay and exclude new generics? Who grants or withholds licenses? Who holds the rights which might exculpate defendants' alleged scheme? The patent owner, Assertio. *See Lone Star Silicon Innovs. v. Nanya Techs., 925 F.3d 1225, 1228-29 (Fed. Cir. 2019)*; *In re Actos End-Payor Antitrust Litig., 848 F.3d 89, 94 (2d Cir.*

2017); Nexium, 842 F.3d at 63. If Assertio maintained the patents throughout the conspiracy, and as far as defendants have told us it did, then *Assertio* maintained both the primary regulatory scarecrow against generic competition *and* the primary (indeed only, thus far) justification for defendants' **[*61]** scheme. In for a penny, in for a pound.

HN17[] *First*, actions in furtherance of a conspiracy are imputed to all involved "until its purpose has been achieved or abandoned." *U.S. v. Inryco, Inc., 642 F.2d 290, 293 (9th Cir. 1981)*; *Arandell Corp. v. Centerpoint Ener. Servs., 900 F.3d 623, 634 (9th Cir. 2018)*. Withdrawal from a conspiracy requires disavowal of the unlawful goal, an affirmative act to defeat its purpose, or "definite, decisive, and positive steps" to show a sufficient disassociation. *United States v. Lothian, 976 F.2d 1257, 1261 (9th Cir. 1992)* (quotes omitted). While Assertio covered its coconspirators' exits, even from afar, it cannot be said to have withdrawn, and will answer alongside them.

HN18[] *Second*, a continuing violation accrues with each overt act, which is both new and independent, not a mere reaffirmation of previous conduct, and which inflicts new and accumulating injury. *Samsung, 747 F.3d at 1202-03*. True, as Assertio notes, the Honorable Lucy H. Koh, relying on our court of appeals' language in *Pace Industries v. Three Phoenix Company* that "an overt act *by the defendant* is required to restart the statute of limitations," concluded that the continuing violation doctrine does not impute acts between coconspirators. *Garrison v. Oracle Corp., 159 F. Supp. 3d 1044, 1072* (quoting *813 F.2d 234, 237 (9th Cir. 1987))*. But this appears an unduly literal interpretation of the language in *Pace* given, first, that our court of appeals did not raise the distinction that Judge Koh later **[*62]** raised and, second, because the Supreme Court does appear to approve of imputing a continuing violation across a conspiracy, explaining famously that "[i]n the context of a *continuing conspiracy* to violate the antitrust laws . . . each time a plaintiff is injured by *an act of the defendants*[,] a cause of action accrues to him to recover the damages caused by that act." *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)* (emphasis added). This order thus respectfully disagrees with Judge Koh's ruling, though, regardless, we have such an overt act here. Assertio provided, and *maintained control of throughout*, the patents, the regulatory leverage that enabled defendants' entire alleged scheme. *Samsung Elects. v. Panasonic Corp., 747 F.3d 1199, 1203 (9th Cir. 2014)*.

HN19[] *Third*, "a defendant cannot be held liable for substantive offenses committed before joining or after withdrawing from a conspiracy." *Lothian, 976 F.2d at 1262*. But our record supports the conclusion that Assertio, by maintaining the regulatory levers permitting and perhaps justifying defendants' conspiracy, never withdrew from it. It's also worth noting that if Assertio retained the patents, it too retained, potential contract breaches aside, the power to stop Valeant's apparently unforeseeable price hikes by pulling the patent license or permitting other generics to enter **[*63]** earlier. *Cf. Samsung, 747 F.3d at 1203*.

6. LUPIN'S INDIVIDUAL DEFENSES FAIL.

Alone, Lupin argues that its distribution contracts insulated distributors AmerisourceBergen, Cardinal Health, and McKesson, whose assignees comprise a large portion of our direct purchasers, from actual injury. According to Lupin, it sold drugs to the distributors at the wholesale acquisition price and the distributers primarily derived revenue not from any markup they might have added but from nonrefundable service fees Lupin paid. The distributors made more money as the percentage fees grew with drug prices.

This argument mistakes plaintiffs' cognizable injury, which encompasses the immediate extent of the overcharge without regard to plaintiffs' later profit. *Hanover Shoe*'s cut-and-dry treatment of the overcharge works no injustice here. What *Hanover Shoe* takes, *Illinois Brick* has given. And, to this point Lupin and its codefendants have enjoyed *Illinois Brick*'s shield against indirect-purchaser liability several times over. *Hanover Shoe v. United Shoe Mach. Corp., 392 U.S. 481, 489-93, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*; *Illinois Brick v. Illinois, 431 U.S. 720, 749, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)* (Brennan, J., dissenting); *Glumetza, 336 F.R.D. at 480-81* (quoting *In re Skelaxin (Metaxalone) Antitrust Litigation, No. MD 12-02343 CLC, 2014 U.S. Dist. LEXIS 66707, 2014 WL 2002887, *5 (E.D. Tenn. May 15, 2014)* (Judge Curtis L. Collier)).

Lupin also argues that Bausch would have raised the price of Glumetza as it did **[*64]** in 2015 even if generics had already entered the market. Even taking this as true, the presence of cheaper generic alternatives in 2015 would have both shielded consumers from the full brunt of the price hikes and helped bring the prices back down to a competitive level sooner. Yet plaintiffs also offer evidence that Bausch had never raised prices to the extent it did with Glumetza on any drug already subject to generic competition. Of the 206 drugs for which Bausch raised the price over 100%, it did so following generic entry only 15 times, and none of those reached anywhere close to the nearly 800% increases seen in our case (Dkt. No. 493-1 at ¶¶ 67-69). A reasonable trier of fact could conclude that generic competition would have suppressed the 2015 price hikes.

CONCLUSION

All motions for summary judgment are **DENIED**. This order has trodden carefully to resolve the parties' four dispositive motions without requiring full resolution of the parties' ten pending *Daubert* motions. Argument on the *Daubert* motions will be set midsummer. A future order will resolve those motions. The Court trusts that if resolution of the *Daubert* motions fundamentally undercuts a party's ability to make a **[*65]** certain argument, the party will own up to it and not waste our time at trial. For that matter, trial remains set for and *voir dire* will commence on **OCTOBER 4 AT 7:30 A.M.** The Court is looking forward to it.

IT IS SO ORDERED.

Dated: May 6, 2021.

Opinion

ORDER GRANTING IN PART AND DENYING IN PART DEFENDANTS' MOTION TO DISMISS

Re: Dkt. Nos. 15, 17, 22

I. INTRODUCTION

Defendants Robinhood Financial LLC and Robinhood Securities, LLC ("Defendants" or "Robinhood") move to dismiss Plaintiffs Siddharth Mehta ("Mehta"), Kevin Qian ("Qian"), and Michael Furtado's ("Furtado") (collectively, "Plaintiffs") First Amended Class Action Complaint ("FAC") (Dkt. 10) pursuant to *Federal Rule of Civil Procedure 12(b)(6)* for failure to state a claim upon which relief can be granted and *Rule 9(b)* on the grounds that Plaintiffs fail to plead some claims with the particularity required **[*2]** by *Rule 9(b)*. Dkt. 15. The Parties have consented to the jurisdiction of a magistrate judge. Dkts. 9, 14.

The Court held a hearing on April 27, 2021. Dkt. 29. After considering the Parties' submissions, arguments at the hearing, the case file and relevant law, the Court **GRANTS IN PART AND DENIES IN PART** Defendants' motion to dismiss the FAC for the reasons discussed below.

II. BACKGROUND

This discussion of the background facts is based on the allegations of Plaintiffs' FAC. Plaintiffs allege that Robinhood failed to keep their promise to maintain the highest security standards. Dkt. 10 ¶ 15. As a result, in the summer and fall of 2020, and perhaps even earlier, unauthorized users accessed approximately 2,000 Robinhood customers' accounts containing the customers' sensitive personal and financial information and looted their funds. *Id.* ¶¶ 4, 18. Plaintiffs allege that Robinhood does not offer a phone number for customer service, forcing customers to attempt to contact Robinhood by email. *Id.* ¶¶ 4, 21. Robinhood customers were left waiting for days or weeks while their account funds were depleted. *Id.* ¶¶ 4, 21. Plaintiffs further allege that Robinhood failed to freeze the affected accounts or alert **[*3]** their customers of the breach right away and did nothing until news outlets reported on the breach. *Id.* ¶¶ 5, 20. After the security breaches were widely reported, Robinhood sent push notifications to customers encouraging them to enable two-factor authentication. *Id.* ¶ 20. Plaintiffs allege that many individuals who were affected by the breach already had two-factor identification enabled when the unauthorized access occurred. *Id.* Collectively, Robinhood customers lost millions of dollars and have spent substantial amounts of their time attempting to remedy the losses and prevent further losses. *Id.* ¶¶ 18, 22, 23. Plaintiffs allege that while Robinhood promised it would cover 100 percent of any losses due to unauthorized activity, Robinhood has only compensated some individuals while refusing other individual's requests. *Id.* ¶¶ 6, 22.

Plaintiff Mehta held an investment account with Robinhood and was a purchaser of their services in 2020. *Id.* ¶ 27. As early as July 22, 2020, or possibly sooner, there was unauthorized access to Mehta's personal and financial information, funds Mehta had deposited into a Robinhood account, and control of securities positions Mehta purchased through Robinhood. **[*4]** *Id.* As a result of Robinhood's negligent and illegal conduct, Mehta lost tens of thousands of dollars and "spent hours of his own time attempting to research and remedy the loss and securing his other assets and information from further breach." *Id.* Robinhood did not inform Mehta of this breach and only acknowledged the breach after Mehta confronted Robinhood about the loss of funds 85 days after the initial breach occurred. *Id.*

Similarly, Plaintiff Qian held an investment account with Robinhood and was a purchaser of their services in 2020. *Id.* ¶ 28. As early as October 10, 2020, and possibly sooner, there was unauthorized access to Qian's personal and financial information, access to funds he had deposited into a Robinhood account, and control of securities positions he had purchased through Robinhood. *Id.* Plaintiffs allege that Robinhood neglected to inform him of this breach and only acknowledged the breach after Qian confronted Robinhood about the loss days after the initial breach. *Id.* As a result, Qian has also lost tens of thousands of dollars and spent hours of his own time attempting to research and remedy the loss and protect his assets and information from further breach. **[*5]** *Id.*

Plaintiff Furtado held an investment account with Robinhood and was a purchaser of their services in 2021. *Id.* ¶ 29. As early as February 12, 2021 and possibly sooner, there was unauthorized access to Furtado's personal and financial information, access to the funds he had deposited into a Robinhood account, and control of securities positions Furtado purchased through Robinhood. *Id.* Furtado attempted to contact Robinhood by email, because Robinhood does not provide a customer service phone number. *Id.* However, he did not receive a response regarding the breach for thirteen days. *Id.* As a result, Furtado lost over ten thousand dollars, purchased identity theft protection services, and has spent time attempting to research and remedy the loss and protect his assets and information from further breach. *Id.*

Plaintiffs bring this action to seek monetary and equitable relief as a class action on behalf of themselves and the following classes:

> Class: All Robinhood customers whose accounts were accessed by unauthorized users from January 1, 2020 to the present.
>
> Reimbursement Subclass: All Class members who suffered direct losses due to unauthorized activity and were not compensated in full **[*6]** by Robinhood for said losses.
>
> California Subclass: All Class members who were California residents.

Id. ¶¶ 34-36.

III. REQUEST FOR JUDICIAL NOTICE AND INCORPORATION BY REFERENCE

A. Legal Standard

There are two doctrines that allow district courts to consider material outside the pleadings without converting a motion to dismiss into a motion for summary judgment: judicial notice under *Federal Rule of Evidence 201* and incorporation by reference. *Khoja v. Orexigen Therapeutics, Inc., 899 F.3d 988, 998 (9th Cir. 2018)*, *cert. denied sub nom. Hagan v. Khoja, — U.S. —, 139 S. Ct. 2615, 204 L. Ed. 2d 264 (2019)*. "The court may judicially notice a fact that is not subject to reasonable dispute." *Fed. R. Evid. 201(b)*. A fact is "not subject to reasonable dispute" if it "is generally known" or "can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned." *Fed. R. Evid. 201(b)(1)-(2)*. However, "[j]ust because the document itself is susceptible to judicial notice does not mean that every assertion of fact within that document is judicially noticeable for its truth." *Khoja, 899 F.3d at 999*.

Incorporation by reference is a judicially created doctrine that allows a court to consider certain documents as though they are part of the complaint itself. *Khoja, 899 F.3d at 1002*. "The doctrine prevents plaintiffs from selecting only portions of documents that support their claims, while omitting portions of those very documents **[*7]** that weaken—or doom—their claims." *Id.* A defendant can seek to incorporate a document into the complaint "if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim." *U.S. v. Ritchie, 342 F.3d 903, 908 (9th Cir. 2003)* (citations omitted). While the "mere mention" of the existence of a document is insufficient to incorporate a document, it is proper to incorporate a document if the claim "necessarily depended" on them. *Khoja, 899 F.3d at 1002*.

After a defendant offers such a document, the district court can treat the document as part of the complaint, and "thus may assume that its contents are true for purposes of a motion to dismiss under *Rule 12(b)(6)*." *Ritchie, 342 F.3d at 908*. However, "[w]hile this is generally true, it is improper to assume the truth of an incorporated document if such assumptions only serve to dispute facts stated in a well-pleaded complaint." *Khoja, 899 F.3d at 1003*. Indeed, using extrinsic documents to "resolve competing theories against the complaint risks premature dismissals of plausible claims that may turn out to be valid after discovery" and it is "improper to do so only to resolve factual disputes against the plaintiff's well-pled allegations in the complaint." *Id. at 998, 1014*.

B. Analysis

Defendants ask the Court to take judicial notice of or incorporate **[*8]** by reference the following documents:

> (1) Robinhood's publicly available webpage titled "Our 6 commitments to you," including archived versions of the webpage throughout the alleged class period (Dkt. 15-2 Ex. 1);
> (2) Robinhood's July 24, 2019 e-mails entitled "Protecting your information" (Dkt. 15-3 Ex. 2);
> (3) Robinhood's October 9-13, 2020 "Inbox Message" advising customers to "Enable Two-Factor Authentication" (Dkt. 15-4 Ex. 3);
> (4) Robinhood's October 9-13, 2020 "Push Notification" advising customers to "Enable Two-Factor Authentication to add another layer of protection to your account" (Dkt. 15-5 Ex. 4);

(5) Robinhood's October 21-23, 2020 "Enable 2FA" follow up campaign e-mail reminding customers to enable 2FA (Dkt. 15-6 Ex. 5); and
(6) Robinhood's October 28-29, 2020 2FA application "Card" advising customers to "Add an extra layer of protection to your account. Enable 2FA now" (Dkt. 15-7 Ex. 6).

Dkt. 16.

Plaintiffs ask the Court to take judicial notice of or incorporate by reference the following documents:
(1) Bloomberg news article, "Robinhood Users Say Accounts Were Looted, No One to Call," dated October 9, 2020 (Dkt. 20-1 Ex. 1);

(2) Bloomberg news article, "Robinhood Internal Probe **[*9]** Finds Hackers Hit Almost 2,000 Accounts," dated October 15, 2020 (Dkt. 20-2 Ex. 2);
(3) Bloomberg news article, "Digital Thieves Are Hacking Brokerage Accounts: Is Your Money Safe?" dated October 13, 2020 (updated October 15, 2020) (Dkt. 20-3 Ex. 3);
(4) Robinhood Customer Agreement from April 28, 2020 (Dkt. 20-4 Ex. 4); and
(5) Robinhood Financial Privacy Notice (Dkt. 20-5 Ex. 5).

Dkt. 19.

As stated on the record at the hearing, the Court rules as follows:

Document	Ruling
Defendants' Exhibit 1 (Dkt. 15-2)	Request for judicial notice is **GRANTED** without any commentary or markings added to the document. Request to incorporate by reference is **DENIED**.
Defendants' Exhibit 2 (Dkt. 15-3)	Request for judicial notice and request to incorporate by reference are **DENIED AS MOOT**.
Defendants' Exhibit 3 (Dkt. 15-4)	Request for judicial notice is **GRANTED**. Request to incorporate by reference is **DENIED**.
Defendants' Exhibit 4 (Dkt. 15-5)	Request for judicial notice and request to incorporate by reference are **DENIED**.
Defendants' Exhibit 5 (Dkt. 15-6)	Request for judicial notice is **GRANTED**. Request to incorporate by reference is **DENIED**.
Defendants' Exhibit 6 (Dkt. 15-7)	Request for judicial notice and request to incorporate by **[*10]** reference are **DENIED**.
Plaintiffs' Exhibit 1 (Dkt. 20-1)	Request for judicial notice is **GRANTED**. Request to incorporate by reference is **DENIED**.
Plaintiffs' Exhibit 2 (Dkt. 20-2)	Request for judicial notice is **GRANTED**. Request to incorporate by reference is **DENIED**.
Plaintiffs' Exhibit 3 (Dkt. 20-3)	Request for judicial notice is **GRANTED**. Request to incorporate by reference is **DENIED**.
Plaintiffs' Exhibit 4 (Dkt. 20-4)	Request for judicial notice is **GRANTED**. Request to incorporate by reference is **DENIED**.
Plaintiffs' Exhibit 5 (Dkt. 20-5)	Request for judicial notice is **GRANTED**. Request to incorporate by reference is **DENIED**.

IV. MOTION TO DISMISS

A. Legal Standard

Under *Rule 12(b)(6)*, a district court must dismiss a complaint if it fails to state a claim upon which relief can be granted. In ruling on a motion to dismiss, the court may consider only "the complaint, materials incorporated into the complaint by reference, and matters of which the court may take judicial notice." *Metzler Inv. GMBH v. Corinthian Colls., Inc., 540 F.3d 1049, 1061 (9th Cir. 2008)* (citation omitted). In deciding whether the plaintiff has stated a claim, the court must assume the plaintiff's allegations are true and draw all reasonable inferences in the plaintiff's favor. *Usher v. City of L.A., 828 F.2d 556, 561 (9th Cir. 1987)*. However, the court is not required to accept as true **[*11]** "allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Scis. Sec. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)* (citation omitted).

To survive a motion to dismiss under *Rule 12(b)(6)*, the plaintiff must allege "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. This "facial plausibility" standard requires the plaintiff to allege facts that add up to "more than a sheer possibility that a defendant has acted unlawfully." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

Courts should freely give leave to amend unless the district court determines that it is clear that the complaint's deficiencies cannot be cured by amendment. *Lucas v. Dep't of Corr., 66 F.3d 245, 248 (9th Cir. 1995)*. When amendment would be futile, the court may dismiss without leave to amend. *Dumas v. Kipp, 90 F.3d 386, 393 (9th Cir. 1996)*.

B. Analysis

Plaintiffs allege that due to Robinhood's failure to maintain proper industry-standard security measures, customers were needlessly exposed to the risk of data and identity theft. Dkt. 10 ¶¶ 16, 17. As a result of Robinhood's security measures, unauthorized third parties accessed approximately 2,000 customers' personal and financial information, customers' funds, and control over securities positions customers purchased through Robinhood. *Id.* ¶ 18. Plaintiffs allege that Robinhood "has repeatedly neglected to fully inform **[*12]** customers regarding the nature and scope of security failures and unauthorized activity." *Id.* ¶ 20. Further, "[c]ontrary to Robinhood's 'commitment' to cover losses caused by unauthorized use, Robinhood has failed to compensate millions of dollars of losses claimed by those affected by the breach." *Id.* ¶ 22. From these allegations, Plaintiffs assert eight claims: (1) negligence; (2) breach of contract; (3) violation of the California Consumer Privacy Act; (4) violation of the Customer Records Act; (5) violation of the Consumers Legal Remedies Act; (6) violation of the right to privacy; (7) violation of the Unfair Competition Law; and (8) violation of the False Advertising Law.

Defendants assert an overarching argument that Robinhood's computer network did not suffer a data breach and Plaintiffs fail to adequately plead that Robinhood maintained inadequate security measures. Defendants also assert arguments as to why each claim individually should be dismissed.

1. Unauthorized Access

Defendants first argue that Plaintiffs fail to allege a breach of Robinhood's network and that Plaintiffs cannot do so, because there was no such breach. Dkt. 15 at 16. Defendants contend that "third parties **[*13]** were able to access customer accounts by identity theft originating outside the Robinhood system." *Id.* at 16-17 (citing Dkt. 10 ¶ 20) (internal quotation marks omitted). Defendants further argue that "Plaintiffs plead no facts tying any account takeovers to Robinhood's security measures." *Id.* at 17. Without such allegations, Plaintiffs' FAC is "too conclusory and must be dismissed." *Id.* Defendants further argue that Robinhood has more than 13 million customers and that the number of alleged takeovers is no more than .01 percent of their customers. Dkt. 22 at 6.

In opposition, Plaintiffs argue that the FAC does allege that Robinhood used inadequate data security. Dkt. 17 at 11. Plaintiffs contend that alleging that thousands of customer accounts accessed by unauthorized users in a matter of days is "more than enough for a reasonable inference of a breach of a computer system in a data security case." *Id.*

The Court finds that Plaintiffs' factual allegations are sufficient to support their claims at the pleading stage. Plaintiffs allege that Robinhood "does not keep its promise to maintain the highest security standards" and "[i]ts system lacks simple and almost universal security measures" **[*14]** that could "prevent unauthorized users from transferring customer funds from an account without substantial verification." Dkt. 10 ¶ 15. Plaintiffs allege that as a result, Robinhood "negligently and illegally allowed unauthorized third-party access to approximately 2,000 customers' personal and financial information." *Id.* ¶ 18. Thus, at this stage of the proceedings, Plaintiffs' allegations that unauthorized third parties were able to access approximately 2,000 Robinhood customers' accounts and deplete their funds due to Robinhood's security measures are sufficient. *Usher, 828 F.2d at 561* ("On a motion to dismiss for failure to state a claim, the court must presume all factual allegations of the complaint to be true and draw all reasonable inferences in favor of the nonmoving party.") (citation omitted). Accordingly, the Court finds that Plaintiffs have adequately alleged that a breach occurred.

2. Negligence Claim

a. Economic Loss Doctrine

Defendants argue that the economic loss rule bars Plaintiffs from recovering for any alleged account losses in tort. Dkt. 15 at 23. Defendants further argue that the exception to the economic loss rule where a special relationship exists between the parties does not apply **[*15]** here. *Id.* at 24. At the hearing, Defendants acknowledged that there were non-economic losses alleged, but argues that they were too vague and speculative to be redressable.

"Quite simply, the economic loss rule prevents the law of contract and the law of tort from dissolving one into the other." *Robinson Helicopter Co., Inc. v. Dana Corp., 34 Cal.4th 979, 988, 22 Cal.Rptr.3d 352, 102 P.3d 268, 273 (2004)*. "Under the economic loss rule, purely economic losses are not recoverable in tort." *R Power Biofuels, LLC v. Chemex LLC, No. 16-CV-00716-LHK, 2016 U.S. Dist. LEXIS 156727, 2016 WL 6663002, at *4 (N.D. Cal. Nov. 11, 2016)* (internal quotation marks and citation omitted). If Plaintiffs' harms were purely economic, the Court would then be required to reach the question of whether any exception, such as a "special relationship," exists. *Flores-Mendez v. Zoosk, Inc., No. C 20-04929 WHA, 2021 U.S. Dist. LEXIS 18799, 2021 WL 308543, at *3 (N.D. Cal. Jan. 30, 2021)* (citing *J'Aire Corp. v. Gregory, 24 Cal.3d 799, 804, 157 Cal. Rptr. 407, 598 P.2d 60 (1979)* (discussing the six-factor test for special relationship that can overcome the economic loss doctrine)).

Plaintiffs allege that their harms and losses include "the loss of control over the use of their identity, harm to their constitutional right to privacy, lost time dedicated to the investigation of and attempt to recover the loss of funds and cure harm to their privacy, the need for future [] time dedicated to the recovery and protection of further loss, and privacy injuries associated with having their sensitive personal and financial information disclosed." Dkt. 10 ¶ 48; *see* *Flores-Mendez, 2021 U.S. Dist. LEXIS 18799, 2021 WL 308543, at *3* (determining **[*16]** that plaintiffs do not allege pure economic loss because they allege "loss of time, risk of embarrassment, and enlarged risk of identity theft"); *Bass v. Facebook, Inc., 394 F. Supp. 3d 1024, 1039* ("Here, plaintiff alleged his loss of time as a harm and so does not allege pure economic loss."); *see also* *In re Solara Medical Supplies, LLC Customer Data Security Breach Litigation, __ F. Supp. 3d __, No. 3:19-cv-2284-H-KSC, 2020 U.S. Dist. LEXIS 80736, 2020 WL 2214152, at *4 (S.D. Cal. May 7, 2020)* (finding that plaintiffs do not allege pure economic loss because they alleged that they "lost time responding to the Breach as well as suffering from increased anxiety"); *but see* *Gardiner v. Walmart Inc.,* No. 20-cv-04618-JSW, 2021 U.S. Dist. LEXIS 75079, at *24 (N.D. Cal. Mar. 5, 2021) (finding that "[p]laintiff's allegations about the value of his lost time constitutes economic loss").

Based upon the allegations in the FAC, the Court finds that Plaintiffs do not allege solely economic loss. *See, e.g.*, Dkt. 10 ¶ 48 (alleging that Defendants' actions "caus[ed] [Plaintiffs] harms and losses including but not limited to [] the loss of control over the use of their identity, harm to their constitutional right to privacy, lost time dedicated to the investigation of and attempt to recover the loss of funds and cure harm to their privacy, the need for future [] time dedicated to the recovery and protection of further loss, and privacy injuries associated with having their sensitive personal and financial information disclosed"). Accordingly, **[*17]** the Court need not address whether a special relationship exists and turns to the elements of a negligence claim.

b. Negligence

To state a claim for negligence, a plaintiff must plead a duty, a breach of duty, proximate cause, and damages. *See* Corales v. Bennett, 567 F.3d 554, 572 (9th Cir. 2009).

Defendants argue that the FAC fails to adequately allege any breach of a general duty of care. Dkt. 15 at 34. Plaintiffs contend that Robinhood owed a duty to Plaintiffs because it was the custodian of their highly sensitive personal and financial information. Dkt. 17 at 13. The Court agrees with Plaintiffs. Plaintiffs have sufficiently alleged that Defendants owed a duty of reasonable care to Plaintiffs. Dkt. 10 ¶ 45 (alleging that "Defendants owed a duty of reasonable care . . . based upon Defendants' contractual obligations, custom and practice, right to control information and funds in its possession, exercise of control over the information and funds in its possession, authority to control the information and funds in its possession, and the commission of affirmative acts that resulted in said harms and losses"); *see* Flores-Mendez, 2021 U.S. Dist. LEXIS 18799, 2021 WL 308543, at *4 (determining that plaintiffs have adequately alleged a duty of care); *see also* Stasi v. Immediata Health Group Corp., --- F. Supp. 3d ----, No. 19cv2353 JM (LL), 2020 U.S. Dist. LEXIS 217097, 2020 WL 6799437, at *7 (S.D. Cal. Nov. 19, 2020) (citing cases that found that defendants had **[*18]** a duty to safeguard personal information and maintain adequate security measures).

Plaintiffs further allege that Defendants breached their duty of care in their manner of collecting, maintaining, and controlling their customers' sensitive personal and financial information. Dkt. 10 ¶ 46. Specifically, Plaintiffs contend that Defendants breached this duty by "stor[ing] customers' information in an unsecure format (¶ 16), fail[ing] to require multi-factor authentication at login (¶ 20), allow[ing] unauthorized users to link bank accounts to customer accounts without verification (¶ 15), and otherwise implement[ing] lax security practices that allowed unauthorized access to Plaintiffs' accounts (¶¶ 17, 46)." Dkt. 17 at 12-13. In Flores-Mendez, the Court reasoned that "[t]he consuming public has come to believe that internet companies, which take in their private information, have taken adequate security steps to protect the security of that information from any and all hackers or interventions." 2021 U.S. Dist. LEXIS 18799, 2021 WL 308543, at *4 ("The breach would not have occurred but for inadequate security measures, or so it can be reasonably inferred at the pleadings stage.").

Third, Plaintiffs have sufficiently alleged proximate cause, alleging **[*19]** that "unauthorized users gained access to, exfiltrated, stole, and gained disclosure of the sensitive personal and financial information of Plaintiffs and the Class, access to the funds customers had deposited into their accounts, and control over securities positions customers purchased." Dkt. 10 ¶ 48.

As to damages, Plaintiffs adequately allege damages, including "the loss of control over the use of their identity, harm to their constitutional right to privacy, lost time dedicated to the investigation of and attempt to recover the loss of funds and cure harm to their privacy, the need for future [] time dedicated to the recovery and protection of further loss, and privacy injuries associated with having their sensitive personal and financial information disclosed." *Id.*; *see* Flores-Mendez, 2021 U.S. Dist. LEXIS 18799, 2021 WL 308543, at *4.

c. Negligence Per Se

Plaintiffs also allege that Defendants "committed *per se* breaches of said duty by negligently violating the dictates of *California Civil Code sections 1798.82, et seq.*, and *1798.100, et seq.*, and the provisions of the California Constitution enshrining the right to privacy." Dkt. 10 ¶ 47. "In California, there are four elements required to establish a viable negligence *per se* theory: (1) the defendant violated a statute or regulation; (2) the violation **[*20]** caused the plaintiff's injury; (3) the injury resulted from the kind of occurrence the statute or regulation was designed to prevent; and (4) the plaintiff was a member of the class of persons the statute or regulation was intended to protect." *Carson v. Depuy Spine Inc., 365 F. App'x. 812, 815 (9th Cir. 2010)*. "District courts have relied on allegations of negligence per se to deny *Rule 12(b)(6)* motions to dismiss." *Stasi, 2020 U.S. Dist. LEXIS 217097, 2020 WL 6799437, at *12*.

As discussed below, Plaintiffs plead a plausible violation of the California Consumer Privacy Act (Section IV.B.4) and their constitutional right to privacy (Section IV.B.7). It is reasonable at this stage in the litigation to determine that Plaintiffs' alleged injuries are the injuries the California Consumer Privacy Act and constitutional right to privacy were intended to prevent and that Plaintiffs are members of the class of persons the California Consumer Privacy Act and constitutional right to privacy were intended to protect.

Accordingly, for the foregoing reasons, Defendants' motion to dismiss Plaintiffs' negligence claim is **DENIED**.

3. Breach of Contract Claim

To plead a claim for breach of contract, Plaintiffs must allege: "(1) the existence of a contract with Defendants, (2) their performance under that contract, (3) Defendants breached that **[*21]** contract, and (4) they suffered damages." *In re Google Assistant Privacy Litig., 457 F. Supp. 3d 797, 831 (N.D. Cal. 2020)* (citation omitted). Defendants contend that Plaintiffs' breach of contract claim fails because Plaintiffs' allegation that Robinhood promised to reimburse customers for account losses due to unauthorized activity is not enforceable. Dkt. 15 at 18. Defendants argue that this statement was made only after Plaintiffs opened their Robinhood accounts and after Plaintiffs Mehta's and Qian's accounts were taken over. *Id.* at 18-19. Further, Defendants contend that the statements that Robinhood is "[d]edicated to maintaining the highest security standards" and that "we take privacy and security seriously" are "not the kind of sufficiently definite promise that can support any legal claim." *Id.* at 19-21. Defendants also argue that Plaintiffs' injuries are not recoverable under a breach of contract claim because unauthorized collection of personal information does not create an economic loss and "[n]ominal damages, speculative harm, or threat of future harm do not suffice to show legally cognizable injury." *Id.* at 26 (quoting *In re Solara, 2020 U.S. Dist. LEXIS 80736, 2020 WL 2214152, at *5*) (citation omitted).

Plaintiffs contend that a Robinhood spokesperson stated that "[i]f we determine that our investigation that **[*22]** the customer has sustained losses because of unauthorized activity, we will compensate the customer fully for those losses." Dkt. 17 at 20 (citing Dkt. 20-3 Ex. 3). Further, Plaintiffs contend that the December 30, 2020 Robinhood Customer Agreement, which is attached to the FAC as Exhibit 2, states that Robinhood "will correct any error promptly." Dkt. 17 at 20. Plaintiffs argue that this same representation was also made in the April 28, 2020 version of the Robinhood Customer Agreement, prior to the alleged unauthorized access of Mehta's and Qian's accounts, although this document is not referenced in the FAC. *Id.* They contend that this statement would "presumably [] include unauthorized transfers." *Id.* Plaintiffs also reference, in their opposition but not in the FAC, the Robinhood Financial Privacy Notice, arguing that this document also contains actionable promises. *Id.* at 21 (citing Dkt. 20-5 Ex. 5). Finally, Plaintiffs contend that they plead appreciable and actual damage, as well as future economic loss. Dkt. 17 at 26.

Plaintiffs do not sufficiently allege a breach of contract claim. First, the version of the Robinhood Customer Agreement attached to the FAC is not the Customer **[*23]** Agreement that was effective at the time of the alleged breach of Plaintiffs Mehta's and Qian's accounts. *See* Dkt. 10 ¶ 50. Similarly, while Plaintiffs reference the Bloomberg statement and Financial Privacy Notice in their opposition for the assertion that these documents also show actionable promises, there is no specific reference to these documents in the FAC. *See* Dkt. 17 at 21. Plaintiffs have not met their burden of pleading the basis of their breach of contract claim. Accordingly, Defendants' motion to dismiss Plaintiffs' breach of contract claim is **GRANTED**.

4. California Consumer Privacy Act ("CCPA") Claim

The CCPA permits "[a]ny consumer whose nonencrypted and nonredacted personal information . . . is subject to an unauthorized access and exfiltration, theft, or disclosure as a result of the business's violation of the duty to implement and maintain reasonable security procedures and practices appropriate to the nature of the information to protect the personal information may institute a civil action." *Cal. Civ. Code § 1798.150(a)(1)*. Defendants argue that Plaintiffs' CCPA claim fails because Plaintiffs cannot allege any qualifying unauthorized disclosure or that any such disclosure was the result of a violation **[*24]** of "the duty to implement and maintain reasonable and appropriate security procedures and practices." Dkt. 15 at 27. Defendants further contend that CCPA's private right of action provision applies only to an unauthorized access of personal information from Robinhood's network, rather than independent third-party breaches of Plaintiffs' individual accounts. *Id.* at 28. Defendants also contend that Plaintiffs did not allege theft or disclosure of each required data element. *Id.* at 27. On the other hand, Plaintiffs contend that the California Legislature "intended for a broad range of activity or inactivity to constitute violations of the CCPA." Dkt. 17 at 15. Further, Plaintiffs contend that courts have defined "disclosure" under CCPA to include circumstances when personal information is accessible through the internet by unauthorized persons. *Id.* at 14 (citing *Stasi, 2020 U.S. Dist. LEXIS 217097, 2020 WL 6799437, at *16*).

The Court previously determined that Plaintiffs plausibly allege that a breach occurred. *See* Section IV.B.1. The Court finds *Stasi* instructive, where the parties determined that allegations that plaintiffs' personal and medical information were accessible via the internet constitute a "disclosure" under the CCPA. *Stasi, 2020 U.S. Dist. LEXIS 217097, 2020 WL 6799437, at *16*. Defendants have **[*25]** not met their burden of showing otherwise. Plaintiffs allege that Robinhood has customers'"sensitive personal and financial information, including but not limited to their names, social security numbers, dates of birth, mailing addresses, telephone numbers, bank account numbers, details of their income, bank account balances, financial transaction histories, credit histories, tax information, and credit scores" as well as "cell phone and mobile computing device location data, IP addresses, and Wi-Fi network data." Dkt. 10 ¶¶ 12-13. Plaintiffs also allege that Defendants violated their duty to implement and maintain reasonable security procedures by "allow[ing] unauthorized users to view, use, manipulate, exfiltrate, and steal the nonencrypted and nonredacted personal information of Plaintiffs and other customers, including their personal and financial information." *Id.* ¶ 58. At the pleadings stage, Plaintiffs sufficiently allege a plausible claim that their personal and financial information was subject to an unauthorized access based on violation of the CCPA. Accordingly, Defendants' motion to dismiss Plaintiffs' CCPA claim is **DENIED**.

5. Customer Records Act ("CRA") Claim

The CRA states **[*26]** that "[a] person or business that conducts business in California, and that owns or licenses computerized data that includes personal information, shall disclose a breach of the security of the system following discovery or notification of the breach in the security of the data to a resident of California . . . whose unencrypted personal information was, or is reasonably believed to have been, acquired by an unauthorized person . . . in the most expedient time possible and without unreasonable delay." *Cal. Civ. Code § 1798.82(a)*. Similar to the CCPA claim, Defendants contend that this claim fails without any allegation of any unauthorized access to Robinhood's computer network. Dkt. 15 at 12, 29; Dkt. 22 at 15. Further, Defendants argue that Plaintiffs fail to allege when Robinhood first learned of any incident for which it should have notified Plaintiffs sooner. Dkt. 15 at 30; Dkt. 22 at 15. Plaintiffs contend that "the Court can reasonably infer that Robinhood suffered a 'breach of the security system' for the purposes of the CRA" from the FAC. Dkt. 17 at 16. While not addressed in the opposition, Plaintiffs argued at the hearing that they allege in the FAC that Robinhood only disclosed the security breach **[*27]** after reports were leaked by anonymous sources to news outlets (Dkt. 10 ¶ 20) and that thousands of Robinhood customers attempted to contact Robinhood by email (*Id.* ¶ 4). Plaintiffs also acknowledged at the hearing that this claim can be amended.

As stated above, the Court finds that Plaintiffs plausibly allege a breach. *See* Section IV.B.1. However, the Court agrees with Defendants that Plaintiffs have not sufficiently alleged when Robinhood actually discovered that the unauthorized access took place. *See* *In re Yahoo! Inc. Customer Data Security Breach Litigation, 313 F. Supp. 3d 1113, 1146 (N.D. Cal. 2018)* (dismissing plaintiffs' CRA claim because plaintiffs failed to allege anything suggesting when defendants learned of the breach, which is necessary to determine whether there was unreasonable delay). Accordingly, Defendants' motion to dismiss Plaintiffs' CRA claim is **GRANTED**.

6. Consumers Legal Remedies Act ("CLRA") Claim

The CLRA prohibits "unfair methods of competition and unfair or deceptive acts or practices." *Cal. Civ. Code § 1770*. To state a claim under CLRA, a plaintiff must allege: "(1) a misrepresentation; (2) reliance on that misrepresentation; and (3) damages caused by that misrepresentation." *In re Sony PS3 Other OS Litigation, 551 F. App'x 916, 920 (9th Cir. 2014)*. "CLRA claims are governed by the 'reasonable consumer' test, under which a plaintiff must allege that **[*28]** 'members of the public are likely to be deceived.'" *Id.* (quoting *Williams v. Gerber Prods. Co., 552 F.3d 934, 938 (9th Cir.2008)*).

First, Defendants contend that this claim is subject to the heightened pleading requirements of *Federal Rule of Civil Procedure 9(b)*, and Plaintiffs fail to adequately allege any enforceable promise. Dkt. 15 at 16, 18-22. Defendants contend that the statement "to fully reimburse direct losses that happen due to unauthorized activity that is not your fault" was never made before the alleged third-party takeovers of Plaintiffs Mehta's and Qian's accounts. *Id.* at 11, 19-20. Additionally, Defendants contend that the statements made regarding Robinhood's security commitments such as "tak[ing] privacy and security seriously" and that Robinhood is "[d]edicated to maintaining the highest security standards" are "non-actionable puffery." *Id.* at 21-22 (citing *In re Yahoo! Inc. Customer Data Sec. Breach Litig., No. 16-MD-02752-LHK, 2017 U.S. Dist. LEXIS 140212, 2017 WL 3727318, at *26 (N.D. Cal. Aug. 30, 2017)*. Specifically, Defendants argue that these statements "say nothing about the specific characteristics" of Robinhood's security systems or practices. *Id.* at 22 (citing *In re Yahoo!, 2017 U.S. Dist. LEXIS 140212, 2017 WL 327318, at *26*). Finally, Defendants contend that Plaintiffs' failure to allege any economic losses undermines their statutory standing to pursue a CLRA claim. *Id.* at 26.

Plaintiffs contend that their allegations "are more than sufficient to put Robinhood **[*29]** on notice of the specific conduct for which relief is sought." Dkt. 17 at 27. Plaintiffs argue that "Robinhood makes specific, non-subjective guarantees of the sort courts find actionable when broken," contending that Robinhood's guarantees are "actionable, non-puffery." *Id.* at 21. Plaintiffs point to the statements that Robinhood offers "robust security tools" and that it maintains "the highest security standards," as well as the Financial Privacy Notice which states that Robinhood uses "computer safeguards and secured files and buildings." *Id.* at 21 (citing Dkt. 10 ¶ 14; Dkt. 20-5 Ex. 5). Further, Plaintiffs contend that Plaintiffs sufficiently allege economic loss. *Id.* at 29 (citing Dkt. 10 ¶¶ 27-29).

As stated on the record at the hearing, the Financial Privacy Notice is the only document presented by the Parties that may contain actionable, non-puffery statements. The statements Plaintiffs point to in the Privacy Policy and the 6 Commitments stating that Robinhood "take[s] privacy and security seriously" and that they are "[d]edicated to maintaining the highest security standards" are non-actionable puffery. "[G]eneralized, vague and unspecified assertions[] constitute[] mere puffery **[*30]** upon which a reasonable consumer could not rely." *Glen Holly Entm't, Inc. v. Tektronix Inc., 343 F.3d 1000, 1005 (9th Cir. 2003)* (internal quotation marks and citation omitted). A reasonable consumer could not rely on these statements as "specific, non-subjective guarantee[s]." *In re Yahoo!, 2017 U.S. Dist. LEXIS 140212, 2017 WL 3727318, at *26*. Additionally, while Plaintiffs reference the Financial Privacy Notice in their opposition, as stated in Section IV.B.3, there is no reference to this document in the FAC. *See* Dkt. 17 at 21. Plaintiffs have not met their burden of pleading with particularity the basis of their CLRA claim. Because this conclusion requires dismissal of Plaintiffs' CLRA claim, the Court need not address Defendants' argument regarding economic losses. Accordingly, Defendants' motion to dismiss Plaintiffs' CLRA claim is **GRANTED**.

7. Right to Privacy Claim

"The California Constitution creates a privacy right that protects individuals' privacy from intrusion by private parties." *In re Google Location History Litigation, 428 F. Supp. 3d 185, 196 (N.D. Cal. 2019)*. To allege a violation of California's constitutional right to privacy, a plaintiff must allege "(1) a legally protected privacy interest; (2) a reasonable expectation of privacy under the circumstances; and (3) conduct by the defendant that amounts to a serious invasion of the protected privacy interest." *Low v. LinkedIn Corp., 900 F. Supp. 2d 1010, 1024 (N.D. Cal. 2012)* (citing *Hill v. Nat'l Collegiate Athletic Ass'n, 7 Cal. 4th 1, 35-37, 26 Cal. Rptr. 2d 834, 865 P.2d 633 (1994)*). The California Supreme **[*31]** Court has explained that "[l]egally recognized privacy interests are generally of two classes: (1) interests in precluding the dissemination or misuse of sensitive and confidential information ('informational privacy'); and (2) interests in making intimate personal decisions or conducting personal activities without observation, intrusion, or interference ('autonomy privacy')." *Hill, 7 Cal. 4th at 35, 26 Cal. Rptr. 2d 834, 865 P.2d 633*. Further, "[a]ctionable invasions of privacy must be sufficiently serious in their nature, scope, and actual or potential impact to constitute an egregious breach of the social norms underlying the privacy right." *Id. at 37*.

Defendants contend that unauthorized access to Plaintiffs' personal and financial information is not conduct by Defendants for purposes of California's constitutional right to privacy. Dkt. 15 at 30-31. Defendants further argue that even if Plaintiffs could allege that Defendants were responsible for the unauthorized access, the unauthorized access does not rise to the level of a violation of California's constitutional right to privacy. *Id.*

The FAC alleges that Defendants' conduct resulted in a serious invasion of privacy due to the release of personal and financial information "including but not **[*32]** limited to names, social security numbers, dates of birth, mailing addresses, telephone numbers, bank account numbers, details of income, bank account balances, financial transaction histories, credit histories, tax information, credit scores, cell phone and mobile computing device location data, IP addresses, and Wi-Fi network data." Dkt. 10 ¶ 85. As alleged, the Court finds that Plaintiffs have adequately pleaded a claim for invasion of privacy. The unauthorized access to Plaintiffs' personal and financial information rises to the requisite level of an egregious breach of social norms. *See Richmond v. Mission Bank, No. 1:14-cv-0184-JLT, 2015 U.S. Dist. LEXIS 48452, 2015 WL 1637835, at *4 (E.D. Cal. Apr. 13, 2015)* ("[I]t is indisputable that the disclosure of details regarding one's personal finances or other financial information is a serious invasion of privacy.") (internal quotation marks and citation omitted). Accordingly, Defendants' motion to dismiss Plaintiffs' invasion of privacy claim is **DENIED**.

8. Unfair Competition Law ("UCL") Claim

The UCL creates a cause of action for business practices that are: (1) unlawful; (2) unfair, or (3) fraudulent. *Cal. Bus. & Profs. Code § 17200*. Each "prong" of the UCL provides a separate and distinct theory of liability. *Lozano v. AT & T Wireless Servs., Inc., 504 F.3d 718, 731 (9th Cir. 2007)*. Further, to have standing to **[*33]** pursue this claim, plaintiffs must show that they "lost money or property" because of Defendants' conduct. *Cal. Bus. & Prof. Code § 17204*; *see* *In re Facebook, Inc., Consumer Privacy User Profile Litig., 402 F. Supp. 3d 767, 804 (N.D. Cal. 2019)*.

a. Standing

Defendants contend that Plaintiffs have no statutory standing to assert the UCL claims, because their alleged losses are not recoverable. Dkt. 15 at 31. Additionally, Defendants argue that Plaintiffs cannot obtain restitution or injunctive relief. *Id.* To establish standing for a UCL claim, "[a] plaintiff must show he personally lost money or property because of his own actual and reasonable reliance on the allegedly unlawful business practices." *In re iPhone Application Litig., 844 F. Supp. 2d 1040, 1071* (citing *Kwikset Corp. v. Superior Court, 51 Cal.4th 310, 330, 120 Cal. Rptr. 3d 741, 246 P.3d 877 (2011)*). However, there are "innumerable ways in which economic injury from unfair competition may be shown." *Kwikset Corp., 51 Cal.4th at 323, 120 Cal.Rptr.3d 741, 246 P.3d 877*. For example, "[a] plaintiff may (1) surrender in a transaction more, or acquire in a transaction less, than he or she otherwise would have; (2) have a present or future property interest diminished; (3) be deprived of money or property to which he or she has a cognizable claim; or (4) be required to enter into a transaction, costing money or property, that would otherwise have been unnecessary." *Id.* (citation omitted).

Plaintiffs alleged that Mehta, Qian, and Furtado have all lost thousands of dollars. Dkt. **[*34]** 10 ¶¶ 27-29. Further, Plaintiffs allege that they have also lost control over the use of their identity, lost time, and future economic loss. *Id.* ¶¶ 21, 27-29, 93. Additionally, Plaintiffs allege that they "made these above-market rate payments that they would not have made, or would have paid less, but for Defendants' representations." *Id.* ¶ 92. Thus, Plaintiffs have sufficiently alleged a loss of money or property as a result of the UCL violation.

In their opposition, Plaintiffs state that they do not intend to seek restitution under the UCL or FAL. Dkt. 17 at 30 n.2. Plaintiffs allege that unauthorized user access is an "ongoing dilemma" that "will continue into the future." Dkt. 10 ¶¶ 19. Further, Plaintiffs allege that "Robinhood has repeatedly neglected to fully inform customers regarding the nature and scope of security failures and unauthorized activity." *Id.* ¶ 20. Plaintiffs face a "real and immediate threat" of future injury. *In re Yahoo!, 2017 U.S. Dist. LEXIS 140212, 2017 WL 3727318, at *31* (citing *City of Los Angeles v. Lyons, 461 U.S. 95, 111, 103 S. Ct. 1660, 75 L. Ed. 2d 675 (1983)*). Accordingly, at this stage of the litigation, Plaintiffs have adequately alleged standing to seek injunctive relief under the UCL. As Plaintiffs have pleaded their UCL claim under all three prongs, the Court will address in turn whether Plaintiffs **[*35]** have sufficiently alleged a claim under the UCL.

b. Unlawful Prong

"The unlawful prong of the UCL prohibits anything that can properly be called a business practice and that at the same time is forbidden by law." *In re iPhone Application Litig., 844 F. Supp. 2d at 1072* (citing *Cel-Tech Commc'ns, Inc. v. L.A. Cellular Tel. Co., 20 Cal.4th 163, 180, 83 Cal. Rptr. 2d 548, 973 P.2d 527 (1999)* (internal quotation marks omitted)). *Section 17200* of the Business and Professions Code permits injured customers to "borrow" violations of other laws and treat them as unfair competition that is independently actionable. *Id.*

Plaintiffs allege that Defendants engaged in unlawful business practices in violation of the CCPA, CRA, CLRA, California Constitution right to privacy, and negligence. Dkt. 17 at 28. The Court has already considered the adequacy of Plaintiffs' allegations as to the CCPA (Section IV.B.4), CRA (Section IV.B.5), CLRA (Section IV.B.6), California Constitution right to privacy (Section IV.B.7), and negligence (Section IV.B.2). Accordingly, the Court must **DISMISS** any claims based on violation of CRA and CLRA. *See* Sections IV.B.5-IV.B.6. On the other hand, Plaintiffs have stated a UCL claim based on CCPA, California Constitution right to privacy, and negligence, which the Court found to be sufficient pleaded. *See* Sections IV.B.2, IV.B.4, IV.B.7. Thus, Plaintiffs' **[*36]** UCL claim survives to the extent it is based upon the alleged violations of CCPA, California Constitution right to privacy, and negligence, and Defendants' motion to dismiss is **DENIED**.

c. Unfair Prong

"The UCL also creates a cause of action for a business practice that is 'unfair' even if not specifically proscribed by some other law." *In re iPhone Application Litig., 844 F. Supp. 2d at 1072* (citing *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal.4th 1134, 1143, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)*). "The UCL does not define the term 'unfair.' In fact, the proper definition of 'unfair' conduct against consumers 'is currently in flux' among California courts." *Hodsdon v. Mars, Inc., 891 F.3d 857, 866 (9th Cir. 2018)* (quoting *Davis v. HSBC Bank Nev., N.A., 691 F.3d 1152, 1169 (9th Cir. 2012)*). "Before *Cel-Tech*, courts held that 'unfair' conduct occurs when that practice 'offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.'" *Davis, 691 F.3d at 1169* (citing *S. Bay Chevrolet v. Gen. Motors Acceptance Corp., 72 Cal. App. 4th 861, 85 Cal. Rptr. 2d 301, 316 (1999)*). The balancing test in *S. Bay Chevrolet* requires the Court to "weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim." *Davis, 691 F.3d at 1169* (internal quotation marks and citation omitted). In *Cel-Tech*, the California Supreme Court established a more concrete definition of "unfair," defining it as "conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable **[*37]** to or the same as a violation of the law, or otherwise significantly threatens or harms competition." *20 Cal. 4th at 187, 83 Cal. Rptr. 2d 548, 973 P.2d 527*. Further, "any finding of unfairness to competitors under *section 17200* [must] be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition." *Id. at 186-87*. While the *Cel-Tech* test did not apply to actions by consumers, "some courts in California have extended the *Cel-Tech* definition to consumer actions." *Davis, 691 F.3d at 1170*.

Defendants argue that Plaintiffs' claim under the unfair prong fails, because Plaintiffs cannot adequately allege a violation of California privacy laws. Dkt. 15 at 31. Plaintiffs contend that Plaintiffs' claim under the unfair prong is "validly 'tethered' to the adequately pled violations of the CCPA, CRA, California Constitution, and CLRA." Dkt. 17 at 28. Further, Plaintiffs also argue that their allegations are sufficient under the balancing test. *Id.* at 28-29. Specifically, Plaintiffs argue that they adequately alleged that Robinhood's business practices has caused injury to customers, "far greater than any alleged countervailing benefit." *Id.* At the motion to dismiss stage, the Court cannot say that the benefits from Robinhood's business practices of allegedly emphasizing **[*38]** growth and profit over protecting their customers' personal and financial information and failing to implement industry-standard security measures outweighs the harm. *See* *In re Google Assistant Privacy Litig., 457 F. Supp. 3d at 844*; *In re iPhone Application Litig., 844 F. Supp. 2d at 1073* ("While the benefits of Apple's conduct may ultimately outweigh the harm to consumers, this is a factual determination that cannot be made at this stage of the proceedings."). Accordingly, Defendants' motion to dismiss on the unfair prong of the UCL is **DENIED**.

d. Fraudulent Prong

"In order to state a cause of action under the fraud prong of the UCL, a plaintiff must show that members of the public are likely to be deceived." *In re iPhone Application Litig., 844 F. Supp. 2d at 1073* (citing *Schnall v. Hertz Corp., 78 Cal. App. 4th 1144, 1167, 93 Cal. Rptr. 2d 439 (2000)*). "The challenged conduct 'is judged by the effect it would have on a reasonable consumer.'" *Davis, 691 F.3d at 1169* (quoting *Puentes v. Wells Fargo Home Mortg., Inc., 160 Cal. App. 4th 638, 72 Cal. Rptr. 3d 903, 909 (2008)*). *Rule 9(b)*'s heightened pleading requirements apply to UCL claims under this prong. *Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)*. Thus, claims under this prong must allege "an account of the time, place, and specific content of the false representations as well as the identities of the parties to the misrepresentations." *Swartz v. KPMG LLP, 476 F.3d 756, 764 (9th Cir. 2007)* (internal quotation marks and citation omitted).

Defendants make the same arguments for the fraud prong that they make regarding Plaintiffs' CLRA claim. *See* Section IV.B.6. Here, Plaintiffs have not met their burden **[*39]** of pleading with particularity the basis of their UCL claim under the fraudulent prong. As stated in Section IV.B.6, the Financial Privacy Notice is the only document presented by the Parties that may contain actionable, non-puffery statements, which is not referenced in the FAC. As alleged in the FAC, there are no statements by which a reasonable consumer would be likely to be deceived. Accordingly, Defendants' motion to dismiss on the fraudulent prong of the UCL is **GRANTED**.

9. False Advertising Law ("FAL") Claim

California's False Advertising Law makes it unlawful for any person to "induce the public to enter into any obligation" based on a statement that is "untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading." *Cal. Bus. & Prof. Code § 17500*. "Whether an advertisement is 'misleading' must be judged by the effect it would have on a reasonable consumer." *Davis, 691 F.3d at 1161-62* (citing *Williams, 552 F.3d at 938*). "A reasonable consumer is the ordinary consumer acting reasonably under the circumstances." *Id. at 1162* (internal quotation marks and citation omitted). "In applying this test, we are mindful that whether a business practice is deceptive will usually be a question of fact not appropriate **[*40]** for decision on a motion to dismiss." *Id.* (citing *Williams, 552 F.3d at 938*) (internal quotation marks omitted).

Defendants make similar arguments for the FAL claim that they make regarding Plaintiffs' UCL claim. *See* Section IV.B.8. While Plaintiffs have adequately alleged a "real and immediate threat" of injury from Defendants, Plaintiffs have not met their burden of pleading with particularity the basis of their FAL claim. Like Plaintiffs' CLRA claim (Section IV.B.6) and UCL claim under the fraudulent prong (Section IV.B.8.d), the FAC does not reference the Financial Privacy Notice. As alleged in the FAC, there are no statements by which a reasonable consumer would have been misled to enter into any obligation. Accordingly, Defendants' motion to dismiss Plaintiffs' FAL claim is **GRANTED**.

V. CONCLUSION

For the reasons stated above, the Court **GRANTS IN PART AND DENIES IN PART** Defendants' motion to dismiss pursuant to *Rule 12(b)(6)*. Specifically, Defendants' motion to dismiss Plaintiffs' claims for negligence, violations of the CCPA, constitutional right to privacy, and unlawful and unfair prongs of the UCL are **DENIED**. Defendants' motion to dismiss Plaintiffs' claims against Defendants for breach of contract, violations of **[*41]** CRA, CLRA, fraudulent prong of the UCL, and FAL are **GRANTED WITH LEAVE TO AMEND**.

Plaintiffs may file an amended complaint by **May 20, 2021**. Plaintiffs may not add new causes of action or parties without leave of the Court or stipulation of the parties pursuant to *Federal Rule of Civil Procedure 15*. Failure to cure the defects identified by this Order will be subject to dismissal with prejudice.

SO ORDERED.

Opinion

REPORT AND RECOMMENDATION

I. Recommendation [*2]

It is respectfully recommended that the Court grant in part and deny in part Defendants' Motion to Dismiss (ECF No.78) the Amended Complaint (ECF No. 43.) It is further recommended that the Court dismiss three of the defendants named in the Amended Complaint pursuant to the screening provisions set forth in *28 U.S.C. § 1915(e)(2)(B)(ii)*.

II. Report

A. Relevant Procedural History

Plaintiff Michael Gorrio is a state prisoner in the custody of the Pennsylvania Department of Corrections ("DOC") who is currently housed at SCI Phoenix. The events in question in this lawsuit occurred between December 2018 and February 2020 when Plaintiff was housed at SCI Fayette. Plaintiff alleges that the numerous defendants in this case, all of whom worked at SCI Fayette during the relevant time period, engaged in a wide-ranging conspiracy to commit violations under the Racketeer Influenced and Corrupt Organization ("RICO") Act, *18 U.S.C. §§ 1961-1968*. Plaintiff also claims Defendants violated the Hobbs Act, *18 U.S.C. § 1951* and the Clayton Act, *15 U.S.C. §§ 12-15*, and brings numerous constitutional tort claims under *42 U.S.C. § 1983* as well as related state-law claims.

Plaintiff is proceeding *pro se*. He commenced this action in October 2019 when he was housed at SCI Fayette. In December 2019 the Court granted **[*3]** his motion for leave to proceed *in forma pauperis*, and his Complaint (ECF No. 6) was docketed. In May 2020 Plaintiff filed a motion for leave to file an amended complaint, which the Court granted. (*See* ECF Nos. 40, 41). Plaintiff then filed the Amended Complaint (ECF No. 43), which is the operative pleading, in June 2020. He also filed a RICO Case Statement. (ECF No. 44.)

Plaintiff names as defendants the following thirty-four officials and employees of SCI Fayette: (1) Superintendent Mark V. Capozza; (2) CO Scoles; (3) CO Evans; (4) CO Terravechia; (5) CO Dicks; (6) CO Emminger; (7) CO Rockridge; (8) CO Francis; (9) CO Caraselly; (10) CO Fetchco; (11) CO Hailey; (12) CO Burrie; (13) CO Minor; (14) CO Poland; (15) CO Regina; (16) CO Cox; (17) CO Ohrman; (18) CO Twardzik; (19) CO Saxion; (20) CO Henry; (21) Sgt. McKileen; (22) Sgt. Walshan; (23) Sgt. Haines; (24) Sgt. Wiles; (25) Lt. Wood; (26) Lt. Dailey; (27) Lt. Rusnak; (28) Lt. Parker; (29) Lt. Rhodes; (30) Superintendent Assistant Rhonda House and (31) Luis Allen, who were the Grievance Coordinators at SCI Fayette; (32) Edward Bohna, the Certified School Principal at SCI Fayette; (33) Brittany Kimmel, the School Guidance Counselor **[*4]** at SCI Fayette; and, (34) Beth Rudzinski, the Hearing Examiner at SCI Fayette. (Amend. Compl. ¶¶ 6-8.) Plaintiff sued each defendant in his or her official and individual capacities. (*Id.*)

Plaintiff also states in the Amended Complaint that he seeks to bring claims against numerous John/Jane Doe defendants who worked at SCI Fayette, including medical personnel and other correctional officers and lieutenants. (*Id.* ¶¶ 7-8.)

Defendants have filed a Motion to Dismiss (ECF No. 78) the Amended Complaint pursuant to *Rule 12(b)(6)* in which they seek to dismiss certain claims asserted by Plaintiff. (*See also* Brief in Support, ECF No. 79.) As explained below, Defendants are seeking dismissal of eleven of the seventeen causes of action Plaintiff brings in the Amended Complaint. They are not seeking dismissal of his constitutional tort claims related to incidents of excessive force, sexual assault, the interference with and/or deprivation of his education, or his state law claim of assault and battery. In his brief in opposition to Defendants' motion, Plaintiff contends that the Court should not dismiss any of his claims. (ECF No. 86.)

B. Standard of Review

At the pleading stage, *Rule 8* requires a "short plain statement" **[*5]** of facts, not legal conclusions, "showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)(2)*. *Federal Rule of Civil Procedure 12(b)(6)* provides for the dismissal of a complaint, in whole or in part, for "failure to state a claim upon which relief can be granted." *Fed. R. Civ. P. 12(b)(6)*. The Supreme Court held that, pertaining to *Rule 12(b)(6)*'s standard of review, a complaint must include factual allegations that "state a claim to relief that is plausible on its face." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (citing *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007))*. "[W]ithout some factual allegation in the complaint, a claimant cannot satisfy the requirement that he or she provide not only 'fair notice' but also the 'grounds' on which the claim rests." *Phillips v. County of Allegheny, 515 F.3d 224, 232 (3d Cir. 2008)*.

In determining whether a plaintiff has met this standard, a court must reject legal conclusions unsupported by factual allegations, "[t]hreadbare recitals of the elements of a cause of action, supported by mere conclusory statements;" "labels and conclusions;" and "'naked assertion[s]' devoid of 'further factual enhancement.'" *Iqbal, 556 U.S. at 678* (citations omitted). Mere "possibilities" of misconduct are insufficient. *Id. at 679*.

The Court of Appeals has summarized this inquiry as follows:

> To determine the sufficiency of a complaint, a court must take three steps. First, the court must "tak[e] note of the elements a plaintiff must **[*6]** plead to state a claim." *Ashcroft v. Iqbal, 556 U.S. 662, 129 S.Ct. 1937, 1947, 173 L.Ed.2d 868 (2009)*. Second, the court should identify allegations that, "because they are no more than conclusions, are not entitled to the assumption of truth." *Id. at 1950*. Third, "whe[n] there are well-pleaded factual allegations, a court should assume their veracity and then determine whether they plausibly give rise to an entitlement for relief." *Id.* This means that our inquiry is normally broken into three parts: (1) identifying the elements of the claim, (2) reviewing the complaint to strike conclusory allegations, and then (3) looking at the well-pleaded components of the complaint and evaluating whether all of the elements identified in part one of the inquiry are sufficiently alleged.

Malleus v. George, 641 F.3d 560, 563 (3d Cir. 2011).

"A document filed *pro se* is to be liberally construed and a pro se complaint, however inartfully pleaded, must be held to less stringent standards than formal pleadings drafted by lawyers[.]" *Erickson v. Pardus, 551 U.S. 89, 94, 127 S. Ct. 2197, 167 L. Ed. 2d 1081 (2007)* (internal citation and quotation marks omitted); *see also* *Higgs v. Att'y Gen., 655 F.3d 333, 339 (3d Cir. 2011)* ("The obligation to liberally construe a pro se litigant's pleadings is well-established.").

C. Facts Alleged in the Amended Complaint

1. The December 16, 2018 excessive force incident and Plaintiff's subsequent confinement in the RHU for 18 days

On December **[*7]** 16, 2018, Plaintiff was in the HC Unit attempting to negotiate the sale of chicken pieces to another inmate. CO Francis approached Plaintiff, accused him of being high on drugs, and handcuffed him. (Amend. Compl. ¶¶ 10-11.) Other officers arrived on the scene to escort Plaintiff to the medical unit and/or the "level 5" or Restrict Housing Unit ("RHU"). (*Id.* ¶ 14) Plaintiff alleges that Sgt. Walshan and other corrections officers subjected him to excessive force when they restrained him during this incident. (*Id.* ¶¶ 15-18.) Afterwards, Plaintiff was examined by medical personnel and taken to the Psychiatric Observation Center ("POC") where he spent the night. (*Id.* ¶¶ 19-21.)

The following day, on December 17, 2018, Plaintiff was placed in the RHU in solitary confinement and he remained there for approximately 18 days. (*Id.* ¶ 21.) During this time Plaintiff submitted a Request to Staff. On December 29, 2018, Lt. Wood responded: "You become a problem you stay in the hole." (*Id.* ¶ 28.) Plaintiff was released from the RHU to the general population after his toxicology tests came back negative. (*Id.* ¶ 21.)

2. Plaintiff's allegations pertaining to his college correspondence courses

Plaintiff **[*8]** was taking correspondence college courses with Colorado State University and Adams State University while he was incarcerated at SCI Fayette. (*Id.* ¶ 51.) In January 2019, Plaintiff sent a Request to Staff Member to Kimmel, the Guidance Counselor at SCI Fayette, in which he inquired about education-related matters. In a response dated January 25, 2019, Kimmel informed Plaintiff: "Per institutional policy any inmate pursuing correspondence courses must be 6-month misconduct free. You can write me in July. You misbehave we revoke your education completely and place you in the RHU, per Supt. Capozza." (*Id.* ¶ 24.)

Plaintiff contacted Edward Bohna, SCI Fayette's Certified School Principal, in February 2019 inquiring about the completion of his ongoing college courses. Similar to Kimmel, Bohna advised Plaintiff that he would have to wait six months to take his exams. (*Id.* ¶ 25.) Plaintiff avers that the delay would have resulted in the automatic disqualification of the courses in which he was enrolled at the time. (*Id.*)

Plaintiff's father contacted the Chief Education Administrator of the Western Region. (*Id.* ¶ 26.) According to the Amended Complaint, the Administrator stated that Plaintiff **[*9]** was "authorized and entitled to impending college correspondence courses, and that Bohna and Kimmel were directed to administer the examinations and rectify the issue at bar." (*Id.*)

Around this same time, Plaintiff submitted a Request to Staff Member to Lt. Wood, who responded: "You already went to the hole for using drugs. The answer is NO and we are not going to do more work after you make us do more work. Your education is a privilege not a right." (*Id.* ¶ 28.) On another occasion, Lt. Wood wrote to Plaintiff in a response to a Request to Staff Member: "Staff at this institution are becoming very irritated of your actions. You continue to harass education and wonder why we put you in the hole. Keep up the crap and you will NEVER leave the hole. Capozza gives us discretion to do what we want to whom we want." (*Id.*)

Superintendent Capozza, in another response to a Request to Staff Member, wrote to Plaintiff: "It is your responsibility to complete college course material—NO ONE ELSE. Also, you are starting to become a problem here. The next time I hear your name I will personally [E]NSURE that you go to the RHU to stay and NOT complete your education AT ALL." (*Id.* ¶ 29.)

Plaintiff alleges **[*10]** that Kimmel and Bohna's actions were in retaliation for his filing of unidentified grievances and "filing legal action." (*Id.* ¶ 26.)

3. <u>The April 25, 2019 excessive force incident</u>

According to the allegations of the Amended Complaint, on April 25, 2019 CO Hailey and CO Burrie escorted Plaintiff to a misconduct hearing and while doing so they slammed Plaintiff "into miscellaneous stationary objects along the way." (*Id.* ¶ 32.) Officer Hailey also slammed Plaintiff's head into the wall multiple times after they entered the hearing room. (*Id.* ¶ 33.)

Plaintiff required medical treatment for the head and face injuries he sustained. (*Id.* ¶¶ 36-37.) Following this incident, Plaintiff alleges, Officer Hailey filed a "fraudulent" misconduct report that falsely accused Plaintiff of refusing to obey an order during the hearing. (*Id.* ¶ 35.)

4. <u>The May 4, 2019 excessive force incident and confiscation of Plaintiff's legal papers and eyeglasses</u>

When Plaintiff was housed at SCI Forest in 2015, he filed a civil rights lawsuit against six staff members of that institution. That civil action was filed in this Court at *Gorrio v. C.O. Sheffer, et al.*, No. 1:15-cv-312. The Court may take judicial notice of the **[*11]** information on the docket of this case, which is a matter of public record. The docket reflects that by 2019, there were two remaining claims against two of the defendants Plaintiff had sued, and the trial in that case was scheduled to commence on May 20, 2019. While Plaintiff had litigated much of that lawsuit *pro se*, John F. Mizner entered his appearance as Plaintiff's counsel on May 8, 2019. *See* ECF Nos. 115, 129, 130 in *Gorrio v. C.O. Sheffer*, No. 1:15-cv-312.

Several days before, on May 4, 2019, unidentified officers arrived at Plaintiff's cell to conduct a "random search." (Amend. Compl ¶ 38.) Plaintiff avers that the officers stated to him: "give us all your paperwork, you think this is a fucking game filing lawsuits against us, now you fucked up, pass out all legal work!" (*Id.* ¶ 39.) According to the allegations in the Amended Complaint, the unidentified officers accused Plaintiff of being insubordinate and, as a result, Lt. Dailey arrived at his cell and deployed OC spray directly onto Plaintiff's face. (*Id.* ¶¶ 40-42.) Plaintiff alleges that Sgt. McKileen subsequently filed a false misconduct report against Plaintiff in order to cover up and justify Lt. Daily's use of excessive **[*12]** force. (*Id.* ¶ 41.)

After the May 4, 2019 incident, Plaintiff was removed from his cell, was administered decontamination solutions, and was moved to the L-Unit. (*Id.* ¶ 42.) He remained in that unit for two weeks. During much of that time, Plaintiff had access to some of his litigation materials for his case that was scheduled to begin trial on May 20, 2019. Plaintiff avers that approximately two days before his trial, and out of "sheer vindictiveness" and retaliation for him proceeding with that lawsuit, "a large portion" of his litigation materials (such as trial exhibits and direct and cross examination questions) as well as "grievance documentation" were removed from his cell and destroyed. The Amended Complaint does not indicate who participated in this incident and/or allegedly destroyed his documents.

Plaintiff also noticed that his prescription eyeglasses were missing. (*Id.* ¶ 43.) The Amended Complaint indicates that Lt. Dailey was responsible for the confiscation of Plaintiff's eyeglasses. (*Id.* ¶ 44.)

Plaintiff alleges that he was not able to proceed forward with his trial without his legal documents and eyeglasses. (*Id.* ¶ 43.) Consequently, he entered into a settlement. Plaintiff **[*13]** claims that the actions to which he was subjected in May 2019 were taken to obstruct his ability to litigate this case. (*Id.* ¶¶ 41-43, 51.) The docket confirms, however, that Plaintiff was represented by counsel as of May 8, 2019. On August 29, 2019, his attorney filed a stipulation of voluntary dismissal pursuant to *Rule 41(a) of the Federal Rules of Civil Procedure*. On September 4, 2019, the Court dismissed the case because the parties reached a settlement. *See* ECF Nos. 143, 144 and 145 in *Gorrio v. C.O. Sheffer*, No. 1:15-cv-312.

5. Lt. Wood and Lt. Daily allegedly coerced Plaintiff to withdraw Grievance #804846, which Plaintiff filed following the May 4, 2019 incident

Plaintiff filed Grievance #804846 regarding the alleged excessive use of force administered against him by Lt. Dailey and "RHU staff" during the May 4, 2019 incident. (Amend. Compl. ¶ 44.) Lt. Wood interviewed Plaintiff about the incident on June 18, 2019. During this interview, Plaintiff alleges, Lt. Wood coerced him into withdrawing Grievance #804846 by threatening that Plaintiff would have to stay "in the hole" "for an indefinite amount of time" if he did not withdraw this grievance. (*Id.*) Plaintiff further alleges that Lt. Wood told him that if he withdrew the grievance **[*14]** Lt Wood would "do away with the misconduct [he received regarding the May 4, 2019 incident] and the seventy-five (75) days" he was currently serving "in the hole" as a sanction. (*Id.*)

Plaintiff further alleges that Lt. Wood "instigated Lt. Dailey to further intimidate the Plaintiff and coerce him" into withdrawing Grievance #804846. (*Id.*) Specifically, Lt. Dailey informed Plaintiff that he had his eyeglasses and would return them if he withdrew the grievance. Thereafter, Plaintiff submitted a letter withdrawing Grievance #804846. (*Id.*)

Sgt. Reichart subsequently returned Plaintiff's eyeglasses to him. (*Id.* ¶ 49.) Plaintiff alleges that Sgt. Reichart stated to him that "next time" his eyeglasses would be "confiscated indefinitely" and that "Superintendent Capozza authorizes officers to do what they please to inmates who file grievances and lawsuits." (*Id.*)

6. Grievance #817811 challenging the alteration of two of Plaintiff's publications

Plaintiff alleges that on August 6, 2019 he filed Grievance #817811 because two of his publications—Atomic Habits and 10 Things Successful People Do—were altered from their original forms by cutting their cardboard bindings in accordance with DOC policy. **[*15]** (Amend. Compl. ¶ 45.) The Amended Complaint does not indicate against whom, if anyone, Plaintiff filed Grievance #817811.

7. The incident in which CO Terravechia and CO Evans allegedly planted drugs in the binding of one of Plaintiff's books

Plaintiff alleges that on October 15, 2019, CO Terravechia and CO Evans planted drugs in the binding of one of his books on the orders of Lt. Wood. (*Id.* ¶ 49.) Plaintiff received a misconduct because drug content was found among his possessions. He alleges that he was "falsely imprisonment" in the RHU as a result. (*Id.*)

8. <u>The alleged confiscation and destruction of Plaintiff's "legal documentation or material" in December 2019 and February 2020</u>

Plaintiff alleges that on December 12, 2019, after he filed the instant lawsuit, Sgt. Wiles and CO Saxon (who were not named defendants in the original complaint) searched his RHU cell at the direction of the security search team. (*Id.* ¶ 52.) During their search they allegedly confiscated and threw in the trash "legal documentation" such as requests to staff and other "critical courthouse documentation[.]" (*Id.*)

Plaintiff further alleges that between February 10, 2020 and February 19, 2020, CO Ohrman, CO Cox, **[*16]** CO Twardzik, CO Regina and Sgt. Haines (who were not named defendants in the original complaint) "targeted" him by "unjustifiably destroying his property and legal material." (*Id.* ¶ 59.) The Amended Complaint does not indicate what property or legal material they allegedly destroyed.

9. <u>CO Henry and CO Saxion allegedly planted paperclips in Plaintiff's food</u>

Plaintiff alleges that on December 17, 2019, CO Henry and CO Saxion (who were not named defendants in the original complaint) planted paper clips in the garden burger on his lunch tray. (*Id.* ¶¶ 54, 55.) Plaintiff was unaware that they had done so and he bit into the burger. One of the pieces lodged into Plaintiff's gums and he required "minor dental procedure for front tooth crack/chip." (*Id.* ¶ 55.)

10. <u>The February 21, 2020 strip search and destruction of Plaintiff's legal and personal property</u>

Plaintiff alleges that on February 21, 2020 CO Regina conducted a "sexually deviant" strip search of Plaintiff in the presence of CO Cox, CO Ohrman and Sgt. Haines. (*Id.* ¶ 60.) (None of these individuals were named defendants in the original complaint). During this incident the officers made sexually harassing and other inappropriate and insulting **[*17]** comments to Plaintiff. (*Id.*)

Plaintiff alleges that CO Ohrman and Sgt. Haines then entered his cell "and began destroying legal, business, educational and personal property." (*Id.* ¶ 61.) Sgt. Haines stated to Plaintiff: "these are the orders of Superintendent Capozza, to destroy property and legal material of jailhouse lawyers and who file grievances and lawsuits." (*Id.*) CO Ohrman said to Plaintiff: "I don't care if there is absolutely no contraband here, I am going to write you up and give you more [disciplinary conduct] time," and "I am talking about all the contraband that is in there, and if I cannot find it, I will make it appear." (*Id.*)

Plaintiff alleges that during this incident Sgt. Haines and CO Ohrman destroyed: (1) numerous photographs of Plaintiff's family members; (2) 325 pages of legal documents from his prior civil action at No. 1:15-cv-312 and 125 pages of evidence related to the instant civil action; (3) 215 songs composed and created by Plaintiff; (4) "1200 pages of business blueprints, articles of incorporate[ion], construct[ion] designs, and intellectual property, original, invaluable and irreplaceable in value"; and (5) "125 pages of study guide notes and handwritten **[*18]** notes on college course curriculums[.]" (*Id.*)

11. <u>The Grievance Coordinators' alleged failure to respond to grievances within the allotted time frame set forth in DCO-ADM 804 Policy</u>

Finally, Plaintiff alleges that he filed numerous grievances pertaining to the events discussed in the Amended Complaint. (*Id.* ¶ 50.) He avers that Superintendent Assistant Rhonda House and Luis Allen, who were the Grievance Coordinators at SCI Fayette, failed to respond to many of those grievances. (*Id.* ¶¶ 9, 50.)

11. <u>Plaintiff's Claims</u>

Plaintiff states in the Amended Complaint that he is bringing against all or some of the defendants the following causes of action:

- Civil RICO (Count A)

- Deliberate Indifference to Safety (Count B)
- Deliberate Indifference to Healthcare (Count C) (this claim is brought only against unknown "Jane Doe" medical personnel)
- Excessive Use of Force (Count D)
- Retaliation (Count E)
- Respondeat Superior (Count F)
- Wrongful Imprisonment (Count G)
- Conspiracy (Count H)
- Deprivation of the Right to an Education and Property Interest (Count I)
- Assault and Battery (Count J)
- Negligence (Count K)
- Intentional Infliction of Emotion Distress (Count L)
- Due Process (Count M)

- Sexual Harassment **[*19]** (Count N)
- Slavery/Involuntary Servitude (Count O)
- the Hobbs Act (Count P)
- the Clayton Act (Count Q).

(*Id.* at pp. 15-19.)

Plaintiff seeks compensatory and punitive damages against each defendant. He also seeks an injunction ordering that he be released from unlawful segregation and transferred to another correctional institution. (*Id.* at pp. 20-21.)

Defendants move for the dismissal of all claims asserted against them in their official capacities and for his claim of injunctive relief. They also contended that the Court should dismiss the following causes of action for failure to state a claim: Civil Rico (Count A); Retaliation (Count E); Respondeat Superior (Count F); Wrongful Imprisonment (Count G); Conspiracy (Count H); Negligence (Count K); Intentional Infliction of Emotional Distress (Count L); Due Process (Count M); Slavery/Involuntary Servitude (Count O); the Hobbs Act (Count P); and the Clayton Act (Count Q).

D. Discussion

1. Plaintiff's official capacity and injunctive relief claims

In the Amended Complaint, Plaintiff has asserted claims against all Defendants in both their official and individual capacities. Defendants contend that Plaintiff's official capacity claims are barred by their immunity from such **[*20]** claims under the *Eleventh Amendment*, and that Plaintiff's claim for injunctive relief is moot since he is no longer housed at SCI Fayette.

The *Eleventh Amendment* protects States and their agencies and departments from suit in federal court. *See, e.g., Lavia v. Pa., Dep't of Corr., 224 F.3d 190, 195 (3d Cir. 2000)*; *Kentucky v. Graham, 473 U.S. 159, 167 n.14, 105 S. Ct. 3099, 87 L. Ed. 2d 114 (1985)*; *Pennhurst State School & Hospital v. Halderman, 465 U.S. 89, 100, 104 S. Ct. 900, 79 L. Ed. 2d 67 (1984)* ("[I]n the absence of consent a suit in which the State or one of its agencies or departments is named as the defendant is proscribed by the *Eleventh Amendment*."). Individual state employees sued in their official capacity are also entitled to *Eleventh Amendment* immunity because "official capacity suits generally represent only another way of pleading an action against the state." *Betts v. New Castle Dev. Ctr., 621 F.3d 249, 254 (3d Cir. 2010)* (citing *Lombardo v. PA. Dept. of Pub. Welfare, 540 F.3d 190, 194 (3d Cir. 2008))*.

As part of the executive department of the Commonwealth, the DOC is entitled to *Eleventh Amendment* immunity. *Lavia, 224 F.3d at 195*. Therefore, its employees share in the Commonwealth's *Eleventh Amendment* immunity to the extent that they are sued in their official capacities. *Jones v. Unknown D.O.C. Bus Driver & Transportation Crew, 944 F.3d 478, 482 (3d Cir. 2019)*. Accordingly, the official capacity claims against Defendants are barred by the *Eleventh Amendment*.

Moreover, although suits seeking purely prospective relief against a state official in his or her official capacity for ongoing violations of federal law are not barred by the Eleventh Amendment, Ex Parte Young, 209 U.S. 123, 159-60, 28 S. Ct. 441, 52 L. Ed. 714 (1908); Graham, 473 U.S. at 167 n.14, Plaintiff no longer has a viable claim for prospective relief against any of the defendants. *See, e.g.,* Christ the King Manor, Inc. v. Sec'y U.S. Dep't of Health & Human Servs., 730 F.3d 291, 318 (3d Cir. 2013) (while claims against state officers **[*21]** in their official capacity for prospective relief are not barred by the Eleventh Amendment, "remedies are limited to those that are 'designed to end a continuing violation of federal law.'") (quoting Green v. Mansour, 474 U.S. 64, 68, 106 S. Ct. 423, 88 L. Ed. 2d 371 (1985)). Here, Plaintiff's claim for injunctive relief is moot since he has been transferred from SCI Fayette and is now housed as SCI Phoenix. *See, e.g.,* Sutton v. Rasheed, 323 F.3d 236, 248 (3d Cir. 2003) ("An inmate's transfer from the facility complained of generally moots the equitable and declaratory claims."); Johnson v. Wenerowicz, 440 F. App'x 60, 62 (3d Cir. 2011) ("As the District Court correctly determined, Johnson's requests for injunctive and declaratory relief against the named DOC defendants were rendered moot by his transfer to SCI-Fayette[.]"); Santiago v. Sherman, No. 1:05-cv-153, 2007 U.S. Dist. LEXIS 5365, 2007 WL 217353, *3 (W.D. Pa. Jan. 25, 2007) ("In the prison context, the transfer of an inmate from the facility complained of moots claims for injunctive relief involving that facility.").

Accordingly, the Court should grant Defendants' motion to the extent that it seeks dismissal with prejudice of the official capacity claims against Defendants. Additionally, the Court also should dismiss with prejudice Plaintiff's claim for injunctive relief because it was rendered moot by his transfer to SCI Phoenix.

2. Civil RICO

Plaintiff's first claim, "Count A," is labeled as **[*22]** a Civil RICO claim against all Defendants. The basis of this claim is that Defendants "exert[ed] sadistic and malicious force, failing to intervene, imposing adverse action, disregarding the psychological and emotional state, and unjustifiably seizing and apprehending [him] resulting in repeated placement in solitary confinement, amongst other 'predicate acts'" thereby committing civil RICO violations. (Amend. Compl. at p. 15, ¶ 64.). Throughout the Amended Complaint, and in his RICO Case Statement (ECF No. 44), Plaintiff also asserts that all of the alleged wrongful conduct committed by Defendants was part of their conspiracy to commit RICO violations. He further asserts that they committed fraud, obstructed justice, conspired to injure him in various ways, and repeatedly engaged in "patterns of racketeering." Such legal conclusions are not relevant when evaluating a motion to dismiss, however. *See, e.g., Fowler*, 578 F.3d at 210-11.

The federal civil RICO statute provides that "[a]ny person injured in his business or property by reason of a violation of section 1962 of this chapter[, which prohibits racketeering activity,] may sue therefor in any appropriate United States district court[.]" 18 U.S.C. § 1964(c). A civil RICO claimant must **[*23]** show a violation of the substantive RICO statute (18 U.S.C. § 1962) and also that he sustained (1) an injury to his *business or property* by reason of a violation of § 1962; and (2) that his injury was caused by the defendants' racketeering activities. *See, e.g.,* Maio v. Aetna, Inc., 221 F.3d 472, 482-84 (3d Cir. 2000).

Here, Plaintiff's RICO claim is premised upon all of the alleged wrongful acts that he contends Defendants committed in the Amended Complaint, and he asserts that they did so as part of a conspiracy to violate RICO. However, no allegation in the Amended Complaint or Plaintiff's RICO Case Statement[1] provides a plausible basis for concluding that Defendants engaged in "racketeering activity" as defined by 18 U.S.C. § 1961. *See, e.g.,* Brookhart v. Rohr, 385 F. App'x 67, 70 (3d Cir. 2010) ("Conclusory allegations of a pattern of racketeering activity, in this case, a fraudulent scheme, are insufficient to survive a Rule 12(b)6) motion.")

Additionally, Defendants are correct that Plaintiff lacks standing to bring a civil RICO claim against them because he has failed to identify a specific loss to his "business or property" as those terms are defined under the statute. *See, e.g.,* Maio, 221 F.3d at 481 n.7. Importantly, personal injuries do not qualify as an injury under RICO. *See, e.g.,*

[1] "Courts may consider the RICO case statement in assessing whether plaintiffs' RICO claims should be dismissed." Glessner v. Kenny, 952 F.2d 702, 712 n. 9 (3d Cir.1991), overruled on other grounds by Jaguar Cars, Inc. v. Royal Oaks Motor Car Co., 46 F.3d 258, 260 (3d Cir.1995).

Williams v. BASF Catalysts LLC, 765 F.3d 306, 323 (3d Cir. 2014) ("[I]n construing the federal RICO law, [the Third] Circuit has rejected **[*24]** the argument that personal injuries qualify as RICO injuries to 'business or property.'") (citing *Maio, 221 F.3d at 492*). Thus, the injuries Plaintiff alleges he sustained as a result of the excessive force incidents, the sexual assault incident, the paperclip incident, his housing in the RHU and/or solitary confinement and his resulting inability to complete is college coursework, are not injuries to his "business or property" under RICO. *See, e.g., Ettiben-Issaschar v. ELI Am. Friends of the Israel Ass'n for Child Prot., Inc., No. 15-cv-6441, 2016 U.S. Dist. LEXIS 1554, 2016 WL 97682, *3 (E.D. Pa. Jan. 7, 2016)* ("The type of harm suffered by [plaintiff] for which she seeks to recover in this action—*i.e.*, harm related to her detention and the alleged abuse she suffered while detained—is not an injury to 'business or property' that is cognizable under the RICO laws.").

Plaintiff also claims that he was injured when his legal materials and other personal items, such as photographs, songs he composed, business blueprints and designs, and documents related to his college coursework were destroyed. To establish the requisite injury for civil RICO purposes, however, Plaintiff must "demonstrate a 'concrete financial loss' in the form of an 'ascertainable out-of-pocket' deprivation." **[*25]** *Dipplito v. United States, No. 13-cv-175, 2015 U.S. Dist. LEXIS 170498, 2015 WL 9308238 (D. N.J. Dec. 21, 2015)* (citing *Magnum v. Archdiocese of Philadelphia, 253 F. App'x 224, 226 (3d Cir. 2007))*. He has not done so. *See, e.g., Whitney v. Lt. Posika, et al., 2:19-cv-1237, 2021 U.S. Dist. LEXIS 8893, 2021 WL 1566431, *4 (W.D. Pa. Jan. 12, 2021)* (prisoner's allegation that defendants "stole his mail, which in turn resulted in a civil case being dismissed, which in turn cost [him] to be subject to high fines and court costs as well as high fines for postage and copies" did not amount to "they type of injury...compensable under the RICO Act.") (internal quotations omitted), report and recommendation adopted, *2021 U.S. Dist. LEXIS 54279, 2021 WL 1099633 (W.D. Pa. Mar. 2021)*. Moreover, speculative damages that are "predicated exclusively on the *possibility* that future events might occur" cannot form the basis of a RICO injury. *See, e.g., Maio, 221 F.3d at 495*; *Clark v. Conahan, 737 F. Supp.2d 239, 255 (M.D. Pa. 2010)* (observing that "[m]ental distress, emotional distress, and harmed reputations do not constitute injury to business or property sufficient to confer standing on a RICO plaintiff" and explaining that "injury for RICO purposes requires proof of concrete financial loss, not mere injury to an intangible property interest"). For these reasons, the alleged destruction of the above-cited items does not qualify as an "injury" for RICO purposes.

Thus, based upon the foregoing, it is recommended that the Court should grant Defendants' motion **[*26]** to the extent that it seeks dismissal of "Count A" for civil RICO violations. The dismissal of this claim should be with prejudice because Petitioner lacks standing to bring a civil RICO claim since, even accepting his allegations as true, he did not suffer an injury to his business or property that would qualify as a compensable injury under that statute.

3. Retaliation

Plaintiff asserts in "Count E" that all Defendants retaliated against him. The Amended Complaint alleges that Plaintiff believes that all defendants were engaged in a conspiracy to retaliate against him.

To state a claim for retaliation under the *First Amendment*, a prisoner must allege that: (1) he was engaged in constitutionally protected conduct; (2) the defendant at issue took adverse action against him; and (3) his constitutionally protected conduct was a substantial or motivating factor in the decision to take that adverse action. *See, e.g., Mitchell v. Horn, 318 F.3d 523, 530 (3d Cir. 2003)*; *Rauser v. Horn, 241 F.3d 330, 333 (3d Cir. 2001)*.

Since Plaintiff is bringing his retaliation claim under *§ 1983*, he must also plead each defendant's personal involvement in the alleged retaliation. *See, e.g., Rode v. Dellarciprete, 845 F.2d 1195, 1207 (1988)*. That is because, as stated in the text of *§ 1983* itself, only a person who "subjects, or causes to be subjected" another person to a civil **[*27]** rights violation can be held liable under *§ 1983*. Thus, each defendant can be held liable only for his or her own conduct. *See, e.g., id.; see also Parkell v. Danberg, 833 F.3d 313, 330 (3d Cir. 2016)*; *Barkes v. First Correctional Medical, 766 F.3d 307, 316 (3d Cir. 2014)* (*rev'd sub. nom. on other grounds 575 U.S. 822, 135 S. Ct. 2042, 192 L. Ed. 2d 78 (2015))*; *C.N. v. Ridgewood Bd. of Educ., 430 F.3d 159, 173 (3d Cir. 2005)* ("To impose liability on the individual defendants, Plaintiffs must show that each one individually participated in the alleged constitutional violation or approved of it.") (citing *C.H. v. Oliva, 226 F.3d 198, 201-02 (3d Cir. 2000)* (en banc)).

In the "Facts" section of the Amended Complaint, Plaintiff asserts that Kimmel and Bohna retaliated against him with respect to the matters related to his college correspondence courses because he "utilize[ed] the grievance system and file[d] legal action." (Amend. Compl. ¶ 26.) However, Plaintiff has not sufficiently alleged facts to show that he filed a grievance against Kimmel and Bohna, or that they were aware that he filed a grievance or lawsuit that plausibly could have a causal link to the adverse actions to which he claims they subjected him. For example, although at the time of Kimmel's and Bohna's alleged wrongful conduct Plaintiff had filed Grievance #780007, Plaintiff does not allege that he filed that grievance against them or that that specific grievance was the cause of their actions. Moreover, although **[*28]** Plaintiff was litigating his civil action at No. 1:15-cv-312, that lawsuit was filed against officials and employees at SCI Forest and not anyone at SCI Fayette. Accordingly, Plaintiff has failed to state a claim of retaliation against Kimmel and Bohna.

Plaintiff also alleges in the "Facts" section of the Amended Complaint that the May 2019 destruction of his legal materials for his civil action at No. 1:15-cv-312 was retaliatory. (Amend. Compl. ¶ 43.) However, the Amended Complaint does not indicate which defendants, if any, were involved in the taking of legal materials. (*See id.* ¶¶ 33-39, 43.) Therefore, Plaintiff has failed to sufficiently plead that any of the defendants had the requisite personal involvement in that incident to proceed with a retaliation claim regarding it.

Finally, Plaintiff alleges throughout the Amended Complaint that the alleged wrongful conduct of the other defendants was retaliatory, but he must do more than assert threadbare allegations that defendants' conduct was due to him filing unspecified grievances or a lawsuit, or was part of "patterns of retaliation," since such allegations are mere legal conclusions that do not satisfy the pleading requirements **[*29]** of *Rule 8* and do not support the requisite elements of a retaliation claim.

Based upon the foregoing, therefore, the Court should grant Defendants' motion to the extent that it seeks the dismissal of "Count E" Retaliation.

