HN1[] **Racketeer Influenced & Corrupt Organizations, Remedies**

To state a claim for damages under the Racketeer Influenced and Corrupt Organizations Act (RICO), a plaintiff has two pleading burdens. First, he must allege that the defendant has violated the substantive RICO statute, *18 U.S.C.S. § 1962 (1976)*, commonly known as criminal RICO. In so doing, he must allege the existence of seven constituent elements: (1) that the defendant (2) through the commission of two or more acts (3) constituting a pattern (4) of racketeering activity (5) directly or indirectly invests in, or maintains an interest in, or participates in (6) an enterprise (7) the activities of which affect interstate or foreign commerce. RICO, *18 U.S.C.S. § 1962(a)-(c)*. Plaintiff must allege adequately defendant's violation of RICO before turning to the second burden of invoking RICO's civil remedies of treble damages, attorney fees, and costs. To satisfy this latter burden, a plaintiff must allege that he was injured in his business or property by reason of a violation of RICO, *18 U.S.C.S. § 1962*. RICO, *18 U.S.C.S. § 1964(c)*.

Counsel: [1]** John B. Nolan, Day, Berry & Howard, Hartford, Connecticut, for Plaintiff.

Judges: Dorsey, District Judge.

Opinion by: DORSEY

Opinion

[*121] RULING ON DEFENDANTS MOTION TO DISMISS

DORSEY, District Judge.

Plaintiffs in this action seek damages for losses incurred in their purchase of limited partnership interests of Glastonbury Associates, a limited partnership formed and existing under the laws of the State of Connecticut. The complaint is framed in two counts. Count I alleges that defendant William Chipman made certain material misrepresentations and omissions in the sale of limited partnership interests of Glastonbury Associates in violation of Section 10 of the Securities Exchange Act of 1934, *15 U.S.C. §§ 78a, et seq.*, and *Rule 10b-5* promulgated by the Securities and Exchange Commission thereunder. 17 C.F.R. § 240.10(b)-5. Count II alleges that defendants violated **[**2]** the provisions of the Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C. §§ 1961-68* (RICO), thus subjecting them, *inter alia*, to treble damages for alleged participation in a scheme or artifice to defraud plaintiffs. The motion of defendants Howard Levy (Levy) and Hale Farms Development Corporation (Hale Farms) to dismiss the RICO count under *Rule 12(b)(6), Fed.R.Civ.P.*, must be denied.

Our circuit court has recently enumerated the dual pleading burdens required to state a civil RICO claim:

> ***HN1***[] To state a claim for damages under RICO a plaintiff has two pleading burdens. First, he must allege that the defendant has violated the substantive RICO statute, *18 U.S.C. § 1962 (1976)*, commonly known as "criminal RICO." In so doing, he must allege the existence of seven constituent elements: (1) that the defendant (2) through the commission of two or more acts (3) constituting a "pattern" (4) of "racketeering activity" (5) directly or indirectly invests in, or maintains an interest in, or participates in (6) an "enterprise" (7) the activities of which affect interstate or foreign commerce. *18 U.S.C. § 1962(a)-(c) (1976)*. Plaintiff must allege adequately defendant's **[**3]** violation of *section 1962* before turning to the second burden -- *i.e.*, invoking RICO's civil remedies of treble damages, attorneys fees and costs. *See Bays v. Hunter Savings Association, 539 F. Supp. 1020, 1023 (S.D.Ohio 1982)*. To satisfy this latter burden, plaintiff must allege that he was "injured in his business or property *by reason of* a violation of *section 1962*." *18 U.S.C. § 1964(c) (1976)* (emphasis added).

Moss v. Morgan Stanley, 719 F.2d 5, 17 (2d Cir.1983), *cert. denied*, *465 U.S. 1025, 104 S. Ct. 1280, 79 L. Ed. 2d 684 (1984)*.

Levy and Hale Farms assert the failure of plaintiffs to satisfy both burdens. As to the substantive or "criminal RICO" allegations, defendants contend that the complaint fails to state, with the specificity required for pleading fraud under *Rule 9(b), Fed.R.Civ.P.*, the circumstances of the two or more acts constituting the pattern of racketeering activity alleged.

In Count II, plaintiffs allege that each of the defendants, in violation of *18 U.S.C. § 1341* (the mail fraud statute), used the mails to lull plaintiffs into a false sense of security about their investment in Glastonbury Associates, and postponed their discovery **[**4]** **[*122]** of the underlying securities fraud by fraudulent pretenses, representations and promises. The complaint asserts the identity, author, recipient, date and nature of the allegedly false letters and documents in question sufficiently as facts constituting mail fraud by the defendants. The allegations here are thus distinguishable from those in *Bennett v. Berg, 685 F.2d 1053, 1062 (8th Cir.1982)*, *aff'd on rehearing*, *710 F.2d 1361* (8th Cir.) (en banc), *cert. denied*, *464 U.S. 1008, 104 S. Ct. 527, 78 L. Ed. 2d 710 (1983)*, stricken as "utterly fail[ing] to apprise defendants of the claims against them and the acts relied upon as constituting the fraud charged." By pleading two or more mailings incident to an essential element of a scheme to defraud violative of the mail fraud statute, *18 U.S.C. § 1341*, the complaint satisfies plaintiffs' first pleading burden.

Movants' contentions as to the second pleading burden appear to have both a procedural and a substantive element. To the extent the complaint could be said to be defective for failing specifically to allege "injury in. . . business or property by reason of a violation of *section 1962*," *18 U.S.C. § 1964(c)*, **[**5]** the defect is cured by plaintiffs' proferred recitation of this language in their motion for leave to amend, *Rule 15(a), Fed.R.Civ.P.*, which is granted.

By implication, movants seem to suggest further that RICO's requirement that plaintiff allege he was "injured in his business or property *by reason of* a violation of *section 1962*" (emphasis added) contains an implicit standing requirement, analogous to that employed in ***antitrust law***. Under this theory, courts have held that an injury is compensable under RICO only if suffered as a result of a distinctive RICO violation, not simply a predicate act. *See, e.g., Bankers Trust Co. v. Feldesman, 566 F. Supp. 1235, 1240-41 (S.D.N.Y.1983)*; *Harper v. New Japan Sec. Int'l, Inc., 545 F. Supp. 1002, 1006 (C.D.Cal.1982)*; *Johnsen v. Rogers, 551 F. Supp. 281, 284-85 (C.D.Cal.1982)*; *Barker v. Underwriters at Lloyd's, London, 564 F. Supp. 352, 358 (E.D.Mich.1983)*; *Clute v. Davenport, 584 F. Supp. 1562 (D.Conn.1984)*. Other courts have adhered to a contrary view. *See, e.g., Schact v. Brown, 711 F.2d 1343, 1357 (7th Cir.1983)*, *cert. denied*, *464 U.S. 1002, 104 S. Ct. 509, 78 L. Ed. 2d 698 (1984)*; *Bennett v. Berg, 685* ***[**6]*** *F.2d at 1059*; *Prudential Lines, Inc. v. McKeon*, No. 80 Civ. 5853 (S.D.N.Y., Apr. 21, 1982); *Landmark Savings & Loan v. Loeb Rhoades, 527 F. Supp. 206, 208 (E.D.Mich.1981)*; *Hellenic Lines, Ltd. v. O'Hearn, 523 F. Supp. 244, 248 (S.D.N.Y. 1981)*. While the Second Circuit does not appear to have reached the issue, the tenor of *Moss* and its express recitation of the persuasiveness of the Seventh Circuit's decision in *Schact, Moss v. Morgan Stanley*, 719 F.2d at n. 10, suggest that no such pleading obstacle to a civil RICO action need be surmounted by a plaintiff in this circuit in order to state a claim.

This standing requirement, like the now-discredited efforts to limit RICO to "organized crime," *see Moss, 719 F.2d at 21*, stems from a perceived need to constrain the very broad language used in drafting RICO. While Congress may not have contemplated the wholesale elevation of "garden variety" securities and common law fraud violations into RICO claims, *see* Note, *Civil RICO and "Garden Variety" Fraud -- A Suggested Analysis*, 58 St. John's L.Rev. 93, 112 (1984), the *Schact* court aptly noted:

> While we are mindful of the jurisprudential maxim that **[**7]** statutes are not to be interpreted woodenly and without regard to their aim, we do not see how any legitimate or principled tailoring of RICO could be effected without impairing the broad strategy embodied in the act. If Congress wishes to avoid the inclusion under RICO's umbrella of "garden variety " fraud claims involving the operation of enterprises through mail and securities fraud, it may easily do so through removing mail and securities fraud from the list of predicate acts enumerated in *§ 1961*. That is not, however, a program which may be undertaken by this court. *United States v. Turkette, 452 U.S. 576, 586-87 [101 S. Ct. 2524, 2530, 69 L. Ed. 2d 246]* . . . (1981).

[*123] *See also Moss, 719 F.2d 5*, at nn. 10, 13, citing *Schact* approvingly and listing a number of courts which have entertained civil and criminal RICO claims premised, like this claim, on common law fraud and "ordinary" securities fraud violations.

Accordingly, the complaint sufficiently pleads a RICO claim based upon an alleged pattern of racketeering activity involving predicate acts of mail fraud, *18 U.S.C. § 1961(1)(B)*. The motion to dismiss is denied without prejudice to renewal **[**8]** upon a more developed record. Defendants Levy and Hale Farms shall answer within ten (10) days.

SO ORDERED.

Evidence > Inferences & Presumptions > Inferences

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN1[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

In the absence of direct evidence, a district court may rely on circumstantial evidence of consciously parallel corporate conduct to support an inference of unlawful agreement. The agreement need not be proven by direct evidence, conduct pointing to concerted action is sufficient. Standing alone, however, such evidence is insufficient unless the circumstances under which it occurs make the inference of a rational, independent choice less attractive than that of concerted action. The principal considerations identified by the courts in making this inquiry are, first, whether the companies undertaking the parallel conduct had motivation to enter an agreement, and second, whether the parallel decisions would have been contrary to the companies' individual economic interests if effected separately.

Business & Corporate Law > ... > Authority to Act > Business Transactions > General Overview

Business & Corporate Law > ... > Duties & Liabilities > Authorized Acts of Agents > General Overview

HN2[] **Authority to Act, Business Transactions**

When a corporation grants authority to its agents or employees to make sales on its behalf, it cannot then eschew responsibility for the means adopted by the agents and employees to make those sales, even when it has made real efforts to control their conduct.

Governments > Legislation > Interpretation

HN3[] **Legislation, Interpretation**

In interpreting a regulatory statute, common-law definitions are irrelevant; instead authority must be construed to extend accountability as far as necessary to eradicate the unfair practices which underlie the order.

Business & Corporate Law > ... > Duties & Liabilities > Authorized Acts of Agents > General Overview

Criminal Law & Procedure > ... > Jury Instructions > Particular Instructions > Use of Particular Evidence

Torts > ... > Employers > Scope of Employment > General Overview

HN4[] **Duties & Liabilities, Authorized Acts of Agents**

The standard for imputing liability to a corporation for the acts of its employees should be no more stringent in civil penalty proceedings than in criminal prosecutions, where courts generally require only that the illegal act be committed within the scope of the wrongdoer's employment and refuse to allow technical claims of lack of authority or even evidence that the employee acted against express instructions to defeat the corporation's responsibility.

Business & Corporate Law > ... > Duties & Liabilities > Authorized Acts of Agents > General Overview

HN5[] **Duties & Liabilities, Authorized Acts of Agents**

The scope of liability, like the breadth of the penalty provisions, must provide a meaningful deterrence against violations.

Business & Corporate Law > ... > Authority to Act > Business Transactions > General Overview

HN6[] **Authority to Act, Business Transactions**

In civil penalty proceedings, as in criminal prosecutions, a corporation which employs an agent in a responsible position cannot say that the man is only "authorized" to act legally.

Business & Corporate Law > ... > Duties & Liabilities > Authorized Acts of Agents > General Overview

HN7[] **Duties & Liabilities, Authorized Acts of Agents**

To deny the possibility of corporate responsibility for the acts of minor employees is to immunize the offender who really benefits, and open wide the door for evasion. Particularly where the end sought is deterrence, distinctions between officers and agents, or between persons holding positions involving varying degrees of responsibility, are inappropriate.

Business & Corporate Law > ... > Duties & Liabilities > Authorized Acts of Agents > General Overview

Torts > Vicarious Liability > Employers > General Overview

HN8[] **Duties & Liabilities, Authorized Acts of Agents**

An employer must stand or fall with those whom he selects to act for him. He is in the same plight, if they are delinquent, as if he has failed to abate a nuisance on his land. It is the case of the non-performance of a nondelegable duty.

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > Federal Trade Commission Act

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

Antitrust & Trade Law > Federal Trade Commission Act > Remedies > General Overview

Antitrust & Trade Law > Federal Trade Commission Act > Penalties

HN9[] **Remedial Powers, Federal Trade Commission Act**

Section 5(l) of the Federal Trade Commission Act, *15 U.S.C.S. § 45(l)*, provides for civil penalties of up to $ 10,000 for each violation against individuals or entities who violate final orders of the Federal Trade Commission. In the case of a violation through continuing failure to obey or neglect to obey a final order of the commission, each day that the conduct continues is a discrete offense subject to the maximum penalty. A "continuing conspiracy to fix prices" is the type of behavior Congress intends to cover as a continuing failure or neglect to obey.

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

Antitrust & Trade Law > Public Enforcement > US Federal Trade Commission Actions > Judicial Review

HN10[] **Settlements, Consent Judgments**

Determining the appropriate civil penalty is a matter within the sound discretion of the trial court. The courts identify several factors to guide this discretion: the good or bad faith of the defendants, the injury to the public, the defendants' ability to pay, the extent to which defendants have benefitted from the violations, and the need to vindicate the authority of the Federal Trade Commission.

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN11[] **Settlements, Consent Judgments**

The good or bad faith of the violator is an important factor in assessing the appropriate penalty.

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

Antitrust & Trade Law > Public Enforcement > US Federal Trade Commission Actions > Judicial Review

HN12[] **Settlements, Consent Judgments**

The degree to which a corporation takes steps on its own initiative to assure compliance with the Federal Trade Commission's cease-and-desist order affects the judgment as to what penalty is necessary to induce a sufficiently vigilant posture.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN13[] **Antitrust & Trade Law, Sherman Act**

Price-fixing is a per se violation of the antitrust laws.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN14[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

Suppression of competition significantly affects public interest.

Opinion

[*1345] CORRECTED OPINION AND ORDER

ABRAHAM D. SOFAER, D.J.:

The United States brought this civil action in September 1978 for monetary penalties and injunctive relief, pursuant to section 5(l) of the Federal Trade Commission Act, *15 U.S.C. § 45(l)*, against defendants Phelps Dodge Industries, Inc., a successor to Phelps Dodge Copper Products Corporation; General Cable Corporation, now known as GK Technologies, Inc. ("GK"); the Okonite Company; and the Anaconda Company. The complaint charges that the defendants violated a 1936 Federal **[**2]** Trade Commission cease-and-desist order ("the Order"), which prohibited price fixing and coordination in the paper cable industry. In November 1979 a final judgment providing for a civil penalty of $300,000 and injunctive relief was entered against Okonite by consent. In January 1980 the remaining defendants unsuccessfully moved to dismiss the complaint on the ground that it failed to state a claim upon which relief could be granted, and extensive discovery ensued. In January 1982 a final judgment providing for a civil penalty of $100,000 and injunctive relief was entered by consent against Anaconda. In January 1983 the remaining parties agreed to submit the entire cause for final judgment on an agreed record.

The Order which the government argues the companies' conduct violated originated in an administrative proceeding instituted by the FTC on September 26, 1935, against defendants or their predecessors, and other companies no longer in the industry. The Order has remained in force since it became final in May 1938. The government charges that Phelps Dodge, GK, Okonite, and Anaconda violated the first, second, and fourth decretal paragraphs of that Order, which prohibit competitors **[**3]** from conspiring to fix or maintain prices, to adhere to prices in price sheets circulated among them, or to conduct investigations to ferret out and discourage deviations from such prices. [1] The findings and conclusions that **[*1346]** follow establish that defendants violated the 1936 Order by conspiring to fix and maintain prices in the paper cable industry. Civil penalties are assessed against Phelps Dodge and GK in the amounts of $517,500 and $552,000, respectively.

[4]** I. *Findings of Fact*

A. *The Paper Cable Industry, Market, and Price Book*.

Impregnated paper cable is electrical cable used for the transmission of high voltage electricity from a generation point to a distribution point. Order para. 2. It is generally made to specifications set by the purchaser from strands of copper or aluminum sheathed with a paper insulation. During the period between 1970 and 1975, the four defendants originally named in this action made over ninety percent of the paper cable sold in this country. Their products were essentially fungible, and their customers primarily public and private utilities.

For some time paper cable pricing has been based on data in a price book, an "historical formula which people have used in the industry as a basis for pricing their products." Priesing at 98. The price book formula in the 1970s reflected costs of labor, materials, and manufacturing, as well as a margin of contribution, for given industry specifications of paper cable. Priesing at 98-103. Book pricing was simply a shorthand method of determining the cost of a product generally manufactured to customer specification. Cowles at 40, 165-67. The price book

---

[1] The Order provides in relevant part:

It Is Further Ordered that said respondent corporations . . . General Cable Corporations . . . Habirshaw Cable and Wire Corporation . . . The Okonite Company, Phelps-Dodge Copper Products Corporation . . . and their successors, officers, agents and employees, and the respondent, National Electrical Manufacturers Association, cease and desist, in connection with the business of selling and offering for sale impregnated paper cable, . . . in interstate commerce, from doing and performing, by agreement, combination or conspiracy between or among any two or more of said respondent corporations acting directly or by or through the respondent, National Electrical Manufacturers Association, the following acts and things:

(1) Fixing maintaining or enhancing prices, special charges, discounts, transportation charges or any terms or conditions of sale which terms or conditions constitute a substantial element in competition;

(2) Providing that any price lists compiled and distributed by any of them among their competitors are to be adopted and adhered to until modifications thereof are similarly compiled and distributed with the result that such original lists and amendments are so adopted and adhered to by any of them and their competitors;. . .

(4) Participating with competitors in initiating or conducting any investigation for the purpose of ascertaining and reporting for their joint benefit if, when and to what extent any competitor has deviated from any price list or any announced or quoted price, or otherwise bringing pressure or persuasion to bear upon competitors not to deviate from any such price list or price, provided that this paragraph shall not prevent the circulation of reports of the prices, terms, conditions and like particulars of closed transactions, when not done for the purpose of policing the activities prohibited in paragraphs (1) or (2);. . .

In re National Electrical Manufacturers Ass'n (No. 2565, Dec. 29, 1936).

contained **[**5]** a base price for specifications of paper cable, as well as a series of price sheets listing the adjustments to that price because of such factors as the cost of metal and other product components.

Three paper cable price sheets are most important in this litigation: the quantity discount sheet, which specified percentage discounts for various quantities of cable; the freight adder sheet, by which shipping charges were calculated; and the jacket adders, which listed the prices of the coverings, or jackets, for the paper cable, and which varied according to the type and thickness of paper insulation used. The price book served to simplify paper cable pricing by providing a means of separately pricing product components. The 1936 Order described the price sheets then in circulation, however, as "exceedingly complex and detailed." *In re National Electrical Manufacturers Assn*., Findings of Fact para. 4(a) (No. 2565 Dec. 29, 1936). Generally, no more than a handful of people in any paper cable company were capable of calculating the book price for a given order. Cowles at 206, 209.

Occasionally, one of the four major domestic producers would issue a revised price sheet and send it **[**6]** to its three major competitors, who typically would revise their own price sheets to conform to the new standard. This practice caused the companies' price books to remain identical: the list price for any given order generally would not vary from company to company. But the companies did not always charge the book price. When market conditions demanded, the companies would bid "off-book," either by discounting the book price by some percentage, Jackson at 111; by utilizing cost-plus pricing from individual component costs, Penhale at 25-26; Jackson **[*1347]** at 25-26, 128-32; or by employing some combination of book and cost-plus pricing, Jackson at 129-30; Penhale at 28; Kedzierski at 107. Each of these methods was responsive to competitive pressures; manufacturers could at any time reduce or increase the discount from book, or adjust their profit above (or loss below) cost. Employed in this manner, the price book enabled manufacturers to base their prices on identical data, but still engage in competitive pricing.

Until around 1970, "the book was pretty much the golden rule," from which paper cable companies derived quotations "without exception." Jackson at 110. After 1970 **[**7]** the fortunes of the paper cable industry fluctuated widely, and so did the industry's adherence to the book. For most of 1973 pricing went off-book, but during the first half of 1974 demand was so strong that at times quotes went above book. Penhale at 29-30; Schell at 39. Beginning in 1975, while quotes remained on-book, considerable discounting took place. By late 1975 the industry was in a serious downturn. Pricing went entirely off-book, Penhale at 29-30; Schell at 38; Viggiano at 60; Cowles at 92-93, and occasionally even went below cost, Kedzierski at 107; *see* Brooks at 70. Costs escalated so rapidly that historical data on which the price book was premised no longer accurately reflected the market, and low demand made book-price increases untenable. Phelps Dodge explored the possibility of a total overhaul of the pricing system, Cowles at 94; Priesing at 103, but the price book proved superior to any other method contemplated, Cowles at 183; Priesing at 156. GK also considered alternative pricing strategies to increase the profitability of paper cable, but none was implemented because the market was believed incapable of supporting higher prices. Brooks at 73, 76, 78-79. **[**8]** Against this gloomy background in the paper cable industry, certain contacts occurred between officials of the defendant companies named Trotter, Kedzierski, and Penhale.

B. *Contacts Between Trotter, Kedzierski, and Penhale*.

In April 1976, when demand for paper cable had been falling for some eighteen months, James Trotter was Product Manager for paper cable at Phelps Dodge and Leo Kedzierski held the same position with GK. Robert Flood, then of Phelps Dodge but formerly of GK, phoned Kedzierski to arrange a meeting between him and Trotter at the Hilton Hotel in Tarrytown, New York. Flood claims he arranged the meeting solely because he knew that Trotter's job at Phelps Dodge was in jeopardy and wished to introduce Trotter to someone at GK in case he might want to seek employment there. Flood at 70, 132, 137-38. He admitted, however, that he did not mention this purpose to Kedzierski during their phone conversation or during his brief appearance to introduce them when they met. Instead, amidst "general comments about the state of the industry," Flood indicated to Kedzierski only that the two men should meet because "Jim Trotter was involved in paper cable pricing." Flood at **[**9]** 75. Kedzierski testified, moreover, that Flood, relating a discussion at Phelps Dodge at which the participants were lamenting the plight of paper cable, suggested that "it didn't have to be like that." Kedzierski at 102-03. Flood termed Kedzierski's account of the conversation "a little dramatic," but he conceded that he had spoken of the poor state of the paper cable product line and that Kedzierski might reasonably have construed the discussion as an invitation to cooperate.

Flood at 72. At their initial meeting, Trotter and Kedzierski discussed Trotter's insecurity about his job with Phelps Dodge, which he thought hard times in the paper cable industry had put in jeopardy. Trotter at 352; Kedzierski at 262. But they also discussed the ailing state of the market for paper cable, book pricing, and ways to shore up the price. Kedzierski at 31; Trotter at 74-77.

Later in April, Kedzierski and Harry Penhale, then Vice-President for Quotations for paper cable at Okonite, arranged to meet at the Marriott Hotel in Saddlebrook, New Jersey. According to Trotter **[*1348]** and Kedzierski, Trotter was not present at this meeting. Trotter at 83, 387-88; Kedzierski at 38-39. Discussion focused **[**10]** primarily on the poor economic conditions then prevailing in the paper cable industry. Kedzierski testified that at this meeting Penhale supplied him with a copy of a new Okonite price sheet of "freight adders." Penhale recalled that he and Kedzierski had discussed the updated freight rates over the phone around this time, but that he had not actually provided Kedzierski with the sheet until a subsequent meeting attended also by Trotter, to whom he also gave a copy. Penhale at 80-83.

Penhale also recalled that at the April meeting Kedzierski had given him and Trotter each "a copy of some work he had done with respect to revisions in discounts on . . . the cable coverings," or jacket adders. Penhale at 83. Kedzierski testified that at this initial meeting he had merely mentioned to Penhale that he was doing some work on jacket adders, that Penhale requested that he send them to him, and that at a later time he did so. Kedzierski at 41-42; 237; *see* Trotter at 74. Trotter did not think he had received the jacket adders at all, recalling that Kedzierski had indicated to him that he had abandoned the work. Trotter at 334. But his superior Richard Cowles, Vice-President of Sales and **[**11]** Marketing for the Phelps Dodge Cable and Wire Company, testified that about this time Trotter had showed him a tentative price sheet for jacket adders from another company, an incident of which he apprised Schell, the president of the Cable and Wire Company. Cowles at 22-25. The evidence makes it likely, therefore, that Kedzierski provided Penhale and Trotter with copies of General Cable's proposed jacket adders.

Trotter also testified that during this period he received a copy of the Okonite freight rates and a quantity discount sheet. Trotter at 320-29. Penhale recalled that an exchange of freight rates occurred at the first three-way meeting. Penhale at 83. Trotter, however, testified that he received both documents through the mail sometime before the three companies issued new price sheets in late May. Thus, the men agree that Penhale gave Trotter a copy of Okonite freight rates; and Trotter recalled receiving quantity discount sheets as well. Though Trotter's recollection of his receipt of these materials seems less than precise, *see* Trotter at 326-27, the testimony of Cowles and Schell confirms that Trotter received some type of price sheet from a competitor. Schell at **[**12]** 156-59; Cowles at 15-25. In sum, notwithstanding the divergence in details of the participants' testimony, the evidence establishes that the men exchanged internal pricing information in the hope of gathering support for imminent price increases.

Penhale, Kedzierski, and Trotter did not simply exchange price information, but by phone call and meeting developed an understanding that their respective companies would bid "on the book" and thus attempt in concert to hold the marketplace price to the levels established by the new pricing sheets. Initially, Trotter advised his cohorts that Phelps Dodge was considering issuing a new price sheet incorporating higher prices. Trotter at 79, 163, 328, 83. Penhale assured Trotter that, if Phelps Dodge took the lead in issuing new price sheets, Okonite would support and follow them. Trotter had similar conversations with Kedzierski, who admitted suggesting to Trotter early in their discussions that General Cable would support higher prices for paper cable, and would adhere to the price sheets soon to be issued. On May 24, 1976, Phelps Dodge issued new price sheets, covering quantity discounts, jacket adders, and freight adders, which raised the **[**13]** price of most if not all types of paper cable. Phelps Dodge distributed the new price sheets to its competitors by mail, as was its custom, and they made their way to Penhale's and Kedzierski's desks. Quickly following Phelps Dodge's lead, General Cable simply copied the new prices and issued them as its own effective May 26. Okonite, too, adopted the Phelps Dodge pricing factors, issuing new price sheets for discounts and jacket and freight adders on June 1, 1976.

[*1349] The issuance of identical price sheets in the highly oligopolistic paper cable industry is not alone sufficient to establish collusive behavior. "Rigid list prices do not prove collusion if transaction prices depart substantially from list." Posner, *Oligopoly and the Antitrust Laws: A Suggested Approach*, 21 Stan. L. Rev. 1562, 1581-82 (1969). But an agreement to stick to newly established price lists does constitute collusive conduct. Traditionally, defendants had used the price sheets only as guides while freely discounting from them to bid competitively. By the time the

May 1976 price sheets were issued, however, Trotter, Penhale, and Kedzierski had a clear understanding that their respective companies **[**14]** would cooperate by stabilizing the market price at book. Though wary of each others' true intentions, and concerned that the companies' simultaneous increase not just in book prices but in actual bids would appear concerted, Kedzierski, Penhale, and Trotter nevertheless agreed to adhere to book prices so long as their competitors did. As Penhale put it, Phelps Dodge should "run it up the flag pole and see who salutes." Penhale at 71-72.

Initially, at least, the three fell in line. In June 1976, GK, Phelps Dodge, and Okonite each began quoting book prices from the newly issued price sheets and sticking to them, a drastic change from the rampant discounting that had prevailed for the preceding eighteen months. Because each company bid on book and their price sheets were identical, their bids too were identical. In Penhale's view the identical bids submitted by the three producers during June and July resulted from the discussions held by the three men. Penhale at 103. Furthermore, Roger Brooks, Kedzierski's immediate superior at GK, testified that, based on several conversations with Kedzierski, Brooks understood that Penhale, Kedzierski, and Trotter had agreed that their respective **[**15]** companies would bid at the list prices established in the new price sheets; and Brooks believed that actual bidding during this period manifested this agreement. Brooks at 89-90, 96-97, 102-03, 110-11, 129-33.

Within a few weeks after the price sheets were issued, Kedzierski, Penhale, and Trotter met at the Saddlebrook Marriott to congratulate themselves that the book prices were holding and, in Penhale's words, to "pledge allegiance" to the agreement. In July, Trotter and Penhale met once again at the Saddlebrook Marriott. The three men were also in constant phone contact throughout the summer, discussing general industry conditions as well as specific bids, current pricing, and book price calculations. On several occasions, Kedzierski received an inquiry from pricing officials in corporate headquarters seeking information that would assist in formulating base prices for lead that the corporation would set for its divisions. Though prevailing lead prices were generally announced in the industry journal, Kedzierski contacted Penhale and Trotter to obtain prices actually being quoted in order to maintain a competitive position. Kedzierski passed on the information he received to corporate **[**16]** headquarters, where it formed the basis for lead pricing. Trotter also requested his competitors' lead factors. While lead was a relatively insignificant component of paper cable pricing, these discussions indicate the extent of the three men's efforts to ensure uniformity. Kedzierski at 225-35; Trotter at 380-83.

The agreement had a direct bearing on at least two major bids during the summer of 1976. In preparing a bid to Consolidated Edison involving several million dollars, Penhale and Kedzierski consulted by phone to ensure that each had arrived at identical calculations from the book for the five elements comprising the bid, and then agreed to bid those figures. Kedzierski at 73-76. Subsequently, Penhale informed Kedzierski that he would likely cut the price on one of the five items in order to remain competitive with Phelps Dodge and GK, each of which had a higher performance rating with Con Ed than did Okonite. Trotter and Kedzierski also discussed this bid, Trotter deriving from the conversation a "general feeling" that GK would bid on book. A third round of bilateral discussions on this **[*1350]** bid took place between Penhale and Trotter, after which Trotter predicted **[**17]** that all three companies would bid on book but for Okonite's partial adjustment. His prediction was accurate -- the Okonite, Phelps Dodge, and General Cable bids were identical on four of the five items, and Okonite cut on the fifth. Because the bids on four of the items were identical, Con Ed rejected these four and requested rebidding on them. Cowles at 98-99, 134-35, 150; Priesing at 131; Brooks at 99.

The men also cooperated on a pending bid to Commonwealth Edison of Chicago worth more than a million dollars, which each company had bid on book. Commonwealth approached General Cable, suggesting that if it reduced its bid on some minor related items it would receive a major portion of the paper cable business. Sensing that, contrary to Commonwealth's suggestion, the price of these relatively insignificant items would not affect Commonwealth's decision on the paper cable, Trotter and Kedzierski agreed not to cut their companies' bids, despite considerable pressure from GK's field salespeople. Kedzierski at 80-82. Kedzierski also discussed the matter with Penhale, who held a similar view of Commonwealth's strategy and indicated that he too would endeavor to maintain his company's **[**18]** bid prices. Penhale at 163-64. Commonwealth eventually split the order among the three companies, paying the book price to which the three men had agreed to adhere. Penhale at 164.

The existence of an agreement is also demonstrated by the conduct of the three men in confronting one another upon the receipt of field information indicating that a competitor had deviated. At the outset of their arrangement, Penhale and Kedzierski had several phone conversations in which they discussed charges of discounting. Kedzierski at 74. Kedzierski recalled that even at their first meeting there had been some "good-natured kidding" about discounting off the book. Kedzierski at 88. Penhale testified and Kedzierski confirmed that on several occasions Penhale called Kedzierski to "chide" him about having bid off-book, and that Kedzierski routinely pleaded a mistake in the calculations. Penhale at 154-55. Kedzierski also called Penhale when he received suspicious information from his salespeople. Kedzierski at 59-61. Trotter pointed out variations from book pricing in Okonite bids to Penhale during the same conversations in which the men discussed upcoming orders. Trotter at 104. At some point between **[**19]** late July and early September, but probably during August when it had become apparent that the agreement was breaking down, the three men met again at the Saddlebook Marriott. The major portion of the meeting was taken up by various charges of cheating on one bid or another, Kedzierski and Trotter "berating" Penhale with particular harshness for having cut a price on a significant piece of business with Boston Edison. Kedzierski at 92-93; Penhale at 100-02. When they refused to believe Penhale's initial excuse that a clerk in the district office had made a typographical error, Penhale claimed he was simply retaliating. Penhale at 101, 222-24. The meeting, which proved to be among the last contacts before the market reverted to massive discounting, concluded with extensive discussion of a major bid to the Long Island Lighting Company. Kedzierski at 97-98; Penhale at 102-03, 168.

Phelps Dodge executives characterized Trotter's role in developing the May 1976 price sheets as ministerial. Cowles at 59-61; Priesing at 36-37; *see* Trotter at 95, 152. He was not included in the discussions as to whether or not Phelps Dodge would go back on book, nor asked for recommendations as to appropriate **[**20]** price levels, nor requested to forecast the effect of a price increase on the Phelps Dodge market share. Trotter at 361, 77, 152-53. With respect to the discount schedules, Cowles insisted that upper management determined various marginal income levels, for which Trotter would work up corresponding price schedules. Trotter's superiors would then decide which to adopt without any input from him. Cowles at 205-08. In the case of the freight and jacket adders, Cowles said that Trotter simply prepared **[*1351]** price sheets which reflected the costs supplied him by other departments. Cowles at 208-09, 211-12; *see id*. at 58-59.

Trotter performed a significant, corporate staff function, however, in generating the price sheets, as well as compiling and analyzing the pricing, cost, and competitive bidding information which constituted the essential basis for managerial decisionmaking. Cowles at 57-59. He was the only person in the organization capable of doing the mathematical calculations necessary to develop new price sheets. Cowles at 206-12; *see* Priesing at 67. He obtained bid inquiries from field salespeople and relayed prices to them. He testified that his job responsibilities **[**21]** in each of his paper cable positions were "very similar," though the last, that of paper cable product manager, involved "more forecasting." Trotter at 13. With respect to pricing, his responsibility was "to see that [an inquiry] got priced and that the quotes went out on time, to see that bid due dates were met." Trotter at 13-14. If pricing was off-book, Trotter had authority to approve bids up to $25,000; anything higher had to be approved by Cavanaugh, his immediate superior. During the periods when quotations were from the book, however, Trotter testified that no approval was necessary, though higher management cursorily reviewed the bids. Decisions whether to quote book were made by those in the upper level of management, but Trotter was the source of the competitive data that informed those decisions, and he regularly made pricing recommendations. Trotter at 39-40; 434. When Phelps Dodge began to consider raising prices in early 1976, Trotter was assigned the task of evaluating the continued efficacy of the price book and developing alternative pricing mechanisms. Cowles at 93-94. Phelps Dodge followed his recommendation in retaining the price book, relied on data he generated **[**22]** in making its decisions on new volume discounts, and allowed him to "[use] his own judgment on the freight factors and the jacket adders." Cowles at 96.

Kedzierski also had a major role in paper cable pricing. He joined General Cable as a quotation clerk in 1954, when he learned to use the price book. In 1976 he became paper cable product manager, with autonomous pricing authority for bids up to between $50,000 and $100,000. Kedzierski at 14-16; Brooks at 27. On higher bids he had to consult with his marketing manager, Roger Brooks, and on exceptionally large bids with the general manager, William Garretson. Kedzierski described his pricing responsibilities as "to execute the tactics or strategies or objectives as set by the division, to review the day-to-day work performed by quotation and/or pricing people, and to recommend to management a change in objectives or a change in strategy." Kedzierski at 12-13. "Product managers were responsible for all the pricing strategies development and the day-to-day execution of pricing to include specific quotations and published price sheets." Brooks at 30; *see id*. at 34-35; Jackson at 96-97. The initiative to adjust prices to market **[**23]** conditions was expected to come from the product manager, who would in the first instance develop figures and make a recommendation. Jackson at 75-76. In sum, "the product managers . . . really would be the points where the decisions and recommendations would come with respect to pricing," for they were "closest to the marketplace." Brooks at 41.

In addition, Kedzierski kept his immediate superior Brooks apprised of his continuing contacts with Trotter and Penhale and their import, and Brooks did little if anything to discourage them. Trotter and Penhale understood that Kedzierski had signed on to the agreement only after checking with "his management." Trotter at 93; Penhale at 78-79, 142, 166. As marketing manager, Brooks had significant influence in establishing and implementing corporate pricing policy for the products within his market areas. Jackson at 74-75. The position of marketing manager for the Power and Control Division "involved all marketing related responsibilities to include the responsibilities of planning, market analysis, sales analysis . . . and also included management of the product managers' **[*1352]** functions within the division." Brooks at 22-23. Brooks **[**24]** viewed his responsibilities with respect to paper cable pricing to entail "managing the entire function and ensuring that basically the pricing that was executed on a day-to-day basis was within what is called acceptable or market competitive pricing ranges." Brooks at 27-28. Brooks and Kedzierski worked together closely, sometimes meeting as often as ten to fifteen times a day. Upon first hearing from Penhale, Brooks testified, Kedzierski called him in Miami to consult. Brooks at 89. Thereafter, Kedzierski kept Brooks aware that the contacts were continuing, made it "clear" that Kedzierski was talking on the phone with Penhale, and advised him that the meetings were intended to clarify the companies' intention to adhere to published book prices. Brooks at 89-93, 96-98. Brooks admitted that the result of the series of meetings and phone calls was an agreement to quote book price on the major jobs under bid at the time in order to "stabilize" the paper cable market. Brooks at 102-03, 111, 132.

Phelps Dodge contends that it increased prices, and GK says it followed the increase, solely because of economic necessity, and not as a result of any agreements reached by their employees. Conditions **[**25]** had become so bad, they allege, that a bold attempt to bolster prices became worth trying, despite continuing, abysmal demand. Schell at 97-98; Cowles at 26; *see* Penhale at 30; Viggiano at 61. Cowles claimed that the Phelps Dodge strategy was in effect riskless:

> Frankly, [with] the incremental income we were obtaining at that time, it really did not make much difference whether we took any more business at those prices or we just reduced our work force and curtailed our activities. . . .

Cowles at 32. Cowles testified that he, Schell, and Priesing determined to increase book prices and stay with them for at least an initial period, suffering some loss of business in an attempt to make the new prices stick. Cowles at 48-50, 59; *see* Priesing at 35, 131. If the competition did not follow but instead sought to take advantage of the move by undercutting the new, higher bids, Phelps Dodge would reconsider. Priesing at 131. At least initially, General Cable was happy to follow, as had been its custom. Brooks at 88-89.

These arguments fail to disprove, however, that the companies relied upon and benefitted from the collusion of Trotter, Penhale, and Kedzierski. **[**26]** They demonstrate that defendants greatly needed to return to book pricing, but the risks of any single company doing so without the others were very substantial: at the time of Phelps Dodge's decision, only three anticipated bids comprised the major portion of the industry's projected requirements for 1977 and early 1978. Cowles at 49. Just a few months before the increase, General Cable had decided not to pursue a similar strategy, after weighing the likelihood that the competition would follow its lead against the severe consequences if its strategy failed. Brooks at 74-76. The risks associated with a unilateral price increase diminished as the likelihood grew that competitors would follow, and that likelihood was made significantly greater by the activities of Trotter, Penhale, and Kedzierski, which undoubtedly affected the decision-making process. Furthermore, the conspiratorial activities helped keep the increase alive because the three men were able to signal each other their companies' willingness to continue on book, as well as to police each other's adherence to book.

II. *Liability of Phelps Dodge and GK*.

The Order provides the rule of law in this case. *See* *FTC v. **[**27]** Lukens Steel Co., 454 F. Supp. 1182, 1188 (D.D.C. 1978)*. It prohibits the respondent corporations "from doing and performing, by agreement, combination or conspiracy" any of the acts enumerated by its decretal paragraphs. Order at 2. The government seeks to impose liability here under three specific paragraphs: the first, which proscribes "fixing, maintaining or enhancing" prices and other charges, terms, and conditions of sale; the second, which prohibits "providing that any price lists . . . be adopted and adhered to;" **[*1353]** and the third, which prohibits the monitoring and enforcement of such price levels.

The evidence on submission warrants a finding that Kedzierski and Trotter agreed to fix prices. In the paper cable industry, proof of a price-fixing agreement has to be particularly strong because the concededly lawful use of the price books by all three competitors made identical, on-book pricing less suspicious than identical prices would be in an industry that had no price book. Here, however, the government has demonstrated that Kedzierski, Trotter, and Penhale expressly agreed that their companies would bid identically at book and would maintain those prices. Their **[**28]** conduct violated the first paragraph of the 1936 Order, which proscribed price-fixing in general terms, and the second, which specifically prohibited price-fixing in the form of an agreement to adhere to book prices. In addition, they monitored and encouraged compliance with the agreement to adhere to book prices. Their efforts may not have risen to the level of "participating with competitors in initiating or conducting any *investigation* for the purpose of ascertaining and reporting for their joint benefit if, when and to what extent any competitor has deviated from any price list or any announced or quoted price." Order para. 4 (emphasis added); *see In re National Electrical Manufacturers Association*, Findings as to the Facts and Conclusion (Dec. 29, 1936), para. 4(e), at 5. But their conduct violated the Order's fourth paragraph prohibiting "otherwise bringing pressure or *persuasion* to bear upon competitors not to deviate from any such price list or price." Order para. 4 (emphasis added). The questioning, "chiding," "good-natured kidding," expressions of "slight disappointment," and the like comprised forms of persuasion, designed to accomplish the prohibited ends.

[29]** GK suggests that the facts in this case fall outside the specific provisions of the 1936 Order, relying on what it terms the 'four corners' rule of strict construction" applicable in proceedings to enforce consent decrees. *See, e.g.,* *United States v. ITT Continental Baking Co., 420 U.S. 223, 43 L. Ed. 2d 148, 95 S. Ct. 926 (1975)*; *United States v. Armour Co., 402 U.S. 673, 29 L. Ed. 2d 256, 91 S. Ct. 1752 (1971)*. It contends, first, that conditions in the modern paper cable industry have radically changed from those existing at the time of the Order, and second, that the decretal provisions of the Order were directed primarily at activities undertaken through the respondents' trade association. The four-corners rule prohibits "modification [of consent decrees] disguised as construction." *ITT Continental, 420 U.S. at 236 n. 9*. Contrary to GK's suggestion, however, the rule does not necessarily mandate strict construction; it simply shifts the court's focus from the purpose of the statute to that of the order. *See* *United States v. Ancorp National Services, Inc., 516 F.2d 198, 201-02 (2d Cir. 1975)*; *United States v. Olin Ski Co., 503 F. Supp. 141, 143 (S.D.N.Y. **[**30]** 1980)* (quoting *United States v. J.B. Williams Co., 498 F.2d 414, 431 (2d Cir. 1974))*. The purpose of the Order under consideration here was to prohibit price-fixing by means of the price book or any other device, and the conduct proven falls squarely within the Order's central prohibitions. The first paragraph contains no more than "anti-price fixing boilerplate language," Cambria Affidavit para. 11; *see* GK Memorandum in Opposition to Motion for Summary Judgment on Liability at 19 n.*, but it amply covers the subject of this action -- a garden-variety price-fixing conspiracy, replete with surreptitious phone calls, anonymous transmissions through the mail, and meetings in hotel cocktail lounges. The purview of the second paragraph specifically includes agreements between the respondent corporations to adhere to any price lists, whether "acting directly or by or through the respondent, National Electrical Manufacturers Association." Order at 2. Finally, GK fails to explain how the significantly smaller number of competitors, the ailing state of the industry, or any other changed circumstance would render ineffective any portion of the Order ineffective absent a modification, **[**31]** **[*1354]** which neither GK nor Phelps Dodge had sought.

A. *Inference of Conspiracy*

Phelps Dodge and GK seek to avoid liability for civil penalties by arguing that the relevant bids resulted wholly from independent business decisions into which Kedzierski and Trotter had no input. The structure of the Order provides some support for defendants' argument, as the prefatory paragraph does not prohibit agreements to do the things specified in the enumerated paragraphs but instead proscribes defendants from "doing and performing" those things pursuant to an agreement. *See* *FTC v. Cement Institute, 333 U.S. 683, 728, 92 L. Ed. 1010, 68 S. Ct. 793 (1948)*. In effect, Phelps Dodge and GK argue that, even if Kedzierski, Trotter, and Penhale agreed to adhere to book price, the companies submitted identical, book-price bids for independent reasons, not because their employees had so agreed.

The weight of the evidence, however, supports an inference that GK and Phelps Dodge violated the Order by fixing prices pursuant to the agreement between Penhale, Kedzierski, and Trotter. The evidence shows that there was an agreement to fix the prices quoted in several large bids, that the companies **[**32]** bid identically on those orders, that the fixed bids reflected significantly higher prices than had prevailed in the market for some time, and that the higher prices proved a temporary aberration.

HN1[] In the absence of direct evidence, a court may rely on circumstantial evidence of consciously parallel corporate conduct to support an inference of unlawful agreement. *United States v. Paramount Pictures, Inc., 334 U.S. 131, 142, 92 L. Ed. 1260, 68 S. Ct. 915 (1948)*; *Interstate Circuit, Inc. v. United States, 306 U.S. 208, 221, 83 L. Ed. 610, 59 S. Ct. 467 (1939)*. "The agreement need not be proven by direct evidence; conduct pointing to concerted action is sufficient." *Phelps Dodge Refining Corp. v. Federal Trade Comm'n, 139 F.2d 393, 396 (2d Cir. 1943)*. Standing alone, however, such evidence is insufficient "unless the circumstances under which it occurred make the inference of a rational, independent choice less attractive than that of concerted action." *Ambook Enterprises v. Time, Inc., 612 F.2d 604, 615 (2d Cir. 1979)* (Friendly, J.) (quoting *Bogosian v. Gulf Oil Corp., 561 F.2d 434, 446 (3d Cir. 1977)*, *cert. denied*, *434 U.S. 1086, 55 L. Ed. 2d 791, 98 S. Ct. 1280* ***[**33]*** *(1978))*, *cert. dism*. *448 U.S. 914, 65 L. Ed. 2d 1179, 101 S. Ct. 35 (1980)*; *accord* *First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 286-88, 20 L. Ed. 2d 569, 88 S. Ct. 1575 (1968)*; *Theatre Enterprises, Inc. v. Paramount Film Distribution Corp., 346 U.S. 537, 540-41, 98 L. Ed. 273, 74 S. Ct. 257 (1954)*; *Modern Home Institute, Inc. v. Hartford Accident & Indemnity Co., 513 F.2d 102, 110-11 (2d Cir. 1975)*; *Federal Prescription Service, Inc. v. American Pharmaceutical Association, 214 U.S. App. D.C. 76, 663 F.2d 253, 267* (D.C. Cir.), *cert. denied*, *455 U.S. 928, 71 L. Ed. 2d 472, 102 S. Ct. 1293 (1981)*. The principal considerations identified by the courts in making this inquiry are, first, whether the companies undertaking the parallel conduct had motivation to enter an agreement, *see* *Cities Service, 391 U.S. at 286-87*; *Ambook, 612 F.2d at 615-16*, and second, whether the parallel decisions would have been contrary to the companies' individual economic interests if effected separately, *see* *Modern Home Institute, 513 F.2d at 110-11*; II P. Areeda & D. Turner, ***Antitrust Law*** para. 317 at 82 (1978). *See also* *Bogosian, 561 F.2d at* ***[**34]*** *446*; *Venzie Corp. v. United States Mineral Products, Co., 521 F.2d 1309, 1314 (3d Cir. 1975)*; *Lukens, 454 F. Supp. at 1190*.

The first factor is easily found here: the record is replete with evidence that the paper cable industry regarded a rise in prices as essential for the survival of the line of business involved. Both Phelps Dodge and GK had strong motivation to enter an agreement to support artificially high prices. Defendants contend, however, that separate implementation of parallel decisions to raise prices was reasonable to **[*1355]** expect in the industry, since pricing had become so "animalistic" at the time that loss of business was actually a blessing, averting a decision to leave the market altogether because of losses that would have been sustained in filing the orders. This argument is unconvincing. While Anaconda in 1975 and GK in 1978 found long-term prospects so bleak that they left the industry, no evidence exists that any of the firms unilaterally turned down business either immediately before or immediately after the conspiracy. Instead, competitive pressures were so strong during the conspiracy that widespread cheating appeared almost at once. The **[**35]** evidence shows in addition that those at Phelps Dodge who determined to raise prices knew that they could only maintain those prices if the competition followed. The continuing quest for new orders accords with familiar economic wisdom: absent a decision to cease operations completely, a company needs business to minimize loss, and the incentives to collude will be at least as strong in a declining as in any other market. *Compare* Turner, *The Definition of Agreement Under the Sherman Act: Conscious Parallelism and Refusals to Deal*, 75 Harv. L. Rev. 655, 670 (1962), *with* Posner, *Oligopoly and the Antitrust Laws: A Suggested Approach*, 21 Stan. L. Rev. 1562, 1592 (1969). The testimony of GK and Phelps Dodge managers indicates they did not abjure new orders, but simply calculated that the risks involved in raising prices were reasonable in light of the potential benefits for increased profits should their competitors follow.

Economic theory suggests that, in a market of few sellers and a fungible product, market intelligence and ability to respond will be so high as to make it difficult for one to differentiate between collusion and interdependent decisionmaking. L. Sullivan, **[**36]** *Handbook of the Law of Antitrust* § 111, at 320-21 (1977). *See generally* H. Blake & R. Pitofsky, *Cases and Materials in* ***Antitrust Law*** 1023 (1967); L. Schwartz & J. Flynn, *Antitrust and Regulatory Alternatives* 503-507 (1977). Professor Turner has argued that interdependent, consciously parallel oligopoly pricing is in reality individual decisionmaking and should be treated as such. He suggests that in an oligopolistic market with relatively inelastic demand, a price cut will likely not result in greater market share for the price cutter. Instead, he insists, competitors might be expected to match the price, and the net effect will be to reinstitute the prior allocation at a lower price. The interdependence that necessarily results from the structure of oligopoly markets might constitute agreement, but Turner believes it should not be characterized as collusion, since "mere interdependence of basic price decisions is not conspiracy." 75 Harv. L. Rev. at 672. Thus, the structure of the paper cable industry in 1976 may weaken the significance of evidence of conscious parallelism as indicative of an unlawful agreement. *See id*. at 665-66; L. Sullivan, §§ 116-17; **[**37]** *Ambook, 612 F.2d at 615*; *Delaware Valley Marine Supply Co. v. American Tobacco Co., 297 F.2d 199, 203 (3d Cir. 1961)*, *cert. denied*, *369 U.S. 839, 7 L. Ed. 2d 843, 82 S. Ct. 867 (1962)*.

Others have reasonably suggested, however, that it is unlikely that "prices could long be maintained above cost in a market, even a highly oligopolistic one, without *some* explicit acts of communication and implementation." Posner, 21 Stan. L. Rev. at 1574. Turner himself concedes that "it may well be that in reality a stable and firm pattern of noncompetitive prices is rarely achieved without some kind of agreement." 75 Harv. L. Rev. at 662. Nevertheless, whatever the theoretic possibility of an effective though wholly tacit oligopoly price agreement, or the legal significance of such behavior, certain marketplace data provide sufficient evidence of actual collusion in this case. For example, all producers in the paper cable market had excess capacity during the period immediately prior to the conspiracy, Jackson at 58-59; Kedzierski at 104-05; Trotter at 157-58; Cowles at 36-37; Viggiano at 117-19; Penhale at 178, yet the price sheets issued in late May and early June and the bids based **[**38]** upon them reflected significantly **[*1356]** higher prices than the companies had been charging, Trotter at 363-65; Brooks at 47; Viggiano at 62; Priesing at 130; Government Response to Defendants' Opposition to Motion for Partial Summary Judgment, Exhibit I. A precipitous rise in prices in the face of such excess capacity and declining demand becomes highly suspicious, *see* Turner, 75 Harv. L. Rev. at 659, as does a refusal to cut prices under the same circumstances, *see* Posner, 21 Stan. L. Rev. at 1582-83. Equally suspicious are identical, supposedly secret bids from producers with excess capacity vying for a large order, *see id*. at 1582; Turner, 75 Harv. L. Rev. at 659, notwithstanding the readily available mechanism of the price book. All these telltale signs are present here.

Moreover, in this case the circumstantial evidence of marketplace conditions and behavior does not stand alone. Apart from its significance as a matter of the vicarious liability of the corporations for the unlawful activity of their employees, the evidence of contacts between Kedzierski, Trotter, and Penhale strengthens the inference that the corporations' actions resulted from collusion **[**39]** rather than interdependent decisionmaking. First, it is reasonable to conclude, and this court does conclude, that officials in Phelps Dodge and GK responsible for setting corporate pricing policy and determining actual prices on the Con Ed, and Commonwealth Edison bids either directly or indirectly received from the conspirators assurances in some form that their competitors would support price increases. Brooks' continuing awareness of his immediate subordinate's activities at GK makes the inference of such assurances particularly strong. Kedzierski testified that Brooks led him to understand that he was keeping higher management informed, specifically mentioning Garretson, and that Brooks made clear at the same time that he couldn't acknowledge securing the information in the first place. Kedzierski at 120, 197. The ritual and identical Garretson and Cummings Affidavits denying any such knowledge do not defeat the inference drawn from the circumstantial economic evidence and the direct evidence of agreement.

Even if the respective higher managements were not expressly aware of their employees' agreement, their reliance on the field information and market assessments generated **[**40]** by Trotter and Kedzierski as paper cable managers infected the pricing decisions with the taint of the conspiracy. Finally, Trotter and Kedzierski each had a major role in developing the figures incorporated into the price sheets adopted by their respective employers in May and June 1976. Reliance of upper management on these price lists constituted action pursuant to an agreement by the companies to violate the Order.

B. *Vicarious Liability*

Defendants are also liable in this case because they are responsible for the conduct of Kedzierski and Trotter. Little direct authority exists on the issue of the vicarious liability of a corporation for its employees' conduct in violation of a cease-and-desist order. The parties argue over whether to employ a theory of apparent authority, proof of actual authority, or some other test based on an agency rationale. Whether Kedzierski and Trotter had "actual" authority, however, or appeared to have authority, to bind their respective employers to the price-fixing conspiracy is not the proper inquiry here. One decision that relied on agency reasoning supports the view that "if defendants' salesmen and representatives were acting within the **[**41]** *apparent* scope of their authority when the alleged representations took place, then liability is imposed upon the defendant." *United States v. Tri-State Home Improvement Co., 446 F. Supp 14, 16 (E.D. Wisc. 1977)* (emphasis in original). Even that decision specifically and properly rejected in the context of a cease-and-desist order the corollary that the third person relying on the agent's apparent authority must reasonably believe that the agent is authorized. *See* *Restatement (Second) Agency § 8, comment c*. The court explained:

> **[*1357]** The defendants' view that it is necessary to establish that the customers actually believed that Podell was authorized to bind Tri-State is not a correct statement of the law in actions to enforce cease and desist orders of the FTC. This is not a case where the third party is suing the principal under a theory of apparent authority. The central inquiry here is whether or not the defendants violated a cease and desist order of the FTC. That order forbids the defendants from making various representations. It is sufficient for a motion for partial summary judgment to show that Tri-State clothed its sales representatives with **[**42]** manifestations of its authority, and this has been done by the depositions referred to above. Whether or not customers believed Podell to be so authorized is irrelevant to the inquiry of whether or not the FTC order was violated.

446 F. Supp. at 16.

The apparent-authority theory is inapposite, however, to the problem of evaluating a company's vicarious liability for conduct by its employees that violates cease-and-desist orders. Whatever terminology the cases employ, the true import of their holdings is that, ***HN2***[] when a corporation grants authority to its agents or employees to make sales on its behalf, it cannot then eschew responsibility for the means adopted by the agents and employees to make those sales, even when it has made real efforts to control their conduct. *See* *Standard Distributors v. FTC, 211 F.2d 7, 13 (2d Cir. 1954)*; *Parke, Austin & Lipscomb, Inc. v. FTC, 142 F.2d 437, 440 (2d Cir. 1944)*; *Globe Readers Service, Inc. v. FTC, 285 F.2d 692, 695 (7th Cir. 1961)*; *Steelco Stainless Steel, Inc. v. FTC, 187 F.2d 693, 697 (7th Cir. 1951)*; *International Art Co. v. FTC, 109 F.2d 393, 396 (7th Cir. 1940)*; *Perma-Maid Co. v. FTC, 121 F.2d 282, 284 (6th **[**43]** Cir. 1941)*; *see also* W. Seavey, *Studies in Agency* 187 (1st ed. 1949) (where agent has authority to sell goods, he may have "authority" to make certain representations even though forbidden to do so, but doubtful whether this is "apparent authority"). The proper inquiry is not into a third party's reasonable perception of the agent's or employee's authority, but into the corporation's delegation of responsibility to employees to carry out activities within the purview of a cease-and-desist order. ***HN3***[] In interpreting a regulatory statute, common-law definitions are irrelevant; instead authority must be construed to extend accountability as far as necessary to eradicate the unfair practices which underlie the order. *See* *Goodman v. FTC, 244 F.2d 584, 591 (9th Cir. 1957)*.

Nor is it necessary to rely upon the Supreme Court's endorsement of apparent-authority theory in the context of civil antitrust liability in *American Society of Mechanical Engineers v. Hydrolevel Corp., 456 U.S. 556, 72 L. Ed. 2d 330, 102 S. Ct. 1935 (1982)*. The harm addressed here did not flow from any misapprehension of authority, and those defrauded were not persons dealing with participants in the conspiracy, **[**44]** but the customers of the conspirators' employers. The customers might reasonably have relied on the integrity of the bids, but their reliance has no relevance to the capacity of Kedzierski and Trotter to involve their employers in the conspiracy. *Compare* *Wilk v. American Medical Association, 719 F.2d 207, 231 (7th Cir. 1983)* (private damages suit; refusal to deal); *Pan Islamic Trade Corp. v. Exxon Corp., 632 F.2d 539, 561 (5th Cir. 1980)* (same); *United States v. Empire Gas Corp., 537 F.2d 296, 301-02 (8th Cir. 1976)*, *cert. denied*, *429 U.S. 1122, 51 L. Ed. 2d 572, 97 S. Ct. 1158 (1977)* (civil antitrust action; attempt to monopolize through threats of retaliatory price cuts).

The two courts that have alluded to apparent authority in the context of a price-fixing conspiracy reached conclusions similar to the one here espoused. In *Continental Baking Co. v. United States, 281 F.2d 137, 149-51 (6th Cir. 1960)*, an appeal from the conviction under section one of the Sherman Act of three baking companies for a conspiracy to fix prices, the court questioned the utility of apparent authority terminology, and rested instead on the settled principle that "so long as the criminal **[**45]** **[*1358]** act is directly related to the performance of the duties which the officer or agent has the broad authority to perform, the corporate principal is liable for the criminal act also, and must be deemed to have 'authorized' the criminal act." And in *United States v. American Radiator & Standard Sanitary Corp., 433 F.2d 174, 204-05 (3rd Cir. 1970)*, *cert. denied*, *401 U.S. 948, 28 L. Ed. 2d 231, 91 S. Ct. 928 (1971)*, which affirmed the conviction of a corporation under section one of the Sherman Act on the basis of a sales manager's participation in a price-fixing conspiracy, the court approved a jury instruction that had "charged in substance that the corporation would be responsible if the agent acted 'on behalf of the corporation and within the scope of his employment or his apparent authority. '" The instruction defined acts within the scope of employment as "acts done on behalf of a corporation and directly related to the performance of the type of duties the employee has general authority to perform."

HN4[] The standard for imputing liability to a corporation for the acts of its employees should be no more stringent in civil penalty proceedings than in criminal prosecutions, **[**46]** where courts generally require only that the illegal act be committed within the scope of the wrongdoer's employment and refuse to allow technical claims of lack of authority or even evidence that the employee acted against express instructions to defeat the corporation's responsibility. *See Developments in the Law -- Corporate Crime: Regulating Corporate Behavior Through Criminal Sanctions*, 92 Harv. L. Rev. 1227, 1247-51 & n.32 (1979). In *United States v. Koppers Co., 652 F.2d 290, 298 (2d Cir. 1981)*, an appeal by a corporation from a felony conviction under section one of the Sherman Act, the court specifically approved an instruction by which

> the [district] court charged that a corporation could be held criminally liable for the acts of its managerial agents
>
> > "done on behalf of and to the benefit of the corporation and directly related to the performance of the duties the employee has authority to perform . . . By a managerial agent I mean an officer of the corporation or an agent of the corporation having duties of such responsibility that his conduct may fairly be assumed to represent the corporation."

See also *United States v. Hilton Hotels* ***[**47]*** *Corp., 467 F.2d 1000, 1007 (9th Cir. 1972)*, *cert. denied*, *409 U.S. 1125, 93 S. Ct. 938, 35 L. Ed. 2d 256 (1973)* ("as a general rule a corporation is liable under the Sherman Act for the acts of its agents in the scope of their employment, even though contrary to general corporate policy and express instructions to the agent.") *Continental Baking Co., 281 F.2d at 149*.

No reason exists to impose a standard less strict in civil penalty proceedings than in criminal prosecutions, because civil penalties differ from the criminal sanctions provided for in antitrust statutes. The civil penalty is not designed to punish or to assign moral culpability, but to deter. *Compare* *United States v. United States Gypsum Co., 438 U.S. 422, 437-43, 57 L. Ed. 2d 854, 98 S. Ct. 2864 (1978)*, *with* *J. B. Williams, 498 F.2d at 421*. For this reason, "the standard of responsibility for compliance and of liability for transgression is drawn to securing abatement of the practices and not to testing (except in fixing the amount of penalty) for the presence of corrupt complicity." *United States v. Halperin*, 1966 Trade Cases P 71,905 at 83,176 (E.D.N.Y. 1966). ***HN5***[] The scope of liability, like the **[**48]** breadth of the penalty provisions, must "provide a meaningful deterrence against violations." *United States v. ITT Continental Baking Co., 420 U.S. 223, 232, 43 L. Ed. 2d 148, 95 S. Ct. 926 (1975)* (considering "continuing failure or neglect to obey" provision of section 5(l)).

The goal of deterrence is best effectuated by a rule which holds the corporation strictly accountable for the conduct of its employees acting within the scope of their responsibilities. To achieve the most effective deterrence, the entity against which an order is directed must bear a high **[*1359]** degree of responsibility for ensuring its employees' adherence to the order's requirements. Any less stringent standard would undermine the effectiveness of FTC orders. ***HN6***[] In civil penalty proceedings, as in criminal prosecutions, a corporation "which employs an agent in a responsible position cannot say that the man was only 'authorized' to act legally." *Continental Baking, 281 F.2d at 150*; *see also* *Hydrolevel, 456 U.S. at 572-73*. Even though its influence may be indirect, the corporation is still in the best position to regulate the conduct of its middle and lower management employees. The pressure **[**49]** to maximize income is keenly felt below senior levels and may lead to "unauthorized" antitrust violations. *See* Coffee, "*No Soul to Damn: No Body to Kick": An Unscandalized Inquiry Into the Problem of Corporate Punishment*, 79 Mich. L. Rev. 386, 397-400 (1981); *see also* Coffee, *Beyond the Shut-Eyed Sentry: Toward a Theoretical View of Corporate Misconduct and an Effective Legal Response*, 63 Va. L. Rev. 1099, 1132-47 (1977). But "***HN7***[] to deny the possibility of corporate responsibility for the acts of minor employees is to immunize the offender who really benefits, and open wide the door for evasion." *United States v. George F. Fish, Inc., 154 F.2d 798, 801 (2d Cir. 1946)*, *cert. denied*, *328 U.S. 869, 90 L. Ed. 1639, 66 S. Ct. 1377 (1946)*; *see* *Hilton Hotels, 467 F.2d at 1006*. Particularly where the end sought is deterrence, "distinctions . . . between officers and agents, or between persons holding positions involving varying degrees of responsibility," are inappropriate. *George F. Fish, Inc., 154 F.2d at 801*.

Both Kedzierski and Trotter held the title of paper cable product manager, and each had "'duties of such responsibility that his conduct may fairly be **[**50]** assumed to represent the corporation. '" *Koppers, 652 F.2d at 298* (quoting district court charge); *see* Model Penal Code §§ 1.04(5), 2.07(1)(a) (where offense is "violation" involving only civil penalties or contemplates conduct, like price fixing, generally involving corporate action, corporation may be held liable if "the conduct is performed by an agent of the corporation acting in behalf of the corporation within the scope of his office or employment"); *id*. § 2.07, Comment at 150 (Tentative Draft No. 4, 1955); *Developments*, 92 Harv. L. Rev. at 1251-52; *cf.* *United States v. Johnson, 541 F.2d 710, 711-12 (8th Cir. 1976)* (appropriate to hold president and sole stockholder of corporation individually liable for civil penalties by virtue of corporation's salespeople's violations of cease-and-desist order). One might fairly state, therefore, that, since the corporation subject to a cease-and-desist order has a duty to secure compliance with its provisions, penalties for noncompliance are imposed not as a matter of vicarious liability, nor of apparent authority, nor of respondeat superior, but instead simply for failure to achieve compliance by persons in positions **[**51]** of relevant responsibility. ***HN8***[] The employer must "stand or fall with those whom he selects to act for him. He is in the same plight, if they are delinquent, as if he had failed to abate a nuisance on his land. . . . It is the case of the non-performance of a nondelegable duty." *People v. Sheffield Farms-Slawson-Decker Co., 225 N.Y. 25, 30, 121 N.E. 474, 476 (1918)* (Cardozo, C.J.) (citations omitted), *quoted in* *Continental Baking, 281 F.2d at 150*; *United States v. Armour & Co., 168 F.2d 342, 343-44 (3d Cir. 1948)*.

Finally, defendants' contention that Kedzierski and Trotter entered the conspiracy in order to curry favor with Penhale in hopes that he might be able to offer them employment in the future, rather than to benefit their companies, is of no consequence here. To convict a corporation of a crime on the basis of its agent's conduct, the agent must have acted with an intention to benefit the corporation. *E.g.,* *Hilton Hotels, 467 F.2d at 1006 n. 4*; *Standard Oil Co. v. United States, 307 F.2d 120, 128-29 (5th Cir. 1962)*; *see Developments*, 92 Harv. L. Rev. at 1250. But this general rule arises directly from the requirement of criminal intent: "unfaithful servants **[**52]** whose conduct was undertaken to advance the interests of parties other than their corporate employer" cannot have the **[*1360]** requisite intent to impute to the corporation. *Standard Oil, 307 F.2d at 129*. Liability for civil penalties, on the other hand, accrues without regard to the actor's intent; the government need only prove that the Order has in fact been violated. *E.g.,* *United States v. H.M. Prince Textiles, Inc., 262 F. Supp. 383, 388 (S.D.N.Y. 1966)*; *United States v. Vitasafe Corp., 212 F. Supp. 397, 398 (S.D.N.Y. 1962)*. The *Hydrolevel* Court explicitly rejected the agent's lack of intent to benefit the corporation as a defense in actions to recover treble damages, regarding it as "simply irrelevant" to the deterrent purposes of the antitrust laws. *456 U.S. at 573-74*.

Even were the defense available, it would not exculpate Phelps Dodge or GK here. The record is devoid of support for the contention that Kedzierski acted from job insecurity. No evidence exists that his superiors were dissatisfied with his performance or that he was dissatisfied with his job. The only evidence that he perceived a need to explore other opportunities was his testimony that, **[**53]** when the sale of GK's paper cable division to another company became imminent, he initiated a conversation with a former GK employee then employed at Okonite about employment prospects there. Kedzierski at 117-18. But this conversation did not occur until 1978. At the time of the events under consideration here, Kedzierski had worked for GK for over twenty-two years and had a history of steady if unspectacular promotion. That pattern continued when Kedzierski was promoted to marketing manager in early 1977, a position he retained upon the sale of the division to Pirelli. Kedzierski at 8, 16-17.

Trotter may well have believed his job insecure. Trotter at 128; Flood at 70; Kedzierski at 262; Penhale at 181, 225. He testified that sometime before 1976 he had lunch with Penhale and Larry Miscall, a former Phelps Dodge employee then with Okonite, after Miscall called him and intimated that Okonite might be looking for new employees. Trotter at 265-66, 273-74. He testified also that, when he learned in October 1975 that his job was in jeopardy, he contacted Penhale again, presumably to test the waters. Trotter at 279; *see* Penhale at 181, 225; Flood at 70; Yearly at 68-69. But the evidence **[**54]** does not support Phelps Dodge's contention that Trotter was willingly manipulated by Penhale, leaking information to him in the hope that he would take care of him should he lose his job at Phelps Dodge. Cowles testified that when he got an inkling that Trotter might improperly be receiving information about competitors, he assured him that regardless what happened to the paper cable business he would have a job. Cowles at 68. By these assurances Cowles implicitly recognized what other evidence makes clear -- that Trotter saw his employment security inextricably entwined with the future of the paper cable industry. *See* Kedzierski at 262; Priesing at 121. Trotter was acting for his own purposes to the extent that he would benefit from a revival of the fortunes of the Phelps Dodge paper cable business. But behavior induced by this type of pressure, though prohibited by company policy as well as by law, is intended to benefit both the corporation and the individual involved. *See* Cowles at 95; *American Radiator, 433 F.2d at 204*. *Compare* *Hilton Hotels, 467 F.2d at 1006 n. 4* ("purpose to benefit the corporation is necessary to bring the agent's acts within the scope of his **[**55]** employment") *with* *id. at 1003 n. 1* (no defense that boycott resulted from employee's personal quarrel with representative of boycotted company).

III. *Civil Penalty*.

A. *Continuing Violation*.

HN9[] Section 5(l) of the Federal Trade Commission Act provides for civil penalties of up to $10,000 for each violation against individuals or entities who violate final orders of the Commission. In the case of a violation through "continuing failure to obey or neglect to obey a final order of the Commission," each day that the conduct continues is a discrete offense subject to the maximum penalty. A "continuing conspiracy to fix prices" is the type of behavior **[*1361]** Congress intended to cover as a "continuing failure or neglect to obey." *United States v. ITT Continental Baking Co., 420 U.S. 223, 231, 43 L. Ed. 2d 148, 95 S. Ct. 926 (1975)*. In *ITT Continental*, the Supreme Court observed:

> These violations share two discernible characteristics: the detrimental effect to the public and the advantage to the violator continue and increase over a period of time, and the violator could eliminate the effects of the violation if it were motivated to do so, after it had begun.

[56]** *Id*. Effective deterrence requires daily penalties for this type of violation, for without them potential violators might regard the statutory penalty "as nothing more than an acceptable cost of violation." *Id*.

GK contends that "while the Supreme Court . . . acknowledged, in dictum, the possibility that an *ongoing* conspiracy may constitute a continuing failure or neglect to obey a final FTC order, the Court's dictum hardly suggests that every agreement or 'conspiracy,' even if proved, amounts to a continuing violation." Memorandum of GK on Issue of Civil Penalty at 26. GK concludes that here the proof of the requisite "discrete continuing violations" necessary to establish an ongoing conspiracy is lacking. *Id. at 28*. To the contrary, a conspiracy to maintain prices at an artificially inflated level is by its very nature an ongoing enterprise. As the court in *FTC v. Consolidated Foods Corp., 396 F. Supp. 1353, 1356 (S.D.N.Y. 1975)*, upon which GK relies, pointed out, "continuing conspiracies to fix prices . . . necessarily continue on a day-to-day basis until a specific act is taken in abatement." The very phrasing chosen by GK to make the argument -- "discrete **[**57]** continuing violation" -- confuses acts attributable to the conspiracy with the conspiracy itself. The discrete acts taken by the participants are simply evidence of the underlying conspiracy; they do not reflect the full extent of the wrong effected by the conspiracy itself. The approach suggested by GK would impose only the "license fee" which Congress moved to foreclose. *See* *ITT Continental, 420 U.S. at 231*; H. Rep. No. 580, 86 Cong., 1st Sess., *reprinted in* 1959 U.S. Code Cong. & Ad. News 1804, 1807 (discussing amended section 5(l) as model for similar amendment to section 11 of Clayton Act); *see also* *United States v. Beatrice Foods Co., 351 F. Supp. 969, 971 (D. Minn. 1972)*, *aff'd*, *493 F.2d 1259 (8th Cir. 1974)*, *cert. denied*, *420 U.S. 961, 43 L. Ed. 2d 438, 95 S. Ct. 1350 (1975)*.

GK also contends that a violation is continuing for purposes of assessing daily penalties only if its effects are continuing. The argument miscomprehends the Court's statement in *ITT Continental* that Congress intended the continuing violation provision "to assure that the penalty provisions would provide a meaningful deterrence against violations whose *effect* is continuing **[**58]** and whose detrimental *effect* could be terminated or minimized by the violator at some time after initiating the violation." *420 U.S. at 232* (emphasis in original). As is obvious from the context, however, this language did not qualify the definition of continuing violation, but rather expressed the deterrent rationale underlying the daily penalty provision. Proof of specific, continuing effects of a violation is unnecessary, if a conspiracy has been proved to have commenced and has not been shown to have ended.

Phelps Dodge employs a similar strategy by reading *ITT Continental* to treat as continuing violations only conduct of which the defendant was aware and which it could have stopped had it wished. The observation that one characteristic of a continuing violation was the ability of the violator to "eliminate the effects of the violation if it were motivated to do so," *420 U.S. at 231*, does not qualify the definition of "continuing violation," but simply explicates its deterrent purpose. Phelps Dodge's argument that only "deliberate and calculated flouting" of the Order would implicate the continuing violation provision is a transparent attempt to reargue the issues of corporate **[**59]** responsibility and bad faith under a different rubric.

[*1362] The number of offenses remain to be counted. The imprecision of the deponents' testimony makes it difficult to pin down the duration of the conspiracy here but it lasted at least from the time of the issuance of the new price sheets at the end of May until the final tripartite meeting in August. Two meetings occurred during April or May, and the conspirators had extensive phone contact during those months. Brooks' testimony makes clear that the agreement was in place by the time Kedzierski met with Penhale, which occurred no later than May 24, 1976. *See* Brooks at 90, 96, 101-02, 111.

Neither Phelps Dodge nor GK has satisfied its burden of advancing evidence to show when the conspiracy ended. *See United States v. James, 609 F.2d 36, 41 (2d Cir. 1979)*, *cert. denied*, *445 U.S. 905, 63 L. Ed. 2d 321, 100 S. Ct. 1082 (1980)*; *United States v. Molina, 581 F.2d 56, 59 (2d Cir. 1978)*; *United States v. Stromberg, 268 F.2d 256, 263 (2d Cir. 1959)*. Trotter testified that at their meeting in August each of the three men indicated that his company would be bidding on book to Long Island Lighting. Trotter at **[**60]** 120-21, 188. Kedzierski recalled only that they discussed whether they would be bidding on that order, and Penhale was not certain whether the Long Island Lighting discussion had occurred at this meeting or by phone. Kedzierski at 95; Penhale at 150-51. Other discussion at the August meeting had made clear to all that their agreement was evaporating, so they would not likely have assumed that their competitors' bids would be on book absent explicit confirmation. Trotter testified that the men also discussed the Con Ed rebid at this meeting, each indicating that his company would remain on book. Trotter at 119-20. Neither Penhale nor Kedzierski mentioned discussing the rebid at this meeting, however, and Penhale assumed that the companies had gone off book on the rebid. Penhale at 147; *see* Cowles at 150. The record demonstrates, moreover, that the agreement collapsed after the August meeting. Kedzierski testified he had no significant conversations with Penhale after that meeting, and but one or two with Trotter, who Phelps Dodge had by that time transferred to another division upon learning that he had had improper contacts with competitors. Kedzierski at 96-97. Penhale and Kedzierski **[**61]** testified that they knew by the time they left the August meeting that the agreement was dead, an assessment Kedzierski shared with Brooks. Penhale at 102; Kedzierski at 97. This meeting constituted the last attempt of the conspirators to maintain their arrangement so it is appropriate to use it as the termination date; and since the weight of the testimony places this meeting in August, Trotter at 116, 118-19, 376; Kedzierski at 89; Penhale at 95-96, a termination date of August 1, 1976, seems a fair and realistic estimate. By this time, too, the resumption of competitive activity in the marketplace demonstrated that the conspiracy had disintegrated. *See United States v. Continental Group, Inc., 603 F.2d 444, 467 (3d Cir. 1979)*, *cert. denied*, *444 U.S. 1032, 62 L. Ed. 2d 668, 100 S. Ct. 703 (1980)*. The agreement is thus held to have lasted sixty-nine days.

B. *Amount of Civil Penalty*.

HN10[] Determining the appropriate civil penalty is a matter within the sound discretion of the trial court. *ITT Continental, 420 U.S. at 229 n.6*; *Brown & Williamson Tobacco Corp. v. Engman, 527 F.2d 1115, 1121 & n.8 (2d Cir. 1975)*, *cert. denied*, *426 U.S. 911, 48 L. Ed. 2d 837, 96 S.* ***[**62]*** *Ct. 2237 (1976)*; *United States v. J.B.*

Williams Co., 498 F.2d 414, 438 (2d Cir. 1974), *aff'g in part and rev'g in part*, *354 F. Supp. 521 (S.D.N.Y. 1973)*. The courts have identified several factors to guide this discretion: the good or bad faith of the defendants; the injury to the public; the defendants' ability to pay; the extent to which defendants have benefitted from the violations, *United States v. Swingline, Inc., 371 F. Supp. 37, 46 (E.D.N.Y. 1974)*; and the need to vindicate the authority of the Commission, *Consolidated Foods, 396 F. Supp. at 1357*. *See J. B. Williams, 498 F.2d at 438*; *United States v. Reader's Digest Association, Inc., 494 F. Supp. 770 **[*1363]** (D. Del. 1980)*, *aff'd*, *662 F.2d 955 (3d Cir. 1981)*, *cert. denied*, *455 U.S. 908, 102 S. Ct. 1253, 71 L. Ed. 2d 446 (1982)*; *United States v. Louisiana-Pacific Corp., 554 F. Supp. 504, 507 (D. Or. 1982)*.

1. *Good faith*. ***HN11***[] The good or bad faith of the violator is an important factor in assessing the appropriate penalty. *J. B. Williams*, 354 F. Supp. at 551. The conduct of Trotter and Kedzierski in entering the agreement to fix the price of paper cable by adhering to book price **[**63]** was willful and deliberate. This constitutes bad faith. *J. B. Williams*, 354 F. Supp. at 551; *United States v. Ancorp National Services, Inc., 367 F. Supp. 1221, 1224 (S.D.N.Y. 1973)*, *aff'd*, *516 F.2d 198 (2d Cir. 1975)*. In evaluating good faith for penalty purposes, however, the response of the entire corporate hierarchy to the obligations imposed by the Order must also be assessed. ***HN12***[] The degree to which the corporation took steps on its own initiative to assure compliance affects the judgment as to what penalty is necessary to induce a sufficiently vigilant posture. *See J. B. Williams*, 354 F. Supp. at 551.

The managers of GK and Phelps Dodge failed to take sufficient steps to assure that their employees would abide by the Order. Harry Schell, President of the Phelps Dodge Cable & Wire Company during the relevant period, testified he was unaware of the existence of the Order until the FTC investigation began. Schell at 21. To Bruce Cowles, Vice-President of Cable & Wire, the Order "was kind of a surprise," Cowles at 70, as it was to Michael Cavanaugh, the company's National Marketing Manager, Cavanaugh at 16-18, 41, 74-75. Schell testified that upon learning of the Order **[**64]** he distributed it to Cowles, Cavanaugh, and Trotter, but both Cowles and Cavanaugh testified at their depositions that they had as yet not so much as seen it. Cowles at 70, 72; Cavanaugh at 74-75. Indeed, Cowles confessed at that time that he still did not know what the Order provided. Cowles at 72-73. Phelps Dodge proved it had an antitrust compliance program which dealt with the types of behavior prohibited by the 1936 Order. Such a program does not excuse the failure of the company to apprise its employees of the need to conform their conduct to specific prohibitions of the Order, let alone the ignorance of its president and vice-president of its very existence. Moreover, though Schell testified he regularly advised his subordinates of the company's strict policy against improper contacts by issuing written directives, speaking to his sales and marketing people, and having the company's attorneys give talks, Schell at 30-31; *see* Cowles at 67; Priesing at 79-80; Memorandum of Phelps Dodge in Opposition to Motion for Partial Summary Judgment, Appendix A, these efforts could not have been very diligent. Cavanaugh testified he could not recall ever having received instruction as **[**65]** to antitrust compliance. Trotter remembered only a speech by counsel in 1970 or 1971, and a booklet issued in the early 1970's and recirculated in 1980, though he did believe at the time of the meetings with Penhale and Kedzierski that he was probably violating company policy. Trotter at 239-45, 223-24.

In addition, the company responded with insufficient vigor to tangible indications of Trotter's illegal conduct. In April 1976, when Phelps Dodge was considering a price increase for paper cable, Trotter showed Cowles a piece of paper he said had come in the mail indicating that competitors were contemplating a price increase. Trotter at 328-29; Cowles at 15-18. Cowles testified that he informed Schell and instructed Trotter to throw the paper away and to avoid using information from the paper. Cowles at 22-25. But he did not bother determining from which company the information came and why it was sent to Trotter. He could not say whether Trotter had actually discarded the paper. Cowles at 22-25. In August 1976, Trotter revealed to Cowles and Schell information about a competitor's bid to Con Ed. Cowles found it "unusual" for Trotter to have obtained such information, and Schell **[**66]** assumed it came from a competitor. Cowles at 18-19; Schell at 162-65, 181. **[*1364]** Trotter testified that he specifically told Cowles that he knew from Okonite that it had bid low on one item on the Con Ed bid. Trotter at 117-18, 224-25. Though they considered the matter of Trotter's illicit contacts "highly sensitive," after some discussion, Priesing, Schell and Cowles, responded only by withholding information on current bidding from Trotter, abruptly terminating his paper cable responsibilities, and transferring him to a position of similar responsibility in the Phelps Dodge Communications Division. Cowles at 22-24, 162-64; Priesing at 45, 48-50; Schell at 162-69; Trotter at 8, 124-25. Trotter was neither disciplined nor told specifically why he had been transferred, and virtually no investigation ensued, even though the limited inquiries undertaken made it appear increasingly probable that the source of the information was improper communication. Trotter at 125-26; Cowles at 164-65; Schell at 168, 171-72.

GK displayed no greater solicitude for the mandates of the Order. Kedzierski testified that during his tenure as product manager for paper cable he received no instruction **[**67]** to refrain from contacts with competitors, and Brooks and Kedzierski were completely ignorant of the Order's existence. Although no direct evidence exists that anyone above Brooks in the corporate hierarchy actually learned of Kedzierski's activities during the conspiracy, GK's management nevertheless failed to fulfill its affirmative obligation to ensure compliance. Furthermore, Brooks' level of responsibility as Marketing Manager of the Power and Control Division of General Cable was significant, and he virtually acquiesced in Kedzierski's activities. Brooks conceded that, though aware of Kedzierski's contacts with competitors, he conveyed to him at most a "sort of mild discouragement, but . . . didn't direct him not to nor . . . strongly discourage him not to have those dialogues or that communication." Brooks at 96. He explained that he "did nothing actively to stop" these contacts because he believed they might benefit both his company and the industry. Brooks at 131; *see id. at 89-98, 129-31*. Brooks attributed his passivity, moreover, to "the environment," observing that he "didn't think [an agreement to stick to the new prices] was something that was so unusual or so **[**68]** blatantly improper or illegal," Brooks at 133, thus demonstrating the need for a compliance program geared as much to the specific proscriptions of the Order as to the overriding mandates of the antitrust statutes. GK's attitude toward the Order seems accurately reflected by its argument that "plainly, an order which is forty-six years old and which relates to an all but extinct industry is hardly something a corporation can reasonably be expected to give prominent attention to." Reply Memorandum of GK on the Issue of Civil Penalty at 11.

Corporate management can and must do far more than did the managements of GK and of Phelps Dodge to establish a good-faith attempt to prevent violations of a cease-and-desist order. For example, in *United States v. Ancorp National Services, Inc., 367 F. Supp. at 1224-25*, the court found that defendant, which operated hundreds of newsstands, had violated the terms of an FTC cease-and-desist order which prohibited it from receiving from suppliers price adjustments not generally available to its competitors. The court imposed a substantial penalty on the corporate defendant in large part because it found that, with the exception of a single memorandum **[**69]** circulated by the president to corporate officers instructing them to review the order and to report any potential violations, "there was no evidence . . . of any . . . action taken by any officer of [the corporation] to assure compliance with the FTC order," *id. at 1224*; the record instead indicated that the defendant had "ignored" the order, *id. at 1225*. Similarly, GK and Phelps Dodge maintained compliance programs so lax that their employees involved in paper cable, including senior executives, were ignorant even of the existence of the Order. Phelps Dodge management did not attempt to satisfy itself that no improper communications were occurring, even when suspicious circumstances came to light, and **[*1365]** the mid-level manager responsible for paper cable at GK, fully aware of such contacts, thought them so little outside the norm that they merited neither his close scrutiny nor any efforts to assure that they ceased. On this record, neither GK nor Phelps Dodge can claim it took the "energetic steps" to effect compliance necessary to a showing of good faith. *Swingline, 371 F. Supp. at 44, 47* (quoting *Babee-Tenda v. Scharco Manufacturing Co., 156 F. Supp. **[**70]** 582, 587 (S.D.N.Y. 1957)* (civil contempt proceeding)); *see J. B. Williams*, 354 F. Supp. at 551 ("reckless disregard of the injunctions in the order" warrants penalty "at or near the maximum prescribed"); *In re Dolcin Corp., 101 U.S. App. D.C. 118, 247 F.2d 524, 534-35 (D.C. Cir. 1956)* (decree "imposed an affirmative obligation . . . to take all reasonable steps to effect compliance with [the] court's order," which officers "could [not] discharge by remaining inert"), *cert. denied*, *353 U.S. 988, 1 L. Ed. 2d 1143, 77 S. Ct. 1285 (1957)*; *United States v. Johnson, 541 F.2d 710, 712 (8th Cir. 1976)* *cert. denied*, *429 U.S. 1093, 51 L. Ed. 2d 539, 97 S. Ct. 1106 (1977)* (chief executive officer of company found liable for civil penalty for violation of cease-and-desist order by his salesman; good faith effort to fulfill "affirmative duty" imposed by this order not established where record showed that he failed to do "everything in his power . . . to assure compliance with the F.T.C. order").

2. *Public harm*. Substantial public harm inheres in an agreement to fix prices. Perhaps no other conduct so directly contravenes the public interest in a free, competitive economy. **[**71]** The Supreme Court long ago placed price-fixing beyond the reach of the rule of reason by declaring ***HN13***[] such conduct a per se violation of the antitrust laws, *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)*, and Congress has made it a felony, *15 U.S. C. § 1*. Similarly, the Order had the purpose of protecting the public from practices

deemed anticompetitive by the Commission. Violation of the restrictions embodied in the agreement therefore presumptively harmed the public regardless of the quantum of financial loss. Moreover, ample evidence of actual harm exists in this case. The defendants artificially inflated the price of paper cable and contaminated a series of major competitive bids during the summer of 1976. The increased costs of paper cable presumably led to lower earnings for the utilities that purchased the paper cable and increased utility charges to consumers. These indirect effects constitute public harm. *See* Swingline, 371 F. Supp. at 47 **HN14**[] ("suppression of competition" significantly affects public interest).

3. *Benefits derived by defendants*. To accomplish the statutory purpose of deterring violations, a penalty must ensure **[**72]** that disobedience does not pay. As a general rule, an offender should be deprived of any benefit derived from violating an FTC order, and common sense suggests that courts consider multiplying the amount of benefit by a factor representing the likelihood of detection. *See* Diver, *The Assessment and Mitigation of Civil Money Penalties by Federal Administrative Agencies*, 79 Colum. L. Rev. 1435, 1466-67 (1979).

The record contains insufficient evidence from which to determine accurately the benefit derived by GK and Phelps Dodge from the illegal agreement. The government contends that this dearth of information results from the claim of GK and Phelps Dodge that they have no knowledge of particular sales during the relevant period. The companies have submitted little detailed analysis of how the price increases attributable to the conspiracy affected their sales figures or profit margins, choosing instead to repeat their contention that the agreement had no impact on corporate pricing decisions. A memorandum written by Roger Brooks of GK the day after Phelps Dodge issued its new price sheets on paper cable in late May 1976, evaluated their likely effect. *See* Government Response **[**73]** on Liability, Exhibit I. Brooks concluded that "generally, if these levels are adhered to in the marketplace, they will represent an increase of 12-30 percent versus **[*1366]** the past four (4) months [sic] quotation levels." Based on sales reports generated by GK, the government argues that GK had paper cable sales of $3,494,000 between June 1, 1976, and September 30, 1976, the government's proposed violation period. Applying Brooks' percentage estimate to the GK sales figures, the agreement would be found to have produced additional revenue to GK of between $419,280 and $1,048,200. The government suggests, moreover, that this range actually understates the revenues GK derived. Absent the conspiracy, the government argues, the downward trend in prices in early 1976 would have continued, driving down revenues from the level from which Brooks drew his figures. The government also urges that the time value of money should be taken into account.

GK derides the "amateur economics" of the government's approach, but provides little assistance in outlining an alternative. It points out that the government analysis employs total sales figures for the June-September period; but GK makes **[**74]** no attempt to differentiate between revenue from affected bids and revenue from other sources, although it has the resources and access to information necessary to provide such an analysis. GK also points out that its paper cable division actually lost $5 million in 1976, due in large part to dramatically increased costs, and that losses increased in 1977 and early 1978, when it decided to sell the division. This demonstrates nothing, however, as a reduced loss is at least as great a benefit as an increased profit.

The government proposes that its analysis as to GK should apply to Phelps Dodge as well. Little if any price competition existed between defendants during the conspiracy period, similar market conditions prevailed, and the three major producers had approximately equal market share of paper cable at the time. Phelps Dodge confirms the ball-park accuracy of the government's proposed analysis. It estimates that as a result of the May 1976 price increase it gained "at most roughly $800,000, and probably substantially less." Phelps Dodge Memorandum on Issue of Civil Penalty at 25-26.

GK and Phelps Dodge emphasize that they have each contributed over $2 million to the settlement **[**75]** of the private class action brought by paper cable purchasers, an amount greater than the highest reasonable estimate of increased profits resulting from the price increase. Thus, they contend, they already have disgorged any illegal gains obtained and cannot be said to have retained a benefit from their improper behavior. The cases relied upon by GK and Phelps Dodge, Swingline, 371 F. Supp. at 47, and United States v. Papercraft Corp., 426 F. Supp. 916, 919 (W.D.Pa. 1977), both deal with costs incurred in complying with FTC orders. Neither supports the proposition that a corporation which incurs liability for civil penalties should receive credit for funds paid in settlement of private suits arising under different statutes but grounded in the same or related transactions. Moreover, the private paper cable plaintiffs founded their action on a series of transactions beginning well before the period to which the government has limited its claim. Nevertheless, while a setoff would be inconsistent with the Supreme Court's recognition that the Sherman and FTC Acts provide "cumulative remedies against activity detrimental to competition," *FTC v. Cement Institute, 333 U.S. 683,* ***[**76]*** *694, 92 L. Ed. 1010, 68 S. Ct. 793 (1948)*, the civil payments made may properly be considered in evaluating what additional penalty could reasonably be required to deter conduct of the sort proscribed.

4. *Ability to pay*. Phelps Dodge has provided information on a recent and severe downturn in the economic fortunes of its parent corporation. *See* Phelps Dodge Memorandum on Civil Penalties, Appendix C; Additional Materials Regarding Financial Condition of Phelps Dodge Corporation. Otherwise, the companies for the most part only briefly address the criterion of ability to pay, likely because they recognize that each is undoubtedly able to pay **[*1367]** any penalty that could reasonably be assessed in this case. GK in 1980 had net sales of $1.18 billion; total assets of $732 million; net profits of $70 million; working capital of $227 million; and $19.9 million on hand in cash and negotiable instruments. Phelps Dodge in 1981 had economic net sales of $1.438 billion; total assets of $2.144 billion; net profits of $58.5 million; total current assets of $473 million; net stockholders' equity of $1.089 billion; and $15.4 million on hand in cash and other negotiable instruments.

[77]** 5. *Vindication of FTC authority*. This consideration underlies all proceedings brought to recover civil penalties. Though the Order violated is old, it has remained fully in effect. Further, it deals with matters central to the FTC's mission to preserve a competitive economy and protect the public from unfair practices, for price-fixing poses a "threat to the central nervous system of the economy." *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 224 n.59, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)*. GK's departure from the industry by virtue of the sale of its paper cable division does not remove this factor, nor does it eliminate the need for general deterrence. The efforts of GK and Phelps Dodge to divorce themselves from the conduct of their employees suggest, in fact, that vindication is an important consideration here. The penalty assessed must provide a "'meaningful deterrence' . . . without being overly punitive." *Reader's Digest, 494 F. Supp. at 779* (quoting *ITT Continental, 420 U.S. at 232*). It "should be large enough to hurt, and to deter anyone in the future from showing as little concern as [GK and Phelps Dodge] did for the need to [comply]." *Swingline* ***[**78]*** *, 371 F. Supp. at 47*.

6. *Okonite settlement as guide*. On November 20, 1979, Okonite, a codefendant in this suit, agreed to pay $300,000 in five equal annual installments to settle the government's claims. Phelps Dodge offers an expert economic analysis that places a real value on that settlement of $251,000, and suggests that, in light of the purportedly greater culpability of Okonite, Phelps Dodge should be assessed a considerably lesser civil penalty. In fact, the Okonite settlement offers little guidance in assessing appropriate penalties for Phelps Dodge or GK. Penhale held a higher executive position in Okonite than did Trotter or Kedzierski in their respective companies, and had virtually autonomous authority to develop corporate pricing policy and to set specific bid prices. Penhale at 14-15, 42. But Okonite, a smaller company than its competitors, employed no manager in a position equivalent to that held by Penhale's coconspirators. In addition, the record fails to support Phelps Dodge's argument that Penhale masterminded the scheme and that Trotter and Kedzierski were willingly manipulated by him in the hope that he might secure them employment in the future. The very **[**79]** nature of a settlement agreement, moreover, precludes a precise assessment of its value. By settling, both the government and Okonite waived the opportunity systematically to present evidence on the issues of liability and good faith which inform the discretion of this court in assessing a penalty. Further, the settlement figure of a codefendant of roughly equal culpability should if anything serve as a floor, not a ceiling. Settlement involves negotiation and compromise; the parties avoid the burdens, expense, and risks of litigation, but forego the possibility of fully vindicating their positions. Incentive to settle would be reduced if figures arrived at in negotiated settlements were used as a cap on the liability of a codefendant which chose unsuccessfully to defend.

Finally, the government claims the Okonite settlement is worth far more in present value than defendants' estimate of $251,000. That estimate, the government contends, is premised on overly favorable assumptions as to bond rating and interest rates, and on a failure to add the time value of money since the settlement several years ago. A figure close to half a million dollars would more fairly represent the value **[**80]** of the Okonite settlement at this time. The Okonite settlement also no doubt reflected the fact that the company is several **[*1368]** times smaller than either Phelps Dodge or GK and had been spun off from its bankrupt parent and purchased by its employees just prior to the agreement. Therefore, to the extent the Okonite settlement should serve as a guide, the defendants' roughly comparable culpability, the present value of the settlement, and the significantly smaller size of Okonite would suggest that a civil penalty of at least $500,000 against each codefendant would be appropriate.

7. *Conclusion*. The government asks for a civil penalty of $900,000 against GK and of $825,000 against Phelps Dodge, explaining the differential on the basis of the active acquiescence of Brooks at GK, the cash flow problems of Phelps Dodge, and Phelps Dodge's action in terminating Trotter's involvement in paper cable. GK and Phelps Dodge contend that only nominal penalties are appropriate.

The findings and conclusions reached above warrant the imposition of substantial civil penalties. The companies engaged through responsible employees in outright price fixing, and gained significant additional **[**81]** revenues from the collusive agreement to adhere to book pricing. Both companies failed to demonstrate good-faith efforts actively to comply with the Order, and Phelps Dodge took only marginally more effective measures than GK to satisfy its obligations. Notwithstanding Phelps Dodge's recent difficulties, both companies are able to bear substantial penalties, the imposition of which appear to be necessary here to affirm the principle that FTC orders do not fall into desuetude with age.

An assessment in the full amount claimed by the government seems inappropriate, however, because the defendants already have paid considerable sums to civil plaintiffs, and because no evidence was developed that indicated intentionally wrongful conduct by the highest officers of either corporate defendant. Accordingly, civil penalties of $7,500 per day against Phelps Dodge and $8,000 per day against GK for each of the sixty-nine days during which the conspiracy lasted are assessed. Thus, Phelps Dodge is liable for a civil penalty of $517,500, and GK of $552,000, with costs. The Clerk will enter judgment accordingly.

SO ORDERED.

HN8[] **Entry of Judgments, Compelling Specific Acts**

That an injunction is not available to a private Racketeer Influenced and Corrupt Organizations Act, 18 U.S.C.S. § 1961-68, plaintiff does not mean that relief that consists of a monetary payment is also barred, even if it is characterized as "equitable." The type of relief described in *18 U.S.C.S. § 1964(a)* & *(b)* is the traditional coercive form of injunctive or equitable relief: divestiture, injunction against participating in a business, dissolution, reorganization, and the like. That Congress did not intend for a private party to obtain such drastic forms of relief does not mean that it intended to bar a private party from compensation for harm done due to a RICO violation merely because the relief is characterized as "equitable".

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

Securities Law > RICO Actions > Remedies

HN9[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

18 U.S.C.S. § 1964(c) expressly grants a private plaintiff the right to sue for damages caused by a Racketeer Influenced and Corrupt Organizations Act (RICO), 18 U.S.C.S. § 1961-68, and defines the proper recovery broadly. Any person injured by reason of a violation of the chapter shall recover threefold the damages he sustains. If the "damages sustained" by a victim of a RICO violation include lost profits, there is no bar in the statute to recovery of those losses. Recovery of lost profits should be subject to the ordinary limitations concerning remoteness, or proximate cause, and speculativeness, or certainty.

Opinion

[*1379] MEMORANDUM OPINION

HON. PRENTICE H. MARSHALL, Judge:

According to the complaint in this action, Eagle Monitoring Systems ("Eagle"), a business that designed systems to monitor complex machinery, began as a partnership between plaintiffs H. Duane DeMent and Keith Kopp in 1971. Being inexperienced in business matters, they sought management and financial advice from defendant Richard E. Lassar and his firm, Richard E. Lassar & Associates ("Lassar & Associates"). In 1973, Lassar advised plaintiffs to incorporate. Plaintiffs did so and sold 6 2/3% of the Eagle stock to Lassar for $10,000 and 6 2/3% to a friend of Lassar for another $10,000. There is no allegation that this sale was tainted by fraud. Eagle entered into an agreement with Lassar for the payment of a monthly retainer and **[*1380]** finder's fee for any financing Lassar obtained for Eagle.

Eagle incorporated on Lassar's advice in 1973. As it expanded, its need for financing grew; Lassar suggested **[**2]** that Eagle seek financing from small business investment companies ("SBICs"). Lassar arranged a loan by several SBICs including defendant Abbott Capital Corp. ("Abbott"). Under the proposed loan, the SBICs were to loan Eagle $100,000. Eagle was to grant the lenders warrants exercisable for five years or the life of the loan for 25 to 50% of Eagle's stock. The proposed agreement also imposed several restrictive covenants. According to plaintiffs, Lassar deliberately delayed the closing of the loan, though he knew Eagle's financial situation was precarious. In addition, plaintiffs allege, Lassar did not disclose to them that he was affiliated with several of the lenders, including Abbott.

At the scheduled closing of the loan, Commerce Capital Corp., another SBIC and a defendant here, objected to the agreement and insisted on additional consideration. Plaintiffs claim that this was planned in advance with an associate of Lassar as a means of coercing Eagle to give up more in return for the loan.

Because of their desperate need for financing, plaintiffs allege, they had no alternative but to accept the additional terms proposed by Commerce Capital. Lassar and Abbott added still more **[**3]** terms before the next closing, including an eight-year management contract between Abbott and Eagle for $4800 per year (which plaintiffs claim was a sham covering a fee that actually went to Lassar in violation of Small Business Administration regulations), more restrictive covenants, a personal guaranty of the loan by DeMent and Kopp, and a requirement that the lenders be permitted to exercise their warrants for a price based on a net worth test. Lassar, still operating under the alleged undisclosed conflict of interest, advised plaintiffs to accept the loan because there was no alternative, and plaintiffs agreed.

The rescheduled closing took place in June 1974; at that time, two more terms were added, including a term that allegedly had the effect of permitting the lenders to exercise the warrants at an extremely low cost. Plaintiffs claim that they did not comprehend the significance of the term but assented to it on Lassar's advice.

Eagle performed its obligations under the loan agreement until April 1981, though it claims that Abbott did not provide it with the management services it had contracted to provide. In April 1981, Eagle agreed to sell its assets to another company, **[**4]** TRW, for $3.2 million in cash and TRW's assumption of Eagle's operating liabilities. The lenders then elected to exercise their warrants and tendered $240 for 25% of Eagle's stock. In light of the TRW proposal, the stock was actually worth $800,000. [1] Plaintiffs claim that the $240 price relied on by the lenders was not the correct price for exercise of the warrants. Eagle refused to honor the warrants, and the proceeds from the TRW acquisition were placed in trust. Eagle commenced this action at or about the same time.

Plaintiffs' amended complaint is stated in nine counts and alleges violations of various **[**5]** federal and Illinois statutes, common law torts, and breaches of contract. Defendants have moved for summary judgment on counts 1 and 3. Count 1 arises under the Racketeer Influenced and Corrupt Organizations Act ("RICO"), *18 U.S.C. §§ 1961-68 (1982)*; count 3 arises under *§§ 12* F & I of the Illinois Securities Act, Ill. Rev. Stat. ch. 121 1/2, §§ 137.12 F, I (1983).

RICO

HN1[] For civil liability to exist under RICO, plaintiffs must show that a defendant or defendants acquired or maintained an interest or control in an enterprise through a **[*1381]** pattern of racketeering activity, *18 U.S.C. § 1962(b)*, participated in the conduct of an enterprise through a pattern of racketeering activity, *id*. *§ 1962(c)*, or conspired to violate the other provisions of *§ 1962*, *see id*. *§ 1962(d)*. "Pattern of racketeering activity" is defined as the commission of at least two criminal acts of the type listed in *id*. *§ 1961(1)*. *See id*. *§ 1961(5)*. Here plaintiffs

---

[1] According to plaintiffs, TRW had previously offered to purchase Eagle in 1978 for 70,000 shares of TRW stock, which then sold for $60 per share. The deal was never consummated, allegedly because TRW was concerned that the warrants held by the SBICs would create problems after the acquisition, and because TRW believed that Eagle lacked the management services that Abbott and Lassar were supposed to provide.

allege that defendants' activities were respect to plaintiffs and other small businesses amounted to violations of the federal mail fraud and wire fraud statutes. *18 U.S.C. §§ 1341*, *1343 (1982)*. The relief plaintiffs seek **[**6]** for the RICO violation is as follows:

> a. An order pursuant to *18 U.S.C. § 1961(a)* preventing and restraining defendants from committing further violations of *18 U.S.C. § 1962*, and ordering them to divest themselves of any purported interest in EMS Liquidating Corporation [which was formed after the sale of Eagle's assets to TR];
> b. Awarding EMS Liquidating Corporation three times the actual damages it has sustained as a result of defendants' unlawful conduct, which damages include:
> i. All excessive interest paid lenders pursuant to the Abbott Loan Agreement;
> ii. All management fees paid Abbott pursuant to the Abbott Loan Agreement;
> iii. All director's fees paid Abbott pursuant to the Abbott Loan Agreement;
> iv. All consulting fees paid Lassar & Associates and/or Lassar individually, at any time; and
> v. Any and all existing or potential equity lost by Eagle pursuant to lenders' exercise or attempted exercise of their warrants;
> c. Costs, including reasonable attorney's fees; and
> d. Such other relief as the Court may deem just.

Amended Complaint para. 71.

Defendants' argument with respect to plaintiffs' RICO claim is that plaintiffs seek **[**7]** relief that is equitable in nature and that equitable relief is not available to a private RICO plaintiff. The only reported decision directly discussing this issue at any length is *Kaushal v. State Bank of India, 556 F. Supp. 576 (N.D. Ill. 1983)*, in which our colleague Judge Milton Shadur concluded that the equitable remedies of injunction and divestiture were not available to a private RICO plaintiff. Defendants urge us to follow *Kaushal*.

As we have noted, defendants argue (1) that plaintiff seek equitable relief, and (2) that a private RICO plaintiff is not entitled to equitable relief. Plaintiffs have responded only to the first part of defendants' argument, claiming that the relief they seek is not equitable. They state in their brief that they disagree with defendants' assertion as to the availability of equitable relief, but they do not argue the point, stating only that they "will address that question if the Court desires." Response to Motion for Partial Summary Judgment at 6. As far as we are concerned, plaintiffs have made their election. We see no need for another round of briefs. Plaintiffs had an opportunity to address all the arguments advanced by defendants, **[**8]** and they have chosen to address only some of them. The question of the availability of equitable relief to a private RICO plaintiff is before us.

1. *Paragraph 71(a)*

Paragraph 71(a) of the amended complaint clearly seeks equitable relief in part; plaintiffs ask for an order restraining defendants from committing further RICO violations. In their response to the motion for summary judgment, at page 5 n. *, plaintiffs state that this is moot. We will take them at their word, and the first part of para. 71(a) is therefore stricken.

The remainder of para. 71(a) also seeks relief in the form of a mandatory injunction: plaintiffs ask us to order defendants to divest themselves of any purported interest in EMS Liquidating Corporation. It is unclear **[*1382]** whether plaintiffs' suggestion of mootness applies to this part of para. 71(a) as well. Certainly the last part of para. 71(a) has not been mooted by factual developments in the case; presumably defendants still hold the warrants, which constitute an "interest" of sorts in EMS. It also appears from the parties' trial briefs that some of the defendants had become shareholders in Eagle even before the Abbott loan agreement was **[**9]** concluded. It may be that plaintiffs seek divestiture of this interest too. ***HN2***[] An order of divestiture is generally considered an equitable remedy. *See* *United States v. Cappetto, 502 F.2d 1351 (7th Cir. 1974)* (criminal RICO case), *cert. denied*, *420 U.S. 925, 43 L. Ed. 2d 395, 95 S. Ct. 1121 (1975)*. Thus, the relief sought in para. 71(a) appears to be injunctive in nature, and if a private RICO plaintiff cannot obtain an injunction under the statute, para. 71(a) should be stricken.

Judge Shadur's opinion in *Kaushal v. State Bank of India* sets forth most of the arguments on both sides of the injunctive/equitable relief issue. **HN3**[] The "relief" portion of RICO, 18 U.S.C. § 1964 (1982), provides as follows:

> (a) The district courts of the United States shall have jurisdiction to prevent and restrain violation of section 1962 of this chapter by issuing appropriate orders, including, but not limited to: ordering any person to divest himself of any interest, direct or indirect, in any enterprise; imposing reasonable restrictions on the future activities or investments of any person, including, but not limited to, prohibiting any person from engaging in the same type of endeavor **[**10]** as the enterprise engaged in, the activities of which affect interstate commerce; or ordering dissolution or reorganization of any enterprise, making due provision for the rights of innocent persons.
> (b) The Attorney General may institute proceedings under this section. In any action brought by the United States under this section, the court shall proceed as soon as practicable to the hearing and determination thereof. Pending final determination thereof, the court may at any time enter such restraining orders or prohibitions, or take other actions, including the acceptance of satisfactory performance bonds, as it shall deem proper.
>
> **HN4**[] (c) Any person injured in his business or property by reason of a violation of section 1962 of this chapter may sue therefor in any appropriate United States district court and shall recover threefold the damages he sustains and the cost of the suit, including a reasonable attorney's fee.
>
> (d) A final judgment or decree rendered in favor of the United States in any criminal proceeding brought by the United States under this chapter shall estop the defendant from denying the essential allegations of the criminal offense in any subsequent civil **[**11]** proceeding brought by the United States.

18 U.S.C. § 1964(a) - (d) (1982).

Some commentators have argued that the use of "and shall" in § 1964(c) rather than "to" before the treble damages recovery clause implies that the private damages remedy is in addition to other remedies, including equitable relief. *See* Blakey & Gettings, Racketeer Influenced and Corrupt Organizations (RICO): Basic Concepts -- Criminal and Civil Remedies, 53 Temple L.Q. 1009, 1038 & n. 133 (1980). However, the Supreme Court twice construed provisions of the original Sherman Act that were nearly identical to § 1962(a) & (c) not to permit a private antitrust plaintiff to obtain injunctive relief. *See* Minnesota v. Northern Securities Co., 194 U.S. 48, 48 L. Ed. 870, 24 S. Ct. 598 (1904); Paine Lumber Co. v. Neal, 244 U.S. 459, 61 L. Ed. 1256, 37 S. Ct. 718 (1917). [2] Section 16 of the Clayton Act, 15 U.S.C. § 26 (1982), expressly provided for private injunctive relief to overcome *Northern Securities. See* A. Bridges, Private Rico Litigation Based Upon "Fraud in the Sale of Securities," 18 **[*1383]** Ga. L. Rev. 43, 74-75 (1983). Had Congress intended a private RICO plaintiff to be able **[**12]** to obtain injunctive relief, it surely would have avoided language that had previously been held by the Supreme Court not to permit such relief.

Further, as Judge Shadur points out, the Senate bill that was the initial RICO proposal, S. 30, 91st Cong., 1st Sess. (1969), did not contain a private right of action at all, and the committee report discussed only civil RICO actions by the United States. S. Rep. No. 617, 91st Cong., 1st Sess. 24, 34, 80-83, 160 (1969). The Senate bill was amended in committee in the House to add a private treble damages remedy. H.R. Rep. No. 1549, 91st Cong., 2d Sess. 35, 58 *reprinted in* 1970 U.S. Code Cong. & Admin. News 4007, 4010, 4034. Thus, as originally written, § 1964(a) conferred jurisdiction **[**13]** on the courts, and § 1964(b) defined who could invoke it. Section 1964(c) appears independent of § 1964(a). "The House Committee's addition of the private damages remedy had not altered the public-action thrust of the other subsection of S. 30 § 1964." Kaushal, 556 F. Supp. at 583.

---

[2] *Kaushal* did not address these cases, but it did note that the current ***antitrust law*** contains the "and shall recover" language in a section separate from that specifically authorizing private injunctive relief, a section not contained in RICO. Kaushal, 556 F. Supp. at 583 & n. 22.

Finally, and perhaps most persuasively, a proposed amendment to RICO that would have added an express right to injunctive relief for private plaintiffs was turned away on the floor of the House. In responding to the proposed amendment, one of the managers of the bill in the House stated that

> [the proposed amendment] does offer an *additional civil remedy* which I think properly might be suited to the special mechanism fashioned in title IV. . . . It has its counterpart almost *in haec verba* in the antitrust statutes, and yet I suggest to [Rep. Steiger] that prudence would dictate that the Judiciary Committee very carefully explore the potential consequences that *this new remedy* might have. . . . I would hope that the gentleman might agree to . . . withdraw his amendment from consideration with the understanding that it might properly be considered by the Judiciary Committee **[**14]** when the Congress reconvenes following the elections or some other appropriate time.

116 Cong. Rec. 35,346 (daily ed. Oct. 7, 1970) (remarks of Rep. Poff) (emphasis supplied), *quoted in* A. Bridges, Private RICO Litigation Based Upon "Fraud in the Sale of Securities," *18 Ga. L. Rev. 43, 75-76 (1983)*. Such an amendment was never considered again. Bridges, *supra* at 76. This discussion indicates that those sponsoring the bill viewed injunctive relief as a remedy in addition to that provided by *§ 1964(c)* as ultimately passed.

As Judge Shadur pointed out in *Kaushal*, under *Transamerica Mortgage Advisors, Inc. v. Lewis, 444 U.S. 11, 19, 62 L. Ed. 2d 146, 100 S. Ct. 242 (1979)*, ***HN5***[] where a statute expressly provides a particular remedy or remedies, a court should be reluctant to read others into it. Further, a court may read additional judicial remedies into "elaborate [statutory] enforcement provisions" only where "strong indicia of a contrary congressional intent" negate the implication that "Congress provided precisely the remedies it considered appropriate." *Middlesex County Sewerage Authority v. National Sea Clammers Association, 453 U.S. 1, 14-15, 69 L. Ed.* ***[**15]*** *2d 435, 101 S. Ct. 2615 (1981)*. Here, not only is there no indication of congressional intent to provide for private injunctive relief, there is in fact strong indication that the contrary was intended. Under *Transamerica Mortgage* and *Sea Clammers*, therefore, a private RICO plaintiff should not be able to obtain an injunction. This means that the injunction and divestiture remedies sought by plaintiffs in para. 71(a) of the amended complaint are not available. [3] That subparagraph is therefore stricken.

2. *Paragraph 71(b)*

Paragraph 71(b) of the amended complaint in essence seeks return of the "excessive" **[*1384]** consideration allegedly paid to defendants, as well as the sums lost due to defendants' exercise of the warrants. Defendants characterize **[**16]** this as an equitable remedy.

HN6[] Return of out of pocket losses is generally the appropriate remedy for fraud, a common law tort that is somewhat analogous to the RICO violation claimed here. *See* *Smith v. Bolles, 132 U.S. 125, 129-30, 33 L. Ed. 279, 10 S. Ct. 39 (1889)*; *Madigan, Inc. v. Goodman, 498 F.2d 233, 239 (7th Cir. 1974)* (securities fraud action). Defendants suggest that what plaintiffs seek is in reality rescission and restitution, which defendants characterize as an equitable remedy. However, even before the merger of law and equity, a plaintiff could obtain such relief at law. *See* 1 G. Palmer, Law of Restitution § 3.7 at 260, § 3.16(b) at 328-29 (1978); 5 J. Moore, Moore's Federal Practice para. 38.23 at 38-188 (1982); W. Prosser, Law of Torts §§ 94, 105, 110 (1971). *See also* *Myzel v. Fields, 386 F.2d 718, 741 (8th Cir. 1967)* (characterizing relief as legal, not equitable), *cert. denied*, *390 U.S. 951, 19 L. Ed. 2d 1143, 88 S. Ct. 1043 (1968)*; *Equitable Life & Casualty Insurance Co. v. Lee, 310 F.2d 262, 266-67 (9th Cir. 1962)* (same). Thus, to the extent plaintiffs seek return of "excess" consideration paid to defendants due to fraud or breach of **[**17]** fiduciary duty, the relief they seek is not equitable in nature.

On the other hand, as defendants point out, to the extent plaintiffs seek to deny defendants the sums defendants claim are owed them due to their exercise of the warrants, it is possible to characterize the remedy sought as cancellation of the warrants. ***HN7***[] Cancellation is an equitable remedy. *See* *Roberts v. Sears, Roebuck & Co., 617 F.2d 460, 464 (7th Cir.)*, *cert. denied*, *449 U.S. 975, 66 L. Ed. 2d 237, 101 S. Ct. 386 (1980)*. However, in the

[3] We do not reach the issue whether preliminary injunctive relief would be available to a private RICO plaintiff in extraordinary circumstances, such as where necessary to prevent a disposition or dissipation of assets pending a final money judgment.

present posture of the parties' relationship, it is also possible to characterize the relief sought as a return of the value of the consideration paid defendants for the Abbott loan. In other words, one could in essence permit defendants to exercise the warrants, which would entitle them to a share of the funds in trust, but then provide that the value obtained that is attributable to their fraud must be returned to plaintiffs. Such relief would not be equitable in nature. [4]

[18]** Even if plaintiffs' requested relief must be characterized as "equitable" rescission, that does not necessarily end matters. The opinions the address the availability of "equitable" relief under RICO in a private lawsuit all concern, with one exception, relief that is injunctive in nature. *See* *Trane Co. v. O'Connor Securities, 718 F.2d 26, 28 (2d Cir. 1983)* (preliminary injunction; characterizing issue as whether private plaintiff can obtain "injunctive" relief); *Dan River, Inc. v. Icahn, 701 F.2d 278, 290 (4th Cir. 1983)* (preliminary injunction); *Aetna Casualty & Surety Co. v. Liebowitz, 570 F. Supp. 908, 910-11 (E.D.N.Y. 1983)* (preliminary injunction), *aff'd*, *730 F.2d 905 (2d Cir. 1984)*; *Kaushal, 556 F. Supp. at 581-84* (divestiture and blocking of sale of business); *Ashland Oil, Inc. v. Gleave, 540 F. Supp. 81, 84-86 (W.D.N.Y. 1982)* (attachment). *But see Car Carriers, Inc. v. Ford Motor Co., 583 F. Supp. 221 (N.D. Ill. 1984)* (rescission) (dictum).

HN8[] That an injunction is not available to a private RICO plaintiff does not mean that relief that consists of a monetary payment is also barred, even if it is characterized as "equitable." The type of relief **[**19]** described in *§ 1964(a)* & *(b)* is the traditional coercive form of injunctive or equitable relief: divestiture, injunction against participating in a business, dissolution, reorganization, and the like. That Congress did not intend for a private party to obtain such drastic forms of relief does not mean that it intended to bar a private party from *compensation* for harm done due to a RICO violation merely because the relief is characterized as "equitable". We therefore **[*1385]** hold that even if para. 71(b) consists of equitable restitution, it describes a form of relief available to a private RICO plaintiff. [5] The relief described in para. 71(b) is therefore proper in the present action.

[20]** 3. *Other relief*.

In response to the motion for summary judgment, plaintiffs pointed out that some of the relief they seek clearly is not equitable in nature. In particular, plaintiffs seek damages for defendants' alleged thwarting of the proposed sale of Eagle to TRW in 1978, *see* n. 1 *supra*, and infliction of injury to Eagle's business by the allegedly unreasonable restrictions imposed upon it by Abbott and the other lenders. *See* Response to Motion for Partial Summary Judgment at 6; Plaintiffs' Trial Brief at 43-44, 46-47. Defendants' reply to this assertion was twofold: that defendants did not thwart or impede the proposed TRW sale, and that plaintiffs' requested damages are speculative as a matter of law. This prompted a motion by plaintiffs to strike what they termed the new factual material in defendants' reply or alternatively to permit plaintiffs to respond to it.

We agree with plaintiffs that defendants' argument that they did not thwart the TRW deal is factual in nature; it is based on citations to deposition testimony and documents. It is therefore out of place in the present motion, which was based entirely on the purported legal insufficiency of plaintiffs' **[**21]** RICO claim. In any event, defendants' argument appears insufficient to warrant striking the TRW damage claim at this stage of the litigation. Defendants' factual argument is that TRW did not view the lenders' warrants as a barrier to the 1978 sale, and that defendants were willing to convert the warrants to stock in order to deal with any concern of TRW. This does not appear to deal with the full scope of plaintiffs' claim. Plaintiffs' claim includes the assertion that another barrier to the sale was the fact that the restrictive covenants imposed by Abbott and the other lenders would continue even after the sale, thus

---

[4] That the funds happen to be held in trust at present does not affect matters. We would not be "ordering" the trustee to pay to one party or another but rather permitting one or the other party to receive the funds held in trust.

[5] In *Car Carriers, Inc. v. Ford Motor Co., 583 F. Supp. 221 (N.D. Ill. 1984)*, Judge Shadur addressed a RICO claim in which "equitable rescission" of a lease was sought. *Id. at 227*. Though other grounds for dismissal existed thus obviating the need to address the availability of such a remedy under RICO, Judge Shadur suggested that were he called upon to do so, he would hold that *Kaushal* applied to equitable rescission as well. *Id*. To the extent that Judge Shadur's *dictum* in *Car Carriers* conflicts with what we state above, we respectfully disagree.

limiting the scope of Eagle's business. *See* Motion Regarding New Matter Raised in Defendants' Reply at 3. Thus, plaintiffs' TRW claim would appear to survive defendants' argument of factual insufficiency.

Defendants' second argument is not a factual argument; rather, it is a response invited by plaintiffs' reliance on the thwarted TRW deal to avoid defendants' argument that a private RICO plaintiff cannot obtain equitable relief. In light of our previous disposition of defendants' motion with respect to para. 71(b) of the amended complaint, plaintiffs do not "need" **[**22]** to rely on the TRW damages to keep their RICO claim alive. However, it may nonetheless be the case that the damages plaintiffs seek for that claim cannot be recovered under RICO. We will therefore address defendants' legal argument.

The cases defendants cite in support of their argument are securities fraud cases in which the courts held that the defrauded plaintiff is limited to recovery of out-of-pocket losses and cannot recover the expected profits he might have gained absent the fraud. *See* *Estate Counseling Service, Inc. v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 303 F.2d 527, 533 (10th Cir. 1962)*; *Herzfeld v. Laventhol, Krekstein, Horwath & Horwath, 378 F. Supp. 112, 129 & n. 30 (S.D.N.Y. 1974)*. We are not persuaded by defendants' implicit suggestion that the measure of damages under the securities fraud laws also applies under RICO. One must bear in mind that the above cases, which arose under *15 U.S.C. § 78j(b) (1982)* and *17 C.F.R. § 240.10b-5 (1983)*, involved a judicially-created right of action not expressly provided for by Congress. **[*1386]** In the present case, ***HN9***[] *§ 1964(c)* expressly grants a private plaintiff the right to sue for damages caused by a RICO **[**23]** violation, [6] and defines the proper recovery broadly: "any person injured . . . by reason of a violation of this chapter . . . shall recover threefold the damages he sustains. . . ." If the "damages sustained" by a victim of a RICO violation include lost profits, we see no bar in the statute to recovery of those losses. Of course, recovery of lost profits should be subject to the ordinary limitations concerning remoteness (or proximate cause) and speculativeness (or certainty), but on the present record we cannot say that the damages sought here are so remote from the wrongdoing or speculative and uncertain that they are unrecoverable as a matter of law. It will, of course, be up to plaintiffs to prove at trial their entitlement to damages.

ILLINOIS SECURITIES ACT

Count 3 is brought **[**24]** pursuant to the Illinois Securities Act, Ill. Rev. Stat. ch. 121 1/2, §§ 137.1 - 137.16 (1983). Plaintiffs claim that defendants' conduct violated *id*. § 137.12 F & I, which provide that it violates the Act for any person to defraud another in connection with the purchase or sale of a security. ***HN10***[] The only private right of action expressly provided in the Act is contained in *id*. § 137.13, which provides that a purchaser may rescind a sale of a security made in violation of the Act. Plaintiffs, of course, are not purchasers; they sold securities to defendants. However, they seek rescission and an award of damages due to defendants' alleged misconduct. Amended Complaint para. 83. Defendants argue that this is beyond that is contemplated by the Illinois Act.

Plaintiffs' response is that we should imply a damages remedy under the Act for a defrauded seller, even though no remedy at all is provided for sellers and no damage remedy is expressly provided even for purchasers. The only case under the Act on which plaintiffs rely is *Anvil Investment Co. v. Thornhill Condominiums, Ltd., 85 Ill. App. 3d 1108, 407 N.E.2d 645, 41 Ill. Dec. 147 (1st Dist. 1980)*, in which the court approved **[**25]** an award to a purchaser of securities of *punitive* (not compensatory) damages against two persons who had violated a prohibition contained in § 137.12. Plaintiffs also rely generally on *Sawyer Realty Group, Inc. v. Jarvis Corp., 89 Ill. 2d 379, 432 N.E.2d 849, 59 Ill. Dec. 905 (1982)*, in which the Illinois Supreme Court discussed when a private remedy should be inferred from a statute that does not expressly provide for one. In *Sawyer*, the court stated that where a statute is enacted to protect a particular class of individuals, courts may imply a private cause of action for a violation of the statute even though no express remedy has been provided by the legislature. *Id*. at 386, 432 N.E.2d 852. The court noted that Illinois courts appear to be more willing to permit private remedies where none are expressly provided than are the federal courts. *Id. at 389, 432 N.E.2d at 853*. The court stated that

---

[6] We do not hold to the view that a RICO plaintiff must show damages amounting to "racketeering enterprise injury" or the like. We have previously rejected that view. *Addis v. Moser*, No. 83 C 6118 (N.D. Ill. Feb. 15, 1984).

> it is clear that it is not necessary to show a specific legislative intent to create a private right of action. If there is no indication that the remedies available are only those the legislature expressed in the Act, then where it is consistent with the underlying **[**26]** purpose of the Act and necessary to achieve the aim of the legislation, a private right of action can be implied.

Id. at 386, 432 N.E.2d at 852. In *Sawyer*, the existence of other express remedies, including a private right of injunctive relief, governmental enforcement, and an express private remedy for limited compensatory damages did not lead the court to hold that the remedies expressly provided were the sole remedies available. Thus, the Illinois Supreme Court does not appear to follow *Transamerica Mortgage Advisors, Inc. v. Lewis, 444 U.S. 11, 19, 62 L. Ed. 2d 146, 100 S. Ct. 242* ***[*1387]*** *(1979)*, which was cited in *Sawyer*, in which the United States Supreme Court held that the existence of some express remedies was evidence of legislative intent to preclude other remedies.

The Seventh Circuit has cautioned the district courts that when we interpret state law, it is not our role "to effect dramatic innovation in that body of law." *Murphy v. White Hen Pantry Co., 691 F.2d 350, 355 (7th Cir. 1982)*. The pertinent provisions of the Illinois Securities Act have been in existence since 1953, and no Illinois court has ever held in a reported decision that **[**27]** a seller of securities is entitled to pursue private remedies under the Act. In addition, since the anti-fraud prohibitions of the Illinois Act are paralleled in the federal securities laws, particularly *15 U.S.C. § 78j(b) (1982)*, upon which plaintiffs rely in count 2 and which unquestionably provides for a private cause of action for rescission or damages, we do not think it prudent in the present action to add to the remedies provided by the Illinois legislature, in the absence of more specific direction from the Illinois courts. [7] For this reason, count 3 of the amended complaint is dismissed. We will enter judgment on count 3 after all claims have been disposed of. *Fed. R. Civ. P. 54(b)*.

[28]** To summarize, defendants' motion for summary judgment is granted in part and denied in part. Paragraph 71(a) of the amended complaint is stricken, and count 3 is dismissed; defendants' motion is otherwise denied.

End of Document

[7] We note that *Anvil Investment*, which upheld an award of punitive damages to a purchaser defrauded in violation of the Illinois Act, relied solely on *federal* case authority for the proposition that awards of punitive damages may be made under a statute absent specific legislative authorization. 85 Ill. App. 3d at __, 407 N.E.2d at 653. Further, the court seemingly disregarded a federal decision from which it quoted extensively, which held that punitive damages were unavailable under the federal statute parallel to the provision of the Illinois Act at issue in *Anvil. Id*. (citing *Globus v. Law Research Service, Inc. 418 F.2d 1276 (2d Cir. 1969))*.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN1[] **Private Actions, Remedies**

See *15 U.S.C.S. § 15*.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN2[] **Private Actions, Standing**

To have standing to bring an anti-trust action a plaintiff must have suffered antitrust injury, which is injury of the type the antitrust laws were intended to prevent and which flows from that which makes a defendant's acts unlawful. The injury must reflect the anticompetitive effect of either the violation of ***antitrust law*** or of the anticompetitive acts made possible by the violation, and it should be the type of loss which a violation of ***antitrust law*** would be likely to cause. To have standing a person must be one against whom anticompetitive activity is directed, and not one who has merely suffered indirect, secondary, or remote injury. Incidental or consequential injury or injury remotely caused by an antitrust violation does not give a plaintiff standing to complain that he has been injured by reason of anything forbidden in the antitrust laws.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

HN3[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The prevailing standard of analysis under *§ 1* of the Sherman Act for non-price vertical restrictions is the rule of reason. Under this rule the finder of fact weighs all circumstances of a case to determine whether a restrictive practice imposes an unreasonable restraint on competition and should therefore be prohibited. If so, it is per se illegal.

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > General Overview

HN4[] **Exclusive & Reciprocal Dealing, Exclusive Dealing**

In order to prove that a franchiser's allocation of territories, each of which is an exclusive territory, is a horizontal restriction, plaintiffs will have to show that the franchiser and those of its franchisees alleged to be part of the combination or conspiracy agreed among themselves as to the division of territories. If the franchiser alone allocated the territories there is no per se violation of ***antitrust law*** because exclusive dealing arrangements are to be analyzed under the rule of reason. That the franchisor itself operates restaurants in certain territories does not, alone, change the standard of analysis.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN5[] **Tying Arrangements, Clayton Act**

A tie is an arrangement under which a seller agrees to sell one product, the tying product, only on the condition that the buyer also purchase a second product, the tied product. A tie is a per se violation of ***antitrust law***, however, only if the seller has sufficient economic power with respect to the tying product to restrain free competition in the market for the tied product and if a not insubstantial amount of interstate commerce is affected. Additionally, a tie is illegal only if the seller of the tying product has a financial interest in the source of the tied product.

Contracts Law > Personal Property > Personalty Leases > General Overview

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > General Overview

Contracts Law > Types of Contracts > Lease Agreements > General Overview

HN6[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Lease payments, a license fee, and a security deposit paid to a franchisor have all been found not to be separate payments for a product distinct from the franchise. However, vending services are not such an essential ingredient of a franchised system's formula for success that they should be treated as part of the franchise itself.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > General Overview

HN7[] **Price Fixing & Restraints of Trade, Tying Arrangements**

An approved source requirement is not, alone, illegal. Only if a franchisee is coerced into purchasing products from a company in which the franchisor has a financial interest does an illegal tie exist.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > General Overview

HN8[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Even if plaintiffs can show the existence of an illegal tie, defendants can still defeat the claim by showing that the tie constitutes a necessary device for controlling the quality of the end product sold to the consuming public by a franchisee. This defense is available because of the unique nature of franchises and the fact that in the franchise context ties may serve legitimate purposes. For this defense to be successful, however, defendants would have to show that the tie is the method of maintaining quality that imposes the least burden on commerce.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Trademark Law > ... > Similarity of Marks > Appearance, Meaning & Sound > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

HN10[] **Monopolies & Monopolization, Actual Monopolization**

A party has monopoly power if it has over any part of trade or commerce the power of controlling prices or unreasonably restricting competition. In a sense, there is monopoly power over every non-standard commodity because each manufacturer has the power over price and production of his product. However, this power which a manufacturer has over a trademarked or unique product is not the power that constitutes an illegal monopoly. Instead, whether there is control of the relevant market depends on the availability of alternative commodities and the interchangeability of products which have similar uses considering price, characteristics, and adaptability. If price is controlled and competition restricted with respect to a product for which there are no reasonable substitutes available in the market, there is monopoly power.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN11[] **Private Actions, Remedies**

In order to survive a motion for summary judgment a plaintiff in an antitrust action must show substantial probative evidence of antitrust injury. Self-serving statements by a plaintiff's corporate officers are not, alone, substantial enough evidence of antitrust injury for a plaintiff to survive a motion for summary judgment.

Contracts Law > Defenses > Affirmative Defenses > Statute of Limitations

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN12[] **Affirmative Defenses, Statute of Limitations**

Where rights and liabilities are finalized by a contract or by denial of a contract, and any damages are at that time provable with certainty, the statute of limitations begins to run at that time.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN13[] **Private Actions, Remedies**

Mere acquiescence in a restrictive practice does not preclude an antitrust action.

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

HN14[] Summary Judgment, Motions for Summary Judgment

Fed. R. Civ. P. 56(c) provides that the judgment sought shall be rendered forthwith if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. Antitrust cases by their very nature are often poorly suited for disposition by summary judgment motion, since antitrust cases often raise questions of motive, credibility, and conspiracy. On the other hand, it is now settled that summary judgment is appropriate in those antitrust cases where plaintiffs, after having engaged in extensive discovery, fail to produce significant probative evidence in support of the allegations in their complaint.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN15[] Price Fixing & Restraints of Trade, Tying Arrangements

To ascertain whether an unlawful arrangement for the sale of products has caused injury to the purchaser, the cost or value of the products involved, free from the unlawful arrangement, must first be ascertained.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Nonprice Restraints

HN16[] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

A non-price horizontal restraint of trade such as territorial restrictions between competitors are illegal per se, because they have no purpose except the stifling of competition. On the other hand, territorial restrictions of a "vertical" nature (between the parties at different levels of the market structure) -- such as those which may be contained in franchising agreements -- are analyzed under a rule of reason, because they promote interbrand competition by allowing the franchisor or manufacturer to achieve certain efficiencies in the distribution of his goods and services. The reasonableness of a particular non-price vertical restraint is judged by whether it produces an anticompetitive effect in interbrand competition in the relevant geographic and product markets and not merely by whether it reduces intrabrand competition.

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Business & Corporate Law > Distributorships & Franchises > Remedies > General Overview

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

HN17[] **Distributorships & Franchises, Antitrust Issues**

Franchisors, like other businessmen generally, have the right to select unilaterally those with whom they deal and to exercise their own discretion in continuing or terminating existing franchisees. The antitrust laws are designed to protect the consumer interest in competition, and courts recognize that giving wide latitude to businesses in choosing methods of distribution and particular distributors promotes competition. Thus, the threat of a treble damages judgment arises only from those refusals to deal which are part of a plan of anti-competitive conduct involving more than one party.

Business & Corporate Compliance > ... > Distributorships & Franchises > Termination > Antitrust Issues

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Business & Corporate Law > Distributorships & Franchises > General Overview

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

HN18[] **Distributorships & Franchises, Antitrust Issues**

In a franchisor-franchisee context, the cases uphold the right of a franchisor to refuse to grant a franchisee or to terminate a franchise as long as no anti-competitive motives for or effects of the franchisor's action exists.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN19[] **Private Actions, Remedies**

In any antitrust case the plaintiff must show antitrust injury of two types. First, he must show an injury to himself causally linked to illegal activities of the defendant. Second, he must show that the defendants' activities have the effect of stifling competition.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN20[] **Clayton Act, Claims**

Section 4 of the Clayton Act, *15 U.S.C.S. § 15* conditions a private action on a showing of economic injury to its business or property. Even if the practice is a per se violation of the law, the plaintiff must show economic injury to itself. Said another way, plaintiff must show the fact of injury which means that what the defendant did impacted in some way on plaintiff's business. To show injury means that plaintiff must be able to demonstrate that it suffered economic damages which are quantifiable.

Counsel: W. Clark Goodwin, Birmingham, Alabama, Manning G. Warren, III, Birmingham, Alabama, J. Michael Rediker, Birmingham, Alabama, K. Morgan Varner, III, Atlanta, Georgia, for Appellant.

Judges: Tjoflat and Johnson, Circuit Judges, and Tuttle, Senior Circuit Judge.

Opinion by: PER CURIAM

Opinion

[*709] We AFFIRM the partial summary judgment of the district court, entered pursuant to *Fed.R.Civ.P. 54(b)*, for the reasons set forth in its dispositive orders of March 15, 1982, and December 30, 1982, annexed hereto as Exhibits A and B, respectively.

EXHIBIT A

ORDER

INTRODUCTION

Before the court in this antitrust action are plaintiffs' motion for reconsideration of their motion for partial summary judgment and defendants' motion for reconsideration of their motion for summary judgment. Although the parties contend they cannot agree on any facts, the court will base this order on facts which appear from the record to be undisputed.

FACTS

Waffle House, Inc. (hereinafter "Waffle **[**2]** House") is a Georgia corporation with its principal offices in the Atlanta area. Its stock is owned principally by its officers and employees. Midwestern Waffles, Inc. (hereinafter "Midwestern Waffles") is an **[*710]** Illinois corporation of which Rex Waldrop and Edwin Waldrop are shareholders.

Waffle House operates a trademark restaurant system with some unique features. It owns and operates some restaurants on the retail level in certain territories, and other territories have been exclusively allocated to franchisees for operation of Waffle House restaurants. Waffle House or Waffle House employees, officers, or shareholders have interests in corporations which own and operate certain of the Waffle House franchises.

Plaintiffs asked defendants for a Waffle House franchise in Selma, Alabama in late September or early October of 1972. Plaintiffs were told that the area was not available for a franchise because Alabama had already been allocated between the company and other franchisees for operation of Waffle House restaurants. Central Illinois was a territory available for a franchise at the time, and in late 1972 Midwestern Waffles, known at the time as Waldrop-Henry **[**3]** Waffles, Inc., became a Waffle House franchisee for that territory.

Rex Waldrop initially remained in Selma, Alabama while Steve Henry worked as the general manager for Midwestern Waffles in Illinois. After Steve Henry's resignation from Midwestern Waffles and the expansion of the franchise into the St. Louis area, Rex Waldrop moved to St. Louis to become general manager for Midwestern Waffles.

Midwestern Waffles opened two Waffle House restaurants, one in 1974 and one in 1976. Plaintiffs executed a Standard Franchise Agreement prior to the opening of each restaurant, and they also executed Area Development Agreements which controlled where they opened restaurants and whether they built additional ones. Orders were placed for plaintiffs' restaurant equipment with The Hickman Company, in which Waffle House had a financial interest. Metro Distributors, Inc., in which Waffle House also had a financial interest, helped arrange for vending machines for plaintiffs' restaurants. In 1977 Waffle House bought plaintiffs' restaurants from them, and plaintiffs are dissatisfied with the price paid them and the method of arriving at the price.

REX WALDROP'S STANDING

Plaintiffs have brought **[**4]** this action pursuant to *15 U.S.C. § 15* which provides in pertinent part as follows:

> ***HN1***[] Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

Defendants contend Rex Waldrop does not have standing to bring this action in his capacity as an officer, employee or stockholder of Midwestern Waffles, Inc. Mr. Waldrop asserts, however, that he has suffered injuries personal to him, specifically lost opportunities and expenses incurred because he left his job in Alabama and moved to Illinois, and he contends he has standing to seek recovery for those non-derivative injuries.

HN2[] To have standing to bring an anti-trust action a plaintiff must have suffered antitrust injury, which is injury of the type the antitrust laws were intended to prevent and which flows from that which makes a defendant's acts unlawful. The injury **[**5]** must reflect the anticompetitive effect of either the violation of ***antitrust law*** or of the anticompetitive acts made possible by the violation, and it should be the type of loss which a violation of ***antitrust law*** would be likely to cause. *Brunswick Corporation v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477 [97 S. Ct. 690, 50 L. Ed. 2d 701]* (1977). To have standing a person must be one against whom anticompetitive activity is directed, and not one who has merely suffered indirect, secondary, or remote injury. *Jeffrey v. Southwestern Bell, 518 F.2d 1129 (5th Cir.1975)*. Incidental or consequential injury or injury remotely caused **[*711]** by an antitrust violation does not give a plaintiff standing to complain that he has been injured by reason of anything forbidden in the antitrust laws. *Id.*

The court finds that the personal damages which Rex Waldrop seeks to recover are, at best, incidental to activity forbidden by ***antitrust law*** and not the type injury the antitrust laws were intended to prevent. *Markas [Martens] v. Barrett, 245 F.2d 844 (5th Cir.1957)*. Accordingly, the court finds that Rex Waldrop does not have standing to bring this action.

TERRITORIAL ALLOCATION

[6]** Plaintiffs contend that Waffle House and certain of its franchisees conspired to violate *§ 1* of the Sherman Act, *15 U.S.C. § 1*, by horizontally dividing, allocating, and imposing restrictions regarding territories in which they and third parties could operate. If a horizontal restriction is proved a *per se* violation would be established. *Red Diamond Supply, Inc. v. Liquid Carbonic Corp., 637 F.2d 1001 (5th Cir.1981)*.

Defendants contend their allocation of territories is a vertical restriction. ***HN3***[] The prevailing standard of analysis under *§ 1* of the Sherman Act for non-price vertical restrictions is the rule of reason. Under this rule the finder of fact weighs all circumstances of a case to determine whether a restrictive practice imposes an unreasonable restraint on competition and should therefore be prohibited. *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36 [97 S. Ct. 2549, 53 L. Ed. 2d 568]* (1977). If so, it is *per se* illegal. *Red Diamond Supply, Inc. v. Liquid Carbonic Corporation, 637 F.2d 1001 (5th Cir.1981)*.

HN4[] In order to prove that Waffle House's allocation of territories, each of which is an exclusive territory, is a horizontal restriction, **[**7]** plaintiffs will have to show that Waffle House and those of its franchisees alleged to be part of the combination or conspiracy agreed among themselves as to the division of territories. If Waffle House alone allocated the territories there is no *per se* violation of ***antitrust law*** because exclusive dealing arrangements are to be analyzed under the rule of reason. *Aladdin Oil Company v. Texaco, Inc., 603 F.2d 1107 (5th Cir.1979)*. That Waffle House itself operates restaurants in certain territories does not, alone, change the standard of analysis. *Red Diamond Supply, Inc. v. Liquid Carbonic Corporation, supra; H & B Equipment Company, Inc. v. International Harvester Company, 577 F.2d 239 (5th Cir.1978)*.

Whether or not Waffle House's territorial allocation is a vertical restriction or a horizontal restriction cannot be decided on motions for summary judgment because there is a question of fact as to who actually makes the decisions about division and allocation of territories. Plaintiffs have described in detail their evidence that certain franchisees which are affiliated with Waffle House participate in the decisions regarding allocation of territories. Defendants, however, **[**8]** have shown the existence of evidence that the decision is made by Waffle House alone without participation by any of the Waffle House employees, officers, or stockholders who own or are affiliated with franchises. Plaintiffs ask the court to look at the realities of the process of territorial allocation, citing authority for the proposition that a restriction which appears on paper to be vertical may nevertheless be horizontal in practice and that such a restriction is illegal *per se*. It is as to the realities of how allocation of territories are made that questions of fact exist. Accordingly, summary judgment on the issue of territorial allocation cannot be granted.

TYING

Plaintiffs contend that Waffle House's requirements that its franchisees purchase equipment from approved sources constitute *per se* illegal ties in violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1*. ***HN5***[] A tie is an arrangement under which a seller agrees to sell one product, the tying product, only on the condition that the buyer also purchase a second product, the tied product. A tie is a *per se* violation of ***antitrust law***, however, only if the seller **[*712]** has sufficient economic power with **[**9]** respect to the tying product to restrain free competition in the market for the tied product and if a not insubstantial amount of interstate commerce is affected. *United States Steel Corporation v. Fortner Enterprises, Inc., 429 U.S. 610 [97 S. Ct. 861, 51 L. Ed. 2d 80]* (1977); *Kentucky Fried Chicken Corporation v. Diversified Packaging Corporation, 549 F.2d 368 (5th Cir.1977)*. Additionally, a tie is illegal only if the seller of the tying product has a financial interest in the source of the tied product. *Keener v. Sizzler Family Steak Houses, 597 F.2d 453 (5th Cir.1979)*.

Plaintiffs contend the Waffle House franchise is the tying product in this case and that equipment and vending services, which franchisees were required to obtain from an approved source, are the tied products. The Hickman Company was the only approved source for certain equipment, and Metro Distributors, Inc. was the only approved source for vending services.

Defendants contend that as to the vending services there are not two separate products which could be tied because vending income, part of which was collected by Metro Distributors, Inc. and paid to Waffle House, was an additional franchise **[**10]** fee and not a separate payment for a product distinct from the franchise. ***HN6***[] Although such has been held to be the case with respect to lease payments, a license fee, and a security deposit paid to a franchisor, *Principe v. McDonald's Corporation, 631 F.2d 303 (4th Cir.1980)*, *cert. denied*, [451] U.S. [970, *101 S. Ct. 2047, 68 L. Ed. 2d 349]* (May 4, 1981), the court finds that vending services are not such "an essential ingredient of the franchised system's formula for success" that they should be treated as part of the franchise itself. *631 F.2d at 309*.

There is some question as to whether a trademarked product has sufficient economic power that it can be an illegally tying product. In *Kentucky Fried Chicken Corporation v. Diversified Packaging Corporation, supra*, the franchisor conceded this point. A few courts have been presented with the issue, but the question has not been settled as a matter of law.

The leading case on economic power in the tying context is *United States Steel Corporation v. Fortner Enterprises, Inc., supra*, in which the Supreme Court emphasized the importance of uniqueness of the alleged tying product. This court finds that it must be **[**11]** determined by the trier of fact whether the Waffle House franchise system is unique in the sense required by the Supreme Court. If competitors are in some way prevented from offering a franchise comparable to a Waffle House franchise, the court will find that a Waffle House franchise can be a tying product.

There is no contention that there is not a sufficient amount of interstate commerce affected for an illegal tie to be found, and it is undisputed that Waffle House has a financial interest in the Hickman Company and in Metro Distributors, Inc. There are, however, questions of fact about the extent to which plaintiffs' purchase of the Waffle House franchise was conditioned on the purchase of certain equipment from The Hickman Company and vending services from Metro Distributors, Inc.

HN7[] An approved source requirement is not, alone, illegal. *Kentucky Fried Chicken Corporation v. Diversified Packaging Corporation, supra.* Only if a franchisee is coerced into purchasing products from a company in which the franchisor has a financial interest does an illegal tie exist. *Id.* Defendants contend that plaintiffs never sought to purchase equipment or obtain vending services from **[**12]** sources other than The Hickman Company and Metro Distributors, Inc. Plaintiffs' position is that to have done so would have been futile because they had been told that no other sources would be approved. Each of these contentions presents disputes of fact. Unless plaintiffs can prove they were coerced into purchasing equipment and vending services from The Hickman Company and Metro Distributors, Inc., their claim that illegal ties existed will fail.