4. Respondeat Superior

Plaintiff asserts in "Count F" a claim identified as "Respondeat Superior" against all Defendants. (Amend. Compl. at p. 16, ¶ 57.) In support of this claim, Plaintiff alleges that each defendant "knowingly and intentionally participated in constitutional violations and failed to remedy the wrong successively after reporting the occurrences of such violations, resulting in *eighth amendment* violations." (*Id.*)

As Defendants correctly point out, *respondeat superior* is a theory of liability based on agency principles and is not a cause of action. *See, e.g., Sherman v. John Brown Ins. Agency Inc., 38 F. Supp.3d 658, 669-70 (W.D. Pa. 2014)* ("District Courts have found that under Pennsylvania law the doctrine of *respondeat superior* does not establish a separate tort, but merely a principle by which employers can be held liable for the tortious acts of their employee'") (internal citation and quotation omitted); *Care v. Reading Hosp. & Med. Ctr., No. 03-cv-04121, 2004 U.S. Dist. LEXIS 5485, 2004 WL 728532 (E.D. Pa. Mar. 31, 2004)* ("*respondeat superior* merely connotes a doctrine of imputation once an underlying theory of **[*30]** liability has been established. It is not a separate cause of action.") (internal citations and quotations omitted).

Additionally, *respondeat superior* is not a sufficient basis upon which any of the constitutional tort claims Plaintiff brings under *42 U.S.C. § 1983* can be asserted.[2] The doctrine of *respondeat superior*, which makes an employer automatically responsible for the wrongdoing of employees, does not apply to claims brought under that statute. *Iqbal, 556 U.S. at 676* ("Because vicarious liability is inapplicable to *Bivens* and *§ 1983* suits, a plaintiff must plead

---

[2] Plaintiff brings his constitutional tort claims under *42 U.S.C. § 1983*, which "provides a cause of action against state actors who violate an individual's rights under federal law." *Filarsky v. Delia, 566 U.S. 377, 380, 132 S. Ct. 1657, 182 L. Ed. 2d 662 (2012)*. *Section 1983* does not create substantive rights but instead "provides only remedies for deprivations of rights established elsewhere in the Constitution or federal laws." *Kneipp v. Tedder, 95 F.3d 1199, 1204 (3d Cir. 1996)*. "To state a claim under *§ 1983*, a plaintiff must allege the violation of a right secured by the Constitution and laws of the United States, and must show that the alleged deprivation was committed by a person acting under color of state law." *West v. Atkins, 487 U.S. 42, 48, 108 S. Ct. 2250, 101 L. Ed. 2d 40 (1988)*.

that each Government-official defendant, through the official's own individual actions, has violated the Constitution."); *see, e.g.,* Rode, 845 F.2d at 1207; Maddox v. Gilmore, No. 2:19-cv-1163, 2020 U.S. Dist. LEXIS 36672, 2020 WL 1026799, *4 (W.D. Pa. Mar. 3, 2020) (granting superintendent's motion for judgment on the pleadings because "liability for Eighth Amendment claims cannot be predicated upon *respondeat superior*[.]") (citing Rode, 845 F.2d at 1207-08).

Therefore, based upon the foregoing, the Court should grant Defendant's motion to the extent that it seeks dismissal of "Count F" asserting "Respondeat Superior" for failure to state a claim. The dismissal should be with prejudice because "Respondeat Superior" is not a viable cause of action.

5. Wrongful Imprisonment

Plaintiff claims in "Count **[*31]** G" that as a result of the alleged unlawful action of Defendants he was "wrongfully imprisoned" in solitary confinement for over 153 days in violation of the Eighth Amendment's prohibition against "cruel and unusual punishment." (Amend. Compl. at pp. 16-17, ¶¶ 58.)

The Eighth Amendment's prohibition against cruel and unusual punishment guarantees that prison officials must provide humane conditions of confinement. Prison officials must ensure that inmates receive adequate food, clothing, shelter and medical care, and must "'take reasonable measures to guarantee the safety of the inmates[.]'" Farmer v. Brennan, 511 U.S. 825, 832, 114 S. Ct. 1970, 128 L. Ed. 2d 811 (1994) (quoting Hudson v. Palmer, 468 U.S. 517, 526-27, 104 S. Ct. 3194, 82 L. Ed. 2d 393 (1984)). To state a claim for an Eighth Amendment violation based on the conditions of confinement, a prisoner must plausibly allege that prison officials' acts or omissions denied him "the minimal civilized measure of life's necessities." Rhodes v. Chapman, 452 U.S. 337, 347, 101 S. Ct. 2392, 69 L. Ed. 2d 59 (1981); Betts v. New Castle Youth Dev. Ctr., 621 F.3d 249, 256 (3d Cir. 2010) (stating that the Eighth Amendment's prohibition of cruel and unusual punishment requires that prison officials provide "humane conditions of confinement."). As set forth above, such necessities include food, clothing, shelter, medical care and reasonable safety. *See, e.g.,* Farmer, 511 U.S. at 832; Rhodes, 452 U.S. at 347; Tillman v. Lebanon Cnty. Corr. Facility, 221 F.3d 410, 418 (3d Cir. 2000).

A prisoner must also allege that the defendants acted with deliberate indifference. Id. at 835. "Deliberate indifference" is a subjective standard. The official **[*32]** must have known of and disregarded "an excessive risk to inmate health or safety; the official must both be aware of facts from which the inference could be drawn that a substantial risk of serious harm exists, and he must also draw the inference." Id. at 838.

In the Amended Complaint, Plaintiff alleged only that he was placed in solitary confinement for a period of 153 days. He did not allege with any specificity the conditions under which he was confined. Therefore, even taking his allegations as true, no plausible reading of the Amended Complaint could support a conclusion that Plaintiff was denied "the minimal civilized measure of life's necessities." Rhodes, 452 U.S. at 347. *See, e.g.,* Kokinda v. Pennsylvania Dep't of Corr., 779 F. App'x 938 943 (3d Cir. 2019) ("Where conditions are not 'cruel and unusual' but merely 'restrictive and even harsh, they do not violate the Eight Amendment but rather 'are part of the penalty that criminal offenders pay for their offenses against society") (citing Rhodes, 452 U.S. at 347); Powell v. McKeown, No. 1:20-cv-348, 2020 U.S. Dist. LEXIS 140479, 2020 WL 4530727, *8 (M.D. Pa. Aug. 6, 2020) ("It appears that Plaintiff bases his Eighth Amendment claim upon his placement in the RHU. Placement in the RHU, however, without allegations concerning the denial of any of life's necessities, is insufficient to state an Eighth Amendment violation.") Therefore, Plaintiff failed to state **[*33]** an Eighth Amendment claim related to his confinement in the RHU and/or solitary confinement.

Further, Plaintiff cannot establish a claim under the Fourteenth Amendment based on his alleged solitary confinement. To establish a due process violation in the prison context, a plaintiff must show that he was deprived of a liberty interest protected by the Constitution or a statute. Sandin v. Conner, 515 U.S. 472, 479 n.4, 483-84, 115 S. Ct. 2293, 132 L. Ed. 2d 418 (1995). A prisoner's liberty interests are not violated, however, unless a condition "imposes atypical and significant hardship on the inmate in relation to the ordinary incidents of prison life." Id. at 484. Therefore, in determining whether a prisoner's due process rights have been violated, courts first consider whether there has been a denial of a liberty or property interest. *See* Ky. Dep't of Corrs. v. Thompson, 490 U.S.

454, 460, 109 S. Ct. 1904, 104 L. Ed. 2d 506 (1989). In determining whether a condition of confinement creates a protected liberty interest, a court must consider (1) the duration of the challenged conditions and (2) whether the conditions overall imposed a significant hardship in relation to the ordinary incidents of prison life. Williams v. Sec'y Pennsylvania Dep't of Corr., 848 F.3d 549, 560 (3d Cir. 2017) (citing Shoats v. Horn, 213 F.3d 140, 144 (3d Cir. 2000)). If a prisoner makes such a showing, the next step for the courts is to evaluate "whether the procedures attendant upon that deprivation were constitutionally sufficient." *Id.*

To the extent that **[*34]** the Amended Complaint alleges that certain defendants issued "fraudulent" misconduct reports against Plaintiff and that, as a result, he was "wrongfully imprisoned" in the RHU in solitary confinement, these allegations fail to state a claim. Plaintiff avers that he was housed a total of 153 days in solitary confinement. However, he does not allege he was in solitary confinement for 153 consecutive days. For example, Plaintiff alleges that he spent 18 days in the RHU after the December 16, 2018 incident and then was released to the general population. In any event, the allegation that Plaintiff spent 153 days in the RHU in solitary confinement, without more, is insufficient to establish the kind of atypical deprivation of prison life necessary to implicate a protected liberty interest. *See, e.g.,* Mutschler v. Tritt, 765 F. App'x 653, 655 (3d Cir. 2019) (district court properly dismissed prisoner's due process claim because his "amended complaint does not allege that any conditions of [his confinement in the RHU for 180 days] involved an atypical and significant hardship sufficient to create a protected liberty interest. We have held that even longer stays in restrictive confinement under otherwise similar circumstances did not implicate **[*35]** a prisoner's liberty interests.") (citing Smith v. Mensinger, 293 F.3d 641, 652 (3d Cir. 2002) (seven months in disciplinary custody insufficient to trigger a due process violation)).

Additionally, even if Plaintiff had plausibly alleged that his solitary confinement placement amounted to a denial of a protected liberty interest, the Amended Complaint contains no allegation that he was denied any of the process he may have been due through misconduct hearings and/or subsequent appeals. For example, he names Beth Rudzinski, the Hearing Examiner at SCI Fayette, as a defendant in this action, but he does not attribute any wrongdoing to her in the "Facts" section of the Amended Complaint. (Amend. Compl. ¶ 8; *see also id.* ¶¶ 10-62.)

In his response to Defendants' motion, Plaintiff indicates that he is also raising a state law claim of wrongful imprisonment. He does not cite to any Pennsylvania law that would support a conclusion that he has even arguably pleaded a state law claim for wrongful imprisonment, which typically is synonymous with a claim of false arrest and which does not apply to this case. *See, e.g.,* Manley v. Fitzgerald, 997 A.2d 1235, 1241 (Pa. Commw. Ct. 2010) ("The elements of false arrest/false imprisonment are: (1) the detention of another person (2) that is unlawful. An arrest based **[*36]** upon probable cause would be justified, regardless of whether the individual arrested was guilty or not.") (internal citation and quotations omitted).

Accordingly, based upon the foregoing, the Court should grant Defendant's motion to the extent that it seeks dismissal of "Count G" asserting a "Wrongful Imprisonment" cause of action under the Eighth and Fourteenth Amendments or under state law because it fails to state a claim upon which relief may be granted.

6. Conspiracy

In "Count H," Plaintiff claims that Defendants conspired to interfere with his "federal court prosecution proceedings" and his education, and to destroy his property in violation of his Eighth Amendment rights. (Amend. Compl. at p. 17 ¶ 59.)

"To prevail on a conspiracy claim under § 1983, a plaintiff must prove that persons acting under color of state law reached an understanding to deprive him of his constitutional rights. This requires that the state actors took concerted action based on an agreement to deprive the plaintiff of his constitutional rights, and that there was an actual underlying constitutional violation of the plaintiff's rights." Harvard v. Cesnalis, 973 F.3d 190, 207 (3d Cir. 2020) (internal quotations and citation omitted); *see, e.g.,* Jutrowski v. Township of Riverdale, 904 F.3d 280, 293-94 (3d Cir. 2018) ("To prevail on a conspiracy claim under § 1983, a plaintiff must prove **[*37]** that persons acting under color of state law reached an understanding to deprive him of his constitutional rights.") (internal citations and quotations omitted). Although the agreement can be shown by direct or circumstantial evidence, a plaintiff cannot base his claim solely on suspicion and speculation. *See, e.g.,* Talley v. Varner, 786 F. App'x 326, 329 (3d Cir. 2019) (citing *Young v. Kann, 926 F.2d 1396, 1405 n.16 (3d Cir. 1991))* ("mere general allegation...[or] averment of conspiracy or collusion without alleging the facts which constituted such conspiracy or collusion is a conclusion of law and is insufficient [to state a claim]" (alterations in original) (quoting *Kalmanovitz v. G. Heileman Brewing Co., 595 F. Supp. 1385, 1400 (D. Del. 1984))*; *Jackson v. Shouppe, 17-cv-1135, 2018 U.S. Dist. LEXIS 113830, 2018 WL 3361270, *2 (W.D. Pa. 2018)* (same).

Here, Plaintiff has failed to allege any facts whatsoever beyond conclusory statements of conspiracy, let alone any facts that plausibly suggest a meeting of the minds, agreement or plan between any of the defendants. Therefore, there are no allegations in the Amended Complaint to support a plausible conspiracy claim. *See, e.g., Brandon v. Burkhart, No. 1:16-cv-177, 2020 U.S. Dist. LEXIS 187760, 2020 WL 5992281, *1 (W.D. Pa. Oct. 9, 2020)* (plaintiff "pled only conclusory averments of a conspiracy, which is not enough to satisfy federal pleading standards.")

Thus, the Court should grant Defendants' motion to the extent that it seeks dismissal of "Count H" **[*38]** that asserts a "Conspiracy" cause of action against Defendants for allegedly conspiring to deprive him of any of his constitutional rights.

7. Negligence

Plaintiff claims in "Count K" that the Defendants were negligent for failing to "use reasonable care to avoid foreseeable risk" to him "in violation of the State Tort Claims Act of the state constitution." (Amend. Compl. at p. 18, ¶ 62.)

Defendants argue that Plaintiff's negligence claim is barred by Pennsylvania state sovereign immunity. In general, employees of the Commonwealth of Pennsylvania acting within the scope of their duties are immune from liability. *1 PA. CONS. STAT. § 2310*; *see, e.g., Moss v. Pennsylvania, 838 F. App'x 702, 707 (3d Cir. Dec. 9, 2020)*. To this end, Pennsylvania's sovereign immunity statute affords broad immunity to state officials from state-law tort claims. With respect to claims of negligence, there are certain specifically delineated exceptions to this general rule of sovereign immunity, including, in relevant part, when the claim pertains to the "care, custody or control of personal property in the possession or control of Commonwealth parties[.]" *42 PA. CONS. STAT. § 8522(b)(3)*. That exception may apply here with respect to certain allegations made in the Amended Complaint. *See, e.g., Williams v. Stickman, 917 A.2d 915, 918 (3d Cir. 2007)*. Defendants do not address this issue **[*39]** in their brief in support of their motion.

Specifically, the Amended Complaint alleges that some defendants destroyed Plaintiff's personal property. Specifically, according to the allegations in the Amended Complaint, CO Henry, CO Saxion, Co Ohrman, CO Cox, CO Twardzik, CO Regina and Sgt. Haines destroyed Plaintiff's legal paperwork and/or other personnel property.[3] (*Id.* ¶¶ 52, 59-61.) Therefore, at this stage of the litigation, the Court cannot conclude that these seven defendants are immune from suit with respect to any negligence claim Plaintiff may be asserting against them for the alleged destruction of his property.[4]

Defendants also contend that, to the extent Plaintiff attempts to assert any claim in "Count K" under the Pennsylvania Constitution, any such claim must fail. They are correct in this regard. In affirming the dismissal of an inmate's assertion of state constitutional claims, the Court of Appeals has observed that "Pennsylvania does not have a statutory equivalent to *§ 1983* and does not recognize a private right of action for damages stemming from

---

[3] Plaintiff avers that following the May 4, 2019 incident, during his subsequent stay in the L-Unit, his legal paperwork related to his civil action at No. 1:15-cv-312 was removed from his cell and destroyed. (Amend. Compl. ¶ 43.) As set forth above, however, the Amended Complaint does not identify who was involved in removing those documents.

[4] In his response to Defendants' motion, Plaintiff contends that the defendants involved in the alleged excessive force incidents, alleged sexual assault incident, and in the incident in which the paperclip was placed in Plaintiff's food are not entitled to immunity. The claims against the defendants involved in these incidents are not claims of negligence, however. Rather, if Plaintiff's allegations against these defendants are true, they violated Plaintiff's *Eighth Amendment* rights and/or committed state law intentional torts such as assault and battery but do not implicate a negligence cause of action.

alleged violation of the state constitution." *Miles v. Zech, 788 F. App'x 164, 167 (3d Cir. 2019)* (citing *Gary v. Braddock Cemetery, 517 F.3d 195, 207 n. 4 (3d Cir. 2008))*. *See also* *Whitenight v. Elbel, No. 2:16-cv-00646, 2017 U.S. Dist. LEXIS 199273, 2017 WL 6026379, *6 (W.D. Pa. Dec. 5, 2017)* ("Any claim which Plaintiff **[*40]** purports to state under the Pennsylvania Constitution against the Defendants is dismissed with prejudice, as there is no Pennsylvania statute that establishes and no Pennsylvania court has recognized a private cause of action for damages under the Pennsylvania Constitution.") (internal quotations and citations omitted).

Based upon the forgoing, it is recommended that the Court grant Defendants' motion to the extent that it seeks dismissal of "Count K" negligence against all Defendants except for CO Henry, CO Saxion, Co Ohrman, CO Cox, CO Twardzik, CO Regina and Sgt. Haines. It is further recommended that the Court grant Defendants' motion to the extent it seeks dismissal with prejudice of a claim based upon a violation of the Pennsylvania Constitution.

8. Intentional Infliction of Emotional Distress

In "Count L," Plaintiff asserts a state law claim of intentional infliction of emotional distress against all Defendants. (Amend. Compl. at p. 18, ¶ 63.)

To state a claim for the state tort of intentional infliction of emotional distress ("IIED"), a plaintiff must allege: (1) extreme and outrageous conduct; (2) intentional or reckless conduct; (3) conduct caused the emotional distress; and **[*41]** (4) severe emotional distress. *See, e.g.,* *Smith v. Washington Area Humane Soc'y, No. 2:19-cv-1672, 2020 U.S. Dist. LEXIS 201740, 2020 WL 6364762, *8 (W.D. Pa. Oct. 29, 2020)* (citation omitted). Importantly, the "[p]laintiff must allege *physical manifestations of the emotional distress*." *Id.* (emphasis added) (citing *Reeves v. Middletown Athletic Ass'n, 2004 PA Super 475, 866 A.2d 1115, 1122 (Pa. Super. Ct. 2004))*.

Thus, "a plaintiff 'must suffer some type of resulting physical harm due to the defendant's outrageous conduct.'" *Richardson v. Barbour, No. 2:18-cv-1758, 2020 U.S. Dist. LEXIS 149513, 2020 WL 4815829, *14 (E.D. Pa. Aug. 19, 2020)* (quoting *Reedy v. Evanson, 615 F.3d 197, 231 (3d Cir. 2010))*. "It is not enough for a plaintiff to generically plead the elements of a claim for IIED, but rather, sufficient detail must be asserted to make out a plausible claim." *Id.* (quoting *M.S. ex rel. Hall v. Susquehanna Twp. School Dist., 43 F. Supp.3d 412, 430-31 (M.D. Pa. 2014)* ("Although Plaintiffs allege M.S. suffered 'physical harm' as a result of the emotional distress, such a general, non-specific averment has been found insufficient to survive motions to dismiss.") and citing *Dobson v. Milton Hershey School, 356 F. Supp.3d 428, 439-40 (M.D. Pa. 2018)* (holding plaintiff's bald allegations of "physical harm" and "physical manifestations of emotional distress" were not enough, without more, to set forth a plausible IIED claim)); *see also* *Hoy v. Angelone, 554 Pa. 134, 720 A.2d 745, 755 (Pa. 1998)* (identify IIED as a "most limited" tort); *Gomez v. Markley, No. 2:07-cv-868, 2011 U.S. Dist. LEXIS 3385, 2011 WL 112886, *1 (W.D. Pa. Jan. 13, 2011)* ("in order to state a claim for [IIED] under Pennsylvania Law, a plaintiff must establish physical injury or harm...at the very least, **[*42]** existence of the alleged emotional distress must be supported by competent medical evidence.") (internal citations and quotation omitted).

Defendants are correct that Plaintiff did not make sufficient allegations in the Amended Complaint with respect to the nature and type of injury or injuries he suffered as a result of the conduct alleged on the part of Defendants to support his IIED claim. Therefore, as currently pled, the Amended Complaint fails to state a claim for IIED against any defendant.

Thus, it is recommended that the Court grant Defendants' motion to the extent that they seek dismissal of "Count L" for IIED.

9. Due Process

In the claim labeled "Count M," Plaintiff asserts that Defendants violated his due process rights under the *Fifth* and *Fourteenth Amendments* by "impeding his access to the grievance system and the courts[.]" (Amend. Compl. at p. 18, ¶ 64.)

Because Plaintiff's claims are brought only against state officials and employees, he cannot assert a claim against them under the *Fifth Amendment*. Therefore, his *Fifth Amendment* claim must be dismissed. *See, e.g.,* *Fauntleroy*

v. Clark, No. 1:19-cv-182, 2020 U.S. Dist. LEXIS 136167, 2020 WL 5351063, *3 (W.D. Pa. July 30, 2020) ("it is axiomatic that '[t]he limitations of the [F]ifth [A]mendment restrict only federal government action.") (quoting Nguyen v. U.S. Catholic Conference, 719 F.2d 52, 54 (3d Cir. 1983)), report **[*43]** and recommendation adopted, 2020 U.S. Dist. LEXIS 161899, 2020 WL 5350532 (W.D. Pa. Sept. 4, 2020).

To the extent that in "Count M" Plaintiff is generally attacking the DOC's grievance process at SCI Fayette under the Due Process Clause of the Fourteenth Amendment, inmates "do not have a constitutionally protected right to a grievance process." Jackson v. Gordon, 145 F. App'x 774, 777 (3d Cir. 2005). Because access to prison grievance procedures is not a constitutionally mandated right, "allegations of improprieties in the handling of grievances do not state a cognizable claim under § 1983." Glenn v. DelBalso, 599 F. App'x 457, 459 (3d Cir. 2015). *See, e.g.,* Walker v. Mathis, No. 15-cv-5134, 2016 U.S. Dist. LEXIS 65843, 2016 WL 2910082, *9 (E.D. Pa. May 19, 2016) ("an inmate does not have a constitutional right to an inmate grievance process and therefore cannot, as a matter of law, state a claim under the Fourteenth Amendment based upon a prison's failure to provide one.") Accordingly, Plaintiff's Fourteenth Amendment due process claim based generally on the prison's grievance procedures should be dismissed.

The same is true for Plaintiff's specific allegations that House and Allen failed to respond to many of his grievances (Amend. Compl. ¶ 50), and that Lt. Wood and Lt. Daily coerced him to withdraw Grievance #804846. (*Id.* ¶ 44). While those defendants' actions may be relevant to a potential affirmative defense of non-exhaustion, the fact that House and Allen allegedly failed to ensure that Plaintiff's grievances were **[*44]** processed in accordance with DOC policy, or that Lt. Wood and Lt. Daily allegedly coerced Plaintiff to withdraw one of his grievances, does not in itself give rise to a Fourteenth Amendment due process claim for the reasons set forth above.

Finally, to the extent that Plaintiff is asserting in "Count M" that he was denied access to the court, such a claim implicates the First Amendment. Lewis v. Casey, 518 U.S. 343, 116 S. Ct. 2174, 135 L. Ed. 2d 606 (1996). In order to proceed with such a claim, a plaintiff must show that he (1) suffered an "actual injury," meaning he "lost a chance to pursue a 'nonfrivolous' or 'arguable'" legal claim; and (2) that he has "no other 'remedy that may be awarded as recompense' for the lost claim other than in the present denial of access suit." Monroe v. Beard, 536 F.3d 198, 205 (3d Cir. 2008) (quoting Christopher v. Harbury, 536 U.S. 403, 415, 122 S. Ct. 2179, 153 L. Ed. 2d 413 (2002)). "To that end, prisoners must satisfy certain pleading requirements: The complaint must describe the underlying arguable claim well enough to show that it is 'more than mere hope,' and it must describe the 'lost remedy.'" Id. at 205-06 (quoting Christopher, 536 U.S. at 416-17).

The Amended Complaint fails to identify any actual injury Plaintiff suffered in the form of "a nonfrivolous claim, or one of arguable merit" that has been lost as a result of any defendant's alleged interference with his access to courts.[5] Thus, Plaintiff failed to state a claim **[*45]** that he was denied access to the courts.

Accordingly, based upon the foregoing, it is recommended that the Court grant Defendants' motion to the extent that it seeks dismissal of "Count M." Specifically, "Count M" should be dismissed with prejudice to the extent that Plaintiff raised a due process claim under the Fifth Amendment, and dismissed to the extent that it seeks to raise claims under the Fourteenth and First Amendments.

10. Slavery/Involuntary Servitude

In "Count O," Plaintiff claims that Defendants "subjected [him] to labor servitude or sexual servitude" in violation of his rights under the Eight Amendment. (Amend. Compl. at p. 19, ¶ 66.)

The Court should dismiss Count O. There are no allegations in the Amended Complaint that could even arguably constitute a cognizable cause of action for "slavery/involuntary servitude." For example, there are no averments regarding Plaintiff's labor at SCI Fayette. Moreover, it would be futile to grant Plaintiff leave to cure his deficient pleading with respect to this claim because it is "well settled that prisoners have no inherent constitutional right to

[5] The Court notes that although Plaintiff alleges that the legal documents for his case at No. 1:15-cv-312 were taken from him in May 2019, he had an attorney in that case as of May 8, 2019.

wages for work performed while incarcerated." *Calipo v. Wolf, No. 1:18-cv-320, 2019 U.S. Dist. LEXIS 200431, 2019 WL 6879570, *10 (W.D. Pa. Nov. 15, 2019)* (internal quotations and citations omitted), report **[*46]** and recommendation adopted, *2019 U.S. Dist. LEXIS 216763, 2019 WL 6877181 (W.D. Pa. Dec. 17, 2019)*. Additionally, Plaintiff's allegation that he was sexually assaulted on February 21, 2020 provides no basis to support a claim of "sexual servitude" at SCI Fayette, and he is pursuing specific claims related to that alleged incident at other counts of the Amended Complaint.

Based upon the foregoing, the Court should grant Defendants' motion to the extent it seeks the dismissal with prejudice of "Count O" asserting a cause of action of slavery/involuntary servitude.

11. Hobbs Act

In "Count P," Plaintiff asserts a claim under the Hobbs Act, *18 U.S.C. § 1951*, for allegedly "interfering with commerce by threats of violence[.]" (Amend Compl. at p. 19, ¶ 67.) Plaintiff's allegations fail to state a claim. "The Hobbs Act, *18 U.S.C. § 1951*, a criminal statute, does not permit a private right of action." *Farrar v. McNesby, No. 13-cv-5683, 2015 U.S. Dist. LEXIS 37420, 2015 WL 1383096, *1 (E.D. Pa. Mar. 24, 2015)*. *See also* *Brookhart, 385 F. App'x at 70* ("The Hobbs Act provides only for criminal sanctions and not civil relief.").

Therefore, based upon the foregoing, the Court should grant Defendants' motion to the extent it seeks the dismissal with prejudice of "Count P," Plaintiff's claim alleging a Hobbs Act violation.

12. Clayton Act

In "Count Q," Plaintiff claims that the Defendant applied "barriers **[*47]** and obstructions in monopolies and combination in restraint of trade" in violation of the Clayton Act, *15 U.S.C. §§ 15-27*.

The Amended Complaint does not state a claim under the Clayton Act, which is an ***antitrust law*** that concern the regulation of interstate commerce and protects competition in the marketplace. The Clayton Act provides a private right of action for violations of the Sherman Act. *See, e.g.,* *Fields v. Doe, No. 14-cv-4573, 2015 U.S. Dist. LEXIS 72172, 2015 WL 3513367, *4 n.14 (E.D. Pa. June 4, 2015)* (citing *In re Mushroom Direct Purchaser Antitrust Litigation, 655 F.3d 158, 165 (3d Cir. 2011)* and *15 U.S.C. §§ 15*, *26*). Plaintiff makes no plausible allegation in Amended Complaint against any defendant that implicates the Clayton Act.

Accordingly, it is recommended that the Court grant Defendants' motion to the extent that it seeks the dismissal with prejudice of Plaintiff's claim at "Count Q" under the Clayton Act as that statute does not apply to the events alleged in this case.

13. Dismissal of House, Allen and Rudzinski

Although Defendants do not move for the dismissal of any specific individual defendant, the Court should dismiss House, Allen and Rudzinski from this lawsuit pursuant to the screening provisions set forth in *28 U.S.C. § 1915(e)(2)(B)(ii)*.

Under the Prison Litigation Reform Act, *Pub. L. No. 104-134, 110 Stat. 1321 (1996)* ("PLRA"), courts are required to screen complaints at any time where, as is the case here, the plaintiff **[*48]** has been granted leave to proceed *in forma pauperis*. *28 U.S.C. § 1915(e)(2)(B)(ii)*. It requires the Court to dismiss a complaint that, among other things, fails to state a claim on which relief may be granted. The legal standard for dismissing a complaint under the PLRA for failure to state a claim is identical to the legal standard used when ruling on a motion to dismiss under *Rule 12(b)(6)*. *Tourscher v. McCullough, 184 F.3d 236, 240 (3d Cir. 1999)*.

Here, Plaintiff seeks to hold House and Allen liable because they failed to ensure he received a response to his grievance in accordance with DOC policies. (Amend. Compl. ¶¶ 8, 9, 50.) As explained above, Plaintiff cannot state a claim against them for this alleged misconduct because "allegations of improprieties in the handling of grievances do not state a cognizable claim under *§ 1983*." *Glenn, 599 F. App'x at 459*. Accordingly, the Court should dismiss House and Allen from this lawsuit.

As for Rudzinski, who is the Hearing Examiner at SCI Fayette, Plaintiff failed to allege any wrongdoing on her part. As set forth above, a plaintiff must plead a defendant's personal involvement in the alleged deprivation of his constitutional right. *See, e.g.,* *Rode, 845 F.2d at 1207*. Thus, Plaintiff failed to state a claim against Rudzinski and the Court should dismiss her from this lawsuit for that reason. **[*49]**

E. Leave to Amend

When dismissing a civil rights case for failure to state a claim, a court must give a plaintiff the opportunity to amend a deficient complaint, irrespective of whether it is requested, unless doing so would be "inequitable or futile." *Fletcher-Harlee Corp. v. Pote Concrete Contractors, Inc., 482 F.3d 247, 251 (3d Cir. 2007)*. "An amendment is futile if the amended complaint would not survive a motion to dismiss for failure to state a claim upon which relief could be granted." *Alston v. Suzuki, 227 F.3d 107, 121 (3d Cir. 2000)*.

Under the circumstances presented here, Plaintiff may, if he so chooses, file another amended complaint to attempt to cure the pleading deficiencies with respect to those claims that the Court does not dismiss with prejudice. Alternatively, he may choose to proceed with the Amended Complaint as it stands but only with respect to his claims in "Count B" Deliberate Indifference to Safety; "Count C" Deliberate Indifference to Healthcare; "Count D" Excessive Use of Force; "Count I" Deprivation of the Right to an Education and Property Interest; "Count J" Assault and Battery; and "Count N" Sexual Harassment.

III. Conclusion

Based upon the foregoing, it is respectfully recommended that the Court grant in part and deny in part Defendants' Motion to Dismiss (ECF No. 78), and dismiss House, Allen **[*50]** and Rudzinski from this action pursuant to the screening provisions set forth in *§ 1915(e)(2)(B)(ii)*. Specifically, it is recommended that the Court:

- dismiss with prejudice the official capacity claims against Defendants and Plaintiff's claim for injunctive relief;
- dismiss with prejudice "Count A" asserting a civil RICO claim;
- dismiss "Count E," which brings claims for Retaliation;
- dismiss with prejudice "Count F" asserting a claim for Respondeat Superior;
- dismiss "Count G" asserting a claim for Wrongful Imprisonment;
- dismiss "Count H" asserting a claim for Conspiracy;
- dismiss "Count K" asserting a claim of Negligence against all Defendants except for CO Henry, CO Saxion, Co Ohrman, CO Cox, CO Twardzik, CO Regina and Sgt. Haines;
- dismiss with prejudice any claim based upon a violation of the Pennsylvania Constitution;

- dismiss "Count L" asserting a claim for intentional infliction of emotional distress; • dismiss "Count M" with prejudice to the extent that Plaintiff is asserting a due process claim under the *Fifth Amendment*;

- dismiss "Count M" to the extent that it seeks to raise claims under the *Fourteenth* and *First Amendments*;
- dismiss with prejudice "Count O" asserting a claim for Slavery/Involuntary Servitude;

- dismiss with prejudice **[*51]** of "Count P" asserting a violation of the Hobbs Act;
- dismiss with prejudice "Count Q" asserting a claim under Clayton Act; and,
- dismiss Hobbs, Allen and Rudzinski from this action for failing to state a claim against them.

Pursuant to the Magistrate Judges Act, *28 U.S.C. § 636(b)(1)(B)* and *(C)*, and Rule 72.D.2 of the Local Civil Rules, the parties are allowed fourteen (14) days from the date of this Order to file objections to this Report and Recommendation. Failure to do so will waive the right to appeal. *Brightwell v. Lehman, 637 F.3d 187, 193 n.7 (3d Cir. 2011)*.

Opinion

CIVIL MINUTES — GENERAL

Proceeding: (IN CHAMBERS) ORDER GRANTING PLAINTIFF'S MOTION TO DISMISS COUNTERCLAIMS AND STRIKE AFFIRMATIVE DEFENSE [DKT. 15]

Ruling

Before the court is Plaintiff Edge Systems LLC's ("Edge" or "Plaintiff") Motion to Dismiss Defendant Ageless Serums LLC's ("Ageless" or "Defendant") counterclaims and strike Ageless' ninth affirmative defense for unlawful tying and illegality. Dkt. 15. For the reasons set forth below, the court GRANTS Edge's Motion with 20 days' leave to amend.

Background

Edge is a California corporation that designs and manufactures "skin resurfacing and rejuvenation systems, including microdermabrasion and hydradermabrasion systems." Dkt. 1 ("Compl.") ¶¶ 5, 8.[1] Edge alleges it has continuously used the mark "HYDRAFACIAL®" to advertise and promote its hydradermabrasion systems since 2005 and registered the mark on April 9, 2013 as Trademark Registration No. 4,317,059. *Id.* ¶¶ 11-12. Edge contracts with customer-licensees pursuant to a license agreement (the "Trademark License Agreement" or "Agreement"). **[*2]** *Id.* ¶ 20; Dkt. 1-2. Under the Trademark License Agreement, Edge authorizes customer-licensees to use the HYDRAFACIAL® mark in connection with the sale and promotion of hydradermabrasion treatments, "so long as those treatments are performed solely using genuine HydraFacial® Systems and genuine HydraFacial® Serums." Compl. ¶ 20.

Ageless is a Texas limited liability company that develops serums for use with hydradermabrasion systems and is a customer-licensee of Edge. *Id.* ¶¶, 21. According to Edge, Ageless urges Edge's customers to use Ageless' serums with Edge's hydradermabrasion equipment instead of Edge's own serums. *Id.* ¶¶ 21, 31-32. Edge contends Ageless is aware that if an Edge customer-licensee uses Ageless' serums with Edge's systems, the customer-licensee is in violation of its Trademark License Agreement with Edge. *Id.* ¶¶ 28-30.

Edge filed the Complaint on October 21, 2020, alleging six causes of action against Ageless for: (1) contributory trademark infringement; (2) unfair competition and contributory false designation of origin; (3) inducing breach of contract; (4) tortious interference with contractual relations; (5) unfair competition under *Cal. Bus. & Prof. Code § 17200 et seq.*; and (6) common law unfair competition. **[*3]** *Id.* ¶¶ 41-88.

Ageless filed the operative First Amended Answer and Counterclaims ("FAAC") on December 15, 2020, in which it asserts the following counterclaims against Edge: (1) "violation of antitrust laws"; (2) unfair competition under *Cal. Bus. & Prof. Code § 17200 et seq.* and California common law, based in part on "unlawful tying"; (3) defamation and false advertising; and (4) tortious interference with business relations. Dkt. 14 at 13 ("FAAC Counterclaims") ¶¶

---

[1] While the subject motion concerns Ageless' counterclaims and affirmative defense, the court includes details from the operative Complaint solely for additional context and does not presume the allegations in the Complaint are true.

13-36. Ageless also asserts affirmative defenses, including its ninth affirmative defense that Edge has violated federal and state antitrust laws. *Id.* (Affirmative Defenses) ¶ 9.[2]

Ageless alleges Edge's Trademark License Agreement constitutes an unlawful tying agreement. FAAC Counterclaims at ¶ 15. According to Ageless, the Agreement provides that a customer-licensee may purchase Edge's skincare equipment only on condition the customer-licensee also purchases Edge's serums. *Id.* Ageless further alleges Edge "has market power in the market for the equipment it sells, including the HydraFacial equipment," and that Edge has "restrained commerce" and "exclude[d] competition." *Id.* at ¶¶ 16-17.

On December 20, 2020, Edge filed the present motion to dismiss Ageless' (1) **[*4]** antitrust counterclaim, (2) unfair competition claim to the extent it relies on violations of ***antitrust law***, and (3) tortious interference claim. Dkt. 15. Edge simultaneously moves to strike Ageless' affirmative defense based on alleged violations of federal and state antitrust laws. *Id.*

The court finds this matter appropriate for resolution without oral argument. *See Fed. R. Civ. P. 78(b)*; Local Rule 7-15.

Discussion

I. Legal Standards

A. Motion to Dismiss under *Rule 12(b)(6)*

The standard for evaluating a motion to dismiss a counterclaim is the same as for a motion to dismiss a complaint. *See, e.g., Portney v. CIBA Vision Corp., 593 F. Supp. 2d 1120, 1122 (C.D. Cal. 2008)* (evaluating motion to dismiss counterclaims under *Rule 12(b)(6)*). Under *Fed. R. Civ. P. 12(b)(6)*, a party may file a motion to dismiss a complaint for "failure to state a claim upon which relief can be granted." The purpose of *Rule 12(b)(6)* is to enable defendants to challenge the legal sufficiency of the claims asserted in the complaint. *Rutman Wine Co. v. E. & J. Gallo Winery, 829 F.2d 729, 738 (9th Cir. 1987)*.

A district court properly dismisses a claim under *Rule 12(b)(6)* if the complaint fails to allege sufficient facts "to support a cognizable legal theory." *Caltex Plastics, Inc. v. Lockheed Martin Corp, 824 F.3d 1156, 1159 (9th Cir. 2016)*. "To survive a motion to dismiss, a complaint must contain sufficient factual matter ... to 'state a claim for relief that is plausible on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). "While a complaint attacked by a *Rule 12(b)(6)* motion to dismiss **[*5]** does not need detailed factual allegations, a plaintiff's obligation to provide the 'grounds' of his 'entitlement to relief' requires more than labels and conclusions, and a formulaic recitation of the elements of a cause of action will not do." *Twombly, 550 U.S. at 555* (internal citations omitted). "Factual allegations must be enough to raise a right to relief above the speculative level." *Id.* (internal citations omitted). "Determining whether a complaint states a plausible claim for relief is 'a context-specific task that requires the reviewing court to draw on its judicial experience and common sense.'" *Ebner v. Fresh, Inc., 838 F.3d 958, 963 (9th Cir. 2016)* (quoting *Iqbal, 556 U.S. at 679*).

---

[2] Ageless asserts "Edge's claims are barred because they are illegal and constitute unlawful tying in violation of federal and state antitrust laws." Dkt. 14 at 10 ("FAAC Affirmative Defenses") ¶ 9. Ageless cites to "the *California Copyright Act § 16700 et. seq.*" (italics in original), by which Ageless presumably intended to cite the Cartwright Act, California's state antitrust statute, codified at *Cal. Bus. & Prof. Code § 16700 et seq.* The analysis under the Cartwright Act mirrors the analysis under federal law because the Cartwright Act was modeled after the Sherman Act. *Cnty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1160 (9th Cir. 2001)*. Thus, the court will only address Ageless' claims under the Sherman Act.

When evaluating a complaint under *Rule 12(b)(6)*, the court "must accept all well-pleaded material facts as true and draw all reasonable inferences in favor of the plaintiff." *Wilson v. Hewlett-Packard Co., 668 F.3d 1136, 1140 (9th Cir. 2012)*. Legal conclusions, however, "are not entitled to the assumption of truth" and "must be supported by factual allegations." *Iqbal, 556 U.S. at 679*. A court must normally convert a *Rule 12(b)(6)* motion into a *Rule 56* motion for summary judgment if it considers evidence outside the pleadings. *United States v. Ritchie, 342 F.3d 903, 907-08 (9th Cir. 2003)*. "A court may, however, consider certain materials—documents attached to the complaint, documents incorporated by reference in the complaint, or matters of judicial notice—without converting **[*6]** the motion to dismiss into a motion for summary judgment." *Id.*[3]

B. Motion to Strike Affirmative Defenses under *Rule 12(f)*

"Affirmative defenses plead matters extraneous to the plaintiff's prima facie case, which deny plaintiff's right to recover, even if the allegations of the complaint are true." *Fed. Deposit Ins. Corp. v. Main Hurdman, 655 F. Supp. 259, 262 (E.D. Cal. 1987)* (citing *Gomez v. Toledo, 446 U.S. 635, 640-41, 100 S. Ct. 1920, 64 L. Ed. 2d 572 (1980)*). *Fed. R. Civ. P. 12(f)* permits a court to strike an insufficient defense. *Id. at 263*. The purpose of *Rule 12(f)* is "to avoid the expenditure of time and money that must arise from litigating spurious issues by disposing of those issues prior to trial." *Whittlestone, Inc. v. Handi-Craft Co., 618 F.3d 970, 973 (9th Cir. 2010)* (quoting *Fantasy, Inc. v. Fogerty, 984 F.2d 1524, 1527 (9th Cir. 1993)*).

On a motion to strike, the court must treat as admitted all material factual allegations underlying the challenged defenses and all reasonable presumptions that can be drawn therefrom. *State of Cal. ex rel. State Lands Comm'n v. United States, 512 F. Supp. 36, 39 (N.D. Cal. 1981)* (citation omitted). The grounds for a motion to strike must appear on the face of the pleading under attack or from matter which the court may judicially notice. *SEC v. Sands, 902 F. Supp. 1149, 1165 (C.D. Cal. 1995)*. If an affirmative defense is stricken, such as for failure to plead sufficient facts, leave to amend should be freely given when doing so would not cause prejudice to the opposing party. *Vogel v. Huntington Oaks Delaware Partners, LLC, 291 F.R.D. 438, 440, 441-42 (C.D. Cal. 2013)*.

II. Sufficiency of Antitrust Counterclaim

A. Legal Standard

Sections 4 and *16* of the Clayton Act, codified in *15 U.S.C. §§ 15(a)*, *26*, create causes of action for private parties **[*7]** to seek damages and injunctive relief for violations of the federal antitrust laws. *Section 1* of the Sherman Act, codified in *15 U.S.C. § 1* ("*Section 1*"), proscribes "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations ...."

To establish a claim under *Section 1*, a plaintiff must show: (1) a contract, combination or conspiracy among two or more persons or distinct business entities; (2) by which the persons or entities intended to harm or restrain trade or commerce in interstate or foreign commerce; (3) which actually injures competition; and (4) that the plaintiff suffered "antitrust injury," that is, that the plaintiff was harmed by the defendant's anticompetitive contract, combination, or conspiracy, and that this harm flowed from an "anti-competitive aspect of the practice under scrutiny." *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1197 (9th Cir. 2012)*.

[3] Because the Trademark License Agreement forms the basis of Ageless' counterclaims and affirmative defense and Ageless refers extensively to the Agreement in its counterclaims, the court incorporates the Agreement (Dkt. 1-2) into Ageless' counterclaims. *See* *Ritchie, 342 F.3d at 908* ("Even if a document is not attached to a complaint, it may be incorporated by reference into a complaint if the plaintiff refers extensively to the document or the document forms the basis of the plaintiff's claim.").

"A tying arrangement is a device used by a competitor with market power in one market to extend its market power to an entirely distinct market. To accomplish this objective, the competitor agrees to sell one product (the tying product) but only on the condition that the buyer also purchase a different product (the tied product), **[*8]** or at least agrees that he will not purchase the tied product from any other supplier." *Paladin Assocs. v. Mont. Power Co., 328 F.3d 1145, 1159 (9th Cir. 2003)* (internal quotation marks and citation omitted). Tying is unlawful under *Section 1* "on the theory that, if the seller has market power over the tying product, the seller can leverage this market power through tying arrangements to exclude other sellers of the tied product.'" *Blough v. Holland Realty, Inc., 574 F.3d 1084, 1089 (9th Cir. 2009)* (quoting *Cascade Health Solutions v. PeaceHealth, 515 F.3d 883, 912 (9th Cir. 2008)*).

"Tying can be either a per se violation or a violation under the rule of reason." *See Cnty. of Tuolumne v. Sonora Cmty. Hosp., 236 F.3d 1148, 1157 (9th Cir. 2001)*.[4] "A per se tying violation 'is proscribed without examining the actual market conditions, when the seller has such power in the tying product or service market that 'the existence of forcing is probable,' ... and there is 'a substantial potential for impact on competition.' A tying arrangement which is not unlawful per se may be invalidated under the 'rule of reason' if the party challenging the tie demonstrates that it is 'an unreasonable restraint on competition in the relevant market.' Both per se rules and the Rule of Reason are employed to form a judgment about the competitive significance of the restraint." *Id.* (internal quotation marks and citations omitted).

Tying arrangements are unlawful per se **[*9]** where a plaintiff shows: (1) the defendant tied together the sale of two distinct products or services; (2) the defendant possesses sufficient economic power, i.e., market power, in the tying product market to coerce its customers into purchasing the tied product; and (3) the tying arrangement affects a "not insubstantial volume of commerce" in the tied product market, such that there is reduced competition in the market for the tied product. *Blough, 574 F.3d at 1089* (brackets omitted); *Ill. Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 46, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)* ("[I]n all cases involving a tying arrangement, the plaintiff must prove that the defendant has market power in the tying product.").

B. Existence of a Tying Condition

"It is well settled that there can be no unlawful tying arrangement absent proof that there are, in fact, two separate products, the sale of one (i.e., the tying product) being conditioned upon the purchase of the other (i.e., the tied product)." *Krehl v. Baskin-Robbins Ice Cream Co., 664 F.2d 1348. 1352 (9th Cir. 1982)*. As the Supreme Court has observed, "where the buyer is free to take either product by itself there is no tying problem ...." *N. Pac. Ry. Co. v. United States, 356 U.S. 1, 6 n.4, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*.

Edge argues Ageless' antitrust counterclaims fail because the Trademark License Agreement does not condition purchase of Edge's equipment on purchase of Edge's serum. Dkt. 16 ("Mot. Br.") **[*10]** at 11-12. According to Edge, "There simply is not a word in the trademark license suggesting that dermatologists and other customers may not purchase Edge's equipment unless they also purchase Edge's serums." *Id.*

Ageless responds it has pleaded Edge sells two separate products, Edge's hydradermabrasion equipment and Edge's serum, and that the Trademark License Agreement establishes an unlawful tie between the two products. Opp. 9-12. According to Ageless, the clear language of the agreement "states that the equipment (the 'tying product' is to be used solely and exclusively by purchasing Edge's serum (the 'tied product') so that Edge's system will 'function properly and effectively." Opp. 11 (quoting Compl. Ex. 2 at ¶ 3.1).

---

[4] A plaintiff that fails to state a per se unlawful tying claim may still prevail under the rule of reason. *See Jefferson Par. Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 29, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*, *overruled on other grounds by Ill. Tool Works Inc. v. Indep. Ink, Inc., 547 U.S. 28, 31, 126 S. Ct. 1281, 164 L. Ed. 2d 26 (2006)*. "[T]he inquiry mandated by the Rule of Reason is whether the challenged agreement is one that promotes competition or one that suppresses competition." *Nat'l Soc'y of Prof'l Eng'rs v. United States, 435 U.S. 679, 691 (1978)*.

After reviewing the Trademark License Agreement, the court agrees with Edge. While Ageless argues the terms of the Trademark License Agreement condition the purchase of Edge's equipment on the purchase of Edge's serums, Opp. 11, FAAC Counterclaims at ¶ 15, the Agreement does not contain any such limitation and only governs a licensee's authorization to use Edge's trademarks. The "Grant of License" provision states, in relevant part:

> Licensor grants to Licensee the **[*11]** nonexclusive, royalty free right to reproduce and display the trademarks listed in Exhibit A attached hereto (collectively "Licensed Trademarks") solely in connection with the advertising and promotion of HydraFacial treatments and/or Perk treatments only within the Licensee's Territory as defined below. In addition, Licensor may grant to Licensee these same or lesser rights, with respect to select trademarks for use in marketing campaigns for future products or services....

Dkt. 1-2 (Ex. 2) at § 1, ¶ 1.1.

The purported tying provision, meanwhile, states that the agreement which grants the customer a license to use Edge's trademarks is conditioned upon the trademark "Licensee" purchasing Edge's serums from Edge or one of Edge's authorized distributors. *Id.* ¶ 3.1. The provision reads, in full:

> In recognition that the HydraFacial system and equipment and the Perk system and equipment only function properly and effectively with the use of Licensor's serum solutions and consumables, Licensee agrees to purchase the serum solutions and consumables used in the Purchased Equipment solely and exclusively from Licensor or its authorized distributor in good standing. Any unauthorized use of solutions **[*12]** other than Licensor's is not allowed, will void the warranty, and will result in an automatic termination of this License Agreement.

Dkt. 1-2 (Exhibit 2) ¶ 3.1 (underline added). Under this term of the Agreement, if a customer-licensee uses non-Edge serums with Edge's equipment, the Agreement automatically terminates, and the licensee may no longer use Edge's marks. *Id.*

Neither the grant of license nor the provision requiring the purchase of Edge's serums requires a purchaser of Edge's equipment to also purchase Edge's serum. These provisions only require licensees of Edge's trademarks to purchase Edge's serums to use the HydraFacial® mark in connection with their skincare services. Indeed, the Agreement is silent as to equipment purchasers who do not license Edge's mark, and nothing in the Agreement precludes a customer from purchasing Edge's equipment without purchasing Edge's serums. Ageless' allegations and arguments that the Trademark Licensing Agreement imposes any limitations on the purchase or use of Edge's equipment thus, fail.

Because Ageless' antitrust counterclaims are predicated on the existence of a tying arrangement between Edge's equipment and its serums, "the facts as **[*13]** pleaded do not fit the definition of a tying arrangement," and Ageless' antitrust counterclaims and affirmative defense of violation of antitrust laws fail. *See* *RealPage, Inc. v. Yardi Sys., No. CV-11-00690-ODW (JEMx), 2011 U.S. Dist. LEXIS 90095, at *14-15 (C.D. Cal. Aug. 11, 2011)* (dismissing tying claim for failure to allege plausibly existence of a tying condition); *see* *SEC, 902 F. Supp. at 1165*.[5]

Edge further argues Ageless' counterclaim fails on several additional dispositive grounds, namely, that Ageless fails to allege: (1) Edge ties two products in separate markets; (2) Ageless has suffered antitrust injury; (3) the existence of relevant antitrust markets as to either the tying or the tied product; (4) Edge enjoys market power with respect to the tying product; and (5) Edge has harmed competition. Mot. Br. at 2-4, 14-16. As Ageless has failed to allege the existence of an agreement that imposes a tying condition, the court need not address the parties' arguments as to these remaining grounds.

---

[5] Plaintiff Edge additionally argues its trademarks cannot qualify as a separate tying product under *Krehl, 664 F.2d 1348 (9th Cir. 1982)*. Mot. Br. 11-14. Ageless responds the counterclaim does not allege Edge's trademark, but rather Edge's skincare device, is the tying product. Opp. at 11-13. As Ageless expressly asserts it is not alleging the existence of a tie between Edge's serums and its trademarks, the court need not address the parties' arguments regarding *Krehl*.

For the foregoing reasons, the court GRANTS Edge's Motion to Dismiss Ageless' first counterclaim for violation of antitrust laws and second counterclaim for unfair competition, to the extent the latter is premised on violation of antitrust laws. The court further GRANTS Edge's Motion to Strike Ageless' ninth affirmative defense **[*14]** for violation of antitrust laws, finding "there are no questions of fact, that any questions of law are clear and not in dispute, and that under no set of circumstances could the defense succeed." *See* SEC, 902 F. Supp. at 1165. Defendant Ageless is granted 20 days' leave to amend to allow it the opportunity to plead sufficient facts to state these counterclaims and this affirmative defense.

III. Ageless' Tortious Interference With Business Relations Claim

The elements of tortious intentional interference with contract are: (1) a valid contract between plaintiff and a third party; (2) defendant's knowledge of the contract; (3) defendant's intentional acts designed to induce a breach or disruption of the contractual relationship; (4) actual breach or disruption of the contractual relationship; and (5) resulting damage. *Guidiville Band of Pomo Indians v. NGV Gaming, LTD 531 F.3d 767, 774 (9th Cir. 2008)* (citation omitted).

The elements of tortious intentional interference with prospective economic advantage are: (1) an economic relationship between the plaintiff and some third person containing the probability of future economic benefit to the plaintiff; (2) knowledge by the defendant of the existence of the relationship; (3) intentional acts on the part of the defendant designed to disrupt the **[*15]** relationship; (4) actual disruption of the relationship; and (5) damages to the plaintiff proximately caused by the acts of the defendant. *Packaging Sys. v. PRC-Desoto Int'l, Inc., 268 F. Supp. 3d 1071, 1089-90 (C.D. Cal. 2017)* (citing *Blank v. Kirwan, 39 Cal. 3d 311, 330, 216 Cal. Rptr. 718, 703 P.2d 58 (1985)*). In addition to these elements, a plaintiff must show the defendant's conduct was wrongful by some legal measure other than the fact of the interference itself. *Della Penna v. Toyota Motor Sales, U.S.A., Inc., 11 Cal. 4th 376, 393, 45 Cal. Rptr. 2d 436, 902 P.2d 740 (1995)*. Wrongful, in this context, means the act of interference "is independently unlawful, that is, [] it is proscribed by some constitutional, statutory, regulatory, common law, or other determinable legal standard." *Korea Supply Co. v. Lockheed Martin Corp., 29 Cal. 4th 1134, 1159, 131 Cal. Rptr. 2d 29, 63 P.3d 937 (2003)*.

Ageless does not specify whether its claim is for tortious interference with contract or tortious interference with prospective economic advantage. However, Edge argues Ageless fails to bring either claim because Ageless does not identify any actual or prospective contract with which Edge allegedly interfered. Mot. Br. at 20-21.[6] To the extent Ageless intends to bring a tortious interference with prospective economic advantage claim, Edge also argues such claim would fail because Ageless fails to allege Edge engaged in any wrongful conduct as the means of interference. *Id.*

The court agrees with Edge. The FAAC does not identify any contractual or prospective business relationship **[*16]** with which Edge allegedly interfered. *See* FAAC Counterclaims at ¶¶ 29-36. Although Ageless states it is prepared to allege these specific relationships as well as Edge's knowledge, acts of interference, and disruption of customer relationships in an amended counterclaim, Ageless implicitly concedes it has not done so in the current pleading. Opp. at 22. Instead, Ageless argues Edge has engaged in "obvious hypocrisy" since it has not met the same standard for its "Inducement to Breach Contract" claim. *Id.* Although a failure to plead all necessary elements of its inducement to breach contract claim may support a challenge to Plaintiff's corresponding claim, Plaintiff's failure to meet the pleading standards would not excuse Ageless from sufficiently pleading this cause of action in the FAAC.

Accordingly, the court GRANTS Edge's Motion to Dismiss Ageless' tortious interference claim with 20 days' leave to amend.

---

[6] Ageless argues Edge's Complaint suffers from the same defect but does not cite any authority for the proposition that Ageless is entitled to avoid dismissal because Edge's Complaint purportedly does not name specific contractual relationships in connection with Edge's interference claim. Opp. at 22.

Conclusion

For the foregoing reasons, the court GRANTS Edge's Motion to Dismiss Ageless' first counterclaim for violation of antitrust laws, second counterclaim for unfair competition claim to the extent it relies on violations of ***antitrust law***, and fourth counterclaim for tortious **[*17]** interference with business relations, and GRANTS Edge's Motion to Strike Ageless' ninth affirmative defense for unlawful tying and illegality. Ageless shall have 20 days from the date of this order to file an amended answer and counterclaims.

IT IS SO ORDERED.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Waiver

HN1[] **Arbitration, Arbitrability**

On a motion to dismiss in favor of arbitration, a court considers whether a valid arbitration clause exists, whether the movant is entitled to invoke the clause, whether the non-moving party is bound by it, and whether the clause covers the claims asserted. A court may then consider whether a party has waived the right to arbitrate.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Waiver

HN2[] **Arbitration, Arbitrability**

Even where a contract provides that an arbitrator shall decide issues of arbitrability, waiver by conduct, at least where due to litigation-related activity, is presumptively an issue for the court.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Waiver

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Orders to Compel Arbitration

HN3[] **Arbitration, Arbitrability**

Generally, a party may waive its right to arbitration explicitly or through its conduct. Under federal law, when deciding whether a litigant has waived its right to compel arbitration through litigation conduct, a court must consider several factors: (1) whether the parties participated in a lawsuit or took other action inconsistent with arbitration; (2) whether the litigation machinery has been substantially invoked and the parties are well into preparation of a lawsuit by the time an intention to arbitrate is communicated; (3) whether there has been a long delay and trial is near at hand; (4) whether the party seeking to compel arbitration has invoked the jurisdiction of the court by filing a counterclaim; (5) whether discovery not available in arbitration has occurred; and, (6) whether the party asserting waiver has suffered prejudice. In weighing the factors, no one factor carries the day, but rather, each case is to be judged on its particular facts. Waiver is not to be lightly inferred, thus reasonable doubts as to whether a party has waived the right to arbitrate should be resolved in favor of arbitration.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Civil Procedure > ... > Defenses, Demurrers & Objections > Affirmative Defenses > Arbitration & Award

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Waiver

HN4[] **Arbitration, Arbitrability**

It is not sufficient to assert in an answer the right to arbitrate as an affirmative defense.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Arbitration Clauses

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Arbitration Agreements

HN5[] **Arbitration, Arbitrability**

Where the parties' contract delegates the arbitrability question to an arbitrator, a court may not override the contract, even where the argument that the arbitration agreement applies to a particular dispute is wholly groundless.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Waiver

HN6[] Arbitration, Arbitrability

A district court has the discretion to dismiss claims where one party has a right to arbitrate all claims.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN7[] Prerequisites for Class Action, Adequacy of Representation

In ruling on a motion for class certification, the court must undertake a rigorous analysis' to determine whether the putative class satisfies each of the four prerequisites set forth in Fed. R. Civ. P. 23(a): numerosity, commonality, typicality, and adequacy of representation. In addition to the Rule 23(a) prerequisites, to be certified, a putative class must demonstrate that it satisfies one of the requirements set forth in Rule 23(b).

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN8[] Class Actions, Certification of Classes

The U.S. Supreme Court has cautioned that Fed. R. Civ. P. 23 does not set forth a mere pleading standard but rather, a plaintiff must affirmatively demonstrate its compliance with the Rule. This inquiry frequently overlaps with the merits of the plaintiff's underlying claim.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN9[] Prerequisites for Class Action, Numerosity

To be certified under Fed. R. Civ. P. 23, the members of a class must be so numerous that joinder of all members is impracticable. Fed. R. Civ. P. 23(a)(1). As a general rule, if the named plaintiffs demonstrate that the potential number of plaintiffs exceeds 40, the first prong of Rule 23(a) has been met.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN10[] Prerequisites for Class Action, Commonality

Fed. R. Civ. P. 23(a)(2) requires questions of law or fact common to the class. A common question is one that is capable of classwide resolution — which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke. Even a single common question will do.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN11[] **Prerequisites for Class Action, Adequacy of Representation**

For a class to be certified under Fed. R. Civ. P. 23, the proposed class representatives must demonstrate that they will fairly and adequately protect the interests of the class, Fed. R. Civ. P. 23(a)(4), and the claims or defenses of the representative parties are typical of the claims or defenses of the class. Fed. R. Civ. P. 23(a)(3).

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

HN12[] **Prerequisites for Class Action, Adequacy of Representation**

Only fundamental conflicts that go to the heart of the litigation prevent a plaintiff from meeting the Fed. R. Civ. P. 23(a)(4) adequacy requirement.

Pensions & Benefits Law > ERISA > Federal Preemption > State Laws

HN13[] **Federal Preemption, State Laws**

To the extent an employee benefit plan is subject to ERISA, courts have concluded that ERISA provides it with the capacity to sue under state law.

Business & Corporate Law > Unincorporated Associations

Civil Procedure > Parties > Capacity of Parties > Representative Capacity

HN14[] **Business & Corporate Law, Unincorporated Associations**

Fed. R. Civ. P. 17(b)(3)(A) of the Federal Rules of Civil Procedure provides that an unincorporated association may sue or be sued in its common name to enforce a substantive right existing under the United States Constitution or laws, and therefore, named Plaintiffs have capacity to pursue their federal RICO claims. Fed. R. Civ. P. 17(b)(3)(A)).

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Allocation

Evidence > Burdens of Proof > Preponderance of Evidence

HN15[] **Class Actions, Certification of Classes**

To meet their burden on a motion for class certification, named plaintiffs must demonstrate, by a preponderance of the evidence, that the class is currently and readily ascertainable based on objective criteria.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN16[] **Prerequisites for Class Action, Commonality**

Under Fed. R. Civ. P. 23(b)(3), a putative class must demonstrate that common issues predominate over individual issues. Class members' claims must depend upon a common contention. That common contention, moreover, must be of such a nature that it is capable of classwide resolution — which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke. What matters to class certification is not the raising of common questions' — even in droves — but rather, the capacity of a class-wide proceeding to generate common answers apt to drive the resolution of the litigation. Pervasive dissimilarities within the proposed class may serve to prevent the generation of common answers. To find predominance, the district court must determine that it can dispose of any differences among class members' claims in a manner that is not inefficient or unfair.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Scope of Protection

HN17[] **Class Actions, Certification of Classes**

Where a putative class action raises individual issues for adjudication, a class may be certified only if the proposed adjudication will be both administratively feasible and protective of defendants' Seventh Amendment and due process rights.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN18[] **Class Actions, Certification of Classes**

Before certifying a class, a district court must offer a reasonable and workable plan for how that opportunity will be provided in a manner that is protective of the defendant's constitutional rights and does not cause individual inquiries to overwhelm common issues.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN19[] **Class Actions, Certification of Classes**

As in any action in which determining whether any given class member was injured (and therefore has a claim) turns on an assessment of the individual facts. But the need to assess individual circumstances does not alone foreclose class certification. Instead, class certification is precluded only where such challenges are reasonably plausible in a given case and the plaintiff cannot demonstrate that allowing for such challenges in a manner that protects the defendant's rights will be manageable and superior to the alternatives.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN20[] Class Actions, Certification of Classes

The court will not allow arguments woven entirely out of gossamer strands of speculation and surmise to tip the decisional scales in a class certification ruling.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN21[] Class Actions, Certification of Classes

Affirmative defenses are appropriate for consideration in the class certification calculus. Although a necessity for individualized statute-of-limitations determinations invariably weighs against class certification under Fed. R. Civ. P. 23(b)(3), the courts reject any per se rule that treats the presence of such issues as an automatic disqualifier. In other words, the mere fact that such concerns may arise and may affect different class members differently does not compel a finding that individual issues predominate over common ones.

Civil Procedure > ... > Class Actions > Class Members > Absent Members

HN22[] Class Members, Absent Members

The court will take full advantage of its authority to place class members with potentially barred claims in a separate subclass or exclude them from the class altogether where evidence later shows that an affirmative defense is likely to bar claims against at least some class members.

Contracts Law > Contract Interpretation > Intent

HN23[] Contract Interpretation, Intent

It is not enough for a nonsignatory to have some resulting benefit from a signatory's exercise of its contractual rights. Instead, the contract must mention or manifest an intent to confer specific legal rights upon nonsignatory.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Arbitration Clauses

Business & Corporate Compliance > ... > Arbitration > Federal Arbitration Act > Arbitration Agreements

Business & Corporate Compliance > ... > Pretrial Matters > Alternative Dispute Resolution > Validity of ADR Methods

HN24[] Arbitration, Arbitrability

Federal courts have been willing to estop a signatory from avoiding arbitration with a nonsignatory when the issues to resolve in arbitration are intertwined with the agreement that the estopped party has signed. Arbitration with a nonsignatory can be compelled where the parties to the contract agreed to arbitrate any action arising out of, or relating in any way to the agreement. Where contract language explicitly limits the agreement to disputes between the signatories and there is no evidence of the signatory's intent to arbitrate with the nonsignatory, arbitration cannot be compelled.

Business & Corporate Compliance > ... > Alternative Dispute Resolution > Arbitration > Arbitrability

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN25[] **Arbitration, Arbitrability**

Some putative class members may be subject to mandatory arbitration is not a bar to class certification. Where common issues otherwise predominated, courts have usually certified Fed. R. Civ. P. 23(b)(3) classes even though individual issues were present in one or more affirmative defenses.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > Claims

Governments > Legislation > Statute of Limitations > Time Limitations

HN26[] **Racketeer Influenced & Corrupt Organizations, Claims**

A RICO, 18 U.S.C.S. § 1961, et seq., claim has not accrued where injury to a plaintiff's property is speculative.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN27[] **Class Actions, Certification of Classes**

A class may be certified without each putative class member first establishing standing, and Fed. R. Civ. P. 23 does not require the district court to establish injury in fact for each class member prior to class certification. But, the defendants must be afforded a meaningful opportunity to challenge injury in fact and pick off uninjured class members before or at trial.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN28[] **Class Actions, Certification of Classes**

To satisfy the predominance requirement for class certification, not only must liability be established through common proof, but the plaintiffs must also demonstrate that any resulting damages would likewise be established by sufficiently common proof. To do so, the plaintiffs must establish that damages are both capable of measurement on a classwide basis and tied to their theory of liability.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN29[] Class Actions, Certification of Classes

A model measuring class-wide damages in a class action must measure only those damages attributable to that theory. If the model does not even attempt to do that, it cannot possibly establish that damages are susceptible of measurement across the entire class for purposes of Fed. R. Civ. P. 23(b)(3). Calculations need not be exact, but at the class-certification stage (as at trial), any model supporting a plaintiff's damages case must be consistent with its liability case.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN30[] Class Actions, Certification of Classes

For the final prerequisite to class certification, the plaintiffs bear the burden of establishing that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy. Fed. R. Civ. P. 23(b)(3). In undertaking this analysis, the court examines four factors: (A) the class members' interests in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already begun by or against class members; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (D) the likely difficulties in managing a class action. Fed. R. Civ. P. 23(b)(3). The court is mindful that the policy at the very core of the class action mechanism is to overcome the problem that small recoveries do not provide the incentive for any individual to bring a solo action prosecuting his or her rights. The superiority and predominance inquiries thus ensure that class action litigation will achieve economies of time, effort, and expense, and promote uniformity of decision as to persons similarly situated, without sacrificing procedural fairness or bringing about other undesirable results.

Opinion

[*189] MEMORANDUM AND ORDER

WILLIAM E. SMITH, District Judge.

Plaintiffs Sheet Metal Workers Local No. 20 Welfare and Benefit Fund ("Sheet Metal Workers"), Indiana Carpenters Welfare Fund ("Indiana Carpenters"), and Plumbers Welfare Fund Local 130 ("Plumbers") (collectively, "Plaintiffs" or "named Plaintiffs") move to certify four classes of third-party payors ("TPPs") or health plans in two consolidated cases. Pls.' Mem. in Supp. of Pls.' Mot. for Class Certification ("Pls.' Mot.") 1-3, ECF No. 123;[1] see also Reply in Supp. of Pls.' Mot. for Class Certification ("Pls.' Reply") 3-4, ECF No. 145-1 (amending the class definition for the "Omissions Consumer Protection Class").[2] They allege that Defendant CVS Pharmacy, Inc. ("CVS") and five pharmacy benefit managers ("PBMs") — Defendant Caremark, L.L.C. ("Caremark", together with CVS, "Defendants"), Express Scripts, Inc., OptumRx, Inc., Medco Health Solutions, Inc.,[3] and MedImpact Healthcare Systems, Inc. — engaged in a nationwide scheme and conspiracy to overcharge TPPs, in violation of the *Racketeer Influenced and Corrupt Organizations Act ("RICO"), 18 U.S.C. § 1961, et seq.*, and various state laws. First Am. Compl. ("FAC") 5-9, 52-84, ECF **[**4]** No. 171. Specifically, Plaintiffs allege that CVS defrauded and overcharged the health plans in failing to treat its Health Savings Pass ("HSP") membership prices as its "Usual and Customary" ("U&C") prices when reporting U&C prices to the PBMs. Moreover, Plaintiffs claim that CVS and the PBMs conspired to conceal from the TPPs that the HSP prices were not included in its U&C prices.

In addition, Caremark moves to dismiss Sheet Metal Workers' claims against Caremark, on the basis that the parties have agreed to arbitrate any disputes between them. See generally Mem. in Supp. of Caremark LLC's Mot. under the FAA to Dismiss the Claims of Sheet Metal Workers ("Caremark Mot. to Dismiss") 1, ECF No. 163-1.

For the reasons that follow, Plaintiffs' Motion for Class Certification, ECF No. 120, is GRANTED, and Caremark's Motion to Dismiss, ECF No. 163, is also GRANTED. The Court DENIES WITHOUT PREJUDICE Plaintiffs' Motions to Exclude the Expert Testimony of Catherine Graeff, Michael P. Salve, Ph.D., and Brett E. Barlag, ECF Nos. 140-42.

I. Background[4]

---

[1] All docket entries refer to the docket in C.A. No. 16-046.

[2] Defendants make much of the term "health plans" as overly vague, but Plaintiffs clarify that it is used as a synonym for "third-party payor" — "namely, any entity (other than the patient or health care provider) that reimburses the patient's health care expenses (e.g., pharmaceutical purchases)." Pls.' Reply 18. In this opinion, "TPPs" and "health plans" are used interchangeably.

[3] Express Scripts purchased MedCo in 2012. FAC ¶¶ 12, 111. During the life of the HSP Program, Indiana Carpenters' PBM was MedCo. Id. ¶ 12.

Retail pharmacy chains generally sell their prescription drugs to two groups of consumers: those with prescription insurance, and **[**5]** those without insurance, also referred to as cash payors. FAC ¶ 29. Customers with insurance make up well **[*190]** over 90 percent of CVS's prescription drug business, and their prescription purchases are processed and paid for (in part or in full) by health plans, including health insurance companies, third-party administrators, health maintenance organizations, self-funding health and welfare benefit plans, health plans, and other health benefit providers (collectively referred to herein as "health plans" or "TPPs"). Id.

Pharmacies, including CVS, report the prices they charge cash customers, known as the "Usual and Customary" or "U&C" price, to PBMs and TPPs to comply with the National Council for Prescription Drug Program's ("NCPDP") requirements. Id. ¶¶ 1, 33-35. This arrangement (and the contracts between CVS and the PBMs), in part, guarantees that TPPs and insured consumers do not pay more for a prescription drug than an uninsured consumer would pay for the same drug. Id. ¶ 1.

Pharmacy benefit managers, or PBMs, facilitate transactions between TPPs and pharmacies. Id. ¶ 28. TPPs contract with PBMs to perform services "including the negotiation of drug prices with drug companies, creation **[**6]** of formularies, management of prescription billing, construction of retail pharmacy networks for insurers, and provision of mail-order services." Id. PBMs set up how pharmacy claims are adjudicated consistent with instructions from their TPP clients. Id. ¶ 36. Pursuant to PBM/TPP contracts, TPPs pay their PBMs for generic drugs purchased by their members based on the "lower of" three benchmark prices: average wholesale price ("AWP") less a defined percentage (i.e., AWP - %); U&C; or Maximum Allowable Cost ("MAC"). Id. ¶¶ 39-41. A drug's AWP is set and published by third parties. Id. ¶ 40. PBMs set the MAC for each generic drug on their proprietary MAC lists. Id. ¶ 41. The U&C is set by the pharmacy and is typically the highest of the three prices. Id. ¶ 42.

PBMs also contract with pharmacies to dispense drugs to their TPP clients. Id. ¶ 43. In those contracts, PBMs also typically agree to pay pharmacies based on benchmark prices, such as AWP, U&C, and MAC. Id. As the middlemen, PBMs make their profit from charging their TPP clients more for drugs than they pay the pharmacy for the transactions. Id. Thus, PBMs do not disclose the prices they charge their TPP clients, nor what they pay **[**7]** pharmacies. Id.

It was against this backdrop that, in September 2006, "Walmart turned the world of generic prescription drugs upside-down" by announcing that it would charge $4 for a 30-day supply, and $10 for a 90-day supply, of hundreds of generic prescription drugs. Id. ¶¶ 2, 52. Target, Walgreens, Rite Aid, and other retailers with pharmacies followed suit. Id. ¶ 52. Walmart and Target (until CVS acquired Target pharmacies in 2015) reported $4 as their U&C prices. Id. Tweaking the model a bit, Walgreens and Rite Aid required customers to "join" their generic prescription drug programs to reap the benefits. Id. ¶ 57.

Plaintiffs allege that CVS joined with Caremark (and later ScriptSave), a fellow subsidiary of CVS Health Corporation, to sketch out a discount generic drug program that shielded CVS from reporting the discount price as its U&C to PBMs. Id. ¶¶ 56-57, 71-83. In March 2008, prior to launching the HSP program, CVS and Caremark analyzed how adopting a generic discount program would impact CVS's revenue from TPPs. Id. ¶ 59. An analyst at CVS determined that the impact to TPP revenue would be $866 million annually if CVS included all the drugs on the Walmart list, and, if CVS **[**8]** included all the drugs on the Walgreens list, the impact would be an additional $329 million. Id. As a result, CVS structured its HSP differently, **[*191]** citing concerns that "[m]aking the program 'too attractive' creates higher risk for our 3rd party plan pricing and profitability." Id. ¶ 61 (quoting CVSSM-0002427, at 2430 (May 8, 2008 presentation given to Larry Merlo, as edited by Bari A. Harlam at Caremark)). Unlike Walmart and Walgreens, CVS decided to charge consumers a $10 annual fee to join the program. Id. ¶ 65. Plaintiffs allege that, in addition to collaborating with Caremark, CVS also "enlisted the participation of" three of the largest PBMs in the country, Express Scripts, OptumRx, and MedImpact, to embark on a scheme to conceal from health plans its HSP drug prices when reporting U&C prices. Id. ¶ 3.

---

[4] The Court gleans the background from Plaintiffs' First Amended Complaint. See generally First Am. Compl. ("FAC"), ECF No. 81-1.

In November 2008, the HSP program went live. Id. ¶ 64. From November 9, 2008 through 2010, customers paid a $10 annual fee to join the program, which gave them access to a 90-day supply of 400 commonly prescribed generic drugs for $9.99. Id. ¶¶ 64-65. Starting in 2011, the annual fee went up to $15, and CVS raised the price for HSP-listed drugs to $11.99 for a 90-day supply and $3.99 **[**9]** for a 30-day supply. Id. ¶ 65. From November 2008 to February 2016, CVS did not report the HSP price as the U&C price for HSP-eligible drugs. Id. ¶ 66. Caremark administered the HSP program from its inception until July 2013, when ScriptSave took over its administration; the program was discontinued on January 31, 2016. Id. ¶¶ 23, 70, 83. Caremark played a dual rule in this saga: in addition to administering the HSP program, many TPPs used Caremark as a PBM. Id. ¶ 3.

Importantly, PBMs have incentive to encourage or conceal inflated U&C prices — PBMs make more money when U&C prices are higher. Id. ¶ 47. When a PBM pays a pharmacy the U&C price for a generic drug transaction, the TPP also pays the U&C price to the PBM. Under those circumstances, the PBM makes no profit or "spread" between what it pays the pharmacy and what the TPP pays the PBM. Id. ¶ 49. During the HSP program, CVS's HSP prices were often lower than the price a TPP would have paid under a formula using AWP or MAC as the benchmark price. Id. ¶ 50. Therefore, if CVS had reported its HSP prices as U&C prices, the U&C price generally would have been the lowest benchmark price. Id. Thus, PBMs stood to lose "hundreds of millions **[**10]** of dollars in 'spread' opportunities" were HSP prices to be reported as U&C prices. Id.

Plaintiffs allege that, for this reason, Caremark, Express Scripts, OptumRx, and MedImpact not only failed to intervene and prevent CVS's alleged fraudulent scheme, but concealed it "by adopting 'policies' that contradicted the language of their own contracts and provider manuals . . . ." Id. ¶ 51. Specifically, in its role as a PBM, Caremark instituted a policy that differentiated between Walmart's $4 generic program and "Club Plans" — like the HSP program — that required consumers to join and pay a membership fee. Id. ¶ 4. Under this policy, generic programs without membership fees were required to report their plan prices as U&C prices, and "Club Plans" were not. Id. Caremark did not disclose this policy to its TPP clients, other than those members of its Client Advisory Board. As a result, Plaintiffs allege, CVS and Caremark — both as HSP administrator and PBM — concealed from TPPs that CVS was not reporting HSP prices as U&C prices for HSP-eligible drugs. Id. ¶¶ 3-5.

II. Discussion

A. Defendant Caremark's Motion to Dismiss Sheet Metal Workers' Claims under the Federal Arbitration Act

Caremark moves **[**11]** to dismiss Sheet Metal Workers' claims under the *Federal Arbitration Act ("FAA")*, **[*192]** arguing that the operative agreements between Caremark and Sheet Metal Workers include arbitration clauses. See generally Caremark Mot. to Dismiss 1. Caremark argues that Sheet Metal Workers violated the parties'[5] agreements by initiating this suit against Caremark and by refusing to engage in dispute-resolution negotiations. See id. Caremark highlights that, under the parties' dispute-resolution provisions, Sheet Metal Workers agreed to do the following in advance of litigation: (1) give notice of any dispute; (2) designate a dispute-resolution representative; (3) negotiate in good faith to resolve the dispute; and (4) submit to binding arbitration in Cook County, Illinois if negotiations did not resolve the dispute in 90 days. Id.

HN1[] On a motion to dismiss in favor of arbitration, a court considers "whether a valid arbitration clause exists, whether the movant is entitled to invoke the clause, whether the non-moving party is bound by it, and whether the clause covers the claims asserted." *FPE Found. v. Cohen, 801 F.3d 25, 29 (1st Cir. 2015)* (citing *Soto-Fonalledas v. Ritz-Carlton San Juan Hotel Spa & Casino, 640 F.3d 471, 474 (1st Cir. 2011)*). A court may then consider whether a party has waived the right to arbitrate. Id. Here, Sheet Metal Workers argues only that Caremark has **[**12]** forfeited its arbitration rights by sitting on its hands, and that not all claims asserted fall within the relevant arbitration provisions. See Resp. in Opp'n to Def. Caremark's Mot. for Leave to File Mot. under the FAA to Dismiss the Claims of Sheet Metal Workers ("Pls.' Opp'n to Mot. to Dismiss") 5, ECF No. 132; Sheet Metal Workers

[5] In this section, "parties" refers only to Plaintiff Sheet Metal Workers and Defendant Caremark.

Sur-Reply in Opp'n to Def. Caremark's Mot. For Leave to File Mot. Under FAA to Dismiss ("Sheet Metal Workers Sur-Reply") 8-9, ECF No. 164.

But before the Court can pass on whether Caremark waived its right to arbitration, the Court must first address a threshold issue: whether the Court or an arbitrator should decide whether Caremark forfeited its right to arbitrate through litigation-conduct waiver.[6]

1. Who Decides Litigation-Conduct Waiver?

Caremark argues that whether it waived its right to arbitrate under the relevant contracts is an issue of arbitrability for an arbitrator, not the Court, to decide. Reply in Supp. of Caremark's Mot. for Leave to File Mot. under the FAA to Dismiss the Claims of Sheet Metal Workers ("Caremark Reply") 1, ECF No. 135. This is because, Caremark says, the contracts at issue here incorporate the commercial rules of the **[**13]** American Arbitration Association ("AAA"), which delegate the issue of arbitrability to an arbitrator. Id. at 4-5 (citing Prescription Benefit Services Agreement ¶ 13.16 (Jan. 1, 2015) ("PBSA"), ECF No. 131-32).

[*193] ***HN2***[] In *Marie v. Allied Home Mortg. Corp., 402 F.3d 1, 14-15 (1st Cir. 2005)*, the First Circuit held that, even where a contract provides that an arbitrator shall decide issues of arbitrability, "waiver by conduct, at least where due to litigation-related activity, is presumptively an issue for the court." Applying this rule, courts in this Circuit have decided issues of litigation-conduct waiver, distinct from issues of arbitrability. See, e.g., *In re Intuniv Antitrust Litig., No. 1:16-CV-12653-ADB, 2021 WL 517386, at *8 (D. Mass. Feb. 11, 2021)* (citing *Christensen v. Barclays Bank Del., No. 18-cv-12280, 2019 U.S. Dist. LEXIS 72239, 2019 WL 1921710, at *5 (D. Mass. Apr. 30, 2019)*; *Binienda v. Atwells Realty Corp., No. 15-cv-00253, 2018 U.S. Dist. LEXIS 38765, 2018 WL 1271443, at *2-3 (D.R.I. Mar. 9, 2018)*; *Cutler Assocs., Inc. v. Palace Constr., LLC, 132 F. Supp. 3d 191, 199-200 (D. Mass. 2015)*).

Caremark contends that after the Supreme Court's decisions in *BG Group, PLC v. Republic of Argentina, 572 U.S. 25, 134 S. Ct. 1198, 188 L. Ed. 2d 220 (2014)*, and *Henry Schein, Inc. v. Archer & White Sales, Inc., 139 S. Ct. 524, 202 L. Ed. 2d 480 (2019)*, Marie is no longer good law, and issues of litigation-conduct waiver are now consigned to an arbitrator. Caremark Reply 3. This argument gets no traction.

In BG Group, the Supreme Court recognized that "courts presume that the parties intend arbitrators, not courts, to decide disputes about the meaning and application of particular procedural preconditions for the use of arbitration." *572 U.S. at 34* (citation omitted). "These procedural matters include claims of 'waiver, delay, or a like defense to arbitrability.'" *Id. at 35* (quoting *Moses H. Cone Mem'l Hosp. v. Mercury Constr. Corp., 460 U.S. 1, 25, 103 S. Ct. 927, 74 L. Ed. 2d 765 (1983)*). This Court **[**14]** previously considered, in *Binienda, 2018 U.S. Dist. LEXIS 38765, 2018 WL 1271443, at *2-3*, whether BG Group displaced the reasoning in Marie, and concluded that it did not.

In BG Group, the Supreme Court emphasized that parties typically expect a forum-based decisionmaker to decide forum-specific procedural gateway matters, including "the satisfaction of 'prerequisites such as time limits, notice, laches, estoppel, and other conditions precedent to an obligation to arbitrate.'" *572 U.S. at 34-35* (quoting *Howsam v. Dean Witter Reynolds, Inc., 537 U.S. 79, 84, 123 S. Ct. 588, 154 L. Ed. 2d 491 (2002)*). Thus, "waiver", as contemplated in *BG Group*, does not include "litigation-conduct waiver". See *Binienda, 2018 U.S. Dist. LEXIS 38765, 2018 WL 1271443, *2*. As it did in Binienda, this Court concludes that "[n]othing in BG Group undercuts the holding in Marie, that the Supreme Court did not intend to alter [the] traditional rule that courts presumptively decide

---

[6] Caremark argues that Illinois law, not federal law, applies to this dispute. Caremark Reply 8-9. While the Court need not reach the issue, the First Circuit has signaled that litigation-conduct waiver is an issue of federal law. See *Rankin v. Allstate Ins. Co., 336 F.3d 8, 12 n.3 (1st Cir. 2003)* (noting that, while not argued, "arbitration-related issues in this case are probably governed by the" FAA and, if so, "federal law would automatically govern waiver issues" (citation omitted)). Under either body of law, the result here is the same. See *LRN Holding, Inc. v. Windlake Capital Advisors, LLC, 409 Ill. App. 3d 1025, 949 N.E.2d 264, 270-72, 350 Ill. Dec. 776 (Ill. App. 3d Dist. 2011)* (noting that, under Illinois law, where a contract contains a choice-of-law provision and incorporates the American Arbitration Association rules of arbitration, federal law applies to questions regarding arbitration).

issues of litigation-conduct waiver." Id. (citation omitted); see also *Rankin v. Allstate Ins. Co., 336 F.3d 8, 12 (1st Cir. 2003)* (pre-dating BG Group, but emphasizing that "an arbitration provision has to be invoked in a timely manner or the option is lost" and, "[u]nder federal law, such a forfeiture is an issue for the judge" (citations omitted)).

Nor does Henry Schein come to Caremark's aid. In Henry Schein, the Supreme Court held that when a contract delegates arbitrability to an arbitrator, courts must give full **[**15]** meaning to that delegation and refrain from passing on any issues of arbitrability. *139 S. Ct. at 529*. Here, in contrast, whether Caremark waived its right to arbitrate through litigation conduct in this judicial forum is a distinct issue from the underlying arbitrability of the dispute. See *In re Intuniv Antitrust Litig., 2021 WL 517386, at *8* (concluding that the Supreme Court's decision in Henry Schein did not upset Marie's **[*194]** holding); see also *Sabatelli v. Baylor Scott & White Health, 832 F. App'x 843, 848 n.3 (5th Cir. 2020)* (noting that litigation-conduct waiver "is an issue for the court, rather than the arbitrator, to decide . . . because it 'implicates courts' authority to control judicial procedures or to resolve issues . . . arising from judicial conduct'" (quoting *Vine v. PLS Fin. Servs., 689 Fed. Appx. 800, 802-03 (5th Cir. 2017)*); *Ehleiter v. Grapetree Shores, Inc., 482 F.3d 207, 219, 48 V.I. 1034 (3d Cir. 2007)*.[7]

The Court therefore concludes that litigation-conduct waiver is presumptively an issue for the Court, not an arbitrator, to decide.

2. Litigation-Conduct Waiver

Next, Caremark argues that it has not waived its right to arbitrate Sheet Metal Workers' claims through its participation in this litigation. Caremark Reply 8-15. ***HN3***[] Generally, a party may waive its right to arbitration explicitly or through its conduct. *FPE Found., 801 F.3d at 29*. Under federal law, when deciding whether a litigant has waived its right to compel arbitration through litigation conduct, a court must **[**16]** consider several factors:

> (1) whether the parties participated in a lawsuit or took other action inconsistent with arbitration; (2) whether the litigation machinery has been substantially invoked and the parties [are] well into preparation of a lawsuit by the time an intention to arbitrate [is] communicated; (3) whether there has been a long delay and trial is near at hand; (4) whether the party seeking to compel arbitration has invoked the jurisdiction of the court by filing a counterclaim; (5) whether discovery not available in arbitration has occurred; and, (6) whether the party asserting waiver has suffered prejudice.

Id. (citation and quotation omitted) (alterations in original). In weighing the factors, no one factor carries the day, but rather, "each case is to be judged on its particular facts." *Tyco Int'l Ltd. v. Swartz (In re Tyco Int'l Ltd. Sec. Litig.), 422 F.3d 41, 46 (1st Cir. 2005)* (citation omitted). "'[W]aiver is not to be lightly inferred,' thus reasonable doubts as to whether a party has waived the right to arbitrate should be resolved in favor of arbitration." *Id. at 44* (quoting *Restoration Pres. Masonry, Inc. v. Grove Eur. Ltd., 325 F.3d 54, 61 (1st Cir. 2003)*). Here, the question is whether Caremark invoked its arbitration right in a timely manner consistent with its desire to arbitrate. See id.

While Plaintiffs initiated this suit against CVS in **[**17]** 2016, they did not seek leave to amend their Complaint to add Caremark as a defendant until June 5, 2017. See Pls.' Mot. for Leave to File First Am. Compl., ECF No. 56. After being granted that leave, on May 4, 2018, Plaintiffs filed the First Amended Complaint, naming Caremark as a defendant. FAC, ECF No. 81-1. Caremark answered on July 3, 2018, asserting that "putative class members and at

---

[7] Caremark further highlights that the current version of the AAA's Commercial Rules states that "[n]o judicial proceeding by a party relating to the subject matter of the arbitration shall be deemed a waiver of the party's right to arbitrate." Caremark Reply 5 (quoting American Arbitration Association, Commercial Arbitration Rules and Mediation Procedures, *Rule 52(a)* (2013)). However, the AAA's Commercial Rules contained this same language when the First Circuit decided Marie, and thus, this argument is not persuasive. See *In re Intuniv Antitrust Litig., 2021 WL 517386, at *8*. Moreover, one could interpret the text "judicial proceeding by a party" as denoting that a plaintiff does not waive its right to arbitrate by filing suit. But in any event, the Rules only govern arbitration, they have no bearing on the Court's determinations.

least one Plaintiff have agreed to, and failed to comply with, dispute **[*195]** resolution procedures for their claims . . . ." Caremark L.L.C.'s Answer to FAC ¶ 29, ECF No. 90.

On October 31, 2018, Caremark began the dispute-resolution process and sent Sheet Metal Workers a Dispute Notice requesting a response within ninety days in accordance with the arbitration clause. See Caremark Dispute Resolution Ltr 1, ECF No. 129-79. In that letter, Caremark designated a representative and requested that Sheet Metal Workers do the same. Id. at 1-2. Sheet Metal Workers responded on January 22, 2019, declining to participate in the dispute resolution process and asserting that Caremark had forfeited its right to compel that process. Sheet Metal Worker Dispute Resolution Ltr 1-2, ECF No. 129-80. Caremark responded, **[**18]** denying Sheet Metal Workers' forfeiture argument, on January 26, 2019. Caremark Dispute Resolution Ltr, ECF No. 129-81. The 90-day period expired on January 29, 2019, and Sheet Metal Workers did not respond to Caremark's final letter. See Caremark Mot. to Dismiss 3. Plaintiffs filed their Motion for Class Certification on April 29, 2019, and on July 17, 2019, Caremark filed its Motion for Leave to File Motion under the FAA to Dismiss the Claims of Sheet Metal Workers, ECF No. 127.

The upshot is that Caremark was added as a defendant on May 4, 2018, engaged in the dispute-resolution process from October 31, 2018 to January 29, 2019, and sought dismissal based on arbitration on July 17, 2019.[8] While the down time before and after the dispute resolution process (May to October 2018, and January to July 2019) remains somewhat unexplained, it was not particularly long. Importantly, prior to its filing this Motion, Caremark's litigation-related activity vis-à-vis Sheet Metal Workers was limited to responding to discovery requests. Caremark Reply 12. Caremark further filed its Motion to Dismiss prior to any summary judgment deadline and well in advance of (a yet-to-be-scheduled) trial. Id. **[**19]** at 13.

Thus, turning to the six factors the Court must consider, the first five factors lean in Caremark's favor. During the period of delay, Caremark and Sheet Metal Workers participated very little in the lawsuit, no substantive motions were litigated, trial was still far off, Caremark filed no counterclaims against Sheet Metal Workers, and Sheet Metal Workers does not claim that Caremark secured discovery that is unavailable in arbitration.[9] See *FPE Found., 801 F.3d at 29*. Notably, Caremark did not, for instance, file counterclaims against Sheet Metal Workers, serve discovery requests on Sheet Metal Workers, file motions against Sheet Metal Workers, or seek adjudication of any arbitrable issue involving Sheet Metal Workers. Caremark Reply 12. Caremark further filed its Motion to Dismiss well in advance of any trial date, and before any other substantive deadlines, aside from class certification. **[*196]** See *FPE Found., 801 F.3d at 29*; see also *Creative Sols. Grp., Inc. v. Pentzer Corp., 252 F.3d 28, 33-34 (1st Cir. 2001)* (holding that the right to arbitrate had not been waived where party moving to compel arbitration had not invoked formal discovery).

On the last of the six factors, Sheet Metal Workers contends that it has been prejudiced by Caremark's dilatory effort to move for arbitration. In particular, it **[**20]** argues that if it is sent to arbitration now, Sheet Metal Workers will be prejudiced by the need to litigate potential defenses related to statutes of limitations and laches (even assuming that the defenses eventually fail). Moreover, it contends that Caremark may argue that its claims are barred for failure to comply with the dispute-resolution procedures. Pls.' Opp'n to Mot. to Dismiss 6-7. However, the only relevant prejudice is that which is a product of a defendant's failure to timely invoke the arbitration procedure, not a product of arbitration itself. See *In re Citigroup, Inc., 376 F.3d 23, 26 (1st Cir. 2004)*). For that reason, Sheet Metal Workers' claims that it may face new defenses in arbitration (statute of limitations, laches, and failure to

---

[8] While Caremark makes much of putting Sheet Metal Workers on notice of its intent to arbitrate by asserting it as an affirmative defense, this Motion is the first time Caremark properly asserted its right. See *In re Citigroup, Inc., 376 F.3d 23, 27 (1st Cir. 2004)* (noting that ***HN4***[] it is not sufficient to assert in an answer the right to arbitrate as an affirmative defense).

[9] The Court does understand Sheet Metal Workers to argue that CVS conducted discovery that would not have been available at arbitration and that CVS and Caremark have the same attorneys. See Feb. 27, 2020 Hr'g Tr. 123-24, ECF No. 170. While the Court is sympathetic to the realities of this situation, it is not confident that Sheet Metal Workers would have found itself in any different of a position had Caremark asserted its arbitration right earlier. Presumably CVS and Sheet Metal Workers would have engaged in that same discovery.

comply with dispute-resolution procedures) fail because Caremark already has alleged those affirmative defenses in its Answer. Caremark Reply 14.

Sheet Metal Workers further argues that it is prejudiced because it did not have the opportunity to add a substitute named plaintiff without an arbitration clause in its relevant agreement; this argument, however, also fails as it is not the product of any alleged delay. Moreover, named Plaintiffs and the putative class suffer no prejudice because, **[**21]** as discussed below, the Court is not persuaded that the absence of a named plaintiff that contracted with a specific PBM advances Defendants' typicality argument.

Having considered all the relevant factors, the Court concludes that Caremark has not waived its right to arbitration through its litigation conduct. See *FPE Found., 801 F.3d at 29*.

3. Claims Subject to Arbitration

Sheet Metal Workers further argues that, even if the Court finds no litigation-conduct waiver, Caremark is still not entitled to arbitrate all of Sheet Metal Workers' claims. Sheet Metal Workers highlights that the contracts containing the arbitration clause do not cover the entire class period — they are dated January 1, 2011 and January 1, 2015. Sheet Metal Workers Sur-Reply 9. Sheet Metal Workers thus argues that Caremark has no right to arbitrate claims arising prior to January 1, 2011. Further, Sheet Metal contends that it is unclear whether the parties entered into the January 11, 2011 agreement. Id.

In pertinent part, the dispute resolution provision in the January 1, 2015 contract provides:

> Dispute Resolution. In the event of a dispute between the parties and prior to commencing any litigation or other legal proceeding, each party shall, **[**22]** by giving written notice to the other party ("Dispute Notice"), request a meeting of authorized representatives of the parties for the purpose of resolving the dispute.

PBSA ¶ 13.16; see also id. ¶ 13.12 (providing that the dispute resolution clause survives termination of the agreement). Whether this dispute-resolution provision requires the parties to arbitrate disputes arising out of contracts entered prior to or after the January 1, 2015 contract is an issue of arbitrability. The parties have delegated the issues relating to arbitrability to an arbitrator, see PBSA ¶ 13.16 (incorporating the AAA rules), and therefore, these arbitrability questions must be decided **[*197]** by an arbitrator. See *Henry Schein, Inc. v. Archer and White Sales, Inc., 139 S. Ct. 524, 529, 202 L. Ed. 2d 480 (2019)* (holding that, ***HN5***[] where "the parties' contract delegates the arbitrability question to an arbitrator, a court may not override the contract", even where "the argument that the arbitration agreement applies to a particular dispute is wholly groundless").

In conclusion, because Caremark has not waived its right to arbitrate Sheet Metal Workers' claims against it through its conduct in this litigation, the Court GRANTS Caremark's Motion to Dismiss.[10]

B. Plaintiffs' Motion for Class Certification

Plaintiffs Sheet Metal **[**23]** Workers, Indiana Carpenters, and Plumbers now move to certify the following classes under *Rule 23(a)* and *(b)(3) of the Federal Rules of Civil Procedure*:

> **Nationwide Class**. All health plans that, at any time between November 2008 and February 1, 2016, (1) had Caremark, L.L.C., Express Scripts, Medco, OptumRx, or MedImpact (or any of their predecessors) as their pharmacy benefit managers, (2) paid for generic prescription drugs purchased from CVS that were included in

---

[10] Neither party argues that a stay, rather than dismissal, is the more appropriate remedy. See *Dialysis Access Ctr., LLC v. RMS Lifeline, Inc., 638 F.3d 367, 372 (1st Cir. 2011)* (noting that ***HN6***[] a district court has the discretion to dismiss claims where one party has a right to arbitrate all claims (citing *Next Step Med. Co. v. Johnson & Johnson Int'l, 619 F.3d 67, 71 (1st Cir. 2010)*)).

> CVS's Health Savings Pass program, and (3) paid for those drugs based on a formula containing Usual and Customary price.
>
> **Unjust Enrichment Class**. All health plans that, at any time between November 2008 and February 1, 2016, (1) had Caremark, L.L.C., Express Scripts, Medco, OptumRx, or MedImpact (or any of their predecessors) as their pharmacy benefit managers, (2) paid for generic prescription drugs purchased from CVS that were included in CVS's Health Savings Pass program in Arkansas, Colorado, Connecticut, District of Columbia, Hawaii, Illinois, Indiana, Iowa, Missouri, New Mexico, New York, Oklahoma, and West Virginia, and (3) paid for those drugs based on a formula containing Usual and Customary price.
>
> **Unfair and Deceptive Conduct Consumer Protection Class**. All health plans **[**24]** that, at any time between November 2008 and February 1, 2016, (1) had Caremark, L.L.C., Express Scripts, Medco, OptumRx, or MedImpact (or any of their predecessors) as their pharmacy benefit managers, (2) paid for generic prescription drugs purchased from CVS that were included in CVS's Health Savings Pass program in California, Florida, Illinois, Iowa, Massachusetts, New Jersey, New York, Ohio, and Washington, and (3) paid for those drugs based on a formula containing Usual and Customary price.

> **Omissions Consumer Protection Class**. All health plans that, at any time between November 2008 and February 1, 2016, (1) had Caremark, L.L.C., Express Scripts, Medco, OptumRx, or MedImpact (or any of their predecessors) as their pharmacy benefit managers, (2) paid for generic prescription drugs purchased from CVS that were included in CVS's Health Savings Pass program in Illinois, Michigan, Nevada, and New Jersey, and (3) paid for those drugs based on a formula containing Usual and Customary price.

Pls.' Reply 3-4.

Plaintiffs have excluded the following payors from the proposed classes: (1) any **[*198]** governmental payors, including Medicare and Medicaid; (2) any health plans that served on Caremark's **[**25]** Client Advisory Committee since January 1, 2008; (3) any health plans that have had parent, subsidiary, or affiliate relationships with any pharmacy benefit manager at any time since January 1, 2008; and (4) health plans making payments processed by OptumRx after January 29, 2015. They further exclude: (1) CVS, and its management, employees, subsidiaries, and affiliates; and (2) CVS Caremark and its officers and directors. See id. (amending the class definition).

1. Legal Standard

HN7[] In ruling on a motion for class certification, the Court must "undertake a 'rigorous analysis'" to determine whether the putative class satisfies each of the four prerequisites set forth in *Rule 23(a) of the Federal Rules of Civil Procedure*: numerosity, commonality, typicality, and adequacy of representation. *In re Nexium Antitrust Litig., 777 F.3d 9, 17-18 (1st Cir. 2015)* (quoting *Comcast Corp. v. Behrend, 569 U.S. 27, 33, 133 S. Ct. 1426, 185 L. Ed. 2d 515 (2013)*). In addition to the *Rule 23(a)* prerequisites, to be certified, a putative class must demonstrate that it satisfies one of the requirements set forth in *Rule 23(b)*. Here, Plaintiffs contend that they have satisfied *Rule 23(b)(3)*, that is, that "the questions of law or fact common to class members predominate over any questions affecting only individual members, and that a class action is superior to other available methods for fairly and efficiently adjudicating the controversy." **[**26]** *Fed. R. Civ. P. 23(b)(3)*.

HN8[] The Supreme Court has cautioned that *Rule 23* "does not set forth a mere pleading standard" but rather, a plaintiff "must affirmatively demonstrate [its] compliance with" the Rule. *Comcast, 569 U.S. at 33* (quoting *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 350, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*). This inquiry "frequently . . . 'overlap[s] with the merits of the plaintiff's underlying claim.'" *Id. at 33-34* (quoting *Dukes, 564 U.S. at 351*).

Here, Plaintiffs argue that each of the prerequisites of *Rule 23* has been met and that the Court should certify the proposed classes accordingly. Defendants disagree, of course, arguing that Plaintiffs fail to satisfy the requirements of *Rule 23*, and thus, class certification is not appropriate. Specifically, Defendants argue that the named class representatives do not satisfy the typicality and adequacy requirements, the proposed classes are not ascertainable, and Plaintiffs have failed to demonstrate that issues common to the classes predominate over individual issues, as required by *Rule 23(b)(3)*.

2. Numerosity and Commonality

HN9[] To be certified under *Rule 23*, the members of a class must be "so numerous that joinder of all members is impracticable." *Fed. R. Civ. P. 23(a)(1)*. As a general rule, if the named plaintiffs demonstrate "that the potential number of plaintiffs exceeds 40, the first prong of *Rule 23(a)* has been met." *Garcia-Rubiera v. Calderon, 570 F.3d 443, 460 (1st Cir. 2009)* (quoting *Stewart v. Abraham, 275 F.3d 220, 226-27 (3d Cir. 2001)*). The Court concludes that **[**27]** the proposed class — comprising hundreds if not thousands of TPPs — is too numerous to render joinder practical, and thus numerosity is established.

HN10[] *Rule 23(a)(2)* requires "questions of law or fact common to the class." A common question is one that is "capable of classwide resolution — which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one **[*199]** stroke." *Dukes, 564 U.S. at 350*. "[E]ven a single [common] question will do[.]" *Id. at 359* (quotations omitted). The Court is satisfied that a common question exists regarding whether Defendants engaged in a scheme to defraud TPPs by failing to report HSP prices as U&C prices, and accordingly, the commonality prerequisite is also met.

3. Typicality and Adequacy of Representation

HN11[] For a class to be certified under *Rule 23*, the proposed class representatives must demonstrate that they "will fairly and adequately protect the interests of the class[,]" *Fed. R. Civ. P. 23(a)(4)*, and the "claims or defenses of the representative parties are typical of the claims or defenses of the class[.]" *Fed. R. Civ. P. 23(a)(3)*.

Named Plaintiffs assert that their claims are typical of the claims of class members because they allege a singular fraudulent scheme: that CVS overcharged **[**28]** class members for drugs by not reporting HSP prices as the drugs' U&C prices. Pls.' Reply 9. Moreover, named Plaintiffs assert they are adequate representatives with knowledge of the claims and no conflicts. Id. at 11-14.

Defendants counter that named Plaintiffs are neither typical of the putative class members nor adequate to represent the proposed classes. Specifically, Defendants argue that named Plaintiffs cannot adequately represent health plans that contracted with PBMs with whom named Plaintiffs had no relationship; named Plaintiffs are subject to additional unique defenses; they lack familiarity with the basic elements of their claims; and they had actual knowledge of the alleged scheme. Mem. in Supp. of Defs.' Obj. to Pls.' Mot. for Class Certification ("Defs.' Opp'n") 58-64, ECF No. 133.

OptumRx and MedImpact. Defendants contend that because none of the named Plaintiffs contracted with the PBMs OptumRx or MedImpact, they are not suitable to represent putative class members who did. Defs.' Opp'n 6; see also Defs.' Sur-Reply in Opp'n to Pls.' Mot. for Class Certification ("Defs.' Sur-Reply") 22, ECF No. 166-1.[11] Defendants insist that named Plaintiffs have no incentive to develop **[**29]** or present evidence that the specific language about U&C pricing in OptumRx's and MedImpact's contracts support the absent class members' claims. Defs.' Opp'n 60-61. These arguments ring hollow. Named Plaintiffs, represented by a reputable, national plaintiffs-side firm, have every incentive to develop the claims of those health plans that did contract with OptumRx and MedImpact in order to establish the strongest trial and/or settlement position as a class. See, e.g., *In re Loestrin 24 FE Antitrust Litig., No. 1:13-MD-2472, 2019 U.S. Dist. LEXIS 118308, 2019 WL 3214257, at *12 (D.R.I. July 2, 2019)* (noting that the plaintiffs, represented by the same law firm as the TPPs here, were "in blunt, strategic terms"

---

[11] Defendants also advance this argument as to Caremark in pressing its Motion to Dismiss. See Feb. 27, 2020 Hr'g Tr. 110:20-111:2, ECF No. 170. The argument fails for the same reasons it fails as to OptumRx and MedImpact.

motivated to pursue the full extent of absent class members' claims "[b]ecause the bigger the claim, the bigger the leverage on [the defendants] and hopefully the bigger the settlement").

Moreover, Defendants' theory of the case on the merits is that "all of the U&C definitions should be interpreted, in light of the uniform industry understanding, to mean that membership program prices like HSP are not U&C prices." Defs.' Opp'n 30. This focus on industry understanding provides ample motivation for **[*200]** named Plaintiffs to pursue evidence regarding OptumRx and MedImpact, as well as all PBMs more generally. Thus, **[**30]** the Court is confident that the named Plaintiffs have the incentive to address contract language or other evidence unique to health plans that contracted with these two PBMs. Any purported conflict arising from different U&C contract terms is merely speculative. See *Matamoros v. Starbucks Corp., 699 F.3d 129, 138 (1st Cir. 2012)* (holding that***HN12***[] only fundamental conflicts that "go to the heart of the litigation prevent a plaintiff from meeting the *Rule 23(a)(4)* adequacy requirement" (citation and quotation omitted)).

Additional Unique Defenses. Defendants argue that named Plaintiffs are subject to additional defenses — rendering them atypical — because they have sued in the name of trusts, rather than in the name of their trustees. Defs.' Opp'n 6. Whether named-Plaintiff trusts have the capacity to sue under state law presents an interesting legal question — but not one that undermines their ability to serve as adequate and typical class representatives.

The First Amended Complaint alleges that named-Plaintiff trusts are "employee welfare benefit plan[s]" and "employee benefit plan[s]" as defined in the *Employee Retirement Income Security Act ("ERISA")*. FAC ¶¶ 9, 11, 13. Named Plaintiffs have staked out the position that they are not traditional trusts, but rather Voluntary Employees Beneficiary Association Plans **[**31]** ("VEBAs"), which are welfare benefit plans under *Section 501(c)(9) of the Internal Revenue Code*. See Ltr from E. Fagen to K. Hoover 1 (May 4, 2018), ECF No. 144-12. "A VEBA is subject to some aspects of ERISA, but is not considered to be a qualified retirement plan." Id.

It is not clear at this juncture whether ERISA conveys to named Plaintiffs, as VEBAs, the capacity to sue as discussed below. That said, were Defendants to convince the Court on summary judgment that named Plaintiffs do not have the capacity to sue as trusts, it would not undermine named Plaintiffs' ability to serve as adequate and typical class representatives. As a remedy in those circumstances, First Circuit authority favors directing plaintiff-trusts to substitute their trustees as plaintiffs, not dismissal of the claims. See *Yan v. Rewalk Robotics Ltd., 973 F.3d 22, 37 (1st Cir. 2020)* (stating that *Rule 17* "expressly anticipates the possibility that a complaint might be brought by someone who turns out not to be the party in interest" and "expressly admonishes that '[t]he court may not dismiss an action for failure to prosecute in the name of the real party in interest until, after an objection, a reasonable time has been allowed for the real party in interest to ratify, join, or be substituted into the action'" (quoting **[**32]** *Fed. R. Civ. P. 17(a)(3)*)).

HN13[] To the extent an employee benefit plan is subject to ERISA, courts have concluded that ERISA provides it with the capacity to sue under state law. See *Int'l Union of Bricklayers & Allied Craftsmen, Local No. 1 of Rhode Island v. Menard & Co. Masonry Bldg. Contractors, 619 F. Supp. 1457, 1462 (D.R.I. 1985)* (Selya, J.) (construing *29 U.S.C. § 1132(d)(1)* as providing employee benefit plans with the "right . . . to sue and be sued like corporations and other legal entities, thereby eliminating artificial state law capacity-to-sue barriers and authorizing suits brought by funds in situations where there would properly be jurisdiction" (citing *Pressroom Unions-Printers League Income Sec. Fund v. Cont'l Assurance Co., 700 F.2d 889, 893 (2d Cir. 1983)*)); see also *Local 159, 342, 343 & 444 v. Nor-Cal Plumbing, Inc., 185 F.3d 978, 984 (9th Cir. 1999)* (holding that *§ 1132(d)(1)* gives ERISA plans the capacity to sue where the court otherwise has **[*201]** jurisdiction); *Labul v. XPO Logistics, Inc., No. 3:18-CV-2062 (VLB), 2019 U.S. Dist. LEXIS 56080, 2019 WL 1450271, at *6 (D. Conn. Apr. 2, 2019)* (rejecting a similar challenge to pension funds' appointment as lead plaintiff in a class action, holding that the funds had capacity to sue under *§ 1132(d)(1)*); *29 U.S.C. § 1132(d)(1)* ("An employee benefit plan may sue or be sued under this subchapter as an entity.").

The Second Circuit in Pressroom and then-District Judge Selya in Menard specifically spoke to the capacity of ERISA trusts to bring state law claims in federal court, noting that

> "if a fund became involved in a contract dispute, and wished to pursue a state law contract claim, *§ 1132(d)(1)* would allow the fund to bring such an action in its own name."

> . . .
>
> And, insofar as § 1132(d)(1) does cede to trust **[**33]** funds capacity to sue as entities in their own behalf, it satisfies an obvious need. Conferral of entity status on an [employee benefit plan] eliminates an artificial impediment to the prosecution of actions by such a fund . . . and thereby enhances an important purpose of ERISA: furtherance of the stability and integrity of [employee benefit plans].

Menard, 619 F. Supp. at 1462 (quoting *Pressroom, 700 F.2d at 893*). Thus, to the extent named Plaintiffs are subject to ERISA, they would have capacity to sue. ***HN14***[] Moreover, *Rule 17(b)(3)(A) of the Federal Rules of Civil Procedure* provides that an unincorporated association "may sue or be sued in its common name to enforce a substantive right existing under the United States Constitution or laws", and therefore, named Plaintiffs have capacity to pursue their federal RICO claims. *Fed. R. Civ. P. 17(b)(3)(A)*).

For these reasons, Defendants' capacity-based argument does not undermine Plaintiffs' ability to serve as adequate and typical class representatives.

Class Representatives' Lack of Familiarity with Basic Elements of their Claims. Defendants next argue that the named Plaintiffs are inadequate class representatives because they are unfamiliar with the basic elements of their claims. Defs.' Opp'n 6. Defendants say that, during depositions, the funds' representatives did not know **[**34]** basic facts about the suit and could not speak to the veracity of the allegations. Id. at 64-65. The record belies this argument. Plaintiffs' proposed class representatives have "the minimal degree of knowledge" necessary to satisfy the *Rule 23* adequacy requirement. See *In re Pharm. Indus. Average Wholesale Price Litig., 277 F.R.D. 52, 60 (D. Mass. 2011)* ("[I]n a complex [pharmaceutical] case such as this, a plaintiff need not have expert knowledge of all aspects of the case to qualify as a class representative, and a great deal of reliance upon the expertise of counsel is to be expected." (citation and quotation omitted)); *In re Advance Auto Parts, Inc., Sec. Litig., No. CV 18-212-RGA, 2020 U.S. Dist. LEXIS 208085, 2020 WL 6544637, at *6 (D. Del. Nov. 6, 2020)* ("It is well-settled that a class representative need only possess a minimal degree of knowledge necessary to meet the adequacy standard." (quoting *Roofer's Pension Fund v. Papa, 333 F.R.D. 66, 77 (D.N.J. 2019)*). Each named Plaintiffs' 30(b)(6) representative provided a brief and broad overview of his understanding of the case and testified that he relied on the advice of counsel. See, e.g., Sheet Metal Workers Trustee Scott Parks Dep. 40:16-19, ECF No. 144-5 ("My understanding is CVS Caremark inflated their pricing by not incorporating their drug program, and it was not factored into the usual and customary pricing."); Indiana Carpenters Trustee Michael Joseph Lauer Dep. 141:8-11, ECF No. 144-13 (confirming **[*202]** that **[**35]** the representative understood from the Complaint that Carpenters was "suing CVS in this case for not reporting its HSP prices as its U&C prices"); Plumbers Trustee Joseph Ohm Dep. 14:21-25, ECF No. 144-14 (describing the pending claims as addressing "various retail generic drug programs offered at the retail level by various pharmacies").

Actual Knowledge. As explained in more detail below, the Court disagrees that any purported actual knowledge of the HSP pricing scheme on the part of the named Plaintiffs renders them inadequate or atypical class representatives. The Court is prepared to manage any such knowledge issues with subclasses.

For these reasons, the Court concludes that named Plaintiffs are adequate and typical class representatives for the proposed classes. See *Fed. R. Civ. P. 23(a)(3)* & *(a)(4)*.

4. Ascertainability

HN15[] To meet their burden on a motion for class certification, named Plaintiffs must demonstrate, "by a preponderance of the evidence, that the class is currently and readily ascertainable based on objective criteria." *Nexium, 777 F.3d at 19* (quoting *Carrera v. Bayer Corp., 727 F.3d 300, 306 (3d Cir. 2013)*). Defendants argue that the proposed classes in the instant case are not ascertainable.

a. Whether Plaintiffs' Class Definition is Too Vague

Defendants argue that Plaintiffs **[**36]** have used overly vague terms to define the proposed classes of "health plans" and the class exclusions (namely, "governmental payor" and "affiliates") and that Plaintiffs have not provided a reliable methodology for identifying the universe of health plans from electronic claims data. Defs.' Sur-Reply 4; see also Defs.' Opp'n 3, 26-27. The Court disagrees.

The Court is satisfied that the universe of TPPs is identifiable in an administratively feasible manner through requests for production to Caremark and subpoenas to third-party PBMs. See Pls.' Reply 16 n.75. At this juncture, the Court need only be satisfied that Plaintiffs can execute their plan; they do not need to have the information in hand. See *In re Asacol Antitrust Litig., 907 F.3d 42, 58 (1st Cir. 2018)* ("And to determine whether a class certified for litigation will be manageable, the district court must at the time of certification offer a reasonable and workable plan . . . .").

Plaintiffs' expert, Dr. Rena Conti,[12] has detailed her method for excluding pharmacy claims paid by government payors, and, in response to input from Mr. Brett Barlag, Defendants' expert, she updated her CVS Condor Codes (i.e., the CVS data field used to identify the PBM associated with each claim) for identifying **[**37]** and excluding government payors to be more inclusive. See Expert Report of Rena Conti, ("Conti Report") ¶ 71, ECF No. 123-6; see also Reply Report of Rena Conti, ("Conti Reply") ¶ 47, ECF No. 145-2; *In re Loestrin 24 FE Antitrust Litigation, 410 F. Supp. 3d 352, 386, 394, 401 (D.R.I. 2019)* **[*203]** (approving a similar methodology for removing governmental payors from the proposed class).

Moreover, Dr. Conti has set forth a method for excluding Caremark's Client Advisory Committee and those health plans with affiliate relationships with PBMs once discovery is completed. See Conti Report 5 n.11; see also Conti Reply ¶ 39 (detailing plans to exclude Caremark's Client Advisory Committee once CVS provides the pertinent data). It strains credulity for Defendants to suggest they do not have access to data on their own Client Advisory Committee and affiliates, and indeed, they have every incentive to come forward with data on Plaintiffs' exclusions, as Mr. Barlag's expert report plainly demonstrates. Thus, the Court is satisfied by a preponderance of the evidence that Plaintiffs have the tools — and Defendants the motivation to sharpen those tools — to precisely identify class members and apply class exclusions.

Plaintiffs have thus established by a preponderance of the evidence that they **[**38]** can identify the universe of TPPs, as well as apply the class definition and class exclusions in an administratively feasible way on a class-wide basis.

b. Identifying TPPs that Contracted for U&C Pricing Terms[13]

At the crux of this suit is the allegation that CVS failed to report its HSP prices as its U&C prices for eligible generic drugs, and as a result, putative class members paid more than they should have. Thus, to fall within the putative class, a TPP or health plan must have been entitled to "lower-of U&C pricing" (hereinafter, "lower-of pricing") during the class period. Lower-of pricing provides that, for specified prescription drugs, a TPP will pay the lowest of several pricing metrics, often including the U&C.[14] Pls.' Mot. 4-5.

---

[12] Dr. Conti is an Associate Research Director of Biopharma & Public Policy for the Boston University Institute for Health System Innovation & Policy, an Associate Professor at the Boston University Questrom School of Business, Department of Markets, Public Policy and Law, and an Academic Affiliate of Greylock McKinnon Associates. Expert Report of Rena Conti, ¶ 1, ECF No. 123-6. She received a B.A. from Kenyon College and a Ph.D. in Health Policy (Economics Track) from Harvard University. Id. ¶ 5. Defendants do not dispute her qualifications to offer expert opinion. They do, however, offer counter expert opinion.

[13] To the extent Plaintiffs assert that (challenged) testimonial affidavits and declarations from class members may be used to establish class membership, Pls.' Reply 15 (citing *In re Dial Complete Mktg. and Sales Practices Litig., 312 F.R.D. 36, 50 (D.N.H. 2015)*), they are incorrect. See *In re Asacol Antitrust Litig., 907 F.3d 42, 52-53 (1st Cir. 2018)* (rejecting rebutted, testimonial affidavits as proof of injury at class certification).

[14] [TEXT REDACTED BY THE COURT]

While many TPP/PBM and CVS/PBM contracts provided for lower-of pricing during the class period, some did not. See, e.g., Conti Reply ¶¶ 46, 48 (updating her damages calculation to "exclude [] claims identified by Mr. Barlag that may not have had U&C in the lower-of pricing formula"). Complicating matters, some TPPs had different contracts over the course of the class period, which in turn may have contained different pricing provisions and covered different **[**39]** prescriptions. Defendants high light Sheet Metal Workers as an example: "For part of the class period, Sheet Metal didn't get U&C pricing at all. For part of the class period, it did. And for part of the class period, it got U&C for some prescriptions but not other[s] . . . ." Feb. 27, 2020 Hr'g Tr. 43:16-19. The parties forecast that there may be upward of 40,000 TPP contracts. Id. at 49-50.

Seizing on this, Defendants next argue that there is no manageable way to identify which health plans or TPPs paid for HSP drugs based on a formula that incorporates U&C as a pricing metric. Defs.' Sur-Reply 1. Instead, they say, to determine class membership, one would need to review thousands of contracts. Defs.' Opp'n 3. To do so, Defendants' expert, Brett Barlag, states that "one would likely need to (1) link the individual prescription transactions to the individual TPP associated with that transaction and (2) review the **[*204]** contract between the PBM and that TPP to determine whether the contract entitled the TPP to U&C pricing — and, if so, for what time periods." Decl. of Brett E. Barlag ("Barlag Decl.") ¶ 119, ECF No. 131-1.

Plaintiffs counter that the process doesn't need to be that complicated. **[**40]** They say that class members can be identified from the PBM/TPP contracts and existing PBM data. Pls.' Reply 15-16 (citing Defs.' Opp'n 3; Conti Reply ¶¶ 10-17); see also Conti Reply ¶ 11 (stating that "PBMs maintain electronic claims data for each TPP and electronically store generic price algorithms" that could be used to "identify whether a TPP's generic pricing algorithm contained the U&C price as a term"). Plaintiffs would develop and deploy a computer program to identify whether a TPP's generic pricing algorithm contained the U&C price as a term, and if it did, to determine whether that TPP had paid for any HSP drugs at CVS during the class periods. Conti Reply ¶ 11. According to Plaintiffs, any TPPs that satisfy these two conditions and do not fall into a class exclusion are properly included in the putative classes. Id. If their classes are certified, Plaintiffs will seek the information through requests for production to Caremark and document subpoenas to the third-party PBMs. Pls.' Reply 16 n.75; see also Conti Reply ¶¶ 12-13 (confirming a data field in the Caremark/Sheet Metal Workers data containing a variable that can be used to identify price basis by which a claim is **[**41]** adjudicated, such as U&C price); Expert Report of Catherine Graeff 2, ECF No. 129-2 (noting that the NCPDP developed the Universal Claim Form in 1980 in an effort to standardize pharmacy benefit claims and that pharmacies and TPPs contract for which data fields on the UCF shall be filled out for claims adjudication).

As a fallback position, if the PBMs fail to produce the requisite data, Plaintiffs also offer to review each of the contracts — estimated to number upwards of 40,000 — for lower-of U&C pricing provisions. See Conti Reply ¶ 14; Feb. 27, 2020 Hr'g Tr. 19-20. Under this method, Plaintiffs would identify PBM/TPP contracts with the U&C price included in the generic pricing formula. Once identified, Plaintiffs would review the PBM claims data to confirm that the TPP paid for an HSP drug purchased at CVS during the class period. Conti Reply ¶ 15. Dr. Conti's team reviewed the 450 contracts in its possession from Caremark, Express Scripts, MedImpact, and OptumRx to test this method, and confirmed they could determine whether each contract indicated "presumptive class membership." Id. ¶ 16.

After carefully reviewing the expert reports and considering Plaintiffs' proposed methodology, **[**42]** the Court is satisfied that Plaintiffs have demonstrated an administratively feasible method by which to determine which TPPs were entitled to lower-of U&C pricing during the class period. At bottom, whether a health plan or TPP is a member of the proposed class is objectively ascertainable from either documents (i.e., contracts) or datasets. This case is clearly distinguishable from, for example, the landmark case of *In re Asacol, 907 F.3d at 51-53*. In Asacol, class membership depended on brand loyalty, which was only knowable by questioning a putative class member. Id. Here, in contrast, class membership can be determined either from "identify[ing] whether a TPP's generic pricing algorithm contained the U&C price as a term," Conti Reply ¶ 11, or an objective contract review.[15] Thus, Plaintiffs'

---

[15] The Court is not convinced that any differences in the contracts' U&C pricing provisions render this exercise unmanageable. To the extent the parties need to litigate whether certain TPPs' contract language entitled them to U&C pricing, Defs.' Opp'n 23 &

[*205] proffered methodology presents a workable plan to ascertain class membership from objective criteria. See *Matamoros v. Starbucks Corp., 699 F.3d 129, 139 (1st Cir. 2012)* ("For a class to be sufficiently defined, the court must be able to resolve the question of whether class members are included or excluded from the class by reference to objective criteria." (quoting 5 James Wm. Moore et al., *Moore's Federal Practice § 23.21[3][a]* (3d ed. 2012))); see also *Asacol, 907 F.3d at 52*; *Byrd v. Aaron's Inc., 784 F.3d 154, 171 (3d Cir. 2015)*, as amended (Apr. 28, 2015) (stating that "'the size of a potential **[**43]** class and the need to review individual files to identify its members are not reasons to deny class certification'" because "[t]o hold otherwise would seriously undermine the purpose of a *Rule 23(b)(3)* class to aggregate and vindicate meritorious individual claims in an efficient manner" (quoting *Young v. Nationwide Mut. Ins. Co., 693 F.3d 532, 539-40 (6th Cir. 2012)*)).

The cases cited by Defendants do not convince this Court otherwise. In Skelaxin, the district court concluded that the class was not ascertainable where class member identification required "individual inquiry into contracts covering millions of [prescription] purchases" and the putative class had "not identified what in each transaction would be required to determine" class membership. *In re Skelaxin (Metaxalone) Antitrust Litig., 299 F.R.D. 555, 570, 572 (E.D. Tenn. 2014)*. That is not the case here. As recited in detail above, Plaintiffs have demonstrated that they can employ either an algorithm or contract review to determine whether a TPP paid for drugs during the class period using U&C pricing.

In Manson, the second case Defendants rely upon, the court held that the putative class was not ascertainable because the public records proposed by the plaintiffs established only "the possibility that a particular homeowner might fall within the class." *Manson v. GMAC Mortg., LLC, 283 F.R.D. 30, 38 n.26 (D. Mass. 2012)*. Here, Plaintiffs' proposed methodology **[**44]** will be able to identify class members with a far greater degree of certainty. Thus, the Court concludes that Plaintiffs have set forth an administratively feasible plan for ascertaining the contours of their proposed class.

5. Predominance

HN16[] Under *Rule 23(b)(3)*, a putative class must demonstrate that common issues predominate over individual issues. *Asacol, 907 F.3d at 51* (citing *Amgen, Inc. v. Connecticut Ret. Plans & Tr. Funds, 568 U.S. 455, 469, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013)*). Class members' "claims must depend upon a common contention." *Dukes, 564 U.S. at 350*. "That common contention, moreover, must be of such a nature that it is capable of classwide resolution — which means that determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke." Id. The Supreme Court emphasized that "[w]hat matters to class certification . . . is not the raising of common 'questions' — even in droves — but rather, the capacity of a class-wide proceeding to generate common answers apt to drive the **[*206]** resolution of the litigation." Id. (quoting Richard A. Nagareda, Class Certification in the Age of Aggregate Proof, *84 N.Y.U. L. Rev. 97, 132 (2009)*). Pervasive "[d]issimilarities within the proposed class" may serve to prevent "the generation of common answers." Id. (quoting Nagareda, *84 N.Y.U. L. Rev. at 132*). To find predominance, the district **[**45]** court must determine that it can dispose of any differences among class members' claims "in a manner that is not 'inefficient or unfair.'" *Asacol, 907 F.3d at 51* (quoting *Amgen, 568 U.S. at 469*).

In Asacol, the First Circuit described inefficiency "as a line of thousands of class members waiting their turn to offer testimony and evidence on individual issues." Id. The flip side of this inefficiency is unfairness, illustrated well as "an attempt to eliminate inefficiency by presuming to do away with the rights a party would customarily have to raise plausible individual challenges on those issues." *Id. at 51-52*. Thus, ***HN17***[] where a putative class action raises individual issues for adjudication, a class may be certified only if "the proposed adjudication will be both

n.6, this can be done in subclasses. If Defendants have actual proof that some contracts are ambiguous (which the Court understands to not be Defendants' primary merits position) the Court will proceed to develop subclasses to litigate individual issues. The Court always has the option of decertifying a class where such an inquiry proves overwhelming; that said, at this point, Plaintiffs have met their burden in establishing that the classes are ascertainable.

'administratively feasible' and 'protective of defendants' Seventh Amendment and due process rights.'" Id. at 52 (quoting Nexium, 777 F.3d at 19).

HN18[] To this end, and before certifying a class, a district court must "offer a reasonable and workable plan for how that opportunity will be provided in a manner that is protective of the defendant's constitutional rights and does not cause individual inquiries to overwhelm common issues." Id. at 58; see also In re New Motor Vehicles Canadian Export Antitrust Litig., 522 F.3d 6, 20 (1st Cir. 2008) ("Under the predominance inquiry, 'a district court must formulate some prediction as to **[**46]** how specific issues will play out in order to determine whether common or individual issues predominate in a given case.'" (quoting Waste Mgmt. Holdings, Inc. v. Mowbray, 208 F.3d 288, 298 (1st Cir. 2000))).

Defendants argue that common issues do not predominate because the differences between class members — in their contracts, their purported knowledge of the alleged fraud, and their payment structures — would render a class action "inefficient" and/or "unfair." Defs.' Opp'n 27-28 (quoting Asacol, 907 F.3d at 51).

Here, the Court is satisfied that the common issues to be tested by the proposed classes — namely, whether CVS fraudulently failed to include its HSP prices in its U&C pricing — will provide common answers. See Dukes, 564 U.S. at 350 (emphasizing that a Rule 23(b)(3) action must have the capacity to produce common answers); see also Corcoran v. CVS Health Corp., 779 F. App'x 431, 433 (9th Cir. 2019) (holding, in consumer suit with similar allegations against CVS, that there existed triable issue of fact as to whether contract language supported finding that PBM contracts required CVS to include HSP prices as U&C prices in consumer class action). Thus, after careful consideration, the Court concludes that common issues predominate, and as discussed further below, any issues relating to subsets of classes — in particular, those relating to contract interpretation, knowledge, **[**47]** statute of limitations, and arbitration issues — can be adjudicated in an administratively feasible manner with the use of subclasses.[16]

[*207] a. Injury

With respect to injury, Defendants contend that several issues must be litigated individually, and thus individual issues predominate over common ones. The Court takes them up seriatim.

i. Contract Interpretation

Defendants contend that common issues do not predominate because there are too many issues requiring individual contract interpretation. For a TPP to have sustained injury under the alleged scheme at issue, it must have paid an overcharge when CVS failed to include HSP prices in its U&C prices. In Defendants' view, that determination is dependent on the drug-pricing formula dictated by individual contracts, including generic effective rate discounts ("GERs"). To sort this out, they contend, one must review thousands of individual contracts between CVS and PBMs, as well as between the five PBMs at issue and the putative class members. What is more, some putative class members had multiple PBMs and/or multiple contracts with a single PBM during the class period. Defs.' Opp'n 36.

Assuming that the parties do not convince this Court on **[**48]** summary judgment that either all TPPs or no TPPs were entitled to receive HSP prices as U&C prices, the contract language will make a difference. See Corcoran, 779 F. App'x at 433 (holding that there existed a triable issue of fact as to whether the contract language supported a finding that the PBM contracts required CVS to include HSP prices as their U&C prices in a consumer class action). The parties have forecasted that each will argue at summary judgment that industry standard dictates the

---

[16] Indeed, Defendants themselves compiled a chart purporting to reflect the individual issues at play in 39 MedImpact contracts proposed in this case. See Defs.' App'x B, ECF No. 133-1. In doing so, they also demonstrate that each of these issues is capable of resolution before trial.

result here: Defendants will argue that "when the varying U&C price definitions . . . are interpreted in light of industry understanding, the only conclusion is that the U&C definitions do not include membership program prices", Defs.' Sur-Reply 9 (emphasis omitted), and Plaintiffs will argue that HSP prices were — without exception — U&C prices per industry standard, see Pls.' Reply 1.

While this merits question is not before the Court now, contract review — by human or computer — appears inescapable. First, some TPPs have no colorable claim to being entitled to lower-of U&C pricing, and thus must be removed from any putative classes, as discussed above. Second, those TPPs entitled to lower- of U&C pricing for some or all **[**49]** of the class period may or may not have been entitled to receive the HSP price as its U&C price. Some contracts expressly exclude membership programs from U&C prices, some are silent, and still others may expressly include or exclude discounts. If Defendants do not prevail on summary judgment, some or all of these differences in contract language will likely present fact issues for trial. See *Corcoran, 779 F. App'x at 433*.

There may be upwards of 40,000 contracts, and while the relevant language in each contract must be isolated to ensure that Defendants are afforded the opportunity to litigate the merits as it pertains to the various TPPs, see *Asacol, 907 F.3d at 53*, there will be a small universe of answers to the common question posed. In the Court's view the contract language can be sorted into various buckets and litigated group by group. See *Byrd v. Aaron's Inc., 784 F.3d 154, 171 (3d Cir. 2015)*, as amended (Apr. 28, 2015) ("[T]he size of a potential class and the need to review individual files to identify its members are not reasons to deny class certification . . . ." (quoting *Young v. Nationwide Mut. Ins. Co., 693 F.3d 532, 539-540 (6th Cir. **[*208]** 2012)*)); cf. *Asacol, 907 F.3d at 53* (denying class certification to a putative class that included brand loyal consumers, in part because the plaintiffs had not been "provided any basis from which [the court] could conclude that the **[**50]** number of affidavits to which the defendants will be able to mount a genuine challenge is so small that it will be administratively feasible").

In sum, Plaintiffs have demonstrated through their expert that they are capable of using algorithms, or undertaking contract-by-contract review, to identify the universe of lower-of U&C pricing. Plaintiffs have further demonstrated that they can organize the relevant contract language into various buckets or subclasses for the jury to consider. It is not fathomable (or supported by evidence) that the putative class TPPs and the at-issue PBMs drafted 40,000 contracts with 40,000 distinct lower-of-U&C pricing provisions. Cf. *Corcoran, 779 F. App'x at 434* (noting, in addressing typicality, that there was no "meaningful differences in the PBM agreements that would result in the interests of the class representatives being misaligned with those of the absent class members"). Instead, the record evidence suggests that some of the U&C language expressly included discount programs, and other language was silent on discount programs.

Assuming the case proceeds to trial, a jury may find that some, none, or all of the class TPPs' contracts entitled them to HSP pricing, but this factual **[**51]** determination is not as overwhelming as Defendants have suggested. See *Asacol, 907 F.3d at 61* (Barron, J., concurring) (stating that *Rule 23(b)(3)* "'does not require a plaintiff seeking class certification to prove that each element of her claim is susceptible to classwide proof' but only to show that there is no 'reason to think that [individualized] questions will overwhelm common ones and render class certification inappropriate'" (quoting *Nexium, 777 F.3d at 21*)).

ii. Actual Knowledge

Defendants next argue that individualized issues of knowledge defeat class certification because Plaintiffs' claims are undermined where class members were aware that U&C pricing did not include HSP prices. Defs.' Opp'n 41. They argue that some health plans knew they were not receiving HSP prices, pointing to evidence purporting to demonstrate this for two of the three named plaintiffs. Defs.' Opp'n 4. Defendants argue that actual knowledge both undermines injury for each claim in the Complaint and provides an affirmative defense. To mount this defense, Defendants say, requires an individualized review of class-member communications and other class-member-specific evidence. Defs.' Opp'n 39; Defs.' Sur-Reply 11. Alongside most of Defendants' arguments, the **[**52]** road leads back to Asacol: if some members of the putative class were uninjured because they had actual knowledge of the underlying fraud, Defendants must have the opportunity to challenge and remove those uninjured class members in an administratively feasible and efficient fashion. Defs.' Sur-Reply 12-13 (citing *Asacol, 907 F.3d at 53-54*).

While this argument is compelling at first blush, upon closer review, Defendants have not put forth evidence of actual knowledge as to the named Plaintiffs, nor the broader putative class, sufficient to block Plaintiffs' bid for class certification.

First, the evidence presented as to the named Plaintiffs is notably thin. With respect to Sheet Metal Workers, Defendants offer a June 2009 email chain between Dan Tibus, a Caremark account executive, and Sheet Metal Workers' prescription benefits consultants "regarding prescription benefits, including drug prices." Decl. of Daniel Tibus ¶ 4, ECF No. 131-9; Email from **[*209]** Daniel Tibus to Rick Gerasta (June 23, 2009) ("Tibus Email"), at CAREMARKSM_0006154, ECF No. 131-43. In this email, the account manager explained to the outside consultants that the HSP "does not integrate with the RX benefit. . . . This retail program was initially **[**53]** launched as a benefit for uninsured customers. Naturally, consumers with insurance use it as a substitute if the Health Savings Pass provides a richer benefit than their employer plan." Tibus Email at CAREMARKSM_0006154. In addition, Defendants point to evidence that one of the Sheet Metal Workers trustees signed up for HSP for himself. That trustee's deposition makes plain that he did not recall signing up for the HSP, did not recall whether it required a membership fee, and did not recall the pricing under the program. See Michael Jones Dep. 83:3-12, ECF No. 129-21 ("I couldn't even tell you if I signed up, but I think I did.").

It is not clear at all to the Court that this is sufficient to conjure an issue of material fact on the issue of knowledge. Defendants offer nothing to suggest that the knowledge of Sheet Metal Workers' outside consultants is imputable to the health plan, nor is there any mention in the email chain of U&C price or CVS's failure to report its HSP price as its U&C price. What is more, there is nothing in this record suggesting that a reasonable juror could conclude from this sole HSP-enrolled trustee's deposition that he had knowledge of the alleged fraudulent **[**54]** scheme simply because he signed up for the HSP program. See *Corcoran v. CVS Health, Case No. 15-cv-03504-YGR, 2017 U.S. Dist. LEXIS 143327, 2017 WL 3873709, at *7 (N.D. Cal. Sept. 5, 2017)*, rev'd on other grounds *Corcoran v. CVS Health Corp, 779 Fed. App'x 431 (9th Cir. 2019)* ("[T]he evidence proffered by defendants does not sufficiently demonstrate that potential [consumer] class members, even those who were members of HSP, knew of the allegedly deceptive practices. . . . Putative class members likely did not understand the relationship between the pharmacy's U&C and what the pharmacy charges them, which may be at times less than or more than the HSP program prices.").

The same is true of Indiana Carpenters. In support of its contention that Indiana Carpenters had actual knowledge of the alleged fraud, Defendants offer a single email from Indiana Carpenters' MedCo account executive to Indiana Carpenters' client services manager. The email contains broad talking points about generic prescription drug programs ("such as Walmart & Kmart"), and a notice providing more detail. See Email from Bart Gerber to Irene Newman (Apr. 2, 2010), ECF No. 129-64. In that notice, MedCo account executive, Bart Gerber, never once mentions CVS or the HSP program specifically; instead, the notice states:

> Medco has found that the low cost generic programs vary from retailer to retailer; some programs **[**55]** are offered free of charge to patients whereby the low cost generic price can be submitted via the U&C field through Medco's TelePAID system (for example, the $4 Wal*Mart generic program), other programs include membership fees to gain access to a member-only price that differs from the pharmacy's U&C price (for example the program offered by Walgreens)[.]

Id. The client services manager did not understand from the email that CVS was not reporting the HSP price as the U&C price, and more generally, she had no understanding of the role U&C prices played in the claims adjudication process or how drug prices were set. See, e.g., R. Irene Newman Dep. 35:15-36:18, 52:10-53:7, ECF No. 144-8; see also Lauer Dep. 89:3-21; 90:22-24, ECF 145-8 (indicating that person **[*210]** copied on email did not understand the meaning of "a member-only price that differs from the pharmacy's U&C price" and that he did not know what the email sender and recipient "were talking about"); David Tharp Dep. 60:12-61:12, ECF No. 144-10; William Nix Dep. at 101:11-24, 102:25-103:5, ECF No. 144-11. Simply put, there is no evidence that anyone at Indiana Carpenters had actual knowledge of the alleged scheme here.

Second, even **[**56]** with all the incentive to do so, Defendants offer very little to suggest that a significant number of putative class members other than the named Plaintiffs had actual knowledge of the alleged scheme. Defendants offer evidence suggesting that no more than a dozen TPPs were informed they had not received HSP prices as their U&C pricing. See Defs.' Opp'n 15-17, 42-43 (setting forth summary of eleven TPPs' knowledge); Pls.' Reply 32, 34-35 (noting that, of the TPPs Defendants have identified, five are not class members for other reasons).

HN19[] As in any action in which "determining whether any given [class member] was injured (and therefore has a claim) turns on an assessment of the individual facts[,]" Defendants here must be afforded "the opportunity to challenge each class member's proof that the defendant is liable to that class member." *Asacol, 907 F.3d at 55* (citing *Dukes, 564 U.S. at 366-67*). But the need to assess individual circumstances — here, with respect to individual TPPs' knowledge of the facts underlying the alleged fraud — does not alone foreclose class certification. Instead, class certification is precluded only where "such challenges are reasonably plausible in a given case" and "the plaintiff cannot demonstrate that **[**57]** allowing for such challenges in a manner that protects the defendant's rights will be manageable and superior to the alternatives." Id. (citing *Fed. R. Civ. P. 23(b)(3)*). In the instant case, Plaintiffs have demonstrated that successful challenges to individual TPPs based on actual knowledge will be few and far between. To the extent these challenges present genuine issues of material fact, the Court will manage them in subclasses and afford Defendants the opportunity to challenge the class member(s)' proof. See *Manning v. Bos. Med. Ctr. Corp., 725 F.3d 34, 60 (1st Cir. 2013)* ("Moreover, the district court has many tools at its disposal to address concerns regarding the appropriate contours of the putative class, including redefining the class during the certification process or creating subclasses." (citing *Fengler v. Crouse Health Found., Inc., 595 F. Supp. 2d 189, 197 (N.D.N.Y. 2009)*)).

That said, the Court does not anticipate being bogged down with requests to perform thousands upon thousands of depositions to explore issues of knowledge with each class member. There can be no question that there is room for large classes under *Rule 23*. See *Asacol, 907 F.3d at 59* (Barron, J., concurring) ("*Rule 23* was clearly written to facilitate large consumer class actions." (citations omitted)). Defendants have access to their own emails and documents. If they present colorable claims of knowledge, **[**58]** the Court will entertain those concerns, thus protecting Defendants' *Seventh Amendment* rights. However, ***HN20***[] the Court will not allow "arguments woven entirely out of gossamer strands of speculation and surmise to tip the decisional scales in a class certification ruling." See *Waste Mgmt. Holdings, Inc. v. Mowbray, 208 F.3d 288, 298 (1st Cir. 2000)* (citing *Zeigler v. Gibralter Life Ins. Co., 43 F.R.D. 169, 173 (D.S.D. 1967)*); see also id. ("[W]hen the court supportably finds that an issue which, in theory, requires individualized factfinding is, in fact, highly unlikely to survive typical pretrial screening . . . , a concomitant finding that the issue neither renders the case unmanageable nor **[*211]** undermines the predominance of common issues generally will be in order.").[17]

Defendants also argue that individual knowledge issues will predominate insofar as they dictate when class TPPs' statute-of-limitations periods began to run. The First Circuit has made clear that ***HN21***[] affirmative defenses, such as statute-of-limitations defenses, "are appropriate for consideration in the class certification calculus." *Mowbray, 208 F.3d at 295*. That said, the First Circuit has explained:

> Although a necessity for individualized statute-of-limitations determinations invariably weighs against class certification under *Rule 23(b)(3)*, we reject any per se rule that treats the presence of such issues as an automatic **[**59]** disqualifier. In other words, the mere fact that such concerns may arise and may affect different class members differently does not compel a finding that individual issues predominate over common ones.

---

[17] To the extent Defendants argue that CVS's alleged fraudulent pricing scheme cannot be the proximate cause of overpayment under the civil RICO statute because it did not "directly" lead to the violation, Defs.' Opp'n 39, the Court rejects the argument. As pleaded, and given the record before the court on class certification, Plaintiffs have plainly established that the putative class members were "the primary and intended victim[s] of the scheme to defraud, and that the injury suffered was a foreseeable and natural consequence of the fraudulent scheme." *In re Neurontin Mktg. & Sales Practices Litig., 712 F.3d 51, 58 (1st Cir. 2013)* (internal quotations and citations omitted).

Id. at 296 (citing 5 James Wm. Moore et al., Moore's Federal Practice § 23.46[3], at 23-210 to —211 (3d ed. 1999)); Smilow v. Sw. Bell Mobile Sys., Inc., 323 F.3d 32, 39 (1st Cir. 2003) ("[W]here common issues otherwise predominated, courts have usually certified Rule 23(b)(3) classes even though individual issues were present in one or more affirmative defenses." (citation omitted)). In Mowbray, the First Circuit affirmed the district court's certification of the class despite "possible differences in the application of a statute of limitations to individual class members" because the district court properly engaged in a "case-specific analysis". 208 F.3d at 296-97 (quotation and citation omitted). As in Mowbray, the Court is confident that, here, "most class members' claims [are] unaffected by possible limitations defenses", Mowbray, 208 F.3d at 297 (citation omitted), and accordingly, that the application of individual statute-of-limitation defenses do not bar certification. **HN22**[] The Court will take full advantage of its authority to "place class members with potentially barred claims in a separate subclass or exclude them from the class altogether" where **[**60]** "evidence later shows that an affirmative defense is likely to bar claims against at least some class members". Smilow, 323 F.3d at 39-40 (internal citations omitted).

iii. Arbitration Clauses

Defendants aver that many absent class members may be subject to arbitration clauses in their PBM/TPP contracts. If a class is certified, Defendants state they will move to dismiss or to compel arbitration, causing individual issues to predominate. Defs.' Opp'n 53-54 & n.29. Importantly, these contracts are between TPPs and PBMs — CVS is a party to none of these contracts, and Caremark is only a party where the contracting PBM was Caremark. See id. at 5; Pls.' Reply 37-38.

First, in arguing that CVS will move to compel arbitration under any PBM/TPP contracts containing an arbitration clause, Defendants overstate the number of absent class members subject to mandatory arbitration. Under First Circuit **[*212]** precedent, CVS — as a nonparty and nonsignatory to these contracts — would only succeed at compelling a TPP to arbitrate as a third-party beneficiary where it could "demonstrate with 'special clarity that the contracting parties intended to confer a benefit on'" CVS Hogan v. SPAR Grp., Inc., 914 F.3d 34, 39 (1st Cir. 2019) (quoting McCarthy v. Azure, 22 F.3d 351, 362 (1st Cir. 1994)). **HN23**[] It is not enough for a nonsignatory to have some **[**61]** resulting benefit from "a signatory's exercise of its contractual rights". Id. at 40 (quoting Ouadani v. TF Final Mile LLC, 876 F.3d 31, 39 (1st Cir. 2017)). Instead, the PBM/TPP contract must "mention [or] manifest an intent to confer specific legal rights upon" CVS. Id. (quoting InterGen N.V. v. Grina, 344 F.3d 134, 147 (1st Cir. 2003)) (alteration in original).

A TPP would further only be equitably estopped from avoiding arbitration under narrow circumstances. "**HN24**[] [F]ederal courts 'have been willing to estop a signatory from avoiding arbitration with a nonsignatory when the issues . . . to resolve in arbitration are intertwined with the agreement that the estopped party has signed." Id. at 40-41 (quoting Ouadani, 876 F.3d at 38). The First Circuit has held that arbitration with a nonsignatory can be compelled where the parties to the contract agreed to arbitrate any action "arising out of, or relating in any way to" the agreement. Sourcing Unlimited, Inc. v. Asimco Int'l, Inc., 526 F.3d 38, 48 (1st Cir. 2008. Where contract language explicitly limits the agreement to disputes between the signatories and there is no evidence of the signatory's intent to arbitrate with the nonsignatory, arbitration cannot be compelled. See Hogan, 914 F.3d at 42 (finding "no legal basis for forcing [signatory] to arbitrate his claims against [nonsignatory] when he demonstrated no intent to do so").

Plaintiffs point to the arbitration clauses of over twenty PBM/TPP **[**62]** contracts that explicitly state that the parties did not intend to create rights for third parties. See Pls.' Reply 37 n.179 ("This agreement . . . is intended solely for the benefit of each party hereto and their respective successors or permitted assigns, and it is not the intention of the parties to confer third party beneficiary rights, and this Agreement does not confer any such rights, upon any other third party . . . ." (quoting Service Agreement, at MI-SM_00000539, ECF No. 145-22)). No one suggests that the PBM/TPP contracts created any legal rights or duties for CVS; indeed, CVShad its own contracts with the PBMs. Thus, CVSfinds support in neither the third-party beneficiary doctrine nor the equitable estoppel doctrine.

Second, that ***HN25***[] some putative class members may be subject to mandatory arbitration is not a bar to class certification. See *Smilow, 323 F.3d at 39* (noting that, "where common issues otherwise predominated, courts have usually certified *Rule 23(b)(3)* classes even though individual issues were present in one or more affirmative defenses"); see also *Walsh v. Gilbert Enters., No. CV 15-472-WES, 2019 U.S. Dist. LEXIS 41225, 2019 WL 1206885, at *4 (D.R.I. Mar. 14, 2019)* (holding that named plaintiff — whose contract did not have an arbitration clause - was typical of class that included individuals subject to arbitration **[**63]** clauses because common issues otherwise predominated). Defendants may pursue those rights under motions to compel arbitration and/or dismiss following class certification, and the Court will employ the procedural tools at its disposable to exclude those TPPs from the class or place them in a subclass. For these reasons, the Court is confident that the existence of arbitration clauses in some PBM/TPP contracts will not result in individual **[*213]** issues predominating over common issues.

b. Generic Effective Rate

Defendants argue that individual issues further predominate because many PBM/TPP contracts contain "aggregate discount guarantees" (also called "generic effective rate guarantees" or "GERs") that, in their view, negate injury in fact and/or any damages from alleged overstated U&C prices. Defs.' Opp'n 4, 45-48. A common PBM/TPP contract provision, a GER clause guarantees that a TPP will receive an average percentage discount off a benchmark price (e.g., average wholesale price) for all drugs in a category (e.g., all generic drugs) for a specified period of time (e.g., one calendar year). Expert Report of Alan Sekula ("Sekula Report") ¶ 10, ECF No. 129-4. In practice, it looks something **[**64]** like this: a PBM guarantees its contracting TPP that it will receive an average discount of 70% off the average wholesale price ("AWP") for generic prescription drugs for calendar year 2021. For any one generic drug, the TPP's discount may be higher than 70% and for any other, lower. But in the aggregate, the health plan is entitled to a 70% (or greater) discount off AWP for generic drugs. Id. In this example, if the TPP paid more than 30% of AWP for the generic drugs purchased in 2021, the PBM would issue a reconciliation payment to make up the difference. Id. ¶ 15.

Defendants offer Sheet Metal Workers as an example; once Sheet Metal Workers' 2014 GER reconciliation is considered, it incurred no damages in 2014, a stark contrast to the $21,498 alleged. Defs.' Opp'n 52; Feb. 14, 2020 Hr'g Tr. 69-70; see also Barlag Decl. ¶¶ 137-38.[18] In such situations, Defendants contend, health plans would be left without damages. Furthermore, Defendants suggest that removing these uninjured putative class members — as required by *Asacol* - would be unduly laborious, and individual issues therefore predominate. See Defs.' Opp'n 49-52.

Plaintiffs retort that GERs are not relevant to injury; at most, they **[**65]** say, GERs may offset damages for some putative class members. For this proposition, Plaintiffs point to ***antitrust law*** where injury accrues the moment an overcharge is incurred, regardless of whether it is later offset. See *In re Nexium Antitrust Litig., 777 F.3d 9, 27 (1st Cir. 2015)*; see also *Holmes v. Sec. Inv'r Prot. Corp., 503 U.S. 258, 267-68, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992)* (concluding that Congress used the same words in drafting RICO as it had in the already-enacted *Sherman Act* and *Clayton Act*, and thus the Court could "only assume it intended them to have the same meaning that courts had already given them" (citation omitted)).

The Court concludes that, on this record, GERs are not relevant to putative class TPP injury in fact. Still, as discussed below, Plaintiffs must demonstrate an administratively feasible way to identify and apply GER offsets to damages in order to ensure that the proposed classes' damages calculations are accurate, and Defendants' due process rights are honored.

First, PBMs do not make GER reconciliation payments at the transaction level; instead, GER reconciliation payments are calculated in the aggregate, across a subset of drugs, for a defined period, after claims have been

[18] To fall within one of the class definitions, a TPP need only have suffered an injury during the class period; a TPP may not have incurred damages in any one single calendar year, but still aptly be included in one of the classes for injury incurred during another year covered by the class period.

adjudicated and paid. Conti Reply ¶ 54; see also Sekula Report **[*214]** ¶ 15. Thus, this arrangement is factually distinguishable from **[**66]** those in which an injury offset could be traced back to a specific transaction. See Barlag Decl. ¶ 136 (recognizing that GERs are not applied at the transaction level, but rather in the aggregate, by noting that "[e]ven if one assumes submitting the HSP price as the U&C price would have changed the amount paid by Sheet Metal on an individual claim, it does not change the aggregate annual amount paid by Sheet Metal across all claims").

The First Circuit authority dictates that ***HN26***[] a RICO claim has not accrued where injury to a plaintiff's property is speculative. *DeMauro v. DeMauro, 115 F.3d 94, 97-98 (1st Cir. 1997)*. In DeMauro, plaintiff-wife sued defendant-husband, and others, alleging that they had fraudulently concealed separate and marital assets during protracted and contentious divorce proceedings. *Id. at 95*. The First Circuit held that any injury to the plaintiff's legal claim had not accrued because it was too speculative, as no one yet knew whether the alleged concealment would diminish her award in the divorce proceeding. *Id. at 97* (citing *Lincoln House, Inc. v. Dupre, 903 F.2d 845, 847 (1st Cir. 1990)*). The First Circuit noted concern that "it is hard to see how a court would calculate damages now, given the dual uncertainties of what [the plaintiff] will be awarded and how it will be affected by concealment." **[**67]** Id. (citing *First Nationwide Bank v. Gelt Funding Corp., 27 F.3d 763, 768 (2d Cir. 1994)*). This concern did not arise, however, where the plaintiff alleged concealment of property in which she held a present ownership interest; for that property, the court concluded she had alleged injury under RICO. *Id. at 98* (citing *Grimmett v. Brown, 75 F.3d 506, 516-17 (9th Cir. 1996)*).

Here, each alleged injury stems from an overcharge paid by a TPP as a result of an inflated U&C price. The injury fully accrued when the claim was adjudicated and paid. At that point, the only loose end was the possibility of an aggregate offset in the form of a GER reconciliation payment. "[T]he injury has occurred and is known, but it is speculative whether the damages might be reduced or even eliminated"; this is not a case in which "the injury is speculative because it is not known whether it will occur at all" due to some future event that may or may not occur. See *Grimmett, 75 F.3d at 517*; see also *DeMauro, 115 F.3d at 97*; cf. *Gastronomical Workers Union Local 610 & Metro. Hotel Ass'n Pension Fund v. Dorado Beach Hotel Corp., 617 F.3d 54, 61-62 (1st Cir. 2010)* ("Fairly viewed, that claim does not suggest that the trustees have alleged a speculative injury, the existence of which depends upon future events that may or may not occur. Rather, the claim is that a future event may change the type of remedy available to redress an existing injury. Consequently, it is the future event, not the trustees' injury, that is speculative."). **[**68]**

Defendants' cited cases do not counsel otherwise, as each involves speculative, future events that may undermine the purported RICO injury. See, e.g., *Maio v. Aetna, 221 F.3d 472 (3d Cir. 2000)* ("There is no factual basis for appellants' conclusory allegation that they have been injured in their 'property' because the health insurance they actually received was inferior and therefore 'worth less' than what they paid for it."); *In re Bridgestone/Firestone Inc. v. Wilderness Tires Prods. Liab. Litig., 155 F. Supp. 2d 1069, 1091 (S.D. Ind.)*, on reconsideration in part, *No. MDL NO. 1373, 2001 U.S. Dist. LEXIS 27217, 2001 WL 34691976 (S.D. Ind. Nov. 14, 2001)*, rev'd on other grounds *288 F.3d 1012 (7th Cir. 2002)* ("RICO affords a monetary remedy only to plaintiffs who have actually realized the diminished value or experienced product **[*215]** failure, and not to those who allege a risk (or even a probability) of such loss.").

The Court is satisfied that, on this record, Plaintiffs' injury from overcharge accrued at the time of payment.

Second, regardless of whether the GER reconciliation payments go to injury or damages, Defendants will get their day in court to meaningfully challenge the effect of GER payments on class damages. In the wake of Asacol, the Court can be confident of a few things.

HN27[] A class may be certified without each putative class member first establishing standing, and *Rule 23* does not require the district court to establish injury in fact for each class member **[**69]** prior to class certification. *Asacol, 907 F.3d at 58*. But, Defendants must be afforded a meaningful opportunity to challenge injury in fact and pick off uninjured class members before or at trial. Id. And there is no question, post-Asacol, that a district court may not certify a class where a body of uninjured class members stand to recover, regardless of whether the defendants are found liable for the aggregate damages amount. See generally id.

The circumstances presented here are clearly distinguishable from those in *Asacol*. In Asacol, the First Circuit was presented with a putative class with a small percentage of members known to be uninjured — the so-called brand loyalists. Moreover, there was no administratively feasible way to allow the defendants a meaningful opportunity to challenge the uninjured class members' inclusion. See *id. at 53*. As a result, the uninjured class members were all but guaranteed to collect damages from the defendants. Here, in contrast, we don't inhabit the theoretical but-for world of ***antitrust law***; instead, a world where alleged injury and damages are knowable and well documented. Even if a subset of putative class members incurred overcharges that were later offset by GER reconciliation **[**70]** payments, Defendants will have the opportunity to challenge them at (or before) trial. No uninjured putative class members stand to recover.

Finally, the Court is satisfied that Plaintiffs' expert, Dr. Rena Conti, will be able to incorporate GER offsets into her damages calculations on a class-wide basis. She offers two methods. First, if provided with reconciliation payment data, Dr. Conti will perform the following calculation. Dr. Conti will first isolate a TPP's measured effective rate and compare it to its contracted GER guaranteed rate (i.e., the guaranteed GER in that TPP's contract). Conti Reply ¶ 55. A measured effective rate is 1 minus (the sum of all ingredient costs paid/the sum of all AWP amounts). Id. If a TPP pays less in the aggregate for the specified drugs than it would under its GER provision (e.g., paying an aggregate of AWP minus 76%, where its contract provides that it pay no more than AWP minus 75%), the PBM would submit no reconciliation. Id. ¶ 56. If the TPP pays more (e.g., its aggregate payment was equal to AWP minus 72%, where its GER was AWP minus 75%), the PBM would reconcile this with a payment equal to the 3% (75%-72%) difference. Id. ¶ 57. Dr. Conti **[**71]** incorporates reconciliation-payment offsets into her damages calculation, and where a reconciliation payment is greater than the calculated damages, the damages are bottomed out at $0. Id. ¶¶ 58-61. Dr. Conti's formula appropriately errs on the side of being conservative in response to Defendants' expert's critique. See id. ¶¶ 59 (formula 8), 62-64 (noting additional exclusions to provide for a conservative damages model).

In the alternative, if Dr. Conti is not provided with reconciliation payments data, she sets forth a conservative method for calculating the effect of GERs on a class-wide basis. Id. ¶ 65. Under this method, **[*216]** Plaintiffs would first review all PBM contracts for a range of annual GER guarantees and identify each PBM's highest GER guarantee for each year. Id. ¶¶ 65-66. Next, using claims data for the generic drugs included in each PBM's GER calculation and a list of the HSP-eligible drugs, Plaintiffs would calculate the impact of adjusting the HSP price on the conservative GER reconciliation payment. Id. ¶¶ 66, 69. This delta in GER reconciliation payment would be used to offset Plaintiffs' overcharge calculation. Id. ¶ 66.

The Court concludes that Plaintiffs have demonstrated **[**72]** by a preponderance of the evidence that they have a "reasonable and workable plan" for determining the effect of a GER on the putative class members' damages "that is protective of the defendant[s]'s constitutional rights and does not cause individual inquiries to overwhelm common issues." *Asacol, 907 F.3d at 58*. Though Defendants' experts have declared the process overly burdensome, they acknowledge that an expert ostensibly could, for any health plan, identify any applicable GER provisions, determine the periods they cover, the drugs to which they apply, whether the health plan received reconciliation payments, and the effect any reconciliation payments had on offsetting any alleged overcharge to the health plan. See Sekula Report ¶¶ 19; Defs.' Opp'n 47-48.

In the Court's view, the need to account for GER damages offsets does not impede certification. The parties will confer before trial on which putative class members fall away as incurring no damages. Should there be a dispute over a subset of health plans, Defendants will have the opportunity to challenge their inclusion in the classes. *Asacol, 907 F.3d at 53* (suggesting a class would be ripe for certification where "a very small absolute number of class members might be **[**73]** picked off in a manageable, individualized process at or before trial"). Because this information is knowable from PBM/TPP contracts and data, individual issues will not predominate — not now, and not at trial.

c. Damages

HN28[] To satisfy the predominance requirement, not only must liability be established through common proof, but Plaintiffs must also demonstrate that "any resulting damages would likewise be established by sufficiently common proof." *Nexium, 777 F.3d at 18* (quoting *New Motor Vehicles, 522 F.3d at 20*). To do so, Plaintiffs must establish that damages are both "capable of measurement on a classwide basis" and tied to their theory of liability. See *Comcast, 569 U.S. at 34-36*.

HN29[] A model measuring class-wide damages in a class action "must measure only those damages attributable to that theory." *Id. at 35*. "If the model does not even attempt to do that, it cannot possibly establish that damages are susceptible of measurement across the entire class for purposes of *Rule 23(b)(3)*." Id. "Calculations need not be exact, but at the class-certification stage (as at trial), any model supporting a plaintiff's damages case must be consistent with its liability case . . . ." Id. (internal citations and quotations omitted).

In support of their Motion for Class Certification, Plaintiffs offer the **[**74]** expert opinion of Dr. Rena Conti. See generally Conti Report; Conti Reply. Using her model, Dr. Conti measures damages for the Nationwide Class as the delta between what a TPP paid for certain HSP-eligible drugs and the amount it would have paid for those HSP drugs had the U&C price incorporated the HSP price. Conti Report ¶ 62. For this model, Dr. Conti used CVS pharmacy claims data for HSP drugs **[*217]** across 14 states[19], as well as HSP price data. Id. ¶¶ 11, 63. Under her model, damages for these 14 states total $334.2 million, exclusive of any GER offsets. Conti Reply ¶ 4. The model is flexible and can be adjusted to account for more or higher quality data as discovery proceeds. Id. ¶ 5.

After careful review of Dr. Conti's reports, the Court concludes that her model reflects a reliable and sound methodology[20] by which to measure Plaintiffs' alleged damages given that she intends to procure and incorporate additional data to strengthen the model. A summary of the model is helpful. Dr. Conti began with all the CVS pharmacy patient claims data for the 14 states covering transactions occurring between November 2008 and December 2015. Conti Report ¶ 70. She then excluded drugs that never appeared **[**75]** on the HSP formulary drug list during the relevant time, limited the claims to the five PBMs implicated in this case, and excluded government payors. Id. ¶ 71. She further excluded claims that were paid based on lesser-of pricing formulas that do not include U&C. Conti Reply ¶ 48.

Using the remaining claims, Dr. Conti calculated the TPP overpayment amount as the TPP adjudicated payment amount less the HSP price, adjusting for the amount paid by the pharmacy customer. Conti Report ¶ 73. Moreover, Dr. Conti applied a damages offset for the annual HSP membership fees paid by cash customers to access the HSP prices, and explained the technique she could apply to incorporate GER offsets, if the Court deemed them relevant. Conti Reply ¶¶ 54-69; Conti Report ¶¶ 75-76.

Dr. Conti opined that, after discovery produces the requisite PBM data, she will use this same method to calculate damages on a classwide basis using the updated data. Conti Report ¶ 77. From PBM data, she will also be able to identify individual class members. Id. Indeed, she demonstrated this by using the PBM data for named Plaintiffs to calculate their damages during the class period. Id. Dr. Conti further **[**76]** extrapolated the damages for the 14

---

[19] The data cover thirteen states and the District of Columbia. For ease of reference, the Court refers to them as the "14 states" in this decision.

[20] While Defendants have not yet filed a Daubert motion to exclude Dr. Conti's expert opinion, it was inescapable for the Court to consider the soundness of her methodology in determining whether damages are capable of measurement on a class-wide basis and tied to Plaintiffs' liability theory. Moreover, the Court considered the expert reports offered by Defendants criticizing Dr. Conti's report. The Court otherwise DENIES WITHOUT PREJUDICE the Motions as premature and will consider them once refiled as the case proceeds. See Pls.' Mots. to Exclude the Expert Testimony of Brett E. Barlag, Catherine Graeff, Michael P. Salve, Ph.D., ECF Nos. 140-42. To the extent those reports conclude Dr. Conti's methodology is unreliable or inaccurate, the Court disagrees for the reasons set forth herein; the Court understands the experts as largely offering competing views that go to the weight, and not admissibility, of the opinion. See *Ruiz-Troche v. Pepsi Cola of Puerto Rico Bottling Co., 161 F.3d 77, 85 (1st Cir. 1998)* ("Daubert neither requires nor empowers trial courts to determine which of several competing scientific theories has the best provenance. It demands only that the proponent of the evidence show that the expert's conclusion has been arrived at in a scientifically sound and methodologically reliable fashion." (citation omitted)).

states to the remaining 36 states using state-specific data (viz., demographic information, total retail prescription sales, Medicaid claims, and CVS's dominance in that market). Id. ¶ 78.

Defendants argue that Plaintiffs' proposed damages model both cannot measure damages on a class-wide basis and is not tied to Plaintiffs' liability theory. In **[*218]** particular, they take issue with Plaintiffs' failure to test certain data.

Defendants' argument implicates a joint stipulation that had resolved a May 2017 discovery dispute between the parties. See Joint Stipulation Regarding Pls.' Motion to Compel CVS to Produce Nationwide Data ("Joint Stipulation Nationwide Data"), ECF No. 54. In the stipulation, Plaintiffs agreed to accept the subset of data produced in the Corcoran case in the Northern District of California, which involved twelve states and the District of Columbia. See id. In exchange for Plaintiffs' agreeing to abandon their claim to CVS's nationwide transaction data, Defendants agreed that Plaintiffs could rely upon this subset of data to demonstrate that damages could be calculated on a class-wide basis. See id. To this end, the stipulation states: **[**77]**

> CVS will not challenge Plaintiffs' methodology for calculating classwide damages (a) on the basis that the data fields that CVS has produced to date for the Corcoran States represent different types of information than is available for states other than the Corcoran States or (b) by using data from states other than the Corcoran States, which has not been produced to Plaintiffs.

Id. at 2. Caremark produced claims data only for HSP drugs purchased in Indiana and Illinois at CVS pharmacies between November 2008 and January 2016. Pls.' Reply 30.

Under Plaintiffs' theory, the damages of any given TPP are the difference between the amount it actually paid for certain HSP drugs and the amount it would have paid for those drugs if the HSP price had been reported as the U&C price. Conti Report ¶ 62. In preparing Plaintiffs' damages model, Dr. Conti did not have TPP payments data — due to the Joint Stipulation — and thus based Plaintiffs' model on PBM payments data. Defendants now complain that Dr. Conti did not calculate the class TPP damages at all, instead she calculated the difference between what the PBMs paid and what they would have paid had HSP prices included U&C prices. Defs.' Opp'n **[**78]** 49.

For purposes of class certification, and given that Dr. Conti asserts that she intends to update this model once more data are made available, the Court finds that PBM data are a reliable proxy for TPP data for purposes of class certification. See *New Eng. Carpenters Health Benefits Fund v. First DataBank, Inc., 248 F.R.D 363, 370 (D. Mass. 2008)* (stating, in a RICO case involving fraudulently reported average wholesale drug prices, that the "data [were] a reasonable proxy of TPP reimbursements for drugs"). Plaintiffs' model generates a conservative damages estimate, or, in other words, "underestimates the overcharges attributable to Defendants' alleged fraud", because TPPs compensate "PBMs for their services at a markup of what PBMs pay pharmacies." Conti Reply ¶ 40; see also Pls.' Reply 27-28 & n.130 (noting that for any one HSP drug, CVS would submit the inflated U&C price to the adjudicating PBM, the PBM would pay CVS , and the inflated price would "ultimately be passed to the Class member in the form of an even higher price so that the PBM would profit from the 'spread' between what it paid CVS and what the Class member paid the PBM" (citing Conti Report ¶¶ 62, 73)).

In addition to modeling damages using PBM claims data as a proxy for TPP claims data, Dr. Conti provides that **[**79]** once more PBM data are produced for the HSP drugs, her "method is flexible to accommodate their inclusion in estimating damages." Conti Reply ¶ 40. Indeed, the model's flexibility is on display where Dr. Conti updates her estimate of named-Plaintiff Sheet Metal Workers' damages to reflect **[*219]** coinsurance payments and the effect of the Maintenance Choice Program. Id. ¶ 53 & n.70; see also id. ¶¶ 54-69 (describing how model can take GERs into account).

Given that this methodology produces a conservative damages model using PBM claims data, and has the demonstrated flexibility to be adjusted to accommodate additional data, the Court is satisfied that, while not "exact[,]" the model is "consistent with [the proposed classes'] liability case." *Comcast, 569 U.S. at 35* (citations and quotation omitted). It is true that the model has not been tested using TPP data, but the shortcomings of Plaintiffs' data are directly attributable to Defendants' strategic decision and will be resolved at the liability stage. Moreover, the record supports a finding that, in the aggregate, any overcharges incurred by PBMs were passed on to the putative class. See Conti Reply ¶ 40. In sum, Dr. Conti's methodology is solid and the data are **[**80]** forthcoming.[21]

Defendants also challenge the amount of individualization necessary to calculate damages under Plaintiffs' model. See *Royal Park Invs. SA v. Wells Fargo Bank, N.A., No. 14-CV-09764, 2018 U.S. Dist. LEXIS 9087, 2018 WL 739580, at *15 (S.D.N.Y. Jan. 10, 2018)* (noting that expert's method was sufficiently reliable and he was not required to present a "comprehensive model at the class certification stage" but concluding that the methodology required individualized determinations). While there can be no question that some individualized inquiry is required under the instant damages model, the Court is satisfied that damages can "be established by sufficiently common proof." *Nexium, 777 F.3d at 18*.

Accordingly, the Court concludes that Plaintiffs have demonstrated that common issues predominate as to damages and that the damages are both "capable of measurement on a classwide basis" and tied to their theory of liability. See *Comcast, 569 U.S. at 34-36*.

6. Superiority

HN30[] For the final prerequisite to class certification, Plaintiffs bear the burden of establishing that a class action is "superior to other available methods for fairly and efficiently adjudicating the controversy." *Fed. R. Civ. P. 23(b)(3)*. In undertaking this analysis, the Court examines four factors:

> (A) the class members' interests in individually controlling the prosecution or defense of separate actions; (B) the extent **[**81]** and nature of any litigation concerning the controversy already begun by or against class members; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; and (D) the likely difficulties in managing a class action.

Id. The Court is mindful that "[t]he policy at the very core of the class action mechanism is to overcome the problem that small recoveries do not provide the incentive for any individual to bring a solo action prosecuting his or her rights." *Amchem Prods. Inc. v. Windsor, 521 U.S. 591, 617, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997)* (quoting *Mace v. Van Ru Credit Corp., 109 F.3d 338, 344 (7th Cir. 1997)*). The superiority and predominance inquiries thus ensure that class action litigation will "achieve economies of time, effort, and expense, and promote . . . uniformity of decision as to persons similarly situated, without sacrificing **[*220]** procedural fairness or bringing about other undesirable results." Id. (quoting Advisory Committee's Notes on *Fed. R. Civ. P. 23*).

Defendants argue that class adjudication is not superior to other methods of adjudication because (1) the elements of the state law causes of action are materially different, and (2) the putative class members are sophisticated entities capable of bringing suit on their own. Defs.' Opp'n 6, 68-69.

The Court is satisfied that class **[**82]** adjudication is the superior method of adjudication. Though some putative class members may be capable of suing on their own, and there may be some opportunity to recover fees for a successful suit under RICO and some state statutes, judicial economy plainly favors certification. Managing subclasses within this action alleging a single fraudulent scheme is superior to managing several thousand suits.

Moreover, variations in the underlying state law claims do not undermine Plaintiffs' certification efforts. The classes are narrowly tailored and are not unlike numerous other nationwide class actions that courts have certified. See, e.g., *In re Loestrin 24 FE Antitrust Litig., 410 F. Supp. 3d 352, 375-76, 406-07 (D.R.I. 2019)* (certifying class action

---

[21] Defendants' other criticisms are sufficiently addressed in Dr. Conti's Reply Report. See Conti Reply ¶ 48 (adjusting model to exclude claims that may have been paid based on formulas that do not include U&C pricing); id. ¶¶ 52-53 (adjusting model to account for patient payment structures). And as addressed at length above, the Court is satisfied that Dr. Conti's damages model can accurately and reliably account for GERs.

brought under numerous state laws and analyzing viability of pharmaceutical antitrust claims under those state statutes).[22] For these reasons, the Court concludes that, in this case, a class action is "superior to other available methods for fairly and efficiently adjudicating the controversy." See *Fed. R. Civ. P. 23(b)(3)*.

III. Conclusion

For the above reasons, Caremark's Motion to Dismiss, ECF No. 163, is GRANTED; Plaintiffs' Motion for Class Certification, ECF No. 120, is GRANTED; Plaintiffs' Motions to Exclude the Expert Testimony of Brett E. Barlag, **[**83]** Catherine Graeff, Michael P. Salve, Ph.D., ECF Nos. 140-42, are DENIED WITHOUT PREJUDICE. The Court further appoints Hagens Berman Sobol Shapiro LLP as Class Counsel and appoints named Plaintiffs as Class Representatives.

IT IS SO ORDERED.

/s/ William E. Smith

William E. Smith

District Judge

Date: May 11, 2021

End of Document

[22] The Court gives Plaintiffs fifteen days from the entry of this order to show cause why the Unfair and Deceptive Conduct Consumer Protection Class definition should not be amended to exclude health plans that paid for generic prescription drugs in New Jersey, Ohio, and Iowa, as Defendants assert these state laws were never pleaded in the Amended Complaint and/or were dropped earlier in this suit. See Defs.' Sur-Reply 27.

For DOMINO FOODS, INC., Plaintiff: James Michael Grippando, **[*19]** Stuart Harold Singer, LEAD ATTORNEYS, BOIES SCHILLER FLEXNER LLP, Fort Lauderdale, FL.

For NIPPON YUSEN KABUSHIKI KAISHA, NYK LINE (NORTH AMERICA), INC. Plaintiffs: Robert Abraham Braun, Benjamin D. Brown, LEAD ATTORNEYS, COHEN MILSTEIN SELLERS & TOLL PLLC, Washington, DC; Leonardo Chingcuanco, COHEN MILSTEIN, Washington, DC.

For SOUTHEASTERN MILLS, INC., Plaintiff: Stephen R. Neuwirth, LEAD ATTORNEY, PRO HAC VICE, QUINN EMANUEL URQUHART & SULLIVAN, LLP, New York, NY.

For MITSUI O.S.K. LINES, LTD., Plaintiff: Conte Cicala, LEAD ATTORNEY, CLYDE & CO LLP, San Francisco, CA.

For TRAMMO, INC., formerly known as, TRANSAMMONIA, INC., Plaintiff: Catriona Lavery, LEAD ATTORNEY, SUSMAN GODFREY LLP, Los Angeles, CA; Sathya S. Gosselin, LEAD ATTORNEY, PRO HAC VICE, HAUSFELD LLP, Washington, DC; Shawn L. Raymond, LEAD ATTORNEY, PRO HAC VICE, SUSMAN GODFREY LLP, Houston, TX; Adam Carlis, SUSMAN GODFREY, LLP, Houston, TX; Geoffrey L. Harrison, LEAD ATTORNEY, Matthew David Wood, SUSMAN GODFREY LLP, Houston, TX.

For TRANSRAIL, INC., Plaintiff: Sathya S. Gosselin, LEAD ATTORNEY, PRO HAC VICE, HAUSFELD LLP, Washington, DC; Shawn L. Raymond, LEAD ATTORNEY, PRO HAC VICE, SUSMAN GODFREY LLP, Houston, TX; Adam **[*20]** Carlis, SUSMAN GODFREY, LLP, Houston, TX; Geoffrey L. Harrison, LEAD ATTORNEY, Matthew David Wood, SUSMAN GODFREY LLP, Houston, TX.

For CENTURY ALUMINUM COMPANY, CENTURY ALUMINUM OF KENTUCKY, GP, CENTURY ALUMINUM OF SOUTH CAROLINA, INC, CENTURY ALUMINUM OF WEST, VIRGINIA, INC., HIGH LEVEL MANAGEMENT, VENTURERS, NSA, GP, Plaintiffs: Daniel J. Walker, LEAD ATTORNEY, BERGER MONTAGUE PC, Washington, DC; Michael Dell'Angelo, LEAD ATTORNEY, Michael J. Kane, Michaela Wallin, BERGER MONTAGUE PC, Philadelphia, PA.

For CALPORTLAND COMPANY, Plaintiff: Leo Caseria,LEAD ATTORNEY, SHEPPARD MULLIN RICHTER &, HAMPTON LLP, Washington, DC; Helen C. Eckert, SHEPPARD MULLIN LLP, San Francisco, CA; Joy O. Siu, SHEPPARD MULLIN RICHTER HAMPTON, LLP, San Francisco, CA.

For STERLING STEEL CO., LLC, Plaintiff: David M. Peterson, LEAD ATTORNEY, PETERSON & ASSOCIATES, PC, Kansas City, MO; Joseph A. Kronawitter, LEAD ATTORNEY, HORN, AYLWARD & BANDY, LLP, Kansas City, MO; R. Keith Johnston, LEAD ATTORNEY, WALTERS BENDER STROHBEHN & VAUGHAN, PC, Kansas City, MO; Robert D.W. Landon, III, LEAD ATTORNEY, KENNY NACHWALTER, P.A., Miami, FL.

For PROCTER & GAMBLE COMPANY, PROCTER & GAMBLE DISTRIBUTING, LLC, PROCTER & GAMBLE, **[*21]** MANUFACTURING COMPANY, PROCTER & GAMBLE PAPER PRODUCTS COMPANY, Plaintiffs: Daniel B. Goldman, LEAD ATTORNEY, KRAMER LEVIN NAFTALIS & FRANKEL LLP, New York, NY; Erin E. Rhinehart, LEAD ATTORNEY, FARUKI PLL, Cincinnati, OH; Steven Sparling, LEAD ATTORNEY, KRAMER LEVIN NAFTALIS & FRANKEL LLP, New York, NY; Daniel Lennard, KRAMER LEVIN NAFTALIS & FRANKEL LLP, New York, NY; Zachary C. Naidich, KRAMER LEVIN NAFTALIS & FRANKEL LLP, New York, NY.

For CROWLEY LINER SERVICES, INC., Plaintiff: Geoffrey L. Harrison, LEAD ATTORNEY, SUSMAN GODFREY LLP, Houston, TX; Shawn L. Raymond, LEAD ATTORNEY, PRO HAC VICE, SUSMAN GODFREY LLP, Houston, TX; Adam Carlis, SUSMAN GODFREY, LLP, Houston, TX; Melinda R Coolidge, LEAD ATTORNEY, HAUSFELD LLP, Washington, DC; Matthew David Wood, SUSMAN GODFREY LLP, Houston, TX.

For CROWLEY LINER SERVICES, INC., CROWLEY LOGISTICS, INC., Plaintiffs: Geoffrey L. Harrison, Shawn L. Raymond, LEAD ATTORNEYS, Adam Carlis, Matthew David Wood, SUSMAN GODFREY LLP, Houston, TX; Melinda R Coolidge, LEAD ATTORNEY, HAUSFELD LLP, Washington, DC.

For CROWLEY MARITIME CORPORATION, Plaintiff: Catriona Lavery, LEAD ATTORNEY, SUSMAN GODFREY LLP, Los Angeles, CA; Geoffrey L. Harrison, Shawn **[*22]** L. Raymond, LEAD ATTORNEYS, Adam Carlis, Matthew David Wood, SUSMAN GODFREY LLP, Houston, TX; Melinda R Coolidge, LEAD ATTORNEY, HAUSFELD LLP, Washington, DC.

For HB CHEMICAL CORPORATION, INTERNATIONAL POLYMERS CORPORATION, RAVAGO AMERICAS LLC, RAVAGO CHEMICAL DISTRIBUTION, INC., formerly known as, TH HILSON COMPANY, Plaintiffs: Sami H. Rashid, LEAD ATTORNEY, QUINN EMANUEL URQUHART & SULLIVAN, LLP, New York, NY; Stephen R. Neuwirth, LEAD ATTORNEY, PRO HAC VICE, QUINN EMANUEL URQUHART & SULLIVAN, LLP, New York, NY; Viola Trebicka, LEAD ATTORNEY, QUINN EMANUEL URQUHART & SULLIVAN, LLP, Los Angeles, CA.

For LEHIGH HANSON, INC., Plaintiff: Robert D.W. Landon, III, LEAD ATTORNEY, KENNY NACHWALTER, P.A., Miami, FL.

For BMW MANUFACTURING CO., LLC, BMW OF NORTH AMERICA, LLC, Plaintiffs: Brian A. Ratner, LEAD ATTORNEY, HAUSFELD LLP, Washington, DC.

For CENTRAL TRANSPORT INTERNATIONAL, INC., CENTRAL TRANSPORT, INC., LOGISTICS INSIGHT CORP., TRANSPORT COMMUNICATIONS SYSTEMS II, L.L.C., Plaintiffs: Brian A. Ratner, Halli E Spraggins, Melinda R Coolidge, Michael David Hausfeld, LEAD ATTORNEYS, HAUSFELD LLP, Washington, DC; Sathya S. Gosselin, LEAD ATTORNEY, PRO HAC VICE, HAUSFELD LLP, Washington, DC; **[*23]** Seth R. Gassman, LEAD ATTORNEY, Hausfeld LLP, San Francisco, CA; Swathi Bojedla, LEAD ATTORNEY, HAUSFELD, LLP, DC, Washington, DC; Theodore Francis DiSalvo, LEAD ATTORNEY, HAUSFLED, Washington, DC.

For AIR PRODUCTS AND CHEMICALS, INC., Plaintiff: Fletcher Strong, Ronald J. Aranoff, William Hagan, III, LEAD ATTORNEYS, WOLLMUTH MAHER & DEUTSCH LLP, New York, NY.

For SMURFIT-STONE CONTAINER CANADA INC, Plaintiff: Sami H. Rashid, LEAD ATTORNEY, QUINN EMANUEL URQUHART & SULLIVAN, LLP, New York, NY; Stephen R. Neuwirth, LEAD ATTORNEY, PRO HAC VICE, QUINN EMANUEL URQUHART & SULLIVAN, LLP, New York, NY; Viola Trebicka, LEAD ATTORNEY, PRO HAC VICE, QUINN EMANUEL URQUHART & SULLIVAN, LLP, Los Angeles, CA.

For TRONOX INC., TRONOX US HOLDINGS INC., Plaintiffs: Barry Coburn, LEAD ATTORNEY, COBURN & GREENBAUM, PLLC, Washington, DC; Daniel B. Goldman, Steven Sparling, LEAD ATTORNEYS, Daniel Lennard, Zachary C. Naidich, KRAMER LEVIN NAFTALIS & FRANKEL LLP, New York, NY.

For ABF FREIGHT SYSTEMS INC, ANDRE M. TOFFEL, Trustee, on behalf of New Wei, Inc., et al., jointly administered bankruptcy estates, Plaintiffs: Daniel J. Walker, LEAD ATTORNEY, BERGER MONTAGUE PC, Washington, DC.

For E.I. DU PONT DE NEMOURS **[*24]** AND COMPANY, Plaintiff: James Peter Denvir, III, LEAD ATTORNEY, BOIES, SCHILLER & FLEXNER LLP, Washington, DC.

For UNION PACIFIC RAILROAD COMPANY, Defendant: Allyson M. Maltas, LEAD ATTORNEY, LATHAM & WATKINS LLP, Washington, DC; Christopher Campbell, LEAD ATTORNEY, Tyler P. Young, LATHAM & WATKINS LLP, San Francisco, CA; Daniel M Wall, Timothy L. O'Mara, LEAD ATTORNEYS, PRO HAC VICE, LATHAM & WATKINS LLP, San Francisco, CA; John M. Majoras, LEAD ATTORNEY, JONES DAY, Washington, DC; Linda Sue Stein, LEAD ATTORNEY, STEPTOE & JOHNSON LLP, Washington, DC; Matthew M. Collette, LEAD ATTORNEY, MASSEY & GAIL LLP, Washington, DC; Tyrone R. Childress, LEAD ATTORNEY, Kelsey Bryan, JONES DAY, Los Angeles, CA.