[*713] ***HN8***[] Even if plaintiffs can show the existence of an illegal tie, defendants can still defeat the claim by showing that the tie constitutes a necessary device for controlling the quality of the end product sold to the consuming public by a franchisee. This defense is available because of the unique nature of franchises and the fact that in the franchise context ties may serve legitimate purposes. *Kentucky Fried Chicken Corporation v. Diversified Packaging Corporation, supra.* For this defense to be successful, however, defendants would have to show that the tie is the method of maintaining quality that imposes the least burden on commerce. *Id.*

Defendants assert that plaintiffs have not shown that The Hickman Company **[**13]** or Metro Distributors, Inc. charged more than market rates for the equipment or the vending services. Although the issue is not determinative of whether an illegal tie existed, *United States Steel Corporation v. Fortner Enterprises, Inc., supra*, it is relevant to the issue of whether plaintiffs have suffered antitrust injury. The question of injury is treated separately in this order.

MONOPOLY

Plaintiffs contend that defendants have violated *§ 2* of the Sherman Act, *15 U.S.C. § 2*, which provides in pertinent part as follows:

> ***HN9***[] Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony . . .

Plaintiffs' contention in this respect depends on a finding that the relevant product market for the alleged monopoly is the Waffle House franchise system. Because the court finds this not to be the case, it will be unnecessary to consider whether the other elements of a monopoly, attempted monopoly, or conspiracy to monopolize are present.

The leading case on relevant product **[**14]** market is *United States v. E.I. DuPont de Nemours & Company, 351 U.S. 377 [76 S. Ct. 994, 100 L. Ed. 1264]* (1956). In that case the Supreme Court stated that ***HN10***[] a party has monopoly power if it has over any part of trade or commerce the power of controlling prices or unreasonably restricting competition. The Court recognized that in a sense there is monopoly power over every non-standard commodity because each manufacturer has the power over price and production of his product. The Court found, however, that this power which a manufacturer has over a trademarked or unique product is not the power that constitutes an illegal monopoly. Instead, whether there is control of the relevant market depends on the availability of alternative commodities and the interchangability of products which have similar uses considering price, characteristics, and adaptability. If price is controlled and competition restricted with respect to a product for which there are no reasonable substitutes available in the market, there is monopoly power.

In *United States v. E.I. DuPont de Nemours & Company*, the Supreme Court considered whether DuPont was guilty of a monopoly because it controlled **[**15]** the cellophane market. The Court found that the relevant product market was the market for flexible packaging materials and not for cellophane alone because other flexible packaging materials are reasonably interchangeable with cellophane for the purposes for which cellophane is produced, taking price, use, and qualities into consideration. Similarly, this court finds that the relevant product market for determining whether Waffle House is engaged in a monopoly is restaurants similar to Waffle Houses -- those with similar menus, similar hours, and similar service. The court does not find that the relevant product market is all restaurants of every type, but it does find that there are other restaurants in the market available to consumers as reasonable substitutes for Waffle Houses. It is these restaurants which, along with Waffle Houses, constitute the relevant product **[*714]** market. Waffle House is thus not engaged in a monopoly in violation of *§ 2* of the Sherman Act.

This conclusion is not inconsistent with a conclusion which might be reached that the Waffle House franchise system is sufficiently unique to have the economic power required for a tie to be found. It **[**16]** is the Waffle House franchise system, not the restaurants alone, which is the potentially tying product. The restaurants and the food served there are relevant to the determination of monopoly power.

Because the court has found no monopoly exists, it is unnecessary for it to consider any other elements of an alleged violation of *§ 2* of the Sherman Act. As to plaintiffs' claims that defendants have violated *§ 2* of the Sherman Act by engaging in a monopoly, attempting a monopoly, or conspiring to monopolize, defendants are granted summary judgment.

MISCELLANEOUS ALLEGED RESTRAINTS OF TRADE

Plaintiffs allege that defendants have engaged in other restraints of trade such as requiring Waffle House's approval for building plans and specifications, requiring franchisees to devote full time to the operation of their restaurants, and requiring employees to wear particular attire. Defendants, in support of their motion for summary judgment, have cited authority for the fact that these alleged restraints of trade are ancillary to the Waffle House franchise and therefore not unlawful and that some have been specifically held valid. Plaintiffs have not responded to this argument advanced **[**17]** by defendants, and the court accordingly grants defendants' motion for summary judgment as to these miscellaneous alleged restraints of trade. Thus the only antitrust claims left in this action are plaintiffs' claims that defendants have engaged in horizontal territorial allocation and illegal tying in violation of *§ 1* of the Sherman Act.

ANTITRUST INJURY

HN11[] In order to survive a motion for summary judgment a plaintiff in an antitrust action must show substantial probative evidence of antitrust injury. *H & B Equipment Company, Inc. v. International Harvester Company, 577 F.2d 239 (5th Cir.1978)*. Self-serving statements by a plaintiff's corporate officers are not, alone, substantial enough evidence of antitrust injury for a plaintiff to survive a motion for summary judgment. *Id.* Defendants contend plaintiffs have failed to show that they have substantial probative evidence of antitrust injury.

The discovery period in this case is still open for certain limited purposes. It is possible that the additional discovery which the court has approved will lead to evidence of antitrust injury. Accordingly, the court will defer ruling on the portion of defendants' motion for **[**18]** summary judgment which alleges that plaintiffs have not shown sufficient antitrust injury to be entitled to a trial of their antitrust claims. Within thirty (30) days of the close of the discovery period plaintiff Midwestern Waffles shall file a supplemental response to the portion of defendants' motion for summary judgment which raises the issue of antitrust injury. Plaintiff's supplemental response shall address only the issue of antitrust injury, and on the basis of that response the court will determine whether there exists the substantial probative evidence of injury required to survive a motion for summary judgment.

STATUTE OF LIMITATIONS

Defendants' refusal to grant plaintiffs a franchise in Alabama occurred more than four years prior to the filing of the complaint in this action. Defendants contend plaintiffs' claim based on the alleged horizontal allocation of territories is barred by the statute of limitations. *15 U.S.C. § 15*. Defendants do not contend plaintiffs' tying claim is barred because each payment under a contract which constitutes an illegal tie is new injury. Plaintiffs contend their later requests for a franchise in Alabama or in another southern state **[**19]** were new injuries which gave rise to new **[*715]** causes of action for horizontal territorial allocation.

HN12[] Where rights and liabilities are finalized by a contract or by denial of a contract, and any damages are at that time provable with certainty, the statute of limitations begins to run at that time. *City of El Paso v. Darbyshire Steel Company, Inc., 575 F.2d 521 (5th Cir.1978)*. Plaintiffs have not shown that the damages they seek for the alleged horizontal territorial allocation could not have been proved at the time defendants first told them no Alabama franchise was available.

There is, however, a question of fact on the issue of the statute of limitations. If plaintiffs' subsequent requests for a franchise territory in Alabama or another southern state were genuine, that is if plaintiffs had reason to believe the original decision not to grant them such a franchise did not still stand, there would be a new alleged injury when a genuine subsequent request was denied. If, however, plaintiffs' subsequent requests were futile and plaintiffs had reason to know they were futile, the statute of limitations will be found to bar plaintiffs' claim that defendants violated **[**20]** ***antitrust law*** by horizontally allocating territories.

STANDING OF MIDWESTERN WAFFLES

Defendants contend plaintiffs cannot complain of the system of territorial allocation because plaintiffs not only agreed to it but specifically asked that their territory be an exclusive one. ***HN13***[] Mere acquiescence in a restrictive practice does not preclude an antitrust action, however. *Perma Life Mufflers, Inc. v. International Parts Corporation, 392 U.S. 134 [88 S. Ct. 1981, 20 L. Ed. 2d 982]* (1968). There is evidence plaintiffs acquiesced in defendants' division of territories for its franchisees and that they sought the protection of an exclusive territory as had other franchisees. There appears to be no evidence, however, of plaintiffs' truly complete involvement and participation in the allegedly illegal arrangement, and even if there was such evidence the Supreme Court did not hold that such conduct would bar an antitrust action. The court finds Midwestern Waffles has standing to challenge defendants' allocation of territories.

STATE LAW CLAIMS

Defendants contend in their motion for summary judgment that Georgia law controls the state law issues in this case because the franchise **[**21]** agreement so provides and because of various contacts with the State of Georgia. Plaintiffs do not dispute this contention, and the court will apply Georgia law.

Defendants contend that Ga.Code Ann. § 2-1409 does not give plaintiffs a private right of action for damages for an antitrust violation and that under the circumstances of this case plaintiffs do not have a claim for unjust enrichment under Ga.Code Ann. § 3-107, a claim for tortious interference with contract, or a claim for unfair competition. Plaintiffs have not disputed any of these contentions, and as to each defendants are granted summary judgment.

Plaintiffs have also alleged fraud and breach of contract. There are some issues of fact as to each claim, such as whether defendants intended not to fulfill promises allegedly made to plaintiffs and whether there were agreements between the parties in addition to those set forth in the written contracts between them. There are not sufficient facts before the court, however, for it to determine what other questions of fact exist as to those claims or whether, instead, defendants are entitled to summary judgment on the claims as they contend. On the basis of the pleadings, **[**22]** the court can merely determine that there could be some set of facts which plaintiffs could prove to entitle them to judgment on the fraud and breach of contract claims. The court cannot find that defendants have shown themselves entitled to judgment as a matter of law on these claims, and defendants' motion for summary judgment on these claims is accordingly denied.

[*716] CONCLUSION

Plaintiffs' motion for partial summary judgment is DENIED. There are questions of fact as to both their claim that defendants violated ***antitrust law*** by horizontally allocating territories to franchisees and their claim that defendants violated ***antitrust law*** by engaging in unlawful tying arrangements. Defendants' motion for summary judgment is GRANTED IN PART and DENIED IN PART. The court finds that Rex Waldrop does not have standing to bring this action and that defendants are entitled to summary judgment on plaintiffs' claim that defendants violated *§ 2* of the Sherman Act by engaging in a monopoly. Additionally, defendants are entitled to summary judgment as to plaintiffs' claims of restraints of trade other than the alleged horizontal territorial allocation and the alleged illegal ties, **[**23]** and defendants are entiled to summary judgment on plaintiffs' state law claims for antitrust damages, unjust enrichment, tortious interference with contract, and unfair competition. Midwestern Waffles has standing to challenge defendants' allocation of territories, and as to all other issues raised in defendants' motion for summary judgment, questions of fact exist.

Plaintiff Midwestern Waffles is DIRECTED to file a supplemental response to the portion of defendants' motion for summary judgment which raises the issue of antitrust injury within thirty (30) days of the close of discovery. The Clerk of this Court is DIRECTED to resubmit this file when that supplemental response is filed.

Plaintiffs' motion to compel discovery or to reopen discovery to permit supplementation of responses has also been submitted to the court. That motion has been treated in a separate order and requires no ruling at this time.

EXHIBIT B

ORDER

This antitrust action is again before the court on defendants' motion for summary judgment. Pursuant to this court's order of March 15, 1982, the only antitrust claims left in this action are plaintiff's claims that defendants have engaged in a horizontal **[**24]** territorial allocation and illegal tying, in violation of *Section 1* of the Sherman Act. Further, in response to defendants' contention that plaintiff has failed to show that it has substantial probative evidence of antitrust injury, the court provided the following: "The discovery period in this case is still open for certain limited purposes. It is possible that the additional discovery which the court has approved will lead to evidence of antitrust injury." *Midwestern Waffles, Inc. v. Waffle House, Inc.*, No. C78-223A, at 11 (N.D.Ga. Mar. 15, 1982). On August 20, 1982, plaintiff provided a supplemental response to defendants' motion for summary judgment, which addressed the concerns of antitrust injury.

I. FACTUAL BACKGROUND AND INITIAL CONSIDERATIONS.

In this court's order of March 15, 1982, the court found the following facts from the record to be undisputed. Waffle House, Inc. ("Waffle House") is a Georgia corporation with its principal offices in the Atlanta area. Its stock is owned principally by its officers and employees. Midwestern Waffles, Inc. ("Midwestern Waffles") is an Illinois corporation of which Rex Waldrop and Edwin Waldrop are shareholders.

Waffle **[**25]** House operates a trademark restaurant system with some unique features. It owns and operates some restaurants on the retail level in certain territories, and other territories have been exclusively allocated to franchisees for operation of Waffle House restaurants. Waffle House or Waffle House employees, officers, or shareholders have interests in corporations which own and operate certain of the Waffle House franchises.

Plaintiff asked defendants for a Waffle House franchise in Selma, Alabama, in late September or early October of 1972. Plaintiff was told that the area was not available for a franchise because Alabama had already been allocated between the company and other franchisees for operation of Waffle House restaurants. Central Illinois

[*717] was a territory available for a franchise at the time, and in late 1972, Midwestern Waffles, known at the time as Waldrop-Henry Waffles, Inc., became a Waffle House franchisee for that territory.

Rex Waldrop initially remained in Selma, Alabama, while Steve Henry worked as the general manager for Midwestern Waffles in Illinois. After Steve Henry's resignation from Midwestern Waffles and the expansion of the franchise into **[**26]** the St. Louis area, Rex Waldrop moved to St. Louis to become general manager for Midwestern Waffles.

Midwestern Waffles opened two Waffle House restaurants, one in 1974 and one in 1976. Plaintiff executed a Standard Franchise Agreement prior to the opening of each restaurant, and they also executed Area Development Agreements which controlled where they opened restaurants and whether they built additional ones. Again in 1974, Edwin and Rex Waldrop requested that they be given the Selma or other area in Alabama which had not been developed. This was denied.

Orders were placed for plaintiff's restaurant equipment with The Hickman Company, in which Waffle House had a financial interest. Metro Distributors, Inc., in which Waffle House also had a financial interest, helped arrange for vending machines for plaintiff's restaurants. In 1977, Waffle House bought plaintiff's restaurants from them, and plaintiff is dissatisfied with the price paid it and the method of arriving at that price.

Rule 56 of the Federal Rules of Civil Procedure ***HN14***[] provides that "the judgment sought shall be rendered forthwith if the pleadings, depositions, answers to interrogatories, and admissions on file, **[**27]** together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law." *Fed.R.Civ.P. 56(c)*. Antitrust cases by their very nature are often poorly suited for disposition by summary judgment motion, since antitrust cases often raise questions of motive, credibility, and conspiracy. 10 C. Wright & A. Miller, Federal Practice & Procedure, § 2732, at 608-10 (1973). *See Poller v. Columbia Broadcasting System, Inc.*, 386 [368] U.S. 464 [*82 S. Ct. 486, 7 L. Ed. 2d 458]* (1962). On the other hand, "it is now settled that summary judgment is appropriate in those antitrust cases where plaintiffs, after having engaged in extensive discovery, fail to produce 'significant probative evidence' in support of the allegations in their complaint." *Zenith Radio Corp. v. Matsushita Electric Industrial Co., 513 F. Supp. 1100, 1140 (E.D.Pa.1981)*. *See Pan-Islamic Trade Corp. v. Exxon Corp., 632 F.2d 539, 553-54 (5th Cir.1980)*, *cert. denied*, [*454 U.S. 927] 102 S. Ct. 427 [70 L. Ed. 2d 236]* (1981).

II. WHETHER PLAINTIFF HAS ESTABLISHED ANY EVIDENCE OF INJURY FROM ANY ALLEGED ILLEGAL **[**28]** TYING ARRANGEMENTS.

Plaintiff's allegations regarding any illegal tying arrangements are as follows. During the time relevant to the complaint in this action, Waffle House required its franchisees to purchase certain equipment for the operation of the franchisees' stores. This requirement was imposed by certain provisions of the franchise agreements. Plaintiff's Supplemental Statement of Facts, para. 14. [1] The standard procedure for Waffle House to follow when granting a new franchise was to effect the purchase of the initial equipment package required by the franchise agreement by having an employee of Waffle House, instead of the franchisee, place the order with The Hickman Company on behalf of the new franchisee. This action was taken with no prior consultation with the franchisee. *Id.*, para. 15. The plaintiff was never furnished with specifications of what equipment was required for a Waffle House restaurant, and, no such specifications existed, since such matters were under the control of The Hickman Company. *Id.*, para. 16. *See also* Affidavit of Rex P. Waldrop, paras. 9-15 (attached **[*718]** to Plaintiff's Motion for Summary Judgment with Supporting Papers, **[**29]** filed January 28, 1980). As a result, plaintiff was effectively coerced into purchasing its equipment from The Hickman Company. Statement, para. 17. Metro Distributors, Inc. was the only agent designated by Waffle House in accordance with paragraph 31 of the franchise agreement through which the franchisee could acquire vending machines to be used in its restaurants. *Id.*, para. 18. Both Waffle House and Metro Distributors, Inc., received a percentage of the revenue from the operation of vending machines in the franchisees' stores. *Id.*, para. 19.

[1] Editors Note: No text for footnote 1 appears on the manuscript copy of the order.

Given these allegations, plaintiff contends that two demonstrations of injury result. First, plaintiff points to evidence in the record that a portion of the vending machine net profits was payable to defendants. Plaintiff states that the vending machine revenue received by plaintiff was one-half of that received by defendants, and therefore "this is clear evidence **[**30]** of a decrease in revenues *directly related* to defendants' tie-in." Memorandum of Authorities in Support of Plaintiff's Supplemental Response to Defendants' Motion for Summary Judgment, at 24 (emphasis in original). Second, plaintiff points to the record as showing that defendant Hickman Company purchased standard equipment from various manufacturers and resold that equipment to franchisees at a cost plus a mark-up. Plaintiff asserts that the mark-up to franchisees such as the plaintiff was greater than that charged to the company-owned stores, thereby showing not only the coercive power of defendants, but also showing the injury suffered by the plaintiff. *Id.*

The seminal case which articulated a standard for determining the existence of injury in tie-in situations is *Siegel v. Chicken Delight, Inc., 448 F.2d 43* (9th Cir.), *cert. denied*, *405 U.S. 955 [92 S. Ct. 1173, 31 L. Ed. 2d 232]* (1972). In *Siegel*, the franchisor required all prospective franchisees to purchase from it cookers, fryers, packing supplies, and mixes as a condition of obtaining a license to use the franchisor trademark. Holding that economic harm was not inferable automatically from the **[**31]** occurrence of tie-in, the Ninth Circuit offered a specific guideline from which the fact of concrete financial damage must be demonstrated:

> ***HN15***[] To ascertain whether an unlawful arrangement for the sale of products has caused injury to the purchaser, the cost or value of the products involved, free from the unlawful arrangement, must first be ascertained.

448 F.2d at 52. Recently, the Eleventh Circuit in *Kypta v. McDonald's Corp., 671 F.2d 1282 (11th Cir.1982)*, indicated that *Siegel* stands for the proposition that injury resulting from a tie-in must be shown by establishing that payments for both the tied and tying products exceeded their combined fair market value. *Id., at 1285*. The court amplified as follows:

> The rationale behind this requirement is apparent: A determination of the value of the tied products alone would not indicate whether the plaintiff indeed suffered any net economic harm, since a lower price might conceivably have been exacted by the franchisor for the tying product. Unless the fair market value of both the tied and tying products are determined and an overcharge and a complete price found, no injury can be claimed; suit, **[**32]** then, would be foreclosed.

Id. In *Kypta*, a franchisee brought an action against a franchisor alleging antitrust violations by requiring all franchisees to be tenants of the franchisor and to pay the franchisor a non-assignable, interest-free security deposit. The court held that since the franchisee failed to come forward with any evidence of actual injury caused by the alleged real estate tie-in, the franchisee could not recover against the franchisor.

With respect to plaintiff's assertion of injury resulting from the purchase of equipment from The Hickman Company, plaintiff fails to show the value of both the Waffle House franchise license and equipment purchased from Hickman. Furthermore, plaintiff does not refer to any comparable **[*719]** equipment that could have been obtained from other sources at cheaper prices, thereby estimating the value of the package compared to other alternative products. Plaintiff simply relies on the fact that Hickman charged the Waffle House Company restaurants less than it charged franchisees. This, however, provides no evidence that plaintiff suffered any net economic harm from the alleged illegal tying arrangement involving **[**33]** Hickman. In addition, defendants explain this difference in price as a result of the recommendations by Waffle House's accounting firm, beginning in 1976, that generally accepted accounting principles precluded Hickman Company, a wholly owned subsidiary of Waffle House, from factoring in any profit on sales to Waffle House. Defendants' Memorandum in Response to Plaintiff's "Papers" on the Issue of Antitrust Injury, at 5. Simply put, the difference in price charged by The Hickman Company in no way indicates that plaintiff could have obtained equivalent equipment at a lower price from other sources, or that the value of both the Waffle House franchise license and Hickman equipment was less than the price paid by plaintiff.

With respect to plaintiff's assertion of injury on the alleged illegal tying arrangement involving vending services provided by Metro Distributors, plaintiff relies on the payment of 50% of vending income to Waffle House and Metro, and argues that this amount itself establishes antitrust injury. Again, plaintiff has failed to offer any evidence that the overall package was overpriced, and that plaintiff suffered any net economic injury. Furthermore, plaintiff's **[**34]** argument "that a portion of the vending machine net profits were payable to defendants, a practice which would not have existed but for the tie-in," Memorandum of Plaintiff at 24, is misplaced. Plaintiff has not shown that alternative sources of comparable products would have been available, but for the alleged tie. *See Krehl v. Baskin-Robbins Ice Cream Co., 78 F.R.D. 108, 120 (C.D.Cal.1978)*, *aff'd*, *664 F.2d 1348 (9th Cir.1982)*.

Accordingly, defendants are entitled to summary judgment on plaintiff's antitrust claims involving Hickman and Metro for the alleged illegal tying arrangements. *Kypta v. McDonald's Corp., supra.*

III. WHETHER PLAINTIFF HAS ESTABLISHED ANY EVIDENCE OF ANTITRUST INJURY FROM ANY ALLEGED ILLEGAL DIVISION OF TERRITORIES.

In addition to alleging unlawful tying arrangements, plaintiff has alleged that defendant has unlawfully allocated markets. Also, it is alleged that defendant's failure to facilitate expansion within the Illinois territory prevented plaintiff from commercially exploiting the territory which it was granted, thus coercing a forced sale of plaintiff's properties to Waffle House in furtherance of an attempt to monopolize the market. **[**35]** The allegations regarding this attempt to monopolize have previously been decided by this court adversely to plaintiff. Accordingly, the court is of the opinion that none of the alleged foot-dragging and other reputed acts of bad faith relative to the development of the Illinois market are relevant to a decision on the allegations of unlawful territorial allocation.

Plaintiff contends that it was affected in two ways by the territorial allocation policies of Waffle House. First, it was denied the right to enter the Alabama market. *See* Plaintiff's Supplemental Statement of Facts, paras. 10-12. Second, after it was granted a franchise in Illinois, it was denied the right to expand beyond its franchise area. *See id.*, paras. 21, 24, 25, 30.

Plaintiff relies heavily on the fact that officials at Waffle House who had some power over the approval of franchise territories were also owners of franchisees. It is understood that some of these franchisees held a territorial allocation in the State of Alabama. From this, the plaintiff would have the court conclude that the market allocation was horizontal instead of vertical. Generally, horizontal allocations of markets are **[**36]** said to be *per se* violations of the ***antitrust law***, and, therefore, it is **[*720]** unnecessary to make any further showing of their anticompetitive effect.

As the court has noticed previously, there seems to be a genuine issue respecting whether these officials used their power with Waffle House to protect the franchise territories already assigned to their own companies. Under the facts of this case, however, that issue is not material or relevant.

It is said that ***HN16***[] a non-price horizontal restraint of trade such as territorial restrictions between competitors are illegal *per se*, because they have no purpose except the stifling of competition. *United States v. Topco Associates, 405 U.S. 596 [92 S. Ct. 1126, 31 L. Ed. 2d 515]* (1972); *United States v. Sealy, 388 U.S. 350 [87 S. Ct. 1847, 18 L. Ed. 2d 1238]* (1967). On the other hand, territorial restrictions of a "vertical" nature (between the parties at different levels of the market structure) -- such as those which may be contained in franchising agreements -- are analyzed under a rule of reason, because they promote interbrand competition by allowing the franchisor or manufacturer to achieve certain efficiencies **[**37]** in the distribution of his goods and services. *Continental TV, Inc. v. GTE Sylvania, Inc., 433 U.S. 36 [97 S. Ct. 2549, 53 L. Ed. 2d 568]* (1977). The reasonableness of a particular non-price vertical restraint is judged by whether it produces an anticompetitive effect in interbrand competition in the relevant geographic and product markets and not merely by whether it reduces intrabrand competition. *Carlson Machine Tools, Inc. v. American Tool, Inc., 678 F.2d 1253, 1262 (5th Cir.1982)*.

This distinction is plausible where the allocation facilitates price maintenance in the relevant product market, but it is implausible where the allocation does not act as a bar to entry or competition in the relevant market. As noted previously, whatever the relevant market is here, it is a great deal broader than the Waffle House system and encompasses much, if not all, of the fast food industry. [2] Where the relevant market is so much larger than that portion which may be influenced by certain horizontal competitors, it cannot be seriously contended that whatever restrictions are imposed in fact appreciably stifle competition. Consequently, after further reflection, this court is of **[**38]** the opinion that for the purposes of this case, the territorial allocations of Waffle House should be viewed as though they are vertical and shall be therefore analyzed under the rule of reason.

[39]** A different approach leads to this same point for the beginning of the analysis. Because of the symbiotic relationship between Waffle House and some of its franchisees, and because Waffle House itself operates restaurants, it might be considered that a dual distributorship exists in the case at bar. Dual distributorships exist where the franchisor not only licenses independent franchisees but also operates its own franchises. As the franchisor, the company is vertically related to its franchisees. As a franchisee it is horizontally related. There is an emerging tendency by the courts to view the primary relationship between a dual distributor and an independent franchisee as vertical where the restrictions do not lessen interbrand competition or decrease the availability of goods or services. *See, e.g., Copy-Data Systems, Inc. v. Toshiba America, Inc., 663 F.2d 405 (2d Cir.1981)*; *Krehl v. Baskin-Robbins* ***[*721]*** *Ice Cream Co., 664 F.2d 1348 (9th Cir.1982)*.

Because there is no evidence here that the territorial allocation made by Waffle House even under the circumstances alleged by the plaintiff, has the tendency to reduce interbrand competition, reduce the availability **[**40]** of services within the relevant market area, or artificially maintain prices, a rule of reason analysis is appropriate.

HN17[] Franchisors, like other businessmen generally, have the right to select unilaterally those with whom they deal and to exercise their own discretion in continuing or terminating existing franchisees. *Compare United States v. Colgate, 250 U.S. 300 [39 S. Ct. 465, 63 L. Ed. 992]* (1919). The antitrust laws are designed to protect the consumer interest in competition, *Reiter v. Sonotone Corp., 442 U.S. 330 [99 S. Ct. 2326, 60 L. Ed. 2d 931]* (1979), and courts recognize that giving wide latitude to businesses in choosing methods of distribution and particular distributors promotes competition. *A.H. Cox & Co. v. Star Machinery Co., 653 F.2d 1302 (9th Cir.1981)*. Thus, the threat of a treble damages judgment arises only from those refusals to deal which are part of a plan of anti-competitive conduct involving more than one party. *Brattleboro Auto Sales, Inc. v. Subaru, Inc., 633 F.2d 649 (2d Cir.1980)*; *Hawkins v. Holiday Inns, Inc., 634 F.2d 342 (6th Cir. 1980)*, *cert. denied*, *451 U.S. 987 [101 S. Ct. 2322, 68 L. Ed. 2d 845]* (1981).

HN18[] In a **[**41]** franchisor-franchisee context, the cases uphold the right of a franchisor to refuse to grant a franchisee or to terminate a franchise as long as no anti-competitive motives for or effects of the franchisor's action exists. For example, in *Ron Tonkin Gran Turismo, Inc. v. Fiat Distributors, Inc., 637 F.2d 1376* (9th Cir.), *cert. denied*, *454 U.S. 831 [102 S. Ct. 128, 70 L. Ed. 2d 109]* (1981), an automobile dealer brought an action against an automobile distributor and another dealer alleging federal antitrust violations as a result of the distributor's rejection of plaintiff's franchise application. The district court granted summary judgment for the distributor. The Ninth Circuit affirmed. On the issue of group boycott or concerted refusal to deal, the court held that because of the distributor's small percentage of the relevant market, the distributor's decision not to appoint an additional dealer cannot be perceived as so plainly anticompetitive so as to utilize a *per se* rule. *Id. at 1388*. As the court cogently stated:

---

[2] The process of defining a relevant market is well stated by Professor Areeda:

> A vast number of firms might have some actual or potential effect on a defendant's behavior. Many of them, however, will not have a significant effect and we attempt to exclude them from the "relevant market" for appraising defendant's power. We try to include in the relevant market only those suppliers -- of this same or related product in the same or related geographic area -- whose existence significantly restrains defendant's power. This process of inclusion and exclusion is spoken of as "market definition."

P. Areeda, Antitrust Analysis: Problems, Text, Cases para. 231, at 239-40 (1981).

Here, generally speaking, the relevant market is restaurants similar to Waffle House -- those with similar menus, hours, and service.

"Appellant has simply failed to evince 'significant probative evidence' of a substantially adverse effect on competition." *Id.* Furthermore, **[**42]** the court provided the following interest analysis:

> Businessmen may, within certain limits, decide to deal with whom they wish. Our conclusion, or a plaintiff's, that a defendant exercised poor business judgment, that a defendant treated someone unfairly, or that a potential competitor has been injured does not mean that the antitrust laws have been violated. The cases discussed above indicate that the courts are reluctant to interfere with a company's business decision to distribute its products in a particular fashion. We do not expect businesses to be run in an altruistic fashion, but, particularly when there is vigorous interbrand competition, "the interests of the manufacturer and a consumer with regard to product distribution coincide." 92 Harv.L.Rev. 1160, 1164 (1979). It is the interests of FDI to see that its product is distributed in an efficient fashion. The economic interests of FDI dictate that it seek to improve sales. It is clear that the desire to stimulate sales was a factor in FDI's decision not to appoint an additional dealer. Appellant seems to recognize this, but it continues to attach talismanic significance to the existence of an additional competitor. **[**43]** The antitrust laws are concerned with competition and we must recognize that FDI's decision not to appoint an additional dealer in an effort to expand its small share of the market had the potential to benefit competition. Accordingly we cannot say that the use of a *per se* rule would be justified. There is assuredly no "significant probative evidence" which would indicate that the **[*722]** challenged product had or was likely to have a pernicious effect on competition or lacked any redeeming virtue.

Id. at 1387-88. *See also* *Continental TV v. GTE, 433 U.S. 36, 58 [97 S. Ct. 2549, 2561, 53 L. Ed. 2d 568]* (1977); *Walner v. Baskin-Robbins Ice Cream Co., 514 F. Supp. 1028 (N.D.Tex.1981)* (franchisor's refusal to approve transfers of franchises upheld in absence of evidence of anti-competitive effect).

Indeed, franchising has stimulated the entry of additional competitors into the marketplace because of the numerous advantages that it offers to both the franchisor and franchisee. From the standpoint of the franchisee, franchising offers:

> (i) The likelihood of lower start-up capital;
>
> (ii) Management assistance and technical training provided **[**44]** by the franchisor;
> (iii) The pre-existing good will and consumer acceptance inherent in dealing with a proven product;
> (iv) Economies in purchasing and advertising equivalent to those available to chain store businesses.

2 Von Kalinowski, Antitrust Laws and Trade Regulation, § 6H.01, at 6H-3-4 (1981). From the standpoint of the franchisor, franchising provides the following advantages:

> (1) Minimal capital investment;
> (2) Site selection;
> (3) Dealer selection;
> (4) Quality control;
> (5) Consistent pattern of dealings;
> (6) Pricing policies; and
> (7) Territorial controls.

Id. at 6H-3-4. Considering the relevant market in this case, it can be noticed that the franchising system has worked well in fostering entrance into the marketplace by many different purveyors of fast food. There is no showing here that the territorial allocation has any pernicious effect on competition within the marketplace or that it lacks any virtue. It is, then, not immediately obvious that the fact pattern before the court shows an anticompetitive effect.

Further, the refusal to allow Midwestern to operate in Alabama or elsewhere outside of Illinois does not **[**45]** restrict its right to trade at all in that market. Plaintiff has no protected right to operate under defendants' trademark and utilize defendants' expertise and good will in a market of its own choosing. As early as 1919, the Supreme Court stated:

> The purpose of the Sherman Act is to prohibit monopolies, contracts and combinations which probably would unduly interfere with the free exercise of their rights by those engaged, or who wish to engage, in trade in commerce -- in a word to preserve the right of freedom to trade. In the absence of any purpose to create or maintain a monopoly, the act does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal. And, of course, he may announce in advance the circumstances under which he will refuse to sell.

Colgate, 250 U.S. at 307 [39 S. Ct. at 468]. It cannot be said, then, that plaintiff's frustrated wishes to operate a Waffle House restaurant in Alabama constitute a harm protectible under the ***antitrust law*** contained in *15 U.S.C. § 1*.

Further, the court would note that plaintiff **[**46]** cannot seriously contend that those things allegedly done by Waffle House which plaintiff contends prohibited it from expanding within its allocated Illinois territory is the result of any conspiracy among the franchisees controlled by Waffle House personnel and Waffle House. The final outcome of the adventure in Illinois speaks too strongly to the contrary. Waffle House bought out Midwestern. It kept the territory. There is no evidence that a specially favored franchisee profited from Midwestern's allegedly coerced sellout.

IV. ANTITRUST INJURY.

HN19[] In any antitrust case the plaintiff must show antitrust injury of two types. First, he must show an injury to himself causally linked to illegal activities of the **[*723]** defendant. Second, he must show that the defendants' activities have the effect of stifling competition. *Brunswick Corporation v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477 [97 S. Ct. 690, 50 L. Ed. 2d 701]* (1977). As just discussed, this court is of the opinion that the territorial allocation policies of Waffle House do not materially affect the competitive environment within the relevant market. Even if a contrary result were reached under either a rule **[**47]** of reason analysis or because the territorial allocation was said to be horizontal and thus a *per se* violation, the court finds that the defendant has not demonstrated an injury to itself proximately caused by the territorial allocations.

In support of its position that it was injured from territorial restrictions, plaintiff submits the following:

> (a) An affidavit from James L. Dent, Jr. which purports to establish that franchise operations will make more money if they are able to benefit from "economies of scale." *See* Plaintiff's Memorandum of Authorities, at 19-20; Affidavit of James L. Dent, Jr., paras. 6-7.
>
> (b) A comparison of profits between Midwestern's operations and those of other franchisees, such as Columbia Foods and Treetop, to establish that the operation of more restaurants suggests that more net profits will be generated. *See* Plaintiff's Memorandum of Authorities, at 16, 20; Statement, para. 35.
>
> (c) A comparison of the profits of plaintiff's two restaurants in Illinois before and after plaintiff ceased to operate them. *See* Plaintiff's Memorandum of Authorities, at 22, 25; Statement, para. 34.

This evidence shows only that Midwestern **[**48]** Waffles could have made more money in the franchise area it was granted if Waffle House had allowed it to establish additional restaurants so that it could benefit from the "economies of scale." The conduct which allegedly caused this injury was the failure of Waffle House to allow Midwestern to expand out of its franchise territory and/or into Alabama. There is no allegation by plaintiff that the territory granted was so restricted that it could not allow economies of scale if developed. For example, the court would notice that within the areas bounded by suburban St. Louis and 42 counties in central Illinois, there were undoubtedly many other locations well suited for the erection of additional restaurants.

Plaintiff must show that it was prepared and ready, willing and able to expand into other territories if it had been allowed. Beyond stating that it asked leave to operate in Alabama and other states, it has shown nothing concerning its ability to finance such expansion or to manage it. On this point alone it fails even to create an issue of fact for a jury. *Hayes v. Solomon, 597 F.2d 958 (5th Cir.1979)*. Further, it makes no effort to project any economic losses from **[**49]** its inability to operate restaurants in Selma or Alabama or Texas or elsewhere, taking into account the competitive environments in those other markets, the geographic dispersion of its operations as it might affect the economies of scale, and its ability to operate any Waffle House on a profitable basis. Nowhere does the court find any analysis of the cost of capital or facilities or projections made taking into account variations in the cost of supplies, food, and labor. The plaintiff contends that it was injured because it was not allowed to enter into trade. It was, in fact, allowed to enter into trade in one market area, and from the evidence adduced, it never made a profit. This court will not assume that plaintiff could have operated Waffle House restaurants in Alabama any more successfully than it operated them in Illinois in the absence of some concrete evidence of that fact in the record.

Accordingly, the court is of the opinion that the plaintiff has failed to demonstrate an economic injury to its business or property, [3] much less injury proximately caused by the territorial allocations of the defendant.

[50]** **[*724]** V. CONCLUSION.

On March 15, 1982, this court made four conclusions: (1) Rex Waldrop does not have standing; (2) defendants are entitled to summary judgment on plaintiff's claim that defendants violated *Section 2* of the Sherman Act by engaging in a monopoly; (3) defendants are entitled to summary judgment as to plaintiff's claims of restraints of trade, other than the alleged horizontal territorial allocation and the alleged illegal ties; and (4) defendants are entitled to summary judgment on plaintiff's state law claims for antitrust damages, unjust enrichment, tortious interference with contract, and unfair competition.

Given the conclusions reached today, defendants' motion for summary judgment is hereby GRANTED.

The Clerk of Court is hereby DIRECTED to enter judgment for the defendants.

End of Document

[3] Section 4 of the Clayton Act *15 U.S.C. § 15* ***HN20***[] conditions a private action on this showing. Even if the practice is a *per se* violation of the law, the plaintiff must show economic injury to itself. *Warriner Hermetics, Inc. v. Copeland Refrigeration, 463 F.2d 1002, 1016 (5th Cir.1972)*. Said another way, plaintiff must show the fact of injury which means that what the defendant did impacted in some way on plaintiff's business. To show injury means that plaintiff must be able to demonstrate that it suffered economic damages which are quantifiable. *McClure v. Undersea Industries, 671 F.2d 1287, 1289 (11th Cir.1982)*. *See also Keener v. Sizzler Family Steak Houses, 597 F.2d 453 (5th Cir.1979)*; *H & B Equipment Co. v. Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN2[] **Monopolies & Monopolization, Actual Monopolization**

The Sherman Act contains a basic distinction between concerted and independent action. The conduct of a single firm is governed by 15 U.S.C.S. § 2 alone and is unlawful only when it threatens actual monopolization. It is not enough that a single firm appears to restrain trade unreasonably, for even a vigorous competitor may leave that impression.

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Antitrust > Vertical Acquisitions

HN4[] Price Fixing & Restraints of Trade, Horizontal Market Allocation

Section 1 of the Sherman Act, 15 U.S.C.S. § 1, reaches unreasonable restraints of trade effected by a contract, combination or conspiracy between separate entities. It does not reach conduct that is "wholly unilateral." Concerted activity subject to § 1 is judged more sternly than unilateral activity under § 2. Certain agreements, such as horizontal price fixing and market allocation, are thought so inherently anticompetitive that each is illegal per se without inquiry into the harm it has actually caused. Other combinations, such as mergers, joint ventures, and various vertical agreements, hold the promise of increasing a firm's efficiency and enabling it to compete more effectively. Accordingly, such combinations are judged under a rule of reason, an inquiry into market power and market structure designed to assess the combination's actual effect. Whatever form the inquiry takes, however, it is not necessary to prove that concerted activity threatens monopolization.

A *15 U.S.C.S. § 1* agreement may be found when the conspirators had a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement.

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] **Antitrust & Trade Law, Sherman Act**

A parent corporation and its wholly owned subsidiary are incapable of conspiring with each other for purposes of *§ 1* of the Sherman Act. To the extent that prior decisions of the United States Supreme Court are to the contrary, they are disapproved and overruled.

Lawyers' Edition Display

Decision

Parent corporation and its wholly owned subsidiary held incapable of conspiring with each other for purposes of 1 of Sherman Act (*15 USCS 1*).

Summary

A steel tubing company brought an antitrust suit in the United States District Court for the Northern District of Illinois against a competing corporation, that corporation's wholly owned subsidiary, and a supplier of tubing mills. The jury found that the parent corporation and its wholly owned subsidiary had conspired to violate 1 of the Sherman Act (*15 USCS 1*), but that the supplier was not part of the conspiracy. The jury also found that the parent company, but not the subsidiary, had interfered with the tubing company's contractual relationship with the supplier, that the subsidiary, but not the parent, had interfered with the tubing company's contractual relationship with a potential customer and had slandered the tubing company, and that the supplier had breached its contract to supply a tubing mill. The United States Court of Appeals for the Seventh Circuit affirmed (*691 F2d 310*).

On certiorari, the United States Supreme Court reversed. In an opinion by Burger, Ch. J., joined by Blackmun, Powell, Rehnquist, and O'Connor, JJ., it was held that a parent corporation and its wholly owned subsidiary are legally incapable of conspiring with each other under 1 of the Sherman Act. The court said that the coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of 1, and that 1 is limited to concerted conduct and does not prohibit conduct that is wholly unilateral.

Stevens, J., joined by Brennan and Marshall, JJ., dissented, expressing the view that a parent corporation and a wholly owned subsidiary corporation are capable of conspiring in violation of 1 and that the rule announced in the majority opinion was inconsistent with what the Supreme Court has held on at least seven previous occasions.

White, J., did not participate.

Headnotes

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §34 > parent and subsidiary corporation -- conspiracy -- > Headnote:
LEdHN[1A][] [1A]***LEdHN[1B]***[] [1B]***LEdHN[1C]***[] [1C]***LEdHN[1D]***[] [1D]

A parent corporation and its wholly owned subsidiary are legally incapable of conspiring with each other under 1 of the Sherman Act (*15 USCS 1*); the coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of 1. (Stevens, Brennan, and Marshall, JJ., dissented from this holding.)

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §34 > pattern of acquisitions -- illegal combination -- > Headnote:
LEdHN[2][] [2]

A pattern of acquisitions may itself create a combination illegal under 1 of the Sherman Act (*15 USCS 1*), especially when an original anticompetitive purpose is evident from the affiliated corporations' subsequent conduct.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §41 > combination between subsidiaries and wholesalers -- resale price -- > Headnote:
LEdHN[3A][] [3A]***LEdHN[3B]***[] [3B]

A combination involving a maximum resale pricing scheme between subsidiaries and wholesalers can violate 1 of the Sherman Act (*15 USCS 1*).

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §9 > conduct of single firm -- > Headnote:
LEdHN[4][] [4]

Under the Sherman Act, the conduct of a single firm is governed by 2 of the Act (*15 USCS 2*) alone and is unlawful only when it threatens actual monopolization; it is not enough that a single firm appears to "restrain trade" unreasonably, for even a vigorous competitor may leave that impression.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §9 > concerted and unilateral conduct -- > Headnote:
LEdHN[5A][] [5A]***LEdHN[5B]***[] [5B]

By making a conspiracy to monopolize unlawful, 2 of the Sherman Act (*15 USCS 2*) reaches both concerted and unilateral behavior, but purely unilateral conduct is illegal only under 2 and not under 1 of the Act (*15 USCS 1*); monopolization without conspiracy is unlawful under 2, but restraint of trade without a conspiracy or combination is not unlawful under 1.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §6 > purpose of antitrust laws -- > Headnote:
LEdHN[6A][] [6A]***LEdHN[6B]***[] [6B]

The antitrust laws were enacted for the protection of competition, not competitors.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §9 > separate entities -- unilateral conduct -- > Headnote:
LEdHN[7][] [7]

Section 1 of the Sherman Act (*15 USCS 1*) reaches unreasonable restraints of trade effected by a contract, combination, or conspiracy between separate entities; it does not reach conduct that is wholly unilateral.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §9 > horizontal price fixing -- market allocation -- > Headnote:
LEdHN[8][] [8]

Horizontal price-fixing agreements and market allocation agreements are illegal per se under 1 of the Sherman Act (*15 USCS 1*) without inquiry into the harm they have actually caused.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §9 > mergers -- joint ventures -- vertical agreements -- > Headnote:
LEdHN[9][] [9]

For purposes of 1 of the Sherman Act (*15 USCS 1*), mergers, joint ventures, and various vertical agreements are judged under a rule of reason, an inquiry into market power and market structure designed to assess the combination's actual effect.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §9 > concerted activity -- > Headnote:
LEdHN[10][] [10]

It is not necessary to prove that concerted activity threatens monopolization in order for there to be a violation of 1 of the Sherman Act (*15 USCS 1*).

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §34 > conspiracy -- officers or employees of same firm -- > Headnote:
LEdHN[11][] [11]

Officers or employees of the same firm do not provide the plurality of actors imperative for a conspiracy under 1 of the Sherman Act (*15 USCS 1*); an internal "agreement" to implement a single, unitary firm's policies does not raise the antitrust dangers that 1 was designed to police.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §34 > conspiracy -- corporate officers -- > Headnote:
LEdHN[12A][] [12A]***LEdHN[12B]***[] [12B]***LEdHN[12C]***[] [12C]***LEdHN[12D]***[] [12D]

Corporations are incapable of conspiring with their own officers or employees for purposes of 1 of the Sherman Act (*15 USCS 1*).

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §9 > activities of single firm -- > Headnote:
LEdHN[13A][] [13A]***LEdHN[13B]***[] [13B]

Section 1 of the Sherman Act (*15 USCS 1*) excludes from unlawful combinations or conspiracies the activities of a single firm.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §34 > conduct of corporation and unincorporated division -- > Headnote:
LEdHN[14][] [14]

Section 1 of the Sherman Act (*15 USCS 1*) is not violated by the internally coordinated conduct of a corporation and one of its unincorporated divisions; the operations of a corporate enterprise organized into divisions must be judged as the conduct of a single actor.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §10 > conspiracy -- unity of purpose -- > Headnote:
LEdHN[15][] [15]

An agreement violating 1 of the Sherman Act (*15 USCS 1*) may be found when the conspirators had a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §9 > single firm -- anticompetitive conduct -- > Headnote:
LEdHN[16][] [16]

The Sherman Act does not prohibit a single firm's anticompetitive conduct (short of threatened monopolization) that may be indistinguishable in economic effect from the conduct of two firms subject to liability under 1 of the Act (*15 USCS 1*).

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §9 > Sherman Act -- concerted conduct -- > Headnote:
LEdHN[17][] [17]

Section 1 of the Sherman Act (*15 USCS 1*) is limited to concerted conduct.

Syllabus

Petitioner Copperweld Corp. purchased petitioner Regal Tube Co., a manufacturer of steel tubing, from Lear Siegler, Inc., which had operated Regal as an unincorporated division, and which under the sale agreement was bound not to compete with Regal for five years. Copperweld then transferred Regal's assets to a newly formed, wholly owned subsidiary. Shortly before Copperweld acquired Regal, David Grohne, who previously had been an officer of Regal, became an officer of Lear Siegler, and, while continuing to work for Lear Siegler, formed respondent corporation to compete with Regal. Respondent then gave Yoder Co. a purchase order for a tubing mill, but Yoder voided the order when it received a letter from Copperweld warning that Copperweld would be greatly **[****2]** concerned if Grohne contemplated competing with Regal and promising to take the necessary steps to protect Copperweld's rights under the noncompetition agreement with Lear Siegler. Respondent then arranged to have a mill supplied by another company. Thereafter, respondent filed an action in Federal District Court against petitioners and Yoder. The jury found, *inter alia*, that petitioners had conspired to violate *§ 1* of the Sherman Act but that Yoder was not part of the conspiracy, and awarded treble damages against petitioners. The Court of Appeals affirmed. Noting that the exoneration of Yoder from antitrust liability left a parent corporation and its wholly owned subsidiary as the only parties to the *§ 1* conspiracy, the court questioned the wisdom of subjecting an "intra-enterprise" conspiracy to antitrust liability, but held that such liability was appropriate "when there is enough separation between the two entities to make treating them as two independent actors sensible," and that there was sufficient evidence for the jury to conclude that Regal was more like a separate corporate entity than a mere service arm of the parent.

Held: Petitioner Copperweld and its **[****3]** wholly owned subsidiary, petitioner Regal, are incapable of conspiring with each other for purposes of *§ 1* of the Sherman Act. Pp. 759-777.

(a) While this Court has previously seemed to acquiesce in the "intra-enterprise conspiracy" doctrine, which provides that *§ 1* liability is not foreclosed merely because a parent and its subsidiary are subject to common ownership, the Court has never explored or analyzed in detail the justifications for such a rule. Pp. 759-766.

(b) *Section 1* of the Sherman Act, in contrast to *§ 2*, reaches unreasonable restraints of trade effected by a "contract, combination . . . or conspiracy" between *separate* entities, and does not reach conduct that is "wholly unilateral." Pp. 767-769.

(c) The coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1* of the Sherman Act. A parent and its wholly owned subsidiary have a complete unity of interest. Their objectives are common, not disparate, and their general corporate objectives are guided or determined not by two separate corporate consciousnesses, but one. With or without a formal "agreement," the subsidiary acts for the parent's **[****4]** benefit. If the parent and subsidiary "agree" to a course of action, there is no sudden joining of economic resources that had previously served different interests, and there is no justification for *§ 1* scrutiny. In reality, the parent and subsidiary *always* have a "unity of purpose or a common design." The "intra-enterprise conspiracy" doctrine relies on artificial distinctions, looking to the form of an enterprise's structure and ignoring the reality. Antitrust liability should not depend on whether a corporate subunit is organized as an unincorporated division or a wholly owned subsidiary. Here, nothing in the record indicates any meaningful difference between Regal's operations as an unincorporated division of Lear Siegler and its later operations as a wholly owned subsidiary of Copperweld. Pp. 771-774.

(d) The appropriate inquiry in this case is not whether the coordinated conduct of a parent and its wholly owned subsidiary may ever have anticompetitive effects or whether the term "conspiracy" will bear a literal construction that includes a parent and its subsidiaries, but rather whether the logic underlying Congress' decision to exempt unilateral conduct from scrutiny **[****5]** under *§ 1* of the Sherman Act similarly excludes the conduct of a parent and subsidiary. It can only be concluded that the coordinated behavior of a parent and subsidiary falls outside the reach of *§ 1*. Any anticompetitive activities of corporations and their wholly owned subsidiaries meriting antitrust remedies may be policed adequately without resort to an "intra-enterprise conspiracy" doctrine. A corporation's initial acquisition of control is always subject to scrutiny under *§ 1* of the Sherman Act and *§ 7* of the Clayton Act, and thereafter the enterprise is subject to *§ 2* of the Sherman Act and § 5 of the Federal Trade Commission Act. Pp. 774-777.

Counsel: Erwin N. Griswold argued the cause for petitioners. With him on the briefs were William R. Jentes, Sidney N. Herman, Robert E. Shapiro, and Donald I. Baker.

Deputy Solicitor General Wallace argued the cause for the United States as amicus curiae urging reversal. With him on the brief were Solicitor General Lee, Assistant Attorney General Baxter, Deputy Assistant Attorney General Collins, Carolyn F. Corwin, Barry Grossman, and Nancy C. Garrison.

Victor E. Grimm argued the cause for respondent. With him on the brief **[****6]** were John R. Myers and Scott M. Mendel. [*]

G. McClintock, Attorney General of Wyoming, and Gay Vanderpoel, Senior Assistant Attorney General; Inez Smith Reid, Acting Corporation Council for the District of Columbia, and Francis S. Smith, Assistant Corporation Council.

Briefs of amici curiae were filed for the Canadian Manufacturers Association et al. by John DeQ. Briggs III, Scott E. Flick, and Jan Schneider; and for Kaiser Aluminum & Chemical Corporation by Milton Handler and John A. Moore.

Judges: BURGER, C. J., delivered the opinion of the Court, in which BLACKMUN, POWELL, REHNQUIST, and O'CONNOR, JJ., joined. STEVENS, J., filed a dissenting opinion, in which BRENNAN and MARSHALL, JJ., joined, post, p. 778. WHITE, J., took no part in the consideration or decision of the case.

Opinion by: BURGER

Opinion

[*755] **[***633]** **[**2733]** CHIEF JUSTICE **BURGER** delivered the opinion of the Court.

LEdHN[1A][] [1A]We granted certiorari to determine whether a parent corporation and its wholly owned subsidiary are legally capable of **[**2734]** conspiring with each other under *§ 1* of the Sherman Act.

I

A

The predecessor to petitioner Regal Tube Co. was established in Chicago in 1955 to manufacture structural steel **[*756]** tubing used in heavy equipment, cargo vehicles, and construction. From 1955 to 1968 it remained a wholly owned subsidiary of C. E. Robinson Co. In 1968 Lear Siegler, Inc., purchased Regal Tube Co. and operated it as an unincorporated division. David Grohne, who had previously served as vice president and general manager of Regal, became president of the division after the acquisition.

[**8]** In 1972 petitioner Copperweld Corp. purchased the Regal division **[***634]** from Lear Siegler; the sale agreement bound Lear Siegler and its subsidiaries not to compete with Regal in the United States for five years. Copperweld then transferred Regal's assets to a newly formed, wholly owned Pennsylvania corporation, petitioner Regal Tube Co. The new subsidiary continued to conduct its manufacturing operations in Chicago but shared Copperweld's corporate headquarters in Pittsburgh.

Shortly before Copperweld acquired Regal, David Grohne accepted a job as a corporate officer of Lear Siegler. After the acquisition, while continuing to work for Lear Siegler, Grohne set out to establish his own steel tubing business to compete in the same market as Regal. In May 1972 he formed respondent Independence Tube Corp., which soon secured an offer from the Yoder Co. to supply a tubing mill. In December 1972 respondent gave Yoder a purchase order to have a mill ready by the end of December 1973.

When executives at Regal and Copperweld learned of Grohne's plans, they initially hoped that Lear Siegler's non-competition agreement would thwart the new competitor. Although their lawyer advised **[****9]** them that Grohne was not bound by the agreement, he did suggest that petitioners might obtain an injunction against Grohne's activities if he made use of any technical information or trade secrets belonging to Regal. The legal opinion was given to Regal and Copperweld along with a letter to be sent to anyone with whom Grohne attempted to deal. The letter warned that Copperweld would be "greatly concerned if [Grohne] contemplates **[*757]** entering the structural tube market . . . in competition with Regal Tube" and promised to take "any and all steps which are necessary to protect our rights under the terms of our purchase agreement and to protect the know-how, trade secrets, etc., which we purchased from Lear Siegler." Petitioners later asserted that the letter was intended only to prevent third parties from developing reliance interests that might later make a court reluctant to enjoin Grohne's operations.

When Yoder accepted respondent's order for a tubing mill on February 19, 1973, Copperweld sent Yoder one of these letters; two days later Yoder voided its acceptance. After respondent's efforts to resurrect the deal failed, respondent arranged to have a mill supplied by **[****10]** another company, which performed its agreement even though it too received a warning letter from Copperweld. Respondent began operations on September 13, 1974, nine months later than it could have if Yoder had supplied the mill when originally agreed.

Although the letter to Yoder was petitioners' most successful effort to discourage those contemplating doing business with respondent, it was not their only one. Copperweld repeatedly contacted banks that were considering financing respondent's operations. One or both petitioners also approached real estate firms that were considering providing plant space to respondent and contacted prospective suppliers and customers of the new company.

B

In 1976 respondent filed this action in the District Court against **[***635]** petitioners and Yoder. [1] The jury found that **[*758]** Copperweld **[**2735]** and Regal had conspired to violate *§ 1* of the Sherman Act, 26 Stat. 209, as amended, *15 U. S. C. § 1*, but that Yoder was not part of the conspiracy. It also found that Copperweld, but not Regal, had interfered with respondent's contractual relationship with Yoder; that Regal, but not Copperweld, had interfered with **[****11]** respondent's contractual relationship with a potential customer of respondent, Deere Plow & Planter Works, and had slandered respondent to Deere; and that Yoder had breached its contract to supply a tubing mill.

[**12]** At a separate damages phase, the judge instructed the jury that the damages for the antitrust violation and for the inducement of the Yoder contract breach should be identical and not double counted. The jury then awarded $ 2,499,009 against petitioners on the antitrust claim, which was trebled to $ 7,497,027. It awarded $ 15,000 against Regal alone on the contractual interference and slander counts pertaining to Deere. The court also awarded attorney's fees and costs after denying petitioners' motions for judgment n.o.v. and for a new trial.

C

The United States Court of Appeals for the Seventh Circuit affirmed. *691 F.2d 310 (1982)*. It noted that the exoneration of Yoder from antitrust liability left a parent corporation and its wholly owned subsidiary as the only parties to the *§ 1* conspiracy. The court questioned the wisdom of subjecting an "intra-enterprise" conspiracy to antitrust liability, when the same conduct by a corporation and an unincorporated **[*759]** division would escape liability for lack of the requisite two legal persons. However, relying on its decision in *Photovest Corp*. v. *Fotomat Corp., 606 F.2d 704 (1979)*, cert. **[****13]** denied, *445 U.S. 917 (1980)*, the Court of Appeals held that liability was appropriate "when there is enough separation between the two entities to make treating them as two independent actors sensible." *691 F.2d, at 318*. It held that the jury instructions took account of the proper factors for determining how much separation Copperweld and Regal in fact maintained in the conduct of their businesses. [2] It also held that there **[***636]** was sufficient evidence for the jury to conclude that Regal was more like a separate corporate entity than a mere service arm of the parent.

[**14]** We granted certiorari to reexamine the intra-enterprise conspiracy doctrine, *462 U.S. 1131 (1983)*, and we reverse.

II

---

[1] The chairman of the board and chief executive officer of both Copperweld and Regal, Phillip H. Smith, was also named as a defendant. In addition, respondents originally charged petitioners and Smith with an attempt to monopolize the market for structural steel tubing in violation of *§ 2* of the Sherman Act, 26 Stat. 209, as amended, *15 U. S. C. § 2*. Before trial respondent dismissed Smith as a defendant and dismissed its *§ 2* monopolization count.

Petitioners counterclaimed on the ground that respondent and Grohne had used proprietary information belonging to Regal, had competed unfairly by hiring away key Regal personnel, and had interfered with prospective business relationships by filing the lawsuit on the eve of a large Copperweld debenture offering. At the close of the evidence, the court directed a verdict against petitioners on their counterclaims. The disposition of these claims is not at issue before this Court.

[2] The jury was instructed to consider many different factors: for instance, whether Copperweld and Regal had separate management staffs, separate corporate officers, separate clients, separate records and bank accounts, separate corporate offices, autonomy in setting policy, and so on. The jury also was instructed to consider "any other facts that you find are relevant to a determination of whether or not Copperweld and Regal are separate and distinct companies." App. to Pet. for Cert. B-9.

Review of this case calls directly into question whether the coordinated acts of a parent and its wholly owned subsidiary can, in the legal sense contemplated by *§ 1* of the Sherman Act, constitute a combination or conspiracy. [3] The so-called "intra-enterprise **[**2736]** conspiracy" doctrine provides that *§ 1* liability is not foreclosed merely because a parent and its subsidiary are subject to common ownership. The doctrine derives from declarations in several of this Court's opinions.

[**15] [*760]** In no case has the Court considered the merits of the intra-enterprise conspiracy doctrine in depth. Indeed, the concept arose from a far narrower rule. Although the Court has expressed approval of the doctrine on a number of occasions, a finding of intra-enterprise conspiracy was in all but perhaps one instance unnecessary to the result.

The problem began with *United States v. Yellow Cab Co., 332 U.S. 218 (1947)*. The controlling shareholder of the Checker Cab Manufacturing Corp., Morris Markin, also controlled numerous companies operating taxicabs in four cities. With few exceptions, the operating companies had once been independent and had come under Markin's control by acquisition or merger. The complaint alleged conspiracies under *§§ 1* and *2* of the Sherman Act among Markin, Checker, and five corporations in the operating system. The Court stated that even restraints in a vertically integrated enterprise were not "necessarily" outside of the Sherman Act, observing that an unreasonable restraint

"may result as readily from a conspiracy among those who are affiliated or integrated under common ownership as from a conspiracy among **[****16]** *those who are otherwise independent*. Similarly, any affiliation or integration flowing from an illegal conspiracy cannot insulate the conspirators from the sanctions which Congress has imposed. *The corporate interrelationships of the conspirators, in other words, are not determinative of the applicability of the Sherman Act. That statute is aimed at substance rather than form*. See *Appalachian Coals, Inc*. v. *United States, 288 U.S. 344, 360-361, 376-377*.

"And so in this case, the common ownership and control of the various corporate appellees are impotent to liberate the alleged combination and conspiracy from the impact of the Act. The complaint charges that the restraint of interstate trade was not only **[***637]** effected by the combination of the appellees but was the primary object **[*761]** of the combination. The theory of the complaint . . . is that 'dominating power' over the cab operating companies 'was not obtained by normal expansion . . . but by deliberate, calculated purchase for control.'" *Id., at 227-228* (emphasis added) (quoting *United States v. Reading Co., 253 U.S. 26, 57 (1920))*.

LEdHN[2][] [2] **[****17]** It is the underscored language that later breathed life into the intra-enterprise conspiracy doctrine. The passage as a whole, however, more accurately stands for a quite different proposition. It has long been clear that a pattern of acquisitions may itself create a combination illegal under *§ 1*, especially when an original anticompetitive purpose is evident from the affiliated corporations' subsequent conduct. [4] **[****18]** The

[3] *Section 1* of the Sherman Act provides in pertinent part:

HN1[] "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. Every person who shall make any contract or engage in any combination or conspiracy hereby declared to be illegal shall be deemed guilty of a felony." 26 Stat. 209, as amended, *15 U. S. C. § 1*.

[4] Under the arrangements condemned in *Northern Securities Co*. v. *United States, 193 U.S. 197, 354 (1904)* (plurality opinion), "all the stock [a railroad holding company] held or acquired in the constituent companies was acquired and held to be used in suppressing competition between those companies. It came into existence only for that purpose." In *Standard Oil Co*. v. *United States, 221 U.S. 1 (1911)*, and *United States v. American Tobacco Co., 221 U.S. 106 (1911)*, the trust or holding company device brought together previously independent firms to lessen competition and achieve monopoly power. Although the Court in the latter case suggested that the contracts between affiliated companies, and not merely the original combination, could be

Yellow Cab passage is most fairly read in light of this settled rule. In *Yellow Cab*, the affiliation of the defendants was irrelevant because the original acquisitions were *themselves* illegal. [5] An **[**2737]** affiliation "flowing from an illegal conspiracy" would not avert sanctions. Common ownership and control were irrelevant because restraint of trade was "the primary object of the combination," which was created in a "'deliberate, **[*762]** calculated'" manner. Other language in the opinion is to the same effect. [6]

[**19]** The **[***638]** Court's opinion relies on *Appalachian Coals, Inc*. v. *United States, 288 U.S. 344 (1933)*; however, examination of that case reveals that it gives very little support for the broad doctrine *Yellow Cab* has been thought to announce. On the contrary, the language of Chief Justice Hughes speaking for the Court in *Appalachian Coals* supports a contrary conclusion. After observing that "[the] restrictions the Act imposes are not mechanical or artificial," *288 U.S., at 360*, he went on to state:

[*763] "The argument that integration may be considered a normal expansion of business, while a combination of independent producers in a common selling agency should be treated as abnormal -- that one is a legitimate enterprise and the other is not -- makes but an artificial distinction. The Anti-Trust Act aims at substance." *Id., at 377*. [7]

---

viewed as the conspiracy, *id., at 184*, the Court left no doubt that "the combination in and of itself" was a restraint of trade and a monopolization, *id., at 187*.

[5] Contrary to the dissent's suggestion, *post*, at 779, 788, n. 18, our point is not that *Yellow Cab* found only the initial acquisition illegal; our point is that the illegality of the initial acquisition was a predicate for its holding that any postacquisition conduct violated the Act.

[6] When discussing the fact that some of the affiliated Chicago operating companies did not compete to obtain exclusive transportation contracts held by another of the affiliated companies, the Court stated:

"[The] fact that the competition restrained is that between affiliated corporations cannot serve to negative the statutory violation where, as here, *the affiliation is assertedly one of the means of effectuating the illegal conspiracy not to compete*." *332 U.S., at 229* (emphasis added).

The passage quoted in text is soon followed by a cite to *United States v. Crescent Amusement Co., 323 U.S. 173, 189 (1944)*. *Crescent Amusement* found violations of *§§ 1* and *2* by film exhibitors affiliated (in most cases) by 50 percent ownership. The exhibitors used the monopoly power they possessed in certain towns to force film distributors to give them favorable terms in other towns. The Court found it unnecessary to view the distributors as part of the conspiracy, *id., at 183*, so the Court plainly viewed the affiliated entities themselves as the conspirators. The *Crescent Amusement* Court, however, in affirming an order of divestiture, noted that such a remedy was appropriate when "creation of the combination is itself the violation." *Id., at 189*. This suggests that both *Crescent Amusement* and *Yellow Cab*, which cited the very page on which this passage appears, stand for a narrow rule based on the original illegality of the affiliation.

The dissent misconstrues a later passage in *Crescent Amusement* stating that divestiture need not be limited to those affiliates whose "acquisition was part of the fruits of the conspiracy," *323 U.S., at 189*. See *post*, at 780-781. This meant only that divestiture could apply to affiliates other than those who were driven out of business by the practices of the original conspirators and who were then acquired illegally to increase the combination's monopoly power. See *323 U.S., at 181*. It did not mean that affiliates acquired for lawful purposes were subject to divestiture.

[7] *Appalachian Coals* does state that the key question is whether there is an unreasonable restraint of trade or an attempt to monopolize. "If there is, the combination cannot escape because it has chosen corporate form; and, if there is not, it is not to be condemned because of the absence of corporate integration." *288 U.S., at 377*. *Appalachian Coals*, however, validated a cooperative selling arrangement among independent entities. The statement that intracorporate relationships would be subject to liability under *§ 1* is thus dictum. The statement may also envision merely the limited rule in *Yellow Cab* pertaining to acquisitions that are themselves anticompetitive.

As we shall see, *infra*, at 771-774, it is the intra-enterprise conspiracy doctrine itself that "makes but an artificial distinction" at the expense of substance.

[**20]** The ambiguity of the *Yellow Cab* holding yielded the one case giving support to the intra-enterprise conspiracy doctrine. [8] In *Kiefer-Stewart Co*. v. *Joseph E. Seagram & Sons, Inc., 340 U.S. 211 (1951)*, the Court held that two wholly owned subsidiaries of a liquor distiller **[**2738]** were guilty under *§ 1* of the Sherman Act for jointly refusing to supply a wholesaler who declined to abide by a maximum resale pricing scheme. The Court offhandedly dismissed the defendants' argument **[*764]** that "their status as 'mere instrumentalities of a single manufacturing-merchandizing unit' makes **[***639]** it impossible for them to have conspired in a manner forbidden by the Sherman Act." *Id., at 215*. With only a citation to *Yellow Cab* and no further analysis, the Court stated that the

"suggestion runs counter to our past decisions that common ownership and control does not liberate corporations from the impact of the antitrust laws"

and stated that this rule was "especially applicable" when defendants "hold themselves out as competitors." *340 U.S., at 215*.

[**21]** ***LEdHN[3A]***[] [3A]Unlike the *Yellow Cab* passage, this language does not pertain to corporations whose initial affiliation was itself unlawful. In straying beyond *Yellow Cab*, the *Kiefer-Stewart* Court failed to confront the anomalies an intra-enterprise doctrine entails. It is relevant nonetheless that, were the case decided today, the same result probably could be justified on the ground that the subsidiaries conspired with wholesalers other than the plaintiff. [9] An intra-enterprise conspiracy doctrine thus would no longer be necessary to a finding of liability on the facts of *Kiefer-Stewart*.

[**22]** Later cases invoking the intra-enterprise conspiracy doctrine do little more than cite *Yellow Cab* or *Kiefer-Stewart*, and in none of the cases was the doctrine necessary to the result reached. *Timken Roller Bearing Co*. v. *United States, 341 U.S. 593 (1951)*, involved restrictive horizontal agreements **[*765]** between an American corporation and two foreign corporations in which it owned 30 and 50 percent interests respectively. The *Timken* Court cited *Kiefer-Stewart* to show that "[the] fact that there is common ownership or control of the contracting corporations does not liberate them from the impact of the antitrust laws." *341 U.S., at 598*. But the relevance of this statement is unclear. The American defendant in *Timken* did not own a majority interest in either of the foreign corporate conspirators and, as the District Court found, it did not control them. [10] **[****23]** Moreover, as in *Yellow*

[8] In two cases decided soon after *Yellow Cab* on facts similar to *Crescent Amusement*, see n. 6, *supra*, affiliated film exhibitors were found to have conspired in violation of *§ 1*. *Schine Chain Theatres, Inc*. v. *United States, 334 U.S. 110 (1948)*; *United States v. Griffith, 334 U.S. 100 (1948)*. *Griffith* simply assumed that the companies were capable of conspiring with each other; *Schine* cited *Yellow Cab* and *Crescent Amusement* for the proposition, *334 U.S., at 116*. In both cases, however, an intra-enterprise conspiracy holding was unnecessary not only because the Court found a *§ 2* violation, but also because the affiliated exhibitors had conspired with independent film distributors. See *ibid.; Griffith, supra, at 103, n. 6, 109*.

[9] ***LEdHN[3B]***[] [3B]

Although the plaintiff apparently never acquiesced in the resale price maintenance scheme, *Kiefer-Stewart Co*. v. *Joseph E. Seagram & Sons, Inc., 182 F.2d 228, 231 (CA7 1950)*, rev'd, *340 U.S. 211 (1951)*, one of the subsidiaries did gain the compliance of other wholesalers after once terminating them for refusing to abide by the pricing scheme. See *182 F.2d, at 231*; *340 U.S., at 213*. A theory of combination between the subsidiaries and the wholesalers could now support *§ 1* relief, whether or not it could have when *Kiefer-Stewart* was decided. See *Albrecht v. Herald Co., 390 U.S. 145, 149-150, and n. 6 (1968)*; *United States v. Parke, Davis & Co., 362 U.S. 29 (1960)*.

Cab, there was evidence that the stock acquisitions were themselves designed to effectuate restrictive practices. [11] The Court's reliance on the intra-enterprise conspiracy **[***640]** doctrine was in no way necessary to the result.

[2739]** The same is true of *Perma Life Mufflers, Inc*. v. *International Parts Corp., 392 U.S. 134 (1968)*, which involved a conspiracy among a parent corporation and three subsidiaries to impose **[****24]** various illegal restrictions on plaintiff franchisees. The Court did suggest that, because the defendants

"availed themselves of the privilege of doing business through separate corporations, the fact of common ownership **[*766]** could not save them from any of the obligations that the law imposes on separate entities [citing *Yellow Cab* and *Timken*]." *Id., at 141-142*.

But the Court noted immediately thereafter that "[in] any event" each plaintiff could "clearly" charge a combination between itself and the defendants or between the defendants and other franchise dealers. *Ibid*. Thus, for the same reason that a finding of liability in *Kiefer-Stewart* could today be justified without reference to the intra-enterprise conspiracy doctrine, see n. 9, *supra*, the doctrine was at most only an alternative holding in *Perma Life Mufflers*.

In short, while this Court has previously seemed to acquiesce in the intra-enterprise conspiracy doctrine, it has never explored or analyzed in detail the justifications for such a rule; the doctrine has played only a relatively minor role in the Court's Sherman Act holdings.

III

Petitioners, joined **[****25]** by the United States as *amicus curiae*, urge us to repudiate the intra-enterprise conspiracy doctrine. [12] The central criticism is that the doctrine gives undue significance to the fact that a subsidiary is separately incorporated and thereby treats as the concerted activity of two **[*767]** entities what is really unilateral behavior flowing from decisions of a single enterprise.

[**26]** We limit our inquiry to the narrow issue squarely presented: whether a parent and its wholly owned subsidiary are capable of conspiring in violation of *§ 1* of the Sherman Act. We do not consider under what

---

[10] See *United States v. Timken Roller Bearing Co., 83 F.Supp. 284, 311-312 (ND Ohio 1949)*, aff'd as modified, *341 U.S. 593 (1951)*. The agreement of an individual named Dewar, who owned 24 and 50 percent of the foreign corporations respectively, was apparently required for the American defendant to have its way.

[11] For almost 20 years before they became affiliated by stock ownership, two of the corporations had been party to the sort of restrictive agreements the *Timken* Court condemned. Three Justices upholding antitrust liability were of the view that Timken's "interests in the [foreign] companies were obtained as part of a plan to promote the illegal trade restraints" and that the "intercorporate relationship" was "the core of the conspiracy." *Id., at 600-601*. Because two Justices found no antitrust violation at all, see *id., at 605* (Frankfurter, J., dissenting); *id., at 606* (Jackson, J., dissenting), and two Justices did not take part, apparently only Chief Justice Vinson and Justice Reed were prepared to hold that there was a violation even if the initial acquisition itself was not illegal. See *id., at 601-602* (Reed, J., joined by Vinson, C. J., concurring).

[12] The doctrine has long been criticized. See, *e. g*., Areeda, Intra-enterprise Conspiracy in Decline, *97 Harv. L. Rev. 451 (1983)*; Handler & Smart, The Present Status of the Intracorporate Conspiracy Doctrine, 3 Cardozo L. Rev. 23 (1981); Kempf, Bathtub Conspiracies: Has *Seagram* Distilled a More Potent Brew?, 24 Bus. Law. 173 (1968); McQuade, Conspiracy, Multicorporate Enterprises, and *Section 1* of the Sherman Act, 41 Va. L. Rev. 183 (1955); Rahl, Conspiracy and the Anti-Trust Laws, 44 Ill. L. Rev. 743 (1950); Sprunk, Intra-Enterprise Conspiracy, 9 ABA Antitrust Section Rep. 20 (1956); Stengel, Intra-Enterprise Conspiracy Under *Section 1* of the Sherman Act, 35 Miss. L. J. 5 (1963); Willis & Pitofsky, Antitrust Consequences of Using Corporate Subsidiaries, 43 N. Y. U. L. Rev. 20 (1968); Note, "Conspiring Entities" Under *Section 1* of the Sherman Act, 95 Harv. L. Rev. 661 (1982); Note, Intra-Enterprise Conspiracy Under *Section 1* of the Sherman Act: A Suggested Standard, 75 Mich. L. Rev. 717 (1977).

circumstances, if any, a **[***641]** parent may be liable for conspiring with an affiliated corporation it does not completely own.

A

LEdHN[4][] [4] ***LEdHN[5A]***[] [5A] ***LEdHN[6A]***[] [6A]The ***HN2***[] Sherman Act contains a "basic distinction between concerted and independent action." *Monsanto Co*. v. *Spray-Rite Service Corp., 465 U.S. 752, 761 (1984)*. The conduct of a single firm is governed by *§ 2* alone and is unlawful only when it threatens actual monopolization. [13] **[****28]** It is not enough that a single firm appears to "restrain trade" unreasonably, for even a vigorous competitor may leave that impression. For instance, an efficient firm may **[**2740]** capture unsatisfied customers from an inefficient **[****27]** rival, whose own ability to compete may suffer as a result. This is the rule of the marketplace and is precisely the sort of competition that promotes the consumer interests that the Sherman Act aims to foster. [14] In part because it is sometimes difficult to **[*768]** distinguish robust competition from conduct with long-run anticompetitive effects, Congress authorized Sherman Act scrutiny of single firms only when they pose a danger of monopolization. Judging unilateral conduct in this manner reduces the risk that the antitrust laws will dampen the competitive zeal of a single aggressive entrepreneur.

LEdHN[7][] [7] ***LEdHN[8]***[] [8] ***LEdHN[9]***[] [9] ***LEdHN[10]***[] [10]*Section 1* of the Sherman **[****29]** Act, in contrast, ***HN4***[] reaches unreasonable restraints of trade effected by a "contract, combination . . . or conspiracy" between *separate* entities. It does not reach conduct that is "wholly unilateral." *Albrecht v. Herald Co., 390 U.S. 145, 149 (1968)*; accord, *Monsanto Co*. v. *Spray-Rite Corp., supra, at 761*. Concerted activity subject to *§ 1* is judged more sternly than unilateral activity under *§ 2*. Certain agreements, such as horizontal price fixing and market allocation, are thought so inherently anticompetitive that each is illegal *per se* without inquiry into the harm it has actually caused. See generally *Northern Pacific R. Co*. v. *United States, 356 U.S. 1, 5 (1958)*. Other combinations, such as mergers, joint ventures, and various vertical agreements, hold the promise of increasing a firm's efficiency and enabling it to compete more effectively. Accordingly, such combinations are judged under a rule of reason, an inquiry **[***642]** into market power and market structure designed to assess the combination's actual effect. See, *e. g., Continental T. V., Inc*. v. *GTE Sylvania Inc., 433 U.S. 36 (1977)*; **[****30]** *Chicago Board of Trade v. United States, 246 U.S. 231 (1918)*. Whatever form the inquiry takes, however, it is not necessary to prove that concerted activity threatens monopolization.

The reason Congress treated concerted behavior more strictly than unilateral behavior is readily appreciated. Concerted activity inherently is fraught with anticompetitive **[*769]** risk. It deprives the marketplace of the independent centers of decisionmaking that competition assumes and demands. In any conspiracy, two or more entities that previously pursued their own interests separately are combining to act as one for their common benefit.

---

[13] ***LEdHN[5B]***[] [5B]

Section 2 of the Sherman Act provides in pertinent part:

HN3[] "Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony." 26 Stat. 209, as amended, *15 U. S. C. § 2*. By making a conspiracy to monopolize unlawful, *§ 2* does reach both concerted and unilateral behavior. The point remains, however, that purely unilateral conduct is illegal only under *§ 2* and not under *§ 1*. Monopolization without conspiracy is unlawful under *§ 2*, but restraint of trade without a conspiracy or combination is not unlawful under *§ 1*.

[14] ***LEdHN[6B]***[] [6B]

For example, the Court has declared that *§ 2* does not forbid market power to be acquired "as a consequence of a superior product, [or] business acumen." *United States v. Grinnell Corp., 384 U.S. 563, 571 (1966)*. We have also made clear that the "antitrust laws . . . were enacted for 'the protection of *competition*, not *competitors*.'" *Brunswick Corp*. v. *Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488 (1977)* (damages for violation of Clayton Act *§ 7*) (quoting *Brown Shoe Co*. v. *United States, 370 U.S. 294, 320 (1962)*).

This not only reduces the diverse directions in which economic power is aimed but suddenly increases the economic power moving in one particular direction. Of course, such mergings of resources may well lead to efficiencies that benefit consumers, but their anticompetitive potential is sufficient to warrant scrutiny even in the absence of incipient monopoly.

B

LEdHN[11][] [11] **LEdHN[12A]**[] [12A] **LEdHN[13A]**[] [13A] **[****31]** The distinction between unilateral and concerted conduct is necessary for a proper understanding of the terms "contract, combination . . . or conspiracy" in *§ 1*. Nothing in the literal meaning of those terms excludes coordinated conduct among officers or employees of the *same* company. But it is perfectly plain that an internal "agreement" to implement a single, unitary firm's policies does not raise the antitrust dangers that *§ 1* was designed to police. The officers of a single firm are not separate economic actors pursuing separate economic interests, so agreements among them do not suddenly **[**2741]** bring together economic power that was previously pursuing divergent goals. Coordination within a firm is as likely to result from an effort to compete as from an effort to stifle competition. In the marketplace, such coordination may be necessary if a business enterprise is to compete effectively. For these reasons, officers or employees of the same firm do not provide the plurality of actors imperative for a *§ 1* conspiracy. [15]

[**32]** **[*770]** **LEdHN[14]**[] [14]There **[***643]** is also general agreement that *§ 1* is not violated by the internally coordinated conduct of a corporation and one of its unincorporated divisions. [16] **[****33]** Although this Court has not previously addressed the question, [17] there can be little doubt that the operations of a corporate enterprise organized into divisions must be judged as the conduct of a single actor. The existence of an unincorporated division reflects no more than a firm's decision to adopt an organizational division of labor. A division within a corporate structure pursues the common interests of the whole rather than interests separate from those of the corporation itself; a business enterprise establishes divisions to further its own interests in the most efficient manner. Because coordination between a corporation **[*771]** and its division does not represent a sudden joining of two independent sources of economic power previously pursuing separate interests, it is not an activity that warrants *§ 1* scrutiny.

Indeed, a rule that punished coordinated conduct simply because a corporation delegated certain responsibilities to autonomous units might well discourage corporations from creating divisions with their presumed benefits. This

---

[15] See, *e. g., Schwimmer v. Sony Corp. of America, 677 F.2d 946, 953* (CA2), cert. denied, *459 U.S. 1007 (1982)*; *Tose v. First Pennsylvania Bank, N. A., 648 F.2d 879, 893-894* (CA3), cert. denied, ***454 U.S. 893 (1981)***; *Morton Buildings of Nebraska, Inc*. v. *Morton Buildings, Inc., 531 F.2d 910, 916-917 (CA8 1976)*; *Greenville Publishing Co*. v. *Daily Reflector, Inc., 496 F.2d 391, 399 (CA4 1974)* (dictum); *Chapman v. Rudd Paint & Varnish Co., 409 F.2d 635, 643, n. 9 (CA9 1969)*; *Poller v. Columbia Broadcasting System, Inc., 109 U. S. App. D. C. 170, 174, 284 F.2d 599, 603 (1960)*, rev'd on other grounds, *368 U.S. 464 (1962)*; *Nelson Radio & Supply Co*. v. *Motorola, Inc., 200 F.2d 911, 914 (CA5 1952)*, cert. denied, ***345 U.S. 925 (1953)***. Accord, Report of the Attorney General's National Committee to Study the Antitrust Laws 31 (1955). At the same time, many courts have created an exception for corporate officers acting on their own behalf. See, *e. g., H & B Equipment Co*. v. *International Harvester Co., 577 F.2d 239, 244 (CA5 1978)* (dictum); *Greenville Publishing, supra; Johnston v. Baker, 445 F.2d 424, 427 (CA3 1971)*.

LEdHN[12B][] [12B] **LEdHN[13B]**[] [13B]Nothing in the language of the Sherman Act is inconsistent with the view that corporations cannot conspire with their own officers. It is true that a "person" under the Act includes both an individual and a corporation. *15 U. S. C. § 7*. But *§ 1* does not declare every combination between two "persons" to be illegal. Instead it makes liable every "person" engaging in a combination or conspiracy "hereby declared to be illegal." As we note, the principles governing *§ 1* liability plainly exclude from unlawful combinations or conspiracies the activities of a single firm.

[16] See *691 F.2d 310, 316 (CA7 1982)* (decision below); *Cliff Food Stores, Inc*. v. *Kroger, Inc., 417 F.2d 203, 205-206 (CA5 1969)*; *Joseph E. Seagram & Sons, Inc*. v. *Hawaiian Oke & Liquors, Ltd., 416 F.2d 71, 83-84 (CA9 1969)*, cert. denied, ***396 U.S. 1062 (1970)***; *Poller v. Columbia Broadcasting System, Inc., 109 U. S. App. D. C., at 174, 284 F.2d, at 603*.

[17] The Court left this issue unresolved in *Poller* v. *Columbia Broadcasting System, Inc*., 368 U.S., at 469, n. 4.

would serve no useful antitrust purpose but could well deprive consumers of the efficiencies that decentralized management may bring.

C

LEdHN[1B][] [1B]For similar reasons, the coordinated activity of a parent and its wholly owned subsidiary must be viewed as that of a single enterprise for purposes of *§ 1* of the Sherman Act. A parent and its wholly owned subsidiary have a complete unity of interest. Their objectives are common, not disparate; their general corporate actions are guided or determined not by two separate corporate consciousnesses, but one. They are not unlike a multiple team of **[**2742]** horses drawing a vehicle under the control of a single driver. **[****34]** With or without a formal "agreement," the subsidiary acts for the benefit of the parent, its sole shareholder. If a parent and a wholly owned subsidiary do "agree" to a course of action, there is no sudden joining of economic resources that had previously served different interests, and there is no justification for *§ 1* scrutiny.

LEdHN[15][] [15]Indeed, the very notion of an "agreement" in Sherman Act terms between a parent and a wholly owned subsidiary lacks meaning. *HN5*[] A *§ 1* agreement may be found when "the conspirators had a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement." *American* **[***644]** *Tobacco Co*. v. *United States, 328 U.S. 781, 810 (1946)*. But in reality a parent and a wholly owned subsidiary *always* have a "unity of purpose or a common design." They share a common purpose whether or not the parent keeps a tight rein over the subsidiary; the parent may assert **[*772]** full control at any moment if the subsidiary fails to **[****35]** act in the parent's best interests. [18]

[**36]** The intra-enterprise conspiracy doctrine looks to the form of an enterprise's structure and ignores the reality. Antitrust liability should not depend on whether a corporate subunit is organized as an unincorporated division or a wholly owned subsidiary. A corporation has complete power to maintain a wholly owned subsidiary in either form. The economic, legal, or other considerations that lead corporate management to choose one structure over the other are not relevant to whether the enterprise's conduct seriously threatens competition. [19] Rather, a corporation may adopt the subsidiary form of organization for valid management and related purposes. Separate incorporation may improve **[*773]** management, avoid special tax problems arising from multistate operations, or serve other legitimate interests. [20] **[****38]** Especially in view of the increasing complexity of corporate operations, a business enterprise should be free to structure itself in ways that serve efficiency of control, economy of

[18] As applied to a wholly owned subsidiary, the so-called "single entity" test is thus inadequate to preserve the Sherman Act's distinction between unilateral and concerted conduct. Followed by the Seventh Circuit below as well as by other Courts of Appeals, this test sets forth various criteria for evaluating whether a given parent and subsidiary are capable of conspiring with each other. See n. 2, *supra*; see generally *Ogilvie v. Fotomat Corp., 641 F.2d 581 (CA8 1981)*; *Las Vegas Sun, Inc*. v. *Summa Corp., 610 F.2d 614 (CA9 1979)*, cert. denied, ***447 U.S. 906 (1980)***; *Photovest Corp*. v. *Fotomat Corp., 606 F.2d 704 (CA7 1979)*, cert. denied, ***445 U.S. 917 (1980)***. These criteria measure the "separateness" of the subsidiary: whether it has separate control of its day-to-day operations, separate officers, separate corporate headquarters, and so forth. At least when a subsidiary is wholly owned, however, these factors are not sufficient to describe a separate economic entity for purposes of the Sherman Act. The factors simply describe the manner in which the parent chooses to structure a subunit of itself. They cannot overcome the basic fact that the ultimate interests of the subsidiary and the parent are identical, so the parent and the subsidiary must be viewed as a single economic unit.

[19] Because an "agreement" between a parent and its wholly owned subsidiary is no more likely to be anticompetitive than an agreement between two divisions of a single corporation, it does not matter that the parent "availed [itself] of the privilege of doing business through separate corporations," *Perma Life Mufflers, Inc*. v. *International Parts Corp., 392 U.S. 134, 141 (1968)*. The purposeful choice of a parent corporation to organize a subunit as a subsidiary is not itself a reason to heighten antitrust scrutiny, because it is not laden with anticompetitive risk.

[20] For example, "[separate] incorporation may reduce federal or state taxes or facilitate compliance with regulatory or reporting laws. Local incorporation may also improve local identification. Investors or lenders may prefer to specialize in a particular aspect of a conglomerate's business. Different parts of the business may require different pension or profitsharing plans or different accounting practices." Areeda, 97 Harv. L. Rev., at 453.

operations, and other factors dictated by business judgment without increasing its exposure to antitrust liability. Because there is nothing inherently anticompetitive about a corporation's **[****37]** decision **[**2743]** to create a subsidiary, the intra-enterprise conspiracy doctrine "[imposes] **[***645]** grave legal consequences upon organizational distinctions that are of *de minimis* meaning and effect." *Sunkist Growers, Inc*. v. *Winckler & Smith Citrus Products Co., 370 U.S. 19, 29 (1962)*. [21]

If antitrust liability turned on the garb in which a corporate subunit was clothed, parent corporations would be encouraged to convert subsidiaries into unincorporated divisions. Indeed, this is precisely what the Seagram company did after this Court's decision in *Kiefer-Stewart Co* **[****39]** . v. *Joseph E. Seagram & Sons, Inc., 340 U.S. 211 (1951)*. [22] Such an **[*774]** incentive serves no valid antitrust goals but merely deprives consumers and producers of the benefits that the subsidiary form may yield.

The error of treating a corporate division differently from a wholly owned subsidiary is readily seen from the facts of this case. Regal was operated as an unincorporated division of Lear Siegler for four years before it became a wholly owned subsidiary of Copperweld. Nothing in this record indicates any meaningful difference between Regal's operations as a division and its later operations as a separate corporation. Certainly nothing suggests that Regal was a greater threat to competition as a subsidiary of Copperweld than as a division of Lear Siegler. Under either arrangement, Regal might have acted to bar **[****40]** a new competitor from entering the market. In one case it could have relied on economic power from other quarters of the Lear Siegler corporation; instead it drew on the strength of its separately incorporated parent, Copperweld. From the standpoint of the antitrust laws, there is no reason to treat one more harshly than the other. As Chief Justice Hughes cautioned, "[realities] must dominate the judgment." *Appalachian Coals, Inc*. v. *United States, 288 U.S., at 360*. [23]

[**41]** D

LEdHN[16][] [16]Any reading of the Sherman Act that remains true to the Act's distinction between unilateral and concerted conduct will necessarily **[***646]** disappoint those who find that distinction arbitrary. It cannot be denied that *§ 1*'s focus on concerted **[*775]** behavior leaves a "gap" in the Act's proscription against unreasonable restraints of trade. See *post*, at 789. An unreasonable restraint of trade may be effected not only by two independent firms acting in concert; a single firm may restrain trade to precisely the same extent if it alone possesses the combined market power of those same two firms. Because the Sherman Act does not prohibit unreasonable restraints of trade as such -- but only restraints effected by a contract, combination, or conspiracy -- it leaves untouched a single firm's anticompetitive **[**2744]** conduct (short of threatened monopolization) that may be indistinguishable in economic effect from the conduct of two firms subject to *§ 1* liability.

---

[21] *Sunkist Growers* provides strong support for the notion that separate incorporation does not necessarily imply a capacity to conspire. The defendants in that case were an agricultural cooperative, its wholly owned subsidiary, and a second cooperative comprising only members of the first. The Court refused to find a *§ 1* or *§ 2* conspiracy among them because they were "one 'organization' or 'association' even though they have formally organized themselves into three separate legal entities." *370 U.S., at 29*. Although this holding derived from statutory immunities granted to agricultural organizations, the reasoning of *Sunkist Growers* supports the broader principle that substance, not form, should determine whether a separately incorporated entity is capable of conspiring under *§ 1*.

[22] See *Joseph E. Seagram & Sons, Inc*. v. *Hawaiian Oke & Liquors, Ltd., 416 F.2d 71 (CA9 1969)*, cert. denied, ***396 U.S. 1062 (1970)***.

[23] The dissent argues that references in the legislative history to "trusts" suggest that Congress intended *§ 1* to govern the conduct of all affiliated corporations. See *post*, at 787-788. But those passages explicitly refer to combinations created for the very purpose of restraining trade. None of the cited debates refers to the postacquisition conduct of corporations whose initial affiliation was lawful. Indeed, Senator Sherman stated:

"It is the unlawful combination, tested by the rules of common law and human experience, that is aimed at by this bill, and not the lawful and useful combination." 21 Cong. Rec. 2457 (1890).

LEdHN[12C][] [12C] **LEdHN[17]**[] [17] **[****42]** We have already noted that Congress left this "gap" for eminently sound reasons. Subjecting a single firm's every action to judicial scrutiny for reasonableness would threaten to discourage the competitive enthusiasm that the antitrust laws seek to promote. See *supra, at 767-769*. Moreover, whatever the wisdom of the distinction, the Act's plain language leaves no doubt that Congress made a purposeful choice to accord different treatment to unilateral and concerted conduct. Had Congress intended to outlaw unreasonable restraints of trade as such, *§ 1*'s requirement of a contract, combination, or conspiracy would be superfluous, as would the entirety of *§ 2*. [24] Indeed, this Court has recognized **[*776]** that *§ 1* is limited to concerted conduct at least since the days of *United States v. Colgate & Co., 250 U.S. 300 (1919)*. Accord, *post*, at 789.

[**43]** **LEdHN[1C]**[] [1C]The appropriate inquiry in this case, therefore, is not whether the coordinated conduct of a parent and its wholly owned subsidiary may ever have anticompetitive effects, as the dissent suggests. Nor is it whether the term "conspiracy" will bear a literal construction that includes parent corporations and their wholly owned subsidiaries. For if these were the proper inquiries, a **[***647]** single firm's conduct would be subject to *§ 1* scrutiny whenever the coordination of two employees was involved. Such a rule would obliterate the Act's distinction between unilateral and concerted conduct, contrary to the clear intent of Congress as interpreted by the weight of judicial authority. See n. 15, *supra*. Rather, the appropriate inquiry requires us to explain the logic underlying Congress' decision to exempt unilateral conduct from *§ 1* scrutiny, and to assess whether that logic similarly excludes the conduct of a parent and its wholly owned subsidiary. Unless we second-guess the judgment of Congress to limit *§ 1* to concerted conduct, we can only conclude that the coordinated behavior of a parent **[****44]** and its wholly owned subsidiary falls outside the reach of that provision.

Although we recognize that any "gap" the Sherman Act leaves is the sensible result of a purposeful policy decision by Congress, we also note that the size of any such gap is open **[*777]** to serious question. Any anticompetitive activities of corporations and their wholly owned subsidiaries meriting antitrust remedies may be policed adequately without resort to an intra-enterprise conspiracy doctrine. A corporation's initial acquisition of control will always be subject to scrutiny under *§ 1* of the Sherman Act and *§ 7* of the Clayton Act, 38 Stat. 731, *15 U. S. C. § 18*. Thereafter, the enterprise is fully subject to *§ 2* of the Sherman Act and § 5 of the Federal Trade Commission Act, 38 Stat. 719, *15 U. S. C.* ***[**2745]*** *§ 45*. That these statutes are adequate to control dangerous anticompetitive conduct is suggested by the fact that not a single holding of antitrust liability by this Court would today be different in the absence of an intra-enterprise conspiracy doctrine. It is further suggested by the fact that the Federal Government, in its administration **[****45]** of the antitrust laws, no longer accepts the concept that a corporation and its wholly owned subsidiaries can "combine" or "conspire" under *§ 1*. [25] Elimination of the intra-enterprise conspiracy doctrine with respect to corporations and their wholly owned subsidiaries will therefore not cripple

---

[24] **LEdHN[12D]**[] [12D]

Even if common-law intracorporate conspiracies were firmly established when Congress passed the Sherman Act, the obvious incompatibility of an intracorporate conspiracy with *§ 1* is sufficient to refute the dissent's suggestion that Congress intended to incorporate such a definition. See *post*, at 784-787. Moreover, it is far from clear that intracorporate conspiracies were recognized at common law in 1890. Even today courts disagree whether corporate employees can conspire with themselves or with the corporation for purposes of certain statutes, such as *42 U. S. C. § 1985(3)*. Compare, *e. g., Novotny v. Great Am. Fed. Sav. & Loan Assn., 584 F.2d 1235 (CA3 1978)* (en banc), vacated and remanded on other grounds, *442 U.S. 366 (1979)*, with *Dombrowski v. Dowling, 459 F.2d 190 (CA7 1972)*. And in 1890 it was disputed whether a corporation could itself be guilty of a crime that required criminal intent, such as conspiracy. Commentators appear to agree that courts began finding corporate liability for such crimes only around the turn of the century. See generally Edgerton, Corporate Criminal Responsibility, 36 Yale L. J. 827, 828, and n. 11 (1927); Miller, Corporate Criminal Liability: A Principle Extended to Its Limits, 38 Fed. Bar J. 49 (1979); Note, 60 Harv. L. Rev. 283, 284, and n. 9 (1946). Of course, Congress changed that common-law rule when it explicitly provided that a corporation could be guilty of a *§ 1* conspiracy. But the point remains that the Sherman Act did not import a pre-existing common-law tradition recognizing conspiracies between corporations and their own employees.

[25] "[The] [intra-enterprise conspiracy] doctrine has played a relatively minor role in government enforcement actions, and the government has not relied on the doctrine in recent years." Brief for United States as *Amicus Curiae* 26, n. 42.

antitrust enforcement. It will simply eliminate treble damages from private state tort suits masquerading as antitrust actions.

IV

LEdHN[1D][] [1D]We hold that *HN6*[] Copperweld and its wholly owned subsidiary Regal are incapable of conspiring with each other for purposes of *§ 1* of the Sherman Act. To the extent that prior decisions of this Court are to the contrary, they are disapproved and overruled. Accordingly, **[****46]** the judgment of the Court of Appeals is reversed.

It is so ordered.

[*778] JUSTICE WHITE took no part in the consideration or decision of this case.

Dissent by: STEVENS

Dissent

[*648]** JUSTICE STEVENS, with whom JUSTICE **BRENNAN** and JUSTICE **MARSHALL** join, dissenting.

It is safe to assume that corporate affiliates do not vigorously compete with one another. A price-fixing or market-allocation agreement between two or more such corporate entities does not, therefore, eliminate any competition that would otherwise exist. It makes no difference whether such an agreement is labeled a "contract," a "conspiracy," or merely a policy decision, because it surely does not unreasonably restrain competition within the meaning of the Sherman Act. The Rule of Reason has always given the courts adequate latitude to examine the substance rather than the form of an arrangement when answering the question whether collective action has restrained competition within the meaning of *§ 1*.

Today the Court announces a new *per se* rule: a wholly owned subsidiary is incapable of conspiring with its parent under *§ 1* of the Sherman Act. Instead of redefining the word "conspiracy," the Court would **[****47]** be better advised to continue to rely on the Rule of Reason. Precisely because they do not eliminate competition that would otherwise exist but rather enhance the ability to compete, restraints which enable effective integration between a corporate parent and its subsidiary -- the type of arrangement the Court is properly concerned with protecting -- are not prohibited by *§ 1*. Thus, the Court's desire to shield such arrangements from antitrust liability provides no justification for the Court's new rule.

In contrast, the case before us today presents the type of restraint that has precious little to do with effective integration between parent and subsidiary corporations. Rather, the purpose of the challenged conduct was to exclude a potential competitor of the subsidiary from the market. The jury apparently concluded that the two defendant corporations -- **[*779]** Copperweld and its subsidiary Regal -- had successfully delayed Independence's entry into the steel tubing business by applying a form of economic coercion to potential suppliers of financing and capital equipment, as well as to potential customers. Everyone seems to agree that this conduct was tortious as a matter **[****48]** of state law. This type of exclusionary conduct is plainly distinguishable from vertical integration designed to achieve competitive efficiencies. If, as seems to be the case, the challenged conduct was manifestly anti-competitive, it should not be immunized from scrutiny under *§ 1* of the Sherman Act.

[2746]** I

Repudiation of prior cases is not a step that should be taken lightly. As the Court wrote only days ago: "[Any] departure from the doctrine of *stare decisis* demands special justification." *Arizona* v. *Rumsey, ante*, at 212. It is therefore appropriate to begin with an examination of the precedents.

In *United States v. Yellow Cab Co., 332 U.S. 218 (1947)*, the Court explicitly stated that a corporate subsidiary could conspire with its parent:

"The fact that these restraints **[***649]** occur in a setting described by the appellees as a vertically integrated enterprise does not necessarily remove the ban of the Sherman Act. The test of illegality under the Act is the presence or absence of an unreasonable restraint on interstate commerce. Such a restraint may result as readily from a conspiracy among those who are affiliated or **[****49]** integrated under common ownership as from a conspiracy among those who are otherwise independent." *Id., at 227*.

The majority attempts to explain *Yellow Cab* by suggesting that it dealt only with unlawful acquisition of subsidiaries. *Ante*, at 761-762. But the Court mentioned acquisitions only as an additional consideration separate from the passage **[*780]** quoted above, [1] and more important, the Court explicitly held that restraints imposed by the corporate parent on the affiliates that it *already* owned in themselves violated *§ 1*. [2]

[**50]** At least three cases involving the motion picture industry also recognize that affiliated corporations may combine or conspire within the meaning of *§ 1*. In *United States v. Crescent Amusement Co., 323 U.S. 173 (1944)*, as the Court recognizes, *ante*, at 762, n. 6, the only conspirators were affiliated corporations. The majority's claim that the case involved only unlawful acquisitions because of the Court's comments concerning divestiture of the affiliates cannot be squared with the passage immediately following that cited by the majority, which states that there had been unlawful conduct going beyond the acquisition of subsidiaries:

"That principle is adequate here to justify divestiture of all interest in some of the affiliates since their acquisition was part of the fruits of the conspiracy. *But the relief need not, and under these facts should not, be so restricted* [to divestiture]. The fact that the companies were affiliated induced joint action and agreement. Common control was one of the instruments in bringing about unity of purpose and unity of action and in making the conspiracy effective. If that affiliation continues, **[*781]** **[****51]** there will be tempting opportunity for these exhibitors to continue to act in combination against the independents." *323 U.S., at 189-190* (emphasis supplied).

Similarly, in *Schine Chain Theatres, Inc*. v. *United States, 334 U.S. 110 (1948)*, the Court held that concerted action by parents and subsidiaries **[***650]** constituted an unlawful conspiracy. [3] **[**2747]** That was also the holding in *United States v. Griffith, 334 U.S. 100, 109 (1948)*. The majority's observation that in these cases there were alternative grounds that could have been used to reach the same result, *ante*, at 763, n. 8, disguises neither the fact that the holding that actually appears in these opinions rests on conspiracy between affiliated entities, nor that today's holding is inconsistent with what was actually held in these cases.

[**52]** In *Kiefer-Stewart Co*. v. *Joseph E. Seagram & Sons, Inc., 340 U.S. 211 (1951)*, the Court's holding was plain and unequivocal:

---

[1] The language I have quoted, most of which is overlooked by the majority, makes it clear that the Court's adoption of the concept of conspiracy between affiliated corporations was unqualified. As the first word of the sentence indicates, the Court's following statement: "Similarly, any affiliation or integration flowing from an illegal conspiracy cannot insulate the conspirators from the sanctions which Congress has imposed," *332 U.S., at 227*, expresses a separate if related point.

[2] "[By] preventing the cab operating companies under their control from purchasing cabs from manufacturers other than CCM, the appellees deny those companies the opportunity to purchase cabs in a free, competitive market. The Sherman Act has never been thought to sanction such a conspiracy to restrain the free purchase of goods in interstate commerce." *Id., at 226-227* (footnote omitted).

[3] "[The] combining of the open and closed towns for the negotiation of films for the circuit was a restraint of trade and the use of monopoly power in violation of *§ 1* and *§ 2* of the Act. The concerted action of the parent company, its subsidiaries, and the named officers and directors in that endeavor was a conspiracy which was not immunized by reason of the fact that the members were closely affiliated rather than independent. See *United States v. Yellow Cab Co., 332 U.S. 218, 227*; *United States v. Crescent Amusement Co., 323 U.S. 173*." *334 U.S., at 116*.

"Respondents next suggest that their status as 'mere instrumentalities of a single manufacturing-merchandizing unit' makes it impossible for them to have conspired in a manner forbidden by the Sherman Act. But this suggestion runs counter to our past decisions that common ownership and control does not liberate corporations from the impact of the antitrust laws. *E. g.* United States v. Yellow Cab Co., 332 U.S. 218. The rule is especially applicable where, as here, respondents hold themselves out as competitors." *Id., at 215*.

[*782] This holding is so clear that even the Court, which is not wanting for inventiveness in its reading of the prior cases, cannot explain it away. The Court suggests only that today *Kiefer-Stewart* might be decided on alternative grounds, *ante*, at 764, ignoring the fact that today's holding is inconsistent with the ground on which the case actually was decided. [4]

[**53]** A construction of the statute that reaches agreements between corporate parents and subsidiaries was again embraced by the Court in *Timken Roller Bearing Co*. v. United States, 341 U.S. 593 (1951), [5] **[****54]** and *Perma Life Mufflers, Inc*. v. International Parts Corp., 392 U.S. 134 (1968). [6] **[***651]** The majority only notes that there might have been other grounds for decision available in these cases, *ante*, at 764-766, but again it cannot deny that its new rule is inconsistent with what the Court actually did write in these cases.

[*783] Thus, the rule announced today is inconsistent with what this Court has held on at least seven previous occasions. [7] **[****56]** Perhaps **[**2748]** most illuminating is the fact that until today, whether they favored the doctrine or not, it had been the universal conclusion of both the lower courts [8] and the commentators [9] that this

---

[4] In *Kiefer-Stewart*, Seagram unsuccessfully argued that *Yellow Cab* was confined to cases concerning unlawful acquisitions, see Brief for Respondents, O. T. 1950, No. 297, p. 21. Thus the *Kiefer-Stewart* Court considered and rejected exactly the same argument embraced by today's majority.

[5] "The fact that there is common ownership or control of the contracting corporations does not liberate them from the impact of the antitrust laws. *E. g., Kiefer-Stewart Co*. v. *Seagram & Sons*, [340 U.S.,] at 215. Nor do we find any support in reason or authority for the proposition that agreements between legally separate persons and companies to suppress competition among themselves and others can be justified by labeling the project a 'joint venture.' Perhaps every agreement and combination to restrain trade could be so labeled." *341 U.S., at 598*.

[6] "There remains for consideration only the Court of Appeals' alternative holding that the Sherman Act claim should be dismissed because respondents were all part of a single business entity and were therefore entitled to cooperate without creating an illegal conspiracy. But since respondents Midas and International availed themselves of the privilege of doing business through separate corporations, the fact of common ownership could not save them from any of the obligations that the law imposes on separate entities. See *Timken Co*. v. United States, 341 U.S. 593, 598 (1951); United States v. Yellow Cab Co., 332 U.S. 218, 227 (1947)." *392 U.S., at 141-142*.

[7] Also pertinent is United States v. Citizens & Southern National Bank, 422 U.S. 86 (1975), in which the Court wrote:

"The central message of the Sherman Act is that a business entity must find new customers and higher profits through internal expansion -- that is, by competing successfully rather than by arranging treaties with its competitors. This Court has held that even commonly owned firms must compete against each other, if they hold themselves out as distinct entities. 'The corporate interrelationships of the conspirators . . . are not determinative of the applicability of the Sherman Act.' United States v. Yellow Cab Co., 332 U.S. 218, 227. See also *Kiefer-Stewart Co*. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 215; *Timken Roller Bearing Co*. v. United States, 341 U.S. 593, 598; *Perma Life Mufflers, Inc*. v. International Parts Corp., 392 U.S. 134, 141-142." *Id., at 116-117*.

[8] See, *e. g., William Inglis & Sons Baking Co*. v. ***ITT Continental Baking Co., 668 F.2d 1014, 1054*** (CA9), cert. denied, ***459 U.S. 825 (1982)***; Ogilvie v. Fotomat Corp., 641 F.2d 581, 587-588 (CA8 1981); *Las Vegas Sun, Inc*. v. Summa Corp., 610 F.2d 614, 617-618 (CA9 1979), cert. denied, ***447 U.S. 906 (1980)***; *Photovest Corp*. v. Fotomat Corp., 606 F.2d 704, 726 (CA7 1979), cert. denied, ***445 U.S. 917 (1980)***; *Columbia Metal Culvert Co*. v. Kaiser Aluminum & Chemical Corp., 579 F.2d 20, 33-35, and n. 49 (CA3), cert. denied, ***439 U.S. 876 (1978)***; *H & B Equipment Co*. v. International Harvester Co., 577 F.2d 239, 244-245

Court's cases establish that a parent **[*784]** **[****55]** and a **[***652]** wholly owned subsidiary corporation are capable of conspiring in violation of *§ 1*. In this very case the Court of Appeals observed:

"[The] salient factor is that the Supreme Court's decisions, while they need not be read with complete literalism, of course they cannot be ignored. It is no accident that every Court of Appeals to consider the question has concluded that a parent and its subsidiary have the same capacity to conspire, whether or not they can be found to have done so in a particular case." *691 F.2d 310, 317 (CA7 1982)* (footnotes omitted).

[**57]** Thus, we are not writing on a clean slate. "[We] must bear in mind that considerations of *stare decisis* weigh heavily in the area of statutory construction, where Congress is free to change this Court's interpretation of its legislation." *Illinois Brick Co*. v. *Illinois, 431 U.S. 720, 736 (1977)*. [10] There can be no doubt that the Court today changes what has been taken to be the long-settled rule: a rule that Congress did not revise at any point in the last four decades. At a minimum there should be a strong presumption against the approach taken today by the Court. It is to the merits of that approach that I now turn.

II

The language of *§ 1* of the Sherman Act is sweeping in its breadth: "Every contract, combination in the form of trust or **[*785]** otherwise, or conspiracy, in restraint of trade or commerce among the several States, . . . is declared **[****58]** to be illegal." *15 **[**2749]** U. S. C. § 1*. This Court has long recognized that Congress intended this language to have a broad sweep, reaching any form of combination:

"[In] view of the many new forms of contracts and combinations which were being evolved from existing economic conditions, it was deemed essential by an all-embracing enumeration to make sure that no form of contract or combination by which an undue restraint of interstate or foreign commerce was brought about could save such restraint from condemnation. The statute under this view evidenced the intent not to restrain the right to make and enforce contracts, whether resulting from combination or otherwise, which did not unduly restrain interstate or foreign commerce, but to protect that commerce from being restrained by methods, whether old or new, which would constitute an interference that is an undue restraint." *Standard Oil Co*. v. *United States, 221 U.S. 1, 59-60 (1911)*.

(CA5 1978); *George R. Whitten, Jr., Inc*. v. *Paddock Pool Builders, Inc., 508 F.2d 547, 557 (CA1 1974)*, cert. denied, ***421 U.S. 1004 (1975)***.

Rev. 661 (1982); Note, Intra-Enterprise Conspiracy Under *Section 1* of the Sherman Act: A Suggested Standard, 75 Mich. L. Rev. 717, 718-727 (1977) (hereinafter cited as Note, Suggested Standard).

[10] See also *Monsanto Co*. v. *Spray-Rite Service Co., 465 U.S. 752, 769 (1984)* (BRENNAN, J., concurring).

This broad construction is illustrated by the Court's refusal to limit the statute to actual agreements. Even mere acquiescence in an anticompetitive scheme has been held sufficient to **[****59]** satisfy the statutory language. [11]

Since the statute was written against the background of the common **[***653]** law, [12] **[****61]** reference to the common law is particularly enlightening in construing the statutory requirement of a "contract, combination in the form of trust or otherwise, or conspiracy." Under the common law, the question whether **[*786]** affiliated corporations constitute a plurality of actors within the meaning of the statute is easily answered. The well-settled rule is that a corporation is a separate legal entity; the separate corporate form cannot be disregarded. [13] The Congress that passed the Sherman Act was well acquainted with this rule. See 21 Cong. Rec. 2571 (1890) (remarks of Sen. Teller) ("Each corporation is a creature by itself"). **[****60]** Thus it has long been the law of criminal conspiracy that the officers of even a single corporation are capable of conspiring with each other or the corporation. [14] **[****62]** This Court has held that a corporation can conspire with its employee, [15] and **[**2750]** that a labor union can "combine" with its business agent within the meaning of *§ 1*. [16] This concept explains the *Timken* Court's statement that the affiliated corporations in that case made **[*787]** "agreements between legally separate persons," *341 U.S., at 598*. Thus, today's holding that agreements between parent and subsidiary corporations involve merely unilateral conduct is at odds with the way that this Court has traditionally understood the concept of a combination or conspiracy, and also at odds with the way in which the Congress that enacted the Sherman Act surely understood it.

Holding that affiliated corporations cannot constitute a plurality of actors is also inconsistent with the objectives of the Sherman Act. Congress **[***654]** was particularly concerned with "trusts," hence it named them in *§ 1* as a specific form of "combination" at which the statute was directed. Yet "trusts" consisted of affiliated corporations. As Senator Sherman explained:

"Because these combinations are always in many States and, as the Senator from Missouri says, it will be very easy for them to make a corporation within a State. So they can; but that is only one corporation of the combination. The combination **[****63]** is always of two or more, and in one case of forty-odd corporations, all

bound together by a link which holds them under the name of trustees, who are themselves incorporated under the laws of one of the States." 21 Cong. Rec. 2569 (1890).

The activities of these "combinations" of affiliated corporations were of special concern:

"[Associated] enterprise and capital are not satisfied with partnerships and corporations competing with each other, and have invented a new form of combination commonly called trusts, that seeks to avoid competition by combining the controlling corporations, partnerships, and individuals engaged in the same business, and placing the power and property of the combination under the government of a few individuals, and often under the control of a single man called a trustee, a chairman, or a president.

[*788] "The sole object of such a combination is to make competition impossible. It can control the market, raise or lower prices, as will best promote its selfish interests, reduce prices in a particular locality and break down competition and advance prices at will where competition does not exist. Its governing motive is to increase the **[****64]** profits of the parties composing it. The law of selfishness, uncontrolled by competition, compels it to disregard the interest of the consumer. It dictates terms to transportation companies, it commands the price of labor without fear of strikes, for in its field it allows no competitors. . . . It is this kind of a combination we have to deal with now." *Id*., at 2457. [17]

Thus, the corporate subsidiary, when used as a device to eliminate competition, was one of the chief evils to which the Sherman Act was addressed. [18] The anomaly **[**2751]** in today's **[***655]** holding is that the corporate devices most similar to the original "trusts" are now those which free an enterprise from antitrust scrutiny.

[**65]** **[*789]** III

The Court's reason for rejecting the concept of a combination or conspiracy among a parent corporation and its wholly owned subsidiary is that it elevates form over substance -- while in form the two corporations are separate legal entities, in substance they are a single integrated enterprise and hence cannot comprise the plurality of actors necessary to satisfy *§ 1*. *Ante*, at 771-774. In many situations the Court's reasoning is perfectly sensible, for the affiliation of corporate entities often is procompetitive precisely because, as the Court explains, it enhances efficiency. A challenge to conduct that is merely an incident of the desirable integration that accompanies such affiliation should fail. However, the protection of such conduct provides no justification for the Court's new rule, precisely because such conduct cannot be characterized as an unreasonable restraint of trade violative of *§ 1*. Conversely, the problem with the Court's new rule is that it leaves a significant gap in the enforcement of *§ 1* with respect to anticompetitive conduct that is entirely unrelated to the efficiencies associated with integration.

Since at least *United States v. Colgate & Co., 250 U.S. 300 (1919)*, **[****66]** *§ 1* has been construed to require a plurality of actors. This requirement, however, is a consequence of the plain statutory language, not of any economic principle. As an economic matter, what is critical is the presence of market power, rather than a plurality of actors. [19] **[****67]** From a competitive standpoint, a decision of a single firm possessing power to reduce output

---

[17] See also 21 Cong. Rec. 2562 (1890) (remarks of Sen. Teller); *id*., at 2570 (remarks of Sen. Sherman); *id*., at 2609 (remarks of Sen. Morgan).

[18] This legislative history thus demonstrates the error in the majority's conclusion that only acquisitions of corporate affiliates fall within *§ 1*. See *ante*, at 761-762. The conduct of the trusts that Senator Sherman and others objected to went much further than mere acquisitions. Indeed, the irony of the Court's approach is that, had it been adopted in 1890, it would have meant that *§ 1* would have no application to trust combinations which had already been formed -- the very trusts to which Senator Sherman was referring.

I cannot believe that the Court really intends to express doubt as to whether the Congress that passed the Sherman Act thought conspiracy doctrine could apply to corporations. *Ante*, at 775-776, n. 24. If that were not the case, then the Sherman Act would have no application to corporations. Since, as is clear and as the Court concedes, the Sherman Act does apply to corporations, there can be no doubt that Congress intended to apply the law of conspiracy to agreements between corporations.

and raise prices above competitive levels has the same consequence as a decision by two firms acting together who have acquired an equivalent amount of market **[*790]** power through an agreement not to compete. [20] **[****68]** Unilateral conduct by a firm **[***656]** with market power has no less anticompetitive potential than conduct by a plurality of actors which generates or exploits the same power, [21] and probably more, since the **[**2752]** unilateral actor avoids the policing problems faced by cartels.

The rule of *Yellow Cab* thus has an economic justification. It addresses a gap in antitrust enforcement by reaching anticompetitive agreements between affiliated corporations which **[*791]** have sufficient market power to restrain marketwide competition, but **[****69]** not sufficient power to be considered monopolists within the ambit of *§ 2* of the Act. [22] **[****70]** The doctrine is also useful when a third party declines to join a conspiracy to restrain trade among affiliated corporations, and is harmed as a result through a boycott or similar tactics designed to penalize the refusal. In such cases, since there has been no agreement with the third party, only an agreement between the affiliated corporations can be the basis for *§ 1* inquiry. [23] Finally, it must be remembered that not all persons who restrain trade wear grey flannel suits. Businesses controlled by organized crime often attempt to gain control of an industry through violence or intimidation of competitors; in such cases *§ 1* can be applied to separately incorporated

---

[19] Market power is the ability to raise prices above those that would be charged in a competitive market. See *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 27, n. 46 (1984)*; United States Steel Corp. v. *Fortner Enterprises, Inc., 429 U.S. 610, 620 (1977)*; *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 391 (1956)*.

[20] Significantly, the Court never suggests that the plurality-of-actors requirement has any intrinsic economic significance. Rather, it suggests that the requirement has evidentiary significance: combinations are more likely to signal anticompetitive conduct than is unilateral activity: "In any conspiracy, two or more entities that previously pursued their own interests separately are combining to act as one for their common benefit. This not only reduces the diverse directions in which economic power is aimed but suddenly increases the economic power moving in one particular direction." *Ante*, at 769. That is true, but it is also true of any ordinary commercial contract between separate entities, as can be seen if one substitutes the word "contract" for "conspiracy" in the passage I have quoted. The language of the Sherman Act indicates that it treats "contracts" and "conspiracies" as equivalent concepts -- both satisfy the multiplicity-of-actors requirement -- and yet one of the most fundamental points in antitrust jurisprudence, dating at least to *Standard Oil*, is that there is nothing inherently anticompetitive about a contract. Similarly, an agreement to act "for common benefit" in itself is unremarkable -- all agreements are in some sense a restraint of trade be they contracts or conspiracies. It is only when trade is unreasonably restrained that *§ 1* is implicated. The Court's evidentiary concern lacks merit.

[21] We made this point in the context of resale price maintenance in *United States v. Parke, Davis & Co., 362 U.S. 29 (1960)*:

"The Sherman Act forbids combinations of traders to suppress competition. True, there results the same economic effect as is accomplished by a prohibited combination to suppress price competition if each customer, although induced to do so solely by a manufacturer's announced policy, independently decides to observe specified resale prices. So long as *Colgate* is not overruled, this result is tolerated but only when it is the consequence of a mere refusal to sell in the exercise of a manufacturer's right 'freely to exercise his own independent discretion as to parties with whom he will deal.'" *Id., at 44* (quoting *Colgate, 250 U.S., at 307*).

[22] "[It] is the potential which this conspiracy concept holds for the development of a rational enforcement policy which, if anything, will ultimately attract the courts. If conduct of a single corporation which restrains trade were to violate *Section 1*, a forceful weapon would be available to the government with which to challenge conduct which in oligopolistic industries creates or reinforces entry barriers. Excessive advertising in the cereal, drug, or detergent industries, annual style changes in the auto industry, and other such practices could be reached as soon as they threatened to inhibit competition; there would be no need to wait until a 'dangerous probability' of monopoly had been reached, the requirement under *Section 2* 'attempt' doctrine. Nor would a single firm restraint of trade rule be overbroad. It would in no way threaten single firm activity -- setting a price, deciding what market it would deal in, or the like -- which did not threaten competitive conditions." L. Sullivan, *supra* n. 9, § 114, at 324 (footnotes omitted).

[23] This was the case in *Kiefer-Stewart*, for example. Seagram had refused to sell liquor to Kiefer-Stewart unless it agreed to an illegal resale price maintenance scheme. Kiefer-Stewart refused to agree, and as a result was injured by losing access to Seagram's products. See *340 U.S., at 213*.

businesses which benefit from such tactics, but which may be ultimately controlled by a single criminal enterprise. [24]

[*792] The **[***657]** rule of *Yellow Cab* and its progeny is not one that condemns every parent-subsidiary relationship. A single firm, no matter what its corporate structure may be, is not expected to compete with itself. [25] **[****72]** Functional **[****71]** integration by its very nature requires unified action; hence in itself it has never been sufficient to establish the **[**2753]** existence of an unreasonable restraint of trade: "In discussing the charge in the *Yellow Cab* case, we said that the fact that the conspirators were integrated did not insulate them from the act, not that corporate integration violated the act." *United States v. Columbia Steel Co., 334 U.S. 495, 522 (1948)*. Restraints that act only on the parent or its subsidiary as a consequence of an otherwise lawful integration do not violate *§ 1* of the Sherman Act. [26] But if the behavior at issue is unrelated to any functional integration between the affiliated corporations and **[*793]** imposes a restraint on third parties of sufficient magnitude to restrain marketwide competition, as a matter of economic substance, as well as form, it is appropriate to characterize the conduct as a "combination or conspiracy in restraint of trade." [27]

[**73]** For example, in *Yellow Cab* the Court read the complaint as alleging that integration had assisted the parent in excluding competing manufacturers from the marketplace, *332 U.S., at 226-227*, leading the Court to conclude that "restraint of interstate **[***658]** trade was not only effected by the combination of the appellees but was the primary object of the combination." *Id., at 227*. Similarly, in *Crescent Amusement* the Court noted that corporate affiliation between exhibitors enhanced their buying power and "was one of the instruments in . . . making the conspiracy effective" in excluding independents from the market. *323 U.S., at 189-190*. Thus, in both cases the Court found that the affiliation enhanced the ability of the parent corporation to exclude the competition of third

[24] See *United States v. Turkette, 452 U.S. 576, 588-593 (1981)* (discussing congressional findings underlying the Organized Crime Control Act of 1970). *Section 1* of the Sherman Act has on occasion been used against various types of racketeering activity. See Hartwell, Criminal RICO and Antitrust, 52 Antitrust L. J. 311, 312-313 (1983); McLaren, Antitrust and Competition -- Review of the Past Year and Suggestions for the Future, in New York State Bar Assn., 1971 ***Antitrust Law*** Symposium 1, 3 (1971).

[25] See Comment, Decisionmaking, *supra* n. 9, at 1753-1757; Note, Suggested Standard, *supra* n. 9, at 735-738. Professor Sullivan elaborates:

"Picture, at one end of the spectrum, a family business which operates one retail store in each of three or four adjacent communities. All of the stores are managed as a unit by one individual, the founder of the business who sets policy, does all the buying, decides on all the advertising, sets prices, and hires and fires all employees other than family members. The fact that each store is operated by a separate corporation should not convert a family business into a cartel. . . . If there is, as a practical matter, an integrated ownership and management, this small business is a single firm. And a single firm cannot compete with itself. Hence it cannot restrain price competition with itself, or divide markets with itself, or act as a common purchasing agent for itself or otherwise restrain competition with itself, regardless of how many separate corporations the single firm may, for reasons unrelated to the act, be divided into." L. Sullivan, *supra* n. 9, § 114, at 326-327.

[26] Thus, the Court is wrong to suggest, *ante*, at 771-772, 774-776, and n. 24, that *Yellow Cab* could reach truly unilateral conduct involving only the employees of a single firm.

[27] If the rule of *Yellow Cab* and its progeny could be easily circumvented through, for example, use of unincorporated divisions instead of subsidiaries, then there would be reason to question its efficacy as a tool for rational antitrust enforcement. However, the Court is incorrect when it asserts, *ante*, at 770-771, 772-774, that there is no economic substance in a distinction between unincorporated divisions, which cannot provide a plurality of actors, and wholly owned subsidiaries, which under *Yellow Cab* can. If that were the case, incorporated subsidiaries would never be used to achieve integration -- the ready availability of an unincorporated alternative would always be employed in order to avoid antitrust liability. The answer is provided by the Court itself -- the use of subsidiaries often makes possible operating efficiencies that are unavailable through the use of unincorporated divisions. *Ante*, at 772-774. We may confidently assume that any corporate parent whose contingent antitrust liability exceeds the savings it realizes through the use of subsidiaries already utilizes unincorporated divisions instead of corporate subsidiaries. Thus, it is more than merely a question of form when a decision is made to use corporate subsidiaries instead of unincorporated divisions, and the rule is not that easily circumvented.

parties, and hence raised entry **[*794]** barriers faced by actual and potential competitors. When conduct restrains trade not merely by integrating affiliated corporations but rather by restraining the ability of others to compete, that conduct has competitive significance drastically different from procompetitive integration. [28] In **[**2754]** these **[****74]** cases, the affiliation assisted exclusionary conduct; it was not the competitive equivalent of unilateral integration but instead generated power to restrain marketwide competition.

[**75]** There are other ways in which corporate affiliation can operate to restrain competition. A wholly owned subsidiary might market a "fighting brand" or engage in other predatory behavior that would be more effective if its ownership were concealed than if it was known that only one firm was involved. A predator might be willing to accept the risk of bankrupting a subsidiary when it could not afford to let a division incur similar risks. Affiliated corporations might enhance their power over suppliers by agreeing to refuse to deal with those who deal with an actual or potential competitor **[*795]** of one of them; such a threat might be more potent coming from both corporations than from only one. [29]

[**76]** In **[***659]** this case, it may be that notices to potential suppliers of respondent emanating from Copperweld carried more weight than would notices coming only from Regal. There was evidence suggesting that Regal and Copperweld were not integrated, and that the challenged agreement had little to do with achieving procompetitive efficiencies and much to do with protecting Regal's market position. The Court does not even try to explain why their common ownership meant that Copperweld and Regal were merely obtaining benefits associated with the efficiencies of integration. Both the District Court and the Court of Appeals thought that their agreement had a very different result -- that it raised barriers to entry and imposed an appreciable marketwide restraint. The Court's discussion of the justifications for corporate affiliation is therefore entirely abstract -- while it dutifully lists the procompetitive justifications for corporate affiliation, *ante*, at 772-774, it fails to explain how any of them relate to the conduct at issue in this case. What is challenged here is not the fact of integration between Regal and Copperweld, but their specific agreement with respect to **[****77]** Independence. That agreement concerned the exclusion of **[*796]** Independence from the market, and not any efficiency resulting from integration. The facts of this very case belie the conclusion that affiliated corporations are incapable of engaging in the kind of conduct that threatens marketwide competition. The Court does not even attempt to assess the competitive significance of the conduct under challenge here -- it never tests its economic assumptions against the concrete facts before it. Use of economic theory without reference to the competitive impact of the particular economic arrangement at issue is

---

[28] See L. Sullivan, *supra* n. 9, § 114, at 328 ("To have two competitors acting concertedly two separate firms, not just persons, are needed. Thus 'concerted action' by two 'legal persons' which is limited solely to the internal management of a single firm does not restrain competition; but 'concerted action' by two 'legal persons' which erects barriers to entry by another separate firm, a competitor or potential competitor, can be a restraint of trade"); see also Willis & Pitofsky, *supra* n. 9, at 38-41. The Attorney General's National Committee to Study the Antitrust Laws made the same point in 1955:

"The substance of the Supreme Court decisions is that concerted action between a parent and subsidiary or between subsidiaries which has for its purpose or effect coercion or unreasonable restraint on the trade of strangers to those acting in concert is prohibited by *Section 1*. Nothing in these opinions should be interpreted as justifying the conclusion that concerted action solely between a parent and subsidiary or subsidiaries, the purpose and effect of which is not coercive restraint of the trade of strangers to the corporate family, violates *Section 1*. Where such concerted action restrains no trade and is designed to restrain no trade other than that of the parent and its subsidiaries, *Section 1* is not violated." Attorney General's Committee Report, *supra* n. 9, at 34.

[29] Professor Sullivan provides another example:

"[Picture] a parent corporation and its wholly owned subsidiary (or two corporations wholly owned by the same parent or stockholder group) which operate, respectively, a newspaper and a radio station in the same city. If the radio station, which has no local competitors, were to deny advertising to a local business because the latter advertised in a rival newspaper, the integration between the two corporations, however close in terms of ownership or management or both, would not protect them from a charge of conspiracy to restrain trade. . . . [The] concerted action here involved is not merely carrying on the business of a single integrated firm, it is action which is aimed at restraining trade by utilizing such market power as is possessed by the firm because of its radio station in order to erect a competitive barrier in front of a competitor of the firm's newspaper." L. Sullivan, *supra* n. 9, § 114, at 327 (footnote omitted).

properly criticized when it produces overly broad *per se* rules of antitrust liability; [30] criticism is no less warranted when a *per se* rule of antitrust immunity is adopted in the same way.

In sum, the question that the Court should ask is not why a wholly owned subsidiary should be treated **[****78]** differently from a corporate division, since the immunity accorded that type of arrangement is a necessary consequence of *Colgate*. Rather the question should be why two corporations that engage in a predatory course of conduct which produces a marketwide restraint **[**2755]** on competition and which, as separate legal entities, can be easily fit within the language of *§ 1*, should be immunized from liability because they are controlled by the same godfather. That is a question the Court simply fails to confront. I respectfully dissent.

Governments > Legislation > Statute of Limitations > General Overview

HN1[] Regulated Practices, Private Actions

Damages are recoverable under federal ***antitrust law*** only if suit is commenced within four years after the cause of action accrued. *15 U.S.C.S. § 15b*. An antitrust cause of action accrues and the statute of limitation begins to run when the defendant does an anticompetitive act, which injures the plaintiff. Where there is a continuing conspiracy to violate the antitrust laws a cause of action accrues to the plaintiff and the statute of limitations begins running each time he or she is injured by an action of the defendant.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Governments > Legislation > Statute of Limitations > General Overview

HN2[] Regulated Practices, Private Actions

Bald allegations of conspiracy and concealment by a plaintiff do not merit delaying consideration of the applicability of the statute of limitations until trial.

Governments > Fiduciaries

Torts > ... > Fraud & Misrepresentation > Nondisclosure > General Overview

Governments > Legislation > Statute of Limitations > General Overview

HN3[] Governments, Fiduciaries

A defendant's denial of wrongdoing does not constitute fraudulent concealment absent the existence of a fiduciary relationship or special circumstances making the plaintiff's reliance on the denial reasonable. Plaintiffs may not postpone suit until they have all the information necessary to prove an antitrust action. Any facts that should excite the suspicion of the plaintiff are considered to be the same as actual knowledge of the underlying claims.

Governments > Legislation > Statute of Limitations > General Overview

HN4[] Legislation, Statute of Limitations

Once the plaintiff has knowledge of the operative facts underlying his claim the statute begins to run, even if the plaintiff does not believe the information received or is not convinced of defendant's culpability.

Governments > Legislation > Statute of Limitations > Tolling

Governments > Legislation > Statute of Limitations > General Overview

HN5[] Statute of Limitations, Tolling

Anticipated duress is not sufficient to toll the running of the statute of limitations.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraud

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraudulent Concealment

Governments > Legislation > Statute of Limitations > General Overview

Torts > ... > Fraud & Misrepresentation > Nondisclosure > General Overview

HN6[] Tolling of Statute of Limitations, Fraud

Courts have identified two types of fraudulent concealment. Fraudulent concealment may consist of affirmative acts by the defendant after the wrongdoing which are designed to conceal the wrongdoing. Active efforts by defendants to conceal wrongdoing which has already occurred tolls the limitations period until actual discovery by the plaintiff. Fraudulent concealment has also been the term used to describe instances where the underlying events being sued upon may involve fraud that by its nature is concealed. Some courts have stated, for example, that an antitrust conspiracy can be by its nature "self-concealing." In instances of self-concealing fraudulent conduct the plaintiff must still show due diligence and lack of knowledge before it is proper to toll the limitations period.

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN7[] **Statute of Limitations, Time Limitations**

The Supreme Court has established an exception to the statute of limitations in instances where the damage resulting from an anticompetitive act does not appear until later. A cause of action for these speculative future damages accrues only when they are suffered. The plaintiff need only sue to recover these damages within four years from the date they are felt.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN8[] **Private Actions, Remedies**

Speculative damages must be distinguished from mere uncertainty as to the extent or amount of damages, which will not bar recovery under antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Governments > Legislation > Statute of Limitations > Time Limitations

Torts > Remedies > Damages > General Overview

HN9[] **Private Actions, Remedies**

There is an approach in which damages "reasonably ascertainable" at the time the wrongful act occurred cannot be deemed speculative. Reasonably ascertainable does not mean provable with clear and convincing certainty. Reasonably ascertainable damages do include future damages when it is foreseeable when they will accrue and even the general rate at which they will accrue. When such future damages are foreseeable at the time of the act and could have been recovered or at least stopped by injunction in a lawsuit commenced at that time or within four years thereafter, then no new action accrues.

Governments > Legislation > Statute of Limitations > General Overview

Torts > Procedural Matters > Discovery

Torts > Procedural Matters > Statute of Limitations > General Overview

HN12[] Tolling of Statute of Limitations, Discovery Rule

Illinois courts have developed a "discovery rule" that provides that the statute of limitations for torts begins to run when the plaintiff knew or reasonably should have known of both its injury and its wrongful causation.

Opinion by: [*1] MORAN

Opinion

MEMORANDUM AND ORDER

In its five-count complaint plaintiff Clow Corporation alleges violations of *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2*, misappropriation of trade secrets, tortious interference with business relations and breach of contract by the defendant Witco Chemical Corporation. Before the court is Witco's motion for summary judgment on the ground that Clow's complaint is barred by the applicable statutes of limitations.

I.

Clow is a producer and seller of pipe and related products. In the early 1970s Clow established itself as a manufacturer and marketer of pipe and fittings made from a petrochemical resin containing polybutylene as its primary component. This resin is extruded into a variety of products ranging from pipe and tubing to household utility bags. Due to its durability, flexibility and low cost, polybutylene pipe is an attractive alternative to copper, steel and other kinds of plastic pipe. By January 1975 Clow had captured the largest share of the polybutylene pipe and fittings market. Because of its patent rights Witco was the only manufacturer of polybutylene resin from 1973 until October 1977.

The first three counts **[*2]** of the complaint allege that Witco unlawfully exercised its monopoly power and restrained trade in order to facilitate its integration forward into the polybutylene pipe and fittings market. Witco is alleged to have attempted to fragment this market into a large number of small competitors and to eliminate Clow as a strong competitor. Witco allegedly (1) failed to sell adequate amounts of polybutylene resin to Clow and engaged in price discrimination; (2) disparaged Clow and its products; (3) required Clow to pay higher prices for a resin used for hot water pipe that was not materially different from the resin used for cold water pipe; (4) induced Roger Cotten, Clow's most successful sales representative, to sever his ties to Clow and to set up his own manufacturing plant; (5) conspired with Clow's competitors to exclude Clow from important pipe and pipe fittings markets by offering technical assistance and divulging Clow's trade secrets; (6) misappropriated Clow's trade secrets; and (7) sent Clow contaminated and defective resins. Count 4 alleges that Witco tortiously interfered with business relations by inducing Roger Cotten to establish his own polybutylene extrusion plant and **[*3]** to capture Clow's clients. From 1973 to 1975 Cotten was a principal source of Clow's sales of polybutylene pipe and was especially active in promoting Clow's sales in the mobile home industry. Count 5 alleges that Witco breached several polybutylene supply contracts by failing to supply agreed-upon quantities of polybutylene resins.

Clow filed its first complaint on December 19, 1980. It voluntarily dismissed this action five days later when Witco agreed to extend the applicable statute of limitations until June 19, 1981. Subsequent agreements extended the time period until June 30, 1982. Clow filed this complaint on February 26, 1982. The extension agreements, however, preserved Witco's statute of limitations defenses as of December 19, 1982. Thus, the complaint can be treated as having been filed on that date.

II.

HN1[] Damages are recoverable under federal ***antitrust law*** only if suit is "commenced within four years after the cause of action accrued." *15 U.S.C. § 15b*. The four-year period before this case was filed begins on December 19, 1976. An antitrust cause of action accrues and the statute of limitations begins to run when the defendant does an anticompetitive act **[*4]** which injures the plaintiff. *Zenith Radio Corp. v. Hazeltine, 401 U.S. 321, 338 (1971)*. Where there is a continuing conspiracy to violate the antitrust laws a cause of action accrues to the plaintiff and the statute of limitations begins running each time he or she is injured by an action of the defendant. Id.

Clow alleges that the statute of limitations was tolled by Witco's fraudulent concealment of its wrongdoing. In order to avoid the bar of the statute of limitations Clow must establish that (1) Witco fraudulently concealed the nature and substance of its unlawful conduct from Clow; (2) Witco's concealment was successful; and (3) Clow did not know or by the exercise of due diligence could not have known that it had an antitrust cause of action. See *In re Beef Indus. Antitrust Litigation, 660 F.2d 1148, 1169 (5th Cir. 1979)*, cert. denied, *449 U.S. 905 (1980)*; *Rutledge v. Boston Woven Hose & Rubber Co., 576 F.2d 248, 249-50 (9th Cir. 1978)*. While Clow has the ultimte burden of persuasion on the fraudulent concealment issue, at this juncture Witco, as a moving party, has the burden of demonstrating the absence of any material fact. See generally In re Beef Industry Antitrust **[*5]** Litigation, supra, 600 F.2d at 1170-71. Even so, ***HN2***[] bald allegations of conspiracy and concealment by a plaintiff do not merit delaying consideration of the applicability of the statute of limitations until trial. *Baker v. E & F Investment, 420 F.2d 1191, 1198 (7th Cir. 1970)*.

The complaint makes the following allegation of fraudulent concealment:

Clow had no knowledge of the unlawful acts and practices of Witco and its co-conspirators until the filing of Cotten, et al., v. Witco Chemical Company, et al., No. 76-3978 (E.D. La. 1976), nor could it have discovered such acts and practices by the exercise of due diligence because they had been fraudulently concealed by Witco and its co-conspirators.

(Complaint, P21.) Cotten was a suit filed by Roger Cotten on December 21, 1976, which contained many of the same allegations as the instant complaint. While Clow's allegation of fraudulent concealment is of questionable particularity, see *Rutledge, supra, 576 F.2d at 250*; *Dayco Corp. v. Goodyear Tire & Rubber Corp., 523 F.2d 389, 394 (6th Cir. 1975)*; *Weinberger v. Retail Credit Co., 498 F.2d 552, 555 (4th Cir. 1974)*; *Laundry Equipment & Sales Corp. v. Borg-Warner Corp., 334 F.2d 788 (7th* **[*6]** *Cir. 1964)*; *Moviecolor Limited v. Eastman Kodak Co., 286 F.2d 80, 88* (2d Cir.), cert. denied, *368 U.S. 821 (1961)*, we need not concern ourselves with that issue, since the pending motion is one for summary judgment after full discovery. The uncontroverted facts developed during that discovery do not justify tolling the statute of limitations in this case by reason of fraudulent concealment.

III.

A.

In its complaint Clow identified two goals of Witco's alleged anticompetitive behavior. The first goal was facilitation of Witco's entry into the polybutylene pipe and fittings market. The second purpose was maintenance of its monopoly position in the polybutylene resin market by preventing Clow from developing into a monoposony. Clow identified Witco's alleged efforts to fragment the market for polybutylene pipe and fittings as the key component of Witco's plan.

Clow had knowledge of both of these goals prior to December 16, 1976. Clow knew before this date that Witco was planning to begin manufacturing large diameter polybutylene pipe. In addition, Clow's July 7, 1976 strategic plan identified a threat posed by a "[r]esin supplier -- Witco -- actively attempting to broaden **[*7]** number of [polybutylene] extruders."

The record also reveals that prior to December 1976 Clow had knowledge of most of the facts which underlie the specific allegations of the complaint. In the 1974-76 period Clow complained on various occasion that Witco was not only failing to meet the terms of its resin supply contracts but was also discriminating unfairly against Clow vis-a-vis other extruders in the allocation of the resin. During this period Clow was also aware that Witco was supplying Clow's actual and potential competitors with resin. The competitors which Clow knew Witco was supplying included Roger Cotten. The Witco-Cotten connection is, of course, the centerpiece of Clow's complaint.

Clow argues that it relied on Witco's assurances that Clow was being treated fairly in the allocation of the resins. ***HN3***[] A defendant's denial of wrongdoing does not constitute fraudulent concealment absent the existence of a fiduciary relationship or special circumstances making the plaintiff's reliance on the denial reasonable. *Rutledge, supra, 576 F.2d at 250*. Neither exception is applicable here. Plaintiffs may not postpone suit until they have all the information necessary to prove **[*8]** an antitrust action. *Starview Outdoor Theatre v. Paramount Film Distributing Corp., 254 F.Supp. 855, 858 (N.D. Ill. 1966)*. Any facts that should excite the suspicion of the plaintiff are considered to be the same as actual knowledge of the underlying claims. *Dayco Corp., supra, 523 F.2d at 394*.

Clow became aware of the single instance of alleged disparagement which has thus far come to light well before December 19, 1976. Clow's vice-president of operations testified that Clow learned of the disparagement, which occurred in 1974-75, prior to February 1976.

Before December 1976 Clow had become well acquainted with the facts underlying its claim that Witco wrongfully charged more for hot water pipe resin than functionally indistinguishable cold water pipe resin. In 1976 Clow retained an outside laboratory to analyze the ingredients of the resins and told Witco that the result showed only a slight difference in the chemical composition of the resins. Clow eventually dropped its effort to prove that the resins were indistinguishable and to convince Witco to end the price differential. The testimony of a Clow official makes clear, however, that Clow did so not because it relied **[*9]** upon Witco's statements that there were significant differences in the resins:

We didn't think the results were conclusive, and ultimately, we accepted Witco's position because we didn't feel we had any choice to do otherwise, but we neve really believed them, and we did feel that the difference in price was inappropriate and we complained to them about it.

(Madden Dep. at 200-01.) (Emphasis added.)

The record reveals that well before December 1976 Clow also knew of problems in the quality of the resins supplied to it by Witco. Clow complained on numerous occasions to Witco about contaminated resins and received apologies, credits and replacement material. As early as December 1975 Clow also complained to Witco about manufacturing problems caused by defective resins. These processing problems were "intolerable" and imposed a "severe burden" upon Clow.

Roger Cotten and one of his companies acted as Clow's exclusive agents in the sale of polybutylene pipe to the mobile home construction industry. This industry was an important market for polybutylene pipe. Clow alleges in essence that Witco was instrumental in inducing Cotten to set up his own polybutylene pipe and pipe **[*10]** fittings extrusion plant and in severing his relationship with Clow. The record shows that Clow investigated Cotten's activities in early 1975 and uncovered his active involvement in a new extrusion in Alabama. The Clow-Cotten relationship was terminated before July 29, 1976. Since Witco was the only supplier of polybutylene resins Clow knew that Witco had to be supplying Cotten with resins. Indeed, Clow felt the effects of Cotten's new plant and Witco's solicitude toward it well before December 1976:

Our whole polybutylene mobile home tubing program was downhill from 1975 on because of our inability to really do a good job in the marketplace so Cotten was very key to us when he went into the business and became a competitor.

(Madden Dep. at 238.)

This record establishes that Clow had sufficient knowledge of the facts such that it could not be deemed a victim of fraudulent concealment. The failure of Witco and Cotten to advertise the existence of their agreement does not toll the running of the statute of limitations. See *Conway v. Bulk Petroleum, 545 F.Supp. 398, 400, n. 3 (N.D. Ill. 1982)*. Alternatively, these same facts should have put Clow on notice that due diligence **[*11]** required at least some investigation on its part into Cotten's venture into manufacturing while nominally still an employee of Clow. See In re Beef Industry Antitrust Litigation, supra, 600 F.2d at 1171 ("[t]hose who have learned of facts "calculated to excite inquiry" must inquire.") ***HN4***[] Once the plaintiff has knowledge of the operative facts underlying his claim the statute begins to run, even if the plaintiff does not believe the information received or is not convinced of defendant's culpability. *Philco Corp. v. Radio Corp. of America, 186 F.Supp. 155, 165-66 (E.D. Pa. 1960)*.

Clow's misappropriation of trade secrets claim (count 3), appears to stem from visits by Witco's personnel to Clow's extrusion facility. Witco allegedly shared information gathered during these visits with Clow's competitors. The limited record indicates that Clow officials became aware of this alleged misappropriation before December 1976.

The heart of Clow's argument is that, while it had some knowledge of the operative facts prior to December 1976, it did not understand their real significance or the dimensions of the assault on its rights until the Cotten litigation was filed and even then its full **[*12]** appreciation of its claims stemmed from later disclosures. The adoption of that argument as a basis for tolling would eviscerate the limitations requirement. Once on notice of the facts previously described Clow had four years to pursue whatever investigation it wished in order to determine whether or not it had wanted to initiate a lawsuit. Such an investigation was not pursued.

B.

Clow interposes several general reasons for tolling the statute of limitations. The first reason stems from the economic relationship between the parties. Clow was the only supplier of resin and Clow argues that it did not aggressively investigate or challenge Witco's behabvior for fear of imperiling its supply of resin. ***HN5***[] Anticipated duress is not sufficient to toll the running of the statute of limitations. See *Kaiser Aluminum & Chemical Sales, Inc. v. Avondale Shipyards, Inc., 677 F.2d 1045, 1056-57 (5th Cir. 1982)*, cert. denied, *103 S.Ct. 729 (1983)*.