For BNSF RAILWAY COMPANY, Defendant: Andrew Santo Tulumello, LEAD ATTORNEY, GIBSON, DUNN & CRUTCHER, LLP, Washington, DC; Glenn D. Pomerantz, LEAD ATTORNEY, MUNGER TOLLS & OLSON, LLP, Los Angeles, CA; Anne Conley, Esteban Martin Estrada, Kuruvilla Joseph Olasa, MUNGER, TOLLES & OLSON LLP, Los Angeles, CA; Benjamin Joseph Horwich, MUNGER, TOLLES & OLSON LLP, San Francisco, CA; Jacobus P. van der Ven, MUNGER, TOLLES & OLSON LLP, Washington, DC; Linda Sue Stein, LEAD ATTORNEY, Molly Bruder Fox, **[*25]** STEPTOE & JOHNSON LLP, Washington, DC.

For CSX TRANSPORTATION, INC., Defendant: Andrew H. Marks, LEAD ATTORNEY, COFFEY BURLINGTON, Miami, FL; Christopher W. Cardwell, LEAD ATTORNEY, GULLETT, SANFORD, ROBINSON & MARTIN, PLLC, Nashville, TN; Jeffrey D. Cohen, LEAD ATTORNEY, KEENAN COHEN & HOWARD P.C., Jenkintown, PA; Kent Alan Gardiner, LEAD ATTORNEY, Luke P. van Houwelingen, CROWELL & MORING LLP, Washington, DC; Linda Sue Stein, LEAD ATTORNEY, STEPTOE & JOHNSON LLP, Washington, DC; Anne Coxe Mesrobian, GUNSTER, Jacksonville, FL; David Matthew Wells, GUNSTER, YOAKLEY & STEWART P.A., Jacksonville, FL; Eric Fanchiang, CROWELL& MORING LLP, Irvine, CA; Mara Lieber, PRO HAC VICE, Juan Arteaga, CROWELL & MORING LLP, New York, NY.

For NORFOLK SOUTHERN RAILWAY COMPANY, Defendant: Linda Sue Stein, LEAD ATTORNEY, STEPTOE & JOHNSON LLP, Washington, DC; Noelle M. Reed, LEAD ATTORNEY, SKADDEN, ARPS, SLATE, MEAGHER & FLOM LLP, Houston, Tx; Matthew Aaron Tabas, ARNOLD & PORTER KAYE SCHOLER LLP, Washington, DC; Ron Wray, GALLIVAN, WHITE & BOYD PA, Greenville, SC; Tara L. Reinhart, SKADDEN, ARPS, SLATE, MEAGHER & FLOM LLP, Washington, DC.

For CALUMET SHREVEPORT REFINING LLC, Defendant: Craig Philip Seebald, **[*26]** LEAD ATTORNEY, Alden Lewis Atkins, VINSON & ELKINS LLP, Washington, DC; Frank J. Pergolizzi, John H. Leseur, Peter Anthony Pfohl, SLOVER & LOFTUS LLP, Washington, DC; Lindsey R. Vaala, VINSON & ELKINS, L.L.P., Washington, DC.

For PAO TMK, CVR PARTNERS, LP, CVR REFINING, LP, CVR NITROGEN, LP, CVR ENERGY, INC., SHELL CHEMICAL LP, SHELL OIL COMPANY, RAVAGO HOLDINGS AMERICA, INC., Interested Parties: Stephen R. Neuwirth, LEAD ATTORNEY, QUINN EMANUEL URQUHART & SULLIVAN, LLP, New York, NY.

For NORFOLK SOUTHERN CORPORATION, Interested Party: Noelle M. Reed, LEAD ATTORNEY, SKADDEN, ARPS, SLATE, MEAGHER & FLOM LLP, Houston, Tx.

Judges: BERYL A. HOWELL, Chief United States District Judge.

Opinion by: BERYL A. HOWELL

Opinion

MEMORANDUM OPINION

After nearly fifteen years of litigation in this District related to their central allegations that defendants, the four largest railroads operating in the United States, engaged in a multi-year price-fixing conspiracy to increase the price of rail-freight transport, plaintiffs in this multidistrict litigation, *In re Rail Freight Fuel Surcharge Antitrust Litigation* ("*MDL II*"), MDL No. 2952, Misc. A. No. 20-00008 (BAH) (D.D.C.), seek an order requiring extensive new discovery, including **[*27]** four years, or even more, of additional transaction data for certain plaintiffs' purchases of rail-freight transport from defendants. Pls.' Mot. Compel Produc. Post-2008 Transaction Data & Price Authorities ("Pls.' Mot.") at 1, ECF No. 543. Defendants, for their part, oppose plaintiffs' request and move for reconsideration of this Court's unambiguous conclusion in its decision on their motions to dismiss ten individual complaints that "'Plaintiffs' allegations of harm caused by effects of the July 1, 2003-December 31, 2008 conspiracy that extended beyond December 31, 2008 are tolled'" under the exception to the running of the statute of limitations for former putative class members set forth in *American Pipe & Construction Co. v. Utah ("American Pipe"), 414 U.S. 538, 94 S. Ct. 756, 38 L. Ed. 2d 713 (1974)*, and may proceed. Defs.' Mot. Recons. & Opp'n Pls.' Mot. Compel ("Defs.' Mot.") at 1, ECF No. 561 (quoting *In re Rail Freight Fuel Surcharge Antitrust Litig. (No. II) ("Tolling Decision"), MDL No. 2925, Misc. A. No. 20-00008 (BAH), 2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *24 (D.D.C. Aug. 25, 2020)*).

A hearing on the pending motions was held on May 6, 2021. *See* Min. Entry (May 6, 2021); Tr. of Hr'g (May 6, 2021) ("May 6 Hr'g Tr."), ECF No. 620. For the reasons set forth below, defendants' Motion for Reconsideration is denied and plaintiffs' Motion to Compel is granted in part and denied in part.

I. BACKGROUND

The extensive factual and procedural background of this multidistrict litigation **[*28]** has been fully summarized in the *Tolling Decision* denying defendants' motions to dismiss, in whole or part, ten individual complaints in *MDL II. See Tolling Decision, 2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *1-6*. Only those facts necessary for resolving the instant motions are provided herein.

A. Creation of MDL II and the *Tolling Decision*

The more than 300 rail-freight-shipper plaintiffs in *MDL II* allege that defendants "engaged in a multi-year price-fixing conspiracy to increase the price of rail freight transport through their coordinated efforts to cause an industry trade group to adopt a new cost index that excluded the cost of fuel and then to implement, in lockstep, artificially inflated fuel surcharges, in violation of *Section 1 of the Sherman Act, 15 U.S.C. § 1*, and *Section 4 of the Clayton Act, 15 U.S.C. § 15*." *2020 U.S. Dist. LEXIS 153826, [WL] at *1*. This theory was originally advanced in another multidistrict litigation created in 2007 and still pending in this District, *In re Rail Freight Fuel Surcharge Antitrust Litigation* ("*MDL I*"), MDL No. 1869, No. 07-mc-00489-PLF-GMH (D.D.C.), "in which a putative class of direct purchasers of unregulated rail freight services alleged the same conspiracy, occurring from 2003 to 2008, against the same defendants," *Tolling Decision, 2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *1* (citing *In re Rail Fuel Surcharge Antitrust Litig., 287 F.R.D. 1, 13 (D.D.C. 2012)*). The class was defined as direct purchasers of rail-freight transport who paid "a standalone rail **[*29]** freight fuel surcharge applied as a percentage of the base rate" at "any time from July 1, 2003 until December 31, 2008" (the "*MDL I* class period"). *2020 U.S. Dist. LEXIS 153826, [WL] at *4* (internal quotation marks and citation omitted); *see also* *2020 U.S. Dist. LEXIS 153826, [WL] at *14-17*. Class certification was denied in 2019, *see* *In re Rail Freight Fuel Surcharge Antitrust Litig. - MDL No. 1869, 934 F.3d 619, 627, 443 U.S. App. D.C. 86 (D.C. Cir. 2019)*, and plaintiffs, former absent putative class members in *MDL I*, subsequently brought individual complaints largely repeating the claims of the putative class, *Tolling Decision, 2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *1, *5-6*.

On February 6, 2020, the Judicial Panel on Multidistrict Litigation ("JPML") consolidated twenty-six individual cases brought by former putative class members in *MDL I* for pretrial proceedings in this Court in *MDL II*. Transfer Order at 1, ECF No. 1. Since its creation, another eighty-one cases initiated by former putative class members have been consolidated in this multidistrict litigation, for a total of 107 individual cases and over 300 plaintiffs as of this writing. The *MDL II* plaintiffs, like the putative *MDL I* class, allege that defendants' conspiracy took place between July 1, 2003 and December 31, 2008, but their individual actions were filed between November 2019 and April 2021. Their claims would therefore be untimely under the Clayton Act's four-year statute of limitations, **[*30]** *see* *15 U.S.C. § 15b*, but for the tolling made generally available to former putative class members under *American Pipe*. The *American Pipe* rule "suspends the applicable statute of limitations," *414 U.S. at 554*, as to all putative class members' individual claims concerning "the same evidence, memories, and witnesses as the subject matter of the original class suit," *United Airlines, Inc. v. McDonald, 432 U.S. 385, 393 n.14, 97 S. Ct. 2464, 53 L. Ed. 2d 423 (1977)* (internal quotation marks and citation omitted), "until class certification is denied," *Crown, Cork & Seal Co. v. Parker ("Crown"), 462 U.S. 345, 354, 103 S. Ct. 2392, 76 L. Ed. 2d 628 (1983)*. The statute of limitations as to most of the *MDL II* plaintiffs' claims, which are substantively identical to the claims of the *MDL I* class, thus began to run only after the 2019 denial of class certification in *MDL I. See* *Tolling Decision, 2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *12*.

A handful of the *MDL II* complaints contain allegations that differ from the allegations of the putative *MDL I* class, including, as relevant here, allegations that certain plaintiffs experienced continuing harm from the conspiracy after December 31, 2008, the date on which the putative class period in *MDL I* ended, because they "continued to pay supracompetitive [fuel surcharges] to [d]efendants for several years after the conspiracy ended, pursuant to the multi-year contracts [they] had entered or renegotiated with [d]efendants prior to the end **[*31]** of the conspiracy." *2020 U.S. Dist. LEXIS 153826, [WL] at *9* (first, second, and fourth alterations in original) (internal quotation marks and citation omitted). Defendants moved to dismiss or strike allegations in these ten complaints, arguing that their divergence from the former class's allegations deprived them of the benefit of *American Pipe* tolling and rendered them untimely. *See* *2020 U.S. Dist. LEXIS 153826, [WL] at *6-9, *12*. Their motions were denied. *2020 U.S. Dist. LEXIS 153826, [WL] at *29-30*. As to the challenged complaints' allegations of post-2008 lingering effects of the 2003-2008 conspiracy, the *Tolling Decision* found that "[n]o undue prejudice to defendants results from tolling plaintiffs' allegations of harm resulting from lingering effects of the conspiracy outside the class period: because the underlying conduct occurred during the class period, defendants have fair notice of their substance, and the number and identities of potential plaintiffs, from the earlier class proceedings." *2020 U.S. Dist. LEXIS 153826, [WL] at *24*. Under this logic, "plaintiffs' allegations of harm resulting from lingering effects of the conspiracy outside the [*MDL I*] class period" of July 1, 2003 to December 31, 2008 stemming from defendants' conduct during the class period were tolled, *id.*, but allegations of continuing conspiratorial conduct after December **[*32]** 31, 2008 were time-barred, *see* *2020 U.S. Dist. LEXIS 153826, [WL] at *25*.[1]

B. Discovery in MDL II

At the time of *MDL II*'s creation in early 2020, plaintiffs represented to the JPML that "all the fact discovery as to Defendants ha[d] been done" in *MDL I*, Tr. of Proceedings ("JPML Hr'g Tr.") at 11:15-16, *MDL II*, MDL No. 2925 (J.P.M.L. Jan. 30, 2020), ECF No. 136, and that, as a result, any new fact discovery needed in *MDL II* would be "proportionately . . . much, much smaller than what's been done to date" and would be largely restricted to "things related to specific new Plaintiffs," *id.* at 11:20-22, in particular, "individualized damages discovery," Related Pls.' Joint Resp. Defs.' Mot. Transfer, Consol. &/or Coordination of Rail Freight Fuel Surcharge Antitrust Actions, *MDL II*, MDL No. 2925 (J.P.M.L. Dec. 12, 2019), ECF No. 87. The Panel thus reported that plaintiffs would "have access to the full discovery record developed in [*MDL I*], and that any remaining discovery in the new cases will be very limited and case-specific." Transfer Order at 2.

Plaintiffs made similar representations at the initial scheduling conference in *MDL II*, indicating that "all of the defendants' transaction **[*33]** data including for all shippers that were alleged to have been in the [putative *MDL I*] class" had been produced and subject to expert analysis in *MDL I*, Tr. of Video-Tel. Scheduling Conf. (May 22, 2020) at 53:19-22, ECF No. 110, and, as a result, the most burdensome and time-consuming discovery needed in *MDL II* was already complete, with the exception of "some particular additional transaction data" that might be required, *id.* at 53:18-19. Based on the parties' discussion of their anticipated discovery needs at the scheduling conference, an initial Scheduling Order was entered, setting a deadline of October 1, 2021 for the completion of all fact discovery. Order (May 22, 2020) ("Scheduling Order") ¶ 5, ECF No. 102.

C. The Present Dispute

On February 2, 2021, two days before a previously scheduled status conference was to be held, plaintiffs submitted an email to the Court in accordance with the procedure for discovery disputes outlined in the Scheduling Order, *see* Scheduling Order at 3, advising that the parties had reached impasse about "the extent to which Defendants will produce . . . transaction data from 2009-2012." Defs.' Mot., Ex. 2, Email from Alden L. Atkins, Partner, Vinson **[*34]** & Elkins LLP, to the Court (Feb. 2, 2021, 3:59 PM) ("Disc. Dispute Email") at 1, ECF No. 561-3. Such information had been provided in *MDL I* for transactions made by defendants for all shipments with any customer for the nine-year period from January 1, 2000 to December 31, 2008 (the "*MDL I* data set"), but was neither requested nor produced for the years after 2008 in that multidistrict litigation. *See id.* at 3-4; Tr. of Status Conf. (Feb. 4, 2021) ("Feb. 4 Status Conf. Tr.") at 15:22-23, ECF No. 516.[2] As an early step in fact discovery in *MDL II*, defendants

---

[1] Plaintiffs Nippon Yusen Kabushiki Kaisha and NYK Line (North America) Inc. (together, the "NYK plaintiffs"), whose complaint was among those targeted by defendants' motions to dismiss, *see* *Tolling Decision, 2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *8-9*, sought clarification or reconsideration of the *Tolling Decision*'s determination that their "allegations about [a] 2009-2013 contract" between NYK plaintiffs and defendants that they claimed contained the same artificially high fuel surcharge as contracts entered during the 2003-2008 conspiracy period "are time-barred," *2020 U.S. Dist. LEXIS 153826, [WL] at *27*; *see* *In re Rail Freight Fuel Surcharge Antitrust Litig. (No. II) ("NYK Recons. Decision"), MDL No. 2925, Misc. A. No. 20-00008 (BAH), Civ. A. No. 20-790 (BAH), 2020 U.S. Dist. LEXIS 195908, 2020 WL 6198487, at *1 (D.D.C. Oct. 22, 2020)*. This request was denied on the grounds, previously articulated in the *Tolling Decision*, that "allegations concerning a supracompetitive fuel surcharge formula in a 2009 contract do not satisfy the criteria for tolling because they are 'factually separate from the 2003-2008 conspiracy pursued by the putative class' in *MDL I* and defendants therefore did not have fair notice that the contract was at issue." *NYK Recons. Decision, 2020 U.S. Dist. LEXIS 195908, 2020 WL 6198487, at *2* (quoting *Tolling Decision, 2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *27*).

[2] *MDL I* was filed in November 2007, *see* Transfer Order, *MDL I*, MDL No. 1869, No. 07-mc-00489-PLF-GMH (D.D.C. Nov. 14, 2007), ECF No. 1, more than a year before the class-period end date of December 31, 2008, and discovery began in late 2008, after disposition of defendants' motion to dismiss, *see* *In re Rail Freight Fuel Surcharge Antitrust Litig., 587 F. Supp. 2d 27, 37*

produced the full *MDL I* data set to *MDL II* plaintiffs. Disc. Dispute Email at 1; Decl. of Daniel M. Jaffe Supp. Pls.' Mot. Compel Produc. Post-2008 Transaction Data & Price Authorities ("Jaffe Decl.") ¶ 6, ECF No. 543-2.

Despite having received this extensive body of information for 2000-2008, plaintiffs requested, in their February 2 email, that defendants be compelled to "produce all transaction data for 2009-2012 for the same data fields that Defendants have produced for 2000-2008" for all rail-freight shippers, claiming that broad set of data was "necessary to assess and prove damages for the continuing **[*35]** effects of Defendants' conspiracy." Disc. Dispute Email at 1. Defendants opposed production of any post-2008 transaction data, arguing that the *MDL I* data set "sufficed in *MDL I* and should suffice in *MDL II*," *id.* at 4, but offered "to produce relevant transaction data for those Plaintiffs that have actually alleged or could at least provide a basis to allege that they paid a rate-based fuel surcharge after 2008 under a pre-2009 contract" by citing an applicable contract or other relevant price authority, *id.* at 5.[3] Plaintiffs rejected this compromise, contending that defendants' approach "would lead to endless disputes, would cause delay, would be enormously burdensome, and would create substantial risk that Defendants' data production would be incomplete." *Id.* at 2. They expressed further concern that "[m]any plaintiffs have incomplete records due to the passage of time." *Id.* This limitation, in combination with defendants' incomplete and slow production of relevant price authorities to this point, therefore meant that these plaintiffs would be unable to demonstrate to defendants' satisfaction that they qualified for production of post-2008 transaction data. *Id.* As a result, the parties **[*36]** reached impasse.

The transaction-data dispute was discussed, but not resolved, at the previously scheduled February 4, 2021 status conference. When asked why *MDL II* plaintiffs were seeking 2009-2012 transaction data that had not been produced or discussed in *MDL I*, plaintiffs' counsel stated that "the damage period that was the focus of [*MDL I*] and that remains the focus of the case ends on December 31st, 2008; and there has been no claim ever made in that case, which was filed in 2007, for damages in the period after December 13th, 2008 [sic]." Feb. 4 Status Conf. Tr. at 14:15-19. He emphasized that "[t]here was really no claim for lingering effects damages" in *MDL I*. *Id.* at 16:13-14; *see also, e.g., id.* at 31:8-14. The parties were encouraged "to meet and confer again" on the transaction data dispute, and to "propose a briefing schedule" if they were unable to reach a solution. *Id.* at 51:18, 21.

The parties accordingly resumed negotiations. During this second conferral process, defendants offered to "provide 2009 transaction data related to all Plaintiffs and those affiliated entities Plaintiffs identified in their answers to interrogatories for whom **[*37]** Plaintiffs claim they are seeking damages," without "requir[ing] Plaintiffs to identify a specific contract or rate authority entitling them to receive this data." Defs.' Mot., Ex. 7, Email from Ronald K. Wray, II, Partner, Gallivan, White & Boyd P.A., to Pls.' Counsel (Feb. 15, 2021, 2:51 PM) ("Defs.' Feb. 15 Email") at 2, ECF No. 561-8. In exchange, they asked that plaintiffs "agree to drop their requests for non-Plaintiff data and for data after 2009." *Id.* Plaintiffs counter-proposed the following terms: (1) plaintiffs would "agree to accept 2009 data" restricted to "the named plaintiffs and the entities they named in their recent interrogatory responses"; (2) defendants "would produce transaction data for longer time periods for plaintiffs for which Defendants have already agreed . . . to produce such data" in the parties' conferral process; (3) defendants "would also agree to produce data after 2009 for plaintiffs that can document a pricing authority/contract in effect during this period"; and (4) defendants would locate the data by "search[ing] for variations of plaintiff names," including names and spellings "previously identified in MDL I transactional data." Defs.' Mot., **[*38]** Ex. 8, Email from Alden L. Atkins, Partner, Vinson & Elkins LLP, to Defs.' Counsel (Feb. 18, 2021, 11:07 AM) at 1, ECF No. 561-9. Defendants sought clarification of the scope of the post-2009 data anticipated by the counterproposal, specifically, "whether . . . Plaintiffs are seeking data beyond 2012"; whether plaintiffs are "seeking post-2009 data for price authorities that were essentially open offers of transportation or for evergreen contracts that remained in effect unless canceled by either party"; and whether plaintiffs "seek to include contracts" with nondefendant railroads in assessing the

(D.D.C. 2008); Feb. 4 Status Conf. Tr. at 15:2-10. Of course, post-2008 lingering-effects damages had not yet occurred at that time. As a result, the central focus of discovery in *MDL I* was defendants' allegedly conspiratorial conduct and damages incurred by plaintiffs during the 2003-2008 class period. *See* Feb. 4 Status Conf. Tr. at 15:22-16:15.

[3] A price authority, in the rail-freight context, is a "[c]ontract, quote, circular, or tariff containing rates and rules governing their application." Jaffe Decl., Ex. 2, Ass'n of Am. R.R.s, *Railway Accounting Rules* ("*R.R. Rules*") 59 (2021), ECF No. 543-3 (emphasis omitted).

relevant post-2009 transaction data. *Id.*, Ex. 9, Email from Ronald K. Wray, II, Partner, Gallivan, White & Boyd P.A., to Pls.' Counsel (Feb. 22, 2021, 11:07 PM) at 1-2, ECF No. 561-10.[4]

As to the post-2012 data, plaintiffs confirmed that "some Plaintiffs have contracts or price authorities from the conspiracy period that were in effect after 2012," while others lacked sufficient information to determine whether their conspiracy-period pricing lasted past 2012, and that plaintiffs were therefore "unwilling to consent to a discovery agreement that could effectively waive claims for damages **[*39]** after 2012 due to a lack of transaction data." *Id.*, Ex. 10, Letter from Pls.' Counsel to Defs.' Counsel (Mar. 2, 2021) ("Pls.' Lingering-Effects Letter") at 2, ECF No. 561-11. They offered a compromise under which "Defendants would agree to produce data through 2012 for contracts in effect through that time," while plaintiffs "would reserve their right to request data after 2012 for pre-2009 contracts and price authorities in effect after 2012, and Defendants would reserve their right to oppose such a request." *Id.* As to the question of evergreen contracts and open offers, plaintiffs clarified that, in their view, they "reserve their rights to request any relevant data demonstrating lingering effects . . . whether based on open offers of transportation, evergreen contracts, or other price authorities." *Id.* Finally, as to contracts with nondefendant railroads, plaintiffs proposed "that they would not use a contract with a non-Defendant . . . to justify a request for data after 2009 at this time," but "would reserve their right to seek such data later." *Id.* at 3.

On March 11, 2021, the parties indicated that they had again reached impasse and requested entry of a stipulated briefing schedule **[*40]** on plaintiffs' planned motion to compel production of post-2008 transaction data and an anticipated motion by defendants for reconsideration of the *Tolling Decision*'s holding that plaintiffs' claims for lingering-effects damages are tolled under *American Pipe*. Mot. Stipulated Briefing Schedule & Proposed Order, ECF No. 542. A schedule for briefing on these two motions was accordingly set, *see* Min. Order (Mar. 12, 2021); Min. Order (Apr. 16, 2021), with the last brief submitted on April 23, 2021, *see* Defs.' Reply Mem. L. Supp. Defs.' Mot. Recons. ("Defs.' Reply"), ECF No. 619. A hearing on both motions was held on May 6, 2021, as part of a previously scheduled status conference. *See* Min. Entry (May 6, 2021). The two motions are now ripe for resolution.

II. LEGAL STANDARDS

A. Motion for Reconsideration

Motions to reconsider interlocutory orders may be granted at any time before the entry of a final judgment, pursuant to *Federal Rule of Civil Procedure 54(b)*, "'as justice requires.'" *Cobell v. Jewell, 802 F.3d 12, 25, 419 U.S. App. D.C. 370 (D.C. Cir. 2015)* (quoting *Greene v. Union Mut. Life Ins. Co. of Am., 764 F.2d 19, 22 (1st Cir. 1985)* (Breyer, J.)); *see also* *Capitol Sprinkler Inspection, Inc. v. Guest Servs., Inc., 630 F.3d 217, 227, 394 U.S. App. D.C. 73 (D.C. Cir. 2011)* (noting that *Rule 54(b)* "recognizes [a court's] inherent power to reconsider an interlocutory order 'as justice requires'" (quoting *Greene, 764 F.2d at 22*)). In this District, that "abstract phrase" is interpreted "narrowly" to permit reconsideration **[*41]** "'only when the movant demonstrates: (1) an intervening change in the law; (2) the discovery of new evidence not previously available; or (3) a clear error in the first order.'" *King & Spalding, LLP v. United States HHS, 395 F. Supp. 3d 116, 119-20 (D.D.C. 2019)* (quoting *Bernier v. Trump, 299 F. Supp. 3d 150, 156 (D.D.C. 2018)*); *see also* *Bayshore Cmty. Hosp. v. Azar, 325 F. Supp. 3d 18, 22 (D.D.C. 2018)*; *Hispanic Affs. Project v. Perez, 319 F.R.D. 3, 6 (D.D.C. 2016)*; *Murphy v. Exec. Off. for U.S. Att'ys, 11 F. Supp. 3d 7, 8 (D.D.C. 2014)*. Although this list may not exhaust the potential justifications for reconsideration, exercise of the discretion granted under *Rule 54(b)* to revisit earlier rulings in the same case is "'subject to the caveat that where litigants have once battled for the court's decision, they should neither be required, nor without good reason permitted, to battle for it again.'" *U.S. Tobacco Coop. Inc. v. Big S. Wholesale of Va., LLC, 899 F.3d 236, 257 (4th*

---

[4] An "evergreen contract is a contract that simply renews each year unless canceled by one of the parties," May 6 Hr'g Tr. at 64:8-10 (statement by Ronald K. Wray, II, Gallivan, White & Boyd, P.A., Counsel for Defendant Norfolk Southern Railway Co.), while an "open offer of transportation" is an offer published by a railroad, for example, on its "website," via "a circular," or through "some other mechanism" that "a shipper can accept" by placing an order for rail-freight transportation under the offer, *id.* at 65:5-15 (statement by Mr. Wray).

Cir. 2018) (quoting Off. Comm. of Unsecured Creditors of Color Tile, Inc. v. Coopers & Lybrand, LLP, 322 F.3d 147, 167 (2d Cir. 2003)); *see also* NRDC, Inc. v. EPA, 490 F. Supp. 3d 190, 194-95 (D.D.C. 2020) (same); Jordan v. U.S. Dep't of Justice, Civ. No. 17-2702 (RC), 2019 U.S. Dist. LEXIS 77342, 2019 WL 2028399, at *2 (D.D.C. May 8, 2019) (same). "'The burden is on the moving party to show that reconsideration is appropriate and that harm or injustice would result if reconsideration were denied.'" Lovely-Coley v. District of Columbia, 255 F. Supp. 3d 1, 9 (D.D.C. 2017) (quoting United States ex rel. Westrick v. Second Chance Body Armor, Inc., 893 F. Supp. 2d 258, 268 (D.D.C. 2012)).

B. Motion to Compel

Under *Federal Rule of Civil Procedure 26*, a party "may obtain discovery regarding any nonprivileged matter that is relevant to any party's claim or defense and proportional to the needs of the case." *Fed. R. Civ. P. 26(b)(1)*. Thus, in assessing a motion to compel discovery, "courts must look carefully to the complaint's allegations to determine if the requested discovery" satisfies *Rule 26*'s relevancy and proportionality requirements. Strike 3 Holdings, LLC v. Doe, 964 F.3d 1203, 1210, 448 U.S. App. D.C. 159 (D.C. Cir. 2020). "Relevancy in this context is 'broadly **[*42]** construed and encompasses any material that bears on, or that reasonably leads to other matters that could bear on, any issue that is or may be in the case.'" In re Veiga, 746 F. Supp. 2d 8, 19 (D.D.C. 2010) (quoting Alexander v. FBI, 194 F.R.D. 316, 325 (D.D.C. 2000)); *see also* Food Lion, Inc. v. United Food & Com. Workers Int'l Union, 103 F.3d 1007, 1012-13, 322 U.S. App. D.C. 301 (D.C. Cir. 1997).

If the requested discovery is found to be relevant, *Rule 26*'s proportionality prong "requires district courts in all discovery matters 'to consider a number of factors potentially relevant to the question of undue burden,' including: (1) whether the discovery sought is 'unreasonably cumulative or duplicative'; (2) whether the discovery sought 'can be obtained from some other source that is more convenient, less burdensome, or less expensive'; and (3) whether the discovery sought is 'proportional to the needs of the case,' taking into account 'the importance of the issues at stake in the action, the amount in controversy, the parties' relative access to relevant information, the parties' resources, the importance of the discovery in resolving the issues, and whether the burden or expense of the proposed discovery outweighs its likely benefit.'" Buzzfeed, Inc. v. United States DOJ, 318 F. Supp. 3d 347, 358 (D.D.C. 2018) (first quoting Watts v. SEC, 482 F.3d 501, 509, 375 U.S. App. D.C. 409 (D.C. Cir. 2007); and then quoting *Fed. R. Civ. P. 26(b)(1)*, *(2)*); *see also* Strike 3 Holdings, LLC, 964 F.3d at 1207 (noting that, under *Rule 26*, "[c]ourts are directed to assess proportionality by reference to" these factors); *Fed. R. Civ. P. 26(b)*.

"The party seeking **[*43]** discovery must first demonstrate that the information sought" is both relevant and proportional and therefore falls "within the scope of discoverable information under *Rule 26*." United States v. All Assets Held at Bank Julius Baer & Co., Ltd., 202 F. Supp. 3d 1, 6 (D.D.C. 2016). "If that party carries its burden, the party resisting discovery then must show 'why discovery should not be permitted.'" *Id.* (quoting Alexander, 194 F.R.D. at 326). Notwithstanding "[t]he broad presumption in favor of discovery of relevant information embodied in *Rule 26*," Oxbow Carbon & Minerals LLC v. Union Pac. R.R., 322 F.R.D. 1, 6 (D.D.C. 2017), a "district court has broad discretion to limit the scope of discovery pursuant to *[Rule] 26(b)*," Webb v. U.S. Vets. Initiative, 993 F.3d 970, 974, 451 U.S. App. D.C. 507 (D.C. Cir. 2021); *see also* Gilmore v. Palestinian Interim Self-Gov't Auth., 843 F.3d 958, 968, 427 U.S. App. D.C. 53 (D.C. Cir. 2016) ("'*Rule 26* vests the trial judge with broad discretion to tailor discovery narrowly . . . .'" (omission in original) (quoting Crawford-El v. Britton, 523 U.S. 574, 598, 118 S. Ct. 1584, 140 L. Ed. 2d 759 (1998))).

III. DISCUSSION

Plaintiffs seek an order compelling defendants (1) to "produce the same fields of transaction data for 2009 that they produced in [*MDL I*] for all Plaintiffs"; (2) to "produce [transaction] data for 2010 to 2012 for Plaintiffs who identify a price authority entered into or in effect on or before December 31, 2008 that they reasonably believe continued beyond 2009 within 30 days of presentment of the price authority"; and (3) to "substantially complete the production of [conspiracy-period] price authorities applicable to the Plaintiffs by" June 1, **[*44]** 2021. Pls.' Mot. at 1; *see also*

Pls.' Mem. P. & A. Supp. Mot. Compel Produc. Post-2008 Transaction Data & Price Authorities ("Pls.' Mem.") at 5, 15, ECF No. 543; Pls.' Mem. P. & A. Opp'n Defs.' Mot. Recons. & Reply Supp. Mot. Compel Produc. Post-2008 Transaction Data & Price Authorities ("Pls.' Reply") at 24 n.9, ECF No. 612.[5] They contend that this information is necessary "to prove and calculate" their lingering-effects damages and therefore falls within the scope of discoverable information under *Rule 26*. Pls.' Mem. at 1.

Defendants oppose production of the requested materials, and move instead for the Court to "reconsider its ruling" in the *Tolling Decision* that plaintiffs' allegations regarding the harm they suffered from post-2008 lingering effects of the alleged 2003-2008 conspiracy are tolled and then, upon granting defendants' Motion for Reconsideration, deny plaintiffs' Motion to Compel as moot. Defs.' Mot. at 1. Alternatively, they ask that plaintiffs' request for production of 2010-2012 transaction data for certain plaintiffs be denied, and that defendants be "require[d] . . . only to produce 2009 transactional data for all Plaintiffs and affiliated entities." *Id.* ***[*45]*** Whether plaintiffs' Motion to Compel presents a live dispute depends on resolution of defendants' Motion for Reconsideration, which itself turns on a correct understanding of the scope of the lingering-effects damages tolled in the *Tolling Decision*. Consideration of the pending motions thus follows review of the *Tolling Decision*'s holding with respect to lingering-effects damages and evaluation of how the *Tolling Decision*'s reasoning applies to theories of lingering-effects damages not presented in the motions to dismiss.

A. Application of the *Tolling Decision's* Conclusion that Certain Lingering-Effects Damages Are Tolled

1. *Description of the* Tolling Decision*'s Holding with Respect to Lingering-Effects Damages*

The *Tolling Decision* evaluated the timeliness of plaintiffs' allegations of continuing harm from defendants' conspiracy after December 31, 2008 against the background principles of *American Pipe* tolling. As described *supra* Part I.A and explained in detail in the *Tolling Decision, American Pipe* stops the running of the statute of limitations "'for all members of the putative class until class certification is denied'" as to "individual actions concerning 'the same evidence, memories, **[*46]** and witnesses as the subject matter of the original class suit.'" *Tolling Decision, 2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *11* (first quoting *Crown, 462 U.S. at 354*; and then quoting *United Airlines, Inc., 432 U.S. at 393 n.14*). This rule is designed to promote both *Federal Rule of Civil Procedure 23*'s "goals of 'efficiency and economy of litigation[,]' by eliminating the need for putative class members to file protective motions to intervene in the pending class action to preserve their claims, and thus preventing a 'needless multiplicity of actions,'" *id.* (first quoting *Am. Pipe, 414 U.S. at 553*; and then quoting *Crown, 462 U.S. at 351*), and "the functions of statutes of limitations, which . . . [']promote justice by preventing surprises through the revival of claims that have been allowed to slumber until evidence has been lost, memories have faded, and witnesses have disappeared,'" *id.* (quoting *Am. Pipe, 414 U.S. at 554*).

The D.C. Circuit takes a "'functional'" approach to application of these guideposts of *American Pipe* tolling "that emphasizes 'whether tolling under [the] circumstances would serve the purposes underlying the class-action tolling doctrine.'" *Id.* (alteration in original) (first quoting *McCarthy v. Kleindienst, 562 F.2d 1269, 1274, 183 U.S. App. D.C. 321 (D.C. Cir. 1977)*; and then quoting *Menominee Indian Tribe of Wis. v. United States, 614 F.3d 519, 527, 392 U.S. App. D.C. 202 (D.C. Cir. 2010)*). "Under this approach, tolling for putative class members is appropriate so long as 'the defendant has received fair notice' through the former class action 'of the number and generic identity **[*47]** of the potential [plaintiffs] and their substantive claims.'" *Id.* (alteration in original) (quoting *McCarthy, 562 F.2d at 1274*). The central inquiry within this framework is whether the claims of former putative class members are "'predicated on the same acts'" as the conduct challenged in the original class action, "such that 'there can be

---

[5] Plaintiffs originally requested that defendants be compelled to produce all price authorities applicable to plaintiffs "by May 1, 2021," Pls.' Mot. at 1, but subsequently extended that request to "June 1," Pls.' Reply at 24 n.9. In addition, though plaintiffs represented that they sought to compel production of "their own post-2008 transaction data and transaction data for which no shipper is identified" through their pending motion, *id.* at 3 n.2, they clarified at the May 6, 2021 motions hearing that they are "no longer asking for" unidentified shipper data, May 6 Hr'g Tr. at 36:9; *see also id.* at 36:6-10, 37:12-15.

no doubt that the defendants have received sufficient notice of the contours of potential claims.'" *Id.* (quoting *McCarthy, 562 F.2d at 1275*). The timeliness of plaintiffs' allegations of continuing harm from defendants' conspiracy after December 31, 2008, the closing date of the *MDL I* class period, was evaluated in light of the foregoing principles and the black-letter rule of ***antitrust law*** that "[t]he lingering effects of a completed conspiracy may be remediated upon successful proof of the underlying anticompetitive conduct." *2020 U.S. Dist. LEXIS 153826, [WL] at *24* (collecting cases); *see also* *Zenith Radio Corp. v. Hazeltine Rsch. Inc., 401 U.S. 321, 338-39, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)* (finding that, "[i]n the context of a continuing conspiracy," "each separate cause of action that . . . accrues entitles a plaintiff to recover not only those damages which he has suffered at the date of accrual, but also those which he will suffer in the future from the particular invasion, including what he has suffered during and will predictably **[*48]** suffer after trial").

Balancing *American Pipe*'s requirement of fair notice to defendants against its aim of preventing duplicative litigation, the *Tolling Decision* reasoned that "[s]ubstantial factual overlap between the original allegations [made in *MDL I*] and the new allegations [raised by *MDL II* plaintiffs], the touchstone of *American Pipe* analysis, remains essential," and that tolling is therefore permitted only for allegations "with a sufficient factual nexus" to the conduct alleged by the putative *MDL I* class "to ensure fair notice to defendants." *2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *25*. On this basis, the *Decision* distinguished allegations that defendants' conduct in furtherance of the conspiracy continued past the 2003-2008 period alleged by the putative *MDL I* class from allegations of lingering harms after 2008 resulting from defendants' purported conspiratorial conduct during the 2003-2008 class period. It concluded that "[n]o undue prejudice to defendants result[ed] from tolling" of allegations as to which "the underlying conduct occurred during the class period" because "defendants ha[d] fair notice of their substance, and the number and identities of potential plaintiffs, from the earlier class proceedings" **[*49]** in *MDL I*. *2020 U.S. Dist. LEXIS 153826, [WL] at *24*. Consequently, "plaintiffs' allegations of harm resulting from lingering effects of the conspiracy outside the [*MDL I*] class period" of July 1, 2003 to December 31, 2008 stemming directly from defendants' conduct during the class period are timely. *Id.* In contrast, "allegations outside the class period that address conduct or harm completely unrelated to conduct or harm that occurred within the class period are untimely," *2020 U.S. Dist. LEXIS 153826, [WL] at *25*, because they "spring[] an unfair surprise on defendants by adding conduct that is factually separate from the 2003-2008 conspiracy pursued by the putative class" to the conduct on which defendants' eventual liability might be premised, *2020 U.S. Dist. LEXIS 153826, [WL] at *27*. Thus, plaintiffs' allegations in the challenged complaints that defendants' conspiratorial conduct lasted past December 31, 2008 and that contracts between certain plaintiffs and defendants entered after December 31, 2008 contained artificially high fuel surcharges as a result of the conspiracy were time-barred. *See* *2020 U.S. Dist. LEXIS 153826, [WL] at *25-27*.

The *Tolling Decision* hesitated, at the pleadings stage, to assess "[t]he duration and scope of the alleged effects of the conspiracy . . . before discovery and expert analysis." *2020 U.S. Dist. LEXIS 153826, [WL] at *24*. Now, some months later and **[*50]** with fact discovery well underway, the parties rely on the *Tolling Decision* to dispute the scope of discovery and, in so doing, seek to extend the *Tolling Decision*'s reasoning and holdings to types of price authorities and lingering-effects theories that were not directly at issue in the ten motions to dismiss resolved in that ruling. Of course, information sought in discovery solely to prove time-barred allegations is irrelevant and therefore beyond the scope of discoverable information under *Rule 26*. *See, e.g.,* *Oppenheimer Fund, Inc. v. Sanders, 437 U.S. 340, 352, 98 S. Ct. 2380, 57 L. Ed. 2d 253 (1978)* ("[I]t is proper to deny discovery of matter that is relevant only to claims or defenses that have been stricken, or to events that occurred before an applicable limitations period, unless the information sought is otherwise relevant to issues in the case."); *Meijer, Inc. v. Biovail Corp., 533 F.3d 857, 868, 382 U.S. App. D.C. 385 (D.C. Cir. 2008)* (noting that, because allegations for which plaintiffs sought discovery "were untimely," "any [related] information . . . is likewise immaterial"); *Neals v. ParTech, Inc., No. 19-cv-05660, 2021 U.S. Dist. LEXIS 24542, 2021 WL 463100, at *6 (N.D. Ill. Feb. 9, 2021)* (observing that "rulings on the applicable statute of limitations may impact the scope of discovery requests" (emphasis omitted)).

The instant dispute between the parties involves plaintiffs' representations during the parties' conferral process and, again, at the May 6, 2021 motions **[*51]** hearing, that they may at some point seek, under the rubric of lingering-effects damages, alleged harms from purchases made more than four years after the end of the conspiracy period; for post-2008 purchases made pursuant to open offers of transportation, evergreen contracts, or other price authorities; or for contracts with nondefendant railroads and the possibility of related requests for post-2008 transaction data. *See* May 6 Hr'g Tr. at 51:24-54:9; *supra* Part I.C. Plaintiffs' claimed entitlement to potentially expansive post-2008 discovery from defendants highlights the need for clarification of how the *Tolling Decision*'s treatment of lingering-effects damages applies to then-undefined iterations of plaintiffs' claims of continuing harm resulting from the alleged 2003-2008 conspiracy in order to structure effectively the remaining fact discovery.

2. *Principles Guiding Application of the* Tolling Decision *to New Lingering-Effects Theories*

At the outset, it bears repeating that all claims raised by the *MDL II* plaintiffs would be untimely under the Clayton Act's four-year statute of limitations but for the benefit of *American Pipe* tolling. *See* 15 U.S.C. § 15b; *supra* Part I.A. The policies underlying **[*52]** statutes of limitations and *American Pipe* tolling therefore inform application of the *Tolling Decision*'s reasoning to new lingering-effects theories advanced by plaintiffs. As the Supreme Court recognized in *American Pipe*, statutes of limitation are "'designed to promote justice by preventing surprises through the revival of claims that have been allowed to slumber until evidence has been lost, memories have faded, and witnesses have disappeared.'" Am. Pipe, 414 U.S. at 554 (quoting Order of R.R. Telegraphers v. Ry. Exp. Agency, 321 U.S. 342, 348-49, 64 S. Ct. 582, 88 L. Ed. 788 (1944)), with a "'primar[y]' purpose . . . 'to protect defendants against stale or unduly delayed claims,'" Maalouf v. Islamic Republic of Iran, 923 F.3d 1095, 1109, 440 U.S. App. D.C. 451 (D.C. Cir. 2019) (alteration in original) (quoting John R. Sand & Gravel Co. v. United States, 552 U.S. 130, 133, 128 S. Ct. 750, 169 L. Ed. 2d 591 (2008)). Statutes of limitations further "advance[e] 'the basic policies of . . . repose, elimination of stale claims, and certainty about a plaintiff's opportunity for recovery and a defendant's potential liabilities,'" Gabelli v. SEC, 568 U.S. 442, 448, 133 S. Ct. 1216, 185 L. Ed. 2d 297 (2013) (quoting Rotella v. Wood, 528 U.S. 549, 555, 120 S. Ct. 1075, 145 L. Ed. 2d 1047 (2000)), by "'encourag[ing] plaintiffs to pursue diligent prosecution of known claims,'" Intel Corp. Inv. Pol'y Comm. v. Sulyma, 140 S. Ct. 768, 774, 206 L. Ed. 2d 103 (2020) (quoting Calif. Pub. Emps.' Ret. Sys. v. ANZ Secs., Inc., 137 S. Ct. 2042, 2049, 198 L. Ed. 2d 584 (2017)). These ends reflect "a pervasive legislative judgment that it is unjust to fail to put the adversary on notice to defend within a specified period of time and that 'the right to be free of stale claims in time comes to prevail over the right to prosecute them.'" United States v. Kubrick, 444 U.S. 111, 117, 100 S. Ct. 352, 62 L. Ed. 2d 259 (1979) (quoting Order of R.R. Telegraphers, 321 U.S. at 349).

The ***[*53]*** *American Pipe* exception to the running of statutes of limitations balances these goals against Federal Rule of Civil Procedure 23's aim of preventing "a needless multiplicity of actions," Crown, 462 U.S. at 351, through its restriction of tolling to individual actions concerning "the same evidence, memories, and witnesses as the subject matter of the original class suit," United Airlines, Inc. 432 U.S. at 393 n.14 (quoting Am. Pipe, 414 U.S. at 562 (Blackmun, J., concurring)). When an individual action satisfies this requirement, the defendant is "on notice as to the content of the claims against it and the set of potential plaintiffs who might assert those claims," which notice "satisfie[s] the purposes of the statute of limitations," even though time has run. Calif. Pub. Emps.' Ret. Sys., 137 S. Ct. at 2053. *MDL II* plaintiffs' allegations, including those concerning lingering-effects damages, are tolled under the *Tolling Decision* only to the extent that they align with these polices underlying *American Pipe* tolling.

Second, although "[t]he statute of limitations is an affirmative defense that [a] defendant must prove" by the applicable standard at each successive stage of litigation, Firestone v. Firestone, 76 F.3d 1205, 1210, 316 U.S. App. D.C. 152 (D.C. Cir. 1996), "the burden shifts back to a plaintiff who invokes an exception to the statute of limitations," Minebea Co., Ltd. v. Papst, 444 F. Supp. 2d 68, 175 (D.D.C. 2006) (collecting cases); *see also* Campbell v. Grand Trunk W. R.R. Co., 238 F.3d 772, 775 (6th Cir. 2001) ("Because the statute of limitations is **[*54]** an affirmative defense, the burden is on the defendant to show that the statute of limitations has run. If the defendant meets this requirement then the burden shifts to the plaintiff to establish an exception to the statute of limitations."); McGary v. Hessler-Radelet, 156 F. Supp. 3d 28, 35 (D.D.C. 2016) ("Defendants must first carry their burden of showing that Plaintiff failed to file in a timely manner. Only at that point does the burden shift to Plaintiff to show that the statute of limitations was . . . tolled."). Plaintiffs therefore carry the burden of proving that their claims, which presumptively fall outside the Clayton Act's statute of limitations, are not time-barred because they qualify for *American Pipe* tolling. The requisite showing at the pleadings stage, at which time "dismissal is appropriate only if the complaint on its face is conclusively time-barred," Bregman v. Perles, 747 F.3d 873, 875, 409 U.S. App. D.C. 143 (D.C. Cir. 2014) (internal quotation marks and citation omitted), is minimal. Nonetheless, the *Tolling Decision* concluded that this showing was not made with respect to *MDL II* plaintiffs' allegations involving conduct after December 31, 2008, which allegations lacked the necessary factual nexus with the claims pursued by the putative *MDL II* class to benefit from *American Pipe* tolling and **[*55]** therefore were found to be time-barred. *See* [2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *24-27](). The same is true of any new efforts by plaintiffs to secure lingering-effects damages that similarly would require litigation of post-2008 conduct.

Relatedly, the *Tolling Decision*'s reasoning and holding with respect to lingering-effects damages was framed around bilateral, term-limited contracts between certain *MDL II* plaintiffs and a defendant for the purchase of rail-freight transportation services, the only type of "price authority" identified as at issue in the ten motions to dismiss. *See id.* In concluding that allegations of lingering effects related to purchases under such agreements were timely, the *Decision* emphasized that all of the "underlying conduct" relevant to proving that pre-2009 contracts were impacted by the conspiracy would have "occurred during" the 2003-2008 putative *MDL I* class period, leaving no doubt that defendants had fair notice of these claims. *2020 U.S. Dist. LEXIS 153826, [WL] at *24*. Extension of the *Tolling Decision*'s holding to lingering-effects damages for purchases made pursuant to types of price authorities other than the bilateral, fixed-term model of purchasing rail-freight transportation from defendants was not raised in the motions to dismiss. **[*56]** Such an extension is appropriate only if, like the bilateral and finite contracts evaluated in the *Decision*, proof that the alleged conspiracy caused plaintiffs to pay allegedly supracompetitive fuel surcharges under the identified price authority rests solely on litigation of conduct occurring before December 31, 2008.

Assessment of whether this criterion is satisfied should take into account that plaintiffs were on notice from 2007, when the Surface Transportation Board ("STB") "determined . . . that defendants' practice of imposing rate-based fuel surcharges for regulated rail freight traffic was an unreasonable practice," *2020 U.S. Dist. LEXIS 153826, [WL] at *7* (internal quotation marks omitted); *see also* STB Ex Parte No. 661, ID No. 37341, at 1 (Jan. 25, 2007), and *MDL I* began, advancing the same theory with respect to unregulated rail-freight traffic, that their agreements with defendants might contain artificially high rate-based fuel surcharges. To the extent that proof of plaintiffs' post-2008 lingering-effects allegations raised under a price authority other than a bilateral, fixed-term contract would require litigation of why plaintiffs, after being put on notice of the alleged conspiracy, did not, for example, **[*57]** object to an allegedly conspiratorial fuel surcharge term, terminate an agreement without a fixed end date, refuse to renew a conspiracy-period agreement, or decline to purchase rail-freight transportation from defendants under an allegedly tainted open price authority after December 31, 2008, such allegations necessitate litigation of post-2008 conduct that was not at issue in *MDL I* and are time-barred.

The *Tolling Decision*'s application to each of the new lingering-effects theories suggested by plaintiffs during discovery and contested in the parties' briefing of the instant motions is considered in light of these principles.

3. *Application to New Lingering-Effects Theories*

Plaintiffs represented during the parties' conferral process that, in addition to the lingering-effects damages resulting from bilateral, fixed-term contracts entered during the pre-2009 class period identified in the *Tolling Decision*, they may seek lingering-effects damages, and related discovery, based on (1) "pre-2009 contracts and price authorities in effect after 2012"; (2) "open offers of transportation, evergreen contracts, or other price authorities"; and (3) contracts with nondefendant railroads. Pls.' Lingering-Effects **[*58]** Letter at 2-3; *see also* Pls.' Reply at 23, 28-29, 29 n.12. They complain that consideration of these categories of potential damages is inappropriate at this stage, where "the question . . . is only whether Plaintiffs' claims are barred by the statute of limitations," Pls.' Reply at 23, relying on the *Tolling Decision*'s observation that "[w]hether plaintiffs can prove that their alleged post-2008 harms in fact resulted from defendants' pre-2008 conduct is an issue for future stages of litigation," *id.* (quoting *Tolling Decision, 2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *24*); *see also id.* at 29-30. While the issue of proof still remains for another day, as explained above, resolution of the instant motions and assessment of the appropriate scope of discovery requires some evaluation of whether these additional lingering-effects claims are likely to be tolled under *American Pipe*. This determination affects both defendants' contention, in support of their Motion for Reconsideration, that undue prejudice results from the tolling of *any* lingering-effects damages here, and plaintiffs' claim, in support of their Motion to Compel, that the extensive post-2008 transaction data they seek is in fact relevant to this multidistrict litigation.

Moreover, the **[*59]** *Tolling Decision* cabined its reservation of judgment only as to those post-2008 lingering-effects allegations for which the underlying conduct to be proven at future stages of litigation "occurred during the class period." *2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *24*. The *Decision* unambiguously held that claims of continuing harm from the conspiracy that would require proof of conduct after December 31, 2008 were time-barred. *See* *2020 U.S. Dist. LEXIS 153826, [WL] at *24-27*. Thus, plaintiffs' allegations with respect to lingering-effects damages are tolled under *American Pipe*, as applied to the facts of this multidistrict litigation in the *Tolling Decision*, only for bilateral, fixed-term contracts entered into before December 31, 2008 with an end date in 2009 or later, and for post-2008 purchases of rail-freight transportation made pursuant to similarly constrained price authorities for which all of the underlying conduct, including any relevant acts or omissions by plaintiffs, occurred prior to December 31, 2008. Allegations concerning lingering-effects damages are otherwise time-barred. This bright-line distinction provides a basis on which to draw some categorical conclusions at this time about the availability of lingering-effects damages resulting from purchases **[*60]** under price authorities other than the bilateral, fixed-term contracts with post-2008 end dates identified by the *Tolling Decision*.

a) Post-2012 Purchases

First, plaintiffs leave open the possibility that they may seek lingering-effects damages for post-2012 purchases of rail-freight transportation made under "pre-2009 contracts and price authorities in effect after 2012." Pls.' Lingering-Effects Letter at 2; *see also* May 6 Hr'g Tr. at 54:1-5. For these lingering-effects allegations to be timely under the *Tolling Decision*'s reasoning, they must allege harms resulting from contracts or other forms of price authorities entered into or in effect before January 1, 2009 with a fixed end date, agreed to at the time of creation, after 2012. Post-2012 claims resulting from purchases made under pre-2009 pricing agreements as to which a plaintiff could have avoided further transactions or mitigated harm after December 31, 2008, including by terminating the agreement or refusing to renew it, necessarily require evidence of post-2008 conduct to establish that plaintiffs paid artificially high fuel surcharges after 2012 because of the alleged 2003-2008 conspiracy. By January 1, 2009, plaintiffs were **[*61]** aware from the STB's ruling and the filing of *MDL I* that their agreements with defendants might include artificially inflated fuel surcharge terms. *See supra* Part III.A.2. Evidence concerning their decision, with that knowledge, to continue purchasing rail-freight transportation under terms set during the conspiracy period, as well as the parties' negotiations after December 31, 2008, would therefore be required to litigate the issue of causation. *See, e.g.,* *Supreme Auto Transp., LLC v. Arcelor Mittal USA, Inc., 902 F.3d 735, 743 (7th Cir. 2018)* ("Proximate causation is an essential element that plaintiffs must prove in order to succeed on any of their [antitrust] claims. The purpose of the proximate causation requirement . . . is to avoid speculative recovery by requiring a direct relation between the plaintiff's injury and the defendant's behavior." (citing *Holmes v. Sec. Inv. Prot. Corp., 503 U.S. 258, 268, 112 S. Ct. 1311, 117 L. Ed. 2d 532 (1992)*)); Defs.' Mem. L. Supp. Defs.' Mot. Recons. & Opp'n Pls.' Mot. Compel ("Defs.' Opp'n") at 17, ECF No. 561-1. Defendants further highlight that, for some multiyear agreements, the parties entered additional, related contracts during the original contract period, May 6 Hr'g Tr. at 67:4-68:11, or "a change in the relationship for the parties, like an amendment to the contract," occurred, *id.* at 68:7-8. Proof of post-2012 **[*62]** lingering effects from the 2003-2008 conspiracy under such altered agreements would likewise require inquiry into the parties' post-2008 conduct.

As to these more complicated multiyear agreements, under the *Tolling Decision*'s logic, *American Pipe* tolling of lingering effects is unavailable because the expansion of plaintiffs' factual allegations, and the concomitant expansion of the scope of discovery, encompasses conduct not litigated and evidence not sought by the putative class. *See* *Tolling Decision, 2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *24-27*. Given this restriction on tolling, and plaintiffs' representation that most of their agreements with defendants were "one-year term contracts" that, if entered in 2008, would have ended at some point in 2009, Pls.' Mem. at 3, the subset of timely post-2012 lingering-effects allegations is likely to be extremely small, if such allegations exist at all. Nonetheless, in the unlikely event that a plaintiff can show that it suffered continuing harms from purchases made pursuant to a pricing agreement entered before January 1, 2009 with an end date after December 31, 2012, as to which no proof of post-

2008 conduct by either side is needed, these post-2012 lingering-effects allegations may be tolled under **[*63]** the *Tolling Decision*. As plaintiffs "do not . . . ask the Court to order the production of data beyond 2012" in their instant Motion to Compel, Pls.' Mem. at 11 n.12; *see also* May 6 Hr'g Tr. at 54:1-5, no final determination of whether allegations for such damages will ultimately be tolled under *American Pipe* need be reached here.

b) Evergreen Contracts and Open Offers of Transportation

Next, plaintiffs' potential lingering-effects damages for post-2008 purchases of rail-freight transportation pursuant to "open offers of transportation, evergreen contracts, or other price authorities," Pls.' Lingering-Effects Letter at 2, are mostly time-barred.[6] As defendants explain, "an evergreen contract is a contract that simply renews each year unless canceled by one of the parties." May 6 Hr'g Tr. at 64:8-10. These types of price authorities typically anticipate long-term, repeat shipments. *See id.* In contrast, "open offers of transportation" are offers published by railroads on their website, via a circular, or through some other mechanism, setting out the terms under which a prospective customer may purchase rail-freight transportation. The shipper accepts the open offer by ordering a shipment **[*64]** under its terms. *See id.* at 65:5-15. Open offers are frequently used in the context of "spot moves," or situations in which a shipper has a short-term need to "mov[e] freight from point A to point B," but does not "need a formal contract or a long-term contract" because "they just want to address one shipment." *Id.* at 65:11-15. The agreement between the parties is thus fully performed upon completion of the single shipment for which the shipper accepted the open offer, and a subsequent purchase by the same shipper under the open offer constitutes a new contract rather than a continuation of the former agreement.

Under the *Tolling Decision*'s reasoning, as plaintiffs concede, *see* May 6 Hr'g Tr. at 44:13-14, allegations related to offers made and accepted after 2008, including offers presented as evergreen contracts and open offers of transportation, are time-barred. In contrast, allegations related to agreements entered into by December 31, 2008, as to which the parties' obligations continued after that date, are tolled. Plaintiffs thus may recover lingering-effects damages for purchases made pursuant to an evergreen contract that was renewed in 2008 until its expiration date one year **[*65]** later, in 2009. In such cases, as explained above, the underlying conduct at issue, of forming the 2008-2009 agreement, occurred entirely during the class period. Lingering-effects damages for purchases made until the one-year term of the evergreen contract ran, at some point in 2009, are tolled.

Allegations of lingering effects resulting from purchases made under an evergreen contract after its annual renewal in 2009 or later present a different case. Though they may include identical terms, the 2009 renewal of the agreement after the conspiracy period is a separate contract from the 2008 initiation or renewal of the agreement finalized during the conspiracy period. Allegations arising under the 2009 or later renewal of an evergreen contract therefore require inquiry into plaintiffs' decision, after December 31, 2008, not to cancel the evergreen agreement after information was publicly available about the alleged conspiracy, any conversations between the parties in relation to that choice, and defendants' motivations for leaving identical terms in place for the 2009-2010 renewal and subsequent annual terms. That conduct is not fairly encompassed by the putative class's claims and would **[*66]** require additional discovery beyond that undertaken in *MDL I*. Allegations for lingering-effects damages under evergreen contracts after the expiration of their 2008 term of renewal are therefore untimely.

A similar distinction controls the availability of lingering-effects damages for allegations of continuing harm resulting from post-2008 purchases of rail-freight transportation under open offers of transportation. Plaintiffs may pursue claims related to their open-offer purchases undertaken prior to January 1, 2009, as to which no litigation of post-

---

[6] Plaintiffs stated at the May 6, 2021 motions hearing that they "don't understand what an evergreen contract is and we don't know that we have any," May 6 Hr'g Tr. at 42:4-5, and that they are "not clear on what [an open offer of transportation] is," *id.* at 42:21. In their March 2, 2021 letter to defendants, however, plaintiffs disputed "Defendants' characterization" of open offers of transportation and evergreen contracts "as not being 'bilateral contracts,'" and "reserve[d] their rights to request any relevant data demonstrate lingering effects . . . whether based on open offers of transportation, evergreen contracts, or other price authorities," Pls' Lingering-Effects Letter at 2, suggesting that plaintiffs have some familiarity with these terms of art and have not disclaimed the possibility of recovering lingering-effects damages under these types of price authorities.

2008 conduct is necessary. Lingering-effects allegations related to open-offer purchases after that date, however, are time-barred. As explained above, each purchase of rail-freight transportation under an open offer forms a new contract. Thus, any purchase made pursuant to these price authorities after December 31, 2008 constitutes an offer and acceptance undertaken after the close of the *MDL I* class period, and related lingering-effects allegations are plainly untimely under the *Tolling Decision*'s bar on litigation of post-2008 contracts. *See* *2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *25, *26-27*. Moreover, linking these purchases, like purchases made under evergreen contracts renewed during **[*67]** the 2009 calendar year or later, to the alleged conspiracy compels litigation of both plaintiffs' post-2008 decision to buy rail-freight transportation under a possibly tainted price authority after being put on notice of defendants' potentially conspiratorial conduct and defendants' decision not to modify the terms of the open offer. These factual issues were not litigated by the putative class in *MDL I* and would call for new evidence. *American Pipe* therefore does not toll allegations of lingering effects from purchases under open offers of transportation after December 31, 2008.

c) Interline Contracts and Contracts with Nondefendant Railroads

The question of the extent to which plaintiffs may seek lingering-effects damages based on interline contracts and contracts with nondefendant railroads entered during the conspiracy period, Pls.' Lingering-Effects Letter at 3; *see* May 6 Hr'g Tr. at 45:5-11, is reserved.[7] The nature of the price authorities to which these terms refer, in the context of this dispute, remains unclear. Plaintiffs assert that they may seek lingering-effects damages under interline "contract[s] between a plaintiff and a defendant railroad," May 6 Hr'g Tr. at 45:25-46:1, **[*68]** meaning that one of the defendants negotiated the contract with a plaintiff, but at least one other railroad, either a second defendant or a nondefendant railroad, carried the plaintiffs' goods part of the way to their final destination, *see id.* at 48:15-24. This category of interline contracts was the focus of their statements at the May 6, 2021 motions hearing, but plaintiffs' March 2, 2021 letter to defendants indicated that "none of the Plaintiffs has reached a decision about whether any might seek damages under a contract with a non-Defendant railroad," and reserved their rights to do so. Pls.' Lingering-Effects Letter at 3. Plaintiffs describe these potentially relevant agreements as "contract[s] with a nondefendant railroad that ha[ve] a fuel surcharge that is an interline with a nondefendant railroad and one of the defendants." May 6 Hr'g Tr. at 49:2-4.

Defendants further complicate this picture. Their emphasis is on the status of claims and related discovery for lingering-effects damages from "[re]ceived traffic." *Id.* at 73:3. As they explain, a contract for interline rail-freight transportation involves an "originating railroad," defined as the railroad **[*69]** that moves the freight from its point of origin, *id.* at 73:4, 73:14-15, and any number of "receiving railroad[s]," *id.* at 73:4, that "receive" the traffic at some point after it leaves its point of origin en route to its final destination. A receiving railroad may complete the transportation of goods to their final destination or hand them off to another railroad. The terms of an interline agreement are "mostly set by the originating railroad," while receiving railroads "simply receive the traffic and receive revenues from it." *Id.* at 73:6-9. Thus, for interline contracts as to which defendants are receiving railroads, they are unlikely to have set the terms of the agreement, including any relevant fuel surcharge term, and may or may not be parties to it. *See id.* at 73:22-24. Depending on the particular interline contract, however, the controlling agreement with the shipper may be a either bilateral contract with the originating railroad or a three-or four-way contract to which "all of the interlining railroads," whether originating or receiving, are parties. *Id.* at 73:18; *see also id.* at 73:17-19.

The lingering effects of interline contracts with either defendant or nondefendant railroads **[*70]** entered after 2008 are, of course, time-barred under the *Tolling Decision*. As to conspiracy-period interline agreements with nondefendant railroads, beyond the immediate issue of the availability of post-2008 lingering-effects damages, no

[7] An "interline" is "[a] rail shipment involving two or more linehaul carriers," *R.R. Rules, supra*, at 58 (emphasis omitted), which are "rail carrier[s] that collect[] or receive[] revenue . . . for the movement of freight between two stations that are not located with the switch limits of each other," *id.* at 59 (emphasis omitted). An interline contract thus is a contract for a shipment from an originating destination to a final destination, as to which a railroad other than the originating railroad carries the shipment part of the way.

ruling has been reached in either *MDL I* or this multidistrict litigation as to whether the *MDL I* and *MDL II* plaintiffs may recover any damages for pre-2009 interline contracts under which one or more of the defendants was a receiving railroad, but a nondefendant railroad was the originating railroad. *See* May 6 Hr'g Tr. at 45:20-46:5.[8] The *Tolling Decision* found allegations in the challenged complaints that nondefendant railroads participated in defendants' conspiracy to be untimely because "*American Pipe* tolling does not apply to entities or individuals not named as defendants by the putative class." 2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *18 (collecting cases). It held that, "[t]o the extent that any allegations involving . . . alleged non-party co-conspirators are intended to change 'the contours of potential claims' against defendants by increasing the number of claimants to include direct purchasers of unregulated rail freight services from [nondefendant railroads] and the scope of potential **[*71]** damages claims from defendants' customers who also purchased rail freight services from [nondefendant railroads], such potential claims would be time-barred." *Id.* (quoting McCarthy, 562 F.2d at 1275); *see also* May 6 Hr'g Tr. at 45:7-11. This reasoning would, on its face, appear to deprive allegations related to interline contracts for which nondefendant railroads were the originating railroads of *American Pipe* tolling. The complexity of this issue, however, warrants resolution at a later date, with the benefit of full briefing.

In any event, resolution of the instant motions does not turn on whether allegations of lingering effects from purchases made under conspiracy-period interline contracts with nondefendant railroads are tolled. Plaintiffs confirm that they are not currently seeking transaction data after 2009 with respect to these agreements. Pls.' Lingering-Effects Letter at 3; May 6 Hr'g Tr. at 50:11-18. As to 2009 data, plaintiffs request only "that same data [on interline contracts with nondefendant railroads] . . . as was produced in *MDL I*." May 6 Hr'g Tr. at 50:16-17. Likewise, defendants' parallel offer during the parties' conferral process "to produce 2009 data for all Plaintiffs and affiliated **[*72]** entities" for the same fields produced in *MDL I*, Defs.' Opp'n at 10; *see also* Defs.' Feb. 15 Email at 2, would result in production of the same data on interline contracts with nondefendant railroads for 2009 that was included in the *MDL I* data set for 2000 to 2008. That data set "include[s] revenues from . . . [re]ceived traffic," May 6 Hr'g Tr. at 73:2-3, that is, information on transactions under interline contracts for which a nondefendant railroad was the originating railroad and at least one defendant was a receiving railroad. Under either plaintiffs' request or defendants' previous offer, then, 2009 data for nondefendant interline contracts would be produced. Thus, the appropriateness of producing 2009 transaction data for nondefendant interline contracts is not contested by the parties, and the scope of fact discovery can be refined at this time without determining the status of lingering-effects claims stemming from interline agreements involving nondefendant railroads.

* * *

In sum, plaintiffs' allegations of lingering-effects damages resulting from pre-2009 price authorities extending past 2012 are tolled only for purchases made under price authorities entered before January **[*73]** 1, 2009 with a fixed-term end date after December 31, 2012. To benefit from *American Pipe* tolling, allegations related to these purchases must not implicate post-2008 conduct by either plaintiffs or defendants, including the issue of whether plaintiffs could have ended their purchases under a challenged conspiracy-period price authority before December

---

[8] Plaintiffs assert that "the Court held at the hearing on March 26, 2021 that Plaintiffs are not foreclosed from seeking damages under price authorities issued by other railroads and said that limited discovery may be subsequently obtained if a Plaintiff seeks such damages." Pls.' Reply at 29 n.12 (citing Tr. of Disc. Dispute (Mar. 26, 2021) ("Mar. 26 Hr'g Tr.") at 65-67, ECF No. 557). No such holding was reached. The March 26, 2021 hearing concerned a request by defendants, in part, to compel production of information about fuel surcharges paid by plaintiffs to defendants' competitors during the conspiracy period. *See* Email from Luke von Houwelingen, Defs.' Counsel, to the Court (Mar. 18, 2021, 12:48 PM), at 1-2, ECF No. 556. In rejecting that request, the Court said: "To the extent that defendants intend to use information about other railroads' fuel surcharges at the damages stage to rebut particular plaintiffs' claims about the degree to which they paid more for shipping than they otherwise would have paid due to the alleged conspiracy, discovery can be reopened as to a refined set of data and contracts relevant to the damages claims of specific plaintiffs at that time." Mar. 26 Hr'g Tr. at 65:16-23. While the Court noted that "discovery can be reopened at the damages stage . . . if plaintiffs prevail on liability . . . and are seeking damages on those specific contracts" with nondefendant railroads, *id.* at 66:18-21, the request at issue sought only data from 2000-2008, not the post-2008 data requested in plaintiffs' pending motion, and the availability of damages under nondefendant contracts was not being disputed by the parties. The Court's statements at the March 26 hearing therefore did not constitute a holding on an issue not raised by the parties in relation to the dispute resolved.

31, 2012. The lingering effects of evergreen contracts are tolled only through the expiration of the 2008-2009 renewal of such contracts at some point in 2009. Lingering effects after the date of the 2009-2010 annual renewal of any evergreen contract are time-barred. Likewise, the lingering effects from purchases made under open offers of transportation published before January 1, 2009 are not tolled for purchases made after that date. Judgment is reserved as to whether plaintiffs may recover damages under interline agreements as to which a nondefendant railroad was a party. The pending motions are evaluated in light of this analysis, starting with defendants' Motion for Reconsideration.

B. Reconsideration of Availability of Lingering-Effects Damages Is Not Warranted

Defendants argue that reconsideration of "whether claims of lingering **[*74]** effects damages are time-barred" is warranted, Defs.' Opp'n at 2, based solely on representations made by plaintiffs' counsel at the February 4, 2021 status conference, described *supra* Part I.C, indicating that the putative class in *MDL I* did not pursue claims for lingering-effects damages, *see* Defs.' Opp'n at 11-19; Defs.' Reply at 2-13. In defendants' view, these statements constitute "new evidence that compels the Court to revisit its lingering effects ruling," Defs.' Opp'n at 15, because they supply proof that defendants "had no fair notice of the claims for post-2008 damages that Plaintiffs now seek to assert," as *American Pipe* tolling requires, *id.* at 16. As explained below, defendants have neither uncovered "new evidence" that makes reconsideration appropriate nor demonstrated that the *Tolling Decision* incorrectly tolled plaintiffs' lingering-effects claims.

1. *Statements by Plaintiffs' Counsel Are Not "New Evidence"*

Though the availability of new evidence is among the recognized circumstances when justice may require reconsideration, *see supra* Part II.A, the statements made by plaintiffs' counsel at the February 4, 2021 hearing do not qualify as new evidence warranting reconsideration. **[*75]** "While it is certainly true that newly-*discovered* evidence may be considered on a motion for reconsideration, a party may not rely on facts that could have been alleged in the underlying motion but were not." *Davis v. Joseph J. Magnolia, Inc., 893 F. Supp. 2d 165, 169 (D.D.C. 2012)*. Thus, "[e]ven if evidence is 'newly raised,' it is not considered 'new' evidence if it was 'previously available'" to the party seeking reconsideration. *Olson v. Clinton, 630 F. Supp. 2d 61, 63 (D.D.C. 2009)* (quoting *Schoenbohm v. FCC, 204 F.3d 243, 250, 340 U.S. App. D.C. 205 (D.C. Cir. 2000)*). As noted, defendants have been parties in *MDL I* since its inception in 2007, and therefore possess extensive firsthand knowledge of the particulars of how that case has been litigated. The premise advanced by defendants that statements made by plaintiffs' counsel at a status conference nearly fifteen years after *MDL I* began provided the first available indication that the plaintiffs in that multidistrict litigation did not pursue lingering-effects damages thus strains credulity. Defendants explain at length their belief that "the *MDL I* docket [and discovery record] provided more than ample notice to absent class members that there was no claim for damages beyond 2008 in *MDL I*," Defs.' Reply at 5; *see also id.* at 3-7, but conspicuously overlook the apparent corollary to this claim, that the *MDL I* record provided **[*76]** equally detailed and longstanding notice to defendants themselves well before the *Tolling Decision*. Plaintiffs' counsel did not provide any information previously inaccessible to defendants at the February 4 status conference; he merely restated aspects of the procedural history in *MDL I* that should have been well-known to all parties. His statements therefore do not fit the definition of "new evidence" warranting reconsideration.

In an effort to avoid this obvious conclusion, defendants attempt to reframe the relevant inquiry as whether the allegedly "new" evidence they proffer was known to the Court at the time of the *Tolling Decision*. To this end, they suggest plaintiffs made "representations that were at best misleading" with respect to the role of lingering-effects damages in *MDL I* in their briefing on the motions to dismiss and "prevailed" in the *Tolling Decision* "at least in part[] based on" these misrepresentations. Defs.' Reply at 11. The dispositive inquiry for *Rule 54* purposes is not, however, whether the reviewing court had prior knowledge of the purportedly new information, but instead whether the information was accessible to the moving party prior to the challenged decision. **[*77]** This standard prevents parties from seeking reconsideration on the basis of evidence that was or should have been in their possession at the time of the interlocutory order because "motions for reconsideration are not vehicles for either reasserting arguments previously raised and rejected by the court or presenting arguments that should have been raised previously with the court." *Lovely-Coley, 255 F. Supp. 3d at 9* (citing *Estate of Gaither ex rel. Gaither v. District of Columbia, 771 F. Supp. 2d 5, 10 & n.4 (D.D.C. 2011)*); *see also* *Cornish v. United States, 934 F. Supp. 2d 105, 109 (D.D.C. 2013)* ("[A] motion for reconsideration is not an opportunity to relitigate claims previously decided and is not a vehicle for presenting theories or arguments that could have been raised previously." (internal quotation marks and citation omitted)); *North v. United States DOJ, 17 F. Supp. 3d 1, 5 (D.D.C. 2013)* (denying a motion for reconsideration in part because "[t]he fact that Plaintiff could have made these arguments before but did not is itself a sufficient basis for the Court to reject these arguments"). Defendants were in possession of all information related to the role of lingering-effects damages in *MDL I* long before the *Tolling Decision* was issued and had ample opportunity to submit that evidence and any related arguments to the Court in their briefing on their ten motions to dismiss.

Moreover, even if defendants' suggested standard were **[*78]** the correct one, they in fact brought the "new" information on which they now rely to the Court's attention in their previous briefing.[9] Defendants may now regret that they did not pursue their argument that the putative *MDL I* class did not seek lingering-effects damages more vigorously, but they had every chance to do so. Their claim that this omission was because "[t]he primary focus of the parties' motion to dismiss briefing was the allegations of post-2008 conspiratorial conduct rather than the allegations of post-2008 lingering effects," Defs.' Reply at 12, is belied by the fact that defendants specifically argued in at least two briefs that plaintiffs' lingering-effects allegations were not tolled "under the well-established 'continuing violations' doctrine." Defs.' Reply Supp. Mot. Partial Dismissal, or in the Alternative, Mot. Strike Compls. Pls. Kawasaki & Yang Ming at 10, ECF No. 308; *see also id.* at 10-12; Defs.' Reply Supp. Mot. Dismiss Pls.' Compl. or, in the Alternative, Mot. Strike at 12-14, ECF No. 309. Defendants now recast their opposition to the tolling of lingering-effects damages as an argument rooted in *American Pipe, see* Defs.' Opp'n at 13-19; Defs.' Reply at **[*79]** 2-10, but "[w]hen a party first argues an unavailing theory . . ., and then attempts to argue an alternative or contrary position in a motion for reconsideration, this constitutes neither new evidence nor a clear error of law sufficient to support a motion for reconsideration," *Foster v. Sedgwick Claims Mgmt. Servs., Inc., 842 F.3d 721, 735, 426 U.S. App. D.C. 403 (D.C. Cir. 2016)*. Statements made by plaintiffs' counsel at a status conference nearly six months after the *Tolling Decision* was issued do not excuse defendants' failure to advance their current argument at the appropriate time or supply a reason to grant them an opportunity to relitigate the lingering-effects issue.

In addition, the *Tolling Decision* makes plain that the Court was aware at the time of that ruling that the putative *MDL I* class did not pursue post-2008 lingering-effects damages. The *Decision* enumerates a list of "novel allegations that defendants contend warrant the dismissal or striking, in whole or in part, of ten of the *MDL II* complaints," including the allegation that "defendants' conspiratorial conduct, and its effects, transpired outside of the 2003-2008 period defining the *MDL I* putative class." *2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *17*. It elsewhere contrasts the putative class's claims, asserting a class period of July 1, 2003 **[*80]** to December 31, 2008, with allegations in the challenged complaints that "the alleged conspiracy and its effects continue to the present," *2020 U.S. Dist. LEXIS 153826, [WL] at *7*, that plaintiffs "experienced continuing harm from defendants' conspiracy after 2008," and "that the conspiracy 'and/or' its effects lasted until September 30, 2012," *2020 U.S. Dist. LEXIS 153826, [WL] at *9*. In short, defendants' claim that the remarks made at the February 4 status hearing constitute new information sufficient to warrant reconsideration fails to carry their burden, as the moving party, "to show that reconsideration is appropriate." *Lovely-Coley, 255 F. Supp. 3d at 9* (internal quotation marks and citation omitted).

---

[9] *See, e.g.*, Defs.' Mem. Supp. Mot. Dismiss Pls.' Compl. or, in the Alternative, Mot. Strike at 6, ECF No. 196-1 ("Plaintiffs in *MDL I* never asserted any conspiracy or damages for the period before July 1, 2003 or after December 31, 2008."); Defs.' Reply Supp. Mot. Partial Dismissal, or in the Alternative, Mot. Strike Compls. Pls. Kawasaki & Yang Ming at 9-10 ("The putative class never amended their complaint to allege a longer conspiracy, never amended their certification request to include additional purchases beyond 2008, and never pushed to broaden the scope of discovery into post-2008 claims."), 9 n.9 ("Here, the Class Complaint clearly does not assert a claim for post-2008 damages[.]"), 10 n.11, 11, ECF No. 308; Defs.' Reply Supp. Mot. Dismiss Pls.' Compl. or, in the Alternative, Mot. Strike at 8-9 n.8, 10 n.11, 11, ECF No. 309 (similar).

2. *The* Tolling Decision *Correctly Concluded that Lingering-Effects Damages Are Tolled*

Even if defendants had demonstrated one of the recognized circumstances when justice may require reconsideration, their argument on the merits, that lingering-effects damages for pre-2009 contracts that extended beyond December 31, 2008 should be time-barred under *American Pipe* because "*MDL I* did not provide Defendants fair notice of claims for lingering effects damages after December 31, 2008," Defs.' Opp'n at 16, fails. As the *Tolling Decision* explained in detail, *American Pipe* tolls the claims of former **[*81]** putative class members that are "'predicated on the same acts'" as the conduct challenged in the original class action, "such that 'there can be no doubt that the defendants have received sufficient notice of the contours of potential claims.'" *2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *11* (quoting *McCarthy, 562 F.2d at 1275*); *see also supra* Part III.A. The putative class in *MDL I* alleged a July 1, 2003 to December 31, 2008 class period, asserting that supracompetitive fuel surcharge formulas were inserted in contracts entered during that time. *2020 U.S. Dist. LEXIS 153826, [WL] at *3-4*. Unlike allegations concerning supracompetitive fuel surcharge formulas in post-2008 contracts, which do not satisfy the criteria for tolling because they are "factually separate from the 2003-2008 conspiracy pursued by the putative class" and defendants therefore lacked fair notice that such contracts were at issue, allegations related to supracompetitive fuel surcharges paid under contracts entered between 2003 and 2008 were litigated by the putative class in *MDL I* and therefore were fairly encompassed by the putative class's claims, even though they may have resulted in lingering effects damages after the *MDL I* class period ended. *2020 U.S. Dist. LEXIS 153826, [WL] at *27*.

Defendants contend that this reasoning was erroneous because, even though the **[*82]** putative *MDL I* class litigated the very contracts for which the *Tolling Decision* found lingering-effects damages to be time-barred, *MDL I* did not provide specific "fair notice" of post-2008 damages claims. Defs.' Opp'n at 16-19; Defs.' Reply at 2-13. In making this argument, they distort the applicable law. Defendants insist that *American Pipe* tolling does not apply to claims for lingering-effects damages "because these claims were not pursued in *MDL I*." Defs.' Reply at 2. As the *Tolling Decision* emphasized, however, "claims raised by former putative class members need not be identical to those alleged by the putative class to be tolled." *2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *28* (citing *Tosti v. City of Los Angeles, 754 F.2d 1485, 1489 (9th Cir. 1985)*). Rather, "tolling . . . is appropriate so long as 'the defendant has received fair notice' through the former class action 'of the number and generic identity of the potential [plaintiffs] and their substantive claims.'" *2020 U.S. Dist. LEXIS 153826, [WL] at *11* (alteration in original) (quoting *McCarthy, 562 F.2d at 1274*). Courts determine whether this notice requirement is satisfied by "assess[ing] whether defendants' 'liability' in the former class action and the present individual action 'is predicated on the same acts,'" *id.* (quoting *McCarthy, 562 F.2d at 1275*), not whether defendants were aware of the exact form plaintiffs' **[*83]** remedy might take if they prevail at the liability stage. The *MDL I* class sought damages resulting from their payment of allegedly supracompetitive rate-based fuel surcharges because of defendants' 2003-2008 conspiracy. Viewed in light of the black-letter antitrust principle that plaintiffs "[i]n the context of a continuing conspiracy" may "recover not only those damages which [they] ha[v]e suffered at the date of accrual, but also those which [they] will suffer in the future" from the initial conspiratorial conduct, *Zenith Radio Corp., 401 U.S. at 338-39*, the putative class's claims provided more than sufficient notice to defendants of the substantive claims at issue here, of economic harm resulting directly from the alleged 2003-2008 conspiracy.

Defendants repeatedly quote the Supreme Court's admonition that tolled claims should "'concern the same evidence, memories, and witnesses as the subject matter of the original class suit,'" Defs.' Opp'n at 13 (quoting *Crown, 462 U.S. at 354-55* (Powell, J., concurring)); *see also* Defs.' Reply at 1, 2, 8, 9, pointing to plaintiffs' requests for extensive new transaction data in their pending Motion to Compel as proof that tolling lingering-effects damages does not satisfy this requirement and therefore **[*84]** prejudices defendants, *see* Defs.' Opp'n at 16-19; Defs.' Reply at 7-10. This emphasis is misplaced for two reasons.

First, in arguing that plaintiffs' lingering-effects allegations prejudice defendants, defendants rely heavily on plaintiffs' representations during the conferral process that they may seek discovery and, eventually, damages for purchases made after 2012, purchases made under evergreen contracts or open offers, and purchases made under contracts with nondefendant railroads. *See* Defs.' Opp'n at 16-17; Defs.' Reply at 9-10. These new allegations, in defendants' view, would require extensive and burdensome new discovery into post-2008 conduct, showing that they were not litigated by the putative *MDL I* class. As explained *supra* Part III.A.3, however, the majority of these novel claims of post-2008 lingering effects fall outside the scope of the lingering-effects allegations tolled under the *Tolling Decision*, and so any discovery related exclusively to proof of these claims is not relevant to this multidistrict litigation and falls outside the scope of discoverable information under *Rule 26*. The burden or prejudice to defendants that might result from substantiating these time-barred **[*85]** claims is therefore inapposite to assessing the accuracy of the *Tolling Decision*'s lingering-effects holding. As to the discovery necessary to prove plaintiffs' timely lingering-effects allegations, defendants have already accepted the burden of producing 2009 transaction data for all plaintiffs and affiliated entities both during the parties' conferral process and in their briefing of the instant Motion to Compel, *see* Defs.' Opp'n at 20-22; *infra* Part III.C, mitigating any burden this discovery may impose on defendants. Any post-2009 transaction data that may eventually be required will be limited in scope to the discovery necessary to substantiate the extremely limited set of post-2009 lingering-effects allegations that are tolled, and will therefore create only minimal burdens. Altogether, defendants' obligation to produce discovery in relation to the very cabined category of timely lingering-effects allegations falls far short of the prejudice needed to foreclose *American Pipe* tolling.

Second, the contours of the "same evidence" requirement emphasized by defendants are tied to the *American Pipe* doctrine's focus on the "substantive claims" raised by plaintiffs. *McCarthy, 562 F.2d at 1275*. This limitation **[*86]** on tolling is thus best understood as a requirement that the underlying conduct at issue in both the former class action and former putative class members' individual actions, not the specific relief sought by plaintiffs, be susceptible to proof by the same evidence. *See* *Tolling Decision, 2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *28*. Defendants do not dispute that, as the *Tolling Decision* noted, they "have now spent over a decade litigating these exact allegations [that they engaged in a 2003-2008 conspiracy to impose supracompetitive rate-based fuel surcharges] in *MDL I*" and that proof of "these overlapping allegations" of their conspiratorial conduct from 2003-2008 "involve[s] the 'same evidence, memories, and witnesses' as the putative class action." *Id.* (quoting *Am. Pipe, 414 U.S. at 562* (Blackmun, J., concurring)). The lingering effects actually tolled by the *Tolling Decision*, for purchases made after 2008 under bilateral, fixed-term contracts or other similarly restricted price authorities entered into before December 31, 2008, do not implicate discovery into any additional conduct. *See supra* Part III.A. Rather, defendants' liability for the continuing-effects claims they challenge are based on the allegation, pursued by the putative *MDL I* class, that defendants **[*87]** set artificially high rate-based fuel surcharges during the conspiracy and therefore will be proven or disproven on this same body of evidence. Given this fact, plaintiffs rightly point out that the 2009-2012 transaction data related to these purchases they seek as "new evidence" is not intended "to prove the fact of their injury," a consideration that would weigh against *American Pipe* tolling, but rather "to quantify the amount of their damages." Pls.' Reply at 18. Their request for limited post-2008 transaction data for this exclusively remedial purpose does not show that lingering-effects damages resulting from defendants' alleged conspiratorial conduct from 2003-2008 were improperly tolled.

In sum, the limited lingering-effects allegations tolled by the *Tolling Decision* were correctly found to fall within the scope of *American Pipe*'s exception to the running of the statute of limitations because they are "predicated on the same acts" and will be proven by the same evidence as the claims advanced by the putative class in *MDL I*. None of this analysis breaks new ground, because defendants seek to relitigate issues already twice decided in an attempt to compel a conclusion more to their **[*88]** liking. *See* *Tolling Decision, 2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *24-27*; *NYK Recons. Decision, 2020 U.S. Dist. LEXIS 195908, 2020 WL 6198487, at *2-3*. Defendants' renewed opposition to plaintiffs' lingering-effects allegations remains, as it was at the time of the *Tolling Decision*, "a barely-concealed attempt to limit their potential liability for plaintiffs' post-2008 damages claims for the alleged continuing effects of defendants' conspiracy at the outset of this litigation." *Tolling Decision, 2020 U.S. Dist. LEXIS 153826, 2020 WL 5016922, at *24* (internal quotation marks omitted).

Defendants' Motion for Reconsideration is denied and lingering-effects damages are tolled within the parameters set forth *supra* Part III.A. Plaintiffs' Motion to Compel the production of information to substantiate their timely lingering-effects allegations is considered next.

C. Defendants Are Required to Produce Only 2009 Transaction Data

Plaintiffs, relying on the *Tolling Decision*'s tolling of limited lingering-effects damages, move for an order compelling production of information they describe as "evidence to prove those damages," Pls.' Mem. at 4, namely: (1) the same fields of transaction data included in the *MDL I* data set for all plaintiffs, including data located by searching for entity names and spellings provided by plaintiffs, and (2) transaction data for 2010-2012 for plaintiffs who identify a **[*89]** price authority entered into or in effect on or before December 31, 2008 that they reasonably believe continued beyond 2009, with production of such data to be made "within 30 days of presentment of the price authority," Pls.' Mot. at 1. They further ask that defendants be required, by June 1, 2021, to complete production of all price authorities entered into or in effect on or before December 31, 2008 applicable to any plaintiff. Pls.' Mot. at 1; Pls.' Mem. at 5, 14-15; Pls.' Reply at 24 n.9. As explained below, in light of the *Tolling Decision*'s substantial limitations on the availability of lingering-effects damages and the significant burden of plaintiffs' request for 2010-2012 transaction data, defendants will be compelled to produce only 2009 transaction data for all plaintiffs and affiliated entities. The application of *Rule 26*'s relevancy and proportionality requirements to the information of which plaintiffs seek to compel production follows review of the interaction between the procedural history of this multidistrict litigation and the *Rule 26* factors.

1. *Relevance of Procedural History and* American Pipe *Tolling*

As the standards for plaintiffs to demonstrate relevancy and proportionality **[*90]** under *Rule 26* make clear, *see supra* Part II.B, evaluation of any discovery dispute under *Rule 26* is highly context-specific. Thus, as previously described at the March 26, 2021 hearing, *see* Mar. 26 Hr'g Tr. at 51:13-55:6, several considerations specific to the procedural posture and extensive history of this multidistrict litigation guide application of the *Rule 26* factors to requests for discovery raised by any party.

First, as explained *supra* Part I.A, this multidistrict litigation is the second multidistrict litigation pending in this District, alleging that defendants engaged in a 2003-2008 price-fixing conspiracy to impose inflated rate-based fuel surcharges. Many of these same parties have been litigating plaintiffs' claims in *MDL I* for well over a decade, and have already undertaken extensive fact and expert discovery on identical or substantially similar issues. Additional discovery requested by any party in *MDL II* that has already been produced in *MDL I* is duplicative and unduly burdensome. It therefore falls outside the scope of allowable discovery under *Rule 26* and will not be permitted. *See Fed. R. Civ. P. 26(b)(2)(C)* ("[T]he court must limit the frequency or extent of discovery . . . if it determines that: (i) the discovery **[*91]** sought is unreasonably cumulative or duplicative, or can be obtained from some other source that is more convenient, less burdensome, or less expensive."); *Dorris v. Unum Life Ins. Co. of Am., 949 F.3d 297, 307 (7th Cir. 2020)* (noting that "duplicative discovery" was "properly denied" by the lower court); *BuzzFeed, Inc., 318 F. Supp. 3d at 358*.

Second, consistent with this procedural history, when the JPML created *MDL II*, after the 2019 denial of class certification in *MDL I*, plaintiffs represented to the Panel that "all the fact discovery as to Defendants ha[d] been done" in *MDL I*, JPML Hr'g Tr. at 11:15-16, and that, as a result, any new fact discovery would be case-specific and substantially limited to individualized damages discovery. Plaintiffs thus anticipated, and accordingly informed both the JPML and the Court, that only some additional transaction data particular to specific parties would be required. *See supra* Part I.B. These statements suggest that discovery as to defendants' liability, which is not case-specific, was completed in *MDL I*, and that any allowable new discovery should presumably be limited to the issue of plaintiffs' damages claims. Moreover, the scope of additional discovery outlined by plaintiffs aligns with the principles of *American Pipe* tolling. *See supra* Part **[*92]** I.A, Part III.A. To the extent that new discovery is required to establish defendants' liability, rather than to quantify plaintiffs' damages, the need for that discovery strongly suggests that the *MDL II* plaintiffs seek to litigate conduct that was not at issue in *MDL I* and lacks a sufficient factual nexus with the claims pursued by the putative class in that case. Consequently, the related allegations are likely time-barred.

Finally, assessment of any request for additional discovery is colored by the background fact that the *MDL II* plaintiffs' claims would have been untimely in their entirety if class certification in *MDL I* had not been denied. *See supra* Part I.A. Although the statute of limitations has been tolled for the majority of the *MDL II* plaintiffs' claims, the policies underlying statutes of limitations and *American Pipe*'s exception to the running of the statute of limitations, outlined *supra* Part III.A.2, inform evaluation of discovery disputes. As relevant to the resolution of such disputes, it bears repeating that, to promote the goals of statutes of limitations, *American Pipe* tolling is available only in individual actions concerning "the same evidence, memories, and **[*93]** witnesses as the subject matter of the original class suit." *Am. Pipe, 414 U.S. at 562* (Blackmun, J., concurring). When these requirements are satisfied, a defendant is "on notice as to the content of the claims against it and the set of potential plaintiffs who might assert those claims," and the purposes of the statute of limitations are thus met even though the claims are facially untimely. *Calif. Pub. Emps.' Ret. Sys., 137 S. Ct. at 2053*. At the same time, this restriction on the availability of tolling weighs heavily against allowing additional discovery in individual actions that was not produced in the original class suit, even if the additional discovery is sought in relation to tolled claims.

Against the backdrop of these three considerations contextualizing fact discovery in *MDL II*, requests from either side for additional discovery not produced in *MDL I* must overcome a very high hurdle of relevancy, probativeness of claims and defenses, and proportionality, in light of the extensive discovery already produced in *MDL I* and the presumption that an otherwise-untimely individual action that stands on the shoulders of a former class action through *American Pipe* tolling will rely on the "same evidence" as the original suit. This framework guides application **[*94]** of the *Rule 26* factors to the requests set forth in plaintiffs' Motion to Compel.