Clow also argues, primarily in relation to the alleged conspiracy between Witco and Cotten, that Witco's acts were by their nature self-concealing and should thus toll the statute of limitations. ***HN6***[] Courts have identified two types of fraudulent **[*13]** concealment. Fraudulent concealment may consist of affirmative acts by the defendant after the wrongdoing which are designed to conceal the wrongdoing. See *Rutledge, supra, 576 F.2d at 250*; *City of Kansas City v. Federal Pac. Electric Co., 310 F.2d 271, 278* (8th Cir.), cert. denied, *371 U.S. 912 (1962)*. Active efforts by defendants to conceal wrongdoing which has already occurred tolls the limitations period until actual discovery by the plaintiff. *Tomera v. Galt, 511 F.2d 504, 510 (7th Cir. 1975)*. Fraudulent concealment has also been the term used to describe instances where the underlying events being sued upon may involve fraud that by its nature is concealed. Some courts have stated, for example, that an antitrust conspiracy can be by its nature "self-concealing." See *King & King Enterprises v. Champlin Petroleum Co., 657 F.2d 1147, 1156 (10th Cir. 1981)*, cert. denied, *454 U.S. 1164 (1982)*; *Baker v. F & F Investments, 420 F.2d 1191, 1199* (7th Cir.), cert. denied, *400 U.S. 821 (1970)*. In instances of self-concealing fraudulent conduct the plaintiff must still show due diligence and lack of knowledge before it is proper to toll the limitations period. *Tomera, supra, 511 F.2d **[*14]** at 511 (7th Cir. 1975)*. *Board of Education of Evanston v. Admiral Heating & Ventilation, Inc., 94 F.R.D. 300, 301-02 (N.D. Ill. 1982)*.

As demonstrated above, Clow either knew of the facts underlying its antitrust claims or failed to exercise due diligence in discovering the bases for these claims. Compare *King & King, supra, 657 F.2d at 1155-56*; State of Illinois v. Sperry Rand Corp., 237 F.Supp. at 520 (N.D. Ill. 1965). Thus, Clow's self-concealing fraud argument must necessarily fail.Clow can only point to Witco's silence and denials of wrongdoing as positive acts by which Clow allegedly attempted to conceal its anticompetitive behavior. Such behavior does not constitute fraudulent concealment absent a fiduciary relationship between the parties or some showing that plaintiff was justifiably misled. See *Rutledge, supra, 576 F.2d at 250*. Given its knowledge of the factual bases for its antitrust claims, Clow's argument in this regard must fail as a matter of law.

Finally, Clow resists dismissal on the ground that the damages it suffered as a result of Witco's anticompetitive conduct were too speculative to be ascertainable prior to December 1976. ***HN7***[] The Supreme Court has established **[*15]** an exception to the statute of limitations in instances where the damage resulting from an anticompetitive act does not appear until later. *Zenith Radio Corp. v. Hazeltine, 401 U.S. at 339*. A cause of action for these speculative future damages accrues only when they are suffered. The plaintiff need only sue to recover these damages within four years from the date they are felt. Id. Clow did not plead speculative damages in its complaint, and mentions it for the first time in its brief.

Zenith did not establish any method for determining whether damages were speculative at the time of the wrongful act. Subsequent decisions do not suggest that the speculative damages exception is a broad one. See e.g. *Kaiser Aluminum & Chemical Sales, Inc. v. Avondale Shipyards, Inc., 677 F.2d 1045, 1053-54*, (5th Cir. 1982). *Siegel Oil Co. v. Gulf Oil Corp., 556 F.Supp. 302 (D. Co. 1982)*. ***HN8***[] Speculative damages must be distinguished from mere uncertainty as to the extent or amount of damages, which will not bar recovery under antitrust laws. See *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 562 (1931)*; *Barnosky Oils, Inc. v. Union Oil Co. of California, 655 F.2d 74, 83 (6th **[*16]** Cir. 1981)*.

The Siegel court outlined ***HN9***[] an approach in which damages "reasonably ascertainable" at the time the wrongful act occurred cannot be deemed speculative.

[R]easonably ascertainable does not mean provable with clear and convincing certainty. Reasonably ascertainable damages do include future damages when it is foreseeable when they will accrue and even the general rate at which they will accrue. When such future damages are foreseeable at the time of the act and could have been recovered or at least stopped by injunction in a lawsuit commenced at that time (or within [four] years thereafter), then Zenith implies no new action accrues.

556 F.Supp. at 309.

It appears that the market for polybutylene pipe and fittings was burgeoning in the early and mid-1970s and that new extruders were entering the market. Nevertheless, nothing in the record suggests that the damages which Clow alleges it suffered prior to December 1976 were not "reasonably ascertainable" even though particular calculations, as in many antitrust cases, might have been difficult. The damages caused by Witco's failure to adequately supply Clow with resins, and its provision of contaminated or defective **[*17]** resins, could have been calculated with reference to the supply contracts, and Clow's lost sales and higher manufacturing costs. The effects of price discrimination could be ascertained with reference to the prices and terms which Witco offered Clow's competitors. No substantial barriers would have prevented proof of the damages stemming from Witco's disparagement of Clow and its products, from its sales of hot water pipe resin at a higher price and its misappropriation of Clow's trade secrets. The effects of Cotten's defection and of the entrance of his own manufacturing facility into the pipe and fittings market were reasonably ascertainable, and before December 1976 Clow knew them to be severe. Calculation of these damages would be eased by the fact that Cotten was Clow's primary salesman in the mobile home market. The damages resulting from Witco's active encouragement of the emergence of competing extrusion companies could have been calculated through an analysis of the respective market shares. In sum, the data available as of December 1976 was sufficient as a matter of law to render damages reasonably ascertainable. See *Argus, Inc. v. Eastman Kodak Co., 552 F.Supp. 589, **[*18]** 597 (S.D.N.Y. 1982)*.

IV.

The parties agree that the Illinois statutes of limitations apply to Clow's state law claims. These claims stem from the same factual allegations that are the bases of Clow's antitrust claims.

HN10[] *Section 2-725 of the Uniform Commercial Code*, 26 Ill.Rev.Stat. 2-725, provides a four-year statute of limitations for breach of contract claims. Clow alleges that Witco breached its supply contract by refusing to deliver agreed-upon quantities of resin and by failing to allocate resins proportionally among manufacturers during periods of shortages. The parties appear to agree that the breaches of contracts occurred before December 1976.

Section 2-725(2) provides in part that "[A] cause of action accrues when the breach occurs, regardless of the aggrieved's party's lack of knowledge." *Section 2-725(4)* provides, however, that the law on tolling the statute of limitations applies to breach of contracts actions. Clow argues that 110 Ill.Rev.Stat. § 13-215, which provides that fraudulent concealment tolls the statute of limitations, prevents its breach of contract action from being time-barred.

This court has already determined that Clow was well aware **[*19]** before December 1976 that Witco had breached the resin supply contracts. It has also concluded that Witco had not engaged in fraudulent concealment in connection with these alleged breaches. Nothing suggests that the Illinois definition of fraudulent concealment differs in any important respect from that used in the antitrust area. See *Zagar v. Health & Hospitals Governing Commission of Cook County, 83 Ill.App.3d 894, 39 Ill.Dec. 112, 404 N.E.2d 496 (1980)*; *Harvey v. Harris Trust and Savings Bank, 73 Ill.App.3d 280, 29 Ill.Dec. 198, 391 N.E.2d 461*, cert. denied, *445 U.S. 929 (1980)*. Consequently, the four-year statute of limitations is not tolled and Clow's breach of contract claim is time-barred.

Clow's tortious interference claim rests upon an allegation that Witco prompted Cotten to discontinue his relationship with Clow, assisted Cotten in setting up an extrusion plant and supplied Cotten with polybutylene resins. The applicable statute of limitations is five years, Ill.Rev.Stat. ch. 110, § 13-205, and thus the limitations period extends back to December 1975. ***HN11***[] Despite the fact that actions based on tort ripen for statute of limitations purposes when all the elements of the **[*20]** action -- duty, breach and resulting injury or damage -- are present, *Ozark Airlines, Inc. v. Fairchild-Hiller Corp., 71 Ill.App.3d 637, 28 Ill.Dec. 277, 280, 390 N.E.2d 444, 447 (1st Dist. 1979)*, the mere fact that the extent of plaintiff's damages are not immediately ascertainable does not postpone accrual of the claim. *Del Bianco v. American Motorists Ins. Co., 73 Ill.App.3d 743, 29 Ill.Dec. 563, 567, 392 N.E.2d 120, 124 (1st Dist. 1979)*.

By December 1975 Clow was aware of the existence and operation of Cotten's extrusion plant and of Witco's provision of resin to the plant. What is unclear is whether the Clow-Cotten relationship had ended as of this date. As early as April 18, 1975, however, a ranking Clow official recommended severing Clow's relationship with Cotten. Given that Cotten was one of Clow's principal salesmen, and given that Witco was the sole supplier of resin, Clow's cause of action accrued prior to December 1975 even if the Clow-Cotten relationship had yet to be formally terminated.

HN12[] Illinois courts have developed a "discovery rule" that provides that the statute of limitations for torts begins to run when the plaintiff knew or reasonably should have known **[*21]** of both its injury and its wrongful causation. See *Witherell v. Weimen, 85 Ill.2d 146, 155, 52 Ill.Dec. 6, 10-11, 421 N.E.2d 869, 873-74 (1981)*. Clow argues that its failure to discover the true nature of the Cotten-Witco relationship until 1980 means that the statute of limitations did not begin running until well after December 1975. This argument fails because Clow reasonably should have known prior to December 1975 of the tortious nature of the Cotten-Witco connection. Cotten was a key Clow salesman. Since Witco was the sole supplier of resin Clow should have deduced that Cotten would not have built his extrusion plant without at least Witco's tacit encouragement. Clow knew in 1975 that Witco was supplying Cotten with resin even though Witco at that time was not fulfilling its supply contracts with Clow. Finally, Clow recognized the wrongful nature of the relationship between Witco and Cotten in early 1975 when a Clow official recommended, soon after Cotten's plant was discovered, that Clow should sever its relationship with Cotten.

Conclusion

Plaintiff's claims are time-barred by applicable statutes of limitations. Defendant's motion for summary judgment is accordingly **[*22]** granted.

HN3[] Antitrust & Trade Law, Exemptions & Immunities

"Antitrust standing," that is, the right to assert a private antitrust action for damages, has been conferred by Congress upon any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws. Section 4 of the Clayton Act, *15 U.S.C.S. § 15*. On its face, § 4 contains little in the way of restrictive language. And the lack of restrictive language reflects Congress' "expansive remedial purpose" in enacting § 4: Congress sought to create a private enforcement mechanism that would deter violators and deprive them of the fruits of their illegal actions, and would provide ample compensation to the victims of antitrust violations. Two factors that limit the availability of the § 4 remedy: (1) the risk of duplicative recovery; and (2) the remoteness of plaintiff's alleged injury from the defendant's alleged violation. In determining whether the injuries are "too remote" from the antitrust violation to afford standing, the court must consider (a) the physical and economic nexus between the alleged violation and the harm to the plaintiff; and (b) the relationship of the injury alleged with those forms of injury about which Congress was likely to have been concerned in making defendant's conduct unlawful and in providing a private remedy under § 4.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN4[] Private Actions, Standing

Supplier standing should be denied unless (1) the plaintiff's product is virtually identical with that of the defendant, or at least the overwhelming component of the latter in value, and (2) the proximity of interest is very clear, as evidenced by the fact that the defendant's actions clearly dictated a substantial market response by the plaintiff, and (3) the plaintiff is the injured party whose interest will most likely lead him to vindicate the public interest, as for example, where each immediately-affected dealer is little damaged and can easily shift his attention to other products, and (4) duplicate recoveries can be avoided through a lost-profits measure of damages. In any given case a supplier may not in fact have sustained, or be able to prove, an impact in its sales or profits as a result of illegal acts that primarily affect its retailer-customers.

HN5[] Robinson-Patman Act, Remedies

It may well prove to be the case that in certain respects the wholesaler, through refunds or credits to its retailer-customers, may have actually borne the brunt of the antitrust injury. While it is well established that §§ 2(d), 2(e) of the Clayton Act, as amended by 15 U.S.C.S. §§ 13(d), 13(e) of the Robinson-Patman Act, proscribe only discrimination among competitors on the same level of distribution, there is little basis for concluding that Congress meant to afford a remedy to those specifically discriminated against, but not those whose injury closely flows from that which makes the defendant's acts unlawful. Section 2(e) of the Clayton Act requires that the service or facility relate to the resale of the product by the purchaser as opposed to the original sale from the supplier to the purchaser. Thus § 2(e) is violated neither by discriminatory deliveries of products, nor by discriminatory allocation of products. A seller who permits certain of its customers to return unsold goods for credit, while not extending the same privilege to other customers violates § 2(e).

MEMORANDUM-DECISION AND ORDER

HN1[] Sections 2(d) and 2(e) of the Clayton Act, as amended by the Robinson-Patman Act, *15 U.S.C. §§ 13(d)* and *13(e) (1976)*, make it unlawful, in substance, for a seller to furnish promotional and advertising allowances, services, or facilities to a customer in connection with the sale of a product unless such allowances, services or facilities are made available on proportionately equal terms to all other customers that compete for such product on the same level of distribution as the favored customer. *See generally, F.T.C. v. Fred Meyer, Inc., 390 U.S. 341, 19 L. Ed. 2d 1222, 88 S. Ct. 904 (1968)*. **[**2]** The central issue on this motion is whether the plaintiff, a wholesaler, may assert a claim for damages for injury to its business as a result of the defendant manufacturer's alleged violation of §§ 2(d) and 2(e) by favoring direct-purchasing retailers over the indirect-purchasing retailers supplied through the plaintiff. The court, for reasons set forth herein, concludes that the plaintiff has antitrust standing to assert such claim, and therefore denies defendants' motion for judgment on the pleadings or, in the alternative, for partial summary judgment.

I.

As alleged in its Amended Complaint, plaintiff Morris Electronics of Syracuse, Inc. ("Morris") is a wholesale dealer in electronics products and appliances. Defendants Mattel, Inc. and its subsidiary Mattel Electronics, Inc. ("Mattel") manufacture, distribute and sell consumer electronics, including its trademarked Intellivision **[*58]** master components and game cartridges. Defendant Buduson is a sales representative of Mattel doing business as Sound Merchandise.

Plaintiff asserts four causes of action, which pertain to Mattel's alleged practices in the sale and marketing of its consumer electronics products. The first **[**3]** cause of action alleges that the defendants unlawfully tied and conditioned the sale to Morris of its Intellivision master components to the sale of its handheld and other consumer electronic games in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1 (1976)*, and *Section 3* of the Clayton Act, *15 U.S.C. § 14 (1976)*. The second cause of action alleges that Mattel unlawfully discriminated in price between Morris and direct purchasing retailers by selling consumer electronics products to direct purchasing retailers at substantially lower prices than to Morris in violation of Section 2(a) of the Clayton Act, as amended by the Robinson-Patman Act, *15 U.S.C. § 13(a) (1976)*. The third cause of action -- which is the subject of this motion -- alleges that Mattel provided promotional and advertising allowances, services and facilities to direct-purchasing retailers in connection with the sale of Mattel's consumer electronics products without providing the same allowances, services and facilities to Morris or Morris' retailer customers on proportionately equal terms, in violation of §§ 2(d) and 2(e) of the Clayton Act, as amended by the Robinson-Patman Act, *15 U.S.C. §§ 13(d)* and *13(e)* ***[**4]*** *(1976)*. Finally, plaintiff's fourth cause of action incorporates the previous allegations, and asserts a violation of the Donnelly Act, *NY GENERAL BUSINESS LAW § 340* (McKinney 1968).

Presently before the court is the defendants' motion, pursuant to *Rule 12(c), Fed. R. Civ. P.*, to dismiss the third cause of action and part of the fourth cause of action in plaintiff's Amended Complaint or, in the alternative, pursuant to *Rule 56 Fed. R. Civ. P.*, for summary judgment as to those claims. Inasmuch as plaintiff does not oppose defendants' motion with respect to part of its fourth cause of action, that motion will be granted, and the court's discussion herein is limited to the sufficiency of plaintiff's claim under §§ 2(d) and 2(e) of the Clayton Act.

II.

For the purpose of considering defendant's *Rule 12(c)* motion, all of the well-pleaded allegations in the complaint are assumed to be true, and all contravening assertions in the defendants' Answer are taken to be false. *National Metropolitan Bank v. United States, 323 U.S. 454, 89 L. Ed. 383, 65 S. Ct. 354 (1945)*. *See generally*, 5 Wright & Miller, Federal Practice & Procedure § 1368 (1969 ed.). [1] Turning, then, to the specific **[**5]** allegations in support of the challenged cause of action, the court must assume the truth of the following:

> 31. . . . In furtherance of the sale of Mattel's products by large direct purchasing retailers, including but not limited to J. C. Penny, Kiddie City, a division of Lionel, K-Mart and Radio Shack, Mattel supplied these direct purchasing retailers with promotional and advertising services and facilities for their use and benefit in connection with their sale of Mattel's products, without offering the same allowances, services and facilities to Morris or Morris' retailer customers on proportionately equal terms as those available to these direct-purchasing retailers or by offering the promotional benefits only on a delayed or in an otherwise discriminatory fashion.

[6]** For example, Mattel provided its direct-purchasing retail customers with advance notification of a rebate that it would offer to promote sales of Intellivision, which notice enabled such direct-purchasing retail customers, but not its indirect-purchasing retail customers, to place timely advertisements **[*59]** of the rebate during the 1982 Christmas season. *Amended Complaint* paras. 32(a)-(d). Morris also discriminated in favor of direct-purchasing retailers by furnishing them with more timely deliveries of products, *id*. P 32(e); more advantageous allocations of in store display materials, *id*.; more advantageous allocations of desired products, *id*.; and more favorable return privileges. *Id*. P 32(f).

As a result of the aforementioned discriminatory conduct, the plaintiff lost profits, sales and goodwill, and its business has been impaired. *Id*. P 35.

III.

HN2[] Sections 2(d) and (e) of the Clayton Act, *15 U.S.C. §§ 13(d)* and *(e)*, provide as follows:

> *§ 13*. *Discrimination in Price, Services, or Facilities*.
>
> . . . .
>
> (d) Payment for services or facilities. It shall be unlawful for any person engaged in commerce to pay or contract for the payment **[**7]** of anything of value to or for the benefit of a customer of such person in the course of such commerce as compensation or in consideration for any services or facilities furnished by or through such customer in connection with the processing, handling, sale, or offering for sale, of any products or commodities manufactured, sold, or offered for sale by such person, unless such payment or consideration is available on proportionally equal terms to all other customers competing in the distribution of such products or commodities.
>
> (e) Furnishing services or facilities. It shall be unlawful for any person to discriminate in favor of one purchaser against another purchaser or purchasers of a commodity bought for resale, with or without processing, by contracting to furnish or furnishing, or by contributing to the furnishing of, any services or facilities connected with the processing, handling, sale, or offering for sale of such commodity so purchased upon terms not accorded to all purchasers on proportionally equal terms.

---

[1] Since the parties agree that the issues before the court are issues of law which may be decided from the face of the pleadings, the court will expressly treat the motion brought pursuant to *Rule 12(c)*, and then rule upon the alternative summary judgment motion as a matter of course.

As both parties recognize, these sections only prohibit a seller from discriminating between customers that compete on the same level of distribution; they do not **[**8]** mandate proportional equality between wholesale and retail customers. *F.T.C. v. Fred Meyer, Inc., 390 U.S. 341, 348-349, 19 L. Ed. 2d 1222, 88 S. Ct. 904*. In moving to dismiss, the defendants construe the Amended Complaint as alleging that Mattel discriminated in promotional advertising services and facilities between Morris, a wholesale distributor, and direct-purchasing retailers, such as J. C. Penney. They therefore contend that the plaintiff has failed to state a claim, since it has failed to allege discrimination between customers that compete on the same level of distribution.

The complaint does appear to allege, *inter alia*, that the defendants discriminated between Morris and direct-purchasing retailers, see *Amended Complaint* para. 31 (". . . Mattel supplied these direct purchasing retailers. . . without offering the same . . . to Morris. . . ."), and to that extent, it does not state a claim. However, the complaint also alleges that the defendants unlawfully discriminated between Morris' retail customers and direct-purchasing retailers -- customers that *are* on the same functional level -- and that Morris was injured in its business as a result of that unlawful **[**9]** discrimination. [2] Such allegation, if asserted by one of the injured retailers, would presumably state a claim. The issue, therefore, **[*60]** is whether plaintiff, a wholesaler, has antitrust standing to assert the claim that the defendants' discrimination among retailers injured it in its business. [3]

[10]** IV.

HN3[] "Antitrust standing", that is, the right to assert a private antitrust action for damages, has been conferred by Congress upon "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws." Clayton Act § 4, *15 U.S.C. § 15*. As the Supreme Court explained in *Blue Shield of Virginia v. McCready, 457 U.S. 465, 472, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*,

> "On its face, § 4 contains little in the way of restrictive language." And the lack of restrictive language reflects Congress' "expansive remedial purpose" in enacting § 4: Congress sought to create a private enforcement mechanism that would deter violators and deprive them of the fruits of their illegal actions, and would provide ample compensation to the victims of antitrust violations. (Citations omitted).

However, as the Court subsequently emphasized in *Associated General Contractors of California, Inc. v. California State Council of Carpenters, 459 U.S. 519, 103 S. Ct. 897, 907, 74 L. Ed. 2d 723 (1983)* ("*Associated General*"), "Congress did not intend to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust **[**11]** violation," nor did Congress "intend to allow every person tangentially affected by an antitrust violation to maintain an action to recover threefold damages for the injury to his business."

After summarizing the struggle of federal courts "to articulate a precise test to determine whether a party injured by an antitrust violation may recover treble damages," the Court in *Associated General* conceded the impossibility of announcing a "black letter rule" that could be uniformly applied. It did, however, identify a number of factors for

---

[2] Possibly, plaintiff did not even intend to allege that the defendants discriminated against *it* and in favor of direct purchasing retailers, but rather sought in Amended Complaint para. 31 to allege only that the defendants discriminated against *its customers* by failing to furnish proportionately equal allowances, services or facilities to either those customers, or to it. *See F.T.C. v. Fred Meyer, Inc., 390 U.S. at 358* (Nothing we have said bars a supplier . . . from utilizing his wholesalers to distribute payments or administer a promotional program, so long as the supplier takes responsibility . . . for seeing that the allowances are made available to all who compete in the resale of his product).

[3] Since the issue is standing, and not the substantive scope of §§ 2(d) and 2(e), defendants' reliance on the holdings of *F.T.C. v. Fred Meyer, Inc., Kirby v. P.R. Mallory & Co., Inc., 489 F.2d 904* (7th Cir.) *cert. denied 417 U.S. 911, 41 L. Ed. 2d 215, 94 S. Ct. 2610 (1974)*, and *L.S. Amster & Co., Inc. v. McNeil Laboratories, Inc., 504 F. Supp. 617 (S.D.N.Y. 1980)* is misplaced. None of those decisions squarely address the question of whether a wholesaler has antitrust standing to sue for injuries it sustained as a result of the defendants' discrimination among retailers. Moreover, even if the issue had been addressed by *Kirby* or *L.S. Amster*, the issue would now have to be considered anew in light of recent Supreme Court decisions on antitrust standing, discussed *infra*.

courts to consider when confronted with the recurrent problem of antitrust standing. A recent decision of the Court of Appeals instructs the courts of this circuit "to follow the approaches adumbrated by the Supreme Court in *McCready* and *Associated General* without concern whether the results are consistent with language in earlier Second Circuit cases." *Crimpers Promotions, Inc. v. Home Box Office, Inc., 724 F.2d 290, 293 (2d Cir. 1983)*.

A.

In *McCready*, the Supreme Court focused upon two factors that limit the availability of the § 4 remedy: (1) the risk of duplicative recovery; and (2) the remoteness of plaintiff's alleged injury **[**12]** from the defendant's alleged violation.

In this instance, the risk of duplicative recovery is minimal. As the plaintiff persuasively explains:

> . . . [Morris'] injuries are not based upon obtaining a portion of the damages suffered by its customers. Rather, Morris' claims are based upon the profits lost as a result of (i) the cancellation of previously placed orders for Mattel products and (ii) having to provide credits and refunds to its customers, as a consequence of defendants' failure to meet their Robinson-Patman obligations. *Plaintiff's Letter in Opposition* at 5 (9/16/83).

Without regard, at this juncture, to any other challenge to these bases for recovery, it is evident that the plaintiff seeks to **[*61]** recover for injuries that are distinct from, and do not duplicate, any injuries its customers might have sustained. *Cf*. 2 Areeda & Turner, ***Antitrust Law*** para. 340d at 214 (1978) (commenting that, where a manufacturer sues its customer's competitor, "duplication could be avoided by awarding each [i.e., the manufacturer and his customer] his lost profits").

Turning next to "the conceptually more difficult question," of whether the injuries **[**13]** are "too remote" from the antitrust violation to afford standing, *McCready, 457 U.S. at 476*, the court must consider (a) "the physical and economic nexus between the alleged violation and the harm to the plaintiff"; and (b) "the relationship of the injury alleged with those forms of injury about which Congress was likely to have been concerned in making defendant's conduct unlawful and in providing a private remedy under § 4." *Id. at 478*.

The plaintiff herein is clearly not the *most* immediate victim of the alleged violation; its retail customers would bear the brunt of any discrimination in favor of their competitors. Nevertheless, the "nexus" between the alleged violation and the alleged harm is a close one: if Morris' retailer-customers lose sales of Mattel products such as Intellivision master components to their direct-purchasing competitors, Morris is apt to suffer an impact in its sales of those products to its retailer-customers.

To be sure, a supplier "is usually denied standing to complain that he was injured by selling less to one who was injured by the defendant's alleged antitrust violation." 2 Areeda & Turner, *supra*, P 340e at 217. *See also, Crimpers,* ***[**14]*** *supra, 724 F.2d at 294* (dicta). This general rule may have to be reconsidered in light of *McCready* and *Associated General*. But in any event, the plaintiff here does not merely allege a loss of sales in its business due to a general impairment in its customers' businesses, which in turn is due to the defendants' illegal conduct. Rather, plaintiff alleges a loss in sales and profits with respect to particular finished products because its customers' ability to resell those same products is impaired by the defendants' illegal conduct. Such allegation presents a particularly close connection between the violation and the injury and has been recognized as a basis for supplier standing. Areeda & Turner, *supra*, P 340 at 212-13. [4]

---

[4] Areeda & Turner comment:

> On balance, we think that ***HN4***[] [supplier] standing should be denied unless (1) *the plaintiff's product is virtually identical with that of the defendant, or at least the overwhelming component of the latter in value*, and (2) the proximity of interest is very clear, as evidenced by the fact that the defendant's actions clearly dictated a substantial market response by the plaintiff, and (3) the plaintiff is the injured party whose interest will most likely lead him to vindicate the public interest -- as for example, where each immediately-affected dealer is little damaged and can easily shift his attention to other products -- and (4) duplicate recoveries can be avoided through a lost-profits measure of damages. *Id. at 213* (emphasis added).

[15]** It is also true that in any given case a supplier may not in fact have sustained -- or be able to prove -- an impact in its sales or profits as a result of illegal acts that primarily affect its retailer-customers. *See Kirby v. P.R. Mallory & Co., Inc., 489 F.2d 904, 911* (7th Cir.), *cert. denied 417 U.S. 911, 41 L. Ed. 2d 215, 94 S. Ct. 2610 (1974)*. But where, as here, the injury is assumed to have occurred for the purpose of this motion, that injury appears to this court to be "precisely 'the type of loss that the claimed violations . . . would be likely to cause. '" *McCready, 457 U.S. at 479*, *quoting Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*.

With regard to the question of whether the alleged injury is a type "about which Congress was likely to have been concerned," *McCready, 457 U.S. at 478*, the court notes, first, "that Robinson-Patman 'was enacted in 1936 to curb and prohibit all devices by which large buyers gained discriminatory preferences over smaller ones by virtue of **[*62]** their greater purchasing power. '" *Jefferson Cty. Pharmaceutical Ass'n. v. Abbott Laboratories, 460 U.S. 150, 103 S. **[**16]** Ct. 1011, 1017, 74 L. Ed. 2d 882 (1983)*, *citing, inter alia, F.T.C. v. Fred Meyer, Inc., supra.* See also, H. C. Hansen, "Robinson-Patman Law: A Review & Analysis," *51 Fordham L. Rev. 1113, 1120-24 (May 1983)*. More specifically, §§ 2(d) and 2(e) were enacted to prevent sellers from circumventing the ban on price discrimination in § 2(a) by discriminating between buyers through advertising and other sales promotional allowances. *F.T.C. v. Fred Meyer, Inc., 390 U.S. at 350-52*.

Undoubtedly, the special focus of Congress' concern in enacting §§ 2(d) and 2(e) were the independent merchants who competed with large chain stores. As the Court noted in *F.T.C. v. Fred Meyer, Inc., id. at 349-50*:

> The role within the statutory scheme which Congress intended for § 2(d) is well documented in the legislative history. An investigation of chain store buying practices undertaken by the Federal Trade Commission, at Congress' request, had indicated that § 2 of the Clayton Act was an inadequate deterrent against outright price discrimination. The investigation also revealed that certain practices by which large buyers induced concessions which their smaller competitors could not **[**17]** obtain were wholly beyond the reach of § 2. It is significant that congressional concern had focused on the buying practices of large retailers, particularly the chain stores, because it was felt that they were threatening the continued existence of the independent merchant.

Moreover, the Court also explained in that case that "the competition with which Congress was concerned in § 2(d) was that between buyers *who competed in resales* of the supplier's products." *Id. at 356* (emphasis added). The Court therefore concluded that Congress did not intend, in enacting § 2(d), to compel a supplier to pay to a wholesaler promotional allowances that are proportionately equal to those it pays to retailers.

There is, however, no indication in *F.T.C. v. Fred Meyer, Inc*. or its progeny that the injury caused to a wholesaler by a supplier's discrimination *among retailers* was beyond the concern of Congress. The wholesaler is no stranger to the competitive scheme the statute is designed to protect, and when that scheme is disrupted by violations of §§ 2(d) and 2(e), its injury is "inextricably intertwined" with the injury inflicted upon the retailers. *Crimpers, 724 F.2d **[**18]** at 294-95*, *quoting McCready, 457 U.S. at 484*. Indeed, ***HN5***[] it may well prove to be the case that in certain respects the wholesaler, through refunds or credits to its retailer-customers, may have actually borne the brunt of the antitrust injury. *See McCready, 457 U.S. at 483*. Thus, while it is well established that §§ 2(d) and 2(e) proscribe only discrimination among competitors on the same level of distribution, there is little basis for concluding that Congress meant to afford a remedy to those specifically discriminated against, but not those whose injury, like this plaintiff's alleged injury, closely "flows from that which makes the defendant's acts unlawful." *Id. at 484*.

B.

In *Associated General*, the Court resolved an antitrust standing problem by considering a number of factors which overlap, in part, those it considered in *McCready*.

One major factor discussed was "the nature of plaintiff's injury." *103 S. Ct. at 908-10*. Here, plaintiff alleges lost sales and profits with respect to Mattel products as a result of the defendants' §§ 2(d) and 2(e) violations. Clearly, the injury is of a general nature ordinarily asserted by antitrust plaintiffs. And as discussed **[**19]** previously, while the plaintiff's injury is not at the epicenter of Congress' concern, it is sufficiently related to the retailer's injury to warrant an inference that Congress did not intend such injury to go unremedied.

[*63] A second factor in *Associated General*, also addressed in *McCready*, concerned the directness or indirectness of plaintiff's injury. *Id. at 910*. Undoubtedly, plaintiff's allegations reveal a causal connection between the violation and its injury, *id. at 908*; moreover, in the language of torts, the violation would be considered a "proximate cause" of the injury, which was "foreseeable." *See id. at 905-06*, n.'s 24, 25. As discussed above, while the plaintiff was not likely to have been the *most* direct victim of the §§ 2(d) and 2(e) violations, *but see ante at* 14, the nexus between the alleged violation and the alleged harm was close indeed.

The Court in *Associated General* also articulated its version of the "best plaintiff" principle that is often considered when standing is an issue:

> The existence of an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest **[**20]** in antitrust enforcement diminishes the justification for allowing a more remote party such as the Union to perform the office of a private attorney general. Denying the Union a remedy on the basis of its allegations in this case is not likely to leave a significant antitrust violation undetected or unremedied.

Id. at 911. *See also*, Wright, Miller & Cooper, *13 Federal Practice & Procedure: Jurisdiction* § 3531 at 211 (1975 ed.).

In this instance, although the plaintiff is perhaps "more remote" than its retailer-customers, that is counterbalanced since the plaintiff appears uniquely situated to litigate matters that its individual retailer-customers might not be as able to litigate on their own behalf. *See* Areeda & Turner, *supra*, P 340c at 213 (supplier standing is warranted where, *inter alia*, "the plaintiff is the injured party whose interest will most likely lead him to vindicate the public interest -- as, for example, where each immediately-affected dealer is little damaged and can easily shift his attention to other products . . .").

A fourth factor identified in *Associated General* concerned the speculative nature of the damages alleged. **[**21]** *Id. at 911*. In *Associated General*, for instance, a union claimed that an employer association coerced certain third parties to enter into business relations with non-union contractors and subcontractors in violation of the Sherman Act; the Court found plaintiff's claim of damages "highly speculative," due in part to the indirect and remote nature of the union's injury.

Here, in contrast, plaintiff alleges that the defendants discriminated against indirect-purchasing retail merchants in promotional and advertising allowances, services, and facilities in violation of §§ 2(d) and 2(e) of the Clayton Act. As discussed previously, such discriminatory conduct could well impact upon the profits and sales of a wholesaler supplying the affected products to the indirect-purchasing retailers. The court is unprepared, on this motion directed toward the pleadings, to conclude that such damages would necessarily be too speculative to permit this action to proceed. Indeed, the business records of Morris and its customers might with elucidation by expert and non-expert witnesses, reveal the amount of damages plaintiff sustained, if any, with considerable precision. Like the plaintiff in **[**22]** *Crimpers*, Morris' losses "should be proveable under the liberal principles long recognized in antitrust cases." *724 F.2d at 297*.

A final factor discussed in *Associated General* was the projected difficulty in "avoiding either the risk of duplicate recoveries on the one hand, or the danger of complex apportionment of damages on the other." *103 S. Ct. at 912*. In this court's view, set forth previously in the course of discussing the *McCready* factors, duplicate recovery can be avoided by focusing upon plaintiff's lost profits. That lodestar should enable the court to avoid a complex apportionment of damages as well.

Accordingly, while the court acknowledges that the question of plaintiff's standing is not insubstantial, a review of the claim in light of the factors articulated by the Supreme Court in *McCready* and *Associated General* lead to a conclusion **[*64]** that this plaintiff is, on the basis of its pleading, a person "injured in his business or property by reason of anything forbidden in the antitrust laws." Clayton Act § 4.

V.

In the event that this court did not recognize plaintiff's standing to sue for its own injury, plaintiff contended that it would **[**23]** have standing to assert the antitrust claims of its retailer-customers by virtue of several assignments executed and delivered by such customers to the plaintiff. The defendants respond, with considerable support in this court's view, that such assignments are champertous under New York law, *see* *NY JUDICIARY LAW § 489* (McKinney 1983) and therefore void. In view of the court's holding above, that plaintiff has standing to assert a claim for its injuries, it is not necessary to rule upon the validity of the assignments. However, it should be stated at this point that, under the court's reading of the Amended Complaint, plaintiff is suing to recovery only *its* damages, and not any damages sustained by its customers.

VI.

In addition to challenging the third cause of action *in toto* on standing grounds, defendants also challenge specific allegations therein as failing to state a claim under §§ 2(d) and 2(e) of the Clayton Act. Specifically, defendants contend that insofar as the plaintiff alleges that Mattel provided "direct-purchasing retailers with more timely deliveries of product" and "more advantageous allocations of desired products," *Amended Complaint* para. 32(e), **[**24]** "refused to honor written and oral cancellations," and "pre-released" shipments of products to Morris, *Amended Complaint* para. 32(f), it has failed to allege anything forbidden by the statute invoked.

Clearly, there is a division of opinion among courts as to whether such allegations fall within the scope of the §§ 2(d) and 2(e). *Compare, e.g.,* *L & L Oil Co., Inc. v. Murphy Oil Corp., 674 F.2d 1113, 1118-19 (5th Cir. 1982)* (delivery is not a "service or facility" within the meaning of § 2(e); moreover, § 2(e) requires that the service or facility relate to the *resale* of the product, and problems associated with delivery concern only the original sale) *with* *Centex-Winston Corp. v. Edward Hines Lumber Co., 447 F.2d 585* (7th Cir.) *cert. denied*, *405 U.S. 921, 30 L. Ed. 2d 791, 92 S. Ct. 956 (1972)* (delivery is a "service or facility" within the meaning of § 2(e)). In this circuit, one district court adopted the *Centex-Winston* position, *Harlem River Consumers Cooperative, Inc. v. Associated Grocers of Harlem, Inc., 371 F. Supp. 701 (S.D.N.Y. 1974)*, and was affirmed, although without discussion of this issue. *493 F.2d 1352 (2d Cir. 1974)*. However, subsequent **[**25]** decisions by other district courts in this circuit have ruled that problems associated with delivery are beyond the scope of § 2(e). *O'Connell v. Citrus Bowl, Inc., 99 F.R.D. 117, 121 (E.D.N.Y. 1983)*; *Diehl & Sons, Inc. v. International Harvester Co., 426 F. Supp. 110 (E.D.N.Y. 1976)*.

After reviewing the language of the statute and the pertinent authorities, this court is convinced, first, that the Second Circuit has not clearly adopted the *Centex-Winston* position, and second, that the *L & L Oil Co., Inc.*, position is correct. As explained at some length in *L & L Oil Co., Inc.*, § 2(e) was "aimed at advertising and other promotional services," *id. at 1118*, and that, "except for "*Centex-Winston* and the cases adopting its holding, the only arrangements courts have found to be services or facilities are those relating to promotional favors." *Id. at 1119*, *citing, inter alia,* *F.T.C. v. Simplicity Pattern, Co., 360 U.S. 55, 3 L. Ed. 2d 1079, 79 S. Ct. 1005 (1959)*. Moreover, there is more than ample authority for *L & L Oil Co., Inc.'s* conclusion that § 2(e) requires that the service or facility relate to the resale of the product by the purchaser **[**26]** as opposed to the original sale from the supplier to the purchaser. *See e.g.,* *Bouldis v. U.S. Suzuki Motor Corp., 711 F.2d 1319, 1327-28 (6th Cir. 1983)*; *Foremost Pro Color v. Eastman Kodak Co., 703 F.2d 534, 546 (9th* **[*65]** *Cir. 1983)*; *O'Connell v. Citrus Bowl, Inc., supra at 121*. *See also*, 5 vonKalinowski, *Antitrust Laws and Trade Regulation* § 35.02 (1983). Thus § 2(e) is violated neither by discriminatory deliveries of products, *L & L Oil Co., Inc.*, nor by discriminatory allocation of products. *Holleb & Co. v. Produce Terminal Cold Storage Co., 532 F.2d 29, 33 (7th Cir. 1976)*; *David R. McGeorge Car Co. v. Leyland Motor Sales, Inc., 504 F.2d 52, 55* (4th Cir.) *cert. denied*, *420 U.S. 992, 43 L. Ed. 2d 674, 95 S. Ct. 1430 (1975)*. *A fortiori* the allegation of pre-released shipments must fall as well.

However, insofar as plaintiff alleges discrimination with respect to written and oral cancellations, it has been held that a seller who permits certain of its customers to return unsold goods for credit, while not extending the same privilege to other customers violates § 2(e). *Bouldis, supra, 711 F.2d at 1328*. At least until such time **[**27]** as the factual basis for plaintiff's allegation with respect to cancellations becomes clearer, the court declines to rule it insufficient under § 2(e).

ACCORDINGLY, the court denies defendants' motion for judgment on the pleadings or, in the alternative, for summary judgment with respect to the third cause of action, except insofar as plaintiff claims violations of §§ 2(d) and 2(e) of the Clayton Act, as amended by the Robinson-Patman Act, based on allegations that Mattel provided "direct purchasing retailers with more timely deliveries of product" and "more advantageous allocations of desired products," *Amended Complaint* para. 32(e), and "pre-released" shipments of products to Morris, *Amended Complaint* para. 32(f), with respect to which allegations the court grants judgment on the pleadings for the defendants; and the court grants defendants' motion for judgment on the pleadings with respect to the fourth cause of action insofar as plaintiff claims violations of *NY GENERAL BUSINESS LAW §§ 340 et seq*. based on allegations of price discrimination.

IT IS SO ORDERED.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN1[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment is to be granted sparingly in antitrust litigation, especially where an allegation of conspiracy raises issues of fact as to motive and intent. In deciding whether to grant summary judgment, moreover, the court must view the facts in the light most favorable to the party opposing the motion, and all possible inferences must be resolved in that party's favor. The moving party has the burden of showing that there is no genuine issue for trial as to any material fact, and that it is entitled to judgment as a matter of law.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN2[] **Summary Judgment, Motions for Summary Judgment**

Where a complete pretrial record shows there is no genuine issue of material fact, and the resisting party does not present a record sufficient to support a reasonable finding in his favor, a district court has a duty to grant the motion for summary judgment.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN4[] **Price Discrimination, Defenses**

Summary judgment is particularly appropriate where extensive discovery has been taken and legitimate business reasons have been advanced for defendants' conduct. Immaterial factual disputes should not block summary judgment.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

HN5[] **Antitrust & Trade Law, Sherman Act**

Section 1 of the Sherman Act, *15 U.S.C.S. § 1*, states that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is declared to be illegal. But while the Sherman Act speaks of restraint of trade in absolute terms, it has long been established that *§ 1* proscribes only unreasonable restraints.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN6[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Courts apply a per se rule only to agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. The legality of all other arrangements is governed by a rule of reason, which invites a more open inquiry into, and a balancing of, such factors as the power of the defendants, the effect of the arrangement, its possible redeeming virtues, and the availability of alternative ways of achieving any legitimate objectives with fewer threats to competition.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] Sherman Act, Claims

The starting point for proof of a section 1 Sherman Act, 15 U.S.C.S. § 1, violation is evidence of a contract, combination, or conspiracy between two or more persons. Proof of joint or concerted action is required; proof of unilateral action does not suffice.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN8[] Monopolies & Monopolization, Conspiracy to Monopolize

Conspiracies are, of course, rarely evidenced by explicit agreements, but must usually be proved by inferences that may fairly be drawn from the behavior of the alleged conspirators. At a minimum, however, the circumstances must be such as to warrant a jury in finding that the conspirators had a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN9[] Monopolies & Monopolization, Conspiracy to Monopolize

Common ownership and control does not liberate corporations from the impact of the antitrust laws. However, a single corporate entity of all its agents and employees are normally treated as a single actor for antitrust purposes except where the individuals or sub-entities are held out as competitors.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN10[] Monopolies & Monopolization, Conspiracy to Monopolize

If no other interpretation of the facts is possible except that a controlled subsidiary, with whom a parent was alleged to have conspired, was created to be and never acted other than as agent for the parent, no valid conspiracy claim is stated because separate entities do not exist to conspire.

HN11[] **Vertical Restraints, Resale Price Maintenance**

Price-fixing conspiracies are unlawful per se.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN12[] **Monopolies & Monopolization, Conspiracy to Monopolize**

A mere showing of close relations or frequent meetings between the alleged conspirators will not sustain a plaintiff's burden absent evidence which would permit the inference that these close ties led to an illegal agreement. Nor does a manufacturer's mere receipt of complaints from its wholesalers or agents who compete with the plaintiff, or its consultation with such other competing wholesalers, standing alone, support a finding of conspiracy with them.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN13[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Even where a termination follows the receipt of complaints from wholesalers or agents, there is no basis for inferring the existence of concerted action, absent some other evidence of a tacit understanding or agreement with them. Finally, the mere fact that a business reason advanced by a defendant for its cut-off of a customer is undermined does not, by itself, justify the inference that the conduct was therefore the result of a conspiracy. Even if a manufacturer or supplier, acting independently, gave a false or inaccurate reason for its action, whether because of a desire to avoid controversy or some other consideration, this would not violate any legal obligation to the customer, absent proof of a conspiracy or breach of contract.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN14[] **Monopolies & Monopolization, Conspiracy to Monopolize**

Permitting an agreement to be inferred merely from the existence of complaints, or even from the fact that termination came about in response to complaints, could deter or penalize perfectly legitimate conduct. Moreover, retailers are an important source of information for manufacturers and their agents, which the antitrust laws should not operate to foreclose. In sum, to permit the inference of concerted action on the basis of receiving complaints alone and thus to expose the defendant to treble damage liability would both inhibit management's exercise of independent business judgment and emasculate the terms of the statute.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN15[] **Price Fixing & Restraints of Trade, Vertical Restraints**

Publication of a suggested retail price list, however, and voluntary adherence to it by plaintiff's competitors, is insufficient to support a finding of a vertical price fixing conspiracy.

Antitrust & Trade Law > Sherman Act > Penalties

HN28[] Tying Arrangements, Clayton Act

Tying is an agreement by a party to sell one product but only on the condition that the buyer also purchase a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier. The seller's leverage in the tying product market enables it to deny competitors free access to the market for the tied product. Tying is a per se violation of both *section 1* of the Sherman Act, *15 U.S.C.S. § 1*, and *section 3* of the Clayton Act, *15 U.S.C.S. § 14*, so long as forcing is likely.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN29[] Sherman Act, Claims

A *section 1* Sherman Act, *15 U.S.C.S. § 1*, tying violation has at least five elements: first, a tying and a tied product; second, evidence of actual coercion by the seller that in fact forced the buyer to accept the tied product; third, sufficient economic power in the tying product market to coerce purchaser acceptance of the tied product; fourth, anticompetitive effects in the tied market; fifth, involvement of a not insubstantial amount of interstate commerce in the tied product market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Business & Corporate Compliance > ... > Types of Commercial Transactions > Sales of Goods > General Overview

HN30[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The elements of a violation of section 3 of the Clayton Act, 15 U.S.C.S. § 14, are: (1) sales of goods for use, consumption, or resale within the United States; (2) sales conditioned on the purchaser's not dealing in the goods of a competitor; (3) a potential effect of substantial lessening of competition in the market for the tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN31[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. Because this element of forcing is so crucial, per se condemnation -- condemnation without inquiry into actual market conditions -- is only appropriate if the existence of forcing is probable.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN32[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A plaintiff might demonstrate the requisite forcing in two ways. He might establish that he has been required to purchase something which he does not want to take. Or he might show an unremitting policy of tie-in, which, if accompanied by sufficient market power, might substitute for actual coercion.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN33[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Tying arrangements can only be condemned if they restrain competition on the merits by forcing purchases that would not otherwise be made.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN34[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Absent evidence of forcing, tying arrangements are not unlawful.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN35[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

In order to prevail in the absence of per se liability, and in the face of defendants' evidentiary showing, plaintiff must come forward with evidence by which a jury could reasonably conclude that defendants' actions unreasonably restrained competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN36[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Under the rule of reason analysis, the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition. Among the most important circumstances to be considered are those relating to the competitive characteristics of the relevant market. Proof that the defendant's activities had an impact upon competition in a relevant market is an absolutely essential element of the rule of reason case.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN37[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

A determination as to the boundaries of the relevant product market is essential in order to measure the anti-competitive effect, if any, of defendants' actions.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN38[] **Pleadings, Amendment of Pleadings**

Although courts usually exercise their discretion in favor of allowing motions under *Fed. R. Civ. P. 15*, they may also deny such a motion when a party seeks to interpose a claim that lacks merit.

Antitrust & Trade Law > Robinson-Patman Act > Claims

HN39[] Clayton Act, Claims

Section 4 of the Clayton Act, 15 U.S.C.S. § 15, confers standing to raise a claim under section 2(a) of the Robinson-Patman Act, 15 U.S.C.S. § 13(a). Notwithstanding the broad language, in order to have standing under section 4, a plaintiff must allege a causative link to his injury which is direct rather than incidental or which indicates that his business or property was in the target area of the defendant's illegal act.

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN40[] Standing, Clayton Act

Plaintiff need not be an actual purchaser, nor a specifically intended target of the anticompetitive conduct. Without expressly approving the target area test, the Supreme Court recently advised courts assessing plaintiffs' standing under section 4 of the Clayton Act, 15, U.S.C.S. § 15, to look (1) to the physical and economic nexus between the alleged violation and the harm to the plaintiff, and (2), more particularly, to the relationship of the injury alleged with those forms of injury about which congress was likely to have been concerned in making defendant's conduct unlawful and in providing a private remedy under § 4. This inquiry, like that posited by the target area test, recognizes that some consequences may flow from anticompetitive conduct which are simply too remote to give rise to a right for damages.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN41[] Monopolies & Monopolization, Actual Monopolization

The offense of monopoly under section 2 of the Sherman Act, 15 U.S.C.S. § 2, has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident, while the essential elements of attempted monopolization are (1) a dangerous probability of success in monopolizing a given product market and (2) a specific intent to destroy competition or build monopoly. Thus, proof of the relevant product market is essential to both these causes of action.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN42[] Monopolies & Monopolization, Conspiracy to Monopolize

Finally, the elements of the offense of conspiracy to monopolize are (1) proof of a concerted action deliberately entered into with the specific intent to achieve an unlawful monopoly, and (2) the commission of an overt act in furtherance of the conspiracy.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Jury Trials > Jury Instructions > General Overview

HN43[] **Entitlement as Matter of Law, Appropriateness**

Summary judgment should be granted if but only if the court is satisfied that a properly instructed jury, giving full weight to plaintiff's evidence, drawing every reasonable inference in its favor, and subjecting defendants' evidence to a critical eye, could not rationally find that plaintiff was entitled to any relief.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN44[] **Supplemental Jurisdiction, Pendent Claims**

Since diversity is lacking the court has no independent jurisdiction of the state law claims beyond its authority to consider them pendent to substantial federal claims. Where the federal claims were not substantial, and the flimsy nature of federal claims may call for dismissal of pendent state claims.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN45[] **Supplemental Jurisdiction, Pendent Claims**

Certainly, if the federal claims are dismissed before trial the state claims should be dismissed as well. Unless a trial of the operative facts is necessary to resolve claims that the federal court must hear, the federal court has no jurisdiction to take any action with respect to a pendent state law claim.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN46[] **Jurisdiction, Jurisdictional Sources**

If it appears that the federal claims could be disposed of on a motion for summary judgment, under *Fed. R. Civ. P. 56*, the court should refrain from exercising pendent jurisdiction absent exceptional circumstances.

Opinion

[*1429] OPINION AND ORDER

ABRAHAM D. SOFAER, D.J.:

Reborn Enterprises, Inc. ("Reborn") brought this action in April 1982 against defendants, Andrews MacLaren, Ltd. ("MacLaren Ltd."); Andrews MacLaren Inc. ("MacLaren Inc."); Ben's for Kids, Inc. ("Ben's"); Mark Wein ("Wein"), the since deceased former president of Ben's; Fine Child Inc. ("Fine Child"); and James Fine ("Fine"), president of Fine Child. Reborn seeks damages based upon alleged violations of federal and state antitrust laws and of common law contractual rights. Plaintiff alleges that defendants engaged in conduct constituting *per se* violations of *section* **[**2]** *1* of the Sherman Antitrust Act, *15 U.S.C. § 1*, by forming horizontal and vertical contracts, combinations, and conspiracies to fix prices, by imposing restrictions on the territories in which various retailers could sell the MacLaren Baby Buggy, and by engaging in concerted refusals to deal and tying arrangements. Plaintiff claims that the tying arrangements were also unlawful under *section 3* of the Clayton Act, *15 U.S.C. § 14*. Alternatively, plaintiff maintains that the conduct amounted to an unreasonable restraint of trade under a "rule of reason" analysis. Plaintiff also alleges that defendants monopolized, attempted to monopolize, and conspired to monopolize commerce in violation of *section 2* of the Sherman Act, *15 U.S.C. § 2*, and that defendants Fine Child, Fine, Ben's, and Wein engaged in illegal price discrimination in violation of *section 2* of the Robinson-Patman Act, *15 U.S.C. § 13(a)*, *(d)*, *(f)*. Plaintiff further claims that defendants violated *sections 340* and *369(a)* of New York's Donnelly Act. *N.Y. Gen. Bus. Law §§ 340*, *369(a)*. Finally, Reborn contends that defendants tortiously breached contracts with Reborn and maliciously conspired to interfere with Reborn's advantageous **[**3]** business relationships. Thus, Reborn contends, defendants are jointly and severably liable for compensatory, treble, and punitive damages, as well as for costs and attorney's fees. Reborn requests that the court permanently enjoin defendants from refusing to sell MacLaren strollers, parts, and accessories to Reborn and order them to make such strollers, parts and accessories available to Reborn.

Defendants Fine and Fine Child counterclaimed against Reborn and its attorneys for defamation based on a letter charging defendants with illegal conduct, sent by Reborn's attorneys to all defendants on January 15, 1982. By order dated August **[*1430]** 30, 1982, the defamation claim was severed from the antitrust claims, to be tried separately after all other issues were determined.

After exhaustive discovery, the case was placed on the ready trial calendar in January 1984. At that time, defendants raised a variety of motions which taken together seek dismissal and/or summary judgment against all plaintiff's claims. For the reasons that follow, summary judgment is granted on behalf of all defendants on the federal antitrust claims. The pendent state claims are dismissed without prejudice **[**4]** to plaintiff's right to pursue them in an appropriate court, in which the defamation counterclaim may also be asserted.

I. *Factual Background*

Reborn is a New York corporation that operates eight retail stores in New York, New Jersey, and Connecticut. Its Manhattan store is located on Third Avenue and 82nd Street. Matthew Wallis, who founded Reborn in 1976, is its president and chief executive officer. Reborn is a discount maternity shop selling primarily maternity clothing and, for a time, the MacLaren Baby Buggy. Wallis sometimes also sells non-clothing items such as wallets and pocketbooks that he acquires by buying the inventory of maternity stores which have gone out of business. Wallis' pricing policy is to buy his goods at wholesale, to determine the retail price at which other companies are selling particular items, and then to sell those items for less. Wallis 317.

MacLaren Ltd. is a relatively small British company that manufactures and sells a line of folding baby strollers and related equipment. Its goods are sold throughout Europe and in the United States. Until May 1980, MacLaren Ltd. sold its stroller directly to customers in the United States. On May 1, 1980, **[**5]** MacLaren Ltd. formed a wholly owned subsidiary named MacLaren Inc., a corporation organized under the laws of New York, to act as the sole distributor of its stroller in the United States. This arrangement has continued since that time, except for the period between November 1981 and May 1983, during which Fine Child acted as sole distributor for MacLaren in the United States.

Fine Child was a New York corporation, incorporated in 1975, which sold infant products to juvenile stores. Fine Child was not a prime manufacturer, but sold imported products on a finished goods basis, or on an exclusive license basis. It also sold products it designed and then subcontracted out for manufacturers. Fine 11. James Fine was Fine Child's president, chief executive officer, and sole stockholder. By early 1983, when Fine Child had failed financially and had been taken over by Sassy Seat, Inc., also a juvenile goods company, Fine was hired by Sassy Seat and now serves as the company's president.

Ben's for Kids is a New York corporation consisting of a single retail store located on Third Avenue between 78th and 79th Streets. It sells furniture and clothing for children up to three years of age. Mark **[**6]** Wein was Ben's sole stockholder and chief executive officer during all times relevant to this litigation. His pricing policy was to charge as much as he could get for a product without losing customers. Wein 18. Ms. Kurzman, a MacLaren Inc. employee, had worked at Ben's, and her brother is currently employed there.

During the 1970's, MacLaren Ltd. invented a lightweight infant umbrella stroller which could fold easily and was virtually unbreakable. All parties agree that it is one of the finest of all baby strollers. Plaintiff claims that it is known as the "Rolls Royce" of strollers. Plaintiff's Pretrial Memorandum at 6; Kurzman 43-46. Despite its high price, it sells well because of its outstanding quality. The MacLaren stroller was originally sold in Europe. In 1979 the company decided to "test the waters" in the United States by selling at first to only one juvenile goods store while monitoring the stroller's success. Around this time, Wein spotted the stroller at a trade show in England, and arranged with MacLaren Ltd. to purchase it. From 1979 through early 1980, Ben's purchased directly from MacLaren Ltd. and was the only **[*1431]** store in the United States carrying **[**7]** the stroller.

The stroller sold well at Ben's. MacLaren Ltd. was impressed with the quality of Wein's store, the relationship Wein had with his customers, and his policy of providing extensive post-sale repair service. Then and now MacLaren Ltd. has worked hard to maintain a strong, positive relationship with Ben's. Satisfied that its stroller would sell well in the United States, MacLaren Ltd. formed MacLaren Inc. to handle sales here.

In August 1980, Wallis, owner of the Reborn maternity store, located near Ben's on the Upper East Side of Manhattan, noticed the MacLaren stroller being sold at Ben's. He contacted MacLaren Inc. and sought to place an order. Barbara Kurzman, then employed by MacLaren Inc., visited Reborn. After her visit, she decided it would be unwise for MacLaren Ltd. to do business with Reborn. She reasoned that because it was a maternity shop which sold no juvenile goods, it would ill fit MacLaren's marketing strategy, which was to sell only to juvenile goods shops. Kurzman 46-49. MacLaren believed that a juvenile goods store was more suitable for selling MacLaren strollers than a maternity shop because customers have the opportunity in a juvenile goods store **[**8]** to compare the MacLaren stroller with strollers of other brands and the proprietor has more knowledge about strollers. Kurzman 45-46. Ms. Kurzman also felt it would be unwise for MacLaren to deal with Reborn because of its close proximity to Ben's. Kurzman explained her position to Ian Jones, Export Sales Manager of MacLaren Ltd., and to George Hambleton, Vice President of MacLaren Inc. Kurzman did, however, inform Jones that Reborn wanted to purchase the stroller. Jones made a note on a telex that he would contact Reborn in November 1980, the next time he planned to visit New York.

During Jones' visit in November, he opened new accounts in Manhattan and Brooklyn at Schneider's Juvenile Furniture, Albee's Baby Carriage, Yeedl's, Berkowitz, and Hatzlacha, all well established juvenile goods stores which sold both "hard" and "soft" goods for very young children. ("Hard" goods include juvenile furniture, strollers, high chairs, car seats, carriages, cribs, and the like, while "soft" goods include baby clothing, bibs, and other accessories.) Jones or Kurzman gave Ben's and all other retailers a "suggested price list," and asked them to try and charge about the suggested price. Kurzman **[**9]** 13-16; *see* Hambleton 73-75. During his visit, Jones told Wein he thought it unlikely that any other store on the Upper East Side would receive the stroller, and he did not contact Wallis. Jones 53.

The depositions and other evidence indicate that those involved in sales at both MacLaren Ltd. and MacLaren Inc. were ambivalent about doing business with Reborn. As a maternity store, with no repair facilities, and with the habit of cutting suggested retail prices, Reborn did not fit MacLaren's marketing strategy. Furthermore, MacLaren had carefully cultivated its relationship with Ben's, which was located close to the Reborn store. Consequently, a year passed between Wallis' initial inquiry and MacLaren's decision seriously to examine Reborn as an account.

In March 1981, Kurzman, acting as a representative of MacLaren Inc., visited Reborn, which by then had moved to a larger store. She told Wallis outright that MacLaren was reluctant to deal with him because he sold no other juvenile goods and because there was ample distribution of the stroller on the Upper East Side. She asked Wallis if he would agree not to sell the stroller from his Upper East Side store, and Wallis acceded in **[**10]** order to increase his chances of getting the stroller. Kurzman 113. Kurzman stated "Wallis has given me his word as a gentleman that if indeed we open him as an account, that he will not sell in his New York Store." Kurzman 114. Kurzman also told Wallis that MacLaren would appreciate his selling the stroller close to the suggested retail price. Kurzman 124-25. Nevertheless, after the meeting Kurzman again advised MacLaren **[*1432]** that in her opinion the company should not deal with Reborn.

In April 1981, Mr. Hambleton himself visited Reborn's Manhattan store. Despite Kurzman's suggestion, he agreed to open an account with Wallis because he liked the fact that Reborn had eight outlets and an extensive advertising campaign. He asked Wallis not to sell the stroller from Reborn's Upper East Side store until Hambleton had had a chance to talk to Wein. Hambleton 67-68. Wallis grudgingly agreed. Wallis 214-215. Hambleton did not set a specific time by which he would talk to Wein, and did not condition MacLaren's sale to Wallis upon Wallis' promise not to sell from the Upper East Side. Hambleton also told Wallis that Reborn should try to sell near the suggested retail price if possible, **[**11]** but that MacLaren understood they could not require retailers to adhere to the price. Hambleton 72-73. Wallis agreed to consider this suggestion and entered an order for a quantity of strollers. Plaintiff Exhibit 9.

In early April 1981, the first shipment of MacLaren strollers bound for Reborn was misdelivered to Ben's through an error of the shipping company, whose driver had been accustomed to delivering strollers to Ben's when his truck entered that part of town. Upon learning of the trucker's error, Wein promptly returned the misdelivered goods to the company, and the shipment was then properly delivered to Reborn's Manhattan store. Wallis became very suspicious and agitated by the misdelivery. He persistently called Hambleton and Kurzman, insisting that the misdelivery was purposeful and accusing MacLaren of conspiring to deprive him of the stroller because he was a discounter. When the shipment was redelivered to Reborn, Wallis refused the goods, contending that all the boxes had been opened. The boxes were returned to the warehouse and examined by Kurzman, who claims that only two had been opened. Hambleton 90. The open boxes were sealed, the shipment went back to Wallis, and **[**12]** he accepted it.

After the misdelivery incident, Kurzman, Hambleton, and Wallis had lunch in an attempt to "improve relations." Hambleton 104. At this meeting, Wallis threatened to sue MacLaren. He also said that he had been taping all conversations with MacLaren, Inc., that he believed a sinister motive existed for the misdelivery, and that he feared that MacLaren Inc. was going to cut him off because he was a discounter. Hambleton tried to assure him that Reborn's pricing policy would not influence their decision to do business with him. Wallis remained suspicious.

Throughout April, Wallis repeatedly called Hambleton to find out whether or not he had spoken to Wein, so Wallis could begin selling strollers from Reborn's upper east side store. Hambleton had not done so, allegedly due to the aggravation Wallis had caused him during the month. Wallis nevertheless began to sell the stroller from Reborn's Upper East Side store. Hambleton claims this was done without his approval, but Wallis maintains that Hambleton told him to go ahead. Wallis 215. In any event, no person from MacLaren took any action to prevent Wallis from selling from the Upper East Side once he had begun, and Reborn **[**13]** quickly became one of MacLaren's largest accounts.

After the April misdelivery, Wein called Hambleton of MacLaren Inc. and Alan Nash and Ian Jones of MacLaren Ltd. to ask why MacLaren was selling its stroller to Reborn, a maternity store. He was told by all that the company wanted to see how the arrangement would work out. Subsequently, Wein walked by Reborn's Manhattan store, noticed the stroller displayed in the window, and went in to talk to Wallis. Tempers flared, and Wallis ended up ejecting Wein from the store and summoning the police. Wallis 366.

Despite requests from MacLaren Inc. to try to adhere to the suggested retail price, Reborn continued to discount. Pltf. Pretrial Memo. at 26. MacLaren Inc. began to receive complaints from Wein and its other customers that Reborn was selling the stroller at a predatory price, that it did not **[*1433]** have repair facilities, and that it was inappropriate for a maternity store to sell baby strollers. They did not threaten to stop buying from MacLaren unless Reborn were terminated, but merely voiced dissatisfaction. Weintraub 49; Leffler 30-33; Waxman 57-58. Both Kurzman and Hambleton informed the callers that nothing could be done. **[**14]** Weintraub 49.

A few of MacLaren Inc.'s other accounts sold below the suggested retail price. Complaints had been received about Berkowitz and Hatzlacha. Kurzman told the proprietor of Hatzlacha that MacLaren wanted retailers to sell the stroller near the suggested retail price, because it was trying to introduce a new product in America. Kurzman 68. None of these stores, however, was ever threatened, forced, or coerced into selling at the suggested retail price. When Hatzlacha, for example, continued to sell below that price, MacLaren took no further action.

MacLaren Inc.'s distribution capability was restricted due to its limited personnel and facilities. MacLaren decided that United States distribution of the stroller would be profitable only if an organized national distributor with a staff larger than MacLaren Inc.'s were to handle the operation. Also, Hambleton was becoming increasingly involved in an organization for the blind which consumed almost all of his time. Hambleton 136. After a comprehensive search, MacLaren selected Fine Child, Inc., a New York corporation with an excellent reputation in the sale of infant products to juvenile goods stores, as its new distributor. **[**15]** An agreement in principle was reached between MacLaren and James Fine in October 1981 for a one-year period to commence January 1982. The arrangement was publicly announced in a press release at the Juvenile Products Manufacturers Association Trade Show in Dallas, Texas, on October 25, 1981, and in January 1982 Fine Child replaced MacLaren Inc. as the exclusive distributor of the MacLaren stroller in the United States. Pltf. Exh. 47.

MacLaren and Fine Child understood the distributorship agreement to give Fine Child complete autonomy to choose with whom it would do business, according to Fine's marketing strategy. Cross 106. In addition, the parties agreed that Fine would have authority to resolve disputes if MacLaren Ltd. chose not to get involved:

> In the event of any dispute arising between the Distributor and any purchaser or proposed purchaser in relation to the sale or offer for sale of the Products [Distributor shall] forthwith inform MacLaren of the details and circumstances of the dispute. Within five days of such notice, MacLaren shall at its option elect to pursue or not pursue such dispute, in which latter event the Distributor shall have the exclusive right **[**16]** to pursue, settle or otherwise dispose of the dispute.

Distributorship Agreement para. 4(m), at 7 (Pltf. Exh. 144).

Fine Child's marketing strategy for the national distribution of the stroller was "to concentrate on independent full line juvenile products retailers around the country and perhaps a few department stores with full juvenile departments." Fine believed it was essential that in each store where the stroller would be placed there be sales people knowledgeable about the product. Fine 157. He thought that "consumer word of mouth was far and away the best advertising and best promotion that a product can have; . . . new parents . . . talk to one another a great deal . . . we wanted that kind of consumer to be sold, to have the MacLaren attributes explained to them as thoroughly and as knowledgeably and as convincingly as possible, by those people in the industry, those retailers who have been dealing in these kinds of goods for years and years." Fine 158.

Hambleton and Kurzman provided Fine with information on all MacLaren Inc.'s accounts. Most of the accounts were familiar to Fine because he had previously done business with them. He was not, however, familiar with **[**17]** Reborn. Kurzman and Hambleton told Fine that they had had problems with Wallis, that his store was not a juvenile goods store, that Reborn was a discounter and had inadequate repair facilities, **[*1434]** but that it was one of MacLaren's largest accounts. Kurzman 159. They did not tell Fine whether or not to sell to Wallis, but this presentation might well have suggested that Fine should terminate the account. MacLaren had itself been supplying the account, however, and no evidence supports the contention that MacLaren insisted on its termination.

In October 1981, Reborn attempted to place an order for one hundred B30 model strollers with MacLaren Inc. but was advised by Kurzman that MacLaren was currently out of stock on that model and that MacLaren Inc. would no longer be handling distribution of the strollers in the United States. Wallis demanded to know the identity of the new distributor, but was told that the distributor would contact Wallis. Kurzman meanwhile turned Wallis' order over to Fine. During October Kurzman went to Reborn to pick up a stroller for repair, and told Wallis that the new distributor might not do business with him because he could not adequately repair **[**18]** the strollers. Kurzman 171; Wallis 243. Wallis interpreted this as a threat and evidence of a conspiracy to cut him off because he was a discounter. He conceded, however, that "she didn't tell me what the new people were going to do." Wallis 241. Wallis repeatedly called MacLaren Inc. to get the name of the new distributor and to find out when to expect the strollers. He complained then, and claims now, that MacLaren had changed distributors in order to stop dealing with Reborn because it was a discount store. He was abusive to whomever he spoke, and tied up their switchboard for days. Kurzman 182. He became increasingly agitated, threatened to sue, and alleged the existence of multiple conspiracies to cut him off.

Reborn claims that MacLaren Inc.'s refusal to identify the new distributor was part of a scheme to terminate the account. It contends that all other customers received a formal announcement of the change in October. MacLaren Inc. did in fact prepare a letter informing all of its customers that Fine Child was to become the new United States distributor of the MacLaren stroller. It sent this letter to Fine for him to distribute. He never did so, however, and many customers **[**19]** did not find out about the change until after January 1982, when Fine Child actually assumed control and began handling all orders and billings. Certainly Fine Child's selection was no secret: a press release issued by MacLaren in late October announced the change. Reborn seems correct in contending that MacLaren Inc. treated it differently than other customers during October and November as Kurzman refused to identify Fine Child to Wallis, whereas she did tell others who inquired that Fine Child was to become the new distributor. Kurzman 164. This had no binding effect on Fine Child, however, and in fact had little if any practical effect on Reborn's ability to obtain strollers. On November 19, 1981, Reborn received its last shipment of strollers from MacLaren Inc. Plaintiff's Ex. 26. At about the same time, Kurzman identified Fine Child to Wallis and gave him Fine's telephone number.

Fine, too, treated Reborn differently than he did other potential customers. He was definitely inclined against doing business with Reborn. A Fine Child agent told Mr. Leffler of Darling's in November that Fine Child was not going to sell to Reborn. Leffler 39-40. Kurzman and Jones testified that in **[**20]** November Fine told them that he was not planning to do business with Reborn. Kurzman 194. At the end of November 1981, Fine told Wallis he wanted a written purchase order to evaluate him as a new account, although Fine did not insist on written orders from some other stores. Fine also asked Wallis if he carried any other Fine Child products or juvenile goods. Wallis said no, but requested that Fine send him a catalogue and a price list. Fine 172.

Fine sent nothing to Wallis for at least two weeks. This may have seemed insignificant to Fine, since he was to become distributor on January 1, 1982, and only received the first shipment of strollers for resale at the end of January. To Wallis, however, Fine's failure to follow up on his **[*1435]** conversation in late November proved he was conspiring to terminate the Reborn account. Two weeks after their conversation, Wallis called Fine and accused him of conspiring with Reborn's competitors, creating illegal tying arrangements, and discriminating against Reborn because it was a discounter. Wallis threatened to sue Fine, insisted that he had sued others before, and told Fine that he was recording their conversation. During this second **[**21]** conversation, Fine told Wallis that his company would not do business with Reborn.

Reborn's attorneys began charging Fine Child and all the other defendants with illegal acts in January 1982. During that month Wallis, trying to bypass Fine Child, wrote to MacLaren in England and asked for strollers. MacLaren informed Wallis that at that time they were not in a position to decide who should receive strollers in the United States. This lawsuit followed in February 1982.

Some time during the spring of 1982, after the filing of the suit, Fine Child sold fifty MacLaren strollers to a Massachusetts maternity retail store called Stork Time. Fine believed that Stork Time was not solely a maternity shop, because it also requested and purchased a number of Fine Child's other juvenile products. Fine 234; Pltf.

Exhs. 58-59. In July 1982, Fine discovered that the strollers sold to Stork Time were not in its store but had been resold to Wallis. Fine then stopped dealing with Stork Time. Fine 240.

In May 1983, due to Fine Child's crumbling economic position, MacLaren Ltd. terminated the distributorship agreement. MacLaren Inc. again became the sole distributor and remains so today. Reborn immediately **[**22]** placed an order for strollers, but MacLaren Inc. refused to fill it. Wallis then contacted Maxwell Cross, MacLaren Ltd.'s former marketing manager, and threatened to start a second lawsuit if MacLaren Inc. did not honor his order. Cross 88-90. MacLaren has taken the position that it will do no business with a company with which it is in litigation. Cross 58-59. From December 1981 through the present, Wallis has made no effort to purchase and sell any other high priced, high quality baby stroller, such as Perego or Aprica, MacLaren's stiffest competition.

II. *Summary Judgment*

HN1[] Summary judgment is to be granted sparingly in antitrust litigation, especially where an allegation of conspiracy raises issues of fact as to motive and intent. *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962)*; *George C. Frey Ready-Mixed Concrete, Inc. v. Pine Hill Concrete Mix Corp., 554 F.2d 551, 554-55 (2d Cir. 1977)*. In deciding whether to grant summary judgment, moreover, the court must view the facts in the light most favorable to the party opposing the motion, and all possible inferences must be resolved in that party's favor. *United States **[**23]** v. Diebold, Inc., 369 U.S. 654, 655, 82 S. Ct. 993, 8 L. Ed. 2d 176 (1962)* (per curiam); *Quinn v. Syracuse Model Neighborhood Corp., 613 F.2d 438, 445 (2d Cir. 1980)*. The moving party has the burden of showing that there is no genuine issue for trial as to any material fact, and that it is entitled to judgment as a matter of law.

Summary judgment is nevertheless appropriate in some antitrust cases. ***HN2***[] Where a complete pretrial record shows there is "no genuine issue of material fact, and . . . the resisting party does not present a record sufficient to support a reasonable finding in his favor, a district court has a duty to grant the motion for summary judgment." *Filco v. Amana Refrigeration, Inc., 709 F.2d 1257, 1260 (9th Cir. 1983)*, *cert. dismissed*, *464 U.S. 956, 104 S. Ct. 385, 78 L. Ed. 2d 331 (1984)*; *see* *First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 288-90, 20 L. Ed. 2d 569, 88 S. Ct. 1575 (1968)*. *Rule 56(e)* makes clear the task of the party opposing the motion:

> ***HN3***[] When a motion for summary judgment is made and supported as provided in this rule, an adverse party may not rest upon the mere allegations or denials of his pleading, but **[**24]** his response . . . must set **[*1436]** forth specific facts showing there is a genuine issue for trial.

See *SEC v. Research Automation Corp., 585 F.2d 31, 33 (2d Cir.1978)*; II P. Areeda & D. Turner, ***Antitrust Law*** para. 316 (1978). The Supreme Court has approved awards of summary judgment in antitrust cases, *see, e.g., First National Bank of Arizona, 391 U.S. at 274-88*, as has the Second Circuit, *see, e.g., Nifty Foods Corp. v. Great Atlantic & Pacific Tea Co., 614 F.2d 832, 839-42 (2d Cir. 1980)*; *Modern Home Institute, Inc. v. Hartford Accident & Indemnity Co., 513 F.2d 102, 109-11 & n. 10 (2d Cir. 1975)*. ***HN4***[] Summary judgment is particularly appropriate where, as here, extensive discovery has been taken, *Giant Paper and Film Corp. v. Albemarle Paper Co., 430 F. Supp. 981, 983-84 (S.D.N.Y. 1977)*, and legitimate business reasons have been advanced for defendants' conduct, *First National Bank of Arizona, 391 U.S. at 289*. Immaterial factual disputes should not block summary judgment. *SEC v. Research Automation Corp., 585 F.2d at 35*. Finally, while plaintiff correctly complains that defendants have failed to submit the statement of material facts as **[**25]** to which the movants contend there is no genuine issue required by Local Rule 3(g), that failure is merely a technical omission in this case, since defendants' responses to plaintiff's pretrial order set forth the facts upon which they seek judgment.

III. *Alleged Sherman Act § 1 Conspiracies*

Reborn maintains that various horizontal and vertical conspiracies whose object was to terminate it as a retail distributor of the MacLaren Baby Buggy existed among the defendants. Reborn alleges conspiracies to fix prices, to allocate markets, to boycott, and to establish tying arrangements, all allegedly violations of *section 1* of the Sherman Act. *15 U.S.C. § 1*.

HN5[] *Section 1* of the Sherman Act states: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is declared to be illegal." But while "the Sherman Act speaks of restraint of trade in absolute terms, it has long been established that *§ 1* proscribes only unreasonable restraints. *Standard Oil Co. v. United States, 221 U.S. 1, 55 L. Ed. 619, 31 S. Ct. 502 (1911)*." *Borger v. Yamaha International Corp., 625 F.2d 390, 396 **[**26]** (2d Cir. 1980)*. *HN6*[] Courts apply a *per se* rule only to "agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use." *Northern Pacific Railway Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*. The legality of all other arrangements is governed by a rule of reason, "which invites a more open inquiry into, and a balancing of, such factors as the power of the defendants, the effect of the arrangement, its possible redeeming virtues, and the availability of alternative ways of achieving any legitimate objectives with fewer threats to competition." II Areeda & Turner, para. 314 at 49.

HN7[] The starting point for proof of a *section 1* violation is evidence of a contract, combination, or conspiracy between two or more persons. "Proof of joint or concerted action is required; proof of unilateral action does not suffice." *Schwimmer v. Sony Corp. of America, 677 F.2d 946, 952 (2d Cir.1982)*. For example, a unilateral decision by any defendant not **[**27]** to deal with Reborn for any reason would not amount to a violation of *section 1* of the Sherman Act. *See* *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, ___, 79 L. Ed. 2d 775, 783, 104 S. Ct. 1464 (1984)*; *Oreck Corp. v. Whirlpool Corp., 639 F.2d 75, 78-79 (2d Cir.1980)*, *cert. denied*, *454 U.S. 1083, 102 S. Ct. 639, 70 L. Ed. 2d 618 (1981)*.

HN8[] Conspiracies are, of course, rarely evidenced by explicit agreements, but must usually be proved by "inferences that may fairly be drawn from the behavior of the **[*1437]** alleged conspirators." *Michelman v. Clark-Schwebel Fiber Glass Corp., 534 F.2d 1036, 1043* (2d Cir.), *cert. denied*, *429 U.S. 885, 50 L. Ed. 2d 166, 97 S. Ct. 236 (1976)*. At a minimum, however, "the circumstances [must be] such as to warrant a jury in finding that the conspirators had a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement." *American Tobacco Co. v. United States, 328 U.S. 781, 810, 90 L. Ed. 1575, 66 S. Ct. 1125 (1946)*.

A. *Alleged Intraenterprise Conspiracy*

Plaintiff contends that MacLaren Ltd. and MacLaren Inc. schemed to terminate his store as a distributor of the **[**28]** MacLaren Baby Buggy by combining to fix prices, boycott, and allocate markets. The initial question is whether section one proscribes the conspiracy alleged between the parent corporation, MacLaren Ltd., and its wholly owned subsidiary, MacLaren Inc.

In *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 215, 95 L. Ed. 219, 71 S. Ct. 259 (1951)*, the Supreme Court held that "common *HN9*[] ownership and control does not liberate corporations from the impact of the antitrust laws." However, "[a] single corporate entity of all its agents and employees are normally treated as a single actor for antitrust purposes except where the individuals or subentities are held out as competitors." R. Givens, *Antitrust: An Economic Approach* § 16.03, at 16-11 (1983); *see* *Sunkist Growers, Inc. v. Winckler & Smith Citrus Products Co., 370 U.S. 19, 28-29, 8 L. Ed. 2d 305, 82 S. Ct. 1130 (1962)*; *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F.2d 71, 80-84 (9th Cir. 1969)* (divisions of same corporation cannot conspire), *cert. denied*, *396 U.S. 1062, 24 L. Ed. 2d 755, 90 S. Ct. 752 (1970)*. *See generally* Willis & Pitofsky, *Antitrust Consequence of* **[**29]** *Using Corporate Subsidiaries*, 43 N.Y.U.L. Rev. 20 (1968).

The uncontradicted evidence here demonstrates that MacLaren Inc. and MacLaren Ltd. neither hold themselves out as competitors nor actually compete. MacLaren Inc. was formed solely to act as distributing agent for MacLaren Ltd. in America, as Hambleton, Kurzman, Myles, Jones, and Cross testified. The personnel of the two organizations are closely interrelated. James Myles serves as Chairman of the Board of Directors of both MacLaren Ltd. and MacLaren Inc.; George Hambleton is a member of both Boards and is President of MacLaren Inc.; Maxwell Cross, formerly Marketing Manager of MacLaren Ltd., is presently Vice President of MacLaren Inc. The subsidiary makes no major policy decisions without MacLaren Ltd.'s approval, as evidenced by their communications about whether to deal with plaintiff and their joint decision about which company would become the new distributor. MacLaren Ltd. set the suggested retail price, which MacLaren Inc. automatically adopted. The two corporations do not compete;

rather, their relationship is one of cooperation and integration. *See Brager & Co. v. Leumi Securities Corp., 429 F. Supp. 1341, [**30] 1345 (S.D.N.Y. 1977)* (Weinfeld, J.), *aff'd mem*., *207 U.S. App. D.C. 264, 646 F.2d 599 (2d Cir. 1980)*, *cert. denied*, *451 U.S. 987, 101 S. Ct. 2322, 68 L. Ed. 2d 845 (1981)*; *I. Haas Trucking Corp. v. New York Fruit Auction Corp., 364 F. Supp. 868, 873-74 (S.D.N.Y. 1973)*; *Beckman v. Walter Kidde & Co., 316 F. Supp. 1321, 1325-27 (E.D.N.Y. 1970)*, *aff'd per curiam*, *451 F.2d 593 (2d Cir. 1971)*, *cert. denied*, *408 U.S. 922, 92 S. Ct. 2488, 33 L. Ed. 2d 333 (1971)*. Moreover, MacLaren Inc. was created from its parent, which wholly owns it. *See Brager & Co., 429 F. Supp. at 1345*; R. Givens, § 16.03, at 16-11 to -12 (discussing U.S. Department of Justice, Antitrust Division, *Antitrust Guide for International Operations*, Case A, at 11-14 (1977). Here "the economic realities of their relationship" preclude finding MacLaren Ltd. and MacLaren Inc. distinct economic entities for purposes of the Sherman Act. *Fuchs Sugars & Syrups, Inc. v. Amstar Corp., 602 F.2d 1025, 1031 n.5 (2d Cir. 1979)*, *cert. denied*, *444* ***[*1438]*** *U.S. 917, 62 L. Ed. 2d 172, 100 S. Ct. 232 (1980)*.

A manufacturer electing to market its goods through a distributor is using the latter **[**31]** to supply its goods to consumers more efficiently than the manufacturer could itself. In *General Electric Co. v. Bucyrus-Erie Corp., 563 F. Supp. 970, 976 (S.D.N.Y. 1983)*, the court noted that "if ***HN10***[] no other interpretation of the facts is possible except that a controlled subsidiary, with whom a parent was alleged to have conspired, was created to be and never acted other than as agent for the parent, . . . no valid conspiracy claim is stated because separate entities do not exist to conspire." The record contains no evidence that MacLaren Ltd. and MacLaren Inc. ever operated as other than as a unit. Thus neither the evidence that the personnel of MacLaren Ltd. and MacLaren Inc. conferred about Reborn's discounting policy, the complaints they had received about it, and the close proximity of Reborn to Ben's, nor the evidence that the organizations were unhappy with the situation and discussed ways to deal with it, establish a claim warranting trial of a conspiracy between the companies to engage in the alleged unlawful behavior.

B. *Price-Fixing Allegations*.

Plaintiff maintains that MacLaren Ltd. and MacLaren Inc., (hereinafter referred to jointly as "MacLaren") and Fine and **[**32]** Fine Child (hereinafter referred to jointly as "Fine Child") conspired vertically with various retailers selling the stroller, including Wein and Ben's (hereinafter referred to jointly as "Ben's"), and that the various retailers conspired horizontally to maintain the resale price of the MacLaren stroller. ***HN11***[] Price-fixing conspiracies are unlawful *per se*. *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 218, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)*.

1. *Vertical Price-Fixing Conspiracy*. To establish its conspiracy claim, plaintiff first points to the close business and personal relationships among the defendants Wein, Fine, and MacLaren, including the frequent meetings and correspondence among them. The Second Circuit has laid down "fairly specific guidelines" in evaluating the probative value of such evidence to support an inference of conspiracy:

> "A ***HN12***[] mere showing of close relations or frequent meetings between the alleged conspirators . . . will not sustain a plaintiff's burden absent evidence which would permit the inference that these close ties led to an illegal agreement." Nor does a manufacturer's mere receipt of complaints from its wholesalers or agents who compete **[**33]** with the plaintiff, or its consultation with such other competing wholesalers, standing alone, support a finding of conspiracy with them. ***HN13***[] Even where a termination follows the receipt of complaints from wholesalers or agents, there is no basis for inferring the existence of concerted action, absent some other evidence of a tacit understanding or agreement with them. Finally, the mere fact that a business reason advanced by a defendant for its cut-off of a customer is undermined does not, by itself, justify the inference that the conduct was therefore the result of a conspiracy. Even if a manufacturer or supplier, acting independently, gave a false or inaccurate reason for its action, whether because of a desire to avoid controversy or some other consideration, this would not violate any legal obligation to the customer, absent proof of a conspiracy or breach of contract.

H.L. Moore Drug Exchange v. Eli Lilly & Co., 662 F.2d 935, 941 (2d Cir. 1981) (citations omitted), *cert. denied*, *459 U.S. 880, 103 S. Ct. 176, 74 L. Ed. 2d 144 (1982)*.

Reborn accords particular significance to the receipt by MacLaren of complaints from Reborn's competitors and to the subsequent termination **[**34]** by Fine Child of the Reborn account. Unquestionably, various retailers selling the stroller complained to MacLaren about Reborn's predatory pricing. But as the Second Circuit has repeatedly held, *see, e.g., id*., and the Supreme Court recently confirmed, *see* *Monsanto, 79 L. Ed. 2d at 785* & n.8, **[*1439]** evidence of complaints, even when followed by termination, cannot alone establish the requisite inference; "something more" is needed. *Id. at 785*. The *Monsanto* Court found this additional quantum of probative evidence in the testimony of a district manager that the company advised price-cutting distributors on at least two occasions that if they did not maintain the suggested retail price they would not receive adequate supplies of a new product and in evidence of coerced compliance by at least one former price-cutter. *Id*. This type of evidence is lacking in the present case. As Justice Powell noted in *Monsanto*, "permitting ***HN14***[] an agreement to be inferred merely from the existence of complaints, or even from the fact that termination came about 'in response to' complaints, could deter or penalize perfectly legitimate conduct." *Id*. Moreover, retailers are **[**35]** an important source of information for manufacturers and their agents, which the antitrust laws should not operate to foreclose. *Monsanto, 79 L. Ed. 2d at 785*. "In sum, 'to permit the inference of concerted action on the basis of receiving complaints alone and thus to expose the defendant to treble damage liability would both inhibit management's exercise of independent business judgment and emasculate the terms of the statute.'" *Id*. (quoting *Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 637 F.2d 105, 111 n.2 (3rd Cir. 1980)*, *cert. denied*, *451 U.S. 911, 68 L. Ed. 2d 300, 101 S. Ct. 1981 (1981)*.

Reborn claims that unity of purpose among defendants is also apparent from the fact that MacLaren Ltd. published and MacLaren Inc. distributed a suggested retail price list and urged the retailers to adhere to these prices. ***HN15***[] Publication of a suggested retail price list, however, and voluntary adherence to it by plaintiff's competitors, is insufficient to support a finding of a vertical price fixing conspiracy. *Fuchs Sugars & Syrups, 602 F.2d at 1030*. ***HN16***[] A manufacturer or dealer may announce the terms under which he will market his product and deal only with those customers **[**36]** who agree to abide by those terms. *Monsanto, 79 L. Ed. 2d at 783-84* (citing *United States v. Colgate Co., 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 (1919))*. On the other hand, a manufacturer or its agent may not "enforce his announced resale prices by active coercion of those who purchase for resale, such as through threats of termination for noncompliance, whether made in combination with others or alone." *Bowen v. New York News, Inc., 522 F.2d 1242, 1254 (2d Cir. 1975)* (citations omitted), *cert. denied*, *425 U.S. 936, 48 L. Ed. 2d 177, 96 S. Ct. 1667 (1976)*. For Reborn to avoid summary judgment on its price-fixing claim it must advance sufficient evidence to raise a genuine dispute as to whether defendants engaged in coercive activity to force adherence to its suggested retail price and plaintiff and other retailers actually adhered to that price. *See* *Albrecht v. Herald Co., 390 U.S. 145, 149-50, 19 L. Ed. 2d 998, 88 S. Ct. 869 (1968)*; *United States v. Parke, Davis & Co., 362 U.S. 29, 43, 4 L. Ed. 2d 505, 80 S. Ct. 503 (1960)*. ***HN17***[] "While evidence of exposition, persuasion, argument, or pressure is alone insufficient to establish coercion, threats of termination, **[**37]** so long as they secure adherence to the fixed price, have been deemed to trespass beyond the boundaries of *Colgate*, thereby triggering a finding of an illegal combination." *Yentsch v. Texaco, Inc., 630 F.2d 46, 53 (2d Cir. 1980)* (citations omitted); *see* *id. at 51-55*.

Plaintiff has failed to raise a genuine dispute as to whether anyone adhered to the suggested price. The depositions of the various store owners reveal that several, including Ben's, Albee's, and Schneider's, sold above the suggested retail price, while at least two, Hatzlacha and Darlings, sold below it. These companies represented approximately half of the MacLaren accounts in New York. Leffler 15; Kurzman 66, 68; Wein 18.

Furthermore, even had most of the MacLaren accounts adhered to the suggested retail price, no significant evidence has been advanced of coercive action on MacLaren's part. Of course, "active coercion" **[*1440]** can take many forms. In *Interphoto Corp. v. Minolta Corp., 295 F. Supp. 711, 716, 718-19* (S.D.N.Y.), *aff'd*, *417 F.2d 621 (2d Cir. 1969)*, the court found the use of an elaborate surveillance system and threats of "drastic" action enough to establish an illegal coercive **[**38]** atmosphere. The *Yentsch* court "just barely" found sufficient evidence to establish the existence of an illegal combination to maintain resale prices on the basis of written and oral evidence that the manufacturer had instructed his agents to tell the dealers that if volume did not increase they were to be terminated, as well as testimony by the plaintiff that he was told to drop the price or risk replacement. *630 F.2d at 52-53*.

Here, by contrast, Reborn has failed to adduce the minimum amount of evidence which would permit a reasonable jury to find a vertical price-fixing scheme. Kurzman stated that she once received many complaints about a price cutter and asked him to try to stay within a few dollars of the suggested price, because MacLaren was trying to market a new product in America. Kurzman 65. When the owner continued to discount, no one at MacLaren took additional action. The record does contain Wallis' deposition testimony that he was threatened by MacLaren to raise his prices or risk termination. Wallis 240. There is no other suggestion in the record that Kurzman threatened to terminate any account for discounting. Wallis' testimony, of course, relates only to Reborn, **[**39]** and is wholly undercut by the fact that MacLaren continued to supply Wallis' store for well over a year until Fine Child took over despite full knowledge of Reborn's consistent discounting policy. The only inhouse memo relied on by plaintiff is a note from MacLaren Ltd. to MacLaren Inc. in June 1981 which states: "No solution to the Reborn situation." Pltf. Exh. 018. From this evidence one could reasonably infer that MacLaren was displeased with its decision to sell to Reborn, but had not come up with any way to deal with the problem; one could not reasonably infer from this evidence that MacLaren conspired to threaten plaintiff or to terminate him. Finally, Kurzman concedes that at two or three different times she asked Wallis to stay near the suggested price, a policy she followed with all MacLaren accounts. But she and Hambleton firmly deny they ever threatened plaintiff. The evidence proffered by Reborn would demonstrate at most exposition, persuasion, argument, or pressure, which are alone insufficient to establish coercion. *See* *Yentsch, 630 F.2d at 53*.

2. *Horizontal Price-Fixing Conspiracy*. Reborn insists that a horizontal conspiracy to fix prices existed between the **[**40]** various retailers. As noted above, neither complaints nor complaints plus termination constitute evidence of a conspiracy. Plaintiff relies on the fact that some stores which sold the stroller adhered to the suggested retail price. The leading case for the proposition that an agreement can be inferred from commonality of conduct is *Interstate Circuit, Inc. v. United States, 306 U.S. 208, 83 L. Ed. 610, 59 S. Ct. 467 (1939)*. There the Court found an antitrust violation despite the absence of evidence that the various retailers had agreed among themselves to abide by the demands of the manufacturer. *Id. at 225-27*. The Court found it "enough that, knowing that concerted action was contemplated and invited, the distributors gave their adherence to the scheme and participated in it." *Id. at 226*. Later, however, the Court pointed out that it had "never held that proof of parallel business behavior conclusively establishes agreement" and cautioned that 'conscious parallelism' had not yet read conspiracy out of the Sherman Act entirely." *Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 541, 98 L. Ed. 273, 74 S. Ct. 257 (1954)*. The problem of consciously **[**41]** parallel conduct and interdependent decisionmaking has continued to challenge the courts and commentators. *See e.g., First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 286-88, 20 L. Ed. 2d 569, 88 S. Ct. 1575 (1968)*; *Ambook Enterprises v. Time, Inc., 612 F.2d 604, 613-18* **[*1441]** (2d Cir.) (Friendly, J.), *cert. dismissed*, *448 U.S. 914, 101 S. Ct. 35, 65 L. Ed. 2d 1179 (1980)*; *United States v. Phelps Dodge Industries, Inc., 589 F. Supp. 1340*, slip op. at 20-15 (S.D.N.Y. 1984); L. Sullivan, *Handbook of the Law of Antitrust* § 122 (1977). But ***HN18***[] the law is at least clear that "proof of consciously parallel business behavior is circumstantial evidence from which an agreement, tacit or express, can be inferred but that such evidence, without more, is insufficient unless the circumstances under which it occurred make the inference of a rational, independent choice less attractive than that of concerted action." *Ambook, 612 F.2d at 615* (quoting *Bogosian v. Gulf Oil Corp., 561 F.2d 434, 446 (3d Cir. 1977)* (Seitz, C. J.), *cert. denied*, *434 U.S. 1086, 55 L. Ed. 2d 791, 98 S. Ct. 1280 (1978))*.

In this case, the evidence of consciously parallel **[**42]** conduct is weak, as the record indicates that some retailers sold at various prices above and below the suggested level. In any case, independent business considerations justified the conduct of those who adhered: it was their practice to do so when a manufacturer gave a suggested retail price, or they felt the price was reasonable, or the strollers were selling well at the price so they had no desire to raise or lower it. Plaintiff claims that the retailers' discussions of Reborn among themselves provides additional proof of conspiracy. To support this contention plaintiff cites the testimony of Weintraub of Albee's and Wein. The testimony reveals that Weintraub called Wein and said, "I'm being undersold," to which Wein replied, "Me, too, but there is nothing we can do." Wein 89-93; Weintraub 55-58. Weintraub spoke to Wein, however, because their families had been friends for forty years, and in fact both Wein and Weintraub sold above the suggested price.

In sum, in this case the inference from the retailers' actions of a rational independent choice is far more compelling than that of concerted action, making summary judgment appropriate. *See* *Modern Home Institute, 513 F.2d* *at [**43] 109-14*. No probative evidence has been proffered by plaintiff that would permit a finding of a horizontal price-fixing scheme.

C. *Alleged Territorial Division of Markets*.

Plaintiff alleges that MacLaren, Wein, and other retailers vertically conspired to restrict the territory in which Reborn could sell the stroller. Plaintiff claims that Kurzman's and Hambleton's request that he not sell from the Upper East Side store until they talked to Wein, and MacLaren's general unwillingness to sell to any store near Ben's, Pltf. Exh. 82, amounted to an unlawful, vertical territorial restriction, and that this restriction was enforced as part of a conspiracy to terminate Reborn. Plaintiff also alleges a horizontal conspiracy to restrict territories.

1. *Vertical Territorial Restriction*. ***HN19***[] While nonprice restrictions furthering a price-fixing scheme designed to keep a supplier's product out of the hands of a discounter are judged under *per se* analysis, vertical, concerted actions on nonprice restrictions are judged under the rule of reason and violate *section 1* only if the action is anticompetitive in purpose or effect. *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, [**44] 57-59, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*; *Monsanto, 79 L. Ed. 2d at 783 n.6*; *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126, 131* (2d Cir.) (en banc), *cert. denied*, *439 U.S. 946, 58 L. Ed. 2d 338, 99 S. Ct. 340 (1978)*. Because no price-fixing scheme could be proved in this case, the alleged territorial restrictions must be evaluated under the rule of reason.

In *Sylvania*, the defendant manufacturer restricted the store locations from which a retailer could sell his merchandise. The Supreme Court held that before condemning such a scheme it was necessary to examine whether justifiable business reasons existed to support it. One such reason is a manufacturer's desire to encourage **[*1442]** and reward a particular dealer who provides exceptional service and repair, and thus enhances product reputation. Absent territorial allocations, dealers in a given area might be unwilling to provide appropriate levels of service for fear of "free riders." *Sylvania, 433 U.S. at 55*. If profit opportunities are denied dealers in a given territory, they might refuse to incur expenses necessary to permit the manufacturer to compete effectively against its interbrand rivals. The **[**45]** "free rider" problem is highly relevant in the present controversy. Reborn often was unable to repair the strollers it sold, and as a result consumers brought MacLaren strollers purchased at Reborn to Wein for repair. Wein provided excellent repair service and MacLaren sought to maintain its good relationship with Wein so he would continue to do so. MacLaren's request that Wallis not sell from the Upper East Side therefore was motivated by the legitimate business reason of continuing a strong business relationship with a favored account. Under *Sylvania*, the "restriction" sought by MacLaren was lawful.

"The ***HN20***[] agreement necessary to establish a *section 1* violation . . . may be found to exist in a territorial restraint case if the defendant, by his own coercive actions, has put together a system of territorial restraints to which his customers or distributors adhere." *Jacobson & Co. v. Armstrong Cork Co., 433 F. Supp. 1210, 1213 n.17* (S.D.N.Y.) (Weinfeld, J.), *aff'd*, *548 F.2d 438 (2d Cir. 1977)*. However, "if the decision to terminate was solely based on legitimate business reasons such as . . . [plaintiff's] excessive and unjustified complaints, and its deteriorating relationship **[**46]** with [defendant], then [plaintiff's] claim must be dismissed." *Id. at 1214*. Reborn claims its termination was influenced by improper motives, particularly MacLaren's desire to protect Wein against competition from plaintiff in the Upper East Side. To prove this it relies upon the assurances Wein was given by MacLaren personnel, before MacLaren sold to plaintiff, that no other store in the Upper East Side would get the stroller; on Hambleton and Kurzman's request that Wallis hold off selling the stroller from the Upper East Side until they could talk to Wein; on MacLaren's practice of referring requests for strollers from the United States to Ben's; and on memoranda reflecting MacLaren's reluctance to sell to any other store in the Upper East Side.

Approximately two weeks passed from the time MacLaren sent its first shipment to plaintiff until Reborn began to sell from its Upper East Side store. Wallis himself testified that Hambleton told him to go ahead and sell from there. Wallis 215. Defendants took no action against Wallis for his decision, but rather continued to deliver the strollers he ordered. Whatever MacLaren did to aid Ben's, or said to Wein, the fact is that no **[**47]** territorial restriction was implemented by MacLaren when Wallis went ahead and sold from the area of concern. This evidence could not establish any agreement between MacLaren and Ben's. *See* *Jacobson, 433 F. Supp. at 1214*.

The MacLaren defendants contend it was Fine's and not their decision to terminate Reborn. Even assuming, however, that MacLaren was somehow involved in the decision to terminate Reborn, that decision was based upon plaintiff's repeated and vituperative complaints to defendants and the bad relationship to which this led. After the misdelivery incident, followed by Wallis' threats of lawsuits, his taping of phone conversations, his refusal to repair strollers, Reborn's predatory pricing, and his tying up the phone lines at MacLaren Inc. to learn the identity of the new distributor, he and the various defendants had increasingly abrasive discussions. Wallis' behavior, however much he may have believed his position justifiable, itself provided the MacLaren defendants a legitimate business reason for their decision to terminate Reborn as a retail distributor of the stroller.

Fine or Fine Child likewise had legitimate business concerns that would justify a decision **[**48]** to refuse to sell strollers to Reborn. Fine appears to have been particularly **[*1443]** concerned that Reborn was a maternity store. Furthermore, Wallis concedes that he attacked Fine on the phone and threatened to sue him, which gave Fine good reason to refuse to deal with such a customer. A businessman's churlish behavior should not be permitted to become an asset, enabling him to bootstrap himself onto an antitrust claim by having a reasonable businessman's refusal to deal with him be regarded as evidence of an illegal conspiracy.

Finally, MacLaren or Fine could legitimately try to give Wein exclusivity on the Upper East Side by expressing reluctance or even refusing to sell to other stores in that area. ***HN21***[] A manufacturer can establish a system of exclusive distributorships without violating *section 1* of the Sherman Act:

> Such a voluntary choice presumptively establishes . . . that the system is a more efficient method of distributing [the manufacturer's] product. Even if he is irrational or mistaken, the fact that he has created a monopoly or near monopoly for one or more distributors is not "monopolizing" conduct on his part, for it has no exclusionary effects on his **[**49]** actual or potential rivals.

Areeda & Turner, para. 734d, at 262.

2. *Horizontal Territorial Restriction*. ***HN22***[] A horizontal market allocation occurs when competitors on the same level agree only to sell within certain territories. In *United States v. Topco Associates, Inc., 405 U.S. 596, 608, 31 L. Ed. 2d 515, 92 S. Ct. 1126 (1972)*, the Supreme Court reiterated that these types of arrangements are *per se* unlawful. Except for the lamentations of Weintraub and Wein, however, who on one occasion complained to each other that they were being undersold, the record contains not a shred of evidence that the retailers selling the MacLaren stroller ever had anything to do with one another. This is a frivolous claim.

D. *Alleged Boycott*.

Reborn alleges a series of horizontal and vertical concerted refusals to deal which appear to exhaust the possible combinations of characters. Notwithstanding the Second Circuit's warning that in boycott cases "it is important to distinguish between 'horizontal' . . . and 'vertical' restraints," *Oreck Corp. v. Whirlpool Corp., 579 F.2d at 131*, it is unnecessary here to parse each of the overlapping allegations. In effect, Reborn contends **[**50]** that MacLaren, Fine Child, and various retailers engaged in a complex conspiracy similar to that of the manufacturers, distributors, and retailer alleged in *Klor's, Inc. v. Broadway Hale Stores, Inc., 359 U.S. 207, 212-14, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*, to which the Supreme Court applied a *per se* analysis. *See* *359 U.S. at 212-14*; *Oreck Corp. v. Whirlpool Corp., 579 F.2d at 131*. Reborn cannot avoid summary judgment on these contentions, however, because it has not raised a material issue of fact as to any of the enumerated conspiracies. Summary judgment is also compelled on the vertical conspiracies, which are examined under the rule of reason, for Reborn has failed to adduce evidence which would put at issue the business justifications for defendants' conduct.

As applied to MacLaren plaintiff's claim has no merit, because in fact MacLaren did not refuse to deal with Reborn, but took Reborn on as an account. MacLaren Inc. stopped doing business with Reborn in November 1981, when Fine Child became the new distributor, and at the time MacLaren Inc. stopped dealing with all its other accounts. MacLaren's present decision not to do business with Reborn because they **[**51]** are involved in litigation is a unilateral decision, protected under *Colgate*. Moreover, a desire to avoid burdensome litigation would constitute a legitimate business reason for refusing to deal. *See* *House of Materials, Inc. v. Simplicity Pattern Co., 298 F.2d 867,* 871 (2d Cir. 1962); Zoslaw v. MCA Distributing Corp., 693 F.2d 870, 889-90 (9th Cir. 1982), *cert. denied*, *460 U.S. 1085, 103 S. Ct. 1777, 76 L. Ed. 2d 349 (1983)*.

[*1444] Reborn's horizontal boycott claim is similarly unsupported. In a conventional horizontal boycott, traders at one level seek to protect themselves from competition from others by taking concerted action aimed at depriving the excluded retailer from a trade relationship the retailer needs to compete effectively at that level. *See* Klor's, 359 U.S. at 212-14. No evidence exists of concerted action among the various retailers to protect themselves from Reborn, and there is no indication that they took action to "induce" MacLaren or Fine to stop selling to Reborn. No reasonable jury could possibly infer that a horizontal boycott existed.

Plaintiff also alleges that MacLaren Ltd. conspired with Fine Child to change distributors solely **[**52]** to cut off Reborn, which would amount to a vertical concerted refusal to deal subject to the rule of reason. **HN23**[] A manufacturer may unilaterally decide to terminate one distributor in favor of another for any reason. United States v. Schwinn & Co., 388 U.S. 365, 376, 18 L. Ed. 2d 1249, 87 S. Ct. 1856 (1967), *overruled on other grounds*, Continental T.V. Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977). This Circuit in Bowen v. New York News, Inc., 522 F.2d at 1254 stated that "where a manufacturer simply decides on his own to substitute one dealer for another . . . his decision to sell exclusively to a new dealer does not amount to an antitrust 'conspiracy' with the latter." If a manufacturer may cease dealing with one distributor in order to deal with another without implicating the antitrust laws, certainly MacLaren could legally choose to transfer its distribution functions from a subsidiary to a nonaffiliated company so long as it did not act pursuant to some otherwise unlawful plan.

In Calculators Hawaii, Inc. v. Brandt, Inc., 724 F.2d 1332, 1337-38 (9th Cir. 1983), the court reversed a district court judgment in favor of the plaintiff **[**53]** on a section 1 claim. Calculators had alleged a concerted refusal to deal between Brandt, a money-handling machine manufacturer from whom it had previously purchased spare parts, and Hallett, an independent contractor from whom pursuant to a new agreement Brandt instructed owners of its machines to seek maintenance and repair. Calculators contended that their refusal to sell it spare parts cut off its supply of these parts and severely damaged its repair business. The Ninth Circuit observed that the facts "that Brandt and Hallett refused to sell parts to Calculators and that Calculators thereby lost business . . . are simply insufficient standing alone to prove anticompetitive purpose or effect," and held that even Brandt's attempts to keep independent servicemen from obtaining its parts in order to protect Hallett's business did not render the refusal to deal unlawful. *Id*. Likewise here, the decisions of MacLaren and Fine Child not to sell to Reborn cannot alone establish the anticompetitive purpose or effect necessary under a rule of reason analysis. Thus, the failure of Reborn to raise a triable issue of fact as to the existence of a conspiracy between Fine Child and MacLaren **[**54]** renders meritless its contention of vertical boycott.

Although a conspiracy can be proved by circumstantial evidence, the pretrial record is devoid of any kind of evidence that MacLaren changed its distribution system merely to terminate Reborn. Evidence exists that Hambleton, President of MacLaren Inc., was occupied with other matters, that MacLaren Ltd. wanted to expand in the United States stroller market, and that MacLaren Inc. lacked the facilities and personnel to accomplish that expansion. MacLaren Ltd. spent some time searching for a juvenile goods distributors with far-reaching connections in the juvenile goods market and eventually selected Fine Child. In the context of this unrebutted proof, and the fact that MacLaren could unilaterally have terminated Reborn at any time, speculation that this change in MacLaren's distribution system occurred as a result of defendants' desire to terminate Reborn raises no triable issue of fact.

On October 8, 1982, the Managing Director of MacLaren wrote to Fine and stated that, before a final agreement **[*1445]** was signed, he was curious as to Fine's position "vis-a-vis Reborn." Pltf. Exh. 153. Plaintiff relies on this as circumstantial **[**55]** evidence of a conspiracy between MacLaren Ltd. and Fine to boycott Reborn. But **HN24**[] a manufacturer has a right to confer with its distributor on its marketing strategy. Monsanto, 79 L. Ed. 2d at 785. MacLaren's unhappiness about doing business with Reborn was no secret. And the reasons for this unhappiness are uncontroverted: Reborn's close proximity to Ben's, its inability to repair the strollers it sold, and Wallis' rude behavior to MacLaren employees. Given these legitimate concerns, it was reasonable for MacLaren Ltd. to find out Fine's stance on the matter before the distributorship agreement became final. In this factual business context, the letter standing alone does not suffice to raise an issue of fact warranting trial on the claim of a vertical conspiracy between MacLaren Ltd. and Fine to boycott Reborn. No evidence exists that MacLaren made a boycott of Reborn a condition of its arrangement with Fine. The letter indicates only that MacLaren wanted to make Fine aware of and sensitive to the problems Reborn's deficiencies and conduct created. Moreover, the agreement itself tends to refute Reborn's view of the letter's significance, since MacLaren Ltd. retained the right to **[**56]** terminate dealings with any customer, and did not therefore need Fine's agreement in advance to terminate Reborn.

Reborn's allegation that MacLaren Inc. conspired with Fine Child to boycott Reborn is based on inferences drawn from the difficulties MacLaren Inc. had in its dealings with Reborn, and the fact that Kurzman and Hambleton told Fine about their experiences with Reborn. Reborn infers that MacLaren recommended that Fine terminate the account, and that thereafter he refused to sell to Reborn.

MacLaren Inc.'s statements and suggestions to Fine are legally insufficient to establish a conspiracy. ***HN25***[] The antitrust laws permit a terminated distributor to confer with the new one on each of its accounts. The transfer of relevant business information should not be inhibited for fear of spawning antitrust allegations. Section 4(m) of the distributorship agreement gave Fine the authority to decide with whom to deal should MacLaren Ltd. choose not to be involved. Neither the advice of MacLaren's employees nor the influence of past events made Fine's decision any "less unilateral" or "more conspiratorial."

Even if Fine acting independently gave Wallis a false or inaccurate reason for his **[**57]** action, whether because of a desire to avoid controversy or any other reason, he did not violate any legal obligation to the retailer so long as he did not act pursuant to a conspiracy. *H.L. Moore Drug Exchange, 662 F.2d at 941*. Even had Fine had an anticompetitive purpose in mind he would not have violated the Act. ***HN26***[] Because the evidence is uncontroverted that Fine acted without soliciting the aid of any other entity, his motives are irrelevant. *See Edward J. Sweeney & Sons, Inc. v. Texaco, Inc., 478 F. Supp. 243, 265 (E.D. Pa. 1979)*, *aff'd*, *637 F.2d 105 (3d Cir. 1980)*, *cert. denied*, *451 U.S. 911, 68 L. Ed. 2d 300, 101 S. Ct. 1981 (1981)*; *see also House of Materials, Inc. v. Simplicity Pattern Co., 298 F.2d 867, 870-71 (2d Cir. 1962)*. "To establish the illegality of [an] act under *Section 1*, it is not enough to prove [the defendants'] motivation was that of punishment for discounting or anything else, however reprehensible." *Carbon Steel Products Corp. v. Alan Wood Steel Co., 289 F. Supp. 584, 588 (S.D.N.Y. 1968)* (quoting *Dart Drug Corp. v. Parke, Davis & Co., 120 U.S. App. D.C. 79, 344 F.2d 173, 186 (D.C. Cir. 1965)*; *see GAF Corp. v. Circle Floor Co* ***[**58]*** *., 329 F. Supp. 823, 828 (S.D.N.Y. 1971)*, *aff'd*, *463 F.2d 752 (1972)*, *cert. dismissed*, *413 U.S. 901, 93 S. Ct. 3058, 37 L. Ed. 2d 1045 (1973)*.

E. *Alleged Tying Arrangement*.

Reborn claims that Fine Child engaged in illegal tying arrangements and that these arrangements not only violated *section 1* of the Sherman Act but also *section 3* of the Clayton Act, *15 U.S.C. § 14*, which provides:

> **[*1446]** ***HN27***[] It shall be unlawful for any person engaged in commerce in the course of such commerce to . . . make a sale or contract for sale of goods . . . or fix a price charged therefor . . . on the condition, agreement, or understanding that the . . . purchaser thereof shall not use or deal in the goods, wares, merchandise, machinery, supplies or other commodities of a competitor or competitors of the . . . seller, where the effect of such . . . sale or contract for sale or such condition, agreement, or understanding may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

Plaintiff maintains that the tying claim must be sustained against all the other defendants as well because the actions of the Fine defendants were part of an **[**59]** overall scheme to terminate plaintiff, in which all joined. In its complaint, plaintiff specifically charged the MacLaren defendants with tying as well, but that claim has apparently been abandoned, as it is not discussed in Reborn's pretrial order and memoranda.

HN28[] Tying is "an agreement by a party to sell one product but only on the condition that the buyer also purchase a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier." *Northern Pacific Railway Co. v. United States, 356 U.S. 1, 5-6, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*. The seller's leverage in the tying product market enables it to "deny competitors free access to the market for the tied product." *Id. at 6*. In the instant case, the MacLaren stroller is allegedly the tying product, and all other products sold by Fine Child are allegedly the tied ones. Tying is a *per se* violation of both *section 1* of the Sherman Act and *section 3* of the Clayton Act, so long as forcing is likely. *Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, , 80 L. Ed. 2d 2, 15, 104 S. Ct. 1551 (1984)*.

HN29[] A *section 1* tying violation has at least five elements: "first, **[**60]** a tying and a tied product; second, evidence of actual coercion by the seller that in fact forced the buyer to accept the tied product; third, sufficient economic power in the tying product market to coerce purchaser acceptance of the tied product; fourth, anticompetitive effects in the tied market; fifth, involvement of a 'not insubstantial' amount of interstate commerce in the tied product market." *Yentsch, 630 F.2d at 56-57* & n.15 (citations omitted). ***HN30***[] "The elements of a violation of *section 3* are: (1) sales of goods for use, consumption, or resale within the United States; (2) sales conditioned on the purchaser's not dealing in the goods of a competitor; (3) a potential effect of substantial lessening of competition in the market for the tied product." *Reisner v. General Motors Corp., 511 F. Supp. 1167, 1176 (S.D.N.Y. 1981)*, *aff'd*, *671 F.2d 91* (2d Cir.), *cert. denied*, *459 U.S. 858, 103 S. Ct. 130, 74 L. Ed. 2d 112 (1982)*.

While the elements of a violation under the two statutes vary a bit, they aim at the same evil -- decisions to purchase distorted by economic considerations outside the relevant market. *See Reisner, 511 F. Supp. at 1177*. ***HN31***[] "The essential characteristic **[**61]** of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms." *Jefferson Parish Hospital, 80 L. Ed. 2d at 13*; *see Northern Pacific Railway, 356 U.S. at 6*. Because this element of forcing is so crucial, "per se condemnation -- condemnation without inquiry into actual market conditions -- is only appropriate if the existence of forcing is probable." *Jefferson Parish Hospital, 80 L. Ed. 2d at 15*.

HN32[] A plaintiff might demonstrate the requisite forcing in two ways. He might "establish that he has been required to purchase something which he does not want to take." *Capital Temporaries Inc. of Hartford v. Olsten Corp., 506 F.2d 658, 662 (2d Cir. 1974)*. Or he might show an "unremitting policy of tie-in," which, "if **[*1447]** accompanied by sufficient market power," might substitute for actual coercion. *Hill v. A-T-O, Inc., 535 F.2d 1349, 1355 (2d Cir. 1976)*; *see Reisner, 511 F. Supp. at 1177 n.21*. Thus in the face of the consistent testimony that Fine Child did not **[**62]** practice tied sales, Reborn must identify evidence either of a persistent policy of tie-in or of actual coercion. In this case, however, only circumstantial evidence exists of a tie-in and no evidence has been presented that stores with whom Fine dealt were required to purchase other Fine Child products if they wished to order the MacLaren stroller.

Reborn relies on the two conversations between Fine and Wallis in which Fine asked Wallis whether Reborn carried any of Fine's other products, Wallis said no, and Fine told Wallis that he would forward a catalogue and price list to Reborn so Wallis would learn its goods and current prices. Two weeks later in a second conversation Wallis said he was only interested in purchasing the stroller, and Fine told Wallis he would not do business with him. Reborn also claims that Fine sold to Stork Time, a maternity shop in Boston, Massachusetts, only because it purchased some of Fine's other products. And plaintiff asserts that most of the retailers of juvenile goods with whom Fine dealt purchased other Fine goods when Fine took over the MacLaren distributorship.

This evidence, taken as a whole and viewed in a light most favorable to Reborn, fails **[**63]** to support a conclusion that Fine's buyers were victims of a tying arrangement. Reborn concedes that Wallis himself told the proprietor of Stork Time to order Fine Child products if he wanted the stroller, so Stork Time's owner asked the Fine Child independent agent with whom it was dealing for other Fine Child goods of his own volition. Pltf. Pretrial Memo at 23. In *Yentsch* a tying arrangement was found where sales representatives of defendant Texaco told leaseholders that "dealers who refused trading stamps 'wouldn't be there when lease time came around again.'" *630 F.2d at 57*. Nothing similar to this was said by Fine or Fine's agent to Stork Time's owner in this case. The owner of Stork Time asked for the "tied" product, other Fine goods, because he was told by Reborn that it was the only way for him to get the stroller. He concluded this, not because he personally knew of a Fine Child "unremitting policy of tie-in" and felt threatened by it, but because Wallis told him that Fine engaged in tying agreements. Stork Time's proprietor never even tried to purchase just the MacLaren stroller, so Wallis' allegation that Fine sold strollers to Stork Time only because it purchased Fine's **[**64]** other juvenile products is conclusory and has no basis in fact.

Fine testified in his deposition that a number of his customers buy only MacLaren strollers from him and may or may not have purchased Fine Child products from other wholesalers. Fine 229. Furthermore, even if many customers did buy other Fine Child juvenile goods, ***HN33***[] "tying arrangements can only be condemned if they restrain competition on the merits by *forcing* purchases that would not otherwise be made." *Jefferson Parish Hospital, 80 L. Ed. 2d at 22* (emphasis added). The record does not indicate that any of Fine's accounts purchasing Fine's other juvenile goods in addition to the MacLaren stroller did not want those goods. In fact, some store owners testified at their deposition that buying Fine's other goods at the same time they purchased the stroller was convenient for them. Leffler 23; Waxman 73. Almost all of the proprietors of Fine's accounts were deposed, but not one spoke of being coerced, in any way, into buying Fine's other goods. Mr. Cziment of Yeedl's in Brooklyn stated that he purchased only the stroller and did not mention anything about being subjected to pressure from Fine to buy other products. **[**65]** Cziment 33.

Given the absence of direct evidence of tying or evidence that many buyers were forced to buy an unwanted tied product, plaintiff must show that it was coerced into purchasing something it did not want. *Capital Temporaries, Inc., 506 F.2d at 662*. Nothing supports plaintiff's claim **[*1448]** that he was required to buy Fine Child products in order to get the MacLaren stroller. Fine's inquiry of Wallis whether he carried any Fine Child goods was at most a sales pitch. Fine did not even send plaintiff the catalogue he said he would send, and as early as October and through November, before Fine spoke to Wallis, Fine had expressed his intention not to sell to Reborn. When Wallis called Fine, threatened to sue, and said he wanted nothing but carriages, Fine had either decided against selling Wallis anything, or had found ample reason for refusing to deal with him further because of his abusive behavior.

HN34[] Absent evidence of forcing, tying arrangements are not unlawful. Plaintiff here has produced no evidence that Fine Child used its economic leverage in the market for MacLaren strollers to force either plaintiff or any other prospective buyer to purchase other Fine Child **[**66]** juvenile goods. Thus, even though other elements necessary to establish a tie-in might have been met here, *see* *Yentsch, 630 F.2d at 57*, absent any evidence of coercion summary judgment must be granted for defendants on the tying claim.

F. *Alleged Rule of Reason Violations*.

HN35[] "In order to prevail in the absence of *per se* liability," and in the face of defendants' evidentiary showing, Reborn must come forward with evidence by which a jury could reasonably conclude that defendants' actions "unreasonably restrained competition." *Jefferson Parish Hospital, 80 L. Ed. 2d at 23*.

> ***HN36***[] Under the rule of reason analysis, "the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." *Continental T.V. Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 49 [53 L. Ed. 2d 568, 97 S. Ct. 2549]* (1977). Among the most important circumstances to be considered are those relating to the competitive characteristics of the relevant market. "Proof that the defendant's activities had an impact upon competition in a relevant market is an absolutely essential element of the rule of **[**67]** reason case." *Kaplan v. Burroughs Corp., 611 F.2d 286, 291 (9th Cir. 1979)*, *cert. denied*, *447 U.S. 924, 65 L. Ed. 2d 1116, 100 S. Ct. 3016 (1980)*.

Hayden Publishing Co. v. Cox Broadcasting Corp., 730 F.2d 64, 69-70 (2d Cir. 1984) (additional citations omitted), *rev'g* *566 F. Supp. 503 (E.D.N.Y. 1983)*. Moreover, "[a] ***HN37***[] determination as to the boundaries of the relevant product market is essential in order to measure the anti-competitive effect, if any, of defendants' actions." *Id. at 70* (quoting *566 F. Supp. at 511*). Reborn has not alleged the relevant market in its complaint, nor has it produced any evidence in its papers to define this market. In *Hayden* the Second Circuit held that a trial court cannot grant summary judgment to defendants for *section 1* Sherman Act claims reviewed under a rule of reason where a plaintiff fails to produce sufficient evidence of a relevant product market, so long as a genuine issue exists as to the definition of the market. *Id*. The present controversy is distinguishable. Whereas in *Hayden* both parties provided the court with numerous economic and statistical studies as to the relevant product market, *see* *566* ***[**68]*** *F. Supp.*

at 507-08, thus generating a genuine issue of fact as to its nature, here neither party has provided the court with any evidence on this matter. Fine Child states that MacLaren strollers comprise less than 5% of the national stroller market and less than 25% of the metropolitan "high-end" stroller market, Memorandum at 5, but even it has offered no evidence to support this. Summary judgment must therefore be granted defendants on these section 1 claims. In Rios v. Marshall, 530 F. Supp. 351, 357 n.4 (S.D.N.Y. 1981), the court dismissed a section 2 Sherman Act claim for failure to allege what proportion of any relevant market was controlled by the defendants, a necessary element of a section 2 claim. Similarly, plaintiff's failure here either to allege or adduce evidence on what proportion of any relevant **[*1449]** market was restrained, a necessary element under rule of reason analysis, compels this court to dismiss the "rule of reason" claims under section 1 of the Sherman Act and section 1 of the Clayton Act. *See also* Reisner, 511 F. Supp. at 1176 n.19; *cf.* Kaplan v. Burroughs, 611 F.2d at 291 (failure to produce substantive evidence proving relevant market **[**69]** entitles defendant, in rule of reason case, to judgment n.o.v.).

IV. *Claims Not Alleged in the Complaint*.

In its pretrial order and memorandum of law, plaintiff added two claims not included in its complaint of a year earlier -- a claim under section 2 of the Sherman Act, 15 U.S.C. § 2, that defendants monopolized, attempted to monopolize, and conspired to monopolize commerce, and a claim under the Robinson-Patman Act, 15 U.S.C. 13, that defendants engaged in price discrimination. Reborn has not formally moved to amend its complaint to include these claims, but has stated its intention to move at the appropriate time to conform the pleadings to the proof pursuant to Rule 15(a) and (b) of the Federal Rules of Civil Procedure. Plaintiff Letter (Nov. 15, 1983). Defendants have not responded to these claims in their summary judgment papers or pretrial order and have noted their objection to entertaining these claims, for which they contend no factual basis exists in any event. Defendants' Letter (Nov. 15, 1983).

Plaintiff notified the court and parties that it would seek to conform the pleadings to the proof when this case was scheduled for trial. That notice will therefore be **[**70]** treated as a motion to amend the complaint, a form of relief within the trial court's discretion. Oreck Corp. v. Whirlpool Corp., 639 F.2d at 81; Ricciuti v. Voltarc Tubes, Inc., 277 F.2d 809, 814 (2d Cir. 1960). While such a motion should be freely granted when justice requires, Foman v. Davis, 371 U.S. 178, 182, 9 L. Ed. 2d 222, 83 S. Ct. 227 (1962), there is no reason to allow the amendment sought in this case.

Lack of diligence is reason enough for this conclusion. *See* Oreck Corp., 639 F.2d at 81; Wheeler v. West India S.S. Co., 205 F.2d 354, 354 (2d Cir. 1953) (per curiam); Kirby v. P.R. Mallory & Co., 489 F.2d 904, 912 (7th Cir. 1973), *cert. denied*, *417 U.S. 911, 41 L. Ed. 2d 215, 94 S. Ct. 2610 (1974)*; Graboi v. Smith, 432 F. Supp. 572, 575-76 (S.D.N.Y. 1977); Weight Watchers of Quebec, Ltd. v. Weight Watchers International, Inc., 398 F. Supp. 1047, 1056 (E.D.N.Y. 1975); J. Moore & J. Lucas, 3 *Moore's Federal Practice* para. 15.08[4], at 15-91 to -94 & n.9. Reborn has had the facts necessary to make the two new allegations proposed throughout this litigation, but has unduly delayed in asserting them.

Alternatively, the amendment is **[**71]** denied because it would add two more meritless causes of action. ***HN38***[] "Although courts usually exercise their discretion in favor of allowing motions under Rule 15, they may also deny such a motion when a party seeks to interpose a claim that lacks merit." *Johnson v. Partrederiet Brovigtank, 202 F. Supp. 859, 867 (S.D.N.Y. 1962)* (Feinberg, J.) (citations omitted); *see* Slavin v. Benson, 493 F. Supp. 32, 33 (S.D.N.Y. 1980). Plaintiff claims that certain documentary evidence establishes that Fine Child and Ben's violated section 2 of the Robinson-Patman Act, 15 U.S.C. § 13, by discriminating in the price it charged for the MacLaren stroller. Plaintiff has produced records showing that Fine Child gave Ben's "B" pricing, which is the price charged if over $2000 of MacLaren merchandise is purchased. Plaintiff Exh. 156(B). In addition, records indicate that Ben's received an additional 5-10% discount from the "B" prices. Plaintiff Exh. 156 E-1. Thus, plaintiff concludes, Fine Child's conduct was unlawful by virtue of the fact that it discriminated in price between different purchasers of the same goods sold in the same time period. Similarly, plaintiff contends that Ben's conduct violates **[**72]** Robinson-Patman, since it is unlawful to induce or receive a discrimination in price.

Plaintiff has no standing to assert these claims. Plaintiff asserts that Fine **[*1450]** "gave Ben's the 'B' pricing which is approximately 5% less than the 'A' pricing it charged its *other customers*", and that Ben's received an additional discount from Fine Child "not offered to *any other purchasers of the MacLaren stroller*." Pltf. Pretrial Memo. at 39-40 (emphasis added). Fine refused to do business with Reborn, however, and did not honor any of Wallis' stroller orders. Therefore, at the time of the alleged price discrimination, Reborn was not competing with Ben's for strollers from Fine Child.

HN39[] Section 4 of the Clayton Act, *15 U.S.C. § 15*, confers standing to raise a claim under *section 2(a)* of the Robinson-Patman Act, *15 U.S.C. § 13(a)*. *Schwimmer v. Sony Corp. of America, 637 F.2d 41, 46 (2d Cir. 1980)*. Notwithstanding the broad language, in order to have standing under section 4, "a plaintiff must allege a causative link to his injury which is 'direct' rather than 'incidental' or which indicates that his business or property was in the 'target area' of the defendant's illegal **[**73]** act." *Litton Systems, Inc. v. American Telephone & Telegraph Co., 700 F.2d 785, 821 (2d Cir. 1983) cert. denied, 464 U.S. 1073, 104 S. Ct. 984, 79 L. Ed. 2d 220 (1984)* (quoting *Billy Baxter, Inc. v. Coca-Cola Co., 431 F.2d 183, 187 (2d Cir. 1970)*, *cert. denied, 401 U.S. 923, 27 L. Ed. 2d 826, 91 S. Ct. 877 (1973)*. ***HN40***[] Plaintiff need not be an actual purchaser, *id*., nor a specifically intended target of the anticompetitive conduct, *Schwimmer, 637 F.2d at 47-48* & n.15. Without expressly approving the "target area" test, the Supreme Court recently advised courts assessing plaintiffs' standing under section 4 to "look (1) to the physical and economic nexus between the alleged violation and the harm to the plaintiff, and (2), more particularly, to the relationship of the injury alleged with those forms of injury about which Congress was likely to have been concerned in making defendant's conduct unlawful and in providing a private remedy under § 4." *Blue Shield of Virginia v. McCready, 457 U.S. 465, 478, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982)*; *see id. at 476-84*. This inquiry, like that posited by the "target area" test, recognizes that some consequences may **[**74]** flow from anticompetitive conduct which are simply "too remote" to give rise to a right for damages, *id. at 476* (quoting *Illinois Brick Co. v. Illinois, 431 U.S. 720, 728, 52 L. Ed. 2d 707, 97 S. Ct. 2061 n.7 (1977)* -- that "despite the broad wording of § 4 there is a point beyond which the wrongdoer should not be held liable," *id. at 477* (quoting *Illinois Brick, 431 U.S. at 760* (Brennan, J., dissenting)).

In this case, however, Reborn was neither a direct purchaser nor a customer farther down the line of distribution from the alleged price discrimination. As its allegations make clear, Reborn attempts to complain of discriminatory pricing as between other customers of Fine Child at a time when it was not purchasing strollers from this distributor. The wrong of which it complains is this inability to purchase, which while potentially unlawful under other provisions does not fall within the purview of the Robinson-Patman Act. That Fine Child allegedly discriminated between other purchasers of its products does not authorize Reborn to cast its fundamentally different complaint in Robinson-Patman guise. *See L & L Oil Co. v. Murphy Oil Co., 674 F.2d 1113, 1120-21* ***[**75]*** *(5th Cir. 1982)*.

Reborn's proposed *section 2* claims are likewise meritless. ***HN41***[] "The offense of monopoly under *section 2* of the Sherman Act has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident," *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*, while "the essential elements of attempted monopolization . . . are (1) a 'dangerous probability of success' in monopolizing a given product market and (2) a specific intent to 'destroy competition or build monopoly,'" *Nifty Foods Corp. v. Great Atlantic & Pacific* ***[*1451]*** *Tea Co., 614 F.2d 832, 841 (2d Cir. 1980)* (citing *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 626, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)*, and *Lorain Journal Co. v. United States, 342 U.S. 143, 153, 96 L. Ed. 162, 72 S. Ct. 181 (1951))*. Thus, proof of the relevant product market is essential to both these causes of action. *Id. at 840*.

Reborn "bears the burden of proving the boundaries **[**76]** of the relevant market," *id*., yet it has failed even to allege facts which might identify this market. Because the claims would thus be subject to dismissal, *see id. at 840-41*, discretion counsels that Reborn not be permitted to amend its complaint to add them, *see, e.g., Johnson v. Partrederiet Brovigtank, 202 F. Supp. at 867*. Moreover, in the face of substantial evidence in the record of interbrand competition and a multibrand market, Reborn has failed to identify any evidence from which a reasonable jury might find that the defendants achieved or attempted to achieve monopoly power in any relevant market. Thus, summary judgment would also be appropriate.

HN42[] Finally, the elements of the offense of conspiracy to monopolize "are (1) proof of a concerted action deliberately entered into with the specific intent to achieve an unlawful monopoly, and (2) the commission of an overt act in furtherance of the conspiracy." *Paralegal Institute, Inc. v. American Bar Association, 475 F. Supp. 1123, 1132 (E.D.N.Y. 1979)*, *aff'd mem*., *622 F.2d 575 (2d Cir. 1980)*. In the case of defendants' testimony that they did not engage in any such anticompetitive behavior, Reborn has failed **[**77]** to raise a triable issue either as to the existence of a conspiracy or any putative participant's specific intent to monopolize. *See id. at 1132-33*. Since exhaustive discovery has already been had, it would be fruitless at this point to allow amendment to add a claim which would be subject to summary judgment because of the patent unsupportability of Reborn's claim.

V. *Conclusion*.

Summary judgment is granted defendants MacLaren Inc., MacLaren Ltd., Fine, Fine Child, Ben's for Kids, and Wein on all plaintiff's federal claims. **HN43**[] Summary judgment should be granted "if but only if the [district] court is satisfied that a properly instructed jury, giving full weight to plaintiff's evidence, drawing every reasonable inference in its favor, and subjecting defendants' evidence to a critical eye, could not rationally find that plaintiff was entitled to any relief." *Ambook Enterprises v. Time Inc., 612 F.2d 604, 611* (2d Cir.), *cert. dismissed*, *448 U.S. 914, 101 S. Ct. 35, 65 L. Ed. 2d 1179 (1980)*. In the present controversy, no jury finding for the plaintiff would survive the scrutiny of the Second Circuit. *See Schwimmer, 677 F.2d at 956*; *H.L. Moore Drug Exchange,* ***[**78]*** *662 F.2d at 946*; *Fuchs Sugars and Syrups, 602 F.2d at 1033*; *Hill v. A-T-O, Inc., 535 F.2d at 1356*; *see also Oreck Corp. v. Whirlpool Corp., 639 F.2d at 81*. While abstract legal analysis might give one or more of plaintiff's numerous legal claims superficial plausibility, any realistic view of the circumstances underlying this lawsuit should make clear its suitability for dismissal prior to trial. The record reveals that Wallis was an unrelentingly suspicious and difficult person to do business with. He admits to attempting to tape a phone conversation with Fine without telling Fine he was doing so. Wallis 13-14. He had his relatives surreptitiously order catalogues from Fine Child solely to find out whether Fine was discriminating against him. Wallis 262. His testimony includes exaggerated inconsistencies. For example, at one point in his deposition he states that "People from Ben's [came] in ranting and raving . . . threatening customers." Wallis 360. Later on he corrects himself. "Only he (Wein) came in and *may* have knocked over some clothes and *may* have knocked over some chairs." Wallis 367 (emphasis added). Wallis said he kept and filed written notes of all **[**79]** his conversations with defendants. He repeatedly threatened to sue Fine and other defendants if they failed to sell to him. Fine 117, 142; Hambleton 103.

[*1452] The record makes clear that Wallis is attempting to employ the antitrust laws as a weapon against a supplier who has ceased doing business with him in reasonable response to his uncontrolled conduct and shoddy practices. But the antitrust laws are not a shelter for intemperate business people; they provide no protection against the usual consequences of obstreperous behavior. Even were it assumed that the defendants treated Wallis harshly or unfairly, the antitrust laws "were never meant to be a panacea for all wrongs." *Sitkin Smelting & Refining Co. v. FMC Corp., 575 F.2d 440, 448* (3d Cir.), *cert. denied*, *439 U.S. 866, 58 L. Ed. 2d 176, 99 S. Ct. 191 (1978)* (quoting *Parmelee Transportation Co. v. Keeshin, 292 F.2d 794, 804* (7th Cir.), *cert. denied*, *368 U.S. 944, 7 L. Ed. 2d 340, 82 S. Ct. 376 (1961))*. The record reveals a business dispute which has taken on nasty personal dimensions, but it contains virtually no factual support for Reborn's legal contentions. Wallis has attempted to transmute personal **[**80]** animosity into an antitrust suit. But no real antitrust interest is involved here: the strollers continue to be sold to discounters, and the manufacturer is lawfully protecting its longterm interest by favoring a dealer who knows, sells and repairs its strollers well.

VI. *Pendent Jurisdiction*.

Dismissal of plaintiff's federal law claims raises the question whether the state law antitrust and business tort claims should be dismissed without prejudice to their assertion in state court. *See Smith v. Weinstein, 578 F. Supp. 1297, 1304-06* (S.D.N.Y.), *aff'd*, No. 84-7164 (2d Cir. May 29, 1984). **HN44**[] Since diversity is lacking the court has no independent jurisdiction of the state law claims beyond its authority to consider them pendent to substantial federal claims. *See United Mine Workers of America v. Gibbs, 383 U.S. 715, 725, 86 S. Ct. 1130, 16 L. Ed. 2d 218 (1966)*. In this case the court has established that the federal antitrust claims were not substantial, and "the flimsy nature of federal claims may call for dismissal of pendent state claims." *Kavit v. A.L. Stamm & Co., 491 F.2d 1176, 1179 (2d Cir. 1974)* (Friendly, J.). Furthermore, the federal antitrust claims here **[**81]** are being dismissed without the need for a trial. Justice Brennan observed in *Gibbs* that "certainly, **HN45**[] if the federal claims are dismissed before trial . . . the state claims should be dismissed as well." 383 U.S. at 727. The Second Circuit has recently stated, "unless a trial of the operative facts is necessary to resolve claims that the federal court must hear, the federal court has no jurisdiction to take any action with respect to a pendent state law claim." McLearn v. Cowen & Co., 660 F.2d 845, 848 (2d Cir. 1981); *see* Reese Publishing Co. v. Hampton International Communications Inc., 620 F.2d 7, 12-13 (2d Cir. 1980); Federman v. Empire Fund and Marine Insurance Co., 597 F.2d 798, 809 (2d Cir. 1979); *Sciss v. Metal Polishers Union Local 8A*, 562 F. Supp. 293, 295 (S.D.N.Y. 1983). Judge Friendly has advised that **HN46**[] "if it appears that the federal claims . . . could be disposed of on a motion for summary judgment, under Fed. R. Civ. P. 56, the court should refrain from exercising pendent jurisdiction absent exceptional circumstances." Kavit, 491 F.2d at 1180. Here, moreover, the federal and state claims will not entirely overlap, since some state legal issues differ **[**82]** markedly from those presented by the federal claims.

The present controversy presents no special circumstances which might warrant hearing the state law claims. No unfairness has been alleged as likely to result. Nothing before the court would indicate that Reborn will be unable to assert its state law claims in the New York courts. A proper exercise of discretion requires dismissal of plaintiff's state antitrust and business tort claims, as well as of the defamation counterclaim. *See* Smith v. Weinstein, 578 F. Supp. at 1306.

SO ORDERED.

HN2[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

A charge that limiting the territories in which one's dealers can sell violates the Sherman Act *§ 1* is now evaluated under the Rule of Reason. This means among other things that the plaintiff must show that the defendant has market power, as this is a prerequisite to being able to restrain trade unreasonably.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN3[] **Private Actions, Remedies**

A private plaintiff can complain only of an antitrust injury. It is not enough that the plaintiff would not have been injured but for the defendant's alleged violation of the antitrust laws; the injury must be the sort of thing that the antitrust laws are intended to forbid.

HN6[] **Judicial Officers, Masters**

Although the use of special masters to assist federal district judges in complex litigation is not only authorized but indispensable to the effective operation of the federal courts under current workload conditions, its scope is limited by *Fed. R. Civ. P. 53(b)*, as follows: A reference to a master shall be the exception and not the rule. In actions to be tried by a jury, a reference shall be made only when the issues are complicated; in actions to be tried without a jury, save in matters of account and of difficult computation of damages, a reference shall be made only upon a showing that some exceptional condition requires it.

Counsel: John S. Skilton, Foley & Lardner, Milwaukee, Wisconsin, for Plaintiff-Appellant.

Richard T. O'Neill, Michael, Best & Friedrich, Milwaukee, Wisconsin, for Defendant-Appellee.

Judges: Eschbach and Posner, Circuit Judges, and Swygert, Senior Circuit Judge. Swygert, Senior Circuit Judge, concurring in the judgment.

Opinion by: POSNER

Opinion

[*701] POSNER, Circuit Judge.

This antitrust suit under *section 1* of the Sherman Act, *15 U.S.C. § 1*, pits a building-materials dealer, Walters, against a manufacturer of prefabricated farm buildings, Morton. The complaint, filed in 1978, alleges that Morton tied building components to its trademark, assigned its franchised dealers (one of whom was Walters) exclusive sales territories, limited the prices the dealers could charge consumers, and eventually took over the dealership function, terminating Walters in the process. There also is a pendent claim for breach of a duty of fair dealing under Wisconsin law. In 1981, shortly before trial was to begin, Morton moved for summary judgment. The district judge referred **[**2]** the motion to a special master, a member of the Milwaukee bar. After considering for 17 months the voluminous materials that the parties had submitted in connection with the motion, the special master submitted his report, which recommended granting the motion except with respect to the claim regarding exclusive territories. In a brief order the district judge adopted the master's recommendations in their entirety and therefore dismissed all but the exclusive-territories claim, which he retained for trial. He then directed entry of final judgment for Morton on the dismissed claims upon an express determination that there was no just reason for delay, and Walters has appealed under *Rule 54(b) of the Federal Rules of Civil Procedure*.

We consider first, on our own initiative as we must, whether the dismissed and retained claims are separate claims within the meaning of *Rule 54(b)*; if they are not, the judgment of dismissal cannot be appealed as a final judgment and Walters must wait to take its appeal until the exclusive-territories claim is tried. Our recent decisions emphasize that ***HN1***[] trial judges do not have carte blanche to certify partial dispositions for immediate appeal under **[**3]** *Rule 54(b)*. See *A/S Apothekernes Laboratorium v. I.M.C. Chem. Group, Inc., 725 F.2d 1140 (7th Cir. 1984)*; *Minority Police Officers Ass'n v. City of South Bend, 721 F.2d 197 (7th Cir. 1983)*. The rule itself makes clear that a district judge may enter an appealable judgment only if it disposes of a "claim for relief" that is "separate" from the claims not disposed of. But unfortunately the meaning that the draftsmen intended "claim for relief" to bear is not clear, see *Local P-171, Amalgamated Meat Cutters v. Thompson Farms Co., 642 F.2d 1065, 1069-71 (7th Cir. 1981)*; 10 **[*702]** Wright, Miller & Kane, Federal Practice and Procedure § 2657 (2d ed. 1983), and the Supreme Court has not yet attempted a compendious definition. See *Sears, Roebuck & Co. v. Mackey, 351 U.S. 427, 100 L. Ed. 1297, 76 S. Ct. 895 (1956)*; *Cold Metal Process Co. v. United Engineering & Foundry Co., 351 U.S. 445, 100 L. Ed. 1311, 76 S. Ct. 904 (1956)*; *Liberty Mutual Ins. Co. v. Wetzel, 424 U.S. 737, 743 n.4, 47 L. Ed. 2d 435, 96 S. Ct. 1202 (1976)*. The recent decisions of this court have experimented with a practical approach based on what we conceive to be the most important purpose **[**4]** behind *Rule 54(b)*'s limitations -- to spare the court of appeals from having to keep relearning the facts of a case on successive appeals. The approach is: if the facts underlying different claims are different, the claims are separate for *Rule 54(b)* purposes. For if there are different facts (and of course different issues) consideration of the appeals piecemeal rather than all at once will not involve a duplication in the efforts required of the judges to prepare for argument in, and to decide, each appeal. The gains from forcing the consolidation of appeals will therefore be small and will be outweighed by the benefits of an immediate appeal in resolving the parties' rights with respect to a part of the controversy between them. By the same token, if there is a great deal of factual overlap between the decided and the retained claims, they are not separate, and appeal must be deferred till the latter are resolved.

Applying this approach to the present case, we find potential but not actual factual overlap between the charges that the district judge dismissed and the single charge, involving exclusive territories, that he retained; therefore we have jurisdiction of the appeal. **[**5]** ***HN2***[] A charge that limiting the territories in which one's dealers can sell violates *section 1* of the Sherman Act is now evaluated under the Rule of Reason. See *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*. This means among other things that the plaintiff must show that the defendant has market power, see *Valley Liquors, Inc. v. Renfield Importers, Ltd., 678 F.2d 742, 745 (7th Cir. 1982)*, as this is a prerequisite to being able to restrain trade unreasonably. The Supreme

Court's most recent tying decision requires the plaintiff to make a similar, maybe identical, showing in order to prove that a tying arrangement is unlawful, even though tying still is referred to as a per se offense. See *Jefferson Parish Hospital Dist. No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 1559-60, 80 L. Ed. 2d 2 (1984)*. Moreover, where as in the present case the plaintiff tries to show that the whole is greater than the sum of its parts -- that an "aggregation of trade restraints" is unlawful even if the constituent restraints taken one by one are not -- and one of the parts is territorial exclusivity, the issue of unlawful "aggregation" logically **[**6]** requires consideration of the facts concerning territorial exclusivity.

All these are reasons why in the usual case a challenge to a scheme of restricted distribution states only one claim for *Rule 54(b)* purposes. But this case is unusual in that the particular grounds on which the special master and the district judge disposed of the charges that are involved in the appeal do not overlap, factually or legally, the charge of territorial exclusivity that he retained for trial. A clue to this is that the parties' briefs in this court tell us nothing about the exclusive territories -- how large they were, how exclusivity was enforced, how long exclusive territories were in effect, and for what reasons and with what consequences. Although the voluminous record submitted with the appeal contains much on these questions, that is only because the appeal record is the same record that was before the master and the district judge. The parties have made no reference to the parts of the record that relate to exclusive territories. The district judge dismissed the tying charge not because he found that Morton lacked market power, an issue that as we have said would also be highly relevant **[**7]** to the lawfulness of territorial restrictions, but because he found that the tying and **[*703]** the tied products were not separate products and therefore that there could be no tie-in. He dismissed the resale price maintenance and vertical integration allegations (the latter involving Morton's takeover of the retail distribution of its buildings) on evidentiary grounds unrelated to the lawfulness of exclusive territories. And with all of the specific charges other than the territorial charge dismissed, the "aggregation of trade restraints" charge fell of its own weight, like a conspiracy charge when all but one of the alleged participants have been exonerated.

Since, for these reasons, this appeal is unencumbered by any facts bearing on the retained claim, we are entitled to regard that as a separate claim. Its retention by the district court therefore does not deprive us of jurisdiction over the appeal from the dismissal of the rest of the plaintiff's case. This brings us to the merits. We begin with the tie-in charge.

Almost every product can be viewed as a package of component products: a pair of shoes, for example, as a package consisting of a left shoe and a right **[**8]** shoe; a man's three-piece suit as a package consisting of a jacket, vest, and pants; a belt as a package consisting of a buckle and a strap. As shown by the last of these examples, it is possible to describe a product as a package of components even if the components are physically integrated at the point of sale to the consumer. Indeed, much of what is called "manufacturing" is the assembly, i.e., physical integration, of components, often components manufactured by other companies. The manufacturer of an airplane, for example, does not build the whole thing from scratch. Usually he will build just the airframe, consisting of the fuselage, wings, and tail, and he will buy the engine, the wheels, the radar and other electronic equipment and much else besides from other manufacturers and will then assemble the various components to create the finished aircraft. Very few products today are produced like a statue that is made by pouring molten bronze into a cast -- the ultimate single product. But to hold therefore that every composite product is a tie-in, subject to the hostile scrutiny to which ***antitrust law*** still subjects tie-ins, would place industry under a vast antitrust cloud, **[**9]** and has been rejected. In *Johnson v. Nationwide Industries, Inc., 715 F.2d 1233 (7th Cir. 1983)*, for example, we held that a condominium and a contract for the provision of management services to the condominium owner were a single product, so that the owner could not complain, at least under ***antitrust law***, that the developer who had sold him the condominium had forced him as a condition of being allowed to purchase it to agree to buy the developer's management services as well. See also *Foster v. Maryland State Savings & Loan Ass'n, 191 U.S. App. D.C. 226, 590 F.2d 928, 932-33 (D.C. Cir. 1978)*.