2. *Agreed-Upon Production of 2009 Transaction Data for All Plaintiffs Is Relevant and Proportional*

First, plaintiffs ask that defendants be compelled to "produce the same fields of transaction data for 2009 that they produced in [*MDL I*] for all Plaintiffs [and affiliated entities], and to search the data for entity names and spellings provided by Plaintiffs." Pls.' Mot. at 1.[10] In their view, this data is relevant "because many price authorities that were entered into or issued at the end of the conspiracy period in 2008 would have continued in effect into 2009." Pls.' Mem. at 8. Thus, transaction data for 2009 "will enable Plaintiffs to determine whether there were any lingering effects of Defendants' conspiracy" in that year and, in turn, to both establish their damages for purchases made in 2009 and determine which plaintiffs "can identify a price authority entered or in effect during the conspiracy period that continued in effect after 2009." *Id.* Plaintiffs further contend that their request for the blanket production of 2009 transaction data is proportional because the burden of collecting data for all plaintiffs **[*95]** and affiliated entities is lower than the burden imposed on both sides by an alternative approach, originally suggested by defendants, under which data is produced only for plaintiffs who can demonstrate that an applicable conspiracy-period price authority continued into 2009. *Id.* at 11; *see also* Pls.' Reply at 28. In addition, plaintiffs "believe that many of the price authorities did not continue beyond 2009," such that the 2009 data will be sufficient to fully establish lingering-effects damages for most plaintiffs. Pls.' Mem. at 11. Defendants claim that "the vast majority of Plaintiffs have not alleged they suffered lingering effects damages beyond 2008 and post-2008 data for those Plaintiffs is therefore irrelevant," but otherwise do not contest any of this analysis. Defs.' Opp'n at 25; *see also id.* at 20-28. They in fact remain willing "to produce 2009 transactional data for all Plaintiffs and affiliated entities" named in plaintiffs' interrogatory responses, *id.* at 1; *see also id.* at 20-22; May 6 Hr'g Tr. at 61:5-63:2, as they previously offered during the parties' most recent conferral process, *see supra* Part I.C.

The 2009 transaction data sought by plaintiffs is both relevant **[*96]** and proportional, as the parties' consensus around production of this information confirms. As explained *supra* Part III.A, plaintiffs may pursue claims for lingering-effects damages related to conspiracy-period price authorities that continued past December 31, 2008 for which no litigation of post-2008 conduct is required. Plaintiffs represent that most of their agreements with

---

[10] Plaintiffs argue that searches for entity names and spellings proposed by plaintiffs are necessary "to ensure that the search covers the names of entities recently identified by Plaintiffs in Interrogatory responses and the different spellings of Plaintiffs' names found in the MDL I data." Pls.' Mem. at 10-11 n.11. Defendants do not object to that component of plaintiffs' request for 2009 transaction data. *See* May 6 Hr'g Tr. at 61:5-63:2.

defendants were "one-year term contracts" that, if entered in 2008, would have ended at some point in 2009. Pls.' Mem. at 3; Pls.' Reply at 34. The 2009 transaction data is clearly relevant to establishing lingering-effects damages from these price authorities, and, as plaintiffs submit, to identifying the price authorities, if any, pursuant to which plaintiffs might seek post-2009 lingering-effects damages despite the restrictions set forth *supra* Part III.A.3. *See, e.g., Eagle Railcar Servs.-Roscoe v. NGL Crude Logistics, LLC, No. 1:16-CV-0153-BL, 2018 U.S. Dist. LEXIS 85415, 2018 WL 2317696, at *18 (N.D. Tex. May 22, 2018)* ("Discovery about recoverable damages stemming from asserted claims is undoubtedly relevant and thus discoverable so long as the requested discovery is proportional."); *In re Domestic Drywall Antitrust Litig., MDL No. 13-2437, Civ. A. No. 15-cv-1712, 2018 U.S. Dist. LEXIS 82956, 2018 WL 2184391, at *1 (E.D. Pa. May 10, 2018)* ("An important part of an antitrust case is the Plaintiffs' burden of proving the 'fact of injury'—that the illegal conduct resulted in damages, and providing discovery relevant **[*97]** on the amount of damages claimed.").

For similar reasons, production of the 2009 transaction data for all plaintiffs and affiliated entities is proportional. This data was not produced in *MDL I, see supra* Part I.C, and therefore is neither cumulative nor duplicative. Although plaintiffs ought to have much of the data sought in their possession, they represent that their records are lacking due to "the passage of time," Pls.' Mem. at 1, such that defendants' records are the most convenient and least burdensome source of this information. The remaining *Rule 26(b)* factors likewise favor production. *See Fed. R. Civ. P. 26(b)*; *BuzzFeed Inc., 318 F. Supp. 3d at 358*; *supra* Part II.B. Consideration of damages is, of course, somewhat premature at this stage of litigation, before defendants' liability for the alleged conspiracy has been established, and is secondary in importance to that ultimate issue. In addition, relative to the overall amount in controversy in this multidistrict litigation, lingering effects are likely only a small portion of the recovery plaintiffs seek. Lingering-effects damages for 2009 purchases, however, represent the bulk of the tolled post-2008 damages claims for which plaintiffs may seek recovery, *see supra* Part III.A, and, according **[*98]** to plaintiffs, the 2009 transaction data will fully capture most plaintiffs' lingering-effects damages, *see* May 6 Hr'g Tr. at 29:2-5; Pls.' Reply at 34. The requested information will therefore help to establish the majority of plaintiffs' claims in this category, and is in fact critical to plaintiffs' ability to do so. Moreover, that defendants have access to their records related to all plaintiffs for 2009 and have already undertaken significant efforts to collect and produce this same data for 2000-2008 suggests that they have both greater access to the relative information and the resources in place to process it.

Crucially, defendants do not object to the potential burden of conducting searches to identify all transaction data associated with any plaintiffs and any affiliated entity. Though less burdensome alternatives for defendants are available and might be feasible—for example, the production of transaction data for all shippers with any searches to be conducted by plaintiffs on their own—defendants have expressed a preference for the seemingly more onerous proposal to them of limiting production to plaintiff-specific data. *See* Defs.' Opp'n at 20-22; May 6 Hr'g Tr. at 60:21-63:2. **[*99]** They will be required to make good on this offer, and are ordered to promptly produce 2009 transaction data for the same fields produced in *MDL I* for all plaintiffs and affiliated entities identified by plaintiffs in their responses to defendants' interrogatories, and to search the data for entity names and spellings provided by plaintiffs.

3. *Production of 2010-2012 Transaction Data Is Not Proportional at This Stage of Litigation*

Plaintiffs next seek "[transaction] data from 2010 to 2012 for Plaintiffs who identify a price authority entered into or in effect on or before December 31, 2008 that they reasonably believe continued beyond 2009." Pls.' Mot. at 1. They contend that "[d]ata for 2010-2012 is just as relevant and just as proportionate for Plaintiffs with conspiracy period contracts that continued after 2009," Pls.' Reply at 25, as the 2009 transaction data defendants offered to produce and that "Defendants identify no particular burdens of producing this information that would outweigh its importance to the case, nor do they identify any other factor . . . that would suggest this request is anything but proportionate and reasonable," *id.* at 25-26; *see also id.* at 25-30, 33-36. **[*100]** Defendants, for their part, note that, for most plaintiffs, "Plaintiffs admit that there is no reason to believe they would need any data beyond the 2009 data offered by Defendants," Defs.' Opp'n at 25, and therefore no factual nexus between most 2010-2012 transaction data and the claims alleged by the putative *MDL I* class exists, such that the requested information is irrelevant. On the basis of this assumption, defendants argue that "requiring [them] to produce irrelevant data . . . relating to contracts or other price authorities that could not support . . . a [lingering-effects] claim[] creates an enormous and expensive burden on Defendants." *Id.* at 26. Thus, in their view, the requested transaction data falls outside the scope of discoverable information under *Rule 26* because it is disproportionate. *See id.* at 25-28.

Defendants' relevancy argument sweeps too broadly. The *Tolling Decision* leaves open the possibility, however unlikely, that some plaintiffs may be able to demonstrate that they suffered lingering effects after 2009 from a price authority, which was entered into or took effect during the alleged 2003-2008 conspiracy, such that their lingering-effects allegations would be tolled. **[*101]** *See supra* Part III.A.3. Though, as defendants claim, plaintiffs repeatedly emphasize that most of their lingering-effects damages claims will be confined to 2009, *see* Pls.' Mem. at 2-3, 8-9; Pls.' Reply at 34-35; May 6 Hr'g Tr. at 29:2-5, to the extent that any plaintiff can successfully show that purchases made under a conspiracy-period price authority extended past 2009 and do not necessitate litigation of post-2008 conduct, lingering-effects damages for 2010-2012 may be available. For the extremely limited number of plaintiffs who can make this threshold showing that their post-2009 lingering-effects allegations satisfy the requirements of *American Pipe*, 2010-2012 transaction data would therefore be relevant to establishing their damages. Moreover, plaintiffs' request for 2010-2012 transaction data, seeking such information only for plaintiffs who can "identify a price authority entered into or in effect on or before December 31, 2008 that they reasonably believe continued beyond 2009," Pls.' Mot. at 1, is appropriately tailored to require production only of relevant information.

Nonetheless, plaintiffs' request is not proportional. In arguing that the *Rule 26(b)* factors tilt in their favor, **[*102]** plaintiffs contend that discovery of 2010-2012 transaction data "goes to a central issue in cases with billions of dollars in damages on the line." Pls.' Reply at 26. Their characterization overstates the importance of lingering-effects damages, and particularly of post-2009 lingering-effects damages, in the context of this multidistrict litigation as a whole. The central issue in the case is whether defendants in fact engaged in a price-fixing conspiracy from 2003-2008 to artificially increase the cost of rail-freight transportation through the imposition of rate-based fuel surcharges. The requested information is not at all connected to this essential question of defendants' liability, which has yet to be decided in either *MDL I* or *MDL II*. The 2010-2012 transaction data may be important to the issue of establishing certain plaintiffs' full damages, but only if plaintiffs successfully carry their burden of proof at summary judgment or trial will their damages need to be quantified. The requested 2010-2012 transaction data does not even relate to the core of plaintiffs' potential recovery, their damages for alleged harms incurred during the 2003-2008 conspiracy period. Further indicating **[*103]** the peripheral nature of this issue, plaintiffs themselves state that only a small minority of their number might be able to pursue claims for post-2009 lingering-effects damages. *See* Pls.' Mem. at 11-12; May 6 Hr'g Tr. at 29:2-5. The importance of plaintiffs' 2010-2012 lingering-effects allegations to *MDL II* overall is minimal, at best. Relatedly, potential recovery from these claims will necessarily constitute a relatively small portion of the total amount in controversy.

Unsurprisingly, in light of the foregoing analysis, the burden of plaintiffs' request for 2010-2012 transaction data outweighs its likely benefit. The data sought is not duplicative, but in the context of *MDL II*, the fact that this information was not produced in *MDL I*, in combination with the attenuated relationship between plaintiffs' central allegations and the post-2009 lingering-effects allegations the data is meant to substantiate, indicates that the benefit of compelling production is relatively low, at least at the liability stage. Plaintiffs protest that allowing defendants to withhold 2010-2012 transaction data is tantamount to allowing them "to evade liability for lingering effects damages after 2009, **[*104]** even though . . . legitimate post-2009 damages may exist." Pls.' Reply. at 28. This risk is mitigated by defendants' obligation to produce both 2009 transaction data and, as discussed below, applicable conspiracy-period price authorities. As plaintiffs concede, they can use these two sources of information to identify both the conspiracy-period price authorities that they believe continued past 2009 and the plaintiffs who they believe purchased rail-freight transportation under the price authorities. *See* Pls.' Reply at 33-34; May 6 Hr'g Tr. at 38:7-12. These inferences will allow plaintiffs to evaluate now, at the liability stage, which of them has a reasonable basis on which to assert post-2009 lingering-effects damages claims. Before defendants' responsibility for plaintiffs' alleged economic harms is established at summary judgment or trial, the additional benefit offered by production of 2010-2012 transaction data to quantify plaintiffs' potential post-2009 damages is of little utility.

On the other side of the equation, defendants assert that "the discovery stemming from Plaintiffs' lingering effects allegations would be significant," necessitating "additional related productions, **[*105]** expert reports and depositions, and likely fact depositions as well, all of which would likely take months to complete." Defs.' Opp'n at 18; *see also id.* at 26. They further contend that, if they are required to produce 2009 transaction data for all plaintiffs, they should not "also be required to engage with Plaintiffs in a contract-by-contract analysis of whether Plaintiffs[] can have additional data from 2010 to 2012—and possibly beyond." *Id.* at 21. The burden to defendants of producing 2009 transaction data for all plaintiffs, though appropriately imposed under *Rule 26*, is substantial. They correctly anticipate the expansion of both fact and expert discovery, as well as additional obligations on their part to carry out further searches on their data to facilitate production. Granting plaintiffs' request for still more plaintiff-specific transaction data outside the conspiracy period would only exacerbate the burden, in exchange for slight gains.

Indeed, plaintiffs previously condemned the process they now suggest for the production of post-2009 transaction data, under which plaintiffs would proffer an applicable conspiracy-period price authority that they believe continued in effect after **[*106]** 2009, as "enormously burdensome," Disc. Dispute Email at 2, "unworkable and inefficient," and likely to lead to numerous "small disputes at this discovery stage over the proper categorization of Defendants' price authorities," *id.* at 3. Plaintiffs now argue that undertaking this procedure with the benefit of complete production of price authorities will "avoid the inevitable squabbling and time-consuming inefficiency" surrounding the issue of "whether a particular price authority that could give rise to lingering effects damages." Pls.' Reply at 35. As previously explained, however, a number of unresolved questions about the timeliness of post-2009 lingering-effects damages claims remain. *See supra* Part III.A.3. Though plaintiffs' model may restrict the squabbling and inefficiency to a narrower set of price authorities, the risk of time-consuming and burdensome disputes stemming from the implementation of this proposal is substantial. These considerations clearly show that the burden of plaintiffs' request for 2010-2012 transaction data outweigh the benefits.

The remaining *Rule 26(b)* factors weigh in plaintiffs' favor. As to the parties' relative access to relevant information and resources, **[*107]** and the availability of the requested information from another source, including plaintiffs' own files, plaintiffs claim that "they do not have access to Defendants' data and that their own data (if they still have it) is not a substitute for Defendants' data" in terms of its completeness. Pls.' Reply at 26-27. Similarly, as to the importance of the discovery in resolving the issue of lingering-effects damages, the parties do not dispute that 2010-2012 transaction data would be necessary to quantify any timely 2010-2012 lingering-effects damages. These factors, however, are not sufficient to overcome either the minimal relevance and importance of the requested information or the significant burdens of production, particularly in light of the heightened showing of relevancy and proportionality necessary in this multidistrict litigation to compel the production of discovery that was not produced in *MDL I. See supra* Part III.C.1. Should plaintiffs prevail at the liability stage, the relevance of post-2009 transaction data will increase, as will the centrality of 2010-2012 lingering-effects allegations to the outstanding issue of quantifying their damages. Accordingly, if the parties reach **[*108]** the damages stage, discovery may be reopened on a limited basis to allow plaintiffs to seek information to substantiate their claims for post-2009 lingering-effects damages.

In short, the limited relevance of the requested post-2009 data to only a tiny subset of a handful of plaintiffs' claims, the fact that these claims are divorced from the central issue of defendants' liability, the burden to defendants of collecting and producing the requested information, and the possibility of reopening discovery as to 2010-2012 lingering-effects allegations if plaintiffs prove their claims and this multidistrict litigation advances to the damages stage all counsel against compelling the production of 2010-2012 transaction data at this time. The requested information, though potentially relevant, is disproportionate to the needs of the litigation at this stage. Defendants therefore will not be required to produce any 2010-2012 transaction data.

4. *Defendants Will Not Be Compelled to Produce Price Authorities by June 1, 2021*

Finally, plaintiffs "seek an order requiring Defendants to substantially complete the production of [conspiracy-period] price authorities" by June 1, 2021. Pls.' Mem. at 14; **[*109]** *see also* Pls.' Mot. at 1; Pls.' Reply at 24 n.9. They contend that this expedited production order is warranted "because Plaintiffs need the price authorities" to establish that they bought rail-freight transportation from defendants after 2009 pursuant to a conspiracy-period price authority "under . . . [their] proposal for [the compelled production of] data after 2009." Pls.' Mem. at 14. In opposing this request, defendants emphasize that they "have spent the last several months searching for and producing approximately 2,800,000 pages of contracts and rate authorities to Plaintiffs, on top of the millions of pages of documents Defendants previously produced in *MDL I*, which Defendants have provided to Plaintiffs at their request." Defs.' Opp'n at 27. They do not, however, contest their obligation under *Rule 26* to produce the applicable conspiracy-period price authorities. *See* May 6 Hr'g Tr. at 74:16-84:7.

At the May 6, 2021 motions hearing, defendants described the productions of conspiracy-period price authorities they have so far made to plaintiffs and their anticipated timeline to complete production.[11] Norfolk Southern Railway indicated that it had produced all contracts and price authorities **[*110]** for all shippers from 2001-2008, May 6 Hr'g Tr. at 58:2-11, 58:15-21, 75:2-5, and "supplement[ed]" that production "with additional hard copy documents" totaling "over 100,000 pages," *id.* at 59:18-20. It expected to make its last supplemental production on May 6, 2021. *Id.* at 59:20-22. BNSF Railway stated that it was, as of May 6, "substantially complete in producing [its] contracts." *Id.* at 75:16-17. CSX Transportation said that its "contracts and price authority production" would likely be complete "within a week or so" of the May 6 hearing. *Id.* at 76:20-23. All three of these defendants noted that additional productions might be necessary due to difficulties locating interline price authorities with nondefendant railroads, steel mill contracts, and documents related to recently added plaintiffs, but stated that, even with these possible outliers, their productions could be completed by June 1, 2021. *See id.* at 75:17-76:13, 76:20-23, 83:8-21, 83:23-84:7. Union Pacific Railroad's production of contracts and price authorities significantly lags behind its codefendants, but the company still intends to complete its productions by June 30, 2021. *Id.* at 82:24-25. In light of these representations, **[*111]** defendants will not be compelled to complete production of price authorities by June 1, 2021. They are nonetheless expected to make every good-faith effort to produce all applicable price authorities to plaintiffs promptly, consistent with their representations to the Court.

IV. CONCLUSION

For the foregoing reasons, defendants' Motion for Reconsideration is denied and plaintiffs' Motion to Compel is granted in part and denied in part. Defendants are required to produce the same fields of transaction data for 2009 that they produced in *MDL I* for all plaintiffs and the affiliated entities plaintiffs identified in their answers to defendants' interrogatories, and to search the data for entity names and spellings provided by plaintiffs. Defendants will not, however, be compelled to produce any transaction data for 2010-2012 at this time, nor to complete the production of price authorities applicable to plaintiffs by June 1, 2021, in light of defendants' representations at the May 6, 2021 hearing that they will complete such production in the coming weeks.

An order consistent with this Memorandum Opinion will be entered contemporaneously.

Date: May 12, 2021

BERYL A. HOWELL

---

[11] Plaintiffs explain at length their belief that "Defendants have delayed producing the price authorities Plaintiffs need." Pls.' Mem. at 15; *see also id.* at 2, 14-16; Pls.' Reply at 30-33; Jaffe Decl. ¶¶ 13-19. They emphasize in particular defendant Union Pacific Railroad's failure to produce any contracts or price authorities until April 7, 2021, and question Union Pacific's representations that it lacked a central pricing database that would have facilitated speedier production. *See* Pls.' Reply at 32-33; Decl. of Daniel M. Jaffe Supp. Pls.' Mem. P. & A. Opp'n Defs.' Mot. Recons. & Reply Supp. Mot. Compel Produc. Post-2008 Transaction Data & Price Authorities ¶¶ 7-18, ECF No. 612-2; May 6 Hr'g Tr. at 54:16-55:22, 87:11-88:6. Defendants, unsurprisingly, challenge this characterization of their efforts to date. *See* Defs.' Opp'n at 26-28; May 6 Hr'g Tr. at 74:16-84:7. In light of defendants' statements at the May 6, 2021 hearing that their productions of price authorities will be substantially complete by June 30, 2021 at the latest, *see* May 6 Hr'g Tr. at 82:24-25, 83:3-21, 83:23-84:7, this dispute need not be resolved.

Chief Judge

ORDER

Upon consideration of the plaintiffs' Motion to Compel, ECF No. 543, the defendants' Motion for Reconsideration, ECF No. 561, the memoranda, declarations, and exhibits submitted in support and opposition, the arguments presented at the motions hearing held on May 6, 2021, and the entire record therein, for the reasons stated in the accompanying Memorandum Opinion issued contemporaneously with this Order, it is hereby

ORDERED that defendants' Motion for Reconsideration, ECF No. 561, is DENIED; and it is further

ORDERED that plaintiffs' Motion to Compel, ECF No. 543, is GRANTED IN PART AND DENIED IN PART; and it is further

ORDERED that plaintiffs' Motion to Compel is GRANTED with respect to the production of 2009 transaction data for all plaintiffs and affiliated entities. Defendants shall promptly produce the same fields of transaction data for 2009 that were produced in *In re Rail Freight Fuel Surcharge Antitrust Litigation*, MDL No. 1869, No. 07-mc-00489-PLF-GMH (D.D.C.), for all plaintiffs and the affiliated entities plaintiffs identified in their answers to defendants' interrogatories. They are instructed to search the data for entity names and spellings **[*113]** provided by plaintiffs; and it is further

ORDERED that plaintiffs' Motion to Compel is otherwise DENIED.

SO ORDERED.

Date: May 12, 2021

Opinion

MEMORANDUM

Schiller, J.

Winn-Dixie has accused the Eastern Mushroom Marketing Cooperative, its members, and various affiliates of unlawfully colluding to inflate the price of fresh agaricus mushrooms. The instant motion, however, does not deal with whether antitrust laws **[*3]** were violated. Instead, it asks whether Winn-Dixie can maintain an action for antitrust damages against Defendants based on its purchase of mushrooms from a non-party. Defendants[1] move for partial summary judgment arguing that Winn-Dixie was not a direct purchaser from Defendants for a portion of the claimed conspiracy period, and therefore, it lacks antitrust standing to pursue some of its claims for damages. For the following reasons, the Court will deny the motion.

I. FACTUAL BACKGROUND

This case is one of a related series of actions dealing with alleged price fixing and collusion in the market for fresh agaricus mushrooms. In February 2006, WM Rosenstein & Sons Co. filed a class action complaint alleging that various players in the mushroom industry colluded to inflate the price of mushrooms by agreeing on minimum prices and by decommissioning various mushroom farms in order to reduce mushroom supply. That complaint was later consolidated with six similar class actions, and a consolidated class action complaint was filed on November 13, 2007. Winn-Dixie, along with co-plaintiff Bi-Lo, opted out of the class action and initiated this action in 2015. Plaintiffs' Complaint was similar **[*4]** in all meaningful respects to the class action complaint that preceded it. Plaintiffs' First Amended Complaint, filed in January 2019, asserts claims pursuant to the *Sherman Act* and *Clayton Act* and alleges that Winn-Dixie "purchased Agaricus mushrooms directly from one or more Defendants." (First Am. Compl. ¶ 18.)

---

[1] The motion was filed by Eastern Mushroom Marketing Cooperative, Inc. (EMMC); Robert A. Feranto, Jr., t/a Bella Mushroom Farms; Brownstone Mushroom Farms, Inc.; To-Jo Fresh Mushrooms, Inc.; Country Fresh Mushroom Co.; Gino Gaspari & Sons, Inc.; Kaolin Mushroom Farms, Inc.; South Mill Mushroom Sales, Inc.; Modern Mushroom Farms, Inc.; Sher-rockee Mushroom Farm, LLC; C&C Carriage Mushroom Co.; Oakshire Mushroom Farm, Inc.; Phillips Mushroom Farms, Inc.; Louis M. Marson, Jr., Inc.; Monterey Mushrooms, Inc.; John Pia; and Forrest Mushrooms (collectively, "Certain Defendants"), Giorgi Mushroom Co.; Giorgio Foods, Inc.; and Franklin Organic Mushrooms, Inc. (f/k/a Franklin Farms, Inc.). While the motion was pending, claims against Franklin Organic Mushrooms, Inc. (f/k/a Franklin Farms, Inc.) were dismissed with prejudice.

Now before this Court is Defendants' motion for partial summary judgment against Winn-Dixie, which argues that Winn-Dixie cannot maintain an action for antitrust damages during a portion of the alleged conspiracy period because it did not purchase mushrooms directly from an alleged conspirator. Defendants argue that from late 2004 through 2010, Winn-Dixie purchased mushrooms from Oakshire Mushroom Sales, LLC (OMS), which is not a party to this action and was not a member of the alleged conspiracy, thereby rendering Winn-Dixie an indirect purchaser.

In support of this argument, Defendants present the Certification of Gary Schroeder, sole shareholder and President of both OMS and Defendant Oakshire Mushroom Farm, Inc. (OMF). (Ex. A to Defs.' Mot. for Summ. J. [Schroeder Cert.] ¶ 1.) Schroeder states that OMF was incorporated in 1985 for the purpose of growing, packaging, and **[*5]** selling specialty mushrooms. (*Id.* ¶ 3.) In 2001, OMF joined the EMMC, and Schroeder was also elected Treasurer of the EMMC. (*Id.*) OMS was formed in 2002 to market and sell mushrooms under the brand name "Dole." (*Id.* ¶ 4.) OMS "kept separate books and records from OMF," but "the two companies shared some common employees and used a common ordering system." (*Id.* ¶ 10.)

OMS began selling mushrooms to Winn-Dixie in 2004. (*Id.* ¶ 6.) Schroeder states that OMS purchased all of the mushrooms that it resold to Winn-Dixie either from OMF "at prices that included the packaging and delivery costs[,]" or from South Mill Mushrooms and Country Fresh Mushrooms "at negotiated prices which included the packaging and delivery costs." (*Id.* ¶ 8.) Schroeder states the prices negotiated between OMS and Winn-Dixie "were not affected or influenced by any rule, regulation or program adopted by the EMMC." (*Id.* ¶ 7.) Schroeder states that OMS did not offer or attempt to join the EMMC, nor did Schroeder ever agree "that OMS would follow any of the rules[,] regulations or pricing policies adopted by the EMMC." (*Id.* ¶ 5.)

Defendants present two supply agreements between Winn-Dixie and OMS that were signed in 2005 **[*6]** and 2007. (*Id.* ¶ 6; Exs. A-B to Schroeder Cert.) Winn-Dixie does not dispute that it entered into a two-year supply agreement in 2005 and a three-year supply agreement in 2007 to purchase mushrooms "from the Oakshire companies, including OMS." (Pl.'s Resp. to Defs.' Statement of Undisputed Material Facts at 33, 35.) However, Plaintiff disputes that these agreements were solely between Winn-Dixie and OMS, because it states that OMS "was acting on behalf of its affiliated and commonly owned and controlled sister company, OMF." (*Id.*)

Plaintiff contends that genuine issues of material fact exist as to whether Winn-Dixie was an indirect purchaser and whether OMS was owned or controlled by OMF. In opposition to Defendants' motion for partial summary judgment, Plaintiff submits the class action deposition testimony of Gary Schroeder (Pl.'s Ex. 1 [Schroeder Tr.]), and Kirk Reichert, who was the controller for OMF. (*See* Pl.'s Statement of Undisputed Mat. Facts in Opp. to Defs.' Mot. [Pl.'s SUMF] ¶ 4; Pl.'s Ex. 4 [Reichert Tr.].) In further support, Winn-Dixie presents the deposition testimony of representatives of several other EMMC members, as well as the EMMC Membership Agreement signed by **[*7]** Gary Schroeder, sales data from OMS, and analysis of its expert Dr. Keith Leffler. (*See* Pl.'s Ex. 5, 8, 11-14, 16-17.)

II. STANDARD OF REVIEW

Summary judgment is appropriate when admissible evidence fails to demonstrate a genuine dispute of material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(a)*, *56(c)*; *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 247-48, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986)*. Material facts are those "that could affect the outcome" of the proceeding, and "a dispute about a material fact is 'genuine' if the evidence is sufficient to permit a reasonable jury to return a verdict for the non-moving party." *Lamont v. New Jersey, 637 F.3d 177, 181 (3d Cir. 2011)*. Evidentiary matter in support of the motion must establish the absence of a genuine dispute of material fact; if it does not, the motion will be denied, even if no opposing evidentiary matter is presented, because "a response is not essential to defeat a motion that does not satisfy the movant's initial burden." *Maldonado v. Ramirez, 757 F.2d 48, 50 (3d Cir. 1985)* (citing *Adickes v. S.H. Kress & Co., 398 U.S. 144, 160-61, 90 S. Ct. 1598, 26 L. Ed. 2d 142 (1970)*). In reviewing the record, "a court must view the facts in the light most favorable to the nonmoving party and draw all inferences in that party's favor." *Armbruster v. Unisys Corp., 32 F.3d 768, 777 (3d Cir. 1994)*. A court may not, however, make credibility determinations or weigh the evidence in considering motions for summary judgment. *Anderson, 477 U.S. at 255*.

III. DISCUSSION

The question raised by **[*8]** Defendants' motion for partial summary judgment is whether Winn-Dixie can bring an action for antitrust damages for its purchases of mushrooms from non-party OMS. As a threshold matter, the Court will consider and deny Plaintiff's request to strike the Certification of Gary Schroeder. Defendants' motion relies entirely on the Schroeder Certification and its accompanying exhibits, so the Court must first determine whether it may consider this Certification before it can assess Defendants' motion. Then the Court will turn to the merits of Defendants' motion for partial summary judgment.

A. Plaintiff's Request to Strike the Schroeder Certification

Plaintiff makes two distinct arguments to exclude the Schroeder Certification offered in support of Defendants' motion. First, Plaintiff argues that the Certification does not meet the requirements of *28 U.S.C. § 1746* or *Rule 56(c)(4)*. Second, because OMS and OMF are in bankruptcy, Plaintiff argues that the Schroeder Certification violated the automatic stay of the bankruptcy court. The Court rejects both of these arguments.

1. Compliance with 28 U.S.C. § 1746 and Rule 56(c)(4)

An unsworn statement can support a motion for summary judgment to the same extent as a sworn affidavit as long as the statement **[*9]** is made under penalty of perjury. *United States ex rel. Doe v. Heart Sol., PC, 923 F.3d 308, 315 (3d Cir. 2019)*; *Fed. R. Civ. P. 56(c)(4)* cmt. on 2010 amdts. (citing *28 U.S.C. § 1746*).

The Schroeder Certification concludes with the statement:

> "The foregoing statements made by me are true and correct to the best of my knowledge, information and belief. I am aware that if any statement made by me is intentionally false, I am subject to punishment under the perjury and false statement laws of the Commonwealth of Pennsylvania or the United States."

(Schroeder Cert.) Plaintiff argues the Certification should be excluded because it does not substantially comply with *28 U.S.C. § 1746*, which requires that an unsworn certification is verified as true and correct under penalty of perjury. Plaintiff argues that Schroder's qualifiers that the statement is true and correct "to the best of [his] knowledge, information and belief[,]" and that Schroeder is subject to perjury only if any statement is "intentionally false," render the Certification non-compliant. (Pl.'s Resp. in Opp. to Defs.' Motion [Pl.'s Resp.] at 46-48.)

The Court finds that Schroeder's Certification substantially complies with the requirements of *28 U.S.C. § 1746*. A declarant is guilty of federal perjury when he "willfully subscribes as true any material matter which he does not **[*10]** believe to be true[.]" *18 U.S.C. § 1621(2)*. Schroeder's certification that his "intentionally false" statements are subject to punishment under perjury laws does not diminish the penalty of federal perjury, and therefore substantially complies with *28 U.S.C. § 1746*.

Schroeder's statement that the entire Certification is true and correct "to the best of [his] knowledge, information and belief[,]" also does not require its exclusion. "[W]hen affidavits based on knowledge and belief are submitted to support or oppose a motion for summary judgment, the district court has discretion to determine whether it can differentiate between knowledge and belief for each averment in the affidavit." *Ondo v. City of Cleveland, 795 F.3d 597, 605 (6th Cir. 2015)*. A party's inclusion of improper language in an affidavit's declaration of personal knowledge does not invalidate the entire contents of an affidavit. *Brown v. Nat'l Penn Ins. Servs. Grp., Inc., Civ. A. No. 13-1748, 2014 U.S. Dist. LEXIS 117036, 2014 WL 4160421, at *4 (E.D. Pa. Aug. 22, 2014)*, *aff'd*, *614 F. App'x 96 (3d Cir. 2015)*. "Rather, the Court must only disregard statements that are clearly not based upon personal knowledge." *Id.* (citing *Keating v. Bucks Cty. Water & Sewer Auth., Civ. A. No. 99-1584, 2000 U.S. Dist. LEXIS 18690, 2000 WL 1888770, at *4 (E.D. Pa. Dec. 29, 2000)*). "Statements in affidavits made only on belief or on information and belief may not be considered in support of or in opposition to summary judgment." *United States v. Rocky Mountain Holdings, Inc., 782 F. Supp. 2d 106, 114 (E.D. Pa. 2011)*; *see also* *Tziatzios v. United States, 164 F.R.D. 410, 411-*

12 (E.D. Pa. 1996) (statements in an affidavit about the conduct of other persons, made to the best of the affiant's "knowledge, **[*11]** information and belief," were insufficient to create a genuine dispute of fact).

Upon review of the Schroeder Certification, nearly all of its contents are based upon Schroeder's personal knowledge. Schroeder is the sole shareholder and President of OMS and OMF. (Schroeder Cert. ¶ 1.) The Court concludes that Schroeder's statements throughout the affidavit concerning OMS's and OMF's formation and business operations are based on his personal knowledge. Therefore, the Court will not exclude those statements from consideration. Schroeder is also the OMS signatory on the two supply agreements with Winn-Dixie, and therefore has personal knowledge of those agreements. (Exs. A-B to Schroeder Cert.) Thus, the Court will not exclude those exhibits from consideration.

However, Exhibit C is a chart that appears to summarize Winn-Dixie's mushroom purchase data, by mushroom type, between 2004 and 2010. (Ex. C to Schroeder Cert.) Schroeder does not state how Exhibit C was created or whose data supported the calculations. (Schroeder Cert. ¶ 7.) In fact, Defendants' brief implies that the chart may have been prepared by Plaintiff's expert witness. (*See* Defs.' Mot. for Partial Summary J. [Defs.' Mot.] **[*12]** at 7 of 39.) Because Schroeder's Exhibit C does not appear to be based upon his personal knowledge, the Court will not consider Exhibit C or the conclusions Schroeder draws from it.

Plaintiff further argues that the Schroeder Certification does not satisfy Rule 56(c)(4) because it lacks support from the record and is conclusory or irrelevant. (Pl.'s Resp. at 41-45.) Declarations in support of a motion for summary judgment must be "made on personal knowledge, set out facts that would be admissible in evidence, and show that the affiant or declarant is competent to testify on the matters stated." Fed. R. Civ. P. 56(c)(4). Statements in an affidavit need not be supported from the record in order to be considered on a motion for summary judgment, so long as they otherwise meet the requirements of Rule 56(c)(4). Even if an affidavit is self-serving, it may still be part of the record if it sets forth specific facts based on personal knowledge. *See* Buie v. Quad/Graphics, Inc., 366 F.3d 496, 506 (7th Cir. 2004) (finding the district court abused its discretion by refusing to consider part of an affidavit simply because it was self-serving, since it set forth a relevant specific fact based on personal knowledge). However, an affidavit that is "'essentially conclusory' and lacking in specific facts" is **[*13]** inadequate to satisfy the movant's burden on a motion for summary judgment. Maldonado v. Ramirez, 757 F.2d 48, 51 (3d Cir. 1985) (quoting Drexel v. Union Prescription Centers, Inc., 582 F.2d 781, 789-90 (3d Cir. 1978)). The Court has already assessed the specific facts in the Schroeder Certification to ensure they are based upon his personal knowledge and would be admissible in evidence. Therefore, the Court will not exclude the entire Certification simply because not all statements therein are supported by extrinsic evidence or certain statements are conclusory or irrelevant.

Finally, although Plaintiff generally claims the Schroeder Certification is contradicted by his deposition, it does not point to any portions of Schroeder's deposition testimony that contradict provisions of the Certification. (Pl.'s Resp. at 41, 43.) Even if the Certification were contradicted by deposition testimony, this could raise an issue of credibility that would preclude summary judgment, but it would not require the Court to exclude the Certification. *See* 10B Wright & Miller, *Federal Practice & Procedure* § 2738 (4th ed.). For these reasons, the Court declines to strike the Schroeder Certification but will not consider Exhibit C to the Certification.

2. The Bankruptcy Automatic Stay

Winn-Dixie next argues that the Schroeder Certification **[*14]** should be excluded because OMF and OMS are in bankruptcy. OMS and OMF each filed a voluntary petition for relief under Chapter 11 of the Bankruptcy Code on December 28, 2018. (Pl.'s Ex. 2 ¶ 1.) The petitions were consolidated, and the bankruptcy case is still ongoing. *See In re: Oakshire Mushroom Farm, Inc.*, No. 18-18446 (Bankr. E.D. Pa.). On March 17, 2021, the bankruptcy court granted Winn-Dixie's Motion to lift the automatic stay of this action against OMF. (Document No. 343-1.)

Winn-Dixie argues that this Court's consideration of the Schroeder Certification would violate the automatic stay imposed by the bankruptcy court. (Pl.'s Resp. at 39-41.) When an entity files for bankruptcy, an automatic stay applies to the "commencement or continuation" of all suits "against the debtor . . . ." 11 U.S.C. § 362(a)(1). Thus, when OMF filed for bankruptcy, Winn-Dixie's claims against Defendant OMF were stayed. But the automatic stay of claims *against* OMF does not have any impact on OMF's voluntary actions. Even before the stay was lifted as to Plaintiffs' claims against OMF, nothing about the automatic stay would have precluded this Court from considering evidence voluntarily produced by OMF's President in support **[*15]** of Defendants' motion for partial summary judgment. The automatic stay did not prevent this matter from proceeding against the other Defendants. *See In re Gronczewski, 444 B.R. 526, 530 (Bankr. E.D. Pa. 2011)*. Moreover, Defendants all face potential joint and several liability for damages premised on Winn-Dixie's purchases from OMS. *See In re Processed Egg Prods. Antitrust Litig., 392 F. Supp. 3d 498, 513 (E.D. Pa. 2019)*. It would unfairly prejudice Defendants not in bankruptcy for this Court to allow Plaintiffs to proceed in litigating their claims against Defendants, but prohibit Defendants from presenting any evidence from Gary Schroeder because of the automatic stay of Plaintiffs' claims against OMF.

Winn-Dixie's final argument for exclusion of the Schroeder Certification is based on its inability to collect evidence from OMF because of the bankruptcy automatic stay. (Pl.'s Resp. at 48-50.) First, the Court notes that Plaintiff has not offered an affidavit or declaration concerning its inability to take discovery from Defendant OMF or non-party OMS, pursuant to *Fed. R. Civ. P. 56(d)*. Even absent this procedural defect, the Court would not exclude the Schroeder Certification on these grounds, for two reasons.

First, Plaintiff argues that it was deprived of discovery relating to OMS, which was previously produced in the class action, because of **[*16]** the automatic stay. (Pl.'s Resp. at 48-49.) Plaintiff bases this argument on the class action deposition of Gary Schroeder, who testified that OMF produced documents in the class action pertaining to OMS. (*Id.*) From this testimony, Plaintiff concludes that Defendants withheld from it documents pertaining to OMS that were previously produced in the class action. The conclusion Plaintiff draws from Schroeder's testimony is not supported by the existing record. During discovery in this action, Plaintiff moved to compel Defendants to produce all documents that had been previously produced in the class action. The Court denied Plaintiff's motion to compel because Defendants represented that they had produced every document previously produced in the class action. (Document No. 262 at 2 n.3.) However, the Court denied this motion without prejudice to renew "[s]hould Winn-Dixie find additional evidence that Defendants' document production is incomplete[.]" (*Id.*) Plaintiff did not renew that motion. Months later, Plaintiff filed a motion to reopen discovery in this action, arguing—as it does here—that the class action deposition testimony of Gary Schroeder indicates Defendants did not produce **[*17]** materials in this action that were produced in the class action, which pertain to OMS. (Document No. 344-1 at 6 n.3.) In opposition to that motion, Defendants reiterated that they did not "refuse or withhold any materials" because of the bankruptcy stay. (Document No. 345 at 5.) In light of this representation, the class action deposition testimony of Gary Schroeder is not sufficient to convince the Court that Defendants withheld from discovery any documents previously produced in the class action.

Second, Plaintiff states that it was unfairly ambushed by new information in Schroeder's Certification that Defendants Country Fresh and South Mill supplied mushrooms to OMS. (Pl.'s 49-50.) This argument is belied by Plaintiff's own exhibits, which indicate that OMS used Country Fresh and South Mill as suppliers to Winn-Dixie. (Pl.'s Ex. 5; *see* Schroeder Tr. 50:11-24.) In fact, in its briefing on discovery disputes, Plaintiff has previously informed the Court that OMS procured mushrooms from these entities. (Document No. 256 at 14 ("Schroeder testified that Oakshire Mushroom Sales, LLC purchased mushrooms from Defendants Country Fresh and South Mill, EMMC members.").) Although the automatic **[*18]** stay may have prevented Plaintiff from collecting discovery directly from OMF, Plaintiff could have propounded discovery requests to Country Fresh or South Mill concerning their supply of mushrooms to OMS, if it believed such discovery was necessary. Plaintiff also could have propounded third party discovery to OMS or sought to lift the automatic stay sooner to pursue discovery from OMF. (*See* Document No. 346.)

In sum, Plaintiff has not shown that the bankruptcy proceedings of OMF and OMS should prevent the Court from considering Gary Schroeder's Certification in support of Defendants' motion. Therefore, the Court will proceed to consider the merits of Defendants' motion, excluding Exhibit C of the Certification.

B. Defendants' Motion for Partial Summary Judgment

Defendants argue that Winn-Dixie cannot pursue damages on the basis of its purchases from non-party OMS because antitrust damages claims can only be sustained by parties who directly purchase from members of the conspiracy. Defendants further argue that OMS is not owned or controlled by OMF, so the exception to the direct purchaser rule for entities that are owned or controlled by members of the conspiracy does not apply. Upon **[*19]** review of the record, the Court concludes that there is a genuine dispute of fact as to whether OMS is owned or controlled by OMF, and therefore, the motion will be denied.

The Court will consider first Plaintiff's argument that the direct purchaser rule does not apply to the facts of this case. Then, the Court will turn to the question of whether OMS is owned or controlled by OMF. Third, the Court will address the alleged pleading deficiencies in the First Amended Complaint. Finally, the Court will consider Defendants' arguments concerning the impact on damages of mushrooms OMS purchased from Defendants other than OMF.

1. The Illinois Brick *Bar to Antitrust Damages for Indirect Purchasers*

Defendants argue that Winn-Dixie's suit for damages for mushroom sales from OMS is barred by the direct purchaser rule set forth in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. Meanwhile, Plaintiff contends that the *Illinois Brick* framework does not apply because OMS sold mushrooms at prices fixed by the EMMC. The Court agrees with Defendants that *Illinois Brick* controls the analysis of Winn-Dixie's potential damages for purchases from OMS.

Section 4 of the Clayton Act provides that, "[a]ny person who shall be injured in his business or property by reason **[*20]** of anything forbidden in the antitrust laws may sue therefor...and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee." *15 U.S.C. § 15(a)*. In *Illinois Brick*, the Court concluded that an injured person under *Section 4 of the Clayton Act* did not encompass an indirect purchaser who had incurred damages passed-on by the direct purchaser from a participant in the conspiracy. *431 U.S. at 728-29*. The *Illinois Brick* opinion relied on two main considerations.

First, in *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*, the Court held that an antitrust defendant could not employ a pass-on theory as a defense to damages, meaning that direct purchasers could recover all damages incurred from an antitrust violation regardless of whether they passed on those damages to their customers. As a result, in *Illinois Brick*, the Court concluded that allowing indirect purchasers to sue for damages would essentially permit *offensive* pass-on theories of liability, even though pass-on was not a permissible defense, which could lead to inconsistent results and double recovery against antitrust violators. *431 U.S. at 730*. The Court expressed concern that allowing an indirect purchaser to sue for damages "would create a serious risk of multiple liability" **[*21]** for antitrust violators in suits from both direct and indirect purchasers. *Id.*

Second, the Court described that requiring courts to "trace the complex economic adjustments to a change in the cost of a particular factor of production"—as would be required to determine the extent of an indirect-purchaser plaintiff's damages stemming from overcharge to the direct purchaser—"would greatly complicate and reduce the effectiveness of already protracted treble-damages proceedings . . . ." *Id. at 732*. As a result, the Court in *Illinois Brick* reaffirmed the judgment of *Hanover Shoe* that "the antitrust laws will be more effectively enforced by concentrating the full recovery for the overcharge in the direct purchasers rather than by allowing every plaintiff potentially affected by the overcharge to sue only for the amount it could show was absorbed by it." *Id. at 735*. In its analysis, the Court cautioned against litigation where "the overcharge would have to be apportioned among the relevant wholesalers, retailers, and other middlemen . . . ." *Id. at 740*.

The Supreme Court has twice reaffirmed *Illinois Brick*'s bar to actions for damages by indirect purchasers. In *Kansas v. UtiliCorp United, Inc., 497 U.S. 199, 110 S. Ct. 2807, 111 L. Ed. 2d 169 (1990)*, the Court held that the bar to damages recovery by indirect **[*22]** purchasers applied even if direct purchasers were required by law or regulation to pass on all overcharges to downstream purchasers. The Court reasoned that even if a direct purchaser passed on 100% of the overcharge to an indirect purchaser, the direct purchaser may still have suffered antitrust damages in situations where it could have raised its prices absent the overcharge, or where there was a delay between the increase in defendants' price and the increase in the direct purchasers' sales price. Id. at 209-11. As a result, the damages from any overcharge would still have to be apportioned between direct and indirect purchasers—the calculation *Illinois Brick* was designed to preclude. *See* id. at 210-11. Thus, even if overcharges are passed on in their entirety, an indirect purchaser cannot sustain a claim for damages, unless a specific exception to *Illinois Brick* applies. *Id.* The Court in *Utilicorp* went on to conclude that "even assuming that any economic assumptions underlying the *Illinois Brick* rule might be disproved in a specific case, we think it an unwarranted and counterproductive exercise to litigate a series of exceptions." Id. at 217. In Apple Inc. v. Pepper, 139 S. Ct. 1514, 203 L. Ed. 2d 802 (2019), the Supreme Court again reaffirmed that *Illinois Brick* outlined a **[*23]** bright-line rule barring an indirect purchaser's recovery, even if the antitrust violator did not set the price of the product for the direct purchaser. The Court reiterated that, "the bright-line rule of *Illinois Brick* means that there is no reason to ask whether the rationales of *Illinois Brick* 'apply with equal force' in every individual case." Id. at 1524 (quoting UtiliCorp, 497 U.S. at 216). The combined effect of the major indirect-purchaser cases is a single bright-line rule: "if manufacturer A sells to retailer B, and retailer B sells to consumer C, then C may not sue A." Id. at 1521.

a. Illinois Brick's *Application in Vertical Conspiracies*

Despite this bright-line rule, the *Illinois Brick* doctrine will not always bar a plaintiff's recovery from multiple levels of a production chain when the plaintiff alleges a vertical conspiracy. *See* Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law****: An Analysis of Antitrust Principles and Their Application* ¶ 346h (5th ed. 2020). For example, if a consumer plaintiff alleges that it has purchased from a retailer who has conspired with the manufacturer to fix the plaintiff's purchase price, the consumer plaintiff can seek damages from the manufacturer because there is no allegation of pass-on **[*24]** damages. *See* Arizona v. Shamrock Foods Co., 729 F.2d 1208, 1211-12 (9th Cir. 1984). This scenario has been referred to as the "co-conspirator exception" to *Illinois Brick*, although some courts have noted that, "the 'co-conspirator exception is not really an exception at all,' but rather describes a situation in which *Illinois Brick* is simply not applicable." In re Nat'l Football League's Sunday Ticket Antitrust Litig., 933 F.3d 1136, 1157 (9th Cir. 2019), *cert. denied sub nom.* Nat'l Football League v. Ninth Inning, Inc., 141 S. Ct. 56, 208 L. Ed. 2d 291 (2020) (quoting In re ATM Fee Antitrust Litig., 686 F.3d 741, 750 (9th Cir. 2012)). In such a scenario, even though the product has been sold through an intermediary, the plaintiff is a direct purchaser from an alleged member of the conspiracy. *Id.* ("[W]hen co-conspirators have jointly committed the antitrust violation, a plaintiff who is the immediate purchaser from any of the conspirators is directly injured by the violation.")

However, in order to invoke the co-conspirator exception and successfully sue an upstream seller or manufacturer for an overcharge, a plaintiff in the Third Circuit must name as a defendant the intermediary co-conspirator from which it purchased the product. McCarthy v. Recordex Serv., Inc., 80 F.3d 842, 855 (3d Cir. 1996); Link v. Mercedes—Benz, 788 F.2d 918, 931-33 (3d Cir. 1986). The Third Circuit has "rejected attempts to invoke a co-conspirator exception to *Illinois Brick*'s bar on indirect purchaser standing when plaintiffs have not named the co-conspirators immediately upstream as defendants." Howard Hess Dental Labs. Inc. v. Dentsply Int'l, Inc., 424 F.3d 363, 370 (3d Cir. 2005) ("*Hess I*") (citing McCarthy, 80 F.3d at 854; Link, 788 F.2d at 933). If the retailer **[*25]** from which a plaintiff purchased the product is not named as a defendant, it will not be bound by the Court's judgment, and therefore, could potentially seek double recovery from the manufacturer. *See* Link, 788 F.2d at 932. This is precisely the type of scenario the *Illinois Brick* holding was designed to avoid. Even if these concerns of double recovery were not practically possible, the absence of *Illinois Brick* policy concerns in a particular case does not remove it as a bar to indirect purchaser recovery. Hess I, 424 F.3d at 371 (citing UtiliCorp, 497 U.S. at 216). Thus, to revive the shorthand described in *Apple v. Pepper*, the bright-line rule for a vertical price-fixing conspiracy in the Third Circuit is: if manufacturer A sells to and conspires with retailer B, and retailer B sells to consumer C, consumer C may not sue A *unless it also sues B*.

Plaintiff argues that the *Illinois Brick* doctrine should not bar Winn-Dixie's recovery in this case because Defendants engaged in a conspiracy to fix the "retail" prices that Winn-Dixie paid for mushrooms. (Pl.'s Resp. 4-10, 19-28, 30-32.) Essentially, Winn-Dixie argues that it should be treated as a direct purchaser because OMS was a co-

conspirator with OMF in a vertical conspiracy that fixed the prices Winn-Dixie **[*26]** paid to OMS. The glaring problem with this argument is that OMS is not a defendant in this action.

Winn-Dixie argues that an intermediary distributor need not be joined as a co-conspirator in a conspiracy to fix the "retail" price, relying on *Lowell v. Am. Cyanamid Co., 177 F.3d 1228, 1230 (11th Cir. 1999)*. (Pl.'s Resp. 31.) In *Lowell*, the plaintiff farmers' failure to join the intermediary dealers from which they purchased a price-fixed product did not bar their recovery. *Id. at 1231*. Thus, the Eleventh Circuit seemed to approve a co-conspirator exception to *Illinois Brick* when the direct sellers were not joined as defendants. But a closer reading of *Lowell* does not support its application to the facts here. *Lowell* specifically relied on what it deemed to be an exception to *Illinois Brick* for a "a single vertical conspiracy where the plaintiff has purchased directly from a conspiring party in the chain of distribution." *Id. at 1232*. The court's conclusion was premised on the fact that there was "no allegation of both a vertical conspiracy as well as a horizontal conspiracy one step removed from the plaintiffs." *Id.* The *Lowell* court specifically differentiated the narrowly confined facts of that case—which alleged a single vertical conspiracy with no allegations of pass-on—from **[*27]** the facts of *In re Beef Indus. Antitrust Litig., 600 F.2d 1148 (5th Cir. 1979)*, in which the plaintiff ranchers alleged a horizonal conspiracy among retail food chains and a vertically integrated conspiracy with the meat packer and slaughterhouse intermediaries. *177 F.3d at 1231-32*. The *Lowell* court explained that "[n]ot every vertical conspiracy allegation will get around the *Illinois Brick* doctrine. An alleged vertical conspiracy on top of a horizontal conspiracy . . . does not...'save' the overall conspiracy claims. Instead, the *Illinois Brick* doctrine might apply even more strongly in a case like *In re Beef*." *177 F.3d at 1232*. Thus, in allegations of a horizontal and vertical conspiracy, where the intermediary reseller is not joined as a defendant, the risks that *Illinois Brick* contemplated of multiple liability and damages-apportionment complexity would still be present.

In this case, Plaintiffs have alleged a horizontal conspiracy among EMMC members. Now facing Defendants' motion for partial summary judgment, Winn-Dixie argues that OMS followed EMMC minimum pricing policies, and in essence, was a vertically integrated co-conspirator that sold to Winn-Dixie at prices fixed by the conspiracy. But because OMS is not a defendant, the policy concerns *Illinois Brick* identified of **[*28]** double recovery from members of the EMMC, and pass-on damages apportionment among OMS and Winn-Dixie, could still arise. Plaintiff argues that the concerns of double recovery and apportionment of damages do not apply in this case because OMS never sued Defendants and any new claims would now be time-barred. (Pl.'s Resp. at 32.) Even if Plaintiff were correct, the Supreme Court has cautioned against assessing whether the policy rationales of *Illinois Brick* apply in a particular case because "allowing an exception, even in rather meritorious circumstances, would undermine the rule." *UtiliCorp, 497 U.S. at 216*. Regardless of whether OMS followed EMMC minimum pricing in its sales to Winn-Dixie, or whether there is any risk that OMS may still sue Defendants, the *Illinois Brick* doctrine bars an indirect purchaser from suing an upstream entity for damages, unless the intermediary is also joined as a defendant or another exception applies. Winn-Dixie's argument that *Illinois Brick* does not apply fails because OMS is not a named defendant in this action.

b. Determining the Seller, Direct Purchaser, and Indirect Purchaser

Winn-Dixie also argues that it is a direct purchaser, and therefore *Illinois Brick* does not apply, **[*29]** because Defendants Country Fresh and South Mill were the "true sellers" to Winn-Dixie. (Pl.'s Resp. 29; Pl.'s SUMF ¶¶ 18-26, 58-63.) Plaintiff argues that because OMS was purely a sales entity that did not package or ship the mushrooms it sold to Winn-Dixie, "it is reasonable to infer that OMS did not take possession or title to the Dole mushrooms sold to Winn-Dixie, and that Country Fresh and South Mill, both EMMC members, were the true sellers of Dole mushrooms to Winn-Dixie." (Pl.'s SUMF ¶ 63.)

Winn-Dixie's argument is similar to an argument considered and rejected in *Hess I, 424 F.3d 363, 372-73 (3d Cir. 2005)*. In that case, the plaintiffs, who purchased a price-fixed product through dealer intermediaries, argued they were direct purchasers from the manufacturer for certain transactions where the dealers "do not take physical possession" of the product. *Id. at 373*. The Third Circuit rejected this argument, reasoning that the shipping method "does not affect the economic substance of the transaction." *Id.*

Here, Schroeder testified that OMS was a sales entity that was distinct from the packaging operation, and OMS used other growers besides OMF, including Country Fresh and South Mill, to supply, package, and label its sales of Dole mushrooms. **[*30]** (*See* Schroeder Tr. 50:11-14; 51:4-52:4, 95:21-96:10.) OMS's data for sales to Winn-Dixie also describes the "Ship Method" as "Southmill", "Country Fresh", or "Quincy". (Pl.'s Ex. 5.) However, Defendants presented sales agreements between Winn-Dixie and OMS, and Winn-Dixie does not dispute the validity of these agreements. (Exs. A-B to Schroeder Cert.) Nor does Winn-Dixie put forth any evidence that it negotiated directly with South Mill or Country Fresh on the prices of mushrooms or directly paid those entities. Although Country Fresh and South Mill may have packaged and shipped OMS mushrooms sold to Winn-Dixie, this does not affect the economic substance of the transaction between OMS and Winn-Dixie. Plaintiff's argument fails to create a genuine issue of material fact that Winn-Dixie purchased mushrooms directly from Defendants Country Fresh or South Mill, rather than from non-party OMS.

The Court concludes that Winn-Dixie is an indirect purchaser in a distribution chain impacted by a horizontal conspiracy, which is exactly the circumstance in which *Illinois Brick* and its progeny apply. Therefore, Winn-Dixie cannot recover damages from Defendants based on purchases from OMS—an alleged **[*31]** co-conspirator that is not joined as a defendant—unless an exception to the *Illinois Brick* doctrine applies to those purchases. The Court will next consider the exception to *Illinois Brick* that may govern Winn-Dixie's purchases from OMS.

2. The Ownership or Control Exception to Illinois Brick

Illinois Brick set forth a potential limited exception to the direct purchaser rule for situations "where the direct purchaser is owned or controlled by its customer." *431 U.S. at 736 n.16*. The Court described that in such a situation "market forces have been superseded" such that the general reasoning to prevent indirect purchasers from recovering might no longer apply. *Id.* Although *Illinois Brick* described this exception in the context of a direct purchaser that was owned or controlled by the customer, courts have since applied the exception where the direct purchaser is owned or controlled by the antitrust conspirator. *See* Areeda & Hovenkamp, *supra*, ¶ 346f.

The Third Circuit has allowed a plaintiff to sue for damages based on its purchases from a conspiring defendant's wholly-owned subsidiary. *In re Sugar Indus. Antitrust Litig., 579 F.2d 13 (3d Cir. 1978)*. *In re Sugar* alleged a conspiracy among major sugar refiners to fix the prices of refined sugar. *Id. at 15*. The plaintiff was a candy wholesaler that had purchased **[*32]** candy from a subsidiary of a defendant. *Id.* After considering the facts of the case, the court concluded that "at least for this purpose and in this context, the subsidiary should be treated as the alter ego of the parent." *Id. at 18-19*. The following year, in *Mid-West Paper Products Co. v. Continental Group. Inc.*, the Third Circuit again faced the question of whether a plaintiff could pursue antitrust damages based on purchases from a defendant's subsidiary. *596 F.2d 573, 588-89 (3d Cir. 1979)*. The Third Circuit remanded to the district court to determine whether *Illinois Brick* should prevent plaintiff's recovery. *Id. at 589*. The *Mid-West Paper* court assessed that in certain circumstances courts could regard a parent and its' subsidiary as one entity, "when the parent dominates and controls the subsidiary to such an extent that the subsidiary is deemed to be an agent of the parent." *Id.* In finding remand necessary, the court stated that "[i]f [plaintiff] can establish facts that...as a consequence of [defendant's] domination the subsidiary's prices were determined in accordance with the general price-fixing conspiracy, [plaintiff] would be entitled to sue defendants for damages resulting from its purchases from [the subsidiary]." *Id.* A **[*33]** few years later, in dicta, the Third Circuit summarized the standard set forth in *Mid-West Paper* as requiring that a "violator must dominate [the] subsidiary's prices in accordance with the general price fixing conspiracy" in order for the indirect purchaser to be able to sue for damages when it purchased from a subsidiary or division of a co-conspirator. *Merican, Inc. v. Caterpillar Tractor Co., 713 F.2d 958, 967 n.20 (3d Cir. 1983)*.

The Third Circuit most recently described the contours of the ownership or control exception in *Hess I, 424 F.3d at 371-72 (3d Cir. 2005)*. The *Hess I* opinion stated that courts which have expanded the ownership or control exception beyond a direct subsidiary have limited the exception to "relationships involving such functional economic or other unity between the direct purchaser and either the defendant or the indirect purchaser that there effectively has been only one sale." *Id. at 372* (quoting *Jewish Hosp. Ass'n of Louisville, Ky. v. Stewart Mech. Enters., 628*

F.2d 971, 975 (6th Cir. 1980)). "Modes of control that might qualify for the control exception include 'interlocking directorates, minority stock ownership, loan agreements that subject the wholesalers to the manufacturers' operating control, [or] trust agreements.'" *Id.* (quoting In re Brand Name Prescription Drugs Antitrust Litig., 123 F.3d 599, 605 (7th Cir. 1997) (alteration in original)). Plaintiffs in *Hess I* were dental laboratories that alleged an exclusive-dealing and price-fixing conspiracy between **[*34]** Dentsply, which marketed artificial teeth, and its dealer intermediaries, which sold the artificial teeth to plaintiffs. *Id. at 366-67*. The Third Circuit held the ownership or control exception did not allow plaintiffs to sue Dentsply for damages because Dentsply did not "own any interest in" the dealers and "no functional unity" existed between Dentsply and the dealers, so the *Illinois Brick* policy concerns of double recovery and damages apportionment would apply. *Id. at 372*. Thus, while the Third Circuit did not apply the control exception to *Illinois Brick* in *Hess I*, the opinion recognized the continuing viability of the exception. *See* *In re: Domestic Drywall Antitrust Litig., 322 F.R.D. 188, 196-97 (E.D. Pa. 2017)*.

In light of this precedent, the question for the Court is whether there is any genuine dispute as to whether non-party OMS should be treated as the alter ego of Defendant OMF. The Court must assess whether OMF has functional unity with OMS or exercises control over OMS as a result of interlocking directorates or other agreements. The Court must also consider whether, as a consequence of OMF's domination or control, OMS's prices were determined in accordance with EMMC minimum pricing policy.

In their respective arguments regarding the ownership or control exception in this **[*35]** case, the parties each rely on earlier decisions in the related class action litigation. Judge O'Neill ruled on the application of the ownership or control exemption to *Illinois Brick* in two instances. In one instance, Judge O'Neill ruled that plaintiff Diversified Foods was an indirect purchaser and could not recover damages because distributor South Mill of New Orleans, from which it had purchased mushrooms, was not owned or controlled by Defendants Kaolin Mushroom Farms, Inc. or Defendant South Mill Mushroom Sales, Inc. ("South Mill/Kaolin"). *In re Mushroom Direct Purchaser Antitrust Litig., 319 F.R.D. 158, 181-84 (E.D. Pa. 2016)*. John and Michael Pia were the 100% owners of Defendants South Mill/Kaolin, but they were only 50% owners of the South Mill Distribution entities; the remaining 50% of the distribution entities were owned by Stuart Thomas. *See* *id. at 183-84*; *In re Mushroom Direct Purchaser Antitrust Litig., 54 F. Supp. 3d 382, 388 n.6 (E.D. Pa. 2014)*. In finding that the Defendants South Mill/Kaolin did not own or control the direct purchaser South Mill of New Orleans, the court reasoned,

> "[w]hile some overlap existed in ownership between the affiliated distributors and the member growers, they were not under common control in the same sense as is a corporation and its wholly-owned subsidiary, a corporation and its divisions or as are *two corporations owned in* ***[*36]*** *identical proportions by the same set of investors*."

319 F.R.D. at 183 (quoting *In re Mushroom, 621 F.Supp.2d 274, 290 (E.D. Pa. 2009)* (emphasis added)). The court further reasoned that the lack of unity of interest between the entities was demonstrated by the fact that there had been a lawsuit between South Mill/Kaolin and a South Mill distribution center concerning mushroom pricing. *Id. at 184*; *see* *54 F. Supp. 3d at 388-89*. The court concluded this history of litigation implicated the potential for double recovery that *Illinois Brick* had attempted to avoid, so Diversified Foods could not proceed with its claims for damages as class representative. *319 F.R.D. at 184*.

Separately, Judge O'Neill found that there were genuine issues of material fact as to whether M.D. Basciani owned or controlled a distribution entity to which it sold mushrooms. *In re Mushroom Direct Purchaser Antitrust Litig., Civ. A. No. 06-620, 2016 U.S. Dist. LEXIS 177839, 2016 WL 8459462, at *5 (E.D. Pa. Dec. 13, 2016)*. There, M.D. Basciani moved for summary judgment arguing that plaintiffs were indirect purchasers because M.D. Basciani sold all of its mushrooms to a distributor, which took possession of and title to the mushrooms, and which was not an EMMC member or defendant. *2016 U.S. Dist. LEXIS 177839, [WL] at *2*. M.D. Basciani argued that it was a separate corporate entity from this distributor, and that the two entities had separate financial statements, bank accounts, boards of directors, shareholder meetings, **[*37]** and payrolls. *Id.* However, the two entities had identical owners, who each owned the same percentage of shares in M.D. Basciani and the distributor. *Id.* The court denied the motion for summary judgment, and found it notable that "M.D. Basciani and [the distributor] were owned and operated and controlled by the same individuals and that he and the other co-owners made decisions for both...."

2016 U.S. Dist. LEXIS 177839, [WL] at *5. Judge O'Neill concluded that there were material questions of fact as to whether "sufficient functional unity" existed between the two entities to warrant application of the control exception to *Illinois Brick* and permit plaintiffs' claims against M.D. Basciani. *Id.*

The situation here regarding OMF and OMS is much more akin to that of M.D. Basciani in the related class case than to South Mill/Kaolin. Here, the parties do not dispute that Gary Schroeder is the sole shareholder and President of both OMS and OMF. (Schroeder Cert. ¶ 1; Schroeder Tr. 95:3-10, 96:11-15.) Indeed, Schroeder himself certifies that OMS and OMF "shared some common employees and used a common ordering system." (Schroeder Cert. ¶ 10.) OMF had already been growing, packaging, and selling mushrooms for 17 years when Schroeder **[*38]** formed OMS "for the purpose of obtaining a license from the Dole Company—which it did in 2003—to market and sell all types of mushrooms...under the DOLE brand name...." (Schroeder Cert. ¶¶ 3-4.) OMS "kept separate books and records from OMF" and had separate financial reporting. (*Id.* ¶ 10; *accord* Schroeder Tr. 96:16-19, 98:21-99:8.)

In 2001, OMF joined the EMMC, and Schroeder was elected Treasurer of the EMMC. (*Id.* ¶ 3.) Schroeder avers that OMS did not offer or attempt to join the EMMC, and he did not agree that OMS would follow "any of the rules[,] regulations or pricing policies adopted by the EMMC." (*Id.* ¶ 5.) Schroeder states that any mushrooms that OMS purchased from OMF and "re-sold" to Winn-Dixie were at "prices that included the packaging and delivery costs...." (*Id.* ¶ 8.) Schroeder further states the sales prices between OMS and Winn-Dixie "were negotiated between Winn Dixie's Procurement Officers and OMS[,]" and "were not affected or influenced by any rule, regulation or program adopted by the EMMC." (*Id.* ¶ 7.) As a result, Defendants argue OMS is not owned or controlled by OMF.

Winn-Dixie argues that there is sufficient evidence to raise a genuine dispute of material fact **[*39]** as to whether OMF owned or controlled OMS. Plaintiff first points to the bankruptcy filings of OMF and OMS, which designate the two entities as "affiliates," pursuant to the Bankruptcy Code. (Pl.'s SUMF ¶¶ 2-3; Pl.'s Ex. 2 ¶ 14.) OMF and OMS's affiliation in bankruptcy does not indicate any functional unity or control beyond what is already evident from the entities' common ownership by Gary Schroeder. *See 11 U.S.C. § 101(2)(B)* (an "affiliate" is a "corporation 20 percent or more of whose outstanding voting securities are directly or indirectly owned or controlled, or held with power to vote, by the debtor, or by an entity that directly or indirectly owns...20 percent or more of the outstanding voting securities of the debtor...").

Next, in support of its argument that genuine issues of material fact exist as to the control of OMS by OMF, Plaintiff submits the deposition of Kirk Reichert, who was the controller for OMF and testified in the related class action as a corporate designee of OMF. (Pl.'s SUMF ¶ 4; Pl.'s Ex. 4 [Reichert Tr.] 9:5-9.) Reichert did not mention the existence of "Oakshire Mushroom Sales" throughout his deposition. While Reichert testified on behalf of OMF, he also testified about sales **[*40]** data from OMS. (*See* Pl.'s SUMF ¶¶ 15-17; Pl.'s Ex 5; Reichert Tr. 17:25-18:17.) Reichert testified that Schroeder usually completed the negotiations on behalf of "Oakshire" (*see* Reichert Tr. 25:23-26:13), and that Schroeder completed all negotiations of rebates and pricing, without specifying whether this testimony applied to OMF or OMS. (*Id.* at 54:13-23, 65:9-15.) He testified to the electronic operating system and operations of a customer service employee, again without differentiating between OMF and OMS. (*See id.* at 21:10-23; 26:7-27:9; Pl.'s SUMF ¶¶ 10-11, 13.) Reichert further testified that in 2003, "we got the Dole license." (Reichert Tr. 65:19-23.) Plaintiff argues that this testimony, as well as an article on the website of OMF, indicate it was OMF, not OMS, which began selling mushrooms under the Dole license. (Pl.'s SUMF ¶¶ 5, 27-30.) Whether it was OMS or OMF that acquired the Dole license is irrelevant to the Court's inquiry of OMF's domination or control over OMS. However, Reichert's failure to distinguish between the two entities throughout his testimony signals to the Court a potential functional unity of operation and management between OMF and OMS.

Plaintiff next **[*41]** argues that OMF required OMS to follow EMMC minimum pricing. (Pl.'s SUMF ¶¶ 32-36.) In support of this argument, Plaintiff presents the EMMC Membership Agreement signed by Schroeder on behalf of OMF, which required EMMC members "not to sell or otherwise dispose of mushrooms except as provided under the terms of this Agreement" and "to sell mushrooms to all customers only on the terms authorized by the Cooperative." (Pl.'s Ex. 8 ¶¶ 6-7.) Plaintiff points to the testimony John Pia, President of South Mill Mushroom Sales, stating that the EMMC minimum prices applied to sales to "[f]resh market consumers[.]" (Pl.'s SUMF ¶ 49; Pl.'s Ex. 11 [Pia Tr.] 8:16-18, 251:11-20.) Schroeder similarly testified that one of the prices set by EMMC minimum pricing was for sales to retail customers. (*See* Pl.'s SUMF ¶ 46; Schroeder Tr. 118:4-25.) Plaintiff also presents the testimony of representatives of several defendants stating that they believed EMMC minimum pricing applied to sales from EMMC members' packaging and shipping operations to retail or wholesale consumers, rather than sales from members' growing operations to their packaging and shipping operations. (*See* Pl.'s SUMF ¶¶ 47-48, Pl.'s Ex. 13 **[*42]** (Johnson Tr. 191:19-192:17, 195:3-14; Reitnauer Tr. 98:5-11, 98:24-99:10; Ferranto Tr. 33:9-21; Cutone Tr. 82:4-22; Cardile Tr. 145:6-12, 146:10-21; D'Amico Tr. 171:17-172:3).) Plaintiff also cites to Judge O'Neill's finding that "the price fixing in which the EMMC admits it participated was applied to integrated and affiliated distributors' sales and not at the growers level." *In re Mushroom Direct Purchaser Antitrust Litig., 621 F. Supp. 2d 274, 285 n.11 (E.D. Pa. 2009)*. Finally, Plaintiff asserts that the prices OMS actually charged Winn-Dixie in its sales contracts were higher than the EMMC minimum prices. (*See* Pl.'s SUMF ¶¶ 51-52; Pl.'s Ex. 16, Leffler Rebuttal Report at 8 n.23.) Defendants do not dispute this assertion.

The Court concludes that there is a genuine dispute of material fact whether OMF controlled OMS in order to satisfy the exception to *Illinois Brick*. OMF and OMS are 100% commonly owned and controlled by Gary Schroeder. OMS shared common employees, a common ordering system, and functional operations with OMF. Schroeder was also solely responsible for negotiating OMF's and OMS's sales prices. As EMMC Treasurer and President of EMMC member OMF, it is a reasonable inference that Schroeder was aware of the EMMC minimum prices. While Schroeder avers that the EMMC **[*43]** minimum pricing did not affect OMS's sale prices to Winn-Dixie, Defendants present no evidence or explanation of how OMS's sales prices were determined or negotiated, for either its sales to Winn-Dixie or to other customers. Moreover, certain other EMMC members seem to have applied the minimum pricing policies to their retail sales operations, even if those were separate entities than their growing enterprises. On this record, and drawing all inferences in the light most favorable to Winn-Dixie, the Court concludes that a reasonable juror could find that OMF exercised sufficient control over OMS to satisfy the exception to *Illinois Brick*. As a result, the Court cannot find, as a matter of law, that the *Illinois Brick* doctrine prevents Winn-Dixie from suing for damages for its purchases of mushrooms from OMS.

3. Winn-Dixie's Pleading Deficiency Regarding Purchases from OMS

Defendants further argue that Plaintiff cannot sustain a claim for damages premised on the ownership or control exception to *Illinois Brick* because it did not plead this exception in its First Amended Complaint. (Defs.' Mot. at 8-9.) Defendants rely on *Hess I*, in which the Third Circuit found that the plaintiffs could **[*44]** not claim they were direct purchasers from Dentsply to avoid the *Illinois Brick* doctrine because their complaint had specifically defined the plaintiff class as dental laboratories "who purchased such products *through Dentsply Dealers*." *424 F.3d at 372*.

Here, Plaintiffs pleaded that during the "Conspiracy Period" Winn-Dixie "purchased Agaricus mushrooms directly from one or more Defendants." (First Am. Comp. ¶ 18.) Plaintiffs defined the "Conspiracy Period" as January 1, 2001 through 2008. (*Id.* ¶ 3.) Winn-Dixie did not plead that it purchased mushrooms from OMS or that OMS was owned or controlled by OMF. As a result, Defendants posit that "Winn-Dixie's 'ownership or control' argument comes too late." (Defs.' Mot. at 9.)

The Federal Rules do not require a plaintiff to set out a legal theory at the pleadings stage and "do not countenance dismissal of a complaint for imperfect statement of the legal theory supporting the claim asserted." *Johnson v. City of Shelby, Miss., 574 U.S. 10, 11, 135 S. Ct. 346, 190 L. Ed. 2d 309 (2014)*. When a party has a valid claim, it should be able to recover provided that the change in theory will not prejudice the other party in maintaining a defense upon the merits. 5 Wright & Miller, *Federal Practice & Procedure* § 1219 (3d ed.); *see also Perma Life Mufflers, Inc. v. Int'l Parts Corp., 392 U.S. 134, 142, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968)*, *overruled on other* ***[*45]*** *grounds by Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* (remanding case for trial despite objections that antitrust plaintiffs' "particular theories of conspiracy" were not pleaded with specificity because "[t]he gist of petitioners' cause of action [was] clear from the outset, and respondents will in no way be prejudiced if petitioners are permitted to rely on these alternative theories of conspiracy.").

Defendants have not argued any prejudice in being able to prepare a defense to the ownership and control exception to *Illinois Brick* premised on Winn-Dixie's purchases from OMS. To the contrary, they have asserted that Gary Schroeder can attest to the relationship between OMF and OMS and has access to contracts and sales data concerning Winn-Dixie's purchases from OMS. (*See* Schroeder Cert.) Moreover, Defendants assert that the parties explicitly discussed Winn-Dixie's indirect purchases from OMS before the close of discovery, and Plaintiff referenced the ownership or control exception in its filings concerning discovery disputes. (Defs.' Mot. at 11-12 (citing Document No. 256 at 8-14).) Thus, Defendants are not surprised or prejudiced by Plaintiff's assertion of the ownership and control exception to *Illinois Brick*. The Court **[*46]** concludes that Winn-Dixie's failure to plead that it purchased from OMS, and that OMS was owned or controlled by OMF, should not prohibit Winn-Dixie from asserting this theory of recovery in opposition to summary judgment or at trial.

4. Mushrooms OMS Purchased from Conspirators Besides OMF

Defendants next argue that even if there is a dispute of material fact concerning whether OMS is owned or controlled by OMF, *Illinois Brick* still prohibits Winn-Dixie from recovering damages stemming from any mushrooms that originated from any member of the conspiracy besides OMF. (Defs.' Mot. at 12.) Defendants argue that 75% of OMS's sales to Winn-Dixie were mushrooms that OMS purchased from Country Fresh or South Mill, citing to Exhibit C to the Schroeder Certification. (*Id.*) As described in Section III.A.1 *supra*, the Court will not consider Exhibit C in support of Defendants' motion. But the Court will consider Defendants' argument in the abstract, since it is evident that at least some share of Winn-Dixie's purchases from OMS were originally acquired from Country Fresh or South Mill. (Pl.'s Ex. 5; *see* Schroeder Tr. 50:11-24.)

Defendants argue the ownership or control exception to *Illinois Brick* ***[*47]*** cannot apply to products purchased from a company owned or controlled by a conspirator that originated from members of the conspiracy other than its parent company. Defendants cite no case law in support of this assertion, and the Court has found no controlling authority from the Third Circuit on this question. *See In re Sugar Indus. Antitrust Litig., 579 F.2d at 20 (3d Cir. 1978)* (denying petition for rehearing and expressly declining to address this issue because it was not raised in the lower court or briefed on appeal); *In re Fine Paper Antitrust Litig., 98 F.R.D. 48, 117 n.61 (E.D. Pa. 1983)*, *aff'd in part, rev'd in part*, *751 F.2d 562 (3d Cir. 1984)* (noting that the Third Circuit did not rule on this question in *In re Sugar*).

In opposition, Plaintiffs rely on *Royal Printing Co. v. Kimberly Clark Corp., 621 F.2d 323 (9th Cir. 1980)*. In *Royal Printing*, the Ninth Circuit approved of an indirect purchaser's antitrust standing in the circumstances alleged here—where a wholly owned or controlled entity sold plaintiff goods acquired from its parent's co-conspirator rather than the parent itself. *621 F.2d at 326*. The court considered the purpose behind the *Illinois Brick* doctrine, specifically the possibility of double recovery, stating, "[t]here is little reason for the price-fixer to fear a direct purchaser's suit when the direct purchaser is a subsidiary or division of a co-conspirator." *Id.* "The co-conspirator parent will forbid **[*48]** its subsidiary or division to bring a lawsuit that would only reveal the parent's own participation in the conspiracy." *Id.*

The *Royal Printing* court did note that extending the *Illinois Brick* exception to goods originating from co-conspirators, rather than the direct purchaser's parent company, created a slightly increased risk of multiple liability. *Id. at 326 n.6* ("Of course, if the plaintiff purchased a defendant's goods through the defendant's own wholesaling subsidiary, there would be even less likelihood that the direct-purchaser subsidiary would ever also sue the defendant and create a potential multiple liability."). For example, the court hypothesized that "[t]he parent might be under government pressure or discover that the conspiracy is not sufficiently profitable; and if a subsidiary has outside shareholders, a derivative suit might be a possibility. In such an event, multiple liability might lurk." *Id. at 326*. But the *Royal Printing* opinion also noted that even if a subsidiary did sue a parent's co-conspirators, it might be prevented from recovering if the subsidiary had true and complete involvement and participation in the antitrust activity. *Id. at 326 n.5* (citing *Perma Life Mufflers, 392 U.S. at 146-47, 149, 154 (1968)* (White, J. concurrence) (Marshall, J. concurrence) **[*49]** (Harlan, J. concurrence), *overruled on other grounds by* *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)*). Thus, a subsidiary's true and complete involvement and participation in the conspiracy lowers the risk of multiple liability.

Notwithstanding "some small chance that such a subsidiary or division might wish to sue its parent's co-conspirators[,]" the Ninth Circuit ultimately concluded,

> "as a practical matter the chance of a direct-purchaser suit is so small, the correspondingly small risk of multiple recovery does not disturb us. This is especially so when our only alternative is to effectively immunize the transactions here from private antitrust liability, thus thwarting a vital part of the antitrust enforcement scheme and the expressed purpose of *Illinois Brick*."

Id. at 326 (footnotes omitted). Thus, in allowing recovery for purchases from a defendant's subsidiary for goods created by any co-conspirator, the Ninth Circuit balanced the dual concerns of *Illinois Brick* to avoid multiple recovery and to encourage private antitrust enforcement.

Although it did not address this particular question, the Third Circuit similarly considered the dual risks of multiple recovery and encouraging private antitrust enforcement in its decision to apply **[*50]** the ownership or control exception in *In re Sugar, 579 F.2d 13, 18-19 (3d Cir. 1978)*. The plaintiff had purchased from a wholly owned subsidiary of a defendant, and in this context, the court concluded that the subsidiary should be treated as the alter ego of the parent. *Id. at 18-19*. "To adopt any other view would invite evasion by the simple expedient of inserting a subsidiary between the violator and the first noncontrolled purchaser." *Id. at 19* (footnote omitted). The *In re Sugar* court reasoned that, "[a]lthough the subsidiary does have a separate legal existence, it is owned by the parent company, and would not ordinarily sue it." *Id. at 18*. Thus, in condoning the existence of an exception to *Illinois Brick*, the Third Circuit considered whether there would be a low risk of multiple recovery by the direct purchaser and expressed a desire to prevent complete evasion of private antitrust liability. Two years after the Third Circuit's decision in *In re Sugar*, the Ninth Circuit considered these same factors in *Royal Printing* and concluded that the same logic should extend to products sold by a co-conspirator's subsidiary. *621 F.2d at 326 (9th Cir. 1980)*.[2]

The reasoning in *In re Sugar* leads the Court to anticipate that that the Third **[*51]** Circuit would agree with the Ninth Circuit's holding in *Royal Printing* that the ownership and control exception to *Illinois Brick* applies equally to goods originating from any member of the conspiracy. In general, a direct purchaser that is owned or controlled by a member of the conspiracy is unlikely to sue its parent company or other members of the conspiracy. When a direct purchaser acquires price-fixed products from a co-conspirator that is not its parent company, there may be a minimally increased risk of multiple liability in certain circumstances. But the Court concludes this risk is generally outweighed by the risk of the antitrust violators' complete evasion of private enforcement through insertion of a corporate entity that is owned or controlled by a conspirator into the distribution chain.

The Court's anticipation that the Third Circuit would condone this conclusion is further bolstered by a footnote in a recent opinion addressing a different antitrust liability question. In *In re Processed Egg Prod. Antitrust Litig.*, the Third Circuit held that the plaintiffs could seek overcharge damages for all egg products purchased from a conspirator, even where those egg products included **[*52]** some amount of eggs from a third-party non-conspirator. *881 F.3d 262, 274-76 (3d Cir. 2018)*. The question was not governed by *Illinois Brick* because the plaintiffs were direct purchasers from conspirators, so the holding is of limited relevance here. But, in a footnote, the opinion stated,

> "certain Defendants obtained shell eggs from other conspirator-Defendants. These eggs are within the scope of what this Opinion refers to as 'internal' eggs, as they were produced within the conspiracy. For purposes of the issues before us, it does not matter whether a Defendant's 'internal' eggs came from a flock owned by that same Defendant or instead from a flock that belonged to a fellow conspirator-Defendant."

---

[2] In dicta, the Third Circuit has compared these decisions, stating, "[t]he *Royal Printing* decision parallels the exception to *Illinois Brick* that we recognized in ***In re Sugar Indus. Antitrust Litig., 579 F.2d 13 (3d Cir.1979)***." *Merican, 713 F.2d 958, 967 n. 20 (3d Cir. 1983)*. The Court in *Merican* noted one key difference between the Ninth Circuit's interpretation in *Royal Printing* and the Third Circuit's interpretation of the ownership or control exception: in the Third Circuit, for the exception to apply, the antitrust conspirator "must dominate the subsidiary's prices in accordance with the general price fixing conspiracy." *Id.* (citing *Mid-West Paper Prods., 596 F.2d 573, 589 (3d Cir. 1979)*). The *Merican* opinion noted no other disagreement between the circuits' interpretation of the exception.

Id. at 266 n.4. Thus, the court treated equally any eggs originating from any member of the conspiracy, regardless of which defendant ultimately sold the eggs outside of the conspiracy. Applying the same reasoning here would require the Court to treat equally any mushrooms that were grown by any Defendant, regardless of which Defendant—or which entity controlled by a Defendant—ultimately sold the mushrooms outside the conspiracy. This is precisely how the Court will proceed.

The Court declines to hold that Winn-Dixie is barred from seeking **[*53]** damages for any mushrooms OMS purchased from Country Fresh, South Mill, or any other Defendant. The Court will treat these mushrooms equivalently to those mushrooms OMS purchased from OMF. Of course, the Court has not issued any opinion as to whether an exception to *Illinois Brick* would allow Winn-Dixie to seek damages from Defendants for its mushroom purchases from OMS. The Court has merely determined that there is a genuine dispute of material fact on this question that cannot be resolved at summary judgment.

IV. CONCLUSION

For the foregoing reasons, Defendants' motion for partial summary judgment is denied. An Order consistent with this Memorandum will be docketed separately.

ORDER

AND NOW, this **12th** day of **May, 2021**, after consideration of Defendants' Motion for Partial Summary Judgment Against Plaintiff Winn-Dixie, and the responses and replies thereto, and for the reasons outlined in this Court's Memorandum dated May 12, 2021, it is **ORDERED** that Defendants' Motion for Partial Summary Judgment (Document No. 286) is **DENIED**.

BY THE COURT:

/s/ Berle M. Schiller

Berle M. Schiller, J.

IN RE: AUTOMOTIVE PARTS ANTITRUST LITIGATION and IN RE: ANTI-VIBRATIONAL RUBBER PARTS CASES, End-Payor Actions.DIRECT PURCHASER PLAINTIFFS, Interested Parties-Appellees, v. YAMASHITA RUBBER COMPANY, LTD.; YUSA CORPORATION; DTR INDUSTRIES, INC.; BRIDGESTONE CORPORATION; BRIDGESTONE APM COMPANY; TOYO TIRE & RUBBER COMPANY, LTD.; TOYO TIRE NORTH AMERICA OE SALES LLC; TOYO AUTOMOTIVE PARTS (USA), INC., SUMITOMO RIKO COMPANY LIMITED, fna Tokai Rubber Industries, Ltd., Defendants-Appellants.

Prior History: **[**1]** Appeal from the United States District Court for the Eastern District of Michigan at Detroit. Nos. 2:12-md-02311; 2:13-cv-00803--Marianne O. Battani, District Judge.

In re Auto. Parts Antitrust Litig., 2018 U.S. Dist. LEXIS 242164, 2018 WL 11260510 (E.D. Mich., Nov. 7, 2018)

Core Terms

purchasers, settlement agreement, lawsuit, indirect, anti-vibration, rubber, antitrust, direct-purchaser, end-payor, manufacturers, settlement, district court, ownership-or-control, violator, indirectly, entities, anti trust law, unambiguous

LexisNexis® Headnotes

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

HN1[] **Purchasers, Indirect Purchasers**

In Illinois Brick Co., the Supreme Court recognized an exception to the direct-purchaser rule, holding that an indirect purchaser might have standing to sue if it purchased from an intermediary that was owned or controlled by the ultimate seller.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Torts > ... > Settlements > Settlement Agreements > Enforcement

Civil Procedure > Appeals > Standards of Review > De Novo Review

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Civil Procedure > Appeals > Standards of Review > Questions of Fact & Law

HN2[] **Standards of Review, Abuse of Discretion**

The court reviews a district court's denial of a motion to enforce a settlement agreement for an abuse of discretion. A district court abuses its discretion when it applies the incorrect legal standard, misapplies the correct legal standard, or relies upon clearly erroneous findings of fact. Where the issue involves the interpretation of a settlement agreement, review is de novo. But if contractual language is unclear or susceptible to multiple meanings, interpretation becomes a question of fact subject to review for clear error.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

Civil Procedure > ... > Settlement Agreements > Enforcement > Breach of Contract Actions

HN3[] **Types of Contracts, Settlement Agreements**

A settlement agreement is a contract governed by principles of state contract law.

Contracts Law > Contract Interpretation > Intent

HN4[] **Contract Interpretation, Intent**

Under Michigan law, the primary goal of contract interpretation is to honor the intent of the parties. To achieve that goal, the court must read the contract as a whole. If the contractual language is clear and unambiguous, the terms are to be taken and understood in their plain, ordinary, and popular sense. The court is governed by what the parties said and did, and not merely by their unexpressed subjective intent.

Business & Corporate Compliance > ... > Contract Formation > Offers > Definite Terms

HN5[] **Offers, Definite Terms**

A. contract is not ambiguous merely because a term is not defined in the contract.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Settlement Agreements

HN6[] **Types of Contracts, Settlement Agreements**

To the extent "indirectly" or "directly purchased" are used in the settlement agreements as legal phrases or terms of art, Michigan law instructs the court to further consider case law explanations that those familiar with such terms of art are held to understand.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN7[] **Remedies, Damages**

The Supreme Court has consistently stated that, for purposes of federal ***antitrust law***, direct purchasers are those who buy immediately from the alleged antitrust violators, and indirect purchasers are those who are two or more steps removed from the violator in a distribution chain.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

HN8[] **Remedies, Damages**

llinois Brick recognized the general rule that a plaintiff has no standing under federal ***antitrust law*** to sue an alleged antitrust violator if the plaintiff did not directly purchase the overcharged product from the alleged violator. But it hinted that that standing rule might not apply if plaintiffs bought from a direct purchaser that was "owned or controlled" by the alleged antitrust violator. That hint has since turned into an exception allowing an indirect purchaser to bring a federal antitrust suit when, for example, an alleged antitrust violator owns or controls its direct purchaser. In practice, the ownership-or-control exception permits courts to treat indirect purchasers as direct purchasers for standing purposes so that antitrust violators cannot simply integrate vertically to escape federal antitrust liability.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

HN9[] **Standing, Clayton Act**

The ownership-or-control exception mentioned in Illinois Brick is ultimately a pragmatic carveout to a federal antitrust standing rule, not a redefinition of indirect purchaser.

Contracts Law > Contract Interpretation > Intent

HN10[] **Contract Interpretation, Intent**

Under Michigan law, courts are prohibited from considering extrinsic evidence to determine the parties' intent when the contract language is clear and unambiguous.

Contracts Law > Contract Interpretation > Intent

HN11[] **Contract Interpretation, Intent**

Where the language in the contracts is clear and unambiguous, the court looks only within the four corners of the relevant contracts to accomplish its task.

Opinion by: JOHN K. BUSH

Opinion

[*679] JOHN K. BUSH, Circuit Judge. Under federal ***antitrust law***, a private plaintiff generally must be a "direct purchaser" to have suffered injury **[**2]** and thus have standing to sue a manufacturer or supplier. *HN1*[] In *Illinois Brick Co. v. Illinois*, however, the Supreme Court recognized an exception to the direct-purchaser rule, holding that an "indirect purchaser" might have standing to sue if it purchased from an intermediary that was "owned or controlled" by the ultimate seller. *431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. The present dispute raises the question whether *Illinois Brick* has any effect on the interpretation of certain antitrust class-action settlement agreements under Michigan law.

Specifically, we consider *Illinois Brick* to address whether Plaintiffs, who purchased automotive anti-vibration rubber parts, are barred from maintaining a purported direct-purchaser class-action lawsuit against the manufacturers and sellers of those parts. Defendants argue that Plaintiffs settled all their claims as part of a class composed of certain "persons and entities" that "indirectly purchased" anti-vibration rubber parts. Plaintiffs argue that, in accordance with *Illinois Brick*, they are not part of the settlement class because they purchased "directly" from subsidiaries of a manufacturer. As explained below, regardless of whether *Illinois Brick* applies to Plaintiffs' underlying **[**3]** claims, Plaintiffs fit within the class definition because they "indirectly purchased" parts under the plain meaning of the settlement agreements. Their suit is therefore barred by those agreements. We reverse the district court's contrary holding.

I.

This appeal is part of the litigation that arose from the manufacture and sale of automotive anti-vibration rubber parts. Those parts are used, as their name suggests, to absorb and reduce vibration transmission in various sections of a vehicle. In 2013, a putative class of anti-vibration rubber part purchasers, referred to as end-payor purchasers, sued several manufacturers and suppliers, alleging that they conspired to fix prices of anti-vibration **[*680]** rubber parts.[1] The end payors brought claims under the *Clayton Act, 15 U.S.C. § 26*, for violations of the *Sherman Act, 15 U.S.C. § 1 et seq.* They also sued under certain state antitrust laws.

The end-payor litigation settled in 2016 and 2017, after the district court certified a nationwide settlement class comprising persons and entities who indirectly purchased anti-vibration rubber parts that were manufactured or sold by the defendant manufacturers and suppliers. Notably, the settlement class excludes persons or entities who purchased parts directly or **[**4]** for resale. In total, the defendants agreed to pay $80.4 million to the settlement class. In exchange for that sum, the class members "completely released, acquitted, and forever discharged . . . any and all claims" against the defendants arising out of or relating to the conduct alleged in the complaint. The agreements bind all settlement class members except those who timely opted out. Finally, the agreements contain a list of exclusions from the releases, including for all direct purchasers and specific indirect purchasers.

Before the district court entered final judgments approving the settlement agreements in the end-payor lawsuit, Jerry Anderson, Laura LaRue, and Christopher Lee filed a separate putative class action against the same manufacturers and suppliers defending the end-payor litigation, in the same court, in front of the same judge.[2] As Plaintiffs in that new lawsuit, they seek money damages under the Clayton Act on behalf of a putative class of all "direct purchasers" of anti-vibration rubber parts.

Specifically, Plaintiffs allege that they purchased parts "from an entity of which one of the Defendants is the ultimate parent." **[**5]** Of note, the entity that Plaintiffs allegedly purchased parts from is not a defendant in their direct-purchaser lawsuit or the end-payor lawsuit. They purchased anti-vibration rubber parts from a Firestone repair shop (Bridgestone Retail Operations, dba Firestone Complete Auto Care), which is owned by Bridgestone Americas, a subsidiary of one of the defendants in both lawsuits, Bridgestone Corporation. The trial record also reflects that Plaintiffs purchased from a couple of other retail shops, "Tires Plus" and "Wheel Works," which too are allegedly "part of the Bridgestone . . . family." Like the end-payor class, Plaintiffs claim that Defendants conspired to raise prices for anti-vibration rubber parts and passed down the increased costs to their putative class of direct purchasers.

Soon after Plaintiffs filed the direct-purchaser lawsuit, the district court entered final judgments approving the settlement agreements in the end-payor lawsuit. In doing so, the court enjoined all settlement class members from "commencing, prosecuting, or continuing . . . any and all claims" arising out of or relating to the released claims.

About a year later, after Plaintiffs filed their first discovery **[**6]** request in the direct-purchaser lawsuit, Defendants filed a motion to enforce the judgments from the **[*681]** end-payor lawsuit against Plaintiffs. They asked the district court to enjoin Plaintiffs from litigating their claims in the direct-purchaser lawsuit because the settlement agreements in the end-payor lawsuits prohibited Plaintiffs, as indirect purchasers, from maintaining their federal antitrust claims against Defendants. The district court denied the motion because, in its view, Plaintiffs were properly considered direct purchasers under the ownership-or-control exception to the standing rule of *Illinois Brick*. It also reasoned that Defendants' litigation tactics and other post-settlement actions tipped the scales of justice in Plaintiffs' favor. Defendants appeal.

II.

---

[1] Those manufacturers and suppliers include Bridgestone Corporation, Bridgestone APM Company, Yamashita Rubber Co., YUSA Corporation, Tokai Rubber Industries, DTR Industries, Toyo Tire & Rubber Co., Toyo Tire North American OE Sales, and Toyo Automotive Parts (USA) and "unnamed co-conspirators."

[2] Judge Marianne O. Battani of the Eastern District of Michigan oversaw the *In re: Automotive Parts Antitrust Litigation* MDL for about eight years. In June of 2020, she removed herself from the MDL for health reasons. Judge Sean F. Cox, of the same district, is now presiding over the MDL.

HN2[] We review a district court's denial of a motion to enforce a settlement agreement for an abuse of discretion. *Therma-Scan, Inc. v. Thermoscan, Inc., 217 F.3d 414, 419 (6th Cir. 2000)*. "A district court abuses its discretion when it applies the incorrect legal standard, misapplies the correct legal standard, or relies upon clearly erroneous findings of fact." *United States v. Fowler, 819 F.3d 298, 303 (6th Cir. 2016)* (quoting *United States v. Bridgewater, 606 F.3d 258, 260 (6th Cir. 2010)*). Where, as here, the issue involves the interpretation of a settlement agreement, our review is de novo. *Golden v. Kelsey-Hayes Co., 73 F.3d 648, 653 (6th Cir. 1996)*. But if contractual **[**7]** language is "unclear or susceptible to multiple meanings, interpretation becomes a question of fact" subject to review for clear error. *Solo v. United Parcel Serv. Co., 819 F.3d 788, 794 (6th Cir. 2016)* (quoting *Port Huron Educ. Assn. v. Port Huron Area Sch. Dist., 452 Mich. 309, 550 N.W.2d 228, 237 (Mich. 1996)*).

III.

A. The Settlement Agreements

The only issue on appeal is whether the settlement agreements bar Plaintiffs from maintaining their direct-purchaser lawsuit. *HN3*[] A settlement agreement is a contract governed by principles of state contract law, here Michigan law. *See* *Converge, Inc. v. Topy Am., Inc., 316 F. App'x 401, 404-05 (6th Cir. 2009)*; *Kloian v. Domino's Pizza L.L.C., 273 Mich. App. 449, 452, 733 N.W.2d 766 (2006)*. So this case simply requires us to apply that law to interpret the parties' contracts.

HN4[] Under Michigan law, "[t]he primary goal of contract interpretation is to honor the intent of the parties." *Old Kent Bank v. Sobczak, 243 Mich. App. 57, 63, 620 N.W.2d 663 (2000)*. To achieve that goal, we must read the contract as a whole. *Id.* If the contractual language is "clear and unambiguous, the terms are to be taken and understood in their plain, ordinary, and popular sense." *Michigan Mut. Ins. Co. v. Dowell, 204 Mich. App. 81, 87, 514 N.W.2d 185 (1994)*. We "are governed by what the parties said and did, and not merely by their unexpressed subjective intent." *Fletcher v. Bd. of Educ. of Sch. Dist. Fractional No. 5, 323 Mich. 343, 348, 35 N.W.2d 177 (1948)*.

Read in light of those rules, the settlement agreements clearly and unambiguously bar Plaintiffs from maintaining their direct-purchaser lawsuit. The district court's contrary legal determination was incorrect and thus an abuse of discretion.

First, we consider the relevant **[**8]** contractual language.[3] The agreements release all **[*682]** the past and future claims of the settlement class. The settlement class includes:

> All persons and entities that, from March 1, 1996 through the Execution Date, purchased or leased a new Vehicle in the United States not for resale, which included one or more Anti-Vibration Rubber Part(s) as a component part, or indirectly purchased one or more Anti-Vibration Rubber Part(s) as a replacement part, which were manufactured or sold by a Defendant, any current or former subsidiary of a Defendant, or any co-conspirator of a Defendant.

That definition excludes those persons and entities that purchased anti-vibration rubber parts "directly or for resale." If Plaintiffs are indirect purchasers who did not timely elect to be excluded from the settlement class, the settlement agreements bar their direct-purchaser lawsuit.[4] But, if they are direct purchasers, the settlement agreements cannot stand in their way.

The settlement agreements do not define "indirectly purchased" or "directly purchased," or any variation of those phrases. Those omissions, however, do not make the agreements ambiguous. *See* *McGrath v. Allstate Ins. Co., 290 Mich. App. 434, 439, 802 N.W.2d 619 (2010)* (*HN5*[] "A[] . . . contract is not ambiguous merely because **[**9]** a term is not defined in the contract."). We can look to the plain and ordinary meaning of those terms and phrases as described in dictionary definitions. *Id.* "Direct" means "[s]traightforward, uninterrupted, immediate"; "[e]ffected or

---

[3] Because each manufacturer settled with the class separately, there are several settlement agreements. The relevant language is identical in all the agreements, so our analysis applies to all Defendants.

[4] Plaintiffs concede that they did not timely opt out of the settlement class, and they do not contend that Defendants provided them insufficient notice of the settlement agreement, or of their ability to opt out of the class.

existing without intermediation or intervening agency; immediate." *Direct*, Oxford English Dictionary (2d ed. 1989); *see also Direct*, Webster's Third New International Dictionary (1986) ("immediate"; "stemming immediately from a source"; without an "intervening agency, instrumentality, [] influence . . . or intervening step"; "without use of a broker or other middleman."). And "indirect" is just the opposite; it means "[n]ot direct." *Indirect*, Oxford English Dictionary (2d ed. 1989).

Plaintiffs alleged that they purchased anti-vibration rubber parts from Bridgestone Retail Operations, LLC, (dba Firestone) and the other retailers noted, which purchased the parts from Bridgestone Americas, Inc., which in turn purchased them from the Bridgestone Corporation--one of the defendants and alleged antitrust violators in both the end-payor and direct-purchaser lawsuits. Plaintiffs' purchasing arrangement was not "[s]traightforward, uninterrupted," or "immediate." **[**10]** And it certainly was not "without intermediation," an "intervening step" or a "middleman." By definition then, it was not direct. It was indirect.

HN6[] To the extent "indirectly" or "directly purchased" are used in the settlement agreements as "legal phrase[s] or term[s] of art," Michigan law instructs us to further consider "case law explanation[s] that those familiar with such terms of art are held to understand." *Henderson v. State Farm Fire and Cas. Co., 460 Mich. 348, 357 n.9, 596 N.W.2d 190 (1999)*. Examination of the relevant antitrust case-law explanations of the terms "indirectly" and "directly purchased" (or "indirect" and "direct purchaser") confirms the plain meaning of the agreements. ***HN7***[] The Supreme Court has "consistently stated" that, for purposes of federal ***antitrust law***, direct purchasers are those who buy "immediately from the alleged antitrust violators," and indirect purchasers are those "who are two or **[*683]** more steps removed from the violator in a distribution chain[.]" *Apple Inc. v. Pepper, 139 S. Ct. 1514, 1520, 203 L. Ed. 2d 802 (2019)* (quoting *Kansas v. UtiliCorp United Inc., 497 U.S. 199, 207, 110 S. Ct. 2807, 111 L. Ed. 2d 169 (1990)*). Here, Plaintiffs concede that they did not purchase "immediately" from Defendant Bridgestone Corporation, or any of the other Defendants. They acknowledge that their purchases were "two or more steps removed" from the alleged violator. *Id.* Plaintiffs are thus indirect purchasers. Accordingly, **[**11]** they fall within the settlement class defined above and are barred by the settlement agreements from maintaining their federal antitrust claims as the named Plaintiffs in the direct-purchaser lawsuit.

B. *ILLINOIS BRICK* & THE OWNERSHIP-OR-CONTROL EXCEPTION

To circumvent the plain meaning, Plaintiffs argue that, as a matter of law, we should treat them as direct purchasers under the ownership-or-control exception to the antitrust-standing rule of *Illinois Brick Co. v. Illinois*. We find their theory unpersuasive.

HN8[] *Illinois Brick* recognized the general rule that a plaintiff has no standing under federal ***antitrust law*** to sue an alleged antitrust violator if the plaintiff did not directly purchase the overcharged product from the alleged violator. *413 U.S. at 729-30*. But it hinted that that standing rule might not apply if plaintiffs bought from a direct purchaser that was "owned or controlled" by the alleged antitrust violator. *Id. at 736 n.16*. That hint has since turned into an exception allowing an indirect purchaser to bring a federal antitrust suit when, for example, an alleged antitrust violator owns or controls its direct purchaser. *See Jewish Hosp. Ass'n of Louisville, Ky., Inc. v. Stewart Mech. Enters., Inc., 628 F.2d 971, 975 (6th Cir. 1980)*; *see also, e.g., Howard Hess Dental Labs. Inc. v. Dentsply Int'l, Inc., 424 F.3d 363, 371 (3d Cir. 2005)*. In practice, the ownership-or-control exception permits courts **[**12]** to treat indirect purchasers as direct purchasers for standing purposes so that antitrust violators cannot simply integrate vertically to escape federal antitrust liability.

As highlighted above, Plaintiffs allege that at least some of Defendants are vertically integrated such that they own their direct purchasers. Accordingly, the argument goes, Plaintiffs are the only purchasers that Defendants do not own, and so, under the "ownership" prong of the ownership-or-control exception, they can proceed against Defendants as its direct purchasers. Defendants assert that Plaintiffs' argument is irrelevant to our interpretation of the settlement agreement.

We agree with Defendants. Whether Plaintiffs can maintain their direct-purchaser lawsuit under the ownership-or-control exception of *Illinois Brick* is a question of antitrust standing. *See Trollinger v. Tyson Foods, Inc., 370 F.3d 602, 613-14 (6th Cir. 2004)*. It is not a question that bears on our interpretation of the settlement agreements. That

Plaintiffs might be considered to have standing under *Illinois Brick* does not alter the reality that they indirectly purchased anti-vibration rubber parts from Defendant Bridgestone Corporation.[5] *See, e.g., Jewish Hosp, 628 F.2d at 975*; **[*684]** *Howard, 424 F.3d at 371*. ***HN9***[] The ownership-or-control exception mentioned in *Illinois* ***[**13]*** *Brick* is ultimately a pragmatic carveout to a federal antitrust standing rule, not a redefinition of indirect purchaser.

By nevertheless claiming that the exception applies to them, Plaintiffs concede that they are in fact indirect purchasers. How so? Well, because the ownership-or-control exception applies *only* to indirect purchasers. *See Jewish Hosp., 628 F.2d at 975*. If Plaintiffs had directly purchased anti-vibration rubber parts from Defendants, they would have no reason to rely on the exception; the settlement agreements would expressly permit their new lawsuit.

What's more, the settlement agreements include eight express exclusions from the class-wide releases, none of which references this ownership-or-control exception. The exclusions allow only certain indirect purchasers to bring federal antitrust claims against Defendants. *See Bridgestone Settlement Agreement*, R. 265-2 at PageID 9859-60 (permitting claims asserted by "automobile dealerships" and "equipment dealerships," that are "indirect purchasers of Anti-Vibration Rubber Parts," or claims asserted by "any state, state agency, or instrumentality or political sub-division of a state"). The exclusions also permit **[**14]** any "claims for damages under the state or local laws of any jurisdiction other than an Indirect Purchaser State."[6] *Id.* at PageID 9860. That means that persons or entities who indirectly purchased anti-vibration rubber parts can sue Defendants under state antitrust laws in states, like Michigan, that do not follow the special standing rule of *Illinois Brick. See Mich. Comp. Laws Ann. § 445.778*. Thus, it seems that the settlement agreements explicitly mention how Plaintiffs might sue the manufacturers in the future--namely, under certain state antitrust laws. The failure of the agreements to provide in their exclusions a means by which Plaintiffs, as indirect purchasers, might sue under federal ***antitrust law*** (*e.g.*, through the ownership-or-control exception) strongly suggests that Plaintiffs cannot maintain their federal claims.

C. "OTHER FACTORS"

Two final matters bear mentioning before we conclude. First, the district court mentioned in its order that a number of "other factors" tipped the scale in Plaintiffs' favor. Those factors included its observations that (1) Defendants' counsel did not file a notice in the direct-purchaser lawsuit that it had settled Plaintiffs' claims **[**15]** in the end-payor settlement agreements, (2) Defendants' counsel also did not notify Plaintiffs of its motion to enforce judgment, and finally, (3) Plaintiffs' claims would not be duplicative of the end-payor claims because the end payors sought injunctive relief against Defendants whereas Plaintiffs now seek money damages.

None of those factors has anything to do with the language in the settlement agreements. ***HN10***[] Under Michigan law, courts are prohibited from considering extrinsic evidence to determine the parties' intent when the contract language is clear **[*685]** and unambiguous. *See Kyocera Corp v Hemlock Semiconductor, LLC, 313 Mich. App. 437, 446, 886 N.W.2d 445 (2015)*. The district court did not purport to find ambiguity in the agreements. We do not find ambiguity either. Therefore, the district court's consideration of post-contracting, external evidence of the parties' intent was an abuse of discretion.

Second, the manufacturers raise a number of policy considerations in their briefing on appeal. We decide this case without reference to those considerations. This is a contract case that requires us to interpret a set of terms. ***HN11***[] Where, as here, the language in the contracts is clear and unambiguous, we look only within the four corners of the relevant contracts to accomplish **[**16]** our task. *See, e.g., Old Kent Bank, 243 Mich. App. at 63*.

---

[5] In resolving this appeal, we do not decide whether Plaintiffs are appropriately considered direct purchasers for purposes of antitrust standing. Just a year ago, after the district court denied Defendants' motion to dismiss the direct-purchaser lawsuit, we held, on review of a petition to appeal under *28 U.S.C. § 1292(b)*, that the facts were not sufficiently "fleshed out" to decide whether Plaintiffs had antitrust standing under the ownership-or-control exception. *In re: Auto parts Antitrust Litig, et al.*, Dkt. No. 19-106, Doc. No. 13 at 2. No additional discovery has been conducted in the interim to alter that holding.

[6] After *Illinois Brick* was decided, several states passed statutes rejecting the logic of the special standing rule in *Illinois Brick*. Those states that amended their antitrust laws to specifically allow indirect purchasers to bring suit are often called "Repealer States"; the states that did not amend their laws after *Illinois Brick* are referred to as "Indirect Purchaser States."

IV.

Having evaluated the terms of the settlement agreements, we hold that they unambiguously bar Plaintiffs from maintaining their alleged direct-purchaser lawsuit. The district court abused its discretion in holding otherwise. We therefore reverse the district court and remand for further proceedings consistent with this opinion.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN1[] **Class Actions, Certification of Classes**

Under Fed. R. Civ. P. 23, a court may certify a class only if it finds that the proposed class satisfies all the requirements of Fed. R. Civ. P. 23(a) and that classwide adjudication is appropriate for one of the reasons set forth in Fed. R. Civ. P. 23(b).

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN2[] **Prerequisites for Class Action, Adequacy of Representation**

Fed. R. Civ. P. 23(a) requires that a class meet the following four criteria:1) the class is so numerous that joinder of all members is impracticable (numerosity), 2) there are questions of law or fact common to the class (commonality), 3) the claims or defenses of the representative parties are typical of the claims or defenses of the class (typicality) and 4) the representative parties will fairly and adequately protect the interests of the class (adequacy). Fed. R. Civ. P. 23(a)(1)-(4).

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN3[] **Prerequisites for Class Action, Adequacy of Representation**

A district court must conduct a rigorous analysis under Fed. R. Civ. P. 23 before certifying a class. The Court may look behind the pleadings, predict how specific issues will become relevant to facts in dispute and conduct a merits inquiry only to the extent that the merits overlap with the Rule 23 criteria. Courts should also be mindful that the prerequisites of commonality, typicality and adequacy tend to merge in their analysis.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Evidence > Burdens of Proof > Preponderance of Evidence

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN4[] **Prerequisites for Class Action, Commonality**

Fed. R. Civ. P. 23(b)(3) requires that common questions of law or fact predominate over those affecting individual class members and that a class action be the superior method for fair and efficient adjudication. Fed. R. Civ. P. 23(b)(3). Implicit in Rule 23 is the additional requirement that plaintiffs demonstrate by a preponderance of the evidence that the class is currently and readily ascertainable based on objective criteria.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN5[] **Prerequisites for Class Action, Numerosity**

Fed. R. Civ. P. 23(a)(1) requires that the class be so numerous that joinder of all members is impracticable. Generally if the named plaintiff demonstrates that the potential number of plaintiffs exceeds 40, the first prong of Fed. R. Civ. P. 23(a) has been met. Nonetheless, there is no requirement of a minimum number of plaintiffs and numerosity requirement is satisfied where class members are geographically dispersed and judicial economy favors proceeding as a class action.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

HN6[] **Prerequisites for Class Action, Commonality**

To satisfy commonality, there must be questions of law or fact common to the class. Fed. R. Civ. P. 23(a)(2). The commonality requirement is a low hurdle, and even a single common question can satisfy this element.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN7[] **Prerequisites for Class Action, Typicality**

The typicality requirement is satisfied when the claims or defenses of the representative parties are typical of the claims or defenses of the class. Fed. R. Civ. P. 23(a)(3). Typicality does not require that all putative class members share identical claims. Rather, typicality is met when the representative's claims arise from the same event or practice or course of conduct that gives rise to the claims of other class members, and are based on the same legal theory. In antitrust cases such as the instant action, the typicality requirement is particularly likely to be satisfied where all claims arise out of the same alleged antitrust violations.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Constitutional Law > ... > Case or Controversy > Standing > Elements

HN8[] **Standing, Requirements**

Competitors and consumers in the market where trade is allegedly restrained are presumptively the proper plaintiffs in an antitrust action, it does not follow that consumers outside of that market necessarily lack standing. Rather, standing depends on whether the injury suffered flows from that which makes defendants' acts unlawful.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN9[] **Class Actions, Certification of Classes**

In the context of a motion for class certification, the purpose of the typicality requirement is to ensure that the named representative's claims have the same essential characteristics as the claims of the class at large.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Class Members > Named Members

HN10[] **Prerequisites for Class Action, Adequacy of Representation**

In the context of a motion for class certification, the element of adequacy is satisfied if 1) there is no conflict between the interest of the named plaintiffs and the class members and 2) counsel chosen by the named plaintiffs are qualified and able to litigate the claims vigorously.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN11[] **Prerequisites for Class Action, Commonality**

In addition to the Fed. R. Civ. P. 23(a) requirements, a proposed class must establish that questions of law or fact common to class members predominate over any questions affecting only individual members. Fed. R. Civ. P. 23(b)(3) To satisfy the predominance requirement, the proposed class must show that the fact of antitrust impact can be established through common proof and that any resulting damages would likewise be established by sufficiently common proof. They need not prove that each element of their claims is susceptible to classwide proof.

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN12[] **Standing, Requirements**

That kind of common evidencehas generally been found sufficient to establish antitrust injury on a classwide basis, except when a large number of putative class members are uninjured.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Indirect Purchasers

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN13[] **Purchasers, Indirect Purchasers**

It is common practice to use averages to determine whether class members suffered a common antitrust injury in direct purchaser actions. Any potential variation among class members in the actual prices paid for each drug is more relevant to assessing the extent of the injury suffered than to determining the existence of an injury at all.

Antitrust & Trade Law > Sherman Act > Claims

HN14[] **Sherman Act, Claims**

An antitrust injury occurs the moment the purchaser incurs an overcharge, whether or not that injury is later offset and that a single overcharge is sufficient to constitute such an injury. Paying an overcharge caused by the alleged anticompetitive conduct on a single purchase suffices to show — as a legal and factual matter — impact or fact of damage.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN15[] Prerequisites for Class Action, Maintainability

Prior to certification, Fed. R. Civ. P. 23(b)(3) requires a showing that the class action would be superior to other available methods for fairly and efficiently adjudicating the controversy. That Rule provides a nonexhaustive list of factors for courts to consider when determining whether the superiority requirement has been met: (A) the interest of members of the class in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; (D) the difficulties likely to be encountered in the management of a class action.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN16[] Class Actions, Certification of Classes

To establish that common issues predominate, the proposed class must show that the fact of antitrust impact can be established through common proof and that any resulting damages would likewise be established by sufficiently common proof.

Torts > Products Liability > Theories of Liability > Strict Liability

HN17[] Theories of Liability, Strict Liability

Antitrust injury occurs the moment the purchaser incurs an overcharge, whether or not that injury is later offset. For that reason, offsets such as consumer contributions and manufacturer rebates are more relevant to the extent of damages than to the incurrence of injury.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Maintainability

HN18[] Class Actions, Certification of Classes

To certify the proposed classes under Fed. R. Civ. P. 23(b)(3), variations in state law must not swamp any common issues and defeat predominance. The necessity of applying the laws of multiple states does not automatically defeat class certification if the variation among those laws is not particularly material or significant.

Civil Procedure > ... > Jury Trials > Verdicts > Special Verdicts

HN19[] Verdicts, Special Verdicts

In the context of complex litigations, any minor differences in the relevant state laws can be accommodated through the use of special jury instructions and verdict forms. Differences in state law can be readily accommodated on a special verdict form or through other mechanisms routinely employed in complex litigations.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Evidence > Burdens of Proof > Preponderance of Evidence

HN20[] Class Actions, Certification of Classes

To satisfy the ascertainability requirement, the proposed class must show, by a preponderance of the evidence, that the class is currently and readily ascertainable based on objective criteria. At the certification stage, it is unnecessary to identify every class member but the class must be sufficiently ascertainable to permit a court to decide and declare who will receive notice, who will share in any recovery, and who will be bound by the judgment.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

HN21[] Class Actions, Certification of Classes

There is no requirement that a class be identified or even that the methodology for doing so be in place by the time of certification.

Opinion

[*297] MEMORANDUM & ORDER

This case involves five actions which were centralized in this Court and then divided into two putative class actions against Ranbaxy Inc. and Sun Pharmaceutical Industries Limited (collectively, "Ranbaxy" or "defendants").

Direct purchaser plaintiffs ("DPPs"), such as wholesalers, purchase generic drugs directly from the drug **[**4]** manufacturer. End-payor plaintiffs ("EPPs") are third-party payors ("TPPs") such as health plans and insurance companies that indirectly purchase (and/or provide reimbursement for generic drugs at the end of the distribution chain) from retailers and other financial intermediaries such as pharmaceutical benefit managers ("PBMs"). The DPPs and EPPs ("plaintiffs") bring claims against Ranbaxy for violations of the **[*298]** *Racketeer Influenced and Corrupt Organizations Act ("RICO")*, federal and state ***antitrust law*** and state consumer protection law.

Pending before the Court are the motions of the DPPs and EPPs for class certification under *Federal Rules of Civil Procedure 23(a)* and *(b)(3)*. For the reasons that follow, those motions will be allowed.

I. Background

A. Factual Background

Both the Court and the parties are well acquainted with the facts, which are described in detail in the Report and Recommendation of United States Magistrate Judge M. Page Kelley on Ranbaxy's motion to dismiss the complaint of plaintiffs in the original action in this Court prior to centralization. See *Meijer, Inc. v. Ranbaxy, Inc., No.1:15-cv-11828-NMG, 2016 U.S. Dist. LEXIS 120998 (D. Mass. Sept. 7, 2016)*. For purpose of completeness, however, the Court provides the following abbreviated summary of the background relevant to the pending motions.

In the early 2000s, Ranbaxy filed a number of applications with the United States **[**5]** Food and Drug Administration ("FDA") seeking approval to manufacture and market generic versions of various pharmaceuticals. Under the *Hatch-Waxman Act, Pub. L. No. 98-417, 98 Stat. 1585 (1984)*, the first generic drug manufacturer to submit a substantially complete Abbreviated New Drug Application ("ANDA") is entitled to a 180-day period of exclusivity during which no other manufacturer is permitted to market a generic version of the subject drug. The FDA may revoke the exclusivity period if the generic manufacturer fails to obtain tentative approval from the FDA, which requires the manufacturer to demonstrate that its facilities comply with current good manufacturing practices.

In 2004 and 2005, Ranbaxy submitted the first substantially complete ANDAs for three brand drugs at issue here: Diovan, Nexium and Valcyte.[1] It subsequently obtained tentative approval from the FDA for its ANDAs for each of those drugs in 2007 and 2008. Despite its early success, Ranbaxy failed to secure final approval for its generic version of Diovan until June, 2014 and did not bring that generic to market until July, 2014. Before defendant could secure final approval for its generic Nexium and Valcyte ANDAs, the FDA revoked its tentative approval for both drugs **[**6]** in 2014 and Ranbaxy's generic versions were never brought to market.

Plaintiffs allege that Ranbaxy violated RICO, federal and state antitrust laws and state consumer protection laws by submitting multiple ANDAs with missing, incorrect or fraudulent information, thereby wrongfully acquiring exclusivity periods and delaying the market entry of generic Diovan, Nexium and Valcyte. Plaintiffs assert that but for defendants' allegedly anti-competitive conduct, generic versions of those three drugs would have entered the market and been available at lower prices much sooner. As a result, plaintiffs contend they paid artificially inflated prices for generic versions of Diovan, Nexium and Valcyte during the Class Periods.

B. The Proposed Classes

The DPPs seek certification of the following three classes:

(1) All persons or entities in the United States and its territories who purchased Diovan and/or AB-rated generic versions of Diovan directly from any of the Defendants or any brand or generic manufacturer at any time during the period September 21, 2012, through and until the anticompetitive effects of the Defendants' conduct cease (the "Diovan Class Period");

(2) All persons or entities in the **[**7]** United States and its territories who purchased Valcyte and/or AB-rated generic versions of Valcyte directly from any of the Defendants or any brand or generic manufacturer, but excluding those purchasers who only purchased branded Valcyte, at any time during the period August 1, 2014, through and until the anticompetitive effects **[*299]** of the Defendants' conduct cease (the "Valcyte Class Period"); and

(3) All persons or entities in the United States and its territories who purchased Nexium and/or AB-rated generic versions of Nexium directly from any of the Defendants or any brand or generic manufacturer at any time during the period May 27, 2014, through and until the anticompetitive effects of the Defendants' conduct cease (the "Nexium Class Period").

Excluded from each of the direct purchaser classes are the defendants and their officers, directors, management, employees, subsidiaries, or affiliates, and all governmental entities.

The EPPs seek to certify the following three nationwide RICO classes:

(1) All persons or entities in the United States and its territories that indirectly purchased, paid, and/or provided reimbursement for some or all of the purchase price of Diovan and/or AB-rated **[**8]** generic versions of Diovan from any of the Defendants or any brand or generic manufacturer at any time during the class period September 28, 2012, through and until the anticompetitive effects of the Defendants' conduct cease (the "Diovan Class Period");

(2) All persons or entities in the United States and its territories that indirectly purchased, paid, and/or provided reimbursement for some or all of the purchase price of AB-rated generic versions of Nexium from any of the Defendants or any brand or generic manufacturer, other than for resale, at any time during the class period May 27, 2014, through and until the anticompetitive effects of the Defendants' conduct cease (the "Nexium Class Period"); and

(3) All persons or entities in the United States and its territories that indirectly purchased, paid, and/or provided reimbursement for some or all of the purchase price of Valcyte and/or AB-rated generic versions of Valcyte from any of the Defendants or any brand or generic manufacturer, other than for resale, at any time during the

[1] Diovan is an antihypertensive drug used to treat high blood pressure and heart failure, among other things. Valcyte is an antiviral medication. Nexium is a proton-pump inhibitor used to treat gastroesophageal reflux disease.

class period August 1, 2014, through and until the anticompetitive effects of the Defendants' conduct cease (the "Valcyte Class Period").

The EPPs also seek **[**9]** certification of the following three state law classes:

(1) All persons or entities in the Indirect Purchaser States that indirectly purchased, paid, and/or provided reimbursement for some or all of the purchase price of Diovan and/or AB-rated generic versions of Diovan from any of the Defendants or any brand or generic manufacturer, other than for resale, at any time during the class period September 28, 2012, through and until the anticompetitive effects of the Defendants' conduct cease (the "Diovan Class Period");

(2) All persons or entities in the Indirect Purchaser States that indirectly purchased, paid, and/or provided reimbursement for some or all of the purchase price of AB-rated generic versions of Nexium from any of the Defendants or any brand or generic manufacturer, other than for resale, at any time during the class period May 27, 2014, through and until the anticompetitive effects of the Defendants' conduct cease (the "Nexium Class Period"); and

(3) All persons or entities in the Indirect Purchaser States that indirectly purchased, paid, and/or provided reimbursement for some or all of the purchase price of Valcyte and/or AB-rated generic versions of Valcyte from any of **[**10]** the Defendants or any brand or generic manufacturer, other than for resale, at any time during the class period August 1, 2014, through and until the anticompetitive effects of the Defendants' conduct cease (the "Valcyte Class Period").

Excluded from all six of the EPPs' proposed classes are:

(a) natural person consumers; (b) Defendants, their officers, directors, management, employees, subsidiaries, and affiliates; (c) all federal and state governmental entities except for cities, towns, municipalities, or counties with self-funded prescription drug plans; (d) all persons or entities who purchased Diovan, Nexium, Valcyte, or their AB-rated generic versions for purposes of resale from any of the Defendants **[*300]** or any brand or generic manufacturer; (e) fully insured health plans (i.e., health plans that purchased insurance covering 100% of their reimbursement obligation to members); and (f) pharmacy benefit managers.

C. Relevant Procedural History

The five actions comprising this multidistrict litigation were centralized in this Court in February, 2019. In April, 2019, the Court consolidated for pretrial purposes all direct purchaser actions and all end-payor actions that were centralized in **[**11]** this District and assigned to this Court, thereby creating two putative class actions. Amended complaints were filed by the DPPs and EPPs later that month. The EPPs further amended their complaint in February, 2020 and March, 2021. The DPPs also amended their complaint in March, 2021.

In November, 2020, the DPPs and EPPs each moved for class certification. Defendants have filed oppositions to class certification to which each group of plaintiffs filed replies. This Court heard oral argument on the motions in April, 2021.

II. Legal Standard

HN1[] Under *Federal Rule of Civil Procedure 23*, a court may certify a class only if it finds that the proposed class satisfies all the requirements of *Rule 23(a)* and that classwide adjudication is appropriate for one of the reasons set forth in *Rule 23(b)*. See *Smilo v. Sw. Bell Mobile Sys., Inc., 323 F.3d 32, 38 (1st Cir. 2003)*.

HN2[] *Rule 23(a)* requires that a class meet the following four criteria:

1) the class is so numerous that joinder of all members is impracticable (numerosity),
2) there are questions of law or fact common to the class (commonality),

3) the claims or defenses of the representative parties are typical of the claims or defenses of the class (typicality) and
4) the representative parties will fairly and adequately protect the interests of the class (adequacy).

Fed. R. Civ. P. 23(a)(1)-(4).

HN3[] A district court **[**12]** must conduct a "rigorous analysis" under *Rule 23* before certifying the class. Smilo, 323 F.3d at 38. The Court may look behind the pleadings, predict how specific issues will become relevant to facts in dispute and conduct a merits inquiry only to the extent that the merits overlap with the *Rule 23* criteria. *In re New Motor Vehicles Canadian Exp. Antitrust Litig., 522 F.3d 6, 20 (1st Cir. 2008)*. Courts should also be mindful that the prerequisites of commonality, typicality and adequacy "tend to merge" in their analysis. *Wal-Mart Stores, Inc. v. Dukes, 564 U.S. 338, 349 n.5, 131 S. Ct. 2541, 180 L. Ed. 2d 374 (2011)*.

Plaintiffs seek to certify all classes under ***HN4***[] *Rule 23(b)(3)* which requires that common questions of law or fact "predominate" over those affecting individual class members and that a class action be the "superior" method for fair and efficient adjudication. *Fed. R. Civ. P. 23(b)(3)*. Implicit in *Rule 23* is the additional requirement that plaintiffs demonstrate by a preponderance of the evidence that the class is "currently and readily ascertainable based on objective criteria." *In re Nexium Antitrust Litig., 777 F.3d 9, 19 (1st Cir. 2015)* ("Nexium III") (internal citation omitted).

III. DPPs' Motion for Class Certification

A. *Rule 23(a)* Requirements

Of the four *Rule 23(a)* requirements, defendants explicitly challenge only the DPPs' showing of adequacy of representation under *Rule 23(a)(4)*. Given that the analysis of commonality, typicality and adequacy of representation tend to merge, this Court assumes that defendants' reliance **[**13]** on typicality relates to the elements of commonality and adequacy as well. Although defendants do not expressly contest the numerosity requirement of *Rule 23(a)(1)*, they refer to the size of the proposed classes in the context of the superiority requirement of *Rule 23(b)(3)*. Accordingly, the Court will briefly address each of the *Rule 23(a)* requirements.

1. Numerosity

HN5[] *Rule 23(a)(1)* requires that the class be "so numerous that joinder of all members is impracticable." The DPPs have shown that the proposed Diovan class contains 62 members, **[*301]** the proposed Nexium class contains at least 51 members and the proposed Valcyte class contains 39 members. At a minimum, the proposed Diovan and Nexium classes are sufficiently numerous. See *Garcia-Rubiera v. Calderon, 570 F.3d 443, 460 (1st Cir. 2009)* ("[G]enerally if the named plaintiff demonstrates that the potential number of plaintiffs exceeds 40, the first prong of *Rule 23(a)* has been met." (internal citation omitted)).

At oral argument, defendants highlighted that the DPPs' expert admits that five of the 39 Valcyte class members suffered no injury. Nonetheless, there is no requirement of a minimum number of plaintiffs and courts in similar cases have found the numerosity requirement to be satisfied where, as here, class members are geographically dispersed and judicial **[**14]** economy favors proceeding as a class action. See, e.g., *In re K-Dur Antitrust Litig., No. 01-1652, 2008 U.S. Dist. LEXIS 118396, at *19 n.4 (D.N.J. Apr. 14, 2008)* ("[E]ven if the proposed Class consisted of only 38 members, that fact, alone, would not defeat numerosity, particularly where the members appear to be dispersed geographically and the interests of judicial economy would be served by resolving the common issues raised in this case in a single action, rather than 38 individual ones.").

The Court finds that the DPPs have established numerosity.

2. Commonality

HN6[] To satisfy commonality, there must be questions of law or fact common to the class. *Fed. R. Civ. P. 23(a)(2)*. The commonality requirement is a "low hurdle," *Swack v. Credit Suisse First Boston, 230 F.R.D. 250, 258 (D. Mass. 2005)*, and even a single common question can satisfy this element. See *Dukes, 564 U.S. at 359*.

The DPPs contend that commonality is satisfied as to both the antitrust and RICO claims. They note that all class members allege injury from the same misconduct, namely the purported anti-competitive scheme to delay the entry of cheaper generic drugs into the market. They also assert that their RICO claims depend on common issues such as whether the evidence will prove a RICO conspiracy, enterprise and pattern of racketeering activity.

This Court finds that, because the DPPs have shown that their claims focus on defendants' conduct, **[**15]** commonality has been sufficiently pled.

3. Typicality

HN7[] The typicality requirement is satisfied when the claims or defenses of the representative parties are typical of the claims or defenses of the class. *Fed. R. Civ. P. 23(a)(3)*. Typicality does not require that all putative class members share "identical claims." *Garcia v. E.J. Amusements of N.H., Inc., 98 F. Supp. 3d 277, 289 (D. Mass. 2015)* (citation omitted). Rather, typicality is met when the representative's claims

> arise[] from the same event or practice or course of conduct that gives rise to the claims of other class members, and . . . are based on the same legal theory.

Garcia-Rubiera v. Calderon, 570 F.3d 443, 460 (1st Cir. 2009) (citation omitted). In antitrust cases such as the instant action, the typicality requirement is "particularly likely" to be satisfied where all claims arise out of the same alleged antitrust violations. *In re Zetia Ezetimihe Antitrust Litig., No. 2:18-md-2836, 2020 U.S. Dist. LEXIS 112331, at *57-58 (E.D. Va. June 18, 2020)* (internal citations omitted).

Defendants contend that Meijer is an atypical class representative because it is subject to unique defenses unavailable to other class members. Specifically, they assert that the DPPs purport to show monopolization by Ranbaxy only in the market for generic drugs. For that reason, defendants assert that the DPPs lack standing to assert claims related to the purchase of brand drugs. Meijer, as a purchaser of brand drugs as well as generics, **[**16]** would therefore benefit from a broader definition of the antitrust market. Ranbaxy submits that such a preference creates a conflict between Meijer and generic-only purchasers over the appropriate market definition because a narrower definition of the antitrust market would allow generic-only purchasers to prove monopolization more easily.

[*302] Defendants' contention is unpersuasive. Although it is true that *HN8*[] "[c]ompetitors and consumers in the market where trade is allegedly restrained are presumptively the proper plaintiffs" in an antitrust action, *Breiding v. Eversource Energy, 344 F. Supp. 3d 433, 452 (D. Mass. 2018)* (quoting *Serpa Corp. v. McWane, Inc., 199 F.3d 6, 10-11 (1st Cir. 1999)*), it does not follow that consumers outside of that market necessarily lack standing. Rather, standing depends on whether the injury suffered "flows from that which makes defendants' acts unlawful." *Serpa Corp., 199 F.3d at 10* (internal citation omitted). Here, the DPPs allege that all class members have suffered overcharge injuries flowing from Ranbaxy's anti-competitive conduct.

In any event, the Court need not conclusively resolve that dispute because brand-only purchasers are, in fact, consumers in the generic market allegedly restrained by Ranbaxy's anti-competitive conduct given that the delay of generics prevented brand-only purchasers from switching to **[**17]** purchasing cheaper generics.

Furthermore, *HN9*[] the purpose of the typicality requirement is

> to ensure that the named representative's claims have the same essential characteristics as the claims of the class at large.

In re Neurontin Mktg., Sales Practices & Prods. Liab. Litig., 257 F.R.D. 315, 321 (D. Mass. 2009) (internal citation omitted).

Here, Meijer's claim arises from the same course of conduct and is based on the same legal theories that give rise to the claims of all other members of the proposed DPP classes. All class members, including Meijer, allege that they suffered an overcharge injury because Ranbaxy improperly delayed entry of generic drugs in violation of the Sherman Act and RICO. The Court finds that to be sufficient to satisfy the typicality requirement. See Zetia, 2020 U.S. Dist. LEXIS 112331, at *60-61 (concluding that the claims of the named plaintiff are typical of the class because he "alleges the same injury as the rest of the class" and "share[s] the same interest in producing proof in relation to the existence, scope, duration, and effect of [the] alleged conspiracy.").

4. Adequacy

HN10[] The element of adequacy is satisfied if 1) there is no conflict between the interest of the named plaintiffs and the class members and 2) counsel chosen by the named plaintiffs are qualified and able to litigate the claims vigorously. **[**18]** S. States Police Benevolent Ass'n v. First Choice Armor & Equip., Inc., 241 F.R.D. 85 (D. Mass. 2007) (citing Andrews v. Bechtel Power Corp., 780 F.2d 124, 130 (1st Cir. 1985)).

Notwithstanding defendants' arguments to the contrary, the Court has already determined that there is no conflict between Meijer as the named plaintiff and the rest of the proposed class members. As to the second criterion, defendants do not dispute that the DPPs' counsel is qualified and able to litigate the claims vigorously under Rule 23(a)(4) and the DPPs have shown that their counsel has extensive experience litigating similar antitrust class actions.

Accordingly, the adequacy element is satisfied.

B. Rule 23(b)(3) Predominance

HN11[] In addition to the Rule 23(a) requirements, the DPPs must establish that

> questions of law or fact common to class members predominate over any questions affecting only individual members.

Fed. R. Civ. P. 23(b)(3). To satisfy the predominance requirement, the DPPs must show that

> the fact of antitrust impact can[] be established through common proof and that any resulting damages would likewise be established by sufficiently common proof.

Nexium III, 777 F.3d at 18 (internal quotation marks omitted). They need not prove that each element of their claims is susceptible to classwide proof. See Amgen Inc. v. Conn. Ret. Plans & Trust Funds, 568 U.S. 455, 469, 133 S. Ct. 1184, 185 L. Ed. 2d 308 (2013).

Defendants assert that the DPPs cannot show that common issues predominate because **[*303]** individualized inquiries will be required to determine whether **[**19]** each class member suffered an antitrust injury. The model used by the DPPs' expert, Dr. Meredith Rosenthal, compares the monthly average prices of the at-issue drugs with the hypothetical average prices for those same drugs in a world without the alleged anti-competitive conduct ("but-for world"). According to Ranbaxy, that model fails to account for price variability among class members in the real world, thereby obscuring uninjured class members.

The Court is satisfied that the DPPs have met their burden under Rule 23(b)(3) to demonstrate that antitrust impact is capable of proof by common evidence. Dr. Rosenthal relies on pharmaceutical economic literature, contemporaneously-created business forecasts from brand and generic manufacturers of each relevant drug and transactions-level sales data for each at-issue drug to conclude that all or virtually all of the members of each proposed class have suffered an overcharge injury. **HN12**[] That kind of common evidence has generally been found sufficient to establish [antitrust] injury on a classwide basis, except when a large number of putative class members are uninjured.

*In re Intuniv Antitrust Litig., No. 1:16-cv-12653, 2019 U.S. Dist. LEXIS 162792, at *29 (D. Mass. Sept. 24, 2019)* (collecting cases); see also *In re Loestrin 24 FE Antitrust Litig., No. 13-2472, 2019 U.S. Dist. LEXIS 118308, at *47-48 (D.R.I. July 2, 2019)* (concluding that plaintiffs established classwide injury **[**20]** through "a combination of transactional data and manufacturers' forecasts to predict prices in the but-for world"). As discussed in further detail below, this is not a case in which a large number of DPP class members are uninjured.

Defendants' attack on the use of averages by Dr. Rosenthal is misguided. First,***HN13***[] it is

common practice to use averages to determine whether class members suffered a common antitrust injury

in direct purchaser actions. *In re Zetia (Ezetimibe) Antitrust Litig., 481 F. Supp. 3d 571, 578 (E.D. Va. 2020)*. Any potential variation among class members in the actual prices paid for each drug is more relevant to assessing the extent of the injury suffered than to determining the existence of an injury at all. See *In re Nexium (Esomeprazole) Antitrust Litig., 296 F.R.D. 47, 57-58 (D. Mass. 2013)* ("Nexium II") ("The Defendants' focus on the variations in purchase price among the putative class members directly challenges the Direct Purchasers' damages model, but it does not weaken their assertion of common impact.").

Second, Dr. Rosenthal's methodology does not obscure a significant number of uninjured class members. Defendants submit that each DPP pays a unique price based upon factors such as individualized negotiations with manufacturers, chargebacks and other credits for which Dr. Rosenthal fails to account. They ignore, however, **[**21]** that ***HN14***[] an antitrust injury

occurs the moment the purchaser incurs an overcharge, whether or not that injury is later offset

and that a single overcharge is sufficient to constitute such an injury. *Nexium III, 777 F.3d at 27* ("Paying an overcharge caused by the alleged anticompetitive conduct on a single purchase suffices to show — as a legal and factual matter — impact or fact of damage.").

By using monthly average prices, Dr. Rosenthal's model necessarily incorporates the variation across class members in the actual and but-for prices of each drug to come to a reasonable conclusion that class members suffered a common injury. See *Loestrin 24, 2019 U.S. Dist. LEXIS 118308, at *46* (approving of a methodology which incorporates the "variation across Class members in the actual prices they paid and in the prices they would have paid, providing averages that correctly summarize the combined effects of all of these Class members in a single classwide overcharge measure."). Through this "well accepted" methodology, id., Dr. Rosenthal demonstrates that the average but-for prices were always or almost always below the average prices actually paid, thus proving a common injury. **[*304]** Even if the proposed DPP classes include a de minimis number of uninjured members, that fact **[**22]** alone is not fatal to class certification at this early stage. See *Loestrin 24, 2019 U.S. Dist. LEXIS 118308, at *48* ("The prospect that a handful of identifiable class members may be uninjured is not a barrier to class certification."); *Nexium III, 777 F.3d at 25* ("Numerous courts have certified plaintiff classes even though the plaintiffs have not been able to use common evidence to show harm to all class members."). The DPPs have persuasively shown through Dr. Rosenthal's analysis that the number of potentially uninjured class members is in single digits and that they can be identified and excluded at a later stage in a manageable fashion. Consequently, this is not a case in which certification of the classes would be inappropriate because

any class member may be uninjured, and . . . apparently thousands who in fact suffered no injury.

In re Asacol Antitrust Litig., 907 F.3d 42, 53 (1st Cir. 2018).

In sum, the DPPs have sufficiently shown that classwide injury and damages can be demonstrated through evidence common to the class and that common issues predominate over individualized inquiries.

C. *Rule 23(b)(3)* Superiority

HN15[] Prior to certification, *Rule 23(b)(3)* requires a showing that the class action would be superior to other available methods for fairly and efficiently adjudicating the controversy.

That Rule provides a "nonexhaustive list of factors" **[**23]** for courts to consider when determining whether the superiority requirement has been met:

> (A) the interest of members of the class in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; (D) the difficulties likely to be encountered in the management of a class action.

Amchem Prods. v. Windsor, 521 U.S. 591, 615-16, 117 S. Ct. 2231, 138 L. Ed. 2d 689 (1997) (quoting *Fed. R. Civ. P. 23(b)(3)*).

Defendants contend that representative litigation is not superior because 1) the proposed DPP classes are small in number, 2) the alleged damages are large and concentrated in only three DPPs and 3) there are fundamental intra-class conflicts.

Two of those three arguments have already been addressed. First, the Court has determined that the purported conflict between generic-only and brand-only purchasers poses no substantial threat to class cohesion. Second, the Court has concluded that each of the three proposed classes is sufficiently numerous that joinder would be impracticable and judicial economy favors proceeding as a class action. Consequently, neither **[**24]** the alleged intra-class conflict nor the purported small size of the classes poses an obstacle to certification.

As to defendant's contention regarding the concentration of damages among a small number of the DPPs, that fact does not defeat certification. Where several class members are "large, well-capitalized companies with multi-million dollar claims," class resolution is still superior if

> the majority of the proposed class members have negative value claims (i.e., the expenses, including expert fees, exceed their possible recovery).

*Am. Sales Co., LLC v. Pfizer, Inc., No. 2:14cv361, 2017 U.S. Dist. LEXIS 137222, at *31 (E.D. Va. July 28, 2017)*. Here, the DPPs have shown, using data provided by Ranbaxy's expert, that many members of the proposed classes would likely have negative value claims if forced to litigate in separate actions. Even if some class members do have economic incentives to litigate their claims individually, counsel for the DPPs noted at oral argument that some members would still be dissuaded from doing so out of fear of retaliation by their suppliers.

Finally, class resolution is particularly appropriate here given that "in the complex **[*305]** context of delayed generic entry the benefits of *Rule 23* have been widely recognized." *Id. at 53*. Indeed, representative litigation of the DPPs' claims is **[**25]** fair and efficient because it will "avoid duplicative, expensive, and potentially inconsistent adjudication of the common claims." Id.

IV. EPPs' Motion for Class Certification

As to the EPPs, Defendants do not oppose certification of their classes under the *Rule 23(a)* requirements. Nevertheless, the Court concludes that the requirements of numerosity, commonality, typicality and adequacy of representation are met here.

The proposed classes are sufficiently numerous such that joinder would be impracticable considering that each class is comprised of thousands of TPPs who paid for prescriptions of the subject drugs during the class hearings. Commonality is satisfied because the EPPs allege injury from the same allegedly unlawful conduct of defendants. The EPPs have shown that the claims and defenses of the class representatives are typical of those of the class because all EPP claims arise from the same anti-competitive scheme. Finally, the EPPs have satisfied the representation requirement by explaining that the interests of the class representatives are aligned with those of the other class members.

Ranbaxy does, however, oppose certification of the EPPs' proposed classes for failure to satisfy **[**26]** the predominance and ascertainability requirements of *Rule 23(b)(3)*. The Court will address those issues seriatim.

A. *Rule 23(b)(3)* Predominance

HN16[] To establish that common issues predominate, the EPPs must show that

> the fact of antitrust impact can[] be established through common proof and that any resulting damages would likewise be established by sufficiently common proof.

Nexium III, 777 F.3d at 18 (internal quotation marks omitted).

Ranbaxy contends that the EPPs fail to satisfy the predominance requirement for two reasons. First, defendants submit that the use of aggregate pricing to establish classwide antitrust injury fails to account for substantial price variability and thus conceals the existence of uninjured class members. Second, Ranbaxy maintains that significant variation in the state law governing the EPPs' claims causes individual questions of law to predominate over common ones.

1. Common Injury Provable by Common Evidence

Ranbaxy challenges the methodology used by the EPPs' expert, Dr. Rena Conti, for relying on "average prices, average copayments, and average rebates to measure injury." According to defendants, because individual payments made by TPPs for the subject drugs vary widely due to factors such as cost-sharing and **[**27]** rebates, Dr. Conti's methodology obscures class members who did not overpay and were therefore uninjured.

That argument is virtually identical to the one asserted against the proposed DPP classes and will be rejected for similar reasons. First, Dr. Conti's "yardstick" methodology and her use of averages are widely accepted methods of proving antitrust injury and damages on a classwide basis. See, e.g., *In re Loestrin 24 Fe Antitrust Litig., 410 F. Supp. 3d 352, 389-90 (D.R.I. 2019)* (observing that the "yardstick" method is generally accepted and has been endorsed by the First Circuit Court of Appeals); *In re Nexium Antitrust Litig., 297 F.R.D. 168, 183 (D. Mass. 2013)* ("Nexium I") ("Dr. Rosenthal's aggregate damages analysis demonstrates both common antitrust impact and damages to the class. Further, the End-Payors at this stage of litigation need not prove individualized proof of injury.").

Furthermore, ***HN17***[] antitrust injury

> occurs the moment the purchaser incurs an overcharge, whether or not that injury is later offset.

Nexium III, 777 F.3d at 27. For that reason, offsets such as consumer contributions and manufacturer rebates are more relevant to the extent of damages than to the incurrence of injury. Dr. Conti's analysis also indicates that defendants greatly exaggerate the variation **[*306]** in pricing of the at-issue drugs. For example, graphs in her rebuttal report **[**28]** demonstrate that approximately 99% of the prices paid for those drugs fall within a very narrow range.

Defendants also overstate the extent to which three discrete groups of EPP class members are likely to be uninjured.

First, defendants assert that the EPPs ignore the existence of "brand loyal" TPPs which would not have purchased generics under any circumstances and would have suffered no injury from a delayed generic entry. Ranbaxy faults Dr. Conti for assuming that plans that only purchased brand drugs prior to generic entry and made no purchase after generic entry would have switched to generic in the event of future purchases. Yet such an assumption is reasonable given that the evidence proffered by Dr. Conti shows that brand loyalty is doubtful among TPPs and that meaningful generic competition would likely cause all TPPs to purchase generics. See *Loestrin 24, 410 F. Supp. 3d at 404 n.46* ("That a TPP did not purchase generic Loestrin 24 once it became available is of no moment when we have evidence that, with sustained and robust generic competition, each TPP likely would have made at least one such purchase.")

Defendants also contend that TPPs which manage Medicare D plans are unlikely to be injured because other parties **[**29]** such as the federal government and consumers cover a high percentage of the costs for the at-issue drugs. Similarly, Ranbaxy submits that there are still more uninjured TPPs because they paid a higher price for generics than the brand drugs for which they received higher copayments and rebates. Both arguments can be easily rebutted because, as noted several times before, antitrust injury occurs at the moment of the overcharge regardless of later rebates or other offsets. That some TPPs may have ultimately paid more for generics is relevant to the amount of damages incurred but not for determining antitrust impact.

An overcharge injury occurs as long as the price for one of the subject drugs is higher for a purchaser in the actual world than it would have been in the but-for world. The EPPs have demonstrated by virtue of Dr. Conti's careful and thorough analysis that all or virtually all class members suffered an overcharge injury which is provable by common evidence.

2. Variation in State Law

HN18[] To certify the proposed classes under *Rule 23(b)(3)*, "variations in state law [must not] swamp any common issues and defeat predominance." *Nexium I, 297 F.R.D. at 175* (internal citation omitted). The necessity of applying the laws of multiple **[**30]** states does not automatically defeat class certification if the variation among those laws is not particularly material or significant. See *In re Solodyn Antitrust Litig., No. 14-md-02503, 2017 U.S. Dist. LEXIS 170676, at *67-68 (D. Mass. Oct. 16, 2017)* (collecting cases).

Defendants submit that the EPPs cannot demonstrate that the common issues predominate in light of the "significant variation[]" in the 21 state antitrust laws and the 11 consumer protection laws under which the EPPs bring suit. The EPPs respond that any variation is neither material nor significant and that their state law claims should be allowed to proceed.

The variety of state laws applicable to the EPPs' claims does not overwhelm predominance. The EPPs have provided charts compiling the state laws applicable to their antitrust and consumer protection claims and have identified the substantial similarities among those laws and between the state and federal antitrust provisions. Ranbaxy purports to highlight material distinctions between the applicable state laws but the EPPs have shown that much of its argument is based upon misinterpretations of state law. Ranbaxy does not contest that the core elements of the EPPs' claims are virtually identical under all applicable state laws. ***HN19***[] Any minor differences in the relevant state **[**31]** laws can be accommodated through the use of special jury instructions and verdict forms, as suggested by the EPPs. See *In re Lidoderm Antitrust Litig., No. 14-md-02521, 2017 U.S. Dist. LEXIS 24097, at *111 (N.D. Ca. Fed. 21, 2017)* ("[D]ifferences [in state law] can be readily **[*307]** accommodated on a special verdict form or through other mechanisms routinely employed in complex litigations like this one.").

Notably, it is common for courts in the First Circuit and elsewhere to certify end-payor classes in similar antitrust actions even when it is necessary to apply the laws of multiple states. See, e.g., *Solodyn, 2017 U.S. Dist. LEXIS 170676, at *68* (collecting cases); *Lidoderm, 2017 U.S. Dist. LEXIS 24097, at *111* (same). A different result is unwarranted here where the variation in the applicable state laws, to the extent it exists, does not appear to be material or significant.

B. Ascertainability

HN20[] To satisfy the ascertainability requirement, the EPPs

> must show, by a preponderance of the evidence, that the class is currently and readily ascertainable based on objective criteria.

Nexium III, 777 F.3d at 19 (quoting Carrera v. Bayer Corp., 727 F.3d 300, 306 (3d Cir. 2013)). At the certification stage, it is unnecessary to identify every class member but the class must be

> sufficiently ascertainable to permit a court to decide and declare who will receive notice, who will share in any recovery, and who will be bound by the judgment.

Schonton v. MPA Granada Highlands LLC, No. 16-cv-12151, 2019 U.S. Dist. LEXIS 56502, at *8 (D. Mass. Apr. 2, 2019) (internal quotation marks omitted).

The EPPs **[**32]** submit that their proposed procedure will easily ascertain class members through the use of detailed pharmaceutical transaction data from the largest PBMs to identify purchases of the three at-issue drugs and their generic equivalents in the applicable states during the relevant class periods. They declare that uninjured EPPs can also be excised from the classes using the same objective criteria. Ranbaxy rejoins that the EPPs' plan is not administratively feasible for either task.

1. Identifying Eligible Class Members with PBM Data

Defendants first contend that using drug transactions data from the seven largest PBMs would exclude an impermissibly large number of eligible class members.

They underscore data provided by Ms. Craft which demonstrate that the seven largest PBMs processed between 89% and 96% of all retail prescriptions from 2015 to 2018. According to Ranbaxy, that data indicates that as much as 11% of all retail prescriptions will be excluded from the classes. Defendants fail to point out, however, that the 11% figure applies only to the year 2015. The percentage of retail prescriptions processed outside of the seven largest PBMs drops to 8% in 2016 and 4% in both 2017 and **[**33]** 2018.

Ranbaxy further asserts that because some insurers operate their own independent PBMs, the data from the seven largest PBMs would not account for the transactions of such insurers. Yet they fail to identify any such insurers and the analysis provided by plaintiffs' expert demonstrates that the data from the largest PBMs will likely capture all but a negligible number of eligible class members. In any event, additional PBMs could be subpoenaed to achieve greater data coverage if necessary. As discussed in further detail below, the Court is satisfied that such a procedure would be relatively straightforward and inexpensive.

In addition to its challenges to the contents of the PBM data, Ranbaxy contends that the collection of such data is not feasible because there is no evidence regarding whether 1) such data contains sufficient information to identify class members, 2) the data can be easily understood and organized and 3) the PBMs retain such data long enough.

To the contrary, plaintiffs' expert has established that the requisite data exists and has proffered a detailed approach for using it to identify class members. Courts in similar cases have confirmed that the identification **[**34]** of class members is administratively feasible because

> **[*308]** in the pharmaceutical industry, data is collected and maintained at every level of the transaction.

Solodyn, 2017 U.S. Dist. LEXIS 170676, at *51. With respect to the availability of older but still relevant data, Ms. Craft has explained and other courts have recognized that

> economic incentives for PBMs, pharmacies, and other relevant actors are aligned with retaining [prescription drug transaction] data in some form for as long as possible.

Loestrin 24, 410 F. Supp. 3d at 400.

For those reasons, the Court is satisfied that the use of retail prescription transactions information from (at least) the seven largest PBMs is an administratively feasible process by which virtually all eligible class members can be identified.

2. Applying Class Exclusions with PBM Data

Defendants also contend that class identity data cannot be used effectively to apply class exclusions. They maintain that the EPPs have not demonstrated how certain excluded parties, namely governmental entities and fully-insured plans, can be separated from eligible class members such as self-funded health plans.

Ranbaxy overstates the difficulty of determining class exclusions based upon the proposed PBM data sets. It relies heavily on the theory that there **[**35]** is no single way to search datasets for non-class members such as Third-Party Administrators ("TPAs") and Administrative Services Only entities ("ASOs") which facilitate payments on behalf of their self-funded plan clients. Although plaintiffs' expert concedes that the labels "TPA" and "ASO" may not be present in the data, she proffers a detailed explanation of how multiple data fields including the "client/carrier" and "account" fields can be used jointly to identify efficiently such non-class members. To the extent that Ranbaxy complains that Ms. Craft has not tested her proposed methodology, that argument has already been raised and rejected elsewhere. See *In re Namenda Indirect Purchaser Antitrust Litig., No. 1:15-cv-6549, 2021 U.S. Dist. LEXIS 26566, 2021 WL 509988, at *12 (S.D.N.Y. Feb. 11, 2021)* (holding***HN21***[] there is no requirement that a class be identified or even that the methodology for doing so be in place by the time of certification).

As to governmental entities, the EPPs have proffered an administratively feasible method of identifying and excluding those plans "through PBMs, government websites and personnel offices, actuarial consulting databases, and data publishers." Other courts have been satisfied by similar methods of identifying governmental plans in order to exclude them from end-payor classes. See, e.g., **[**36]** *Namenda, 2021 U.S. Dist. LEXIS 26566, 2021 WL 509988, at *12-13* ("Craft notes that PBMs processing the insurance claims would know the identity of any government entities . . . that they service. . . . Information about state/federal insurance plans is also publicly available, and so whoever is analyzing the raw PBM data could use this information to apply the exclusion."); *In re Zetia Ezetimibe Antitrust Litig., No. 2:18-md-2836, 2020 U.S. Dist. LEXIS 183601, at *38 (E.D. Va. Aug. 13, 2020)* ("Craft persuasively testified that PBMs 'absolutely know' which of its clients are federal or state entities and thus would be able to point them out to EPPs.").

Because Ms. Craft has proposed using PBM data in which government plans have been highlighted and using additional third-party data as a backstop, the Court sees no reason to deviate from prior approvals of such approaches to exclude governmental entities.

3. Economic Feasibility of EPPs' Methodology

Finally, Ranbaxy submits that the EPPs have not shown that the proposed methodology for ascertaining class members can be implemented without excessive cost.

Defendants' cost-based objection is without merit. Plaintiffs' expert clearly explains in her rebuttal report that PBMs regularly provide data in response to subpoenas at no cost to the parties and that some PBMs have a "standard litigation package" of claims data to **[**37]** be produced in cases such as this one. Defendants provide no contradictory evidence. Accordingly, there is no indication **[*309]** that the EPPs' proposed methodology would be "prohibitively expensive and thus infeasible." *In re Niaspan Antitrust Litig., 464 F. Supp. 3d 678, 707 (E.D. Pa. 2020)*.

ORDER

For the foregoing reasons, the motions of the Direct Purchaser Plaintiffs and the End-Payor Plaintiffs for class certification (Docket Nos. 286 and 287) are **ALLOWED**.

So ordered.

HN8[] **Statute of Limitations, Time Limitations**

The discovery rule defers accrual until the plaintiff knew, or exercising reasonable diligence, should have known of the wrongful act causing injury.

Torts > ... > Statute of Limitations > Tolling > Discovery Rule

HN9[] **Tolling, Discovery Rule**

The discovery rule does not apply simply because a claimant does not know the specific cause of the injury, the party responsible for it, the full extent of it, or the chances of avoiding it.

Governments > Legislation > Statute of Limitations > Time Limitations

Torts > ... > Statute of Limitations > Tolling > Discovery Rule

HN10[] **Statute of Limitations, Time Limitations**

The discovery rule is a limited exception to statutes of limitation and will only be applied when the nature of the plaintiff's injury is both inherently undiscoverable and objectively verifiable. Texas courts have set the inherently undiscoverable bar high, to the extent that the discovery rule will apply only where it is nearly impossible for the plaintiff to be aware of his injury at the time he is injured.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Governments > Legislation > Statute of Limitations > Pleadings & Proof

Evidence > Burdens of Proof > Allocation

Governments > Legislation > Statute of Limitations > Time Limitations

HN11[] **Motions to Dismiss, Failure to State Claim**

In considering the applicability of the discovery rule at the motion to dismiss stage, the court's inquiry is whether, accepting all well-pleaded facts as true, plaintiffs' alleged injury, by its nature, is unlikely to be discovered within the prescribed limitations period despite due diligence. Defendants bear the burden of proof on the statute of limitations defense. With respect to the statute of limitations defense, dismissal at the Fed. R. Civ. P. 12(b)(6) stage is proper only where it is evident from the complaint that the action is barred and the complaint fails to raise some basis for tolling.

Governments > Courts > Authority to Adjudicate

HN12[] **Courts, Authority to Adjudicate**

Reasonable diligence requires parties to make general inquiries to knowledgeable parties.

Evidence > Privileges > Trade Secrets > Elements

Trade Secrets Law > Protected Information > Business Information

Trade Secrets Law > Protected Information > Know-How

Trade Secrets Law > Trade Secret Determination Factors > Definition Under Common Law

Trade Secrets Law > Misappropriation Actions > Elements of Misappropriation > Existence & Ownership

HN13[] **Trade Secrets, Elements**

A trade secret is any formula, pattern, device or compilation of information which is used in one's business and presents an opportunity to obtain an advantage over competitors who do not know or use it.

Governments > Legislation > Statute of Limitations > Time Limitations

Torts > ... > Concerted Action > Civil Conspiracy > Defenses

HN14[] **Statute of Limitations, Time Limitations**

Civil conspiracy claims are generally subject to a two-year statute of limitations.

Governments > Legislation > Statute of Limitations > Time Limitations

Torts > ... > Statute of Limitations > Tolling > Discovery Rule

HN15[] **Statute of Limitations, Time Limitations**

The discovery rule analysis turns on whether an injury is inherently undiscoverable, not on whether particular actions or causes are undiscoverable.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

Governments > Legislation > Statute of Limitations > Equitable Estoppel

Torts > ... > Fraud & Misrepresentation > Actual Fraud > Defenses

Governments > Legislation > Statute of Limitations > Tolling

Torts > ... > Statute of Limitations > Tolling > Equitable Estoppel

HN16[] **Tolling of Statute of Limitations, Fraudulent Concealment**

Fraudulent concealment tolls the statute of limitations only until the fraud is discovered or could have been discovered with reasonable diligence.

Governments > Legislation > Statute of Limitations > Time Limitations

HN17[] **Statute of Limitations, Time Limitations**

Tortious interference claims are subject to a two-year statute of limitations under Texas law.

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN18[] **Judges, Discretionary Powers**

Fed. R. Civ. P. 15(a)(2) constrains the district court's discretion in deciding whether to allow parties leave to amend. Rule 15 favors granting leave to amend, but denying leave is justified when the movant unduly delays or acts with bad faith or dilatory motive.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN19[] **Standards of Review, Abuse of Discretion**

When parties delay seeking leave to amend for several months after a motion to dismiss is filed, the court has held that district courts do not abuse their discretion in denying the request for leave.

Counsel: For Academy of Allergy & Asthma in Primary Care, United Biologics, L.L.C., doing business as United Allergy Services, Plaintiffs - Appellants, Ronald Casey Low, Benjamin L. Bernell, Esq., Dillon James Ferguson, Pillsbury Winthrop Shaw Pittman, L.L.P., Austin, TX.

For Quest Diagnostics, Incorporated, Defendant - Appellee: Mark H. Hamer, Baker & McKenzie, L.L.P., Washington, DC; Nicholas O'Brian Kennedy, Baker & McKenzie, L.L.P., Dallas, TX.

Judges: Before STEWART, HIGGINSON, and WILSON, Circuit Judges.

Opinion by: CARL E. STEWART

Opinion

[*194] CARL E. STEWART, *Circuit Judge*:

Plaintiffs-Appellants Academy of Allergy & Asthma in Primary Care ("AAAPC") and United Allergy Services ("UAS") sued Quest Diagnostics ("Quest") for conspiring to force them out of the market of providing allergy and asthma testing. The district court dismissed Plaintiffs' claims under *Rule 12(b)(6)*. We AFFIRM in part and REVERSE and REMAND in part.

I. FACTUAL AND PROCEDURAL HISTORY

A. Factual Background

In 2009, UAS began providing allergy testing and treatment services in Texas. UAS's services allowed primary care physicians to treat allergies, disrupting the standard **[**2]** practice that required doctors to refer patients to allergists for treatment. Quest is one of the leading laboratories that receive patient referrals. Phadia is an allergy test producer and a defendant in Plaintiffs' 2014 suit.[1]

According to Plaintiffs' complaint, Quest and Phadia began discussing ways to curtail competition posed by UAS in 2011. The two businesses created a "talking points letter" to be distributed by their employees to discourage doctors from working with UAS. The letter fabricated warnings about patient safety, medical and legal liability, and the risks of fraudulent billing associated with UAS's testing products.

[*195] Unaware that Quest and Phadia were working to push UAS out of the market, UAS began negotiating with Quest to provide alternative methods of allergy testing. Phadia instructed Quest not to work with UAS, and Quest passed along confidential information about UAS to Phadia. Notably, Quest shared UAS's customer list with Phadia in 2012. Phadia then targeted those customers and tried to convince them to cease their relationships with UAS. Quest and Phadia also used a misleading opinion from the Office of the Inspector General of Health and Human

[1] Plaintiffs' 2014 suit will be discussed *infra* Section B.1.

Services **[**3]** ("OIG") that cautioned against businesses like UAS.[2] Through 2014, Quest and Phadia trained their employees to tell physicians and providers about the opinion and to spread misinformation about UAS.

From 2014 to 2016, Quest and Phadia continued to disparage UAS and to conspire to remove it from the market. In September 2014, Phadia and Quest used a Superior Health Plan policy change (that was announced in June 2014 and enacted in August 2014) to convince primary care physicians to stop working with UAS.

As a result of Quest and Phadia's actions, competition declined and the two entities now account for more than 70% of the local market share in allergy testing and immunotherapy.

B. Procedural History

1. The 2014 Lawsuit

In January 2014, UAS began tracking which customers were targeted with disinformation about its testing products. Unaware that Phadia or Quest were involved in spreading the disinformation, UAS filed both state and federal antitrust claims against several physicians. *Acad. of Allergy & Asthma in Primary Care v. Am. Acad. of Allergy, No. SA-14-CV-35-OLG, 2014 U.S. Dist. LEXIS 201028, 2014 WL 12497080, at *2 (W.D. Tex. Sep. 8, 2014)*. As the lawsuit progressed through discovery, Plaintiffs learned of Phadia's role and amended their complaint to add Phadia as a defendant in 2015.

Plaintiffs soon sought discovery from Phadia, and they began **[**4]** to suspect that Quest might have knowledge of Phadia's conduct. Plaintiffs subpoenaed Quest's corporate representative and requested document production in December 2015. Quest responded in January 2016 with several objections. Quest provided a representative in May 2016, and only then did Plaintiffs learn of Quest's involvement.

The physicians and Phadia settled Plaintiffs' 2014 suit. The remaining defendants (Allergy Asthma Network/Mothers of Asthmatics, Inc. ("AANMA") and Tonya Winders, Phadia's former market development leader and new CEO of AANMA) went to trial, and a jury found them not liable.

2. The Current Suit

The deadline for Plaintiffs to add Quest to their 2014 suit occurred before Quest responded to Plaintiffs' subpoenas. Once Plaintiffs learned of Quest's involvement, they filed this suit against Quest on December 28, 2017.

Quest moved to dismiss on March 9, 2018. The district court granted Quest's **[*196]** motion on February 22, 2019. The district court dismissed Plaintiffs' antitrust claims as time-barred, concluding that Plaintiffs had not alleged that Quest committed overt acts within the four-year statute of limitations. The court dismissed Plaintiffs' state law tortious interference **[**5]** and civil conspiracy claims as time-barred by Texas's two-year statute of limitations. The court also dismissed Plaintiffs' misappropriation of trade secrets claim as time-barred because it was not filed within three years of when Plaintiffs discovered or could have discovered the misappropriation through ordinary diligence.

Plaintiffs requested leave to amend, and the district court denied their request. Plaintiffs then submitted a *Rule 59(e)* motion, and the district court denied it because it failed to raise new arguments. This appeal followed.

---

[2] James Wallen, an associate and alleged co-conspirator of Phadia and Quest, put together a company called Universal Allergy Labs, LLC, not to be confused with Plaintiffs' United Allergy Labs (the predecessor to UAS). The Office of the Inspector General Opinion referred to UAL and expressed serious concerns about businesses providing allergy tests being run by a single person with no healthcare experience. Plaintiffs argue that Wallen intentionally "sandbagged" the review process to get an unfavorable decision so that it could be used to falsely equate Wallen's company with Plaintiffs.

II. Standard Of Review

HN1[] This court reviews de novo a district court's grant of a *Rule 12(b)(6)* motion to dismiss. *Gregson v. Zurich Am. Ins. Co., 322 F.3d 883, 885 (5th Cir. 2003)*. We construe all allegations in favor of the plaintiff. *Id.*

HN2[] "[D]ismissal for failure to state a claim based on the statute of limitations defense should be granted only when the plaintiff's potential rejoinder to the affirmative defense was foreclosed by the allegations in the complaint." *Jaso v. The Coca Cola Co., 435 F. App'x 346, 352 (5th Cir. 2011)* (internal quotation marks omitted).

III. Discussion

Plaintiffs appeal the district court's dismissal of the following seven claims against Quest: (1) *Sherman Act § 1*, (2) *Sherman Act § 2*, (3) Texas antitrust, (4) Texas misappropriation of trade secrets, (5) Texas tortious interference with contracts, (6) **[**6]** Texas tortious interference with existing and prospective business, and (7) Texas civil conspiracy.

A. Dismissal of Plaintiffs' Federal and State Antitrust Claims

Plaintiffs alleged that Quest violated *§§ 1* & *2 of the Sherman Act* and Texas ***antitrust law***. The district court dismissed these claims under *Rule 12(b)(6)*, concluding that they were time-barred. We disagree.

HN3[] *Section 1 of the Sherman Act* prohibits "[e]very contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States." *15 U.S.C. § 1*. Texas law also prohibits restraints on trade. *See Tex. Bus. & Com. Code § 15.05(a)* ("Every contract, combination, or conspiracy in restraint of trade or commerce is unlawful."). *Section 2 of the Sherman Act* prohibits persons from "monopoliz[ing], attempt[ing] to monopolize, or combin[ing] or conspir[ing] . . . to monopolize any part of the trade or commerce among the several States . . . ." *15 U.S.C. § 2*.

HN4[] Both federal and Texas law have four-year statutes of limitations for antitrust claims. *See 15 U.S.C. § 15(b)*; *Tex. Bus. & Com. Code § 15.25*. "Generally, a cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business." *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*.

Under the general rule, Plaintiffs had four years to bring their claims against Quest from the date of Quest's latest overt act. **[**7]** The district court determined that the last overt act was Quest's August 2013 meeting with Phadia about UAS's insurance reimbursement. Plaintiffs filed suit on December 28, 2017. Because Plaintiffs' claims were not brought by August 2017, **[*197]** the district court dismissed them as time barred.

In concluding that Quest's latest overt act occurred in August 2013, the district court disregarded several of Plaintiffs' allegations that described later overt acts. The district court determined that these allegations were insufficient because they lacked specificity, described mere "aftershocks" of earlier overt acts, or only described Phadia's actions as a potential co-conspirator (and not Quest's actions). We agree that many of the allegations lacked specificity or described aftershocks of earlier acts, but we disagree as to the allegations of Phadia's role as a potential co-conspirator.

1. Lack of Specificity in Allegations of Later Acts

Plaintiffs point to their allegations that Quest continued to injure their businesses in 2014 and 2015. They argue that those allegations sufficiently describe later overt acts and that the statute of limitations should reset based on those overt acts. We disagree. **[**8]**

Plaintiffs alleged before the district court that "Phadia and Quest continued to approach individual providers and payors in 2014 and 2015 regarding the negative impact UAS was having on their ImmunoCAP sales. Quest and Phadia continued to work with other co-conspirators to minimize the competitive threat." The district court discounted this allegation from Plaintiffs as insufficiently specific to restart the statute of limitations. The district court cited *Poster Exchange Incorporated v. National Screen Service Corporation, 517 F.2d 117 (5th Cir. 1975)*. In *Poster Exchange Inc.*, we remanded an antitrust case to determine whether there was a specific act or word of refusal contributing to the antitrust conspiracy during the limitations period. *Id. at 128-29*.

Later, we decided *Rx.com v. Medco Health Solutions, Inc., 322 F. App'x 394 (5th Cir. 2009)*. In *Rx.com*, we did not allow the plaintiffs to toll the statute of limitations by merely alleging that the defendants continued their earlier violations of ***antitrust law***. *Id. at 397*. ***HN5***[] We reiterated the Supreme Court's rule that "each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover the damages caused by that act and . . . the statute of limitations runs from the commission of the act." *Id.* (quoting *Zenith Radio Corp., 401 U.S. at 338*).

Plaintiffs' allegations about Phadia and Quest's continued meetings with providers **[**9]** and payors mirror the allegations we rejected in *Rx.com.* These allegations do not restart the statute of limitations because they did not describe a specific act or word contributing to the conspiracy. *See Poster Exch. Inc., 517 F.2d at 128-29*.

2. Allegations of "Aftershocks" of Earlier Events

Plaintiffs next argue that the district court erred by concluding that a policy change that took effect in June 2014 was not an overt act that would reset the statute of limitations. Plaintiffs alleged that a June 2014 policy change that discouraged providers from working with UAS was a timely overt act. The district court disagreed, concluding that the overt act associated with the policy change occurred in August 2013. We agree with the district court.

HN6[] "Aftershocks" are lingering effects of earlier overt acts in an antitrust conspiracy. They are not events that restart the statute of limitations because "a newly accruing claim for damages must be based on some injurious act actually occurring during the limitations period, not merely **[*198]** the abatable but unabated inertial consequences of some pre-limitations action." *Poster Exch. Inc., 517 F.2d at 128*.

Here, the district court determined that the overt act occurred in August 2013 when Quest and Phadia lobbied for the **[**10]** policy change. It follows that the policy's implementation was an aftershock of Quest and Phadia's earlier lobbying rather than an independent action. Phadia and Quest did not continue to act after they lobbied for the new policy, so the policy's implementation was merely a delayed result of their earlier actions. This allegation does not suffice to restart the clock for Plaintiffs' claims.

Accordingly, the district court properly concluded that Plaintiffs' allegation regarding the June 2014 policy change does not suffice to restart the statute of limitations.

3. Allegations of Phadia's Involvement

Next, Plaintiffs argue that the district court erred by concluding that their allegations as to Phadia's conduct could not restart the statute of limitations. We agree.

The district court disregarded Plaintiffs' allegations of Phadia's post-2013 overt acts because they were "actions taken wholly by Phadia." Plaintiffs alleged that in May 2014, Phadia's Dallas district manager emailed Quest's directors about their collaboration to discourage providers from working with UAS. The manager indicated that he had recently met with Timothy McDaniel (another Quest employee), and the manager sent out **[**11]** a list of several providers that they should further target.

Plaintiffs argue that Phadia's manager's meeting with McDaniel was an overt act by a co-conspirator that occurred within four years of Plaintiffs' suit. They rely on *United States v. Therm-All, Inc., 373 F.3d 625 (5th Cir. 2004)*. In

Therm-All, Inc., various corporations and their presidents were indicted for conspiring to fix prices. *Id. at 628*. Though five companies were involved in the price fixing, only two of them were parties to the underlying dispute in *Therm-All, Inc.* *Id. at 629-32*. The defendants argued that the government's claims against them were barred because the government failed to introduce evidence that the illegal actions occurred within the statute of limitations. *Id. at 631*. However, testimony of non-party co-conspirators was introduced as evidence that the conspiracy continued into the limitations period. *See id. at 636* ("Rhodes (of Mizell Co.) testified that the conspiracy continued through June 1995. The testimony is direct evidence that the participants were involved in conspiratorial acts . . . .").

Here, the district court ruled that Phadia's actions were insufficient to restart the statute of limitations, even if its actions were in furtherance of the conspiracy. The district court's view is inconsistent **[**12]** with our precedent in *Therm-All, Inc.*

Moreover, Quest's argument that Phadia cannot be a co-conspirator here because it was a defendant in the 2014 lawsuit is incorrect. Phadia settled in the 2014 suit, but no court ever determined its liability as a co-conspirator. Collateral estoppel would bar Plaintiffs from arguing that Phadia is a co-conspirator only if Phadia's liability was "actually litigated in the prior action" and was determined as "a necessary part of the judgment in that action." *See* *Petro-Hunt, L.L.C. v. United States, 365 F.3d 385, 397 (5th Cir. 2004)*.

Phadia cites *Discon Inc. v. Nynex Corp.*, where a district court held that a plaintiff was collaterally estopped from asserting a conspiracy claim against a second co-conspirator after a jury determined that the first co-conspirator was not liable. *86 F. Supp. 2d 154, 167 (W.D.N.Y. 2000)*. The **[*199]** alleged conspiracy involved only two co-conspirators. *Id.* An acquittal of one co-conspirator meant that there was no conspiracy as between the two of them, and the district court concluded that the second suit was barred. *Id.*

Here, the conspiracy involved many actors, including allergists, Tonya Winders, AANMA, Phadia, and now Quest. The jury determined that Winders and AANMA were not liable, but it did not determine Phadia's liability. Collateral **[**13]** estoppel does not bar Plaintiffs from asserting that Phadia is a co-conspirator. Plaintiffs may use the allegations of co-conspirators (and the timing of those actions) in future suits. *See* *Therm-All, Inc., 373 F.3d at 636*.

At this stage of litigation, Plaintiffs have sufficiently alleged that Phadia and Quest were involved in the alleged conspiracy and that the allegation regarding Phadia's May 2014 email reset the statute of limitations. We therefore disagree with the district court and reverse its dismissal of Plaintiffs' state and federal antitrust claims.

B. Dismissal of Plaintiffs' Tort Claims

The district court also dismissed Plaintiffs' claims for misappropriation of trade secrets, civil conspiracy, and tortious interference. We reverse the dismissal of Plaintiffs' misappropriation of trade secrets claim. We affirm the dismissal of the civil conspiracy and tortious interference claims.

1. Misappropriation of Trade Secrets Claim

Plaintiffs filed a misappropriation of trade secrets claim against Quest, arguing that Quest misappropriated UAS's client list. UAS shared its client list with Quest when the two were discussing doing business together, and Quest sent the list to Phadia in February 2012 (more than five **[**14]** years before Plaintiffs filed suit against Quest). ***HN7***[] Under Texas law, "[a] person must bring suit for misappropriation of trade secrets not later than three years after the misappropriation is discovered or by the exercise of reasonable diligence should have been discovered." *Tex. Civ. Prac. & Rem. Code Ann. § 16.010(a)*.

The district court dismissed Plaintiffs' trade secrets claim because "UAS and AAAPC fail[ed] to explain why they could not have discovered the misappropriation through ordinary diligence in the months following February 2012."

Plaintiffs argue that they did not know that Quest shared their customer list with Phadia in 2012. They only knew that Quest declined to move forward with Plaintiffs' deal to provide allergy testing. They learned of Quest's involvement in May 2016 when Quest produced discovery during the 2014 lawsuit. Because they did not discover Quest's involvement until May 2016, Plaintiffs argue that the statute of limitations should be tolled until that time.

HN8[] The discovery rule "defers accrual . . . until the plaintiff knew, or exercising reasonable diligence, should have known of the wrongful act causing injury." *N. Tex. Opportunity Fund v. Hammerman & Gainer Int'l., Inc., 107 F. Supp. 3d 620, 635-36 (N.D. Tex. 2015)* (quoting *Jackson v. W. Telemarketing Corp. Outbound, 245 F.3d 518, 523-24 (5th Cir. 2001)*). The fact that Plaintiffs did not actually know of Quest's involvement until **[**15]** 2016 will not preserve their claim unless they also could not have discovered their misappropriation injury using ordinary diligence. ***HN9***[] The discovery rule does not apply "simply because a claimant does not know 'the specific cause of the injury,' 'the party responsible for it,' 'the full extent of it,' or 'the chances of avoiding it.'" *USPPS, Ltd.* ***[*200]*** *v. Avery Dennison Corp., 326 F. App'x 842, 847 (5th Cir. 2009)* (quoting *PPG Indus. Inc. v. JMB/Hous. Ctrs. Partners Ltd., 146 S.W.3d 79, 93-94 (Tex. 2004)*).

HN10[] The discovery rule is a limited exception to statutes of limitation and will only be applied "when the nature of the plaintiff's injury is both inherently undiscoverable and objectively verifiable." *Wagner & Brown, Ltd. v. Horwood, 58 S.W.3d 732, 734 (Tex. 2001)*. "Texas courts have set the inherently undiscoverable bar high, to the extent that the discovery rule will apply only where it is nearly impossible for the plaintiff to be aware of his injury at the time he is injured." *Sisoian v. Int'l Bus. Machs. Corp., No. A-14-CA-565-SS, 2014 U.S. Dist. LEXIS 114693, 2014 WL 4161577, at *4 (W.D. Tex. Aug. 18, 2014)* (quoting *Priester v. JP Morgan Chase Bank, N.A., 708 F.3d 667, 675 (5th Cir. 2013)*).

HN11[] In considering the applicability of the discovery rule at the motion to dismiss stage, our inquiry is whether, accepting all well-pleaded facts as true, Plaintiffs' alleged injury, "by its nature, is unlikely to be discovered within the prescribed limitations period despite due diligence." *Beavers v. Metro. Life Ins. Co., 566 F.3d 436, 440 (5th Cir. 2009)* (quoting *Wagner, 58 S.W.3d at 734-35*). Defendants bear the burden of proof on the statute of limitations defense. *Jaso, 435 F.App'x at 351*. "With respect to the statute of limitations **[**16]** defense, dismissal at the 12(b)(6) stage is proper only 'where it is evident from the [complaint] that the action is barred and the [complaint] fail[s] to raise some basis for tolling.'" *Id.* (quoting *Jones v. Alcoa Inc., 339 F.3d 359, 366 (5th Cir. 2003)* (alterations in original)).

The district court rejected Plaintiffs' allegations and suggested that Plaintiffs could have learned that Quest misappropriated their client list. ***HN12***[] Reasonable diligence requires parties to make general inquiries to knowledgeable parties. *See Target Strike, Inc. v. Marston & Marston Inc., 524 F. App'x 939, 945 (5th Cir. 2013)*. On appeal, Plaintiffs assert that even if they learned which customers stopped working with UAS, they would not have learned that Quest shared their customer list with Phadia.

We agree that even if Plaintiffs had exercised due diligence by inquiring with their customers, it is unlikely that they would have learned that Quest shared UAS's proprietary billing information and business records. Plaintiffs' trade secret injury was unlikely to be discovered given the nature of Plaintiffs' trade secret[3] —a client list. While the misappropriation of other proprietary information like computer codes[4] or product designs[5] may be readily discoverable once the information appears in the marketplace, Plaintiffs could not have discovered **[**17]** their misappropriation injury as easily.

---

[3] ***HN13***[] "A trade secret is any formula, pattern, device or compilation of information which is used in one's business and presents an opportunity to obtain an advantage over competitors who do not know or use it." *Computer Assocs. Int'l, Inc. v. Altai, Inc., 918 S.W.2d 453, 455 (Tex. 1996)*.

[4] *See Altai, Inc., 918 S.W.2d at 457*.

[5] *See Seatrax, Inc. v. Sonbeck Int'l, Inc., 200 F.3d 358, 365-66 (5th Cir. 2000)*.

We therefore find it unlikely that they could have discovered the distinct injury to their trade secret caused by Quest. We conclude that Plaintiffs' trade secret injury, by its nature, was unlikely to have been discovered within the limitations period even if Plaintiffs had exercised due diligence. *See* Beavers, 566 F.3d at 440.

[*201] Plaintiffs have sufficiently pled they could not have discovered their misappropriation injury using reasonable diligence. Moreover, nothing in the complaint forecloses Plaintiffs' potential rejoinder to the statute of limitations defense. *See* Jaso, 435 F. App'x at 351. We thus disagree with the district court's dismissal of Plaintiffs' misappropriation of trade secrets claim and reverse.

2. Civil Conspiracy Claim

The district court dismissed Plaintiffs' civil conspiracy claim as time-barred. Plaintiffs argue that their civil conspiracy claim is also subject to the discovery rule and therefore timely. Here, we disagree.

Plaintiffs' conspiracy claim is based on Quest and Phadia's actions dissuading providers from using UAS's services. **HN14**[] Civil conspiracy claims are generally subject to a two-year statute of limitations. Navarro v. Grant Thornton, LLP, 316 S.W. 3d 715, 719 (Tex. App.—Houston [14th Dist.] 2010, no pet.). Like their misappropriation of trade secrets **[**18]** argument, Plaintiffs argue that this information could not have been discovered within the initial statute of limitations. *See* Sisoian, 2014 U.S. Dist. LEXIS 114693, 2014 WL 416157, at *4.

We are unpersuaded by Plaintiffs' argument that they could not discover the injuries caused by Quest and Phadia's alleged civil conspiracy. Unlike their trade secrets injury, the only injuries Plaintiffs alleged here relate to their businesses and ability to compete in the marketplace. We fail to see how those injuries are inherently undiscoverable, particularly since these injuries were litigated in Plaintiffs' 2014 suit against Phadia.[6]

Our analysis is unaltered by the argument that Quest's role in the conspiracy might have been inherently undiscoverable during the limitations period. **HN15**[] The discovery rule analysis turns on whether an injury is inherently undiscoverable, not on whether particular actions or causes are undiscoverable. *See* Beavers, 566 F.3d at 440. Unlike Plaintiffs' misappropriation claim, there is no inherently undiscoverable injury that stems from the civil conspiracy.

Plaintiffs also argue that Quest's fraudulent concealment of its alleged wrongdoing may toll the statute of limitations. We disagree.

HN16[] Fraudulent concealment tolls the statute of limitations only until **[**19]** "the fraud is discovered or could have been discovered with reasonable diligence." Shell Oil Co. v. Ross, 356 S.W.3d 924, 927 (Tex. 2011) (quoting BP Am. Prod. Co. v. Marshall, 342 S.W.3d 59, 67 (Tex. 2011)). As we previously discussed, Plaintiffs failed to plead that they used diligence in trying to discover Quest and Phadia's civil conspiracy. We thus affirm the district court's dismissal of Plaintiffs' civil conspiracy claim.

3. Tortious Interference Claims

The district court also dismissed Plaintiffs' tortious interference claim as time barred. Plaintiffs argue that this claim is subject to the discovery rule. We disagree.

HN17[] Tortious interference claims are subject to a two-year statute of limitations under Texas law. *See* First Nat'l Bank of Eagle Pass v. Levine, 721 S.W.2d 287, 289 (Tex. 1986). Plaintiffs allege that Quest and Phadia's work convincing UAS's customers **[*202]** to stop using UAS interfered with its existing and future business.

[6] Plaintiffs' misappropriation of trade secrets claim was not litigated in the 2014 suit, probably because Plaintiffs did not yet know of Quest's involvement or that Quest shared the customer list with Phadia.