The problem is that there is no obvious way of deciding whether a product is a single product or an assemblage of components. The practice has been to classify a product as a single product if there are rather obvious economies of joint provision, as in the left-shoe-right-shoe example. See *Principe v. McDonald's Corp., 631 F.2d 303, 309-11 (4th Cir. 1980)*; Sullivan, Handbook of the Law of Antitrust 449 (1977); Comment, *A New Approach to the Legality of*

Franchising Tie-Ins, 129 U. Pa. L. Rev. 1267, 1293 (1981). Although this approach seems to take what would otherwise **[**10]** be a matter of defense and make its absence a threshold requirement of the offense, it does serve to screen out many silly cases. A different but related approach was taken recently in the *Jefferson Parish* case (decided after argument in our case), where the Supreme Court held that products are separate for tie-in purposes if there are separate markets for each product. See *104 S. Ct. at 1562-63*. The link to the older view is that if there are not separate markets, this is evidence that the economies of joint provision are overwhelming.

The test of *Jefferson Parish* disposes handily of the shoe example, but could be thought to place decisions such as *Johnson* under a cloud, since there are separate markets for condominiums and for real estate management services. Only time will **[*704]** tell how far the "separate markets" approach of *Jefferson Parish* will be pushed. There are separate markets for sugar and for sugarless breakfast cereals, but it would be surprising to find that a sugary cereal was a tie-in (sugar tied to cereal), assuming the seller refused to sell a sugar-free version. The belt example also becomes problematic under the separate-markets approach. **[**11]** Belts are rarely sold without buckles; but surgical operations are even more rarely sold without anesthesia (held in *Jefferson Parish* to have been tied to the hospital's operating rooms). There may be overwhelming economies of joint provision for most customers and yet enough customers with idiosyncratic demands to encourage small markets tailored to their needs to emerge, as has happened with ornamental belt buckles. The separate market for ornamental buckles resembles the separate market for anesthesia, which exists because a patient can contract separately with the surgeon and with the anesthesiologist. We doubt that, even after *Jefferson Parish*, belts are tie-ins of buckles to straps; yet we cannot be sure where the separate-markets test will lead.

Still, we are reasonably confident that under that test as under the older, more intuitive test a building is a single product and not a tie-in of the walls, floors, roof, windows, and so forth; for most of these components are not sold in separate markets, though some are. And as Walters' counsel acknowledged helpfully at argument, it does not matter whether, as with hobby kits of various sorts (and even motorcycles, **[**12]** see *Flaminio v. Honda Motor Co., 733 F.2d 463, 465 (7th Cir. 1984))*, the manufacturer, instead of assembling the components himself at the factory, ships the unassembled components, and the actual assembly is done by the customer or by a dealer (as was the case here, before Morton took over the dealer function). It is enough if the end product is a single product; and a single building is a single product.

All this is more or less common ground among the parties and we have gone over it at such length only to dispel any impression that a tie-in case about prefabricated buildings must be based on a claim that the prefabricated parts were tied to each other. That is not Walters' claim. Its claim is that the Morton name, the Morton trademark, is the tying product and that the building, the kit of prefabricated building components, is the tied product. The difficulty with this argument is that a product and its name are inseparable. It is one thing to say that a manufacturer of copying machines who requires his customers to buy from him the copying paper that is used in the machines is conditioning the sale of the machines on the customer's purchase of a distinct product; it **[**13]** is quite another to say that General Motors lets you use the name Buick on condition that you buy the car to which the name is attached. That is a fantastical description of the transaction, and the cases reject the proposition that a tie-in claim can be based on it. See, e.g., *California Glazed Products, Inc. v. Burns & Russell Co., 708 F.2d 1423, 1430 (9th Cir. 1983)*; *Dart Industries, Inc. v. Plunkett Co., 704 F.2d 496, 500 (10th Cir. 1983)*; *Hamro v. Shell Oil Co., 674 F.2d 784, 788 (9th Cir. 1982)*; *Krehl v. Baskin-Robbins Ice Cream Co., 664 F.2d 1348, 1352-54 (9th Cir. 1982)*; *Redd v. Shell Oil Co., 524 F.2d 1054, 1056-57 (10th Cir. 1975)*; *Kugler v. AAMCO Automatic Transmissions, Inc., 460 F.2d 1214 (8th Cir. 1972)*. The only appellate case we can find in which such a claim was accepted is *Warriner Hermetics, Inc. v. Copeland Refrigeration Corp., 463 F.2d 1002, 1015-16 (5th Cir. 1972)*. To accept it would be to impose in the name of antitrust a regime of compulsory licensing of trademarks -- an absurd project. Moreover, since a trademark that denotes a product is rarely licensed apart from the product -- and was not in this case -- the separate-markets **[**14]** test of *Jefferson Parish* is not satisfied.

However, some cases, including several in this circuit, do treat as tying products trademarks that name not a product manufactured by the trademark's owner but a service which he provides to consumers **[*705]** through a system of franchised retail outlets; the tie-in consists of requiring franchisees, as a condition of being allowed to use the trademark, to buy distinct products supplied by the franchisor. See, e.g., *Photovest Corp. v. Fotomat Corp., 606*

F.2d 704, 722 (7th Cir. 1979); Ohio-Sealy Mattress Mfg. Co. v. Sealy, Inc., 585 F.2d 821, 834 (7th Cir. 1978); Milsen Co. v. Southland Corp., 454 F.2d 363, 365 (7th Cir. 1971); Siegel v. Chicken Delight, Inc., 448 F.2d 43 (9th Cir. 1971); Susser v. Carvel Corp., 332 F.2d 505 (2d Cir. 1964), cert. dismissed, 381 U.S. 125, 14 L. Ed. 2d 284, 85 S. Ct. 1364 (1965). The trademark is analytically separable from the tied product, so there is not the same absurdity in treating the trademark as a tying product as there is when the trademark is simply the name of the alleged tied product, as in our example of the Buick name and the Buick automobile. "Chicken Delight," **[**15]** in contrast, was the name of a fast-food franchise operation, not the name of a product; and the franchisor, the owner of the "Chicken Delight" mark, manufactured none of the things (which included mixes, fryers, and packaging supplies) that it required its franchisees to buy from it as a condition of their being allowed to use the name. Siegel v. Chicken Delight, Inc., supra, 448 F.2d at 48 n.4. It was a "case of a franchise system set up not to distribute the trade-marked goods of the franchisor, but . . . to conduct a certain business under a common trade-mark or trade name." Id. at 48 (footnote omitted). The name and the tied products thus were separable in a way that the name Buick and the car sold under that name are not. Or so at least it can be argued; for the *Chicken Delight* line of cases is not universally delectated. See, e.g., Principe v. McDonald's Corp., supra, 631 F.2d at 309; *Baker, The Supreme Court and the Per Se Tying Rule: Cutting the Gordian Knot*, 66 Va. L. Rev. 1235, 1315-17 (1980). And the emphasis in the Supreme Court's recent decision in *Jefferson Parish* on the importance of proving that the owner of the tying product has real market **[**16]** power may doom the franchise trademark cases, as they mostly involve highly competitive retail industries, such as the fast-food business. But we shall not have to get into the broader questions here. All we shall have to decide is whether Morton Building, the name the defendant has given to its prefabricated farm buildings, is more like Chicken Delight or more like Buick -- bearing in mind that since this question was decided on summary judgment we cannot answer it in Morton's favor if there is any material fact in dispute.

Morton manufactures some building parts, such as sheet-metal walls and wooden corner posts, buys others from other manufacturers, and ships the unassembled parts to retail outlets for assembly into finished buildings on the farmer's property. The parts when assembled make a rather austere building, even for a farm utility building, and often the dealer will customize the building by adding things that are not part of Morton's kit. A Morton Building is therefore quite likely to contain some parts not supplied by Morton, just as an automobile might have some accessories that had not been supplied by the manufacturer, such as a dealer-supplied car alarm. But **[**17]** whether few or many farmers embellish their Morton Buildings, the inference that Morton really is engaged in manufacturing buildings is inescapable, and we think this fact defeats any effort to separate its name from the product that it is alleged to be tying to it. Maybe Walters is capable, as it alleges, of building from parts it gets elsewhere a farm building identical to the Morton Building; but it does not follow that it can put Morton's name on it, when Morton wants to manufacture the Morton Building itself. If Morton were just selling blueprints for a building and it told the people it sold them to, "You must buy your bathroom faucets from us if you want to use the blueprints," then it might be possible to separate design and product. But if you happen to be in the business of selling faucets, a dealer cannot force you to let him sell, under your name, faucets he gets elsewhere.

To summarize, we hold that there was no tie-in because there were no separate **[*706]** products (or services) tied together. But we emphasize again that it is not alleged that Morton tied accessories to the building kits that it sold, so we need not decide at what point prefabricated building **[**18]** parts cease to be a single product.

The next question is whether Morton violated the per se rule against resale price maintenance. Several times each year Morton would advertise special deals for its buildings. The advertising was directed to the consuming public and mentioned special prices at which consumers could buy the buildings from dealers such as Walters, listing them by name. Morton gave dealers a discount from the wholesale price to make it easier for the dealers to offer consumers the special retail price that Morton had advertised. It was important to Morton that dealers not charge a higher price than the advertised price, because if they did Morton's advertising would lack credibility -- indeed, would be deceptive and create ill will. So, according to Walters' affidavits, Morton took various steps to see that its dealers sold its buildings at no more than the advertised price. These steps included threatening the dealers with termination if they went above that price, offering if they did to sell directly to the public at the advertised price, and checking up on the dealers to see whether they were charging more. Walters also charges that Morton made it hard for **[**19]** the dealers to comply with its desire that they sell at the advertised price by giving them a smaller discount from the wholesale price than the difference between the regular retail price and the advertised price.

The usual form of resale price maintenance, the form that invited condemnation from the Supreme Court in *Dr. Miles Medical Co. v. John D. Park & Sons Co., 220 U.S. 373, 55 L. Ed. 502, 31 S. Ct. 376 (1911)*, involves setting a minimum price below which dealers may not sell rather than a maximum price above which they may not sell. It is minimum price fixing that creates the analogy to a dealers' cartel upon which the per se rule against resale price maintenance rests. Although *Albrecht v. Herald Co., 390 U.S. 145, 19 L. Ed. 2d 998, 88 S. Ct. 869 (1968)*, extended the rule of *Dr. Miles* to a scheme of maximum resale price maintenance, the continued vitality of *Albrecht* is in doubt after *Continental T.V., Inc. v. GTE Sylvania Inc., supra*, held that assigning dealers exclusive territories is not unlawful per se. The newspaper dealers in *Albrecht* had exclusive territories, and putting a ceiling on their prices was, as Justice Stewart pointed out in his **[**20]** dissenting opinion, a way for the Herald Company to prevent the dealers from exploiting the monopoly power that territorial exclusivity gave them. See *390 U.S. at 169*. But at a time when exclusive territories, at least if imposed through a sale contract (as in *Albrecht*) rather than an agency contract, were illegal per se, as had been held a year before *Albrecht* in *United States v. Arnold, Schwinn & Co., 388 U.S. 365, 18 L. Ed. 2d 1249, 87 S. Ct. 1856 (1967)* (the decision overruled by *Sylvania*), it was not a good defense of maximum price fixing that it was ancillary to a system of exclusive territories. Now that assigning exclusive territories to dealers is lawful if reasonable, a manufacturer-imposed price ceiling intended to limit the power that exclusive territories give dealers to raise prices regardless of what other dealers in the manufacturer's product are charging may also be lawful in some cases -- a proposition suggested by Professor Pitofsky in *The Sylvania Case: Antitrust Analysis of Non-Price Vertical Restrictions*, 78 Colum. L. Rev. 1, 16 n. 59 (1978), and supported by the First Circuit's decision in *Eastern Scientific Co. v. Wild Heerbrugg Instruments, **[**21]** Inc., 572 F.2d 883, 885-86 (1st Cir. 1978)*. The defendant in that case had a lawful system of exclusive territories but allowed its dealers to sell outside their territories provided they did not sell below a certain price. This provision was held lawful because it allowed a little more competition than if the territories had been airtight. The justification for maximum prices within exclusive dealer territories is even more straightforward: it forces price within the territories closer to the **[*707]** competitive level. See Easterbrook, *Maximum Price Fixing*, 48 U. Chi. L. Rev. 886, 890 n. 20 (1981). It is true that, after *Sylvania* was decided, *Albrecht* was cited approvingly in *Arizona v. Maricopa County Medical Soc'y, 457 U.S. 332, 347-48, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)* (4-3 decision), but only as supporting the proposition that horizontal price fixing is not saved from condemnation merely because the prices fixed are maximum rather than minimum prices, see *id. at 348* and n.18, a matter of no significance here. Indeed, the footnote can be read as supporting a distinction between horizontal and vertical maximum price fixing.

But we need not explore **[**22]** this maze further. Since the lawfulness of Morton's territorial exclusivity has not been adjudicated, it is premature to conclude that maximum price fixing would be a lawful incident to it. We mention the point to avoid creating the impression that we consider maximum price fixing always and everywhere unlawful (unless horizontal, in which event it is indeed illegal per se, as held in *Maricopa, 457 U.S. at 348*). That seems to us an open question after *Sylvania*. But even if we assume that maximum price fixing would be unlawful in this case, as it might well be if Morton's exclusive territories were unlawful (an issue not before us on this appeal), we must still determine whether the conduct attested to in Walters' affidavits is price fixing. The special master thought that Morton's efforts to compel its dealers to comply with the advertised price, and the dealers' responses, did not create an agreement to adhere to that price; and without agreement there can be no violation of *section 1* of the Sherman Act. The picture painted by Walters' affidavits is one not of agreement but of Morton's unsuccessful efforts to force Walters to agree. However, Supreme Court pronouncements **[**23]** which appear still to be authoritative despite the considerable changes in the Court's interpretation of the antitrust laws in recent years indicate that when a seller goes beyond announcing a policy of refusing to deal with price cutters (or in this case price gougers) and of cutting off those dealers who do not comply with the announced policy, it has, for *section 1* purposes, conspired with any dealer who complies with the policy. See, e.g., *United States v. Parke, Davis & Co., 362 U.S. 29, 4 L. Ed. 2d 505, 80 S. Ct. 503 (1960)*. Here some dealers did comply; and Walters' affidavits if true indicate that Morton went beyond simply announcing its policy and terminating noncompliers, and used persuasion and policing to obtain that compliance, as in *Yentsch v. Texaco, Inc., 630 F.2d 46, 49-55 (2d Cir. 1980)*. See also *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 104 S. Ct. 1464, 1471-73, 79 L. Ed. 2d 775 (1984)*.

But there is a more fundamental ground, alluded to by the special master, which requires that we uphold the dismissal of this part of the complaint. Walters concedes as it must that it is perfectly lawful for a manufacturer to advertise his product to **[**24]** the ultimate consumer, whether or not he sells directly to the consumer, and to mention in that advertising the retail price of the product -- the only price the consumer is interested in. The law of products liability has come to recognize what economists and businessmen have long known -- that manufacturers are in a direct economic relationship with the ultimate consumers of their products even if they are not in privity with them. See, e.g., *Henningsen v. Bloomfield Motors, Inc., 32 N.J. 358, 412-16, 161 A.2d 69, 99-101 (1960)*. This insight cannot be limited to tort law. The demand for a manufacturer's product depends significantly on the retail price; the lower that price is (other things being equal), the more his product will be demanded by consumers and therefore by the dealers who are his immediate purchasers. Hence the manufacturer has a vital interest in the retail price. Maybe that interest is not great enough to allow him to place a cap on the retail price but Walters concedes that it is great enough to allow the manufacturer to advertise a retail price.

[*708] This concession is very damaging to Walters. If it is lawful to advertise a retail price, it **[**25]** should be lawful to take at least the minimum steps necessary to make that advertising beneficial. It would be pretty embarrassing for a manufacturer who had advertised a special retail price to be bombarded by complaints from consumers that dealers were refusing to sell to them at that price. Such refusals would make the advertising misleading and might even expose the manufacturer to legal sanctions under the Federal Trade Commission Act or counterpart state regulations. So if retail price advertising by manufacturers is to be feasible the manufacturer must be allowed to take reasonable measures to make sure the advertised price is not exceeded. These measures include trying to persuade dealers to adhere to the advertised price and checking around to make sure they are adhering. These are the respects in which Morton is alleged to have gone beyond the simple announcement of policy and refusal to deal with noncompliers that would be permissible even if it were trying to get its dealers to adhere to its suggested retail prices across the board. See *Monsanto Co. v. Spray-Rite Service Corp., supra, 104 S. Ct. at 1469*. They are the minimum steps that Morton had to take if its **[**26]** advertised price was to have any value at all, and they are therefore lawful. Cf. *Bruce Drug, Inc. v. Hollister, Inc., 688 F.2d 853, 859-60 (1st Cir. 1982)*.

It is true that dicta in *Butera v. Sun Oil Co., 496 F.2d 434, 437 (1st Cir. 1974)*, based on *Pearl Brewing Co. v. Anheuser-Busch, Inc., 339 F. Supp. 945 (S.D. Tex. 1972)*, suggest that for a supplier to condition a cut in the wholesale price to his dealers on their agreeing to pass it on to the consumer by lowering their prices, which is a little like what is alleged here, is a form of price fixing. But the more recent decisions hold to the contrary. See *Lewis Service Center, Inc. v. Mack Trucks, Inc., 714 F.2d 842, 846 (8th Cir. 1983)*; *AAA Liquors, Inc. v. Joseph E. Seagram & Sons, Inc., 705 F.2d 1203, 1206 (10th Cir. 1982)*. And in none of these cases did the manufacturer have the additional argument that Morton has here: Morton had to pressure its dealers to lower price in order to maintain the credibility of its price advertising -- a form, by the way, of constitutionally protected speech. See *Virginia State Bd. of Pharmacy v. Virginia Citizens Consumer Council, 425 U.S. 748, 48 L. Ed. 2d 346, 96* ***[**27]*** *S. Ct. 1817 (1976)*.

All this is not to say that simply by advertising retail prices a manufacturer gets the right to fix retail prices. If Morton had tried to fix its dealers' prices at times when it was not advertising special deals at specific prices, its efforts would not be privileged just because at other times it did advertise retail prices. Nor could Morton require its dealers to comply with minimum prices. And therefore it could not forbid them to sell at less than the advertised prices. See *Lehrman v. Gulf Oil Corp., 464 F.2d 26, 39-40 (5th Cir. 1972)*. But it did not do any of these things.

Even if what Morton did was price fixing, Walters could not challenge it. ***HN3***[] A private plaintiff can complain only of an antitrust injury. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*. It is not enough that the plaintiff would not have been injured but for the defendant's alleged violation of the antitrust laws; the injury must be the sort of thing that the antitrust laws are intended to forbid. The plaintiff in *Brunswick* was complaining that the defendant's acquisition of a rival would enable the rival to become **[**28]** a more efficient company, and therefore a more effective competitor of the plaintiff. The Supreme Court held that the plaintiff could not complain about the injury. It would have been different if the complaint was that the acquisition would lead to the rival's engaging in predatory pricing or some other method of competition with the plaintiff that the antitrust laws are intended to prevent.

There is nothing esoteric about the *Brunswick* rule. It is the application to ***antitrust law*** of venerable principles of tort **[*709]** causation illustrated by *Gorris v. Scott*, 9 L.R. Ex.-125 (1874). The plaintiff's animals, which were being transported on the deck of the defendant's ship, were washed overboard in a storm. They would have been saved if the deck had been penned, as required by statute. But since the purpose of the statute was to prevent contagion, not drowning, the defendant was not liable. Similarly, although the plaintiff in *Brunswick* would not have been hurt if there had been no acquisition, the acquisition did not hurt it in the way that the framers of the antitrust laws had in mind. In the present case, even if Morton did violate the prohibition against **[**29]** fixing its dealers' prices, the only harm to Walters came from the fact that competing dealers (or Morton itself) would lower their prices to consumers if Walters did not. There is no suggestion that the lower prices would have been below cost; they would have been lawful prices. This case thus is stronger for the defendant than *Gorris*. The loss of the animals was a pure social cost, while the loss to Walters from lawful price competition was a gain to consumers. Walters will not be heard to complain about having to meet lawful price competition, which ***antitrust law*** seeks to encourage, merely because the competition may have been enabled by an antitrust violation. See *MCI Communications Corp. v. American Tel. & Tel. Co., 708 F.2d 1081, 1161 (7th Cir. 1983)*; Page, *Antitrust Damages and Economic Efficiency: An Approach to Antitrust Injury*, 47 U. Chi. L. Rev. 467, 491 (1980).

The remaining antitrust claim that the district court dismissed is that the tie-in, resale price maintenance, and exclusive-territories allegations, taken together, make out an independent violation of *section 1* of the Sherman Act, because they establish a scheme to destroy Morton's independent **[**30]** dealers in order that Morton could take over the retail sale of its buildings, as eventually it did. Our conclusion that there was no tie-in and no resale price maintenance may seem to eliminate all possibility that there was an unlawful scheme of greater compass than the territorial exclusivity, which is not before us on this appeal. But it is possible to recast Walters' argument as follows. Even if there was no tie-in in a technical sense and no resale price maintenance in the sense in which it is a per se violation of *section 1*, still when one combines what Morton is alleged to have done (such as forbidding its dealers to obtain, from other manufacturers, any Morton Building components that Morton supplies, and squeezing the dealers by forcing them to sell buildings at the low prices that Morton advertised and to swallow part of the discount) with its alleged motive in doing so of driving the dealers out of business, an unreasonable restraint of trade can be inferred. And it meets the threshold requirement of *section 1* that there be a contract, combination, or conspiracy, since Morton managed to draw some of its (doomed) dealers into its scheme to eliminate recalcitrants such **[**31]** as Walters.

It does not add much, though, to call the scheme an "aggregation of trade restraints." The term goes back to *Timken Roller Bearing Co. v. United States, 341 U.S. 593, 598, 95 L. Ed. 1199, 71 S. Ct. 971 (1951)*, and as used there, and later in *United States v. Sealy, Inc., 388 U.S. 350, 354, 357, 18 L. Ed. 2d 1238, 87 S. Ct. 1847 (1967)*, just meant that whether a restriction was illegal per se might depend on what other restrictions the defendant had imposed. A later decision in the interminable Sealy litigation, *Ohio-Sealy Mattress Mfg. Co. v. Sealy, Inc., supra, 585 F.2d at 827-28*, used a similar approach to conclude that a number of separate provisions in the Sealy licensing agreement, each innocuous in itself, had been combined in such a way as to perpetuate the division of markets that the Supreme Court had held was a per se violation of *section 1*. All that Walters is asking us to do here is to decide whether its challenge to Morton's system of marketing raises a triable issue under the Rule of Reason.

It is helpful to recall that ***HN4***[] at common law a conspiracy was unlawful if the conspirators used unlawful means to a **[*710]** lawful end or lawful means **[**32]** to an unlawful end. *United States v. Addyston Pipe & Steel Co., 85 Fed. 271, 293 (6th Cir. 1898)*, modified and aff'd, *175 U.S. 211, 44 L. Ed. 136, 20 S. Ct. 96 (1899)*. This is a pretty encompassing definition, and if Walters cannot bring itself within either branch it is unlikely to have a cause of action under *section 1*. The means, we have seen, were not unlawful, unless the exclusive territories are unlawful; but if they are, Walters can get all the relief it seeks in the trial of the retained claim in the district court. Predatory pricing, alleged in *Coleman Motor Co. v. Chrysler Corp., 525 F.2d 1338, 1345 (3d Cir. 1975)*, on which Walter relies as a case where the goal of the alleged conspiracy was vertical integration into retail distribution, is not alleged here.

The end that Walters alleges is that Morton wanted to take over the retail function; in the terminology of industrial organization, it wanted to integrate forward. But vertical integration is not an unlawful or even a suspect category under the antitrust laws: "Firms constantly face 'make-or-buy' decisions -- that is, decisions whether to purchase a good or service in the market or to produce it internally **[**33]** -- and ordinarily the decision, whichever way it goes, raises no antitrust question." *University Life Ins. Co. of America v. Unimarc Ltd., 699 F.2d 846, 852 (7th Cir. 1983)*. Morton manufactures some of the building components that it includes in the kits that it sells. It is therefore vertically integrated, because it could buy those components on the market instead. There is nothing abnormal about this. If Morton employs its own typists it is vertically integrated, because it could farm out its typing work to independent contractors. When a corporation that has been using a law firm to handle a particular type of litigation hires a lawyer to do the litigation in-house, it is vertically integrating into litigation services. When a law firm that has been buying a billing service from a computer time-sharing firm buys its own computer to perform the service, it is vertically integrating into computer services. Vertical integration is a universal feature of economic life and it would be absurd to make it a suspect category under the antitrust laws just because it may hurt suppliers of the service that has been brought within the firm.

A common type of vertical integration is **[**34]** for a manufacturer to take over the distribution of his product. Some manufacturers use wholesalers; others, for example the U.S. automobile manufacturers, do their own wholesaling and thus are vertically integrated into wholesale distribution. Some firms, IBM for example, sell their products directly to the public, rather than through independent retail outlets, and thus are vertically integrated into retail distribution. It was not improper for Morton to want to deal directly with the consuming public rather than indirectly through dealers such as Walters. Of course if it set about to do this in an unlawful fashion it would not be immune from liability just because it had an unexceptionable end in view. But that is only because, as we have noted, a conspiracy to attain a lawful end by unlawful means is actionable.

We just said that vertical integration is not an improper objective. But this puts the matter too tepidly; vertical integration usually is procompetitive. If there are cost savings from bringing into the firm a function formerly performed outside it, the firm will be made a more effective competitor. Moreover, the option of vertical integration places competitive **[**35]** pressure on the firm's suppliers and buyers, who know that if they charge too much for their services the firm may decide to perform them itself. It thus increases competition in the markets for those services. Morton claims that the spiraling costs of building materials forced it to cast about for methods of economizing on its operations, and one method it hit on was to do its own retailing. This is a common motivation for vertical integration. True, some economists believe that monopolistic firms might integrate vertically in order to deny supplies or outlets to competitors, or to make it more costly for new firms to enter the **[*711]** market (because they would have to enter at more than one level of production or distribution), or to facilitate price fixing with their competitors. See 3 Areeda & Turner, ***Antitrust Law*** paras. 725-26 (1978). But nothing of this kind is suggested here. Walters does allege that Morton has a big name in the prefabricated farm buildings market, but there is no indication that this is a meaningful economic market that might be worth monopolizing, or that Morton's purpose in integrating into retail distribution was to make life harder for *its* **[**36]** competitors. Its object was to make more money by reducing the cost of retail distribution, not by coercing or excluding (or for that matter colluding with) its own competitors, whoever they may be, or discouraging potential competitors. Indeed Walters' tie-in claim is premised on the ready availability, from other manufacturers, of the building parts that Morton sells in kits from which Morton Buildings are put together. This shows that Morton has no monopoly.

The final substantive question is whether the district court was correct to dismiss Walters' claim that Morton breached its duty under Wisconsin law to deal fairly with a party with which it had a contractual relationship. The dismissal was on the merits; and if it were not for the fact that Walters and Morton are of diverse citizenship and that the amount in controversy between them exceeds $10,000, there would be a question whether retention of this state-law claim after all the federal claims except the challenge to Morton's use of exclusive territories were dismissed before trial was a proper exercise of pendent jurisdiction; for the relationship between the pendent claim and the only retained federal claim is somewhat **[**37]** distant.

Walters does not charge Morton with a breach of contract, in part because Walters has been unable to produce a copy of any written contract though it claims there was one. The charge sounds in tort. But we share the special master's perplexity as to what tort is being charged. In Wisconsin as in many other states it is tortious for an insurance company to refuse to pay an insured his claim if the company has no colorable basis for its refusal. See, e.g., *Kranzush v. Badger State Mutual Casualty Co., 103 Wis. 2d 56, 61-62, 307 N.W.2d 256, 259-60 (1981)*; *Anderson v. Continental Ins. Co., 85 Wis. 2d 675, 687, 271 N.W.2d 368, 374 (1978)*. But the tort requires a contractual claim so incontestable that the refusal to honor it must have been in bad faith; here, if Walters has any contractual claim at all, it is so tenuous that Walters is not asserting it. Also the tort has not been extended, in Wisconsin anyway, beyond the insurance setting, where the disparity in resources between insurer and insured has seemed to make the bad-faith breaking of contracts especially reprehensible. Indeed, even in that setting the tort has been defined narrowly, as we pointed out recently **[**38]** in *A.W. Huss Co. v. Continental Casualty Co., 735 F.2d 246, 249-54 (7th Cir. 1984)*.

Fiduciaries have a duty of fair dealing, of course; and in *Estate of Chayka, 47 Wis. 2d 102, 176 N.W.2d 561 (1970)*, this duty was extended to spouses executing a joint will -- a special relationship resembling a fiduciary one. But it is a big step from this to reading into every commercial relationship a duty of fair dealing not cabined by contractual provisions, express or implied. Statutes in many states, including Wisconsin, give dealers and franchisees special protections against termination. See *Wis. Stat. § 135.03*. But Walters does not rely on any statute; it relies on a common law tort concept that is not yet the law in Wisconsin. ***HN5***[] The common law of Wisconsin does not make the franchisor a fiduciary of his franchisees. *Murphy v. White Hen Pantry Co., 691 F.2d 350, 355 (7th Cir. 1982)*.

This completes our discussion of the matters presented in the appeal, but before ending we want to make an observation about the procedure employed by the district court in this case. ***HN6***[] Although the use of special masters to assist federal district judges in complex litigation is not only authorized **[**39]** but indispensable to the effective operation of the federal courts under **[*712]** current workload conditions, its scope is limited by *Fed. R. Civ. P. 53(b)*, as follows: "A reference to a master shall be the exception and not the rule. In actions to be tried by a jury, a reference shall be made only when the issues are complicated; in actions to be tried without a jury, save in matters of account and of difficult computation of damages, a reference shall be made only upon a showing that some exceptional condition requires it." The reference in this case was proper only if required by "some exceptional condition," since it was not made to assist a jury and did not call for an accounting or a damage calculation; and we doubt that this demanding condition was met. Cf. *Bennerson v. Joseph, 583 F.2d 633, 642 (3d Cir. 1978)*. In this more than in any other circuit we must be alert to the danger of overusing special masters, for it was overuse by one of our district judges that led the Supreme Court to issue a writ of mandamus in *La Buy v. Howes Leather Co., 352 U.S. 249, 1 L. Ed. 2d 290, 77 S. Ct. 309 (1957)*. Judge La Buy "stated he did not know when he could try the case 'if **[**40]** it is going to take this long.' He asked if the parties could agree 'to have a Master hear' it. The parties ignored this query and the next day [Judge La Buy] entered the orders of reference sua sponte. The orders declared that the court was 'confronted with an extremely congested calendar' and that 'exception [sic] conditions exist for this reason' requiring the references. The cases were referred to the master 'to take evidence and to report the same to this Court, together with his findings of fact and conclusions of law.' . . . All parties objected to the references. . . ." *Id. at 253-54* (footnote omitted).

In this case the district judge, also on his own initiative and also because he did not have time for a long trial, and hoping that the special master's report would (as it did) enable the number of issues to be reduced for trial, referred summary judgment proceedings to a special master who prepared a report that the judge then adopted without independent analysis. Since the judge did not refer the case to the special master for trial, and only one of the parties (Walters) objected, the delegation of judicial power was less extreme than in *La Buy*. But that **[**41]** does not mean it was in conformity with *Rule 53(b)*. Although the materials submitted in connection with the motion for summary judgment ran to several thousand pages, this unfortunately is not unusual in antitrust and other complex litigation; yet it would be contrary to *Rule 53(b)*, as it has been understood and interpreted against a background of concern with the cost and delay created by using masters, to refer summary judgment motions in antitrust cases routinely to masters. See 9 Wright & Miller, Federal Practice and Procedure § 2605 (1971); cf. *MCI Communications Corp. v. American Tel. & Tel. Co., supra, 708 F.2d at 1169 n.125*.

But unless the delegation of judicial power to the master in this case exceeded the bounds of Article III of the Constitution, it is not reversible error, because Walters has not asked us to reverse the district court's judgment on the ground that the reference to the master violated *Rule 53(b)*. See, e.g., *Hayes v. Foodmaker, Inc., 634 F.2d 802, 803 (5th Cir. 1981)* (per curiam); 9 Wright & Miller, *supra*, § 2606. The objection was made in the district court but has been abandoned on appeal, so we would not revive it unless we thought **[**42]** the reference was beyond the district court's subject-matter jurisdiction. The district judge delegated a reporting and recommending power rather than the power of decision; it was he, not the master, who entered judgment. True, the master's function was to evaluate a long documentary record and determine whether it presented genuine issues of material fact; the opinion he wrote was indistinguishable in form from a judicial opinion; and the district judge approved that opinion rather than write his own. Walters therefore has a valid gripe about being hustled off to an adjudicative process conducted -- and at rather too leisurely a pace -- by a private practitioner. If Walters had preserved its objection on appeal we might well reverse, **[*713]** and we would have to do so whether it had or not if we thought the procedure was so improper as to be beyond the powers granted federal judges by the Constitution, statutes, and rules -- which means, practically speaking, so egregious as to warrant reversal even though the issue was not preserved on appeal. We do not think the procedure was quite that egregious, and we naturally are reluctant to prolong the length and increase the expense **[**43]** of this proceeding (already six years old) by vacating the reference on our own initiative. But we trust that in the future the use of special masters in antitrust and other complex litigation will be conducted with greater sensitivity to the problems of excessive delegation of judicial power that such use can create and to the precise language of *Rule 53(b)*, which as we have pointed out requires in a case such as this a showing of "some exceptional condition" justifying the reference to a master.

AFFIRMED.

Concur by: SWYGERT

Concur

SWYGERT, Senior Circuit Judge, concurring in the judgment.

Walters raises four issues on appeal: (1) whether Morton's trademark was illegally tied to the sale of its building material packages; (2) whether Morton forced Walters to maintain illegally fixed retail prices on periodically advertised specials; (3) whether Walters states a claim under *section 1* of the Sherman Act for Morton's alleged predatory scheme to destroy its independent dealers; and (4) whether Morton owed Walters a duty of good faith. I agree with the majority that the district court's disposition of these four issues should be affirmed, although I will address only the first two.

[44]** In regard to the tie-in claim, the record can admit of only one conclusion: there was no tie-in because there were not two separate products, *see Fortner Enterprises, Inc. v. United States Steel Corp., 394 U.S. 495, 507, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1969)*. Under any of the analyses adopted by the courts, the Morton trademark did not constitute a product separate from the Morton building material package. *See, e.g., Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 1562-63, 80 L. Ed. 2d 2 (1984)* (separate products exist where there are separate markets for each product); *Principe v. McDonald's Corp., 631 F.2d 303, 309 (4th Cir. 1980)*, *cert. denied*, *451 U.S. 970, 68 L. Ed. 2d 349, 101 S. Ct. 2047 (1981)* (franchise package constitutes single product where the "aggregation is an essential ingredient of the franchised system's formula for success"); *Siegel v. Chicken Delight, Inc., 448 F.2d 43, 48-49 (9th Cir. 1971)*, *cert. denied*, *405 U.S. 955, 31 L. Ed. 2d 232, 92 S. Ct. 1172 (1972)* (trademark used under "business format system" or "rent a name" franchise constitutes separate product from articles used in production of system **[**45]** but trademark used under a "distribution format system" is integrated with the product or products that it represents).

Walters' retail price maintenance claim is hardly worth discussion. Morton legally could advertise its products for direct sales to consumers at any price it wished. Walters admitted that he was faced with the choice of meeting the price advertised by Morton or making no sales. Thus, any actions by Morton to enforce sales at the advertised price were unnecessary and could not have caused Walters a compensable antitrust injury. *See* *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 487-89, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*.

Unfortunately, I cannot concur in much of the discussion contained in the majority opinion, not because that discussion may not state correct principles of law, but because I believe it is dicta -- dicta that might tend to influence and prejudice decisions in cases yet unborn but which may come to this court for review. It could be argued that the discussion of matters other than those actually raised by this appeal has a certain peripheral relevance, but such relevance, if it exists at all, is unnecessary for an understanding **[**46]** and treatment of this case. It is axiomatic, of course, that we **[*714]** should confine our discussion to the legal principles applicable to the case at hand. Shadows cast beyond the facts of a particular case tend to confuse the trial judges and haunt our own appellate court -- inhibiting our freedom to decide future cases according to what we perceive to be the applicable law at that time.

Opinion by: DUNIWAY

Opinion

[*1185] DUNIWAY, Circuit Judge:

This is an antitrust suit brought by newspaper home-delivery carriers against the publisher of two newspapers. The carriers complained that the newspapers violated the Sherman Act, *15 U.S.C. § 1*, and parallel state law, *Ariz. Rev. Stat. Ann. § 44-1402*, by directly signing up home subscribers and engaging in other conduct setting the **[*1186]** price that home subscribers paid to the carriers. The district court rejected the carriers' *per se* violation analysis and, after bench trial, filed detailed findings of fact, and decided for the newspapers under the "rule of **[**2]** reason." The carriers appeal, and we affirm.

I. FACTS.

Plaintiffs Gary J. Dunn, his minor son Steven Dunn, and G. Michael Dunn were carriers for the *Arizona Republic* and the *Phoenix Gazette*, daily newspapers published by defendant Phoenix Newspapers, Inc. The carriers were independent contractors, not employees of the newspapers. The newspapers did not grant the carriers monopolies or exclusive geographical sales rights. The newspapers set the prices at which they sold papers to the carriers.

The newspapers engaged in various practices that, the carriers say, tended to set the price that home-delivery subscribers would pay the carriers: (1) The newspapers published "suggested retail subscription prices" for home-delivery, as well as newsstand "face" prices, in each copy of the papers. (2) When the newspapers changed the published home-delivery subscription rates, they notified subscribers by prominent notices in the papers. (3) When the newspapers switched from carriers to motor route distributors, they directly notified subscribers of rate increases by form letter. (4) At various times, the newspapers used subscription-boosting practices such as door-to-door, telephone, **[**3]** and direct mail solicitation; newspaper advertisements quoting home delivery subscription rates; and promotional subscription discounts ("Eight-for-Four" and "Eight-for-Eight" plans). The carriers were contractually obligated to deliver the papers to such new subscribers. (Exh. 1, para. 9.) (5) The newspapers offered direct plans ("Easy Pay Plan" and "Debit Transfer Plan") under which home-delivery subscribers paid directly to the newspapers at the suggested subscription rates, and the newspapers credited the carriers' accounts on a weekly basis. The carriers were not contractually obligated to participate in these plans. (*See* Exh. 1, para. 8.) (6) The newspapers offered the carriers prepared billing invoices at the published home-delivery subscription rates.

The contractual agreements between the newspapers and carriers did not cover subscription prices, and the newspapers told both the carriers and subscribers that published subscription rates were "suggested retail prices" and that carriers were free to charge whatever prices they wanted. There was no evidence that the carriers ever tried to deviate from the suggested retail subscription price. Consequently, there was **[**4]** no evidence as to what the newspapers' actual response to a price increase by a carrier would have been.

II. STANDARDS OF REVIEW.

The parties disagree as to the appropriate standard of review. ***HN1***[] Findings of fact must be upheld unless they are clearly erroneous. *Fed. R. Civ. P. 52(a)*. ***HN2***[] Whether the newspapers' practices as found violate the Sherman Act is a question of law, not fact, and is subject to *de novo* review. *See* *United States v. General Motors Corp., 384 U.S. 127, 141 n.16, 16 L. Ed. 2d 415, 86 S. Ct. 1321 (1966)*. The carriers are wrong in saying that all issues on appeal are issues of law subject to *de novo* review. The newspapers are wrong in saying that all issues on appeal are issues of fact subject to the "unless clearly erroneous" rule.

---

* The Honorable William H. Timbers, Senior United States Circuit Judge for the Second Circuit, sitting by designation.

III. PER SE VIOLATION.

A. *Agreements between Newspapers and Subscribers*.

HN3[] Section 1 of the Sherman Act forbids "every contract, combination . . ., or conspiracy, in restraint of trade or commerce among the several States." 15 U.S.C. § 1. A manufacturer that suggests resale prices and unilaterally refuses to deal with distributors that do not comply does not violate the statute. *Monsanto Co. v. Spray-Rite* **[**5]** *Service Corp., 465 U.S. 752, 761, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*; *United States v. Colgate &* **[*1187]** *Co., 250 U.S. 300, 307, 63 L. Ed. 992, 39 S. Ct. 465 (1919)*; *Filco v. Amana Refrigeration, Inc., 709 F.2d 1257, 1261* (9 Cir., 1983); *General Cinema Corp. v. Buena Vista Distribution Co., 681 F.2d 594, 597* (9 Cir., 1982). **HN4**[] Resale price maintenance is illegal only if implemented by contract, combination, or conspiracy. *Albrecht v. Herald Co., 390 U.S. 145, 149, 19 L. Ed. 2d 998, 88 S. Ct. 869 (1968)*; *United States v. Parke, Davis & Co., 362 U.S. 29, 43-44, 4 L. Ed. 2d 505, 80 S. Ct. 503 (1960)*; *United States v. Bausch & Lomb Optical Co., 321 U.S. 707, 721-23, 88 L. Ed. 1024, 64 S. Ct. 805 (1944)*; *F.T.C. v. Beech-Nut Packing Co., 257 U.S. 441, 451-53, 66 L. Ed. 307, 42 S. Ct. 150 (1922)*; *Dr. Miles Medical Co. v. Park & Sons Co., 220 U.S. 373, 408, 55 L. Ed. 502, 31 S. Ct. 376 (1911)*.

The carriers do not contend that agreements between the newspapers and themselves, or between the newspapers and other carriers, fixed resale prices. They do argue that the direct payment plans and other agreements between the newspapers and certain subscribers **[**6]** fixed the carriers' resale prices, and that this was *per se* illegal. We reject this argument for two reasons. First, the district court found that the carriers failed to show that agreements between the newspapers and subscribers fixed the prices received by the carriers. Second, even if such agreements set subscription prices, they would not be illegal *per se*.

1. *No price-fixing agreements*.

The district court found that the direct payment plans did not fix the carriers' prices and that carriers could charge higher or lower rates under these plans. The carriers argue that they were contractually bound to honor "direct payment" and other subscription agreements. This is not what the carrier agreements say. (Exhs. 1-3, para. 8.) This is not what the district court found. (Findings & Conclusions para. 46; *cf.* para. 43.) Carriers were obligated to service *new* subscribers (Exhs. 1-3, para. 9.) Although the carriers might have blushed to explain to their customers why they charged more than the suggested subscription prices, the record does not contradict the district court's finding that the carriers could have charged prices other than the suggested retail **[**7]** subscription prices.

The carriers target the newspapers' subscription promotion plans, but the district court found that these plans, while they did fix prices, were of limited duration, were offered on a sporadic basis, and were not shown to involve the plaintiff carriers or any of their subscribers. The carriers did not show that they ever tried to charge, but were prevented from charging, higher prices under the direct payment or other subscription plans.

Therefore, the district court found that there were no express agreements to fix prices that would support application of the *per se* rules of illegality. The district court further found that there was no implied agreement or combination because the newspapers stayed within permitted bounds of unilateral suggestion and persuasion in setting subscription rates. *See* *Colgate, 250 U.S. at 305-06*; *Hanson v. Shell Oil Co., 541 F.2d 1352, 1355-57* (9 Cir., 1976); *Gray v. Shell Oil Co., 469 F.2d 742, 748* (9 Cir., 1972). The findings are not clearly erroneous.

2. *No per se violation*.

HN5[] Price-fixing brought about by contract, combination, or conspiracy is unquestionably *per se* illegal. *Arizona v. Maricopa* **[**8]** *Medical Society, 457 U.S. 332, 347, 73 L. Ed. 2d 48, 102 S. Ct. 2466 (1982)*. But a producer is free to fix and publish a retail price for his product and solicit business at that price. The carriers argue that when the newspapers sign up subscribers for home delivery at specified prices, this is a combination in restraint of trade under the Sherman Act. Clearly, without more, it is not; and it is not *per se* illegal.

The myriad cases that have held resale price maintenance schemes to be *per se* violations have typically involved significantly different fact patterns, such as (1) a **[*1188]** combination between the newspaper and a rival carrier, *e.g.*, *Albrecht v. Herald Co., 390 U.S. at 150*; or (2) a combination between the newspaper and the plaintiff carrier, *e.g.*, *Noble v. McClatchy Newspapers, 533 F.2d 1081, 1089* (9 Cir., 1975); *Blankenship v. Hearst Corp., 519 F.2d 418, 427-28* (9 Cir., 1975); *see* *Albrecht, 390 U.S. at 150 n.6*; or (3) a combination between the newspaper and a rival newspaper, *e.g.*, *Citizen Publishing Co. v. United States, 394 U.S. 131, 135, 22 L. Ed. 2d 148, 89 S. Ct. 927 (1969)*.

The carriers rely on the second paragraph of the **[**9]** Supreme Court's footnote in *Albrecht, 390 U.S. at 150 n.6*:

> Petitioner's amended complaint did allege a combination between respondent and petitioner's customers. Because of our disposition of this case it is unnecessary to pass on this claim. It was not, however, a frivolous contention. See *Federal Trade Commission v. Beech-Nut Packing Co., 257 U.S. 441 [66 L. Ed. 307, 42 S. Ct. 150]* (1922); *Girardi v. Gates Rubber Co. Sales Div., Inc., 325 F.2d 196 (C.A. 9th Cir. 1963)*; *Graham v. Triangle Publications, Inc., 233 F. Supp. 825 (D.C.E.D. Pa. 1964)*, aff'd *per curiam*, *344 F.2d 775 (C.A. 3d Cir. 1965)*.

In *Albrecht*, there was a combination between a newspaper, a subscription solicitation firm, and a replacement carrier against an independent carrier who charged more than the suggested retail price. *390 U.S. at 147, 150*. The footnote is thus dictum, as is clear from its language. The Court did not say that such a combination is a *per se* violation, but only that the claim was something better than "frivolous."

The cases cited in the *Albrecht* footnote are not helpful. *Beech-Nut* held that resale price maintenance by a food producer, **[**10]** implemented in the course of its dealings with jobbers, wholesalers, and retailers, was an unfair method of competition under § 5 of the Federal Trade Commission Act, *15 U.S.C. § 45*. *Beech-Nut* did not involve dealings between the producer and retail customers. *See* *257 U.S. at 447-48*. The only references to "customers" pertain to wholesale buyers. *See* *257 U.S. at 444, 455*.

Girardi involved an alleged conspiracy and agreement between a belt and pulley producer and its distributors, which at trial was confined to a conspiracy between the producer and a rival distributor. *325 F.2d at 198*. Neither the holding nor dictum addresses dealings between the producer and retail customers.

In *Graham*, the Third Circuit affirmed the denial of a preliminary injunction without expressing any opinion on the merits. *344 F.2d 775, 776*.

B. *Coercion by the Newspapers*.

The district court held that the carriers failed to show a "level of coercion sufficient to deprive plaintiffs of their free choice in the context of all the facts of this case." (Findings & Conclusions paras. 39, 95-99.) *See In re Coordinated Pretrial Proceedings in* *Petroleum Products Antitrust Litigation* ***[**11]*** *, 691 F.2d 1335, 1343* (9 Cir., 1982); *General Cinema, 681 F.2d at 597*; *Knutson v. Daily Review, Inc., 548 F.2d 795 at 806 (9th Cir.1976)*; *Hanson, 541 F.2d at 1357*; *Gray, 469 F.2d at 748*. The carriers say that they need not show coercion because express agreements between the newspapers and subscribers set the price received by the carriers. The argument is predicated on the finding of an agreement establishing a *per se* violation, which the district court properly rejected.

The carriers also say that they proved coercion under the standard of *Parke, Davis, 362 U.S. at 44-45*. But in *Parke, Davis* the manufacturer combined with wholesalers to induce price maintenance by retailers. Here the district court did not find that the newspapers coerced carriers who attempted to raise subscription rates. Gary Dunn testified that newspaper employee Dyer said that Dunn would be "off the route" if he raised prices. But the district court **[*1189]** rejected this testimony as "entirely self-serving." (Findings & Conclusions para. 68.) There was contrary testimony by newspaper area sales manager Carity, which the trial court chose to believe, that the newspaper routinely **[**12]** told carriers that they could set their own prices. We give due regard to the trial court's judgment of the credibility of the witness. *Fed. R. Civ. P. 52(a)*.

Our decision in *Chelson v. Oregonian Publishing Co., 715 F.2d 1368* (9 Cir., 1983), is of no help to the carriers. There, we held that a claim that a newspaper threatened to terminate carriers if they agreed to carry another publisher's advertising circulars could amount to a valid antitrust claim and reversed a summary judgment for the newspaper. No such claim is asserted here, and this case has been tried on the merits and findings have been made against the claims of the carriers.

C. *Application of the Rule of Reason Analysis*.

The carriers do not try to show that the newspapers intended their subscription practices to restrain trade or injure competition but rather that, if the practices are not illegal *per se* as resale price maintenance, they are presumptively unreasonable because they "operate directly on price." The carriers quote *United States v. Trenton Potteries Co., 273 U.S. 392, 397-98, 71 L. Ed. 700, 47 S. Ct. 377 (1927)*. But *Trenton Potteries* involved fixing prices by means of agreements **[**13]** between 23 manufacturers and distributors, which was illegal *per se*. The district court correctly found that there were no such agreements here.

HN6[] Under the rule of reason, the carriers must show either that the purpose of the newspapers' direct dealings with subscribers was to restrain trade or that it actually injured competition. *Calculators Hawaii, Inc. v. Brandt, Inc., 724 F.2d 1332, 1337-38* (9 Cir., 1983); *Sherman v. British Leyland Motors, Ltd., 601 F.2d 429, 449* (9 Cir., 1979). They have not done this. The district court properly considered under the rule of reason standard: (1) whether the newspapers had a legitimate economic interest in using subscription practices to increase their circulations, (2) whether subscribers benefitted from restrained subscription costs, and (3) whether the carriers would have provided any additional services to subscribers if they had charged higher prices.

1. *The finding that subscription solicitation practices did not affect the carriers*.

The carriers argue that this finding was clear error because, as a result of the newspapers' subscription practices, the carriers received only the published home-delivery subscription **[**14]** rates, although they wanted to charge more. But the district court found that the carriers were not adversely affected by the newspapers' practices, because the carriers never tried to charge anything other than the suggested rates. Under the rule of reason, the carriers had the burden of proving that they were affected.

2. *The finding that the carriers never attempted to increase prices*.

First, the carriers argue that there was uncontroverted testimony by Gary Dunn that the carriers had repeatedly attempted to increase their prices but had been prevented from doing so. Not so. The district court gave greater credence to contrary testimony by newspaper area sales manager Carity. (*See* Findings & Conclusions paras. 52-54.) ***HN7***[] A reviewing court must give due regard to the trial court's judgment of the credibility of the witnesses. *Fed. R. Civ. P. 52(a)*.

Second, the carriers argue that the newspapers expressly admitted in para. 33 of their Proposed Findings of Fact that the carriers had attempted to charge more than the suggested subscription rates. This misconstrues the quoted passage, which referred to Dunn's own testimony regarding his inquiry to his newspaper supervisor **[**15]** about raising prices, and did not concede that Dunn actually attempted to charge his customers **[*1190]** more than the suggested subscription price.

Third, the carriers argue that there is a legal presumption that home-delivery carriers would increase their prices if they were free to do so, citing *Knutson, 548 F.2d at 812*, as establishing this presumption. But *Knutson* involved an express agreement between carriers to adhere to current subscription rates. Under such circumstances, the carriers could not prove what they would have done in the absence of such agreements, and we recognized a rebuttable presumption that dealers would set prices at the level that maximized profits. Here no agreements required the carriers to adhere to the suggested subscription rates, and thus the *Knutson* rationale does not apply. The district court did not err in requiring that the carriers prove damages.

Without such a presumption, the carriers showed no damages. They did not try to raise prices. The newspapers did not fire any of them for trying to raise prices: Gary Dunn voluntarily quit because the route took too much time and he had problems with delinquent subscription payments; **[**16]** Michael Dunn voluntarily quit; Steven Dunn was fired by the *Arizona Republic* for unrelated reasons, but continues to deliver the *Phoenix Gazette*. None of them suffered injury apart from alleged lost profits. These lost profits were speculative because any increases in price would have caused decreases in circulation, as the carriers stipulated. The net effect on revenues depends on the price elasticity of demand, regarding which there were no findings. (The newspapers' circulation director Martz testified that an increase in subscription rates to the face price of the newspapers might cause a 20 to 25% decrease in circulation.) Thus, the carriers failed to prove damages.

IV. OTHER ERRORS OF LAW.

A. *Claim for Injunctive Relief*.

The carriers claim that under the district court's findings, Steven Dunn (who is still delivering papers) was entitled to a permanent injunction barring the newspapers from continuing to violate the antitrust laws by imposing their resale price maintenance program on their independent carriers. Because the district court properly found that there were no such violations, it did not err in denying injunctive relief.

B. *Pendant State* **[**17]** *Law Claim*.

The district court treated the federal and state antitrust claims as presenting substantially identical issues of fact and law. ***HN8***[] Arizona ***antitrust law*** expressly incorporates federal court interpretations of federal ***antitrust law***. *Ariz. Rev. Stat. Ann. § 44-1412*. Without separating the two claims, the district court entered judgment in favor of the newspapers on both. We find no error.

C. *Attorneys Fees Award*.

The carriers argue that the district court's order improperly awarded attorneys fees to the defendant newspapers. The attorneys fees are like the snakes in Ireland. The judgment does not provide for them.

Affirmed.

Gemini Supply Corp. v. Zeitlin

United States District Court for the Eastern District of New York

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Primary Line Injuries

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > Secondary & Tertiary Line Injuries

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN2[] **Robinson-Patman Act, Claims**

To prevail on a Robinson-Patman Act claim, plaintiff must demonstrate that defendant has discriminated in the prices it has charged in contemporaneous sales of commodities of like grade and quality between two or more different customers; that at least one of these sales crossed a state line; and that the price discrimination has had or may in the future have the requisite negative effect on competition. The injury to competition can occur either at the "primary line", i.e., between competing sellers, one of whom is discriminating in price, or at the "secondary line", i.e., between two firms at the buyer level, one of whom receives discriminatory prices from a seller. This case is to be judged by the injury to competition at the primary line.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Defenses > Meeting Competition Defense

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN3[] **Robinson-Patman Act, Claims**

The competitive injury requirement of the Robinson-Patman Act may be met by a showing of either injury to competition at the seller's level or the existence of the seller's predatory intent from which injury to competition may be inferred. There may not be any serious argument that competition in the sanitary supply industry is threatened by the actions of seller.

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN4[] **Antitrust & Trade Law, Robinson-Patman Act**

While the court must look for direct evidence of predatory intent, evidence of predatory pricing, from which predatory intent may be inferred, is a crucial part of plaintiff's proof.

Opinion

[*154] MEMORANDUM AND ORDER

This case is before the Court on the parties' cross-motions for preliminary injunctive relief. Plaintiff Gemini Supply Corporation ("Gemini") seeks to enjoin defendants Edmer Sanitary Supply Company, Inc. ("Edmer"), and Messrs. Bernard Zeitlin, Edward Zeitlin, Glenn Rogers and Jerome Goldberg [1] from violating the Robinson-Patman Act, *15 U.S.C. § 13 et seq. (1982)*. Third-party plaintiff Edmer seeks to enjoin third-party defendants Messrs. William Zager and George Flanagan, [2] as well as Gemini, from soliciting Edmer's customers or using or disclosing certain information which the third-party defendants acquired while employees of Edmer, and which Edmer alleges is confidential. On February 14, 1984, defendants' counsel consented to the entry of a temporary restraining order ("TRO") forbidding defendants from violating the Robinson-Patman Act, and a hearing was held to consider both motions on twelve dates **[**2]** between February 21, 1984 and April 4, 1984. For the reasons that follow, both motions for injunctive relief are denied, and the TRO is dissolved.

I

Edmer was founded in 1959 by Mr. Bernard Zeitlin. (Tr. p. 731-32). It distributes janitorial and sanitary supplies to businesses and institutions in the New York Metropolitan area. While little or no evidence was presented at the hearing concerning either the size of Edmer, the definition or size of a relevant market, or Edmer's share of that market, it is apparent from the record that the sanitary supply industry is highly competitive, has relatively low barriers to entry and that Edmer is only one of many companies competing in that market. (Tr. p. 753-58).

Messrs. Zager and Flanagan began working for Edmer as salesmen in 1976. (Defendant's **[**3]** **[*155]** exhibit P, Tr. pp. 210, 1447). Each signed, as a condition of their employment, an agreement in the nature of a restrictive covenant, which provided, *inter alia*, that they would not, for a period of three years after they left Edmer's employ, solicit orders for goods in any city or town they had visited as a salesman for Edmer or from any person who had been a customer of Edmer. They also agreed not to disclose any confidential information they received while with Edmer. (Defendant's exhibits A and Y). During the period between 1976 and October, 1983, Messrs. Zager and Flanagan became two of Edmer's leading salesmen (Tr. p. 878), and each serviced approximately 200 accounts. (Tr. pp. 236, 1456).

During the late part of the summer of 1982 Messrs. Zager and Flanagan, who were growing increasingly dissatisfied with their prospects at Edmer, began considering leaving Edmer and forming their own sanitary supply company. (Tr. p. 212). Over the next fourteen months each of the third-party defendants took certain steps,

---

[1] A sixth defendant, Mr. Jay Schwartz, was released as a party by the plaintiff on the first day of the hearing held to consider the cross-motions.

[2] Messrs. Zager and Flanagan are the founders and sole shareholders of Gemini.

allegedly on their own time, towards achieving this goal, such as forming Gemini, finding and leasing office space, and assembling a list of potential customers **[**4]** through the purchase of mailing lists from various commercial sources in New York City. (Tr. pp. 213-16). However, Messrs. Zager and Flanagan did not solicit any business on Gemini's behalf from anyone until after October 17, 1983. (Tr. pp. 214-15).

During the week of October 17, 1983, Messrs. Zager and Flanagan resigned from Edmer and began soliciting business for Gemini. Some of the businesses and institutions they solicited were accounts they had serviced while at Edmer, and some were not. There was no credible evidence presented at the hearing that either Mr. Zager or Mr. Flanagan removed written customer information from Edmer at the time of their departure. There *was* considerable evidence that the information Gemini used to solicit prospective customers was either readily available through public sources, e.g., the yellow pages or else was information which Messrs. Zager and Flanagan remembered from their work at Edmer. (Tr. pp. 218-19).

On or about October 21, 1983, Edmer sought a preliminary injunction in New York State Supreme Court, Nassau County, restraining Messrs. Flanagan and Zager and Gemini from soliciting Edmer's customers or disclosing any information about **[**5]** Edmer's business, such as the names of Edmer's customers. (Tr. p. 903). In support of their motion, Edmer submitted a list of the Edmer accounts serviced by Messrs. Zager and Flanagan to the Court. Mr. Justice Stanley Harwood appended this list to his Memorandum of November 30, 1983 denying the motion for preliminary injunctive relief. Edmer never requested that such list be sealed and it is, and has been for some time, a public record.

In late December, 1983, Messrs. Zager and Flanagan became aware that certain businesses that had been serviced by them while they were with Edmer and which were now purchasing sanitary supplies from Gemini, were being offered what Messrs. Zager and Flanagan felt were drastic price discounts by Edmer. Based on their experience with Edmer, which to their knowledge had rarely offered discounts before, Messrs. Zager and Flanagan felt that these price concessions could have only one purpose -- i.e., to drive Gemini out of business. This suit followed.

In their answer to Gemini's complaint, defendants added a counterclaim and third-party action seeking the relief Edmer had failed to get from the Supreme Court, Nassau County. Evidence on both claims for **[**6]** relief was presented at the hearing.

II

A

In order ***HN1***[] to prevail on a motion for a preliminary injunction, the moving party must first show the possibility of irreparable injury and then show "either (1) probable success on the merits *or* (2) sufficiently serious questions going to the merits to **[*156]** make them a fair ground for litigation *and* a balance of hardships tipping decidedly toward the party requesting the preliminary relief." *Caulfield v. Board of Ed., 583 F.2d 605, 610 (2d Cir. 1978)*. We will examine each motion in turn.

B

Plaintiff's motion papers allege that it will suffer irreparable injury if Edmer is allowed to continue its practice of offering selective deep discounts to their mutual customers. While the evidence adduced at the hearing showed that approximately eighty percent (80%) of Gemini's present customers have previously done business with Edmer (Tr. p. 276) only a fraction of these customers were offered discounts (Tr. p. 229) and only some of those offered discounts stopped purchasing from Gemini. Moreover, the hearing testimony revealed that there are tens of thousands of potential customers for Gemini in the New York Metropolitan area. **[**7]** Given the extent of Gemini's market which has not been subjected to allegedly illegal price discrimination by Edmer, we cannot agree that Gemini will suffer irreparable injury if an injunction is not issued. While Gemini can probably ill afford to lose any customers at this early stage in its corporate life, its financial frailty is common to any start-up business and is not the result of Edmer's alleged illegal conduct.

Gemini has also failed to demonstrate that it would probably succeed on the merits, or that there are serious questions going to the merits *and* a balance of hardships tipping towards Gemini.

HN2[] To prevail on its Robinson-Patman Act claim, Gemini must demonstrate that Edmer has discriminated in the prices it has charged in contemporaneous sales of commodities of like grade and quality between two or more different customers; that at least one of these sales crossed a state line; and that the price discrimination has had or may in the future have the requisite negative effect on competition. Hansen, *Robinson-Patman Law: A Review and Analysis*, *51 Fordham L.Rev. 1113, 1125-34 (1983)*. The injury to competition can occur either at the "primary line", i.e., between **[**8]** competing sellers, one of whom is discriminating in price, or at the "secondary line", i.e., between two firms at the buyer level, one of whom receives discriminatory prices from a seller. This case is to be judged by the injury to competition at the primary line.

The first two elements of Gemini's proof are not in serious dispute. Edmer has clearly made recent sales of like commodities at different prices. (*Compare* plaintiff's exhibit 15A *with* plaintiff's exhibit 6). It is equally clear and, in fact, defense counsel stipulated that at least one of the sales producing a price discrimination crossed a state line. (Tr. p. 559). Our inquiry, then, is into Gemini's ability to show a primary-line competitive injury.

HN3[] The competitive injury requirement of the Robinson-Patman Act may be met by a showing of either injury to competition at the seller's level or the existence of the seller's predatory intent from which injury to competition may be inferred. ABA Antitrust Section, ***Antitrust Law*** *Developments* 231 (2d Ed. 1984). There may not be any serious argument that competition in the sanitary supply industry is threatened by the actions of Edmer. The testimony of a competitor, **[**9]** Bruce Janbey, clearly indicated that there are scores of firms selling to tens of thousands of potential customers. (Tr. pp. 756-57). Edmer's actions do not indicate an attempt to gain monopoly power in a market, nor is there any evidence that such an attempt could reasonably be expected to succeed. *O. Hommel Co. v. Ferro Corp., 659 F.2d 340, 347 (3d Cir. 1981)*, *cert. denied*, *455 U.S. 1017, 72 L. Ed. 2d 134, 102 S. Ct. 1711 (1982)*.

Gemini must therefore demonstrate that Edmer's actions were predatory to prevail on its motion for a preliminary injunction. The Supreme Court in *Utah Pie Co. v. Continental Baking Co., 386 U.S. 685, 18 L. Ed. 2d 406, 87 S. Ct. 1326 (1967)*, appeared to take a broad view of what conduct may be admissible to prove predatory **[*157]** intent, which in turn may imply an injury to competition. *Id. at 702*. However, since 1975, the year of publication of Areeda and Turner, *Predatory Pricing and Related Practices Under Section 2 of the Sherman Act*, 88 Har. L.Rev. 697 (1975), courts have increasingly performed an economic analysis of price discrimination's effect on competition, focusing primarily on whether the discriminatory prices were **[**10]** set above or below the seller's cost to determine whether predatory intent has been proved. As Professors Areeda and Turner note, prices which are at or above a seller's cost are pro-competitive since they may be met by any equally efficient competitor and provide consumers with the lowest price consistent with efficient allocation of resources. *Id*. at 711. Prices below cost, on the other hand, may only be explained as "the deliberate sacrifice of present revenues for the purpose of driving rivals out of the market and then recouping the losses through higher profits earned in the absence of competition." 2 P. Areeda & D. Turner, ***Antitrust Law*** para. 711b at 151 (1978). See *Northeastern Tel. Co. v. American Tel. & Tel. Co., 651 F.2d 76, 86 (2d Cir. 1981)*, *cert. denied*, *455 U.S. 943, 71 L. Ed. 2d 654, 102 S. Ct. 1438 (1982)*. Professors Areeda and Turner argue that since the Robinson-Patman Act forbids price discriminations only "where the effect may be substantially to lessen competition", only discriminatory prices which are below cost should violate the Robinson-Patman Act, since only these prices are predatory and anti-competitive. Discriminatory prices above cost **[**11]** should, on the other hand, be *per se* lawful. Areeda & Turner, *Predatory Pricing, supra*, at 733; see 3 P. Areeda & D. Turner, ***Antitrust Law***, *supra*, para. 720c at 190.

While courts have not yet adopted this "*per se* lawful" rule for above-cost discriminatory prices, they have increasingly focused on evidence of below-cost pricing when evaluating primary-line competitive injury in Robinson-Patman Act cases. Hansen, *Robinson-Patman Law: A Review and Analysis*, *51 Fordham L.Rev. 1114, 1139-40 (1983)*. I ABA Antitrust Sec., *The Robinson-Patman Act: Policy and Law* (ABA Monograph No. 4) 81-90 (1980). See *William Inglis & Sons Baking Co. v. ITT Continental Baking Co., Inc., 668 F.2d 1014 (9th Cir. 1981)*, cert. denied, *459 U.S. 825, 103 S. Ct. 58, 74 L. Ed. 2d 61, 103 S. Ct. 57 (1982)*; *O. Hommel Co. v. Ferro Corp., 659 F.2d 340 (3d Cir. 1981)*, *cert. denied*, *455 U.S. 1017, 72 L. Ed. 2d 134, 102 S. Ct. 1711 (1982)*; *Janich Bros. v. American*

Distilling Co., 570 F.2d 848 (9th Cir. 1977), *cert. denied*, *439 U.S. 829, 58 L. Ed. 2d 122, 99 S. Ct. 103 (1978)*; Pacific Eng'r Prod. Co. v. Kerr-McGee Corp., 551 F.2d 790 (10th Cir.), *cert. denied*, *434 U.S.* ***[**12]*** *879, 98 S. Ct. 234, 54 L. Ed. 2d 160 (1977)*; International Air Indus., Inc. v. American Excelsior Co., 517 F.2d 714 (5th Cir. 1975), *cert. denied*, *424 U.S. 943, 47 L. Ed. 2d 349, 96 S. Ct. 1411 (1976)*. **HN4**[] Thus while we must look for direct evidence of predatory intent, Double H Plastics, Inc. v. Sonoco Products Co., 732 F.2d 351 (3d Cir. 1984), evidence of predatory pricing, from which predatory intent may be inferred, is a crucial part of plaintiff's proof.

In this case, the direct evidence of predatory intent consists of the admitted enmity between the principals of Edmer and the principals of Gemini (Tr. pp. 220, 709, 901, 933-35). There was also some evidence that Mr. Bernard Zeitlin had made disparaging remarks to Gemini's suppliers (Tr. 1013). There was not, however, evidence of the type of predatory intent proscribed by the antitrust laws, that is, the intention to sacrifice "present revenues with the hope of obtaining monopoly profits". Double H Plastics, Inc. v. Sonoco Products Co., 732 F.2d 351, 354 (3d Cir. 1984); O. Hommel Co. v. Ferro Corp., 659 F.2d at 348; Areeda & Turner, *Predatory Pricing*, 88 Harv. L.Rev. at 698. While Edmer was obviously displeased **[**13]** by Gemini's attempt to solicit Edmer's client base, often with lower prices than Edmer had charged, there was ample evidence that Edmer accepted competition from the dozens of other sanitary supply firms in the region as a way of life. (Tr. p. 1062). There was no evidence that Edmer had a monopoly position **[*158]** in the relevant market, that it was trying to establish one, or that by forcing Gemini out of the market it could recoup the profits lost on the discounted sales by a later price increase. Rather this appeared to be a situation where Edmer realized "the realities of its own market place", i.e., that a new competitor, with special access to its customers, was now in its market which, "standing alone, cannot support an inference of predatory intent." Double H Plastics, supra, 732 F.2d 351, 355.

Nor did Gemini successfully demonstrate Edmer's below-cost pricing. However, before turning to the issue of proving predatory intent through predatory pricing, we must define what we mean by a seller's "cost". Professors Areeda and Turner argue that it is a seller's marginal cost, that is, the cost of each additional increment of production, that should be the basis for analyzing **[**14]** predatory prices: prices above marginal cost are presumptively non-predatory, prices below are presumptively predatory. *Predatory Pricing, supra*, at 732-33. Recognizing that marginal costs are difficult to compute from traditional accounting date, Professors Areeda and Turner propose an alternative measure of a firm's costs, which is the average variable cost, that is, the sum of charges such as the acquisition costs, selling expenses and other costs that fluctuate with the quantity of goods sold. Id., at 716-17. This alternate measure of a firm's cost was adopted by the Second Circuit as a standard to judge allegedly predatory prices in *Northeastern Tel. Co. v. American Tel. & Tel. Co., supra*. While *Northeastern Tel. Co*. involved a claim of predatory pricing under § 2 of the Sherman Act, 15 U.S.C. § 2 (1982), and not the Robinson-Patman Act, courts and commentators agree that the analysis is the same in both situations. See Areeda and Turner, *Predatory Pricing*, 88 Harv. L.Rev. at 727; Pacific Eng'r Prod. Co. v. Kerr-McGee Corp., 551 F.2d at 798.

Using average variable cost as our guide, then, we conclude that Gemini has not shown that Edmer's discounted **[**15]** prices were below this level, and thus has failed to show a likelihood of success on the merits on their Robinson-Patman Act claim.

With one exception, no evidence whatsoever was even submitted with regards to Edmer's acquisition costs on any of the items whose discounts are in dispute. One item, cases of Windex, was shown to have been purchased at $ 11.06 a case (Ex. R), and sold at prices ranging from $ 18.75 to $ 31.20 a case (Exs. 1c, E). [3] Moreover, if we assume that the items for which no acquisition cost evidence was introduced were originally marked up 100% over acquisition cost (Tr. p. 852) then items such as Kleen-glo concentrate cost $2.30 per gallon, and were sold at prices ranging from $3.22 to $4.60 per gallon. (Exs. 4, E); Super Wax Stripper cost $2.55 per gallon and sold at prices

[3] It is questionable whether any of the parties gave proper consideration to what comprises Edmer's "average variable cost" on any of its products in question here. When asked what Edmer's "cost" was on a case of Windex and whether Edmer made a "profit" on a sale at $16 per case and whether such sale was below "your cost," Mr. Bernard Zeitlin replied $11.05 a case and "yes" and "no" to the respective questions (Tr. pp. 1207-08). Left unspecified was a statement of what other "costs" may have been involved besides "acquisition cost."

ranging from $3.57 to $5.10 per gallon (Exs. 6, E); Premium floor finish cost $3.90 per gallon and sold at prices ranging from $5.46 to $7.80 a gallon (Exs. 4, E). Cotton mop heads cost $24.25 per dozen, and sold at prices ranging from $33.95 to $48.50 per dozen (Exs. 3, E).

[16]** Even when we add a selling commission of between 10 and 15 % to each item (Tr. p. 369), the court-estimated acquisition costs plus selling costs do not in any case exceed the prices at which these goods were offered to various members of the buying public. [4] Absent a showing that Edmer was selling sanitary supplies below its average variable costs, Gemini may not prevail on **[*159]** its motion for a preliminary injunction on a theory of predatory pricing. *Northeastern Tel. Co. v. American Tel. & Tel. Co*., 651 F.2d at 91. See also, *California Computer Products, Inc. v. IBM Corp., 613 F.2d 727, 743 (9th Cir. 1979)*.

Since we find that the evidence of personal enmity between the principals of Edmer and Gemini is not sufficient to demonstrate predatory **[**17]** intent for Robinson-Patman Act purposes, and that Gemini has failed to show any instance of Edmer's pricing below its average variable costs, we hold that Gemini has not shown a probability of success on the merits, nor sufficiently serious questions going to the merits to make them a fair ground for litigation and a balance of hardships tipping in its favor, *Caulfield v. Board of Ed., supra*, and thus its motion for a preliminary injunction is denied.

C

Edmer alleges that it will be irreparably harmed if Messrs. Zager and Flanagan, along with Gemini are not enjoined from soliciting Edmer's customers or using or disclosing certain information which Edmer considers proprietary and confidential.

As a preliminary matter, we note that Edmer asserts that we have jurisdiction over its claims under *28 U.S.C. § 1337 (1982)* and the doctrine of pendent jurisdiction. While we are not totally convinced that Edmer's counterclaim arises out of a "common nucleus of operative fact" with Gemini's claim, *United Mine Workers v. Gibbs, 383 U.S. 715, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)*, our decision below obviates any detailed discussion of this point.

Despite Edmer's arguments about irreparable **[**18]** injury, we find that it would be fully compensable in money damages if Gemini's solicitation of approximately 80 of Edmer's over 2000 customers is ultimately proved wrongful, and furthermore, that Edmer has not demonstrated that its customer list, which it appended to a Nassau County Supreme Court pleading thereby making the same a public record, is either confidential or proprietary. Thus Edmer has not satisfied the first requirement for the issuance of a preliminary injunction.

However, a more fundamental shortcoming exists in Edmer's counterclaim. As noted above, one of the first actions Edmer took when it discovered that Messrs. Zager and Flanagan had formed Gemini was to seek a preliminary injunction, seeking the same relief on the same grounds asserted here, in the New York State Supreme Court, Nassau County. That motion was denied on November 30, 1983, and that decision thereby became the law of the case in this proceeding. See J. Moore, J. Lucas & T. Currier, *1 b Moore's Federal Practice*, 155 (2d Ed. 1983). Although the doctrine of law of the case is not as rigid as the related doctrines of res judicata or collateral estoppel, see J. Moore, J. Lucas & T. Currier, *1* **[**19]** *b Moore's Federal Practice*, 118 (2d Ed. ***HN5***[] 1983), we are hesitant to upset the determination of a State court on a question of State law, absent a showing of "substantially different evidence at a subsequent trial, new controlling authority, or the prior decision was clearly erroneous and would result in injustice." *Handi Investment Co. v. Mobil Oil Co., 653 F.2d 391 (9th Cir. 1981)*.

Edmer failed to make any such showing at the hearing before this Court. On the contrary, the proof showed that (a) to the extent that Messrs. Zager and Flanagan removed information from Edmer it was via information they retained in their heads after seven (7) years of work; (b) the types of customers in question are matters of common

[4] While we have used the 100% mark-up to approximate Edmer's acquisition cost for each item, there would be nothing to prevent either Edmer or Gemini from showing a different acquisition cost, "average variable cost," etc., at a trial, if any, in this case.

knowledge in the highly competitive sanitary supply industry, and a customer list could be recreated out of public documents such as the yellow pages; (c) Edmer submitted a "confidential" customer list as part of a pleading filed in the Nassau County Supreme Court proceeding, and never sought to have that list sealed or otherwise protected from public inspection; and (d) when asked the hypothetical question about what he would do in similar circumstances, one of Edmer's **[**20]** competitors revealingly replied "nothing -- that's business" (Tr. p. 820). Edmer has also failed to **[*160]** indicate any new controlling authority which might justify our disturbing the Nassau County Supreme Court's decision.

Edmer argued at the hearing that they were represented by other counsel in the State Court proceeding and that they failed to submit certain evidence to the State Supreme Court which they submitted to the undersigned. However, "it is not enough . . . that defendants could now make a more persuasive argument. . . . The law of the case will be disregarded only when the court has 'a clear conviction of error.'" *Fogel v. Chestnutt, 668 F.2d 100 (2d Cir. 1981)*, *cert. denied*, *459 U.S. 828, 103 S. Ct. 65, 74 L. Ed. 2d 66 (1982)*, quoting *Zdanok v. Glidden, 327 F.2d 944, 953 (2d Cir. 1964)*, citing, in turn, *Johnson v. Cadillac Motor Car Co., 261 F. 878, 886 (2d Cir. 1919)*. We do not have such a conviction, and consequently Edmer's motion for a preliminary injunction must be, and the same hereby is, denied.

D

For all of the above reasons the parties' cross-motions for preliminary injunctive **[**21]** relief must be, and hereby are, denied.

SO ORDERED.

Judges: Greene

Opinion by: GREENE

Opinion

[*26] Greene, District Judge.

This is a motion to disqualify plaintiff's counsel. Several of the defendants [1] have cited various incidents in the past career of Donald A. Farmer, Esq. which they claim give rise to his disqualification from his current representation of Laker. [2] **[**4]** There is no question that Farmer, both during his government service and in private practice, **[*27]** has specialized in the areas of law involved in the instant lawsuit. **[**3]** He has also encountered or had contact with the parties to this lawsuit, both in a regulatory capacity and as a private attorney. One way to look at the issues raised by the motion would be to assume that with this kind of experience and specialization, there must be something in Farmer's career to disqualify him now. But when his relationships are examined in detail, it becomes apparent that defendants' charges do not require disqualification. [3]

I

Before discussing the specific facts, it is appropriate to relate some of the applicable policy considerations.

It is true, of course, that where there are conflicts of interest, the particular attorney or attorneys must be ordered disqualified. Conflicts of interest by attorneys give rise to many substantive evils *(e.g.,* unfair advantage in litigation, neglect of duties to the client) and they tend to diminish the bar's image in the mind of the public. But the mere claim of a conflict is not enough; there must be proof. Moreover, the Court must make its decision [4] **[**5]** in the interest of justice to all concerned, [5] and it must balance the need to ensure proper conduct on the part of lawyers appearing before it against the harm to other social interests which may ensue if disqualification is improvidently granted. [6] There are several such competing interests in this case.

---

[1] British Airways Board (British Airways), British Caledonia Airways Ltd., Deutsche Lufthansa Akt. (Lufthansa), Swissair, Swiss Transport Company (Swissair), Pan American World Airways, Inc. (Pan Am), and Trans World Airlines, Inc. (TWA).

[2] Defendants claim that consequently all other members of Beckman & Farmer, the law firm in which Farmer is a partner, must also be disqualified, as well as the law firm of Metzger, Shadyac & Schwarz, co-counsel for Laker in this case. Because of the Court's disposition of the motion to disqualify with regard to Farmer, it need not address the issue of the disqualification of other members of Farmer's firm and of co-counsel.

[3] Opposition papers have been filed by Robert E. Jordan III and others of the law firm of Steptoe & Johnson, specially retained by plaintiff's counsel for this proceeding.

[4] The decision whether to disqualify counsel grows out of the Court's responsibility to supervise the members of its bar, and it is viewed to be discretionary. *Groper v. Taff, 230 U.S. App. D.C. 358, 717 F.2d 1415 (D.C. Cir. 1983)*; *Hull v. Celanese Corp., 513 F.2d 568, 571 (2d Cir. 1975)*; *City of Cleveland v. Cleveland Electric Illuminating Co., 440 F. Supp. 193, 195-96 (N.D. Ohio 1977)*.

[5] *J.P. Foley & Co. v. Vanderbilt, 523 F.2d 1357, 1360 (2d Cir. 1975)* (Gurfein, J., concurring); see also *Woods v. Covington County Bank, 537 F.2d 804, 812 (5th Cir. 1976)*; *International Electronics v. Flanzer, 527 F.2d 1288, 1293 (2d Cir. 1975)*.

[6] See, *e.g., Woods v. Covington County Bank, supra 537 F.2d at 810*; *Williamsburg Wax Museum v. Historic Figures, Inc., 501 F. Supp. 326, 332 n.19 (D.D.C. 1980)*, *aff'd in part and vacated in part on other grounds sub nom.* *National Souvenir Center, Inc. v. Historic Figures, Inc., 234 U.S. App. D.C. 222, 728 F.2d 503 (D.C. Cir. 1984)*; *Black v. Missouri, 492 F. Supp. 848, 874 (W.D. Mo. 1980)*; *City of Cleveland v. Cleveland Electric Illuminating Co., supra, 440 F. Supp. at 195-96*.

First. A litigant has a right to freely chosen, competent counsel. [7] The protection of that right is particularly important in this case, where the attorneys sought to be disqualified have a unique and probably irreplaceable value to their client. Robert Beckman, one of the attorneys whose disqualification defendants seek (see note 2 **[**6]** *supra),* has served as Laker's counsel on all aviation matters in this country and most aviation matters worldwide for over ten years. Moreover, the subject matter of this lawsuit is quite specialized, and without Farmer and Beckman plaintiff would be dealt a significant, perhaps irreparable, setback. See also, note 80 *infra.* [8]

Second. Related to the interest in allowing plaintiff to proceed through its own counsel is the public interest in a speedy resolution of this lawsuit. See *Black v. Missouri, supra, 492 F. Supp. at 873-74*. The complaint alleges an international conspiracy among a number of foreign and domestic airlines in violation of the United States antitrust laws, and that conspiracy is claimed to have resulted **[**7]** ultimately in plaintiff's financial collapse. The case may have important consequences both for the many American consumers of the services of transatlantic carriers and for Laker's creditors. Despite the public interest in the expeditious resolution of this lawsuit, the action has already been characterized **[*28]** by extraordinary delay due to defendants' litigation tactics. See, *e.g.,* notes 78 and 79. Were the motion to disqualify to be granted, the resulting additional delay might well be crippling. In fact, defendants have requested that all work product prepared by counsel to date be withheld from substitute counsel, and that steps be taken to insulate disqualified counsel from any new counsel.

Third. The Court may appropriately consider an attorney's right freely to practice his profession. *Woods v. Covington County Bank, supra, 537 F.2d at 812*. The judicial system benefits from attorneys who have a specialized expertise, for such attorneys bring to the process both experience and a special insight into those problems which are encountered within the areas of their expertise. Yet questions concerning conflict of interest are likely to arise more frequently **[**8]** when an attorney has a specialized practice, especially in an area as narrow as that in which Farmer has practiced, since the same parties and similar issues of law will frequently be encountered in subsequent lawsuits. A court must be careful not to penalize attorneys who chose such specialties, and it therefore should not order disqualification without carefully examining whether a genuine conflict exists.

Fourth. When the motion is based upon an attorney's government service--as this motion is in primary part--a court must also be wary not to take action which will discourage other attorneys from entering government employ. As Judge Kaufman admonished in his seminal article, *The Former Government Attorney and the Canon of Professional Ethics,* 70 Harv. L. Rev. 657, 668 (1957):

> If the Government service will tend to sterilize an attorney in too large an area of law for too long a time, or will prevent him from engaging in the practice of a technical specialty which he had devoted years in acquiring, and if that sterilization will spread to the firm with which he becomes associated, the sacrifice of entering government service will be too great for most men to make.

[9]** See also, Cutler, *New Rule Goes Too Far,* 63 A.B.A.J. 725 (1977).

Fifth. Disqualification motions "have become increasingly popular 'tools of the litigation process, being used . . . . for purely strategic purposes. '" *Rice v. Baron, 456 F. Supp. 1361, 1368 (S.D.N.Y. 1978)*, quoting *Allegaert v. Perot, 565 F.2d 246, 251 (2d Cir. 1977)*. Accord *Williamsburg Wax Museum v. Historic Figures, Inc., supra, 501 F. Supp. at 331*. See also Part VI *infra.* Accordingly, courts have in recent years become more and more skeptical of motions to disqualify counsel, and they now approach them with cautious scrutiny. [9]

---

[7] *Woods v. Covington County Bank, supra, 537 F.2d at 810*; *W.T. Grant Co. v. Haines, 531 F.2d 671, 677 (2d Cir. 1976)*.

[8] Cf. *Williamsburg Wax Museum v. Historic Figures, Inc., supra, 501 F. Supp. at 332 n. 19*; *Black v. Missouri, supra, 492 F. Supp. at 873-74*.

[9] See, *e.g.,* ***Koller v. Richardson-Merrell, Inc., 237 U.S. App. D.C. 333, 737 F.2d 1038 (D.C. Cir. 1984)***; *Board of Education v. Nyquist, 590 F.2d 1241 (2d Cir. 1979)*.

In its determination of the specific issues discussed below, the Court has considered these various policies in juxtaposition to the need to disqualify counsel who has a true conflict of interest.

II

Defendant's primary **[**10]** challenge is based on Farmer's prior government service, and in this regard they rely on Canon 9 of the D.C. Code of Professional Responsibility [10] which states that "[a] lawyer should avoid even the appearance of professional impropriety," and upon the Code's Disciplinary Rule 9-101(B) (hereinafter generally referred to as the Disciplinary Rule) which implements Canon 9 and provides that:

> A lawyer shall not at any time accept private employment in connection with any matter in which he or she participated personally and substantially as a public officer or employee, which includes acting on the merits of a matter in a judicial capacity.

[*29] In support of their disqualification claim, defendants provide a laundry list of governmental proceedings in which Farmer was claimed to have been involved and which are said to be connected with this litigation. However, under the Rule, as a former attorney with the government, **[**11]** Farmer would have engaged in improper conduct only by accepting private employment (1) in the same "matter" (2) in which he "participated personally and substantially" while in government service. [11]

The question therefore is not, as defendants would have it throughout their briefs, whether there is some relationship or connection between this litigation and a subject under Farmer's jurisdiction while he was serving the government. [12] Rather, the pertinent questions are, first, whether Farmer's government activity was the same "matter" as the alleged conspiracy to destroy Laker, and second, whether he participated "personally and substantially" in that matter while serving as a public employee.

[12]** The case law illustrates this point. Most cases concerning the Rule involved *ongoing litigation* where a former government attorney who participated in the litigation in that capacity later represented one of the parties in a private capacity, [13] and the remaining cases were often *parallel case proceedings,* where a private civil action was instituted charging allegations which were virtually identical to a criminal or agency proceeding brought by the government against the same defendant. [14] As will be seen *infra,* the instant case is entirely different. [15]

[13]** Moreover, it is not enough to rummage through Farmer's past career to find incidents which may be said to have some relationship to the present suit. Among the principal evils the Rule was designed to prevent are the practice of "switching sides" (leaving government employ and representing another party in the same matter) and the use by government attorneys of their public position to develop suits which they may later bring in a private

[10] The Canon was adopted by this Court in Local Rule 4-3(IV)(b).

[11] The Rule was recently amended in *Revolving Door, 445 A.2d 615, 617 (D.C. App. 1982)* with respect to other subjects.

[12] Defendants' Reply Memorandum at 5.

[13] See, *e.g. Kessenich v. Commodity Futures Trading Comm., 221 U.S. App. D.C. 314, 684 F.2d 88 (D.C. Cir. 1982)*; *United States v. Miller, 624 F.2d 1198 (3d Cir. 1980)*; *Hull v. Celanese Corp., supra.*

[14] See, *e.g., General Motors Corp. v. City of New York, 501 F.2d 639 (2d Cir. 1974)*; *Telos, Inc. v. Hawaiian Tel. Co., 397 F. Supp. 1314 (D. Hawaii 1975)*; *Allied Realty of St. Paul, Inc. v. Exchange Nat'l Bank, 283 F. Supp. 464 (D. Minn. 1968)*, *aff'd, 408 F.2d 1099 (8th Cir. 1969)*.

[15] The regulations of the Office of Government Ethics (5 C.F.R. § 737.9(g) provide a pertinent example of conduct not leading to disqualification:

> *Example 4:* A Senior Justice Department lawyer participated in an antitrust case against Q Company, which is represented by Y law firm. Immediately after leaving the Department, she goes to work with Y law firm, and assists at a trial representing Q Company in a different antitrust case, not involving the allegations in the Government case. Such assitance would not be barred because it does not occur in connection with the same particular matter.

capacity. [16] As has aptly been noted, the fear is of "the great potential for lucrative returns in following into private practice the course already charted with government resources." General Motors Corp. v. City of New York, 501 F.2d 639, 650 (2d Cir. 1974). The Rule also aims at such abuses of a government position as the concentration on potentially profitable cases with a view towards subsequent private gain. See Allied Realty v. Exchange National Bank, 283 F. Supp. 464, 469 (D. Minn. 1968).

[14]** Unless the past government matter is essentially like the private litigation conducted in the present, these concerns are largely absent. Thus, disqualification is not mandated merely because it might be observed in retrospect that certain past **[*30]** governmental matters may have some factual connection to the allegations of a present complaint. Yet, as seen below, a simple connection, at best, is all that defendants are able to establish.

III

Defendants first rely on several facets of Farmer's career in the Antitrust Division of the Department of Justice from October 1, 1969 to September 30, 1977.

A. *1974 Grand Jury Investigation*

First. During his tenure in the Public Counsel Section of the Antitrust Division, Farmer in 1973 conducted an investigation into alleged price-fixing among the North Atlantic carriers. Defendants claim that there is a similarity between the basic claim made by Farmer in a memorandum to support the grand jury investigation and one of the allegations made by Laker in its complaint in this case. However, there is no such similarity. In fact, the two matters are entirely separate and distinct.

The Laker complaint concerns an alleged conspiracy **[**15]** among several transatlantic airlines to eliminate its Skytrain service. Laker alleges that this service posed a threat to defendants' maintenance of high prices by airline agreement through the International Air Transport Association (IATA). [17] According to Laker, this conspiracy first took the form of a series of predatory schemes to offer more attractive, high-cost services at prices below the costs of these services. When these schemes were not completely successful, the airline defendants allegedly pressured Laker's lenders (also named as defendants) to deny Laker necessary financing, and to mislead Laker into believing the financing would be provided in order to prevent it from seeking other sources of finance.

The focus of the 1973 grand jury investigation, on the other hand, was a single meeting reported in the press as having taken **[**16]** place in Geneva, Switzerland after an IATA traffic conference. The conference, and the meeting which followed, took place in December 1972, *four years before Laker's Skytrain service even came into existence.* In his memorandum seeking authority to conduct the grand jury probe, Farmer expressed his belief that the IATA members fixed North Atlantic fares outside the CAB-approved IATA rate machinery at the Geneva meeting after the IATA conference had failed to reach agreement on such fares. The memorandum does refer to the fact that "efforts to prevent further erosion of market share to charter services are clearly an important consideration behind scheduled North Atlantic air fare proposals," [18] but it indicates no concern whatever that the prices proposed at this informal Geneva meeting were predatory or designed to eliminate competition. The investigation involved simply the possibility of an agreement among the airlines to fix prices outside the approved machinery of IATA traffic conferences.

---

[16] Kessenich v. Commodity Futures Trading Comm'n, supra, 684 F.2d at 97; Woods v. Covington County Bank, supra, 537 F.2d at 814; Telos, Inc. v. Hawaiian Tel. Co., supra, 397 F. Supp. at 1316-17; see also 5 C.F.R. 737.5(b)(1) (comparable federal regulation).

[17] Since 1946, the fares for scheduled air transportation on North Atlantic airline routes have been set primarily by government-approved agreements among members of IATA.

[18] Defendants quote this language out of context in an effort to link the grand jury investigation to Laker's complaint. But that reference is incidential to the complaint's focus upon the alleged scheme to destroy Laker's Skytrain service. The complaint *does not* allege a predatory scheme to destroy charters before Skytrain came into existence.

[17]** This is not only Farmer's own view of the matter. In addition to his testimony, there are before the Court an affidavit by Elliott Seiden (the attorney who replaced Farmer in December 1974 as lead counsel for the Justice Department in the grand jury proceeding) and a letter from Seiden to Farmer, both of which explicitly state that the 1973-74 grand jury proceedings are entirely unrelated to the Laker complaint. [19]

[18]** **[*31]** The defendants, by contrast, offer nothing but speculation based upon the generally expansive and unpredictable nature of grand juries, and upon similar discovery requests made in the grand jury investigation and in the instant lawsuit. One purpose of discovery, however, is to find new avenues of discovering further information, and requests are frequently drawn in broad and general terms and encompass much material which may turn out to be entirely irrelevant. A court would not be justified in finding that matters are related, much less essentially the same, so as to disqualify counsel, on the basis of demand for discovery. [20]

Second. Defendants also claim that Farmer should be disqualified because he had access to confidential information, some of it provided during the grand jury **[**19]** proceedings. [21] According to the defendants, Pan American and TWA provided a large number of documents containing trade secret information, IATA materials, and attorney-client communications in response to grand jury subpoenas, and they cite several decisions which indicate that it was one of the concerns underlying the Disciplinary Rule that unfair advantage could accrue to a private client whose attorney had access to confidential information while in government service. [22] **[**20]** There is no authority for the proposition, however, that an attorney should be disqualified under the Rule upon the basis of the receipt of confidential information when the matter in which he participated was not substantially related to the present litigation. [23] To the contrary, disqualification on these grounds was denied in a number of cases when the matters were not identical or substantially related. [24]

Defendants have made no attempt to establish that the documents submitted in 1974 are in any way material to this lawsuit, [25] **[**21]** or even that Farmer had actual knowledge of the contents of those documents or was familiar enough with them to be able to use them to the prejudice of defendants in a lawsuit ten years later. [26]

---

[19] Seiden's testimony is particularly credible since he is still employed at the Department of Justice and has no interest in this lawsuit. Defendants' suggestion that Seiden's affidavit is not based upon personal knowledge is simply incorrect. Seiden has testified that

> based upon my familiarity with [the grand jury] proceedings, and from having read the complaint in *Laker v. Pan American, et al.,* it is my opinion that the subject of the grand jury investigation is entirely unrelated to the subject matters described in the *Laker* complaint.

Seiden affidavit at para. 5.

[20] Discovery need not be limited to documents or testimony which would be relevant as evidence, but they may include papers and testimony which may be expected to lead to such evidence. ***Fed. R. Civ. P. 26(b)(1)***.

[21] Defendants make this claim also with regard to a number of other events and proceedings.

[22] See, *e.g., Woods v. Covington County Bank, supra, 537 F.2d at 816*; *Allied Realty v. Exchange National Bank, supra, 283 F. Supp. at 467*.

[23] The cases in which the concern about access to confidential information is discussed and disqualification was granted generally involve former prosecutors representing a private client in a civil matter relating to or arising out of the criminal prosecution in which he had substantial responsibility. See *Allied Realty v. Exchange National Bank, supra; Hilo Metals Co. v. Learner Co., 258 F. Supp. 23 (D. Hawaii 1966)*.

[24] See *Flego v. Philips, Appel & Walden, Inc., 514 F. Supp. 1178 (D.N.J. 1981)*; *International Union, UAW v. National Caucus of Labor Committees, 466 F. Supp. 564 (S.D.N.Y.)*, *aff'd*, ***607 F.2d 996 (2d Cir. 1979)***.

[25] Defendants repeat over and over that confidential information was supplied to the grand jury (Reply Memorandum at 13 note 9); they do not focus on the relationship of that material to this lawsuit.

[26] Cf. *Control Data Corp. v. International Business Corp., 318 F. Supp. 145 (D. Minn. 1970)*.

Like the case law, policy considerations do not support the disqualification of a government attorney merely because during his government service he had access to information about a corporation which subsequently turned out to become an opponent in a private lawsuit. If the law were otherwise, the limiting language of the Disciplinary Rule could be bypassed altogether by the simple claim that an attorney may have viewed confidential information while employed by the government, and government lawyers would face perpetual **[*32]** disqualification in their subsequent practices. [27]

[22]** B. *Laker Skytrain Service Permits*

In December of 1974, Farmer became a Special Assistant to the Assistant Attorney General, Antitrust Division. In this capacity, he was involved in the preparation of the Department of Justice recommendation to the President in connection with his review of the Civil Aeronautics Board decision on Laker's Skytrain application in 1975, [28] and defendants advocate his disqualification for that reason. That claim is likewise without merit.

The Court finds that the Laker Skytrain permit proceedings are not the same "matter" as the instant lawsuit. [29] To be sure, the CAB grant of permission to Laker to operate the Skytrain service is a necessary factual predicate for this lawsuit since without that permission the service would not have existed. Beyond that, however, the CAB matter has absolutely nothing to do with this lawsuit: it was not a proceeding with **[**23]** either the same allegations [30] or the same legal issues as this lawsuit. [31] **[**24]** Thus, there was no switching of side and there can be no concern that Farmer could have, somehow, participated in the approval of Laker's application with a view towards bringing this antitrust suit in a private capacity. [32]

C. *The 1977 IATA Fare Proceedings*

Prior to Farmer's departure from the Department of Justice in October 1977, several carriers filed tariffs with the CAB proposing reduced fares on the London-New York route. These fares, commonly referred to as the 1977 IATA fare package, were later incorporated into an agreement among the members of IATA. The CAB heard oral argument from the interested parties on the proposal on September 7, 1977, and it issued a proposed order on September 16, essentially approving some of the fares and disapproving others. Pursuant to section 801 of the

---

[27] Disqualification would be appropriate if the moving party were able to demonstrate with some degree of persuasiveness that the material was indeed confidential and could not have been obtained by other means; that it is material to and has significance in the private litigation; and that under the circumstances the former government attorney would be able to use such information to the prejudice the moving party.

[28] The President never acted on the CAB decision. Three years later, the CAB approved Laker's Skytrain application.

[29] Moreover, Farmer has testified that he has no recollection that he was at all involved in the review of the 1977 CAB decision. This is not overcome by defendants' claim that he must have been involved because he normally participated in such reviews.

[30] Defendants attempt to link the two matters by observing that the Laker complaint alleges that "the airline defendants resisted Laker's efforts" to obtain government authority to operate its Skytrain service. Complaint para. 17 However, there is no indication that when the CAB approved Laker's application it was concerned with or investigated such resistence, or that if it did, Farmer had any awareness of it. And defendants do not suggest otherwise.

[31] Indeed, the decision to grant a permit does not involve "allegations" or "legal issues" so much as policy considerations. There is considerable doubt therefore whether a policy decision such as this may even be considered a "matter" within the terms of the Disciplinary Rule. See Part IV *infra.*

[32] Defendants complain that Farmer has insight into the reasons generally for CAB and Presidential action or inaction that is unavailable to them. This is too insubstantial a concern. If a court were disqualify counsel whenever he may have gained special insight into governmental deliberations, disqualification of former government attorneys, or indeed former law clerks of judges, would become mandatory and routine.

Federal Aviation Act, 49 U.S.C. § 1461, the Board then submitted its suspension and investigation **[**25]** order to the President for his review. [33]

Defendants claim that Farmer "appears to have been involved" in the proceedings relating to the 1977 IATA fare package. **[*33]** More specifically, they suggest it was his "normal practice" to participate in the Antitrust Division's recommendations in connection with the subsequent Presidential review of the CAB's decision, [34] and they attempt to establish his presence at two meetings held on September 14 and 23, 1977, respectively--the first between representatives of British Airways and Antitrust Division officials, the second between representatives of various agencies and officials at the White House.

[26]** However, there simply is no credible evidence that Farmer participated in any of these proceedings. In support of their assertions, defendants provide only the affidavit of William C. Clarke, one of the British Airways representatives at the September 14 meeting, who states that it is his recollection that he first met Farmer at that meeting. The affidavit also candidly concedes, however, that "none of the other participants with whom I have spoken say that they can recall whether Mr. Farmer was present"; that his own recollection of the meeting is "somewhat hazy after five years"; that he has no recollection of anything said or done by Farmer at the meeting; and that it is "possible that I could be mistaken about Mr. Farmer's participation." Clarke affidavit at para. 20. Defendants also offer speculation revolving around the fact that there is a notation on Farmer's calendar on September 23, 1977, of the meeting at 11:00 a.m.

Defendants' "evidence" does not come close to establishing Farmer's involvement in the Presidential review of the CAB order, [35] particularly since much more credible evidence suggests the precise opposite. Farmer has stated that he has no recollection **[**27]** of attending either meeting or otherwise participating in the IATA fare package proceedings on behalf of the Department of Justice during September 1977. That denial is supported by objective facts.

Farmer was planning his move to the CAB's Bureau of International Aviation (BIA) at the time, and his primary activities were assisting CAB Chairman Kahn in preparing his testimony for hearings **[**28]** related to the Bermuda 2 agreement and working on airline deregulation legislation for the Department of Justice. [36] As concerns more specifically the September 14 meeting, none of the participants who were contacted (with the equivocal exception of Clarke) recall attendance by Farmer, and, most significantly, a Department of Justice public file memorandum does not identify Farmer as being in attendance. [37] With regard to the September 23 meeting, it apparently took place at the White House. Security clearance records for the White House and the Old Executive Office Building reveal that Farmer was not admitted to either of those buildings on that day.

The Court concludes that Farmer did not participate in the 1977 IATA fare package proceedings. [38]

---

[33] In a letter written September 26, 1977 to Chairman Kahn, the President rejected the CAB's proposed order as inconsistent with the Administration's foreign economic policy. He stated that he would consider suspension of these fares in the future should the CAB obtain evidence that they were predatory.

[34] Farmer did not participate in the presentation of the Antitrust Division's position before the CAB. He was away from Washington on vacation from July 29 to August 28, during which time the Department of Justice's pleadings were filed with the CAB. Abbott B. Linsky, Jr., represented the Department at the September 7 oral argument.

[35] Even if the proof were stronger, it is doubtful that Farmer's participation in the 1977 IATA fare package proceedings and decisions could be characterized as substantial enough to meet the requirements of the Disciplinary Rule. "Participation" is defined to include "the rendering of advice," D.C. Code of Professional Responsibility, Definitions (1983) but that does not mean that whenever an individual has been involved in the rendering of advice his participation violates the Disciplinary Rule. The advice, like any participation, must have been sufficiently substantial to raise the types of concerns underlying the Rule.

[36] Farmer affidavit at para. 15; Clarke affidavit exh. 15 ("Jordan memo") at 7-8.

[37] Jordan memorandum at 9, App. D; Clarke affidavit at para. 20; Farmer affidavit at paras. 16-19.

[38] Accordingly, it need not be decided whether these proceedings constitute the same matter as this lawsuit, or whether for the purposes of the Disciplinary Rule, they may at all be considered as a "matter."

[29]** IV

Defendants next discuss the various regulatory and policy-making activities **[*34]** of the CAB during Farmer's tenure there, and they assume that, as Director of BIA, Farmer must have been directly involved. However, even if that premise is correct, [39] disqualification does not follow. It is well established that rule-making and policy-making activities do not constitute a "matter" within the meaning of the Disciplinary Rule for the purposes of disqualifying counsel from a subsequent private lawsuit, [40] and they do not become so unless the activity is narrow in scope and is confined to specified issues and identifiable parties such that it may be properly characterized as "quasi-judicial" in nature.

[30]** The District of Columbia has specifically defined "matter" to include:

> any judicial or other proceeding, application, request for a ruling or other determination, contract, claim, controversy, investigation, charge, accusation, arrest, or *other particular matter involving a specific party or parties.*

Revolving Door, supra, 445 A.2d at 618 (emphasis added). [41]

The language indicates that the Disciplinary Rule is limited to government actions focusing upon particular, distinct, and identifiable sets of facts with reasonably measurable implications and consequences involving specific parties. As one commentator has noted,

> the word 'particular ' was inserted in the definition of 'matter ' in order to emphasize that the restriction applies to a specific case or matter and not to a general area of activity. [42]

[31]** Contrasted with such distinct situations are rulemaking activities and other actions of broad application, such as supervision of a program of compliance or the formulation of general policies, standards, or objectives. The regulations implementing the Ethics in Government Act (5 C.F.R. § 737.5(c)) make this point very clearly:

> [A particular matter involving a specific party or parties] typically involves a specific proceeding affecting the legal rights of the parties or an isolatable transaction or related set of transctions between identifiable parties. Rulemaking, legislation, the formulation of general policy, standards, or objectives, or other action of general application is not such a matter.

In short, a government attorney may participate in legislative or other policy-making activity without precluding his subsequent representation of private parties affected by such rules or policies. [43]

---

[39] The issue of Farmer's personal and substantial participation in the activities cited by defendants is discussed *infra.*

[40] To be sure, the Disciplinary Rule would bar counsel from representing a private party in a regulatory or rule-making proceeding when he previously participated as a government attorney *in the same proceeding.* Such a practice of "switching sides" is the primary target of the Rule. See note 13 *supra.* Contrary to defendants' assertion, allegations that defendants engaged in predatory pricing do not constitute an attack on the rate-making proceedings held at the CAB during Farmer's tenure there such that he may be said to have "switched sides." Laker is not litigating CAB approval of defendants' fares or its policies concerning deregulation.

[41] This language is identical to the definition of matter in the comparable provision of the Ethics in Government Act, *18 U.S.C. § 207*.

[42] B. Manning, *Federal Conflict of Interest Law* 55 (1964), quoting H.R. Rep. No. 748, 87th Cong., 1st Sess. 20 (1961) (regarding the identical definition in federal ethics statute).

[43] See 5 C.F.R. § 737.5(c):

> [A] former Government employee may represent another person in connection with a particular matter involving a specific party even if rules or policies which he or she had a role in establishing are involved in the proceeding.

[32]** Defendants' objections regarding the consequences of Farmer's activities at the CAB are therefore in the main entirely beside the point. They complain about Farmer's involvement in the implementation of a new deregulatory policy of fostering international fare competition on the North Atlantic routes; his advocacy of views with respect to policies which may become issues in this lawsuit; his involvement with issues that, it is claimed, he **[*35]** should have recognized would have effects upon particular parties; and his participation in the establishment of the framework within which the defendants were granted authority to engage in price competition on the routes at issue in this lawsuit.

These are not the sorts of specific problems the Disciplinary Rule was designed to prevent. If advocating views, fostering a policy, or establishing a framework for competition were sufficient to disqualify counsel, every government attorney holding a position of authority in an executive department or an administrative agency would be disqualified from the practice of law in his field for a very long time. Farmer in particular would be precluded from participating in any litigation involving **[**33]** airline regulation, rates, or antitrust questions. [44] That is not, that cannot be, the law. The Disciplinary Rule accordingly does not include such activities unless, as indicated above, they have become narrowed to specific issues and parties.

The Court will now examine the specific CAB activities in controversy in light of these principles. [45]

[34]** A. *Scheduled Fare Proceedings*

In late 1977, the CAB issued a number of orders suspending foreign airline tariffs until such time as the European destination countries entered into *ad hoc* agreements which would permit suspension in the event the fares proved to be predatory with respect to charter services. As various countries entered into such agreements with the United States the CAB thereafter vacated its suspension orders. [46]

In the spring of 1978, several airlines filed individual tariffs with the CAB for the 1978 peak summer season. [47] Various charter tour operators filed objections to these fares, arguing that the airlines were seeking to extend low winter season fares into the peak season, that the fares would be destructive of their North Atlantic charter business, and that at the very least they should not be extended into countries that had not entered into agreements **[**35]** with the United States. [48] In response to these complaints, the CAB's Bureau of Pricing and Domestic Aviation (BPDA) prepared and sent to the Board a memorandum recommending that the complaints be summarily dismissed and the summer fares be permitted to become effective. Farmer signed the memorandum as "coordinated" with the BIA following its preparation. [49]

Further tariff revisions were filed late summer 1978 proposing fare revisions for the winter 1978/79 season. [50] With the exception of a complaint filed against TWA's tariff by a consumer group, no complaints were filed against these

---

[44] These principles also illustrate the irrelevance of Farmer's CAB activities to this lawsuit. The establishment of a framework which granted defendants the freedom to engage in price competition is not the same matter as the alleged abuse of that freedom in the form of an antitrust conspiracy to establish anti-competitive pricing in order to eliminate a particular competitor.

[45] Defendants' suggestion that the CAB activities should not be examined separately but as one single "matter"--the regulation of low fares being charged by scheduled carriers--is clearly inappropriate in light of the principle that a matter be "particular." See note 42 *supra.* As indicated below, the defendants' broad brush effort obscures rather than illuminates the issues on this motion.

[46] The CAB reversed its policy on the necessity of entering into these *ad hoc* agreements in an order issued May 2, 1978.

[47] These tariffs generally proposed upward seasonal adjustments from the new low fares from the 1977/78 winter season.

[48] Laker was not among those complaining.

[49] The CAB ultimately adopted the BDPA's recommended order. *Transatlantic passenger fares,* Nos. 31232, *etc.,* C.A.B. Order 78-5-3 (May 2, 1978).

[50] The proposals again generally involved fare increases.

tariffs. The BDPA prepared two memoranda recommending suspension of the proposed increases with respect **[**36]** to one of the normal fares but approving the others. Farmer signed the first memorandum as coordinated with BIA, indicating next to his signature **[*36]** that he did so before reviewing the matter to meet the CAB's internal deadline. The second memorandum was signed for Farmer by his deputy. [51]

During this period, the CAB also concluded a rulemaking proceeding entitled *North Atlantic Fares Investigation* to establish long-term ratemaking guidelines for evaluating fare levels and structures. That proceeding resulted in a Board determination that it was no longer desirable to establish regulatory standards by which to judge international rates in view of its new policy of relying on competition to regulate airline prices. **[**37]** *North Atlantic Fares Investigation,* No. 27918, C.A.B. Order 78-5-157 (May 25, 1978).

Defendants complain about Farmer's participation in these various activities, but the complaints are not well taken because all these proceedings clearly constituted rulemaking. [52] A review of the various memoranda and orders reveals that all the decisions rendered were based upon general policy considerations, and that none of the proceedings could in any sense be characterized as "adjudicative," or even, with one exception, "investigative." [53] These fare proceedings therefore cannot be used as a basis for disqualifying Farmer.

Finally, defendants claim that confidential **[**38]** information was provided to the CAB and thus to Farmer in connection with the *North Atlantic Fares Investigation.* However, Farmer had no access to that information, since the CAB issued an order insulating such data from all staff members except those in the Bureau of Fares and Rates. [54] Farmer was never a member of that Bureau.

B. *Data Collection, Deregulation, and International Negotiation*

First. Soon after the President's letter of September 26, 1977 to Chairman Kahn, the CAB instituted a procedure for obtaining and compiling data from American and foreign air carriers relating to the low fares offered on transatlantic scheduled routes. This information was supplied to the CAB's Bureau of Accounts and Statistics of which Farmer was not a member. An August 11, 1978 memorandum prepared by that Bureau proposed the issuance of an order to continue the collection of data, and it noted that the data "permit **[**39]** more comprehensive analyses of market trends in transatlantic discount traffic" and were necessary "to keep abreast of the impact these low fares are having on charter traffic in North Atlantic Markets."

The routine submission of data pursuant to CAB direction to assist the agency to monitor traffic and to assess the impact of its regulatory decisions is clearly not sufficiently specific to be a "matter" within the terms of the Disciplinary Rule.

As for defendants' claim that because of their proprietary nature, these statistics were submitted to the CAB in confidence, as noted above there is no authority for the proposition that counsel may be disqualified simply because he had access to confidential matters while employed by the government. See note 27 *supra.* In any event, defendants do not claim that Farmer actually examined this data, and Farmer has stated that he has no recollection of seeing it. [55]

---

[51] The CAB again adopted the BDPA's proposed orders. *Transatlantic fare increases,* No. 33276, C.A.B. Order 78-9-38 (August 23, 1978); *Transatlantic fare increases,* No. 33622, C.A.B. Order 78-10-61 (October 5, 1978).

[52] Moreover, as noted, Farmer was so little involved that he signed one BPDA memorandum before reviewing the matter, and another was signed for him by his deputy.

[53] The *North Atlantic Fares Investigation* is the obvious exception. That proceeding, however, was clearly a broad rulemaking proceeding and not a "matter" under the Disciplinary Rule.

[54] *North Atlantic Fares Investigation,* No. 27918, C.A.B. Order 77-10-100 (October 25, 1977).

[55] There is also a question as to whether the data is still confidential. Beckman was apparently able to acquire this same information through a Freedom of Information Act request. Thus, if it was related to the issues of this lawsuit, it would be discoverable in any event.

[40]** Second. During this same period, the CAB also instituted a series of proceedings **[*37]** designed to liberalize CAB rules governing charter carriers, so as to permit them to compete with the reduced fares offered by scheduled carriers. Again, as rulemaking proceedings concerned primarily with policy considerations, they were not "matters" under the Disciplinary Rule for the purpose of disqualifying counsel. Furthermore, the proceedings governing charter carriers do not appear even to be related to the instant action, which alleges an antitrust conspiracy to eliminate Laker's scheduled Skytrain services.

Third. Defendants cite a number of international discussions and negotiations in which Farmer was a participant while Director of the BIA. For example, he was a delegate to negotiations between the United States and Great Britain with respect to four annexes to a previously-negotiated agreement known as "Bermuda 2," which established a general framework for the operation of air services between the two countries. Farmer also participated in bilateral negotiations between the United States and the Federal Republic of Germany, which also resulted in an agreement providing a **[**41]** framework for determining fares and rates as well as charter rules, and he was a delegate to tripartite discussions between the United States, Canada, and the European Civil Aviation Conference. [56]

Such broad, policy-oriented activities as international discussions and negotiations clearly do not amount to "matters" under the Disciplinary Rule. To the extent that these negotiations resulted in agreements, they were plainly legislative in nature, similar to treaties or executive agreements. Although during the course of negotiations items of a more specific nature may have been discussed, [57] **[**42]** such discussions were entirely collateral to the main purpose of the negotiations. [58]

V

Defendants also move for Farmer's disqualification on the basis of his activities in private practice.

Following his employment at the CAB, Farmer joined the law firm of Galland, Kharasch, Calkins & Short. He was a member of that firm from April 1979 until August 1981, when he left to join Robert Beckman to form the firm of Beckman & Farmer. In August of 1980, Swissair asked the Galland firm to render antitrust advice with respect to Swissair's activities in certain IATA committees, and in connection with this employment Farmer was given access **[**43]** to confidential correspondence between IATA and another defendant concerning the scope of the antitrust immunity for IATA activities. [59] The Galland firm was also retained by a committee of IATA in October 1980 to render advice similar to that provided to Swissair, on essentially the same issues. On November 21, 1980, Farmer and other members of the Galland firm met with that committee to provide advice on the questions raised. Following the meeting, IATA requested that the Galland firm provide a memorandum reducing the oral advice to writing.

[*38] Defendants seek to disqualify Farmer on the basis of the attorney-client relationship he and his previous law firm had with Swissair and IATA, pursuant to Canon 4 of the D.C. Code of Professional Responsibility and on DR 4-

---

[56] The report of the chairman of the United States delegation to that conference reveals that the meetings took the form of a discussion session and an exchange of views rather than negotiations.

[57] The incidental reference to an agreement by the United States that its "aeronautical authorities shall promptly consider [an application for renewal of Laker's permit] in accordance with Article 3 of the 1977 Air Services Agreement," does not change the thrust of the negotiations or the Court's conclusion. That subject was incidental to the proceedings and not significant to the instant lawsuit.

[58] Defendants once again claim that Farmer had access to confidential information, basing that assertion upon vague statements in two affidavits to the effect that "TWA proprietary information" was given to U.S. officials during the Bermuda II and U.S.-West Germany negotiations. Affidavit of Thomas K. Taylor at para. 4; affidavit of Kenneth L. Briggs at para. 6. Mere exposure to proprietary information is a far cry from the concerns and language of the Disciplinary Rule and the case law, particularly where the evidence is entirely indeterminate.

[59] The representation culminated in a telex from the Galland firm to Swissair dated September 1980.

101(B) (hereinafter referred to as the Confidentiality Rule) which deals with a lawyer's duty to preserve the confidences and secrets of **[**44]** a client.

To enforce the duty of confidentiality in successive representations, this Circuit, like others, has adopted the "substantial relationship" test first enunciated in *T.C. Theatre Corp. v. Warner Brothers Pictures, Inc., 113 F. Supp. 265 (S.D.N.Y. 1953)*, as the standard for disqualification. *Williamsburg Wax Museum v. Historic Figures, Inc., 234 U.S. App. D.C. 222, 728 F.2d 503, 517 (D.C. Cir. 1984)*. Under this test, the former client has the burden of showing that the pending suit is substantially related to the matters in which the attorney previously represented him. *Williamsburg Wax Museum v. Historic Figures, Inc., supra, 501 F. Supp. at 328*; *T.C. Theatre Corp. v. Warner Brothers Pictures, Inc., supra, 113 F. Supp. at 268*. [60] See also, *Duncan v. Merrill Lynch, Pierce, Fenner & Smith, 646 F.2d 1020, 1028 (5th Cir. 1981)*; *Trone v. Smith, 621 F.2d 994, 998 (9th Cir. 1980)*.

[45]** The theory underlying the substantial relationship test is as follows. A court could not properly inquire into the nature and extent of the confidences actually provided to the moving party's former attorney, because such an inquiry would reveal the very confidences sought to be protected. [61] **[**46]** For that reason, the Court will instead assume that, if a substantial relationship was established, confidences were disclosed that would have a bearing on the present representation. *T.C. Theatre Corp. v. Warner Brothers, Inc., supra, 113 F. Supp. at 268*. In addition, when the subject matters of the two representations are substantially related, it is assumed that a genuine threat exists that the confidences revealed to former counsel will be used for the benefit of the present adversary despite the attorney's good faith efforts to avoid such use. [62] These standards are, of course, substantially more favorable to the defendants than would be a requirement of actual proof of the exchange of confidences.

It is a question of fact whether there is a substantial relationship between present litigation and a previous matter or cause of action. *Williamsburg Wax Museum v. Historic Figures, Inc., supra, 501 F. Supp. at 328*. The focus of the inquiry is on the precise nature of the relationship between the present and former representations. *Duncan v. Merrill Lynch, Pierce, Fenner & Smith, supra, 646 F.2d at 1029*. In light of the serious nature and consequences of such relationships, the Court has a duty to examine them with precision and care, and this Court has done just that.

To that end, the Court examined the record submitted *in camera* with regard to this matter in light of this standard, and it has considered the several affidavits submitted by both parties, the confidential correspondence involved in the Swissair representation, the instructions presented to the Galland firm in the IATA representation, and the written **[**47]** materials in both representations which comprise the advice furnished to Swissair and IATA.

It should be observed initially that the previous matters consisted not of litigation but of advice within a particular factual **[*39]** context and with regard to specific concerns. [63] Thus, the prior representations may be considered substantially related to the present litigation only if the facts occasioning the need for advice have a substantial bearing on this suit. These facts have no such bearing.

---

[60] This Court has stated that it will grant disqualification "only upon a showing that the relationship between issues in the prior and present cases is 'patently clear ' . . . . [and] when the issues involved have been 'identical ' or 'essentially the same. '" *Williamsburg Wax Museum v. Historic Figures, Inc., supra, 501 F. Supp. at 329*, quoting *Government of India v. Cook Industries, Inc., 569 F.2d 737, 739-40 (2d Cir. 1978)*; accord *City of Cleveland v. Cleveland Electric Illuminating Co., supra, 440 F. Supp. at 208-09*.

[61] *Emle Industries, Inc. v. Patentex, 478 F.2d 562, 571 (2d Cir. 1973)*; *T.C. Theatre Corp. v. Warner Brothers, Inc., supra, 113 F. Supp. at 269*.

[62] See *Duncan v. Merrill Lynch, Pierce, Fenner & Smith, 646 F.2d 1020, 1028 (5th Cir. 1981)*; *Emle Industries, Inc. v. Patentex, supra, 478 F.2d at 570-71*.

[63] This case is therefore unlike cases such as *Chugach Electric Association v. United States District Court, 370 F.2d 441 (9th Cir. 1966)*, where the attorney appearing for counsel for plaintiff in an antitrust action had been general counsel for defendant.

The event which caused first Swissair, then IATA, to seek legal advice, was the proposal of the CAB to remove antitrust immunity for IATA Traffic Conference agreements and the reactions of some of the airlines to that proposal. [64] That proposal and the reactions **[**48]** thereto are of no significance whatever to the allegations of Laker's complaint or to the issues which it raises. These events are not even alluded to in the factual portion of Laker's complaint, and there is no reason why they should have been. Nor may the events be said to be implicitly contained by, or have any impact upon, [65] the allegations of the complaint: the CAB regulatory proposal simply has no relevance to the alleged illegal conspiracy to destroy Laker. [66]

[49]** The nature of the Swissair and IATA concerns which prompted them to request advice of the Galland firm further illustrates the essential dissimilarity between the previous consultations and the present litigation. Swissair and IATA sought merely general clarification of the antitrust immunity available to IATA carriers with respect to the normal functioning of various IATA committees. Plaintiff's affidavits, the nature of the advice requested, and the advice itself all reveal that the advice was being sought to assist the clients in understanding the requirements of the antitrust laws as applied to IATA committee activities in order to fully comply with them. [67] The advice sought and given did not relate to any particular factual activities or transactions involving IATA or any of its members. In fact, the written request for advice specifically excluded all antitrust implications of the IATA Traffic Conference ratemaking activities.

[50]** The advice requested and rendered thus bears no relationship to this case, involving as it does specific allegations of conscious and deliberate illegal activity. There is not the slightest suggestion that at the time they requested advice from the Galland firm any members of IATA were even contemplating any sort of illegal activity, or that they sought legal advice which might extricate them if they acted unlawfully. The clients' concern was simply how best to conduct business in order to comply with the law. Their general request for what amounted to straight-forward, textbook advice cannot be considered to be substantially related to this lawsuit. [68]

[51]** Defendants' papers are brimming with claims of apparent similarities between this **[*40]** lawsuit and the earlier requests for advice which they claim create a substantial relationship. This inventory of similarities, however, may be reduced essentially to two points of contact.

The first is that both representations share a common area of law. This, of course, does not make two matters related. The second is that both matters involve IATA, its organization, operation, and activities. [69] But these areas of resemblances are both general and superficial; specific similarities between this lawsuit and Farmer's advice are entirely absent. [70] Absent such similarities, Farmer, or any other attorney who at any time furnished IATA with legal

---

[64] Because of the confidential nature of the materials submitted to the Court, it must necessarily speak in generalities.

[65] This is particularly true in light of the fact that the CAB never implemented its proposal.

[66] This analysis is not changed merely because it is through IATA Traffic Conferences that the IATA may agree upon rates, subject to CAB approval. It may of course be possible to imagine circumstances in which the events in question could have some factual connection to this case, but that would be true of any event of the past ten years involving the CAB, IATA, or any of the defendants. Disqualifications are not based upon such speculation. In any event, scrutiny of the documents involved in the prior representations makes clear that there are no factual connections to this lawsuit.

[67] Defendants can do no better in this respect than to claim that Farmer rendered advice "concerning the scope of . . . . the antitrust immunity of [various carriers] provided pursuant to the Federal Aviation Act." Reply Memorandum at 6.

[68] Furthermore, it is important not to lose sight of the fact that one of the purposes of the "substantial relationship" standard is to protect the former client against the use to his detriment of confidential information provided to his former attorney. The correspondence and written instructions requesting advice do not contain, and the advice rendered does not reflect, any confidences with any bearing upon this case.

[69] IATA is not named as a defendant in this lawsuit, and the complaint does not allege that IATA itself played a role in the defendants' conspiracy.

[70] Cf. *Duncan v. Merrill Lynch, Pierce, Fenner & Smith, Inc., supra, 646 F.2d at 1030-31*; *Moyroud v. Itek Corp., 528 F. Supp. 707, 708 (S.D. Fla. 1981)*; *Jackson v. J.C. Penney Co., 521 F. Supp. 1032, 1035 (N.D. Ga. 1981)*.

counsel, could never again participate in a matter involving IATA. The proscriptions of the Confidentiality Rule are not that draconian.

[52]** Moreover, the concern of the Confidentiality Rule and the case law is the protection of what the client tells his attorney, not what the attorney tells the client (except, of course, to the extent the attorney's advice incorporates client confidences). The fact that this case may involve points of law contained in the Galland firm's recitation of ***antitrust law*** to Swissair and IATA is therefore irrelevant. As defendants themselves put it, the substantial relationship standard involves the relationship between the two representations, not the relationship between the two sets of legal advice, [71] *i.e.,* the fact that similar legal advice may have been given to different clients.

The Court therefore finds as a fact, based upon its review of the pertinent documents, that there is no substantial relationship between the Galland firm matters and this lawsuit. [72]

[53]** Defendants also argue that, even if these matters are not substantially related, Farmer should still be disqualified because he was privy to confidential information concerning IATA. Farmer has sworn that he was privy to no confidential information with respect to IATA activities and that he received no confidential information relevant to this proceeding. [73] His showing is not overcome by the kind of information adduced by defendants.

Defendants have made no effort to demonstrate that confidences were disclosed to Farmer which relate to this lawsuit; instead, they are content merely to state a conclusion to that effect. If defendants are correct in their approach, a party moving for disqualification may avoid the burden imposed upon it under the case law simply by asserting, without elaboration, that confidences had been imparted under the prior attorney-client relationship. Because it is improper for a Court to inquire into the confidences actually **[**54]** provided, [74] the clients would in effect hold veto power over their former attorneys' ability ever to represent an opponent in another matter. **[*41]** That is not the law. [75]

In short, there is no reason to presume or to find on this record that Farmer engaged in unethical behavior, [76] or that his representation of plaintiff in this case would be inconsistent with his prior representation of Swissair and IATA. [77]

---

[71] Defendants' Reply at 34 n.35.

[72] None of these conclusions is altered by defendants' frequent references to discovery requests for information concerning IATA meetings and activities. As indicated above, arguments based upon the scope of discovery are not necessarily persuasive grounds upon which to establish that two matters are substantially related.

Moreover, defendants' discussions of discovery requests are broad and unspecific. On one occasion, the Court is referred to "some" 400 pages of deposition testimony, and it is apparently expected either to accept blindly defendants' characterization of that testimony or to read through one thousand pages of deposition testimony in search of the unidentified 400 pages. In any event, the Court finds that, even accepting defendants' characterizations of plaintiff's discovery, a substantial relationship has not been established.

[73] Farmer *in camera* affidavit at paras. 3, 4, 7, 10.

[74] See note 61 *supra.*

[75] It is not the courts' duty to disqualify an attorney whenever a mere possibility exists that one of the canons of professional ethics could be violated. To the contrary; the Court presumes that, as an officer of the Court, each attorney may be depended upon to meet his professional and ethical obligations.

[76] Cf. *Fred Weber, Inc. v. Shell Oil Co., 566 F.2d 602, 609 (8th Cir. 1977)*.

[77] Defendants argue that the need for Farmer's disqualification under Canon 4 is reinforced by the concern underlying Canon 9, which seeks to protect against the appearance of impropriety. The case law is clear, however, that an attorney may not be disqualified under Canon 9 unless there is a reasonable possibility that some specifically identifiable impropriety actually occurred. *Woods v. Covington County Bank, supra, 537 F.2d at 810*; see also *Board of Education v. Nyquist, supra, 590 F.2d at*

[55]** VI

It is, finally, appropriate to consider this motion in the context in which it has been filed. As noted above, courts have become increasingly aware that some motions for disqualification are motivated not by a fine sense of ethics and a well-developed desire to remove from litigation practitioners whose ethics are less acute, but, bluntly, by a desire to achieve a tactical advantage. Some of the defendants in this suit have engaged in other maneuvers to avoid or delay a decision on the merits, ranging all the way from their litigation in Great Britain, [78] to their determined resistance to legitimate discovery. [79]

[56]** In connection with this motion, defendants have evidently scoured the government files for references to Farmer's name and for activities for which he may have ever had some responsibility. On the basis of these efforts, they then provided the Court with a roll of activities which allegedly bar him, and all associated counsel, from representing plaintiff in this case. This broad, wide-ranging and scattershot effort is undoubtedly designed to persuade the Court that where there is this much smoke there must be some fire. Yet, when the various claims are analyzed in detail, it becomes clear that there is no fire--there is only smoke.

Defendants frequently mischaracterize and misrepresent the nature and essence of Farmer's activities in both government and private practice; they often rely upon sheer supposition concerning the extent of Farmer's participation in government activities; and they ignore or distort the nature of this suit--all to achieve the goal of eliminating Laker's counsel from this action. See slip op. at 4-6 *supra.* In addition, there is every reason to believe that similar efforts would be directed against any new counsel Laker might retain, should it be able **[**57]** to find attorneys with the necessary experience and expertise who are not already retained by the twelve powerful and wealthy corporations which are defendants here. [80] This case, in brief, is a textbook **[*42]** example of the kind of misuse of the disqualification standards for tactical litigation advantage of which courts have become increasingly aware and wary.

None of this should be taken to mean that if Farmer's participation in this litigation did, indeed, violate the canons of professional ethics, the **[**58]** Court would allow him to remain. But for the reasons stated, that participation presents no such violations.

The Court is both justified and required to regard defendants' arguments through a practical lens, and to assess them in light of those practicalities. Its responsibility with respect to the supervision of its bar is not limited to the disqualification of attorneys for violations of the Code of Professional Responsibility; it also includes the rejection of efforts to abuse the Code through motions to disqualify which lack substantive merit and represent means to harass the opposing party.

The motion to disqualify counsel will be denied.

1247. As the Court has found that there is no reason to believe that an impropriety has or will occur, it will not disqualify Farmer under Canon 9, whether considered in conjunction with Canon 4 or as an alternative grounds for disqualification.

[78] See *Laker Airways Ltd. v. Pan American World Airways, 559 F. Supp. 1124 (D.D.C. 1983)*, *aff'd,* *235 U.S. App. D.C. 207, 731 F.2d 909 (D.C. Cir. 1984)*.

[79] See, *e.g.,* a separate Opinion issued simultaneously herewith, which describes Lufthansa's performance with respect to discovery of whatever type and for whatever purpose, sometimes by enlisting the support of the foreign governments which own or control them, sometimes by almost childish objections *(e.g.,* the refusal to make corporation officials located in New York available for deposition in Washington on the ground that they cannot be spared at any time from their duties for the duration of the one-hour trip).

[80] In their supplementary papers defendants reveal that they are actively investigating ("through Freedom of Information Act requests and other means") the prior government activities of a recent member of the firm of Beckman & Farmer who has begun working on this case. Defendants complain that they "have been unable to obtain sufficient information to present in appropriate detail their concerns about the potential ethical problems" they claim are raised by that attorney's representation of Laker.

Southern Pac. Communications Co. v. American Tel. & Tel. Co.

HN8[] **Grounds for Disqualification & Recusal, Personal Bias**

A determination that a judge is not disqualified for bias necessarily includes a determination that the right to a fair trial is not violated by the judge's presiding over the case.

Civil Procedure > ... > Inability to Proceed > Disqualification & Recusal > General Overview

Civil Procedure > Judicial Officers > Judges > General Overview

HN9[] **Inability to Proceed, Disqualification & Recusal**

The test for judicial bias may be stated in terms of whether the judge's mind is "irrevocably closed" on the issues as they arise in the context of the specific case.

Civil Procedure > ... > Inability to Proceed > Disqualification & Recusal > General Overview

Civil Procedure > Judicial Officers > Judges > General Overview

HN10[] **Inability to Proceed, Disqualification & Recusal**

A judge is not disqualified merely because he personally disagrees with the policy underlying a law that he is bound to apply in a case.

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

HN11[] **Standards of Review, Clearly Erroneous Review**

In the absence of clear evidence to the contrary, an appellate court must presume that the lower court judge adopted the findings of fact and conclusions of law after full consideration.

Civil Procedure > ... > Inability to Proceed > Disqualification & Recusal > General Overview

Civil Procedure > Judicial Officers > Judges > General Overview

HN12[] **Inability to Proceed, Disqualification & Recusal**

The lower court judge's extensive copying of the proposed findings of fact and conclusions of law prepared by counsel for one of the parties is an abandonment of the duty and the trust that has been placed in the judge.

Civil Procedure > ... > Inability to Proceed > Disqualification & Recusal > General Overview

HN13[] **Inability to Proceed, Disqualification & Recusal**

Statistical one-sidedness of a trial court's evidentiary, factual, and legal rulings cannot be used to support an inference of judicial bias.

Civil Procedure > ... > Inability to Proceed > Disqualification & Recusal > General Overview

Civil Procedure > Judicial Officers > Judges > General Overview

HN14[] **Inability to Proceed, Disqualification & Recusal**

There is a strong presumption against disqualifying a judge solely on the basis of his views about law or policy.

Civil Procedure > Appeals > Standards of Review > Clearly Erroneous Review

Civil Procedure > Judicial Officers > Judges > General Overview

HN15[] **Standards of Review, Clearly Erroneous Review**

The reviewing court is bound by the rule that findings of fact in actions tried without a jury shall not be set aside unless clearly erroneous, and due regard shall be given to the opportunity of the trial court to judge of the credibility of the witnesses. A finding is clearly erroneous when, although there is evidence to support it, the reviewing court on the entire evidence is left with the definite and firm conviction that a mistake has been committed.

Civil Procedure > ... > Standards of Review > Substantial Evidence > General Overview

HN16[] **Standards of Review, Substantial Evidence**

It is the responsibility of an appellate court to accept the ultimate factual determination of the fact-finder unless that determination either (1) is completely devoid of minimum evidentiary support displaying some hue of credibility, or (2) bears no rational relationship to the supportive evidentiary data.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

HN17[] **Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing**

Exclusionary conduct may be defined as conduct, other than competition on the merits or restraints reasonably necessary to competition on the merits, that reasonably appear capable of making a significant contribution to creating or maintaining monopoly power. The issue is whether the defendant's conduct is reasonable in light of its business needs, or whether it unreasonably excludes competition.

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN18[] **Regulated Industries, Energy & Utilities**

Repeals of the antitrust laws by implication from a regulatory statute are strongly disfavored, and have only been found in cases of plain repugnancy between the antitrust and regulatory provisions.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN19[] **Monopolies & Monopolization, Actual Monopolization**

The offense of monopolization under § 2 of the Sherman Act, 15 U.S.C.S. § 2, has two elements: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. Monopoly power is the power to control prices or exclude competition.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN20[] **Regulated Practices, Market Definition**

In cases involving unregulated industries, courts frequently approach the problem of measuring market power by defining the relevant product and geographic market and computing the defendant's market share. Monopoly power is then ordinarily inferred from a predominant share of the market. Reliance on statistical market share is a questionable approach in cases involving regulated industries, however. A predominant market share may merely be the result of regulation, and regulatory control may preclude the exercise of monopoly power. Therefore, in such cases market share should be at most a point of departure in determining whether monopoly power exists. Ultimately, a court should focus directly upon the ability of the regulated firm to control prices or exclude competition.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN21[] **Antitrust & Trade Law, Sherman Act**

Any market condition that makes entry more costly or time-consuming and thus reduces the effectiveness of potential competition as a constraint on the pricing behavior of the dominant firm should be considered a barrier to entry, regardless of who is responsible for the existence of that condition. Thus, the costs and delays of the regulatory process clearly constitute barriers to entry.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN22[] **Antitrust & Trade Law, Sherman Act**

The need for large capital outlays and lengthy construction programs in order to enter the market, and the need to overcome brand preference established by the defendant's having been first in the market or having made extensive image advertising expenditures constitute barriers to entry.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN23[] **Actual Monopolization, Anticompetitive & Predatory Practices**

To identify predatory pricing, some courts follow the Areeda-Turner test, which establishes conclusive presumptions that prices are either lawful or predatory depending solely on the relationship between those prices and certain measures of the firm's costs. Other courts follow the Ninth Circuit's test, which states that to establish predatory pricing, a plaintiff must prove that the anticipated benefits of defendant's price depended on its tendency to discipline or eliminate competition and thereby enhance the firm's long-term ability to reap the benefits of monopoly power. The United States Court of Appeals for the District of Columbia Circuit finds it unnecessary to decide which rule it should adopt for identifying predatory pricing.

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN24[] **Regulated Industries, Energy & Utilities**

Absolute equality of access to essential facilities is not mandated by the antitrust laws.

Antitrust & Trade Law > Regulated Industries > Communications

HN25[] **Regulated Industries, Communications**

Access to essential facilities is to be afforded to competitors upon such just and reasonable terms and regulations as will, in respect of use, character and cost of service, place every such company upon as nearly an equal plane as may be with respect to expenses and charges as that occupied by the proprietary companies. Essential facilities must be shared on "fair terms," and the antitrust laws do not require that an essential facility be shared if such sharing would be impractical or would inhibit the communication company's ability to serve its customers adequately.

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN26[] **Regulated Industries, Energy & Utilities**

See *47 U.S.C.S. § 201(a)*.

Antitrust & Trade Law > Regulated Industries > Energy & Utilities > General Overview

HN27[] **Regulated Industries, Energy & Utilities**

An ideal instruction for the regulatory justification defense would very briefly explain, for example, that a carrier has an obligation under the Communications Act to interconnect, but may deny interconnections if it determines that the public interest is to the contrary; and that if the carrier at the time had a reasonable basis in regulatory policy to conclude, and in good faith concluded, that denial of interconnections is required by concrete, articulable concerns for the public interest, then there is no liability under the antitrust laws.

Opinion by: EDWARDS

Opinion

[*983] EDWARDS, Circuit Judge:

This appeal arises out of a private antitrust action brought by Southern Pacific Communications Company and Transportation Microwave Corporation (collectively "SPCC") against the American Telephone and Telegraph Company and the local Bell operating telephone companies **[**2]** (collectively "AT & T"), alleging that AT & T monopolized the market for intercity business telecommunications services in the United States in violation of *section 2* of the Sherman Act. [1] **[**3]** Following a lengthy trial, the District Court entered judgment for the defendants and dismissed the case. [2] The plaintiffs appeal from this judgment.

Figuratively speaking, this case is an appellate judge's nightmare. It not only presents an enormous record and poses some extremely difficult and controversial issues of great public importance, but also is lamentably tainted with charges of judicial bias. The central issue at trial was whether AT & T had wrongfully used monopoly power to exclude competition. Yet, in his Memorandum Opinion, the District Judge strongly expressed his personal policy view that an AT & T monopoly, and not competition, is in the public interest in the telecommunications industry. Moreover, in drafting his extremely lengthy Memorandum Opinion, the trial judge simply copied -- word-for-word (including even typographical errors) -- most of AT & T's proposed findings of fact and conclusions of law. Virtually every assessment of the credibility of witnesses, finding of fact and conclusion of law is in favor of AT & T. Finally, almost as if to ensure a preferred result, **[**4]** the trial court's judgment is supported by layer upon layer of alternative **[*984]** holdings on the issues of implied antitrust immunity, monopoly power, unlawful maintenance of monopoly power, injury-in-fact and proof of damages.

We would be remiss if we did not state our dismay over certain aspects of the trial court's decisionmaking in this case. We are not so naive as to suggest that trial judges should *never* use proposed findings of counsel; indeed, such a suggestion would be absurd and would belie the reality of trial practice in the United States. Nor do we mean to suggest that trial judges may never tip their hands with regard to possible final judgments in a case. We do not even mean to suggest that trial judges must be devoid of personal views about legal issues. Rather, we mean to intimate that, because of their positions of great public responsibility, District Judges often must walk a very narrow course in the performance of their jobs on the bench. A District Judge, particularly one adjudicating a case of considerable public moment, must scrupulously avoid giving the parties or the public *any* basis for perceiving that

---

* Sitting by designation pursuant to 28 U.S.C. § 294(d)(1982).

[1] *Section 2* of the Sherman Act provides, in pertinent part, that ***HN1***[] "every person who shall monopolize . . . any part of the trade or commerce among the several States . . . shall be deemed guilty of a felony." *15 U.S.C. § 2 (1982)*. The present action was brought pursuant to § 4 of the Clayton Act, which provides in pertinent part that ***HN2***[] "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee." *15 U.S.C. § 15(a) (1982)*.

[2] ***Southern Pacific Communications Co. v. AT & T, 556 F. Supp. 825 (D.D.C. 1982)*** (as amended Jan. 10, 1983) (hereinafter cited as Mem. Op.).

he is deciding the case otherwise **[**5]** than pursuant to an application of controlling law to the facts and in the exercise of his impartial, independent, considered judgment. In our view, the trial judge has raised a serious concern that he failed to heed this precept in the present case.

Judges certainly may hold personal views on law and policy and may express those views under appropriate circumstances. But the Memorandum Opinion in this case, in which the District Judge held that the antitrust laws do not apply to the defendants' conduct and alternatively that the defendants' conduct did not violate those laws, was an inappropriate place for the Judge to advocate a personal policy view contrary to the policy underlying the antitrust laws. Moreover, it is never justifiable for a judge to abdicate to a party his duty to provide a reasoned explanation for his decision. The misplaced advocacy and extensive copying of findings and conclusions that occurred in this case at least created a danger that the parties and the public would perceive that the Judge impermissibly decided the case on the basis of his personal views rather than on the basis set forth in the Memorandum Opinion.

This is indeed precisely what has **[**6]** occurred in this case: SPCC's principal argument on appeal is that it was denied a fair trial because of the District Judge's legal and policy bias. Because of the questionable circumstances confronting us, we have considered this argument with the greatest of care. Despite our dismay over this matter, we have concluded, for the reasons set forth at length in Part II below, that SPCC has failed to prove that the District Judge allowed his personal, legal and policy views impermissibly to affect his decisionmaking.

Accordingly, ***HN3***[] we must affirm the District Court's judgment provided that the court's conclusions are based on correct legal standards and the court's findings of fact are not clearly erroneous. We specifically decline to abandon the "clearly erroneous" standard as SPCC advocates: we believe that the type of *de novo* review suggested by SPCC would be wholly inconsistent with the function of an appellate court. Nevertheless, in light of the special circumstances of this case, we have reviewed the District Court's findings against the record with particular, even painstaking, care. We emphasize, however, that this review is only for the purpose of determining whether **[**7]** the findings of the trial court must be set aside under the "clearly erroneous" standard.

We conclude that the District Court erred in holding that AT & T enjoys implied antitrust immunity with respect to the conduct at issue in this case. We also conclude that the District Court's holding that AT & T lacked monopoly power is based on an erroneous legal analysis. However, we sustain the District Court's alternative holding that AT & T did not maintain its monopoly power by engaging in predatory pricing or other exclusionary conduct. Because this holding is sufficient to affirm the District Court, we uphold the judgment in favor of AT & T without addressing the District Court's alternative holdings on the **[*985]** issues of injury-in-fact and proof of damages.

I. BACKGROUND

A. *Competition in the Intercity Private Line Market*

Prior to 1969, AT & T had a lawful monopoly in the market for interstate, intercity private line common carrier telecommunications services. [3] AT & T provided these services through its Long Lines Department acting in

---

[3] This case principally involves three types of private line services: point-to-point, FX and CCSA. The District Court described these services as follows:

> Point-to-point private line service, which plaintiffs initially sought authorization to provide, connects two customer locations with a dedicated circuit that does not require use of switching systems because the circuit is available to the customer on a continuing and exclusive basis. In contrast, foreign exchange (FX) and common control switching arrangement (CCSA) services, which are involved in certain of plaintiffs' interconnection charges, require dedicated intercity circuits, but also provide a connection into a switching system, located in a telephone company switching center.

Mem. Op. at 855 n. 11 (citations to record omitted). For a more detailed description of FX and CCSA services, see Mem. Op. at 986 nn. 191-192.

partnership with the local Bell and independent operating telephone companies. These services were provided over the same nationwide **[**8]** network that was used to provide ordinary switched telephone services. [4]

[9]** In 1959, the Federal Communications Commission ("FCC") had liberalized the licensing of privately-owned microwave systems in *Allocation of Frequencies in the Bands Above 890 Mc*, 27 F.C.C. 359 (1959), *recon. denied*, 29 F.C.C. 825 (1960). The *Above 890* decision, however, only permitted entities to build microwave systems in order to provide telecommunications services for their own use. In 1963, Microwave Communications, Inc. ("MCI") took the next step by filing an application with the FCC to build a private microwave system between Chicago and St. Louis in order to provide point-to-point private line telecommunications services to business customers on a common carrier basis. MCI represented in its application that such a specialized carrier system was necessary to make some of the benefits of the *Above 890* decision available to small businesses by providing new and innovative specialized point-to-point private line services that were not being provided by the established carriers. The FCC granted MCI's application in 1969. *Microwave Communications, In., 18 F.C.C.2d 953 (1969)*, *recon. denied*, *21 F.C.C.2d 190 (1970)*. The *MCI* decision resulted in a deluge **[**10]** of applications from new "specialized common carriers," including SPCC, for authority to construct and operate facilities for similar private line communications systems between other specific city pairs. In response, the FCC instituted a rulemaking proceeding to determine "whether as a general policy the public interest would be served by permitting the entry of new carriers in the specialized communications field." *Specialized Common Carriers, 24 F.C.C.2d 318, 327 (1970)* (Notice of Inquiry). In *Specialized Common Carriers, 29 F.C.C.2d 870 (1971)*, *aff'd sub nom.* *Washington Utilities & Transportation Commission v. FCC, 513 F.2d 1142 (9th Cir.)*, *cert. denied*, *423 U.S. 836, 96 S. Ct. 62, 46 L. Ed. 2d 54 (1975)*, the FCC declared that "a general policy in favor **[*986]** of the entry of new carriers in the specialized communications field would serve the public interest, convenience, and necessity." 29 F.C.C.2d at 920.