Plaintiffs alleged injuries of lost revenue and lost business relationships. The lost revenue injury is not inherently undiscoverable as discussed above. While the loss of prospective business relationships might be the kind of injury that is inherently undiscoverable, Plaintiffs fail to adequately plead tortious interference with a prospective business relationship. Their complaint does not adequately allege that there was a reasonable **[**20]** probability that UAS and third parties would enter into future relationships. *See* *Apani Sw., Inc. v. Coca-Cola Enters., Inc., 300 F.3d 620, 634 (5th Cir. 2002)*. Though the complaint says that there was a reasonable probability that AAPC would have entered into additional relationships with third parties, the statement is conclusory. Plaintiffs did not plead adequate factual support for their claim, so we dismiss the claim under *Rule 12(b)(6)*.

Accordingly, we affirm the district court's dismissal of Plaintiffs' tortious interference claim.

C. Leave to Amend Complaint

After the district court dismissed their first complaint, Plaintiffs filed a motion for leave to amend their complaint. The district court denied Plaintiffs' request, and they now argue that the district court erred. We disagree.

HN18[] *Rule 15(a)(2)* constrains the district court's discretion in deciding whether to allow parties leave to amend. *See* *Dussouy v. Gulf Coast Inv. Corp., 660 F.2d 594, 597-98 (5th Cir. 1981)*. *Rule 15* favors granting leave to amend, but denying leave is justified when the movant unduly delays or acts with bad faith or dilatory motive. *Rosenzweig v. Azurix Corp., 332 F.3d 854, 864 (5th Cir. 2003)*.

Here, Quest filed its *Rule 12(b)(6)* motion to dismiss on March 9, 2018. The district court granted Quest's motion on February 22, 2019. In the eleven months that Quest's motion was pending, Plaintiffs did not seek leave to amend their complaint. However, Plaintiffs **[**21]** did timely move for leave to file an amended complaint after the district court issued its order granting dismissal. Their motion did not attach an amended complaint but attached additional evidence instead.

The facts of this case resemble *Whitaker v. City of Houston, 963 F.2d 831 (5th Cir. 1992)*. ***HN19***[] When parties delay seeking leave to amend for several months after a motion to dismiss is filed, we have held that district courts do not abuse their discretion in denying the request for leave. *See* *id. at 837* (affirming district court's denial of *Rule 15(a)* request to amend for undue delay when the plaintiff did not seek leave to amend for eleven months while motion to dismiss was pending).

Plaintiffs rely on *Dussouy*, where we held that a court can abuse its discretion by denying a request for leave that occurs within a reasonable time after the entry of dismissal. *Dussouy, 660 F.2d at 599*. Though Plaintiffs' request was within thirty days of the district court's entry of dismissal, we cannot conclude that the court abused its discretion because Plaintiffs did not seek to amend during the eleven months that Quest's motion was pending or provide an amended complaint once they did move for leave to amend.

We thus affirm the district court's denial of Plaintiffs' request for leave to amend their **[**22]** complaint.

IV. Conclusion

For the aforementioned reasons, we AFFIRM in part and REVERSE and REMAND in part.

Opinion

MEMORANDUM OPINION AND ORDER

Before the Court is Defendant Google LLC's Motion to Transfer Venue Pursuant to *28 U.S.C. § 1404(a)*, (Dkt. #28). For the following reasons, the Court concludes that the motion should be **DENIED**.

I. BACKGROUND

Plaintiffs—the States of Texas, Alaska, Arkansas, Florida, Idaho, Indiana, Mississippi, Missouri, Montana, Nevada, North Dakota, South Dakota, and Utah, and the Commonwealths of Kentucky and Puerto Rico, by and through their Attorneys General (collectively, "Plaintiff States")—have brought the instant action in the Eastern District of Texas against Defendant Google LLC ("Google").[1] Plaintiff States, invoking their statutory, equitable, or common-law powers, and pursuant to *Sections 4* and *16 of the Clayton Act, 15 U.S.C. §§ 15c*, *26*, brought this action in their

[1] The Court has jurisdiction over the instant action. Plaintiff States assert claims under *Sections 1* and *2 of the Sherman Act*, *15 U.S.C. §§ 1*, *2*, and *Sections 4* and *16 of the Clayton Act*, *15 U.S.C. §§ 15c*, *26*. *See also* *28 U.S.C. §§ 1331*, *1337*. Plaintiff States also assert various state-law claims arising out of the same nucleus of operative fact, over which this Court is empowered to exercise supplemental jurisdiction. *See* *28 U.S.C. § 1367(a)*.

respective sovereign capacities and as *parens patriae* on behalf of the citizens, general welfare, and economies **[*5]** of their respective states.

At its core, Plaintiff States' theory of the case is that Google has violated *Section 2 of the Sherman Act*, as well as applicable state antitrust laws, by unlawfully maintaining a monopoly, or attempting to acquire a monopoly, in markets associated with online display advertising. Specifically, Plaintiff States allege that Google engaged in anticompetitive conduct to force publishers and advertisers to use its online-display-advertising products or services. Plaintiff States further allege that Google violated *Section 1 of the Sherman Act* through an unlawful agreement with Facebook. Plaintiff States also contend that Google's representations to publishers, advertisers, and consumers violated state consumer-protection and deceptive-trade laws. Based on these allegations, Plaintiff States assert the following causes of action: actual and attempted monopolization and unlawful tying under *Section 2 of the Sherman Act, 15 U.S.C. § 2*; unlawful agreement under *Section 1 of the Sherman Act, 15 U.S.C. § 1*; and thirty additional state-law claims under Plaintiff States' respective antitrust and deceptive-trade-practices statutes.

Google denies all the substantive factual and legal allegations in Plaintiff States' Amended Complaint. Google asserts that it has not acted anticompetitively in the digital-advertising **[*6]** and e-commerce marketplace. Google specifically maintains that Plaintiff States' Amended Complaint is factually inaccurate, that the digital-advertising and e-commerce marketplace is highly competitive, and that Plaintiff States' legal theory turns on the incorrect premise that ***antitrust law*** requires companies to design their products so as to help their rivals become stronger competitors. Google further contends that Plaintiff States mischaracterize the terms and misunderstand the impact of a procompetitive agreement between Google and Facebook and that Google has not made false or deceptive statements to consumers concerning its products or services.

Google has filed a motion to transfer venue under *28 U.S.C. § 1404(a)*, arguing that this case should be transferred to the United States District Court for the Northern District of California. (Dkt. #28). Google does not dispute that venue is proper in the Eastern District of Texas under *15 U.S.C. § 22* and *28 U.S.C. § 1391*. Google contends that transfer is appropriate because the Northern District of California constitutes a clearly more convenient forum for this action. Plaintiff States counter that Google's transfer motion should be denied because Google has failed to show that the **[*7]** private-interest and public-interest factors comprising the *Section 1404(a)* test, taken together, warrant the transfer of this case to the Northern District of California.

II. Legal Standard

Section 1404(a) permits the transfer of civil actions for the convenience of the parties and witnesses and in the interest of justice to other districts or divisions where the plaintiffs could have properly brought the action. *28 U.S.C. § 1404(a)*. District courts have broad discretion in deciding whether to transfer a case under *Section 1404(a)*, *In re Volkswagen of Am., Inc., 545 F.3d 304, 311 (5th Cir. 2008)* (en banc), and *Section 1404(a)* motions are adjudicated on an "individualized, case-by-case consideration of convenience and fairness." *TravelPass Grp. v. Caesars Ent. Corp., No. 5:18-cv-153, 2019 U.S. Dist. LEXIS 142227, 2019 WL 3806056, at *11 (E.D. Tex. May 9, 2019)* (quoting *Stewart Org., Inc. v. Ricoh Corp., 487 U.S. 22, 29, 108 S.Ct. 2239, 101 L.Ed.2d 22 (1988)* and *Van Dusen v. Barrack, 376 U.S. 612, 622, 84 S.Ct. 805, 11 L.Ed.2d 945 (1964)*), *report and recommendation adopted*, *2019 U.S. Dist. LEXIS 147213, 2019 WL 4071784 (E.D. Tex. Aug. 29, 2019)*.

The party seeking a transfer under *Section 1404(a)* must show good cause. *Volkswagen, 545 F.3d at 315* (quoting *Humble Oil & Refin. Co. v. Bell Marine Serv., Inc., 321 F.2d 53, 56 (5th Cir. 1963)*). In this context, showing good cause requires the moving party to "clearly demonstrate that a transfer is for the convenience of parties and witnesses [and] in the interest of justice." *Id.* (cleaned up) (quoting *28 U.S.C. § 1404(a)*). When the movant fails to demonstrate that the proposed transferee venue is "clearly more convenient" than the plaintiff's chosen venue, "the plaintiff's choice should be respected." *Id.* Conversely, when the movant demonstrates that the proposed transferee venue is clearly **[*8]** more convenient, the movant has shown good cause and the court should transfer the case. *Id.* The "clearly more convenient" standard is not equal to a clear-and-convincing-evidence standard, but it is nevertheless "materially more than a mere preponderance of convenience." *Quest NetTech Corp. v. Apple, Inc., No. 2:19-CV-00118, 2019 U.S. Dist. LEXIS 206019, 2019 WL 6344267, at *7 (E.D. Tex. Nov. 27, 2019)*.

To determine whether a *Section 1404(a)* movant has demonstrated that the proposed transferee venue is "clearly more convenient," the Fifth Circuit employs the four private-interest and four public-interest factors first enunciated in *Gulf Oil Corp. v. Gilbert, 330 U.S. 501, 67 S.Ct. 839, 91 L.Ed. 1055 (1947)*. *Volkswagen, 545 F.3d at 315*. The private-interest factors are: "(1) the relative ease of access to sources of proof; (2) the availability of compulsory process to secure the attendance of witnesses; (3) the cost of attendance for willing witnesses; and (4) all other practical problems that make trial of a case easy, expeditious and inexpensive." *Id.* (citation omitted). The public-interest factors are: "(1) the administrative difficulties flowing from court congestion; (2) the local interest in having localized interests decided at home; (3) the familiarity of the forum with the law that will govern the case; and (4) the avoidance of unnecessary problems of conflict of laws [or in] the application of foreign law." *Id.* (alteration **[*9]** in original) (citation omitted).

Although these factors "are appropriate for most transfer cases, they are not necessarily exhaustive or exclusive," and no single factor is dispositive. *Id.* (citation omitted). Moreover, courts are not to merely tally the factors on each side. *In re Radmax, Ltd., 720 F.3d 285, 290 n.8 (5th Cir. 2013)*. Instead, courts "must make factual determinations to ascertain the degree of actual convenience, if any, and whether such rises to the level of 'clearly more convenient.'" *Quest NetTech, 2019 U.S. Dist. LEXIS 206019, 2019 WL 6344267, at *7* (citing *In re Radmax, 720 F.3d at 290* (holding that, where five factors were neutral, two weighed in favor of transfer, and one weighed "solidly" in favor of transfer, the movant had met its burden)); *see also* *In re Radmax, 720 F.3d at 290* (holding that courts abuse their discretion when they deny transfer solely because the plaintiff's choice of forum weighs in favor of denying transfer).

III. Discussion

A party seeking transfer under *28 U.S.C. § 1404(a)* must first meet the threshold requirement of establishing that the action could have been brought in the transferee district. Google, the only defendant in this case, has its headquarters and principal place of business in the Northern District of California. Accordingly, the Court finds that this case could have properly been filed in the Northern District of California **[*10]** under both *28 U.S.C. § 1391* and *15 U.S.C. § 22*. The threshold requirement having been met, the Court will analyze each of the private-interest and public-interest factors to determine if Google has demonstrated that the Northern District of California is a "clearly more convenient" forum for the instant action than the Eastern District of Texas.

A. Private-Interest Factor One: Ease of Access to Sources of Proof

Google asserts that there is greater ease of access to sources of proof in the Northern District of California than in the Eastern District of Texas. Specifically, Google argues that the Northern District of California is where the challenged conduct occurred, where Google has its headquarters, and where its executives and most of its employees work. Google maintains that none of its challenged conduct is alleged to have occurred in the Eastern District of Texas. Google further asserts that, because the complaint refers to a number of Google communications authored or possessed by employees that work in Northern California or New York, but not Texas, those communications and documents are more readily available in the Northern District of California.

Plaintiff States contest Google's assertion that the challenged **[*11]** conduct occurred in the Northern District of California, maintaining instead that Google's conduct occurred throughout the country. Plaintiff States further argue that Google has presented no evidence that any specific, relevant documents are actually located in the Northern District of California. Plaintiff States have also presented evidence that Google stores its electronic documents in thirteen data-storage centers across the country and that all but two of these centers are located closer to the Eastern District of Texas than to the Northern District of California. (Dkt. #46 at 10).

The Court agrees with Plaintiff States: Google has not demonstrated that the ease of access to sources of proof is relatively greater in the Northern District of California than in the Eastern District of Texas. In considering this factor, courts look to where "documents and physical evidence" are stored. *Seven Networks, LLC v. Google LLC, No. 2:17-CV-442, 2018 U.S. Dist. LEXIS 146375, 2018 WL 4026760, at *2 (E.D. Tex. Aug. 15, 2018)* (citing *Volkswagen, 545 F.3d at 316*).[2]

In *Seven Networks*, Google, seeking a convenience transfer to the Northern District of California, argued that much of the evidence was "located in or maintained by Google's Northern California offices." *Id.* (citation omitted). However, the court observed that "the **[*12]** vast majority of Google's electronic records are hosted in secure servers *managed from* its Northern California offices, not *stored in* its Northern California offices." *Id.* (quotations omitted). Consistent with the Fifth Circuit's admonition that technological improvements to the ease of access to electronic documents has not rendered the ease-of-access factor superfluous, the *Seven Networks* court held that the physical location of sources of proof must still be considered. *2018 U.S. Dist. LEXIS 146375, [WL] at *3* (citing, among others, *Volkswagen, 545 F.3d at 316*). The evidence showed that Google stored its electronic documents in facilities outside of Northern California—and that all but one of those facilities were closer to the Eastern District of Texas. The plaintiff further presented evidence of specific sources of proof that could be found in the Eastern District of Texas. For its part, Google presented no such specific evidence. *Id.* Rather, Google claimed only that some of the documentary evidence that might be relevant would likely be located in Northern California. *2018 U.S. Dist. LEXIS 146375, [WL] at *4*. The *Seven Networks* court reasoned that the fact that evidence "might" exist in a particular location, absent any identification of the specific documents, is insufficient. *Id.* ***[*13]*** Accordingly, the court held that the ease-of-access factor weighed against transfer. *2018 U.S. Dist. LEXIS 146375, [WL] at *7*.

Google's ease-of-access arguments here mirror those that it presented in *Seven Networks*. Google asserts that the ease-of-access factor favors transfer because Google's headquarters and the headquarters of several potentially relevant nonparties are located in the Northern District of California. But Google has failed to present any evidence of the specific documents or kinds of documents allegedly located in Northern California. By contrast, Plaintiff States have provided rebuttal evidence that Google's electronic documents are located in storage facilities outside of Northern California (most of which are closer to this district than to the Northern District of California) and that ten potential third-party witnesses possess relevant documents stored closer to this district. (Dkt. #46-7-11) (sealed exhibits).

Furthermore, Plaintiff States have confirmed, and Google does not dispute, that much of the relevant documentary evidence is contained in Austin, Texas, at the Office of the Attorney General of Texas as a result of the extensive investigation that precipitated this suit. Google maintains that **[*14]** the location of these relevant and voluminous materials is irrelevant because Austin is in the Western District of Texas rather than the Eastern District of Texas. Google misunderstands the burden of proof on this issue. Plaintiff States do not have to establish that the Eastern District of Texas is the most convenient venue in which this case could be litigated. Rather, Google, as the party seeking transfer, must establish that the Northern District of California is a clearly more convenient venue than the Eastern District of Texas. In regard to the ease of access to documents located in Austin, Texas, the Northern District of California is certainly not a more convenient forum than the Eastern District of Texas.

For all of these reasons, the ease-of-access factor weighs against transfer.

B. Private-Interest Factor Two: Availability of Compulsory Process to Secure Attendance of Unwilling Witnesses

Federal Rule of Civil Procedure 45 allows courts to subpoena a nonparty witness to ensure attendance at trial "within 100 miles of where the person resides, is employed, or regularly transacts business in person" or a party

[2] The *Seven Networks* court rejected Google's argument that witnesses constitute sources of evidence under this first factor, noting that the *Volkswagen* court emphasized and analyzed only documentary evidence under this factor. *Seven Networks, 2018 U.S. Dist. LEXIS 146375, 2018 WL 4026760, at *3* (citing *Volkswagen, 545 F.3d at 316*).

witness's attendance at trial "within the state where the person resides, is employed or regularly transacts **[*15]** business in person." *Fed. R. Civ. P. 45(c)(1)*. Courts are to consider the availability of this compulsory process to secure the attendance of witnesses—especially nonparty witnesses—in making convenience-transfer determinations. *Seven Networks, 2018 U.S. Dist. LEXIS 146375, 2018 WL 4026760, at *7* (citing *Volkswagen, 545 F.3d at 316*). Only witnesses potentially unwilling to attend trial are considered under this factor. Identifying a pool of likely unwilling witnesses has some probative value in determining convenience, although greater specificity as to the identity of those witnesses creates greater probative value. *2018 U.S. Dist. LEXIS 146375, [WL] at *8*.[3]

Google argues that it would be unable to subpoena witnesses from relevant third parties, such as competitors and former Google employees, many of whom reside or work in California. Plaintiff States counter that Google is merely speculating that these witnesses would be unwilling to attend. Moreover, Plaintiff States identify seventy-nine potential nonparty witnesses within 100 miles of this Court who could be subpoenaed for attendance at trial. (Dkt. #46-2). Thus, Plaintiff States argue, this factor should weigh against transfer "because transfer would merely redistribute the inconvenience of lacking the ability to subpoena non-party witnesses" from one party to the others. *Perritt v. Jenkins, No. 4:11-CV-23, 2011 U.S. Dist. LEXIS 89614, 2011 WL 3511468, at *5 (E.D. Tex. July 18, 2011)*.

The Court **[*16]** agrees that the presence of potential nonparty witnesses within both districts' respective ambits means that this factor does not weigh in favor of transfer. However, neither party has demonstrated beyond mere speculation the unwillingness of these potential witnesses to attend trial. Ultimately, therefore, this factor is neutral as to the requested venue transfer.

C. Private-Interest Factor Three: Cost of Attendance for Willing Witnesses

As the Fifth Circuit has held, it is obviously more convenient for witnesses to testify closer to home, and additional distance means additional travel, meal, and lodging costs, as well as additional time away from the witnesses' regular employment. *Volkswagen, 545 F.3d at 317*. "When the distance between an existing venue for trial of a matter and a proposed venue under *§ 1404(a)* is more than 100 miles, the factor of inconvenience to witnesses increases in direct relationship to the additional distance to be traveled." *Id.* (citation omitted). Significantly, this factor relates primarily to the inconvenience placed on willing nonparty witnesses, not party witnesses. *See, e.g., Seven Networks, 2018 U.S. Dist. LEXIS 146375, 2018 WL 4026760, at *9* (collecting cases); *Frederick v. Advanced Fin. Sols., Inc., 558 F.Supp.2d 699, 704 (E.D. Tex. 2007)* ("The availability and convenience of party-witnesses is generally insignificant because **[*17]** a transfer based on this factor would only shift the inconvenience from movant to nonmovant.").

In *Seven Networks*, the court found that the inconvenience to Google's party witnesses if the case was not transferred would generally be the same as the inconvenience to the plaintiff's party witnesses if the case was transferred, and thus concluded that the two concerns canceled each other out. *Seven Networks, 2018 U.S. Dist. LEXIS 146375, 2018 WL 4026760, at *12*. However, Google also specifically identified a willing potential nonparty witness, and the inconvenience to that witness weighed "heavily in the analysis," causing the Court to ultimately determine that this factor weighed "slightly in favor of transfer." *Id.*

Here, as in *Seven Networks*, the inconvenience to the party witnesses, which is given little weight, would only be shifted from Google to Plaintiff States by a transfer.[4] Further, Google has specifically named only one potential

---

[3] The compulsory-process factor weighs heaviest against or for transfer when either the transferor or transferee has "absolute subpoena power," meaning that "all relevant and material non-party witnesses reside within the subpoena power of a particular court." *Volkswagen, 545 F.3d at 316*. Because neither this district nor the Northern District of California has absolute subpoena power, the magnitude of this factor is diminished.

[4] Google maintains that transfer would not shift the inconvenience to the Plaintiff States because the inconvenience of litigating this case in the Northern District of California is no greater than the inconvenience of doing so in the Eastern District of Texas for most of the Plaintiff States. However, as Google concedes, this district is a more convenient forum for the lead Plaintiff State—

nonparty witness who possibly resides in the Northern District of California and would therefore be inconvenienced by a trial in this district. (Dkt. #63-2 ¶5) (sealed exhibit). As to other potential nonparty witnesses, Google appears to presume that such witnesses reside in Northern California without pointing to any **[*18]** specific witnesses or entities. Plaintiff States, on the other hand, have specified thirteen potential nonparty witnesses, each of whom is located closer to this district and each of whom has expressed his or her willingness to travel to this district to testify at trial.[5] (Dkt. #46-7-16) (sealed exhibits). Thus, this factor weighs against transfer.

D. Private-Interest Factor Four: All Other Practical Problems

The fourth private-interest factor includes "all other practical problems that make trial of a case easy, expeditious and inexpensive." *Volkswagen, 545 F.3d at 315*. This "all-other-practical-problems" factor is a "Catch-All Factor," *ExpressJet Airlines, Inc. v. RBC Cap. Mkts. Corp., No. H-09-992, 2009 U.S. Dist. LEXIS 64411, 2009 WL 2244468, at *9 (S.D. Tex. July 27, 2009)*, comprising all practical considerations "rationally based on judicial economy," *i.e.*, the efficient application of judicial resources, *Seven Networks, 2018 U.S. Dist. LEXIS 146375, 2018 WL 4026760, at *12*. For example, "the existence of duplicative suits involving the same or similar issues may create practical difficulties that will weigh heavily in favor or against transfer." *Seven Networks, 2018 U.S. Dist. LEXIS 146375, 2018 WL 4026760, at *12* (citation omitted).

Courts need not find the issues in the two sets of litigation to be identical in order for this factor to weigh in favor of transfer, but, typically, the issues must be at least "substantially" similar. *See, e.g., TravelPass, 2019 U.S. Dist. LEXIS 142227, 2019 WL 3806056, at *15-16* (concluding that, where the cases **[*19]** did not involve "precisely the same issues" and the court could not say that the other district court was "well-versed in *all* of the claims, parties, and issues before the Court presently," the factor was, at least, "neutral" (cleaned up)); *Princeton Digit. Image Corp. v. Facebook, Inc., No. 2:11-CV-400, 2012 U.S. Dist. LEXIS 119432, 2012 WL 3647182, at *5 (E.D. Tex. Aug. 23, 2012)* (transferring action where pending cases involved the same patent); *Fujitsu Ltd. v. Tellabs, Inc., 639 F.Supp.2d 761, 768 (E.D. Tex. 2009)* (transferring where the two actions involved "substantially similar issues" regarding patents relating to the "same technology," even though the cases might "not involve precisely the same issues"); *Westberry v. GusTech Commc'ns, LLC, No. 3:17-CV-3162, 2018 U.S. Dist. LEXIS 123753, 2018 WL 3548869, at *9 (N.D. Tex. July 24, 2018)* (involving "identical FLSA claims").

The decision in *TravelPass* is instructive here. In that case, the plaintiffs brought several antitrust and related claims in the Eastern District of Texas. *2019 U.S. Dist. LEXIS 142227, 2019 WL 3806056, at *1*. Defendants sought to transfer the case under *Section 1404(a)* to the Northern District of Illinois, primarily because a putative class action with similar allegations had been pending in that district for over a year. *2019 U.S. Dist. LEXIS 142227, [WL] at *2*. The two actions concerned the same core set of facts, the same antitrust statute, and nearly all the same defendants. *Id.* Nevertheless, the court concluded that the judicial-economy factor (subsumed under the all-other-practical-problems factor) was neutral. *2019 U.S. Dist. LEXIS 142227, [WL] at *16*. On one hand, the court recognized **[*20]** that "numerous courts have held that transfer for the purpose of consolidating concurrent, ongoing actions is proper where the concurrent actions are based on precisely the same issues." *2019 U.S. Dist. LEXIS 142227, [WL] at *15* (citations omitted). On the other hand, the court was not persuaded that the case and the pending out-of-district action involved "precisely the same issues." *Id.*

Moreover, the court rejected the defendant's argument that the judicial-economy factor was, by itself, "determinative" in the case. *2019 U.S. Dist. LEXIS 142227, [WL] at *14*. Specifically, the *TravelPass* court was concerned that no other factors weighed in favor of transfer, unlike in the other cases cited by the defendants in which the courts found transfer proper. *Id.* Having determined that the other three private-interest factors were neutral and that two of the public-interest factors were neutral, one weighed against transfer, and one weighed in

---

Texas. Further, the Court notes that, by any measure, the majority of Plaintiff States are closer to the Eastern District of Texas than to the Northern District of California.

[5] Plaintiff States have also identified thirty-four additional nonparty witnesses located closer to this district, although statements regarding those witnesses' willingness to appear in this district have not been produced. (Dkt. #46-1 ¶ 3).

favor of transfer, 2019 U.S. Dist. LEXIS 142227, [WL] at *12-14, 16-18, the *TravelPass* court held that the defendants had "failed to carry their burden to show the Northern District of Illinois is a clearly more convenient venue," 2019 U.S. Dist. LEXIS 142227, [WL] at *18

Here, similar to *TravelPass*, Google points to several antitrust class actions pending in the Northern District of California "that, like this case, accuse **[*21]** Google of monopolistic conduct related to digital advertising and seek both damages and injunctive relief on behalf of publishers and advertisers." (Dkt. #61 at 2). In Google's view, given the similarity of the cases, the Northern District of California would be a "clearly more convenient" forum to resolve this case together with the California class cases.

Google correctly notes that the central allegations in the cases pending against it in the Northern District of California mirror the core allegations of the Plaintiff States here; that is, that Google has engaged in purportedly anticompetitive conduct in markets associated with online display advertising. However, the private class actions pending in the Northern District of California involve different claims, parties, defenses, and damages than this case. Further, the various proposed class plaintiffs in those cases will be required to meet the criteria of Federal Rule of Civil Procedure 23 before they can litigate their claims on a classwide basis. In this regard, the procedural posture of the proposed private class actions in the Northern District of California undermines Google's argument that judicial economy will necessarily be advanced by transferring this **[*22]** case. Those actions are likely to undergo class discovery followed by class-certification motion practice, none of which is relevant to the case pending before this Court. Consolidating this case with multiple putative class actions would therefore introduce a substantial risk of unnecessary delay associated with Rule 23 proceedings, which may be complex and heavily litigated, and which are unrelated to this litigation. *See* TravelPass, 2019 U.S. Dist. LEXIS 142227, 2019 WL 3806056, at *16 (concluding that transferring a non-class action to be consolidated with a putative class action would have a negative effect on judicial economy due to the nature of class certification).

Further, this case was filed following an eighteen-month investigation by the Plaintiff States, which involved the production of millions of documents and the participation of over sixty witnesses. Under the circumstances, the materials and information already disclosed in the underlying investigation will aid the discovery process in this case. The parties in the California cases, however, will likely have to collect materials and information that have already been gathered here through the Plaintiff States' pre-suit investigation.[6] The plaintiffs here are sovereign states that have **[*23]** filed suit as *parens patriae* on behalf of citizens allegedly harmed by Google's conduct in online-display-advertising markets; therefore, no class allegations are at issue and no Rule 23 proceedings are implicated in this case. Additionally, this case involves state-law claims that are not at issue in the private class actions pending in the Northern District of California, including consumer-protection and deceptive-trade-practices claims that are dissimilar to the putative class plaintiffs' claims. Such differing claims implicate differing evidence and legal issues.

In sum, the Court concludes that, rather than presenting precisely the same issues as this case, the private class actions pending in the Northern District of California—while premised on the same underlying theories concerning Google's alleged anticompetitive conduct—involve claims, parties, defenses, damages, and procedural frameworks that differ materially from those in this case. Given the important distinctions between this case and those pending in the Northern District of California, Google has failed to establish that transfer of this case would clearly preserve judicial **[*24]** economy. *See, e.g.*, TravelPass, 2019 U.S. Dist. LEXIS 142227, 2019 WL 3806056, at *15.[7]

---

[6] For example, in their initial requests for discovery, the plaintiffs in *In re Google Digital Advertising Antitrust Litigation* indicated that they seek "100,000 pages of documents that Google reportedly produced to the Texas Attorney General." No. 5:20-cv-03556, Dkt. #37 at 2 (N.D. Cal. Oct. 16, 2020).

[7] The Court notes that the class-action lawsuits in the Northern District of California referenced by Google are themselves not all pending before the same judge. Most of the cases are pending before Judge Freeman and have been consolidated into two related actions. *See generally In re Google Digit. Advert. Antitrust Litig.*, No. 5:20-cv-03556-BLF, (N.D. Cal.); *In re Google Digit. Publisher Antitrust Litig.*, No. 5:20-cv-08984-BLF, (N.D. Cal.). However, Judge Freeman rejected the relation of one other suit on which Google relies, and it remains pending before Judge Gilliam. *See In re Google Digit. Advert. Antitrust Litig.*, No. 5:20-cv-

E. Public-Interest Factor One: Court Congestion

The first public-interest factor is the speed with which a case can come to trial and be resolved. *Deep Green Wireless LLC v. Ooma, Inc., 2:16-CV-0604, 2017 U.S. Dist. LEXIS 23509, 2017 WL 679643, at *6 (E.D. Tex. Feb. 21, 2017)* (citing *In re Genentech, Inc., 566 F.3d 1338, 1347 (Fed. Cir. 2009)*). Generally, this factor favors a district that can bring a case to trial faster. *Ho Keung Tse v. Blockbuster, LLC, No. 4:12-CV-328, 2013 U.S. Dist. LEXIS 33234, 2013 WL 949844, at *5 (E.D. Tex. Jan. 17, 2013)*, *report and recommendation adopted*, *No. 4:12cv328, 2013 U.S. Dist. LEXIS 32060, 2013 WL 942496 (E.D. Tex. Mar. 8, 2013)*. However, this factor is "the most speculative," and "case-disposition statistics may not always tell the whole story" because "[c]omplex cases . . . need more time for discovery and take longer to get to trial" no matter where they proceed. *Va. Innovation Sci., Inc. v. Amazon.com, Inc., 2019 U.S. Dist. LEXIS 117004, 2019 WL 3082314, at *32 (E.D. Tex. July 15, 2019)*.

According to the December 2020 Federal Court Management Statistics report, the median time from filing of a civil case to its disposition in the Eastern District of Texas is 8.9 months, and the median time from filing to trial is 17.5 months.[8] In the Northern District of California, those median times are 11.3 months and 37.6 months, respectively.[9]

Google argues that "transfer unquestionably achieves overall efficiency because it places this case **[*25]** in the same district as numerous other antitrust cases against Google that concern the same claims." (Dkt. #28 at 12). Plaintiff States respond that, because the median times are shorter in this district, this factor "weighs heavily against transfer." (Dkt. #46 at 17-18).

The Court concludes that this factor weighs against transfer. Google is correct that, in theory, consolidating cases regarding precisely the same facts and legal claims should create greater "overall efficiency." However, as noted in Section III.D., *supra*, the factual and legal issues in the instant case are not "precisely the same" as those presented in the private class action cases pending in the Northern District of California. Given the substantive and procedural distinctions between this case and the class cases in the Northern District of California, particularly the anticipated class discovery and motion practice associated with the private actions referenced by Google, it is likely that transferring this case to the Northern District of California would result in this litigation being delayed by class proceedings.

Further, as discussed above, the instant action is in a unique position because, as a *parens patriae* ***[*26]*** and government-enforcement action, Plaintiff States have already conducted a substantial pre-suit investigation, and thus the discovery required in this action will likely be significantly truncated compared to the discovery in the California actions. Therefore, based on both the shorter median disposition and trial times in this district and the likelihood of a shorter discovery period if this action is kept separate, the Court concludes that this factor weighs against transfer.

F. Public-Interest Factor Two: Deciding Local Interests at Home

---

03556-BLF, Dkt. #108 (Mar. 2, 2021) (denying motion to relate *SPX Total Body Fitness LLC v. Google LLC*, No. 4:21-cv-00801-HSG (N.D. Cal.)).

Accordingly, it is not obvious that, were the Court to transfer this case, it would be assigned to any particular judge presiding over cases involving similar allegations against Google. *See* *TravelPass, 2019 U.S. Dist. LEXIS 142227, 2019 WL 3806056, at *16* (noting that the defendants could not meet their burden by simply assuming that the similar cases would be consolidated before a single judge if the case were transferred).

[8] UNITED STATES COURTS, *U.S. District Courts—Federal Court Management Statistics—Profiles—During the 12-Month Periods Ending December 30, 2015 Through 2020*, available at https://www.uscourts.gov/sites/default/files/data_tables/fcms_na_distprofile1231.2020.pdf (last accessed May 20, 2021).

[9] *Id.*

"There is little doubt" that a district "has a local interest in the disposition of any case involving a resident corporate party." *Seven Networks, 2018 U.S. Dist. LEXIS 146375, 2018 WL 4026760, at *14*. Because Google's principal place of business is located there, the Northern District of California has an obvious interest in deciding this case.

But at least one of the Plaintiff States, Texas, has an equally strong interest in resolving this case in a district within the state. Further, Texas has brought this action on behalf of Texas advertisers, publishers, competitors, and consumers, many of whom are located in the Eastern District of Texas. By contrast, because California has not joined as a plaintiff in this **[*27]** action, Plaintiff States have not and could not bring their action on behalf of California advertisers, publishers, competitors, and consumers. Thus, because the Northern District of California has an interest in deciding a case involving Google, a California-based company, and because the Eastern District of Texas has an equal interest in deciding a case involving Texas advertisers, publishers, competitors, and consumers, this factor is neutral.

G. Public-Interest Factor Three: Familiarity of the Forum with the Governing Law of the Case

In addition to federal antitrust claims, each Plaintiff State asserts causes of action under its own law. "The need to apply a particular state's law may weigh in favor of or against transfer." *Calypso Wireless, Inc. v. T-Mobile USA, Inc., No. 2:08-CV-441, 2010 U.S. Dist. LEXIS 155260, 2010 WL 11469012, at *5 (E.D. Tex. Mar. 31, 2010)*.

The State of California is not a Plaintiff in this case, and this action contains no claims arising under California law. Google therefore concedes that the Northern District of California does not have greater familiarity than this Court with any law to be applied in this case. The State of Texas, however, asserts two causes of action arising under Texas law, with which this Court likely has a greater degree of familiarity than does the Northern District of **[*28]** California. Because the claims arising under Texas law amount to only two of thirty state-law claims asserted in an action that also involves significant federal claims, this factor weighs only slightly against transfer.

H. Public-Interest Factor Four: Avoidance of Unnecessary Problems of Conflict of Laws or in the Application of Foreign Law

The parties do not dispute that this factor is neutral. The Court agrees.

IV. Conclusion

In light of the foregoing, Google has failed to establish that any private-interest factor or public-interest factor weighs in favor of transfer, and several factors weigh against transfer. Thus, Google has failed to meet its burden to establish that the Northern District of California is a clearly more convenient venue for the instant litigation than the Eastern District of Texas. It is therefore **ORDERED** that Google's Motion to Transfer Venue Pursuant to *28 U.S.C. § 1404(a)*, (Dkt. #28), is **DENIED**.

So ORDERED and SIGNED this 20th day of May, 2021.

/s/ Sean D. Jordan

SEAN D. JORDAN

UNITED STATES DISTRICT JUDGE

Pac. Steel Grp. v. Commercial Metals Co.

United States District Court for the Northern District of California

May 21, 2021, Decided; May 21, 2021, Filed

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Fed. R. Civ. P. 8(a) requires that a complaint contain a short and plain statement of the claim showing that the pleader is entitled to relief. Rule 8(a)(2). A defendant may move to dismiss a complaint for failing to state a claim upon which relief can be granted under Fed. R. Civ. P. 12(b)(6). Dismissal under Rule 12(b)(6) is appropriate only where the complaint lacks a cognizable legal theory or sufficient facts to support a cognizable legal theory. To survive a Rule 12(b)(6) motion, a plaintiff need only plead enough facts to state a claim to relief that is plausible on its face. A claim is facially plausible when a plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN2[] **Motions to Dismiss, Failure to State Claim**

In reviewing the plausibility of a complaint, courts accept factual allegations in the complaint as true and construe the pleadings in the light most favorable to the nonmoving party. Nevertheless, courts do not accept as true allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Amendment of Pleadings > Leave of Court

HN3[] **Motions to Dismiss, Failure to State Claim**

Even if the court concludes that a Fed. R. Civ. P. 12(b)(6) motion should be granted, the court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could not possibly be cured by the allegation of other facts.

Evidence > Judicial Notice > Adjudicative Facts > Facts Generally Known

Evidence > Judicial Notice > Adjudicative Facts > Public Records

Evidence > Judicial Notice > Adjudicative Facts > Verifiable Facts

Evidence > Judicial Notice > Adjudicative Facts > Judicial Records

HN4[] **Adjudicative Facts, Facts Generally Known**

Under Fed. R. Evid. 201, a court may take judicial notice of a fact not subject to reasonable dispute because it can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned. Rule 201(b)(2). Accordingly, a court may take judicial notice of matters of public record, but cannot take judicial notice of disputed facts contained in such public records. The Ninth Circuit has clarified that if a court takes judicial notice of a document, it must specify what facts it judicially noticed from the document. Further, just because the document itself is susceptible to judicial notice does not mean that every assertion of fact within that document is judicially noticeable for its truth.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN5[] **Relevant Market, Geographic Market Definition**

A threshold step in any antitrust case is to accurately define the relevant market, which refers to the area of effective competition. The plaintiff must allege both that a relevant market exists and that the defendant has power within that market. Such allegations need not be pled with specificity. Although the validity of the relevant market is typically a factual element rather than a legal one, an antitrust complaint may be dismissed under Fed. R. Civ. P.

12(b)(6) if the complaint's relevant market definition is facially unsustainable. The relevant market must include both a geographic market and a product market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

HN6[] Relevant Market, Geographic Market Definition

A properly defined geographic market extends to the area of effective competition in which buyers can turn for alternative sources of supply.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN7[] Relevant Market, Product Market Definition

The question of what constitutes a relevant market is factual, and not usually appropriate to resolve at the motion to dismiss stage.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN8[] Relevant Market, Product Market Definition

A properly defined product market must encompass the product at issue as well as all economic substitutes for the product. Whether a product can be substituted is determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN9[] Scope, Monopolization Offenses

Market power is demonstrated by a party's ability to raise prices profitably by restricting output. Market power cannot be inferred solely from the existence of entry barriers and a dominant market share. The ability to control output and prices—the essence of market power—depends largely on the ability of existing firms to quickly increase their own output in response to a contraction by the defendant.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN10[] Per Se Rule Tests, Manifestly Anticompetitive Effects

The United States Supreme Court has made clear that a market power analysis is required for antitrust claims based on vertical restraints. Vertical restraints often pose no risk to competition unless the entity imposing them has market power, which cannot be evaluated unless the court first defines the relevant market. The possibly anticompetitive manifestations of vertical arrangements can occur only if there is market power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN11[] Attempts to Monopolize, Elements

The Ninth Circuit has explained that while market share is just the starting point for assessing market power, market share, at least above some level, could support a finding of market power in the absence of contrary evidence. Where such an inference is not implausible on its face, an allegation of a specific market share is sufficient, as a matter of pleading, to withstand a motion for dismissal.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN12[] Scope, Monopolization Offenses

The Ninth Circuit has been reluctant to apply bright-line rules regarding market share in deciding whether a defendant has market power to restrict output or raise prices. The Ninth Circuit has advised courts to be wary of the numbers game of market percentage, and instead consider relevant market factors including market share, entry barriers and the capacity of existing competitors to expand output.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

HN13[] Actual Monopolization, Monopoly Power

Market power can be plausibly alleged even with a low market share if other anticompetitive factors are adequately alleged.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN14[] Sherman Act, Claims

In order to state a valid claim under the Sherman Act, a plaintiff must allege that the defendant has market power within a relevant market.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN15[] **Sherman Act, Claims**

Ninth Circuit precedent holds that to state a valid claim under the Sherman Act, a plaintiff must allege that the defendant has market power within a relevant market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN16[] **Per Se Rule & Rule of Reason, Sherman Act**

The United States Supreme Court has repeatedly emphasized that there is no duty to deal under the terms and conditions preferred by a competitor's rivals. Likewise, the Sherman Act does not restrict the long recognized right of a trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal. This is because the antitrust laws, including the Sherman Act, were enacted for the protection of competition, not competitors.

Torts > ... > Types of Premises > Recreational Facilities > Sports Facilities

HN17[] **Recreational Facilities, Sports Facilities**

The limited exception to the general rule that there is no antitrust duty to deal comes under the United States Supreme Court's decision in Aspen Skiing. The Ninth Circuit has explained that the Aspen Skiing exception applies in limited circumstances where a company (1) unilaterally terminates a voluntary and profitable course of dealing; (2) the only conceivable rationale or purpose is to sacrifice short-term benefits in order to obtain higher profits in the long run from the exclusion of competition; and (3) the refusal to deal involves products that the defendant already sells in the existing market to other similarly situated customers.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

HN18[] **Sherman Act, Claims**

Section 1 of the Sherman Act prohibits every contract, combination, or conspiracy, in restraint of trade or commerce among the several States. 15 U.S.C.S. § 1. The United States Supreme Court has long held that, the phrase "restraint of trade" is best read to mean undue restraint. Therefore, to establish liability under § 1, a plaintiff must prove (1) the existence of an agreement, and (2) that the agreement was in unreasonable restraint of trade.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN19[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

A restraint of trade may be found unreasonable under either a per se rule or the rule of reason burden-shifting framework. A minority of restraints are found per se unreasonable because they always or almost always tend to restrict competition and decrease output. Restraints that are not unreasonable per se are judged under the rule of reason. The rule of reason requires courts to conduct a fact-specific assessment of market power and market structure to assess the restraint's actual effect on competition.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN20[] **Scope, Monopolization Offenses**

Typically only horizontal restraints—restraints imposed by agreement between competitors'—qualify as unreasonable per se. A common example is price fixing. On the other hand, vertical restraints should nearly always be analyzed under the rule of reason. An exclusive-dealing arrangement does not constitute a per se violation of § 1 of the Sherman Act.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN21[] Scope, Monopolization Offenses

A vertical restraint of trade is not per se illegal under § 1 of the Sherman Act unless it includes some agreement on price or price levels.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN22[] Exclusive & Reciprocal Dealing, Exclusive Dealing

The main antitrust objection to exclusive dealing is its tendency to foreclose existing competitors or new entrants from competition in the covered portion of the relevant market during the term of the agreement.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN23[] Exclusive & Reciprocal Dealing, Exclusive Dealing

Under the antitrust rule of reason, an exclusive dealing arrangement violates § 1 of the Sherman Act only if its effect is to foreclose competition in a substantial share of the line of commerce affected. The Ninth Circuit has indicated that in analyzing allegations of market foreclosure, courts are to consider alternative sources available to competitors. The foreclosure calculation includes the full range of selling opportunities reasonably open to rivals, namely, all the product and geographic sales they may readily compete for, using easily convertible plants and marketing organizations.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN24[] Sherman Act, Claims

To establish liability under § 2 of the Sherman Act, a plaintiff must show: (a) the possession of monopoly power in the relevant market; (b) the willful acquisition or maintenance of that power; and (c) causal antitrust injury.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN25[] **Sherman Act, Claims**

Antitrust injury means injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. Essentially, a plaintiff must adequately allege that its loss flows from an anticompetitive aspect or effect of the defendants' behavior. If the injury flows from aspects of the defendant's conduct that are beneficial or neutral to competition, there is no antitrust injury, even if the defendant's conduct is illegal per se. A causal link between a plaintiff's injuries and a defendant's actions alone is not enough to sustain an antitrust claim.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > State Regulation

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN26[] **Sherman Act, Claims**

Injuries to a competitor that do not also harm competition are not grounds for antitrust claims. The antitrust laws, including the Sherman Act, were enacted for the protection of competition, not competitors and therefore the Sherman Act generally does not restrict the long recognized right of a trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal. Where the defendant's conduct harms the plaintiff without adversely affecting competition generally, there is no antitrust injury.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

Mergers & Acquisitions Law > Antitrust > Horizontal Mergers

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Sherman Act

HN27[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

Competition may be promoted rather than harmed by vertical agreements because they have potential to stimulate interbrand competition, the primary concern of ***antitrust law***. That said, vertical restraints certainly can injure competition when they foreclose competitors from entering or competing in a market.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

Constitutional Law > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Jurisdiction

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Same Case & Controversy

HN28[] **Supplemental Jurisdiction, Pendent Claims**

A district court may decline to exercise supplemental jurisdiction if it has dismissed all claims over which it has original jurisdiction. 28 U.S.C.S. § 1367(c)(3). In the usual case in which all federal-law claims are eliminated before trial, the balance of factors to be considered under the pendent jurisdiction doctrine—judicial economy, convenience, fairness, and comity—will point toward declining to exercise jurisdiction over the remaining state-law claims.

Opinion

ORDER GRANTING MOTIONS TO DISMISS

Re: Dkt. Nos. 39, 40, 41, 49

Pending before the Court are motions to dismiss filed by Defendants Commercial Metals Company and its subsidiaries and Defendant Danieli Corporation. Dkt. Nos. 39, 40. For the following reasons, the Court **GRANTS** the motions to dismiss with **LEAVE TO AMEND**.

I. BACKGROUND

A. Causes of Action

Plaintiff Pacific Steel Group ("PSG" or "Plaintiff") brings this action for injunctive relief, damages, and restitution against Defendants Commercial Metals Company ("CMC") and its subsidiaries, CMC Steel Fabricators, Inc. d/b/a CMC Rebar ("CMC Rebar"), CMC Steel US, LLC ("CMC Steel US"), and Gerdau Reinforcing Steel ("GRS") **[*3]** (collectively, "CMC" or the "CMC Defendants") and Defendant Danieli Corporation ("Danieli") for violations of *Sections 1* and *2 of the Sherman Act*, California antitrust and unfair competition statutes, and California common law. Dkt. No. 1 ("Compl.") at 1. PSG lists eight causes of action:

1. Conspiracy in restraint of trade against CMC and Danieli in violation of the *Sherman Act (15 U.S.C. § 1*) and the California Cartwright Act (*Cal. Bus. & Prof. Code § 16720*);

2. Monopolization against CMC in violation of the *Sherman Act (15 U.S.C. § 2*);

3. Attempted monopolization (in the alternative) against CMC in violation of the *Sherman Act (15 U.S.C. § 2*);

4. Conspiracy to monopolize against CMC and Danieli in violation of the *Sherman Act (15 U.S.C. §§ 1*, *2*) and the California Cartwright Act (*Cal. Bus. & Prof. Code § 16720*);

5. Below cost sales against CMC Rebar, CMC Steel US, and GRS in violation of the California Unfair Practices Act (*Cal. Bus. & Prof. Code § 17043*);

6. Loss leader sales against CMC Rebar, CMC Steel US, and GRS in violation of the California Unfair Practices Act (*Cal. Bus. & Prof. Code § 17044*);

7. Unlawful and unfair business practices against all defendants in violation of the California Unfair Competition Law (*Cal. Bus. & Prof. Code § 17200*);

8. Interference with prospective economic advantage against CMC in violation of California common law. Compl. ¶¶ 124-169.

B. Parties

PSG is a fabricator and installer of steel reinforcing bar ("rebar") based in San Diego. Compl. ¶ 17. CMC is a U.S.-based manufacturer and fabricator of rebar and is the parent company to CMC Rebar, CMC **[*4]** Steel, and CMC Steel US. *Id.* ¶ 18. According to the Complaint, CMC is the largest rebar manufacturer and fabricator in the United States. *Id.* CMC Rebar is a subsidiary of CMC and is in the fabrication and installation market ("Furnish-and-Install"). *Id.* ¶ 19. As of 2018, CMC Rebar owns the assets and liabilities of GRS. *Id.* CMC Steel US is a subsidiary of CMC and markets and manufactures rebar, among other things. *Id.* ¶ 20. GRS, like PSG and CMC Rebar, is in the Furnish-and-Install market. *Id.* ¶ 21. Danieli builds mills and plants for metal industries. *Id.* ¶ 22.

C. Factual Allegations

Entities in the Furnish-and-Install market, like PSG, buy rebar from rebar manufacturers, like CMC. *Id.* ¶ 3. PSG desires to vertically integrate by entering the rebar manufacturing market. *Id.* Rebar manufacturing is done in steel mills, of which there are three types: traditional integrated steel mills, mini mills (which came into prominence in the 1960s), and micro mills, the first of which was built in 2009 by CMC and Danieli. *Id.* ¶ 42-53. According to PSG, "building a traditional integrated mill requires enormous startup costs and historically was only economical to build when done on an enormous scale **[*5]** with millions of tons of annual capacity or more" whereas "mini mills require lower capital costs and provide higher returns on equity" by controlling costs and using advanced technology. *Id.* ¶ 43, 48-49. Micro mills are allegedly the future of rebar manufacturing because, unlike traditional or mini mills, they "output[] directly into rebar." *Id.* ¶ 52. "This enables a micro mill not only to be more efficient, it also requires a smaller physical footprint and lower capital expenditures." *Id.* According to PSG, these gains in efficiency and lower startup costs are the reason that "[s]ince building its first micro mill over ten years ago, CMC has not built any other type of mill." *Id.* ¶ 57.

PSG wants to build a micro mill. *Id.* ¶ 3. According to the Complaint, "[t]he only commercially viable way for PSG to enter the relevant rebar manufacturing market [is] to construct a micro mill, as opposed to a mini mill that requires a significantly greater capital investment and employs older, less efficient technology." *Id.* ¶ 5.

Danieli is the only company to have developed and sold a micro mill. *Id.* Danieli has sold or is in the process of selling five such micro mills using its proprietary ("MI.DA") **[*6]** technology; three of these deals have gone to CMC and two to CMC's largest national competitor, Nucor Corporation. *Id.* ¶ 7. CMC's first micro mill, which was located in Mesa, Arizona, was subject to an exclusivity provision covering a radius of 400 miles from Mesa. *Id.*

PSG met with Danieli in late 2019 to begin negotiations to build an environmentally friendly micro mill. *Id.* ¶ 85. Initially, the plan was to build the micro mill in Pittsburg, California, which is outside of the 400-mile exclusivity provision of CMC's first micro mill. *Id.* ¶ 89. At the same time, however, Danieli was allegedly negotiating with CMC for CMC's purchase of another MI.DA mill to be located in Mesa, Arizona. *Id.* PSG's Pittsburg site location fell through, and it decided instead to secure property within the greater Los Angeles basin. *Id.* ¶ 91. Ultimately, negotiations between PSG and Danieli were cut short when Danieli and CMC finalized their agreement for a third micro mill. *Id.* ¶ 95. The agreement includes an exclusivity provision which bars Danieli from selling one of their proprietary micro mills to any company other than CMC within a 500-mile radius of Rancho Cucamonga, California for 69 months. *Id.* ¶ **[*7]** 5. This radius covers approximately half of Utah, nearly all of Arizona, the majority of Nevada, and almost all of California (up to just south of Redding). *Id.* ¶ 97. Rancho Cucamonga is not the planned site of the new mill in Arizona, but instead is apparently the location of one of CMC's mini mills which is soon to be retired. *Id.* ¶ 98. PSG claims this new exclusivity agreement "effectively prevents construction of any rebar mill within the 500-mile radius for over five years because the most efficient means of manufacturing rebar is the MI.DA mill." *Id.* ¶ 8.

CMC's new mill will allegedly employ the "technology PSG had been led to believe it would be developing in conjunction with Danieli." *Id.* ¶ 95. PSG alleges that "CMC promoted the new mill as embracing the very alternative energy use concepts PSG had laid out to Danieli in their initial November 2019 meeting." *Id.* Additionally, PSG alleges that Danieli "inappropriately shared PSG's [Pittsburg, CA] site consideration with CMC." *Id.* ¶ 89. PSG alleges that CMC opted for a 500-mile exclusionary zone from Rancho Cucamonga, California—as opposed to Mesa, Arizona—in part because that zone includes Pittsburg, California. *Id.* ¶ 99; Dkt. **[*8]** No. 99 ("Opp.") at 8.

PSG also alleges that building a micro mill outside the reach of the 500-mile restriction is not commercially feasible due to the cost to transport rebar, especially to PSG's southern California facilities and customers. Compl. ¶ 101. According to PSG, a significant majority of rebar sales are to customers located within 500 miles of a mill. *Id.* ¶ 108.

Finally, PSG also alleges that Defendants in the Furnish-and-Install market (CMC Rebar, CMC Steel US, and GRS) have for years priced their services below cost and used loss leaders "in an effort to minimize PSG's growth, profitability, effectiveness, and efficiency." *Id.* ¶ 1. Allegedly, "[d]espite a California construction boom and rising demand for rebar Furnish-and-Install services, CMC Rebar and GRS have sustained heavy losses in their Furnish-and-Install businesses since at least 2017, due in large part to bidding below cost." *Id.* ¶ 63. PSG also claims that

"CMC Rebar has been accused [by former employees] of below-cost bidding in other geographic areas," like Texas, in efforts to undercut competitors and force them to "go broke." *Id.* ¶¶ 64-65.

II. LEGAL STANDARD

HN1[] Federal Rule of Civil Procedure 8(a) requires that a complaint contain "a short and plain **[*9]** statement of the claim showing that the pleader is entitled to relief." Fed. R. Civ. P. 8(a)(2). A defendant may move to dismiss a complaint for failing to state a claim upon which relief can be granted under Rule 12(b)(6). "Dismissal under Rule 12(b)(6) is appropriate only where the complaint lacks a cognizable legal theory or sufficient facts to support a cognizable legal theory." *Mendiondo v. Centinela Hosp. Med. Ctr., 521 F.3d 1097, 1104 (9th Cir. 2008)*. To survive a Rule 12(b)(6) motion, a plaintiff need only plead "enough facts to state a claim to relief that is plausible on its face." *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*. A claim is facially plausible when a plaintiff pleads "factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)*.

HN2[] In reviewing the plausibility of a complaint, courts "accept factual allegations in the complaint as true and construe the pleadings in the light most favorable to the nonmoving party." *Manzarek v. St. Paul Fire & Marine Ins. Co., 519 F.3d 1025, 1031 (9th Cir. 2008)*. Nevertheless, courts do not "accept as true allegations that are merely conclusory, unwarranted deductions of fact, or unreasonable inferences." *In re Gilead Scis. Secs. Litig., 536 F.3d 1049, 1055 (9th Cir. 2008)* (quoting *Sprewell v. Golden State Warriors, 266 F.3d 979, 988 (9th Cir. 2001)*).

HN3[] Yet even if the court concludes that a 12(b)(6) motion should be granted, the "court should grant leave to amend even if no request to amend the pleading was made, unless it determines that the pleading could **[*10]** not possibly be cured by the allegation of other facts." *Lopez v. Smith, 203 F.3d 1122, 1127 (9th Cir. 2000)* (en banc) (quotation omitted).

In *Khoja v. Orexigen Therapeutics*, the Ninth Circuit clarified the judicial notice rule and incorporation by reference doctrine. *See* *899 F.3d 988 (9th Cir. 2018)*. **HN4**[] Under Federal Rule of Evidence 201, a court may take judicial notice of a fact "not subject to reasonable dispute because it ... can be accurately and readily determined from sources whose accuracy cannot reasonably be questioned." Fed. R. Evid. 201(b)(2). Accordingly, a court may take "judicial notice of matters of public record," but "cannot take judicial notice of disputed facts contained in such public records." *Khoja, 899 F.3d at 999* (citation and quotations omitted). The Ninth Circuit has clarified that if a court takes judicial notice of a document, it must specify what facts it judicially noticed from the document. *Id. at 999*. Further, "[j]ust because the document itself is susceptible to judicial notice does not mean that every assertion of fact within that document is judicially noticeable for its truth." *Id.* As an example, the Ninth Circuit held that for a transcript of a conference call, the court may take judicial notice of the fact that there was a conference call on the specified date, but may not take judicial notice of a fact mentioned **[*11]** in the transcript, because the substance "is subject to varying interpretations, and there is a reasonable dispute as to what the [document] establishes." *Id. at 999-1000*.

III. DISCUSSION

A. Sherman Act Antitrust Plaintiffs Must Establish A Geographic Market, A Product Market, And Market Power

HN5[] "A threshold step in any antitrust case is to accurately define the relevant market, which refers to 'the area of effective competition.'" *Fed. Trade Comm'n v. Qualcomm Inc., 969 F.3d 974, 992 (9th Cir. 2020)* (citing *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2285, 201 L. Ed. 2d 678 (U.S. 2018)*). "[T]he plaintiff must allege both that a 'relevant market' exists and that the defendant has power within that market." *Newcal Indus., Inc. v. Ikon Off. Sol.,* 513 F.3d 1038, 1044 (9th Cir. 2008). Such allegations need not be pled with specificity. *Id.* Although the "validity of the 'relevant market' is typically a factual element rather than a legal one," an antitrust complaint may be dismissed under Rule 12(b)(6) "if the complaint's 'relevant market' definition is facially unsustainable." *Id.* "The relevant market must include both a geographic market and a product market." Hicks v. PGA Tour, Inc., 897 F.3d 1109, 1120 (9th Cir. 2018). PSG alleges two relevant markets: a rebar manufacturing market centered near Los Angeles, which PSG seeks to enter, and Furnish-and-Install markets in the Los Angeles Basin and the San Francisco Bay Area, in which PSG currently competes.

i. Geographic Market

HN6[] A properly defined geographic **[*12]** market extends to the "area of effective competition" in which "buyers can turn for alternative sources of supply." *Tanaka v. Univ. of S. Cal., 252 F.3d 1059, 1063 (9th Cir. 2001)* (citation and internal quotation marks omitted). PSG alleges the relevant Furnish-and-Install market covers a 200-mile radius from the Los Angeles basin (PSG's Southern California fabrication facilities), and a 200-mile radius from the San Francisco Bay Area (PSG's Northern California fabrication facilities). Compl. ¶ 117. PSG alleges the relevant rebar manufacturing market covers a "500-mile radius from the high desert area near the greater Los Angeles basin." *Id.* ¶ 109.

With respect to the Furnish-and-Install market, PSG alleges that rebar is "costly to ship due to its weight and irregular shape[,]" and that "additional trips to the construction site are sometimes needed." *Id.* ¶ 115. Therefore, "[t]he large majority of sales of Furnish-and-Install services are provided at construction sites within 200 miles of the fabrication plant." *Id.* ¶ 116. As a result, the alleged Furnish-and-Install product market extends 200 miles from each of PSG's fabrication facilities. The Court finds that PSG has plausibly alleged this market.[1]

With respect to the rebar manufacturing market, **[*13]** PSG contends that "[r]ebar's weight makes it expensive to ship, especially relative to the cost of manufacturing rebar." Compl. ¶ 30. "There are substantial cost advantages to sourcing rebar locally to reduce shipping costs." *Id.* As a result, "[a] significant majority of rebar sales are to customers located within 500 miles of a mill, and most of those sales are to customers located less than 400 miles away." *Id.* ¶ 108. On this basis, PSG alleges that the relevant rebar market is defined by the outer limits of what is economical to ship.

CMC contends that PSG's allegations regarding the geographic market are conclusory and implausible. Dkt. No. 40 ("CMC Mot.") at 8. CMC argues that a geographic market must include all sellers to whom a purchaser can reasonably turn, including imports, and that because at least some rebar in California is supplied by imports, PSG's claimed geographic market is implausible. *Id.* (citing Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)). PSG acknowledges that foreign imports account for at least some (roughly 7%) of total rebar sourced in California. Compl. ¶ 33.[2]

HN7[] The question of what constitutes a relevant market is factual, and not usually appropriate to resolve at the motion to dismiss stage. **[*14]** Newcal Indus., 513 F.3d at 1045. Because PSG has plausibly alleged that transportation costs are a determinative factor in the geographic scope of the rebar market and that the majority of rebar sales are to customers located within 500 miles of a mill, its alleged geographic market is not "facially

[1] While CMC asserts that "[t]his geographic scope is not supported by any facts," CMC Mot. at 14, CMC fails to address the alleged facts about the Furnish-and-Install market's geographic scope, and fails to explain why these facts do not satisfy the pleading standard.

[2] CMC notes that the complaint does not allege the percentage of rebar bought from domestic suppliers located outside of PSG's geographic market and requests judicial notice of documents that purport to show PSG's purchase of rebar from Washington, Nevada, Oregon, and Texas. CMC Mot. at 3-4, 9. The Court **DENIES** CMC's request for judicial notice, Dkt. No. 41, because CMC asks the Court to resolve a factual dispute through "judicial notice of disputed facts contained in such . . . records." *See* Khoja, 899 F.3d at 999.

unsustainable." *Id.* Accordingly, the Court finds that PSG has plausibly alleged a geographic rebar manufacturing market.

ii. Product Market

HN8[] A properly defined product market "must encompass the product at issue as well as all economic substitutes for the product." *Id. at 1045* (citation omitted). Whether a product can be substituted is "determined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." *Id.* (citing *Brown Shoe v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*). Concerning the rebar manufacturing market, PSG alleges that "[s]teel rebar is used to reinforce concrete slabs in construction projects. . . . It is virtually impossible to complete a commercial construction project without using rebar to reinforce concrete structures." Compl. ¶ 106. Alternatives, like stainless steel, are far more expensive and are not commercially viable. *Id.* Concerning the Furnish-and-Install market, PSG alleges that fabrication **[*15]** and installation "services are necessary for steel rebar to be used to reinforce concrete in a structure, and there are no substitutes for these services." *Id.* ¶ 114. These factual allegations are sufficient to plausibly allege a product market.

iii. CMC's Market Power

PSG's Sherman Act claims also require plausible allegations of market power. *See Newcal Indus., 513 F.3d at 1044 n. 3* ("The 'relevant market' and 'market power' requirements apply identically under the two different sections of the Act, meaning that the requirements apply identically to all six of [plaintiff's] claims.").[3] ***HN9***[] Market power is demonstrated by a party's "ability to raise prices profitably by restricting output." *Am. Express Co., 138 S. Ct. at 2288* (citation omitted). "Market power cannot be inferred solely from the existence of entry barriers and a dominant market share." *Rebel Oil Co. v. Atl. Richfield Co., 51 F.3d 1421, 1441 (9th Cir. 1995)*. "The ability to control output and prices—the essence of market power—depends largely on the ability of existing firms to quickly increase their own output in response to a contraction by the defendant." *Id.*

HN11[] The Ninth Circuit has explained that "[w]hile market share is just the starting point for assessing market power, . . . market share, at least above some level, could support a finding of market power in the **[*16]** absence of contrary evidence." *Cost Mgmt. Servs., Inc. v. Wash. Nat. Gas Co., 99 F.3d 937, 950-51 (9th Cir. 1996)* (quoting *Hunt—Wesson Foods, Inc. v. Ragu Foods, Inc., 627 F.2d 919, 925 (9th Cir.1980)*). "Where such an inference is not implausible on its face, an allegation of a specific market share is sufficient, as a matter of pleading, to withstand a motion for dismissal." *Id.* (emphasis removed).

With respect to the rebar market, PSG "believes that CMC has accounted for approximately 50% of the total rebar sold in the relevant market during the relevant time period." Compl. ¶ 111. CMC contends that this allegation is conclusory and below the threshold of 65% market share generally required by courts. CMC Mot. at 7. ***HN12***[] The Ninth Circuit, however, has been "reluctant to apply such bright-line rules regarding market share in deciding whether a defendant has market power to restrict output or raise prices." *Rebel Oil, 51 F.3d at 1438 n.10*. The Ninth Circuit has advised courts to be "wary of the numbers game of market percentage," and instead consider relevant market factors including "market share, entry barriers and the capacity of existing competitors to expand output." *Id.* Given that the complaint includes allegations of 50% market share and "[s]ubstantial barriers to entry . . . that make

---

[3] PSG argues that because it has alleged direct evidence the Defendants excluded competition, it need not establish CMC's market power. Opp. at 12-13. ***HN10***[] But the Supreme Court has made clear that a market power analysis is required for antitrust claims based on vertical restraints. *Am. Express, 138 S. Ct. at 2285 n.7* ("Vertical restraints often pose no risk to competition unless the entity imposing them has market power, which cannot be evaluated unless the Court first defines the relevant market. . . . '[T]he possibly anticompetitive manifestations of vertical arrangements can occur only if there is market power.'" (citations omitted)).

CMC's market power durable," Compl. ¶¶ 71, 111-112, the Court finds that PSG has **[*17]** plausibly alleged CMC's market power in the rebar manufacturing market.

With respect to the Furnish-and-Install market, "PSG estimates that CMC Rebar's market share in each of the relevant markets has ranged between 15% and 30% during the relevant time period." Compl. ¶ 119. But a market share of somewhere between 15% and 30% does not appear to be enough to establish market power. *See* *Distance Learning Co. v. Maynard, No. 19-cv-03801-KAW, 2020 U.S. Dist. LEXIS 99256, 2020 WL 2995529, at *7 (N.D. Cal. June 4, 2020)* (noting "the 'gray area of the law' between the 30% and 65% thresholds identified by the Ninth Circuit."). PSG disagrees and cites three cases in support of its argument that market power can exist below 30% of market share. Opp. at 14 (citing *Twin City Sportservice, Inc. v. Charles O. Finley & Co., Inc., 676 F.2d 1291, 1301 (9th Cir. 1982)*; *United States v. Visa U.S.A., Inc., 344 F.3d 229 (2nd Cir. 2003)*; *Toys "R" Us, Inc. v. F.T.C., 221 F.3d 928, 937 (7th Cir. 2000)*). But none of those cases stand for the proposition that a market share below 30%, *standing alone*, equates to market power. The court in *Twin City Sportservice* "found unreasonable restraint of trade had been evidenced not only by Sportservice's 24 percent share of the relevant market, but also from its continuing *pattern of conduct that produced that market share*," including predatory franchise agreements. *676 F.2d at 1301* (emphasis added). The court in *Visa U.S.A.* found defendants had market power because merchants "could not refuse to accept payment by Visa [47% market share] **[*18]** or MasterCard [26% market share], even if faced with significant price increases, because of customer preference." *344 F.3d at 239-40*. And the court in *Toys "R" Us* found that defendant had market power not because of its 20% market share but because of "direct evidence of anticompetitive effects." *221 F.3d at 937*. ***HN13***[] In short, market power can be plausibly alleged even with a low market share if other anticompetitive factors are adequately alleged.

Here, PSG's allegations regarding the Furnish-and-Install market are focused on state law unfair practices claims rather than Sherman Act violations. Compl. ¶¶ 148-157. PSG does allege that Defendants' anticompetitive behavior in the rebar manufacturing market will result in loss of access to a lower-cost supply of rebar for PSG's Furnish-and-Install business, *Id.* ¶¶ 128, 133-134, 140-141, 146-147, but these allegations are conclusory and stem from alleged anticompetitive behavior in the rebar manufacturing market rather than the Furnish-and-Install market. Taking PSG's allegations as a whole, the Court finds that PSG has not plausibly alleged that CMC's market share of 15-30% coupled with other behavior establishes market power in the Furnish-and-Install market. According, **[*19]** PSG's Sherman Act claims against CMC in the Furnish-and-Install market are **DISMISSED WITH LEAVE TO AMEND**.

iv. Danieli's Market Power

HN14[] As discussed above, "[i]n order to state a valid claim under the Sherman Act, a plaintiff must allege that the defendant has market power within a 'relevant market.'" *Newcal Indus., 513 F.3d at 1044*. But PSG does not allege that Danieli has market power in either the rebar manufacturing market or the Furnish-and-Install market. *See* Compl. at 28-29, 31. Rather, Danieli builds and supplies steel mills. *Id.* ¶ 22.

Still, PSG contends that a supplier that has entered into an anticompetitive vertical agreement with a customer may be subject to antitrust liability for harm caused in the customer's downstream market, relying on *Beech Cinema, Inc. v. Twentieth Century Fox-Film Corp., 622 F.2d 1106 (2d Cir. 1980)*, and similar cases. Opp. at 31. The Court finds that *Beech Cinema* and the other cases cited by PSG are of limited persuasive value. In addition to being out of circuit authority that is decades old, the cases relied upon by PSG do not squarely analyze whether a supplier like Danieli can be held liable under the Sherman Act for anticompetitive behavior in a market in which it does not participate. ***HN15***[] In the absence of clear authority to the contrary, the Court will rely on **[*20]** Ninth Circuit precedent holding that "to state a valid claim under the Sherman Act, a plaintiff must allege that the defendant has market power within a 'relevant market.'" *Newcal Indus., 513 F.3d at 1044*. PSG is not pleading that the market for steel mills is being restrained. Rather, PSG is pleading that the rebar manufacturing and Furnish-and-Install markets are being restrained. But Danieli is not a participant in those markets and is not alleged to have market power within them.

Further, PSG's arguments come close to implying that Danieli has an antitrust duty to deal with PSG. As Danieli points out, PSG does not allege that it was barred from contracting with another builder of steel mills, or with Danieli to build a different type of steel mill, such as a mini mill, within the exclusivity zone. Dkt. No. 39 at 3-4. Rather, PSG alleges that it was barred from contracting with Danieli for one specific type of steel mill, i.e. a micro mill, that it preferred at a location of its choosing. ***HN16***[] "As the Supreme Court has repeatedly emphasized, there is 'no duty to deal under the terms and conditions preferred by [a competitor's] rivals[.]" *Qualcomm, 969 F.3d at 993* (citations omitted). Likewise, "the Sherman Act 'does not restrict the long recognized **[*21]** right of [a] trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal.'" *Id.* "This is because the antitrust laws, including the Sherman Act, were enacted for the protection of *competition*, not *competitors*." *Id.* (citations and quotation marks omitted). ***HN17***[] The limited exception to the "general rule that there is no antitrust duty to deal comes under the Supreme Court's decision in *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 105 S. Ct. 2847, 86 L. Ed. 2d 467 (1985)*." *Id.* The Ninth Circuit has explained that the *Aspen Skiing* exception applies in limited circumstances where a company (1) "unilateral[ly] terminat[es]. . .a voluntary and profitable course of dealing;" (2) "the only conceivable rationale or purpose is 'to sacrifice short-term benefits in order to obtain higher profits in the long run from the exclusion of competition;'" and (3) "the refusal to deal involves products that the defendant already sells in the existing market to other similarly situated customers." *Id.* (citations omitted). It may be that PSG is able to adequately allege facts supporting this exception, but it has not done so in the current complaint. Accordingly, the Court **DISMISSES WITH LEAVE TO AMEND** the **[*22]** claims against Danieli.

B. First Cause of Action: Conspiracy In Restraint Of Trade By CMC And Danieli In Violation Of The Sherman Act, Section 1

HN18[] *Section 1 of the Sherman Act* prohibits "[e]very contract, combination . . . , or conspiracy, in restraint of trade or commerce among the several States." *15 U.S.C. § 1*. The Supreme Court has long held that, "the phrase 'restraint of trade' is best read to mean 'undue restraint.'" *Am. Express Co., 138 S. Ct. at 2283*. Therefore, "[t]o establish liability under *§ 1*, a plaintiff must prove (1) the existence of an agreement, and (2) that the agreement was in unreasonable restraint of trade." *Aerotec Int'l, Inc. v. Honeywell Int'l, Inc., 836 F.3d 1171, 1178 (9th Cir. 2016)* (citation omitted). Because PSG's Sherman Act claims against CMC in the Furnish-and-Install Market and against Danieli are not adequately pled, as discussed above, the Court need only consider whether PSG has adequately alleged an unreasonable restraint of trade against CMC in the rebar manufacturing market.

i. Existence Of An Agreement

The parties do not dispute that a contract exists between CMC and Danieli, and PSG's factual allegations are sufficient to establish an agreement. Therefore, the first element of a *Sherman Act Section 1* claim is satisfied.

ii. An Unreasonable Restraint of Trade

HN19[] A restraint of trade may be found unreasonable under either a per se **[*23]** rule or the "rule of reason" burden-shifting framework. *Am. Express, 138 S. Ct. at 2283-2284*. A minority of restraints are found per se unreasonable because they "always or almost always tend to restrict competition and decrease output. . . . Restraints that are not unreasonable per se are judged under the 'rule of reason.'" *Id.* (citation omitted). "The rule of reason requires courts to conduct a fact-specific assessment of 'market power and market structure . . . to assess the [restraint]'s actual effect' on competition." *Id.* (citation omitted).

HN20[] "Typically only 'horizontal' restraints—restraints 'imposed by agreement between competitors'—qualify as unreasonable *per se*." *Id. at 2284* (citation omitted). A common example is price fixing. On the other hand, vertical restraints should nearly always be analyzed under the rule of reason. *Id.*; *see also Allied Orthopedic Appliances Inc. v. Tyco Health Care Grp. LP, 592 F.3d 991, 996 (9th Cir. 2010)* ("[A]n exclusive-dealing arrangement does not constitute a per se violation of *section 1*."). PSG contends that CMC and Danieli's conduct is a per se violation of federal and California state antitrust laws. Compl. ¶ 127. But the parties do not dispute that the agreement at issue—establishing the micro-mill exclusivity zone—is vertical, and PSG has not pled that CMC and Danieli agreed to set prices. **[*24]** *See Rheumatology Diagnostics Lab., Inc. v. Aetna, Inc., No. 12-cv-05847-WHO, 2014 U.S. Dist. LEXIS 16631, 2014 WL 524076, at *9 (N.D. Cal. Feb. 6, 2014)* ("***HN21***[] A vertical restraint of trade is not per se illegal under *§ 1 of the Sherman Act* unless it includes some agreement on price or price levels." (quoting *Bus. Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 717, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*)). PSG has not provided any other reason why the Court should analyze the agreements at issue under the per se rule. As a result, the Court finds that the rule of reason applies.

In its motion to dismiss, CMC argues that PSG fails to adequately allege that entry into the rebar manufacturing market is foreclosed by the exclusivity zone, relying on caselaw that addresses "exclusive-dealing" arrangements. CMC Mot. at 9-10. 12-14. In response, PSG argues that it is not bringing an exclusive-dealing claim, such that market foreclosure is not at issue. Opp. at 21. Rather, PSG argues that the relevant question is whether the contract restriction constitutes "anticompetitive conduct." *Id.* The Court finds this argument curious. It is true that the CMC-Danieli exclusivity zone is not "an agreement between a vendor and a buyer that prevents the buyer from purchasing a given good from any other vendor" and thus does not fit squarely within the traditional definition of an exclusive-dealing relationship. *See Allied Orthopedic 592 F.3d at 996*. But the "anticompetitive conduct" that PSG alleges **[*25]** is an exclusive relationship between a provider of an essential input into a market, i.e. steel mills, and a customer. *See* Compl. ¶ 110 ("CMC was able to exclude PSG by conspiring with the sole provider of the technology PSG needs to profitably enter the market."). And the harm alleged by PSG is foreclosure from the rebar manufacturing market. *Id.* ¶ 100 ("Exclusive access not only *forecloses* PSG's entry into the relevant rebar manufacturing market, but blocks entry by other potential competitors as well.") (emphasis added).

Given that the harm alleged by PSG is market foreclosure due to an exclusive relationship between a provider and its customer, the Court is not persuaded by PSG's argument that the authority on exclusive dealing and market foreclosure is irrelevant. On the contrary, the Court finds that the contractual relationship at issue between CMC and Danieli is analogous enough to a traditional exclusive-dealing relationship to make the precedent in that area helpful in analyzing PSG's allegations of anticompetitive conduct. *See Omega Env't, Inc. v. Gilbarco, Inc., 127 F.3d 1157, 1162 (9th Cir. 1997)* (***HN22***[] "The main antitrust objection to exclusive dealing is its tendency to 'foreclose' existing competitors or new entrants from competition in the covered **[*26]** portion of the relevant market during the term of the agreement.").

HN23[] "Under the antitrust rule of reason, an exclusive dealing arrangement violates Section 1 only if its effect is to 'foreclose competition in a substantial share of the line of commerce affected.'" *Allied Orthopedic, 592 F.3d at 996*. The Ninth Circuit has indicated that in analyzing allegations of market foreclosure, courts are to consider alternative sources available to competitors. *Omega Env't, 127 F.3d at 1162-63* (quoting with approval the proposition that the "foreclosure calculation 'includes the full range of selling opportunities reasonably open to rivals, namely, all the product and geographic sales they may readily compete for, using easily convertible plants and marketing organizations.'").[4]

PSG claim that it is foreclosed from the rebar manufacturing market by the exclusivity zone is undermined by PSG's own factual allegations. The premise of PSG's claim is that entry into the rebar manufacturing market *must* be via a micro mill built by Danieli. *See* Compl. ¶¶ 5, 113, 126. In support, PSG alleges that "all three of the new mills CMC has built (or is building) since 2009 are [micro] mills . . . as are both of the mills built recently by Nucor Corporation." **[*27]** Opp. at 4; Compl. ¶¶ 55-57, 98. But this, at best, suggests only that micro mills are preferable to mini mills, not that mini mills are obsolete, or that "[t]he *only* commercially viable way for PSG to enter the relevant rebar manufacturing market [is] to construct a micro mill." Compl. ¶ 5 (emphasis added).

---

[4] While the Ninth Circuit's decision in *Omega Environmental* dealt with a claim under *Section 3 of the Clayton Act*, the Ninth Circuit has applied similar standards in Sherman Act cases and held that "a *greater* showing of anticompetitive effect is required to establish a Sherman Act violation than a section three Clayton Act violation in exclusive-dealing cases." *Twin City Sportservice, 676 F.2d at 1304 n.9* (emphasis added).

On the contrary, a necessary implication of PSG's allegations is that other competitors are operating successfully in the rebar manufacturing market without micro mills. For example, PSG alleges that CMC controls 50% of the Los Angeles-based rebar manufacturing market even though CMC is the only manufacturer in the region using a micro mill. *Id.* ¶ 111. Thus, accepting PSG's allegations as true, at least half of the market is being supplied by traditional or mini mills. CMC itself uses mini mills and has purchased them quite recently: while it may be true that all of the mills CMC has built recently are micro mills, CMC agreed to acquire four steel mills from Gerdau in 2018, none of which are micro mills. *Id.* ¶ 69. PSG concedes that mini mills are "capable of generating profits on rebar through cost control and advanced technology." *Id.* ¶ 49. Finally, PSG alleges that it is a superior **[*28]** competitor. *Id.* ¶ 62 ("PSG's innovative and efficient operations and its high performance standards yield superior performance and lower costs"). So, a reasonable inference is that PSG could, like those companies already in the rebar market, compete using a mini mill.

In short, PSG's claim elides the difference between "the most efficient means of entry or expansion—the MI.DA mill—" and the ability to enter the market at all. *Id.* ¶ 113. It may be true that micro mills are highly efficient and an improvement on mini mills. *Id.* ¶ 52-60. Micro mills can, for example, output directly to rebar rather than steel billets (which must later be crafted into rebar); mini mills cannot. *Id.* But neither PSG's allegations, nor reasonable inferences from them, plausibly allege that building a micro mill with Danieli is the *only* way to enter the rebar manufacturing market. Because PSG's restraint of trade claim is based on its complete exclusion from the rebar manufacturing market and because the facts alleged by PSG suggest that manufacturing using mini mills is a viable means of competing in the market, the Court finds that PSG has not adequately alleged an unreasonable restraint of trade.[5] Accordingly, **[*29]** PSG's conspiracy in restraint of trade claim is **DISMISSED WITH LEAVE TO AMEND**.

C. Second Through Fourth Causes of Action: Monopolizations Claims In Violation Of The Sherman Act, Section 2

HN24[] To establish liability under *Section 2 of the Sherman Act*, "a plaintiff must show: (a) the possession of monopoly power in the relevant market; (b) the willful acquisition or maintenance of that power; and (c) causal antitrust injury." *Qualcomm, 969 F.3d at 990* (quotation marks omitted).

"'***HN25***[] Antitrust injury' means 'injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful.'" *Somers v. Apple, Inc., 729 F.3d 953, 963 (9th Cir. 2013)*. Essentially, PSG must adequately allege that its loss "flows from an *anticompetitive* aspect or effect of" Defendants' behavior. *Pool Water Prods. v. Olin Corp., 258 F.3d 1024, 1034 (9th Cir. 2011)*. "'If the injury flows from aspects of the defendant's conduct that are beneficial or neutral to competition, there is no antitrust injury, even if the defendant's conduct is illegal per se.'" *Id.* A causal link between a plaintiff's injuries and a defendant's actions alone is not enough to sustain an antitrust claim. *See Cascade Health Sols. v. PeaceHealth, 515 F.3d 883, 902 (9th Cir. 2008)*.

PSG alleges that competition in the rebar manufacturing market has been harmed in a number of ways: PSG claims that it would have been a "a lower-cost producer with the **[*30]** ability and incentive to price below the market and spur greater price competition" had it entered the rebar manufacturing market; that "additional production capacity and output and the resulting additional competition is excluded from the market"; and that "other potential entry into the relevant rebar manufacturing market is foreclosed." Compl. ¶ 126. But the only basis upon which PSG rests these claims is the allegation that "[t]he *only* commercially viable way for PSG to enter the relevant rebar manufacturing market [is] to construct a micro mill." *Id.* ¶ 5 (emphasis added). As discussed above, PSG's allegations, and reasonable inferences drawn from them, do not adequately foreclose the possibility that

[5] The Court notes that the exclusionary zone challenged by PSG centers on Rancho Cucamonga, California and not Mesa, Arizona, the site of the planned CMC micro mill. While certainly revealing with respect to CMC's motives, this fact does not obviate the need for PSG to plausibly allege all necessary elements of its Sherman Act claims. Additionally, even if CMC had opted to center the second exclusionary zone on Mesa, Arizona, that still would have foreclosed PSG from building a micro mill in the greater Los Angeles basin.

PSG or other competitors could enter the rebar market using mini mills rather than a micro mill built by Danieli, which is the only type of steel mill affected by the alleged anticompetitive conduct.

PSG also claims personal injuries, asserting that, since it is barred from the rebar manufacturing market, "it will lose sales of rebar and the profits thereon; and . . . [it] is losing access to a lower-cost supply of rebar for its rebar Furnish-and-Install business." Compl. ¶ 134. ***HN26***[] Setting **[*31]** aside the issue of whether PSG is in fact barred from the rebar manufacturing market, injuries to a competitor that do not also harm competition are not grounds for antitrust claims. *See* *Qualcomm, 969 F.3d at 993* (explaining that "the antitrust laws, including the Sherman Act, were enacted for the protection of *competition*, not *competitors*" and therefore the Sherman Act generally "does not restrict the long recognized right of [a] trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal."); *Paladin Assocs., Inc. v. Montana Power Co., 328 F.3d 1145, 1158 (9th Cir. 2003)* ("Where the defendant's conduct harms the plaintiff without adversely affecting competition generally, there is no antitrust injury.").

HN27[] To that end, competition may be promoted rather than harmed by vertical agreements, like the ones at issue here, because they have "potential to stimulate interbrand competition, 'the primary concern of ***antitrust law***.'" *Bus. Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 724, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*. And PSG, as a purchaser of rebar, may in fact be helped by this interbrand competition if it results in lower priced rebar available from CMC. *See* *Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 329, 110 S. Ct. 1884, 109 L. Ed. 2d 333 (1990)* (finding that plaintiff did not suffer antitrust injury in part because the alleged conspiracy would have worked to its advantage). **[*32]** That said, vertical restraints certainly can injure competition when they "foreclose competitors from entering or competing in a market." *Brantley v. NBC Universal, Inc., 675 F.3d 1192, 1198-1200 (9th Cir. 2012)*. But, again, PSG has not adequately pled that it has been prevented from entering the rebar manufacturing market.

In short, because PSG's has not adequately pled causal antitrust injury, its monopolization claims are **DISMISSED WITH LEAVE TO AMEND**.

D. Fifth Through Eighth Causes of Action (State Law Claims)

HN28[] A district court may decline to exercise supplemental jurisdiction if it has dismissed all claims over which it has original jurisdiction. *Sanford v. MemberWorks, Inc., 625 F.3d 550, 561 (9th Cir. 2010)* (citing *28 U.S.C. § 1367(c)(3)*). "[I]n the usual case in which all federal-law claims are eliminated before trial, the balance of factors to be considered under the pendent jurisdiction doctrine—judicial economy, convenience, fairness, and comity—will point toward declining to exercise jurisdiction over the remaining state-law claims." *Id.* (citation and internal quotations omitted).

PSG alleges that the Court has subject matter jurisdiction over the federal claims and supplemental jurisdiction over the state claims. Compl. ¶ 11. Having dismissed all the federal claims, the Court, in its discretion, declines to assert supplemental jurisdiction **[*33]** over the remaining state law claims unless and until PSG can state a valid federal claim. Accordingly, PSG's state law claims are **DISMISSED** without prejudice. Plaintiff may reassert these claims (but no new state law claims) in any amended complaint.

IV. CONCLUSION

The Court **GRANTS** Defendants' motions to dismiss with **LEAVE TO AMEND**.[6] Dkt. Nos. 39, 40. Plaintiff may not add any new causes of action or defendants to an amended complaint, and any amended complaint must be filed within 21 days from the date of this Order.

---

[6] The Court also **DENIES AS MOOT** Defendants' motion to stay discovery pending the Court's decision on Defendants' motion to dismiss. Dkt. No. 49.

IT IS SO ORDERED.

Dated: 5/21/2021

Opinion

MEMORANDUM

MARSTON, J.

Plaintiff Cigna Corporation filed this action against Defendants Celgene Corporation and its parent company Bristol-Meyers Squibb Corporation ("BMS") (collectively Defendants) alleging that Defendants violated federal and state antitrust laws by suppressing generic competition against Celgene's Thalomid and Revlimid drugs. (Doc. No. 1.) Presently before the Court is the parties' joint motion to transfer venue to the District of New Jersey pursuant to *28 U.S.C. § 1404(a)*. (Doc. No. 17.) Following a status conference with the Court, the **[*2]** parties filed a supplemental memorandum in support of their joint motion to transfer providing additional information related to BMS's presence in the Eastern District of Pennsylvania.[1] (Doc. No. 19.) For the reasons that are discussed below, the parties' joint motion will be granted.

I.

Cigna's complaint alleges six counts against Defendants: (I) violation of *Section 2 of the Sherman Act*; (II) a monopolization and monopolistic scheme under various state laws; (III) an attempted monopolization under state laws; (IV) unfair and deceptive trade practices under state laws; (V) unjust enrichment under state laws; and (VI) declaratory and injunctive relief under *Section 16* of the Clayton Act for Celgene's violations of *Section 2 of the Sherman Act*. (*Id.* at ¶¶ 448-89.) The facts of this action are complex, as evidenced by Cigna's 131-page complaint. As relevant to this Memorandum, the facts are as follows.[2]

Cigna is a Delaware corporation with a principal place of business in Bloomfield, Connecticut. (Doc. No. ¶ at ¶ 14.) Cigna is the parent company of or is otherwise affiliated with businesses that operate specialty pharmacies, health insurance plans, and prescription drug plans. (*Id.* at ¶¶ 15-16.) Celgene is a pharmaceutical company, incorporated in Delaware **[*3]** and with a principal place of business in Summit, New Jersey, that manufactures and markets Thalomid and Revlimid. (*See id.* at ¶ 19.) BMS is Celgene's parent company and is incorporated in Delaware, with a principal place of business in New York City, New York. (*Id.* at ¶ 20.) BMS has owned Celgene since January 2, 2019. (*Id.*) According to the parties' supplemental memorandum in support of their joint transfer motion, BMS also leases a storage facility in Falsington, Pennsylvania, which is located within the Eastern District of Pennsylvania. (Doc. No. 19 at ¶ 4.)

The prescription drug market is subject to a complex regulatory scheme designed to balance the intellectual property rights of pharmaceutical companies, patient health and safety, and the benefits of free-market competition. (*See id.* at ¶¶ 21-67.) Federal law requires companies that invent a new drug to obtain approval from the Food and Drug Administration ("FDA") before they may sell the drug.[3] (*Id.* at ¶ 28 (citing *21 U.S.C. § 355(b)*).)

At issue in this suit are the allegedly unlawful tactics that Defendants purportedly employed to protect two of Celgene's name-brand drugs, Thalomid and Revlimid, from generic competition. **[*4]** (*Id.* at ¶ 1.) Cigna alleges that Celgene manipulated its Risk Evaluation and Mitigation Strategy ("REMS") programs for these drugs, abused the patent process related to them, and filed baseless citizen petitions, all to prevent generic manufacturers from producing generic versions of the drugs. (*Id.*) Cigna also alleges that when these efforts failed, Celgene paid off generic manufacturers to delay bringing their generic versions of the drugs to market. (*Id.* at ¶ 2. *See generally id.* at ¶¶ 77-417.)

But for this alleged misconduct, Cigna claims that generic Thalomid would have been commercially available in early 2009, and generic Revlimid would have entered the market in or around 2010. (*Id.* at ¶¶ 419-420.) The result of Celgene's conduct, Cigna says, was the illegal maintenance of a monopoly over the sale of Thalomid and Revlimid, allowing Celgene to artificially inflate the prices of these drugs without fear of lost sales. (*Id.* at ¶ 430.) Additionally, Cigna asserts that it was personally injured by Celgene's alleged misconduct in that the misconduct forced Cigna to spend more money on Thalomid and Revlemid than it would have otherwise had to if those drugs were subject to generic **[*5]** competition. (*Id.* at ¶ 425.) Cigna and its subsidiaries have purchased both Thalomid and Revlemid from Celgene in this District. (*Id.* at ¶ 12.)

---

[1] The parties also argued that if the Court were to find venue improper, transfer to the District of New Jersey would also be proper pursuant to *28 U.S.C. § 1406(a)*. (Doc No. 19 at 2-3.)

[2] Unless otherwise noted, these facts are all drawn from Cigna's complaint. At this stage of the litigation, we take the well-pleaded allegations in Cigna's complaint as true. *See* *Lewis v. Nat'l Bd. of Osteopathic Med. Exam'rs, Civil Action No. 20-4368, 2020 U.S. Dist. LEXIS 232062, 2020 WL 7260747, at *1 n.1 (E.D. Pa. Dec. 10, 2020)*.

[3] New drugs that are approved by the FDA become known as "brand-name drugs"; when these same drugs are manufactured and sold by other companies, they are known as "generic drugs." *See Generic Drug Facts*, U.S. FOOD & DRUG ADMIN., https://www.fda.gov/drugs/generic-drugs/generic-drug-facts (last accessed May 6, 2021).

This is one of several cases that has been filed in federal and state courts across the country by various plaintiffs alleging the same basic violations against Defendants. (*See* Doc. No. 17 at ¶¶ 2, 10.) In this case, as well as at least three other cases, Defendants have filed motions to transfer to the District of New Jersey, where similar cases are pending.[4]

II.

Although the parties have stipulated to a transfer of venue to the District of New Jersey, the Court must independently evaluate whether transfer is appropriate. *See* *White v. ABCO Eng'g Corp., 199 F.3d 140, 142 (1999)* ("We conclude that *§ 1404(a)* transfers may not be made simply by stipulation."). "In addressing a motion to transfer, 'all well-pleaded allegations in the complaint are generally taken as true unless contradicted by the defendant's affidavits, and the Court may examine facts outside the complaint to determine proper venue.'" *Lewis, 2020 U.S. Dist. LEXIS 232062, 2020 WL 7260747, at *1 n.1* (quoting *Holiday v. Bally's Park Place, Inc., CV No. 06-4588, 2007 U.S. Dist. LEXIS 66554, 2007 WL 2600877, at *1 (E.D. Pa. Sept. 10, 2007)*).