The *Specialized Common Carriers* decision left a number of significant questions unanswered. First, the decision did not specify what services the "specialized common carriers" were authorized to offer in the "specialized communications field," **[**11]** but noted merely that they would serve "evolving, new, diverse and specialized needs in a dynamic, rapidly growing market." 29 F.C.C.2d at 912. Second, the decision did not indicate what competitive response AT & T would be allowed to make to the entry of the specialized common carriers into the market. Rather, the Commission stated that:

> We do not find it necessary at this time and on this record to speculate concerning the manner in which the existing carriers may seek to respond to competitive conditions that may emerge in the market for new and developing specialized communications services. We do, however, stress our objective to promote and maintain an environment within which existing and any new carriers shall have an opportunity to compete fairly and fully in the sale of specialized services. Our rate-making and regulatory policies and practices will be appropriately adapted to accomplish this objective. There is no reason to deny the public the benefits that may derive from active and vigorous participation by the Bell System and Western Union in this market, so long as their participation is not a burden upon or significantly detrimental to their other services. **[**12]** Thus, it is our intention to permit the existing carriers to price their competitive services in a fashion that will realistically and reasonably reflect economic advantages, if any, that are inherent in the plant and operations of those carriers.

---

[4] These services comprise local exchange telephone service and long distance service. The District Court described these services as follows:

> Local exchange telephone service is the ordinary service used in nearly all homes and businesses. From a technical standpoint, it involves a wire connection from the telephone set to a switching system in a nearby telephone company switching center that is in turn connected by transmission trunks to switching systems in other switching centers within the exchange area.
>
> Long distance service operates in a manner similar to local exchange service but typically involves a two-step process in which the user first gains access to the local switching system through a dial tone and then requests access to the long distance toll switching system (in many cases the exact same switch) by dialing an area code plus the number of the telephone the calling party wishes to reach.

Mem. Op. at 855 nn.9-10 (citations to transcript omitted).

> Moreover, we subscribe fully to the views of our staff, endorsed by the Department of Justice, that there should not be any "protective umbrella" for the new entrants or "any artificial bolstering of operations that cannot succeed on their own merits" (*Notice*, paragraph 44).

29 F.C.C.2d at 915. [5]

[13]** Finally, the decision did not dictate the terms and conditions under which the specialized common carriers would be entitled to interconnect with the Bell system. The specialized common carriers proposed to provide intercity services primarily by microwave transmission. However, it was neither technically nor economically practical to carry a signal by microwave directly to a customer's premises. To serve customers located in urban areas, it was necessary for the specialized common carriers to interconnect their intercity microwave systems with local distribution facilities. These local distribution facilities were only obtainable from the local telephone companies, which, in nearly all locations served by SPCC, were owned and controlled by AT & T. In addressing this critical issue of interconnection, the Commission stated only that:

> We reaffirm the view expressed in the *Notice* (paragraph 67) that established carriers with exchange facilities should, upon request, permit interconnection or leased channel arrangements on reasonable **[*987]** terms and conditions to be negotiated with the new carriers, and also afford their customers the option of obtaining local distribution **[**14]** service under reasonable terms set forth in the tariff schedules of the local carrier. Moreover, as there stated, "where a carrier has monopoly control over essential facilities we will not condone any policy or practice whereby such carrier would discriminate in favor of an affiliated carrier or show favoritism among competitors."

29 F.C.C.2d at 940 (footnote omitted).

As the new specialized common carriers began to enter the market, disputes arose among these new carriers, AT & T and the FCC concerning the types of services that the new carriers were authorized to provide, the kinds of interconnections to which they were entitled, the terms and conditions upon which such interconnections would be provided, and the nature of the competitive rate response that AT & T would be permitted to make in its own private line tariffs. The subjects of these disputes form the basis of the present antitrust suit.

B. *The Parties*

The plaintiffs in this case are SPCC and Transportation Microwave Corporation. The defendants are AT & T and the 24 Bell operating companies.

SPCC was formed in January 1970 as a wholly owned subsidiary of the Southern Pacific Company to provide **[**15]** business and governmental private line communications services over its own intercity microwave network. Shortly thereafter, SPCC filed initial applications with the FCC, seeking to construct and operate specialized common carrier microwave systems between Seattle and San Diego and between Los Angeles and St. Louis. The FCC granted these applications following its decision in the *Specialized Common Carriers* inquiry, and

---

[5] AT & T made competitive price responses both to the *Above 890* decision and to the *MCI* and *Specialized Common Carriers* decisions. Four months after the *Above 890* decision, AT & T filed a new tariff, called Telpak, that offered substantial discounts for bundles of 60 channels (Telpak C) or 240 channels (Telpak D). Telpak was designed to eliminate the incentive for entities to construct private microwave systems for their own use where AT & T facilities were available. Similarly, following the *Specialized Common Carriers* decision, AT & T filed a new tariff, called Hi/Lo, that substantially reduced the rate for single-channel lines connecting high-density centers, where the specialized common carriers were likely to compete. Two years later, the FCC found Hi/Lo to be unreasonable. AT & T then filed a replacement tariff, known as the Multi-Schedule Private Line ("MPL") tariff, that similarly offered low rates on high-density routes. After each of the above tariffs was filed, the FCC suspended the tariff for the then maximum period of 90 days. After that period, each tariff went into effect and remained in effect throughout the lengthy FCC investigation of its reasonableness.

SPCC commenced commercial operations on December 26, 1973. Transportation Microwave Corporation is a 95%-owned subsidiary of the Southern Pacific group.

AT & T, through its Long Lines Department acting in partnership with the Bell and independent operating telephone companies, provides interstate and intercity telecommunications services in competition with SPCC. Each of the Bell operating companies possesses a lawful, exclusive franchise or monopoly in the geographic area in which it provides service.

C. *The Proceedings Below*

SPCC filed its complaint in this action on March 27, 1978, alleging violations of the Sherman Act and seeking, ultimately, $230.2 million in damages, trebled to $690.6 million pursuant to section 4 of the Clayton Act. SPCC's **[**16]** complaint contained a demand for trial by jury. AT & T promptly filed a motion to dismiss, arguing that the challenged conduct was subject to pervasive regulatory control and hence was immune from antitrust scrutiny. The District Court, Judge Richey presiding, rejected this argument and denied AT & T's motion to dismiss on July 2, 1979. The parties engaged in extensive discovery between 1979 and 1981. In February 1982, SPCC waived its earlier demand for a jury trial in order to try the case before Judge Richey. The case was submitted for trial on the charge that AT & T had possessed monopoly power and had misused that power during the period from 1968-1978 through conduct alleged to violate *section 2* of the Sherman Act.

Trial commenced on May 10, 1982, and lasted 33 trial days. SPCC argued at trial that AT & T had refused to accept the FCC mandate permitting competition in the intercity private line market. Plaintiffs also contended that AT & T had used its monopoly power over prices and its control of local distribution facilities unlawfully to foreclose competition. At & T conceded that it disagreed in principle with the FCC's policies because it believed that these policies **[**17]** threatened to destroy the rate structure that had been designed to foster the universal availability of telephone service. AT & T argued, however, that it opposed these policies only to the extent of speaking **[*988]** out against them. According to AT & T, it was committed to conducting its business fully in accordance with the FCC's decisions and orders and to providing competitors with access to its essential facilities on fair terms to the extent that doing so was consistent with its public responsibilities. Furthermore, AT & T argued, to the extent that the FCC permitted it to compete, it did so fully but fairly, using its superior efficiency due to economies of scale and scope to provide service at a lower cost and price than could be provided by SPCC.

SPCC completed its presentation of evidence, including the testimony of 24 witnesses and the introduction of approximately 1,400 exhibits, on June 14, 1982. On June 8, AT & T filed a motion for involuntary dismissal under *rule 41(b) of the Federal Rules of Civil Procedure*. On June 21, the District Court announced its decision to defer ruling on AT & T's motion until it had heard all of the evidence. Between June 23 and **[**18]** July 2, AT & T presented the testimony of 147 witnesses [6] and introduced over 7,900 exhibits. SPCC then presented rebuttal evidence, consisting of the testimony of nine witnesses and the introduction of 326 exhibits, and AT & T then introduced 23 exhibits in surrebuttal evidence. As the conclusion of the trial, the District Court requested proposed findings of fact and conclusions of law from both parties. SPCC submitted 375 pages of proposed findings and conclusions and AT & T submitted 486 pages of proposed findings and conclusions. Finally, on July 19, 1982, the trial court heard closing arguments.

Five months later, on December 21, 1982, the District Court issued a Memorandum Opinion and Order entering judgment for the defendants and dismissing the case with prejudice. The Memorandum Opinion, 605 typewritten pages long, is reprinted in 275 pages **[**19]** of the Federal Supplement. The opinion is overwhelmingly copied verbatim from AT & T's proposed findings of fact and conclusions of law. According to the uncontradicted computation of SPCC, the District Court adopted 730 of the 746 paragraphs of AT & T's proposed findings and conclusions; on a line-by-line basis (excluding quotations), 80.5% of the opinion is copied from AT & T's proposed findings and conclusions, 4.4% is copied from SPCC's proposed findings and conclusions (on all nonsubstantive

---

[6] Most of the testimony in this case was presented in written form. Only 47 of AT & T's witnesses actually appeared in court. *See* Mem. Op. at 851 n.7.

matters), and 15.1% is original material. *See* Appellants' Opening Brief at 20 & n. 15; *see also* VI Record Excerpts at tab 97 (copy of Memorandum Opinion with each line attributed to source). The District Court even copied dozens of typographical errors from AT & T's submission; these were corrected before publication by an order filed January 10, 1983. In certain of the original portions of the Memorandum Opinion, the District Judge strongly expressed his agreement with AT & T's view that the FCC's decisions opening the telecommunications industry to competition were inimical to the public interest.

II. THE JUDICIAL BIAS ISSUE

SPCC's central argument on this appeal is that **[**20]** it was denied a fair trial because of the District Judge's bias. SPCC alleges that the Judge was biased because he approached the trial with the firm personal beliefs that an AT & T monopoly is in the public interest and that the antitrust laws should not, and do not, apply to AT & T. [7] **[*989]**

---

[7] The District Judge expressed his beliefs most prominently in the course of the following discussion of implied antitrust immunity in the "Conclusion" section of his Memorandum Opinion:

> Under the controlling decisions of the Supreme Court, it is undisputed that matters subject to a pervasive scheme of public utility or common carrier regulation are not subject to the antitrust laws. *Pan American World Airways, Inc. v. United States, 371 U.S. 296, 300-01, 305, 309, 83 S. Ct. 476, 479, 482, 484, 9 L. Ed. 2d 325 (1963)*; *Hughes Tool Co. v. Trans World Airlines, Inc., 409 U.S. 363, 387-89, 93 S. Ct. 647, 660, 34 L. Ed. 2d 577 (1973)*; *United States v. Radio Corp. of America, 358 U.S. 334, 348-49, 79 S. Ct. 457, 465, 3 L. Ed. 2d 354 (1959)*. Based on the evidence adduced at trial, the Court finds that all of the rates and practices of defendants challenged by SPCC in this case are subject to pervasive federal and state regulatory control under a public interest standard that is quite different from and inconsistent with the application of the antitrust laws. Though this reverses the Court's earlier 1979 ruling on a Motion to Dismiss, it is clear from all of the evidence now before this Court with respect to this plaintiff, that every action complained of in this case could have or should have been handled by the appropriate regulatory bodies, which responsibility the regulators miserably mishandled or failed to handle. What the FCC actually did over the years was talk about competition (in reality contrived) in order to achieve deregulation which has and will be shown to be contrary to the best interests of millions of Americans throughout the country and by those outside the profitable big city areas with a resultant loss of service, quality, and higher costs to those least able to afford this now essential service. It is clear that defendants could not make one penny more than what the various regulators allowed them. Indeed, AT & T had a double burden -- not only could their rates not be too low, but neither could they be too high. The states have done a particularly good job in regulating the defendants in order to insure the highest quality of service at the lowest possible cost for all of their citizens. There are many instances in which AT & T would seek a rate increase from the state, only to be denied all of it or part of it. The states were also very effective in regulating the interconnection problems as well. The picture became cloudy on the interconnection matter only because the FCC attempted, and quite successfully, to obtain jurisdiction over intrastate matters. Whether this was in the public interest will remain for another day. The bottom line of "public interest" has actually been construed as what some powerful interests in this country want as distinguished from what the public can afford, namely, safe, reliable service to everyone (instead of creamskimming the big city areas where profits are maximized) at the lowest possible cost to *all* and particularly those least able to afford telecommunications service, which should be our continued standard. This Court believes that the antitrust laws were never intended to destroy an essential public utility such as we have here. It may be necessary for Congress and the Justice Department to re-examine the problems herein discussed and to bring about the return of responsible regulation so that there will be no more contrived competition in profitable areas only. This Court believes that sound and honest regulation of telecommunications at the federal and state level is our only guarantee of access to this necessity throughout the *whole* country and not just part of it. Regulation in this area of telecommunications up until the 1970's at the federal and state levels has served this country well and it is hoped that sometime in the near future it will again do its proper job without abdication to the greed of a few, no matter how big or small.
>
> It is necessary to mention the FCC again. It put the Specialized Common Carriers into business for the benefit of a few without taking into account the myriad of problems to our people and our national security. It was the FCC that never found TELEPAK (C & D) unlawful for over *20* years, as well as delayed making other very important decisions. It cannot be successfully disputed that whatever the FCC mandated throughout the relevant period of this case, that AT & T was obligated to, and did in fact, follow, no matter whether it made any sense in economics or law. It was primarily the FCC staff during this entire period, after permitting the Specialized Common Carriers entry into the market in the name of competition (really contrived), whose performance, was, to say the least, totally unprofessional and inadequate by virtue of the likes of Messrs. Cox, Hinchman, Tucker, and Scott. It was a result of their actions (or inaction) as well as a thin majority

SPCC further contends that the District Court's Memorandum Opinion -- extensively copied from AT & T's proposed findings of fact and conclusions of law, and adverse to SPCC on all significant factual and legal questions -- merely gave vent to the Judge's personal beliefs, and, consequently, failed to reflect his impartial application of the antitrust laws to the facts of the case. Thus, according to SPCC, we should vacate the opinion of the District Court and remand the case for a new trial, without consideration of the evidence. Alternatively, according to SPCC, we should abandon the "clearly erroneous" standard of review, and simply review the record to determine whether the Judge's convictions substantially influenced his judgment.

[21]** We must emphasize at the outset the narrow focus of SPCC's argument. Although a claim is made that plaintiffs were denied a fair trial, SPCC does not allege **[*990]** that the District Judge in any way interfered with plaintiffs' efforts to present their case. To the contrary, SPCC concedes that the Judge never foreclosed it from engaging in discovery, introducing documentary or testimonial evidence, engaging in cross-examination, presenting legal arguments, or citing applicable legal precedents. Thus, as SPCC also concedes, it was able to create a full, complete record for us to review. Furthermore, although SPCC asserts a charge of bias, there is no claim that the District Judge was biased in the sense of having adjudged the facts in advance of hearing the case. *Cf.* *Cinderella Career & Finishing Schools, Inc. v. FTC, 138 U.S. App. D.C. 152, 425 F.2d 583, 591 (D.C. Cir. 1970)*. Rather, SPCC asserts that the District Judge was biased only in the sense that he held firm views concerning law and policy and decided the case on the basis of these views, thus depriving SPCC of an impartial judgment. [8]

[22]** A. *Views on Law or Policy*

It is well established that ***HN4***[] the mere fact that a judge holds views on law or policy relevant to the decision of a case does not disqualify him from hearing the case. [9] **[**24]** *See, e.g.,* *Association of National Advertisers, Inc. v.*

> of the Commissioners in the 60's and 70's that has subjected AT & T to many lawsuits in the antitrust field now pending today. Had the FCC not engaged in its usual regulatory lag and dealt forthrightly and properly with the problems as they arose, then few, if any, of the cases would now be before the antitrust Courts, such as this one.

Mem. Op. at 1095-97 (emphasis in original) (footnotes omitted).

[8] SPCC alleged at oral argument that the District Judge also was biased in the sense that he harbored a personal animus against SPCC as a party. *See* Transcript of Oral Argument at 7-8. This allegation is based solely on statements the District Judge made to the effect that the specialized common carriers *as a class* were interested only in "creamskimming the big city areas where profits are maximized" and not in providing "safe, reliable service to everyone . . . at the lowest possible cost to *all* and particularly those least able to afford telecommunications service." Mem. Op. at 1096 (emphasis in original); *see* Transcript of Oral Argument at 8. We do not at all find that these and similar statements manifest a personal animus against SPCC, but only that they reflect the District Judge's policy views. Our review of the trial record provides no support for SPCC's allegation of *personal animus*. Indeed, at the conclusion of the trial, lead counsel for SPCC thanked the District Judge for the "great deal of goodwill toward the parties" that he had shown "throughout this case." Trial Transcript at 6048. We also find it significant that, after several years of pre-trial proceedings, SPCC waived its right to trial by jury to have the case tried before the District Judge, and that SPCC never sought to have the District Judge disqualified for personal bias.

[9] The issue in the present case is whether the appellants were denied a fair trial because of the District Judge's alleged bias, and not whether the District Judge should have disqualified himself for bias. ***HN5***[] Judicial disqualification in the federal courts is governed by two sections of the Judicial Code, *28 U.S.C. §§ 144*, *455 (1982)*. *Section 144* provides in pertinent part:

> ***HN6***[] Whenever a party to any proceeding in a district court makes and files a timely and sufficient affidavit that the judge before whom the matter is pending has a personal bias or prejudice either against him or in favor of any adverse party, such judge shall proceed no further therein, but another judge shall be assigned to hear such proceeding.

28 U.S.C. § 144 (1982). *Section 455* provides in pertinent part that ***HN7***[] "any justice, judge, or magistrate of the United States shall disqualify himself in any proceeding in which his impartiality might reasonably be questioned," *id.* *§ 455(a)*, and "also" shall disqualify himself "where he has a personal bias or prejudice concerning a party," *id.* *§ 455(b)(1)*. These sections establish a more stringent standard for disqualification than is required by the right to a fair trial guaranteed by the due process clause. *See* *United States v. Haldeman, 181 U.S. App. D.C. 254, 559 F.2d 31, 130 n.276 (D.C. Cir. 1976)* (en banc) (per curiam), *cert. denied*, ***431 U.S. 933, 97 S. Ct. 2641, 53 L. Ed. 2d 1113 (1980)*; *id. at 1177* (Leventhal, J., concurring) ("even judges are not disqualified merely because they have previously announced their positions on legal issues"); United States v. Haldeman, 181 U.S. App. D.C. 254, 559 F.2d 31, 136 n. 332 (D.C. **[*991]** Cir. 1976) (en banc) (per curiam) ("although fixed, an opinion on the law is not disqualifying"), *cert. denied*, *431 U.S. 933, 97 S. Ct. 2641, 53 L. Ed. 2d 250 (1977)*. Indeed, we can barely conceive of a judge coming to a case without holding at least certain preconceptions that may affect his approach to the case. "The human mind, even at infancy, is no blank piece of paper. We are born with predispositions; **[**23]** and the process of education, formal and informal, creates attitudes in all men which affect them in judging situations, attitudes which precede reasoning in particular instances and which, therefore, by definition, are prejudices." In re J. P. Linahan, Inc., 138 F.2d 650, 651 (2d Cir. 1943). If a judge approached every case completely free of preconceived views concerning the relevant law and policy, we would be inclined not to applaud his impartiality, but to question his qualification to serve as a judge. [10]

Although it is both understood and accepted that judges do not approach a case empty-headed, it is also presumed that a judge will not prejudge any case. In each new case the judge confronts a new factual context, new evidence, and new efforts at persuasion. As long as the judge is capable of refining his views in the process of this intellectual confrontation, and maintaining a completely open mind to decide the facts and apply the applicable law **[**25]** to the facts, personal views on law and policy do not disqualify him from hearing the case. ***HN9***[] The test may be stated in terms of whether the judge's mind is "irrevocably closed" on the issues as they arise in the context of the specific case. *See* FTC v. Cement Institute, 333 U.S. 683, 701, 92 L. Ed. 1010, 68 S. Ct. 793 (1948); *see also* Hortonville Joint School District No. 1 v. Hortonville Education Association, 426 U.S. 482, 493, 49 L. Ed. 2d 1, 96 S. Ct. 2308, 2314 (1976) ("Nor is a decisionmaker disqualified simply because he has taken a position, even in public, on a policy issue related to the dispute, in the absence of a showing that he is not 'capable of judging a particular controversy fairly on the basis of its own circumstances.'"); United States v. Haldeman, 181 U.S. App. D.C. 254, 559 F.2d 31, 136 (D.C. Cir. 1976) (en banc) (per curiam) ("a judge's comment is disqualifying only if it connotes a fixed opinion -- 'a closed mind on the merits of the case.'"), *cert. denied*, *431 U.S. 933, 97 S. Ct. 2641, 53 L. Ed. 2d 250 (1977)*.

In the present case, SPCC argues both that the District Judge held firm views about the policies and issues involved before hearing **[**26]** the case, and that his mind was irrevocably closed. We conclude, however, that SPCC has failed to establish either prong of this argument.

AT & T strongly disputes SPCC's contention that the District Judge held his policy or legal views prior to hearing the case, and argues that, to the contrary, the Judge developed his views during the course of the trial in response to the arguments and evidence presented by both parties. It seems clear that the Judge, at minimum, did not initially believe that the antitrust laws are inapplicable to AT & T's allegedly anticompetitive conduct, for, on July 2, 1979, the Judge entered a pre-trial order rejecting AT & T's motion to dismiss the case on the basis of implied antitrust immunity. In that order, the Judge noted that "it is consistent with the FCC's general goals for the specialized communications market, as well as with the agency's determinations in particular cases, that the antitrust laws and the Communications Act may be applied simultaneously and complementarily." Order at 8. The Judge explained

---

(2d Cir. 1980); *see also* FTC v. Cement Institute, 333 U.S. 683, 702, 92 L. Ed. 1010, 68 S. Ct. 793 (1948) (most matters relating to judicial disqualification do not rise to a constitutional level); Tumey v. Ohio, 273 U.S. 510, 523, 71 L. Ed. 749, 47 S. Ct. 437 (1927) ("All questions of judicial qualification may not involve constitutional validity. Thus matters of kinship, personal bias, state policy, remoteness of interest, would seem generally to be matters merely of legislative discretion."). Thus, ***HN8***[] a determination that a judge is not disqualified for bias necessarily includes a determination that the right to a fair trial is not violated by the judge's presiding over the case.

[10] *Cf.* Laird v. Tatum, 409 U.S. 824, 835, 34 L. Ed. 2d 50, 93 S. Ct. 7, 14 (1972) (Memorandum of Mr. Justice Rehnquist) ("Proof that a Justice's mind at the time he joined the Court was a complete *tabula rasa* in the area of constitutional adjudication would be evidence of lack of qualification, not lack of bias."); In re J. P. Linahan, Inc., 138 F.2d 650, 652 (2d Cir. 1943) ("An 'open mind,' in the sense of a mind containing no preconceptions whatever, would be a mind incapable of learning anything, would be that of an utterly emotionless human being, corresponding roughly to the psychiatrist's descriptions of the feeble-minded.").

his change of position between the pretrial order and the final decision as being due to the failure of the "proof adduced at this trial" **[**27]** to substantiate the "facts **[*992]** alleged in the pleadings." Mem. Op. at 1096 n.341. In other words, far from initially holding a firm belief that the antitrust laws did not apply to AT & T, the trial judge initially held the view that the antitrust laws *did* apply to AT & T, and adopted the contrary view only after hearing the evidence. This hardly supports SPCC's charge of bias.

Moreover, we have examined the arguments and evidence presented in this case, and find AT & T's position that the District Judge developed his policy views as well as his legal views during the course of the trial to be at least highly plausible. The merits and demerits of the FCC's decision to allow competitive entry by the specialized common carriers were extensively debated by counsel during the trial. Indeed, SPCC itself, in an attempt to prove AT & T's anticompetitive intent, submitted documentary evidence setting forth AT & T's reasons for opposing the FCC's decision. One such document, a speech given by the then Chairman of the Board of Directors of AT & T, John D. deButts, to the annual convention of the National Association of Regulatory Utility Commissioners on September 30, 1973, **[**28]** is quoted in its entirety in the Memorandum Opinion. *See* Mem. Op. at 894-902. A comparison of that speech with the views expressed by the District Judge in the Conclusion" section of the Memorandum Opinion [11] reveals a striking similarity. This strongly suggests to us that the Judge developed his policy views during the trial. Most importantly, SPCC fails to offer any convincing evidence that the District Judge held his policy views prior to hearing the case.

Even if we were to assume that the trial judge began the case with certain firmly held views, SPCC has failed to establish that the Judge held these views with an "irrevocably closed" mind. Once again, the evidence suggests the opposite. The first such evidence is the Judge's denial of AT & T's pretrial motion to exclude SPCC's FX and CCSA [12] claims from the case, and his denial of AT & T's motion at the close of SPCC's case for involuntary dismissal under *rule 41(b)*. These actions are indicative of a judge who **[**29]** was fully prepared to hear all of the evidence before reaching a final decision, not a judge whose mind was irrevocably closed to persuasion. Second, the Judge repeatedly stated throughout the trial that he had not yet reached a conclusion on the merits of the case. Finally, as noted earlier, the Judge never foreclosed SPCC from engaging in discovery, introducing documentary or testimonial evidence, engaging in cross-examination, presenting legal arguments, or citing applicable legal precedents.

If the Judge was as biased as claimed by SPCC, it is unlikely that he would have been so consistently evenhanded in his administration of the trial proceedings. To assume bias in the face of such a fair trial is to conjure up a most duplicitous mind; we will not idly indulge such speculation about an officer of the law.

B. *Disagreement with Applicable Law or Policy*

We recognize that SPCC's argument goes beyond the assertion that the District **[**30]** Judge held certain views on law and policy with an irrevocably closed mind. SPCC further argues in essence that the Judge ignored the applicable ***antitrust law*** and simply decided the case on the basis of his view that an AT & T monopoly is good and competition against AT & T is bad. Once the Judge reached his decision in this manner, according to SPCC, he copied AT & T's proposed findings of fact and conclusions of law without further consideration in order to render his decision "appeal proof." [13]

---

[11] *See* note 7 *supra*.

[12] For a brief description of FX and CCSA, see note 3 *supra*.

[13] In its brief and at oral argument, SPCC repeatedly referred to remarks made by the District Judge at a hearing on a post-judgment motion to the effect that his decision was "appeal proof" and would be affirmed. SPCC would have us believe that these remarks indicate that the District Judge deliberately and deviously set about to render a biased decision impervious to attack. SPCC neglected to quote the Judge's remarks in context, however. At the time the remarks were made, the District Judge was urging the parties to settle the case. The District Judge suggested to SPCC that although its intention to appeal was "perfectly proper," it would make more sense to settle instead because "the decision is appeal proof . . . unless the Court of Appeals is going to overrule 100 years of law about findings being clearly erroneous . . ., and I don't see how in the world in light

[31]** **[*993]** It is clear that the District Judge did hold the view that AT & T's former monopoly in private line telecommunications was in the public interest and that competitive entry into this market was contrary to the public interest. This view is inconsistent with the determination that the FCC made in *Specialized Common Carriers, 29 F.C.C.2d 870 (1971)*, *aff'd sub nom. Washington Utilities & Transportation Commission v. FCC, 513 F.2d 1142 (9th Cir.)*, *cert. denied*, *423 U.S. 836, 96 S. Ct. 62, 46 L. Ed. 2d 54 (1975)*, that competitive entry into this market *is* in the public interest. The FCC's determination was upheld by the Ninth Circuit and was given broad effect by this court in *AT & T v. FCC, 176 U.S. App. D.C. 288, 539 F.2d 767, 773-74 (D.C. Cir. 1976)*. The District Judge's proper role in deciding this case was to apply the antitrust laws to the facts *given* this policy of allowing competition. It was not part of his official role in deciding this case to pass judgment on, or even to express his personal views concerning, the FCC's policy decision to allow competition.

It is well established, however, that ***HN10***[] a judge is not disqualified merely because **[**32]** he personally disagrees with the policy underlying a law that he is bound to apply in a case. As Judge Leventhal noted, "in fulfilling the functions of applying or considering the validity of a statute, or a government program, the judge endeavors to put aside personal views as to the desirability of the law or program, and he is not disqualified because he personally deems the program laudable or objectionable." *Association of National Advertisers, Inc. v. FTC, 201 U.S. App. D.C. 165, 627 F.2d 1151, 1175 (D.C. Cir. 1979)* (Leventhal, J., concurring) (footnotes omitted), *cert. denied*, *447 U.S. 921, 100 S. Ct. 3011, 65 L. Ed. 2d 1113 (1980)*. [14] In the present case, however, it is alleged that the District Judge not only disagreed in the context of this case with the policy promoted by the antitrust laws, but also that instead of putting his personal views aside he allowed those views to dominate his judgement. SPCC principally relies on three factors to support this latter allegation: the statements made by the Judge in his Memorandum Opinion, the fact that the Judge largely copied his Memorandum Opinion from AT & T's proposed findings of fact and conclusions of law, and the **[**33]** fact that virtually every determination of credibility, finding of fact and conclusion of law is in favor of AT & T. For the reasons discussed below, we do not find these factors sufficient to overcome the strong presumption that judges in deciding cases do not substitute their personal views for controlling law.

1. *Statements in* **[**34]** *the Memorandum Opinion*

SPCC argues that we can deduce from the District Judge's policy statements in the Memorandum Opinion that these views were the basis for the Judge's decision. We disagree. It is true that the Judge interspersed comments about his view of the public interest with his analysis of one of the issues in this case, the issue **[*994]** of implied immunity. But the Judge did not base even his conclusion that AT & T enjoys implied immunity from the antitrust laws on his notions of the public interest, but rather on his conclusion -- with which we disagree -- that AT & T was subject to a pervasive scheme of regulation. One of the most troublesome comments that the Judge made was that he "believes that the antitrust laws were never intended to destroy an essential public utility such as we have here." Mem. Op. at 1097. We interpret this comment, however, merely to be a restatement of his conclusion that antitrust immunity can be implied from the scheme of public utility regulation applicable to AT & T.

In any case, even if the trial judge's views of the public interest *did* influence his judgment on the issue of implied antitrust immunity, the decision does **[**35]** not rest on the disposition of that issue. [15] Rather, the Judge went on to

---

of this record it could be." Transcript of Hearing at 112 (Mar. 30, 1983). We do not find these remarks to be inappropriate in context, and we do not read them necessarily to indicate more than that the District Judge believed that his decision fully documented a total failure by SPCC to prove its case.

[14] Thus, for example, a judge who was vehemently opposed to the continuation of the Vietnam War was not disqualified from determining whether a draftee had been unlawfully inducted under the selective service laws. *Lawton v. Tarr, 327 F. Supp. 670 (E.D.N.C. 1971)*. Similarly, a judge whose Church was opposed to the proposed Equal Rights Amendment and to extension of its ratification deadline was not disqualified from determining whether a state legislature may rescind its prior adoption of the amendment and whether Congress may extend the ratification period after the time originally designated by Congress had elapsed. *Idaho v. Freeman, 478 F. Supp. 33 (D. Idaho 1979)*.

[15] Indeed, the Judge addressed the issue of implied antitrust immunity for the first time in the "Conclusion" section of the Memorandum Opinion, almost as an afterthought.

hold in the alternative that, even if the antitrust laws *do* apply, SPCC has failed to prove that AT & T unlawfully maintained monopoly power through anticompetitive conduct. It is solely on the basis of that holding that we affirm the District Court's judgment, and we find no evidence that the Judge's policy views impermissibly influenced that holding.

2. *Copied Findings of Fact and Conclusions of Law*

SPCC also argues that the fact that the District Judge overwhelmingly copied his Memorandum Opinion from AT & T's proposed findings of fact and conclusions of law supports the conclusion that the Judge's decision was based on his personal policy views and not on impartial application of the antitrust laws to the facts of the case. The argument, as we understand **[**36]** it, is that we cannot assume that the Judge actually based his judgment on the antitrust analysis contained in the Memorandum Opinion, because we cannot know whether he adopted that analysis after full consideration or merely copied it mechanically.

The short answer to this argument is that, ***HN11***[] given the absence of clear evidence to the contrary, we must presume that the Judge adopted these findings and conclusions after full consideration. In *United States v. Crescent Amusement Co., 323 U.S. 173, 89 L. Ed. 160, 65 S. Ct. 254 (1944)*, the Supreme Court noted:

> The defendants finally object to the findings on the ground that they were mainly taken verbatim from the government's brief. The findings leave much to be desired in light of the function of the trial court. But they are nonetheless the findings of the District Court. And they must stand or fall depending on whether they are supported by the evidence.

Id. at 184-85 (citation omitted); *accord United States v. El Paso Natural Gas Co., 376 U.S. 651, 656, 12 L. Ed. 2d 12, 84 S. Ct. 1044 (1964)*; *Afshar v. Department of State, 226 U.S. App. D.C. 388, 702 F.2d 1125, 1144 (D.C. Cir. 1983)*; *Valentino* ***[**37]*** *v. United States Postal Service, 218 U.S. App. D.C. 213, 674 F.2d 56, 60-61 n.2 (D.C. Cir. 1982)*. Indeed, in *Valentino* this circuit explicitly rejected the suggestion that the District Court's substantial acceptance of the prevailing party's proposed findings warrants departure from the "clearly erroneous" standard of review. *674 F.2d at 60-61 n.2*.

SPCC argues that this case is distinguishable from *Crescent Amusement Co., El Paso Natural Gas Co., Afshar, Valentino* and similar cases because of the sheer extensiveness of the copying. We find this argument unpersuasive. Proportionately, the extent of the copying was the same or less in the present case than in many others. The total number of pages copied reflects the size of the case more than the degree of abdication of the judge's responsibility for opinion writing.

Even apart from our presumption of regularity, however, we find that there is reason to believe that the Memorandum **[*995]** Opinion may reflect the actual thinking of the District Judge on the issues. First, counsel for AT & T explained at oral argument that AT & T's proposed findings of fact and conclusions of law were written to reflect the views **[**38]** of the District Judge that had been freely expressed throughout the trial in response to the testimony of the witnesses, the submissions of documentary evidence and the arguments of the parties. Our review of the record convinces us that there is considerable merit to this explanation. To an extent, therefore, AT & T merely performed a stenographic function. Moreover, we note that the District Judge did add a not insignificant amount of original material, including supplemental determinations of credibility, findings of fact and conclusions of law. This original material is interspersed throughout AT & T's submissions. This indicates to us that the trial judge did not mechanically copy AT & T's proposed findings and conclusions, but rather considered them and elaborated upon them where he considered it necessary.

Finally, we note that careful appellate review provides some safeguard against adoption of findings and conclusions that reflect excessive zeal of advocacy. Courts of appeals are able independently to review the legal analysis of a trial court's opinion for error, regardless of whether that analysis was written in the first instance by the District Judge or by the **[**39]** prevailing party. And, as long as the court of appeals has a full record -- which SPCC concedes we do in this case -- the court of appeals can "examine[] the decision with special care" for clear error in the findings of fact. *Valentino v. United States Postal Service, 674 F.2d at 60 n.2*. We may contrast this situation with the situation in Crandell v. United States, 703 F.2d 74 (4th Cir. 1983), one of the cases principally relied upon by SPCC. In *Crandell*, all of the findings in the district court's memorandum opinion relating to two key issues were lifted virtually verbatim from a report prepared by a government witness. 703 F.2d at 76. During the trial, the District Judge had prevented the plaintiff from effectively cross-examining this witness. *Id.* In contrast, as SPCC concedes, the District Judge in the present case never foreclosed SPCC from presenting its case and developing a full record for review.

Nevertheless, we wish to make clear that we cannot endorse ***HN12***[] the District Judge's action in extensively copying the proposed findings of fact and conclusions of law prepared by counsel for AT & T. As the Supreme Court noted in *El Paso Natural Gas Co.*, **[**40]** this practice "is an abandonment of the duty and the trust that has been placed in the judge." *376 U.S. at 657 n.4* (quoting J. Skelly Wright, Seminars for Newly Appointed United States District Judges 166 (1963)). As the present case illustrates, the parties, the public and the reviewing court can never be certain that the judge actually decided the case on the grounds given in the copied Memorandum Opinion. Confidence in the integrity of the judicial process inevitably suffers when judges succumb wholesale to this practice.

3. *One-sided Findings and Conclusions*

Finally, SPCC argues that it is difficult to credit to anything except judicial bias the fact that virtually every determination of the credibility of witnesses, finding of fact and conclusion of law in the Memorandum Opinion is in favor of AT & T. We conclude that ***HN13***[] the statistical one-sidedness of the trial court's evidentiary, factual and legal rulings simply cannot be used to support an inference of judicial bias. As the Second Circuit has noted:

> A trial judge must be free to make rulings on the merits without the apprehension that if he makes a disproportionate number in favor of one litigant, he may **[**41]** have created the impression of bias. Judicial independence cannot be subservient to a statistical study of the calls he has made during the contest.

In re IBM Corp., 618 F.2d 923, 929 (2d Cir. 1980) (rejecting IBM's argument that **[*996]** the disproportionate number of rulings by the trial judge against IBM and in favor of the Government constituted evidence of judicial bias).

This position is also supported by the Supreme Court's decision in *NLRB v. Pittsburgh Steamship Co., 337 U.S. 656, 93 L. Ed. 1602, 69 S. Ct. 1283 (1949)*. In that case, a trial examiner without exception had found the witnesses for the company untrustworthy and those for the union reliable, and the Board had adopted the examiner's findings. The court of appeals held that this fact alone showed bias: "It is enough to say that the unvarying repudiation of every witness for the petitioner because of falsity, evasion or faint recollection, along with the consistent exaltation of every union witness as truthful, forthright and accurate, destroys completely any confidence that might otherwise be placed in the findings of the trial examiner and stamp[s] them as arbitrary." *337 U.S. at 658* **[**42]** (quoting *Pittsburgh Steamship Co. v. NLRB, 167 F.2d 126, 129 (6th Cir. 1948))* (brackets in original). The Supreme Court reversed, holding that "total rejection of an opposed view cannot of itself impugn the integrity or competence of a trier of fact." *Id. at 659*.

C. *Case Law Relied on by SPCC*

SPCC relies primarily on five cases to support its argument that the District Judge should be reversed for bias: *Crandell v. United States, 703 F.2d 74 (4th Cir. 1983)*; *Nicodemus v. Chrysler Corp., 596 F.2d 152 (6th Cir. 1979)*; *Faulkner Radio, Inc. v. FCC, 181 U.S. App. D.C. 243, 557 F.2d 866 (D.C. Cir. 1977)*; *Reserve Mining Co. v. Lord, 529 F.2d 181 (8th Cir. 1976)*; and *Knapp v. Kinsey, 232 F.2d 458 (6th Cir.)*, *cert. denied*, *352 U.S. 892, 1 L. Ed. 2d 86, 77 S. Ct. 131 (1956)*.

In *Faulkner Radio*, this court remanded a case to the FCC because the administrative law judge, in resolving a conflict between the testimony of two parties who were lawyers and the testimony of opposing witnesses who were non-lawyers, apparently acted on the assumption that the FCC accords greater weight to the testimony of lawyers than to that of non-lawyers. Although **[**43]** the appellant couched its argument in terms of "bias," the court remanded because it considered it likely that the judge's credibility determinations were "predicated upon a material error of law." *557 F.2d at 870*. Thus, *Faulkner Radio* does not suggest that we should vacate the opinion below and remand the present case for a new trial without consideration of the evidence, as SPCC argues, but only that we should carefully review the District Judge's determinations of credibility and findings of fact to make certain that they, too, are not predicated upon material errors of law. [16]

[44]** In each of the other four cases relied on by SPCC, the court of appeals held that the district judge's *conduct during the trial* deprived the losing party of due process. This conduct consisted in part of statements made by the judge indicating bias, but also in each case involved significant -- even egregious -- interference by the judge with the attempts of the losing party to present its case. Indeed, in three of the cases the court of appeals concluded that the district judge had "simply assumed the role of an advocate" for the prevailing party. *Crandell, 703 F.2d at 77*; *see* Reserve Mining Co., 529 F.2d at 185 ("Judge Lord seems to have shed the robe of the judge and to have assumed the mantle of the advocate."); *Knapp, 232 F.2d at 467* (district **[*997]** judge "figuratively speaking, stepped down from the bench to assume the role of advocate for the plaintiff"). In none of these four cases was the decision of the court of appeals founded solely on the district judge's expressions of policy views and speculation that the district judge impermissibly based his decision on those views rather than on the applicable law.

D. *Summary*

We recognize the **[**45]** difficulty of proving that a trial judge not only held certain views about law or policy, but also approached a case with an "irrevocably closed" mind or actually substituted his personal views for controlling law in deciding a case. As we have indicated, ***HN14***[] there is a strong presumption against disqualifying a judge solely on the basis of his views about law or policy. Indeed, we assume that most judges do have personal views; but we also presume that these views do not invariably cause a judge to prejudge a case or to abandon his public responsibility to preside over a fair and wholly impartial adjudication. In other words, we expect that most judges are faithful to their enormous public trust.

In the present case, however, the issue of bias has been seriously raised in a context that we find troubling. We therefore have examined the trial judge's conduct in considerable detail. We find the plaintiffs' charges of bias to be unsupported by the factors SPCC cites, whether considered individually or together as a whole. Accordingly, we reject these charges and deny SPCC's requests that we reverse and remand for bias or that we abandon the "clearly erroneous" standard of review **[**46]** of the District Court's factfinding.

III. THE ANTITRUST ISSUES

A. *Introduction*

Turning now to the substantive issues that formed the subject of the trial, we note that the District Court outlined four elements of proof that SPCC had to satisfy in order to prevail on its antitrust claims:

> (1) that the defendant possesses monopoly power in a relevant market; (2) that the defendant has unlawfully exercised that power to attain, or maintain, a monopoly in the relevant market; (3) that the plaintiff has suffered injury in fact as a result of those unlawful acts; and (4) that damages in a reasonably ascertainable amount have been proved.

Mem. Op. at 870 (citations omitted). The District Court then concluded in a series of alternative holdings that SPCC had failed to satisfy *any* of these elements of proof. Finally, in the "Conclusion" section of its Memorandum

---

[16] SPCC argues that many of the District Court's determinations of credibility in the present case were predicated on impermissible grounds. We have considered SPCC's allegations, and conclude that the District Court fully supported each determination of credibility critical to its holding on the issue of unlawful maintenance of monopoly power on the basis of legitimate considerations, such as demeanor, objectivity, expertise, experience, and the logic of the testimony. As we have already noted, it does not matter that certain of these findings were initially drafted by counsel for AT & T. What is important is that the District Judge adopted these findings as his own, that they have a basis in the record, and that there is nothing to suggest that they are clearly erroneous.

Opinion, the District Court held that, in any event, all of AT & T's rates and practices challenged by SPCC were immune from antitrust scrutiny because they were subject to a pervasive scheme of public utility or common carrier regulation. Thus, the District Court's judgment for AT & T rests **[**47]** on five principal alternative holdings.

B. *The "Clearly Erroneous" Standard of Review*

On appeal, SPCC raises two general arguments on the merits. First, SPCC argues that "on each and every issue on this appeal, SPCC presented evidence sufficient to prevail before an impartial decisionmaker." Appellants' Reply Brief at 5. Thus, SPCC essentially seeks to relitigate its charges against AT & T. SPCC repeats the allegations that it unsuccessfully made to the District Court, cites to evidence in the record that supports these allegations, and urges the Court of Appeals independently to review the evidence. These arguments assume that we have adopted SPCC's suggestion that we abandon the "clearly erroneous" standard on the ground that the trial court's factfinding was tainted by the District Judge's policy bias. [17] As discussed above in Part II, however, **[*998]** we reject SPCC's charge of judicial bias. Accordingly, ***HN15***[] we are bound by the rule that findings of fact in actions tried without a jury "shall not be set aside unless clearly erroneous, and due regard shall be given to the opportunity of the trial court to judge of the credibility of the witnesses." *FED. R. CIV. P. **[**48]** 52(a)*. The Supreme Court has stated that "[a] finding is 'clearly erroneous' when although there is evidence to support it, the reviewing court on the entire evidence is left with the definite and firm conviction that a mistake has been committed." *United States v. United States Gypsum Co., 333 U.S. 364, 395, 68 S. Ct. 525, 92 L. Ed. 746 (1948)*.

Thus, under the "clearly erroneous" standard, our review of findings of fact is critically limited. **[**49]** This point was aptly emphasized in *Krasnov v. Dinan, 465 F.2d 1298 (3d Cir. 1972)*, as follows:

> "In reviewing the decision of the District Court, our responsibility is not to substitute findings we could have made had we been the fact- finding tribunal; our sole function is to review the record to determine whether the findings of the District Court were clearly erroneous, i.e., whether we are 'left with a definite and firm conviction that a mistake has been committed.'" *Speyer, Inc. v. Humble Oil and Refining Co., 403 F.2d 766, 770 (3d Cir. 1968)*. ***HN16***[] It is the responsibility of an appellate court to accept the ultimate factual determination of the fact-finder unless that determination either (1) is completely devoid of minimum evidentiary support displaying some hue of credibility, or (2) bears no rational relationship to the supportive evidentiary data. Unless the reviewing court establishes the existence of either of these factors, it may not alter the facts found by the trial court. To hold otherwise would be to permit a substitution by the reviewing court of its finding for that of the trial court, and there is no existing authority for this in the federal judicial **[**50]** system, either by American common law tradition or by rule and statute.

Id. at 1302-03. We fully subscribe to this position and adhere to it in our review of the record in this case.

The District Court's lengthy Memorandum Opinion contains extremely detailed discussions of the evidence. On each factual issue, the District Court fully discusses the evidence introduced by SPCC as well as the evidence introduced by AT & T, and explains exactly why it finds AT & T's evidence persuasive and SPCC's unconvincing. In each instance where SPCC disagrees with the District Court's findings of fact, we have reviewed the evidence discussed by the District Court as well as the evidence cited by SPCC. In a number of these instances, we acknowledge that a factfinder rationally could resolve the conflicting evidence in a manner contrary to the determination of the District Court. In every instance, however, there is clearly substantial evidence to support the

---

[17] The closest SPCC comes to arguing that the District Court's findings of fact should be set aside under the "clearly erroneous" standard is the following:

> Under the proposed standard of review, it is unnecessary for this Court to even reach the question of how the district court's opinion would be reviewed under a clearly erroneous test. However, even if such a test were applied, we do not concede, as AT & T alleges (AT & T Br., p. 23), that any or all of the district court's factfindings should be affirmed.

Appellants' Reply Brief at 4 n.4.

findings of the District Judge; and in no instance have we been left with the definite and firm conviction that a mistake in factfinding has been committed by the trial court.

Because of the nature of this case, we have **[**51]** been tempted to recite in detail every factual issue raised by appellants, including an explicit description of the relevant evidence in the record and an explanation of how that evidence as a whole supports the District Court's findings. We have decided, however, that this would both involve us in a task that is wholly unnecessary to our legitimate appellate function and result in a pointless exercise. For us to detail every factual issue would be essentially to repeat scores of pages of the District Court's comprehensive Memorandum Opinion. We are aware, however, that by merely stating our conclusions **[*999]** without engaging in such detailed discussions, we leave ourselves open to the charge that we have failed to consider the evidence. We therefore wish to emphasize that we have considered the evidence in the record relating to each and every factual issue raised by SPCC. [18] Indeed, it is only because of the need to engage in this time-consuming effort that it has taken us such a long time -- over three months -- to arrive at our decision and to release our opinion in this case.

[52]** Because we conclude that the District Court's findings are supported by the evidence and are not clearly erroneous, we focus our attention on SPCC's second general argument: that each of the District Court's alternative holdings is based on fundamental errors of law. We agree with SPCC's argument that the District Court's holding on the issue of implied antitrust immunity is incorrect as a matter of law. We also agree that the court's holding that AT & T lacked monopoly power is based on erroneous legal analysis. We conclude, however, that the District Court's alternative holding that AT & T did not "unlawfully exercise[] that power to attain, or maintain, a monopoly in the relevant market" must be sustained. In particular, we conclude that, given the District Court's findings of fact, SPCC has failed to prove that AT & T engaged in predatory pricing even under the legal test proposed by SPCC. We further conclude that the District Court in fact applied the correct legal test to evaluate SPCC's charges that AT & T engaged in exclusionary inter connection practices. We therefore affirm the judgment of the District Court solely on the ground that SPCC failed to satisfy this **[**53]** second element of proof, *i.e.*, maintenance of monopoly power by exclusionary conduct. [19] Given this disposition of the case, it is unnecessary for us to consider SPCC's legal and factual arguments on the issues of injury-in-fact and proof of damages.

C. *Implied Antitrust Immunity*

The District Court concluded that AT & T enjoys implied antitrust immunity, at least with regard to the pricing and interconnection practices at issue in this case, **[**54]** on the ground that these practices are subject to pervasive regulatory control under a public interest standard different from and inconsistent with the application of the antitrust laws. *See* Mem. Op. at 1095-97. We reject this conclusion.

The Supreme Court has repeatedly noted that ***HN18***[] "repeals of the antitrust laws by implication from a regulatory statute are strongly disfavored, and have only been found in cases of plain repugnancy between the antitrust and regulatory provisions." *Otter Tail Power Co. v. United States, 410 U.S. 366, 372, 35 L. Ed. 2d 359, 93 S. Ct. 1022, 1027 (1973)* (quoting *United States v. Philadelphia National Bank, 374 U.S. 321, 350-51, 10 L. Ed. 2d 915, 83 S. Ct. 1715, 1734 (1963))*. The decision of the District Court in the present case notwithstanding, it is well settled that such repugnancy does not exist between the antitrust laws and the regulatory scheme applicable to AT & T's pricing and interconnection decisions. *See, e.g., MCI Communications Corp. v. AT & T, 708 F.2d 1081, 1101-5 (7th Cir.)*, *cert. denied*, *464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)*; *Phonetele, Inc. v. AT & T, 664 F.2d 716, 726-37 (9th Cir. 1981),* **[**55]** *cert. denied*, *459 U.S. 1145, 103 S. Ct. 785, 74 L. Ed. 2d 992 (1983)*; *Northeastern Telephone Co. v. AT & T, 651 F.2d 76, 82-84 (2d Cir. 1981)*, *cert. denied*, *455 U.S. 943, 71 L. Ed. 2d*

---

[18] However, because we do not reach the issues of injury-in-fact and proof of damages, we have not considered the factual disputes pertaining to these issues.

[19] "***HN17***[] Exclusionary" conduct may be defined as "conduct, other than competition on the merits or restraints reasonably 'necessary' to competition on the merits, that reasonably appear capable of making a significant contribution to creating or maintaining monopoly power." 3 P. AREEDA & D. TURNER, ***ANTITRUST LAW*** para. 626, at 83 (1978). The issue is whether the defendant's conduct is reasonable in light of its business needs, or whether it unreasonably excludes competition. *See Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227, 230 (1st Cir. 1983)*.

654, 102 S. Ct. 1438 (1982); *Mid-Texas Communications* ***[*1000]*** *Systems v. AT & T, 615 F.2d 1372, 1377-82 (5th Cir.)*, *cert. denied*, *449 U.S. 912, 101 S. Ct. 286, 66 L. Ed. 2d 140 (1980)*; *Sound, Inc. v. AT & T, 631 F.2d 1324, 1327-31 (8th Cir. 1980)*; *Essential Communications Systems v. AT & T, 610 F.2d 1114, 1116-25 (3rd Cir. 1979)*; *United States v. AT & T, 461 F. Supp. 1314, 1320-30 (D.D.C. 1978)*. We agree with the consistent analysis presented in these cases, and see no point in repeating it yet another time. We merely emphasize that, under the applicable regulatory scheme, the initial decision to file a tariff establishing rates or to provide interconnections to a competing specialized common carrier rests with AT & T, and AT & T's tariffs and interconnection decisions often become effective without FCC scrutiny or approval. At minimum, long regulatory delays often have preceded final FCC approval or disapproval of AT & T's allegedly predatory rates, [20] refusals **[**56]** to interconnect, or unreasonable and discriminatory terms and conditions of access to local distribution facilities. As Judge Greene concluded in *United States v. AT & T*, "it would be a gross misconception of the realities to equate the instant statutory scheme, the relatively weak regulatory controls which have implemented that scheme, and defendants' alleged activities which offend both the antitrust laws and the regulatory purposes, with the kind of explicit regulation endorsing industry conduct which the Supreme Court has held in relatively few instances to be inconsistent with antitrust enforcement." *461 F. Supp. at 1328*. [21]

[57]** D. *Monopoly Power*

HN19[] The offense of monopolization under *section 2* of the Sherman Act has two elements: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698, 1704 (1966)*. Monopoly power is "the power to control prices or exclude competition." *Id. at 571* (quoting *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 100 L. Ed. 1264, 76 S. Ct. 994 (1956))*. ***HN20***[] In cases involving unregulated industries, courts frequently approach the problem of measuring market power by defining the relevant product and geographic market and computing the defendant's market share. Monopoly power is then ordinarily inferred from a predominant share of the market. *See id.* Reliance on statistical market share is a questionable approach in cases involving regulated industries, however. A predominant market share may merely be the result of regulation, and regulatory control may preclude the exercise **[**58]** of monopoly power. Therefore, in such cases market share should be at most a point of departure in determining whether monopoly power exists. Ultimately, a court should focus directly upon the ability of the regulated firm to control prices or exclude competition. *See MCI Communications Corp. v. AT & T, 708 F.2d 1081, 1106-07 (7th Cir.)*, *cert. denied*, *464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)*; Watson & Brunner, *Monopolization by Regulated "Monopolies": The Search for Substantive Standards*, 22 ANTITRUST BULL. 559, 565-68 (1977).

[*1001] The District Court's analysis of monopoly power in the present case is consistent with the above principles. The District Court defined the relevant market as "the interstate, intercity private line market (excluding sole source governmental telecommunications needs and short haul) in the geographic areas which plaintiffs elected to serve, or would have served in their 'but for' world." [22] **[**60]** Mem. Op. at 1097; *see id. at 871-77*. The

[20] *See* note 5 *supra*.

[21] Notwithstanding the District Court's holding on the issue of implied antitrust immunity, the court clearly recognized the inadequacy of the regulatory scheme, as implemented by the FCC, to prevent anticompetitive behavior. Thus, the District Court noted that "every action complained of in this case could have or should have been handled by the appropriate regulatory bodies, *which responsibility the regulators miserably mishandled or failed to handle*." Mem. Op. at 1096 (footnote omitted) (emphasis added). The District Court further noted that "it was the FCC that never found TEL-PAK (C & D) unlawful for over *20* years, as well as delayed making other very important decisions," and that "had the FCC not engaged in its usual regulatory lag and dealt forthrightly and properly with the problems as they arose, then few, if any, of the cases would now be before the antitrust Courts, such as this one." *Id. at 1097* (emphasis in original).

District Court then determined that AT & T's market share ranged from a high of 95.6% to a low of 66.5%, sufficient to support an inference of monopoly power. *Id. at 878*. Nevertheless, **[**59]** the District Court concluded that this inference was rebutted by AT & T's inability in fact to control prices or exclude competition. In particular, the District Court rejected SPCC's argument that AT & T had monopoly power by virtue of various barriers to market entry, such as costs and delays inherent in the regulatory process, substantial capital outlays and lengthy construction programs needed to build intercity telecommunications systems, brand loyalty enjoyed by AT & T, and AT & T's control of interconnection with its local distribution facilities. *See id. at 880-84*. The District Court noted that entry actually had occurred at a rapid pace. *See id. at 884-85*. [23] Finally, the District Court concluded that the complete control over prices and access to local distribution facilities exercised by the FCC and the state regulatory agencies precluded AT & T from exercising monopoly power. *See id. at 885-88*.

SPCC argues on appeal that the District Court's conclusions on the issues of barriers to entry and regulatory control were based on erroneous legal analysis, and that the court's overall conclusion that AT & T lacked monopoly power therefore must be set aside. We agree. In concluding that the regulatory agencies prevented AT & T from controlling price or excluding competition, the District Court erred, as it had in its analysis of implied antitrust immunity, in failing to consider the realities of the regulatory scheme. That scheme leaves pricing and interconnection decisions to AT & T in the first instance. The regulatory agencies are not always able to respond to alleged abuses immediately and effectively.

The District Court also erred in ruling that costs and delays imposed by the regulatory process are not barriers to entry. The District Court based this ruling on the ground that the regulatory agencies, and not AT & T, are responsible for these costs and delays. **[**61]** The defendant's innocence or blameworthiness, however, has absolutely nothing to do with whether a condition constitutes a barrier to entry. ***HN21***[] Any market condition that makes entry more costly or time-consuming and thus reduces the effectiveness of potential competition as a constraint on the pricing behavior of the dominant firm should be considered a barrier to entry, regardless of who is responsible for the existence of that condition. Thus, the costs and delays of the regulatory process clearly constitute barriers to entry. On this point, Judge Greene noted in *United States v. AT & T, 524 F. Supp. 1336 (D.D.C. 1981)*, that

> a persuasive showing has been made that [AT & T has] monopoly power (wholly apart from FCC orders with respect to interconnection) through various barriers to entry, such as the creation of bottlenecks, entrenched customer preferences, the regulatory process, large capital requirements, access to technical information, and disparities in risk. These factors, in combination with the evidence of market shares, suffice at least to meet the government's initial burden, and the burden is then appropriately placed upon **[*1002]** defendants to rebut **[**62]** the existence and significance of barriers to entry. On that basis, the defendants' regulatory defense to the government's claim of monopoly power must and will be rejected.

Id. at 1347-48 (footnotes omitted); *see also* G. BROCK, THE TELECOMMUNICATIONS INDUSTRY 198, 213-15 (1981).

Similarly, as noted by Judge Greene, ***HN22***[] the need for large capital outlays and lengthy construction programs in order to enter the market, and the need to overcome brand preference established by the defendant's having been first in the market or having made extensive "image" advertising expenditures, also constitute barriers to entry. *United States v. AT & T, 524 F. Supp. at 1348*; *see also* *Transamerica Computer Co. v. IBM, 481 F. Supp. 965, 976 (N.D. Cal. 1979)*, *aff'd*, *698 F.2d 1377 (9th Cir.)*, *cert. denied*, *464 U.S. 955, 104 S. Ct. 370, 78 L. Ed. 2d 329*

---

[22] SPCC argues that the relevant market should be defined as the nationwide market for all business and government intercity telecommunications services. Mem. Op. at 871; *see* Appellants' Opening Brief at 27 n.23. Given our disposition of this case, we need not decide this issue.

[23] SPCC argues that this finding is overstated. *See* Appellants' Opening Brief at 27; Appellants' Reply Brief at 19-20.

(1983); *see also* 2 P. AREEDA & D. TURNER, ***ANTITRUST LAW*** paras. 409d-409e (1978); Joskow & Klevorick, *A Framework for Analyzing Predatory Pricing Policy*, 89 Yale L.J. 213, 228-29 (1979).

Finally, and perhaps most critically, AT & T's control of interconnection with its local distribution facilities constitutes **[**63]** a barrier to entry. *See* 2 P. AREEDA & D. TURNER, ***ANTITRUST LAW*** para. 409f (1978); G. BROCK, THE TELECOMMUNICATIONS INDUSTRY 198-99, 216-18 (1981). The District Court erroneously dismissed this factor on the ground that the FCC has power to mandate interconnection pursuant to *47 U.S.C. § 201(a) (1976)*, again ignoring the realities of control by AT & T in the first instance and of regulatory delay and inefficiency in policing alleged abuses.

It is not clear to us whether the District Court still would have found that AT & T lacked monopoly power had it properly considered the effect of regulatory control and barriers to entry. Accordingly, if the issue of monopoly power were dispositive, we would have to remand the case to the District Court. The court went on, however, to hold in the alternative that AT & T did not use its power over price and entry in an exclusionary manner. Because we conclude that this holding is supported even under the legal standards proposed by SPCC, we affirm the judgment of the District Court dismissing SPCC's monopolization action.

E. "*Willful Acquisition or Maintenance" of Monopoly Power*

As noted in Part III.D above, the second element **[**64]** of the offense of monopolization is the "willful acquisition or maintenance of [monopoly] power as distinguished from growth or development as a consequence of superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*. SPCC argues that AT & T willfully maintained its monopoly power by engaging in predatory pricing and exclusionary interconnection practices.

1. *The Predatory Pricing Charges*

SPCC alleges that AT & T willfully maintained monopoly power through predatory pricing of the Telpak, [24] **[**66]** Hi/Lo and MPL tariffs. [25] AT & T used each of these tariffs **[*1003]** to reduce prices in response to competition. Following the FCC's *Above 890* decision, AT & T faced competition in the market for bulk private line services from the users of these services, who were permitted to construct private microwave systems for their own use. AT & T responded by offering a greatly reduced bulk rate under the Telpak tariff. Similarly, following the *MCI* and *Specialized Common Carriers* decisions, AT & T faced competition from the specialized common carriers in the market for single **[**65]** channel private line services along low cost, high density routes. AT & T responded by reducing prices for these services first under the Hi/Lo tariff and later under the MPL tariff.

Ordinarily, price cuts are a necessary and desirable response to competition. Courts and commentators have recognized, however, that there may be circumstances in which price cuts serve an anticompetitive purpose. In particular, there is concern that a firm might deliberately sacrifice present revenues for the purpose of driving rivals out of the market and then recoup the losses through higher profits earned in the absence of competition. [26] **[**67]**

---

[24] SPCC also argues that the structure of Telpak was anti-competitive even if Telpak was not preditorily priced. The District Court rejected SPCC's arguments after full consideration. *See* Mem. Op. at 947-53; *accord* *MCI Communications Corp. v. AT & T, 708 F.2d 1081, 1130-31 (7th Cir.)*, *cert. denied*, ***464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)***. We agree with the District Court's analysis. We note that the Telpak structure was designed for legitimate business reasons to duplicate the economic characteristics of the private microwave systems that large users of AT & T's private line services considered constructing for their own use following the FCC's *Above 890* decision. The District Court found after fully reviewing the evidence that AT & T continued to maintain and market Telpak throughout the 1960's and 1970's as a competitive alternative to private microwave. *See* Mem. Op. at 953-55. This finding is supported by the evidence and is not clearly erroneous.

[25] For a brief description of these tariffs, see note 5 *supra*.

[26] *See, e.g.*, *Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227, 231 (1st Cir. 1983)*; *MCI Communications Corp. v. AT & T, 708 F.2d 1081, 1112 (7th Cir.)*, *cert. denied*, ***464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)***; *Northeastern Telephone*

The problem of differentiating between lawful price cuts and predatory price cuts presents considerable theoretical and practical difficulties, and has been the subject of a heated debate among scholars of ***antitrust law***. [27] In particular, courts and commentators have disagreed about whether the test should be based purely on the relationship between the firm's prices and costs, or whether evidence of subjective intent also should be considered. In addition, there is disagreement about which measures of cost are theoretically and practically appropriate.

In the present case, SPCC raises a barrage of objections to the District Court's analysis of the predatory pricing issue. According to SPCC, the District Court made incorrect findings of fact concerning AT & T's costs, misconstrued the significance of the measures of cost used, and applied an incorrect legal test. In order to provide a framework for discussing the **[**68]** District Court's analysis and the contentions of the parties, we shall consider first the issue of the proper legal test to apply. SPCC alleges that the District Court improperly adopted the Areeda-Turner test, [28] and urges us essentially to adopt the Ninth Circuit's *Inglis-Transamerica* test. [29]

[*1004] ***HN23***[] The Areeda-Turner test establishes conclusive presumptions that prices are either lawful or predatory depending solely on the relationship between **[**69]** those prices and certain measures of the firm's costs. According to Professors Areeda and Turner, a price at or above average total cost [30] should be conclusively presumed lawful. This should be so even if the price is not profit-maximizing in the short run and even if the price was set in order to preserve or enhance market share by deterring rivals. The rationale for this rule is that when a firm prices at or above average total cost, its total revenues cover its total costs, including a normal return on investment. Such pricing can drive out only less efficient rivals; that is, rivals who are unable to produce equivalent goods or services at as low a cost as the monopolist. Such competition based on superior performance must, according to Areeda and Turner, be considered competition on the merits.

[70]** Professors Areeda and Turner further argued that a price at or above reasonably anticipated short run marginal cost [31] also should be conclusively presumed lawful. [32] **[**71]** Areeda and Turner acknowledged that

Co. v. AT & T, 651 F.2d 76, 86 (2d Cir. 1981), *cert. denied*, ***455 U.S. 943, 102 S. Ct. 1438, 71 L. Ed 2d 654 (1982)***; Areeda & Turner, *Predatory Pricing and Related Practices Under Section 2 of the Sherman Act*, 88 HARV. L. REV. 697, 698 (1975).

Some commentators have argued that this type of conduct is irrational and unlikely to occur in the case of an unregulated firm. *See, e.g.*, R. BORK, THE ANTITRUST PARADOX 144-60 (1978); Easterbrook, *Predatory Strategies and Counter Strategies*, 48 U. CHI. L. REV. 263 (1981); McGee, *Predatory Pricing Revisited*, 23 J. LAW & ECON. 289 (1980). A different argument leading to the same conclusion can be made in the case of a firm subject to overall rate-of-return regulation. *See, e.g.*, Testimony of Kenneth J. Arrow, *United States v. AT & T*, Civ. Action No. 74-1698 (D.D.C.), at 35-37.

[27] The seminal and most influential article has been Areeda & Turner, *Predatory Pricing and Related Practices Under Section 2 of the Sherman Act*, 88 HARV. L. REV. 697 (1975). For other prominent views, see, *e.g.*, R. BORK, THE ANTITRUST PARADOX 144-60 (1978); R. POSNER, ***ANTITRUST LAW***: AN ECONOMIC PERSPECTIVE 184-96 (1976); Baumol, *Quasi-Permanence of Price Reductions: A Policy for Prevention of Predatory Pricing*, 89 YALE L.J. 1 (1979); Joskow & Klevorick, A *Framework for Analyzing Predatory Pricing Policy*, 89 Yale L.J. 213 (1979); Scherer, *Predatory Pricing and the Sherman Act: A Comment*, 89 HARV. L. REV. 869 (1977); Williamson, *Predatory Pricing: A Strategic and Welfare Analysis*, 87 YALE L.J. 284 (1977).

[28] *See* Areeda & Turner, *Predatory Pricing and Related Practices Under Section 2 of the Sherman Act*, 88 HARV. L. REV 697 (1975); *see also* 3 P. AREEDA & D. TURNER, ANTI-TRUST LAW paras. 711-721 (1978 & Supp. 1982).

[29] *See Transamerica Computer Co. v. IBM, 698 F.2d 1377 (9th Cir.)*, *cert. denied*, ***464 U.S. 955, 104 S. Ct. 370, 78 L. Ed. 2d 329 (1983)***; ***William Inglis & Sons Baking Co. v. ITT Continental Baking Co., 668 F.2d 1014 (9th Cir. 1981)***, *cert. denied*, ***459 U.S. 825, 74 L. Ed. 2d 61, 103 S. Ct. 57, 103 S. Ct. 58 (1982)***.

[30] Average total cost is the sum of fixed cost and total variable cost, divided by output. Fixed cost is the sum of all costs that do not vary with output; total variable cost is the sum of all costs that vary with changes in output. Areeda & Turner, *Predatory Pricing and Related Practices Under Section 2 of the Sherman Act*, 88 HARV L. REV. 697, 700 (1975).

[31] Marginal cost is the increment to total cost that results from producing an additional increment of output. *Id.*

such pricing could drive out equally or more efficient rivals who have less staying power than the monopolist, and therefore possibly might not maximize long run consumer welfare. Nevertheless, Areeda and Turner concluded that allowing pricing as low as marginal cost is desirable because it produces the competitive and socially optimal result in the short run. Finally, Areeda and Turner recognized that marginal cost cannot readily be inferred from conventional business accounts, and therefore proposed that average variable cost [33] be used as a proxy for marginal cost.

The Ninth Circuit has rejected the idea that courts should distinguish lawful from predatory pricing solely on the basis of the relationship between the firm's prices and costs. Instead, under the Ninth Circuit's test, "to establish predatory pricing a plaintiff must prove that the anticipated benefits of defendant's price depended on its tendency to discipline or eliminate competition and thereby enhance the firm's long-term ability to reap the benefits of monopoly power." *William Inglis & Sons Baking Co. v. ITT Continental Baking Co., 668 F.2d 1014, 1035 (9th Cir. 1981)*, *cert. denied*, *459 U.S. 825, 74 L. Ed. 2d 61, 103 S. Ct. 57, 103 S. Ct. 58 (1982)*. The Ninth Circuit has, however, adopted a cost-based test for the purpose of allocating the burden of proof. Thus, according to the Ninth Circuit, if the plaintiff proves that the defendant's prices were below average variable cost, the plaintiff has established a prima facie case **[**72]** of predatory pricing and the burden shifts to the defendant to prove that the prices were justified without regard to any anticipated destructive effect they might have on competitors. *Id. at 1036*. If the plaintiff proves that the defendant's prices were below average total cost but not below average variable cost, the plaintiff bears the burden of proving by a preponderance of the evidence that the defendant's pricing was predatory in the sense that "the anticipated benefits of defendant's price depended on its tendency to discipline or eliminate competition and thereby enhance the firm's long-term ability to reap the benefits of monopoly power." *Id. at 1035-36*. Finally, if the plaintiff cannot prove that the defendant's prices were below average total cost, the plaintiff must prove by clear and **[*1005]** convincing evidence -- *i.e.*, that it is highly probably true -- that the defendant's pricing policy was predatory in the above sense. *Transamerica Computer Co. v. IBM, 698 F.2d 1377, 1388 (9th Cir.)*, *cert. denied*, *464 U.S. 955, 104 S. Ct. 370, 78 L. Ed. 2d 329 (1983)*.

Application of the above tests is complicated in the present case because AT & T is a **[**73]** multiservice firm. The measures of cost it uses for its private line services are "long run incremental cost" ("LRIC") and "fully distributed cost" ("FDC") rather than average variable cost or average total cost. The District Court did not precisely define these measures of cost. The court noted that "long run incremental costs or average incremental costs are a form of marginal costs reflecting the change in total costs caused by changes in output over a longer period of time." Mem. Op. at 922 (citations to record omitted). [34] The court described FDC as follows:

> Fully distributed cost is an accounting concept focusing on the historical costs reflected in the books of the company. Fully distributed costs require an allocation of the firm's total costs to the firm's various product lines. The allocation methods used to compute fully distributed cost are inherently arbitrary and have no economic basis.

Mem. Op. at 922 n. 105 (citations to record omitted).

---

[32] Under the Areeda-Turner test, a price below reasonably anticipated short run marginal cost (or its proxy, average variable cost) is conclusively presumed predatory, unless at or above average total cost. *Id.* at 733.

[33] Average variable cost is the sum of all variable costs divided by output. Variable costs are costs that vary with changes in output. *Id.* at 700.

[34] The court cited an article by Professor Baumol that defines "average incremental cost" as follows:

> The average incremental cost of product X is defined as total company cost minus what the total cost of the company would be in the absence of production of X, all divided by the quantity of X being produced. Total costs refer to those that would prevail in the long-run with the output combinations specified.

Baumol, *Quasi-Permanence of Price Reductions: A Policy for Prevention of Predatory Pricing*, 89 YALE L.J. 1, 9 n.26 (1979); *see also* Joskow & Klevorick, A *Framework for Analyzing Predatory Pricing Policy*, 89 YALE L.J. 213, 252 n.79 (1979).

[74]** With this background, we are ready to turn to consideration of the District Court's analysis of SPCC's predatory pricing charges and to SPCC's objections to that analysis. First, the District Court held that a cost-based standard must be adopted to judge SPCC's predatory pricing claims. Next, the court concluded that "marginal or incremental cost" is the appropriate cost to consider. The court then found that SPCC failed to prove that Telpak, Hi/Lo or MPL were priced below incremental cost. Accordingly, the court held that SPCC failed to prove that AT & T had engaged in predatory pricing. Although the court rejected FDC as an appropriate measure of cost for identifying predatory pricing, the court nevertheless made findings that Telpak, Hi/Lo and MPL were priced above FDC as well as above LRIC. *See* Mem. Op. at 918-33.

In conducting the above analysis, the District Court purported to adopt the Areeda-Turner test. The court did not, however, as SPCC alleges, rely on the somewhat controversial Areeda-Turner rule that a price at or above reasonably anticipated short run marginal cost (or its proxy, average variable cost) is conclusively presumed lawful. When the court stated **[**75]** that "marginal or incremental cost" is the appropriate cost to consider, it was referring to long run incremental cost. The court noted that "long run or average incremental costs . . . include certain items of long term expense that are typically considered fixed and would generally be excluded from a calculation of average variable cost, such as the cost of plant and equipment, as well as the cost of capital. It is generally recognized that long run or average incremental cost approximates anticipated average total cost for various levels of production." Mem. Op. at 922 (footnote and citations omitted). Thus, the court adopted only the relatively uncontroversial Areeda-Turner rule that a price at or above average total cost is conclusively presumed lawful.

SPCC argues on appeal that the District Court made errors of both fact and law. First, SPCC argues that the District Court erred in finding that Telpak, Hi/Lo and MPL were priced above LRIC and FDC. Second, SPCC argues that the District **[*1006]** Court erred in rejecting FDC as an appropriate measure of cost. According to SPCC, LRIC, at least as used by AT & T, corresponds to average variable cost, and FDC corresponds **[**76]** to average total cost. Third, SPCC argues that the District Court erred in adopting the Areeda-Turner test rather than the *Inglis-Transamerica* test. In sum, SPCC argues that the District Court should have ruled in its favor on its predatory pricing charges on the basis of *each* of the three alternative grounds provided by the *Inglis-Transamerica* test: (1) SPCC proved that AT & T priced below average variable cost (which SPCC equates with LRIC); (2) SPCC proved that AT & T priced below average total cost (which SPCC equates with FDC) with predatory intent; and (3) even if SPCC did not prove that AT & T priced below average total cost, SPCC proved by clear and convincing evidence that AT & T priced with predatory intent.

In response to these arguments, we must note that we have serious doubts about the usefulness of FDC as a measure of cost to be used in distinguishing lawful from predatory pricing. [35] We also have serious doubts about the correctness of SPCC's characterization of LRIC and FDC in terms of average variable cost and average total cost. [36] Given the District Court's findings of fact in the present case, however, it is unnecessary for us to resolve these **[**77]** issues. It is also unnecessary for us to decide today precisely what rule for identifying predatory pricing this circuit should adopt. We hold only that, accepting *arguendo* SPCC's legal arguments, SPCC cannot on the facts of this case prevail on *any* of the three grounds it advances.

[78]** First, we conclude that the District Court's findings that AT & T priced Telpak, Hi/Lo and MPL above both LRIC and FDC are not clearly erroneous. The evidence supporting these findings is discussed at considerable length in the District Court's opinion. Briefly, AT & T submitted a number of cost studies showing that the Telpak,

Cir. 1980)*** (Wilkey, J., dissenting) (arguing that it was arbitrary and capricious for the FCC to prescribe fully distributed cost as a standard for establishing minimum rates in competitive markets), *cert. denied*, ***451 U.S. 920, 68 L. Ed. 2d 311, 101 S. Ct. 1998, 101 S. Ct. 1999 (1981)***.

[36] *See* MCI Communications Corp. v. AT & T, 708 F.2d 1081, 1114-25 (7th Cir.), *cert. denied*, ***464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)***.

Hi/Lo and MPL rates were projected to be above LRIC and FDC, and actually were above those costs. AT & T's studies were corroborated by a study performed by an independent accounting firm. A number of economists testified that AT & T's cost studies were as soundly conceived and carried out as such studies practicably can be. In contrast, SPCC did not introduce a single study purporting to show AT & T's actual costs. SPCC introduced several internal AT & T documents allegedly showing that Telpak was not profitable. The District Court found these documents inconclusive:

> For the most part, the Court cannot tell what kind of analysis underlies these documents or what they were intended to reflect; and for this reason alone, the Court cannot give this evidence any significant weight. It appears, however, that several of the documents do not even **[**79]** relate to Telpak's revenue/cost relationship and that several others in fact show that [sic] Telpak rates to be covering costs. Moreover, other of the documents do not appear to reflect current conditions at all, but rather to show rough projections into 1977 and 1980 which were associated with some kind of rate planning effort (*e.g.*, PX2-0168; PX2-0175). But by 1977, AT & T had filed to terminate Telpak, thus rendering these projections of little significance. On balance, the Court cannot find that these unexplained documents are sufficient to meet plaintiffs' burden of proof, **[*1007]** particularly when compared to AT & T's detailed, formal studies.

Mem. Op. at 929-30 (footnotes omitted). SPCC also introduced the testimony of two cost witnesses, Mr. Tucker and Mr. Scott, who took AT & T's own cost studies, adjusted them for alleged errors in data and methodology, and then recalculated the cost figures. The recalculated figures showed that Hi/Lo and MPL were priced below LRIC and FDC. SPCC concedes, however, that "Messrs. Scott and Tucker did not purport to establish the true FDC and LRIC for Hi/Lo and MPL." Appellants' Opening Brief at 86. In any case, **[**80]** the District Court found that Mr. Tucker and Mr. Scott were not knowledgeable about AT & T's actual plant, engineering, or costs; that there were unexplained inconsistencies in their studies; and that AT & T's witnesses effectively responded to Mr. Tucker's and Mr. Scott's criticisms and demonstrated that their calculations seriously overstated AT & T's costs. Finally, SPCC relied on the testimony of its principal cost witness, Dr. Melody. The District Court found that Dr. Melody's testimony was refuted by AT & T's witnesses. We have reviewed the evidence and testimony summarized above and conclude that the District Court's findings that Telpak, Hi/Lo and MPL were priced above LRIC and FDC are supported by the evidence and are not clearly erroneous.

Having established that the District Court's findings concerning AT & T's costs are not clearly erroneous, we now turn to SPCC's argument that it has proved predatory pricing under the *Inglis-Transamerica* test. SPCC concedes that FDC is equivalent to average total cost. Thus, even under SPCC's view, the District Court's findings that Telpak, Hi/Lo and MPL were priced above FDC mean that Telpak, Hi/Lo and MPL were priced above **[**81]** average total cost. In order to prevail under the *Inglis-Transamerica* test that it advocates, therefore, SPCC must present clear and convincing proof that AT & T priced with predatory intent; that is, that "the anticipated benefits of defendant's price depended on its tendency to discipline or eliminate competition and thereby enhance the firm's long-term ability to reap the benefits of monopoly power." *Inglis, 668 F.2d at 1035*. SPCC argues that it met this requirement by proving that AT & T priced below its short run profit-maximizing level in order to eliminate competition from the specialized common carriers. [37] The District Court considered SPCC's charge that AT & T priced below the profit-maximizing rate and found that the charge was unsupported. *See* Mem. Op. at 964-65. The District Court also considered SPCC's "intent" documents and found that these documents could not be read as evincing an anticompetitive intent within the meaning of *Inglis. See* *id. at 890-912, 922 n. 106*. We have reviewed the record and conclude that these findings are supported by the evidence and are not clearly erroneous.

---

[37] We note that the First Circuit recently rejected the *Transamerica* rule after thoughtful consideration and held that prices above both marginal and average total cost, even if not profit-maximizing, are conclusively presumed lawful. *Barry Wright Corp. v. ITT Grinnell Corp., 724 F.2d 227, 233-36 (1st Cir. 1983)*; *accord* *MCI Communications Corp. v. AT & T, 708 F.2d 1081, 1114 (7th Cir.)* (decided before *Transamerica*), *cert. denied*, ***464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)***.

Accordingly, even assuming *arguendo* that the *Inglis-Transamerica* **[**82]** test advocated by SPCC is the appropriate test to use, we conclude that SPCC has failed to prove that AT & T engaged in predatory pricing. [38]

2. *The Interconnection Charges*

SPCC alleged at trial that AT & T unlawfully maintained its monopoly power by engaging in various exclusionary interconnection practices. SPCC's theory was that AT & T was **[**83]** required to provide SPCC with full and nondiscriminatory access to the Bell operating companies' local distribution facilities under the "essential facilities" doctrine of the antitrust laws. AT & T **[*1008]** argued in defense that, to the extent that it had engaged at all in the alleged interconnection practices, its conduct was justified by its duty under the regulatory scheme to interconnect only when such interconnection is in the public interest. The District Court ruled in favor of AT & T on each of SPCC's interconnection charges. *See* Mem. Op. at 972-1054. SPCC's principal argument on appeal is that the District Court applied a legally incorrect standard for upholding AT & T's assertions of what SPCC terms the "regulatory justification defense." SPCC also contends that the District Court made errors in its factfinding. [39]

[84]** On appeal, SPCC focuses on five practices or courses of conduct in which AT & T allegedly engaged. Briefly, SPCC's allegations, each of which was rejected by the District Court, are as follows. First, according to SPCC, AT & T engaged in a course of conduct prior to SPCC's commencement of operations on December 26, 1973, that was intended to delay SPCC's entry into the market. SPCC sets forth the following scenario to support its first charge: Before SPCC could commence operations, it was necessary for AT & T and SPCC to establish the terms and conditions upon which AT & T would provide SPCC with interconnections to the Bell operating companies' local distribution facilities. In order to delay having to provide these interconnections, AT & T negotiated in bad faith with SPCC over the terms of a draft facilities contract. When these negotiations were nearing completion, AT & T unilaterally and in bad faith decided to provide the interconnections pursuant to facilities tariffs rather than pursuant to contract. Moreover, AT & T decided to file its tariffs with the state regulatory commissions rather than with the FCC. In October 1973, however, the FCC learned of this plan and **[**85]** ordered the tariffs to be filed with the FCC.

Second, according to SPCC, AT & T refused to provide SPCC with interconnections that would enable SPCC to provide certain switched services, known as FX and CCSA services. [40] It is contended that AT & T based its refusal in bad faith on the pretext that the *Specialized Common Carriers* decision did not authorize SPCC to provide these services, and that it would be contrary to the public interest for AT & T voluntarily to provide interconnections with its switched network, since such interconnections would have an adverse economic, technical and operational impact on the Bell system. On April 23, 1974, however, the FCC ruled that the *Specialized Common Carriers* decision had authorized the specialized common carriers to provide FX and CCSA services.

Third, according to SPCC, AT & T reclassified certain interstate circuits as intrastate circuits in order to deny SPCC interconnections **[**86]** and to place SPCC at a competitive disadvantage.

Fourth, SPCC claims that AT & T provided SPCC with interconnections and services that were operationally and technically inferior to those provided to AT & T's own Long Lines Department.

Finally, according to SPCC, AT & T charged SPCC discriminatorily and excessively high prices for interconnections.

Each of the above charges is based on the theory that the Bell operating companies' local distribution facilities are "essential facilities." By using its control over access to these essential facilities, AT & T had the ability to extend its

---

[38] And, *a fortiori*, as the District Court concluded, SPCC has failed to prove that AT & T engaged in predatory pricing under the Areeda-Turner test.

[39] We have considered each of these factual contentions, and upon review of the record conclude that the District Court's findings of fact relating to SPCC's interconnection charges are supported by the evidence and are not clearly erroneous.

[40] For a brief description of FX and CCSA services, see note 5 *supra*.

natural monopoly power in the market for local public switched telephone service to the competitive market for intercity private line service. The antitrust laws therefore prohibit AT & T from unreasonably and discriminatorily restricting access to these essential facilities. *See Hecht v. Pro-Football, Inc., 187 U.S. App. D.C. 73, 570 F.2d 982, 992-93 (D.C. Cir. 1977), cert.* **[*1009]** *denied, 436 U.S. 956, 57 L. Ed. 2d 1121, 98 S. Ct. 3069 (1978); see also Otter Tail Power Co. v. United States, 410 U.S. 366, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973); United States v. Terminal* **[**87]** *Railroad Association, 224 U.S. 383, 56 L. Ed. 810, 32 S. Ct. 507 (1912); MCI Communications Corp. v. AT & T, 708 F.2d 1081, 1132-33 (7th Cir.), cert. denied, 464 U.S. 891, 104 S. Ct.234, 78 L. Ed. 2d 226 (1983); United States v. AT & T, 524 F. Supp. 1336, 1352-53 (D.D.C. 1981).*

HN24[] Absolute equality of access to essential facilities, however, is not mandated by the antitrust laws. In *United States v. Terminal Railroad Association*, the Supreme Court required that ***HN25***[] access to essential facilities be afforded to competitors "upon such just and reasonable terms and regulations as will, in respect of use, character and cost of service, place every such company upon as nearly an equal plane as may be with respect to expenses and charges as that occupied by the proprietary companies." *224 U.S. at 411*. Similarly, in *Hecht*, this circuit stated that essential facilities must be shared on "fair terms," and noted that "the antitrust laws do not require that an essential facility be shared if such sharing would be impractical or would inhibit the defendant's ability to serve its customers adequately." *570 F.2d at 992-93; see also United States v. AT & T, 524 F. Supp. at 1360-61* **[**88]** ("problems of feasibility and practicability may be taken into account by the Court in determining the sufficiency under the law of the access to essential facilities granted by defendants to non-Bell carriers").

Denials of access or restrictive interconnection practices also possibly may be justified on the basis of AT & T's duties as an enterprise regulated under a "public interest" standard. AT & T's duty to provide interconnections with other carriers is governed by *section 201(a)* of the Communications Act, which provides:

> ***HN26***[] It shall be the duty of every common carrier engaged in interstate or foreign communication by wire or radio to furnish such communication service upon reasonable request therefore; and, in accordance with the orders of the Commission, in cases where the Commission, after opportunity for hearing, finds such action necessary or desirable in the public interest, to establish physical connections with other carriers, to establish through routes and charges applicable thereto and the divisions of such charges, and to establish and provide facilities and regulations for operating such through routes.

47 U.S.C, § 201(a) (1976). When AT & T is presented **[**89]** with an interconnection request, it must decide in the first instance whether or not voluntarily to grant the request. Public policy will be vindicated only if AT & T makes this decision on the basis of the "public interest" standard of *section 201(a)* as it has been interpreted by the FCC. *See Mid-Texas Communications Systems v. AT & T, 615 F.2d 1372, 1389 (5th Cir.), cert. denied, 449 U.S. 912, 101*, S. Ct. 286, *66 L. Ed. 2d 140 (1980)*. It would therefore be contrary to public policy to permit antitrust liability against AT & T on the basis of interconnection decisions so made. *See id.*

In our view, and in the view of other circuits that have considered the issue, this regulatory justification defense is only applicable if AT & T's asserted "public interest" basis for its interconnection decision is reasonable and if AT & T actually made its decision at the time in good faith on that basis rather than solely on the basis of competitive considerations. The "reasonableness" component of this test requires that AT & T have a reasonable basis in terms of concerns for the public interest that are concrete, articulable, and recognized as legitimate by the appropriate regulatory **[**90]** agencies. *See, e.g., Phonetele, Inc. v. AT & T, 664 F.2d 716, 737-38 (9th Cir. 1981), cert. denied, 459 U.S. 1145, 103 S. Ct. 785, 74 L. Ed. 2d 992 (1983)*. As the Fifth Circuit noted in *Mid-Texas*, however, "though the refusal may be based upon articulable concerns of public policy, it may also be possible to rationalize a decision whose purpose is anticompetitive." *615 F.2d at 1380*. Thus, the "good faith" component **[*1010]** of the test is required as well. Accordingly, the Fifth Circuit held in *Mid-Texas* that Bell could defend its denials of interconnections only "to the extent that Bell *based* its decision here on articulable concerns relating to the public interest as defined in *section 201(a)*." *Id. at 1381* (emphasis added). The Fifth Circuit further stated that "if Bell was correct in its assessment [that interconnection was contrary to the public interest], *and if its purpose in* *refusing interconnection was to vindicate the public interest*, then the refusal, despite its obvious anticompetitive effect, would have been proper and entitled to protection from antitrust scrutiny." *Id. at 1390* (emphasis added).

In sum, we agree with the standard **[**91]** articulated by the Seventh Circuit, which includes both objective and subjective components:

> ***HN27***[] An ideal instruction would very briefly explain, for example, that a carrier has an obligation under the Communications Act to interconnect, but may deny interconnections if it determines that the public interest is to the contrary; and that if the carrier at the time had a reasonable basis in regulatory policy to conclude, and in good faith concluded, that denial of interconnections is required by concrete, articulable concerns for the public interest, then there is no liability under the antitrust laws.

MCI Communications Corp. v. AT & T, 708 F.2d 1081, 1138 (7th Cir.), *cert. denied*, *464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)*.

SPCC argues that the District Court in the present case erred as a matter of law by adopting and applying a test requiring only objective reasonableness. In consequence, according to SPCC, the District Court repeatedly upheld AT & T's after-the-fact rationalizations for its refusals voluntarily to provide interconnections and for the exclusionary practices in which it allegedly engaged after the FCC ordered it to provide interconnections. **[**92]** SPCC argues that the District Court ignored the evidence it introduced allegedly proving that AT & T's conduct was anticompetitively motivated and that AT & T's asserted public interest concerns were pretextual.

It is true that the District Court's discussion of the applicable legal standard for SPCC's interconnection charges focused on the element of objective reasonableness. *See* Mem. Op. at 972-78. The District Court stated that "a denial of interconnection prior to an FCC determination of the public interest will be deemed reasonable under the antitrust laws if there was an objectively reasonable basis for believing that the interconnection was not in the public interest based on recognized public interest considerations." Mem. Op. at 976. It is clear, however, that the District Court recognized and required the element of subjective good faith as well. For example, the District Court approvingly discussed the Fifth Circuit's analysis in *Mid-Texas* of the regulatory justification defense, which requires both reasonableness and good faith. Indeed, the District Court noted that "the Fifth Circuit recognized that it would be 'contrary to public policy to permit antitrust **[**93]** liability' to be imposed where the carrier denies interconnection *on the basis* of legitimate public interest factors." Mem. Op. at 977 (emphasis added).

More to the point, the District Court conducted a thorough examination of all of SPCC's evidence that AT & T acted with anticompetitive intent, and found that AT & T acted throughout in good faith. The District Court conceded that AT & T disagreed in principle with the policy decisions of the FCC and intended to oppose those decisions by speaking out against the FCC's policies. The District Court found, however, that in spite of this disagreement, AT & T was determined to live with the *Specialized Common Carriers* decision as long as it remained official policy and to cooperate fully with the FCC, to follow the FCC's orders, and to treat SPCC and the other specialized common carriers in a fair and nondiscriminatory manner. Moreover, the District Court found that AT & T made certain that its employees and the presidents of the Bell operating companies understood **[*1011]** AT & T's commitment to this policy of full cooperation. The District Court's discussion of this evidence and elaboration of these conclusions precede **[**94]** its discussion of the regulatory justification defense in the Memorandum Opinion; accordingly, there was no reason for the trial court to focus on the subjective good faith element of that defense, which it had already established had been satisfied.

Furthermore, in its subsequent discussion of SPCC's various specific interconnection charges, the District Court repeatedly reasserted its findings that AT & T acted in good faith. To take just one example, SPCC asserts that in accepting AT & T's regulatory justification for its refusal voluntarily to provide FX and CCSA interconnections, the District Court erred "in accepting . . . after-the-fact rationalization[s] while ignoring pervasive evidence of AT & T's bad faith." Appellants' Opening Brief at 43. Yet, in discussing AT & T's denial of FX and CCSA interconnections, the District Court noted that it had

> examined carefully a number of AT & T documents put into evidence here by SPCC which SPCC asserts show that AT & T knew that its conduct was inconsistent with the FCC's orders. The court finds, to the contrary, that none of these documents support that proposition directly or indirectly. What they do show is a general **[**95]** concern by Bell System employees at various levels about the potentially adverse economic, technical and operational consequences of FCC policy trends and possible future FCC directives.

Mem. Op. at 997 n.209.

We therefore reject as unfounded SPCC's argument that the District Court erred as a matter of law by adopting and applying an incorrect legal standard to judge the sufficiency of AT & T's assertions of the regulatory justification defense.

CONCLUSION

We reject SPCC's charge that it was denied a fair trial because of the District Judge's alleged legal and policy bias. We sustain the District Court's holding that SPCC failed to prove that AT & T engaged in predatory pricing or other exclusionary conduct in violation of *section 2* of the Sherman Act. Because this holding is sufficient to support the District Court's judgment in favor of AT & T, the judgment of the District Court is

Affirmed.

Antitrust & Trade Law > Sherman Act > General Overview

HN1[] **Antitrust & Trade Law, Sherman Act**

See *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN2[] **Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints**

A horizontal restraint of trade is created where an agreement among competitors exists on the way in which they will compete with one another. A restraint of this type has often been held to be unreasonable as a matter of law.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

HN3[] Price Fixing & Restraints of Trade, Cartels & Horizontal Restraints

Horizontal price fixing is ordinarily condemned as a matter of law under an "illegal per se" approach because the probability that these practices are anticompetitive is so high. A per se rule is applied when the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output. In such circumstances a restraint is presumed unreasonable without inquiry into the particular market context in which it is found.

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > Colleges & Universities

Business & Corporate Law > Nonprofit Corporations & Organizations > General Overview

Antitrust & Trade Law > Regulated Industries > Higher Education & Professional Associations > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] Higher Education & Professional Associations, Colleges & Universities

There is no doubt that the sweeping language of *15 U.S.C.S. § 1* applies to nonprofit entities. Courts impose antitrust liability on nonprofit entities that engage in anticompetitive conduct.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN5[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

A conclusion that a restraint of trade is unreasonable may be based either on the nature or character of the contracts, or on surrounding circumstances giving rise to the inference or presumption that they were intended to restrain trade and enhance prices. Under either branch of the test, the inquiry is confined to a consideration of impact on competitive conditions.

HN12[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Under the Rule of Reason, hallmarks of anticompetitive behavior place upon petitioner a heavy burden of establishing an affirmative defense, which competitively justifies a deviation from the operations of a free market.

Lawyers' Edition Display

Decision

NCAA exclusive football telecasting plan held Sherman Act violation.

Summary

The University of Oklahoma and the University of Georgia brought suit in the United States District Court for the Western District of Oklahoma against the National Collegiate Athletic Association (NCAA), challenging the validity under the Sherman Act of the NCAA's restraints in the televising of college football games. The District Court ruled that the NCAA unlawfully restrained trade by fixing the price for particular telecasts, boycotting and threatening to boycott potential broadcasters by its exclusive network football-broadcast contracts, and placing an artificial limit on the production of televised college football (*546 F Supp 1276*). The United States Court of Appeals for the Tenth Circuit affirmed but remanded for an appropriate modification of the injunctive decree, holding that the NCAA television plan constituted illegal per se price fixing, and that even if the television plan was not per se illegal, its anticompetitive limitation on price and output was not offset by any procompetitive justification sufficient to save the plan even when the totality of the circumstances was examined (*707 F2d 1147*).

On certiorari, the United States Supreme Court affirmed. In an opinion by Stevens, J., expressing the views of Burger, Ch. J., and Brennan, Marshall, Blackmun, Powell, and O'Connor, JJ., it was held that (1) the record supported the District Court's conclusion that by curtailing output and blunting the ability of member institutions to respond to customer preference, the NCAA restricted rather than enhanced the place of intercollegiate athletics in the nation's life; and (2) the NCAA television plan, which limited the total amount of televised intercollegiate football and the number of games that an NCAA member might televise, and which forbade any member to make any sale of television rights except in accordance with the basic plan, constituted a restraint on the operation of a free market in violation of 1 of the Sherman Act.

White, J., joined by Rehnquist, J., dissented on the ground that the essentially noneconomic nature of the NCAA's program of self-regulation offset any minimal anticompetitive effects of the television plan.

Headnotes

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §16 > TV contract -- > Headnote:
LEdHN[1A][] [1A]***LEdHN[1B]***[] [1B]***LEdHN[1C]***[] [1C]

A television plan adopted by an association of colleges and universities, which limits the total amount of televised intercollegiate football and the number of games that an association member may televise, and which forbids any member to make any sale of television rights except in accordance with the basic plan, constitutes a restraint on the operation of a free market, in violation of 1 of the Sherman Act (*15 USCS 1*), where the record supports the lower court's conclusion that by curtailing output and blunting the ability of member institutions to respond to customer preference, the association restricted rather than enhanced the place of intercollegiate athletics in the nation's life. (White and Rehnquist, JJ., dissented from this holding.)

APPEAL §1506 > findings -- two-court rule -- > Headnote:
LEdHN[2A][] [2A]***LEdHN[2B]***[] [2B]

The United States Supreme Court accords great weight to a finding of fact which has been made by a United States District Court and approved by a United States Court of Appeals.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §16 > reason -- > Headnote:
LEdHN[3][] [3]

The Sherman Act (*15 USCS 1 et seq.*) is intended to prohibit only unreasonable restraints of trade.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §9 > per se rule -- > Headnote:
LEdHN[4][] [4]

A per se rule is applied when a practice facially appears to be one that would always or almost always tend to restrict competition and restrict output, in which event a restraint is presumed unreasonable without inquiring into the particular market context in which it is found.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §11 > nonprofit entities -- > Headnote:
LEdHN[5A][] [5A]***LEdHN[5B]***[] [5B]

Section 1 of the Sherman Act (*15 USCS 1*) applies to nonprofit entities.

EVIDENCE §173 > motive -- NCAA -- > Headnote:
LEdHN[6A][] [6A]***LEdHN[6B]***[] [6B]

As the guardian of an important American tradition, the National Collegiate Athletic Association's motives must be accorded a respectful presumption of validity.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §15 > motive -- > Headnote:
LEdHN[7A][] [7A]***LEdHN[7B]***[] [7B]

Good motives do not validate an otherwise anticompetitive practice.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §16 > rule of reason -- > Headnote:
LEdHN[8][] [8]

A conclusion that a restraint of trade is unreasonable may be based either (1) on the nature or character of the contracts or (2) on surrounding circumstances giving rise to the inference or presumption that they were intended to restrain trade and enhance prices; under either branch of the test, the inquiry is confined to a consideration of impact on competitive conditions.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §9 > per se rule -- > Headnote:
LEdHN[9][] [9]

Per se rules are invoked when surrounding circumstances make the likelihood of anticompetitive conduct so great as to render unjustified further examination of the challenged conduct.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §19 > anticompetitive impact -- > Headnote:
LEdHN[10][] [10]

Under the Sherman Act (*15 USCS 1 et seq.*), the criterion to be used in judging the validity of a restraint on trade is its impact on competition.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §17 > consumer welfare -- > Headnote:
LEdHN[11][] [11]

A restraint that has the affect of reducing the importance of consumer preference in setting price and output is not consistent with the fundamental goal of ***antitrust law*** of serving as a consumer welfare prescription.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §19 > market power -- > Headnote:
LEdHN[12][] [12]

The absence of proof of market power does not justify a naked restriction on price or output; rather, a naked restraint on price and output requires some competitive justification even in the absence of a detailed market analysis.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36 > price -- output -- > Headnote:
LEdHN[13][] [13]

When there is an agreement not to compete in terms of price or output, no elaborate industry analysis is required to demonstrate the anticompetitive character of the agreement.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §19 > market -- > Headnote:
LEdHN[14][] [14]

The correct test for determining whether college football broadcasts constitute a separate market is whether there are other products that are reasonably substitutable for televised NCAA football games.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §19 > monopolies -- > Headnote:
LEdHN[15][] [15]

When a product is controlled by one interest, without substitutes available in the market, there is monopoly power.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §36 > price -- defense -- > Headnote:
LEdHN[16][] [16]

Under the rule of reason, a price rise and output reduction place upon the one causing them a heavy burden of establishing an affirmative defense which competitively justifies the apparent deviation from the operations of a free market.

RESTRAINTS OF TRADE, MONOPOLIES, AND UNFAIR TRADE PRACTICES §16 > defense -- > Headnote:
LEdHN[17][] [17]

The rule of reason does not support a defense based on the assumption that competition itself is unreasonable.

Syllabus

In 1981, petitioner National Collegiate Athletic Association (NCAA) adopted a plan for the televising of college football games of its member institutions for the 1982-1985 seasons. The plan recites that it is intended to reduce the adverse effect of live television upon football game attendance. The plan limits the total amount of televised intercollegiate football games and the number of games that any one college may televise, and no member of the NCAA is permitted to make any sale of television rights except in accordance with the plan. The NCAA has separate agreements with the two carrying networks, the American Broadcasting Cos. and the Columbia Broadcasting System, granting each network the right to telecast the live "exposures" described in the plan. Each network agreed to pay a specified "minimum aggregate compensation" to the participating NCAA members, and was authorized **[****2]** to negotiate directly with the members for the right to televise their games. Respondent Universities, in addition to being NCAA members, are members of the College Football Association (CFA), which was originally organized to promote the interests of major football-playing colleges within the NCAA structure, but whose members eventually claimed that they should have a greater voice in the formulation of football television policy than they had in the NCAA. The CFA accordingly negotiated a contract with the National Broadcasting Co. that would have allowed a more liberal number of television appearances for each college and would have increased the revenues realized by CFA members. In response, the NCAA announced that it would take disciplinary action against any CFA member that complied with the CFA-NBC contract. Respondents then commenced an action in Federal District Court, which, after an extended trial, held that the controls exercised by the NCAA over the televising of college football games violated *§ 1* of the Sherman Act, and accordingly granted injunctive relief. The court found that competition in the relevant market -- defined as "live college football television" -- **[****3]** had been restrained in three ways: (1) the NCAA fixed the price for particular telecasts; (2) its exclusive network contracts were tantamount to a group boycott of all other potential broadcasters and its threat of sanctions against its members constituted a threatened boycott of potential competitors; and (3) its plan placed an artificial limit on the production of televised college football. The Court of Appeals agreed that the Sherman Act had been violated, holding that the NCAA's television plan constituted illegal *per se* price fixing and that even if it were not *per se* illegal, its anticompetitive limitation on price and output was not offset by any procompetitive justifications sufficient to save the plan even when the totality of the circumstances was examined.

Held: The NCAA's television plan violates *§ 1* of the Sherman Act. Pp. 98-120.

(a) While the plan constitutes horizontal price fixing and output limitation, restraints that ordinarily would be held "illegal *per se*," it would be inappropriate to apply a *per se* rule in this case where it involves an industry in which horizontal restraints on competition are essential if the product is to be available **[****4]** at all. The NCAA and its members market competition itself -- contests between competing institutions. Thus, despite the fact that restraints on the ability of NCAA members to compete in terms of price and output are involved, a fair evaluation of their competitive character requires consideration, under the Rule of Reason, of the NCAA's justifications for the restraints. But an analysis under the Rule of Reason does not change the ultimate focus of the inquiry, which is whether or not the challenged restraints enhance competition. Pp. 98-104.

(b) The NCAA television plan on its face constitutes a restraint upon the operation of a free market, and the District Court's findings establish that the plan has operated to raise price and reduce output, both of which are unresponsive to consumer preference. Under the Rule of Reason, these hallmarks of anticompetitive behavior place upon the NCAA a heavy burden of establishing an affirmative defense that competitively justifies this apparent deviation from the operations of a free market. The NCAA's argument that its television plan can have no significant anticompetitive effect since it has no market power must be rejected. As a matter **[****5]** of law, the absence of proof of market power does not justify a naked restriction on price or output and, as a factual matter, it is evident from the record that the NCAA does possess market power. Pp. 104-113.

(c) The record does not support the NCAA's proffered justification for its television plan that it constitutes a cooperative "joint venture" which assists in the marketing of broadcast rights and hence is procompetitive. The District Court's contrary findings undermine such a justification. Pp. 113-115.

(d) Nor, contrary to the NCAA's assertion, does the television plan protect live attendance, since, under the plan, games are televised during all hours that college football games are played. Moreover, by seeking to insulate live ticket sales from the full spectrum of competition because of its assumption that the product itself is insufficiently attractive to draw live attendance when faced with competition from televised games, the NCAA forwards a justification that is inconsistent with the Sherman Act's basic policy. "The Rule of Reason does not support a defense based on the assumption that competition itself is unreasonable." *National Society of Professional Engineers v. United States, 435 U.S. 679, 696.* **[****6]** Pp. 115-117.

(e) The interest in maintaining a competitive balance among amateur athletic teams that the NCAA asserts as a further justification for its television plan is not related to any neutral standard or to any readily identifiable group of competitors. The television plan is not even arguably tailored to serve such an interest. It does not regulate the amount of money that any college may spend on its football program or the way the colleges may use their football program revenues, but simply imposes a restriction on one source of revenue that is more important to some colleges than to others. There is no evidence that such restriction produces any greater measure of equality throughout the NCAA than would a restriction on alumni donations, tuition rates, or any other revenue-producing activity. Moreover, the District Court's well-supported finding that many more games would be televised in a free market than under the NCAA plan, is a compelling demonstration that the plan's controls do not serve any legitimate procompetitive purpose. Pp. 117-120.

Counsel: Frank H. Easterbrook argued the cause for petitioner. With him on the briefs were George H. Gangwere and James D. **[****7]** Fellers.

Andy Coats argued the cause for respondents. With him on the brief were Clyde A. Muchmore, Erwin N. Griswold, J. Ralph Beaird, and James F. Ponsoldt.

Solicitor General Lee argued the cause for the United States as amicus curiae urging affirmance. With him on the brief were Assistant Attorney General McGrath, Deputy Solicitor General Wallace, Deputy Assistant Attorney General Ginsberg, Jerrold J. Ganzfried, Barry Grossman, and Andrea Limmer. [*]

Judges: STEVENS, J., delivered the opinion of the Court, in which BURGER, C. J., and BRENNAN, MARSHALL, BLACKMUN, POWELL, and O'CONNOR, JJ., joined. WHITE, J., filed a dissenting opinion, in which REHNQUIST, J., joined, post, p. 120.

Opinion by: STEVENS

Opinion

[*88] **[***75]** **[**2953]** JUSTICE STEVENS delivered the opinion of the Court.

LEdHN[1A][] [1A] **[****8]** The University of Oklahoma and the University of Georgia contend that the National Collegiate Athletic Association has unreasonably restrained trade in the televising of college football games. After an extended trial, the District Court found that the NCAA had violated *§ 1* of the Sherman Act [1] and granted **[***76]** injunctive relief. *546 F.Supp. 1276 (WD Okla. 1982)*. The Court of Appeals agreed that the statute had been violated but modified the remedy in some respects. *707 F.2d 1147 (CA10 1983)*. We granted certiorari, *464 U.S. 913 (1983)*, and now affirm.

I

The NCAA

[**9]** Since its inception in 1905, the NCAA has played an important role in the regulation of amateur collegiate sports. It has adopted and promulgated playing rules, standards of amateurism, standards for academic eligibility, regulations concerning recruitment of athletes, and rules governing the size of athletic squads and coaching staffs. In some sports, such as baseball, **[**2954]** swimming, basketball, wrestling, and track, it has sponsored and

[*] Gerald A. Caplan and Alexander Halpern filed a brief for the National Federation of State High School Associations as amicus curiae urging reversal.

Forrest A. Hainline III and J. Laurent Scharff filed a brief for the Association of Independent Television Stations, Inc., as amicus curiae urging affirmance.

[1] *Section 1* provides in pertinent part:

HN1[] "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. . . ." 26 Stat. 209, as amended, *15 U. S. C. § 1*.

conducted national tournaments. It has not done so in the sport of football, however. With the **[*89]** exception of football, the NCAA has not undertaken any regulation of the televising of athletic events. [2]

The NCAA has approximately 850 voting members. The regular members are classified into separate divisions to reflect differences in size and scope of their athletic programs. Division I includes 276 colleges with major athletic programs; in this group only 187 **[****10]** play intercollegiate football. Divisions II and III include approximately 500 colleges with less extensive athletic programs. Division I has been subdivided into Divisions I-A and I-AA for football.

Some years ago, five major conferences together with major football-playing independent institutions organized the College Football Association (CFA). The original purpose of the CFA was to promote the interests of major football-playing schools within the NCAA structure. The Universities of Oklahoma and Georgia, respondents in this Court, are members of the CFA.

History of the NCAA Television Plan

In 1938, the University of Pennsylvania televised one of its home games. [3] From 1940 through the 1950 season all of Pennsylvania's home games were televised. App. 303. That was the beginning of the relationship between television and college football.

[**11]** On January 11, 1951, a three-person "Television Committee," appointed during the preceding year, delivered a report to the NCAA's annual convention in Dallas. Based on preliminary surveys, the committee had concluded that "television does have an adverse effect on college football attendance and unless brought under some control threatens to seriously harm the nation's overall athletic and physical **[*90]** system." *Id*., at 265. The report emphasized that "the television problem is truly a national one and requires collective action by the colleges." *Id*., **[***77]** at 270. As a result, the NCAA decided to retain the National Opinion Research Center (NORC) to study the impact of television on live attendance, and to declare a moratorium on the televising of football games. A television committee was appointed to implement the decision and to develop an NCAA television plan for 1951. *Id*., at 277-278.

The committee's 1951 plan provided that only one game a week could be telecast in each area, with a total blackout on 3 of the 10 Saturdays during the season. A team could appear on television only twice during a season. The plan also provided that the NORC would **[****12]** conduct a systematic study of the effects of the program on attendance. *Id*., at 279. The plan received the virtually unanimous support of the NCAA membership; only the University of Pennsylvania challenged it. Pennsylvania announced that it would televise all its home games. The council of the NCAA thereafter declared Pennsylvania a member in bad standing and the four institutions scheduled to play at Pennsylvania in 1951 refused to do so. Pennsylvania then reconsidered its decision and abided by the NCAA plan. *Id*., at 280-281.

During each of the succeeding five seasons, studies were made which tended to indicate that television had an adverse effect on attendance at college football games. During those years the NCAA continued to exercise complete control over the number of games that could be televised. *Id*., at 325-359.

From 1952 through 1977 the NCAA television committee followed essentially the same procedure for developing its television plans. It would first circulate a questionnaire to the membership and then use the responses as a basis for formulating **[**2955]** a plan for the ensuing season. The plan was then submitted to a vote by means of a mail referendum. **[****13]** Once approved, the plan formed the basis for NCAA's negotiations **[*91]** with the networks. Throughout this period the plans retained the essential purposes of the original plan. See 546 F.Supp., at 1283. [4]

---

[2] Presumably, however, it sells the television rights to events that the NCAA itself conducts.

[3] According to the NCAA football television committee's 1981 briefing book: "As far as is known, there were [then] six television sets in Philadelphia; and all were tuned to the game." App. 244.

Until 1977 the contracts were all for either 1- or 2-year terms. In 1977 the NCAA adopted "principles of negotiation" for the future and discontinued the practice of submitting each plan for membership approval. Then the NCAA also entered into its first 4-year contract granting exclusive rights to the American Broadcasting Cos. (ABC) for the 1978-1981 seasons. ABC had held the exclusive rights to network telecasts of NCAA football games since 1965. *Id., at 1283-1284*.

[**14]** *The Current Plan*

The plan adopted in 1981 for the 1982-1985 seasons is at issue in this **[***78]** case. [5] **[****15]** This plan, like each of its predecessors, recites that it is intended to reduce, insofar as possible, the adverse effects of live television upon football game attendance. [6] It provides that "all forms of television of the football **[*92]** games of NCAA member institutions during the Plan control periods shall be in accordance with this Plan." App. 35. The plan recites that the television committee has awarded rights to negotiate and contract for the telecasting of college football games of members of the NCAA to two "carrying networks." *Id*., at 36. In addition to the principal award of rights to the carrying networks, the plan also describes rights for a "supplementary series" that had been awarded for the 1982 and 1983 seasons, [7] as well as a procedure for permitting specific "exception telecasts." [8]

[**16]** In separate agreements with each of the carrying networks, ABC and the Columbia Broadcasting System (CBS), the NCAA granted each the right to telecast the 14 live "exposures" described in the plan, in accordance with the "ground rules" set **[**2956]** forth therein. [9] Each of the networks agreed to pay a specified "minimum

---

[4] The television committee's 1981 briefing book elaborates:

"In 1952, the NCAA Television Committee initiated a plan for controlling the televising of college football games. The plans have remained remarkably similar as to their essential features over the past 30 years. They have had the following primary objectives and purposes:

"1. To reduce, insofar as possible, the adverse effects of live television upon football game attendance and, in turn, upon the athletic and education programs dependent upon that football attendance;

"2. To spread television among as many NCAA member colleges as possible; and

"3. To provide football television to the public to the extent compatible with the other two objectives." *Ibid*.

[5] Because respondents sought and obtained only injunctive relief against future violations of *§ 1* in the District Court, we do not consider previous NCAA television plans except to the extent that they shed light on the purpose and effect of the current plan.

[6] "The purposes of this Plan shall be to reduce, insofar as possible, the adverse effects of live television upon football game attendance and, in turn, upon the athletic and related educational programs dependent upon the proceeds therefrom; to spread football television participation among as many colleges as practicable; to reflect properly the image of universities as educational institutions; to promote college football through the use of television, to advance the overall interests of intercollegiate athletics, and to provide college football television to the public to the extent compatible with these other objectives." *Id*., at 35 (parenthetical omitted).

[7] The supplementary series is described in a separate article of the plan. It is to consist of no more than 36 exposures in each of the first two years and no more than 40 exposures in the third and fourth years of the plan. Those exposures are to be scheduled on Saturday evenings or at other times that do not conflict with the principal football series that is scheduled for Saturday afternoons. *Id*., at 86-92.

[8] An "exception" telecast is permitted in the home team's market of games that are sold out, and in the visiting team's market of games played more than 400 miles from the visiting team's campus, but in both cases only if the broadcast would not be shown in an area where another college football game is to be played. *Id*., at 62-72. Also, Division II and Division III institutions are allowed complete freedom to televise their games, except that the games may not appear on a network of more than five stations without the permission of the NCAA. *Id*., at 73-74.

aggregate compensation **[*93]** to the participating NCAA member institutions" during the 4-year period in an amount that totaled $ 131,750,000. In essence the agreement authorized each network to negotiate directly with member schools for the right to televise their games. The agreement itself does not describe the method of computing the compensation for each game, but the practice that has developed over the years and that the District Court found would be followed under the current agreement involved the setting of a recommended fee by a representative of the NCAA for different types of telecasts, with national telecasts being **[***79]** the most valuable, regional telecasts being less valuable, and Division II or Division III games commanding a still lower price. [10] **[****18]** The aggregate of all these payments presumably equals the total minimum aggregate compensation **[****17]** set forth in the basic agreement. Except for differences in payment between national and regional telecasts, and with respect to Division II and Division III games, the amount that any team receives does not change with the size of the viewing audience, the number of markets in which the game is telecast, or the particular characteristic of the game or the participating teams. Instead, the "ground rules" provide that the carrying networks make alternate selections of those games they wish to televise, and thereby obtain the exclusive right to submit a bid at an essentially fixed price to the institutions involved. See *546 F.Supp., at 1289-1293*. [11]

[*94] The plan also contains "appearance requirements" and "appearance limitations" which pertain to each of the 2-year periods that the **[****19]** plan is in effect. The basic requirement imposed on each of the two networks is that it must schedule appearances for at least 82 different member institutions during each 2-year period. Under the appearance limitations no member institution is eligible to appear on television more than a total of six times and more than four times nationally, with the appearances to be divided equally between the two carrying networks. See *id., at 1293*. The number of exposures specified in the contracts also sets an absolute maximum on the number of games that can be broadcast.

Thus, although the current plan is more elaborate than any of its predecessors, it retains the essential features of each of them. It limits the total amount of televised intercollegiate football and the number of games that any one team may televise. No member is permitted to make any **[**2957]** sale of television rights except in accordance with the basic plan.

Background of this Controversy

Beginning in 1979 CFA members began to advocate that colleges with major football programs should have a greater voice in the formulation of football television policy than they **[***80]** had in the **[****20]** NCAA. CFA therefore investigated the possibility of negotiating a television agreement of its own, developed **[*95]** an

---

[9] In addition to its contracts with the carrying networks, the NCAA has contracted with Turner Broadcasting System, Inc. (TBS), for the exclusive right to cablecast NCAA football games. The minimum aggregate fee for the initial 2-year period of the TBS contract is $ 17,696,000. *546 F.Supp., at 1291-1292*.

[10] The football television committee's briefing book for 1981 recites that a fee of $ 600,000 was paid for each of the 12 national games telecast by ABC during the regular fall season and $ 426,779 was paid for each of the 46 regional telecasts in 1980. App. 250. The report further recites: "Division I members received $ 27,842,185 from 1980 football television revenue, 89.8 percent of the total. Division II's share was $ 625,195 (2.0 percent), while Division III received $ 385,195 (1.3 percent) and the NCAA $ 2,147,425 (6.9 percent)." *Id*., at 251.

[11] The District Court explained how the agreement eliminates competition for broadcasting rights:

"First, the networks have no intention to engage in bidding. Second, once the network holding first choice for any given date has made its choice and agreed to a rights fee for that game with the two teams involved, the other network is then in a monopsony position. The schools cannot threaten to sell the broadcast rights to any other network. They cannot sell to NBC without committing a violation of NCAA rules. They cannot sell to the network which had first choice over that particular date because, again, they would be in violation of NCAA rules, and the network would be in violation of its agreement with NCAA. Thus, NCAA creates a single eligible buyer for the product of all but the two schools selected by the network having first choice. Free market competition is thus destroyed under the new plan." *546 F.Supp., at 1292-1293*.

independent plan, and obtained a contract offer from the National Broadcasting Co. (NBC). This contract, which it signed in August 1981, would have allowed a more liberal number of appearances for each institution, and would have increased the overall revenues realized by CFA members. See *id., at 1286*.

In response the NCAA publicly announced that it would take disciplinary action against any CFA member that complied with the CFA-NBC contract. The NCAA made it clear that sanctions would not be limited to the football programs of CFA members, but would apply to other sports as well. On September 8, 1981, respondents commenced this action in the United States District Court for the Western District of Oklahoma and obtained a preliminary injunction preventing the NCAA from initiating disciplinary proceedings or otherwise interfering with CFA's efforts to perform its agreement with NBC. Notwithstanding the entry of the injunction, most CFA members were unwilling to commit themselves to the new contractual arrangement with NBC in the face of **[****21]** the threatened sanctions and therefore the agreement was never consummated. See *id., at 1286-1287*.

Decision of the District Court

After a full trial, the District Court held that the controls exercised by the NCAA over the televising of college football games violated the Sherman Act. The District Court defined the relevant market as "live college football television" because it found that alternative programming has a significantly different and lesser audience appeal. *Id., at 1297-1300*. [12] The District Court then concluded that the NCAA **[*96]** controls over college football are those of a "classic cartel" with an

"almost absolute control over the supply of college football which is made available to the networks, to television advertisers, and ultimately to the viewing public. Like all other cartels, NCAA members have sought and achieved a price for their product which is, in most instances, artificially high. The NCAA cartel imposes production limits on its members, and maintains mechanisms for punishing cartel members who seek to stray from these production quotas. The cartel has established a uniform price for the **[****22]** products of each of the member producers, with no regard for the differing quality of these products or the consumer demand for these various products." *Id., at 1300-1301*.

The District Court found that competition in the relevant market had been restrained in three ways: (1) NCAA fixed the price for particular telecasts; (2) its exclusive network contracts were tantamount to a group boycott of all other potential broadcasters and its threat of sanctions **[***81]** against its own members constituted a threatened boycott of potential competitors; and (3) its plan placed an artificial limit on the production of televised college football. *Id., at 1293-1295*.

In the District Court the NCAA offered two principal **[****23]** justifications for its television policies: that they protected the gate attendance of its members and that they tended to preserve a competitive balance among the football programs of the various schools. The District Court rejected the first justification because the evidence did not support the claim that college football television adversely affected gate attendance. *Id., at 1295-1296*. With respect to **[**2958]** the "competitive balance" argument, the District Court found that the evidence failed to show that the NCAA regulations on matters such as recruitment and the standards for preserving amateurism were not sufficient to maintain an appropriate balance. *Id., at 1296*.

[*97] *Decision of the Court of Appeals*

[12] The District Court held that the NCAA had monopolized the relevant market in violation of *§ 2* of the Sherman Act, *15 U. S. C. § 2*. See *546 F.Supp., at 1319-1323*. The Court of Appeals found it unnecessary to reach this issue, as do we.

The Court of Appeals held that the NCAA television plan constituted illegal *per se* price fixing, [707 F.2d, at 1152](). [13] **[****25]** It rejected each of the three arguments advanced by NCAA to establish the procompetitive character of its plan. [14] First, the court rejected the argument that the television plan promoted live attendance, noting that since the plan involved a concomitant reduction in viewership the **[****24]** plan did not result in a net increase in output and hence was not procompetitive. *Id., at 1153-1154*. Second, the Court of Appeals rejected as illegitimate the NCAA's purpose of promoting athletically balanced competition. It held that such a consideration amounted to an argument that "competition will destroy the market" -- a position inconsistent with the policy of the Sherman Act. Moreover, assuming *arguendo* that the justification was legitimate, the court agreed with the District Court's finding "that any contribution the plan made to athletic balance could be achieved by less restrictive means." *Id., at 1154*. Third, the Court of Appeals refused to view the NCAA plan as competitively justified by the need to compete effectively with other types of television programming, since it entirely eliminated competition between producers of football and hence was illegal *per se. Id., at 1155-1156*.

LEdHN[2B][] [2B]Finally, the Court of Appeals concluded that even if the television plan were not *per se* illegal, its anticompetitive limitation on price and output was not offset by any **[*98]** procompetitive justification sufficient to save the plan even when the totality of the circumstances was examined. **[***82]** *Id., at 1157-1160*. [15] **[****26]** The case was remanded to the District Court for an appropriate modification in its injunctive decree. *Id., at 1162*. [16]

II

LEdHN[3][] [3]There can be no doubt that the challenged practices of the NCAA **[****27]** constitute a "restraint of trade" in the sense that they limit members' freedom to negotiate and **[**2959]** enter into their own television contracts. In that sense, however, every contract is a restraint of trade, and as we have repeatedly recognized, the Sherman Act was intended to prohibit only unreasonable restraints of trade. [17]

---

[13] **LEdHN[2A]**[] [2A]

The Court of Appeals rejected the District Court's boycott holding, since all broadcasters were free to negotiate for a contract as carrying networks and the threat of sanctions against members for violating NCAA rules could not be considered a boycott if the rules were otherwise valid. *707 F.2d, at 1160-1161*.

[14] In the Court of Appeals as well as the District Court, petitioner argued that respondents had suffered no injury of the type the antitrust laws were designed to prevent, relying on *Brunswick Corp*. v. *Pueblo Bowl-O-Mat, Inc., 429 U.S. 477 (1977)*. Both courts rejected its position, *707 F.2d, at 1150-1152*; *546 F.Supp., at 1303-1304*. Petitioner does not seek review on that question in this Court. Brief for Petitioner 5, n. 1.

[15] The Court of Appeals rejected petitioner's position that it should set aside many of the District Court's findings as clearly erroneous. In accord with our usual practice, we must now accord great weight to a finding of fact which has been made by a district court and approved by a court of appeals. See, *e. g., Rogers v. Lodge, 458 U.S. 613, 623 (1982)*. In any event, petitioner does not now ask us to set aside any of the findings of the District Court, but rather argues only that both the District Court and the Court of Appeals erred as a matter of law. Brief for Petitioner 6, n. 2, 18-19.

[16] Judge Barrett dissented on the ground that the NCAA television plan's primary purpose was not anticompetitive. "Rather, it is designed to further the purposes and objectives of the NCAA, which are to maintain intercollegiate football as an amateur sport and an adjunct of the academic endeavors of the institutions. One of the key purposes is to insure that the student athlete is fully integrated into academic endeavors." *707 F.2d, at 1163*. He regarded the television restraints as fully justified "in that they are necessary to maintain intercollegiate football as amateur competition." *Id., at 1165*. He added: "The restraints upon Oklahoma and Georgia and other colleges and universities with excellent football programs insure that they confine those programs within the principles of amateurism so that intercollegiate athletics supplement, rather than inhibit, academic achievement." *Id., at 1167*.

[17] See, *e. g., Arizona v. Maricopa County Medical Society, 457 U.S. 332, 342-343 (1982)*; *National Society of Professional Engineers v. United States, 435 U.S. 679, 687-688 (1978)*; *Chicago Board of Trade v. United States, 246 U.S. 231, 238 (1918)*.

[*99] It is also undeniable that these practices share characteristics of restraints we have previously held unreasonable. The NCAA is an association of schools which compete against each other to attract television revenues, not to mention fans and athletes. As the District Court found, the policies of the NCAA with respect to television rights are ultimately **[****28]** controlled by the vote of member institutions. By participating in an association which prevents member institutions from competing against each other on the basis of price or kind of television rights that can be offered to broadcasters, the NCAA member institutions have created ***HN2***[] a horizontal restraint -- an agreement among competitors on the way in which they will compete with one another. [18] A restraint of this type has often been held to be unreasonable as a matter of law. Because it places a ceiling on the **[***83]** number of games member institutions may televise, the horizontal agreement places an artificial limit on the quantity of televised football that is available to broadcasters and consumers. By restraining the quantity of television rights available for sale, the challenged practices create a limitation on output; our cases have held that such limitations are unreasonable restraints of trade. [19] Moreover, the District Court found that the minimum aggregate price in fact operates to preclude any price negotiation between broadcasters and institutions, **[*100]** thereby **[****29]** constituting horizontal price fixing, perhaps the paradigm of an unreasonable restraint of trade. [20]

[**30]** ***LEdHN[4]***[] [4]***LEdHN[5A]***[] [5A]***LEdHN[6A]***[] [6A]***LEdHN[7A]***[] [7A]***HN3***[] Horizontal price fixing and output limitation are ordinarily condemned as a matter of law under an "illegal *per se*" approach because the probability that these practices are anticompetitive is so high; a *per se* rule is applied when "the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output." *Broadcast Music, Inc*. v. *Columbia Broadcasting System, Inc., 441 U.S. 1, 19-20 (1979)*.In such circumstances a restraint is presumed unreasonable without inquiry into the particular market context in which it is found. Nevertheless, we have decided that it would be inappropriate to apply a *per se* rule to this case. This decision is not based **[**2960]** on a lack of judicial experience with this **[****31]** type of arrangement, [21] **[****32]** on the fact that the NCAA is organized as a nonprofit entity, [22] or **[***84]** on **[*101]** our respect for the NCAA's historic role in the preservation

[21] While judicial inexperience with a particular arrangement counsels against extending the reach of *per se* rules, see *Broadcast Music, 441 U.S., at 9-10*; *United States v. Topco Associates, Inc., 405 U.S., at 607-608*; *White Motor Co*. v. *United States, 372 U.S. 253, 263 (1963)*, the likelihood that horizontal price and output restrictions are anticompetitive is generally sufficient to justify application of the *per se* rule without inquiry into the special characteristics of a particular industry. See *Arizona v. Maricopa County Medical Society, 457 U.S., at 349-351*; *National Society of Professional Engineers v. United States, 435 U.S., at 689-690*.

[22] ***LEdHN[5B]***[] [5B]***HN4***[] There is no doubt that the sweeping language of *§ 1* applies to nonprofit entities, *Goldfarb v. Virginia State Bar, 421 U.S. 773, 786-787 (1975)*, and in the past we have imposed antitrust liability on nonprofit entities which have engaged in anticompetitive conduct, *American Society of Mechanical Engineers, Inc*. v. *Hydrolevel Corp., 456 U.S. 556, 576 (1982)*. Moreover, the economic significance of the NCAA's nonprofit character is questionable at best. Since the District

and encouragement of intercollegiate amateur athletics. [23] Rather, what is critical is that this case involves an industry in which horizontal restraints on competition are essential if the product is to be available at all.

[**33]** As Judge Bork has noted: "[Some] activities can only be carried out jointly. Perhaps the leading example is league sports. When a league of professional lacrosse teams is formed, it would be pointless to declare their cooperation illegal on the ground that there are no other professional lacrosse teams." R. Bork, The Antitrust Paradox 278 (1978). What the NCAA and its member institutions market in this case is competition itself -- contests between competing institutions. Of course, this would be completely ineffective if there were no rules on which the competitors agreed to create and define the competition to be marketed. A myriad of rules affecting such matters as the size of the field, the number of players on a team, and the extent to which physical violence is to be encouraged or proscribed, all must be agreed upon, and all restrain the manner in which institutions compete. Moreover, the NCAA seeks to market a particular brand of football -- college football. The identification of this "product" with an academic tradition differentiates **[*102]** college football from and makes it more popular than professional sports to which it might otherwise be comparable, such **[****34]** as, for example, minor league baseball. In order to preserve the character and quality of the "product," athletes must not be paid, must be required to attend class, and the like. And the integrity of the "product" cannot be preserved except by mutual agreement; if an institution adopted such restrictions unilaterally, its effectiveness as a competitor on the playing field might soon be destroyed. Thus, the NCAA plays a vital role in enabling college football to preserve its character, and as a result enables a product to be marketed which might otherwise be unavailable. In performing this role, its actions widen consumer choice -- not only the choices available to sports fans but also **[**2961]** those available to athletes -- and hence can be viewed as procompetitive. [24]

Court found that the NCAA and its member institutions are in fact organized to maximize revenues, see *546 F.Supp., at 1288-1289*, it is unclear why petitioner is less likely to restrict output in order to raise revenues above those that could be realized in a competitive market than would be a for-profit entity. Petitioner does not rely on its nonprofit character as a basis for reversal. Tr. of Oral Arg. 24.

[23] ***LEdHN[6B]***[] [6B] ***LEdHN[7B]***[] [7B]

While as the guardian of an important American tradition, the NCAA's motives must be accorded a respectful presumption of validity, it is nevertheless well settled that good motives will not validate an otherwise anticompetitive practice. See *United States v. Griffith, 334 U.S. 100, 105-106 (1948)*; *Associated Press v. United States, 326 U.S. 1, 16, n. 15 (1945)*; *Chicago Board of Trade v. United States, 246 U.S., at 238*; *Standard Sanitary Manufacturing Co*. v. *United States, 226 U.S. 20, 49 (1912)*; *United States v. Trans-Missouri Freight Assn., 166 U.S. 290, 342 (1897)*.

Rev. 341, 344-345 (1983); Kurlantzick, Thoughts on Professional Sports and the ***Antitrust Law***; *Los Angeles Memorial Coliseum* v. *National Football League*, 15 Conn. L. Rev. 183, 189-194 (1983); Note, Antitrust and Nonprofit Entities, 94 Harv. L. Rev. 802, 817-818 (1981). See generally *Hennessey v. NCAA, 564 F.2d 1136, 1151-1154 (CA5 1977)*; *Association for Intercollegiate Athletics for Women v. NCAA, 558 F.Supp. 487, 494-495 (DC 1983)*; *Warner Amex Cable Communications, Inc*. v. *American Broadcasting Cos., 499 F.Supp. 537, 545-546 (SD Ohio 1980)*; *Board of Regents v. NCAA, 561 P. 2d 499, 506-507 (Okla. 1977)*; Note, Tackling Intercollegiate Athletics: An Antitrust Analysis, 87 Yale L. J. 655, 665-666, 673-675 (1978).

[**35]** **[*103]** **[***85]** *Broadcast Music* squarely holds that a joint selling arrangement may be so efficient that it will increase sellers' aggregate output and thus be procompetitive. See *441 U.S., at 18-23*. Similarly, as we indicated in *Continental T. V., Inc*. v. *GTE Sylvania Inc., 433 U.S. 36, 51-57 (1977)*, a restraint in a limited aspect of a market may actually enhance marketwide competition. Respondents concede that the great majority of the NCAA's regulations enhance competition among member institutions. Thus, despite the fact that this case involves restraints on the ability of member institutions to compete in terms of price and output, a fair evaluation of their competitive character requires consideration of the NCAA's justifications for the restraints.

LEdHN[8][] [8]Our analysis of this case under the Rule of Reason, of course, does not change the ultimate focus of our inquiry. Both *per se* rules and the Rule of Reason are employed "to form a judgment about the competitive significance of the restraint." *National Society of Professional Engineers v. United States, 435 U.S. 679, 692 (1978)*. **[****36]** ***HN5***[] A conclusion that a restraint of trade is unreasonable may be

"based either (1) on the nature or character of the contracts, or (2) on surrounding circumstances giving rise to the inference or presumption that they were intended to restrain trade and enhance prices. Under either branch of the test, the inquiry is confined to a consideration of impact on competitive conditions." *Id., at 690* (footnotes omitted).

LEdHN[9][] [9]***LEdHN[10]***[] [10]*Per se* rules are invoked when surrounding circumstances make the likelihood of anticompetitive conduct so great as to **[*104]** render unjustified further examination of the challenged conduct. [25] But whether the ultimate finding is the product of a presumption or actual market analysis, the essential inquiry remains the same -- whether or not the challenged restraint enhances **[***86]** competition. [26] **[****37]** ***HN6***[] Under the Sherman **[**2962]** Act the criterion to be used in judging the validity of a restraint on trade is its impact on competition. [27]

[**38]** III

Because it restrains price and output, the NCAA's television plan has a significant potential for anticompetitive effects. [28] **[****39]** The findings of the District Court indicate that this **[*105]** potential has been realized. The

[25] See *Jefferson Parish Hospital Dist. No. 2 v. Hyde, 466 U.S. 2, 15-16, n. 25 (1984)*; *Arizona v. Maricopa County Medical Society, 457 U.S., at 350-351*; *Continental T. V., Inc*. v. *GTE Sylvania Inc., 433 U.S. 36, 50, n. 16 (1977)*.

[26] Indeed, there is often no bright line separating *per se* from Rule of Reason analysis. *Per se* rules may require considerable inquiry into market conditions before the evidence justifies a presumption of anticompetitive conduct. For example, while the Court has spoken of a "*per se*" rule against tying arrangements, it has also recognized that tying may have procompetitive justifications that make it inappropriate to condemn without considerable market analysis. See *Jefferson Parish Hospital* *Dist. No. 2 v. Hyde, 466 U.S., at 11-12*.

[27] "The Sherman Act was designed to be a comprehensive charter of economic liberty aimed at preserving free and unfettered competition as the rule of trade. It rests on the premise that the unrestrained interaction of competitive forces will yield the best allocation of our economic resources, the lowest prices, the highest quality and the greatest material progress, while at the same time providing an environment conducive to the preservation of our democratic political and social institutions. But even were that premise open to question, the policy unequivocally laid down by the Act is competition. ***HN7***[] And to this end it prohibits 'Every contract, combination . . . or conspiracy, in restraint of trade or commerce among the Several States.'" *Northern Pacific R. Co*. v. *United States, 356 U.S. 1, 4-5 (1958)*.

[28] In this connection, it is not without significance that Congress felt the need to grant professional sports an exemption from the antitrust laws for joint marketing of television rights. See *15 U. S. C. §§ 1291-1295*. The legislative history of this exemption demonstrates Congress' recognition that agreements among league members to sell television rights in a cooperative fashion

District Court found that if member institutions were free to sell television rights, many more games would be shown on television, and that the NCAA's output restriction has the effect of raising the price the networks pay for television rights. [29] **[****40]** **[***87]** Moreover, the **[*106]** court found that by fixing a price for television rights to all games, the NCAA creates a price structure that is unresponsive to viewer demand and unrelated to the prices that would prevail in a competitive market. [30] **[****41]** And, of course, **[**2963]** since as a practical matter all member institutions need NCAA approval, members have no real choice but to adhere to the NCAA's television controls. [31]

---

could run afoul of the Sherman Act, and in particular reflects its awareness of the decision in *United States v. National Football League, 116 F.Supp. 319 (ED Pa. 1953)*, which held that an agreement among the teams of the National Football League that each team would not permit stations to telecast its games within 75 miles of the home city of another team on a day when that team was not playing at home and was televising its game by use of a station within 75 miles of its home city, violated *§ 1* of the Sherman Act. See S. Rep. No. 1087, 87th Cong., 1st Sess. (1961); H. R. Rep. No. 1178, 87th Cong., 1st Sess., 2-3 (1961); 107 Cong. Rec. 20059-20060 (1961) (remarks of Rep. Celler); *id*., at 20061-20062 (remarks of Rep. McCulloch); Telecasting of Professional Sports Contests: Hearings on H. R. 8757 before the Antitrust Subcommittee of the House Committee on the Judiciary, 87th Cong., 1st Sess., 1-2 (1961) (statement of Chairman Celler); *id*., at 3 (statement of Rep. McCulloch); *id*., at 10-28 (statement of Pete Rozelle); *id*., at 69-70 (letter from Assistant Attorney General Loevinger).

[29] "It is clear from the evidence that were it not for the NCAA controls, many more college football games would be televised. This is particularly true at the local level. Because of NCAA controls, local stations are often unable to televise games which they would like to, even when the games are not being televised at the network level. The circumstances which would allow so-called exception telecasts arise infrequently for many schools, and the evidence is clear that local broadcasts of college football would occur far more frequently were it not for the NCAA controls. This is not a surprising result. Indeed, this horizontal agreement to limit the availability of games to potential broadcasters is the very essence of NCAA's agreements with the networks. The evidence establishes the fact that the networks are actually paying the large fees because the NCAA agrees to limit production. If the NCAA would not agree to limit production, the networks would not pay so large a fee. Because NCAA limits production, the networks need not fear that their broadcasts will have to compete head-to-head with other college football telecasts, either on the other networks or on various local stations. Therefore, the Court concludes that the membership of NCAA has agreed to limit production to a level far below that which would occur in a free market situation." *546 F.Supp., at 1294*.

[30] "Turning to the price paid for the product, it is clear that the NCAA controls utterly destroy free market competition. NCAA has commandeered the rights of its members and sold those rights for a sum certain. In so doing, it has fixed the minimum, maximum and actual price which will be paid to the schools appearing on ABC, CBS and TBS. NCAA has created the mechanism which produces a uniform price for each national telecast, and a uniform price for each regional telecast. Because of the NCAA controls, the price which is paid for the right to televise any particular game is responsive neither to the relative quality of the teams playing the game nor to viewer preference.

"In a competitive market, each college fielding a football team would be free to sell the right to televise its games for whatever price it could get. The prices would vary for the games, with games between prominent schools drawing a larger price than games between less prominent schools. Games between the more prominent schools would draw a larger audience than other games. Advertisers would pay higher rates for commercial time because of the larger audience. The telecaster would then be willing to pay larger rights fees due to the increased prices paid by the advertisers. Thus, the price which the telecaster would pay for a particular game would be dependent on the expected size of the viewing audience. Clearly, the NCAA controls grossly distort the prices actually paid for an individual game from that to be expected in a free market." *Id., at 1318*.

[31] Since, as the District Court found, NCAA approval is necessary for any institution that wishes to compete in intercollegiate sports, the NCAA has a potent tool at its disposal for restraining institutions which require its approval. See *Silver v. New York Stock Exchange, 373 U.S. 341, 347-349, and n. 5 (1963)*; *Associated Press v. United States, 326 U.S., at 17-18*.

LEdHN[11][] [11]The anticompetitive consequences of this arrangement are apparent. Individual competitors lose their freedom to compete. [32] **[*107]** Price is higher and output lower than they would otherwise be, and both are unresponsive to consumer preference. [33] **[****43]** This latter point is perhaps **[***88]** the most significant, since "Congress designed the Sherman Act as a 'consumer welfare prescription.'" *Reiter v. Sonotone Corp., 442 U.S. 330, 343 (1979)*. ***HN8***[] A restraint that has the effect of reducing **[****42]** the importance of consumer preference in setting price and output is not consistent with this fundamental goal of anti-trust law. [34] Restrictions on price and output are the paradigmatic examples of restraints of trade that the Sherman **[*108]** Act was intended to prohibit. See *Standard Oil Co*. v. *United States, 221 U.S. 1, 52-60 (1911)*. [35] **[****44]** At the same time, the **[**2964]** television plan eliminates competitors from the market, since only those broadcasters able to bid on

[32] See *Fashion Originators' Guild of America, Inc*. v. *FTC, 312 U.S. 457, 465 (1941)*; *Standard Sanitary Manufacturing Co*. v. *United States, 226 U.S., at 47-49*; *Montague & Co*. v. *Lowry, 193 U.S. 38 (1904)*.

[33] "In this case the rule is violated by a price restraint that tends to provide the same economic rewards to all practitioners regardless of their skill, their experience, their training, or their willingness to employ innovative and difficult procedures." *Arizona v. Maricopa County Medical Society, 457 U.S., at 348*. The District Court provided a vivid example of this system in practice:

"A clear example of the failure of the rights fees paid to respond to market forces occurred in the fall of 1981. On one weekend of that year, Oklahoma was scheduled to play a football game with the University of Southern California. Both Oklahoma and USC have long had outstanding football programs, and indeed, both teams were ranked among the top five teams in the country by the wire service polls. ABC chose to televise the game along with several others on a regional basis. A game between two schools which are not well-known for their football programs, Citadel and Appalachian State, was carried on four of ABC's local affiliated stations. The USC-Oklahoma contest was carried on over 200 stations. Yet, incredibly, all four of these teams received exactly the same amount of money for the right to televise their games." *546 F.Supp., at 1291*.

[34] As the District Court observed:

"Perhaps the most pernicious aspect is that under the controls, the market is not responsive to viewer preference. Every witness who testified on the matter confirmed that the consumers, the viewers of college football television, receive absolutely no benefit from the controls. Many games for which there is a large viewer demand are kept from the viewers, and many games for which there is little if any demand are nonetheless televised." *Id., at 1319*.

[35] Even in the context of professional football, where Congress was willing to pass a limited antitrust exemption, see n. 28, *supra*, it was concerned about ensuring that telecasts not be subject to output limitations:

"Mr. GARY. On yesterday I had the opportunity of watching three different games. There were three different games on three different channels. . . .

"Would this bill prevent them from broadcasting three different games at one time and permit the league to enter into a contract so that only one game would be permitted?

"Mr. CELLER. The bill does not prevent what the gentleman saw yesterday. As a matter of fact the antitrust exemption provided by the bill shall not apply to any package contract which prohibits the person to whom league television rights are sold or transferred from televising any game within any area except the home area of a member club on the day when that club is playing a home game.

. . . .

"Mr. GARY. I am an avid sports fan. I follow football, baseball, basketball, and track, and I am very much interested in all sports. But I am also interested in the people of the United States being able to see on television the games that are played. I am interested in the television audience. I want to know that they are not going to be prohibited from seeing games that might otherwise be telecast.

"Mr. CELLER. I can assure the gentleman from Virginia that he need have no fears on that score." 107 Cong. Rec. 20060 (1961).

television rights covering the entire NCAA can compete. [36] Thus, as the District Court found, many telecasts that would occur in a competitive market are foreclosed by the NCAA's plan. [37]

[**45]** **[*109]** **[***89]** Petitioner argues, however, that its television plan can have no significant anticompetitive effect since the record indicates that it has no market power -- no ability to alter the interaction of supply and demand in the market. [38] We must reject this argument for two reasons, one legal, one factual.

LEdHN[12][] [12]***LEdHN[13]***[] [13] **[****46]** As a matter of law, ***HN10***[] the absence of proof of market power does not justify a naked restriction on price or output. To the contrary, when there is an agreement not to compete in terms of price or output, "no elaborate industry analysis is required to demonstrate the anticompetitive character of such an agreement." *Professional Engineers, 435 U.S., at 692*. [39] **[****47]** Petitioner does not quarrel with **[**2965]** the District Court's **[*110]** finding that price and output are not responsive to demand. Thus the plan is inconsistent with the Sherman Act's command that price and supply be responsive to consumer preference.

---

[36] The impact on competitors is thus analogous to the effect of block booking in the motion picture industry that we concluded violated the Sherman Act:

"In the first place, they eliminate the possibility of bidding for films theater by theater. In that way they eliminate the opportunity for the small competitor to obtain the choice first runs, and put a premium on the size of the circuit." *United States v. Paramount Pictures, Inc., 334 U.S. 131, 154 (1948)*.

[37] *546 F.Supp., at 1294*. One of respondents' economists illustrated the point:

"[It's] my opinion that if a free market operated in the market for intercollegiate television of football, that there would be substantially more regional and even more local games being televised than there are currently. I can take a specific example from my home state of Indiana.

"I am at Ball State University, which until recently was a division one-A institution, although now is a division one-AA institution in terms of intercollegiate football. When Ball State plays Indiana State, that is a hotly contested game in an intrastate sense. That is a prime example of the type of game that probably would be televised. For example, when Ball State is playing Indiana State at Terre Haute, Indiana, that [would be] a popular game to be televised in the Muncie area, and, vice versa, in Terre Haute when the game happens to be in Muncie." App. 506-507.

See also *id., at 607-608*.

[38] ***HN9***[] Market power is the ability to raise prices above those that would be charged in a competitive market. *Jefferson Parish Hospital* *Dist. No. 2 v. Hyde, 466 U.S., at 27, n. 46*; *United States Steel Corp*. v. *Fortner Enterprises, 429 U.S. 610, 620 (1977)*; *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 391 (1956)*.

[39] "The fact that a practice is not categorically unlawful in all or most of its manifestations certainly does not mean that it is universally lawful. For example, joint buying or selling arrangements are not unlawful per se, but a court would not hesitate in enjoining a domestic selling arrangement by which, say, Ford and General Motors distributed their automobiles nationally through a single selling agent. Even without a trial, the judge will know that these two large firms are major factors in the automobile market, that such joint selling would eliminate important price competition between them, that they are quite substantial enough to distribute their products independently, and that one can hardly imagine a pro-competitive justification actually probable in fact or strong enough in principle to make this particular joint selling arrangement 'reasonable' under Sherman Act *§ 1*. The essential point is that the rule of reason can sometimes be applied in the twinkling of an eye." P. Areeda, The "Rule of Reason" in Antitrust Analysis: General Issues 37-38 (Federal Judicial Center, June 1981) (parenthetical omitted).

[40] We have never required proof of market power in such a case. [41] This naked restraint on price and output requires some competitive justification even in the absence of a detailed market analysis. [42]

[**48]**

[*111] **[***90]** ***LEdHN[14]***[] [14]***LEdHN[15]***[] [15]As a factual matter, it is evident that petitioner does possess market power. The District Court employed the correct test for determining whether college football broadcasts constitute a separate market -- whether there are other products that are reasonably substitutable for televised NCAA football games. [43] Petitioner's argument that it cannot obtain supracompetitive prices from broadcasters since advertisers, and hence broadcasters, can switch from college football to other types of programming simply ignores the findings of the District Court. It found that intercollegiate football telecasts generate an audience uniquely attractive to advertisers and that competitors are unable to offer programming that can attract a similar audience. [44] These findings amply support its conclusion that the NCAA possesses market power. [45] Indeed, the District Court's subsidiary finding that advertisers will pay a premium price per viewer to reach audiences watching college football because of their demographic **[****49]** characteristics [46] **[**2966]** is vivid evidence of the uniqueness of this product. [47] **[****51]** Moreover, the District Court's market **[*112]** analysis is firmly supported by our decision in *International Boxing Club of New York, Inc*. v. *United States, 358 U.S. 242 (1959)*, that championship boxing events are uniquely attractive to fans [48] and hence constitute a market separate

---

[40] Moreover, because under the plan member institutions may not compete in terms of price and output, it is manifest that significant forms of competition are eliminated. See *Catalano, Inc*. v. *Target Sales, Inc., 446 U.S., at 648-649 (per curiam); Professional Engineers, 435 U.S., at 692-695*; *Paramount Famous Lasky Corp*. v. *United States, 282 U.S. 30, 43-44 (1930)*.

[41] See *United States v. McKesson & Robbins, Inc., 351 U.S. 305, 309-310 (1956)*; *United States v. Socony-Vacuum Oil Co., 310 U.S., at 221*. See also *Klor's, Inc*. v. *Broadway-Hale Stores, Inc., 359 U.S. 207, 213 (1959)*.

[42] The Solicitor General correctly observes:

"There was no need for the respondents to establish monopoly power in any precisely defined market for television programming in order to prove the restraint unreasonable. Both lower courts found not only that NCAA has power over the market for intercollegiate sports, but also that in the market for television programming -- no matter how broadly or narrowly the market is defined -- the NCAA television restrictions have reduced output, subverted viewer choice, and distorted pricing. Consequently, unless the controls have some countervailing procompetitive justification, they should be deemed unlawful regardless of whether petitioner has substantial market power over advertising dollars. While the 'reasonableness' of a particular alleged restraint often depends on the market power of the parties involved, because a judgment about market power is the means by which the effects of the conduct on the market place can be assessed, market power is only one test of 'reasonableness.' And where the anti-competitive effects of conduct can be ascertained through means short of extensive market analysis, and where no countervailing competitive virtues are evident, a lengthy analysis of market power is not necessary." Brief for United States as *Amicus Curiae* 19-20 (footnote and citation omitted).

[43] See, *e. g., United States v. Grinnell Corp., 384 U.S. 563, 571 (1966)*; *United States v. E. I. du Pont de Nemours & Co., 351 U.S., at 394-395*; *Times-Picayune Publishing Co*. v. *United States, 345 U.S. 594, 612, n. 31 (1953)*.

[44] See *546 F.Supp., at 1297-1300*. See also Hochberg & Horowitz, Broadcasting and CATV: The Beauty and the Bane of Major College Football, 38 Law & Contemp. Prob. 112, 118-120 (1973).

[45] See, *e. g., Jefferson Parish Hospital Dist. No. 2 v. Hyde, 466 U.S., at 27, n. 46*; *id., at 37-38, n. 7* (O'CONNOR, J., concurring in judgment); *Fortner Enterprises, Inc*. v. *United States Steel Corp., 394 U.S. 495, 504-506, and n. 2 (1969)*.

[46] See *546 F.Supp., at 1298-1300*.

[47] As the District Court observed, *id., at 1297*, the most analogous programming in terms of the demographic characteristics of its audience is professional football, and as a condition of its limited exemption from the antitrust laws the professional football leagues are prohibited from telecasting games at times that conflict with intercollegiate football. See *15 U. S. C. § 1293*.

from that for nonchampionship events. See *id., at 249-252*. [49] Thus, respondents **[***91]** have demonstrated that there is a separate market for telecasts of college football which "[rests] on generic qualities differentiating" viewers. *Times-Picayune Publishing Co*. v. *United States, 345 U.S. 594, 613 (1953)*. It inexorably follows that if college football broadcasts be defined as a separate market -- and we are convinced they are -- then the NCAA's complete control over those broadcasts provides a solid basis for the District Court's conclusion that the NCAA possesses market power with respect to those broadcasts. ***HN11***[] "When a product is controlled by one interest, **[****50]** without substitutes available in the market, there is monopoly power." *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 394 (1956)*. [50]

[**52]**

[*113] ***LEdHN[1B]***[] [1B]***LEdHN[16]***[] [16]Thus, the NCAA television plan on its face constitutes a restraint upon the operation of a free market, and the findings of the District Court establish that it has operated to raise prices and reduce output. ***HN12***[] Under the Rule of Reason, these hallmarks of anticompetitive behavior place upon petitioner a heavy burden of establishing an affirmative defense which competitively justifies this apparent deviation from the operations of a free market. See *Professional Engineers, 435 U.S., at 692-696*.We turn now to the NCAA's proffered justifications.

IV

Relying on *Broadcast Music*, petitioner argues that its television plan constitutes a cooperative "joint venture" which assists in the marketing of broadcast rights and hence is procompetitive. While joint ventures have no immunity from the antitrust laws, [51] as *Broadcast Music* indicates, a joint selling arrangement may "[make] possible a new **[****53]** product by reaping otherwise unattainable efficiencies." *Arizona v. Maricopa County Medical Society, 457 U.S. 332, 365 (1982)* (POWELL, J., dissenting) (footnote omitted). The essential contribution **[**2967]** made by the NCAA's arrangement is to define the number of games that may be televised, to establish the price for each exposure, and to define the basic terms of each contract between the network and a home team. The NCAA does not, however, act as a selling agent for any school or for any conference of schools. The selection of individual games, and the negotiation of particular agreements, are matters left to the networks and the individual schools. Thus, the effect of the network plan is not to eliminate **[***92]** individual sales of broadcasts, since these still occur, albeit subject to fixed prices and output limitations. Unlike *Broadcast Music*'s blanket license covering broadcast rights **[*114]** to a large number of individual compositions, here the same rights are still sold on an individual basis, only in a noncompetitive market.

[**54]** The District Court did not find that the NCAA's television plan produced any procompetitive efficiencies which enhanced the competitiveness of college football television rights; to the contrary it concluded that NCAA

---

[48] We approved of the District Court's reliance on the greater revenue-producing potential and higher television ratings of championship events as opposed to other events to support its market definition. See *358 U.S., at 250-251*.

[49] For the same reasons, it is also apparent that the unique appeal of NCAA football telecasts for viewers means that "from the standpoint of the consumer -- whose interests the statute was especially intended to serve," *Jefferson Parish Hospital* *Dist. No. 2 v. Hyde, 466 U.S., at 15*, there can be no doubt that college football constitutes a separate market for which there is no reasonable substitute. Thus we agree with the District Court that it makes no difference whether the market is defined from the standpoint of broadcasters, advertisers, or viewers.

[50] See, *e. g., Jefferson Parish Hospital* *Dist. No. 2 v. Hyde, 466 U.S., at 24-25*; *Northern Pacific R. Co*. v. *United States, 356 U.S., at 7-8*; *Times-Picayune*, 345 U.S., at 611-613. Petitioner seems to concede as much. See Brief for Petitioner 36-37; Tr. of Oral Arg. 6.

[51] See *Citizen Publishing Co*. v. *United States, 394 U.S. 131, 134-136 (1969)*; *United States v. Sealy, Inc., 388 U.S., at 353*; *Timken Roller Bearing Co*. v. *United States, 341 U.S. 593, 597-598 (1951)*; *Associated Press v. United States, 326 U.S., at 15-16*.

football could be marketed just as effectively without the television plan. [52] There is therefore no predicate in the findings for petitioner's efficiency justification. Indeed, petitioner's argument is refuted by the District Court's finding concerning price and output. If the NCAA's television plan produced procompetitive efficiencies, the plan would increase output and reduce the price of televised games. The District Court's contrary findings accordingly undermine petitioner's position. In light of these findings, it cannot be said that "the agreement on price is necessary to market the product at all." *Broadcast Music, 441 U.S., at 23*. [53] In *Broadcast Music*, the availability of a package product that no individual could offer enhanced the total volume of music that was sold. Unlike this case, there was no limit of any kind placed on the volume that might be sold in the entire market and each individual remained free to sell his own music **[****55]** without restraint. Here production has been limited, not enhanced. [54] **[*115]** No individual school is free to televise its own games without restraint. The NCAA's efficiency justification is not supported by the record.

[**56]** Neither is the NCAA's television plan necessary to enable the NCAA to penetrate the market through an attractive package sale. Since broadcasting rights to college football constitute a unique product for which there is no ready substitute, there is no need for collective action in order to enable the product to compete against its nonexistent competitors. [55] This is borne out by the District Court's finding that the NCAA's television plan *reduces* the volume of television rights sold.

V

[*93]** Throughout the history of its regulation of intercollegiate football telecasts, the NCAA has indicated its concern with **[**2968]** **[****57]** protecting live attendance. This concern, it should be noted, is not with protecting live attendance at games which *are* shown on television; that type of interest is not at issue in this case. Rather, the concern is that fan interest in a televised game may adversely affect ticket sales for games that will not appear on television. [56]

Although the NORC studies in the 1950's provided some support for the thesis that live attendance would suffer if **[*116]** unlimited television were permitted, [57] **[****58]** the District Court found that there was no evidence to

---

[52] See *546 F.Supp., at 1306-1308*.

[53] Compare *id., at 1307-1308* ("The colleges are clearly able to negotiate agreements with whatever broadcasters they choose. We are not dealing with tens of thousands of relatively brief musical works, but with three-hour football games played eleven times each year"), with *Broadcast Music, 441 U.S., at 22-23* (footnotes omitted) ("[To] the extent the blanket license is a different product, ASCAP is not really a joint sales agency offering the individual goods of many sellers, but is a separate seller offering its blanket license, of which the individual compositions are raw material. ASCAP, in short, made a market in which individual composers are inherently unable to compete fully effectively").

[54] Ensuring that individual members of a joint venture are free to increase output has been viewed as central in evaluating the competitive character of joint ventures. See Brodley, Joint Ventures and Antitrust Policy, 95 Harv. L. Rev. 1523, 1550-1552, 1555-1560 (1982). See also Note, United Charities and the Sherman Act, 91 Yale L. J. 1593 (1982).

[55] If the NCAA faced "interbrand" competition from available substitutes, then certain forms of collective action might be appropriate in order to enhance its ability to compete. See *Continental T. V., Inc*., 433 U.S., at 54-57. Our conclusion concerning the availability of substitutes in Part III, *supra*, forecloses such a justification in this case, however.

[56] The NCAA's plan is not even arguably related to a desire to protect live attendance by ensuring that a game is not televised in the area where it is to be played. No cooperative action is necessary for that kind of "blackout." The home team can always refuse to sell the right to telecast its game to stations in the immediate area. The NCAA does not now and never has justified its television plan by an interest in assisting schools in "blacking out" their home games in the areas in which they are played.

[57] During this period, the NCAA also expressed its concern to Congress in urging it to limit the antitrust exemption professional football obtained for telecasting its games to contests not held on Friday or Saturday when such telecasts might interfere with attendance at intercollegiate games. See H. R. Rep. No. 1178, 87th Cong., 1st Sess., 3-4 (1961); 107 Cong. Rec. 20060-20061

support that theory in today's market. [58] **[****59]** Moreover, as the District Court found, the television plan has evolved in a manner inconsistent with its original design to protect gate attendance. Under the current plan, games are shown on television during all hours that college football games are played. The plan simply does not protect live attendance by ensuring that games will not be shown on television at the same time as live events. [59]

LEdHN[17][] [17]There is, however, a more fundamental reason for rejecting this defense. The NCAA's argument that its television plan is necessary to protect live attendance is not based on a desire to maintain the integrity of college football as a distinct and attractive product, **[****60]** but rather on a fear that the product will not prove sufficiently attractive to draw live attendance when faced with competition from televised games. At bottom the NCAA's position is that ticket sales for most college games are unable to compete in a free market. [60] The **[*117]** television plan protects ticket sales by limiting **[***94]** output -- just as any monopolist increases revenues by reducing output. By seeking to insulate live ticket sales from the full spectrum of competition because of its assumption that the product itself is insufficiently attractive to consumers, petitioner forwards a justification that is inconsistent with the basic policy of the Sherman Act. "[The] Rule of Reason does not support a defense based on the assumption that competition itself is unreasonable." *Professional Engineers, 435 U.S., at 696*.

[**61]** VI

Petitioner argues that the interest in maintaining a competitive balance among amateur athletic teams is legitimate and important and that it justifies the regulations challenged in this case. We agree **[**2969]** with the first part of the argument but not the second.

Our decision not to apply a *per se* rule to this case rests in large part on our recognition that a certain degree of cooperation is necessary if the type of competition that petitioner and its member institutions seek to market is to be preserved. [61] It is reasonable to assume that most of the regulatory controls of the NCAA are justifiable means of fostering competition among amateur athletic teams and therefore procompetitive because they enhance public interest in intercollegiate athletics. The specific restraints on football telecasts that are challenged in this case do not, however, fit into the same mold as do rules defining the conditions of the contest, the eligibility of participants, or the manner in which members of a joint enterprise shall share the responsibilities and the benefits of the total venture.

[**62]** The NCAA does not claim that its television plan has equalized or is intended to equalize competition within any **[*118]** one league. [62] **[****63]** The plan is nationwide in scope and there is no single league or

---

(1961) (remarks of Rep. Celler); *id*., at 20662; Hearings, *supra* n. 28, at 66-68 (statement of William R. Reed). The provision enacted as a result is now found in *15 U. S. C. § 1293*.

[58] See *546 F.Supp., at 1295-1296, 1315*.

[59] "[The] greatest flaw in the NCAA's argument is that it is manifest that the new plan for football television does not limit televised football in order to protect gate attendance. The evidence shows that under the new plan, many areas of the country will have access to nine hours of college football television on several Saturdays in the coming season. Because the 'ground rules' eliminate head-to-head programming, a full nine hours of college football will have to be shown on television during a nine-to-twelve hour period on almost every Saturday of the football season in most of the major television markets in the country. It can hardly be said that such a plan is devised in order to protect gate attendance." *Id., at 1296*.

[60] Ironically, to the extent that the NCAA's position has merit, it rests on the assumption that football telecasts are a unique product. If, as the NCAA argues, see *supra, at 111-112*, all television programming is essentially fungible, it would not be possible to protect attendance without banning all television during the hours at which intercollegiate football games are held.

[61] See Part II, *supra*.

[62] It seems unlikely, for example, that there would have been a greater disparity between the football prowess of Ohio State University and that of Northwestern University in recent years without the NCAA's television plan. The District Court found that in fact the NCAA has been strikingly unsuccessful if it has indeed attempted to prevent the emergence of a "power elite" in

tournament in which all college football teams compete. There is no evidence of any intent to equalize the strength of teams in Division I-A with those in Division II or Division III, and not even a colorable basis for giving colleges that have no football program at all a voice in the management of the revenues generated by the football programs at other schools. [63] The **[***95]** interest in maintaining a competitive balance that is asserted by the NCAA as a justification for regulating all television of intercollegiate football is not related to any neutral standard or to any readily identifiable group of competitors.

[**64]** **[*119]** The television plan is not even arguably tailored to serve such an interest. It does not regulate the amount of money that any college may spend on its football program, nor the way in which the colleges may use the revenues that are generated by their football programs, whether derived from the sale of television rights, the sale of tickets, or the sale of concessions or program advertising. [64] The plan simply imposes a restriction on one source of revenue that is more important to some colleges than to others. There is no evidence that this restriction produces any greater measure of equality throughout the NCAA than would a restriction on alumni donations, tuition rates, or any other revenue-producing activity. At the same time, as **[**2970]** the District Court found, the NCAA imposes a variety of other restrictions designed to preserve amateurism which are much better tailored to the goal of competitive balance than is the television plan, and which are "clearly sufficient" to preserve competitive balance to the extent it is within the NCAA's power to do so. [65] And much more than speculation supported the District Court's findings on this score. No other NCAA **[****65]** sport employs a similar plan, and in particular the court found that in the most closely analogous sport, college basketball, competitive balance has been maintained without resort to a restrictive television plan. [66]

Perhaps the most important reason for rejecting the argument that the interest in competitive balance is served by the television plan is the District Court's unambiguous and well-supported finding that many more games would be televised in a free market than under the NCAA plan. The hypothesis that legitimates the maintenance of competitive balance as a procompetitive justification under the Rule of **[*120]** Reason is that equal competition will maximize consumer demand **[****66]** for the product. [67] The finding that consumption will materially increase if the controls are removed is a compelling demonstration that they do not in fact serve any such legitimate purpose. [68]

---

intercollegiate football. See *546 F.Supp., at 1310-1311*. Moreover, the District Court's finding that there would be more local and regional telecasts without the NCAA controls means that Northwestern could well have generated more television income in a free market than was obtained under the NCAA regime.

[63] Indeed, the District Court found that the basic reason the television plan has endured is that the NCAA is in effect controlled by schools that are not restrained by the plan:

"The plaintiffs and other CFA members attempted to persuade the majority of NCAA members that NCAA had gone far beyond its legitimate role in football television. Not surprisingly, none of the CFA proposals were adopted. Instead the membership uniformly adopted the proposals of the NCAA administration which 'legitimized' NCAA's exercises of power. The result was not surprising in light of the makeup of the voting membership. Of approximately 800 voting members of the NCAA, 500 or so are in Divisions II and III and are not subjected to NCAA television controls. Of the 275 Division I members, only 187 play football, and only 135 were members of Division I-A at the time of the January Convention. Division I-A was made up of the most prominent football-playing schools, and those schools account for most of the football games shown on network television. Therefore, of some 850 voting members, less than 150 suffer any direct restriction on their right to sell football games to television." *Id., at 1317*.

[64] Moreover, the District Court found that those schools which would realize increased revenues in a free market would not funnel those revenues into their football programs. See *id., at 1310*.

[65] See *id., at 1296, 1309-1310*.

[66] See *id., at 1284-1285, 1299*.

[67] See *Continental T. V., Inc*., 433 U.S., at 54-57. See also n. 55, *supra*.

VII

[*96]** ***LEdHN[1C]***[] [1C]The NCAA plays a critical role in the maintenance of a revered tradition of amateurism in college sports. There can be no question but that it needs ample latitude to play that role, or that the preservation of the student-athlete **[****67]** in higher education adds richness and diversity to intercollegiate athletics and is entirely consistent with the goals of the Sherman Act. But consistent with the Sherman Act, the role of the NCAA must be to *preserve* a tradition that might otherwise die; rules that restrict output are hardly consistent with this role. Today we hold only that the record supports the District Court's conclusion that by curtailing output and blunting the ability of member institutions to respond to consumer preference, the NCAA has restricted rather than enhanced the place of intercollegiate athletics in the Nation's life. Accordingly, the judgment of the Court of Appeals is

Affirmed.

Dissent by: WHITE

Dissent

JUSTICE WHITE, with whom JUSTICE REHNQUIST joins, dissenting.

The NCAA is an unincorporated, nonprofit, educational association whose membership includes almost 800 nonprofit public and private colleges and universities and more than **[*121]** 100 nonprofit athletic conferences and other organizations. Formed in 1905 in response to a public outcry concerning abuses in intercollegiate athletics, the NCAA, through its annual convention, establishes policies and rules governing its members' **[****68]** participation in college sports, conducts national championships, exerts control over some of the economic aspects of revenue-producing sports, and engages in some more-or-less commercial activities. See Note, Tackling Intercollegiate Athletics: An Antitrust Analysis, 87 Yale L. J. 655, 656-657 (1978). Although some of the NCAA's activities, viewed in isolation, bear a resemblance to those undertaken by professional sports leagues and associations, the Court errs in treating intercollegiate athletics under the NCAA's control as a purely commercial venture in which colleges and universities participate solely, or **[**2971]** even primarily, in the pursuit of profits. Accordingly, I dissent.

I

"While it would be fanciful to suggest that colleges are not concerned about the profitability of their ventures, it is clear that other, non-commercial goals play a central role in their sports programs." J. Weistart & C. Lowell, The Law of Sports § 5.12 (1979). The NCAA's member institutions have designed their competitive athletic programs "to be a vital part of the educational system." Constitution and Interpretations of the NCAA, Art. II, *§ 2(a)* (1982-1983), reprinted **[****69]** in App. 216. Deviations from this goal, produced by a persistent and perhaps inevitable desire to "win at all costs," have in the past led, and continue to lead, to a wide range of competitive excesses that prove harmful to students and institutions alike. See G. Hanford, Report to the American Council on Education, An Inquiry into the Need for and Feasibility of a National Study of Intercollegiate Athletics 74-76 (1974) (Hanford); **[***97]** Marco, The Place of Intercollegiate Athletics in Higher Education: The Responsibility of the Faculty, 31 J. Higher Educ. 422, 426 (1968). The fundamental policy **[*122]** underlying the NCAA's regulatory program, therefore, is to minimize such deviations and "to maintain intercollegiate athletics as an integral part of the educational program and the athlete as an integral part of the student body and, by so doing, retain a clear line of demarcation between college athletics and professional sports." Constitution and Interpretations of the NCAA, Art. II, *§ 2(a)*, reprinted in App. 216. See *546 F.Supp. 1276, 1309 (WD Okla. 1982)*.

---

[68] This is true not only for television viewers, but also for athletes. The District Court's finding that the television exposure of all schools would increase in the absence of the NCAA's television plan means that smaller institutions appealing to essentially local or regional markets would get more exposure if the plan is enjoined, enhancing their ability to compete for student athletes.

The NCAA, in short, "[exists] primarily to enhance the contribution made by amateur athletic **[****70]** competition to the process of higher education as distinguished from realizing maximum return on it as an entertainment commodity." *Association for Intercollegiate Athletics for Women v. NCAA, 558 F.Supp. 487, 494 (DC 1983)*, aff'd, *236 U. S. App. D. C. 311, 735 F.2d 577 (1984)*. In pursuing this goal, the organization and its members seek to provide a public good -- a viable system of amateur athletics -- that most likely could not be provided in a perfectly competitive market. See *Hennessey v. NCAA, 564 F.2d 1136, 1153 (CA5 1977)*. "Without regulation, the desire of member institutions to remain athletically competitive would lead them to engage in activities that deny amateurism to the public. No single institution could confidently enforce its own standards since it could not trust its competitors to do the same." Note, Antitrust and Nonprofit Entities, 94 Harv. L. Rev. 802, 817-818 (1981). The history of intercollegiate athletics prior to the advent of the NCAA provides ample support for this conclusion. By mitigating what appears to be a clear failure of the free market to serve the ends and goals of higher **[****71]** education, the NCAA ensures the continued availability of a unique and valuable product, the very existence of which might well be threatened by unbridled competition in the economic sphere.

In pursuit of its fundamental goal and others related to it, the NCAA imposes numerous controls on intercollegiate athletic competition among its members, many of which "are similar to those which are summarily condemned when **[*123]** undertaken in a more traditional business setting." Weistart & Lowell, *supra*, § 5.12.b. Thus, the NCAA has promulgated and enforced rules limiting both the compensation of student-athletes, see, *e. g., Justice v. NCAA, 577 F.Supp. 356 (Ariz. 1983)*, and the number of coaches a school may hire for its football and basketball programs, see, *e. g., Hennessey v. NCAA, supra*; it also has prohibited athletes who formerly have been compensated for playing from participating in intercollegiate competition, see, *e. g., Jones v. NCAA, 392 F.Supp. 295 (Mass. 1975)*, restricted the number of athletic scholarships its members may award, and established minimum academic standards for recipients of those scholarships; **[****72]** and it has pervasively regulated the recruitment process, student eligibility, practice schedules, squad size, the number of games **[**2972]** played, and many other aspects of intercollegiate athletics. See *707 F.2d 1147, 1153 (CA10 1983)*; *546 F.Supp., at 1309*. One clear effect of most, if not all, of these regulations is to prevent institutions **[***98]** with competitively and economically successful programs from taking advantage of their success by expanding their programs, improving the quality of the product they offer, and increasing their sports revenues. Yet each of these regulations represents a desirable and legitimate attempt "to keep university athletics from becoming professionalized to the extent that profit making objectives would overshadow educational objectives." *Kupec v. Atlantic Coast Conference, 399 F.Supp. 1377, 1380 (MDNC 1975)*. Significantly, neither the Court of Appeals nor this Court questions the validity of these regulations under the Rule of Reason. See *ante*, at 100-102, 117; *707 F.2d, at 1153*.

Notwithstanding the contrary conclusion of the District Court, *546 F.Supp., at 1316*, **[****73]** and the majority, *ante*, at 117, I do not believe that the restraint under consideration in this case -- the NCAA's television plan -- differs fundamentally for antitrust purposes from the other seemingly anticompetitive aspects of the organization's broader program of self-regulation. **[*124]** The television plan, like many of the NCAA's actions, furthers several complementary ends. Specifically, the plan is designed

"to reduce, insofar as possible, the adverse effects of live television . . . upon football game attendance and, in turn, upon the athletic and related educational programs dependent upon the proceeds therefrom; to spread football television participation among as many colleges as practicable; to reflect properly the image of universities as educational institutions; to promote college football through the use of television, to advance the overall interests of intercollegiate athletics, and to provide college football television to the public to the extent compatible with these other objectives." App. 35.

See also *id., at 244, 323, 640, 651, 672*. More generally, in my view, the television plan reflects the NCAA's fundamental policy of preserving **[****74]** amateurism and integrating athletics and education. Nor does the District Court's finding that the plan is intended to maximize television revenues, *546 F.Supp., at 1288-1289, 1315-1316*, warrant any implication that the NCAA and its member institutions pursue this goal without regard to the organization's stated policies.

Before addressing the infirmities in the Court's opinion, I should state my understanding of what the Court holds. To do so, it is necessary first to restate the essentials of the NCAA's television plan and to refer to the course of this case in the lower courts. Under the plan at issue, 4-year contracts were entered into with the American Broadcasting Cos. (ABC), Columbia Broadcasting System (CBS), and Turner Broadcasting System (Turner) after competitive bidding. Every fall, ABC and CBS were to present 14 exposures of college football and Turner would show 19 evening games. The overall price for each network was stated in the contracts. The networks select the games to be telecast and pay directly to the colleges involved what has developed to be **[*125]** a uniform fee for each game telecast. Unless within one of the exceptions, only the **[****75]** designated number of games may be broadcast, and no NCAA member **[***99]** may arrange for televising its games other than pursuant to the plan. Under this scheme, of course, NCAA members must compete against one another for television appearances, although this competition is limited somewhat by the fact that no college may appear on television more than six times in any 2-year period. In 1983, 242 games were televised, 89 network games and 153 under the exceptions provided in the television plan. In 1983, 173 schools appeared on television, 89 on network games and an additional 84 teams under the exceptions. Report of the 1983 NCAA Football Television Committee to **[**2973]** the 78th Annual Convention of the NCAA 61-65 (1984). [1]

[**76]** The District Court held that the plan constituted price fixing and output limitation illegal *per se* under *§ 1* of the Sherman Act; it also held that the scheme was an illegal group boycott, was monopolization forbidden by *§ 2*, and was in any event an unreasonable restraint of trade. It then entered an injunction that for all practical purposes excluded the NCAA from interfering with or regulating its members' arrangements for televising their football games. The Court of Appeals, while disagreeing with the boycott and monopolization holdings, otherwise upheld the District Court's judgment that the television plan violated the Sherman Act, focusing almost entirely on the price-fixing and output-limiting aspects of the television plan. The Court of Appeals, however, differed with the District Court with respect to the injunction. After noting that the injunction vested exclusive control of television rights in the individual schools, the court stated that, "[while] we hold that the NCAA cannot **[*126]** lawfully maintain exclusive control of the rights, how far such rights may be commonly regulated involves speculation that should not be made on the record of the instant **[****77]** case." *707 F.2d, at 1162*. The court expressly stated, for example, that the NCAA could prevent its members from telecasting games on Friday night in competition with high school games, *ibid*., emphasized that the disparity in revenue between schools could be reduced by "[a] properly drawn system of pass-over payments to ensure adequate athletic funding for schools that do not earn substantial television revenues," *id., at 1159*, and indicated that it was not outlawing "membership-wide [contracts] with opt-out and pass-over payment provisions, or blackout rules." *Id., at 1162*. It nevertheless left the District Court's injunction in full force and remanded the case for further proceedings in light of its opinion. Anticipating that the Court would grant certiorari, I stayed the judgment of the Court of Appeals. *463 U.S. 1311 (1983)*.

In affirming the Court of Appeals, the Court first holds that the television plan has sufficient redeeming virtues to escape condemnation as a *per se* violation of the Sherman Act, this because of the inherent characteristics of competitive athletics and the justifiable role of the **[****78]** NCAA in regulating college athletics. It nevertheless **[***100]** affirms the Court of Appeals' judgment that the NCAA plan is an unreasonable restraint of trade because of what it deems to be the plan's price-fixing and output-limiting aspects. As I shall explain, in reaching this result, the Court traps itself in commercial antitrust rhetoric and ideology and ignores the context in which the restraints have been imposed. But it is essential at this point to emphasize that neither the Court of Appeals nor this Court purports to hold that the NCAA may not (1) require its members who televise their games to pool and share the compensation received among themselves, with other schools, and with the NCAA; (2) limit the number of times any member may arrange to have its games shown on **[*127]** television; or (3) enforce reasonable blackout rules to avoid head-to-head competition for television audiences. As I shall demonstrate, the Court wisely and correctly does not condemn such regulations. What the Court does affirm is the Court of Appeals' judgment that the NCAA may not limit the number of games that are broadcast on television and that it may not contract for an overall

[1] Television plans with similar features have been in place since 1951. The 1951-1953 plans were submitted to the Antitrust Division of the Department of Justice for review. The Department took the matter "under study," App. 284-285, and, until this litigation, has apparently never taken the position that the NCAA's television plans were unlawful.

price **[****79]** that has the effect of setting the price for individual game broadcast rights. [2] I disagree with the Court in these respects.

[2974]** II

"In a competitive market," the District Court observed, "each football-playing institution would be an independent seller of the right to telecast its football games. Each seller would be free **[****80]** to sell that right to any entity it chose," and "for whatever price it could get." *546 F.Supp., at 1318*. Under the NCAA's television plan, member institutions' competitive freedom is restrained because, for the most part, television rights are bought and sold, not on a per-game basis, but as a package deal. With limited exceptions not particularly relevant to antitrust scrutiny of the plan, broadcasters wishing to televise college football must be willing and able to purchase a package of television rights without knowing in advance the particular games to which those rights apply. The real negotiations over price and terms take place between the broadcasters and the NCAA rather **[*128]** than between the broadcasters and individual schools. Knowing that some games will be worth more to them than others, the networks undoubtedly exercise whatever bargaining power they possess to ensure that the minimum aggregate compensation they agree to provide for the package bears some relation to the average value to them of the games they anticipate televising. Because some schools' games contribute disproportionately to the total value of the package, see *id., at 1293*, **[****81]** the manner in which the minimum aggregate compensation is distributed among schools whose games **[***101]** are televised has given rise to a situation under which less prominent schools receive more in rights fees than they would receive in a competitive market and football powers like respondents receive less. *Id., at 1315*.

As I have said, the Court does not hold, nor did the Court of Appeals hold, that this redistributive effect alone would be sufficient to subject the television plan to condemnation under *§ 1* of the Sherman Act. Nor should it, for an agreement to share football revenues to a certain extent is an essential aspect of maintaining some balance of strength among competing colleges and of minimizing the tendency to professionalism in the dominant schools. Sharing with the NCAA itself is also a price legitimately exacted in exchange for the numerous benefits of membership in the NCAA, including its many-faceted efforts to maintain a system of competitive, amateur athletics. For the same reasons, limiting the number of television appearances by any college is an essential attribute of a balanced amateur athletic system. Even with shared television **[****82]** revenues, unlimited appearances by a few schools would inevitably give them an insuperable advantage over all others and in the end defeat any efforts to maintain a system of athletic competition among amateurs who measure up to college scholastic requirements.

The Court relies instead primarily on the District Court's findings that (1) the television plan restricts output; and (2) the plan creates a noncompetitive price structure that is unresponsive to viewer demand. *Ante*, at 104-106. See, **[*129]** *e. g.*, *546 F.Supp., at 1318-1319*. These findings notwithstanding, I am unconvinced that the television plan has a substantial anticompetitive effect.

First, it is not clear to me that the District Court employed the proper measure of output. I am not prepared to say that the District Court's finding that "many more college football games would be televised" in the absence of the NCAA controls, *id., at 1294*, is clearly erroneous. To the extent that output is measured solely in terms of the number of televised games, I need not **[**2975]** deny that it is reduced by the NCAA's television plan. But this measure of output is not the proper **[****83]** one. The District Court found that eliminating the plan would reduce the number of games on network television and increase the number of games shown locally and regionally. *Id., at 1307*. It made no finding concerning the effect of the plan on total viewership, which is the more appropriate measure of output or, at least, of the claimed anticompetitive effects of the NCAA plan. This is the NCAA's position,

---

[2] This litigation was triggered by the NCAA's response to an attempt by the College Football Association (CFA), an organization of the more dominant football-playing schools and conferences, to develop an independent television plan. To the extent that its plan contains features similar to those condemned as anticompetitive by the Court, the CFA may well have antitrust problems of its own. To the extent that they desire continued membership in the NCAA, moreover, participation in a television plan developed by the CFA will not exempt football powers like respondents from the many kinds of NCAA controls over television appearances that the Court does not purport to invalidate.

and it seems likely to me that the television plan, by increasing network coverage at the expense of local broadcasts, actually expands the total television audience for NCAA football. The NCAA would surely be an irrational "profit maximizer" if this were not the case. In the absence of a contrary finding by the District Court, I cannot conclude that respondents carried their burden of showing that the television plan has an adverse effect on output and is therefore anticompetitive.

Second, and even more important, I am unconvinced that respondents have proved that any reduction in the number of televised college football **[***102]** games brought about by the NCAA's television plan has resulted in an anticompetitive increase in the price of television rights. **[****84]** The District Court found, of course, that "the networks are actually paying the large fees because the NCAA agrees to limit production. If the NCAA would not agree to limit production, the networks would not pay so large a fee." *Id., at 1294*. Undoubtedly, this is true. But the market for television rights to college football competitions should not be equated to the markets **[*130]** for wheat or widgets. Reductions in output by monopolists in most product markets enable producers to exact a higher price for *the same product*. By restricting the number of games that can be televised, however, the NCAA creates a *new product* -- exclusive television rights -- that are more valuable to networks than the products that its individual members could market independently.

The television plan makes a certain number of games available for purchase by television networks and limits the incidence of head-to-head competition between football telecasts for the available viewers. Because competition is limited, the purchasing network can count on a larger share of the audience, which translates into greater advertising revenues and, accordingly, into larger payments **[****85]** per game to the televised teams. There is thus a relationship between the size of the rights payments and the value of the product being purchased by the networks; a network purchasing a series of games under the plan is willing to pay more than would one purchasing the same games in the absence of the plan since the plan enables the network to deliver a larger share of the available audience to advertisers and thus to increase its own revenues. In short, by focusing only on the price paid by the networks for television rights rather than on the nature and quality of the product delivered by the NCAA and its member institutions, the District Court, and this Court as well, may well have deemed anticompetitive a rise in price that more properly should be attributed to an increase in output, measured in terms of viewership.

Third, the District Court's emphasis on the prices paid for particular games seems misdirected and erroneous as a matter of law. The distribution of the minimum aggregate fees among participants in the television plan is, of course, not wholly based on a competitive price structure that is responsive to viewer demand and is only partially related to the value those **[****86]** schools contribute to the total package the networks agree to buy. But as I have already indicated, see **[*131]** *supra*, at 128, this "redistribution" of total television revenues is a wholly justifiable, even necessary, aspect of maintaining a system of truly competitive college teams. As long as the NCAA cannot artificially fix the price of the entire package and demand supercompetitive prices, this aspect of the plan should be of little concern. And I find little, if anything, in the record to support **[**2976]** the notion that the NCAA has power to extract from the television networks more than the broadcasting rights are worth in the marketplace.

III

Even if I were convinced that the **[***103]** District Court did not err in failing to look to total viewership, as opposed to the number of televised games, when measuring output and anticompetitive effect and in failing fully to consider whether the NCAA possesses power to fix the package price, as opposed to the distribution of that package price among participating teams, I would nevertheless hold that the television plan passes muster under the Rule of Reason. The NCAA argues strenuously that the plan and the network **[****87]** contracts "are part of a joint venture among many of the nation's universities to create a product -- high-quality college football -- and offer that product in a way attractive to both fans in the stadiums and viewers on [television]. The cooperation in producing the product makes it more competitive against other [television] (and live) attractions." Brief for Petitioner 15. The Court recognizes that, "[if] the NCAA faced 'interbrand' competition from available substitutes, then certain forms of collective action might be appropriate in order to enhance its ability to compete." *Ante*, at 115, n. 55. See *Continental T. V., Inc*. v. *GTE Sylvania Inc., 433 U.S. 36, 54-57 (1977)*. It rejects the NCAA's proffered procompetitive justification, however, on the ground that college football is a unique product for which there are no available substitutes and "there is no need for collective action in **[*132]** order to enable the product to compete against its nonexistent competitors." *Ante*, at 115 (footnote omitted). This proposition is singularly unpersuasive.

It is one thing to say that "NCAA football is a unique product," *546 F.Supp., at 1299*, **[****88]** that "intercollegiate football telecasts generate an audience uniquely attractive to advertisers and that competitors are unable to offer programming that can attract a similar audience." *Ante*, at 111 (footnote omitted). See *707 F.2d, at 1158-1159*; *546 F.Supp., at 1298-1300*. It is quite another, in my view, to say that maintenance or enhancement of the quality of NCAA football telecasts is unnecessary to enable those telecasts to compete effectively against other forms of entertainment. The NCAA has no monopoly power when competing against other types of entertainment. Should the quality of the NCAA's product "deteriorate to any perceptible degree or should the cost of 'using' its product rise, some fans undoubtedly would turn to another form of entertainment. . . . Because of the broad possibilities for alternative forms of entertainment," the NCAA "properly belongs in the broader 'entertainment' market rather than in . . . [a] narrower [market]" like sports or football. Grauer, Recognition of the National Football League as a Single Entity Under *Section 1* of the Sherman Act: Implications of the Consumer Welfare Model, *82 Mich. L. Rev. 1, 34, n. 156 (1983)*. **[****89]** See *National Football League v. North American Soccer League, 459 U.S. 1074, 1077 (1982)* (REHNQUIST, J., dissenting from the denial of certiorari); R. Atwell, B. Grimes, & D. Lopiano, The Money Game 32-33 (1980); Hanford, at 67; J. Michener, Sports in America 208-209 (1976); Note, 87 Yale L. J., at 661, and n. 31.

The NCAA has suggested a number of plausible ways in which its television plan might enhance the **[***104]** ability of college football telecasts to compete against other forms of entertainment. Brief for Petitioner 22-25. Although the District Court did conclude that the plan is "not necessary for effective marketing of the product," *546 F.Supp., at 1307*, its **[*133]** finding was directed only at the question whether college football telecasts would continue in the absence of the plan. It made no explicit findings concerning the effect of the plan on viewership and thus did not reject the factual premise of the NCAA's argument that the plan might enhance competition by increasing **[**2977]** the market penetration of NCAA football. See also *707 F.2d, at 1154-1156, 1160*. The District Court's finding **[****90]** that network coverage of NCAA football would likely decrease if the plan were struck down, *546 F.Supp., at 1307*, in fact, strongly suggests the validity of the NCAA's position. On the record now before the Court, therefore, I am not prepared to conclude that the restraints imposed by the NCAA's television plan are "such as may suppress or even destroy competition" rather than "such as merely [regulate] and perhaps thereby [promote] competition." *Chicago Board of Trade v. United States, 246 U.S. 231, 238 (1918)*.

IV

Finally, I return to the point with which I began -- the essentially noneconomic nature of the NCAA's program of self-regulation. Like Judge Barrett, who dissented in the Court of Appeals, I believe that the lower courts "erred by subjugating the NCAA's educational goals (and, incidentally, those which Oklahoma and Georgia insist must be maintained in any event) to the purely competitive commercialism of [an] 'every school for itself' approach to television contract bargaining." *707 F.2d, at 1168*. Although the NCAA does not enjoy blanket immunity from the antitrust laws, cf. *Goldfarb v. Virginia State Bar, 421 U.S. 773 (1975)*, **[****91]** it is important to remember that the Sherman Act "is aimed primarily at combinations having commercial objectives and is applied only to a very limited extent to organizations . . . which normally have other objectives." *Klor's, Inc*. v. *Broadway-Hale Stores, Inc., 359 U.S. 207, 213, n. 7 (1959)*.

The fact that a restraint operates on nonprofit educational institutions as distinguished from business entities is as "relevant **[*134]** in determining whether that particular restraint violates the Sherman Act" as is the fact that a restraint affects a profession rather than a business. *Goldfarb v. Virginia State Bar, supra, at 788, n. 17*. Cf. *Community Communications Co*. v. *Boulder, 455 U.S. 40, 56, n. 20 (1982)*. The legitimate noneconomic goals of colleges and universities should not be ignored in analyzing restraints imposed by associations of such institutions on their members, and these noneconomic goals "may require that a particular practice, which could properly be viewed as a violation of the Sherman Act in another context, be treated differently." *Goldfarb v. Virginia State Bar, supra, at 788, n. 17*. **[****92]** The Court of Appeals, like the District Court, flatly refused to consider what it termed "noneconomic" justifications advanced by the NCAA in support of the television plan. It was of the **[***105]** view that our decision in *National Society of Professional Engineers v. United States, 435 U.S. 679 (1978)*, precludes reliance on noneconomic factors in assessing the reasonableness of the television plan. *707 F.2d, at 1154*; see Tr. of Oral Arg. 24-25. This view was mistaken, and I note that the Court does not in so many words repeat this error.

Professional Engineers did make clear that antitrust analysis usually turns on "competitive conditions" and "economic conceptions." *435 U.S., at 690*, and n. 16. Ordinarily, "the inquiry mandated by the Rule of Reason is whether the challenged agreement is one that promotes competition or one that suppresses competition." *Id., at 691*. The purpose of antitrust analysis, the Court emphasized, "is to form a judgment about the competitive significance of the restraint; it is not to decide whether a policy favoring competition is in the public interest, or in the interest of **[****93]** the members of an industry." *Id., at 692*. Broadly read, these statements suggest that noneconomic values like the promotion of amateurism and fundamental educational objectives could not save the television plan from condemnation under the Sherman Act. **[*135]** But these **[**2978]** statements were made in response to "public interest" justifications proffered in defense of a ban on competitive bidding imposed by practitioners engaged in standard, profit-motivated commercial activities. The primarily non-economic values pursued by educational institutions differ fundamentally from the "overriding commercial purpose of [the] day-to-day activities" of engineers, lawyers, doctors, and businessmen, Gulland, Byrne, & Steinbach, Intercollegiate Athletics and Television Contracts: Beyond Economic Justifications in Antitrust Analysis of Agreements Among Colleges, *52 Ford. L. Rev. 717, 728 (1984)*, and neither *Professional Engineers* nor any other decision of this Court suggests that associations of nonprofit educational institutions must defend their self-regulatory restraints solely in terms of their competitive impact, without regard for the legitimate **[****94]** noneconomic values they promote.

When these values are factored into the balance, the NCAA's television plan seems eminently reasonable. Most fundamentally, the plan fosters the goal of amateurism by spreading revenues among various schools and reducing the financial incentives toward professionalism. As the Court observes, the NCAA imposes a variety of restrictions perhaps better suited than the television plan for the preservation of amateurism. *Ante*, at 119. Although the NCAA does attempt vigorously to enforce these restrictions, the vast potential for abuse suggests that measures, like the television plan, designed to limit the rewards of professionalism are fully consistent with, and essential to the attainment of, the NCAA's objectives. In short, "[the] restraints upon Oklahoma and Georgia and other colleges and universities with excellent football programs insure that they confine those programs within the principles of amateurism so that intercollegiate athletics supplement, rather than inhibit, educational achievement." *707 F.2d, at 1167* (Barrett, J., dissenting). The collateral consequences of the spreading of **[*136]** regional and national **[****95]** **[***106]** appearances among a number of schools are many: the television plan, like the ban on compensating student-athletes, may well encourage students to choose their schools, at least in part, on the basis of educational quality by reducing the perceived economic element of the choice, see Note, 87 Yale L. J., at 676, n. 106; it helps ensure the economic viability of athletic programs at a wide variety of schools with weaker football teams; and it "[promotes] competitive football among many and varied amateur teams nationwide." Gulland, Byrne, & Steinbach, *supra*, at 722 (footnote omitted). These important contributions, I believe, are sufficient to offset any minimal anticompetitive effects of the television plan.

For all of these reasons, I would reverse the judgment of the Court of Appeals. At the very least, the Court of Appeals should be directed to vacate the injunction of the District Court pending the further proceedings that will be necessary to amend the outstanding injunction to accommodate the substantial remaining authority of the NCAA to regulate the telecasting of its members' football games.

Opinion

[*645] *RECOMMENDED RULING AND REPORT OF THE SPECIAL MASTER WITH RESPECT TO REMINGTON PRODUCTS, INC.'S MOTION FOR DEFAULT AND SANCTIONS AGAINST N. V. PHILIPS' GLOEILAMPENFABRIEKEN, DATED SEPTEMBER 9, 1983*

In this antitrust action, plaintiff Remington Products, Inc. ("Remington") challenges the acquisition of the electric shaver assets of defendant Schick Incorporated ("Schick") by defendant North American Philips Corporation ("NAPC") and NAPC's parent, defendant N. V. Philips' Gloeilampenfabrieken ("N. V. Philips"). The District Court referred the case to the undersigned Special Master for a recommended ruling and report with respect to certain discovery disputes which have arisen between the parties.

The present discovery dispute results from the failure of N. V. Philips, a Dutch corporation and a defendant in this case, to provide any discovery in this action. On October 25, 1982, Remington filed a Motion to Compel Discovery against N. V. Philips. N. V. Philips in its Memorandum in Opposition argued that (1) certain portions of the requested discovery were irrelevant, (2) the discovery requested which might be relevant was duplicative of material **[**2]** provided by or available from NAPC, and (3) N. V. Philips was prevented by Article 39 of the Dutch Competition Code from complying with the discovery requests.

After oral argument on Remington's Motion to Compel, the Special Master recommended that (1) N. V. Philips' relevancy objection be sustained only as to those documents which reflect transactions or events not affecting the

U.S. market, and otherwise be overruled, (2) N. V. Philips be required to list relevant documents identical to those provided by NAPC, and otherwise recommended that the objection based **[*646]** on duplication of material in the possession of NAPC be overruled, and (3) N. V. Philips be ordered to comply with certain discovery requests, and be ordered to seek a waiver under Article 39 from the Dutch authorities. Recommended Ruling, dated January 7, 1983, at 2-9. The Court adopted the Recommended Ruling on January 24, 1983, and ordered N. V. Philips to comply with discovery in accordance with that ruling.

On February 1, 1983, N. V. Philips filed an application by letter with the Dutch Ministry of Economic Affairs (the "Ministry") requesting a waiver of the restrictions of Article 39, attaching to the application the pleadings **[**3]** in this case relating to discovery from N. V. Philips. The application stated:

> In accordance with American rules of practice, "discovery proceedings" have been initiated by Remington against both NAPC and our company in which Remington did not confine itself to the information already provided and offered by NAPC but insisted that also our company furnish information, documents, and "depositions." We have opposed these demands. See in this connection attachment A: 2a-2w.
>
> Nevertheless, on 24th January 1983 Judge Robert C. Zampano made the attached order (attachment A: 3).
>
> In compliance with Article 39 of the Dutch Economic Competition Act we hereby request you to grant us an exemption from the prohibition to comply with the Judge's order.

On March 9, 1983, Remington submitted a memorandum to the Ministry setting forth reasons why the waiver should be granted. The Ministry reached a "decision in principle" not to grant the waiver in May, 1983, and officially denied the request for a waiver by letter dated August 2, 1983. N. V. Philips subsequently informed the Court on August 19, 1983, of the Ministry's decision and stated that compliance with the Court's discovery order was "not possible".

On **[**4]** September 9, 1983, Remington filed a Motion for Default and Sanctions against N. V. Philips for N. V. Philips' failure to comply with the discovery order of the Court dated January 24, 1983. N. V. Philips filed a Memorandum in Opposition, dated November 18, 1983, to which Remington has responded with a Reply Memorandum, dated December 2, 1983. Oral argument on the motion was held before the Special Master on December 19, 1983.

I.

A. *N. V. Philips*

N. V. Philips is the largest company in The Netherlands, with over $ 16 billion in annual worldwide gross revenues. N. V. Philips manufactures and sells a myriad of products, many of which are exported to and sold in the United States. [*] Electric shavers manufactured by N. V. Philips have been sold in the United States since 1948 under the NORELCO brand name, with over 3 million such shavers presently being sold in the United States each year.

In the course of its business operations N. V. Philips has frequently sought the protection of American laws. For example, N. V. Philips has **[**5]** sought and received U.S. trademark registrations and patent registrations for many of its products, including electric shavers. N. V. Philips has also resorted to American courts and agencies with respect to disputes regarding its business interests. [**]

The amended complaint in this action names N. V. Philips as a defendant in all four counts, which counts allege violations of *Sections 1* and *2* of the Sherman Act, *Section 7* of the Clayton Act, and *§§35-26* and *35-27* of the Connecticut General Statutes. **[*647]** N. V. Philips has not contested the Court's jurisdiction over it as a party in this case.

---

[*] *E.g.*, televisions, radios, video cassette recorders, coffeemakers, hair dryers, home video games, cameras, home and office lighting equipment, and medical equipment.

[**] *See, e.g., N. V. Philips v. United States*, No. 149-83C, United States Claims Court, slip op., March 21, 1983; *N. V. Philips v. Atomic Energy Commission, 316 F.2d 401, 114 U.S. App. D.C. 400 (D.C. Cir. 1963)*; *In re N. V. Philips' Gloeilampenfabrieken*, Decision of the Comptroller General, No. B-207485.3 (May 3, 1983).

B. *Article 39*

Article 39 of the Dutch Competition Code states, in relevant part:

> 1. Save in so far as Our Ministers have prescribed an exception or, on request, have granted exemption, it shall be forbidden to comply deliberately with any measures or decisions taken by any other State, which relate to any regulations **[**6]** of competition, dominant positions or conduct restricting competition.
> 2. Exceptions and exemptions may have restrictions attached to them. They may be subject to conditions.

Article 39 is similar to nondisclosure statutes of several other nations, which are commonly termed "blocking statutes". Article 39 was enacted in response to an investigation and prosecution in the 1950's by the U.S. Department of Justice of an international petroleum cartel. The Dutch government prohibited disclosure of documents in that proceeding, and subsequently codified its position in Article 39.

There is no doubt, therefore, that the purpose of Article 39 is to frustrate the enforcement of U.S. ***antitrust law*** with respect to Dutch companies. [***] There has never been a reported prosecution of a Dutch company for failure to abide by Article 39.

II.

A party failing to comply with a discovery order of the Court is normally subject to sanctions pursuant to *Rule 37(b) of the Federal Rules of Civil Procedure*. *Rule 37(b)(2)* states the general rule that if "a party or an officer, director, or managing agent **[**7]** of a party . . . fails to obey an order to provide or permit discovery . . . the court in which the action is pending may make such orders in regard to the failure as are just". Where, however, a foreign party's failure to comply is based on a statute of its own country which prohibits compliance, the court must balance several factors in determining whether sanctions are appropriate. *See* Restatement (Second) of the Foreign Relations Law of the United States, §40 (1965).

The seminal case regarding noncompliance with discovery orders based on foreign blocking statutes is *Societe Internationale Pour Participations Industrielles et Commerciales, S.A. v. Rogers, 357 U.S. 197, 78 S. Ct. 1087, 2 L. Ed. 2d 1255 (1958)*, in which a Swiss company suing to recover assets seized under the Trading with the Enemy Act failed to comply with a court order requiring disclosure of documents. The company claimed that disclosure would violate Swiss penal and banking secrecy laws. The district court dismissed the company's complaint as a sanction for noncompliance, but the Supreme Court reversed.

The Supreme Court held in *Societe* "that *Rule 37* should not be construed to authorize dismissal of this complaint because of petitioner's noncompliance **[**8]** with a pretrial production order when it has been established that failure to comply has been due to inability, and not to wilfullness, bad faith, or any fault of petitioner." *357 U.S. at 212*. The Court did not hold that no sanctions were appropriate where good faith inability to comply is shown; in fact, the Court suggested that the district court would be justified in drawing adverse inferences at trial from the noncompliance. *357 U.S. at 213*. The Court held only that dismissal was not authorized by *Rule 37* where good faith had been demonstrated. *Id*.

The Court's holding in *Societe Internationale* was predicated on the fact that the Swiss company was seeking return of company assets which had been summarily seized by the government "without the opportunity for protest by any party claiming **[*648]** that seizure was unjustified under the Trading with the Enemy Act." *See* *357 U.S. at 210-11*. The district court's dismissal of the action thus raised *Fifth Amendment* due process concerns since "this summary power to seize property which is believed to be enemy-owned is rescued from constitutional invalidity under the *Due Process and Just Compensation Clauses of the Fifth Amendment* only by those provisions **[**9]** of the Act which afford a nonenemy claimant a later judicial hearing as to the propriety of the seizure." *357 U.S. at 210-11*.

[***] *See* Tentative Draft No. 3, Restatement (Revised) of Foreign Relations Law in the United States, §420 at 22.

A review of the case law involving blocking statutes decided subsequent to *Societe* will be helpful in evaluating N. V. Phillips' actions in the present case. The lower courts have relied heavily on Section 40 of the Restatement (Second) of Foreign Relations Law of the United States (1965) for guidance. Section 40 provides:

> Where two states have jurisdiction to prescribe and enforce rules of law and the rules they may prescribe require inconsistent conduct upon the part of a person, each state is required by international law to consider, in good faith, moderating the exercise of its enforcement jurisdiction, in the light of such factors as
>
> (a) vital national interests of each of the states,
>
> (b) the extent and the nature of the hardship that inconsistent enforcement actions would impose upon the person,
>
> (c) the extent to which the required conduct is to take place in the territory of the other state,
>
> (d) the nationality of the person, and
>
> (e) the extent to which enforcement by action of either state can reasonably be expected to achieve compliance with the rule prescribed **[**10]** by that state.

In *United States v. First National City Bank, 396 F.2d 897 (2d Cir. 1968)*, the court relied on §40 in affirming a civil contempt judgment against a bank for failure to comply with a grand jury subpoena requiring the bank to produce documents located in the bank's branch in Germany. After balancing the factors enumerated in §40, the court concluded that German law requiring bank secrecy did not excuse the bank's noncompliance. *396 F.2d at 905*. In reaching this decision, the court noted that violation of the German law would not subject the bank to criminal charges and that the bank was an American corporation rather than a German corporation. *Id. at 903, 905*.

A district court's decision not to order a bank to seek waivers from its customers to avoid Swiss bank secrecy law was affirmed in *Trade Development Bank v. Continental Ins. Co., 469 F.2d 35 (2d Cir. 1972)*. The Second Circuit observed that, while the district court unquestionably had the power to order the requests for waivers, and that the "power might appropriately have been exercised in a case such as this", the district court had not abused its discretion in reaching its decision. *469 F.2d at 40-41*. [****]

The imposition of sanctions in the form of a civil contempt for failure to comply with a discovery order was reversed in *In re Westinghouse Elec. Corp. Uranium Contracts Litigation, 563 F.2d 992 (10th Cir. 1977)*. In that case, Westinghouse sought discovery by subpoena of documents located in the Canadian offices of a Delaware corporation, which was not a party in the case. The Delaware corporation resisted the subpoena on grounds that a Canadian statute prohibited compliance. Although the Delaware corporation had sought a waiver **[**12]** from the Canadian authorities, which was denied, the district court **[*649]** held the corporation in contempt, finding that a good faith showing of inability to comply had not been made.

After review of *Societe* and §40, the Tenth Circuit in *Westinghouse* held the finding of lack of good faith to be clearly erroneous, and reversed the contempt judgment. *563 F.2d at 998-99*. In balancing the interests, the court noted Canada's national interest in controlling and supervising atomic energy, and observed that Westinghouse's defense did not "stand or fall on the present discovery order", since "the present discovery, though admittedly of potential significance, is still in a sense cumulative." *Id*.

The Ninth Circuit considered the blocking statute issue in *United States v. Vetco Inc., 691 F.2d 1281 (9th Cir.)*, *cert. denied*, *454 U.S. 1098, 102 S. Ct. 671, 70 L. Ed. 2d 639 (1981)*. The IRS had issued summonses to Vetco, an American corporation, requesting documents from Vetco and its overseas subsidiaries. Vetco sought to avoid compliance with respect to its Swiss subsidiary on the grounds, *inter alia*, that compliance would violate a Swiss

---

[****] The **[**11]** approach of the Court in *Trade Development* has been frequently criticized on the grounds that the balancing of interests performed by the district court is appropriate only at the sanctions stage of the proceedings, and is not germane to the issue of whether an order compelling discovery should be entered. *See, e.g., Ohio v. Arthur Andersen & Co., 570 F.2d 1370, 1372 (10th Cir.)*, *cert. denied* ***439 U.S. 833, 99 S. Ct. 114, 58 L. Ed. 2d 129 (1978)***; Note, *Discovery of Documents Located Abroad in U.S. Antitrust Litigation*, 14 Va. J. Int. L. 747, 753 (1974). Since discovery has already been ordered in this case, and a motion for sanctions has been filed, this distinction need not be addressed here.

criminal statute. The district court ordered Vetco to produce the documents, and issued a civil contempt **[**13]** citation when Vetco failed to comply. The Ninth Circuit affirmed. 691 F.2d at 1287-91. The court specifically noted that the case was not controlled by *Societe*, since there were no findings of good faith efforts by Vetco or that production would violate Swiss law. *Id. at 1287*. The court also distinguished *Societe* in that IRS summonses "serve a more pressing national function than civil discovery." *Id. at 1288*.

Both parties to this motion cite in their briefs *In re Uranium Antitrust Litigation, 480 F. Supp. 1138 (N.D. Ill. 1979)*. The issue decided in that case was whether discovery should be ordered in the face of blocking statutes rather than what sanctions should be imposed for noncompliance, so to that extent the case is inapposite. However, the court analyzed three factors in making its determination, [*****] which are of assistance in considering the present controversy: (1) the strength of the Congressional policies underlying the statute which forms the basis for the moving party's action; (2) whether the requested documents are crucial to the determination of a key issue in the litigation; and (3) an appraisal of the chances for flexibility in a country's application of its nondisclosure **[**14]** laws. *480 F. Supp. at 1154-55*. The court, in ordering the requested discovery, determined that: (1) the antitrust laws sued on by the plaintiff "are as important to the preservation of economic freedom and our free-enterprise system as the *Bill of Rights* is to the protection of our fundamental personal freedoms", quoting *United States v. Topco Associates, Inc., 405 U.S. 596, 610, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*, (2) the "inevitable inference is that the withheld information is likely to be the heart and soul of plaintiffs' case", and (3) the degree of leniency in the application of the nondisclosure laws of the several affected countries varied from country to country. *Id*.

Sanctions for failure to comply with a court order requiring production of documents were considered in another uranium antitrust case. In *General Atomic Co. v. Exxon Nuclear Co., 90 F.R.D. 290 (S.D. Cal. 1981)*, the plaintiff relied on the Canadian uranium nondisclosure statute as its defense to defendant's **[**15]** motion for dismissal of the complaint and default on the counterclaim for noncompliance. The court set out as the test for the motion:

> . . . Exxon must establish by a preponderance of the evidence that: (1) the failure to fully comply with the production orders was caused by "wilfullness, bad faith, or any fault" of [plaintiff]; (2) the withheld documents may be crucial to the outcome of this litigation; (3) Exxon is prejudiced by the failure of discovery in the presentation of its case; and (4) the **[*650]** sanctions sought are commensurate with the prejudice to Exxon and the degree of fault attributable to [plaintiff].
>
> *90 F.R.D. at 296*.

The court found bad faith amounting to "courting legal impediments" in plaintiff's deliberate storage of documents in Canada with the expectation that they would be unavailable for discovery and in the "destruction or disappearance" of certain documents in the United States. *Id. at 299, 304*. The court further determined that the requested documents were crucial to a fair trial, and that Exxon would be prejudiced by their nondisclosure. *Id. at 306*.

The *General Atomic* court then addressed the question of the sanction to be applied. Although the sanctions sought **[**16]** by Exxon were not precluded under *Societe*, "in view of the court's findings", the court determined that "their imposition should be reserved for extreme situations where lesser sanctions would be ineffective to cure the consequences of the discovery failure." *90 F.R.D. at 307*. In lieu of the more drastic remedy of a dismissal of the complaint and default on the counterclaim, the court chose to "deem designated facts presumed established subject to rebuttal by [plaintiff]", precluded plaintiff from asserting certain affirmative defenses, and waived the authenticity and other foundational requirements for Exxon as to certain documents. *Id. at 308*. The court expressly mentioned that "[a]n important factor in declining to impose harsher sanctions is the consideration that Exxon has some evidence [produced by plaintiff] available to utilize in the presentation of its claims." *Id*.

As in *Uranium Antitrust Litigation, supra*, *SEC v. Banca Della Svizzera Italiana, 92 F.R.D. 111 (S.D.N.Y. 1981)* concerned the propriety of a discovery order in the face of a Swiss nondisclosure statute rather than the question of

[*****] The court in *Uranium Antitrust* specifically declined to utilize §40 of the Restatement in its analysis, arguing that it is "simply impossible" to judicially balance the competing national interests of the United States with foreign countries.

sanctions for noncompliance. Nevertheless, Remington relies heavily on the analysis **[**17]** of Judge Pollock in *Banca*. The court in *Banca* utilized the §40 factors in its determination that discovery should be ordered, noting the importance of U.S. securities laws, the apparent lack of interest of the U.S. and Swiss governments in the case, the flexibility of the Swiss statute given the "necessity" defense available under it, and the defendant's lack of good faith in undertaking its securities transactions "fully expecting to use foreign law to shield it from the reach of our laws". *92 F.R.D. at 117-19*.

The most recent reported case considering sanctions for noncompliance with a discovery order, based on a blocking statute, is *In re Oil Spill by the Amoco Cadiz, 93 F.R.D. 840 (N.D. Ill. 1982)*. That case involved attempted discovery by the owners of a grounded oil tanker from the Republic of France, a party to the proceeding. The requested documents had been compiled by French government inquiry commissions. France refused to comply with the order compelling discovery, on the ground that disclosure would violate a French criminal nondisclosure statute. The owners sought a default judgment against France and dismissal of France's counterclaims. The court determined that France's **[**18]** refusal to comply was in good faith, and therefore refused the owners' request for default and dismissal. *93 F.R.D. at 843*. Instead, the court allowed the owners the admission into evidence of certain arguably objectionable documents, and stated that it would issue other appropriate rulings at trial to try to minimize the prejudice to the owners. *Id. at 844*.

Analysis of the foregoing cases leads to the following conclusions: (1) the mere existence of the prohibition against disclosure in Article 39 does not preclude the imposition of sanctions against N. V. Philips for its noncompliance with the Court's discovery order; (2) whether sanctions should be imposed depends on a balancing of interests under *Societe* and §40 of the Restatement; (3) if sanctions are imposed, the appropriate sanction is determined by evaluating the prejudice to Remington of N. V. Philips' noncompliance with the discovery order and the degree of culpability which can be attributed to N. V. Philips; (4) the sanction to be imposed must be designed as **[*651]** a just remedy, the purpose of which is to negate the impact of N. V. Philips' refusal to comply with the discovery order; and (5) the sanction of default is not permissible **[**19]** upon a finding of good faith by N. V. Philips.

III.

A review of the factors enumerated in §40 of the Restatement leads to the conclusion that the imposition of sanctions against N. V. Philips is warranted in the circumstances of this case.

The first factor--the competing interests of the two countries--militates in favor of an order designed to enforce this Court's prior discovery order. The vital national interest of the United States in the enforcement of its antitrust laws is unquestionable. As the court observed in *Uranium Antitrust Litigation*:

> Plaintiffs' complaint challenges activities by the defendants which, if true, would constitute massive violations of this nation's antitrust laws. "These laws have long been considered cornerstones of this nation's economic policies, have been vigorously enforced and the subject of frequent interpretation by our Supreme Court." *United States v. First National City Bank, 396 F.2d 897, 903 (2d Cir. 1968)*. They are as important to the preservation of economic freedom and our free-enterprise system as the *Bill of Rights* is to the protection of our fundamental personal freedoms." *United States v. Topco Associates, Inc., 405 U.S. 596, 610, 92 S.Ct. 1126, 1135, 31 L.Ed.2d 515 (1972)*.
>
> *480 F. Supp. at 1154*.

The **[**20]** fact that this is a private civil action rather than a public enforcement action does not in any manner diminish the importance of the national interest involved; indeed, Congress intended that the antitrust laws would be enforced through civil actions by non-governmental parties. *Id*.

The Dutch national interest, on the other hand, is much less compelling. The Ministry's letter denying N. V. Philips' exemption request hints that the Dutch concern is with confidentiality. ****** Article 39 is significantly different from

---

****** The Ministry's letter states, in relevant part:

the Swiss bank secrecy law or the Canadian uranium law, which were involved in Banca and General Atomic, supra. Those nondisclosure laws seek to prevent disclosure of a certain *type* of information in *any* case. Article 39, however, seeks to prevent the disclosure of *all* information in only a single type of case, *i.e*. an antitrust case. It is therefore clear that the Dutch interest involved is not the confidentiality of business documents, but is rather the frustration of the antitrust laws of the United States. Frustration of the law enforcement efforts of another country is not a legitimate national interest which can justify the failure to enforce a valid Court order. **[**21]** *See* Tentative Draft No. 3, Restatement (Revised) of Foreign Relations Law of the United States, §420, Comment (b). Furthermore, to the **[*652]** extent that the Dutch government has any legitimate interest in preserving the confidentiality of the documents in question, that interest can be adequately protected through the Protective Order previously entered in this action on May 27, 1982. ******* Therefore, the first factor of §40 strongly favors granting the present motion.

The second factor is the extent and nature **[**23]** of the hardship that inconsistent enforcement actions would impose upon the party subject to both jurisdictions. Article 39 is a criminal statute, a fact found significant by the Supreme Court in *Societe* with respect to the Swiss law involved there. *See* 357 U.S. at 211. As previously noted, however, no prosecution has ever been pursued under Article 39. As in *Banca*, the availability to N. V. Philips of a "necessity" defense to any prosecution under Article 39 diminishes the hardship imposed on N. V. Philips. *See* Fokkema, Chorus, Hodis and Lissar, *Introduction to Dutch Law for Foreign Lawyers*, at 339. Furthermore, just as the Supreme Court observed in *Societe* that inability to comply is distinguishable from refusal to comply, so might a Dutch court determine that disclosure by N. V. Philips pursuant to a court order is not a "deliberate" disclosure within the meaning of Article 39. ******** Although the foregoing considerations may not completely remove all concern that N. V. Philips could face criminal penalties if it complies with this Court's order, they do greatly reduce that risk. *See, e.g.,* *SEC v. Banca Della Svizzera Italiana, 92 F.R.D. at 118-19*. Indeed, even if these considerations **[**24]** do not afford N. V. Philips a defense, the Dutch authorities must also consider moderating the enforcement of Article 39, in light of the factors outlined in §40 of the Restatement.

The three remaining factors of §40 of the Restatement--the country where compliance will take place, nationality of the person against whom the order is directed and the prospects for compliance with this Court's order if sanctions are imposed--"appear to be less important in [the Second] Circuit." *SEC v. Banca Della Svizzera Italiana, 92 F.R.D.*

> With respect to the first two parts of the decision of the District Court I inform you, also on behalf of the Minister of Foreign Affairs, that I refuse exemption in as far as it concerns information in documents--which also includes written answers to "interrogatories"--of N. V. Philips' Gloeilampenfabrieken which are in the Netherlands since it has not been determined that by complying with the request no conflict can occur with public international law or with the material or formal principles of the Dutch Competition Law.
>
> With respect to the last part of the decision of the District Court it is considered that it concerns behaviour, facts and circumstances in and outside **[**22]** the United States of America of N. V. Philips' Gloeilampenfabrieken, a company operating in the Netherlands.
>
> With respect to the behaviour mentioned in the preceding paragraph it is also considered that the "Notices of Deposition" by which the employees concerned of N. V. Philips' Gloeilampenfabrieken are summoned to make depositions are not subject to any limitation which would mean that information based on documents which are in the Netherlands, belonging to N. V. Philips' Gloeilampenfabrieken would not be excluded in the making of these depositions.
>
> I inform you, also on behalf of my abovementioned colleague, that I also refuse exemption with respect to this part of the decision of the American Judge involved viz, the appearance in person in order to answer questions and to give depositions, on the same grounds as put forward with respect to the order to produce documents and to answer "interrogatories".

******* Indeed, if N. V. Philips believes the outstanding protective order to be inadequate, the Special Master would be willing to consider recommending that the Court require any additional reasonable safeguards suggested by N. V. Philips.

******** By its express terms, Article 39 prohibits only "deliberate" disclosures. The record of the instant case, in which N. V. Philips has filed several briefs and motions in an effort to avoid disclosing the requested information, would appear to strongly refute any suggestion that N. V. Philips' disclosure--if such disclosure is hereafter made--was deliberate.

at 119. The court in *Banca* resolved the three factors in favor of the moving party with respect to discovery sought from a Swiss corporation. The *Banca* court's analysis of these factors can be applied with equal force to the instant case:

> It is significant nevertheless that [the three factors also] tip in **[**25]** favor of the SEC. Performance may be said to occur here as well as in Switzerland since the actual answering of the interrogatories will presumably take place in the United States, where BSI's lawyers are. As for citizenship, it is true that BSI is a Swiss corporation. However, its transnational character, as evidenced by its large number of foreign affiliates,… render this Court less reluctant to order BSI to conform to our laws even where such an order may cause conflict with Swiss law. Last, with respect to enforcement, this Court believes that an appropriate formal order directing the demanded disclosure, to the extent that compliance has been incomplete, will serve as the requisite foundation for any further actions that may be needed in the form of sanctions and should serve to bring home the obligations a foreign entity undertakes when it conducts business on the American securities exchanges.
>
> 92 F.R.D. at 119.

The final factor to be considered; as mandated by *Societe* and subsequent cases, is the good faith of N. V. Philips. That issue is, not unexpectedly, the subject of considerable disagreement between the parties. **[*653]** Under *Societe*, parties resisting discovery under a blocking **[**26]** statute show good faith when they "make all…efforts to the maximum of their ability" to comply. 357 U.S. at 205. Remington argues that the bad faith of N. V. Philips is demonstrated by the tenor of its exemption application to the Ministry, and by the fact that N. V. Philips provided discovery in another antitrust case in which it was a party, when it apparently was in the interest of N. V. Philips to comply with the requested discovery. *See* General Business Systems v. North American Philips Corp., 699 F.2d 965 (9th Cir. 1983). ********* N. V. Philips contends that the situation in *General Business Systems* is distinguishable from this case, and that its conduct in this case reflects its good faith.

By **[**27]** applying for an exemption from Article 39 from the Dutch Ministry, N. V. Philips certainly complied with the letter of the Court's order of January 24, 1983. However, the tenor of this application falls far short of the spirit of that order. ********** The application states that Remington "did not confine itself" to the discovery provided by NAPC, but "insisted" that N. V. Philips provide discovery. N. V. Philips then informs the Ministry that "[w]e have opposed these demands", and provides the Ministry with copies of its briefs opposing the requested discovery. The

---

********* Remington also argues that N. V. Philips has the burden of showing its good faith. Since N. V. Philips is clearly able to comply with the Court's discovery order and has consciously decided not to do so, it is proper to place on it the burden of demonstrating good faith with respect to its reliance on Article 39. *See* Societe Internationale v. Rogers, 357 U.S. at 212; United States v. Vetco, Inc., 691 F.2d at 1287. Contra, General Atomic Co. v. Exxon Nuclear Co., 90 F.R.D. 290, 296 (S.D. Cal. 1981).

********** N. V. Philips conten that the tenor of the application is similar to that of an exemption request found to be in good faith in In re Westinghouse, supra, 563 F.2d at 999-1000. The request in *Westinghouse* stated, in part:

> Rio Algom Corporation, as a result, finds itself in a dilemma. It has no desire to offend the court in Utah, but if it complies with the court order in respect to any documents which are subject **[**28]** to the Uranium Information Security Regulations, then it would be in breach, and would cause individuals in Canada to be in breach of the Regulations. This dilemma could be resolved if the Honourable Minister of Energy, Mines and Resources were to consent to the release of the subject documents and to the disclosure of the contents of those documents.
>
> Rio Algom Corporation, therefore, respectfully requests the consent of the Honourable Minister of Energy, Mines and Resources to the release of all documents located in Canada which would respond to the subpoenas and to the disclosure or communication of the contents thereof by Mr. George R. Albino or any other officer, director or employee of Rio Algom Corporation.

A comparison of the two requests for exemption belies N.V. Philips' contention that its request is the equivalent of that approved in *Westinghouse*.

application strongly suggests that N. V. Philips remained opposed to the requested discovery and did not support the exemption application. As such, it is evidence which would support a finding of bad faith.

Remington also points out that N. V. Philips' application is deficient in that it does not mention important facts such as that the discovery order was limited to matters affecting the United States electric shaver market and that any confidential information would be protected by the Court's protective order in this case, dated May **[**29]** 27, 1982. N. V. Philips argues that it asked the Dutch authorities to consider information that Remington might submit, and that Remington in fact made such submissions. However, the question here is the good faith of N. V. Philips, and submissions by Remington are no substitute for a good faith application by N. V. Philips. ***********

[*654] Whether N. V. Philips' apparent lack of good faith in the exemption **[**30]** application would of itself compel a finding of bad faith, other conduct of N. V. Philips, both in the present action and in the General Business Systems litigation, supports a finding of bad faith with respect to N. V. Philips' reliance on Article 39. *See* General Atomic Co. v. Exxon Nuclear Co., supra, 90 F.R.D. at 295 ("While Gulf's efforts to overcome the Security Regulations constitute a *prima facie* showing of good faith to comply with the production orders, Gulf's conduct prior to the passage of the Security Regulations must also be evaluated to determine the appropriateness of sanctions.")

In its original objections to the discovery sought by Remington, N. V. Philips not only asserted Article 39, but also objected on grounds of relevancy and duplicative discovery to all of Remington's discovery demands. Although certain of Remington's discovery requests sought information not affecting the United States market, and accordingly N. V. Philips' relevancy objections were sustained as to these requests, the vast majority of Remington's requests to which N.V. Philips objected as to relevancy were clearly relevant. Similarly, N. V. Philips' objection that all discovery sought by Remington **[**31]** was duplicative because Remington had already obtained discovery of NAPC, a different party, was unsupportable.

The Recommended Ruling dated January 7, 1983, as ordered by the Court on January 24, 1983, expressed "no opinion at [that] time…on the good faith of N. V. Philips to [that] point." The indiscriminate nature of the relevancy and duplicative discovery objections to all discovery sought by Remington suggests that N. V. Philips' reliance on Article 39 was simply another basis for N. V. Philips to utilize to avoid providing any discovery to Remington, and was tantamount to "courting legal impediments" which the Supreme Court in *Societe* recognized as constituting bad faith. 357 U.S. at 209. This inference is confirmed by N. V. Philips' actions in *General Business Systems v. North American Philips Corp*.

General Business Systems was an antitrust suit brought against N. V. Philips and two of its American subsidiaries, NAPC and Philips Business Systems, Inc. GBS, a Philips' distributor for Northern California prior to its termination by Philips Business Systems in 1978, alleged violations of sections 1 and 2 of the Sherman Act and section 3 of the Clayton Act with respect to defendants' **[**32]** small computer magnetic ledger cards. The discovery proceedings in that case suggest that N. V. Philips has not sought the protection of Article 39 where compliance with a discovery order was in its interest.

There is no question that N. V. Philips provided a great deal of discovery in *General Business Systems*, including answers to interrogatories, production of documents and depositions of employees. Remington argues that N. V. Philips' actions in *General Business Systems* demonstrate that N. V. Philips ignores Article 39 when it is convenient to do so and is using Article 39 in this case "solely as a device to avoid its lawful discovery obligations." N. V. Philips contends that *General Business Systems* is distinguished by the fact that the products at issue there were

*********** The fact that N. V. Philips asked the Dutch authorities to consider Remington's submissions may be some indicium of its good faith. However, given the following footnote from page 9 of the Recommended Ruling dated January 7, 1983, as ordered by the Court on January 24, 1983, failure of N. V. Philips to cooperate with Remington would have been clear bad faith:

> N. V. Philips indicated at oral argument that if discovery were ordered it would seek an exemption from Section 39 from the Dutch authorities, and agreed to allow Remington to provide "some input" in the application for an exemption from the Dutch statute. Since the good faith of N. V. Philips will be an important factor in any decision regarding sanctions, it is in its interest to consult with Remington on the application.…

manufactured in Germany, not The Netherlands, and the documents produced and interrogatory answers given contained information derived from Germany or elsewhere outside The Netherlands. N. V. Philips further states that its decision to provide discovery in *General Business Systems* was based on its conclusion that Article 39 did not prohibit compliance, and that it would be irrational to accept Remington's arguments because **[**33]** of N. V. Philips' decision to comply with discovery where Article 39 was not clearly triggered.

In camera review of the discovery available to the Special Master which was provided by N. V. Philips in *General Business Systems* reveals that N. V. Philips' characterization **[*655]** of the discovery it provided in that case is not accurate. It is clear that answers to interrogatories and documents produced by N. V. Philips contained information that could only have been derived from The Netherlands. *See* Remington Exhibits 33, 35-37. Thus, N. V. Philips was willing to construe Article 39 narrowly as not applying in order to make disclosure in the *General Business Systems* litigation. Although this is commendable in attempting to obey the conflicting requirements of two sovereigns, it demonstrates that N. V. Philips' reliance on Article 39 here, when its application is equally tenuous, was for the purpose of avoiding discovery rather than complying with the Dutch law.

The combination of the exemption application, the initial response to Remington's discovery requests and the disclosure made in *General Business Systems* compels the conclusion that N. V. Philips has not sustained its burden of showing **[**34]** good faith. Moreover, even if Remington had the burden of showing bad faith by N. V. Philips, a finding of bad faith on the part of N. V. Philips is justified on these facts. When this finding is viewed in conjunction with a balancing of §40 factors, which strongly favor. Remington, it is clear that sanctions against N. V. Philips are appropriate. *See, e.g.,* General Atomic Co. v. Exxon Nuclear Co., supra, 90 F.R.D. at 306-07.

IV.

Having determined that sanctions are appropriate in this case, the next issue to be addressed is the form the sanctions should take. The principal goal in fashioning a sanction in this context is to encourage N. V. Philips to comply with the order issued by this Court. Consequently, the sanction should be sufficient to negate any benefit N. V. Philips might otherwise obtain in refusing to comply, and it must negate any prejudice that Remington would suffer from a failure of compliance. Secondly, the sanction should be designed, insofar as possible, so that it will not adversely affect any party to the action, other than N. V. Philips. Finally, the sanction chosen should be the one which does the least amount of damage to N. V. Philips, while accomplishing the **[**35]** first two stated goals. A corollary to this last principle is that the drastic remedy of default should be utilized only where there is no other alternative that will satisfy the first two goals.

Clearly, the importance of the requested discovery and the resultant prejudice to Remington of N. V. Philips' failure to provide that discovery is extreme. "[T]he heart of any American antitrust case is the discovery of business documents. Without them, there is virtually no case." *In re Uranium Antitrust Litigation, 480 F. Supp. at 1155*, *quoting* Note, *Discovery of Documents Located Abroad in U.S. Antitrust Litigation*, 14 Va. J. Int'l. L. 747 (1974). Remington claims that N. V. Philips has violated the antitrust laws by conspiring with NAPC and Schick. N. V. Philips' failure to provide any discovery not only virtually insulates it from liability for conspiracy, but also greatly prejudices Remington's entire conspiracy case. "The inevitable inference is that the withheld information is likely to be the heart and soul of plaintiffs' case." *In re Uranium Antitrust Litigation, 480 F. Supp. at 1155*. The discovery sought of N. V. Philips by Remington is, accordingly, crucial to its case.

Concomitant **[**36]** with the prejudice to Remington is the unfair advantage accruing to N. V. Philips as the result of its failure to provide any discovery. Given N. V. Philips' failure to demonstrate its good faith, it is clear that an appropriate sanction should attempt to prevent N. V. Philips' from profiting by its refusal to provide discovery. ************

In addition to the rights and interests of Remington and N. V. Philips, the appropriate sanction must take into account the interests of NAPC and Schick. Both of these defendants have provided discovery to Remington.

************ The discovery immunity claimed by N. V. Philips could very well lead to *de facto* antitrust immunity.

Accordingly, any sanction **[*656]** against N.V. Philips must be crafted as nearly as possible to avoid affecting NAPC and Schick. *************

In determining the appropriate sanction, the case **[**37]** law requires that the least onerous sanction be imposed that is consistent with the factors and interests discussed *supra* at 28-29. *See Wilson v. Volkswagen of America Inc., 561 F.2d 494, 504 (4th Cir. 1977)*, *cert. denied*, *434 U.S. 1020, 98 S. Ct. 744, 54 L. Ed. 2d 768 (1978)*; *Diaz v. Southern Drilling Corp., 427 F.2d 1118, 1127 (5th Cir.)*, *cert. denied*, *400 U.S. 878, 91 S. Ct. 118, 27 L. Ed. 2d 115 (1970)*. A harsh sanction is not appropriate if a lesser sanction is sufficient to do justice under the circumstances. *See Webber v. Eye Corp., 721 F.2d 1067, 1069 (7th Cir. 1983)*; Note, *Standards for Imposition of Discovery Sanctions*, 27 Me. L. Rev. 247, 266 (1975).

Rule 37(b) provides a wide range of sanctions for failure to comply with a discovery order. In addition to the general authority of the court to "make such orders in regard to the failure as are just", *Rule 37(b)* specifically provides for the following sanctions: (1) the award of reasonable expenses, including attorney's fees, incurred as a result of the failure to provide discovery; (2) an order designating facts to be taken as established for the purposes of the action; (3) an order precluding the disobedient party from supporting or opposing designated issues; (4) an order striking out pleadings **[**38]** or parts thereof, or staying proceedings until compliance with the discovery order is achieved; (5) an order of contempt; and (6) an order rendering judgment by default or dismissal. Each of the foregoing sanctions will be analyzed in turn for its fitness with respect to the criteria set forth above.

The award of reasonable expenses, including attorney's fees, is the mildest of the *Rule 37(b)* sanctions. Such an award is clearly appropriate here. *See Ohio v. Arthur Andersen & Co., 570 F.2d 1370, 1374-75 (10th Cir.)*, *cert. denied*, *439 U.S. 833, 99 S. Ct. 114, 58 L. Ed. 2d 129 (1978)*. However, the award to Remington of reasonable expenses and attorney's fees is insufficient to negate the consequences of N. V. Philips' refusal to comply with discovery.

An order designating certain facts as established is useful when the discovery failure relates to discrete factual claims of the parties. *E.g., Evanson v. Union Oil Co., 85 F.R.D. 274, 278 (D. Minn. 1979)*, *appeal dismissed*, *619 F.2d 72 (8th Cir.)*, *cert. denied*, *449 U.S. 832, 101 S. Ct. 102, 66 L. Ed. 2d 38 (1980)*. Where, however, a party fails to provide any discovery, there are no discrete facts which can appropriately be established other than the totality of the factual allegations of the complaint. Moreover, **[**39]** where there are conspiracy allegations, it would be unreasonable to order a jury to take as established certain facts with regard to one alleged co-conspirator and not with regard to the others. ************** For example, it would clearly be prejudicial to NAPC to order a jury to take as established as to N. V. Philips that N. V. Philips conspired with NAPC, yet require the jury to determine whether NAPC conspired with N. V. Philips. Therefore, an order designating facts as established is not an appropriate sanction in this case.

An order precluding N. V. Philips from supporting or opposing designated issues suffers from similar infirmities. Since N. V. Philips failed to provide any discovery, it should logically be precluded on all issues, which would constitute a *de facto* default. Precluding N. V. Philips on only a single or few issues would be both arbitrary in terms of selection of issues and insufficient to negate the consequences of N. V. Philips' actions. Issue preclusion is therefore also not a practical solution.

[*657] The striking of N. V. Philips' answer and affirmative defenses would, as in general issue preclusion, **[**40]** constitute a *de facto* default. Merely striking the affirmative defenses would not negate the consequences of N. V. Philips' actions, since Remington would still be denied the documentary evidence, if it exists, necessary to prove the allegations of its complaint.

************* Although under certain circumstances an American subsidiary, such as NAPC, may be ordered to produce documents controlled by its foreign parent, *see Uranium Antitrust Litigation, 480 F. Supp. at 1152-53*, and presumably could also be sanctioned for failure to comply, the record is insufficient to justify such action against NAPC.

************** Remington claimed this case to a jury on March 8, 1982.

A contempt order in the form of a continuing fine for noncompliance could be directed solely at N. V. Philips. However, contempt is not appropriate under the circumstances. Although N. V. Philips has failed to demonstrate that it acted in good faith in its refusal to provide discovery as a result of Article 39, Article 39 is nevertheless an existing statute in N. V. Philips' home jurisdiction. By doing business in both the United States and the Netherlands, N. V. Philips has subjected itself to the conflicting requirements of two sovereigns. *See, e.g.,* *First Nat. City Bank v. I.R.S., 271 F.2d 616, 620 (2d Cir. 1959)*. So long as N. V. Philips is not allowed to take advantage of its failure to provide discovery, it is for N. V. Philips to decide which course to take to resolve the conflict. Therefore, contempt is not recommended as an appropriate sanction.

In addition to the specific sanctions analyzed above, several combinations **[**41]** and permutations of those sanctions have been considered and rejected for failing to meet the criteria listed *supra* at 28-29. The sanction remaining for consideration is a default against N. V. Philips. It is indisputable that a default judgment is "a drastic remed[y], and should be applied only in extreme circumstances." *Independent Prod. Co. v. Loew's, Inc., 283 F.2d 730, 733 (2d Cir. 1960)*. Moreover, default judgments are properly disfavored since they deny a party a decision on the merits and raise due process considerations. *Wilson v. Volkswagen of America, Inc., 561 F.2d at 503-04*; *General Atomic Co. v. Exxon Nuclear Co., 90 F.R.D. at 307*. Nevertheless, harsh sanctions such as default can be appropriate responses to bad faith failures to provide discovery because of the important specific and general deterrence functions of such sanctions. *See* *National Hockey League v. Metropolitan Hockey Club, 427 U.S. 639, 643, 96 S. Ct. 2778, 49 L. Ed. 2d 747 (1976)*; *Cine Forty-Second St. Theatre Corp. v. Allied Artists Pictures Corp., 602 F.2d 1062, 1066 (2d Cir. 1979)*.

Under the circumstances presented in this case, a default is the only sanction which negates the consequences of N. V. Philips' actions, while not affecting **[**42]** the rights of innocent parties such as NAPC and Schick. There is no less drastic sanction which would accomplish these aims. Nevertheless, in order to provide N. V. Philips with a final opportunity to comply with the Court's discovery order, the Special Master recommends that a default judgment be entered against N. V. Philips, to be followed by a hearing in damages pursuant to *Rule 55(b)(2) of the Federal Rules of Civil Procedure*, unless N. V. Philips within 60 days of the Court's adoption of this ruling affirms to the Court its intention to comply with the discovery order.

CONCLUSION

The Special Master recommends that a default judgment be entered against N. V. Philips unless it affirms to the Court its intention to comply with this Court's discovery order, dated January 24, 1983, within 60 days of the Court's adoption of this recommended ruling. The Special Master further recommends that N. V. Philips be ordered to pay Remington its reasonable expenses, including attorney's fees, incurred in connection with this motion.

Dated at New Haven, Connecticut, this 28 day of June, 1984.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN3[] Regulated Practices, Trade Practices & Unfair Competition

A plaintiff establishes an antitrust violation by proving that defendants conspired to use unfair and predatory competitive means to eliminate the plaintiff as a competitor, and that the plaintiff's elimination from the marketplace in this fashion imposed an illegal restraint on trade under the rule of reason analysis.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN4[] Trials, Judgment as Matter of Law

On motions for directed verdict and for judgment notwithstanding the verdict the court should consider all of the evidence, not just that evidence which supports the non-mover's case, but in the light and with all reasonable inferences most favorable to the party opposed to the motion. If the facts and inferences point so strongly and overwhelmingly in favor of one party that the court believes that reasonable men could not arrive at a contrary verdict, granting of the motions is proper.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

Civil Procedure > Trials > Jury Trials > General Overview

Civil Procedure > ... > Standards of Review > Substantial Evidence > Sufficiency of Evidence

HN5[] Trials, Judgment as Matter of Law

If there is substantial evidence opposed to the motions, that is, evidence of such quality and weight that reasonable and fair-minded men in the exercise of impartial judgment might reach different conclusions, the motions should be denied, and the case submitted to the jury. A mere scintilla of evidence is insufficient to present a question for the jury. The motions for directed verdict and judgment n.o.v. should not be decided by which side has the better of the case, nor should they be granted only when there is a complete absence of probative facts to support a jury verdict. There must be a conflict in substantial evidence to create a jury question. However, it is the function of the jury as the traditional finder of the facts, and not the court, to weigh conflicting evidence and inferences, and determine the credibility of witnesses.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN6[] Trials, Judgment as Matter of Law

To avoid a directed verdict the plaintiff must present sufficient evidence to create a jury question with respect to each element of its case.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN7[ ] **Regulated Practices, Trade Practices & Unfair Competition**

There is a policy against summary dispositions of antitrust cases where motive and intent play leading roles, and the proof is largely in the hands of the alleged conspirators and hostile witnesses, and where the plaintiff must build its case largely on circumstantial evidence.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN11[] Per Se Rule & Rule of Reason, Per Se Violations

Depending on the claim presented, the court evaluates an alleged violation of 15 U.S.C.S. § 1 under a per se or rule of reason analysis. Certain activities, such as price fixing, have such a pernicious effect on competition and are so lacking in any redeeming virtue that they are deemed per se violations without inquiry into the nature of their impact on a particular market. Other restraints on trade, such as territorial restrictions that a manufacturer imposes on a distributor, have possible procompetitive influences on a given market and the legality of the restraint is judged under the rule of reason.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN12[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition, or whether it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the fact peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint, and its effect, actual or probable.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN13[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The rule of reason inquiry must be tied to a particular market in which the challenged activity is alleged to impose an impermissible restraint. An antitrust policy divorced from market considerations would lack any objective benchmarks.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN14[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

In the circuit, the court evaluates a 15 U.S.C.S. § 1 claim that the defendants conspired to use unfair competitive means to drive plaintiff from the market place under the rule of reason standard.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN15[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

The rule of reason test has two parts, under which the plaintiff must show: (1) a market effect that would be prohibited under the law of mergers; and (2) other conduct by the defendant that threatens Sherman Act values.

Antitrust & Trade Law > Sherman Act > Remedies > Damages

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN16[] **Remedies, Damages**

Injury to a competitor need not result in injury to competition. The use of unfair means in substituting one competitor for another without more does not violate the antitrust laws. Unfair competitive means can be actionable under other legal theories, as is demonstrated by plaintiff's pendent state law claims. However, to avail itself of treble damages under *15 U.S.C.S. § 1*, plaintiff must show harm to competition in general, as well as its own injury as a competitor.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN17[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The court therefore must evaluate whether, viewing the evidence offered at trial in the light most favorable to the plaintiff, it offered sufficient proof for a reasonable and fair minded jury to conclude: (1) that the defendants conspired to use unfair competitive means to destroy plaintiff's business, and (2) that the elimination of plaintiff and formation of another entity imposed an illegal restraint on competition under the rule of reason.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN18[] **Market Definition, Relevant Market**

Plaintiff bears the burden of showing an injury to competition. To show such an injury, plaintiff first has to establish a particularized or relevant market in which the defendant's actions unreasonably restrained trade. An antitrust plaintiff thus makes out a prima facie case under the rule of reason only upon proof of a well-defined relevant market upon which the challenged anticompetitive actions would have substantial impact.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN19[] **Regulated Practices, Market Definition**

Evaluations of the market power of the parties involved and the anticompetitive effect of an alleged restraint, both of which are essential to the rule of reason analysis, are rendered impossible in the absence of proof regarding the economic significance, or relevance, of the market allegedly influenced by the defendant's conduct.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN20[] **Market Definition, Relevant Market**

The relevant market is defined generally as the area of effective competition. The market must contain both a product dimension, determined by the availability of substitutes to which consumers can turn in response to price increases and other existing or potential producer's ability to expand output, and a geographic dimension, the area in which the product or its reasonably interchangeable substitutes are traded, both of which must be shown to be economically significant. Within a broad market, economically significant sub-markets can exist that in themselves constitute relevant markets. Thus, although the geographic market in some instances may encompass the entire nation, under other circumstances it may be as small as a single metropolitan area.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN21[] **Regulated Practices, Market Definition**

In determining the area of effective competition in which a product or its reasonably interchangeable substitutes are traded, such economic and physical barriers to expansion as transportation costs, delivery limitations and customer convenience and preference must be considered. The location and facilities of other producers and distributors are also essential in determining the relevant geographic market. Economically significant geographic barriers limit the ability of sellers outside the market to operate within, and the ability of purchasers to obtain the product from suppliers outside the geographic area. Price data, corroborated by the factors listed above, are perhaps the most probative evidence on the relevance of the given market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN22[] **Regulated Practices, Market Definition**

If sellers within the area are making price and output decisions protected from the need to take account of sellers outside the area, there is the distinct geographic market. If sellers within the market must take account of sellers outside it, either because those sellers are mobile and can easily come into the area to sell, or because buyers are mobile and can easily go outside the area to buy, the market is being defined too narrowly.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN23[] **Market Definition, Relevant Market**

In affirming the district court's directed verdict on the antitrust claims, the court is mindful of the principle that relevant market definition is generally a question of fact for the jury. The court is also aware that the definition of a relevant market should be pragmatic, not formal or legalistic.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Estate, Gift & Trust Law > Wills > Beneficiaries > Elections

HN24[] Subject Matter Jurisdiction, Jurisdiction Over Actions

See *Ala. Code § 6-5-440* (1975).

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN25[] Jurisdiction, Jurisdictional Sources

Two factors determine whether state law claims lacking an independent federal jurisdictional basis can be heard in federal court with a federal claim over which the court has jurisdiction. To exercise pendent jurisdiction over state law claims not otherwise cognizable in federal court, the court must have jurisdiction over a substantial federal claim, and the federal and state claims must derive from a common nucleus of operative fact.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

Governments > Courts > Authority to Adjudicate

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN26[] Supplemental Jurisdiction, Pendent Claims

The question for jurisdictional purposes is not whether the claims are without merit, but whether the prior decisions inescapably render the claims frivolous. The federal courts' power or jurisdiction to entertain pendent state claims ordinarily is determined on the pleadings.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN27[] Supplemental Jurisdiction, Pendent Claims

Dismissal of federal claims does not necessarily keep those claims from being substantial for purposes of jurisdiction over pendent state law claims.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN28[] Supplemental Jurisdiction, Pendent Claims

Even where the federal court has power to entertain the pendent state claims, it need not do so. Pendent jurisdiction is a matter of discretion, not of plaintiff's right.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN29[] **Supplemental Jurisdiction, Pendent Claims**

The discretion to entertain or dismiss the pendent state claims continues throughout the proceeding.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Claims

Governments > Courts > Judicial Comity

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN30[] **Supplemental Jurisdiction, Pendent Claims**

The district court's discretionary decision whether or not to entertain pendent state claims is guided generally by four factors: (1) whether the state law claims predominate in terms of proof, the scope of the issues raised, or the comprehensiveness of the remedy sought; (2) whether comity considerations warrant determination by a state court, i.e., is the state claim novel or particularly complex such that an accurate definitive interpretation of state law is necessary; (3) whether judicial economy, convenience, and fairness to the litigants would best be served by trying the federal and state claims together; and (4) whether the state claim is so closely tied to questions of federal policy that the argument for exercise of pendent jurisdiction is particularly strong.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN31[] **Subject Matter Jurisdiction, Supplemental Jurisdiction**

The timing of the federal court's decision to hear the state claims also influences the consideration of discretionary factors.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

Governments > Courts > Judicial Comity

HN32[] **Subject Matter Jurisdiction, Supplemental Jurisdiction**

Comity requires that the court defer to the courts of Alabama for a ruling on the alleged unfair competition claim. It is most improper for a federal court, without suitable law to guide it, to plow new ground in a state law field.

Opinion by: ANDERSON, III

Opinion

[*416] R. LANIER ANDERSON, III, Circuit Judge:

L.A. Draper & Sons, Inc. [1] **[**2]** (plaintiff in the action below) appeals a directed verdict on its antitrust claim against defendants, Wheelabrator-Frye, Inc. (referred to as "Whiffy"), [2] Hessco Industrial Supply, Inc. ("Hessco"), and Fred Hester, [3] and the **[*417]** dismissal without prejudice of its pendent state unfair competition claims.

[3]** The antitrust claim under *Section 1* of the Sherman Act involves a cause of action similar to that discussed in *Northwest Power Products, Inc. v. Omark Industries, Inc., 576 F.2d 83 (5th Cir.1978)*, *cert. denied*, *439 U.S. 1116, 59 L. Ed. 2d 75, 99 S. Ct. 1021 (1979)*, and *Associated Radio Service Co. v. Page Airways, Inc., 624 F.2d 1342 (5th Cir.1980)*, *cert. denied*, *450 U.S. 1030, 101 S. Ct. 1740, 68 L. Ed. 2d 226 (1981)*. Under the principles discussed in *Northwest* and *Page*, ***HN3***[] a plaintiff establishes an antitrust violation by proving that defendants conspired to use unfair and predatory competitive means to eliminate the plaintiff as a competitor, and that the plaintiff's elimination from the marketplace in this fashion imposed an illegal restraint on trade under the rule of reason analysis. Finding the plaintiff's proof in the instant case insufficient to state a claim under *Northwest* and *Page*, we affirm the district court's directed verdict on the plaintiff's antitrust claims.

With regard to the district court's decision to dismiss the pendent state claims without prejudice, *560 F. Supp. 1138*, we remand for a determination of Ladsco's ability to bring **[**4]** those claims in state court. If a state forum is still available for the unfair competition claims, we hold that the district court's dismissal was not an abuse of discretion. If not, we hold that the district court must entertain Ladsco's state claims.

FACTS

L. A. Draper & Sons, Inc., consists of two divisions, Ladmet and Ladsco, and is wholly owned by its president, Alan Draper. The plaintiff's Ladsco Division has been in the foundry supply business since the early 1950's. In 1979, when this cause of action arose, Ladsco distributed four products: (1) primary and secondary aluminum, (2) refractories, (3) grinding wheels, and (4) abrasive shot. [4] Since 1960 Ladsco has been obtaining that shot

[1] Hereinafter referred to as "Ladsco," the division of L. A. Draper & Sons involved in the current action.

[2] Employees of Wheelabrator-Frye use this nickname in reference to the company.

[3] A fourth co-defendant, Joseph O'Callahan, is the leading officer of Whiffy's materials cleaning division, located in Mishawaka, Indiana. The materials cleaning division manufactures the products involved in this case and O'Callahan was one of Whiffy's principal representatives in the transactions out of which the lawsuit arose. The trial court dismissed the claims against O'Callahan for improper venue. *See* §§ 4 and 12 of the Clayton Act, *15 U.S.C.A. §§ 15* and *22 (1982)* (authorizing suits against individuals for violations of the antitrust laws "in the district in which the defendant resides or is found to have an agent"); *Braun v. Berenson, 432 F.2d 538, 543-44 (5th Cir.1970)* (holding that a non-resident officer of the defendant corporation was not "found" in the forum state for purposes of § 4, even though he spent two weeks each year in the forum state on routine corporate business).

Should the district court determine that it must hear Ladsco's state claims pursuant to our instructions on remand, we find that venue was proper against O'Callahan under *28 U.S.C.A. § 1391(b) (1976)* ***HN1***[] ("[a] civil action wherein jurisdiction is not founded solely on diversity of citizenship may be brought only in the judicial district where all the defendants reside, or in which the claim arose, except as otherwise provided by law"). The majority of courts considering the joint operation of the venue provisions of the Clayton Act and *§ 1391(b)* have held that ***HN2***[] the Clayton Act's specific venue provisions do not "abolish or supersede venue provision of *§ 1391(b)*." *First Pullen Commodity Services, Inc. v. A. G. Becker-Kipnis & Co., 507 F. Supp. 770, 773 (S.D.Fla.1981)* (also providing an exhaustive listing of the courts considering this issue). *See generally*, C. Wright & A. Miller & E. Miller, *Federal Practice & Procedure: Jurisdiction*, § 3818 at 110 (1975). Because the claims in this case arose in the Northern District of Alabama, we consider that venue was properly laid against O'Callahan under *§ 1391(b)* and on remand, if the court entertains the unfair competition claims, it should reinstate him as a party.

exclusively from the corporate defendant, Wheelabrator-Frye. In 1979 it obtained primary aluminum from Alcoa, secondary aluminum from the Ladmet Division of L. A. Draper & Sons, refractories from A. P. Green Refractories, and grinding wheels from Universal Grinding Wheels.

[5]** In 1979, the Ladsco Division of L. A. Draper & Sons had for many years been managed by the defendant, Fred Hester, who started with Ladsco in the early 1960's as a clerk typist and worked his way up through the ranks. By the early 1970's, Hester had become a vice president and director of Ladsco and was in charge of its **[*418]** day-to-day operations. Ladsco employed five salesmen under Hester's supervision, a warehouse supervisor, and numerous drivers and office personnel.

For some reason, Hester became dissatisfied with his Ladsco employment arrangement. During the summer of 1979 he formed plans to terminate his employment and enter into business in competition with Ladsco. To this end, he purchased a warehouse in Anniston, Alabama, the corporate home of Ladsco, and began obtaining equipment and setting up the warehouse for the foundry supply business. Within a short time, Ned Landers, Jerry Ellis, and Bill West, three of Ladsco's salesmen, had invested in Hester's new venture and made plans to join Hester once the business was started.

By the beginning of August, Hester had informed Ladsco's suppliers of his intent to leave Ladsco and begin a competing business. On **[**6]** July 31 and August 1, 1979, Hester had discussions with Wheelabrator-Frye officials, including the defendant O'Callahan, at Whiffy's offices in Mishawaka, Indiana. Wheelabrator-Frye immediately began to study the Ladsco-Hester situation.

On Thursday, August 23, 1979, Hester resigned. The following Monday, Mr. Draper presented most of the remaining Ladsco employees with an employment contract that included a covenant not to compete, in an effort to determine their continuing loyalty to Ladsco. None of the employees were willing to sign the contract; all were terminated. [5] Within three weeks all but one of the former Ladsco employees had begun to work for Hester's new company in competition with Ladsco. [6]

[7]** By the second week of September 1979, Hester's new business, under the name of Hessco, had begun to take orders. Its product lines and suppliers were virtually a mirror image of those Ladsco had offered until two weeks earlier. [7] Mr. Draper, now operating Ladsco himself with a vastly depleted workforce was told by Whiffy that Ladsco no longer had credit to purchase Whiffy shot, but could continue to receive a commission for arranging direct sales to Ladsco customers.

On September 5, Mr. O'Callahan traveled to Anniston and on behalf of Whiffy expressed an interest in purchasing both Ladsco, from Mr. Draper, and Hessco, from Mr. Hester. Hester accepted the offer and on September 20, 1979, Hessco became a wholly-owned subsidiary of Wheelabrator-Frye.

[8]** Hessco rapidly became a substantial force in the foundry supply business. It established warehouses in Anniston, Birmingham, and Chattanooga, all cities in which Ladsco maintained warehouse facilities. There is some evidence in the record that Hessco reduced its shot prices in the early months of operation to gain a stronger

---

[4] Abrasive shot is a small, rounded steel pellet used in cleaning residue off the molds that foundries use to manufacture various metal products.

[5] Missing from the August 27th meeting was Mr. Bill Ellison, a Ladsco salesman working out of the Birmingham office. Hester and the three salesmen investing in the new venture testified that Ellison had not been approached about the new company because they were convinced of his loyalty to Mr. Draper. Ellison remained with Ladsco following the formation of Hessco.

[6] The only salesman who left Ladsco and did not join Hessco was Ladsco's salesman in the Carolinas. Hessco does not sell shot in the Carolinas.

[7] Ladsco's supplier of primary aluminum, Alcoa, did not become a Hessco supplier until early 1980. Ladsco had been purchasing secondary aluminum from the Ladmet division of L. A. Draper & Sons and continued to do so after Hester and the other employees left.

foothold in the marketplace. Unlike Ladsco, Hessco did not operate in the Carolinas, where Ladsco and Whiffy had for many years been in direct competition for shot sales.

Ladsco, on the other hand, suffered an immediate downturn in its business fortunes. It obtained shot, refractories, and grinding wheels from alternative manufacturers and continued to market foundry supplies in competition with its former employees. Although some customers remained with Ladsco, many customers shifted over to Hessco and its familiar salesmen **[*419]** and products. By the end of 1980, Hessco business reports stated that "Ladsco is selling very little shot."

Based on the foregoing, in the summer of 1980 Ladsco filed suit alleging that Hester and other employees had conspired to use unfair competitive means to eliminate Ladsco from the marketplace. Ladsco further alleged **[**9]** that Whiffy had joined in the conspiracy in an effort to reap the profits that Hessco had attained through its unfair competitive practices. According to Ladsco, the defendant's actions violated *§ 1* of the Sherman Act and state laws against unfair competition.

After extensive discovery, a jury trial began on March 15, 1982, in the United States District Court for the Northern District of Alabama. After thirteen days of testimony, Ladsco rested. The district court considered motions for directed verdict by Hessco, Hester, and Whiffy on both the antitrust and unfair competition claims. On April 1, the court heard a full day of legal arguments by the parties and announced its intention to file an order granting the directed verdict motions regarding the antitrust claims and dismissing the pendent state claims because they presented novel questions of Alabama law. The jury was dismissed. To allow the plaintiff an opportunity to file a separate state action on the unfair competition claims, the court proposed to delay in filing its order until April 9, 1982.

The court did not enter its order on April 9, 1982. Rather, for over six months the parties disputed the content of that **[**10]** order and Ladsco filed a motion for a new trial. On March 8, 1983, the district court had yet to issue its order and Ladsco filed a petition for mandamus. Eight days later the district court entered its order, *L.A. Draper & Son, Inc. v. Wheelabrator-Frye, Inc., 560 F. Supp. 1138 (N.D.Ala.1983)*, and Ladsco filed timely notice of appeal. [8]

ISSUES ON APPEAL AND STANDARD OF REVIEW

Ladsco presents two primary issues [9] on this appeal: (1) whether the district court properly directed a verdict in favor of the defendants on the antitrust claim, and (2) whether the district court properly **[**11]** dismissed the pendent state unfair competition claims.

With regard to the first issue, the standards for evaluating motions for directed verdict were clearly articulated in *Boeing v. Shipman, 411 F.2d 365 (5th Cir.1969)* (en banc). [10]

> ***HN4***[] On motions for directed verdict and for judgment notwithstanding the verdict the Court should consider all of the evidence -- not just that evidence which supports the non-mover's case -- but in the light and

[8] While pursuing this appeal, Ladsco also filed suit on its unfair competition claims in the Alabama courts. Relying on *Ala.Code § 6-5-440* (1975), the state trial court dismissed Ladsco's action because this appeal was pending. The Alabama Supreme Court recently affirmed. The possibility that Ladsco may be unable to reassert its state claims in the Alabama courts is discussed more fully in Section II, *infra*.

[9] We have already addressed Ladsco's challenge to the dismissal of the defendant O'Callahan for improper venue, *supra* note 3. Ladsco also challenges several of the district court's evidentiary rulings. We have considered the excluded evidence in determining whether the district court properly dismissed Ladsco's claims. We have determined that Ladsco presented insufficient proof to avoid a directed verdict on the antitrust claims, even considering the excluded evidence, and we therefore do not address the lower court's specific evidentiary rulings.

[10] In *Bonner v. City of Prichard, 661 F.2d 1206 (11th Cir.1981)* (en banc), this court adopted as binding precedent all of the decisions of the former Fifth Circuit handed down prior to the close of business on September 30, 1981. *Id. at 1209*.

> with **[**12]** all reasonable inferences most favorable to the party opposed to the motion. If the facts and inferences point so strongly and overwhelmingly in favor of one party that the Court believes that reasonable men could not arrive at a contrary verdict, granting of the motions is proper. On the other ***HN5***[] hand, if there is substantial evidence opposed to the motions, that is, evidence of such quality and weight that reasonable and **[*420]** fair-minded men in the exercise of impartial judgment might reach different conclusions, the motions should be denied, and the case submitted to the jury. A mere scintilla of evidence is insufficient to present a question for the jury. The motions for directed verdict and judgment n.o.v. should not be decided by which side has the better of the case, nor should they be granted only when there is a complete absence of probative facts to support a jury verdict. There must be a conflict in substantial evidence to create a jury question. However, it is the function of the jury as the traditional finder of the facts, and not the Court, to weigh conflicting evidence and inferences, and determine the credibility of witnesses.

Id. at 374-75 **[**13]** (footnote omitted). *See also* *Huff v. Standard Life Ins. Co., 683 F.2d 1363, 1366 (11th Cir.1982)*; *Kaye v. Pawnee Const. Co., 680 F.2d 1360, 1364 (11th Cir.1982)*; *Malcolm v. Marathon Oil Co., 642 F.2d 845, 848 (5th Cir.1981)* ***HN6***[] (to avoid a directed verdict the plaintiff must present sufficient evidence to create a jury question with respect to each element of its case), *cert. denied*, *454 U.S. 1125, 102 S. Ct. 975, 71 L. Ed. 2d 113 (1981)*. In addition, we are mindful of the ***HN7***[] policy against summary dispositions of antitrust cases "where motive and intent play leading roles, [and] the proof is largely in the hands of the alleged conspirators [and hostile witnesses]," and where the plaintiff must build its case largely on circumstantial evidence. *Poller v. Columbia Broadcasting System, 368 U.S. 464, 473, 82 S. Ct. 486, 491, 7 L. Ed. 2d 458 (1962)*.

[14]** ***HN8***[]

The second issue -- the dismissal without prejudice of the pendent state claims -- is to be judged on an abuse of discretion standard. *See* *Jackson v. Stinchcomb, 635 F.2d 462, 473 (5th Cir.1981)*; *H & B Equipment Co. v. International Harvester Co., 577 F.2d 239, 248 (5th Cir.1978)*.

DISCUSSION

I. *The Antitrust Issues*

A. Generally

Section 1 of the Sherman Act provides:

> ***HN9***[] Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is declared to be illegal.

15 U.S.C. § 1. ***HN10***[] Under § 4 of the Clayton Act, "Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefore . . . and shall recover threefold the damages by him sustained." *15 U.S.C. § 15*. Ladsco alleges that the defendants conspired to use unfair competitive means to drive Ladsco from the marketplace and seeks treble damages for this alleged violation of *§ 1* of the Sherman Act.

HN11[] Depending on the claim presented, we evaluate an alleged violation of *§ 1* under a per se or rule of reason analysis. Certain activities, **[**15]** such as price fixing, have such a pernicious effect on competition and are so lacking in any redeeming virtue that they are deemed per se violations without inquiry into the nature of their impact on a particular market. *See* *Northern Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545 (1958)* (discussing rationale behind per se rule). Other restraints on trade, such as territorial restrictions that a manufacturer imposes on a distributor, have possible procompetitive influences on a given market and the legality of the restraint is judged under the rule of reason. *See, e.g.,* *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*. Under the rule of reason,

> ***HN12***[] The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition, or whether it is such as may suppress or even destroy competition. To determine that question the court must ordinarily consider the fact peculiar to the business to which the restraint is applied; its condition before and after the restraint was imposed; the nature of the restraint, and its effect, actual or probable.

[16]**

[*421] *Chicago Board of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 244, 62 L. Ed. 683 (1918)*. ***HN13***[] The rule of reason inquiry must be tied to a particular market in which the challenged activity is alleged to impose an impermissible restraint. *Continental TV., Inc. v. GTE Sylvania, Inc., 433 U.S. at 53 n.21, 97 S. Ct. at 2559 n.21* ("an antitrust policy divorced from market considerations would lack any objective benchmarks").

HN14[] In this circuit, we evaluate Ladsco's *§ 1* claim -- that the defendants conspired to use unfair competitive means to drive Ladsco from the market place -- under the rule of reason standard discussed in the *Northwest* and *Page* cases.

In *Northwest Power Products, Inc. v. Omark Industries, 576 F.2d 83 (1978)*, the Fifth Circuit addressed a claim similar to that presented here. The plaintiff, Northwest, was a former distributor of the defendant manufacturer's product. The defendant, Omark, had allegedly conspired with the plaintiff's key employees to substitute another sales company as its distributor. The new distributor then hired the former Northwest employees. Although Northwest suffered considerable injury as **[**17]** a competitor, the court held that it must further prove that defendant's conduct violated the antitrust laws under a rule of reason analysis. [11] *Accord Associated Radio Service Co. v. Page Airways, Inc., 624 F.2d 1342 (5th Cir.1980)* (finding rule of reason violation where defendant conspired with key employees of plaintiff to establish a subsidiary that drove plaintiff out of business). [12]

[18]** The rule of the *Northwest* and *Page* cases is that ***HN16***[] "injury to a competitor need not result in injury to competition. The use of unfair means in substituting one competitor for another without more does not violate the antitrust laws." *Manufacturing Research Corp. v. Greenlee Tool Co., 693 F.2d 1037, 1043 (11th Cir.1982)* (citing *Northwest, 576 F.2d at 90*). *See also Redwing Carriers, Inc. v. McKenzie Tank Lines, Inc., 594 F.2d 114 (5th Cir.1979)*. Unfair competitive means can be actionable under other legal theories, as is demonstrated by Ladsco's pendent state law claims. However, to avail itself of treble damages under *§ 1* of the Sherman Act, Ladsco must show harm to competition in general, as well as its own injury as a competitor.

Under the *Northwest/Page* analysis, ***HN17***[] we therefore must evaluate whether, viewing the evidence offered at trial in the light most favorable to the plaintiff, Ladsco offered sufficient proof for a reasonable and fairminded jury to conclude: (1) that the defendants conspired to use unfair competitive means to destroy Ladsco's business, and (2) that the elimination of Ladsco and formation of Hessco imposed an illegal restraint on competition **[**19]** under the rule of reason.

B. *Rule of Reason Analysis*

---

[11] In so holding, the *Northwest* court expressly rejected the notion that a conspiracy to use unfair means to destroy a competitor was a per se violation of *§ 1* of the Sherman Act. *Id.* at 90. Prior to *Northwest*, a line of cases flowing from the First Circuit decision in *Albert Pick-Barth Co. v. Mitchell Woodbury Corp., 57 F.2d 96 (1st Cir.)*, *cert. denied*, ***286 U.S. 552, 52 S. Ct. 503, 76 L. Ed. 1288 (1932)***, had indicated that a conspiracy to engage in unfair competition was a per se violation of the antitrust laws.

[12] Following the discussion in *Northwest*, the *Page* court broke ***HN15***[] the rule of reason test down into two parts, under which the plaintiff must show: "(1) a market effect that would be prohibited under the law of mergers; and (2) other conduct by [the] defendant that threatens Sherman Act values." *624 F.2d at 1351*. Three findings were relevant to the *Page* Court's determination that the defendant had violated the rule of reason: (1) Associated was the most significant competitor in a concentrated market; (2) Page was a potential entrant into the market and its entry by taking over the business of the most significant competitor held potential for lessening competition; and (3) the newly created subsidiary had dramatic market power as was evidenced by its ability to raise prices and make excessive profits on its installation contracts. *Id. at 1351-53*.

Without deciding whether Ladsco offered sufficient proof on the conspiracy element of its *§ 1* claim, we address **[*422]** the more fundamental inadequacy in the proof offered at trial. To avoid a directed verdict on its antitrust claims, Ladsco had to introduce sufficient evidence to create a jury question on each element of its claim. *Malcolm v. Marathon Oil Co., 642 F.2d 845, 848 (5th Cir.1981)*. We must agree with the district court's determination that Ladsco offered insufficient proof of the relevant geographic market in which the defendant's actions allegedly restrained trade. *560 F. Supp. at 1144*. [13]

[20]** 1. The necessity of showing a relevant market

In order to prevail on a claim under the *Northwest/Page* analysis, ***HN18***[] Ladsco bore the burden of showing an injury to competition. To show such an injury, Ladsco first had to establish a particularized or relevant market in which the defendant's actions unreasonably restrained trade. In *Dougherty v. Continental Oil Co., 579 F.2d 954 (5th Cir.1978)*, *vacated by stipulation of the parties*, *591 F.2d 1206 (1979)*, the court stated:

> An antitrust plaintiff thus makes out a prima facie case under the rule of reason only upon "proof of a well-defined relevant market upon which the challenged anticompetitive actions would have substantial impact."

Id. at 962 (quoting *Cornwell Quality Tools Co. v. CTS Co., 446 F.2d 825 (9th Cir.1971)*, *cert. denied*, *404 U.S. 1049, 92 S. Ct. 715, 30 L. Ed. 2d 740 (1972))*. *See also* *Graphic Prods. Distribs., Inc. v. Itek Corp., 717 F.2d 1560, 1569 (11th Cir.1983)* (analyzing anticompetitive effect of territorial dealer restrictions under rule of reason); *Hornsby Oil Co. v. Champion Spark Plug Co., 714 F.2d 1384, 1393 & n. 8 (5th Cir.1983)* (same). ***HN19***[] Evaluations of the **[**21]** market power of the parties involved and the anticompetitive effect of an alleged restraint, both of which are essential to the rule of reason analysis, are rendered impossible in the absence of proof regarding the economic significance (or relevance) of the market allegedly influenced by the defendant's conduct. *See* *Dougherty v. Continental Oil Co., 579 F.2d at 962*; *Northwest Power Products, Inc. v. Omark Industries, Inc., 576 F.2d at 87*. [14]

---

[13] At oral argument to this court, Ladsco contended for the first time that it had introduced sufficient evidence on each of three per se theories to avoid a directed verdict on the antitrust claims. These theories -- (1) resale price maintenance, (2) tying arrangements, and (3) group boycott -- were not included in Ladsco's complaint nor were they part of the amended pretrial order in the case. Ladsco's failure to assert its per se theories of recovery prior to oral argument before this court would generally preclude their consideration at this time. Furthermore, the district court did address these claims in the fashion in which Ladsco presented them below and in its briefs to this court. Ladsco had argued that these three factors contributed to a finding of "a threat to antitrust values" under the second prong of the *Northwest/Page* analysis. *See supra* note 12. Viewed in this context, the district court properly held that there was insufficient proof on these theories to constitute a "threat" to antitrust values, let alone a per se violation of the antitrust laws. *560 F. Supp. at 1140-44*.

Ladsco also argued that Whiffy was guilty of imposing territorial restrictions on Ladsco as a distributor. The district court found this allegation lacking in any factual basis. *560 F. Supp. at 1142-43*. In addition, territorial restrictions are judged under the rule of reason. *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*. Thus, just as Ladsco's failure to establish a relevant market defeated its claim under *Northwest* and *Page*, absence of proof on the relevant market defeated the territorial restrictions allegation as well.

[14] The importance of the relevant market determination to a rule of reason analysis is illustrated by the Supreme Court decision in *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*. *Tampa Electric* was a case under § 3 of the Clayton Act and involved a requirement contract between the parties. The coal company defended its breach of that contract on grounds that the contract violated the antitrust laws because it imposed an illegal restraint on trade. Had the Court adopted the defendant's argument that the relevant geographic market consisted of Peninsular Florida, the contract at issue would have foreclosed 18% of the market. By broadening the relevant market to include those areas "to which the purchaser[s] [could] practicably turn for supplies," *id. at 327, 81 S. Ct. at 628, 5 L. Ed. 2d at 587*, the market foreclosure dropped to less than 1%.

In the instant case, without proof of a relevant market, there was no way for the jury to find a market effect that would be prohibited by the merger laws. Therefore, Ladsco could not meet its burden of proof under the first prong of the *Northwest/Page* analysis. *See supra* note 12.

[22]** **[*423]** 2. Defining a relevant market

HN20[] The relevant market is defined generally as "the area of effective competition." *Brown Shoe Co. v. United States, 370 U.S. 294, 324, 82 S. Ct. 1502, 1523, 8 L. Ed. 2d 510 (1962)*. The market must contain both a product dimension (determined by the availability of substitutes to which consumers can turn in response to price increases and other existing or potential producer's ability to expand output), and a geographic dimension (the area in which the product or its reasonably interchangeable substitutes are traded), both of which must be shown to be economically significant. *Id. at 324-26, 82 S. Ct. at 1523-25*; *Hornsby Oil Co. v. Champion Spark Plug Co., 714 F.2d at 1393*. Within a broad market, economically significant submarkets can exist that in themselves constitute relevant markets. *Brown Shoe Co. v. United States, 370 U.S. at 325* & *336-37, 82 S. Ct. at 1523* & 1529-30 ("thus, although the geographic market in some instances may encompass the entire nation, under other circumstances it may be as small as a single metropolitan area").

Assuming *arguendo* that retail shot sales constituted a relevant product for which **[**23]** there are no readily apparent substitutes, the defendants argue and the district court found that Ladsco offered insufficient proof to create a jury question on the relevant geographic boundaries of the shot market. We agree.

HN21[] In determining the "area of effective competition" in which a product or its reasonably interchangeable substitutes are traded, "such economic and physical barriers to expansion as transportation costs, delivery limitations and customer convenience and preference must be considered." *Hornsby Oil Co. v. Champion Spark Plug Co., 714 F.2d at 1394*. The location and facilities of other producers and distributors are also essential in determining the relevant geographic market. *See Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 628, 5 L. Ed. 2d 580 (1961)*. Economically significant geographic barriers limit the ability of sellers outside the market to operate within, and the ability of purchasers to obtain the product from suppliers outside the geographic area. *Id.* Price data, corroborated by the factors listed above, are perhaps the most probative evidence on the relevance of the given market.

> ***HN22***[] If sellers within **[**24]** the area are making price and output decisions protected from the need to take account of sellers outside the area, there is the distinct [geographic] market. If sellers within the market must take account of sellers outside it, either because those sellers are mobile and can easily come into the area to sell, or because buyers are mobile and can easily go outside the area to buy, the market is being defined too narrowly.

L. Sullivan, *Handbook of the Law of Antitrust*, § 19 at 68 (1977). *See also* II P. Areeda & D. Turner, ***Antitrust Law***, para. 522 at 355 ("when prices and price movements in two territories are closely corrollated, a single market definition is strongly indicated").

3. Analyzing Ladsco's Proof

Ladsco has attempted to define two distinct geographic areas as relevant shot markets. Viewing Ladsco's evidence in a favorable light, as we must on review of a directed verdict, we address each proposed market and conclude that the proof was insufficient to support a jury finding that either market was economically significant.

a. The Four State Area

The first of the markets Ladsco identifies as relevant is the four-state area consisting of **[**25]** Alabama, Tennessee, Georgia, and Mississippi. This is an area in which Ladsco had for twenty years served as the exclusive distributor of Whiffy shot and had captured 50% of the shot sales. Hessco now fulfills a similar function and has about the same market share. Ladsco also offered proof that would support an inference **[*424]** that consumers in the four-state area were loyal to the salesmen formerly employed by Ladsco and now working for Hessco, and preferred local warehousing for quick delivery -- a factor also indicated by Hessco's establishment of local warehouses and operations identical to those used by Ladsco. Finally, Ladsco introduced evidence that shot is a heavy, lowcost item, where freight cost is a significant marketing consideration.

Notably absent from the record is any showing on how the four-state area functioned as a distinct or relevant geographic market. Ladsco offered no evidence on the location of shot manufacturers other than Whiffy and the ability of those manufacturers to sell in the four-state area. *Compare* *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. at 331, 81 S. Ct. at 630* (area of effective competition is area in which coal producers **[**26]** operated and were willing to compete for customers). Ladsco competed in the four-state area with eight to ten other distributors, but there is no evidence in the record on where those distributors obtained shot, sold shot (*i.e.*, we do not know the sales patterns of Ladsco's competitors; they may sell shot outside the four-state area), or where their warehouse facilities were located. Most importantly, Ladsco offered no evidence on the relationship of prices within the four-state area to other parts of the country. There was simply no evidence that could support an inference that if prices increased in the four-state area, purchasers could not obtain shot from distributors located elsewhere. *Compare, id. at 327, 81 S. Ct. at 628* (in order to find a market relevant, purchasers must, as a practical matter, be unable to turn to suppliers outside their own area); L. Sullivan, *supra* § 19 at 68.

Ladsco did show that it, and Hessco, adopted the four-state area as their sales area. However, as noted, there was no evidence that competing distributors used a similar sales pattern. Furthermore, any number of irrelevant considerations could have caused Ladsco and Hessco to **[**27]** limit their operation to a four-state area. For example, both Ladsco and Hessco sell a mix of several different foundry supplies. The geographic market limitations and consumer preferences that led to Ladsco and Hessco's four-state distribution pattern could have been created by any one of the products, or some mix of all four. *See* *United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 360-61, 83 S. Ct. 1715, 1739-40, 10 L. Ed. 2d 915 (1963)* (recognizing that banks, which offer a variety of services to a variety of customers, may face an "area of effective competition" that varies according to the service and customers). We are concerned here only with the geographic market for shot sales; and Ladsco's proof that it and Hessco served a four-state area with sales of various foundry supplies, unsupported by a showing that other shot sellers followed a similar sales pattern, is inconclusive on the sales pattern that prevailed in the shot market.

Even if Ladsco had shown that the four-state area was the predominant sales pattern for shot sales, that evidence without more would have been insufficient to present the issue to the jury. "Although actual sales patterns can aid in **[**28]** the interpretation of ambiguous price data or otherwise illuminate the character of the market, we should be aware that actual patterns can also be virtually meaningless." II P. Areeda & D. Turner, *supra* para. 522(b) at 357. The pattern of sales may only reflect established consumer preferences, but do not mean the customers would remain loyal if Ladsco or now Hessco would try to raise shot prices. For proof of sales patterns to support a geographic market definition, we would have to know that consumers could not realistically turn to outside distributors should prices rise within the four-state area. *Id. See also* *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. at 327, 81 S. Ct. at 628*; *RCM Supply Co. v. Hunter Douglas, Inc., 686 F.2d 1074 (4th Cir.1982)* (plaintiff's proof that it sold only in metropolitan Washington, D.C. area was inclusive on geographic market issue, in face of evidence that suppliers outside the market could and did make shipments into the area).

[*425] Ladsco also offered evidence that consumers were loyal to familiar salesmen and distributors that maintained local warehousing for quick and reliable services. This evidence, in conjunction **[**29]** with proof of price differentials between the four-state area and other portions of the country, might have created a jury issue on the four-state area as a relevant market. *See* *Brown Shoe Co. v. United States, 370 U.S. at 325, 82 S. Ct. at 1524* (practical indicia, such as consumer preference, can aid in defining an economically significant markets); II P. Areeda and D. Turner, *supra* para. 524 at 367 & 370 ("consumer convenience and preference . . . can narrow the scope of a geographic market * * * [however], we are inclined to view the identification of such barriers to entry as consumer preferences or the need for local sales or servicing facilities as serving no useful purpose other than to support price relationship data that point to separate markets").

The record in the instant case, however, is insufficient to afford any weight to Ladsco's proof of consumer preference as it relates to relevant market definition. Ladsco, which bore the burden of proving that it had identified an economically significant market, had to show how the alleged consumer preferences translated into market power for the firms within the four-state area and contributed to making that area **[**30]** a relevant market. Crucial information on the location of distribution facilities, the availability or nonavailability of shot at competitive prices from outside the four-state area, and the existence of price differentials is lacking. Ladsco's evidence on consumer preferences was therefore inconclusive and insufficient to create a question for the jury.

Finally, Ladsco's evidence on freight costs also was insufficient to create a jury question. Areeda & Turner state: "Two areas are ordinarily separate markets where there are no or only episodic sales between them and where transport costs exceed any price differentials between the two areas." II. P. Areeda & D. Turner, *supra* para. 523 at 358. *See also* *Hornsby Oil Co. v. Champion Spark Plug Co., 714 F.2d at 1393* (transport costs factor in determining relevant market); *United States v. Columbia Steel, 334 U.S. 495, 510-11, 68 S. Ct. 1107, 1115-16, 92 L. Ed. 1533 (1947)* (same). Transport costs, however, must be compared in order to support a given market definition. Ladsco had to present sufficient evidence for the factfinder to conclude that these costs foreclosed the market to shot suppliers outside the geographic **[**31]** area. *Id.*

In the instant case, Ladsco showed that transport costs into the four-state area from Whiffy's Virginia plant were a significant portion of the sales price of shot (15%). It failed to offer any proof on how Ladsco's cost related to other distributors or suppliers operating within or outside the four-state area. Because there was no proof of price differentials between the four-state area and other places where shot was sold, there was no indication that relative transport costs exceeded those differentials. Proof of the mere existence of significant transport costs from one plant into the four-state area could not support a conclusion that the four states were an economically significant, distinct, relevant market.

In short, the record is devoid of sufficient evidence on the operation of the four-state area as a relevant market to create a legitimate question of fact for the jury.

b. The Carolinas

Ladsco also asserted that North and South Carolina were a second relevant market in which the alleged Whiffy-Hessco conspiracy imposed an unreasonable restraint on trade. This is an area in which Ladsco and Whiffy had competed directly for shot sales. [15] As with **[**32]** regard to the **[*426]** four-state area, Ladsco introduced no proof on the location of manufacturers and distributors competing for shot sales in the Carolinas. There was no evidence on the relationship of prices in the Carolinas to other areas. [16]

[33]** For the reasons discussed with respect to the four-state area, we conclude that Ladsco did not offer sufficient proof to create a jury question on the definition of the Carolinas as a relevant market.

HN23[] In affirming the district court's directed verdict on the antitrust claims, we are mindful of the principle that relevant market definition is generally a question of fact for the jury. *See* *Heatransfer Corp. v. Volkswagenwerk, A.G., 553 F.2d 964, 979-81 (5th Cir.1977)*, *cert. denied*, *434 U.S. 1087, 98 S. Ct. 1282, 55 L. Ed. 2d 792 (1978)*. We are also aware that the definition of a relevant market should be pragmatic, not formal or legalistic. *Brown Shoe Co. v. United States*, 370 U.S. 336 at 336-37, 82 S. Ct. at 1529-30. Nevertheless, we conclude that Ladsco failed to present sufficient evidence of the commercial realities within the industry to warrant a jury finding that either the four-state area or the Carolinas constitute an economically significant relevant market.

---

[15] Contrary to Ladsco's assertion, the mere fact that it competed with Whiffy in the Carolinas is insufficient to establish the Carolinas as a relevant market. In support of its assertion, Ladsco cites the general proposition that a relevant market is the "area of effective competition." *E.g.,* *Brown Shoe Co. v. United States, 370 U.S. at 324, 82 S. Ct. at 1523*. However, the concept of effective competition in *Brown Shoe* and other cases that Ladsco cites is not limited to the parties in a given case, but encompasses the area in which suppliers of the product can effectively compete and purchasers can turn for supplies. *See, e.g.,* *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. at 327, 81 S. Ct. at 628* (discussing "area of effective competition").

[16] Indeed, the record indicates that prices in the Carolinas were similar to those in the four-state area. Whiffy supplied shot for the Carolinas and the four-state area from its Virginia plant. If anything, the record supports an inference that the Carolinas and the four states were part of a single market. Even combining these areas, however, there was insufficient proof to support a relevant market definition.

Without a well-defined relevant market upon which the defendant's alleged anticompetitive conduct might be judged, there was simply no way for the jury to conduct the rule of reason analysis required **[**34]** in this case. Accordingly, we must affirm the district court's directed verdict on the antitrust claim.

II. DISMISSAL OF THE PENDENT STATE LAW CLAIMS FOR UNFAIR COMPETITION

With regard to the district court's dismissal without prejudice of Ladsco's pendent state unfair competition claims, we must remand to the district court for reconsideration in light of recent developments in the state court action that Ladsco filed subsequent to the district court's final order in this case. *See supra* note 8. The district court's decision to dismiss the pendent state claims was based in large part on Ladsco's ability to obtain a state forum for its unfair competition claims. Ladsco filed the state action; and the Alabama Supreme Court recently affirmed the state trial court's dismissal of that action because this federal appeal was pending. *L.A. Draper & Sons, Inc. v. Wheelabrator-Frye, Inc., 454 So. 2d 506 (Ala.1984)*. [17]

[35]** The parties' briefs to this court have not addressed the issue of whether a state action remains available to Ladsco on its unfair competition claims. Accordingly, we remand to the district court to determine that issue, which, as we will discuss, has a decisive bearing in this particular case on the propriety of denying Ladsco a federal forum for its pendent state claims. *See Pharo v. Smith, 625 F.2d 1226, 1227 (5th* ***[*427]*** *Cir.1980)* (remanding to district court to redetermine whether pendent state claims should have been dismissed in light of possible statute of limitations bar to subsequent state suit).

A. *The State Law Claims Were Pendent Under the United Mine Workers v. Gibbs Analysis*

HN25[] Two factors determine whether state law claims lacking an independent federal jurisdictional basis can be heard in federal court with a federal claim over which the court has jurisdiction. To exercise pendent jurisdiction over state law claims not otherwise cognizable in federal court, "the court must have jurisdiction over a substantial federal claim and the federal and state claims must derive from a 'common nucleus of operative fact.'" *Jackson v. Stinchcomb, 635 F.2d 462,* ***[**36]*** *470 (5th Cir.1981)* (quoting *United Mine Workers v. Gibbs, 383 U.S. 715, 86 S. Ct. 1130, 16 L. Ed. 2d 218 (1966))*. *See generally C.* Wright, A. Miller & E. Cooper, *Federal Practice and Procedure: Jurisdiction* § 3567 pp. 443-47 (1975).

For jurisdictional purposes, Ladsco's antitrust claim was sufficiently substantial. ***HN26***[] "The question for jurisdictional purposes is 'not whether the claims are without merit but whether the prior decisions inescapably render the claims frivolous.'" *Jackson v. Stinchcomb, 635 F.2d at 471* (quoting *Curtis v. Taylor, 625 F.2d 645, 649-50 (5th Cir.1980))*. The federal courts' power or jurisdiction to entertain pendent state claims ordinarily is determined on the pleadings. *United Mine Workers v. Gibbs*, 373 U.S. at 727-28, 86 S. Ct. at 1139-40. Although Ladsco's proof on the federal claims ultimately was insufficient to create an issue for the jury, the claims at the pleading stage did state a cause of action similar to that recognized in *Northwest* and *Page*. Thus, the antitrust claims were not inescapably rendered frivolous by previous decisions. *See Warehouse Groceries Management v. Sav-U-Warehouse, 624 F.2d 655, 659 (5th* ***[**37]*** *Cir.1980)* ***HN27***[] (dismissal of federal claims does not necessarily keep those claims from being "substantial" for purposes of jurisdiction over pendent state law claims).

---

[17] The state courts dismissed Ladsco's claim on the authority of *Ala.Code § 6-5-440* (1975), which provides:

> ***HN24***[] No plaintiff is entitled to prosecute two actions in the courts of this state at the same time for the same cause and against the same party. In such a case, the defendant may require the plaintiff to elect which he will prosecute, if commenced simultaneously, and the pendency of the former is a good defense to the latter if commenced at different times.

The Alabama Supreme Court interpreted the statute to preclude a state action while Ladsco's federal appeal on the same claim was pending. That court, however, did not address the issue of whether a state forum would be available to Ladsco following the conclusion of a federal action in which the merits of the state claim were not addressed.

In addition, Ladsco's state law unfair competition and federal antitrust claims derived from a "common nucleus of operative facts." *Jackson v. Stinchcomb, 635 F.2d at 470*. The actions of Hester and the three salesmen, along with the alleged conspiracy in which Whiffy participated, were the basis for both the federal and state claims. Considered without regard to their federal or state character, Ladsco's antitrust and unfair competition claims are such that they ordinarily would be tried in a single action. *See United Mine Workers v. Gibbs, 383 U.S. at 725, 86 S. Ct. at 1138*.

Because the federal claim was substantial, and the state claims arose from the same facts, the district court had the power to hear the pendent state claims. Subsequent developments, including the directed verdict against the federal antitrust claims, have not divested the district court's jurisdiction should the court determine on remand that a state forum is unavailable and that it must hear the pendent unfair competition claims. **[**38]** *See Stein v. Reynolds Securities, Inc., 667 F.2d 33, 34 (11th Cir.1982)* ("federal court may retain pendent jurisdiction over a state claim which is barred by the state period of limitations, even though all federal claims have been dismissed").

B. *The Discretionary Factors*

The Court in *Gibbs* held that ***HN28***[] even where the federal court has power to entertain the pendent state claims, it need not do so: "Pendent jurisdiction is a matter of discretion, not of plaintiff's right." *United Mine Workers v. Gibbs, 383 U.S. at 726, 86 S. Ct. at 1139*. *See also Laird v. Bd. of Trustees of the Inst. of Higher Learning of the State of Mississippi, 721 F.2d 529, 534 (5th Cir.1983)*; *Jackson v. Stinchcomb, 635 F.2d at 472*. ***HN29***[] The discretion to entertain or dismiss the pendent state claims continues throughout the proceeding. *See United Mine Workers v. Gibbs, 383 U.S. at 727, 86 S. Ct. at 1139*; *H & B Equipment **[*428]** Co. v. International Harvester Co., 577 F.2d 239, 248 (5th Cir.1978)* (holding that dismissal of pendent state unfair competition claims was not an abuse of discretion subsequent to trial that resulted in directed verdict against plaintiff's antitrust claims). **[**39]** *See generally*, C. Wright, A. Miller & E. Cooper, *supra*, § 3567 at 445.

HN30[] The district court's discretionary decision whether or not to entertain pendent state claims is guided generally by four factors: (1) whether the state law claims predominate in terms of proof, the scope of the issues raised, or the comprehensiveness of the remedy sought; (2) whether comity considerations warrant determination by a state court (*i.e.*, is the state claim novel or particularly complex such that an accurate definitive interpretation of state law is necessary); (3) whether judicial economy, convenience, and fairness to the litigants would best be served by trying the federal and state claims together; and (4) whether "the state claim is so closely tied to questions of federal policy that the argument for exercise of pendent jurisdiction is particularly strong." *Jackson v. Stinchcomb, 635 F.2d at 473* (quoting *United Mine Workers v. Gibbs, 383 U.S. at 726-27, 86 S. Ct. at 1139-40*).

HN31[] The timing of the federal court's decision to hear the state claims also influences the consideration of these discretionary factors. For example, a state claim that does not appear predominant on **[**40]** the pleadings may emerge as such following discovery. Thus, a district court might properly find that the first factor warrants dismissal of the state claim sometime after the pleading stage. *See Jackson v. Stinchcomb, 635 F.2d at 472 n. 20*. Indeed, if the federal claims are dismissed prior to trial, *Gibbs* strongly encourages or even requires dismissal of the state claims. *United Mine Workers v. Gibbs, 383 U.S. at 726, 86 S. Ct. at 1139*. *See Joiner v. Diamond M. Drilling Co., 677 F.2d 1035, 1042 (5th Cir.1982)*; *Ray v. Tennessee Valley Authority, 677 F.2d 818, 825 (11th Cir.)*, *cert. denied*, *459 U.S. 1147, 103 S. Ct. 788, 74 L. Ed. 2d 994 (1983)*. Conversely, after a full trial on the merits, judicial economy and convenience counsel against dismissal of the state claims, which would thereby require an identical and duplicative proceeding in state court. *See Caserta v. Village of Dickinson, 672 F.2d 431, 433 (5th Cir.1982)*. If the statute of limitations had run on Ladsco's state claims while the action in federal court was pending, previous decisions of this court strongly indicate that dismissal of the state claims would be an abuse of discretion. *Ransom **[**41]** v. S & S Food Center, Inc., 700 F.2d 670, 678 (11th Cir.1983)*; *Stein v. Reynolds Securities, Inc., 667 F.2d at 34*; *Rheaume v. Texas Dept. of Public Safety, 666 F.2d 925, 931-32 (5th Cir.)*, *cert. denied*, *458 U.S. 1106, 102 S. Ct. 3484, 73 L. Ed. 2d 1367 (1982)*; *Henson v. Columbus Bank & Trust Co., 651 F.2d 320, 325 (5th Cir.1981)*; *Pharo v. Smith, 625 F.2d 1226, 1227 (5th Cir.1980)*. *See also Quality Foods de Cent. Am. v. Latin Am. Agribusiness Dev. Corp., 711 F.2d 989, 990-91 (11th Cir.1983)* (remanding for consideration of statute of limitations problem in dismissal of pendent claims, but noting that issue was not presented to district court and that delay causing statute of limitations problem was caused by plaintiff).

In examining the factors that guided the district court's determination to dismiss the pendent claims, we first assume that a state forum is still available to Ladsco on its unfair competition claims and find the decision was not an abuse of discretion. In the following section, we determine that if Ladsco's action in the state courts is now unavailable, the balance of discretionary factors tips in favor of the district court affording Ladsco **[**42]** a decision on the merits of its state claims, which were properly appended to a non-frivolous federal action.

1. Assuming a State Forum is Still Available

Once the district court had directed a verdict against the antitrust claims, it had only the state claims left to consider; as would of course be true in any case in which the federal claims are insufficient to **[*429]** create a jury issue. This predominance of the state claim, by itself, is not determinative; the federal claims can drop out of the case after trial yet dismissal of pendent state claims nevertheless might be an abuse of discretion. *See* *Caserta v. Village of Dickinson, 672 F.2d at 433* (holding that district court properly dismissed federal claims after trial, but abused discretion in dismissing pendent state claims).

The district court relied primarily upon the second factor, the novelty of the state unfair competition allegations, as grounds for dismissing the pendent claims.

> ***HN32***[] Comity requires that this court defer to the courts of Alabama for a ruling on the alleged unfair competition claim. That claim, as alleged in the complaint, has never been recognized by the Alabama courts. A preliminary **[**43]** search for Alabama authority has revealed a single case on the general issue, with facts quite dissimilar from the facts here. Thus, what is helpful in that opinion is, for the most part, mere dictum.
> * * *
> It is most improper for a federal court, without suitable law to guide it, to plow new ground in a state law field.

560 F. Supp. at 1146. We agree with the district court and the weight it placed upon this factor. *See* *Financial General Bankshares, Inc. v. Metzger, 220 U.S. App. D.C. 219, 680 F.2d 768, 776 (D.C.Cir.1982)* ("although the degree of uncertainty in state law is one of several factors that should guide the district court's discretion, it should be given considerable weight"); *Gregory v. Mitchell, 634 F.2d 199, 202 (5th Cir.1981)*. [18]

[44]** The legal ramifications of Hester and the three salesmen forming a competing business while in Ladsco's employ, and Whiffy's possible conspiratorial participation are by no means clear in Alabama law. Any decision on the parameters of the state law claim, if indeed one exists, should be rendered, if possible, by the Alabama courts. The district court's reliance on this important factor favoring dismissal of the pendent state claims was not misplaced.

---

[18] Professor Wechsler articulated the rationale underlying this factor of the *Gibbs* decision as follows: "Federal courts are not the authorized expositors of state law; there is no mechanism by which their errors in such matters can be corrected on appeal by state courts." Wechsler, *Federal Jurisdiction and the Revision of the Judicial Code*, 13 LAW & CONTEMP. PROB. 216, 232 (1948) (cited in *Gibbs, 383 U.S. at 726 n. 15, 86 S. Ct. at 1139 n. 15*). *See also* Note, *UMW v. Gibbs and Pendent Jurisdiction*, 81 HARV.L.REV. 657, 666 (1968) ("A federal court's holding on a novel issue of state law may unduly limit later state consideration of the problem; a state court will be hesitant to create a conflict with the federal determination because of possible reliance upon that earlier exposition.")

The district court found that certification of the general question regarding the parameters of Ladsco's state claims would not be efficient or appropriate. 560 F.2d at 1146. However, should the court on remand determine that it must hear the state claims, it should consider whether it is feasible to narrow the state law questions sufficiently to certify specific questions to the Alabama Supreme Court.

At the time the district court rendered its decision on the state claims, considerations of judicial economy and convenience weighed against dismissal. The same witnesses would have to introduce virtually identical testimony in a duplicative state proceeding. *See* Phillips v. Smalley Maintenance Services, Inc., 711 F.2d 1524, 1531 (11th Cir.1983) (affirming district court's decision to exercise pendent jurisdiction over state claims, which avoided the necessity of dual proceedings in federal and state court and the need for witnesses to testify twice to the same facts). The dismissal of the state claims imposed a waste of judicial time and resources in the instant case.