In federal court, venue transfers are governed by *28 U.S.C. §§ 1404(a)* and *1406(a)*. *Jumara v. State Farm Ins. Co., 55 F.3d 873, 878 (3d Cir. 1995)*. *Section 1404(a)* governs transfer when "both the original and the requested venue are proper." *Id.* Under *§ 1404(a)*, a district **[*6]** court may for the convenience of the parties and witnesses and if it is in the interest of justice "transfer any civil action to any other district or division where it may have been brought or to any district or division to which all parties have consented." *See* *28 U.S.C. § 1404(a)*. "*Section 1406(a)*, on the other hand, applies where the original venue is improper." *Jumara, 55 F.3d at 878*. Under *§ 1406(a)*, the court may either dismiss the action or, "if it be in the interest of justice, transfer such case to any district or division in which it could have been brought." *28 U.S.C. § 1406(a)*.

Under this framework, we must first decide whether venue is proper in the Eastern District of Pennsylvania. Proper venue for Cigna's federal antitrust claims is determined according to the antitrust venue statute, which provides:

> Any suit, action, or proceeding under the antitrust laws against a corporation may be brought not only in the judicial district whereof it is an inhabitant, but also in any district wherein it may be found or transacts business; and all process in such cases may be served in the district of which it is an inhabitant, or wherever it may be found.

15 U.S.C. § 22.

The general venue statute contained in *28 U.S.C. § 1391*[5] applies to Cigna's state law claims, or in the alternative a court may **[*7]** exercise "pendent venue" over state law claims arising out of the same operative facts as Cigna's federal antitrust claims. *See, e.g.,* *Dockery v. Heretick, Civil Action No. 17-4114, 2019 U.S. Dist. LEXIS 81748, 2019 WL 2122988, at *14 (E.D. Pa. May 14, 2019)*; *McKinney v. Pinter, Civil Action No. 18-4185, 2019 U.S. Dist. LEXIS 30715, 2019 WL 952247, at *3-4 (E.D. Pa. Feb. 26, 2019)*.

III.

---

[4] *See* *BCBSM, Inc. v. Celgene Corp., Case No. 20-cv-02071 (SRN/ECW), 2021 U.S. Dist. LEXIS 52785, 2021 WL 1087662, at *8 (D. Minn. Mar. 22, 2021)* (transferring a related matter to the District of New Jersey); *United Healthcare Servs., Inc. v. Celgene Corp., Civil No. 20-686(DSD/ECW), 2020 U.S. Dist. LEXIS 226940, 2020 WL 7074626, at *4 (D. Minn. Dec. 3, 2020)* (same); Minute Order, *Blue Cross & Blue Shield Ass'n v. Celgene Corp.*, No. 1:20-cv-01980-TSC (Apr. 16, 2021) (same); *see also* Docket, *Humana Inc. v. Celgene Corp.*, No. 2:19-cv-07532-ES-MAH (D.N.J.) (related case originally filed in the District of New Jersey).

[5] *Section 1391(b)* states:

> A civil action may be brought in (1) a judicial district in which any defendant resides, if all defendants are residents of the State in which the district is located; (2) a judicial district in which a substantial part of the events or omissions giving rise to the claim occurred, or a substantial part of property that is the subject of the action is situated; or (3) if there is no district in which an action may otherwise be brought as provided in this section, any judicial district in which any defendant is subject to the court's personal jurisdiction with respect to such action.

As for Cigna's federal antitrust claims, contained in Counts I and VI of the complaint, venue is proper under 15 U.S.C. § 22 in any district in which the Defendants reside, may be found, or transact business.

Defendant Celgene

Cigna alleges that it and its subsidiaries have purchased Thalomid and Revlemid from defendant Celgene in the Eastern District of Pennsylvania and that Celgene has its principle place of business in the District of New Jersey. (Doc. No. ¶ at ¶¶ 12, 19.) Therefore, **[*8]** because Celgene transacts business in this District and resides in the District of New Jersey, both Districts are proper venues for Cigna's federal antitrust claims against Celgene.

Because both the Eastern District of Pennsylvania and the District of New Jersey are proper venues for Cigna's federal antitrust claims, we must next consider the *Jumara* private and public factors to determine whether transfer to the District of New Jersey is appropriate. *See* *Jumara, 55 F.3d at 879* (outlining the public and private interest factors that must be considered before a case is transferred pursuant to *§ 1404(a)*); *Yelverton v. Lab. Corp. of Am. Holdings, CIVIL ACTION NO. 19-6045-KSM, 2020 U.S. Dist. LEXIS 81281, 2020 WL 2307353, at *3 (E.D. Pa. May 8, 2020)* ("[H]aving made the threshold determination under *§ 1404(a)* that venue is proper in both forums, the Court now considers the *Jumara* private and public interest factors to determine whether transfer to the District of Delaware under *§ 1404(a)* is appropriate in this case.").

In *Jumara*, the Third Circuit explained that the private interest factors are: (1) the "plaintiff's forum preference as manifested in the original choice," (2) the defendant's forum preference; (3) "whether the claim arose elsewhere;" (4) "the convenience of the parties as indicated by their relative physical and financial condition;" (5) "the convenience of witnesses **[*9]** - but only to the extent that the witnesses may actually be unavailable for trial in one of the fora;" and (6) "the location of books and records (similarly limited to the extent that the files could not be produced in the alternative forum." *55 F.3d at 879*. The public interest factors include: (1) "the enforceability of the judgment;" (2) "practical considerations that could make the trial easy, expeditious, or inexpensive;" (3) "the relative administrative difficulty in the two fora resulting from court congestion;" (4) "the local interest in deciding local controversies at home;" (5) "the public policies of the fora;" and (6) "the familiarity of the trial judge with the applicable state law in diversity cases." *Id.*

For the private interest factors, although Cigna originally filed this case in the Eastern District of Pennsylvania, Cigna has stipulated to the transfer to the District of New Jersey, rendering the first private interest factor essentially neutral. (Doc. No. 17 at ¶ 9). Celgene is headquartered in New Jersey and prefers to litigate this matter in the District of New Jersey. Given the close proximity of the two fora, the other private interest factors—including proximity of witnesses **[*10]** that may be needed for trial and the location of books and records—do not "render one forum significantly more convenient than the other." *Jumara, 55 F.3d at 882*. As for the public interest factors, there is no indication that a judgment against Celgene could be more easily enforced in this District as opposed to the District of New Jersey, so this factor does not weigh for or against transfer. *See* *Perrigo Co. v. AbbVie, Inc., Civil Action No. 20-2132, 2020 U.S. Dist. LEXIS 195977, 2020 WL 6200192, at *3 (E.D. Pa. Oct. 21, 2020)*. Given the proximity of the District of New Jersey and Eastern District of Pennsylvania, it is unlikely that trial will be substantially easier, more expeditious, or more inexpensive in one jurisdiction over the other.[6] And, given that Celgene is "at home" in the District of New Jersey, this factor weighs slightly in favor of transfer. As the claims allege nationwide violations of federal law there are no distinct public interests in resolving the claims in

[6] As one judge put it in evaluating a proposed transfer from the District of New Jersey to the Eastern District, "as the James A. Byrne Courthouse in Philadelphia is visible from the upper floors of the Mitchell H. Cohen Courthouse in Camden, the Court cannot conceive of any meaningful inconvenience or difficulty posed by continued litigation in New Jersey as opposed to the Eastern District of Pennsylvania." *United Ass'n of Plumbers & Pipefitters Loc. 322 of S. N.J. v. Mallinckrodt ARD, LLC, Civil No. 20-188 (RBK/KMW), 2020 U.S. Dist. LEXIS 148343, 2020 WL 5627149, at *8 (D.N.J. Aug. 18, 2020)*. As the related cases in the District of New Jersey are assigned to the Honorable Esther Salas (*see* Doc. No. 17 at ¶¶ 3-5), who is stationed in Newark, the situation in this case is not quite as dramatic as that in *Mallinckrodt*. Nonetheless, the spirit of the *Mallinckrodt* court's analysis applies equally here.

Pennsylvania, no clear difference in policy preferences for the two locales, and no disparities in the qualifications of the federal judges sitting in the two districts to pass on federal law. *See* Jumara, 55 F.3d at 882-83. Court congestion does weigh against transfer as the District of New Jersey currently faces a significantly heavier caseload than this Court,[7] however, the other **[*11]** public interest factors, combined with the fact that a number of related actions are pending in New Jersey, weigh heavily in favor of transfer here.

The Court finds that the private and public interest factors weigh in favor of transferring Counts I and VI against Celgene to the District of New Jersey—particularly given the parties' joint preference to litigate this matter there and the fact that there are already related actions pending there. *See* Orndorff v. Ford Motor Co., Civil Action No. 20-00247-KSM, 2020 U.S. Dist. LEXIS 56592, 2020 WL 1550760, at *1 (E.D. Pa. Mar. 31, 2020) (approving transfer in part because the parties had consented to it); Dawson v. Gen. Motors LLC, No. 3:19-cv-08680, 2020 U.S. Dist. LEXIS 33710, 2020 WL 953713, at *2 (D.N.J. Feb. 24, 2020) (same); Jermano v. Graco Child.'s Prods., Inc., Civil Action No. 12 5905, 2013 U.S. Dist. LEXIS 197512, 2013 WL 12156081, at *1 (E.D. Pa. Feb. 12, 2013) (same); Travelers Indem. Co. v. E.F. Corp., Civ. A. No. 95-5660, 1996 U.S. Dist. LEXIS 20683, 1997 WL 135819, at *8 (E.D. Pa. Mar. 17, 1997) ("Because of the related actions pending in New Jersey, the public interests weigh heavily in favor of transfer.") (collecting cases).

Defendant BMS

The Court notes that Cigna's complaint and the parties' joint motion to transfer has very little factual information for the Court to determine if venue is proper as to BMS in either the Eastern District of Pennsylvania or the District of New Jersey. Rather, Cigna and the Defendants assert that "[v]enue is proper in the District of New Jersey because Celgene is headquartered there and the Complaint alleges **[*12]** conduct there." (Doc. No. 17 at ¶ 8.)

Cigna's complaint alleges that BMS "wholly owns Defendant Celgene Corporation as its subsidiary," "is a biopharmaceutical drug company incorporated under the laws of Delaware with its principal executive offices located [in New York City]," and "is a publicly-traded corporation registered on the New York Stock Exchange under the symbol 'BMY.'" (Doc. No. 1 at ¶ 20.) Although the complaint's allegations largely refer to the actions of both Defendants Celgene and BMS collectively as "Celgene," the parties agreed during a status conference with the Court that, for the purposes of transfer, the complaint can be read as alleging violations of the laws by both Defendants.

The parties have filed a supplemental memorandum in support of their joint motion to transfer that asserts that "BMS presently leases a storage facility in Falsington, Pennsylvania"—a town located within the Eastern District. (Doc. No. 19 at ¶ 4.) The Court finds that the fact BMS has a storage facility in the Eastern District constitutes a sufficient presence to find venue proper pursuant to § 1404(a) for the federal antitrust claims.[8]

Additionally, the Court finds that venue **[*13]** is proper in the District of New Jersey as the Court takes judicial notice of the fact that BMS maintains at least five facilities in New Jersey, and these facilities house BMS's finance,

---

[7] In the twelve-month period ending on September 30, 2020, there were 440 pending cases and 306 weighted filings per judge in the Eastern District, and 2,742 pending cases and 860 weighted filings per judge in the District of New Jersey. *See United States District Courts — National Judicial Caseload Profile*, U.S. COURTS, https://www.uscourts.gov/sites/default/files/data_tables/fcms_na_distprofile0930.2020.pdf (last accessed May 6, 2021).

[8] The Third Circuit has explained that, for the purposes of 15 U.S.C. § 22, a corporation may be "found" in any judicial district in which it has a "presence" and "continuous local activities." In re Auto. Refinishing Paint Antitrust Litig., 358 F.3d 288, 293 n.6 (3d Cir. 2004) (quoting Caribe Trailer Sys., Inc. v. P.R. Mar. Shipping Auth., 475 F. Supp. 711, 716 (D.D.C. 1979)). Additionally, a corporation "transacts business" within a district for § 22 purposes if, "in the ordinary and usual sense" it engages "in any substantial business operations" there. United States v. Scophony Corp. of Am., 333 U.S. 795, 807, 68 S. Ct. 855, 92 L. Ed. 1091 (1948). The Court finds that, for the purposes of 15 U.S.C. § 22, a company that rents a warehouse within a judicial district may be "found" in and "transacts business" in that district. *See R.I. Fittings Co*.

legal, and accounting departments.[9] These activities are sufficient indicators that BMS may be found in and transacts business in the District of New Jersey.

Because venue is proper both in this District and in the District of New Jersey, *28 U.S.C. § 1404(a)* governs transfer, and the Court again considers whether the *Jumara* private and public interest factors militate in favor of transferring this matter to the District of New Jersey. The Court finds that they do. The analysis of these factors is largely identical to the analysis with respect to Cigna's claims against Celgene, with one exception. That exception is that BMS, unlike Celgene, is not "at home" in the District of New Jersey; it is at home in the District of Delaware and the Southern District of New York. However, given BMS's stated preference to litigate this matter in the District of New Jersey and its significant presence there, this is a distinction without a difference. Therefore, the Court finds, as it did with **[*14]** respect to Celgene, that the *Jumara* public and private interest factors weigh in favor of transferring Counts I and VI against BMS to the District of New Jersey.[10]

IV.

Cigna also brings state antitrust, unfair and deceptive trade practices, and unjust *Rhode Island Fittings Co. v. Grinnell Corp., 215 F. Supp. 198, 200-01 (D.R.I. 1963)* (considering the presence or absence of a warehouse in the district as a factor in the venue analysis under *§ 22*); *Wentling v. Popular Sci. Publ'g Co., 176 F. Supp. 652, 657 (M.D. Pa. 1959)* (same). enrichment claims against Celgene and BMS (Counts II, III, IV and V). "Although venue must generally be established for each cause of action, there is an exception known as 'pendent venue,' which applies 'where claims arise out of the same operative facts.'" *See* *Dockery, 2019 U.S. Dist. LEXIS 81748, 2019 WL 2122988, at *14* (quoting *Phila. Musical Soc'y, Loc. 77 v. Am. Fed'n of Musicians of the U.S. & Can., 812 F. Supp. 509, 517 n.3 (E.D. Pa. 1992)*). Because all the federal ***antitrust law*** claims against Celgene and BMS are properly venued in both this District and the District of New Jersey under *15 U.S.C. § 22*, and the remaining state law claims (state antitrust, unfair and deceptive trade practices, and unjust enrichment) all arise out of the same operative facts, the Court finds venue is proper in both districts as to these claims against both Defendants.[11] The Court finds its analysis of the public and private *Jumara* factors[12] for the federal antitrust claims is also applicable for the state claims and weighs in favor **[*15]** of transfer for these remaining claims against Celgene and BMS to the District of New Jersey.

V.

For these reasons, the Court finds that transfer to the District of New Jersey is appropriate under *§ 1404(a)*. Therefore, the Court grants the parties' joint motion to transfer venue (Doc. No. 17.)

An appropriate Order follows.

---

[9] *See Worldwide Facilities*, BRISTOL MYERS SQUIBB, https://www.bms.com/about-us/our-company/worldwide-facilities.html (last accessed May 5, 2021).

[10] In the alternative, even if venue were not proper in the Eastern District, the Court finds that it would be in the interest of justice to transfer Counts I and VI to the District of New Jersey, where venue is proper, and thus would approve the transfer pursuant to *28 U.S.C. § 1406(a)*.

[11] During the status conference Defendants agreed for purposes of venue only that these state law claims arise out of the same operative facts.

[12] The Court notes that Cigna's claim for unjust enrichment alleges that Defendants have been unjustly enriched under the state laws of both Pennsylvania and New Jersey, and as such, this remains a neutral factor in the Court's analysis, as both the transferor and transferee jurisdictions have an interest in resolving local controversies arising under their laws at home. And, although Cigna alleges a violation of Pennsylvania state law, but not New Jersey law, as to its claim for unfair and deceptive trade practices, the Court finds that the familiarity with the law public interest factor is also neutral here as "[f]ederal district courts are regularly called upon to interpret the laws of jurisdictions outside of the states in which they sit." *Nathan, 2019 WL 3216613, at *7*.

ORDER

AND NOW, this 24th day of May, 2021, upon consideration of the parties' Joint Motion to Transfer Venue (Doc. No. 17) and Supplemental Memorandum in Support of Joint Motion to Transfer Venue (Doc. No. 19), and for the reasons discussed in the accompanying memorandum, it is **ORDERED** as follows:

1. The Joint Motion (Doc. No. 17) is **GRANTED**.

2. The Clerk of Court is directed to **TRANSFER** this lawsuit to the United States District Court for the District of New Jersey pursuant to *28 U.S.C. § 1404(a)*.

IT IS SO ORDERED.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

To survive a Fed. R. Civ. P. 12(b)(6) motion to dismiss for failure to state a claim, a complaint must contain sufficient factual matter, accepted as true, to state a claim to relief that is plausible on its face. A claim is plausible if the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. In determining whether a complaint states a claim for the relief sought, courts construe the complaint in the light most favorable to the plaintiff, accept its allegations as true, and draw all reasonable inferences in favor of the plaintiff.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

HN2[] Sherman Act, Defenses

Under the Parker immunity doctrine , states and state officials are immune from liability for federal antitrust claims brought under the Sherman Act. As explained by the Supreme Court, Parker immunity does not automatically apply to the actions of municipalities and their agents because municipalities and other political subdivisions are not themselves sovereign. Thus, Parker immunity only applies to the actions of municipalities and their agents if they are acting pursuant to a clearly articulated and affirmatively expressed state policy to displace competition. A sufficient state policy exists if the displacement of competition was a foreseeable result of the actions that the state policy authorizes. Displacement of competition is foreseeable when the anticompetitive effects are the inherent, logical, or ordinary result of the exercise of authority delegated by the state. But displacement of competition is not foreseeable if the state takes a merely neutral position regarding the allegedly anticompetitive actions. However, the clear articulation test does not require the state legislature to expressly state that it intends for the delegated actions to have anticompetitive effects. Instead, the municipalities or their agents must show that the state has delegated authority to them to act anticompetitively.

Energy & Utilities Law > Utility Companies

Governments > Local Governments > Duties & Powers

Governments > Local Governments > Property

HN3[] Energy & Utilities Law, Utility Companies

Ky. Const. § 163 grants municipalities the authority and responsibility to control the entry of public utilities into the municipal marketplace by requiring such utilities to obtain a franchise before they can operate within a municipality. While not explicitly mentioned in the statute, the Kentucky Supreme Court has held that § 163 includes cable television systems. Relatedly, § 164 places limits on the length of the franchises that municipalities grant and gives municipalities the right to reject any or all bids when granting franchises. Ky. Const. § 164. In turn, Ky. Rev. Stat. Ann. § 96.010 sets forth the requirements that a municipality must fulfill in granting a franchise. Ky. Rev. Stat. Ann. § 96.010(1). A municipality does not have to fulfill these requirements if the city owns or desires to own and operate a municipal plant to render the required service. § 96.010(2).

Business & Corporate Compliance > ... > Communications Law > Federal Acts > Cable Television Consumer Protection & Competition Act

Governments > Local Governments > Duties & Powers

Communications Law > ... > Rules & Regulations > Regulated Entities > Cable Systems

Business & Corporate Compliance > ... > Regulated Entities > Satellite Services > Direct Broadcast Satellites

HN4[] Federal Acts, Cable Television Consumer Protection & Competition Act

Displacement of competition is the inherent, logical, or ordinary result of a city's constitutional authority to reject bids by cable television providers for franchises and to control which cable television providers may obtain franchises to operate within the municipality. Displacement of competition is also the inherent, logical, or ordinary result of the city's statutory authority to operate its own plant to provide cable television. In this way, Kentucky has delegated authority to cities and their agents to act anticompetitively.

Constitutional Law > State Constitutional Operation

Governments > Local Governments > Property

HN5[] Constitutional Law, State Constitutional Operation

The guiding themes behind the enactment of Ky. Const. § 163 and § 164 were: 1) municipal control; and 2) municipal benefit via the sale of franchises.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Right to Petition Immunity

Governments > Local Governments > Claims By & Against

Communications Law > Federal Acts > Telecommunications Act > Federal Preemption

Antitrust & Trade Law > Regulated Industries > Communications > Telecommunications Act

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

HN6[] Noerr-Pennington Doctrine, Right to Petition Immunity

It cannot be concluded that a municipality should incur antitrust liability simply for contravening some unrelated federal statute, especially in the absence of any authority indicating otherwise. Indeed, violations of the federal Cable Act or Telecommunications Act should be pursued as just that—violations of independent federal statutes. Such violations should not also neutralize a municipality's immunity to federal ***antitrust law***.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Governments > Local Governments > Claims By & Against

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN7[] Parker State Action Doctrine, Local Governments & Private Parties

The Supreme Court has merely acknowledged the possible existence of a market participant exception to Parker immunity in the municipality context. In North Carolina State Board, the Court held that a nonsovereign actor controlled by active market participants enjoys Parker immunity only if it satisfies two requirements: first that the challenged restraint be one clearly articulated and affirmatively expressed as state policy, and second that the policy be actively supervised by the State. Here, the Court did not adopt a market participant exception to Parker immunity but instead, concluded that, subject to these two requirements, Parker immunity still applies to actors controlled by market participants. As the Court itself confirmed in North Carolina State Board, the active supervision requirement does not apply to municipal actors.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN8[] **Scope, Exemptions**

The Sixth Circuit has explained that if a state acts as a commercial participant in a given market, action taken in a market capacity is not protected. Thus, with the possible market participant exception, any action that qualifies as state action is ipso facto exempt from the operation of the antitrust laws. In those circumstances, a state is a market participant when it acts in a proprietary capacity as a purchaser or seller with regard to the challenged action or its actions constitute direct state participation in the market.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN9[] **Private Actions, Sherman Act**

Both Kentucky state courts and federal district courts in Kentucky have analyzed Kentucky state antitrust claims under the same framework as federal antitrust claims.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Same Case & Controversy

Evidence > Burdens of Proof > Allocation

HN10[] **Supplemental Jurisdiction, Same Case & Controversy**

Where subject matter jurisdiction is challenged pursuant to Fed. R. Civ. P. 12(b)(1), the plaintiff has the burden of proving jurisdiction in order to survive the motion. A district court has supplemental jurisdiction over all other claims that are so related to claims in the action within such original jurisdiction that they form part of the same case or controversy under Article III of the United States Constitution. 28 U.S.C.S. § 1367(a). Claims form part of the same case or controversy when they derive from a common nucleus of operative facts.

Opinion

OPINION AND ORDER

This matter is before the Court on the joint partial motion to dismiss filed by Defendants The City of Monticello, Kentucky ("The City"), The City Council of the City of Monticello ("The City Council"), and Community Telecom Services ("CTS") pursuant to *Federal Rules of Civil Procedure 12(b)(6)* for failure to state a claim and *12(b)(1)* for lack of subject-matter jurisdiction. (DE 10.) For the following reasons, the Court grants the motion.

I. Background

Plaintiff NFINITYLINK Communications, Inc. constructs communications networks to deliver cable, internet, and phone services to commercial and residential customers. (Compl. ¶¶ 1, 26.) Plaintiff also offers consulting services related to the operation and management of communications networks to other network owners. (**[*2]** *Id.* ¶ 1.) Plaintiff provided consulting services to CTS to assist with the operation of its cable system. (*Id.* ¶ 30.)

Similar to Plaintiff, CTS is a provider of cable, internet, and phone services. (*Id.* ¶ 4.) CTS offers these services to residents of the City, which has authorized CTS to construct the necessary systems in the City's rights of way. (*Id.*) The City and Wayne County, Kentucky jointly own CTS. (*Id.*) Currently, CTS is the sole cable operator serving the City. (*Id.* ¶ 28.)

A. Plaintiff's Cable Franchise and License Requests

On May 21, 2020, CTS's Board of Directors voted to hire a new co-manager who would be responsible for replacing the services that Plaintiff was providing to CTS. (*Id.* ¶ 35.) The next day, Plaintiff formally requested a cable television franchise through a letter to the City. (*Id.* ¶ 36.) The Board of Directors held a special meeting with Plaintiff on May 28, 2020, during which the Board voted to formally and immediately terminate the consulting relationship between Plaintiff and CTS. (*Id.* ¶¶ 37-40.) On July 27, 2020, Plaintiff sent a follow up letter to the City, giving additional details regarding its cable franchise request. (*Id.* ¶ 45.)

Plaintiff's franchise **[*3]** request was an agenda item for the City Council meeting on August 10, 2020. (*Id.* ¶ 47.) In considering Plaintiff's request, Greg Latham, the City Clerk and CTS's Chairman of the Board of Directors, gave a presentation to the City Council about the prior relationship between CTS and Plaintiff. (*Id.* ¶¶ 49-51.) Latham allegedly asked the City Council to reject Plaintiff's request, explaining that he did not want Plaintiff to compete with CTS. (*Id.* ¶ 52.) The City Council did not invite comment from Plaintiff before voting on Plaintiff's franchise request and ultimately voted to deny the request. (*Id.* ¶¶ 58- 66.) During the same City Council meeting, the City approved an agreement between the City and CTS to allow CTS to install wireless antennas on a City-owned water tower to provide wireless internet service. (*Id.* ¶ 48.)

After the City Council denied Plaintiff's franchise request, Plaintiff asked Latham about the requirements for obtaining a license to occupy the City's rights of way to provide non-cable services. (*Id.* ¶ 71.) Latham responded that the City would not issue Plaintiff such a license without a cable franchise. (*Id.* ¶ 72.)

Thereafter, Plaintiff sent another letter to the City **[*4]** that asked it to reconsider its denials of Plaintiff's requests for a cable franchise and a license to occupy the City's rights of way. (*Id.* ¶ 73.) The City did not respond to Plaintiff's letter. (*Id.* ¶ 74.) On September 10, 2020, Plaintiff requested that the City allow Plaintiff to be heard on its franchise request at the next City Council meeting, but the City denied the request. (*Id.* ¶¶ 75-76.) To date, Plaintiff claims that it never had the opportunity to address the City Council and that the City never provided a reason for denying Plaintiff's franchise request. (*Id.* ¶¶ 80-81.)

B. Plaintiff's Equipment

At the May 28, 2020 meeting where CTS terminated its consulting relationship with Plaintiff, Plaintiff asked CTS to return the equipment that Plaintiff had purchased and installed to operate CTS's cable system. (*Id.* ¶ 41.) CTS indicated that it would return the equipment the following week. (*Id.* ¶ 42.) According to Plaintiff, CTS has never returned the equipment. (*Id.* ¶ 44.)

C. Procedural History

On October 14, 2020, Plaintiff filed a complaint for declaratory and injunctive relief against Defendants, claiming violations of the Sherman Act and Kentucky state antitrust laws and alleging **[*5]** that Defendants are engaging in a conspiracy to maintain CTS's monopoly over the cable market. (*Id.* ¶¶ 119-168.) Plaintiff also claims that the City and the City Council violated the 1992 Cable Act ("Cable Act") and 1996 Telecommunications Act ("Telecommunications Act"). (*Id.* ¶¶ 87-118.) Plaintiff specifically requests a declaratory judgment finding that Defendants' actions violated these respective statutes and an injunction requiring the City to grant Plaintiff's request for a cable franchise. (*Id.* at p. 26- 27.) Additionally, Plaintiff asserts conversion and trespass to chattels claims against CTS. (*Id.* ¶¶ 169-176.)

Defendants filed a joint partial motion to dismiss on November 20, 2020. (DE 10.) Defendants seek to dismiss the federal and state antitrust claims against them, arguing that *Parker* immunity bars these claims. (*Id.* at 5-7.) CTS further argues that the Court lacks supplemental jurisdiction over the conversion and trespass claims against it. (*Id.* at 8-9.)

II. Analysis

A. Standard of Review

HN1[] To survive a 12(b)(6) motion to dismiss for failure to state a claim, a complaint "must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible **[*6]** on its face.'" *Ashcroft v. Iqbal, 556 U.S. 662, 678, 129 S. Ct. 1937, 173 L. Ed. 2d 868 (2009)* (quoting *Bell Atl. Corp. v. Twombly, 550 U.S. 544, 570, 127 S. Ct. 1955, 167 L. Ed. 2d 929 (2007)*). A claim is plausible if "the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged." *Id.* In determining whether a complaint states a claim for the relief sought, courts "construe the complaint in the light most favorable to the plaintiff, accept its allegations as true, and draw all reasonable inferences in favor of the plaintiff." *Cagayat v. United Collection Bureau, Inc., 952 F.3d 749, 753 (6th Cir. 2020)* (citations and quotation marks omitted).

1. *Parker* Immunity

a. Application of *Parker* Immunity to Federal Antitrust Claims

HN2[] Under the *Parker* immunity doctrine[1], states and state officials are immune from liability for federal antitrust claims brought under the Sherman Act. *See* *Parker v. Brown, 317 U.S. 341, 350-51, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. The Supreme Court most recently discussed *Parker* immunity in the municipality context in *Federal Trade Commission v. Phoebe Putney Health System, Inc., 568 U.S. 216, 133 S. Ct. 1003, 185 L. Ed. 2d 43 (2013)*. As explained in *Phoebe Putney, Parker* immunity does not automatically apply to the actions of municipalities and their agents[2] "[b]ecause municipalities and other political subdivisions are not themselves sovereign." *568 U.S. at 225*. Thus, *Parker* immunity only applies to the actions of municipalities and their agents if they are acting "pursuant to a 'clearly articulated and affirmatively expressed' **[*7]** state policy to displace competition." *Id. at 226* (quoting *Cmty. Commc'ns Co. v. City of Boulder, 455 U.S. 40, 52, 102 S. Ct. 835, 70 L. Ed. 2d 810 (1982)*). A sufficient state policy exists if the displacement of competition was a "foreseeable result" of the actions that the state policy authorizes. *Id. at 226-27*. Displacement of competition is foreseeable when the anticompetitive effects are "the inherent, logical, or ordinary result of the exercise of authority delegated by the [state]." *Id. at 229*. But displacement of competition is not foreseeable if the state takes a merely neutral position regarding the allegedly anticompetitive actions. *Id. at 228*. However, the clear articulation test does not require the state legislature to "'expressly state'" that it "'intends for the delegated action[s] to have anticompetitive effects.'" *Id. at 226* (quoting *Town of Hallie v. City of Eau Claire,*

---

[1] *Parker* immunity is also known as "state-action" immunity.

[2] Parties do not appear to dispute that the City Council and CTS are municipal agents for the purposes of *Parker* immunity. Therefore, the Court will analyze the applicability of *Parker* immunity to the actions of Defendants altogether.

471 U.S. 34, 43, 105 S. Ct. 1713, 85 L. Ed. 2d 24 (1985)). Instead, the municipalities or their agents must show that the state has delegated authority to them to act anticompetitively. Id. at 228.

To support their argument that *Parker* immunity shields their allegedly anticompetitive actions from liability for the federal antitrust claims brought against them, Defendants cite to the Sixth Circuit's decision in Consolidated Television Cable Service, Inc. v. City of Frankfort, 857 F.2d 354 (6th Cir. 1988). (DE 10 at 6.) Parties do not dispute the virtually indistinguishable factual similarities between *Consolidated* and the **[*8]** instant case. (*See* DE 10 at 6; DE 13 at 6.) In *Consolidated*, a private cable television provider brought federal antitrust claims against the City of Frankfort, the city's Electric and Water Plant Board, and a city-owned cable provider after the city denied the private provider's requests to utilize city-owned poles for cable services. 857 F.2d 354 at 355-56. The Sixth Circuit ultimately found that *Parker* immunity extended to the defendants' actions because Kentucky law contains "a 'clearly articulated and affirmatively expressed' state policy to allow municipal regulation of the provision of [cable television] service, and, foreseeably, to displace competition." Id. at 359-60.

However, parties dispute whether *Consolidated* remains good law. (DE 13 at 6-11.) Plaintiff maintains that it does not because (1) the Supreme Court's decision in *Phoebe Putney* overturned *Consolidated*; and (2) the Cable Act and the Telecommunications Act preempt any contrary state policy and thus, supersede *Consolidated*. (*Id.*) Defendants disagree. (DE 14 at 1-4.) Plaintiff further contends that, in any event, *Parker* immunity does not apply because Defendants were acting as "market participants" in denying Plaintiff's franchise and license requests. **[*9]** (DE 13 at 12-13.) The Court addresses these arguments in turn.

i. Impact of *Phoebe Putney* on *Consolidated*

Plaintiff argues that the Sixth Circuit's reasoning in *Consolidated* depended on the Eleventh Circuit's "loose application" of the clear articulation test that the Supreme Court later rejected in *Phoebe Putney*. (DE 13 at 9-11.) The Eleventh Circuit found that, under *Parker*, the displacement of competition was a "foreseeable result" of a state policy when the state legislature could have "reasonably anticipated" that anticompetitive conduct would occur as a result of the policy. Phoebe Putney, 568 U.S. at 223 (citing F.T.C. v. Phoebe Putney Health Sys., Inc., 663 F.3d 1369, 1376 (11th Cir. 2011) (quotation marks omitted)). According to the Eleventh Circuit, the anticompetitive effect did *not* need to be "one that ordinarily occurs, routinely occurs, or is inherently likely to occur as a result of the empowering legislation." *Id.* (citation and quotation marks omitted). The Supreme Court ultimately reversed the Eleventh Circuit, instead finding that a state policy meets the clear articulation test if "the displacement of competition was the inherent, logical, or ordinary result of the exercise of authority delegated by the [state]." Id. at 229.

In contrast to Plaintiff's suggestion otherwise, the Sixth **[*10]** Circuit did not apply the Eleventh Circuit's version of the clear articulation test in *Consolidated*, nor did the Sixth Circuit even reference a similar standard. Consolidated, 857 F.2d at 359-61. *Phoebe Putney* merely affirmed and clarified, rather than overturned, existing precedent, finding that displacement of competition is foreseeable when it is the "inherent, logical, or ordinary result" of a state policy. Phoebe Putney, 568 U.S. at 229.

In finding that Kentucky law contains a "clearly articulated and affirmatively expressed" state policy that foreseeably displaces competition, the Sixth Circuit in *Consolidated* analyzed *Parker* immunity consistent with . Consolidated, 857 F.2d at 359-61. The applicable state policy is found in Sections 163 and 164 of the Kentucky Constitution and Kentucky Revised Statute ("KRS") § 96.010. Id at 360-61. Section 163 of the Kentucky Constitution provides:

> No street railway, gas, water, steam heating, telephone, or electric light company, within a city or town, shall be permitted or authorized to construct its tracks, lay its pipes or mains, or erect its poles, posts or other apparatus along, over, under or across the streets, alleys or public grounds of a city or town, without the consent of the proper legislative bodies or boards of such city or town being first obtained[.]

Ky. Const. § 163. ***HN3***[] Put more simply, the provision "grants municipalities **[*11]** the authority and responsibility to control the entry of public utilities into the municipal marketplace by requiring such utilities to obtain a franchise before they can operate within a municipality." *Hopkinsville Cable TV, Inc. v. Pennyroyal Cablevision, Inc., 562 F. Supp. 543, 546 (W.D. Ky. 1982)*. While not explicitly mentioned in the statute, the Kentucky Supreme Court has held that *Section 163* includes cable television systems. *Id.* (citing *City of Owensboro v. Top Vision Cable Co., 487 S.W.2d 283, 287 (Ky. 1972)*). Relatedly, *Section 164* places limits on the length of the franchises that municipalities grant and gives municipalities "the right to reject any or all bids" when granting franchises. *Ky. Const. § 164*. In turn, *KRS § 96.010* sets forth the requirements that a municipality must fulfill in granting a franchise. *See Ky. Rev. Stat. Ann. § 96.010(1)*. A municipality does not have to fulfill these requirements "if . . . the city owns or desires to own and operate a municipal plant to render the required service." *Id. § 96.010(2)*.

In *Consolidated*, the Sixth Circuit found that, as a result of the clearly articulated and affirmatively expressed state policy derived from these provisions, "[the] displacement of competition in the provision of [cable television] service . . . is a foreseeable result of granting the city power to franchise public utilities or own and operate a municipal plant." *Consolidated, 857 F.2d at 361*. Kentucky law is "not neutral" and "clearly **[*12]** contemplates" the anticompetitive conduct alleged. *Id. at 360*. This analysis aligns with that set forth (and further clarified) by the Supreme Court in *Phoebe Putney*.

Moreover, the state policy relied upon in *Consolidated* still sufficiently confers *Parker* immunity on Defendants, even after *Phoebe Putney*. ***HN4***[] Displacement of competition is the "inherent, logical, or ordinary result" of the City's constitutional authority to reject bids by cable television providers for franchises and to control which cable television providers may obtain franchises to operate within the municipality. *Phoebe Putney, 568 U.S. at 229*. Displacement of competition is also the "inherent, logical, or ordinary result" of the City's statutory authority to operate its own plant to provide cable television. *Id.* In this way, Kentucky has "delegated authority to [the City and its agents] to act . . . anticompetitively." *Id. at 228*.

Plaintiff additionally argues that the Kentucky Supreme Court recently characterized the state policy implicated in *Consolidated* "quite differently." (DE 13 at 10.) Plaintiff accordingly cites to *Kentucky CATV Ass'n v. City of Florence, 520 S.W.3d 355 (Ky. 2017)*. In that case, the Kentucky Supreme Court explained, "Evident within the [d]ebates concerning *Sections 163* and *164* is the framers' desire to protect the citizens **[*13]** of a municipality from a city council infiltrated by business interests and whose objective is to profit, at the expense of the public, through perpetual monopolies and backroom dealings." *Kentucky CATV, 520 S.W.3d at 360*. Thus, Plaintiff claims that the state policy is instead "intended to protect *against* anticompetitive monopolies and 'backroom dealings.'" (DE 13 at 10 (emphasis in original).) However, Plaintiff misconstrues this passage. The framers' concern seemingly originated from those perpetual monopolies created by *private corporations*, rather than those created by *municipalities*. ***HN5***[] As the court confirms in the same opinion, "[T]he guiding themes behind the enactment of *Sections 163* and *164* were: 1) municipal control; and 2) municipal benefit via the sale of franchises." *Kentucky CATV, S.W.3d 355 at 361*. This state policy of municipal control over the provision of public utilities is entirely in harmony with the state policy that the Sixth Circuit identified in *Consolidated*.

Therefore, in denying Plaintiff's franchise and license requests, Defendants were acting pursuant to a clearly articulated and affirmatively expressed state policy to displace competition under Kentucky law. Thus, *Parker* immunity applies to Defendants' actions, and Defendants are not **[*14]** liable for the federal antitrust claims brought against them.

ii. Impact of Subsequent Federal Law on *Consolidated*

At the outset, the Court notes that Plaintiff has not cited to a single case finding that the Cable Act or the Telecommunications Act overrides any grant of immunity under *Parker*. The Court recognizes that the Cable Act and the Telecommunications Act contain express preemption provisions. *See 47 U.S.C. § 253(d)* ("If . . . the [Federal Communications] Commission determines that a State or local government has permitted or imposed any statute, regulation, or legal requirement that violates *subsection (a)* or *(b)* [of the immediate provision], the Commission shall preempt the enforcement of such statute, regulation, or legal requirement[.]") *(Telecommunications Act); 47 U.S.C. § 556(c)* ("[A]ny provision of law of any State, political subdivision, or agency thereof, or franchising authority, or any provision of any franchise granted by such authority, which is inconsistent with this chapter shall be deemed to be preempted and superseded.") (Cable Act). ***HN6***[] However, the Court cannot conclude that "a municipality should incur antitrust liability simply for contravening some *unrelated* federal statute," especially in the absence of any **[*15]** authority indicating otherwise. *Classic Commc'ns, Inc. v. Rural Tel. Serv. Co., 956 F. Supp. 896, 904 (D. Kan. 1996)* (examining similar preemption argument) (emphasis added). Indeed, "[v]iolations of . . . the federal Cable Act or Telecommunications Act should be pursued as just that—violations of independent federal statutes. Such violations should not also neutralize a municipality's immunity to federal ***antitrust law***." *Id.* Therefore, the Court cannot conclude that the Cable Act and the Telecommunications Act supersede *Consolidated* and thus, will not deprive Defendants of their *Parker* immunity on that basis.

iii. Application of the Market Participant Exception to *Parker* Immunity

Finally, Plaintiff argues that *Parker* immunity does not apply to the actions of Defendants because they were acting as "market participants" when denying Plaintiff's franchise and license requests. (DE 13 at 12-13.) Defendants respond that such an exception does not apply in this case. (DE 14 at 5-7.)

HN7[] The Supreme Court has merely acknowledged the *possible* existence of a market participant exception to *Parker* immunity in the municipality context. *See Phoebe Putney, 568 U.S. at 226 n.4*; *City of Columbia v. Omni Outdoor Advert., Inc., 499 U.S. 365, 379, 111 S. Ct. 1344, 113 L. Ed. 2d 382 (1991)* ("We reiterate that, with the possible market participant exception, *any* action that qualifies as state action is *ipso facto* . . . exempt from **[*16]** the operation of the antitrust laws.") (emphasis in original) (citation and quotation marks omitted). To the extent that Plaintiff relies upon the Supreme Court's opinion in *North Carolina State Board of Dental Examiners v. Federal Trade Commission, 574 U.S. 494, 135 S. Ct. 1101, 191 L. Ed. 2d 35 (2015)* to support its assertion that "the Supreme Court then formally adopted and applied the market-participant exception in 2015," Plaintiff's representation is misleading. (DE 13 at 12.) In *North Carolina State Board*, the Court held that

> "[a] nonsovereign actor controlled by active market participants . . . enjoys *Parker* immunity only if it satisfies two requirements: first that the challenged restraint . . . be one clearly articulated and affirmatively expressed as state policy, and second that the policy . . . be actively supervised by the State."

574 U.S. at 503-04 (citations and quotation marks omitted). Here, the Court did not adopt a market participant exception to *Parker* immunity but instead, concluded that, subject to these two requirements, *Parker* immunity *still* applies to actors controlled by market participants. *See id.* Further, *North Carolina State Board* involved antitrust claims brought against a state regulatory agency comprised of private actors, unlike the instant case, which involves claims brought against a municipality **[*17]** and its agents. *Id. at 499*. As the Court itself confirmed in *North Carolina State Board*, the "active supervision" requirement does not apply to municipal actors. *See id. at 507-08*.

The Sixth Circuit similarly recognized the possibility of a market participant exception in *VIBO Corporation, Inc. v. Conway, 669 F.3d 675 (6th Cir. 2012)*. In that case, the Sixth Circuit explained, "[I]f a state acts as a 'commercial participant in a given market,' action taken in a market capacity is not protected. ***HN8***[] Thus, 'with the possible market participant exception, *any* action that qualifies as state action is *ipso facto* exempt from the operation of the antitrust laws.'" *VIBO, 669 F.3d at 687* (quoting *Omni, 499 U.S. at 379*) (emphasis in original). In those circumstances, "[a] state is a market participant when it acts 'in a proprietary capacity as a purchaser or seller with regard to the challenged action' or its actions 'constitute[ ] direct state participation in the market.'" *Id.* (quoting *Huish Detergents, Inc. v. Warren Cnty., 214 F.3d 707, 714-15 (6th Cir. 2000)* (discussing the market participation exception in the context of the *Commerce Clause*)). Notably, however, the Sixth Circuit concluded that the market participant exception did not apply. *Id.* And the court examined the possible exception as applied to corporations, not to municipalities. *Id. at 686- 87*.

This Court is not aware of any federal District Court or Court of **[*18]** Appeals that has applied the market participant exception to nullify *Parker* immunity and reestablish antitrust liability against a municipality and its agents. *See, e.g., Freedom Holdings, Inc. v. Cuomo, 624 F.3d 38, 61 (2d Cir. 2010)* ("While the possibility of a market participant exception is left open in [*Omni*], the trial record does not support its application here."); *Hedgecock v. Blackwell Land Co., 52 F.3d 333, 1995 WL 161649 (Table), at *2 (9th Cir. 1995)* ("While a commercial participant exception to *Parker* might be appropriate in circumstances where an arm of the state enters a market in competition with private actors . . ., such is not the case here."); *AmeriCare MedServices, Inc. v. City of Anaheim, Case No. 8:16-cv-1596-JLS- AFMx, 2017 U.S. Dist. LEXIS 74031, 2017 WL 1836354, at *10 (C.D. Cal. Mar. 28, 2017)* ("Moreover, in the present case, the City Defendants' provision of emergency ambulance services does not implicate the exception."); *In re Recombinant DNA Tech. Pat. & Cont. Litig., 874 F. Supp. 904, 912 (S.D. Ind. 1994* ("Thus, even were we inclined to apply a market participant exception to *Parker* immunity, the facts of this particular case would not warrant its application."); *see also* *W. Star Hosp. Auth. Inc. v. City of Richmond, 986 F.3d 354, 360 (4th Cir. 2021)* ("The Supreme Court has never recognized such an exception; in fact, it has suggested only that it might possibly exist. . . . Nor have *any* of the Courts of Appeals ever concluded that this proposed exception frustrates the invocation of state action immunity[.]") (emphasis in original). Absent definitive guidance from the Supreme Court or the Sixth Circuit, this Court declines **[*19]** to apply the market participant exception to this case. Therefore, Defendants are immune from antitrust liability under *Parker*, and no other exception applies. The Court accordingly dismisses those claims.

b. Application of *Parker* Immunity to State Antitrust Claims

Plaintiff argues that *Parker* immunity does not apply to its *state* antitrust claims against Defendants because it is a doctrine based on federalism. (DE 13 at 13-14.) ***HN9***[] Both Kentucky state courts and federal district courts in Kentucky have analyzed Kentucky state antitrust claims under the same framework as federal antitrust claims. *See* *Conrad v. Bevin, No. 3:17-CV-00056-GFVT, 2018 U.S. Dist. LEXIS 27736, 2018 WL 988071, at *8 (E.D. Ky. Feb. 16, 2018)*. Accordingly, for the reasons given above, *Parker* immunity also applies to the state antitrust claims against Defendants, and those claims are also dismissed.

B. Supplemental Jurisdiction over Conversion and Trespass Claims

Parties do not dispute that this Court still retains subject-matter jurisdiction over the Cable Act and the Telecommunications Act claims in this matter because those claims present federal questions. (Compl ¶¶ 5-6; DE 10 at 8.) However, parties disagree about whether the Court has supplemental jurisdiction over the state conversion and trespass claims against CTS pursuant **[*20]** to *28 U.S.C. § 1367(a)*. (Compl. ¶ 7; DE 10 at 8-9.)

HN10[] "Where subject matter jurisdiction is challenged pursuant to *12(b)(1)*, the plaintiff has the burden of proving jurisdiction in order to survive the motion." *Ashland Hosp. Corp. v. Int'l Brotherhood. of Elec. Workers Loc. 575, 807 F. Supp. 2d 633, 638 (E.D. Ky. 2011)*. A district court has "supplemental jurisdiction over all other claims that are so related to claims in the action within such original jurisdiction that they form part of the same case or controversy under Article III of the United States Constitution." *28 U.S.C. § 1367(a)*. "Claims form part of the same case or controversy when they 'derive from a common nucleus of operative facts.'" *Harper v. AutoAlliance Int'l, Inc., 392 F.3d 195, 209 (6th Cir. 2004)* (quoting *Ahearn v. Charter Twp. of Bloomfield, 100 F.3d 451, 454-55 (6th Cir. 1996)*).

The Court declines to exercise supplemental jurisdiction over Plaintiff's state conversion and trespass claims against CTS because those claims do not form part of the same case or controversy as the remaining federal claims. The federal and state claims do not derive from common underlying facts. The Cable Act and the Telecommunications Act claims arise out of the City's and the City Council's denials of Plaintiff's requests for a cable franchise and a license to occupy the City's rights of way. The conversion and trespass claims arise out of CTS's alleged failure to return Plaintiff's equipment following the dissolution of the pre-existing consulting relationship between **[*21]** Plaintiff and CTS. Therefore, the federal claims and state claims "require proof of different facts, will involve different witnesses, and apply different law." *Raymer v. W. and S. Life Ins. Co., Civil Action No. 5:13-cv-00042, 2013 U.S. Dist. LEXIS 129596, 2013 WL 4875029, at *3 (E.D. Ky. Sept. 11, 2013)*. Accordingly, the Court dismisses Plaintiff's state conversion and trespass claims against CTS. Because those are the sole remaining claims against CTS, the Court likewise dismisses CTS as a party to this action.

III. Conclusion

The Court hereby ORDERS as follows:

1. The joint partial motion to dismiss (DE 10) brought by Defendants The City of Monticello, Kentucky, The City Council of the City of Monticello, Kentucky, and Community Telecom Services is GRANTED;

2. Counts III (violation of *15 U.S.C. § 1*), IV (violation of *15 U.S.C. § 2*), V (violation of *Kentucky Revised Statute § 367.175(1)*), and VI (violation of *Kentucky Revised Statute § 367.175(2)*) are DISMISSED with prejudice;
3. Count VII (conversion and trespass to chattels) is DISMISSED without prejudice; and
4. Defendant Community Telecom Services is DISMISSED as a party to the action.

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > Remedies > Injunctions > Temporary Restraining Orders

HN1[] **Grounds for Injunctions, Balance of Hardships**

In deciding whether to grant a motion for a temporary restraining order, courts look to substantially the same factors that apply to a court's decision on whether to issue a preliminary injunction. A plaintiff seeking a preliminary injunction generally must show that: (1) he or she is likely to succeed on the merits; (2) he or she is likely to suffer irreparable harm in the absence of preliminary relief; (3) the balance of equities tips in his or her favor; and (4) that an injunction is in the public interest. Like a preliminary injunction, a temporary restraining order is an extraordinary remedy that may only be awarded upon a clear showing that the plaintiff is entitled to such relief.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Balance of Hardships

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

HN2[ ] Grounds for Injunctions, Balance of Hardships

A stronger showing of one element of the preliminary injunction test may offset a weaker showing of another. Thus, when the balance of hardships tips sharply in the plaintiff's favor, the plaintiff need demonstrate only serious questions going to the merits.

Civil Procedure > Remedies > Injunctions > Mandatory Injunctions

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Civil Procedure > Remedies > Injunctions > Temporary Restraining Orders

HN3[ ] Injunctions, Mandatory Injunctions

The already high standard for granting a temporary restraining order (TRO) or preliminary injunction is further heightened when the type of injunction sought is a mandatory injunction. To obtain a mandatory injunction, a plaintiff must establish that the law and facts clearly favor her position, not simply that she is likely to succeed. In plain terms, mandatory injunctions should not issue in doubtful cases.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN4[ ] Sherman Act, Claims

Section 1 of the Sherman Act prohibits any contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce. 15 U.S.C.S. § 1. Section 1 is intended to prohibit actions that unreasonably restrain competition.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Evidence > Burdens of Proof > Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

Evidence > Burdens of Proof > Burden Shifting

HN5[ ] Per Se Rule Tests, Manifestly Anticompetitive Effects

The rule of reason is the accepted standard for testing whether an alleged restraint on competition imposed by a sports league violates § 1 of the Sherman Act. To determine whether a restraint violates the rule of reason, courts apply a three-step, burden-shifting framework. The plaintiff bears the initial burden to show that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market. If the plaintiff carries this burden, it shifts to the defendant to show a procompetitive rationale for the restraint. If the defendant makes that showing, then the burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > International Aspects > Commerce With Foreign Nations

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN6[] **Sherman Act, Claims**

With respect to § 1 of the Sherman Act, a plaintiff must establish three elements to meet its initial burden: (1) the existence of a contract, combination, or conspiracy among two or more separate entities that (2) unreasonably restrains trade and (3) affects interstate or foreign commerce.

Antitrust & Trade Law > Sherman Act > Claims

HN7[] **Sherman Act, Claims**

Section 1 of the Sherman Act targets only concerted action between separate entities and does not apply to anticompetitive actions taken by a single entity acting unilaterally. The determination of whether targeted activity is concerted action between separate entities is a functional consideration of how the parties involved in the alleged anticompetitive conduct actually operate. The inquiry does not turn simply on whether the parties involved are legally distinct entities. Instead, the crucial question is whether the entities alleged to have conspired maintain an economic unity, and whether the entities were either actual or potential competitors.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN8[] **Per Se Rule Tests, Manifestly Anticompetitive Effects**

In a Sherman Act case, the plaintiff can show that an agreement unreasonably restrains trade either directly or indirectly. Direct evidence of anticompetitive effects would be proof of actual detrimental effects on competition, such as reduced output, increased prices, or decreased quality in the relevant market. Indirect evidence would be proof of market power plus some evidence that the challenged restraint harms competition.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN9[] Relevant Market, Product Market Definition

The labor market of athletes can constitute a relevant market for antitrust purposes.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Per Se Rule Tests > Manifestly Anticompetitive Effects

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN10[] Per Se Rule Tests, Manifestly Anticompetitive Effects

The antitrust laws are concerned with competition. Accordingly, justifications offered under the rule of reason may be considered only to the extent that they tend to show that, on balance, the challenged restraint enhances competition. Procompetitive benefits are those that improve or broaden competitive choices and include increasing output, creating operating efficiencies, making a new product available, enhancing product or service quality, and widening consumer choice. Cost-cutting, promoting social values, ethical values, public policy, or public safety are not considered procompetitive benefits.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > Labor > Statutory Exemptions

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN11[] Scope, Exemptions

The Supreme Court has recognized that a proper accommodation between the congressional policy favoring collective bargaining under the National Labor Relations Act and the congressional policy favoring free competition in business markets requires that some union-employer agreements be accorded a limited nonstatutory exemption from antitrust sanctions. The Supreme Court has never delineated the precise boundaries of the non-statutory labor exemption, and what guidance it has given as to its application has come mostly in cases in which agreements between an employer and a labor union were alleged to have injured or eliminated a competitor in the employer's business or product market. The Court has explained that the purpose behind the exemption is to effectuate the intent of Congress of preventing judicial use of ***antitrust law*** to resolve labor disputes.

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

Antitrust & Trade Law > Exemptions & Immunities > Labor > Statutory Exemptions

HN12[] Private Actions, Sherman Act

In the context of professional sports leagues, courts have consistently held that rules created through or incorporated by collective bargaining agreements between leagues and their respective players unions are immune from scrutiny under § 1 of the Sherman Act.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Irreparable Harm

Civil Procedure > Remedies > Injunctions > Temporary Restraining Orders

HN13[] **Grounds for Injunctions, Irreparable Harm**

To obtain a temporary restraining order, a plaintiff must demonstrate that irreparable injury is likely in the absence of an injunction.

Civil Procedure > ... > Injunctions > Grounds for Injunctions > Public Interest

HN14[] **Grounds for Injunctions, Public Interest**

With respect to an injunction, the public interest inquiry primarily addresses impact on non-parties rather than parties.

Opinion

[*1176] OPINION AND ORDER

IMMERGUT, District Judge.

Before this Court is Plaintiff's Motion for a Temporary Restraining Order ("TRO") and Preliminary Injunction. ECF 2. Plaintiff, a 15-year-old soccer player, seeks an order from this Court enjoining Defendant National Women's Soccer League ("NWSL") from enforcing against her its rule that all players in the league must be at least 18 years old (the "Age Rule"). Plaintiff does not seek an order requiring the NWSL or any of its member teams to hire her. Further, Plaintiff does not seek an order that interferes **[**2]** with negotiations between the NWSL and the NWSL Players Association ("NWSL PA"). Plaintiff concedes that if the NWSL and the NWSL PA enter into a collective bargaining agreement ("CBA") that includes an age restriction, she could lose her ability to play for the NWSL until she is age-eligible and would not have grounds to challenge such a restriction. Through this TRO, Plaintiff solely seeks the opportunity to compete for a position on a professional soccer team free from the Age Rule's restrictions.

Plaintiff filed both her Complaint and TRO Motion on May 4, 2021. ECF 1; ECF 2. Plaintiff's Complaint challenges the NWSL Age Rule as a violation of the *Sherman Anti-Trust Act, 15 U.S.C. § 1*, and argues that "[t]he ten teams that make up the NWSL have agreed among themselves, and with the League, not to contract with soccer players under the age of 18, without regard to their talents or ability to compete in the League." ECF 1 at ¶ 40. Plaintiff further argues that NWSL is the only option for women to play professional soccer in the United States, and that the Age Rule serves no legitimate business justification or procompetitive purpose. *Id.* at ¶¶ 41, 44. Plaintiff points to the absence of any age restrictions for male soccer **[**3]** players to demonstrate that the public interest in open competition and equal treatment of women favors a TRO in this case. *Id.* at ¶ 45. Plaintiff asserts that keeping her out of the NWSL, which has already started its season of games, "will continually slow her development, delay her improvement, and more generally impede her career as a soccer player." *Id.* at ¶ 35.

On May 20, 2021, this Court held a hearing on Plaintiff's TRO Motion at which both sides had an opportunity to present additional evidence and argument.[1] ECF 46. After considering testimony at the hearing, as well as the pleadings, declarations, exhibits, and arguments of counsel, this Court finds that Plaintiff has presented facts and legal support sufficient to warrant a TRO enjoining the enforcement of the Age Rule against her until a preliminary injunction hearing is held. As explained further below, Plaintiff has shown that the ten teams that make up the NWSL have agreed to impose the NWSL's age restriction which excludes female competitors from the only available professional soccer opportunity in the United States because they are under 18, regardless of talent, maturity, strength, and ability. Defendants have not **[**4]** presented any compelling procompetitive reasons to **[*1177]** justify this anticompetitive policy, nor have they shown that eliminating the Age Rule will cause any non-speculative injury to the NWSL. Defendants have offered no legitimate procompetitive justification for treating young women who want an opportunity to play professional soccer differently than young men.

In contrast, Plaintiff has presented persuasive evidence that each day that passes with the Age Rule in place represents a missed opportunity for her potential professional soccer career. Accordingly, this Court finds that the merits clearly favor Plaintiff's position and that she will be irreparably harmed if this Court does not grant the TRO. Furthermore, the balance of equities and the public interest strongly favor affording girls in the United States the same opportunities as boys. Therefore, for the reasons that follow, Plaintiff's Motion for Temporary Restraining Order, ECF 2, is GRANTED.

STANDARDS

HN1[] In deciding whether to grant a motion for a temporary restraining order, courts look to substantially the same factors that apply to a court's decision on whether to issue a preliminary injunction. *See* *Stuhlbarg Int'l Sales Co. v. John D. Brush & Co., 240 F.3d 832, 839 n.7 (9th Cir. 2001)*. A plaintiff seeking a preliminary **[**5]** injunction generally must show that: (1) he or she is likely to succeed on the merits; (2) he or she is likely to suffer irreparable harm in the absence of preliminary relief; (3) the balance of equities tips in his or her favor; and (4) that an injunction is in the public interest. *Winter v. NRDC, Inc., 555 U.S. 7, 20, 129 S. Ct. 365, 172 L. Ed. 2d 249 (2008)*. Like a preliminary injunction, a temporary restraining order is an "extraordinary remedy that may only be awarded upon a clear showing that the plaintiff is entitled to such relief." *Id. at 22*.

The Ninth Circuit applies a "sliding scale" approach in considering the factors outlined in *Winter*. ***HN2***[] A stronger showing of one element of the preliminary injunction test may offset a weaker showing of another. *All. for the Wild Rockies v. Cottrell, 632 F.3d 1127, 1131-32 (9th Cir. 2011)*. Thus, "when the balance of hardships tips sharply in the plaintiff's favor, the plaintiff need demonstrate only 'serious questions going to the merits.'" *hiQ Labs, Inc. v. LinkedIn Corp., 938 F.3d 985, 992 (9th Cir. 2019)* (quoting *All. for the Wild Rockies, 632 F.3d at 1135*).

HN3[] Finally, the already high standard for granting a TRO or preliminary injunction is further heightened when the type of injunction sought is a "mandatory injunction." *Garcia v. Google, Inc., 786 F.3d 733, 740 (9th Cir. 2015)*. To obtain a mandatory injunction, a plaintiff must "establish that the law and facts *clearly favor* her position, not simply that she is likely to succeed." *Id.* (emphasis in original). "In **[**6]** plain terms, mandatory injunctions should not issue in 'doubtful cases.'" *Id.* (quoting *Park Vill. Apartment Tenants Ass'n v. Mortimer Howard Trust, 636 F.3d 1150, 1160 (9th Cir. 2011)*).

---

[1] The Court adopted the parties' proposed briefing schedule leading up to the hearing. ECF 23. In its Response to Plaintiff's TRO Motion, Defendant argued that the *Norris LaGuardia Act*'s ("NLGA") anti-injunction provision, *29 U.S.C. § 101*, divested this Court of jurisdiction to issue an injunction in this case unless it conformed with the NLGA's enumerated special requirements. ECF 35 at 25-30. This Court ordered the parties to provide briefing addressing whether the NLGA's anti-injunction provision applied to this case. ECF 40. On May 19, 2021, this Court issued an Order finding that the NLGA's anti-injunction provision does not apply to this case. ECF 45.

DISCUSSION

A. Form of Injunction

Defendant argues that Plaintiff seeks a mandatory injunction and thus this Court must apply the heightened standard described above. ECF 35 at 24-25. Plaintiff asserts that her requested relief can be properly categorized as prohibitory. ECF 41 at 12. Because this Court finds that Plaintiff has met her burden under either standard, it assumes without finding that Plaintiff seeks a mandatory injunction.

[*1178] B. TRO Factors

1. The Law and the Facts Clearly Favor Plaintiff's Position

a. The Sherman Act

Plaintiff alleges Defendant's Age Rule violates *§ 1 of the Sherman Act, 15 U.S.C. § 1*. ECF 1 at ¶ 3. ***HN4***[] *Section 1 of the Sherman Act* prohibits any "contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce." *15 U.S.C. § 1*. *Section 1* "is intended to prohibit actions that unreasonably restrain competition." *Jack Russell Terrier Network of N. Cal. v. Am. Kennel Club, Inc., 407 F.3d 1027, 1033 (9th Cir. 2005)* (citing *Business Electronics Corp. v. Sharp Electronics Corp., 485 U.S. 717, 723, 108 S. Ct. 1515, 99 L. Ed. 2d 808 (1988)*).

HN5[] The "rule of reason" is the accepted standard for testing whether an alleged restraint on competition imposed by a sports league violates *§ 1 of the Sherman Act*. *See* *Am. Needle, Inc. v. Nat'l Football League, 560 U.S. 183, 202-03, 130 S. Ct. 2201, 176 L. Ed. 2d 947 (2010)*; *N. Am. Soccer League, LLC v. U.S. Soccer Fed'n, Inc., 883 F.3d 32, 41 (2d Cir. 2018)* ("Regulation of league sports is a textbook example of when the rule of reason applies."). To determine whether a restraint violates the rule of reason, courts apply **[**7]** a three-step, burden-shifting framework. *Ohio v. Am. Express Co., 138 S. Ct. 2274, 2284, 201 L. Ed. 2d 678 (2018)*. The plaintiff bears the initial burden to show that the challenged restraint has a substantial anticompetitive effect that harms consumers in the relevant market. *Id.* If the plaintiff carries this burden, it shifts to the defendant to show a procompetitive rationale for the restraint. *Id.* If the defendant makes that showing, then the burden shifts back to the plaintiff to demonstrate that the procompetitive efficiencies could be reasonably achieved through less anticompetitive means. *Id.*

HN6[] A plaintiff must establish three elements to meet its initial burden: "(1) the existence of a contract, combination, or conspiracy among two or more separate entities that (2) unreasonably restrains trade and (3) affects interstate or foreign commerce." *Jack Russell Terrier, 407 F.3d at 1033*. Each element is discussed in turn.

Defendant argues that Plaintiff cannot demonstrate the existence of a contract, combination, or conspiracy among two or more separate entities because "the NWSL is a single entity that employs the players and assigns their rights to teams via its draft and player dispersal process." ECF 35 at 34. ***HN7***[] *Section 1 of the Sherman Act* targets only "concerted action" between separate entities and does not apply **[**8]** to anticompetitive actions taken by a single entity acting unilaterally. *Am. Needle, 560 U.S. at 190-91*. The determination of whether targeted activity is "concerted action" between separate entities is a "functional consideration of how the parties involved in the alleged anticompetitive conduct actually operate." *Id. at 191*. The inquiry "does not turn simply on whether the parties involved are legally distinct entities." *Id.* ("[W]e have repeatedly found instances in which members of a legally single entity violated *§ 1* when the entity was controlled by a group of competitors and served, in essence, as a vehicle for ongoing concerted activity."). Instead, "the crucial question is whether the entities alleged to have conspired maintain an 'economic unity,' and whether the entities were either actual or potential competitors." *Jack Russell Terrier, 407 F.3d at 1034*.

Courts have often rejected single entity defenses from sports leagues in *§ 1* cases. *See* *Am. Needle, 560 U.S. at 201*; *Nat'l Collegiate Athletic Ass'n v. Bd. of Regents of Univ. of Okla., 468 U.S. 85, 99, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984)*; **[*1179]** *L.A. Memorial Coliseum Comm'n v. Nat'l Football League, 726 F.2d 1381, 1388-89 (9th Cir. 1984)* (collecting cases); *Sullivan v. Nat'l Football League, 34 F.3d 1091, 1099 (1st Cir. 1994)*; *McNeil v. Nat'l Football League, 790 F. Supp. 871, 878-80 (D. Minn. 1992)*. In *Fraser v. Major League Soccer, LLC, 284 F.3d 47, 56 (1st Cir. 2002)*, the district court found on summary judgment that Major League Soccer ("MLS") was a single entity because its owners were called "operator/investors" and the league had some aspects of a unified corporation and granted summary judgment for the MLS on that issue. *Id. at 59-61*. The First Circuit declined **[**9]** to affirm on the district court's finding that MLS was a single entity, calling it "doubtful." *Id. at 58*. In calling the single entity finding "doubtful," the court focused on the operator/investors' roles as individual team managers with "a diversity of entrepreneurial interests that go[] well beyond the ordinary [stockholder in a company]." *Id. at 57-58*.

Here, the information in the record suggests that, like many other professional sports leagues, the NWSL is not a single entity for the purposes of this *§ 1* analysis. Plaintiff asserts in an unchallenged declaration that each NWSL team has a separate owner who funds at least some aspects the team's operations. ECF 9 at ¶ 19. The teams compete directly against each other to build the best team, attract fans, and make money, including by selling sponsorships, advertising, and tickets. *Id.* Each team hires and pays its own staff and trains its own players. *Id.* The NWSL also has an "Allocation Money" mechanism that allows each team to spend its own funds to pay individual players on its roster significantly more money than would otherwise be permitted by the NWSL's salary cap, or to pay acquisition/transfer fees for players the team wishes to acquire from non-NWSL **[**10]** teams and leagues. *Id.* Based on this limited record, this Court finds that the member teams of the NWSL are competitors in the market for players such that they are not a single entity for the purposes of this *§ 1* challenge alleging an anticompetitive restriction of that market.

Defendant asserts that because the NWSL was a single entity at the time the Age Rule was adopted in 2013, Plaintiff cannot show any agreement between two or more competitors to constitute concerted action. ECF 35 at 34-35. However, the relevant question is not whether the NWSL was a single entity when the Age Rule was created but whether the Age Rule has now been agreed upon and enforced by separate entities in an anticompetitive manner. Defendant contends that this case is similar to *Relevent Sports, LLC v. United States Soccer Fedn., Inc., No. 19-cv-8359 (VEC), 2020 U.S. Dist. LEXIS 128260, 2020 WL 4194962 (S.D.N.Y. July 20, 2020)*. In *Relevant Sports*, a sporting event promoter brought a *§ 1* claim against United States Soccer Federation alleging that it had entered into an agreement with the Fédération Internationale de Football Association ("FIFA") and other regional confederations and national associations to refuse to sanction soccer games in the United States and to boycott professional leagues, clubs, and players that participate in unsanctioned games. *2020 U.S. Dist. LEXIS 128260, [WL] at *1*. **[**11]** The district court granted United States Soccer Federation's motion to dismiss the complaint because Plaintiff failed to plead facts demonstrating that it had entered into any such agreement with FIFA. *2020 U.S. Dist. LEXIS 128260, [WL] at *6-*7*.

In contrast to *Relevant Sports*, Plaintiff here has pointed to evidence in the record which demonstrates that the Age Rule has been incorporated into an agreement made between the NWSL and its member teams. ECF 41 at 19. Documents filed under seal appear to show that the Age Rule is contained in the 2021 NWSL Competition **[*1180]** Manual, and that member teams are required to sign Rules of Compliance Affidavits at the beginning of each season certifying their compliance with the rules in the Manual. At this stage of the proceedings, this Court concludes that Plaintiff has shown sufficient evidence of an agreement to enforce the Age Rule between the NWSL and its member teams to constitute concerted action.

In sum, Plaintiff has established that the NWSL and its member teams are not a single entity under *§ 1 of the Sherman Act* and that they formed an agreement to enforce the Age Rule. Thus, Plaintiff has satisfied the first step of its initial burden by showing "the existence of a contract, combination, or conspiracy **[**12]** among two or more separate entities." *See* *Jack Russell Terrier, 407 F.3d at 1033*.

HN8[] Next, Plaintiff must establish that the Age Rule "unreasonably restrains trade." *Id.* Plaintiff can show that an agreement unreasonably restrains trade either directly or indirectly. *Ohio, 138 S. Ct. at 2284*. "Direct evidence of anticompetitive effects would be proof of actual detrimental effects on competition, such as reduced output, increased prices, or decreased quality in the relevant market." *Id.* (internal quotation marks, citations and alterations omitted). "Indirect evidence would be proof of market power plus some evidence that the challenged restraint harms competition." *Id.*

To start, the NWSL has market power. ***HN9***[] The labor market of athletes can constitute a relevant market for antitrust purposes. *See O'Bannon v. Nat'l Collegiate Athletic Ass'n, 802 F.3d 1049, 1058 (9th Cir 2015)*. The NWSL is the only professional women's soccer league in the United States, and it accordingly has no real competition in the labor market for women professional soccer players. ECF 9 at ¶ 16; *Denver Rockets v. All-Pro Management, Inc., 325 F. Supp. 1049, 1053-54 (C.D. Cal. 1971)* (finding that there were "no other leagues of professional basketball teams of comparable status" to the NBA and ABA—the then existing top-level professional U.S. basketball leagues), *injunction reinstated by, Haywood v. Nat'l Basketball Ass'n, 401 U.S. 1204, 91 S. Ct. 672, 28 L. Ed. 2d 206 (1971)*.

In *Denver Rockets*, Spencer Haywood successfully challenged **[**13]** the NBA's rule prohibiting a prospective player from negotiating with any NBA team until four years after his high school class graduation. *325 F. Supp. at 1066-67*. The district court in that case explained the harms stemming from rules like the "four years from high school" rule as follows:

> The harm resulting from a 'primary' boycott such as this is threefold. First, the victim of the boycott is injured by being excluded from the market he seeks to enter. Second, competition in the market in which the victim attempts to sell his services is injured. Third, by pooling their economic power, the individual members of the NBA have, in effect, established their own private government.

Id. at 1061. The District Court granted a preliminary injunction, and later a partial summary judgment in Haywood's favor. *Id. at 1067*. On appeal, the Ninth Circuit briefly stayed the injunction, but never ruled on the merits because on emergency petition to the Supreme Court, Justice Douglas reinstated the trial court injunction, permitting Haywood to play immediately. *Haywood, 401 U.S. at 1206-07*. In his opinion, Justice Douglas expressed that "[t]his group boycott issue in professional sports is a significant one" and found that the balance of equities favored Haywood. *Id. at 1205-06*.

Two other **[**14]** cases followed in hockey and football, with the same result. *Linseman v.* ***[*1181]*** *World Hockey Ass'n, 439 F. Supp. 1315 (D. Conn. 1977)*; *Boris v. United States Football League, No. Cv. 83-4980 LEW (Kx), 1984 U.S. Dist. LEXIS 19061, 1984 WL 894 (C.D. Cal. Feb. 28, 1984)*.

Here, the Age Rule unreasonably restrains competition in the same way that the "four years from high school" rule did in *Denver Rockets*. Plaintiff is injured by being excluded from the market, competition in the market is injured by the exclusion of otherwise qualified players, and the NWSL and its members have pooled their market power to "in effect, establish[] their own private government." *Denver Rockets, 325 F. Supp. at 1061*. Therefore, Plaintiff has satisfied the second step of its initial burden by showing the Age Rule "unreasonably restrains trade." *See Jack Russell Terrier, 407 F.3d at 1033*.

Finally, it is clear that the Age Rule "affects interstate commerce." *Id.* The NWSL has ten teams in ten states, and each team travels to each of those states regularly to play games. ECF 1 at ¶ 17. Many of those games are broadcast around the United States on TV, radio, and the internet pursuant to contracts entered into by the NWSL or its teams. Accordingly, this Court concludes that Plaintiff has made a sufficient showing of all three elements to satisfy its initial burden under the rule of reason.

Because Plaintiff has met her initial burden, it shifts to Defendant to show a procompetitive rationale **[**15]** for the Age Rule's restraint. *Ohio, 138 S. Ct. at 2284*. The antitrust laws are concerned with competition. ***HN10***[] Accordingly, "justifications offered under the rule of reason may be considered only to the extent that they tend to show that, on balance, the 'challenged restraint enhances competition.'" *Law v. NCAA, 134 F.3d 1010, 1021 (10th*

Cir. 1998) (quoting Bd. of Regents, 468 U.S. at 104). Procompetitive benefits are those that improve or broaden competitive choices and include increasing output, creating operating efficiencies, making a new product available, enhancing product or service quality, and widening consumer choice. Id. at 1023; *see also* In re Nat'l Collegiate Athletic Ass'n Athletic Grant-in-Aid Cap Antitrust Litig., 958 F.3d 1239, 1257 (9th Cir. 2020) (citing O'Bannon, 802 F.3d 1049, 1072 (9th Cir. 2015)); Bd. of Regents, 468 U.S. at 102 (expanding consumer choice is procompetitive). Cost-cutting, promoting social values, ethical values, public policy, or public safety are not considered procompetitive benefits. Law, 134 F.3d at 1022-23; FTC v. Superior Trial Ct. Laws. Assn., 493 U.S. 411, 423-24, 110 S. Ct. 768, 107 L. Ed. 2d 851 (1990); FTC v. Ind. Fed'n of Dentists, 476 U.S. 447, 462-64, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986); Bd. of Regents, 468 U.S. at 117; National Soc. of Professional Engineers v. United States, 435 U.S. 679, 695-96, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978).

In a footnote, Defendant asserts that the Age Rule has "numerous benefits, including concerns for minor athletes' development, protecting a league from a minor's ability to avoid employment contracts, the myriad concerns for minor athletes embedded in the Safe Sport Act, and the League's costs to implement the same if it employs minors and allows them to travel throughout the United States for games." ECF 35 at 36-37 n.15. Further, Defendant argues that the **[**16]** benefits are "demonstrated by the fact that nearly every professional sports league in the U.S. chooses to require players to be at least the age of majority, if not older." *Id.* Defendant does not attempt to explain how its proffered benefits improve or broaden competitive choices in any way. Indeed, the list appears to be more directed at reducing Defendant's overhead costs than benefitting competition. *See* Law, 134 **[*1182]** F.3d at 1022 ("[C]ost-cutting by itself is not a valid procompetitive justification."). In the absence of further evidence justifying the Age Rule as procompetitive, this Court concludes that Defendant has failed to meet its burden of demonstrating a procompetitive rationale for the Age Rule's restraint.

Given the information in the record at this time, this Court finds that Plaintiff has shown that the law and facts clearly favor her position that the NWSL's Age Rule violates § 1 of the Sherman Act.

i. The Non-statutory Labor Exemption

Defendant next argues that Plaintiff cannot show that the law and the facts clearly favor her position because the Age Rule falls under the non-statutory labor exemption to the antitrust laws. ECF 35 at 30-34. **HN11**[] The Supreme Court has recognized "that a proper accommodation between the **[**17]** congressional policy favoring collective bargaining under the [National Labor Relations Act] and the congressional policy favoring free competition in business markets requires that some union-employer agreements be accorded a limited nonstatutory exemption from antitrust sanctions." Connell Constr. Co. v. Plumbers & Steamfitters Local Union No. 100, 421 U.S. 616, 622, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975) (citing Meat Cutters v. Jewel Tea Co., 381 U.S. 676, 85 S. Ct. 1596, 14 L. Ed. 2d 640 (1965). "The Supreme Court has never delineated the precise boundaries of the [non-statutory labor] exemption, and what guidance it has given as to its application has come mostly in cases in which agreements between an employer and a labor union were alleged to have injured or eliminated a competitor in the employer's business or product market." Cal. ex rel. Harris v. Safeway, Inc., 651 F.3d 1118, 1125 (9th Cir. 2011) (quoting Clarett v. Nat'l Football League, 369 F.3d 124, 131 (2d Cir. 2004) (internal quotation marks omitted). The Court has explained that the purpose behind the exemption is to effectuate the intent of Congress of preventing "judicial use of ***antitrust law*** to resolve labor disputes." Brown v. Pro Football, Inc., 518 U.S. 231, 236, 116 S. Ct. 2116, 135 L. Ed. 2d 521 (1996).

HN12[] In the context of professional sports leagues, courts have consistently held that rules created through or incorporated by collective bargaining agreements between leagues and their respective players unions are immune from scrutiny under § 1 of the Sherman Act. *See* Wood v. Nat'l Basketball Ass'n, 809 F.2d 954, 963 (2d Cir. 1987); Nat'l Hockey League Players Ass'n v. Plymouth Whalers Hockey Club, 419 F.3d 462, 474-75 (6th Cir. 2005); Clarett v. Nat'l Football League, 369 F.3d 124, 142-43 (2d Cir. 2004).

Defendant argues that by recognizing the NWSL PA as an exclusive bargaining agent and beginning **[**18]** the collective bargaining process, it has immunized the Age Rule from antitrust scrutiny, and that any injunction this

Court could grant would interfere with the bargaining process. ECF 35 at 30-34. This position is unsupported by precedent and the facts of this case.

First, Defendant has not identified any cases where the non-statutory labor exemption applied to a regulation created before the recognition of a union, and which had not been subsequently included or implicitly incorporated into a collective bargaining agreement. There is no existing collective bargaining agreement between the NWSL and the NWSL PA, nor has there ever been. Extending the non-statutory exemption as Defendant suggests would mean that employers could fully insulate themselves from antitrust scrutiny by simply recognizing a union and commencing the (often years-long) collective bargaining process.

[*1183] Second, despite Defendant's assertions to the contrary, nothing about the injunction Plaintiff seeks would interfere with the NWSL PA's ability to collectively bargain over the terms or conditions of employment with Defendant. The Age Rule Plaintiff challenges was created by Defendant years before the NWSL PA existed. **[**19]** It has not been incorporated into any collective bargaining agreement between Defendant and the NWSL PA because no collective bargaining agreement has yet been reached. As Plaintiff acknowledges in her Complaint, an injunction prohibiting Defendant from enforcing its current Age Rule against Plaintiff in no way prevents the NWSL PA and Defendant from including a new age rule into a collective bargaining agreement, at which point it could be lawfully enforced against Plaintiff. ECF 1 at 12. Thus, Plaintiff's requested relief does not interfere with the rights of the NWSL PA to negotiate rules governing the league with Defendant, including whether there should be an Age Rule. Rather, Plaintiff simply seeks an order preventing Defendant from enforcing a rule created outside of any collective bargaining agreement which bars her from seeking employment with the NWSL.

Defendant further argues that the non-statutory labor exemption applies to the Age Rule because it has signed a "Voluntary Recognition Agreement" with the NWSL PA in November 2018. ECF 35 at 33. However, the agreement provides that Defendant reserves the unilateral right to change and establish rules concerning the drafting **[**20]** and trading of players. The agreement also reflects that it is not the result of collective bargaining negotiations, which had not yet begun in November 2018. The mere existence of this agreement does not insulate the Age Rule from *§ 1* scrutiny. Thus, this Court finds that the non-statutory labor exemption does not apply to this case.

ii. Damages

Finally, Defendant argues that Plaintiff cannot show that the merits clearly favor her position because her claimed injury is "entirely speculative." ECF 35 at 37-38. This Court disagrees.

In both her Complaint and during her testimony at the May 20, 2021 hearing, Plaintiff proffered sufficient indicia that she would be a sought-after player in the NWSL were it not for the Age Rule barring her eligibility. Plaintiff has an ongoing arrangement with the Portland Thorns, a member team of the NWSL, where she is treated like a team member in all ways other than signing a player contract and playing in official games. ECF 1 at ¶ 8. Plaintiff practices with the team, plays in unofficial "scrimmages" and pre-season games against other professional teams, and has her own locker in the Thorns' locker room. *Id.* At the hearing, Plaintiff testified that both **[**21]** the Thorns' General Manager and one of its coaches have told her that they would sign her if she were eligible. Plaintiff's testimony was not contradicted by Defendant.

Defendant asserts that because Plaintiff already missed this season's draft, "there is no mechanism in the League's rules and procedures that would result in her playing this season." ECF 35 at 38. This argument appears to be undermined by the 2021 NWSL Competition Manual, which outlines mechanisms outside the draft for players to enter the league mid-season. Therefore, this Court rejects Defendant's position that Plaintiff's alleged damages are entirely speculative and undermine her ability to succeed on the merits of her claim.

Based the record available at this stage of the proceeding, this Court finds that Plaintiff has met her burden of establishing that the law and the facts clearly favor her position.

[*1184] 2. Irreparable Harm

HN13[] To obtain a TRO, Plaintiff must also "demonstrate that irreparable injury is likely in the absence of an injunction." *Winter, 555 U.S. at 22*. This Court finds that Plaintiff has made this showing.

Through declarations from U.S. National Women's Team players and collegiate soccer coaches, as well as her own testimony, Plaintiff **[**22]** has shown that she has the requisite skills and is ready to play professional soccer, that the Age Rule is impeding her development as a soccer player in an irreversible manner, that the career of a professional soccer player is short, and that there are no substitutes to actual professional competition to help her realize her full potential. ECF 3; ECF 4; ECF 5; ECF 6; ECF 8.

Becky Sauerbrunn, a professional soccer player on the Portland Thorns, described Plaintiff's injury as follows:

> Keeping [Plaintiff] out of League play can slow her development, delay her improvement, and more generally impede her career. Playing against top professional competition, when the opponents play their hardest and when your failures have consequences, is how you learn to be at your best. Practice and scrimmages are very helpful, but nothing is a full substitute for real competition.

ECF 3 at ¶ 7.

Plaintiff expressed a similar sentiment during her live testimony, where she explained that every coach she has ever worked with has believed that real competition is where players improve their skills the most. Plaintiff's injury is irreparable because the opportunities she will miss due to the Age rule cannot **[**23]** be regained. As put by Ms. Sauerbrunn, "A soccer player's career is finite. If [Plaintiff] spends two-and-a-half years (or some lesser period) barred from the League, there is no way to recover that lost time and the valuable experience she could be gaining by competing against the best week-in and week-out." *Id.* at ¶ 9. Plaintiff's personal coach, Joseph Smith, agrees:

> In my opinion, holding O.M. back from professional game competition will block her from being stretched, challenged, and pushed onto the next level and will do an incredible amount of harm to her ability to compete at the top level. I am fearful she might actually go backwards from lack of opportunity.

ECF 5 at ¶ 13.

The harm inflicted by the Age Rule is particularly acute given that the Olympic Games will be held this summer, which will open up roster spots in the NWSL, thereby increasing the likelihood that Plaintiff will receive even more meaningful playing time if the Age Rule is lifted promptly. ECF 8 at ¶ 15.

Based on this record, Plaintiff has shown that she will suffer irreparable injury in the absence of an injunction. *See Denver Rockets, 325 F. Supp. at 1057* (finding that the plaintiff's exclusion from playing professional basketball would cause **[**24]** him "irreparable injury in that a substantial part of his playing career will have been dissipated, his physical condition, skills and coordination will deteriorate from lack of highlevel [sic] competition, his public acceptance as a super star will diminish to the detriment of his career, his self-esteem and his pride will have been injured and a great injustice will be perpetrated on him").

3. The Balance of the Equities

The threat of irreparable injury to Plaintiff is not counterbalanced by any cognizable harm to Defendant from a temporary injunction. Defendant suggests that if minors are permitted to play in the NWSL, its expenses will skyrocket because **[*1185]** it will need to develop guidelines to account for the presence of minors, to comply with all aspects of the *Safe Sports Act*, add hotel rooms and shower facilities for minors, and develop contracts specifically tailored for minors. ECF 35 at 41. Defendant offers no estimate of these additional costs. Further, the record suggests that Plaintiff is already using the Thorns' locker room facilities and has traveled with the team to participate in preseason scrimmages.

Without further evidence of the hardships the injunction Plaintiff seeks **[**25]** would impose on the NWSL, this Court finds that the equities tip strongly in Plaintiff's favor.

4. The Public Interest

Finally, this Court finds that the public interest weighs in favor of granting the requested injunction. ***HN14***[] "The public interest inquiry primarily addresses impact on non-parties rather than parties." *League of Wilderness Defs./Blue Mountains Biodiversity Project v. Connaughton, 752 F.3d 755, 766 (9th Cir. 2014)* (internal quotation marks and citation omitted).

Here, the public interest is served by issuing injunctive relief both because it preserves free and open competition and because it promotes gender equity. This Court notes that the NWSL's comparable men's league in the United States, MLS, has no age limit and employs players under 18. ECF 1 at ¶ 4. As of the date Plaintiff's Complaint was filed, more than half of MLS teams allegedly had one or more players on their roster under the age of 18. *Id.* In other words, the only thing currently standing between Plaintiff and her aspiration to be a professional soccer player in this country is her gender. Promoting gender equity in athletics is clearly in the public interest.

By satisfying all four of the elements outlined above, Plaintiff has met her burden of establishing that temporary injunctive relief is appropriate in this case. **[**26]** Accordingly, Plaintiff's Motion for Temporary Restraining Order, ECF 2, is GRANTED as follows:

TEMPORARY RESTRAINING ORDER

1. Defendant and its members, officers, agents, servants, employees, attorneys, teams, and all persons in active concert or participation with them are enjoined from enforcing the Age Rule against Plaintiff, unless and until such Age Rule is contained in a fully effective collective bargaining agreement that would apply to her, as permitted by law.
2. This Order shall expire in fourteen (14) days after entry, unless otherwise extended by stipulation of the parties or by further order of the Court.
3. The parties shall confer and propose to the Court a schedule for briefing and hearing on whether the Court should issue a preliminary injunction.

IT IS SO ORDERED.

DATED this 24th day of May 2021.

HN1[] **Motions to Dismiss, Failure to State Claim**

A district court conducts a three-part analysis when considering a motion to dismiss for failure to state a claim pursuant to Fed. R. Civ. P. 12(b)(6). First, the court must take note of the elements a plaintiff must plead to state a claim. Second, the court must accept as true all of the plaintiff's well-pleaded factual allegations and construe the complaint in the light most favorable to the plaintiff. The court, however, may ignore legal conclusions or factually unsupported accusations that merely state the-defendant-unlawfully-harmed-me. Finally, the court must determine whether the facts alleged in the complaint are sufficient to show that the plaintiff has a plausible claim for relief. A facially plausible claim allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. On a Fed. R. Civ. P. 12(b)(6) motion, the defendant bears the burden of showing that no claim has been presented.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Elements

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > ... > Private Actions > Standing > Sherman Act

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN2[] **Conspiracy to Monopolize, Elements**

Competition is at the heart of the antitrust laws. Antitrust laws are only aimed at curtailing anticompetitive conduct, or a competition-reducing aspect or effect of the defendant's behavior. Stated differently, the underlying principle of our antitrust laws is to protect competition, not competitors. The law therefore establishes antitrust injury as a common pleading requirement for antitrust plaintiffs. An antitrust injury is an injury of the type the antitrust laws were intended to prevent and that flow from that which makes defendants' acts unlawful. Under this requirement, a party must allege harm to competition, not just harm to its own business' to adequately plead antitrust injury. This standard, on a motion to dismiss, requires an antitrust plaintiff to allege facts capable of supporting a finding or inference that the purported anticompetitive conduct produced increased prices, reduced output, or otherwise affected the quantity or quality of the product.

Civil Procedure > Pleading & Practice > Motion Practice > Opposing Memoranda

Civil Procedure > Pleading & Practice > Motion Practice > Content & Form

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN3[] **Pleadings, Amendment of Pleadings**

Pleadings may not be amended by the briefs in opposition to a motion to dismiss.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Pricing

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

Antitrust & Trade Law > Regulated Practices > Private Actions > Sherman Act

HN4[] **Anticompetitive & Predatory Practices, Predatory Pricing**

In an antitrust action, a competitor cannot suffer antitrust injury from its rival's charging higher prices because competitors have only to gain from their rivals' higher pricing schemes.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN5[] **Complaints, Requirements for Complaint**

It is well established that the court may ignore legal conclusions or factually unsupported accusations that merely state the-defendant-unlawfully-harmed-me.

Torts > ... > Contracts > Intentional Interference > Elements

HN6[] Intentional Interference, Elements

A claim of tortious interference with a contract requires a plaintiff to allege: (1) actual interference with a contract; (2) that the interference was inflicted intentionally by a defendant who is not a party to the contract; (3) that the interference was without justification; and (4) that the interference caused damage.

Torts > ... > Contracts > Intentional Interference > Elements

Torts > ... > Prospective Advantage > Intentional Interference > Elements

HN7[] Intentional Interference, Elements

A complaint based on tortious interference must allege facts that show some protectable right—a prospective economic or contractual relationship. Not only does the law protect a party's interest in a contract already made, but it also protects a party's interest in reasonable expectations of economic advantage.

Torts > ... > Business Relationships > Intentional Interference > Elements

HN8[] Intentional Interference, Elements

In a tortious interference action, to determine malicious interference, the relevant inquiry is whether the conduct was sanctioned by the rules of the game, and where a plaintiffs loss of business is merely the incident of healthy competition, there is no compensable tort injury.

Opinion by: MICHAEL A. SHIPP

Opinion

MEMORANDUM OPINION

SHIPP. District Judge

This matter comes before the Court upon Plaintiffs-Counter Defendants AlphaCard Systems LLC, DiscountID.com LLC, and ID Card Group, LLC's (collectively, "Plaintiffs") Motion to Dismiss Defendant-Counter Plaintiff Fery LLC's ("Fery") counterclaims. (ECF No. 39.) Fery opposed (ECF No. 41), and Plaintiffs replied (ECF No. 45). The Court has carefully considered the parties' submissions and decides the matter without oral argument pursuant to *Local Civil Rule 78.1*. For the reasons set forth herein, Plaintiffs' Motion is granted in part and denied in part.

I. BACKGROUND[1]

Plaintiffs and Fery sell identification card products and related supplies ("ID Products") on Amazon Marketplace. AlphaCard Sys. LLC, 2020 U.S. Dist. LEXIS 147059, 2020 WL 4736072, at *1. Plaintiffs allege that Fery has placed fake, positive reviews for its own products on Amazon's Marketplace. *Id.* Based on those allegations, Plaintiffs filed a two-count action against Fery in November **[*2]** 2019 asserting claims for (1) false advertising under the Lanham Act, 15 U.S.C. § 1125(a) and (2) tortious interference with prospective business advantage under New Jersey law. *Id.* In an earlier opinion, the Court denied Fery's motion to dismiss both counts. 2020 U.S. Dist. LEXIS 147059, [WL] at *5.

Thereafter, in September 2020, Fery filed an Answer and Counterclaims against Plaintiffs. (Answer & Countercls., ECF No. 33.) In those pleadings, Fery alleges that Plaintiffs and their nonparty corporate affiliates—the Barcodes Enterprise[2]—are seeking to monopolize the "ID Products market." (Countercls. ¶¶ 16, 25.) Fery asserts, on information and belief, that the Barcodes Enterprise "controls in excess of seventy (70%)" of the "'market for direct online sales of ID printers and related security control equipment and supplies to commercial and government customers i[n] the geographic market of the United States[.]" (*Id.* ¶ 17.) Fery alleges that, despite acting as a single enterprise, Plaintiffs "us[e] their own free-standing websites that they deceptively present to customers as numerous unrelated businesses[.]" (*Id.* ¶¶ 15, 20.) Fery also alleges that Plaintiffs "have historically charged prices above competitive levels for their products.'" (*Id.* ***[*3]*** ¶ 18.)