However, in the district court's discretion, the convenience **[**45]** and economy considerations did not outweigh the novelty factor which favored dismissal of the state claims so that they might be determined by the Alabama courts. In this vein, we note that the district court made commendable efforts to ensure that a state forum was available for Ladsco's claims and to ameliorate any unfairness to Ladsco that might result from dismissal of the state claims. The court's order dismissing the pendent claims without prejudice was contingent **[*430]** upon securing from defendants a waiver of any portion of the statute of limitations that ran from the time Ladsco filed the federal action to the final order by the district court. *See* Stein v. Reynolds Securities, Inc., 667 F.2d at 34; Henson v. Columbus Bank & Trust Co., 651 F.2d at 325 (abuse of discretion to dismiss timebarred pendent state claims); Pharo v. Smith, 625 F.2d at 1227 ("that a plaintiff's state law claims will be time-barred if dismissed is certainly a factor, if not a determinative factor, a district court should consider in deciding whether to maintain jurisdiction over pendent state claims once the federal claims have been resolved"). [19]

[46]** If the district court was correct assuming that Ladsco could obtain a state forum for its novel state claims, we conclude that the dismissal was not an abuse of discretion.

2. If a State Action is Not Available

The district court evidenced sensitivity to the potential unfairness of its dismissal in the stipulation it obtained from defendants on the statute of limitations question. However, the court, while avoiding the statute of limitations problem, failed to account fully for the procedural bar of Ala.Code § 6-5-440 (1975) (discussed *supra* at note 17). [20] That provision forces a plaintiff to elect prosecution in a single forum; and, as applied on the instant facts, led to dismissal of Ladsco's state court claims because this appeal was pending.

[47]** Because the parties have not briefed the issue, we do not know whether Ladsco could reassert its state claims in the Alabama courts. If not, then the Alabama statute operated on these facts much like a statute of limitations in depriving Ladsco of a state forum because it chose to bring its state claims, which were properly pendent to the antitrust claims, in a single action in federal court. By analogy to the cases involving a statute of limitations bar to a subsequent state proceeding, [21] **[**48]** we conclude that Ladsco's inability to obtain a state forum for its claims would render the district court's dismissal of the pendent claims an abuse of discretion. [22]

---

[19] With regard to the fourth factor, the pendent state law unfair competition claims were not so closely tied to federal policy as to warrant a federal forum for the state claims. *Compare* Jackson v. Stinchcomb, 635 F.2d at 473 (state law claims for wrongful discharge were pendent to federal claim under 42 U.S.C. § 1983 and involved important questions of federal policy that favored litigation in a federal forum). This factor thus does not point to an abuse of discretion in the district court's dismissal of the state claims.

[20] The district court's failure to account fully for the procedural bar in Ala.Code § 6-5-440 is understandable in light of then-existing interpretations of that section. In Terrell v. City of Bessemer, 406 So. 2d 337 (Ala.1981), the Alabama Supreme Court held that the section did not apply to prevent a state action if the federal court dismissed pendent state claims. The Alabama court did not clarify *Terrell*, or the operation of the statute when a federal appeal was pending, until Ladsoc filed its state claim.

[21] The instant case is distinguishable from Quality Foods de Central America v. Latin American Agribusiness Development Corp., 711 F.2d 989 (11th Cir.1983). In *Quality Foods*, the court "reluctantly" remanded to the district court for reconsideration of its dismissal of pendent state claims in light of a possible statute of limitations bar. Id. at 990-91. The court intimated that even if the district court found that the state claims were time-barred, it nevertheless might dismiss the pendent claims because the statute of limitations issue was not presented to the district court during its initial consideration of the pendent claims and any delay in the federal proceedings that may have led to the limitations problem was caused by the plaintiff's recalcitrance.

CONCLUSION

After examining the factors considered by the district court, we affirm its dismissal **[*431]** of Ladsco's state claims contingent upon a finding on remand that Ladsco can obtain a state forum for its claims. Although that dismissal was contrary to notions of economy and convenience, the novelty of the state claims was such that comity considerations strongly favor dismissal. We cannot say that the district court abused its discretion in determining that the need for a "surer-footed" rendering of state law weighed heavily enough to favor dismissal.

[49]** Conversely, should the district court determine on remand that Ladsco is unable to bring its unfair competition claims in the Alabama courts, the district court's dismissal would be extremely unfair to Ladsco. The court properly attempted to remove the unfairness of a statute of limitations bar, evidencing its sensitivity to the potential hardship caused by dismissal of the pendent claims, but understandably failed to account fully for the similar hardship imposed by *Ala.Code § 6-5-440*. The district court's discretion to dismiss pendent state claims should not work a hardship on Ladsco, simply because it elected a federal forum and chose to appeal its substantial federal and state claims to this court. The district court has jurisdiction over the pendent claims and should exercise that jurisdiction if an alternative forum is unavailable. *See* *Stein v. Reynolds Securities, Inc., 667 F.2d at 34*; *Henson v. Columbus Bank & Trust Co., 651 F.2d at 325*; *Pharo v. Smith, 625 F.2d at 1227*. *Cf.* *Jackson v. Stinchcomb, 635 F.2d at 472* (power to hear pendent claims ordinarily exercised).

The directed verdict against the antitrust claims is AFFIRMED. The dismissal with prejudice **[**50]** of the pendent state unfair competition claims is REMANDED WITH INSTRUCTIONS.

End of Document

Conversely, Ladsco argued to the district court prior to dismissal of the pendent claims that the Alabama courts would not consider its state claims should Ladsco pursue its right to appeal the district court's order.

[22] We place dispositive weight on the availability of a state court action in analyzing the dismissal of the pendent claims, because the dismissal, even without the unavailability of a state court action, was an extremely close question. If a state court action is not available, it would be an abuse of discretion to dismiss the pendent claims. *See* *Henson v. Columbus Bank & Trust Co., supra* (holding that district court abused its discretion in dismissing pendent claim on facts similar to but weaker than the instant facts).

HN1[] **Monopolies & Monopolization, Attempts to Monopolize**

The appellate court's scope of review of a jury verdict is limited. The court must consider the evidence in the light most favorable to the party receiving judgment in its favor and give it the benefit of all legitimate inferences. But the jury's factfinding power is not without limit. When the evidence leaves no room for a reasonable difference of opinion as to the proper resolution of the case, it should be decided by the court as a matter of law.

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] Sherman Act, Claims

The elements of an attempted monopolization claim under *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, are as follows: (1) specific intent to control prices or destroy competition in some part of commerce; (2) predatory or anti-competitive conduct directed to accomplishing the unlawful purpose; and (3) a dangerous probability of success.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] Sherman Act, Claims

To establish monopolization in violation of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, it must be shown that a party (1) possessed monopoly power in the relevant market, and (2) used its monopoly power to foreclose competition, gain a competitive advantage, or destroy a competitor.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > Claims

HN4[] Actual Monopolization, Claims

To prove a violation of *§ 2* under the Sherman Act, *2 U.S.C.S. § 2*, whether based on a claim of attempted monopolization or actual monopolization, it must be shown that a party engaged in anti-competitive behavior. A mere showing of monopoly power unaccompanied by evidence of anti-competitive behavior is insufficient to support a claim for monopolization.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] Monopolies & Monopolization, Actual Monopolization

Acts which would constitute an unlawful use of monopoly power are those derived from the monopolist's power in the market or its size, acts which could only have been performed by one with the requisite power. Anti-competitive conduct is conduct without legitimate business purpose. Such conduct makes sense only because it eliminates competition. Acts which are ordinary business practices typical of those used in a competitive market do not constitute anti-competitive conduct violative of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*. The exercise of business judgment cannot be found to be anti-competitive. To be labeled anti-competitive, the conduct involved must be such that its anticipated benefits were dependent upon its tendency to discipline or eliminate competition and thereby enhance the firm's long term ability to reap the benefits of monopoly power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] **Monopolies & Monopolization, Actual Monopolization**

Section 2 of the Sherman Act, *15 U.S.C.S. § 2*, does not give purchasers the exclusive right to dictate the terms on which they will deal, nor does it require a monopolist to accede to every demand of its competitors or customers.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] **Monopolies & Monopolization, Actual Monopolization**

As long as he is acting in good faith, a seller does not lose the right to contest a customer's claim simply by having monopoly power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN8[] **Monopolies & Monopolization, Actual Monopolization**

Setting a high price is not in itself anti-competitive. *15 U.S.C.S. § 2*. *Section 2* of the Sherman Act does not forbid a monopolist to set profit-maximizing prices. Such conduct is not the exclusionary conduct that violates the antitrust laws, but rather is the normal, rational response of a business seeking to maximize profits, sales, or revenues.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Sherman Act, Claims**

Evidence of anti-competitive intent alone is not enough; anti-competitive conduct or use of monopoly power must also be shown to prove a violation of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*.

Judges: McMillian, John R. Gibson, and Bowman, Circuit Judges.

Opinion by: GIBSON

Opinion

[*263] JOHN R. GIBSON, Circuit Judge.

Canadian Industries, Ltd., and CIL Ammunition, Inc., appeal from a judgment in favor of Trace X Chemical, Inc., and John F. Arens on their claim against the CIL group under *Section 2* of the Sherman Act, *15 U.S.C. § 2 (1982)*. Following the jury verdict of $ 500,000, the district court trebled the award pursuant to Section 4 of the Clayton Act, *15 U.S.C. § 15 (1982)*. CIL's motions for judgment notwithstanding the verdict and for a new trial were denied. Trace X manufactured and distributed cast TNT primers for use in the mining industry. CIL manufactured TNT and was the principal source of TNT for Trace X. Arens, Trace X's president, claimed that Trace X was forced out of business by CIL's anti-competitive conduct, particularly CIL's refusal of credit and its failure to replace allegedly defective TNT. CIL appeals **[*264]** from the judgment on the grounds that (1) there was insufficient evidence of any anti-competitive conduct **[**2]** on its part or that CIL caused the shutdown of Trace X's business, (2) the district court erred in admitting irrelevant, prejudicial documents, and (3) Trace X failed to adequately prove its damages. For the reasons stated below, we reverse.

I.

When Trace X first began to buy TNT from CIL, it did so through Gulf Oil Company, Trace X's principal customer. This arrangement permitted Trace X to use Gulf's credit. Trace X had not provided the financial information required by CIL's credit section; therefore, any direct purchases by Trace X were to be paid by cash or certified check.

In April, 1976, CIL's credit section authorized Trace X to make direct purchases on thirty days credit, up to a limit of $ 16,000 -- the cost of one truckload of TNT. If Trace X ordered more than one load in a month, it would have to pay for each load before receiving the next. If the order went through Gulf, however, CIL would extend unlimited credit.

To meet the demand of its rapidly increasing sales, Trace X relied solely on CIL for its supply of TNT. Since the Trace X primer was composed of approximately 95 percent TNT, Trace X was vitally concerned with the availability, quality, and price of TNT. **[**3]** Because of Trace X's ever-increasing need for TNT, Arens became interested in manufacturing TNT. In February, 1976, he contacted CIL about its patented continuous-process method for making TNT, and CIL offered to license its process at a cost of $ 3,500,000. Instead, in late 1976, Arens purchased the equipment and blueprints of a military batch-process TNT plant in Childersburg, Alabama. Arens planned to reconstruct the plant in Arkansas and operate it there. Trace X prepared a prospectus for potential investors in its TNT manufacturing process. By March, 1977, Trace X had commitments for investment only from Arens and Szaloczi, vice president of Trace X. No contracts or commitments had been made by any customer other than Trace X itself.

From April through September, 1976, CIL's deliveries of TNT to Trace X increased steadily. CIL billed Gulf for almost all of Trace X's purchases during this period, but Gulf refused to pay, stating that Trace X was responsible for the purchases. After totalling the amount due on all these purchases and subtracting the amount owed by CIL to Trace X for primers, Trace X owed CIL $ 160,000, an amount far beyond Trace X's credit limit of $ 16,000.

[4]** To settle this account CIL met with Arens in October of 1976. Arens argued that according to Trace X's accounts, CIL owed Trace X rather than Trace X owing CIL because Trace X had received no invoices from CIL, while Trace X invoices to CIL for primers remained unpaid. CIL threatened to stop shipping TNT to Trace X if arrangements were not made to pay for the TNT that Trace X had received. After negotiating, Trace X agreed to pay CIL the $ 160,000 over a ten-week period. Arens also gave CIL his personal guarantee. CIL agreed to ship 40,000 pounds of TNT a week for ten weeks to Trace X and reaffirmed its commitment to supply all of Trace X's TNT requirements subject to availability. CIL insisted that future purchases be cash in advance. In February, 1977, CIL gave Trace X the further written assurance that it would supply 100,000 pounds of TNT per week thereafter.

In September of 1976 some of Trace X's customers complained that primers were misfiring. Trace X took back the faulty primers, gave its customers credit, and made and shipped them new primers. Arens told CIL that primers manufactured by Trace X had been failing and that tests conducted by Trace X showed that the TNT was **[**5]** at fault. CIL disputed this and refused to replace the TNT. CIL maintained that it was Trace X's manufacturing process, rather than defective TNT, that had caused the primer misfires.

[*265] In March, 1977, Trace X again asked for credit, presenting financial statements for the year ending September, 1976. CIL's credit section again declined to grant credit, stating that it would reconsider if provided with current, audited information for the six months from October, 1976, through March, 1977.

Arens shut down Trace X's primer business and decided to abandon its TNT project in March, 1977. According to Arens he was forced to shut down because CIL refused to extend credit to Trace X and would not replace the allegedly defective TNT. At the meeting in late March when Arens again asked CIL to replace the TNT, Ingham, CIL's marketing manager responded: "Why would we do that? If we exchange the TNT, you will just use your profits to compete against us in the manufacture of TNT."

II.

By a general verdict the jury found that CIL violated *Section 2* of the Sherman Act by monopolizing interstate commerce and by attempting to monopolize interstate commerce. ***HN1***[] Our scope of review of **[**6]** a jury verdict is limited. *Roesch, Inc. v. Star Cooler Corp., 712 F.2d 1235, 1237 (8th Cir. 1983)*, *cert. denied*, *466 U.S. 926, 104 S. Ct. 1707, 80 L. Ed. 2d 180 (1984)* (en banc). We must consider the evidence in the light most favorable to Trace X and give it the benefit of all legitimate inferences. *Continental Ore Co. v. Union Carbide and Carbon Corp., 370 U.S. 690, 696, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962)*; *Roesch, Inc., 712 F.2d at 1237*; *J & J Farms, Inc. v. Cargill, Inc., 693 F.2d 830, 834-35 (8th Cir. 1982)*. But the jury's factfinding power is not without limit. When the evidence leaves no room for a reasonable difference of opinion as to the proper resolution of the case, it should be decided by the court as a matter of law. *Roesch, Inc. v. Star Cooler Corp., 671 F.2d 1168, 1171 (8th Cir. 1982)*, *aff'd by an equally divided court*, *712 F.2d 1235 (8th Cir. 1983)*; *Admiral Theatre Corp. v. Douglas Theatre Co., 585 F.2d 877, 883 (8th Cir. 1978)*.

III.

HN2[] The elements of an attempted monopolization claim under *Section 2* of the Sherman Act are as follows: (1) specific intent to control prices or destroy competition in some part of commerce; (2) predatory **[**7]** or anti-competitive conduct directed to accomplishing the unlawful purpose; and (3) a dangerous probability of success. *Inglis v. ITT Continental Baking Co., 668 F.2d 1014, 1027 (9th Cir. 1981)*, *cert. denied*, *459 U.S. 825, 74 L. Ed. 2d 61, 103 S. Ct. 58 (1982)*; *Lekto-Vend Corp. v. Vendo Co., 660 F.2d 255, 270 (7th Cir. 1981)*, *cert. denied*, *455 U.S. 921, 71 L. Ed. 2d 461, 102 S. Ct. 1277 (1982)*; *Blair Foods, Inc. v. Ranchers Cotton Oil, 610 F.2d 665, 669 (9th Cir. 1980)*.

HN3[] To establish monopolization in violation of *Section 2* it must be shown that CIL: (1) possessed monopoly power in the relevant market, and (2) used its monopoly power to foreclose competition, gain a competitive advantage, or destroy a competitor. *United States v. Griffith, Inc., 334 U.S. 100, 107, 92 L. Ed. 1236, 68 S. Ct. 941 (1948)*; *Paschall v. Kansas City Star Co., 727 F.2d 692, 696 (8th Cir. 1984)* (en banc); *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 275-76 (2d Cir. 1979)*, *cert. denied*, *444 U.S. 1093, 62 L. Ed. 2d 783, 100 S. Ct. 1061 (1980)*.

Although at trial CIL contested every element of both claims, only the element of anti-competitive conduct or the use of **[**8]** monopoly power is at issue on appeal. [1] *HN4*[] To prove a violation of *Section 2* under the Sherman Act, whether based on a claim of attempted monopolization or actual monopolization, it must be shown that CIL engaged **[*266]** in anti-competitive behavior. As explained by the court in *Northeastern Tel. Co. v. American Tel. & Tel. Co., 651 F.2d 76 (2d Cir. 1981)*, *cert. denied*, *455 U.S. 943, 71 L. Ed. 2d 654, 102 S. Ct. 1438 (1982)*, a mere showing of monopoly power unaccompanied by evidence of anti-competitive behavior is insufficient to support a claim for monopolization. Therefore, a conclusion that CIL's activities were not anti-competitive would absolve it of liability under both claims. *651 F.2d at 85*. These general principles were outlined in the district court's charge to the jury.

[9]** According to Trace X, CIL engaged in monopolistic conduct with the intent and effect of driving Trace X out of business. Specifically, Trace X contends that CIL's refusal to extend credit or replace the defective TNT constituted anti-competitive, monopolistic conduct. CIL maintains, however, that its denial of credit and its refusal to replace the TNT were acts of ordinary commercial conduct.

HN5[] Acts which would constitute an unlawful use of monopoly power are those "derived from [the monopolist's] power in the market or its size, . . . acts which could only have been performed by one with the requisite power." *Telex Corp. v. IBM, 510 F.2d 894, 926* (10th Cir.), *cert. dismissed*, *423 U.S. 802, 46 L. Ed. 2d 244, 96 S. Ct. 8 (1975)*. *See* *Northeastern Tel. Co., 651 F.2d at 92*; *Berkey Photo, 603 F.2d at 275*. Anti-competitive conduct is conduct without legitimate business purpose. *Becker v. Egypt News Co., 713 F.2d 363, 366 (8th Cir. 1983)*; *Inglis, 668 F.2d at 1030-31*. Such conduct makes sense only because it eliminates competition. *Id.* Acts which are ordinary business practices typical of those used in a competitive market do not constitute anti-competitive **[**10]** conduct violative of *Section 2*. *Telex Corp., 510 F.2d at 925-26*. The exercise of business judgment cannot be found to be anti-competitive. To be labeled anti-competitive, the conduct involved must be such that its "anticipated benefits were dependent upon its tendency to discipline or eliminate competition and thereby enhance the firm's long term ability to reap the benefits of monopoly power." *Inglis, 668 F.2d at 1030*.

Since a general verdict was returned against CIL, we must conclude that the jury considered the elements which constitute an antitrust violation, as properly instructed by the district court, and found that CIL had engaged in anti-competitive, monopolistic conduct. After a careful study of the record, however, we conclude that there is insufficient evidence as a matter of law to support such a finding. CIL's refusals to extend credit or replace the TNT were not invalid uses of monopoly power, but were, under the circumstances, ordinary business practices.

Our reading of the evidence does not reveal material conflicts in the facts. Insofar as there are differences in the testimony, they simply do not reach the essential antitrust issues presented. CIL presented **[**11]** uncontradicted evidence that Trace X's parent company was in bankruptcy and that Trace X had refused to supply Dun & Bradstreet with financial information. In addition, Trace X's auditors declined to give an opinion on Trace X's 1976 statement of earnings, and Trace X had been unable to secure credit from other sources. CIL's denial of credit to Trace X under these circumstances cannot be considered an unlawful use of monopoly power. *See* *Blair Foods, Inc., 610 F.2d at 671-72*. On the basis of the evidence presented, CIL's refusal to extend credit did not amount to unreasonable anti-competitive conduct, but rather constituted a valid exercise of business judgment. *See* *Becker, 713 F.2d at 366*; *see also* *Paschall, 727 F.2d at 697*; *Paschall v. Kansas City Star, 695 F.2d 322, 339-40 (8th Cir.*

---

[1] For purposes of this appeal, CIL does not contest the fact that it has a monopoly in the TNT market. CIL also does not contest the element of anti-competitive intent, but rather argues that even if CIL were found to have had an anti-competitive intent, that would not, in the absence of anti-competitive, monopolistic conduct, amount to a violation of *Section 2* of the Sherman Act.

1982) (Henley, J., dissenting). It is certainly not conduct that is "possible or effective only if taken by a firm that dominates its smaller rivals." Berkey Photo, 603 F.2d at 275.

In support of its claim of anti-competitive conduct, Trace X argues that CIL threatened to discontinue supplying it with TNT unless Trace X paid for the $ 160,000 worth of TNT received but not paid for **[**12]** by **[*267]** Trace X. [2] However, terminating or threatening to terminate deliveries to a purchaser who refuses to provide full payment is not predatory or unlawful anti-competitive conduct. Fairdale Farms, Inc. v. Yankee Milk, Inc., 715 F.2d 30, 34 (2d Cir. 1983), *cert. denied*, *464 U.S. 1043, 104 S. Ct. 711, 79 L. Ed. 2d 174 (1984)*.

This case does not involve a refusal to deal. CIL was willing to continue to supply Trace X with TNT; it merely refused to deal with Trace X on other than a cash basis. "***HN6***[] Section 2 of the Sherman Act does not give purchasers the exclusive right to dictate the terms on which they will deal," Fairdale Farms, 715 F.2d at 34, nor does it require a monopolist to accede to every demand of its competitors or customers. Glen Eden Hospital v. Blue Cross & Blue Shield, 555 F. Supp. 337, 345 (E.D. Mich. 1983).

A careful study of the evidence also reveals nothing from **[**13]** which a jury could reasonably conclude that CIL's refusal to replace the defective TNT was anything other than ordinary commercial ***HN7***[] conduct. As long as he is acting in good faith, a seller does not lose the right to contest a customer's claim simply by having monopoly power. Even though a jury in a breach of warranty action later found that the TNT was defective, [3] there is no evidence in the record to support Trace X's suggestion that CIL deliberately supplied Trace X with defective TNT. The evidence showed that CIL had tested the TNT before shipping it to Trace X and concluded that the TNT was satisfactory. Even Arens admitted that he had no proof that CIL knew that the TNT was defective when shipped to Trace X. Other than the statement made by Ingham, there is also no evidence indicating that CIL's refusal to replace the TNT was in bad faith. Although the report of Trace X's expert stated that the TNT was defective, CIL's experts disagreed. After analyzing some of the defective Trace X primers, CIL believed that the failures resulted from Trace X's manufacturing process rather than from the TNT used. It was not an abuse of its monopoly power for CIL to rely on the tests run by its **[**14]** own research department and, therefore, refuse to replace the TNT.

In its brief Trace X also lists CIL's alleged monopolistic pricing and the TNT shortages as further examples of anti-competitive, monopolistic conduct. A careful review of the record reveals that the evidence concerning pricing relates to price discrimination. The district court directed a verdict on Trace X's claim of price discrimination under the Robinson-Patman Act, 15 U.S.C. § 13(a) (1982), [4] and Trace X has not appealed from that ruling. Where its purpose or likely effect is to inhibit competition, discriminatory pricing may also constitute a violation of Section 2 of the Sherman Act. L. Sullivan, *Antitrust* 122 (1977). However, just as the district court found that there was insufficient evidence of a violation of the Robinson-Patman Act, [5] we conclude that there is insufficient evidence as a matter **[**15]** of law to sustain the jury's finding of a violation under the Sherman Act.

In addition to its allegations of price discrimination, Trace X contends that CIL's prices in the United States for TNT were too high, thus reflecting monopolistic **[*268]** pricing. ***HN8***[] However, setting a high price is not in itself anti-competitive. **[**16]** Berkey Photo, 603 F.2d at 294. *See* 3 P. Areeda & D. Turner, ***Antitrust Law*** 41-42, 148

---

[2] In his testimony Arens admitted that Trace X did owe CIL the $ 160,000 for the TNT it had received.

[3] Trace X Chemical, Inc. v. Gulf Oil Chemical Co., 519 F. Supp. 826 (W. D. Ark. 1982), *aff'd*, 724 F.2d 68 (8th Cir. 1983).

[4] 15 U.S.C. § 13(a) provides as follows:

> It shall be unlawful for any person engaged in commerce, . . . to discriminate in price between different purchasers of commodities of like grade and quality, where either or any of the purchases involved in such discrimination are in commerce, . . . and where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly . . ., or to injure, destroy, or prevent competition. . . .

[5] Although the prohibitions of the Robinson-Patman Act are narrower than those contained in section 2 of the Sherman Act, the insufficiency of evidence precludes a finding of violation under both Acts.

(1978). *Section 2* does not forbid a monopolist to set profit-maximizing prices. L. Sullivan, *supra*, at 116. Such conduct is not the exclusionary conduct that violates the antitrust laws, but rather is "the normal, rational response of a business . . . seeking to maximize profits, sales or revenues." *Id. at 100*.

Trace X's claim that the TNT shortages were induced by CIL as a means of market control also must fail. There is insufficient evidence in the record from which a jury could reasonably conclude that the shortages were other than real. The documents relating to TNT shortages simply show that there were times when CIL was unable to supply all of its customers' demands.

IV.

To further support its claims, Trace X relied on CIL's anti-competitive intent. Trace X's evidence of CIL's intent is its evidence regarding statements made by representatives of CIL. According to Arens and Szaloczi of Trace X, in March, 1977, when they asked CIL to replace the defective TNT, Ingham of CIL responded, "Why would we do that? If we exchange the TNT, you will just use your profits to compete **[**17]** against us in the manufacture of TNT." Szaloczi also testified that Heddle, CIL's export sales manager, had told him that "Trace X would have a lot better time at the meeting tomorrow if CIL had some understanding that Trace X was going to be raising its prices and not going into the manufacture of TNT." Even if it is assumed that proof of these statements supports an inference of anti-competitive intent on the part of CIL, [6] this is not enough to transform CIL's otherwise legitimate business activities into anti-competitive, monopolistic conduct. *See* *Telex Corp., 510 F.2d at 925-28*. ***HN9***[] Evidence of anti-competitive intent alone is not enough; anti-competitive conduct or use of monopoly power must also be shown to prove a violation of *Section 2* of the Sherman Act. *See* *Cal. Computer Products v. IBM, 613 F.2d 727, 745 n.32 (9th Cir. 1979)* (regardless of intent, *Section 2* condemns only the monopolist's use of monopoly power); *Telex Corp., 510 F.2d at 925-26*; *Inglis, 668 F.2d at 1028* (direct evidence of intent alone, without corroborating evidence of conduct cannot sustain a claim of attempted monopolization); *Buffalo Courier-Exp. v. Buffalo Evening News, 601 F.2d 48,* ***[**18]*** *54 (2d Cir. 1979)*; *Hayes v. Solomon, 597 F.2d 958, 977 (5th Cir. 1979)*, *cert. denied*, *444 U.S. 1078, 62 L. Ed. 2d 761, 100 S. Ct. 1028 (1980)* (a manifestation of intent to triumph in the competitive market, in the abence of unfair, anti-competitive or predatory conduct is not enough to establish an antitrust violation).

Although we are reluctant to overturn a jury finding, we conclude that there was insufficient evidence as a matter of law to support the jury's verdict. [7] Therefore, we reverse the judgment of the district court.

HN1[] **Per Se Rule & Rule of Reason, Per Se Violations**

Tying arrangements are per se violations of section one of the Sherman Act if a party has sufficient economic power with respect to the tying product to appreciably restrain free competition in the market for the tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN2[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The inquiry into economic power in a tying case is defined as whether the seller has some advantage not shared by his competitors in the market for the tying product. The three types of advantages are: Legal, as in the case of patented and copyrighted products; physical, as when the product is land; or economic, as when competitors are simply unable to produce the distinctive product profitably. Economic advantage is not the product itself but rather the seller's cost advantage in producing it. Without a showing of cost advantage, according to the court, there could be no finding of economic power under a theory of economic advantage.

Counsel: John C. Butters, Atlanta, Georgia, for Appellant.

William O. Carter, Hartwell, Georgia, Jerre Swann, Atlanta, Georgia, for Appellee.

Judges: Godbold, Chief Judge, Roney and Kravitch, Circuit Judges.

Opinion by: RONEY

Opinion

[*1285] RONEY, Circuit Judge:

This antitrust suit involves several participants in the broiler chicken industry. Virgil Ayers, W. C. Meaders, Jr., Boyce Blackmon, and Joe Acker produce eggs from which the broiler chickens were hatched. Spartan Grain & Mill Company, supplies feed to chicken farmers. The broiler chicken producers claim that Spartan violated the antitrust laws by tying the sale of its feed to its guarantee of a market for the producers' eggs. Two trials have resulted in verdicts for the producers. The central question on this appeal is whether Spartan had sufficient economic power that its marketing program must be viewed as an antitrust violation. On the basis of jury answers to special interrogatories, the district ruled that Spartan had such power. We hold that **[**2]** the jury verdict does not support this finding and reverse the judgment.

Our earlier decision in this case gives a detailed history and explanation of the broiler chicken industry. *Spartan Grain & Mill Co. v. Ayers, 581 F.2d 419, 420-22 (5th Cir. 1978)*, *cert. denied*, *444 U.S. 831, 100 S. Ct. 59, 62 L. Ed. 2d 39 (1979)*. Briefly restated, the raising of a broiler chicken involves five distinct steps: (1) *primary breeders* hatch breeding flock chicks; (2) *producers* raise the breeding flocks and then collect the eggs; (3) *hatcheries* receive the eggs to hatch the chicks; (4) *growers* raise the chicks to the age that they can be sold as broilers; and (5) *processors* slaughter the broiler chickens and prepare them for market. Another participant in this process is the *feed merchant* who supplies the grain for feeding the chickens during each of the first four steps. The parties to this suit are a *feed merchant*, Spartan, and *producers* of broiler eggs, Ayers, Meaders, Blackmon, and Acker.

As the industry originally evolved, separate individuals handled each step of the production process. A number of inefficiencies resulted from this arrangement. **[**3]** First, there was a duplication of management and accounting personnel. Second, the lack of coordination between the various stages in the industry combined with the natural time constraints of the product created a great risk that there would not be a buyer for every seller, or vice versa, along the production chain. This often resulted either in a waste of product or in capital facilities sitting idle. Third, collection problems occurred because money had to change hands between each stage.

To reduce these inefficiencies, the industry began to integrate the various steps in the production process. In north Georgia, the locale of the present controversy, well over 90% of the industry was integrated by the end of the 1960s. The evidence at trial showed two types of integrated firms. In one type all stages in the production process as well as a feed mill are owned and operated by a single entity. Other integrated firms are comprised only of a feed mill, hatchery, and processing plant. The tasks of producing broiler eggs and growing broilers are "contracted out".

A producer under a contract arrangement with an integrated firm faces substantially less risk than when functioning **[**4]** as an independent. The integrated firm **[*1286]** supplies the breeding flock and provides all medical care and feed required during the life of the bird. Title to the chickens remains in the integrated firm, and it takes the eggs at an agreed upon price. Under an independent arrangement, however, a producer purchases his own flock and administers his own medical care. The independent also shoulders the major cost in producing broiler eggs, feeding the breeding flock. At the time of this dispute, contract producers usually earned between $1.00 and $1.50 per breeding bird for the 30-40 week period in which the birds lay eggs. Independents had the possibility of earning $3.00 or more per breeding bird.

The antitrust claimants in this action are producers of broiler eggs. At the time this suit was filed, they resided in Franklin, Hart, and Elbert counties, which are located in northeastern Georgia. Their personal history mirrors that of the industry in general. The two who have been in the business the longest started out as independents but switched over to contract arrangements in the early 1960s. A third, who is a more recent entrant to the business, began as a contract **[**5]** producer in 1966. The reason the producers joined the integrated firms as contract producers was because they could find no hatcheries willing to guarantee them a market for the broiler eggs they produced. No producer would take on a breeding flock without a prior agreement from a hatchery because the risk of a catastrophic loss due to lack of an appropriate egg market was too great.

In 1967 and 1968, the poultry industry in the producers' area entered into a prolonged slump. Suddenly, contract arrangements were not available. This was the situation when Spartan, an independent feed merchant, offered the program which is the subject of the present litigation. Basically, Spartan offered producers breeding flocks and, most importantly, a guaranteed market for their eggs in return for the producer's promise to feed Spartan grain. Spartan assured producers its grain prices would be competitive. Spartan's program was popular with producers for two reasons: first, it gave them a chance to stay in business; and second, it was structured so that they could operate as independents instead of as contract producers.

Spartan was bucking industry trends by attempting to create by contract **[**6]** what other firms had accomplished by integration. Several large hatcheries in Pennsylvania, Ohio, and Maryland were recruited by Spartan as outlets for broiler eggs. In return for Spartan's promise to provide a fixed supply of eggs, the hatcheries promised to give Spartan a fixed price for the eggs. Spartan, in turn, wrote approximately the same price into the producers' contracts. Thus, Spartan served as essentially a costless middleman for the producers and hatcheries. Spartan instituted this arrangement to stem the erosion of its share of the feed market to the integrated firms.

By 1972, Spartan closed down this program. It claims that lack of profitability and difficulty in securing hatchery commitments caused the program's demise. In November, 1972, Spartan filed suit against producers, Ayers, Blackmon, and Meaders for the unpaid balances on their feed accounts. The producers counterclaimed asserting a violation of the antitrust laws. These claims were severed for a later trial. The fourth producer, Acker, filed an independent antitrust suit against Spartan. The two antitrust suits were consolidated for trial. At trial, the producers won a directed verdict on liability **[**7]** and only the issue of damages was sent to the jury.

Spartan appealed to the former Fifth Circuit. That Court defined the antitrust issue as whether Spartan's program constituted a *per se* illegal tying arrangement under section one of the Sherman Act, *15 U.S.C.A. § 1*. *Spartan Grain & Mill Co. v. Ayers, 581 F.2d 419, 425, 428 (5th Cir. 1978)*, *cert. denied*, *444 U.S. 831, 100 S. Ct. 59, 62 L. Ed. 2d 39 (1979)* (*Spartan I*). In the typical tying arrangement, a seller conditions the sale of one product (the tying product) on the purchase of another product (the tied product). *Northern Pacific Railway Co. v. United States, 356 U.S. 1, 5,* ***[*1287]*** *78 S. Ct. 514, 518, 2 L. Ed. 2d 545 (1958)*. Although the present situation is not typical in that Spartan tied a requirement to buy feed to its promise to purchase eggs, the court held that this arrangement was sufficiently analogous to a tie-in that it should be analyzed under tying doctrine. *Spartan I, 581 F.2d at 425*. That ruling is not in dispute. The central issue under tying doctrine analysis is the extent of Spartan's economic power. Controlling on this point is the Supreme Court decision in *United States* **[**8]** *Steel Corp. v. Fortner Enterprises, Inc., 429 U.S. 610, 97 S. Ct. 861, 51 L. Ed. 2d 80 (1977)* (*Fortner II*), which was decided subsequent to the first trial. The *Spartan I* court held that the producers had not established economic power as a matter of law so that a directed verdict of liability was improper. The case was remanded for a second trial, however, to give the producers an opportunity to meet factually the *Fortner II* standards.

At the second trial, both sides relied on expert and industry witnesses to support their positions on economic power. All of the witnesses agreed that in the long run the integrated firms were the most efficient system for producing broiler chickens. The producers' expert asserted, however, that in the short run, an independent feed mill like

Spartan, would have a structural advantage over the integrated firms when the broiler industry as a whole was losing money. This advantage was derived from the relative lack of overhead an independent possessed as compared to an integrated firm. Evidence was produced that the broiler industry was in an economic slump during the period Spartan instituted its tying arrangement. The producers **[**9]** also brought out through testimony and stipulations evidence which showed that Spartan charged substantially above the market rate for its feed and that Spartan discriminated in its pricing policy between different producers.

Spartan's expert testified that any of the integrated firms in north Georgia could have offered a program similar to Spartan's and made a reasonable profit at it. Spartan produced numerous representatives from integrated firms in north Georgia who testified that not only could they have set up a program like Spartan's but they could have done it cheaper. They added that they had not followed that course because it was not economically attractive.

The trial court sent two special interrogatories to the jury on the issue of economic power. The court instructed the jury that an affirmative answer to either question represented a finding that Spartan possessed "appreciable economic power." The interrogatories read:

> (A) As to the (1) purchase and (2) sale or usage of hatching eggs [was] Spartan Grain & Mill Company's overall arrangement with eastern hatcheries to buy all hatching eggs at the same price Spartan Grain & Mill Company was paying producers, **[**10]** an economic advantage that Spartan Grain & Mill Company had over its competitors?
> (B) Was Spartan Grain & Mill Company in the Royston area able to offer a guaranteed price for hatching eggs during the life of the flock at a time when its competitors under conditions then existing could not have offered an equivalent guaranteed price if they had elected to do so?

Amplifying the second interrogatory, the court instructed the jury that the word "could" referred "to reality, to actuality, as compared to a theoretical possibility."

The jury answered "yes" to the first interrogatory and "no" to the second. Based on this finding of fact, the court entered judgment for the producers. Spartan appeals contesting the relevance of the first interrogatory to the issue of economic power and asserting that the jury's answer to the second interrogatory conclusively resolves the issue of economic power in its favor. We are asked today to decide what factors constitute proof of economic power. Spartan contends there is only one factor, cost advantage. The producers argue that cost advantage is only one of several factors. These other factors are price **[*1288]** discrimination, **[**11]** burdensome pricing, and production of an unmatchable differentiated product.

HN1[] Tying arrangements are *per se* violations of section one of the Sherman Act if "a party has sufficient economic power with respect to the tying product to appreciably restrain free competition in the market for the tied product. . . ." *Northern Pacific, 356 U.S. at 6, 78 S. Ct. at 518*; *see* *Jefferson Parish Hospital District No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 1558-1561, 80 L. Ed. 2d 2 (1984)*. The Supreme Court in *Fortner II* discussed the issue of economic power at length. The Court defined ***HN2***[] the inquiry into economic power in a tying case as "whether the seller has some advantage not shared by his competitors in the market for the tying product." *Fortner II, 429 U.S. at 620, 97 S. Ct. at 867*. Three types of advantages were noted by the Court: "legal, as in the case of patented and copyrighted products, . . . physical, as when the product is land, . . . [or] economic, as when competitors are simply unable to produce the distinctive product profitably. . . ." *Id. at 621, 97 S. Ct. at 868* (quoting *Fortner Enterprises, Inc. v. United States Steel, 394 U.S. 495, 505 n.2, 89* ***[**12]*** *S. Ct. 1252, 1259 n.2, 22 L. Ed. 2d 495 (1969))* (cites omitted). The Court explained that economic advantage "is not the product itself but rather the seller's cost advantage in producing it." *Id.* Without a showing of cost advantage, according to the Court, there could be no finding of economic power under a theory of economic advantage. *Id. 429 U.S. at 622, 97 S. Ct. at 868*.

Fortner II involved an asserted economic advantage, as does the instant case. The tie-in there was between homes and credit. U.S. Steel had tied credit arrangements to the sale of prefabricated houses. In evaluating the proof on the question of economic power, the Court's entire focus was on whether plaintiff, a disgruntled housing developer, had shown that the tying arrangement was predicated on a cost advantage U.S. Steel had in the tying product market. All of plaintiff's proof was rejected as not probative of cost advantage. The Court thought the most plaintiff had shown was that U.S. Steel had offered a highly competitive package deal.

The amalgam of factors asserted by the producers to be just as relevant as cost advantage to the question of economic advantage were mentioned by the Court **[**13]** in *Fortner II*. But it is clear that the Court thought them relevant only to the extent that they were probative of cost advantage. The producers have confused the evidentiary facts with the ultimate fact.

In the instant case, Spartan tied the purchase of grain to a guaranteed market for eggs. *Fortner II* dictates that the issue on which Spartan's antitrust liability turns is whether Spartan had a cost advantage in the tying product market. Since Spartan's tying product was a guaranteed market for eggs, the key factual inquiry should have been directed at Spartan's economic ability *vis-a-vis* its competitors to provide a market for eggs.

When the special interrogatories are examined in light of this analysis, the first must be rejected as irrelevant to the question of economic advantage. The first interrogatory asked whether Spartan's arrangement with the eastern hatcheries to purchase broiler eggs was an economic advantage. In phrasing the interrogatory in that manner, the district court focused attention on the economic advantage of the tying product instead of on Spartan's economic advantage in securing the tying product. The Supreme Court cautioned against exactly **[**14]** this misstep in *Fortner II*: economic power when measured strictly by economic advantage is "somewhat confusing since the real source of economic power is not the product itself but rather the seller's cost advantage in producing it." *Fortner II, 429 U.S. at 621, 97 S. Ct. at 868*. The district court's entry of judgment on the basis of the answer to the first interrogatory was error.

The question remains whether a third trial is appropriate. The answer in favor of Spartan on the second interrogatory is conclusive on the issue of economic power. **[*1289]** Judgment should be entered for Spartan. The second interrogatory asked whether Spartan was able to supply a guaranteed market for eggs at a price its competitors could not meet. The court instructed the jury that the word "could" must be viewed realistically. The second interrogatory read in light of this instruction is more than adequate on the issue of cost advantage. It actually is weighted strongly in the producers' favor. What the interrogatory required in order for the jury to find no cost advantage was that Spartan's competitors be able to make a reasonable profit using Spartan's program when in fact, Spartan **[**15]** should have been only required to show that its competitors would have made no less of a return or lost no more than Spartan. That the jury answered this interrogatory in Spartan's favor resolves the question of Spartan's economic power.

Since judgment should have been entered for Spartan, the producers' attorney's fees award must be reversed. *15 U.S.C.A. § 15*; *See* *De Filippo v. Ford Motor Co., 516 F.2d 1313, 1321 (3d Cir.1975)*, *cert. denied*, *423 U.S. 912, 96 S. Ct. 216, 46 L. Ed. 2d 141 (1975)*.

REVERSED and RENDERED.

HN1[] Scope, Monopolization Offenses

The Sherman Act *§ 2*, *15 U.S.C.S. § 2* makes it unlawful for any person to monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several states. A party injured by such anti-competitive conduct may sue to recover treble damages under the Clayton Act § 4, *15 U.S.C.S. § 15*.

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN2[] Antitrust & Trade Law, Sherman Act

The elements of an attempted monopolization under the Sherman Act *§ 2* are: (1) specific intent to accomplish the illegal result; and (2) a dangerous probability that the attempt will be successful. The intent must be to do more than compete vigorously; vigorous competition is precisely what the antitrust laws are designed to foster. Thus, a statement of intent to compete even if perceived as a threat is not unlawful. Such a manifestation of intent to triumph in the competitive market, in the absence of unfair, anticompetitive or predatory conduct, is not enough to establish an antitrust violation. Rather, the forbidden specific intent is that of acquiring and exercising the power to fix prices or to exclude competition.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN3[] Actual Monopolization, Anticompetitive & Predatory Practices

The court defined "predatory" to mean that the defendant must have at least sacrificed present revenues for the purpose of driving plaintiff out of the market with the hope of recouping the losses through subsequent higher prices. A price above average cost is a fairly competitive price for it is profitable to the monopolist if not to its rivals; in effect, the price excludes only less efficient firms. By contrast, a firm's pricing behavior can be considered anticompetitive when it sells at a price below its average variable cost. One important exception to the principle that a price above average variable cost is presumed lawful occurs when there are substantial barriers to new entry into the relevant market.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN4[] Actual Monopolization, Anticompetitive & Predatory Practices

As the barriers to entry increase, so does the degree to which the monopolist's price may exceed his average variable cost and yet still be deemed predatory.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN5[] **Actual Monopolization, Anticompetitive & Predatory Practices**

In order to prevail as a matter of law, a plaintiff must at least show that either (1) a competitor is charging a price below his average variable cost in the competitive market or (2) the competitor is charging a price below its short-run, profit-maximizing price and barriers to entry are great enough to enable the discriminator to reap the benefits of predation before new entry is possible.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN6[] **Actual Monopolization, Anticompetitive & Predatory Practices**

One seeking to establish predatory pricing must demonstrate that the defendant at least sacrificed present revenues for the purpose of driving the plaintiff out of the market with the hope of recouping losses through subsequent higher prices. Generally, in order to prove that the defendant has sacrificed present revenues, it is necessary to establish that the defendant's prices were below marginal or average variable cost.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

Civil Procedure > ... > Standards of Review > Substantial Evidence > Sufficiency of Evidence

HN7[] **Judgment as Matter of Law, Judgment Notwithstanding Verdict**

Judgment n.o.v. is appropriate when there is a complete absence of probative facts to support a jury verdict. There must be a conflict in substantial evidence to create a jury question.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN8[] **Monopolies & Monopolization, Attempts to Monopolize**

If the market structure will not allow a dominant firm to set its price above the competitive level, the strictures of the antitrust laws are not activated. The injury to plaintiffs' business is not cognizable under the antitrust laws if competition itself is not harmed.

HN9[] **Regulated Practices, Intellectual Property**

The mere hiring away of employees from a rival is lawful. The fact that the employee then uses her own skills and contacts, and not, for example, misappropriated trade secrets, to generate business for her new employer, even at the expense of her old employer, provides no basis for antitrust liability.

Judges: Johnson, Higginbotham, and Davis, Circuit Judges.

Opinion by: HIGGINBOTHAM

Opinion

[*886] PATRICK E. HIGGINBOTHAM, Circuit Judge:

We review the granting of judgment n.o.v. to the defendant in this private antitrust suit brought by Adjusters Replace-A-Car and Wakely & Associates, two insurance replacement car rental firms, against their rival, Agency Rent-A-Car, Inc. The principal accusation is that Agency employed predatory pricing in the San Antonio and Austin markets as part of an attempt to monopolize in violation of section two of the Sherman Act. Adjusters also charges that Agency hired away **[**2]** an essential employee in an attempt to monopolize the Corpus Christi market. Because we agree with the district court that plaintiffs failed to present a jury question regarding any of these claims, we affirm the judgment for Agency.

I

Adjusters, Wakely, and Agency all operated in a segment of the rental car business, providing replacement cars to persons whose cars had been stolen or damaged in an accident. The replacement rental firm deals directly with insurance adjusters, and is able to offer a lower rate than the standard public rental firms because its rentals are often long-term and its operating and advertising costs are less. To the extent that firms specializing in insurance replacement rentals cannot satisfy the demand for such services, the public rental firms will also provide this service, though ordinarily at a higher cost to the insurer. The record indicates that a public rental firm wishing to compete directly in the insurance replacement segment of the market would be able to do so with relative ease.

In September 1973, Adjusters became the first insurance replacement rental firm to enter the San Antonio market. Wakely and Agency entered that market in **[**3]** October 1974, each charging a daily rental of $9.50; Adjusters' rate was then $8.50. Dissatisfied with its unprofitably small portion of the insurance replacement rental market in San Antonio, Agency cut its rental rate there to $8.00 per day in March 1975. When this tactic failed to increase its market share significantly, Agency in November 1975 reduced its rental rate to $7.00 per day.

At $7.00, Agency began to make substantial inroads into the San Antonio market. After four months it began increasing its price, first to $7.50, then to $8.00, and by July 1976 to $8.50. Agency admits that in San Antonio it suffered a net operating loss during the sixteen month period that its rental rate was set at $8.00 and below, and Adjusters and Wakely charge that Agency continued losing money until it raised its rental rate to $9.50 in February 1977.

In the Austin market, which Adjusters entered in December 1974 and Agency entered in November 1975, the $7.00 rental rate again proved a powerful tool with which Agency carved out a substantial **[*887]** share of the market. Agency's pricing in Austin evidently paralleled its pricing in San Antonio, and it again appears that Agency suffered **[**4]** net operating losses while offering the cheaper rate.

In December 1977, Adjusters left the Austin market and was replaced by Wakely, which charged first $10.00 and then $11.00; Agency was apparently charging $10.45 when Wakely entered that market. Agency cut its Austin rental rate to $9.00 in January 1979. Wakely initially responded with an $8.50 rate, but closed its Austin office after April 1979.

Adjusters opened its Corpus Christi office in January 1975, and held the great percentage of that market by the time Agency opened there in May 1976. Agency came to prominence, however, after it hired away Adjusters' office manager, Patty Manges, who brought many of Adjusters' clients with her to Agency. So successful was Agency that Adjusters left Corpus Christi by March 1977.

Adjusters went out of business in March 1978, closing its San Antonio office. Adjusters' Dallas office, not involved in this litigation, had closed in July 1977. Wakely continues to operate in San Antonio. Both companies argue that their business reversals were due to anticompetitive conduct by Agency, which was allegedly attempting to monopolize the insurance replacement rental market in San Antonio, **[**5]** Austin, and Corpus Christi.

II

HN1[] *Section 2* of the Sherman Act, *15 U.S.C. § 2*, makes it unlawful for any person to "monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several states." A party injured by such anti-competitive conduct may sue to recover treble damages under section 4 of the Clayton Act, *15 U.S.C. § 15*. Here the claim is one of attempted monopolization by Agency, and the burden on the plaintiffs is to prove the elements of this offense and a causal relationship between the Agency's anticompetitive conduct and the plaintiffs' proven damages. *J.T. Gibbons, Inc. v. Crawford Fitting Co., 704 F.2d 787, 795 (5th Cir.1983)*.

HN2[] The elements of an attempted monopolization under *§ 2* of the Sherman Act are: "(1) specific intent to accomplish the illegal result; and (2) a dangerous probability that the attempt will be successful." *Spectrofuge Corp. v. Beckman Instruments, Inc., 575 F.2d 256, 276 (5th Cir.1978)*, *cert. denied*, *440 U.S. 939, 99 S. Ct. 1289, 59 L. Ed. 2d 499 (1979)*. The intent must be to do more than compete vigorously; vigorous competition is precisely **[**6]** what the antitrust laws are designed to foster. Thus, "[a] statement of intent to compete . . . even if perceived as a threat is not unlawful. Such a manifestation of intent to triumph in the competitive market, in the absence of unfair, anticompetitive or predatory conduct, is not enough to establish an antitrust violation." *Hayes v. Solomon, 597 F.2d 958, 977 (5th Cir.1979)*, *cert. denied*, *444 U.S. 1078, 100 S. Ct. 1028, 62 L. Ed. 2d 761 (1980)*. Rather, the forbidden specific intent is that of acquiring and exercising "the power to fix prices or to exclude competition." *United States v. du Pont & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 1005, 100 L. Ed. 1264 (1956)*; *American Tobacco Co. v. United States, 328 U.S. 781, 811, 66 S. Ct. 1125, 1140, 90 L. Ed. 1575 (1946)*; *Spectrofuge, 575 F.2d at 276*.

Adjusters and Wakely argue that the jury was entitled to infer that Agency had the requisite intent and was dangerously likely to succeed at monopolizing the insurance rental market in the relevant geographical area from evidence that Agency's pricing and operational strategies drove competitors from the marketplace when market conditions prevented other firms from **[**7]** entering the market to compete with Agency. The specific conduct which plaintiffs allege was anticompetitive is Agency's use of predatory pricing regimen in San Antonio and Austin, and Agency's deliberate efforts to "steal" Adjusters' Corpus Christi customers by hiring away Adjusters' office manager in that city. Adjusters **[*888]** and Wakely claim that this anticompetitive conduct caused them injury in their trade or business.

Responding to interrogatories, the jury found that Agency had attempted to monopolize the insurance replacement car market in San Antonio and Austin by means of its pricing in 1975 and 1976, in Austin by means of its pricing in 1978 and 1979, and in Corpus Christi by means of hiring Patricia Manges. Total damages, without trebling, were set at $800,000. [1]

Defendants **[**8]** moved for judgment notwithstanding the verdict, and filed a brief supporting the motion. On this basis, the trial judge granted a judgment n.o.v. and dismissed the case. [2] **[**9]** Adjusters and Wakely appeal. [3]

---

[1] The damage award was broken down as follows:

San Antonio

Adjusters:

$ 271,000

Wakely:

88,000

Austin

Adjusters:

182,000

Wakely:

162,000

Corpus Christi

Adjusters:

97,000

[2] The court's order reads: "Having considered Defendant's Motion for Judgment Notwithstanding the Verdict, Plaintiffs' response thereto and the argument of counsel, as well as the evidence presented at trial hereof, the Court finds that said motion should be granted for the reasons set forth in Defendant's brief in support thereof."

We have many times disapproved the use of such brief, unilluminating orders granting judgment in complex cases. Most recently, in *Myers v. Gulf Oil Corp., 731 F.2d 281, 283 (5th Cir.1984)*, we described an order almost identical to this one as being

[10]** III

There is obviously a tension inherent in the legal assignment to protect competition but not competitors. Fighting hard but fair, avoiding ruinous competition and avoiding predation are often-used catch-words that fail in their central normative purpose -- they do not segregate desired and undesired conduct in the marketplace. As a seeming precursor to the current willingness of courts to be informed by economics, Professors Areeda and Turner, **[*889]** lawyer and economist, undertook to suggest measures with content. Their effort was sufficiently successful that the starting point for an analysis of a predatory pricing claim is now their influential article, *Predatory Pricing and Related Practices Under Section 2 of the Sherman Act*, 88 Harv.L.Rev. 697 (1975), in which they analyze a firm's pricing in terms of that firm's average total cost, average total cost, average variable cost, and marginal cost of production.

Basic economic theory subscribed to by Areeda and Turner teaches that in a perfectly competitive market a small manufacturer's price is dictated by the marketplace, and his production will be at the level where the marginal cost of producing another unit **[**11]** of output exactly equals the price that he will receive for this unit. A manufacturer's costs are divided between fixed costs, which do not vary with the level of production shrinks to zero, and variable costs, which do vary with production and roughly equal the cost of the resources necessary to produce additional units of output. Because marginal cost is an economic concept with no exact counterpart in account, Areeda and Turner employ average variable cost as a surrogate for marginal cost. [4]

According to Areeda and Turner, a firm is always acting reasonably if it charges a price for its output that enables it to recover at least its average variable costs, because at that price the company is recovering the costs associated **[**12]** with producing each individual unit of output. The firm will, of course, prefer to recover its average

---

"pithy to the point of being incomplete," and we vacated a summary judgment so that the district judge could provide us with an adequate statement of reasons for his action. Such a statement by the trial court is essential to effective review. *Id. at 284*; *Jot-Em-Down Store (JEDS) Inc. v. Cotter & Co., 651 F.2d 245, 247 (5th Cir.1981)*.

Here, though practical concerns persuade us to review and decide this case, we are left guessing about the district court's reason for granting judgment n.o.v. Did the district court conclude that plaintiffs failed to prove *prima facie* unlawful pricing? that they failed to prove dangerous likelihood of success? that they failed to prove fact of injury, or amount of damages, or causation? Perhaps Agency prevailed on all these issues; because the district court has said only that it adopts the arguments in Agency's post-verdict brief, we are effectively forced to assume that such is the case.

We are, of course, sympathetic to the trial court's limited resources -- especially time -- in the face of a heavy caseload. A lengthy opinion is not always required, and arguments may be incorporated from the parties' briefs if they are specifically recited rather than adopted *en masse*. In the final analysis, however, it is the trial court's exercise of judgment that we review, and in a case such as this one we must see more evidence of that judgment than a boilerplate order if we in turn are to perform our function effectively.

[3] In their initial appellate brief, plaintiffs argued that Agency's motion for judgment n.o.v. should not have been entertained by the trial judge because Agency allegedly did not make an adequate motion for directed verdict at the close of all the evidence as prescribed by *Fed.R.Civ.P. 50(b)*. Agency, moved for directed verdict at the close of the plaintiffs' evidence, laying out the various grounds on which it thought it was then entitled to judgment. At the close of the defendant's case, Agency briefly reurged its motion for directed verdict, incorporating the grounds urged in its initial motion.

Since plaintiffs' original brief was filed, this court has decided two cases involving similar contentions about allegedly insufficient motions for directed verdicts. *Bohrer v. Hanes Corp., 715 F.2d 213 (5th Cir.1983)*, *cert. denied*, *__U.S.__, 104 S. Ct. 1284, 79 L. Ed. 2d 687 (1984)*; *Elliott v. Group Medical & Surgical Service, 714 F.2d 556 (5th Cir.1983)*. In both cases we rejected a rigid application of *Rule 50(b)*, holding that if the court and counsel were adequately informed of the defendant's challenge to the sufficiency of plaintiff's evidence a motion for judgment n.o.v. could thereafter be entertained. *Bohrer* and *Elliott* control this case; the trial judge properly considered Agency's motion for judgment n.o.v.

[4] Although variable costs and marginal costs will differ at some points along the production possibilities curve, we note simply that, so long as marginal cost did not significantly exceed average variable cost during the relevant time, any difference is not germane to our analysis.

total cost, but if it is unable to do so it will minimize its losses if it produces those units of output for which it can recover at least its variable costs. This is so because, in the short run at least, a firm cannot escape paying its fixed costs even if it reduces its production to zero.

Areeda and Turner argue that predatory pricing occurs only when a firm sets its price at a level below its average variable cost. At this price, the firm is suffering a loss on every unit of output it produces and sells, and its behavior is rational only if it hopes by engaging in this conduct to drive its competitors from the market and thereby gain monopoly powers that will enable it to charge a monopoly price in the future. This sort of pricing conduct is economically undesirable because the monopoly profits garnered by the monopolist over the long term will more than offset the short term benefit to consumers of the low predatory price. Competitors, of course, are harmed also, either by being driven from the market or by being disciplined into following the price leadership of the **[**13]** monopolist.

In this court's first major statement on predatory pricing following publication of the Areeda-Turner article, we adopted much of its analysis. *International Air Industries, Inc. v. American Excelsior Co., 517 F.2d 714 (5th Cir.1975)*, *cert. denied*, *424 U.S. 943, 96 S. Ct. 1411, 47 L. Ed. 2d 349 (1976)*. ***HN3***[] We defined "predatory" to mean that the defendant "must have at least sacrificed present revenues for the purpose of driving [plaintiff] out of the market with the hope of recouping the losses through subsequent higher prices." *Id. at 723*. We agreed with Areeda and Turner that "a price above average cost is a fairly competitive price for it is profitable to the monopolist if not to its rivals; in effect, the price excludes only less efficient firms." *Id.* By contrast, "a firm's pricing behavior can be considered anticompetitive when it sells at a price below its average variable cost." *Id. at 724*.

One important exception to the principle that a price above average variable cost is presumed lawful occurs when there are substantial barriers to new entry into the relevant market. In such a case, we expressed concern that even a price above average **[**14]** variable cost might enable a monopolist to drive an existing competitor out of the market, whereafter the entry barriers **[*890]** would enable the monopolist to realize substantial monopoly profits. ***HN4***[] As the barriers to entry increase, so does the degree to which the monopolist's price may exceed his average variable cost and yet still be deemed predatory. *Id. at 724-25* & n. 31. ***HN5***[] In sum:

> In order to prevail as a matter of law, a plaintiff must at least show that either (1) a competitor is charging a price below his average variable cost in the competitive market or (2) the competitor is charging a price below its short-run, profit-maximizing price and barriers to entry are great enough to enable the discriminator to reap the benefits of predation before new entry is possible.

Id. at 724 (footnotes omitted). Finally, we cautioned that it is "important to look to the price discriminator's costs, rather than his competitor's cost, to determine whether the price discrimination was anti-competitive." *Id. at 724-25*.

The objective economic approach to predation that we adopted in *American Excelsior* is still the law of this circuit. At the same time, **[**15]** however, we declined to adopt Areeda and Turner's proposed *per se* test for predatory pricing whereby a price above average variable cost would be *per se* non-predatory and a price below average variable cost *per se* predatory. We were unwilling, in an attempted monopolization case, to relegate the intent element to the status of an automatic and irrebuttable inference.

That interest in the defendant's intent surfaced in *Malcolm v. Marathon Oil Co., 642 F.2d 845 (5th Cir.)*, *cert. denied*, *454 U.S. 1125, 102 S. Ct. 975, 71 L. Ed. 2d 113 (1981)*, where we declared that "predatory pricing differs from healthy competitive pricing in its motive: a predator by his pricing practices seeks 'to impose losses on other firms, not garner gains for itself. '" *Id. at 853-54*, *quoting* L. Sullivan, *Handbook of the Law of Antitrust* 111 (1977). While the *Malcolm* panel noted the ongoing debate between partisans of an economic test for predation -- the Areeda-Turner approach -- and partisans of an intent test -- the Sullivan approach -- and disclaimed any view of the merits of these alternative analytical frameworks, *id. at 854 n. 17*, this court had already joined **[**16]** the economic camp in *American Excelsior*, and that decision bound the panel deciding *Malcolm* as it binds this panel. *See White v. Estelle, 720 F.2d 415, 417 (5th Cir.1983)*.

Our latest statement on predatory pricing briefly iterates the teaching of *American Excelsior*:***HN6***[]

> One seeking to establish predatory pricing must demonstrate that the defendant "at least sacrificed present revenues for the purpose of driving [the plaintiff] out of the market with the hope of recouping losses through subsequent higher prices." *International Air Industries v. American Excelsior Co., 517 F.2d 714, 723 (5th Cir.1975)*, *cert. denied*, *424 U.S. 943, 96 S. Ct. 1411, 47 L. Ed. 2d 349 (1976)*. Generally, in order to prove that the defendant has sacrificed present revenues, it is necessary to establish that the defendant's prices were below marginal or average variable cost.

Bayou Bottling, Inc. v. Dr. Pepper Co., 725 F.2d 300, 305 (5th Cir.1984). [5] **[**18]** In sum, **[*891]** although we follow with interest the continuing debate over theories of predation, the law in this circuit is that where barriers to entry are not pronounced predatory pricing is not established unless **[**17]** the defendant has set his price below his average variable cost. [6]

IV

We review then the evidence to determine if it can sustain a finding that Agency charged a price below its average variable cost. If the evidence cannot support this finding, we must next determine if there is evidence that barriers to entry existed which could render even a price above average variable cost predatory. Related particularly to this latter inquiry, we must then query whether market conditions generated a dangerous probability that defendant would succeed in attaining a market position which **[**19]** would enable it to control the market price. We conclude as a matter of law that plaintiffs here failed on all three counts.

Before trial, plaintiffs filed requests for admissions under *Fed.R.Civ.P. 36*. The first request was: "During the period of time that Agency charged $7.00 per day for a rental unit in San Antonio, its San Antonio rental office experienced a net loss from operations." The second request substituted "Austin" for "San Antonio." The third request dealt with Agency's $8.00 price in San Antonio, and the fourth request dealt with Agency's $8.00 price in Austin. Agency admitted that all four propositions were true.

At trial, plaintiffs relied almost exclusively on these admissions as evidence that Agency had engaged in predatory pricing. Plaintiffs did not offer any evidence respecting Agency's variable and fixed costs of operation. Rather, plaintiffs interpreted Agency's admission that it had suffered "a net loss from operations" to be effectively an admission of predatory pricing. This was a costly error.

Plaintiffs fought admission of exhibits showing that Agency operations in San Antonio and Austin earned revenues greater than their costs during some of **[**20]** the months covered by the admissions and less than their costs during some others of these months. Plaintiffs argued that the exhibits conflicted with the admissions, but the

---

[5] Sister circuits have also weighed the merits of Areeda and Turner's economic analysis of predation. Although all have accepted the basic premises of the Areeda and Turner formulation, most have expressed some reservations about supplanting entirely the intent-based test, and none have adopted a *per se* cost-based test. Of particular interest are the discussions in *MCI Communications Corp. v. American Tel. & Tel. Co., 708 F.2d 1081 (7th Cir.)*, *cert. denied*, ***__U.S.__, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)***; ***William Inglis & Sons Baking Co. v. ITT Continental Baking Co., 668 F.2d 1014 (9th Cir.1981)***, *cert. denied*, ***459 U.S. 825, 103 S. Ct. 57, 74 L. Ed. 2d 61 (1982)***; and *Northeastern Tel. Co. v. American Tel. & Tel. Co., 651 F.2d 76 (2d Cir.1981)*, *cert. denied*, ***455 U.S. 943, 102 S. Ct. 1483, 71 L. Ed. 2d 654 (1982)***. A helpful overview of the caselaw in this area is Vawter & Zuch, *A Critical Analysis of Recent Federal Appellate Decisions on Predatory Pricing*, 51 Antitrust L.J. 401 (1983). A less comprehensive discussion of the caselaw accompanies an interesting and thought-provoking synopsis of the principal alternative theories of predatory pricing advanced in the legal and economic literature in Calvani & Lynch, *Predatory Pricing under the Robinson-Patman and Sherman Acts: An Introduction*, 51 Antitrust L.J. 375 (1983).

[6] We recognize that a cost which is regarded as fixed in the short-run may become variable in the long-run, as, for example, when durable goods wear out and are either replaced or not. In most cases, however, we think it will be obvious to judges and juries which costs are appropriately viewed as fixed and which as variable over the relevant time period. When a legitimate dispute arises as to the characterization of certain costs, the question is one of fact to be resolved by the jury. *See* ***William Inglis & Sons Baking Co. v. ITT Continental Baking Co., 668 F.2d at 1036-38***.

exhibits were admitted when the trial judge concluded that the admissions related only to total costs and total revenues; when a portion of Agency's headquarters overhead was allocated to the individual offices, each showed a net loss throughout the period covered by the admissions. The defense exhibits, which made no provision for an allocation of centralized operating costs, were not inconsistent.

Admission of these exhibits afforded Agency an opportunity to demonstrate that the price it charged for a rental car never dropped below its average variable costs. Agency's expert testified, based on these documents, that Agency's average variable costs in San Antonio and Austin during the relevant time periods fluctuated between approximately $3.65 and approximately $5.00. Thus, Agency's price was always at least 40% greater than its average variable cost. The expert also testified that Agency's average variable costs in Austin were $5.23 when Agency went to a $9.00 price there in January 1979; the price was **[**21]** thus 72% above average variable cost. This testimony cut to the quick of plaintiffs' predatory pricing claim, and Adjusters and Wakely urge that admission of the defense exhibits upon which defendant's expert wholly relied was reversible error.

[*892] First, Adjusters and Wakely contend that the exhibits conflict with Agency's admissions that it operated at a net loss, but we reject this argument for the same reason as the trial judge: The admissions and the exhibits do not conflict. This is apparent when one has in mind what costs are reflected in each.

Second, plaintiffs charge that they were never given access to the underlying documents summarized in the profit and loss statements. The trial judge found, however, that plaintiffs bore most of the blame if they were surprised by the testimony of Agency's expert, for they had turned down an opportunity to take his deposition before trial. The underlying documents were in fact made available to plaintiffs, and they would have known which ones were important to their case if they had taken the deposition of Agency's expert. Plaintiffs, however, erroneously assumed that Agency's admissions gave them all the ammunition they **[**22]** needed, and were surprised to discover at trial that their big gun was not loaded.

Plaintiffs cry foul. Agency, they charge, took advantage of their misapprehension concerning the importance of the admissions. Even assuming this to be true, [7] **[**23]** nothing in our adversary system prevents Agency from exploiting plaintiffs' error by watching silently as plaintiffs failed to carry their burden of proof. Agency was under no obligation to teach Adjusters and Wakely about the rudiments of predatory pricing or to point out the difference between a net operating loss and a price below average variable cost. Instead, this distinction was brought out at trial to rebut any impression that plaintiffs had established a prima facie case of predatory pricing. [8]

---

[7] The record does suggest that Agency did not share plaintiffs' misapprehension:

> THE COURT: * * * Mr. Tondre [plaintiffs' counsel] says they relied on these admissions and even after this [defense] expert was tendered, I mean, the expert negated the admissions at least insofar as certain months were concerned. He came up and said the average variable cost was exceeded by these prices.
>
> MR. BICKERTON [defendant's counsel]: Which was never any response -- there was never any interrogatory. They have never asked us about costs, your Honor. I think that is the point in this case, and if you look at American Excelsior, it is not whether you make a profit or loss. It is the cost. Cost is the test in a predatory price increase [*sic*] case.

Agency made the same point in another exchange:

> MR. BICKERTON: We are not changing the admission.
>
> THE COURT: You are modifying it or explaining it, right? You are saying it ain't so.
>
> MR. BICKERTON: We are saying we agree that we lost money -- you know, frankly, he didn't couch the question properly: Did you have a net loss? Net loss is not even a relevant issue in a predatory pricing case. Below cost or above cost, that is the issue . . . .

[8] Thus, the following exchange occurred on direct examination of Agency's expert:

> Q. Can a firm charge a price still above its average variable cost and still sustain a net loss in the period that you mentioned?

[24]** Adjusters and Wakely seek now to convince us that Agency's price was below its average variable costs when it charged a $7.00 and $8.00 rental rate for its automobiles. Such evidence, however, had to be set before the jury, and the record shows that plaintiffs failed to carry their burden even of proving a prima facie case of below-cost pricing. Although plaintiffs challenged **[*893]** many of the assumptions shaping the opinion of Agency's expert, the record is devoid of any positive evidence that Agency's average variable cost ever exceeded its prices. ***HN7***[] Judgment n.o.v. is appropriate when "there is a complete absence of probative facts to support a jury verdict. There must be a conflict in substantial evidence to create a jury question." *Boeing Co. v. Shipman, 411 F.2d 365, 374-75 (5th Cir.1969)* (en banc). This record will not support a finding that Agency's price was ever inadequate to cover its average variable costs. [9]

[25]** Under the *American Excelsior* rule, plaintiffs might still prevail if they were able to establish that the barriers to entry were sufficiently high to render even a price above average cost predatory. The insurance replacement car market is neither a natural monopoly nor a heavily regulated industry. Plaintiffs argue, however, that barriers existed in the form of high start-up costs and the need for contacts within the insurance industry. We find that the only conclusion permitted by the record is that the barriers to entry into this market were slight -- not negligible, perhaps, but assuredly not so great as to permit a monopoly born of predatory pricing to be exploited before new competition would scotch the potential for extra-normal profits. [10]

A. Can a firm charge a price above the average variable price [*sic*] and yet still maintain a net loss?

Q. For the period?

A. Yes.

Q. Is it true, that the term "average variable cost" and whether you are above or below average variable cost doesn't necessarily have anything to do with whether or not you are making a net profit or loss?

A. I would expect that if you are above average variable cost but below average total cost, you might be sustaining a loss.

Q. Talking about different concepts?

A. That's right.

Earlier in the trial Agency's chairman had also revealed a businessman's instinctive grasp of this concept:

Q. Pursuant to court procedures, pursuant to what is called a request for admissions, [Agency] has admitted that during the time Agency was charging $7.00 and $8.00 in San Antonio and Austin, it was losing money in those offices. That is the state of the record.

A. Sir, we could be charging $50 per car when we first open and still lose money.

[9] Nor, given the essentially fungible character of the product and the relatively low plant investment, is it surprising that there is no suggestion that marginal cost ever exceeded average variable cost.

[10] Sensitive to the stricture that when a judgment n.o.v. is sought the evidence must be viewed "in the light and with all reasonable inferences most favorable to the party opposed to the motion," *Boeing Co. v. Shipman, 411 F.2d at 374*, we set out some of the exchanges at trial that underlie our conclusion. Most direct was the testimony of Agency's expert:

Q. Do you have an opinion as to whether or not any company could have charged a monopoly [price] in the replacement car rental business?

* * * * * *

A. In my opinion no company could have established a monopoly in San Antonio in the auto replacement rental business at that time.

Q. Why is that?

A. Primarily, there are no barriers to entry. Should a company be able to, even for a short period of time, exclude competition and raise their prices to an unusual profit, the market would be flooded by competitors to compete away any monopoly profits. There are so low barriers to entry into the business from what I can learn that there could be no monopoly in that industry.

[26]** **[*894]** This last conclusion dooms not only plaintiffs' claim of predatory pricing, but also another necessary element of their case -- the dangerous probability of success. ***HN8***[] If the market structure will not allow a dominant firm to set its price above the competitive level, the strictures of the antitrust laws are not activated. The injury to plaintiffs' business is not cognizable under the antitrust laws if competition itself is not harmed. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488-89, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977)*; *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*.

Only Adjusters, during its first year of operations, had the luxury of being the sole firm in San Antonio specializing in insurance replacement rentals. Significantly, Adjusters' founder testified that during this period he was able neither to set a monopolist's price nor to prevent competitors from entering the market.

A jury question would have been presented, of course, if plaintiffs' evidence had been to the contrary. Instead, plaintiffs' expert effectively endorsed the defense expert's assessment:

> Q. Do you remember we had some discussion about replacement[?] Didn't you tell me in the deposition it was your perception that it would be easy for the daily car companies, the Hertz and Avises to get into the business whether or not they are in it at this time? You said that?
>
> A. I think it would be easy for me to get in it. I guess it obviously would be easy for them.
>
> Q. I think you also indicated it would be easy for the new car dealers to get into the business whether or not they were in it at this time?
>
> A. That is correct.

Even more damaging to plaintiffs' case were the admissions made by the founder and president of Adjusters:

> Q. Essentially, all it takes to be in the replacement car business or the insurance rental business is cars and an office and a decision to be involved in that business, isn't that true?
>
> A. And some knowledge.
>
> Q. Some knowledge. Wouldn't you assume that Hertz or Avis or any existing car rental company would have at least as much about the replacement car rental business as you did when you started the business?
>
> A. Yes, but they would want to specialize.
>
> Q. So, you would agree with me, then, would you not, that there is a possible ready transition by the Hertzes and the Avises into the insurance rental business even to a larger extent than they are now?
>
> A. Yes.
>
> Q. And isn't there also another source of competition in the replacement car insurance rental business, that being the car dealers?
>
> A. Some car dealers.
>
> * * * * * *
>
> Q. If the new car dealer made the decision to get into the replacement car business in San Antonio, all it would take would be the decision to do it and acquiring the knowledge?
>
> A. It is the same as in any business.
>
> Q. Is there any reason to think they couldn't develop a fantastic business within a year just like you did?
>
> A. No.
>
> * * * * * *
>
> Q. And we also know that regardless of how many actual competitors there are for this business, there are a whole lot of potential competitors, isn't that true[?]
>
> A. There is a lot of potential, yes.

On this record, the trial judge concluded that, as a matter of law, plaintiffs failed to establish that Agency engaged in anticompetitive conduct in San Antonio and Austin which created a dangerous probability **[**27]** that Agency would come to wield monopoly powers in those markets. We agree with this conclusion, and accordingly affirm the granting of judgment n.o.v. on these claims.

V

In Corpus Christi, Adjusters' complaint rests on the fact that Agency hired Adjusters' former office manager, Patty Manges, and that many of Adjusters' customers followed her to Agency. Adjusters charges that Manges was lured away from her job with that company, and that she was specifically induced to draw away Adjusters' customers.

The case principally relied upon by both parties is *Associated Radio Service Co. v. Page Airways, Inc., 624 F.2d 1342 (5th Cir.1980)*, *cert. denied*, *450 U.S. 1030, 101 S. Ct. 1740, 68 L. Ed. 2d 226 (1981)*. *Page* must be read on its facts. Within a narrowly framed market, we found an antitrust violation on the basis of evidence that the defendant had induced the plaintiff's employees to act disloyally in steering business toward the defendant while they were evidently still in the employ of the plaintiff. Here there was no evidence that Manges acted inimically to Adjusters' interests until she had already left their employ for Agency.

HN9[] *Page* supports the view that **[**28]** "the mere hiring away of employees from a rival" is lawful. *624 F.2d at 1354*. The fact that the employee then uses her own skills and contacts -- and not, for example, misappropriated trade secrets -- to generate business for her new employer, even at the expense of her old employer, provides no basis for antitrust liability. The record here contained nothing more, and we hold accordingly that judgment n.o.v. was properly granted to Agency on this claim.

VI

In sum, plaintiffs have failed to establish that any injury caused their businesses as a result of Agency's participation in the insurance replacement car rental market in San Antonio, Austin, and Corpus Christi stemmed from anticompetitive conduct comprehended by *section 2* of the Sherman Act. Predatory pricing was not shown in San Antonio and Austin; anticompetitive hiring practices were not shown in Corpus Christi. Plaintiffs likewise failed to establish a dangerous probability that Agency could have come to monopolize any of these markets. As the evidence was insufficient to support a jury verdict for the plaintiffs, entry of judgment n.o.v. was appropriate.

AFFIRMED.

Robert J. Sherman and David A. Allgeyer, of Minneapolis, Minnesota, were on the brief for Appellant.

Roger L. Cook, of San Francisco, California, argued for Appellee. With him on the brief were J. Georg Seka, David N. Slone and John W. Schlicker of Counsel.

Judges: Friedman, Circuit Judge, Nichols, Senior Circuit Judge, and Baldwin, Circuit Judge.

Opinion by: BALDWIN

Opinion

[*656]** **[*606]** BALDWIN, Circuit Judge.

This is an appeal from an unpublished decision of the United States District Court for the Northern District of California holding claims 1-7 of U.S. Patent No. 3,319,515 (hereinafter '515 patent or Flournoy patent) for an "Interferometric Optical Phase Discrimination Apparatus" valid and infringed. Judgment was entered on a jury verdict rendered after forty-four days of trial. We vacate the District Court's denial of prejudgment interest and remand for an award of prejudgment interest or a determination that some **[**2]** reason exists for denying prejudgment interest. In all other respects, the judgment is affirmed.

The Parties

Bio-Rad Laboratories, Inc. (Bio-Rad) is a Delaware corporation with its principal office in Richmond, California. Between 1978 and 1979, Bio-Rad acquired two divisions, Digilab, Inc. (Digilab) and Block Engineering, Inc. (Block Engineering). Digilab was formed as a subsidiary of Block Engineering in 1969 to produce and sell instruments that rapidly measure the crystalline surface layer on semiconductors, known as the epitaxial layer. Since 1970, Digilab has manufactured and sold an epitaxial measuring instrument known as the FTG-12 under an exclusive license from E. I. du Pont de Nemours and Company (du Pont), owner of the '515 patent. When Bio-Rad acquired Block Engineering and Digilab, it also acquired the exclusive license under the '515 patent which included the right to enforce the patent against infringers. The name Bio-Rad will be used throughout this opinion to refer to the conduct of Digilab, and Block Engineering, as well as the conduct of Bio-Rad.

Nicolet Instrument Corporation (Nicolet) is a Wisconsin corporation engaged in the production and **[**3]** sale of electronic instruments. In 1979, Nicolet began selling an epitaxial thickness measuring instrument known as the MX-ECO.

Procedural Background

In 1981, Bio-Rad sued Nicolet for willful infringement of the '515 patent by Nicolet's production and sale of the MX-ECO measuring instrument. Nicolet counterclaimed for a declaratory judgment that the '515 patent is invalid and not infringed, and for alleged violations of the antitrust laws.

Both Bio-Rad and Nicolet demanded a jury trial and agreed to submit the case to the jury on general verdicts without special interrogatories. The jury declared all seven claims of the '515 patent valid and infringed, but not willfully infringed. The jury also concluded that Bio-Rad did not violate sections 1 or 2 of the Sherman Antitrust Act. The jury awarded Bio-Rad $3,078,000 in money damages for the infringement.

[*607] Nicolet moved for judgment notwithstanding the verdict (JNOV) and, in the alternative, for a new trial. Nicolet also moved to deny enforcement of the '515 patent for misuse. The district court denied all three motions and denied Bio-Rad's separate request for prejudgment interest. The trial judge entered **[**4]** judgment on the jury verdicts without comment and permanently enjoined Nicolet from infringing the '515 patent in any way, including by the production, use or sale of the MX-ECO epitaxial thickness gauge. Interest was awarded from the date judgment was entered.

Nicolet appeals from the judgment entered by the District Court, and from the court's refusal to declare the '515 patent unenforceable for patent misuse. Bio-Rad cross-appeals from the lower court's denial of prejudgment interest. Although this appeal is from the judgment entered on the jury verdict, the District Court's denial of Nicolet's motions guides our analysis. Accordingly, we consider the issues raised by the parties in the following order:

I. Grounds For JNOV.
II. Grounds For New Trial.
III. Patent Misuse.
IV. Prejudgment Interest.

Standard of Review

Several cases have issued from this court describing the analysis trial judges should follow when they entertain motions for JNOV or new trial. *Connell v. Sears, Roebuck & Co., 722 F.2d 1542, 1546, 220 U.S.P.Q. (BNA) 193, 197 (Fed. Cir. 1983)*; *Railroad Dynamics, Inc. v. A. Stucki Co., 727 F.2d 1506, 1512-13, 220 U.S.P.Q.* ***[**5]*** *(BNA) 929, 936 (Fed. Cir. 1984)*; *Perkin-Elmer Corp. v. Computervision Corp., 732 F.2d 888, 221 U.S.P.Q. (BNA) 669, 672-673 (Fed. Cir. 1984)*. That analysis need not be repeated here, but description of our appellate review process is useful.

Nicolet has urged that we review the record *de novo*, in part because no interrogatories were submitted to the jury and because the trial judge did not produce a written opinion discussing reasons for denying Nicolet's motions or describing the facts supporting **[***657]** the jury verdict. Nicolet mistakes our role. The presence of special interrogatories or a written opinion by the trial court certainly makes our task easier but the absence of these aids does not alter our standard of review. In the absence of special interrogatories we presume the existence of factual findings and legal conclusions necessary to support the verdict reached by the jury. The findings and conclusions are controlled by the court's instructions to the jury. *Perkin-Elmer, 732 F.2d at 893, 221 U.S.P.Q. (BNA) at 673*. ***HN1***[] On appeal after denial of a motion for JNOV, appellant must show either: 1) that the jury's presumed or express findings are not supported by substantial **[**6]** evidence or, 2) if the jury's findings were supported by substantial evidence, that the legal conclusions implied from the verdict cannot be supported by those findings. *Perkin-Elmer, 732 F.2d at 893, 221 U.S.P.Q. (BNA) at 673*. In sum, appellant must show either that reasonable jurors could not have made the presumed findings or that the conclusions necessary to the general verdict were not supported. ***HN2***[] The District Court's denial of Nicolet's Motion for a new trial is reviewed on an abuse of discretion standard. *Railroad Dynamics, Inc. v. A. Stucki Co., 727 F.2d at 1512, 220 U.S.P.Q. (BNA) at 935*. As this description of our approach demonstrates, our role as a reviewing court is circumscribed by standards that place a difficult burden on appellant.

Analysis

I. *Grounds For JNOV*

To overturn the District Court's denial of the Motion For JNOV, Nicolet presents several grounds for declaring the '515 patent invalid. The various grounds for invalidity will be discussed under the following lettered sections:

A. Anticipation and Obviousness.
B. Fraud.

C. Compliance With The Requirements Of *35 U.S.C. § 112*.
D. Infringement.

[7]** **[*608]** A. *Anticipation and Obviousness*

1. *Description of the Invention*

The '515 patent claims a method and apparatus for determining the thickness of a film or a surface layer on a substrate. The apparatus, known as an interferometer, may be used to measure the thin crystalline surface layer of semiconductors, known as the epitaxial layer. The claimed method is represented by claim 1 of the '515 patent, reproduced below:

> 1. A method for determining a physical property of a specimen on the basis of interferometric optical phase discrimination comprising, in sequence, directing analytical radiation upon said specimen along a course such that there is developed an optical phase difference between radiation emanating from a first radiation-reflective surface of said specimen and from a second radiation-reflective surface of said specimen, cyclically varying at a predetermined time rate the length of the path of travel of said radiation emanating from a given one of the pair consisting of said first radiation-reflective surface of said specimen and said second radiation-reflective surface of said specimen, with respect to the length of the path of travel of the **[**8]** radiation emanating from the other of said pair over a span inclusive of a zero-order peak at **[***658]** which there exists constructive interference between said radiation emanating from said first radiation-reflective surface of said specimen and from said second radiation-reflective surface of said specimen, measuring the elapsed time existing between the scan traverse of said zero-order peak at which there exists said constructive interference and a pre-selected reference point synchronized in time with the cycle of said scan traverse, said pre-selected reference point being originally established in location by scanning said specimen through a span inclusive of a central zero-order peak, and determining said physical property of said specimen as a function of said elapsed time.

The apparatus claims correspond to the method claims as illustrated by claim 5, reproduced below:

> 5. Apparatus for determining a physical property of a specimen on the basis of interferometric optical phase discrimination comprising, in combination, a source directing radiation upon said specimen of a wavelength adapted to develop an optical phase difference between radiation emanating from a first **[**9]** radiation-reflective surface of said specimen and from a second radiation-reflective surface of said specimen, means cyclically varying at a predetermined time rate the length of the path of travel of said radiation emanating from a given one of the pair consisting of said first radiation-reflective surface of said specimen and said second radiation-reflective surface of said specimen with respect to the length of the path of travel of the radiation emanating from the other of said pair over a span inclusive of a zero-order peak at which there exists constructive interference between said radiation emanating from said first radiation-reflective surface of said specimen and from said second radiation-reflective surface of said specimen, means sensing the occurrence of said zero-order peak, means measuring the elapsed time existing between the scan traverse of said zero-order peak and a preselected reference point synchronized in time with the cycle of said scan traverse, said preselected reference point being originally established in location by scanning said specimen throughout a span inclusive of a central zero-order peak, and means indicating said physical property of said specimen **[**10]** as a function of said elapsed time.

Operation of a preferred embodiment of the claimed invention is illustrated with reference to Figure 1 from the patent in suit.

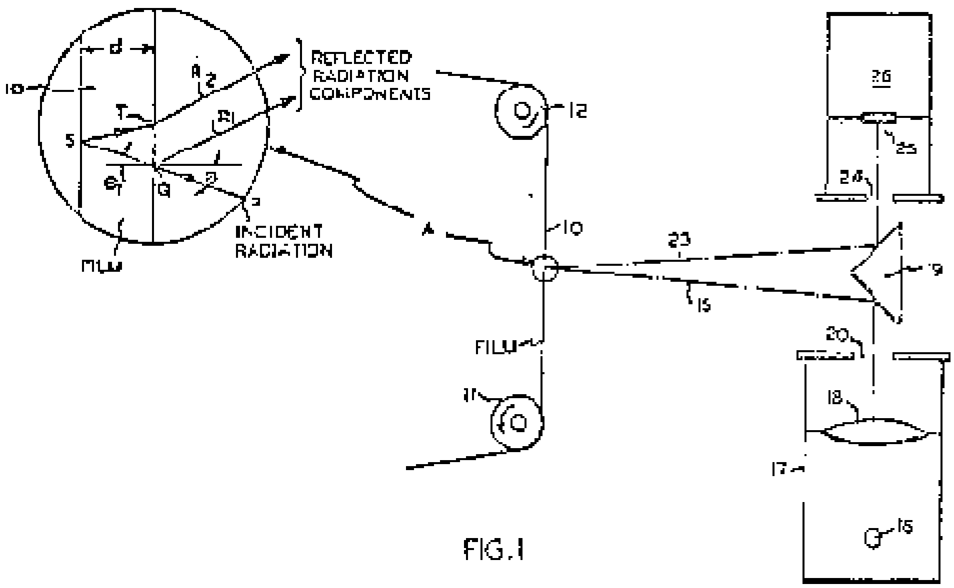

FIG.1

[*609]

Film or specimen 10 moves over guide rolls 11 and 12 as it is produced. A beam of light emanates from a light source 16 mounted within housing 17. Light 15 travels through convex lens 18 and is projected as a single beam onto the film 10 by a silvered prism 19.

Enlarged inset A shows light 15 impinging upon a front refractive surface of film 10 at Q. A first component of the light is reflected away from the film along R[1], while a second component of the light is transmitted through the film to a back radiation-reflective surface at S. The transmitted component is reflected back along path R[2]. Both components of light moving along paths R[1] and R[2] are identified in Figure 1 as 23. The reflected light components traveling along paths R[1] and R[2] are out of phase because of the difference in distance traveled by the first and second components after refraction and reflection. The phase difference results in interference that can be **[**11]** measured by an interferometer.

An interferometer used in appellee's claimed invention, known as a Michelson interferometer, is illustrated in Figure 2 of the '515 patent:

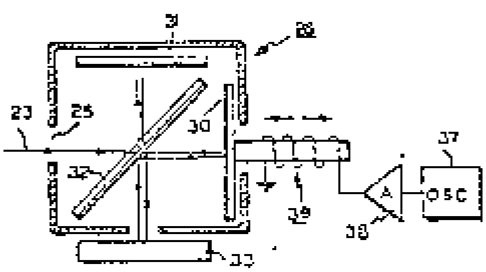

FIG.2

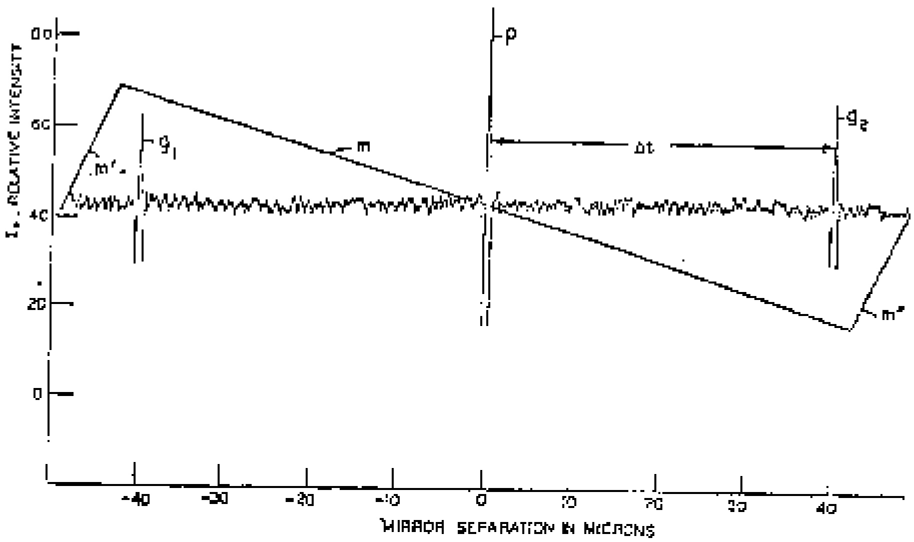
As in conventional interferometers, the light 23 strikes an inclined beam-splitter 32 which delivers light to mirrors 30 and 31. The mirrors reflect the light back to beam splitter 32 which in turn directs the beams towards a photoelectric detector 33. The detector measures the interference between the beams of light. During operation, mirror 30 is reciprocated cyclically over a known distance. The reciprocal motion, or oscillation, is effected by a saw-tooth oscillator 37 and associated electronic power amplifier 38. The mirror 30 oscillates at about 50 cycles/second.

As explained above, the light making up beam 15 is in phase when it reaches the surface of film 10. However, after reflection and refraction, the light traveling along paths R[1] and R[2] are out of phase **[*610]** because of the difference in distance traveled. The differences in distance traveled is related to the thickness of film 10. In the interferometer, a beam splitter divides each of **[**12]** the two components of the light 23 in half, yielding four beams. Two beams are directed to a stationary mirror and the other two to the reciprocating mirror. The mirrors reflect the beam components back to the beam splitter which directs the light to the detector. As the beams emerge from the interferometer together, they interfere with each other. This interference is measured and an interferogram may be produced. The interferogram may look like the interferogram illustrated in Figure 3 of the '515 patent, reproduced below:



[*659]** FIG.3

Central peak P is generated when all four beam components interfere constructively. This occurs when the mirrors 30 and 31 are the same distance from the beam splitter 32. Side peaks g[1] and g[2] occur when the difference in the distances between the beam splitter and the two mirrors corresponds to the optical retardation caused by the film. The side peaks are of lesser intensity than the central peak because only two of the beam components are constructively interfering.

The invention claimed in the '515 patent uses the distance between peaks to determine the thickness of the film. Figure 3 shows the "mirror **[**13]** separation in microns." This is the distance the mirror has traveled from the position where the four beams interfere constructively, known as the zero position. The time between the occurrence of two reference peaks may be measured directly from the interferogram to determine the thickness of the film.

2. *Anticipation*

Nicolet argues that the claims, except claim 6, read on a publication by Lowenstein and are therefore invalid under *35 U.S.C. § 102*. Lowenstein used infrared radiation and a lamellar grating interferometer which does not use mirrors that oscillate like those of a Michelson interferometer. Lamellar grating interferometers were used when light in the far infrared was employed because, at the time, there were no efficient beam splitters for light in the far infrared. One measurement or run of the interferometer used by Lowenstein could take six to eight hours. Nicolet's argument is that the substitution of a Michelson interferometer would have been obvious to one of ordinary skill in the art when not working with far infrared radiation. **[*611]** There was also evidence that the Lowenstein article differs from the claimed invention because Lowenstein does **[**14]** not teach the measurement of thin films from peaks of an interferogram. Because of these substantial differences between the claimed invention and the Lowenstein reference, the appropriate analysis is under *35 U.S.C. § 103*.

3. *Obviousness*

The parties agreed that a person of ordinary skill in the art would be an instrument designer with a college degree in physics or engineering and some practical experience in the design of optical instruments. Each party proffered expert testimony on the factual question of the scope and content of the prior art. It is notable that Bio-Rad's expert, Gebbie, was the only expert capable of testifying on the basis of first-hand experience with the level of skill in the relevant time period. One of Nicolet's experts, Lowenstein, whose article was relied on to assert invalidity, said:

> As far as the designers of commercial or industrial interferometers were concerned, I think I don't know anybody or, at least not well enough to be able to form an opinion about his level of skill.

This excerpt from the testimony is produced to illustrate the importance of the jury's role in ascertaining the content of the prior art. The **[**15]** jurors must discern how a person of ordinary skill in the art would have interpreted available art at the time the invention was made. The factfinder's interpretation of prior art references is necessarily guided by the credibility given the testimony of the experts. Here, the jury presumably credited the testimony of Gebbie rather than the testimony of Lowenstein in deciding what the Lowenstein article would have meant to one of ordinary skill in the art. Given the different familiarity of the experts with those skilled in the art at the relevant time, that evaluation by the jury was reasonable and cannot be successfully challenged on appeal. The only question for this court, therefore, is whether, on the facts testified to by Gebbie and presented by Bio-Rad, reasonable jurors could conclude that the invention would not have been obvious to one of ordinary skill in the art at the time it was made.

Nicolet argues the claimed invention would have been obvious in view of the Lowenstein publication. The Lowenstein publication used a lamellar grating interferometer to measure refractive properties of sapphire. The interferometer used by Lowenstein had a set of stationary plates **[**16]** and a set of moveable plates. To analyze the sample being studied, the moveable plates were run in one direction by a motor until the motor was shut off. One run, or scan, typically took 6 to 8 hours. After one scan was completed a motor drove the interferometer back to begin a new scan. The claimed invention requires cyclical mirror movement. Lowenstein did not disclose or suggest the mirror oscillation required by the claimed invention.

Dr. Gebbie testified that those of *ordinary* skill in the art were skeptical of Michelson rapid scan interferometers, which provide cyclical mirror movement, and would not have interpreted the Lowenstein article to suggest using a Michelson interferometer as required by the claimed invention. It appears from Gebbie's testimony that a person of ordinary **[***660]** skill in the relevant art would not have arrived at the claimed invention after reading the Lowenstein article. Nicolet has not shown that reasonable jurors could not agree with Gebbie that one of ordinary skill in the art would not have derived the claimed invention after reading the Lowenstein publication.

Further, there was evidence that the claimed invention enjoyed commercial success **[**17]** in the measurement of electrically conductive film and epitaxial layers of semiconductors. The claimed invention permitted simple accurate measurement of substrates moving at high speeds. It reduced labor costs and increased productivity. The savings were in some instances so great that one witness said the $65,000 instrument had paid for itself in about two weeks. The jury had to consider this success **[*612]** in reaching its presumed conclusion that the claimed invention would not have been obvious.

We have no doubt that conflicting evidence was presented at trial by Nicolet on the appropriate interpretation of the Lowenstein publication and commercial success. That, however, does not carry Nicolet's burden on appeal.

B. *Fraud*

Nicolet argues the '515 patent is invalid because Flournoy, the named inventor, did not actually invent the claimed subject matter. Nicolet contends that Myron Block, not Flourney, was the inventor. According to Nicolet, Myron Block permitted Flournoy, a duPont engineer, to claim inventorship to induce duPont to invest in Block Associates (a predecessor of Block Engineering founded by Myron Block). There is conflicting testimony in **[**18]** the record with regard to how the invention was developed. Nicolet's case on fraud principally hinges on the credibility of Myron Block. However, the development of the claimed invention described by Bio-Rad during the trial adequately supports the finding that Flourney invented the claimed subject matter.

Dr. Philip Flournoy joined duPont in 1960 as a research engineer in the Engineering Physics Laboratory at the duPont Experimental Station. A group of scientists at duPont, including Dr. Flournoy, were engaged in developing instruments for monitoring and controlling a wide variety of industrial manufacturing processes. Dr. Flournoy wanted to develop an instrument that could provide rapid information on the thickness of epitaxial layers on semiconductors of electrically conductive film, known as Mylar, during the production process. Previous techniques were undesirably slow because the spectrometers used required a relatively long period of time to produce one spectrum. Flournoy hoped that a rapid scan interferometer could provide desired spectral information rapidly in a short period of time.

In the course of investigations on measuring Mylar film and epitaxial layers, Dr. **[**19]** Flournoy observed the presence of small peaks ("side bursts") on either side of the main peak of an interferogram. To determine whether these small peaks were associated with the equipment or with the sample, Dr. Flournoy took interferograms of samples having different thicknesses and observed that the spacing between these peaks varied directly with the thickness of the sample. This determination led him to conclude that, with an adequate interferometer, he could construct an instrument for measuring film thickness, utilizing a rapid scan interferometer.

In March, 1961, Flournoy and his supervisor visited Block Associates to evaluate Block Associates as a vendor of rapid scan interferometers for DuPont's process control equipment needs. That trip satisfied Flournoy that Block Associates could produce sufficiently high quality equipment to satisfy DuPont's requirements.

By December 1961, Flournoy had obtained a suitable interferometer. With that instrument, he performed a series of experiments whereby he took interferograms from samples of Mylar, detected distinguishable side bursts in the interferogram, and utilized the distance between those side bursts to calculate the thickness **[**20]** of the Mylar samples. The accuracy of these experimentally obtained thickness readings was verified by comparing them to the actual thickness of the film, measured with a micrometer. By July 1962, Flournoy further refined the specifications for the various operational parameters for a thickness measuring instrument.

In July 1962, there were discussions between DuPont and Block Associates concerning the possibility of Block's manufacturing the thickness measuring instrument for DuPont. In the course of these discussions, the parties recognized that Block Associates and DuPont had possibly conflicting claims to inventorship of the process and apparatus embodied in the thickness gauge. It was agreed that the parties would collect and exchange documentation **[*613]** of their inventions. On the basis of the exchanged documentation, the patent attorneys would determine which party was entitled to any of the invention(s) that might reside in the thickness gauge under development.

After the documents were exchanged, Block Associate's patent attorney and DuPont's **[***661]** patent attorney determined that Flournoy was the inventor. Specifically, they found that Flournoy could prove he had **[**21]** conceived the invention of measuring film thickness with reference to the side burst spacing on the interferogram at least as early as March 23, 1961 and that he could prove a reduction to practice of that invention in December 1961. Block, on the other hand, could not prove that he or his employees had conceived the invention any earlier than May 4, 1961, nor could Block prove a reduction to practice of the invention any earlier than June 29, 1962. A memorandum was produced, and signed by both attorneys, wherein Myron Block recognized Flournoy as the inventor of the subject matter ultimately claimed in the '515 patent.

These facts adequately support the jury's presumed finding that Dr. Flournoy invented the claimed subject matter. Whether a different conclusion could have been reached on the basis of conflicting testimony presented by Nicolet at trial is not the issue before this court.

C. *Compliance With The Requirements Of 35 U.S.C. § 112*

Nicolet argues that the '515 patent is invalid for failure to disclose the best mode and because the disclosed invention is inoperative. Both arguments are premised on the omission of Automatic Gain Control circuitry (AGC) from **[**22]** the specification. On appeal, Bio-Rad identifies specific testimony establishing that the disclosed invention is fully operative and that at the time the patent application was filed, the AGC was not considered a necessary part of the invention or of the best mode for practicing the claimed invention. Nicolet's arguments on these issues amount to little more than bald assertions by counsel. As appellant, Nicolet has not satisfied this court that reasonable jurors could not find that the best mode requirement was satisfied or that the claimed invention was operative.

Nicolet also asserts that the claims are vague and indefinite. Here again the argument amounts to little more than a statement by counsel supported by some evidence in the record that the language "scanning said specimen" does not have a definite, understandable meaning. Bio-Rad presented testimony showing that a person of ordinary skill in the art would understand the phrase "scanning said specimen" to mean that a movable mirror of the interferometer must reciprocate when the phrase is read in light of the specification. Nicolet has not presented a basis for overturning the jury's presumed resolution of this issue **[**23]** in Bio-Rad's favor.

D. *Infringement*

Nicolet contends its MX-ECO machines do not infringe any claims of the '515 patent for two reasons. According to Nicolet, the method claims require light to be directed from a source onto a sample, then reflected from the sample to an interferometer and then onto a detector. Both parties agree that the MX-ECO does not follow this sequence. During operation of the MX-ECO, light moves from a source into an interferometer, then onto the sample, and from the sample to a detector. The issue here is whether reasonable jurors, after reviewing all the evidence, could have interpreted the claims to include the sequence of events followed by the MX-ECO. *Envirotech Corp. v. Al George, Inc., 730 F.2d 753, 758, 221 U.S.P.Q. (BNA) 473, 477 (Fed. Cir. 1984)*. The contested language of claim 1 is reproduced below:

> 1. A method for determining a physical property of a specimen on the basis of interferometric optical phase discrimination comprising,
> in sequence,
> directing analytical radiation upon said specimen,
>
> **[*614]** along a course such that there is developed an optical phase difference between radiation emanating from a **[**24]** first radiation-reflective surface of said specimen, second radiation reflective surface of said specimen cyclically varying at a predetermined time rate the length of the path of travel of said radiation emanating from a given one of the pair consisting of said first radiation-reflective surface of said specimen, and said second radiation-reflective surface of said specimen with respect to the length of the path of travel of the radiation emanating from the other of said pair, * * *.

At trial, Bio-Rad presented testimony of Mr. Johnston, a patent attorney, on the subject of claim interpretation. The witness testified that to clearly require performance of one step after another in the order listed, he would add the words "and thereafter" or similar language between the listed steps. Certainly such language in claim 1 would remove any ambiguity. Because the claim could have been more clearly written to require a specific sequence, but was not, there is room for reasonable people to interpret the claim as urged by Bio-Rad. We emphasize that our task is not to interpret the claims as though no trial had occurred. Both parties submitted testimony in support of their interpretation **[**25]** before the jury. Bio-Rad's interpretation prevailed and was not overturned by the trial judge. On appeal, we consider only whether reasonable jurors could have interpreted **[***662]** the claim in the manner presumed. *Envirotech Corp. v. Al George, Inc., 730 F.2d at 758, 221 U.S.P.Q. (BNA) at 477*. We conclude that reasonable jurors could conclude the claims simply require light to travel from a source to a detector in a manner that develops an optical phase difference.

Nicolet's second theory for overturning the judgment of infringement is that the '515 patent requires determining a sample's thickness by measuring time directly from an interferogram. In contrast, the MX-ECO measures thickness of a sample by measuring the distance traveled by the reciprocating mirror between occurrences of constructive interference.

The jury presumably concluded that one of ordinary skill in the art would understand that the MX-ECO's mirror time of travel is functionally equivalent to the mirror distance traveled. The patent specification uses "time" to encompass alternative approaches for determining the distance traveled by the mirror between the occurrence of a sideburst and a reference point. When **[**26]** the patent claims speak of "measuring the elapsed time" they also refer to the measurement of the distance the mirror traveled from a reference point to the position where a sideburst occurs.

For instance, Figure 3 of the '515 patent shows both distance of mirror travel as well as time. Both distance and time may be used to determine the distance traveled by the mirror. The jury could also reasonably have drawn the presumed conclusion from other evidence produced by Bio-Rad such as Nicolet's sales brochure which described a Michelson interferometer used in the MX-ECO and stated that the mirror velocity must be constant during the scan. The evidence produced by Bio-Rad shows that although time and distance are different, they are related in this technological setting. Because of the close relationship between time and distance in this case, we cannot conclude that the jury's finding of infringement must be reversed.

Nicolet's argument that the MX-ECO applies mathematical formulas known as fourier transforms to the data of an interferogram does not avoid infringement. Steps or features added to a claimed invention do not necessarily avoid infringement. *Radio Steel Mfg. Co. **[**27]** v. MTD Products, Inc., 731 F.2d 840, 221 U.S.P.Q. (BNA) 657 (Fed. Cir. 1984)*.

II. *Grounds For New Trial*

A. *Form Of Verdict*

Nicolet argues that a new trial is required because the form of verdict used in this case was improper. Nicolet contends that the general verdict form permitted the jury to decide questions of law. **[*615]** This court has already held that ***HN3***[] there is no error inherent in submitting questions of law to a jury so long as the jury is adequately instructed. *Railroad Dynamics, Inc. v. A. Stucki Co., 727 F.2d at 1514-15, 220 U.S.P.Q. (BNA) at 937-38*. Nicolet's argument for a new trial therefore has no merit absent some harmful error in the instructions.

The instructions in this case were jointly submitted by the parties to the court. When the instructions were given to the jury, Nicolet raised no objection to any of them. Ordinarily, ***HN4***[] a party must object to an instruction in time to give the trial judge an opportunity to correct the alleged error before the jury returns its verdict. If no objection is raised, the instructions cannot be challenged on appeal unless great injustice would result. *See* *American Hoist & Derrick Co. v. **[**28]** Sowa & Sons, Inc., 725 F.2d 1350, 1364, 220 U.S.P.Q. (BNA) 763, 774 (Fed. Cir. 1984)*.

B. *Instruction On Burden Of Proof*

Nicolet also argues that the trial judge failed to properly instruct the jury on Nicolet's burden for proving invalidity. The jury was instructed that the patent must be presumed valid and that the burden of proving invalidity rests upon Nicolet. The trial judge also told the jury that "the presumption of validity is rebuttable only by clear and convincing evidence." Nicolet contends that the jury should have been told that the presumption of validity may be weakened or destroyed when prior art more pertinent than that considered by the examiner is presented at trial. Because prior art presented at trial was more pertinent than art before the examiner, Nicolet says the jury should have been instructed that Nicolet only had to carry its burden of proof by a preponderance of the evidence.

Nicolet cannot possibly show that great injustice was caused by the challenged instruction since this court has repeatedly held that the party asserting invalidity must prove facts capable of overcoming the presumption by clear and convincing evidence. The introduction **[**29]** of prior art not considered by the PTO does not change the burden of proof or the requirement that evidence establish the presumption-defeating facts clearly and convincingly. *Connell v. Sears, Roebuck & Co., 722 F.2d at 1549, 220 U.S.P.Q. (BNA) at 199*. Nicolet's challenge to the burden of proof instruction is therefore without merit.

C. *Abuse Of Discovery*

Here, Nicolet says that Bio-Rad abused the discovery process to such an extent that a new **[***663]** trial is required. The argument is not premised on failure to disclose documents but on the production of certain documents during the trial. The documents involved opinions from attorneys on validity questions.

HN5[] Questions regarding abuse of the discovery process are within the trial judge's province and denial of a motion for new trial based on such abuse will be overturned only if the denial of a new trial is shown to be an abuse of discretion. *Edgar v. Finley, 312 F.2d 533 (8th Cir. 1963)*. The disputed evidence was discovered during trial and the documents were entered as evidence in the case. The record indicates Nicolet had an adequate opportunity to examine witnesses necessary to explain the significance of these **[**30]** documents and to present arguments regarding their importance on the validity issues. Under these circumstances, we cannot say that an abuse of discretion occurred when Nicolet's request for new trial was denied.

D. *Damages*

Finally, to obtain a new trial, Nicolet argues the damages award is excessive. In attacking the jury award of $3,078,000, Nicolet assumes that lost profits were awarded on 91 MX-ECO instruments sold by Nicolet and that a reasonable royalty of $18,000 per instrument was assessed on each sale of 19 other MX-ECO instruments. Bio-Rad does not challenge this presumed analysis of the jury's award, as it appears to follow Bio-Rad's arguments to the jury on the damages issue. Although **[*616]** we are not required to follow the analysis presumed by the parties, we do so in this case and affirm the jury award.

HN6[] To obtain lost profits, a patent owner must prove that he would have made the sales but for the infringing activity. The patent owner need not prove causation as a certainty, evidence showing a reasonable probability that Bio-Rad would have made the infringing sales Nicolet made will suffice. *Gyromat Corp. v. Champion Spark Plug Co., 735* ***[**31]*** *F.2d 549, slip op. at 9 (Fed. Cir. 1984)*; *Lam, Inc. v. Johns-Manville Corp., 718 F.2d 1056, 1065, 219 U.S.P.Q. (BNA) 670, 675 (Fed. Cir. 1983)*. The jury was instructed that Bio-Rad is entitled to lost profits on sales Bio-Rad would have made but for Nicolet's infringement and that several factors should be considered, including:

> whether plaintiff had the existing or at least potential manufacturing and marketing capabilities to obtain the infringing sales, whether plaintiff's FTG-12C and defendant's MX-ECO compete with one another, whether plaintiff's and defendant's marketing efforts were aimed at the same geographical markets and categories of customers, and whether there were any particularly close substitutes for the FTG-12C and the MX-ECO.

The instruction on lost profits is not challenged on appeal. We conclude that sufficient evidence was proffered by Bio-Rad to establish a reasonable probability that in the absence of Nicolet's infringement, Bio-Rad would have sold an additional 91 thickness measuring instruments. For instance, Bio-Rad showed demand for the claimed invention by proving Nicolet's sales of infringing instruments and licenses for the production **[**32]** and use of instruments embodying the claimed invention by two other corporations. Bio-Rad is the only company licensed to sell instruments embodying the invention of the '515 patent, with one inconsequential exception. Texas Instruments was licensed to sell five instruments embodying the claimed invention after Texas Instruments had used them for one year. This fact alone does not preclude the award of lost profits by the jury. In addition, Bio-Rad's witnesses testified that Bio-Rad's facilities were adequate or could have been made adequate to meet the additional demand for the claimed invention.

Nicolet argues that Bio-Rad is not entitled to lost profits because Bio-Rad did not establish the absence of acceptable noninfringing substitutes, one of the factors required by *Panduit Corp. v. Stahlin Bros. Fibre Works, Inc., 575 F.2d 1152, 1156 (6th Cir. 1978)*, to justify an award of lost profits. [*] We conclude there is sufficient evidence of record for a reasonable jury to find the absence of acceptable substitutes. Bio-Rad's market survey expert testified that in surveying purchasers of the Nicolet device, 70-90% of the interviewees would have purchased Bio-Rad's FTG-12 device **[**33]** had Nicolet not been present in the market. Bio-Rad also points to admissions by Nicolet that Bio-Rad was Nicolet's sole competitor. We are also satisfied that the jury could reasonably conclude from the evidence that there were no other devices which could be deemed acceptable substitutes, especially in **[***664]** view of the fact that Nicolet did not offer any evidence to the contrary. Indeed, it is Nicolet's burden on appeal to

---

[*] Although this court has accepted the *Panduit* standard as a permissible way to establish entitlement to lost profits, we have not made that standard the exclusive one for determining entitlement to lost profits. *Central Soya Co. v. Geo. A. Hormel & Co., 723 F.2d 1573, 1579, n. 5, 220 U.S.P.Q. (BNA) 490 (Fed. Cir. 1983)*; *Gyromat Corp. v. Champion Spark Plug Co., 735 F.2d 549, slip op. at 5 (Fed. Cir. 1984)*.

show that reasonable jurors could not have concluded that but for Nicolet's infringement, Bio-Rad would have sold 91 additional instruments. Nicolet has failed to carry that burden here.

[34]** Nicolet also contends that the amount of lost profits awarded is so large that the jury verdict must be overturned or a new trial ordered. ***HN7***[] The amount of lost profits awarded cannot be speculative but the amount need not be proven with unerring precision. See *Lam, Inc. v. Johns-Manville **[*617]** Corp., 718 F.2d at 1065, 219 U.S.P.Q. (BNA) at 675*; *Livesay Window v. Livesay Industries, Inc., 251 F.2d 469, 472, 116 U.S.P.Q. (BNA) 167, 169 (5th Cir. 1958)*.

To support its contention, Nicolet describes the testimony of Bio-Rad's accounting expert as speculative and without any reasonable basis. Bio-Rad's expert relied on an incremental cost accounting method that resulted in a profit of about $39,650 for each domestic sale and $34,313 for each foreign sale. This calculation included all of Bio-Rad's costs, except for direct selling expenses, labor and materials. We cannot conclude that the size of the award for lost profits was too speculative simply because the jury was guided by an incremental cost accounting method.

Nicolet also argues that the reasonable royalty, presumed to be part of the damages award, is too high. They point out that the industry royalty rate **[**35]** runs from three to ten percent of sales while the royalty awarded by the jury approaches one third of the selling price of the MX-ECO. ***HN8***[] Though established royalty rates are normally applicable, *Hanson v. Alpine Valley Ski Area, Inc., 718 F.2d 1075, 1078, 219 U.S.P.Q. (BNA) 679, 682 (Fed. Cir. 1983)*, they do not necessarily establish a ceiling for the royalty that may be assessed after an infringement trial. *Cf. Tektronix, Inc. v. United States, 213 Ct. Cl. 257, 552 F.2d 343 at 347 n.5, 193 U.S.P.Q. (BNA) 385 at 390 n.5 (1977)*, *cert. den., 439 U.S. 1048, 58 L. Ed. 2d 707, 99 S. Ct. 724 (1978)*. Appellant has not met its burden of showing that use of a higher rate was inappropriate under the circumstances of this case.

E. *Antitrust Counterclaim*

Finally, Nicolet argues it is entitled to a new trial on its antitrust counterclaims because the jury's incorrect analysis of validity and infringement necessarily resulted in their rejection of Nicolet's antitrust claims. In view of our affirmance of the decisions on validity and infringement, Nicolet's argument is without merit.

III. *Patent Misuse*

Nicolet's answer to Bio-Rad's complaint alleged patent misuse **[**36]** because of bad faith threats of patent infringement suits. Nicolet's answer said: "Plaintiff is estopped from enforcing said patent No. 3,319,515 by reason of misuse thereof in the form of bad faith threats of patent infringement suits based thereon." This was the only misuse theory presented to the jury. After the jury verdict was returned, Nicolet argued two different misuse theories to the trial judge in a motion to deny enforcement of the '515 patent. The trial judge denied the motion without comment. On appeal, Nicolet relies on the same two misuse theories that were presented only to the trial judge after the jury rendered its verdict. Nicolet would have this court declare the patent in suit unenforceable.

First, Nicolet argues that Bio-Rad misused its patent in 1969-1970 when Digilab refused to sell unpatented interferometers to Texas Instruments unless Texas Instruments took a license under the '515 patent. Second, Nicolet contends that misuse occurred when Bio-Rad and DuPont agreed to jointly enforce the '515 patent against Nicolet and created a joint litigation fund for that purpose. We do not address the merits of these contentions because Nicolet has waived the **[**37]** right to raise these misuse issues.

HN9[] Misuse is an affirmative defense that must be pleaded and proved. *35 U.S.C. § 282 (1976)*; *Trio Process Corp. v. L. Goldstein's Sons, Inc., 461 F.2d 66, 74, 174 U.S.P.Q. (BNA) 129, 135 (3d Cir. 1972)*, *cert. denied, 409 U.S. 997, 34 L. Ed. 2d 262, 93 S. Ct. 319 (1972)*. Nicolet and Bio-Rad both asked for a jury trial on all the issues. No issues were reserved for trial to the court only. In fact, in its Joint Pretrial Statement, Nicolet said "Bifurcation or separate trials of any issues is neither desired nor feasible." Because the affirmative defenses argued on appeal were not pleaded in Nicolet's answer or presented to the jury, we hold these defenses were waived and we need **[*618]** not consider them further. *See id.* at *461 F.2d at 74, 174 U.S.P.Q. (BNA) at 135*.

Nicolet relies on *In re Yarn Processing Patent Validity Litigation, 472 F. Supp. 170, 205 U.S.P.Q. (BNA) 758 (S.D. Fla. 1979)* (*Yarn Processing*) for the proposition that misuse *must* be decided by the court and not the jury. Nicolet's reliance on this case is unfounded. The plaintiff in *Yarn Processing* sued for infringement occurring after misuse had **[**38]** been purged and demanded a jury trial. The District Court granted a motion for separate trial to the court of the purged issues because they were separable from the infringement issues and their separate adjudication would expedite **[***665]** the litigation. The court concluded that trying the equitable misuse defense before a judge did not violate plaintiff's right to a jury trial. The decision in *Yarn Processing*, therefore, has no bearing on this case where all issues were to be tried to the jury.

IV. *Prejudgment Interest*

The trial court denied Bio-Rad's request for prejudgment interest before the United States Supreme Court decision in *Devex Corp. v. General Motors Corp., 461 U.S. 648, 103 S. Ct. 2058, 76 L. Ed. 2d 211, 51 U.S.L.W. 4613 (1983)* was available. In that case, the Supreme Court said that ***HN10***[] prejudgment interest is compensatory, not punitive, and should be awarded under *35 U.S.C. § 284* absent some justification for withholding such award. Here the district court denied prejudgment interest but did not indicate that there was any reason for denying prejudgment interest. The determination of whether such a reason is present is for the trial court to ascertain **[**39]** in the first instance. We therefore *vacate* the trial court's denial of prejudgment interest and *remand* for an award of prejudgment interest or a determination that some specific justification exists for denying prejudgment interest. In all other respects, the judgment is *affirmed*.

AFFIRMED-IN-PART, VACATED-IN-PART, AND REMANDED.

HN1[] **Jury Instructions, Objections**

Fed. R. Civ. P. 51 provides that no party may assign as error the giving or failure to give an instruction unless he objects thereto before the jury retires to consider its verdict, stating distinctly the matter to which he objects and the grounds of his objection. The purpose of this rule is to prevent a litigant from taking advantage of an error which could be rectified by the court if called to its attention by timely and specific objection.

HN8[] Trials, Judgment as Matter of Law

A proper motion for a directed verdict and its denial will always preserve for review the question whether under the law truly applicable to the case there was an adequate evidentiary basis for the submission of the case to the jury.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

Civil Procedure > Appeals > Standards of Review

HN9[] Trials, Judgment as Matter of Law

In determining whether a trial court has erred in denying a motion for a directed verdict, it is the applicable law that is controlling, and not what the trial court announces the law to be in his or her instructions.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN10[] **Monopolies & Monopolization, Actual Monopolization**

Regarding the duty to cooperate, under the so-called essential facilities or bottleneck doctrine, a business or group of businesses which controls a scarce facility has an obligation to give competitors reasonable access to it.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN11[] **Private Actions, Remedies**

There are two elements to the offense of monopolization under the Sherman Act, *15 U.S.C.S. § 18*. The first is the possession of monopoly power in the relevant market. The second is the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. The fact of injury and damages suffered by reason of a violation of the antitrust laws must also be shown for a private litigant to recover on a claim of monopolization.

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] **Antitrust & Trade Law, Sherman Act**

Regarding the duty to cooperate, under the intent test, a business is free to deal with whomever it pleases so long as it has no purpose to create or maintain a monopoly.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN13[] **Monopolies & Monopolization, Actual Monopolization**

The presence of four elements is necessary to establish liability under the essential facilities doctrine: (1) control of the essential facility by a monopolist; (2) a competitor's inability to duplicate the facility; (3) denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility.

Civil Procedure > Appeals > Standards of Review > General Overview

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN14[] **Appeals, Standards of Review**

Where an issue is raised by a claim of error in the denial of defendant's motion for a directed verdict and for judgment notwithstanding the verdict, the court must view the evidence most favorably to the party against whom the motion is made, and give that party the benefit of all reasonable inferences.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Evidence > Admissibility > Expert Witnesses

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN15[] **Standards of Review, Abuse of Discretion**

The court reviews a district court's admission or exclusion of expert testimony for abuse of discretion only.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN16[] **Private Actions, Remedies**

The trier of fact can determine the amount of antitrust damages from a just and reasonable estimate of the damage based on relevant data. The damage award, however, may not be based on speculation or conjecture.

Civil Procedure > Appeals > Standards of Review > General Overview

Civil Procedure > Judgments > Relief From Judgments > General Overview

Civil Procedure > Judgments > Relief From Judgments > Motions for New Trials

HN17[] **Appeals, Standards of Review**

The court must afford the district court's refusal to grant a new trial on the excessive damages claim considerable deference on appeal.

Civil Procedure > Appeals > Standards of Review > General Overview

Civil Procedure > ... > Jury Trials > Jurors > Misconduct

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

Civil Procedure > Remedies > Damages > General Overview

HN18[] **Appeals, Standards of Review**

Absent an award so excessive as to shock the judicial conscience and to raise an irresistible inference that passion, prejudice, corruption or other improper cause invaded the trial, the jury's determination of the damages is considered inviolate.

HN20[] **Costs & Attorney Fees, Clayton Act**

The Clayton Act, *15 U.S.C.S. § 15(a)* authorizes the award of counsel fees for legal services performed at the appellate stages of a successfully prosecuted private antitrust action. The amount of the award for such services should, as a general rule, be fixed in the first instance by the district court, after hearing evidence as to the extent and nature of the services rendered.

Counsel: Tucker K. Trautman, (John H. Evans and Owen C. Rouse of Ireland, Stapleton & Pryor, P.C., Denver, Colorado), for Plaintiff-Appellee, Cross-Appellant.

Richard M. Cooper, (Edward Bennett Williams and Harold Ungar of Williams & Connolly, Washington, D.C., and David G. Palmer and William W. Maywhort of Holland & Hart, Denver, Colorado), for substituted Defendant-Appellant, Cross-Appellee.

Judges: Holloway, Doyle, and Seymour, Circuit Judges.

Opinion by: HOLLOWAY

Opinion

[*1512] HOLLOWAY, Circuit Judge.

Defendant Aspen Skiing Company operates skiing facilities at three of the four skiing mountains in the Aspen, Colorado area, Ajax Mountain, Buttermilk and Snowmass. Plaintiff Aspen Highlands Skiing Corporation operates skiing facilities at the fourth mountain, Aspen Highlands.

For many years, plaintiff and defendant individually offered a wide variety of ski-lift tickets. Defendant's ski-lift tickets were interchangeable among its three Aspen facilities. From the 1962-63 ski-season through the 1971-72 season, plaintiff and defendant offered a joint multi-day ski-lift ticket which could be used at any of the **[**2]** four Aspen mountains. Revenues from the joint ticket were divided through coupons used to measure actual use at the four mountains. II App. 488-49. [1] After a one-year discontinuance of the joint ticket during 1972-73, the joint ticket was reinstituted in 1973-74 through 1976-77. Profits were divided on the basis of surveys of actual use. Plaintiff received 17.5% of the net revenues from the sale of four-area tickets during 1973-74, 18.5% in 1974-75, 16.8% in 1975-76, and 13.2% in 1976-77.

[1] Citations to "App." refer to the joint appendix on appeal prepared by the parties. Citations to "R." refer to the original record.

Defendant offered to continue the joint ticket for 1977-78 if plaintiff would accept a 13.2% fixed percentage of the revenues. I App. 90-91. Plaintiff objected to this percentage because it was based on the survey for 1976-77, which plaintiff contended was a ski-season marked by below average amounts of snowfall and an unusually low number of skiers visiting the Aspen area. *Id.* **[**3]** at 91. Although plaintiff wanted revenues to be divided on the basis of actual usage, it eventually accepted a fixed 15% of revenues for 1977-78. *Id.* at 92-93.

[*1513] Defendant offered to continue the joint ticket for 1978-79 if plaintiff would accept 12.5% of revenues. *Id.* at 145-46. Plaintiff again urged a return to a system of sharing revenues on the basis of actual usage. *Id.* at 73, 77-78. The parties were unable to agree and no joint tickets were offered thereafter.

Plaintiff brought suit against defendant under § 4 of the Clayton Act, *15 U.S.C. § 15*. Plaintiff alleged that defendant violated *§§ 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2*, by monopolizing, attempting to monopolize, and conspiring to monopolize the sale of downhill skiing services in Aspen, and by conspiring to restrain trade.

After the close of the evidence at trial, the district court granted defendant's motion for a directed verdict with respect to all of plaintiff's claims except the claims of unlawful monopolization and conspiracy to restrain trade between defendant and nonparties.

The jury found for plaintiff on the monopolization claim and for defendant on the conspiracy **[**4]** claim. II App. 603; I App. 31-32. The jury by special interrogatories found that the relevant product market was downhill skiing at destination ski resorts and that the relevant product submarket was downhill skiing services in the Aspen area, including multi-area and multi-day lift tickets. The jury also found that the relevant geographic market was North America and that the relevant geographic submarket was the Aspen area. I App. 30-31, II App. 601-02. The jury found that plaintiff had suffered $2.5 million in damages by defendant's unlawful monopolization. I R. 33, II App. 603. [2]

[5]** The district court thereupon trebled the verdict and entered judgment of $7.5 million plus attorneys' fees and costs. I App. 35, II App. 607. The court also issued an injunction requiring defendant to participate with plaintiff in offering a joint four-area six-day ski lift ticket for a period not exceeding three years. I App. 36-40. The district court denied motions for judgment notwithstanding the verdict, for a new trial, and for remittitur filed by defendant both after trial and seven months later. I R. 294, 296. The district court issued an order fixing the amount of costs and attorney's fees. *Id.* at 244. Defendant appeals, and plaintiff cross-appeals. [3]

[6]** I

The relevant market

On appeal, defendant contends that the district court erred in instructing the jury on the relevant market. The trial court's instructions on the market and submarket are reproduced in the Appendix to this opinion. Defendant argues that the instructions on the relevant product submarket and geographic submarket were inadequate, and that the court erred in instructing the jury that "there can be both a relevant market and a relevant submarket." II App. 584-

---

[2] On December 22, 1975, the Attorney General of Colorado brought an antitrust suit under federal law against both plaintiff and defendant challenging, among other things, the joint ticket offered by the parties. Exhibit X, III App. The suit was settled by entry of a consent decree on August 19, 1977, which permitted the continued marketing of the joint ticket for a period of five years subject to certain restrictions. Exhibit 26, III App.

Defendant argued that apprehension over continued scrutiny by the Attorney General of Colorado under the consent decree was one of the factors which led it to discontinue the joint ticket after plaintiff refused to accept 12.5% as its share of revenues. I App. 121. On appeal, defendant's position is that "even if it abandoned the joint ticket as a conscious and unequivocal refusal to cooperate with [plaintiff] in the marketing of their respective facilities, it committed no antitrust violation." Brief of Defendant-Appellant, Cross-Appellee, at 7-8.

[3] Plaintiff does not seek a new trial. It asserts that the issues raised in its cross-appeal are "pertinent only if defendants are successful on their appeal." Opening Brief of Plaintiff-Appellee, Cross-Appellant, at 1. Because we affirm the trial court's judgment, we need not reach the arguments plaintiff advances in its cross-appeal.

85. *See* Brief of Defendant-Appellant, Cross-Appellee, at 22-40. Plaintiff says that at trial, however, defendant did not object to the instructions on these grounds. Instead, defendant objected on the ground that the relevant market **[*1514]** issue should be decided by the court as a matter of law and should not be submitted to the jury. II App. 580-81.

Rule 51 of the Federal Rules of Civil Procedure ***HN1***[] provides that "no party may assign as error the giving or failure to give an instruction unless he objects thereto before the jury retires to consider its verdict, stating distinctly the matter to which he objects and the grounds of his objection." *Fed. R. Civ. P. 51*. The purpose of this **[**7]** rule is to "prevent a litigant from taking advantage of an error which could be rectified by the court if called to its attention by timely and specific objection." *Corriz v. Naranjo, 667 F.2d 892, 896 (10th Cir. 1981)*, *cert. granted*, *456 U.S. 971, 102 S. Ct. 2233, 72 L. Ed. 2d 844 (1982)*, *cert. dismissed*, *458 U.S. 1123, 103 S. Ct. 5, 73 L. Ed. 2d 1394 (1983)* (by stipulation); *see also* *Moe v. Avions Marcel Dassault-Breguet Aviation, 727 F.2d 917, 924 (10th Cir. 1984)*; *Taylor v. Denver and Rio Grande Western Railroad Co., 438 F.2d 351, 353 (10th Cir. 1971)*; 9 C. Wright & A. Miller, *Federal Practice and Procedure* § 2551 (1971).

Accordingly, *Rule 51* ***HN2***[] requires counsel "to make abundantly clear to the trial court the objecting party's position." *Rogers v. Northern Rio Arriba Electric Cooperative, Inc., 580 F.2d 1039, 1042 (10th Cir. 1978)*; *see also* *Palmer v. Hoffman, 318 U.S. 109, 119, 87 L. Ed. 645, 63 S. Ct. 477 (1943)*("In fairness to the trial court and to the parties, objections to a charge must be sufficiently specific to bring into focus the precise nature of the alleged error."); *Community National Life Insurance Co. v. Porter Square Savings & **[**8]** Loan Association, 406 F.2d 603, 606 (10th Cir. 1969)* (objection to instruction "not sufficient because it was not distinct in explaining the grounds for objection as required by *Rule 51*"); 9 C. Wright & A. Miller, *supra*, § 2554, at 643 ("grounds must be stated with sufficient clarity"). We have indicated that the grounds stated in the objection must be obvious, plain, or unmistakable. *Corriz, supra, 667 F.2d at 896* (objections on grounds that elements of cause of action were not proven as a matter of law and that there was no evidence to support submission of claim to jury "are shotgun objections which do not meet *Rule 51*'s specificity requirement").

Defendant argues that it did object to the charge on relevant submarket and contends that it took action at trial to sufficiently apprise the district court of these grounds. Defendant points to (1) its objection at the conference on instructions, set out below, where it objected to any submission of the market question to the jury; (2) its proposed instruction on market definition, which did not include instructions relating to submarkets; and (3) the argument made both in its trial memorandum and in its motion for a directed **[**9]** verdict that the relevant market, as a matter of law, could not be limited to Aspen, "and, *implicitly*, that there can be only one *relevant* market." Reply Brief of Defendant-Appellant, Cross-Appellee, at 2-3 (earlier emphasis added, later emphasis in original).

We note that at the conference in the district judge's chambers, during which both sides made their objections to the trial court's proposed instructions, counsel for the defendant made only the following objection to the relevant market instruction:

> Your Honor, Defendants would object to the instruction concerning relevant market contained on pages 16 through 18 of the instructions. While the defendants recognize that there is case authority supporting the submission of the relevant market -- the relevant market question to the jury, we believe that on the record established in this case that the market definition of both the product market and the geographic market should be decided as a matter of law and should not be submitted to the jury.

XIV R. 2290. [4]

---

[4] The determination of the relevant market is generally a question of fact. *See* *Telex Corp. v. IBM, 510 F.2d 894, 915* (10th Cir.) (per curiam), *cert. dismissed*, ***423 U.S. 802, 96 S. Ct. 8, 46 L. Ed. 2d 244 (1975)***; *see also* *Borough of Lansdale v. Philadelphia Electric Co., 692 F.2d 307, 311 (3d Cir. 1982)*; *Pinder v. Hudgins Fish Co., 570 F.2d 1209, 1220-21 (5th Cir. 1978)*; *Sulmeyer v. Coca Cola Co., 515 F.2d 835, 839 (5th Cir. 1975)*, *cert. denied*, ***424 U.S. 934, 47 L. Ed. 2d 341, 96 S. Ct. 1148 (1976)***; ABA Antitrust Section, ***Antitrust Law*** *Developments* 110-11 (2d ed. 1984). On that fact question, the defendant raises no issue in this appeal. Defendant concedes that "the evidence supporting the jury's findings on market definition is irrelevant because this appeal does not present any issue as to the sufficiency of that evidence." Reply Brief of Defendant-Appellant, Cross-Appellee, at 7 n.3 (citation omitted).

[10]** A few pages later in the record of the conference on instructions, the judge **[*1515]** said she would make one other comment concerning the defendant's request that the court rule as a matter of law on the question of the relevant market; that if she were to rule as a matter of law on the relevant market, she would rule that "the relevant market was Aspen and that the relevant product market was down-hill skiing services;" that after hearing defendant's witnesses she thought there was enough factual contest for the question to go to the jury; and that her not ruling as a matter of law was actually better for the defendant. XIV R. 2292. At that point defendant's counsel said: "Just so the record is clear, *our argument is that you should rule as a matter of law in our favor on that issue*." *Id. at 2292* (emphasis added). We feel this part of the record shows the intent of the defendant's objection to the market instructions and that it was not an objection directed to the form of the market and submarket portion of the charge, but was rather that the issue was for the court alone to decide.

Further, as noted the defendant did argue for a directed verdict on the theory **[**11]** that the evidence showed a larger market than just this Aspen area. IX R. 1450. And defendant says that its proposed instructions 13 through 16 "excluded any instruction on submarkets." Reply Brief of Defendant-Appellant, Cross-Appellee, at 2. The proposed instructions on product and geographic market are general statements on the tests for the jury to follow, they state detailed tests on both product and geographic market, and make no reference to any submarkets. I Supp. R. 87-90.

We cannot agree that these statements and objections relied on stated "distinctly the matter to which [defendant] objects and the grounds of [its] objection," *Fed.R.Civ.P. 51*, so as to amount to a proper objection to the market and submarket formulation in the charge. We long have held that ***HN3***[] the offering of a proposed instruction does not preserve a challenge to the court's instructions under *Rule 51*, absent a specific objection. *See, e.g., Western Transmission Corp. v. Colorado Mainline, Inc., 376 F.2d 470, 474 (10th Cir. 1967)*; *Justheim Petroleum Co. v. Hammond, 227 F.2d 629, 635 (10th Cir. 1955)*; *Jones v. Koma, 218 F.2d 530, 531-32 (10th Cir. 1955)*; *see also Johnson v. Houser* ***[**12]*** *, 704 F.2d 1049, 1051 (8th Cir. 1983)* ("The mere tender of an alternative instruction without objecting to some specific error in the trial court's charge or explaining why the proferred instruction better states the law does not preserve the error for appeal."). In the instant case, we cannot agree that defendant adequately apprised the district court of the grounds on which it now challenges the instructions given. As we stated in a similar context, "the trial judge cannot be held to the standard of omniscience apparently envisioned by defendant[]." *Corriz, supra, 667 F.2d at 896*; *cf.* *Sunkist v. Winckler & Smith Co., 370 U.S. 19, 26-27, 8 L. Ed. 2d 305, 82 S. Ct. 1130 (1962)* (when counsel made objections at conference on instructions before charge was given and requested instructions on basis of objections, and after charge counsel was told all prior objections would be preserved, waiver did not occur in light of that assurance and prior objections and requests). We are persuaded that the record shows no proper and timely objection on the ground that the market and submarket part of the charge was erroneous.

Defendant says that if we do not agree that a proper objection **[**13]** was made on this ground, then we should consider the point as plain error that generated a miscarriage **[*1516]** of justice. Reply Brief of Defendant-Appellant, Cross-Appellee, at 3-4. However, ***HN4***[] where an objection to an instruction is not made before the jury retires for deliberation, we only review an instruction that is "patently plainly erroneous and prejudicial." *See Moe v. Avions Marcel Dassault-Breguet Aviation, 727 F.2d 917, 925 (10th Cir. 1984)*; *Fiedler v. McKea Corp., 605 F.2d 542, 548 n.1 (10th Cir. 1979)*. ***HN5***[] In a civil case only rarely will we review an error in the instructions when no specific objection was made. *E.g., Glasscock v. Wilson Constructors, Inc., 627 F.2d 1065, 1067-68 (10th Cir. 1980)*; *Fabian v. E.W. Bliss Co., 582 F.2d 1257, 1260 (10th Cir. 1978)*; 9 C. Wright & A. Miller, *supra*, § 2558, at 672 ("actual reversals on basis of plain error are rare"). We have said that ***HN6***[] a new trial should be ordered in the absence of an objection below if an error in the instructions resulted in a "miscarriage of justice," [5] and we

---

[5] *See* *Brown v. McGraw-Edison Co., 736 F.2d 609 n.6 (10th Cir. 1984)*; *Fox v. Ford Motor Co., 575 F.2d 774, 786 (10th Cir. 1978)*.

review instructions to which proper objection was not made only if they are "patently plainly erroneous and prejudicial." [6] **[**14]**

[15]** We cannot say that the district court's instructions on the relevant market resulted in a "miscarriage of justice" or were "patently plainly erroneous and prejudicial." Courts repeatedly have cautioned that ***HN7***[] the plain error exception is limited to exceptional cases where the error "has seriously affected the fairness, integrity or public reputation of judicial proceedings." *Rowe International, Inc. v. J-B Enterprises, Inc., 647 F.2d 830, 835 (8th Cir. 1981)*; *see also* *Morris v. Getscher, 708 F.2d 1306, 1309 (8th Cir. 1983)*; *Dunn v. Sears, Roebuck & Co., 639 F.2d 1171, 1176* (5th Cir.), *modified on other grounds*, *645 F.2d 511, 513 (5th Cir. 1981)*; *Whiting v. Jackson State University, 616 F.2d 116, 126 (5th Cir. 1980)*; 9 C. Wright & A. Miller, *supra*, § 2558, at 675 ("If there is to be a plain error exception to *Rule 51* at all, it should be confined to the exceptional case where the error has seriously affected the fairness, integrity, or public reputation of judicial proceedings."). The instructions here were not "hopelessly confusing" [7] and did not fail "to provide even the barest legal guideposts to aid the jury in rationally reaching a decision." [8] Accordingly, **[**16]** the plain error exception to *Rule 51* should not be applied to upset the verdict here.

In sum, we hold that defendant's attack on the relevant market instruction is not premised on a proper objection and that the circumstances do not justify setting aside the verdict and judgment on grounds not raised below.

II

Monopolization

Defendant **[**17]** argues that "there was insufficient evidence to present a jury issue of monopolization because, as a matter of law, **[*1517]** the conduct at issue was pro-competitive conduct that a monopolist could lawfully engage in." Brief of Defendant-Appellant, Cross-Appellee, at 40. Defendant essentially reasons that plaintiff articulated six ways in which defendant's conduct allegedly constituted monopolization, and that none of these created an issue for the jury because none were anti-competitive.

In closing argument, plaintiff's counsel argued that defendant used its power "to deliberately exclude [plaintiff] from a substantial portion of the destination skier visits beginning in the 1977-'78 season, by doing six things:" (1) forcing plaintiff out of the four-area ticket by requiring that revenues be divided below plaintiff's market share; (2) substituting defendant's three area ticket for a four area ticket; (3) marketing and advertising its three mountains in a manner designed to convince consumers that Aspen had only three mountains, not mentioning Aspen Highlands; (4) making an agreement with a tour operator to sell defendant's tickets to the exclusion of plaintiffs; (5)

---

[6] See *Brown v. McGraw-Edison Co., 736 F.2d 609 n.6 (10th Cir. 1984)*; *Moe v. Avions Marcel Dassault-Breguet Aviation, 727 F.2d 917, 924 (10th Cir. 1984)*; *cf.* *Scholz Homes, Inc. v. Wallace, 590 F.2d 860, 864 (10th Cir. 1979)* ("plain and fundamental error").

We have also said that an error in an instruction to which there was no objection may be plain error if it was a "generating factor which culminated in a verdict not warranted under the law." *Herndon v. Seven Bar Flying Service, Inc., 716 F.2d 1322, 1330 (10th Cir. 1983)*, *cert. denied*, ***466 U.S. 958, 80 L. Ed. 2d 553, 104 S. Ct. 2170, 52 U.S.L.W. 3791 (1984)***; *see also* *Fox v. Ford Motor Co., 575 F.2d 774, 786 (10th Cir. 1978)*; *Pridgin v. Wilkinson, 296 F.2d 74, 76 (10th Cir. 1961)*. We understand this to be merely a component of the inquiry whether the instruction was "patently plainly erroneous and prejudicial," or to have caused a "miscarriage of justice."

[7] *Frederic P. Wiedersum Associates v. National Homes Construction Corp., 540 F.2d 62, 66 (2d Cir. 1976)*.

[8] *McNello v. John B. Kelly, Inc., 283 F.2d 96, 102 (3d Cir. 1960)* (*quoted in* *Frederic P. Wiedersum Associates, supra, 540 F.2d at 66*); *see also* *Morris v. Getscher, 708 F.2d 1306, 1309-10 (8th Cir. 1983)* (instruction constituted plain error when it "provided the jury with virtually no guidance" and "essentially allowed the jury to arrive at a verdict through speculation or conjecture"); *Cruthirds v. RCI, Inc., 624 F.2d 632, 636 (5th Cir. 1980)* (instruction that left "jury to speculate as to an essential point of law" was plain error).

refusing **[**18]** to accept plaintiff's coupons during the 1978-79 season; and (6) raising ticket prices for a single-day lift ticket thus eliminating plaintiff's ability to offer a multi-area ticket. [9]

[19]** A. *Waiver*

In response to defendant's attack on plaintiff's six theories, plaintiff contends that defendant's argument "is largely a legal one," and because defendant failed to object to the instruction on monopolization, it is the law of the case. The thrust of plaintiff's argument is that defendant has waived its opportunity to challenge the sufficiency of the evidence under legal principles different from those announced in the instructions.

Defendant challenges the first, second, fifth and sixth theories reasoning that their validity hinges on whether defendant had a duty to cooperate with plaintiff, and that as a matter of law no such duty could have existed. *See* Brief of Defendant-Appellant, Cross-Appellee, at 42, 47, 56, 58. We agree that the validity of the above four theories is premised on the theory of a duty to cooperate. And we agree that defendant has preserved the right to challenge the sufficiency of the evidence of this theory to support the verdict.

Defendant moved for a directed verdict on two occasions. Each time it urged that there was no duty to cooperate. II App. 427-29; *id. at 561-63* (renewed motion for directed verdict incorporating **[**20]** arguments made at close of plaintiff's case). This preserved defendant's opportunity to challenge the sufficiency of the evidence on that issue under the truly controlling law, regardless of defendant's failure to object to the jury instructions concerning a duty to cooperate. The Fifth, Seventh and Eighth Circuits have held that **[*1518]** ***HN8***[] "[a] proper motion for a directed verdict and its denial will always preserve for review the question whether *under the law truly applicable to the case* there was an adequate evidentiary basis for the submission of the case to the jury." *Coca-Cola Bottling Co. v. Hubbard, 203 F.2d 859, 862 (8th Cir. 1953)* (emphasis added); *see also* *Dual Manufacturing & Engineering, Inc. v. Burris Industries, Inc., 619 F.2d 660, 662-63* (7th Cir.) (en banc), *cert. denied*, *449 U.S. 870, 66 L. Ed. 2d 90, 101 S. Ct. 208 (1980)*; *Mid-America Food Service v. ARA Services, Inc., 578 F.2d 691, 696 n.4 (8th Cir. 1978)*; *House of Koscot Development Corp. v. American Line Cosmetics, Inc., 468 F.2d 64, 65-66 (5th Cir. 1972)*; *Johnson v. United States, 434 F.2d 340, 343 (8th Cir. 1970)*; *Gorsalitz v. Olin Mathieson Chemical Corp., 429 F.2d 1033, **[**21]** 1040 n.5 (5th Cir. 1970)*; *Hanson v. Ford Motor Co., 278 F.2d 586, 593 (8th Cir. 1960)*. Thus, ***HN9***[] "in determining whether a trial court has erred in denying a motion for a directed verdict . . ., it is the applicable law that is controlling, and not what the trial court announces the law to be in his [or her] instructions." *Dual Manufacturing & Engineering, Inc. v. Burris Industries, Inc., 619 F.2d 660, 663* (7th Cir.) (en banc) (quoting *Coca-Cola Bottling v. Hubbard, supra, 203 F.2d at 862*), *cert. denied*, *449 U.S. 870, 66 L. Ed. 2d 90, 101 S. Ct. 208 (1980)*. Therefore we will consider the validity of the theory that defendant had a duty to cooperate or deal with plaintiff in these circumstances.

B. *Duty to cooperate or duty to deal*

---

[9] In its brief, defendant quotes the following passage from plaintiff's closing argument:

> The evidence has also shown that the Aspen Skiing Corporation, Buttermilk Skiing Corporation, and Snowmass Skiing Corporation together used that power to deliberately exclude Highlands from a substantial portion of the destination skier visits beginning in the 1977-'78 season by doing six things: (1) Imposing a condition that revenue must be divided on the four-area ticket based upon a fixed percentage substantially below the Aspen Highlands' market share previously realized, and to do so, to force Aspen Highlands out of the four area ticket; [2] as part of that, substituting their own three-area, six-day ticket which was provided in place of the four-area ticket and also provided for revenues being divided on the basis of usage; (3) marketing and advertising the Aspen resort in such a manner as to convince the newcomer to Aspen that Aspen only had three mountains rather than four mountains; (4) entering into special agreements with ARI, Aspen Reservations, Inc., the tour operator, for the purpose of inducing ARI, to sell Aspen Skiing Corporation tickets to the exclusion of Aspen Highlands' tickets; (5) refusing to accept Aspen Highlands Adventure Pack coupons during the '78-'79 season, again making it more difficult for Aspen Highlands to compete in the Aspen market; and (6) using their power to raise the individual daily lift ticket price this last year to $22, to completely eliminate Aspen Highlands' ability to offer a multi-area ticket in the Aspen market.

See Brief of Defendant-Appellant, Cross-Appellee, at 41; XIII R. 2214-15.

We must decide whether under the truly applicable law there was sufficient evidence for the jury to conclude that defendant's refusal to market a four-mountain ticket, together with defendant's other conduct, constituted monopolization in violation of *§ 2* as a refusal to cooperate, sometimes referred to as a refusal to deal. [10] Defendant replies that this case is not one where any such duty exists, arguing that such a duty can **[**22]** arise only in different circumstances where, through vertical integration, one firm has come to monopolize or control the supply of a component necessary for production, distribution or sale of a rival's product or service. [11] **[*1519]** Brief of Defendant-Appellant, Cross-Appellee, at 44 n.32; Reply Brief of Defendant-Appellant, Cross-Appellee, at 13-14.

[23]** The instances in which a monopolist has a duty to cooperate or deal is one of the most "unsettled and vexatious" issues in ***antitrust law***. *Byars v. Bluff City News Co., Inc., 609 F.2d 843, 846 (6th Cir. 1980)*. "There exist two conceptually similar lines of cases which impose a duty to deal upon a monopolist." *Id. at 855*; *see also MCI Communications v. AT & T, 708 F.2d 1081, 1148* (7th Cir.) *cert. denied*, *464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)*. [12] First, there is ***HN10***[] the so-called essential facilities or bottleneck doctrine. "Under this

---

[10] We are mindful that one of the damage years was 1977-78, and that a four-area ticket was offered in that year. We discuss the antitrust injury attributable to this year in *infra* Part III.

[11] Defendant relies on Areeda & Turner, who state that "in general, the monopolist is under no duty to help his rivals enter, survive, or expand." 3 P. Areeda & D. Turner, ***Antitrust Law*** para. 738m, at 286 (1978). Defendant says that while an exception must be made for bottleneck cases where through vertical integration a firm has come to monopolize or control a component essential for a rival's survival, the "so-called 'bottleneck' cases are inapplicable here, however, because there is no claim that [defendant] is vertically integrated, or that it is the sole supplier of some component without which [plaintiff] absolutely cannot bring its product (here, service) to the market." Brief of Defendant-Appellant, Cross-Appellee, at 44-45 n.32. We reject defendant's argument.

We are not convinced that the essential touchstone of bottleneck cases is vertical integration. *See, e.g.*, P. Areeda & D. Turner, ***Antitrust Law*** para. 728b4, at 231 (1978) ("Of course, the nonintegrated monopolist. An integrated monopolist cannot engage in refusals to deal tending unreasonably to exclude actual or potential rivals from his monopoly market."); L. Sullivan, *Handbook of the Law of Antitrust* § 48, at 131 (1977) ("As a matter of policy, to require the monopolist [with a natural advantage monopoly, but without a vertical link to the customer level] to treat all like firms in the same way -- to have, one might say, a rational and relevant basis for any distinctions it may make -- is to protect vertically related and adjacent markets from being distorted because of arbitrary decisions by the monopolist.").

We decline to adopt a narrow rule that would immunize an unintegrated monopolist from antitrust liability for refusing a competitor access to an essential facility in these circumstances. Vertical integration is not essential to finding a violation of the antitrust laws for a refusal to deal under the intent test. *See, e.g., Lorain Journal Co. v. United States, 342 U.S. 143, 96 L. Ed. 162, 72 S. Ct. 181 (1951)*. We believe that it is also apparent that no bright line can be drawn between the bottleneck and intent cases. *See infra* note 13. Given this, and the need for a fact sensitive inquiry in this area, *e.g., Byars v. Bluff City News, Inc., 609 F.2d 843, 860 (6th Cir. 1980)* (courts should "carefully analyze[] the fact situation before them to see whether defendants' conduct was anti-competitive . . . in a case where there is a unilateral refusal-to-deal by a monopolist"), we conclude in the circumstances of this case that the bottleneck doctrine is applicable.

[12] ***HN11***[] There are two elements to the offense of monopolization under *§ 2* of the Sherman Act. The first is "the possession of monopoly power in the relevant market." The second is "the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell, Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*; *see also MCI Communications v. AT & T, 708 F.2d 1081, 1106* (7th Cir.), *cert. denied*, ***464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)***; *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263 (2d Cir. 1979)*, *cert. denied*, ***444 U.S. 1093, 100 S. Ct. 1061, 62 L. Ed. 2d 783 (1980)***. Of course, the fact of injury and damages suffered by reason of a violation of the antitrust laws must also be shown for a private litigant to recover on a claim of monopolization. *E.g., Central National Bank v. Rainbolt, 720 F.2d 1183, 1187 (10th Cir. 1983)*. The essentials of these elements were covered by the trial court's instructions. XIV R. 2304.

Defendant's challenge to the sufficiency of the evidence assumes, *arguendo*, that Aspen is the relevant market and that defendant had monopoly power in that market. *See* Brief of Defendant-Appellant, Cross-Appellee, at 40. Reply Brief of Defendant-Appellant, Cross-Appellee, at 7 n.3 (defendant's "appeal does not present any issue as to the sufficiency of [the] approach, a business or group of businesses which controls a scarce facility has an obligation to give competitors reasonable access to it." Byars, supra, 609 F.2d at 856 & n.34 (citing Associated Press v. United States, 326 U.S. 1, 89 L. Ed. 2013, 65 S. Ct. 1416 (1945) (Associated Press enjoined from continuing its practice of refusing to furnish its service to its members' competitors); United States v. Terminal Railroad Association, 224 U.S. 383, 56 L. Ed. 810, 32 S. Ct. 507 (1912) (railroad companies jointly owning a terminal facility that was only feasible facility when coming to city from west must make **[**24]** facility available to non-proprietor railroads on non-discriminatory reasonable terms); Gamco, Inc. v. Providence Fruit & Produce Bldg., Inc., 194 F.2d 484 (1st Cir.) (fruit wholesalers who jointly own a warehouse may not exclude competing wholesaler, absent some justification), *cert. denied*, *344 U.S. 817, 73 S. Ct. 11, 97 L. Ed. 636 (1952))*.

[25]** Second, in various contexts courts have employed ***HN12***[] an intent test under which a "business is free to deal with whomever it pleases so long as it has no 'purpose to create or maintain a monopoly.'" Byars, supra, 609 F.2d at 855 (quoting United States v. Colgate & Co., 250 U.S. 300, 307, 63 L. Ed. 992, 39 S. Ct. 465 (1919)); *see also* MCI, supra, 708 F.2d at 1148. "These cases focus on the intent and competitive effect of the refusal to deal; not on whether the facility itself is 'essential.'" MCI, supra, 708 F.2d at 1148 (citing Lorain Journal Co. v. United States, 342 U.S. 143, 96 L. Ed. 162, 72 S. Ct. 181 (1951) (newspaper publisher enjoined from refusing to accept advertisements from customers who advertised with competing radio station); Eastman Kodak Co. v. Southern Photo Materials Co., 273 U.S. 359, 71 L. Ed. 684, 47 S. Ct. 400 (1927) (permissible for jury to infer that defendant's refusal to sell to plaintiffs was in pursuance of purpose to monopolize); United States v. Colgate & Co., 250 U.S. 300, 63 L. Ed. 992, 39 S. Ct. 465 (1919) (absent any purpose to create or maintain monopoly, Sherman Act does not restrict manufacturer's right to refuse to deal)). **[**26]**

We recognize that the cases do not fit neatly into these two categories. There **[*1520]** is a significant amount of overlap between them. [13] **[**27]** Nevertheless the dichotomy, though in part illusory, is a useful analytical tool. [14] On this record we conclude that both groups of cases apply and support the judgment here. [15]

---

evidence" on "the jury's findings on market definition"). Thus, the first element under *Grinnell* necessary to establish a § 2 violation is not at issue.

[13] The overlap of the essential facilities doctrine and the intent test is "apparent upon examination of Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)." Byars, supra, 609 F.2d at 857. In *Otter Tail*, the defendant was a vertically integrated power company. It had the capacity to produce power and transmit it over its own lines to municipalities, where it could sell the power at retail prices. When municipalities sought to replace the defendant at the retail level, defendant refused to sell power to the municipalities.

Relying on both the intent test and the bottleneck theory, the district court found that this refusal to deal violated the antitrust laws. United States v. Otter Tail Power Co., 331 F. Supp. 54, 61 (D. Minn. 1971). The Supreme Court in its brief analysis did not distinguish between the two theories. Otter Tail, supra, 410 U.S. at 377-79; *see also* Byars, supra, 609 F.2d at 857. The Court held that the district court's finding "that Otter Tail's refusal to sell at wholesale or to wheel were solely to prevent municipal power systems from eroding its monopolistic position" was supported. Otter Tail, supra, 410 U.S. at 378.

For other cases discussing a duty to deal but not distinguishing between the essential facilities doctrine and the intent test, see, e.g., Home Placement Service v. Providence Journal Co., 682 F.2d 274, 281 (1st Cir. 1982), *cert. denied*, *460 U.S. 1028, 103 S. Ct. 1279, 75 L. Ed. 2d 500 (1983)*; Mid-Texas Communications, Inc. v. AT & T, 615 F.2d 1372, 1387-88 & n.12 (5th Cir.) ("While in theory there exist differences between the two approaches, in practice the theories are similar."), *cert. denied*, ***449 U.S. 912, 101 S. Ct. 286, 66 L. Ed. 2d 140 (1980)***.

[14] Only general intent, not specific intent, is necessary to a finding of a § 2 violation of monopolization. *See* Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 626, 97 L. Ed. 1277, 73 S. Ct. 872 (1953); United States v. Griffith, 334 U.S. 100, 105-06, 92 L. Ed. 1236, 68 S. Ct. 941 (1948). *But see* Byars v. Bluff City News Co., Inc., supra, 609 F.2d at 859. "While the completed offense of monopolization under § 2 demands only a general intent to do the act, 'for no monopolist monopolizes unconscious of what he is doing,' a specific intent to destroy competition or build monopoly is essential to guilt for the mere attempt now charged." Times-Picayune Co., supra, 345 U.S. at 626.

[28]** (1). *Essential facilities (or bottleneck)*

The essential facilities or bottleneck doctrine has been applied in a variety of circumstances. In *Terminal Railroad*, the defendant railroads jointly owned the only feasible terminal for rail traffic coming to St. Louis from the west. The Court decreed that in the special circumstances of the terminal and bridge facilities, the railroad companies and terminal company should provide reasonable access to the facility for competing railroads. *Terminal Railroad, supra, 224 U.S. at 411*. In *MCI Communications v. AT & T, supra, 708 F.2d at 1133*, the doctrine was applied where the competing defendant system controlled access to the communications facility essential to operation of its competitor. The Seventh Circuit identified ***HN13***[] four elements necessary to establish liability under the essential facilities doctrine: (1) control of the essential facility by a monopolist; (2) a competitor's inability to duplicate the facility; (3) denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility. *MCI, supra, 708 F.2d at 1132-33*. Evidence was presented on these factors here.

First, there **[**29]** is no dispute that defendant controlled three of the four skiing mountains in the Aspen area. If defendant refuses to market a multi-day multi-mountain ticket with plaintiff, plaintiff cannot compete in the market for such tickets. Yet, defendant through its control of three of the four mountains can continue to offer such a ticket. We believe this is sufficiently analogous to *Terminal Railroad* to satisfy **[*1521]** the element of control of an essential facility. Second, there was evidence concerning the difficulty of developing another ski area in Aspen due to regulatory restrictions, and delays, and the expense and time required to develop new mountains. *E.g.*, IV R. 377-79; VI R. 790-91; XII R. 2079-82. Third, there is no dispute that defendant denied the use of the "facility" to plaintiff. Defendant admits that it refused to continue to market a joint ticket with plaintiff. *See* Brief of Defendant-Appellant, Cross-Appellee, at 42-48. Fourth, there was evidence that it was feasible for defendant to provide access to the "facility." Prior to this litigation, plaintiff and defendant had marketed a joint multi-day multi-mountain ticket. There was testimony that **[**30]** defendant refused to accept coupons from plaintiff's Adventure Pack, although the coupons were at least as convenient as checks and credit cards. III R. 330-31.

We are not convinced by defendant's arguments based on its restrictive analysis that this is not a case of a vertical integration bottleneck. The substance of an essential facilities case was made. We must remember that ***HN14***[] this issue is raised by a claim of error in the denial of defendant's motion for a directed verdict and for judgment n.o.v. In that connection we must view the evidence most favorably to the party against whom the motion is made, and give that party the benefit of all reasonable inferences. *See, e.g., Hurd v. American Hoist and Derrick Co., 734 F.2d 495 (10th Cir. 1984)*; *Yazzie v. Sullivent, 561 F.2d 183, 188 (10th Cir. 1977)*. We hold that in these circumstances there was sufficient proof to sustain the verdict on the basis of a duty to deal or cooperate, and wrongful refusal to deal.

(2). *Intent*

We likewise feel there was sufficient evidence for a finding against defendant on the basis that defendant's intent in refusing to market a multi-day multi-mountain ticket with plaintiff **[**31]** was to "create or maintain a monopoly." *Colgate, supra, 250 U.S. at 307*. [16] By refusing to cooperate with plaintiff, defendant became the only business in

---

[15] Defendant relies on *Telex Corp. v. IBM, 510 F.2d 894, 926* (10th Cir.) (per curiam), *cert. dismissed*, ***423 U.S. 802, 96 S. Ct. 8, 46 L. Ed. 2d 244 (1975)***, for the proposition that its marketing of a three-mountain ticket was one of the "ordinary marketing methods available to all in the market," and therefore could not violate *§ 2* of the Sherman Act. Brief of Defendant-Appellant, Cross-Appellee, at 48.

We need not decide that it was or would be illegal to offer a three-mountain ticket in competition with the four-mountain ticket. We believe that all of the evidence should be examined together, and we do not consider defendant's marketing of a three-area ticket in isolation from its other conduct. *See infra* note 18.

[16] Defendant argues that "the verdict cannot be construed as based on a finding that [defendant's] refusal to cooperate was intended, or was motivated by a purpose or desire, to achieve or maintain monopoly power" because the trial court "instructed the jury that no such finding was necessary." Brief of Defendant-Appellant, Cross-Appellee, at 47 n.34. We must reject defendant's argument.

Aspen that could offer a multi-day multi-mountain skiing experience. This is an important factor to attract Aspen skiers who seek variety. I App. 191, 243. There was evidence that defendant refused to offer a four mountain ticket, despite skiers' frustration over its unavailability. II App. 525-33.

[32]** To compete with defendant's three-mountain ticket, plaintiff developed an "Adventure Pack." This was a six day ticket designed to permit skiers to ski three of the six days at defendant's mountains. To do this, plaintiff included vouchers in the packet that theoretically were negotiable at defendant's ticket windows. Although there was evidence that these vouchers were guaranteed by a bank, and easier to **[*1522]** accept than checks or charge cards, defendant refused to accept them. III R. 328-35. After plaintiff modified its Adventure Pack to eliminate any of defendant's objections, IV R. 504-05, defendant raised the price of its single-day ticket to $22.00, thereby making it unprofitable for plaintiff to market its Adventure Pack. IV R. 534-35; IX R. 1424-25.

We hold that there was sufficient evidence for the jury to conclude that defendant's refusal to market a four-mountain ticket, [17] **[**33]** considered together with its other conduct, showed its intent to create or maintain a monopoly and thus a violation of *§ 2*. [18]

There was no proper or timely objection to the formulation of the intent instruction, as required by *Rule 51*. *Fed. R. Civ. P. 51*. Moreover, the charge correctly stated that "willfully as used in these instructions means acting knowingly and deliberately, but it does not mean that [defendant] must have specifically intended to achieve or maintain monopoly power." XIV R. 2310. Under *§ 2* general intent is all that is required to support a monopolization claim; only for a mere attempt to monopolize is specific intent required to be shown. *E.g., Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 626, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)*; *United States v. Griffith, 334 U.S. 100, 105-06, 92 L. Ed. 1236, 68 S. Ct. 941 (1948)*; *Home Placement Service v. Providence Journal Co., 682 F.2d 274, 281 (1st Cir. 1982)*, *cert. denied*, ***460 U.S. 1028, 103 S. Ct. 1279, 75 L. Ed. 2d 500 (1983)***; *see also Bank of Utah v. Commercial Security Bank, 369 F.2d 19, 26 (10th Cir. 1966)*, *cert. denied*, ***386 U.S. 1018, 18 L. Ed. 2d 456, 87 S. Ct. 1374 (1967)***. *But see Byars v. Bluff City News Co., 609 F.2d 843, 859 (6th Cir. 1980)*. The trial judge was instructing the jury as to the elements of the offense of monopolization, not an attempt to monopolize, and she properly instructed that specific intent was not an element of that offense.

[17] The trial judge's charge referred to the duty to cooperate with a business rival and said that a refusal to deal with a competitor "does not violate *Section 2* if valid business reasons exist for that refusal." XIV R. 2311.

[18] Defendant argues that each of the "six things" on which plaintiff relied to demonstrate that it was deliberately excluded from the destination skier market must be supported by sufficient evidence to support a *§ 2* verdict. *See supra* note 9. Defendant reasons that if we "uphold[] the legal sufficiency and proof of one or more, but not all, of [plaintiff's] theories, then [defendant] is entitled to a new trial." Brief of Defendant-Appellant, Cross-Appellee, at 59-60.

Defendant relies on *Northeastern Telephone Co. v. AT & T, 651 F.2d 76 (2d Cir. 1981)*, *cert. denied*, ***455 U.S. 943, 102 S. Ct. 1438, 71 L. Ed. 2d 654 (1982)*** for the above proposition. In *Northeastern*, the Second Circuit reversed and held that plaintiff failed to prove five of the six types of conduct it alleged were anti-competitive. Because the interrogatories submitted to the jury did not permit the court to determine whether the jury based its damage award on any of the five types of conduct that plaintiff had failed to prove were anti-competitive, the Second Circuit remanded for a new trial. We cannot agree that each one of the "six things" which plaintiff argued demonstrated abuse of monopoly power, taken alone, must be supported by sufficient evidence to find a *§ 2* violation. We reach this conclusion for two reasons.

First, defendant's argument would require that we view each of the "six things" in isolation. To do this, however, would be contrary to the Supreme Court's admonition that an antitrust plaintiff "should be given the full benefit of [its] proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each." *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962)*; *see also Associated Press v. United States, supra, 326 U.S. at 14*; *Northeastern Telephone v. AT & T, supra, 651 F.2d at 95 n.28* (recognizing rule in *Continental Ore* but distinguishing it where proof was "utterly lacking" in "numerous critical respects"); *Case- Swayne Co. v. Sunkist Growers, Inc., 369 F.2d 449, 459 (9th Cir. 1966)*, *cert. denied*, *387 U.S. 932, 18 L. Ed. 2d 994, 87 S. Ct. 2056*, *rev'd on other grounds*, *389 U.S. 384, 19 L. Ed. 2d 621, 88 S. Ct. 528 (1967)*; *GVF Cannery, Inc. v. California Tomato Growers Association, Inc., 511 F. Supp. 711, 716 (N.D. Cal. 1981)*. Plaintiff's evidence should be viewed as a whole. Each of the "six things" viewed in isolation need not be supported by sufficient evidence to amount to a *§ 2* violation. It is enough that taken together they are sufficient to prove the monopolization claim.

[34]** III

Injury

Defendant argues that even assuming that it abused its monopoly power, plaintiff cannot recover because it has failed to establish that defendant's unlawful conduct **[*1523]** caused plaintiff injury in its business or property. Such injury is an essential element that plaintiff must prove to recover under the antitrust laws. *E.g.,* *Central National Bank v. Rainbolt, 720 F.2d 1183, 1187 (10th Cir. 1983)*; *Mountain View Pharmacy v. Abbott Laboratories, 630 F.2d 1383, 1389 (10th Cir. 1980)*; *World of Sleep, Inc. v. Stearns & Foster Co., 525 F.2d 40, 43-44 (10th Cir. 1975)*. Plaintiff's damage evidence covered four skiing seasons -- 1977-78 through 1980-81 -- and included expert testimony on such damages with estimates ranging from $3,162,100 to $4,708,600. *See, e.g.*, Plaintiff's Exhibit 101.

Defendant reasons that plaintiff sought to show that its business would have been more profitable if defendant had agreed to market a four-mountain ticket and had not marketed its own three-mountain ticket; that the only evidence that plaintiff relied on to show this was that of its expert, Mr. Farwell; and that this testimony should have been excluded because **[**35]** it was grounded on two false assumptions. *See* Brief of Defendant-Appellant, Cross-Appellee, at 60-62; Reply Brief of Defendant-Appellant, Cross-Appellee, at 15-16. We reject defendant's argument for two independent reasons.

First, there was sufficient evidence of injury, other than Farwell's testimony, to sustain the jury verdict. For example, plaintiff's president and owner, II R. 149, testified that plaintiff was "severly damaged" by defendant's refusal to market a four-mountain ticket. III R. 197; *see also id. at 195*. Plaintiff's financial vice president, IX R. 1374, testified that elimination of the four-mountain ticket had the effect of a loss of revenues during the 1978-79, 1979-80, and 1980-81 skiing seasons; he made projections assuming that plaintiff's "slice of the pie" would stay the same and made a rough estimation of a 50-60% loss attributable to the marketing practices of defendant. IX R. 1386-91, 95. He also testified that as a result of eliminating the four-mountain ticket, plaintiff became "a day ski area in a destination market." IX R. 1425. Moreover, there was testimony that because of the elimination of the four-mountain ticket plaintiff had to **[**36]** decrease the number of its ski patrolmen. IV R. 477. There was sufficient evidence for the jury to conclude that plaintiff proved that it was injured by defendant's unlawful conduct.

Second, we reject defendant's argument that the testimony and exhibits of plaintiff's expert [19] were grounded on two false assumptions, and therefore were inadmissible. Defendant says that the validity of the expert testimony "depended explicitly on two indispensable assumptions: (1) that [plaintiff's] ski areas and those of [defendant] 'are equally desirable in the mind of the consumer,' and, (2) that [defendant] would not offer its own 3-area 6-day ticket

---

Second, defendant never objected to the instructions that required the jury to consider the evidence as a whole. XIV R. 2295 (jury instruction); XIV R. 2290-92 (defendant's objections to instructions). In fact, the trial judge instructed that the plaintiff is "not required to prove every one of its allegations about anti-competitive conduct. Once again, you have a problem for judgment, for thorough and sensitive weighing of the evidence." XIV R. 2213-14. Moreover, defendant did not submit more specific interrogatories that would have required the jury to make the grounds for its decision clear. I R. 143-45 (defendant's special interrogatories on monopolization). In these circumstances, we should uphold the general verdict if the proof on various theories is sufficient to sustain the general verdict. *See, e.g.,* *Union Pacific Railroad Co. v. Lumbert, 401 F.2d 699, 701 (10th Cir. 1968)* (absent pertinent objection to charge or request for specific interrogatory, a general verdict is upheld where there is substantial evidence supporting any ground of recovery in favor of an appellee); *see also* ***Malandris v. Merrill Lynch, Pierce, Fenner & Smith Inc., 703 F.2d 1152, 1176-77 n.20 (10th Cir. 1981)***, (en banc) (plurality opinion), *cert. denied*, ***464 U.S. 824, 104 S. Ct. 92, 78 L. Ed. 2d 99 (1983)***; *Comins v. Scrivener, 214 F.2d 810, 814 (10th Cir. 1954)*. In the instant case, we hold that there is sufficient evidence to find that defendant had a duty to cooperate in marketing a four-mountain ticket, and that its refusal to do so, considered together with its other acts, supported the finding of monopolization.

[19] Plaintiff's expert was Ted Farwell of Boulder, Colorado. Mr. Farwell was a ski area planner, consultant and appraiser, with a bachelor's and master's degree in business administration, and 20 years' experience in his field. VIII R. 1163. He was a former competitive skier himself, skiing for the University of Denver, and on three United States Olympic teams. ***Id. at 1170***.

during the damage period to attract customers away from the jointly-offered 4-area ticket." Brief of Defendant-Appellant, Cross-Appellee, at 62 (citations omitted) (footnote omitted).

[37]** Although Farwell's assumptions may have been open to question, they were not so unsupported that the trial court abused its discretion in permitting admission of the testimony and exhibits. We begin with the general rule that ***HN15***[] we review a district court's admission or exclusion of expert testimony for abuse of discretion only. *E.g., Scholz Homes, Inc. v. Wallace, 590 F.2d 860, 863 (10th Cir. 1979)* ("Trial courts have broad discretion in determining the extent to which expert testimony is admissible."); *see also Garwood v. International Paper Co., 666 F.2d 217, 223 (5th Cir. 1982)* ("the district court's admission or exclusion of expert testimony under *Fed.R.Evid. 702* is reviewable only for abuse of discretion").

[*1524] We cannot say that the admission of this expert testimony was an abuse of discretion. Although there may have been considerable evidence contradicting the expert's assumptions, his assumptions were not without support. [20] **[**39]** *See also Litton Systems, Inc. v. AT & T, 700 F.2d 785, 822-25 (2d Cir. 1983)* (expert's damage projections admissible because assumptions on which they were based were supported in record), *cert. denied*, *464 U.S. 1073, 104* ***[**38]*** *S. Ct. 984, 79 L. Ed. 2d 220 (1984)*. Moreover, "the full burden of exploration of the facts *and assumptions* underlying the testimony of an expert witness [is] squarely on the shoulders of opposing counsel's cross-examination." *Smith v. Ford Motor Co., 626 F.2d 784, 793 (10th Cir. 1980)* (emphasis added), *cert. denied*, *450 U.S. 918, 67 L. Ed. 2d 344, 101 S. Ct. 1363 (1981)*. [21] **[**40]** We therefore conclude that permitting the jury to consider the testimony from plaintiff's expert was not an abuse of discretion. [22]

---

[20] There was evidence that plaintiff's mountain was of equivalent desirability to defendant's mountains. There was testimony that plaintiff's mountain was "the finest, well-balanced mountain in the Aspen area." IV R. 502. One witness testified that he "prefer[ed] [plaintiff's mountain] as a ski area," and that he recommended plaintiff's ski school over the others because it is a "friendly area." VII R. 983; *see also* ***id. at 985-86***. There was also testimony from a member of defendant's board of directors that if a four-mountain ticket had been offered in 1978-79, defendant would *not* have marketed its three-mountain ticket at the same time. Exhibit 33, III App.; V R. 585.

[21] Defendant also argues that Farwell's projections "were attributed at least in part to what the trial court found to be [defendant's] *lawful* competition -- its offering of its own 3-area ticket." Brief of Defendant-Appellant, Cross-Appellee, at 66 (emphasis in original). Defendant argues that the judgment must be reversed because, as in *Coleman Motor Co. v. Chrysler Corp., 525 F.2d 1338 (3d Cir. 1975)*, plaintiff's expert relied on defendant's lawful conduct in projecting damages. We disagree for two reasons.

First, we have explained above that we must look at the evidence as a whole in determining whether defendant violated *§ 2*. Whatever the propriety of marketing its own three-day ticket in other circumstances, we must conclude that defendant cannot complain of Farwell's reliance on its offering of the three-day ticket in conjunction with the other evidence of monopolization in this case, especially where defendant has acquiesced in the jury's return of a general verdict. "But however innocent such agreements might be, standing alone, they would assume quite a different aspect if utilized as essential features of a program to hamper or destroy competition." *Associated Press, supra, 326 U.S. at 14*.

Second, Farwell's projections do not assume that the three-day ticket is illegal. Instead, the projections merely assume that defendant would refrain from offering the three-day ticket. As we have explained earlier, there is support in the record for this assumption. *See supra* note 20.

[22] Defendant makes a broad challenge to the admission of the testimony of plaintiff's expert. In addition to the challenge that the testimony was inadmissible because grounded on false assumptions, which we have rejected, defendant also argues that even if the expert evidence was otherwise admissible it should have been excluded as misleading and confusing. *See Fed.R.Evid. 403*. Brief of Defendant-Appellant Cross-Appellee at 68. We note that under *Rule 403, Fed.R.Evid.*, the "task of balancing the probative value of evidence against danger of confusion of the issues is one for which the trial judge because of his [or her] familiarity with the full array of evidence in the case, is particularly suited." *Rigby v. Beech Aircraft Co., 548 F.2d 288, 293 (10th Cir. 1977)*. We will not disturb the trial court's decision on this issue unless it is an abuse of discretion. *See, e.g., Whiteley v. OKC Corp., 719 F.2d 1051, 1057 (10th Cir. 1983)*; *Texas Eastern Transmission Corp. v. Marine Office-Appleton & Cox Corp., 579 F.2d 561, 567 (10th Cir. 1978)*; *Rigby v. Beech Aircraft Co., 548 F.2d 288, 293 (10th Cir. 1977)*. We cannot say it was an abuse of discretion to refuse to exclude the expert's testimony under *Rule 403*.

[41]** Defendant also argues that plaintiff failed to show that it was injured by reason of an antitrust violation for the 1977-78 ski season. Defendant contends that a four-mountain ticket was offered in 1977-78 and therefore any injury suffered by plaintiff during this season was based on defendant's lawful offering of its own three-area ticket. Brief of Defendant-Appellant, Cross-Appellee, at 76-78; Reply Brief of Defendant-Appellant, Cross-Appellee, at 19-21.

This argument ignores the evidence before the jury of antitrust injury suffered by plaintiff in having to accept 15% as its share of net revenues from the sale of four-area tickets during 1977-78. Plaintiff's **[*1525]** counsel contended in closing argument that defendant had used its market "power to deliberately exclude [plaintiff] from a substantial portion of the destination skier visits beginning in the 1977-'78 season by [, among other things,] imposing a condition that revenue must be devided on the four-area ticket based upon a fixed percentage substantially below [plaintiff's] market share previously realized, and to do so, to force [plaintiff] out of the four-area ticket." II App. 574.

In years preceding **[**42]** 1977-78, revenues from the sale of the joint four-area tickets were divided on the basis of actual use. In all but one of these seasons, plaintiff received between 16.8% and 18.5% of the revenues based on actual use of its facility. Only during 1976-77, a season that plaintiff contended was marked by below average amounts of snowfall and an unusually low number of skiers visiting the Aspen area, did plaintiff's share of the revenues based on actual use fall below 16.8%. Its share during this season was 13.2%. Defendant offered to continue the joint ticket for 1977-78 if plaintiff would accept a 13.2% fixed percentage of the revenues. III R. 270-71. Plaintiff objected to this percentage because it was based on the survey for 1976-77. *Id. at 271*. Plaintiff's vice president testified that "it looked pretty obvious to us that [defendant] had no intention of really having a four-area, six-day ticket with us, and we felt that our own [sic] chance of keeping this thing alive was to accept some type of a fixed percentage, because [defendant was not] going to go along with a survey [of actual use]." *Id. at 273*. As a result, plaintiff offered a "compromise" deal in which **[**43]** it would accept the average of its previous three years as its share of the revenue for 1977-78. *Id.* The parties eventually settled on 15% as plaintiff's share of the revenues for the 1977-78 season.

We conclude that there was sufficient evidence for the jury to conclude that plaintiff was injured through the exercise of monopoly power by defendant's acts in compelling plaintiff to accept 15% as its share of the profits from the joint four-area ticket during the 1977-78 season, rather than dividing revenues on the basis of actual use. And of course, with respect to the 1978-79, 1979-80, and 1980-81 years defendant did refuse to deal with plaintiff in the marketing of a four-mountain ticket, in addition to its other acts.

The expert tesimony thus supported the jury inference of injury in fact resulting from defendant's violation of *§ 2*, and the testimony of other witnesses as well. In sum, the requirement of proof of injury as an element of plaintiff's case was met. *King & King Enterprises v. Champlin Petroleum Co., 657 F.2d 1147, 1156, 1160 (10th Cir. 1981)*, *cert. denied*, *454 U.S. 1164, 71 L. Ed. 2d 320, 102 S. Ct. 1038 (1982)*.

IV

Damages

Lastly, defendant **[**44]** takes issue with the proof supporting the jury's award of $ 2.5 million in damages, which the district court trebled to $ 7.5 million. Defendant again challenges the testimony and exhibits of plaintiff's expert Farwell. Defendant contends that Farwell's damage estimates of $ 4,708,600 under his "Method A" and $ 3,162,100 under "Method B" are an inadequate foundation for the jury's damage award. Farwell's "Method A" estimate of damages was based on the assumption of a trend of the market share continuing in favor of plaintiff through the damage years projected. Farwell estimated the before tax profit that would have been produced if the defendant's marketing practices had not changed; this method produced the $ 4,708,600 estimate of damages. Farwell's "Method B" was more conservative and assumed that the plaintiff would only continue to have the average market share of recent prior years through the damage years projected; this method produced the $ 3,162,100 estimate of loss resulting from defendant's change in marketing practices.

The Supreme Court has recognized that an antitrust plaintiff is rarely able to prove its damages with mathematical precision. **[*1526]** *See,* **[**45]** *e.g., J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 566, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)* ("The vagaries of the marketplace usually deny us sure knowledge of what plaintiff's situation would have been in the absence of defendant's antitrust violation."); *Zenith Corp. v. Hazeltine, 395 U.S. 100, 123, 23 L. Ed. 2d 129, 89 S. Ct. 1562 (1962)* ("damages issue in [cases where plaintiff was partially or totally excluded from a market] are rarely susceptible of the kind of concrete, detailed proof of injury which is available in other contexts"); *see also King & King Enterprises v. Champlin Petroleum Co., 657 F.2d 1147, 1158 (10th Cir. 1981)*, *cert. denied*, *454 U.S. 1164, 71 L. Ed. 2d 320, 102 S. Ct. 1038 (1982)*; *Cackling Acres, Inc. v. Olson Farms, Inc., 541 F.2d 242, 246 (10th Cir. 1976)*, *cert. denied*, *429 U.S. 1122, 51 L. Ed. 2d 572, 97 S. Ct. 1158 (1977)*. The Court has emphasized that ***HN16***[] the trier of fact can determine the amount of damages from "a just and reasonable estimate of the damage based on relevant data." *Bigelow v. RKO Radio Pictures, 327 U.S. 251, 264, 90 L. Ed. 652, 66 S. Ct. 574 (1946)*. The damage award, however, may not be based **[**46]** on "speculation or conjecture." *Id.*

In Part IV, *supra*, we rejected defendant's challenge to the testimony and exhibits of plaintiff's expert Farwell in the context of proving injury. We similarly must reject defendant's argument concerning the inadequacy of the proof concerning damages, particularly in light of the general rule that "the burden of proving the amount of damages is less than that required for proving the fact of damage." ABA Antitrust Section, ***Antitrust Law*** *Developments* 409 (2d ed. 1984); *see also Story Parchment Co. v. Paterson Parchment Co., 282 U.S. 555, 562, 75 L. Ed. 544, 51 S. Ct. 248 (1931)*. As we stated in a similar context:

> If the calculations upon which the loss of profits are based are *estimated in any reasonable way* and the underlying assumptions on which the [expert] relied *are not without support in the record*, the calculations may be upheld as a valid means of measuring loss of profits.

King & King Enterprises, supra, 657 F.2d at 1158. (emphasis added). In light of Farwell's testimony and exhibits, we cannot say that the jury's $2.5 million damage award was based on "speculation or conjecture." *See* **[**47]** *id. at 1162-63* ("The weight and probative value of [experts'] testimony was for the jury to decide. . . . 'Even though we may not agree with each step in the [fact finder's] reasoning process, we must affirm . . . unless the findings are beyond the pale of sane judgment. '") (quoting *Trabert & Hoeffer, Inc. v. Piaget Watch Corp., 633 F.2d 477, 484 (7th Cir. 1980)*); *see also Midwest Underground Storage v. Porter, 717 F.2d 493, 501 (10th Cir. 1983)* (upholding jury damages award that was "within the range of the evidence," even though exact amount of award was open to question).

Defendant also argues that the $2.5 million damage award is excessive. The district court rejected defendant's motion for a new trial based, in part, on the claim that the damage award was "grossly excessive." I R. 212; I App. xviii. ***HN17***[] We must afford the district court's refusal to grant a new trial on the excessive damages claim "considerable deference on appeal." *Blevins v. Cessna Air Craft Co., 728 F.2d 1576, 1579 (10th Cir. 1984)*; *see also Midwest Underground Storage Inc., 717 F.2d at 502* ("The decision whether to grant a new trial is committed to the informed discretion of the district **[**48]** court, which is generally in a better position to evaluate claims of jury confusion or other error in the verdict."). "Moreover, ***HN18***[] 'absent an award so excessive as to shock the judicial conscience and to raise an irresistible inference that passion, prejudice, corruption or other improper cause invaded the trial, the jury's determination of the damages is considered inviolate. '" *Blevins, supra, 728 F.2d at 1579* (quoting *Malandris v. Merrill Lynch, Pierce, Fenner & Smith, Inc., 703 F.2d 1152, 1168 (10th Cir. 1981)* (en banc) (plurality opinion), *cert. denied*, *464 U.S. 824, 104 S. Ct. 92, 78 L. Ed. 2d 99 (1983)*); *see also* ***[*1527]*** *Hurd v. American Hoist and Derrick Co., 734 F.2d 495 (10th Cir. 1984)*.

We cannot say that the district court abused its discretion in denying defendant's motion for a new trial on the basis of the alleged excessiveness of the verdict or that the $2.5 million award is so excessive as to shock the judicial conscience. Indeed, the jury's award was below the estimates of plaintiff's expert Farwell, whose testimony we held to be admissible in *supra* Part III. [23] Defendant's other challenges to certain aspects of the exhibits on which Farwell **[**49]** relied, *see* Brief of Defendant-Appellant, Cross-Appellee, at 79-80, do not convince us that overturning the jury's damage award is appropriate here.

[50]** V

Attorneys' fees and costs on appeal

Plaintiff asks that we award it "costs, including reasonable attorneys' fees, on appeal." Reply and Answer Brief of Plaintiff-Appellee, Cross-Appellant, at 84. Section 4 of the Clayton Act ***HN19***[] provides that "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws . . . shall recover . . . the cost of suit, including a reasonable attorney's fee." *15 U.S.C. § 15(a)*.

In *Perkins v. Standard Oil Co., 399 U.S. 222, 26 L. Ed. 2d 534, 90 S. Ct. 1989 (1970)*, the Supreme Court held that § 4 of the Clayton Act ***HN20***[] "authorize[s] the award of counsel fees for legal services performed at the appellate stages of a successfully prosecuted private antitrust action." *Id. at 223*; *see also* *Alexander v. National Farmers Organization, 696 F.2d 1210, 1211-12 (8th Cir. 1982)*, *cert. denied*, *461 U.S. 937, 103 S. Ct. 2108, 2110, 77 L. Ed. 2d 313 (1983)*; *Moore v. Jas. H. Matthews & Co., 682 F.2d 830, 839 & n.11 (9th Cir. 1982)*; *Carpa, Inc. v. Ward Foods, Inc., 536 F.2d 39, 55-56 (5th Cir. 1976)*; *see generally* 2 S. Speiser, *Attorneys' Fees* § 14:6 (1973). The Supreme Court in **[**51]** *Perkins* indicated that "the amount of the award for such services should, as a general rule, be fixed in the first instance by the District Court, after hearing evidence as to the extent and nature of the services rendered." *399 U.S. at 223*.

Accordingly we remand to the district court to hold a hearing on the appropriate amount of attorneys' fees and costs incurred by plaintiff which are attributable to the appeal in No. 82-1407. With respect to the cross-appeal in No. 82-1424, the issues raised were only to be considered if defendant Aspen Skiing Company was successful in its appeal. *See* note 3, *supra*. In view of these circumstances, we conclude that each side should bear its own appellate costs and attorneys' fees which are attributable to the cross-appeal. On remand the district court should thus determine the appellate costs and attorneys' fees attributable to the appeal in No. 82-1407 and award those costs and attorneys' fees to plaintiff.

VI

Conclusion

We are satisfied that the trial was fairly conducted, that the instructions were balanced and fair to both sides, and that no error is demonstrated. Accordingly in all **[*1528]** respects the judgment **[**52]** of the district court is affirmed, and the case is remanded to the district court for further proceedings concerning appellate attorneys' fees and costs as provided in Part V.

APPENDIX

The district court's relevant market instruction was as follows:

A relevant market has two components: One is the product market and the other is the geographic market.

---

[23] Defendant criticizes Farwell's damage estimate for 1977-78 on the ground that the four-mountain ticket *was* actually offered during this year, contrary to the apparent assumption of Exhibit 101. However, this defect is not fatal to the verdict when we consider the amount of damages attributed to this year in comparison with the other damage years. Under his more conservative Method B, Farwell attributed between $884,400 and $991,300 in damages for each of the years 1978-79 through 1980-81, during which the four-mountain ticket was not offered. The total damages attributed by Farwell to these three years was over $2.8 million, which was greater than the jury's damage award for the four damage years in question. Farwell's estimate of $354,300 in damages for 1977-78, during which the four-mountain ticket was offered, therefore should be viewed in light of Farwell's estimated damages for 1978-79 through 1980-81 and the actual damages awarded by the jury. *See* *Midwest Underground Storage, Inc., supra, 717 F.2d at 501* (upholding jury damages award that was "within the range of the evidence").

Product market: The parties are in disagreement as to what the relevant product market is. Aspen Highlands claims that downhill skiing services in Aspen, including multi-area, multi-day lift tickets is the relevant product market. Aspen Skiing Corporation and its subsidiaries claim that the relevant product market is downhill skiing at destination ski resorts.

Like many issues of fact, this one calls upon you to apply your collective common sense and experience to the record of evidence before you.

The basic idea of a relevant product market is that the product or services within it can be substituted for each other as a practical matter from the buyer's point of view. Two products need not be identical to be in the same market, but they must be as a matter of practical fact in the actual behavior of consumers substantially **[**53]** or reasonably interchangeable to fill the same consumer needs or purposes. Two products are within a single market if one item could suit buyers' needs substantially as well as the other.

One way you can tell whether products are reasonable substitutes for each other is to consider whether changes in the price of one have fairly direct and substantial effects upon the sales of the other. If so, the products are probably in the same market. You can also consider how people in the industry and the public at large view the products, whether the products have similar prices, whether the products are sold to similar customers, and whether they are sold by the same kind of sellers. Other factors which you should consider include the special characteristics and uses of each product and the overlap between the consumers of different products.

In sum, you are being asked to decide which products compete with each other. No one factor is necessarily decisive; but the more of these criteria that are present, the more likely the particular market is a separate product or service market.

Sub-markets: Once you have determined the relevant product market, you next have to consider whether **[**54]** or not there exists within that product market a relevant sub-market. Even though a group of products are sufficiently interchangeable to be grouped in one product market, there may be within that group a smaller group of products that compete so directly with each other as to constitute a sub-market with in [sic] the larger market; or the products or services of particular seller may have such particular characteristics and such particular consumer appeal and are sufficiently insensitive to price variations of other products that they constitute a relevant sub-market all by themselves.

There can be both a relevant market and a relevant sub-market or just a relevant market without any relevant sub-market. Thus, if you decide that the relevant product market is downhill skiing at destination ski resorts, you must still determine whether downhill skiing services in Aspen, including multi-area, multi-day lift tickets is a sub-market within the larger market.

Relevant geographic market: Second, you must determine [the] relevant geographic market. The relevant geographic market is the area or areas in which these parties and their competitors compete for the sale of products **[**55]** that form the relevant product market. It is the area or areas to which a potential customer may rationally turn for the service or product he needs.

[*1529] Just as there can be a sub-market within a relevant product market, there can be a sub-market within a relevant geographic market. Your destination [sic] of the geographic market or sub-market must both correspond to the commercial realities of the ski industry and be economically significant. Thus, although the geographic market in some instances may be national or international, under other circumstances it may be as small as a single town or resort area.

In this case, Aspen Highlands contends that the relevant geographic market is the Aspen area, while Aspen Skiing Corporation and its subsidiaries contend that it is North America. Thus, if you decide that the relevant product market is downhill skiing at destination ski resorts and the relative georgraphic [sic] market North America, you may still consider whether downhill skiing services in Aspen, including multi-area, multi-day lift tickets from a relevant product sub-market, and if so, whether the Aspen area is a relevant geographic sub-market.

LexisNexis® Headnotes

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN1[] **Trials, Judgment as Matter of Law**

On motions for judgment notwithstanding the verdict a court should consider all of the evidence, not just that evidence which supports the non-mover's case, but in the light and with all reasonable inferences most favorable to the party opposed to the motion. If the facts and inferences point so strongly and overwhelmingly in favor of one party that the court believes that reasonable men could not arrive at a contrary verdict, granting of the motions is proper. On the other hand, if there is substantial evidence opposed to the motions, that is, evidence of such quality and weight that reasonable and fair-minded men in the exercise of impartial judgment might reach different conclusions, the motions should be denied.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN2[] **Private Actions, Remedies**

A plaintiff seeking damages for an antitrust injury need only prove with a fair degree of certainty that the defendant's illegal conduct materially contributed to his injury.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN3[] **Private Actions, Remedies**

It is proper for a trial judge to infer damages from circumstantial evidence.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN4[] **Private Actions, Remedies**

When direct evidence points to a conspiracy to injure a plaintiff, a court can find causation on the basis of circumstantial evidence and inference.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Scope

Civil Procedure > Special Proceedings > Eminent Domain Proceedings > Jury Trials

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Civil Procedure > ... > Jury Trials > Jury Instructions > General Overview

Civil Procedure > ... > Jury Trials > Jury Instructions > Objections

HN5[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

The Noerr-Pennington doctrine provides an exception to antitrust liability enabling citizens or business entities to influence or to petition public officials to take official action that will harm or eliminate competition. When such petitioning is a mere sham or the public officials are participants in the conspiracy, however, there is no exception to antitrust liability.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN6[] **Noerr-Pennington Doctrine, Sham Exception**

Petitioning calculated to deny a competitor meaningful access to a governmental entity is within the sham exception to Noerr-Pennington immunity. Whether or not such conduct is within the sham exception is a fact issue for the jury.

Governments > Local Governments > Employees & Officials

HN7[] **Local Governments, Employees & Officials**

A municipal official acting in his legislative capacity is entitled to absolute immunity from civil suits.

Governments > State & Territorial Governments > Claims By & Against

Governments > State & Territorial Governments > Employees & Officials

HN8[] **State & Territorial Governments, Claims By & Against**

Government officials performing discretionary functions generally are shielded from liability for civil damages insofar as their conduct does not violate clearly established statutory or constitutional rights of which a reasonable person would have known. Assuming that the law in question was clearly established, an official can still prevail if he can show extraordinary circumstances and can prove that he neither knew nor should have known of the relevant legal standard.

[*1556] GARZA, Circuit **[**2]** Judge

In *Affiliated Capital Corp. v. City of Houston, 519 F. Supp. 991 (S.D.Tex. 1981)*, the district court granted the defendant's judgment n.o.v. motion in an antitrust action because it believed there was insufficient evidence connecting plaintiff's theory of conspiracy to limit competition and its failure to receive a cable television franchise. A divided panel of this court reversed that decision holding among other things that the conspiracy complained of was a *per se* antitrust violation. *Affiliated Capital Corp. v. City of Houston, 700 F.2d 226 (5th Cir. 1983)*. We vacated that decision and decided to hear this case *en banc, 714 F.2d 25 (5th Cir. 1983)*. Because the **[*1557]** district court's j.n.o.v. ruling can be reversed without reaching the issue of a *per se* violation, we again reverse the court below, and reinstate the jury verdict. The City of Houston is not a party to this appeal, having been voluntarily dismissed by the plaintiff on June 23, 1982.

I.

FACTS

The events leading to the litigation at bar commenced in 1972, when several firms sought cable television franchises from the city of Houston. After reviewing these applications the **[**3]** Houston Public Service and Legal

---

* Judge Garza, now a senior judge of this circuit, is participating as a member of the panel that initially considered the appeal now subject to en banc review.

** Judges Randall and Garwood did not participate in this decision.

Departments recommended two firms to the Mayor and City Council. The Mayor and City Council then awarded one corporation a franchise for the entire city. The unsuccessful franchise applicant, Gulf Coast Cable Television Co. [hereinafter Gulf Coast] then secured a petition of more than five hundred Houston voters calling for a referendum on the Council action. [1] The voters soundly defeated the grant of a monopoly franchise.

In 1978 the city was again considering granting cable franchises. Mayor McConn, who had been a city councilman in 1973, wanted a plan that would not be overturned by the voters. The Mayor testified at the trial below that he, therefore, determined that several franchises would be granted. In addition, he decided that qualified, local applicants would be favored. Finally, he concluded that any plan should include minority participation. **[**4]** Defendant Gulf Coast was the first of many concerns to seek a cable television franchise in 1978. [2] There is ample evidence that the city of Houston did not even initiate the franchise process; defendant Gulf Coast approached the city and made application for a franchise. The city of Houston is a highly desirable cable television market. The city, however, made no effort to take advantage of its position by publicizing its intention to award franchises. Instead of following this common practice, the city passively accepted applications as they arrived. From the many applications submitted to the Public Service Department, four emerged as strong contenders. Their strength was not based on the merits of their proposals, however, but on the political power of the men behind them. These four actors were Gulf Coast, Houston Cable Television Co., Houston Community Cable Television Co., and Meca. Mayor McConn had let it be known that he did not want to choose between competing applicants. He wanted the applicants to cooperate, resolve any overlaps in their territories and present him with a finished product. He abdicated his responsibility in the franchising process to a group **[**5]** of powerful Houston businessmen. In turn, these businessmen became friendly competitors in an effort to divide the city among themselves and prevent competition from any outsiders.

These businessmen and their attorneys met, and over a period of time mutually agreed on franchise areas. After this agreement, the Mayor informed Gulf Coast that another applicant, Westland Corporation, a group primarily controlled by the Mayor's personal attorney, had to be added to the ranks. A portion of the area Westland desired was in the territory sought by Gulf Coast. Conscious of both the political realities of the situation and the need to avoid competition among potential franchises, Gulf Coast decided to redraw the franchise **[**6]** boundaries in order to comply with McConn's wishes. After this arrangement was completed the businessmen were ready to present proposed franchises to the Mayor and City Council for approval.

While Gulf Coast and the above-mentioned applicants were cutting out competition by carving up the city amongst themselves, the plaintiff, Affiliated Capital Corporation, **[*1558]** [hereinafter Affiliated] entered the picture. Affiliated is a publicly-held corporation that owned a savings and loan association. A federal prohibition against owning both a savings and loan association and a cable television system prevented Affiliated from making application for a franchise until it sold the savings and loan association. After the mid-September sale, Affiliated hired a local attorney to investigate the state of the franchising process. When the attorney contacted counsel for Gulf Coast, he was informed that Affiliated was too late because the "pie had been cut." Surprised by this news, Affiliated's president, Billy Goldberg, went to visit the Mayor who assured him that there was still time for Affiliated to receive a fair hearing. Consequently, Affiliated made application for a cable television **[**7]** franchise on October 16th.

Although the city never advertised its intention to award cable television franchises, it did undertake other measures calculated to give the appearance that the citizens of Houston would receive quality cable television service. The Public Service Department prepared a questionnaire, which was distributed to all franchise applicants. The city hired a consultant, Dr. Robert Sadowski, to evaluate the applicants based on their responses to this questionnaire. By the middle of November, Dr. Sadowski had completed a report that was highly critical of the franchising/selection process. He warned that it was irrational to allow the applicants themselves to divide the city into franchise

---

[1] *Tex.Rev.Civ.Stat.Ann. art. 1181* (Vernon 1963) and the Charter of the city of Houston provided for this procedure.

[2] Gulf Coast is a limited partnership that operates solely in the cable television business. After its unsuccessful bid for a franchise in the city of Houston in 1972, Gulf Coast remained in business and obtained franchises for a number of small cities within the Houston Metropolitan area.

territories. He concluded that such a procedure did not give the citizens of Houston the best possible cable television service.

In addition to this general indictment of the process, Dr. Sadowski recommended that only two of the applicants, Meca and Cable-Conn, be awarded the franchise areas they sought. [3] He urged that three applicants, Houston Cable, Westland, and Houston Community Cable, be rejected and that the size of defendant Gulf Coast's service area be reduced **[**8]** substantially. He apparently had doubts about the ability of Gulf Coast to service even this smaller territory so personally inspected its facility. Shortly after this visit, Sadowski was fired. His conclusions were altered before the report was publicized. The five ultimately successful applicants were pronounced qualified. [4]

[9]** The City Council then began taking final action on the franchise applications. The president of Affiliated appeared before City Council and requested that his application be given due consideration. Instead of due consideration, the City Council (through Councilman Johnny Goyen) admonished Affiliated to go and work out an agreement with the defendant and the other above-mentioned applicants. Goyen said:

> Mr. Goldberg, let me address Council's wisdom. As these applications came in, they were sent to the Legal Department. Obviously, a number of lawyers got together and did whatever they did. I was not privy to it nor did I want to sit in on any meeting.
>
> Apparently, they came up with the formula that those applicants agreed upon. I was hoping that your situation might end up in the same pot as the others, whereby there would be some kind of recommendation coming before this Council, and this Council would not have to carve from one to give to another which we have not had to do in the past and which I do not want to do now nor do I intend to.
>
> I do not want to taketh away and giveth to somebody else, because I **[*1559]** haven't had to do that in the past. You have **[**10]** a very competent attorney, and the other people have very competent attorneys. What I would like to see done, and it might take a motion to get this done, is to send this to the Legal Department and try to work something out.

Plaintiff's Exhibit 150, at 27-28.

The message to Goldberg was clear: it was not the Council, but rather private businessmen who would decide the future of cable television in Houston. When Mr. Goldberg did not make an agreement with those businessmen, the City Council and Mayor voted for the convenient franchise package presented by Gulf Coast and the other conspirators.

Affiliated then filed this suit alleging that defendants had engaged in a conspiracy to prohibit its entry into the Houston cable television market, thereby violating *section 1* of the Sherman Act. Specifically, the plaintiff claimed that certain applicants for cable television franchises agreed to define the territories in which they would apply for franchises, so that no two members of the conspiracy would compete for the same territory. In addition, plaintiff charged defendants with participation in a more general conspiracy to limit competition for cable television franchises **[**11]** by excluding non-conspirator competitors.

II.

DISTRICT COURT JUDGMENT

At the close of evidence in the trial of the instant case, the jury was presented with a series of interrogatories. The relevant interrogatories and jury responses are reproduced below.

---

[3] Doctor Sadowski never evaluated Affiliated's application because it was submitted after his employment had been terminated.

[4] Shortly before the City Council considered the franchise ordinances, the Public Service Director submitted a letter to the City Attorney to the effect that he lacked the information necessary to judge the merits of each application. In relevant part, the letter concluded that "while these issues may have been considered by the drafting principals, and may have been addressed satisfactorily by them, I have no way of knowing this." Record on Appeal, vol. 14, at 616. The "drafting principals" were later identified as the attorneys for certain franchise applicants.

INTERROGATORY NO. 1

It is established that two or more franchise applicants, including defendant Gulf Coast, participated in agreements on boundary lines so as to divide the geographic areas for which these applicants would seek cable television franchises. Do you find from a preponderance of the credible evidence that these arrangements were part of a conspiracy in unreasonable restraint of trade, in violation of *Section 1* of the Sherman Act. Answer "yes" or "no."
ANSWER: No.
INTERROGATORY NO. 3

Do you find from a preponderance of the credible evidence that one or more of the defendants participated in a conspiracy in unreasonable restraint of trade to limit competition for cable television franchises, in violation of *Section 1* of the Sherman Act? Answer "yes" or "no."
ANSWER: Yes.
INTERROGATORY NO. 4

Do you find from a preponderance of the credible evidence that any of the following persons participated **[**12]** in that conspiracy? Answer "yes" or "no."
a. City of Houston
Yes
b. Mayor Jim McConn
Yes
c. Gulf Coast Cable Television
Yes
INTERROGATORY NO. 5
Do you find from a preponderance of the credible evidence that either of the conspiracies, if you have so found in answer to Interrogatories 1 or 3, proximately caused injury to the plaintiff's business or property? Answer "yes" or "no."
ANSWER: Yes.
INTERROGATORY NO. 6
What sum of money, if paid now in cash, do you find from a preponderance of the credible evidence would fairly and reasonably compensate plaintiff for the damages, if any, you find plaintiff has incurred? Answer in dollars and cents, if any.
ANSWER: $2,100,000.00.

In a post-trial motion, defendants argued for judgment notwithstanding the verdict on three grounds. First, the defendants asserted that all of plaintiff's evidence had related to boundary agreements, found legal by the jury's answer to Interrogatory No. 1, so that there was no evidence to support the jury's finding of an independent conspiracy under Interrogatory No. 3. Second, they claimed that there was no evidence exclusive of boundary agreements **[*1560]** to support **[**13]** the proximate cause finding in Interrogatory No. 5. Finally, defendants contended that the *Noerr-Pennington* doctrine mandated judgment notwithstanding the verdict.

In a thorough and carefully researched opinion, *Affiliated Capital Corp. v. City of Houston, 519 F. Supp. 991 (S.D.Tex. 1981)*, the district court granted the relief requested by the defendants. Although the trial judge found substantial evidence independent of the boundary agreements to support the answer to Interrogatory No. 3, [5] he

[5] In response to defendant's motion, plaintiff cited a wealth of evidence to demonstrate a second theory of conspiracy. In its memorandum opinion the court set out all the evidence which it agreed would support a second theory of conspiracy to limit competition:

By late August 1978, Clive Runnells, on behalf of Gulf Coast, had agreed with Meca that they would be friendly competitors. Testimony of Clive Runnells. Al Levin, Affiliated Capital's lawyer during the franchising process, testified that by September 20, 1978, he contacted Bill Chamberlain, an agent of Gulf Coast. Chamberlain told him that Gulf Coast's attorney Bill Olson "was a pushing force of the cable TV situation at that point." Levin further testified that he then contacted Olson and Olson told him, "as far as I am concerned, Al, it's too late; the pie has already been cut." On the day before this telephone conversation between Levin and Olson, Olson had told Jonathan Day, an attorney for Houston Cable, that Olson was "trying to put a map together" and that "most of the areas are defined on eastern side." Plaintiff's exhibit 63.

On September 28, 1978, a lawyer for Houston Cable wrote to the lawyer for Gulf Coast regarding the franchise ordinance:

> Enclosed is a copy of the proposed cable television ordinance marked to show deletions and additions, including some recommended by our FCC counsel. Also enclosed is an unmarked copy for your convenience.
>
> The enclosed form of the proposed ordinance has been placed in our word processing equipment. Consequently, any changes or additions you wish to make can be easily accommodated. As we discussed, the enclosed form should be considered as an internal working draft so that we can reach an agreed proposal to present to the city.

Plaintiff's exhibit 14. A week later he wrote another letter recounting that they had met on this franchise ordinance, and noting their discussions of various provisions of this proposed ordinance, including the provision with respect to the percentage of the City's interest in the gross revenues from the ordinances:

> Enclosed is a revised form of CATV ordinance with the changes we discussed at our last meeting in Section 8.G; Section 10.B; Section 12.H, J, and M; and Section 23.A.
>
> Also enclosed is a suggested revision to Section 20.A regarding the three percent of gross revenue issue in the event we are unsuccessful in limiting the franchise fee to regular subscriber service.
>
> If you have further comments or suggestions regarding this proposed form of ordinance, please let me know.

Plaintiff's exhibit 15. None of the referenced sections of the proposed ordinance relates to boundaries.

In October 1978, Runnells and others met with Mayor McConn. At that meeting, Runnells was informed that McConn wanted Westland to have a franchise. Westland had applied for a portion of the area sought by Gulf Coast, and the Mayor indicated to Gulf Coast that a general area, Westbury-Meyerland, was what he wanted Westland to have. Testimony of Clive Runnells; Testimony of James McConn.

On November 22, 1978, notice of the November 29th City Council agenda indicated that six (6) ordinances, five of which ultimately were approved, would be considered. On November 27, 1978, the attorney for Houston Cable, one of the applicants scheduled on the upcoming agenda, sent a final proposed cable television ordinance to the City Attorney:

> Enclosed is a revised form of the proposed cable t.v. ordinance which includes the modifications made this week-end.
>
> In order to meet the proposed time schedule, any further revisions must be agreed by 12 noon on Tuesday, November 28. Final proofing of the enclosure will be completed by that time.

Plaintiff's exhibit 29. He also sent a copy of the ordinance to Gulf Coast's attorney, who had discussed it with the lead counsel for Houston Cable earlier that morning:

> Enclosed is the proposed cable t.v. ordinance which Jonathan Day discussed with you this morning. Also enclosed is a copy of the transmittal letter to the City attorney.
>
> I have marked significant changes in red in order to facilitate your review. If you have any questions or comments, please let me know.

Plaintiff's exhibit 30. The next day Houston Cable's attorney sent copies of the ordinances to the ultimately successful applicants. The proposed ordinances were complete except for the names of the applicants and their proposed service area. Plaintiff's exhibits 32 & 189. The successful applicants then filled in the blanks with their names and service areas, and forwarded the ordinances to the City Attorney. Some applicants sent their proposed ordinances back to the Houston Cable Attorney who then forwarded them to the City. Plaintiff's exhibit 35.

The agenda for the City Council meeting of November 29, 1978 contained six (6) cable television franchises, not including plaintiff's, Plaintiff's exhibit 33; those ordinances had been placed on the agenda on or before November 22, 1978, Plaintiff's exhibit 174. When Affiliated attorney Levin heard of this, he contacted Assistant City Attorney Adrian Baer. Baer relayed the following information to Levin:

> The Mayor and City Council had made their decision, and [Baer] said, 'I learned this directly from the Mayor, the franchises are non-exclusive, he does not know about the areas, it's still being worked out by Williams and Baer . . . so the net result will be a de facto exclusive.'

> He [,Baer,] explained to me that there were -- the decisions as to who was going to get what areas, specifically in terms of the actual boundaries, were still under negotiations, but the decision as to who was fait accompli.

Testimony of Al Levin; Plaintiff's exhibit 106.

After an on-site inspection of Gulf Coast's Bellaire facilities, Sadowski, the consultant hired by the City of Houston, told Earle, Director of Public Service, and Baer, Assistant City Attorney, that he would reject Gulf Coast's application. The next morning, Sadowski was fired. One day later a messenger from Earle retrieved the notes Sadowski had made concerning the applications. In his notes, Sadowski had not recommended that Gulf Coast's application be rejected, in spite of his oral suggestion to that effect to Earle and Baer, and he testified that he would have made no substantive changes in his report after the visit to Gulf Coast's facilities. He had recommended in his report, however, that Gulf Coast be given a smaller franchise area than that for which it had applied. When Sadowski's notes were typed by someone with the City, that recommendation was deleted. Moreover, other significant changes were reflected in the typed version of the notes Sadowski had turned over to Earle's messenger: his recommendations that Houston Community Cable, Houston Cable, and Columbia (Westland) be rejected were changed to recommendations that they should continue to be considered; and his statement that Cablecom had presented the only satisfactory application was omitted. Testimony of Robert Sadowski.

Prior to the plaintiff's hearing before City Council on December 12, 1978, McConn suggested to Goldberg that Affiliated seek a franchise in another area of the City rather than in the area sought by Gulf Coast. McConn testified as to his motivation for the suggestion: "I thought that, in trying to really help Mr. Goldberg, it was pretty obvious to me that Gulf Coast had the muscle and that Mr. Goldberg did not."

At the City Council hearing on plaintiff's application which was conducted on December 12, 1978, the following comments were made by Councilman Goyen:

> Mr. Goldberg, let me address Council's wisdom. As these applications came in, they were sent to the Legal Department. Obviously, a number of lawyers got together and did whatever they did. I was not privy to it nor did I want to sit in on any meeting.
>
> Apparently, they came up with the formula that those applicants agreed upon. I was hoping that your situation might end up in the same pot as the others, whereby there would be some kind of recommendation coming before this Council, and this Council would not have to carve from one to give to another, which we have not had to do in the past and which I do not want to do now nor do I intend to.
>
> I do not want to taketh away and giveth to somebody else, because I haven't had to do that in the past. You have a very competent attorney, and the other people have very competent attorneys. What I would like to see done, and it might take a motion to get this done, is to send this to the Legal Department and try to work something out.

Plaintiff's exhibit 150, at 27-28. Subsequently, the Council discussed how to proceed with plaintiff's application, and Councilman Mann made the following suggestions:

> I want to make a substitute motion that the [plaintiff's] application be referred to the Legal Department, and they in turn can contact these other applicants who have come forward and see if they can work out something.
>
> . . . .
>
> If you take this, fine, then see how much Gulf Coast is going to knock off this other group on farther down and then around and around.
>
> . . . .
>
> Substitute motion that this application be referred to the Legal Department and Public Service, and they are to contact the other people that have ordinances and guarantee that these boundaries are being adjusted between them, and they report back to Council.

Plaintiff's exhibit 150, at 37, 39, 40.

Also at that hearing, Mann indicated his knowledge of a house-count survey that had been conducted by Gulf Coast. Plaintiff's exhibit 150, at 25. The survey resulted in a comparison between the area plaintiff was applying for and an area that was within Houston Cable's application, Plaintiff's exhibit 84, and was conducted in conjunction with a proposal by Gulf Coast, that if Houston Cable would give the identified area to Gulf Coast, then Gulf Coast would be willing to give plaintiff its area. Testimony of Al Levin. A document, prepared sometime between November 28, 1978, and December 20, 1978, by Assistant City Attorney concluded that plaintiff had failed to **[*1562]** demonstrate that its injury was caused by anything other than defendants' boundary agreements. Thus, he reasoned that there was no evidence to support Interrogatory No. 5:

> The agreements to allocate and divide territory cannot be considered as evidence proving causation of plaintiff's injury, and no other evidence in the record, either direct or inferential, provides the necessary connection between the second theory of conspiracy to exclude non-conspirators and the plaintiff's failure to receive a franchise.
>
> The testimony elicited by plaintiff from its expert witness further demonstrates that what plaintiff established **[**14]** was a causal relationship between the applicants' agreements to eliminate overlaps in territory and the plaintiff's failure to be awarded a franchise, rather than a relationship between the agreement to exclude non-conspirators and plaintiff's injury.

Baer bears an alternative boundary description for the Gulf Coast franchise including the Houston Cable area, with Baer's notation: "I-10 line shifted to Hwy. 290 without Goldberg's tract -- contingency." Plaintiff's exhibit 56.

The City Council favored Gulf Coast's franchise, which subsumed the area plaintiff had applied for, and at trial several councilmen and Mayor McConn testified as to their reasons therefor. McConn's concern was to keep politically influential groups content:

> Q. You didn't want to step on anybody's political toes, did you?
>
> A Not if I could avoid it.
>
> Q You didn't want to make any type of political decision where some powerful person like Walter Mischer would be unhappy, did you?
>
> A Not if I could avoid it.
>
> Q And if all of the parties could work things out, then you wouldn't have to make any type of decision, other than approving their agreements, isn't that correct?
>
> A Yes, generally that is correct, yes, sir.
>
> Q And isn't that what you wanted to happen?
>
> A That would have been beautiful, if it could have happened that way.
>
> Q But when it didn't happen and you had to make the choice between Southwest Houston and Gulf Coast, you stated that the other -- you thought the other people were more politically powerful than Southwest, isn't that correct?
>
> A Yes, sir. I don't know if I said that, but I'll say it now. Testimony of James McConn.
>
> Councilman Goyen testified by deposition that he would have voted for Affiliated Capital's application if "on the 20th, Mr. Goldberg had come in and Mr. Runnells had come in, Mr. Mishcher had come in, and all the principals had come, and a piece of Houston had been carved out for Mr. Goldberg with no objection by anybody." Councilman Robinson testified that he would have supported Affiliated Capital's application if plaintiff had been able to work something out with Gulf Coast to give him what he wanted. Councilman Westmoreland testified that he did not disagree with his prior deposition testimony that Affiliated had been unable to work out any type of arrangement with Gulf Coast, and for that reason Westmoreland voted in favor of Gulf Coast.
>
> Finally, plaintiff's expert witness, Martin Malarkey, testified at length about the detrimental results of the noncompetitive franchising process in Houston, and about the benefits to residents of other cities where the process has involved competition on the merits of the applications. According to his testimony, the benefits include lower rates, provisions for sanctions in the event of noncompliance by the franchisee, provisions for performance bonds, and provisions requiring city approval prior to changes in ownership or control of the franchises. Further, he testified that normally the city itself prepares the franchise ordinance, rather than allowing applicants to do so.

519 F. Supp. at 1000-05 (footnotes omitted).

519 F. Supp. at 1006.

[15]** III.

IMPACT ON COMPETITION

It is abundantly clear from the record of this case that a group of Houston businessmen decided to ensure the receipt of cable television franchises by agreeing to divide the city among themselves and exclude anyone who wanted to compete for a franchise on the merits. They did so not simply with the blessing of the Mayor, but at his behest. Record on Appeal, vol. 12, at 450. The devastating competitive impact of this gentlemen's agreement to exclude anyone who wished to compete for a franchise, is evident against the backdrop of the inherent structure of the cable television industry.

[*1563] Cable television, like electric utilities, is generally considered a natural monopoly. According to conventional wisdom, the extremely high fixed costs incurred in preparing a cable television company for operation prevent the survival of competition in the marketplace. Plaintiff's expert witness on the cable television industry admitted that it did not make economic sense to grant franchises with overlapping boundaries. Record on Appeal, vol. 35, at 28. The economies of scale do not approach those of electric utilities but the theory for both industries **[**16]** holds that the long-run average costs tend to fall as output increases. We assume for purposes of this discussion that cable television is indeed a natural monopoly and proceed to discuss the pernicious effects of the conspiracy given this assumption.

Defendant Gulf Coast argues that since cable television is a natural monopoly and competition within franchise areas is impractical, the division of territories is a practical characteristic of this industry and was not harmful to consumers. Given this characteristic, competition is possible only before a franchise is granted. Unfortunately for both Affiliated and the citizens of Houston, there was no competition among the corporations that received franchises. The result was lower quality, higher priced cable television for Houston. Record on Appeal, vol. 34, at 23-27.

IV.

THE J.N.O.V. RULING

In *Boeing Co. v. Shipman, 411 F.2d 365 (5th Cir. 1969)* (*en banc*), this court established the standard of review of a judgment n.o.v. or directed verdict by a trial court. We stated that:

> ***HN1***[] On motions for . . . judgment notwithstanding the verdict the Court should consider all of the evidence -- not just that evidence **[**17]** which supports the non-mover's case -- but in the light and with all reasonable inferences most favorable to the party opposed to the motion. If the facts and inferences point so strongly and overwhelmingly in favor of one party that the Court believes that reasonable men could not arrive at a contrary verdict, granting of the motions is proper. On the other hand, if there is substantial evidence opposed to the motions, that is, evidence of such quality and weight that reasonable and fair-minded men in the exercise of impartial judgment might reach different conclusions, the motions should be denied.

Id. at 374-75; *accord Bazile v. Bisso Marine Co., 606 F.2d 101, 104 (5th Cir. 1979)*, *cert. denied*, *449 U.S. 829, 101 S. Ct. 94, 66 L. Ed. 2d 33 (1980)*.

In weighing the evidence the jury had at its disposal we find that it amply supports the jury's findings in interrogatories Nos. 3 and 5. In no event is the evidence in favor of the defendant so overwhelming that reasonable men could not arrive at the verdict reached by the jury. Thus, the trial court was incorrect in overturning the jury verdict.

In addressing the harm plaintiff suffered as a result of the **[**18]** conspiracy recognized in Interrogatory No. 3, it is important to understand that the agreement to exclude those who wanted to compete constitutes a separate conspiracy and a valid independent ground for imposing liability. While at first glance the answers to Interrogatories Nos. 1 and 3 appear irreconcilable, the explanation is simple. The manner in which Interrogatory No. 1 was posed to the jury caused them to believe that they were passing on the question of whether or not it was better to have one franchise for the city or multiple franchises. All of the parties to the suit agreed that dividing the city into several franchises was preferable and would not unreasonably restrain trade. Indeed, the jury sent a note to the trial judge asking whether or not they needed to answer both questions. They asked: assuming we want to vote "yes on #3 is there any point in voting on #1?" Jury Note No. 4, Record on Appeal, vol., 1, at 1482.

As noted, the trial court believed that the conspiracy found by the jury (Interrogatory No. 3), was not the proximate cause of plaintiff's failure to receive a franchise. **[*1564]** The court thus overturned the jury's answer to Interrogatory No. 5. **[**19]** Before addressing this argument directly, we pause to point out that proof of causation in this case is necessarily hypothetical (what would have occurred in the absence of the conspiracy). As the Supreme Court has noted, "the vagaries of the market place usually deny us sure knowledge of what plaintiff's situation would have been in the absence of defendant's antitrust violation." *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 567, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)*. We also note that ***HN2***[] a plaintiff seeking damages for an antitrust injury need only prove with a fair degree of certainty that the defendant's illegal conduct materially contributed to his injury. *Hayes v. Solomon, 597 F.2d 958, 978 (5th Cir. 1979) cert. denied*, *444 U.S. 1078, 100 S. Ct. 1028, 62 L. Ed. 2d 761 (1980)*; *Terrell v. Household Goods Carriers' Bureau, 494 F.2d 16, 20* (5th Cir.), *cert. dismissed*, *419 U.S. 987, 95 S. Ct. 246, 42 L. Ed. 2d 260 (1974)*; *Gainesville Utilities Department v. Florida Power & Light Co., 573 F.2d 292, 304* (5th Cir.) (noting that a jury charge asking whether or not the violation was a "substantial factor" in plaintiff's loss is a model of perfection), **[**20]** *cert. denied*, *439 U.S. 966, 99 S. Ct. 454, 58 L. Ed. 2d 424 (1978)*. *See* *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n. 9, 89 S. Ct. 1562, 1571 n. 9, 23 L. Ed. 2d 129 (1969)* (in proving fact of damage under § 4 of the Clayton Act it is enough that the violation is shown to be a "material cause" of injury).

When the jury considered Interrogatory No. 3, (which asked whether the defendants conspired to limit competition for cable television franchises), they found that the agreement did constitute an unreasonable restraint of trade. The trial court mistakenly assumed that in determining proximate cause the jury improperly considered evidence pertaining to the boundary agreements submitted in Interrogatory No. 1 and that the evidence plaintiff cites in support of Interrogatory No. 5 is inappropriate because it concerns evidence relating solely to Interrogatory No. 1.

Despite the learned trial court's opinion we find that the judgment n.o.v. was improper because there is substantial evidence and inferences to support the jury's finding that the conspiracy found pursuant to Interrogatory No. 3 was the proximate cause of harm to the plaintiff. We reach **[**21]** this conclusion because three categories of evidence indicate that the conspiracy to limit competition prevented Affiliated from obtaining a franchise: (1) circumstantial evidence flowing from the nature of the conspiracy; (2) evidence that Gulf Coast in conjunction with the City Council vetoed approval of Affiliated's application; and (3) evidence that the plaintiff would have been awarded a franchise on the merits in the absence of a conspiracy limiting competition on the merits.

First, Affiliated was the leading rival of Gulf Coast and the other conspirators. The exclusive nature of the conspiracy itself and Affiliated's failure to obtain a franchise is circumstantial evidence from which the jury could infer that the conspiracy operated to exclude Affiliated, a non-conspirator who was very likely to have received a franchise through competition on the merits. In *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*, the Supreme Court held in a trial before the court that ***HN3***[] it is proper for the trial judge to infer damages from circumstantial evidence. The court noted that "the injury alleged by Zenith was precisely the type **[**22]** of loss that the claimed violations of the antitrust laws would be likely to cause. The trial court was entitled to infer from this circumstantial evidence that the necessary causal relation between the pool's conduct and the claimed damage existed." *Id. at 125, 89 S. Ct. at 1577* (citing *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 696-701, 82 S. Ct. 1404, 1409-1412, 8 L. Ed. 2d 777 (1962))*. Failure of a nonconspirator to obtain a franchise is exactly the type of loss that a conspiracy to preclude competition for franchises is likely to cause when the entity awarding franchises participates in the conspiracy.

Moreover, even though the jury found the boundary agreements legal, it could **[*1565]** properly consider evidence concerning those agreements as demonstrating the defendant's intent to conspire. *See, e.g., United Mine Workers of America v. Pennington, 381 U.S. 657, 670 n. 3, 85 S. Ct. 1585, 1593 n. 3, 14 L. Ed. 2d 626 (1965)*; *United States v. Southern Motor Carriers Rate Conference, 439 F. Supp. 29, 47 (N.D. Ga. 1977)*. This evidence when considered cumulatively with other independent evidence of a conspiracy to exclude anyone who did **[**23]** not join the conspiracy also supports the jury finding of proximate cause. Consequently, the jury's ruling on Interrogatory No. 5 is supported by circumstantial evidence that the conspiracy itself caused Affiliated's injury.

HN4[] When direct evidence points to a conspiracy to injure the plaintiff, as in the case at bar, a court can find causation on the basis of circumstantial evidence and inference. As this court has noted: "in cases where the defendants' acts are motivated by intent to injure the plaintiff, the inferential leap to the finding of fact of damage is not great. Indeed, one court has found it virtually nonexistent: 'Such damage need not be made patent item by item as on a balance sheet. The mere unlawful combination over a period of time to eliminate competition is proof of damage.'" *Malcolm v. Marathon Oil Co., 642 F.2d 845, 855 (5th Cir. 1981)* (quoting *Fox West Theatres Corp. v. Paradise Theatres Building Corp., 264 F.2d 602, 608 (9th Cir. 1958))*.

Second, the record contains sufficient evidence supporting the inference that co-conspirators prevented Affiliated from obtaining a franchise. The trial court agreed with plaintiff's assessment that Interrogatory **[**24]** No. 3 reflects the jury's "apparent conclusion that the conspiracy to limit competition was an agreement or understanding that franchises would be awarded only to those applicants that were approved by Gulf Coast and other nondefendant participants." *519 F. Supp. at 998*. The trial court held, however, that there is no evidence in the record "either direct or inferential, [that] provides the necessary connection between the second theory of conspiracy to exclude non-conspirators and the plaintiff's failure to receive a franchise." *519 F. Supp. at 1006*.

We disagree; substantial inferential evidence exists. For example, Affiliated's attorney, Al Levin, testified that when he talked to Assistant City Attorney Adrian Baer in November he was told that "the decision as to who was going to get what areas, specifically in terms of the actual boundaries, were still under negotiations, but the decision as to who was fait accompli." Plaintiff's exhibit No. 151, at 84. When Levin then contacted Gulf Coast's attorney he was told "as far as I am concerned, Al, it's too late; the pie has already been cut." We note that the trial court itself recognized that "an inference can be derived from **[**25]** the testimony [of Al Levin] that the defendants had decided who would get franchises regardless of what geographic areas the franchises would cover." *519 F. Supp. at 1000 n. 11*. In other words, the decision of whom to exclude from the award of franchises did not hinge on the boundary agreements. Under the terms of the conspiracy, applicants who joined the plan obtained a franchise and those who wished to compete for a franchise received nothing.

Direct evidence exists that under the conspiracy, Gulf Coast and the other conspirators, in conjunction with the Mayor and City Council had the power to approve or veto plaintiff's attempt to obtain a franchise. Mayor McConn stated that his vote was subject to the wishes of the conspirators because of their political clout. *519 F. Supp. at 1016*. Councilmen Goyen, Robinson, and Westmoreland testified that they would have voted to grant Affiliated a franchise if Gulf Coast and the other applicants had given their blessing. *519 F. Supp. at 1004*. After hearing Affiliated's presentation at a City Council meeting on December 12, 1978, two Councilmen encouraged the City Legal Department and the applicants to "see if [you] can work out something." **[**26]** A document prepared by the City between November 28, 1978, and December 20, 1978, provided for changed boundaries, noting that "I-10 line shifted to Hwy. 290 without Goldberg's tract -- contingency." Plaintiff's exhibit 56. The **[*1566]** record evidence reveals that this alternative was contingent upon the approval of Gulf Coast and the other conspirators. Reasonable men could certainly have drawn the inference that Affiliated's application was denied because Gulf Coast and the other participants in the conspiracy vetoed its application.

Third, the record contains evidence that absent a conspiracy, Affiliated would have obtained a franchise on the merits of its application. Citing Malarkey's testimony, the trial court held that all of the applications, including plaintiffs, were "well below standard and not at all informative as to many important aspects of the franchise application." *519 F. Supp. at 1009*. Although this conclusion is debatable, there can be little doubt that Affiliated was more qualified to receive a franchise than the five successful applicants. Moreover, the evidence demonstrates, so the jury could infer, that Affiliated would have received a franchise if **[**27]** the conspiracy had not prevented a consideration of its application on the merits. Malarkey testified that the most important part of a franchise application concerns a firm's financial qualifications. He testified that Affiliated's application was the only one that contained enough financial information to have permitted the City Council to make a preliminary decision as to its ability to construct a cable system. He stated that Affiliated was financially qualified and that Gulf Coast was not. The last audited financial statements contained in Affiliated's application reveal that it had assets of $25,294,266 and equity of $18,622,383. Plaintiff's exhibit 83. Gulf Coast, on the other hand, had assets of $366,259 and equity of $327,259. Plaintiff's exhibit 10. Moreover, by 1980 many of the conspirators had been bought out by out of town corporations and Gulf Coast had borrowed half of its debt from another company. Plaintiff's exhibit 55, at part II, *§ 1*. Affiliated, on the other hand, had the qualifications of close ties to the community it sought to serve and the capacity to provide immediate service. We find that the jury could properly infer from the preceding evidence **[**28]** that Affiliated would have obtained a franchise if the conspiracy to exclude nonconspirators had not eclipsed competition on the merits.

V.

NOERR-PENNINGTON DOCTRINE

HN5[] The *Noerr-Pennington* doctrine provides an exception to antitrust liability enabling citizens or business entities to influence or to petition public officials to take official action that will harm or eliminate competition. *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*. When such petitioning is a mere sham or the public officials are participants in the conspiracy, however, there is no exception to antitrust liability. The trial court instructed the jury fully and correctly with regard to the *Noerr-Pennington* doctrine, [6] the State Action Exemption, and Legislative Process Immunity.

---

[6] Indeed, if the instruction was anything but neutral it was favorable to the defendants. It provided:

Defendant Gulf Coast claims that the agreements with Houston Cable and Westland to divide or allocate territories within which certain applicants would apply for a franchise constituted an exercise of Gulf Coast's right to petition government and therefore falls outside the scope of the Sherman Act. The Constitution ensures the right of all persons, whether acting individually or in concert, to petition government for political action, recognizing that persons in the exercise of these constitutional rights naturally will petition government for political action that is favorable to their particular interests and unfavorable to the interests of others. The Supreme Court has declared that this right to petition government for political action is paramount, and that the concerted effort of various parties genuinely to influence public officials does not in any way violate the antitrust laws regardless of intent or purpose. Joint efforts truly intended to influence public officials to take official action do not violate antitrust laws even though the efforts are intended to eliminate competition, unless one or more of the public officials involved was also a participant in the illegal arrangement or conspiracy.

Accordingly, you must determine whether any City official participated in the alleged conspiracy, as that term is defined in this Charge. You may not infer that any member of the City Council or the Mayor was participating in or acting in furtherance of a conspiracy simply because that person accepted or agreed with a position urged by an applicant. A public official's communications with a constituent, even if that official thereby is influenced to favor the constituent, is within the parameters of the legislative process, and cannot violate the antitrust laws so long as the officials' activities are not the product of an illegal arrangement.

Also you must determine whether the petitioning activities of the defendants Gulf Coast, Clive Runnells or Jack Trotter were genuine attempts to influence public officials with regard to political action.

The petitioning activity must be genuine. Protection does not extend to purported petitioning that is in fact a mere sham to cover what actually is nothing more than an attempt to interfere directly with the business of a competitor. That is, protection does not extend to activities that are merely a pretext for inflicting on plaintiff an injury not caused by any government action.

Thus, if you should conclude from your review of the evidence that defendants City of Houston and Mayor McConn did not participate in any illegal agreement or conspiracy and that defendants Gulf Coast, Runnells and Trotter did nothing more in his case than meet with other franchise applicants and with City officials for the purpose of persuading the City to award them a cable television franchise on some basis, and in furtherance of that objective they reached boundary agreements with the Houston Cable and Westland groups, then you may not find that these defendants violated the antitrust laws. Even if you believe

[29]** **[*1567]** In its answer to Interrogatory No. 3 the jury found a conspiracy and implicitly found that the defendants were not entitled to immunity. In analyzing the jury's ruling the trial court produced an exhaustive study of why the public co-conspirator exception to the *Noerr-Pennington* doctrine was applicable to the instant case. The district court's analysis of this issue and the record evidence is thorough and correct. *519 F. Supp. at 1016-23*. Therefore, we need not recount his analysis and reasoning. Numerous examples of official involvement in the conspiracy abound, which indicate that the trial court did not err in finding that the co-conspirator exception applied. For example, the City fired its own expert when he wrote a report unfavorable to Gulf Coast, and then it doctored his report. We agree with the trial court's assessment that the actions of the Mayor and City Council indicate a "vigorous involvement in orchestrating certain aspects of the conspiracy." Thus, its application of the co-conspirator exception was correct.

Since the trial court found the co-conspirator exception applicable it did not discuss the sham exception. We note that a defendant cannot **[**30]** rely on *Noerr-Pennington* immunity when the activity to influence government action is a mere sham to hide what is essentially an attempt to interfere with a competitor's business. *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 144, 81 S. Ct. 523, 533, 5 L. Ed. 2d 464 (1961)*. ***HN6***[] Petitioning calculated to deny a competitor meaningful access to a governmental entity is within the sham exception to *Noerr-Pennington* immunity. *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 512, 92 S. Ct. 609, 612, 30 L. Ed. 2d 642 (1972)*; *Mason City Center Ass'n v. City of Mason City, 468 F. Supp. 737, 745 (N.D.Iowa 1979)*. Whether or not such conduct is within the sham exception is a fact issue for the jury. *Feminist Women's Health Center v. Mohammad, 586 F.2d 530, 543 (5th Cir. 1978)*, *cert. denied*, *444 U.S. 924, 100 S. Ct. 262, 62 L. Ed. 2d 180 (1979)*.

Appellee argues that Affiliated was not denied access to the City Council but had an opportunity to present its application formally and informally. Appellee questions **[*1568]** the applicability of *California Motor Transport, supra* (where the defendant used frivolous **[**31]** lawsuits to deny a competitor access to a court or agency), in the legislative context of a city council awarding franchises. *See* 1 P. Areeda & D. Turner, ***Antitrust Law*** para. 203 (1978). We need not reach this disputed issue because the defendants' activities were clearly within the co-conspirator exception as the jury implicitly found in its answer to Interrogatory No. 3. We note in passing, however, that the record may indeed contain enough evidence to justify application of the sham doctrine. While in the process of trying to obtain a franchise, Affiliated's attorney was told by Gulf Coast's attorney that the political realities were that " the city is locked up by five franchises." Record on Appeal, vol. 22, at 34. This and similar evidence of the activities of McConn, the City Council and the other co-conspirators may have effectively blocked meaningful access to a fair and impartial consideration of Affiliated's application by the city such that the sham exception applies.

VI.

THE MAYOR'S IMMUNITY

Appellee McConn argues that he is entitled to absolute, or in the alternative, qualified immunity. This circuit and others have recognized that ***HN7***[] a municipal official **[**32]** acting in his legislative capacity is entitled to absolute immunity from civil suits. *E.g., Hernandez v. City of Lafayette, 643 F.2d 1188 (5th Cir. 1981)*, *cert. denied*, *455 U.S. 901, 102 S. Ct. 1242, 71 L. Ed. 2d 440 (1982)*; *Bruce v. Riddle, 631 F.2d 272 (4th Cir. 1980)*; *Gorman Towers, Inc. v. Bogoslavsky, 626 F.2d 607 (8th Cir. 1980)*.

---

that the purpose or the necessary effect of meetings attended by Gulf Coast or its representatives was to exclude plaintiff from obtaining a franchise, you may not find that the defendants were guilty of a conspiracy in restraint of trade if you believe that the defendants' conduct genuinely was aimed toward influencing the City to take favorable action toward them in granting a franchise. On the other hand, if you find that the activity was not really an attempt to influence an official to take official action, but was nothing more than a sham -- an attempt to interfere directly with the business of a competitor, you may consider those actions and any reasonable inferences you may draw from those actions in determining whether defendants engaged in a conspiracy in violation of the antitrust laws.

The burden of proof with regard to this instruction is on the defendants. They must prove by a preponderance of the credible evidence that the petitioning activities were genuine.

In *Hernandez*, we held that local legislators are entitled to absolute immunity for conduct in furtherance of their duties. We also recognized that although a Mayor is the Chief Executive Officer of a city, "he is entitled to absolute immunity from suit for acts taken in a legislative capacity." *643 F.2d at 1193* (citing *Supreme Court of Virginia v. Consumers Union of the United States, 446 U.S. 719, 731-34, 100 S. Ct. 1967, 1974-76, 64 L. Ed. 2d 641 (1980))*.

Although the Mayor of Houston serves in the traditional executive role, he also presides over and has a vote in the City Council, which functions as a legislative body. McConn contends that his activities connected with the award of the cable franchises were "more closely akin to that of a legislator than an executive." Since we find that McConn is entitled to qualified **[**33]** immunity we need not reach the question of his absolute immunity. We note in passing, however, that on the facts before us it is unlikely that he is entitled to absolute immunity. [7]

[34]** **[*1569]** The trial court's interpretation regarding qualified immunity is inapplicable now because the court did not have the benefit of the Supreme Court's decision in *Harlow v. Fitzgerald, 457 U.S. 800, 102 S. Ct. 2727, 73 L. Ed. 2d 396 (1982)*. In *Harlow* the Court announced that the question of qualified or good faith immunity for public officials is to be determined under an objective standard. The court held that:

> ***HN8***[] government officials performing discretionary functions generally are shielded from liability for civil damages insofar as their conduct does not violate clearly established statutory or constitutional rights of which a reasonable person would have known.

457 U.S. at 818, 102 S. Ct. at 2738. Assuming that the law in question was clearly established, an official can still prevail if he can show "extraordinary circumstances and can prove that he neither knew nor should have known of the relevant legal standard." *Id. at 819, 102 S. Ct. at 2739*.

---

[7] "The Supreme Court has long held that no immunity exists for actions outside the sphere of legitimate legislative activity." *Espanola Way Corp. v. Meyerson, 690 F.2d 827, 829 (11th Cir. 1982)*, *cert. denied*, ***460 U.S. 1039, 103 S. Ct. 1431, 75 L. Ed. 2d 791 (1983)***. Although McConn's votes at the City Council meetings and some of his other activities were part of the legislative process, he also undertook substantial acts outside of his legislative capacity, which were neither legitimate nor in furtherance of his legislative duties. Mayor McConn participated in and promoted an illegal conspiracy, and intervened several times to apply pressure on Affiliated and the conspirators, doing so outside of his legislative capacity.

The Mayor testified that the franchise process was conducted in an open, public forum. The Public Service Department prepared a questionnaire for all applicants and hired a consultant to evaluate the applications. The public was thus lead to believe that there would be competition on the merits for the franchises, even if the competitors drew the particular boundary lines. The city's expert criticized the application process, determined that only two applicants were qualified, and that three applicants, including Westland, should be rejected.

The Mayor did not adhere to the publicly announced program of granting franchises on the basis of critical evaluation. Instead, the franchise ordinance was drafted by the conspirators, the expert was fired, his report doctored, and the City Council's decision was made solely on the basis of who participated in the conspiracy.

The Mayor did not publicly reveal that to repay a personal debt he had intervened to guarantee a franchise for his lawyer. He never announced that the city's expert had been fired because his recommendations were contrary to the design of the conspiracy. He did not inform the public that the expert's report had been altered to make the conspirators' applications appear qualified and meritorious. He never admitted that the information in the applications was not a factor in the decision-making process. These facts and others belie the contention that the Mayor's acts were part of a legitimate legislative process. As Judge Bue noted, the City was "vigorous[ly] involve[d] in orchestrating certain aspects of the conspiracy" and the Mayor "directed" some of the activities of the conspirators as "an active co-conspirator not content merely to accede to the wishes of private parties." *519 F. Supp. at 1014, 1016*. The illegitimate nature of the Mayor's actions explains why the jury found Runnells (Gulf Coast's attorney) and Trotter (financier) innocent, yet held McConn guilty -- despite a generous *Noerr-Pennington* instruction.

McConn contends that the state of the law regarding a municipal official's liability for an antitrust violation was unsettled in 1978. Since he could not have known that he would be liable **[**35]** for violating the ***antitrust law***, he argues that he is entitled to qualified immunity.

We take note of the fact that at the time the franchises were granted it was unclear whether or not an antitrust violation occurred under the rule of reason when a city let franchises in an uncompetitive manner. Second, it was uncertain whether or not home rule cities were entitled to *Parker* immunity. *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. There were several recent cases indicating that a city or political subdivision of a state could not use *Parker* immunity to avoid the antitrust laws without a state mandate to displace competition. *Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)* (decided March 29); *Whitworth v. Perkins, 559 F.2d 378, 381 (5th Cir. 1977)*, *judgment vacated*, *435 U.S. 992, 98 S. Ct. 1642, 56 L. Ed. 2d 81 (1978)*, *judgment reinstated*, *576 F.2d 696 (1978)* (decided July 17) (per curiam); *Kurek v. Pleasure Driveway and Park District of Peoria, 557 F.2d 580 (7th Cir. 1977)*, *judgment vacated*, *435 U.S. 992, 98 S. Ct. 1642, 56 L. Ed. 2d 81 (1978)*, *judgment reinstated*, *574 **[**36]** F.2d 892 (7th Cir. 1978)* (decided Sept. 18) (per curiam), *cert. denied*, *439 U.S. 1090, 99 S. Ct. 873, 59 L. Ed. 2d 57 (1979)*; *Woolen v. Surtran Taxicabs, Inc., 461 F. Supp. 1025, 1029 (N.D.Tex. 1978)* (decided Nov. 29); *United States v. Texas State Bd. of Public Accountancy, 464 F. Supp. 400, 403-04 (W.D.Tex. 1978)* (decided May 5), *modified on other grounds*, *592 F.2d 919*, *cert. denied*, *444 U.S. 925, 100 S. Ct. 262, 62 L. Ed. 2d 180 (1979)*; *Star Lines, Ltd. v. Puerto Rico Maritime Shipping Auth., 451 F. Supp. 157, 166 (S.D. New York 1978)* (decided May 3). *Contra* *Metro Cable Co. v. CATV of Rockford, Inc., 516 F.2d 220 (7th Cir. 1975)*.

The cases indicating liability, decided as or shortly before the franchise process occurred, [8] were breaking new ground and were not clearly established. Moreover, the guidance from the Supreme Court was limited because *Lafayette* was a plurality opinion. *See* *Hybud Equip. v. City of Akron, 654 F.2d 1187, 1195 (6th Cir. 1981)*, *judgment vacated*, *455 U.S. 931, 102 S. Ct. 1416, 71 L. Ed. 2d 640 (1982)*. It was not until *Community Communications Co. v. Boulder, 455 U.S. 40, 102 S. Ct. 835, 70 **[*1570]** L. Ed. **[**37]** 2d 810 (1982)*, that it became clearly established that a home rule city was not entitled to blanket *Parker* immunity and could thus be liable for violating ***antitrust law***. Consequently, the mayor could not, nor should not, have known that he was violating a clearly established law.

Although we find that the Mayor can avail himself of qualified immunity, we emphasize that this ruling does not effect his status as a conspirator. The jury found that the Mayor was a conspirator and we do not disturb this finding. The **[**38]** Mayor is absolved of liability only because applying the *Harlow* immunity standard he did not, as a matter of law, violate a clearly established law.

At oral argument McConn's attorney opined that municipal politics are municipal politics and that the appropriate remedy for the Mayor's acts was exercised by the voters of Houston when they booted McConn out of office. *See* *Tenney v. Brandhove, 341 U.S. 367, 378, 71 S. Ct. 783, 789, 95 L. Ed. 2d 1019*. Certainly currying political favor is the hallmark of a good politician and is neither illegal nor violative of the ***antitrust law***. Nevertheless, in future cases involving franchise letting, when an elected official instigates, directs, or actively participates in an illegal conspiracy designed to circumvent competition on the merits -- when the state has not provided the city with an anticompetitive mandate -- a reasonable man should know that such actions violate clearly established ***antitrust law***.

Judgment n.o.v. should not have been granted and the court below is hereby REVERSED with instructions to reinstate the jury verdict and grant the plaintiff judgment against Gulf Coast only.

Concur by: HIGGINBOTHAM

---

[8] In July and August of 1978, Houston began taking applications for franchises. In October the city hired an expert and in November the plaintiff applied for a franchise. On November 29, 1978, the city ordinances were tabled and the plaintiff was granted a hearing on its application. On December 12, 1978, the plaintiff made its presentation and all applications were thereafter referred to the Public Service Department for evaluation. On January 10, 1979, the final franchises were awarded.

Concur

PATRICK E. HIGGINBOTHAM, **[**39]** Circuit Judge, concurring specially:

I

To understand the limits of our holding it is important that we isolate the conduct found illegal. The jury's answer to interrogatory number one tells us that the conspiracy in unreasonable restraint found in number three *did not* include "agreements on boundary lines so as to divide the geographic areas for which these applicants would seek cable television franchises." On the evidence, reconciliation of the answers to interrogatories one and three requires the conclusion that the jury found that the city and the private defendants agreed that Affiliated's application would not be considered -- that the city would not consider an application from companies not approved by the original five applicants for franchises. The jury could thus have concluded that the principal purpose of the concerted activity was not to influence public officials or to further any proffered goal of the city other than that of blocking competitive access. Reconciliation of the jury's answers leaves little room for any conclusion that the jury decided otherwise.

The point here is more than whether evidence supports the jury verdict. The relevant point is **[**40]** that the *only* conduct condemned today is an agreement between the city and private defendants to deny a competitor access to the process created by the city for the awarding of franchises. The majority opinion does not otherwise judge the legality of the process. The holding today is then relatively straightforward in its condemnation of a classic restraint and the antitrust rule for municipalities which emerges is a modest one indeed.

Equally, our decision should not be read to imply that a municipality must employ competitive bidding in the award of all contracts and franchises or the procurement of all goods and services. Such a conclusion would be inferable only if we were to hold that the public interest in competition must predominate over other legitimate municipal interests as it predominates over the private profit motive. Emphatically, we have not so held.

The municipal defendants have stated that they intended to favor minority businesses and locally-based businesses, but, even assuming that both of these are legitimate public purposes, neither policy explains the selection of the Gulf Coast consortium in preference to Affiliated. These defendants have also **[**41]** testified that they **[*1571]** hoped to avoid the burden of selecting between competing applicants for particular franchise areas, and only the Gulf Coast group presented a package proposal featuring total city coverage with no overlapping boundaries. Selecting from among competing applicants those companies most fit to provide cable service to the citizens of Houston was a paradigmatic governmental function, and it is difficult to conclude that the desire of the mayor and city council to escape making this determination was itself a legitimate municipal purpose. [1] As the municipal defendants have thus failed to advance any public policy justifying their conduct, I conclude that the jury was warranted in concluding that their anticompetitive actions merit the imposition of antitrust liability.

[42]** II

Isolating the restraint which we today condemn also places in perspective the limits of our rulings regarding *First Amendment* protections of petitions for redress. The *Parker* principle stunted the growth of *Noerr-Pennington* until *City of Lafayette* and *City of Boulder* were decided. The full reach of *Noerr-Pennington* by necessity is now open for exploration. But today we do no exploring. In the present posture of this case there is no petition to government at issue. We do not face a successful request for governmental action with anti-competitive results where the participation of government was confined to that of decisionmaker. Instead, the condemned conduct included active participation by the city with citizens in the exclusion of a competitor. Resolution of the host of difficult issues traveling under the *Noerr-Pennington* rubric must await another day.

---

[1] Regardless, the jury could have inferred from the evidence that the city and the defendant applicants agreed that no other applicant would be considered without their permission. It is difficult to defend action as being that of city government, with all the weight such ought to carry, when the decisionmaking is placed in the hands of private potential competitors.

In sum, I concur with Judge Garza's opinion and add this separate writing in parts I and II only to identify issues we do not decide today. I continue in part III to highlight an issue presented by the application of antitrust laws to municipalities and implicit in today's decision.

III

[43]** The Supreme Court in *City of Lafayette* and *City of Boulder* left the inferior courts with the exquisite task of fitting the antitrust laws to municipal government. The rule of reason is at the center of the uncertainty.

Basic antitrust principles teach that private citizens and corporations cannot weigh the public good against the competitive impact of their agreements. [2] It is, for example, no answer to price-fixing charges that competitive letting of design work will cause inferior design. It is for government to weigh the public good against any anti-competitive impact. When the antitrust laws are then found to be applicable to municipalities, how we may balance the competitive impact of decisions by city government against the perception of the public good is uncertain.

This **[**44]** question is posed when city government acts in its unique role of local government, whatever be the issue when it acts as a consumer of goods and services. Arguably, when the city enters the marketplace to compete for the custom of others, or to purchase window cleaners for the City Hall windows, its activity is virtually indistinguishable from private business. Where, however, the city acts as a regulator or governor of the sales and deliveries of goods and services to its constituents, it is engaged in a role dissimilar from that of private business.

In our economic system, private business enterprises are presumed to respond predominately, if not exclusively, to the profit motive. By contrast, the concept of "profit" *per se* is alien to the purposes of a unit **[*1572]** of government. Consequently, the clash of interests necessitating an ***antitrust law*** -- the private desire to reap extra-normal profits versus the public interest in free competition -- will not appear in its traditional form when the accused antitrust conspirator is a governmental entity.

The underlying principle of the antitrust laws, starkly stated, is that when the private pursuit of profit conflicts **[**45]** with the public interest in competition, the public interest shall prevail. In turn, the traditional "rule of reason" states that a present constraint on competition may be justified only by an ultimately pro-competitive effect. Other societal benefits which may allegedly flow from an anticompetitive act are irrelevant because it is not the businessman's prerogative to determine how those benefits may best be obtained. Rather, we presume that competition will ordinarily be attended by greater social benefits than any other market structure. It is then the prerogative of government alone to determine when the competitive process is inadequate to meet the needs or the best interests of society. In such cases, the government may pursue three related and often-overlapping courses: It may replace or restrict competition, for example by adopting a licensing procedure; it may supplement competition, for example by enacting product safety or anti-pollution laws; and it may substitute for competition, for example by regulating the price charged by a natural monopolist.

Though the majority has not addressed this issue directly, its opinion signifies amenability to the rationale that the **[**46]** "rule of reason" which applies when the accused is a governmental entity must differ from that encountered when the accused is a private business. This is so because the majority opinion ultimately rests on a duty of the city to justify the absence of competition in awarding franchises; political patronage is not justification. Under this rationale, public interests other than competition can be balanced against the interest in competition, because it is the particular prerogative of government to advance these other interests. Thus, for example, there was evidence in this case that the City of Houston planned to favor minority-owned businesses in awarding the cable franchises. Such a policy is anti-competitive in that it accords an advantage to certain businesses based on a non-economic criterion, but no antitrust liability should result if one decides that the advancing of public policy is "legitimate" and outweighs any adverse impact on competition.

---

[2] Given the procedural posture of this case, the parties do not attack the jury instruction regarding rule of reason. Regardless, how the rule is actually applied gives it meaning apart from its traditional phrasing.

The majority does not surface the problem, but, by analogy to other uses of private suits to implement social goals, such a rationale ought to be implemented by allocating to the party best equipped to make the proof the burden **[**47]** of going forward with the evidence. Thus, when a plaintiff has established a prima facie case of anticompetitive conduct by a municipal defendant, the burden on the municipality would then be to articulate legitimate governmental interests advanced by its conduct which put at issue whether the gains reasonably expected to be achieved by its anticompetitive conduct justify the degree by which competition was reasonably expected to be diminished. The ultimate burden of persuasion that the restraint, so measured, was unreasonable, would be on the plaintiff.

Application of such a rule will not be easy. Critically, such a rule does not reconcile applicability of the federal antitrust laws to municipalities with those principles of federalism which counsel deference to the balancing of public interests performed by local units of government under authority delegated by the states. To the contrary, it would give to the courts the task of balancing a municipal objective against its anticompetitive effect. Reviewing the "reasonableness" of such restraint could travel against our commitment to federalism.

A rule of reason analysis that allows government purpose to be directly weighed **[**48]** against competitive impact seems antithetical to federalism. Yet, the premise of this concern is that decisions by municipal government reflect a species of governmental choice and that such review is an intrusion of the federal government into the affairs of local government. This premise, **[*1573]** however, fails to accept that in this sense the majority opinion in *City of Boulder* denied the sovereignty of municipal government (we are not a nation of city states). In doing so, the court sanctioned this intrusion into free decision-making in a manner not dissimilar to limitations placed upon private business.

Finally, not to weigh the purpose of the restraint and the presence of less anticompetitive alternatives to achieving the purpose would render the rule of reason illusory, for its essence is balance. In sum, the weighty concerns about subjecting decisions of municipal government to traditional rule of reason measures were presumably considered and found insufficient to overcome the pro-competitive policies underlying the antitrust laws when the Supreme Court removed municipalities from the cover of *Parker v. Brown*. While in my view this is a treacherous path, **[**49]** as an inferior court we must accept that judgment and I read the majority opinion as doing so.

Dissent by: CLARK (In Part)

Dissent

CLARK, Chief Judge, with whom REAVLEY and E. GRADY JOLLY, Circuit Judges, join, dissenting in part.

This case came to be reheard en banc because the panel held that the City of Houston, its mayor and a cable franchise applicant committed a *per se* violation of *Section 1* of the Sherman Act. The en banc court abandons that position. Although the reasoning it substitutes lacks the sweep of the prior error, it remains just as wrong in reversing the district court's judgment in favor of Gulf Coast.

Initially, the majority fails to make the critical determination of relevant market. It compounds this legal error by choosing its own path through the facts to arrive at a result which ignores the contrary initial fact finding of the jury and the trial judge's fact reconciliation of the jury's two inconsistent findings. The result is to saddle a bidder for a municipal franchise with an erroneous 6.3 million dollar award for actions that are no more an antitrust offense than would be an agreement to establish separate churches in different parts of town.

Relevant **[**50]** *Market* -- The majority acknowledges that the city started this unfortunate affair when it made a political decision to let multiple franchises for cable TV coverage in Houston. What the majority then promptly ignores is that this final decision established the relevant market for each competitor as, not the city of Houston, but each discrete segment of the city that any competitor for a franchise wanted to designate. This elemental truth negates every anticompetitive conclusion the majority draws. When the proper concept of relevant market is put with the jury finding that there was no conspiracy in restraint of trade in the agreements which drew the proposed boundary lines, every doubt that this is not an antitrust case disappears. Affiliated Capital could have competed in any one or more of the relevant markets designated by any applicant in the defendant group. Affiliated Capital could have competed in yet different markets by forming its own group and dividing territories differently. When it belatedly demanded a choice piece of Gulf Coast's territory, the rebuff was neither conspiratorial nor anticompetitive.

Inconsistent Special Verdicts -- The jury determined that **[**51]** the boundary line agreement to divide geographic areas between franchise applicants was not part of a conspiracy in unreasonable restraint of trade. This finding is a lion in the street for the majority's fact conclusions on causation. This jury fact finding was not a casual aside. The plaintiff insisted this was a major fact issue in the case. The court's instructions as well as its interrogatories made it so. How does the majority harmonize this critical, well supported finding which the trial judge who heard and saw the witnesses found controlling? It recasts the jury's first special verdict -- which found the boundary agreements were not part of a conspiracy in unreasonable restraint of trade -- as a finding that multiple franchises were preferable to one.

The majority's forced reconciliation of the jury's answers to interrogatories 1 and 3 is no reconciliation at all. It merely substitutes this court's finding for that of **[*1574]** the jury. The only reasoned path to resolution of the case through reconciliation of the jury's otherwise inconsistent answers is that followed by the trial court -- to grant judgment for the defendants on the basis of no causation.

[52]** Alternatively, conceding for the sake of argument that there could be some basis for finding causation of damage to plaintiff in a conspiratorial refusal by Gulf Coast to remake a valid boundary agreement, the decision of this court should be that the jury's answers to interrogatories were internally inconsistent and that a new trial is required. *Guidry v. Kem Mfg Co., 598 F.2d 402 (5th Cir. 1979)*; Wright and Miller Federal Practice and Procedure Civil § 2510. But the majority enters its own verdict on inconsistent findings remade at the appellate level. This is wrong.

Lack of Antitrust Injury -- Still more wrong is the court's approval of the use of the Sherman Act in this dispute to wound one who competed on the city's terms and reward a summer soldier who did not. The antitrust laws were not intended to restore losses caused by business mistakes or free market forces. Affiliated Capital, for reasons of its own, did not seek a cable TV franchise until others interested had legally agreed on market areas. That default is the sole proximate cause of its failure to get a franchise.

I concur in the result reached in Part VI of the majority opinion as to the mayor's **[**53]** qualified immunity. I also agree with the view expressed in Judge Higginbotham's concurring opinion that the majority's decision should not be read as a ruling that cities must use competitive bidding to award contracts and franchises. Such a ruling would drastically impede the development of a law of municipal antitrust liability which accords proper deference to municipal decision-making.

I respectfully dissent from the partial reversal of the judgment.

Casey v. Diet Center, Inc.

United States District Court for the Northern District of California

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN1[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The answer to the question whether one or two products are involved turns not on the functional relation between them, but rather on the character of the demand for the two items.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN2[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The test for separate products is whether the arrangement links two distinct markets for products distinguishable in the eyes of buyers. The test derives from the underlying rationale for the rule against tying to prohibit only those arrangements which create the possibility of foreclosing competition on the merits in a product market distinct from the market for the tying item.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN3[] **Price Fixing & Restraints of Trade, Tying Arrangements**

No tying arrangement can exist unless there is a sufficient demand for the purchase of the tied product separate from the tying product to identify a distinct product market in which it is efficient to offer the tied product separately from the tying product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN4[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Any inquiry into tying arrangements must focus on the markets in which the two products are sold and in which the anticompetitive forcing has its impact.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Business & Corporate Compliance > ... > Trademark Law > Conveyances > Franchises

HN5[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The tie of one product to another is per se illegal only if the seller possesses sufficient market power in the tying product to appreciably restrain trade in the tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

HN6[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

In the absence of the degree or the kind of market power that enables a seller to force customers to purchase a second, unwanted product in order to obtain the tying product, an antitrust violation can be established only by evidence of an unreasonable restraint on competition in the relevant market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

To find a distinct submarket based on price requires detailed consideration of other factors such as the precise contours of the alleged submarket, the spread of price levels throughout the market, the degree of price overlap, cross-elasticity of demand and price sensitivity.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Trademark Law > ... > Eligibility for Trademark Protection > Distinctiveness > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] Price Fixing & Restraints of Trade, Tying Arrangements

Uniqueness, of course, presupposes that competitors are in some way foreclosed from offering the distinctive product. Such barriers may be legal, as in the cases of patented or copyrighted products. Trademarks surely may be included in the list of such legal restraints, and, as with copyrighted material, the mere presence of competing substitutes is insufficient to destroy the legal, and more importantly the economic distinctiveness of the trademark.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Patent Law > ... > Utility Patents > Process Patents > Principles & Results

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN9[] Price Fixing & Restraints of Trade, Tying Arrangements

The court adheres to the principle applied by the Supreme Court that the proper focus of concern is whether the seller has the power to raise prices, or impose other burdensome terms such as a tie-in, with respect to any appreciable number of buyers within the market.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN10[] Robinson-Patman Act, Claims

Where the quantity of sales of the tied product operates as a measure of the buyer's intensity of use of the tying product, the seller may exact a premium from the more intensive users by charging supracompetitive prices for the tied product. Price discrimination, as such, of course, is unlawful only if it violates the Robinson-Patman Act, *15 U.S.C.S. § 13*, which requires a showing of lessened competition or tendency toward monopoly.

Antitrust & Trade Law > Sherman Act > Claims

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN11[] Sherman Act, Claims

In the absence of per se liability, plaintiffs bear the burden of proving that the purchase requirement violates the Sherman Act, *15 U.S.C.S. § 1* because it unreasonably restrained trade. That burden involves an inquiry into the effect of defendant's, requirement that its franchisees purchase its product on competition among suppliers of the product or its equivalents.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN12[] Regulated Practices, Price Fixing & Restraints of Trade

Without a showing of actual adverse effect on competition, plaintiff cannot make out a case under the antitrust laws, and no such showing has been made.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN13[] Private Actions, Standing

A plaintiff seeking to assert a claim under the Sherman Act, *15 U.S.C.S. § 1*, must also demonstrate actual injury causally linked to defendants' antitrust violation.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN14[] Private Actions, Standing

One of the essential elements for recovery under the ***antitrust law*** is that the claimant be injured or damaged.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN15[] Private Actions, Standing

Absent injury, a private person has no right to complain of a violation of the Sherman Act, *15 U.S.C.S. §§ 1* and *2*.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN16[] Private Actions, Standing

A plaintiff who fails to adduce evidence of injury is not entitled to have his claim submitted to the jury.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Clayton Act

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN17[] Tying Arrangements, Clayton Act

15 U.S.C.S. § 26 provides for private injunctive relief solely "against threatened loss or damage by a violation of the antitrust laws" and a finding of the possibility of future injury is thus as much a prerequisite for enjoining a tying arrangement as one of prior injury is for awarding treble damages.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Business & Corporate Law > Distributorships & Franchises > General Overview

Business & Corporate Compliance > ... > Trademark Law > Conveyances > Franchises

Trademark Law > Conveyances > General Overview

HN18[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The franchisee alleging an illegal tie to the franchised trademark does not meet his burden of proving the injury necessary to recover under *Section 1* merely by establishing that he paid an inflated or noncompetitive price for the tied product.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN19[] **Price Fixing & Restraints of Trade, Tying Arrangements**

To ascertain whether an unlawful arrangement for the sale of products has caused injury to the purchaser, the cost or value of both the tying and the tied products involved, free from the unlawful arrangement, must first be ascertained.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN20[] **Private Actions, Remedies**

In other words, a party to a tying arrangement has not suffered economic harm from the inflated price of the tied product where the seller might simply have reduced that price to a "competitive level" and correspondingly increased the price of the tying product. Thus, to demonstrate the injury necessary to establish defendant's liability, plaintiff must prove that the payment for both the tied and tying product exceeded their combined fair market value.

Opinion

[*1562] MEMORANDUM OF OPINION AND ORDER

This is an antitrust action brought by subfranchisees of defendant Diet Center, Inc., which franchises a system to promote weight loss and control for individual clients. Plaintiffs claim that defendants require franchisees [1] to purchase from Diet Center, Inc., at excessive prices the Diet Center Diet Supplement ("Diet Supp"), a nutritional tablet Diet Center clients must take. They argue that the forced purchase of Diet Supp constitutes a tying arrangement illegal per se under *Section 1* of the Sherman Act, *15 U.S.C. § 1*. The action is before the Court on cross-motions for summary judgment on the issue whether the purchase requirement is an illegal tying arrangement. No facts material to the disposition of these motions are in dispute, and no triable issue is presented. **[**2]**

I. *Background Facts*.

Diet Center is a nation-wide chain of approximately 1830 franchised weight-control **[*1563]** centers. The franchise is structured in three tiers. Diet Center, Inc., the primary franchisor, sells franchises to area franchisees who are permitted to subfranchise; area franchisees operate a total of 350 outlets directly, and subfranchise another 1130 outlets to third-tier operators. Plaintiff Garvey is a third-tier operator who subfranchises from defendant Jenkins Diet Centers which is an area franchisee of defendant Diet Center, Inc. Plaintiffs Casey and Johnson are joint operators who subfranchise one outlet from defendant Archibald, also an area franchisee of Diet Center, Inc., and a second outlet from defendant Jenkins.

Diet Center offers a five-phase weight-control program, the second or "reducing" phase of which is relevant here. Clients in **[**3]** that phase (1) attend daily personalized counseling sessions, (2) follow prescribed diets, (3) have access to nutrition and behavior modification classes, and (4) take various nutritional products daily, including eight Diet Supps which they obtain from their Diet Center outlet. Clients pay a weekly fee which covers all costs including that of the Diet Supps.

The Diet Supp is a chewable tablet consisting of a vitamin B complex in a base of soy protein and invert sugar, together with panothenic acid and niacin. Its inactive ingredients, not listed on its label, are excipients and binding agents which give the supplement its taste, texture, and consistency. It serves as a nutritional supplement, an appetite depressant, and a digestive, and both parties concede its importance to the Diet Center program.

All Diet Center franchisees must purchase their requirements of Diet Supps (either directly or through a subfranchisor) from Diet Center, Inc., which has produced the tablets at an in-house laboratory since early 1980; before then, Diet Center, Inc., had the supplement manufactured by outside sources. Diet Center, Inc., has never sold Diet Supps separately from its weight control program. **[**4]** Supplements with the same active ingredients are or could be made available from other sources, but Diet Center, Inc., claims that the quality of its ingredients and the particular excipients it uses to create taste and texture are secret and unique.

Diet Center franchisees are charged a refundable "initial franchising fee" of $24,000 (this amount has varied over the years) and a "continuing License Fee" of approximately $1.05 per dieter per day of enrollment in the program. It is unclear from the record whether the license fee is a charge solely for the Diet Supp, solely for the franchise (i.e., a royalty), or both, primarily because Diet Center, Inc., has been inconsistent in characterizing the fee in license agreements, disclosure documents, and promotional literature. In any event, the fee covers the cost of the Diet Supp. Defendants do not appear to dispute that a dieter's daily ration of Diet Supps costs Diet Center, Inc., from 35 to 45 cents to produce, an amount it has also on occasion characterized as the price to subfranchisors of the Diet Supp. Subfranchisors pass along these charges to subfranchisees with a mark-up of about 50 cents which covers their charge for processing **[**5]** orders for the Diet Supp. Plaintiffs maintain that products equivalent to the Diet Supp are available for 25 to 30 cents from various sources including a former Diet Center franchisee, a Diet Center competitor, and the laboratory which originally produced the Diet Supp.

---

[1] Although plaintiffs are technically subfranchisees, they will be referred to as franchisees except where the context requires otherwise.

II. *Does the Diet Center Franchise Package Tie Separate Products*

Diet Center, Inc., offers its franchisees a comprehensive program of weight reduction and control services, products, and techniques. Sufficient goodwill attaches to the Diet Center trademark to induce franchisees to pay for the right to operate the program and pay for its component products such as the Diet Supp. Plaintiffs argue that this franchise arrangement is a tying agreement illegal per se because it ties two products and because Diet Center possesses sufficient market power in the tying product to appreciably restrain trade in the tied product, *Fortner Enters., Inc. v. United States Steel Corp., 394 U.S. 495, 499, 89 S. Ct. 1252, 22 L. Ed. 2d 495 (1969)* ("*Fortner I*"); *Northern Pac. Ry. Co. v. United States, 356 U.S. 1, 6, 2 L. Ed. 2d 545, 78 S. Ct. 514* ***[*1564]*** *(1958)*; *California Glazed Products, Inc. v. Burns & Russell* ***[**6]*** *Co., 708 F.2d 1423, 1427* (9th Cir.), *cert. denied*, *464 U.S. 938, 104 S. Ct. 348, 78 L. Ed. 2d 314 (1983)*. [2] Defendants argue first that the trademarked franchise and the Diet Supp are inseparable components of a single product which is therefore not subject to scrutiny as a tying arrangement.

[7]** In its recent decision in *Jefferson Parish Hosp. Dist. No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*, the Supreme Court held that defendant hospital's requirement that its patients employ the services of a specified group of anesthesiologists did not violate *Section 1*. A majority of the Court, however, rejected defendants' contention that hospital services and those offered by the anesthesiologists were inseparable merely because they were functionally integrated:

> Our cases indicate . . . that ***HN1***[] the answer to the question whether one or two products are involved turns not on the functional relation between them, but rather on the character of the demand for the two items.

104 S. Ct. at 1562.

The Court relied on *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 97 L. Ed. 1277, 73 S. Ct. 872 (1953)*, which held that advertising in a morning newspaper and in an afternoon newspaper was a single product because the purchasing advertisers viewed the newspaper reading public of both papers as fungible and not distinct, *id. at 613-14*. *Hyde* thus defined ***HN2***[] the test for separate products to be whether the arrangement "links two distinct **[**8]** markets for products . . . distinguishable in the eyes of buyers," *104 S. Ct. at 1562*. That test, it held, derives from the underlying rationale for the rule against tying to prohibit only those arrangements which create the possibility of "foreclosing competition on the merits in a product market distinct from the market for the tying item," *id. at 1563*.

In *Hyde*, plaintiff presented evidence that patients differentiated between hospital services and anesthesiological services: the latter were frequently separately arranged for and paid for. No such evidence is offered here. Although alternatives to the Diet Supp do exist, it does not follow that the purchase of the Supp or its equivalents by franchisees creates a distinct market. Under *Hyde*, "no ***HN3***[] tying arrangement can exist unless there is a sufficient demand for the purchase of the [tied product] separate from the the [tying product] to identify a distinct product market in which it is efficient to offer [the tied product] separately from [the tying product]," *104 S. Ct. at 1563*.

Here the demand for the Diet Supp is not separate from that for the franchise: it is generated wholly by the franchisee's operation **[**9]** of the franchise. Were it not for the Diet Center's franchised weight control program, there would be no market for the Diet Supp. Indeed, the Diet Supp may be purchased only by Diet Center

---

[2] The Ninth Circuit often transforms the per se rule into one of presumptive illegality. *See, e.g., Moore v. Jas. H. Matthews & Co., 550 F.2d 1207, 1213 (9th Cir. 1977)* ("the presumptive illegality of tie-ins"); *Roberts v. Elaine Powers Figure Salons, Inc., 708 F.2d 1476, 1479 (9th Cir. 1983)* (tying arrangements "presumptively unlawful" if certain elements exist). *But see Digidyne v. Data General Corp., 734 F.2d 1336 (9th Cir. 1984)* (referring to per se illegality). There is, however, no discernible distinction between that rule and the per se rule. The difference in terminology arises from the opportunity the Ninth Circuit affords a defendant to justify an otherwise illegal tie. *See, e.g., Moore, supra.*

franchisees who use it solely as an integral part of the Diet Center method. [3] Treating the Diet Supp as a separate market would thus not serve the purpose of the tying rule to protect distinct markets from anticompetitive restraints.

Ninth Circuit decisions have sought to address the separate products issue by application of two tests. In *Siegel v. Chicken **[*1565]** Delight, Inc., 448 F.2d 43, 48 (9th Cir. 1971)*, *cert. denied* **[**10]** , *405 U.S. 955, 92 S. Ct. 1172, 31 L. Ed. 2d 232 (1972)*, the court articulated a "function of the aggregation" analysis, but this has quite clearly been rejected in *Hyde*. More recently, the court, in *Krehl v. Baskin-Robbins Ice Cream Co., 664 F.2d 1348, 1353 (9th Cir. 1982)*, and subsequent decisions, rested on a distinction between business format systems and distribution systems, making the determination of separateness of franchised trademarks and component products turn primarily on the extent to which the trademark is associated in the public mind with the source of the allegedly tied product. *See also* *Roberts, supra note 2*, *708 F.2d at 1481*; *California Glazed Products, supra*; *Hamro v. Shell Oil Co., 674 F.2d 784, 787-88 (9th Cir. 1982)*.

Hyde, at least implicitly, appears to reject this approach. First, the Ninth Circuit test generates legal results based on the application of conclusory labels [4] unrelated to the focus of the "tying" inquiry set forth in *Hyde* -- "whether the arrangement may have the type of competitive consequences addressed by the rule [against tying]." Characterizing a particular franchise as business format or distributional does **[**11]** not aid in weighing the economic benefits that society is acknowledged to derive from franchises against any potential harm from the tie of component products. *See, e.g., Sullivan, Antitrust* 448-49 (1977). [5]

---

[3] This may be what the Court had in mind when it stated:

> Similarly, when a purchaser is "forced" to buy a product he would not have otherwise bought even from another seller in the tied product market, there can be no adverse impact on competition because no portion of the market which would otherwise have been available to other sellers has been foreclosed.

104 S. Ct. at 1560.

[4] "Easy labels do not always supply ready answers." *Broadcast Music, Inc. v. CBS, 441 U.S. 1, 8, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)*. The Third Circuit has expressed a similar concern:

> We are genuinely concerned that the law of tying is becoming a kind of semantic shell game, resting more on key words than on careful analysis. For that reason, we feel compelled to take a pragmatic and prudential, as well as jurisprudential, view of the problem before us, taking into our perspective both the nature of the franchising industry and the effects which may be perceived to flow from the decision under review.

Ungar v. Dunkin' Donuts of America, Inc., 531 F.2d 1211, 1222 (3d Cir.), *cert. denied*, ***429 U.S. 823, 97 S. Ct. 74, 50 L. Ed. 2d 84 (1976)***.

[5] There are compelling reasons against imposing on franchisors the uncertainty and risk of presumptive illegality inherent in courts' reliance on arbitrary labels. It is doubtful that a franchise agreement requiring franchisees to purchase certain products from the franchisor is so "plainly anticompetitive" or "lacking in redeeming virtue" as to warrant presumptive condemnation unless it can be fitted into the distribution system category. *See* *Broadcast Music, supra* note 4, *441 U.S. at 8* (blanket licenses of musical composition not unlawful per se).

Courts have recognized that tying may serve legitimate, procompetitive purposes, *see, e.g.*, Fortner II, supra, 429 U.S. at 619, n.10. It may for example, create certain production economies, see, e.g., *Principe v. McDonald's Corp., 631 F.2d 303 (4th Cir. 1980)*, *cert. denied*, ***451 U.S. 970, 68 L. Ed. 2d 349, 101 S. Ct. 2047 (1981)***, cited in *Roberts, 708 F.2d at 1482*; ensure quality control and consumer good-will, *see, e.g., California Glazed Products;* *Krehl, 664 F.2d at 1353-54*; and protect nascent industries, *see* *United States v. Jerrold Electronics Corp., 187 F. Supp. 545 (E.D. Pa. 1960)*, *aff'd*, ***365 U.S. 567, 5 L. Ed. 2d 806, 81 S. Ct. 755 (1961)***.

Moreover, courts and commentators agree that franchising itself enhances the ability of small businesses to compete effectively. *See GTE Sylvania v. Continental TV, Inc., 537 F.2d 980, 999-1000 (9th Cir. 1976)*, *aff'd*, *433 U.S. 36, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*. Other attributes often credited to franchising are that it tends to promote competition by expanding the number of sales outlets and creating efficiencies of production and distribution otherwise unattainable. It facilitates market entry by small

[12]** Second, the *Krehl* test directs attention to the market in which the ultimate consumer purchases but *Hyde* requires that ***HN4***[] "any inquiry . . . must focus on the . . . markets in which the two products are sold" and in which "the anti-competitive forcing has its impact," *104 S. Ct. at 1561*. **[*1566]** In the franchise context, the markets in which the tying and tied products are sold are those in which the *franchisees* purchase. Thus whether the franchise arrangement ties separate products is not necessarily related to the perception of ultimate consumers who purchase in a different market downstream from that of the franchisees.

Finally, franchise arrangements cannot necessarily be fitted into one of the two *Krehl* categories based on consumer perceptions and an assessment of good will. The present case is an example. The Diet Center trademark and franchise represent a program comprising numerous components, including daily weigh-ins and counseling, daily doses of Diet Supp, Vitamin C and calcium, specified diets, and weekly nutrition and behavior classes. Clearly this is not a simple distribution system in which the trademark and goodwill attach only to products manufactured **[**13]** by or otherwise identified with the manufacturer as in *Krehl* or *California Glazed Products*. Nor is it a business format system in which the trademark represents only a way of conducting business but not a particular component product, as was true of the Chicken Delight franchise in *Siegel*.

This case illustrates the difficulty of principled and consistent application of a test based on consumer perception. The individual client may not attach great significance to a particular component or product of the Diet Center program but the franchisor may reasonably treat each as an essential ingredient. Whether a particular product is essential to the program is more likely perceived by its creator than by consumers who are concerned with the end results obtained from participation rather than with the reasons for the program's success. Comparing the Diet Supp taken each day by Diet Center customers who may or may not give thought to its source with the paper plates on which fast-food customers are served their fried chicken is not helpful to arriving at a sound disposition of this case.

In sum, where, as here, franchisees bargain for the right to use a package of products and **[**14]** services none of which represents a market distinct from that of the franchise itself, the competitive purposes of the rule against tying are not served by fractionating the franchise into separate components. [6] **[**15]** In the absence of any evidence offered to establish the existence of a distinct market for the Diet Supp, the requisite element of separate products is not satisfied, there is thus no illegal tie, [7] and defendants are entitled to summary judgment on this issue.

III. *Does Diet Center, Inc., Possess Sufficient Market Power for Application of the Per Se Rule*? [8]

---

enterprises with little start-up capital. It retards the tendency toward vertical integration. It facilitates quality control and protection of franchisors' goodwill. And it promotes the development of innovative production techniques and expertise. *See Note*, A *Clarification and Reformulation of Prevailing Approaches to Product Separability in Franchise Tie-In Sales*, *67 Minn. L. Rev. 1165, 1173-75 (1983)*; *Note, A New Approach to the Legality of Franchising Tie-Ins*, 129 U. Pa. L. Rev. 1267, 1276-77 (1981). Thus, disincentives to the use of franchise arrangements created by the threat of per se or presumptive illegality dependent on vague and conclusory characterizations may affect the economy adversely.

[6] The Fourth Circuit used a somewhat analogous approach to reach the same result in *Principe, supra* note 6, *631 F.2d at 309*, which held a license to use McDonald's trademark and food preparation system inseparable from the required leasing of particular store premises:

> Given the realities of modern franchising, we think the proper inquiry is not whether the allegedly tied products are associated in the public mind with the franchisor's trademark, but whether they are integral components of the business method being franchised. Where the challenged aggregation is an essential ingredient of the franchised system's formula for success, there is but a single product and no tie-in exists as a matter of law.

[7] In the absence of disputed material facts, the issue of separateness is properly decided on summary judgment. *See* *Krehl, supra*; *Hamro, supra.* *Cf.* *California Glazed Products, supra.*

[8] The analysis of tying agreements has at times been muddled by the injection of an additional requirement that plaintiff prove "coercion." In *Moore, supra*, for example, the court held that "there must be some modicum of coercion shown," *550 F.2d at 1216*. It went on to find that the necessary coercion could be inferred from a showing than an appreciable number of buyers had accepted burdensome terms and defendant possessed sufficient economic power in the tying product. *See also,* *Hirsh v. Martindale-Hubbell, Inc., 674 F.2d 1343, 1347* (9th Cir.), *cert. denied*, ***459 U.S. 973, 74 L. Ed. 2d 285, 103 S. Ct. 305 (1982)***.

[16]** Even were the Diet Supp found to be separable from the trademarked franchise, **[*1567]** ***HN5***[] the tie of one product to another is per se illegal only if the seller possesses sufficient market power in the tying product to appreciably restrain trade in the tied product. In confirming the survival of a per se rule against tying, *Hyde* restricted its applicability to cases where "the existence of forcing is probable," *104 S. Ct. at 1560*. *See also Robert's Waikiki U-Drive, Inc. v. Budget Rent-a-Car Systems, Inc., 732 F.2d 1403, 1407 (9th Cir. 1984)*. [9] The Court cited patents, high market share, and the unique character of a product competitors are unable to offer as sources of market power that make forcing likely, *id. at 1560-61*. But ***HN6***[] in the absence of "the degree or the kind of market power that enables [a seller] to force customers to purchase a second, unwanted product in order to obtain the tying product, an antitrust violation can be established only by evidence of an unreasonable restraint on competition in the relevant market. . . . Any inquiry into the validity of the tying arrangement must focus on the market or markets in which the two products are sold, for that **[**17]** is where the anticompetitive forcing has its impact." *Id. at 1561*. Thus, following the reasoning in *Hyde*, the analysis here must focus on Diet Center, Inc.'s, sale of franchises to franchisees (and subfranchisees) for that is the market in which the tying and tied products are sold and in which any anticompetitive effect would arise.

[18]** The parties have provided little evidence concerning this market, having instead directed the Court's attention to the retail market in which the franchisees' services are sold to clients. Although that market is not the one relevant to the resolution of the tying issue in this action, the evidence offered illuminates Diet Center's position in the relevant market.

Both parties agree that franchisees compete at the retail level in what they call the service-assisted weight-loss program market, distinguished from a broader market that might include, for example, self-help methods of weight loss such as diet books and appetite suppressants. Plaintiffs posit the existence, however, of a submarket consisting of high-priced individual-counseling diet-related weight loss programs. That market is principally defined by price: plaintiffs claim that customers for such programs pay $30 per week and up, compared to $5 per week for non-individualized services. Given such price differentials and the availability of both kinds of services from single companies, they argue that there are distinct customer groups.

[*1568] The evidence submitted by plaintiffs is not sufficient to establish the **[**19]** existence of a submarket at the retail level. It is far too generalized and vague to fix any comprehensible line of demarcation. Market definitions based on price levels, moreover, have not found favor with courts. *See Brown Shoe Co. v. United States, 370 U.S.*

The Supreme Court in *Hyde* has made it clear that coercion, i.e. forcing, is simply a manifestation of market power.

[9] Application of the "forcing" concept confronts courts with a dilemma. Obviously a seller must have some degree of leverage or power to require buyers to accept the condition of having to purchase the tied product: if buyers always purchased the product voluntarily, the condition would be unnecessary. But if that leverage or power alone suffices to establish the presence of forcing and thus to evoke the per se rule, then every tying agreement would ipso facto be illegal per se. Such a result is clearly not what *Hyde* or earlier Supreme Court decisions intended. First, in the absence of a degree of market power sufficient to raise an issue under *Section 2* of the Sherman Act, a tying agreement, from the perspective of a defendant's competitor, is tantamount to a requirements contract subject to scrutiny under the rule of reason, *104 S. Ct. at 1568 n.51*. From the buyer's point of view, the tie resembles a non-price vertical restraint subject to the rule of reason under ***GTE Sylvania, supra*** note 5. Second, had the Court intended otherwise, the analysis in *Hyde* of competitive conditions in the tying product market would have been superfluous.

At base, "forcing" a buyer to accept a tie-in does not differ from "forcing" him to pay a particular purchase price. The seller simply takes part of the price for the tying product in the form of forced purchases of the tied product. To the buyer, the controlling consideration remains the aggregate price of the package. The anti-tying prohibition is aimed not at such market devices in general but at the unlawful use of market power to unreasonably restrain trade or to monopolize. As the Court stated in *Hyde*,

> Of course, the Sherman Act does not prohibit "tying," it prohibits "contracts . . . in restraint of trade." Thus, in a sense the question of whether this case involves "tying" is beside the point. The legality of petitioners' conduct depends on its competitive consequences, not whether it can be labeled "tying." If the competitive consequences of this arrangement are not those to which the per se rule is addressed, then it should not be condemned irrespective of its label.

104 S. Ct. at 1563 n.34.

294, 326, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962) ("medium priced" shoes found to compete with "low priced" shoes); United States v. Jos. Schlitz Brewing Co., 253 F. Supp. 129 (N.D. Cal.), *aff'd per curiam*, 385 U.S. 37, 87 S. Ct. 240, 17 L. Ed. 2d 35 (1966) (premium and non-premium beers not separate lines of commerce). Further, **HN7**[] to find a distinct submarket based on price requires detailed consideration of other factors such as the precise contours of the alleged submarket, the spread of price levels throughout the market, the degree of price overlap, cross-elasticity of demand and price sensitivity. *See* JBL Enters., Inc. v. Jhirmack Enters., Inc., 509 F. Supp. 357, 373-75 (N.D. Cal. 1981), *aff'd*, 698 F.2d 1011 (9th Cir. 1983). Virtually no evidence has been offered on these points.

Even if price levels were found to suggest a high-end submarket at the retail level, there is nothing before the Court to indicate **[**20]** the existence of a comparable submarket in the market where franchises are sold. There is no reason to suppose a priori that different weight loss program franchises are not "reasonably interchangeable by [franchisees] for the same purposes," United States v. E.I. Du Pont & Co., 351 U.S. 377, 395, 100 L. Ed. 1264, 76 S. Ct. 994 (1956). The retail price of the product is only one factor that might bear on potential franchisees' decisions: others include the cost of the franchise, the quality of the product or service franchised, the demonstrated goodwill among consumers, and profit potential. Nothing before the Court affords a basis for narrowing the market beyond the definition the parties agree on, the nation-wide service-assisted weight-loss market.

The inquiry then becomes whether Diet Center, Inc., possesses the requisite power in that market to support application of the per se rule. To begin with, plaintiffs allege none of the factors on which the Ninth Circuit recently relied in *Data General, supra* note 2, to find that defendant computer manufacturer possessed sufficient market power in the tying product market to foreclose competition in the tied product market. **[**21]** [10] There the tying product, a computer software program, was unique among competing products and could not be reproduced without infringing defendant's copyright or utilizing its trade secrets. Creation of a comparable system was conceded to be economically infeasible. Moreover, the court found many of defendant's customers to be "locked in" to use of defendant's tying product by their substantial investment in compatible application software. No such evidence is offered here. Diet Center's competitors are not prevented from developing or offering a comparable diet program. Plaintiff alleges no patent, copyright or monopoly power of any sort. Defendants' franchisees are not "locked in" to the tying product by substantial investment; indeed, the initial franchising fee is conceded to be refundable. Nor are there technological barriers even remotely analogous to those the court found dispositive in *Data General*.

[22]** Plaintiffs argue that Diet Center, Inc., wields market power solely by virtue of its trademark which is alleged to render the Diet Center franchise sufficiently unique to enable defendants to impose burdensome conditions. *Data General*, in dicta, quoted with approval from the Fifth Circuit's decision in Carpa, Inc. v. Ward Foods, Inc., 536 F.2d 39, 48 (5th Cir. 1976), a trademark tying case:

> **HN8**[] uniqueness, of course, presupposes that competitors are in some way foreclosed from offering the distinctive product. *Fortner* points out at 505, 89 S. Ct. 1252 note 2, that such barriers may be legal, as in the cases of **[*1569]** patented or copyrighted products. Trademarks surely may be included in the list of such legal restraints, and, as with copyrighted material, the mere presence of competing substitutes is insufficient to destroy the legal, and more importantly the economic, distinctiveness of the trademark.

But *Carpa* made clear that a trademark, unlike a patent or copyright, is not automatically presumed to confer market power. The *Carpa* opinion goes on to state in the paragraph after that quoted above:

> Neither the Supreme Court, nor this **[**23]** Circuit, has gone so far as to presume that the mere existence of a trademark in and of itself supplies economic power sufficient to constitute an antitrust violation. Unlike a patent or copyright which is designed to protect the uniqueness of the product or process itself, a trademark protects

[10] It is important to note that *Data General* was an action brought by a competing seller, not by a customer as is the case here. The appropriate market analysis will not necessarily be the same in both types of cases. See also the discussion in parts IV and V, below.

> only the name or symbol of the product. This is a basic conceptual difference. . . . ***HN9***[] We adhere to the principle applied by the Supreme Court in *Fortner, supra*: "The proper focus of concern is whether the seller has the power to raise prices, or impose other burdensome terms such as a tie-in, with respect to any appreciable number of buyers within the market." *394 U.S. at 504*. [11]

To establish that power, plaintiffs rely primarily on Diet Center's market **[**24]** share. But in the market the Court has determined to be relevant, that of service-assisted weight-loss operations, plaintiffs calculate Diet Center's share at 19%; defendants contend that it is only 13-15%. Thus Diet Center's share of the relevant market is substantially lower than the market shares of defendants in both *Hyde* and *Times-Picayune* which were held insufficient to confer market power.

Additional factors support the conclusion that defendants do not possess market power. Plaintiffs concede that there are no significant barriers to entry in the tying product market. Their evidence shows that Diet Center's initial franchising fee and royalties are lower than those charged by many of its competitors and that Diet Center's share of the service-assisted weight-loss franchise market declined from 1980 to 1982. Finally, it is not disputed that Diet Center's franchise charges declined in constant dollars over the same time period.

The evidence thus establishes that Diet Center, Inc., lacks the requisite market power sufficient to sustain a finding that it forced franchisees to make unwanted purchases of Diet Supp.

It should be noted that even if Diet Center, Inc., possessed **[**25]** some measure of market power, this is not a case warranting relief against a tying arrangement on the ground that it could "increase[] the social costs . . . [by] facilitating price discrimination." *Hyde, 104 S. Ct. at 1567, n.47*. In theory, "where ***HN10***[] the quantity of sales of the tied product operates as a measure of the buyer's intensity of use of the tying product, the seller may exact a premium from the more intensive users by charging supracompetitive prices for the tied product." *Hirsh, supra* note 8, *674 F.2d at 1349*. Assuming the price charged for the Diet Supp to be supracompetitive, the tie enables Diet Center, Inc., to collect more from those franchisees who are more intensive users of the franchise and thus value it more highly than the less intensive users. *See* *Fortner I, 394 U.S. at 513 n.7* (J. White dissenting) (tying arrangements "may be used as a counting device to effect price discrimination"); *Moore, 550 F.2d at 1213* ("importance of tie-ins as a means of price discrimination"); *see generally* W. Bowman, *Tying Arrangements and the Leverage Problem*, 67 Yale L.J. 19, 23 (1957).

Price discrimination as such, of course, is unlawful only if it violates **[**26]** the Robinson Patman Act, *15 U.S.C. § 13*, which requires a showing of lessened competition or tendency toward monopoly. No **[*1570]** such claim is made here. Nevertheless price discrimination through tying agreements when it could not otherwise have been accomplished (usually by way of variable-quantity purchasing) has been criticized by some courts, *see, e.g.,* *Hirsh, supra*, although commentators disagree on whether it is economically harmful. [12]

For two reasons, price discrimination is not a basis for condemning the Diet Center arrangement. First, it is not a device to evade price control or restraint. *See* *Hyde, 466 U.S. 2, 104 S. Ct. at 1567, 80 L. Ed. 2d 2, n.47*. Second, Diet Center, Inc., could achieve the same result by charging a variable royalty **[**27]** based on a percentage of revenue, *see* *Siegel, 448 F.2d at 50* (royalties based on sales volume are a "feasible alternative method of compensation"), and thereby extract the consumer surplus from intensive users of the franchise.

---

[11] *See also* *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 52 U.S.L.W. 4821, 4831 n.19, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*: "Market power is the ability to raise prices above those that would be charged in a competitive market."

[12] *Compare* R. S. Markovits, *Tie-Ins and Reciprocity: A Functional, Legal, and Policy Analysis*, 58 Tex. L. Rev. 1363, 1378-81 (1980), *with* R. Posner, *Exclusionary Practices and the Antitrust Laws*, 41 U.Chi.L.Rev. 506, 508-15 (1974).

There are various unobjectionable reasons why Diet Center, Inc., might prefer to employ a tying rather than a royalty arrangement. [13] But price discrimination does not create anticompetitive consequences merely because it is achieved by one means rather than another. *See* 2 *P. Areeda & D. Turner* ***Antitrust Law*** para. 347b (1978). Absent proof that Diet Center franchisees were competitively damaged (other than by Diet Center, Inc.'s, decision to employ what amounts to a royalty scheme) plaintiffs fail to establish that Diet Center, Inc., has "increased the social costs of its market power."

The Court concludes, **[**28]** therefore, that plaintiffs have failed to demonstrate the existence of market power sufficient to invoke the per se rule. There is no evidence which could support a finding that Diet Center, Inc., is able to impose unreasonable terms on buyers in the relevant market. In the absence of any disputed material facts, defendants are entitled to summary judgment on this issue.

IV. *Is the Arrangement an Unreasonable Restraint of Trade*

HN11[] In the absence of per se liability, plaintiffs bear the burden of proving that the purchase requirement violates the Sherman Act because it unreasonably restrained trade. That burden involves an inquiry into the effect of Diet Center, Inc.'s, requirement that its franchisees purchase its Diet Supp on competition among suppliers of Diet Supp or its equivalents. *Hyde, 104 S. Ct. at 1567*.

Plaintiffs have offered no evidence defining the relevant market or bearing on the effect of the Diet Center, Inc., arrangement on competing suppliers. The only evidence plaintiffs have offered concerns the allegedly lower prices charged for alternative diet supplements from other suppliers. That evidence is not probative of a restraint of trade. There is no indication **[**29]** that the Diet Center, Inc., arrangement had any effect on competition among suppliers or on consumer demand for diet supplements.

As the Court stated in *Hyde*,

> ***HN12***[] without a showing of actual adverse effect on competition, [plaintiff] cannot make out a case under the antitrust laws, and no such showing has been made.

104 S. Ct. at 1568. Plaintiffs have failed to show anything other than that possibly comparable diet supplements (which may or may not secure Diet Center, Inc.'s, requisite approval under the franchise agreement) could be purchased for less. They have come forward with no evidence that competition has been adversely affected. *See also Robert's, supra, 732 F.2d at 1408* ("injury to the antitrust plaintiff alone is not sufficient to prove injury to competition").

[*1571] V. *Even if the Diet Center Franchise Were Held to be an Unlawful Tie-In, Could Plaintiffs Establish Damage*

In addition to establishing the existence of an illegal tying arrangement, ***HN13***[] plaintiffs seeking to assert a claim under *Section 1* must also demonstrate "actual injury . . . causally linked to defendants' antitrust violation," *In re Data General Corp. Antitrust Litigation* ***[**30]*** *, 490 F. Supp. 1089, 1101 (N.D. Cal. 1980)*, *rev'd on other grounds*, *Data General, supra*; *Kline v. Coldwell, Banker & Co., 508 F.2d 226, 230-31, 233 (9th Cir. 1974)*, *cert. denied*, *421 U.S. 963, 44 L. Ed. 2d 449, 95 S. Ct. 1950 (1975)*. "One ***HN14***[] of the essential elements for recovery under the ***antitrust law*** is that the claimant be injured or damaged," *Gray v. Shell Oil Co., 469 F.2d 742, 748 (9th Cir. 1972)*, *cert. denied*, *412 U.S. 943, 37 L. Ed. 2d 403, 93 S. Ct. 2773 (1973)*; ***HN15***[] absent injury, "a private person has no right to complain of a violation of *§§ 1* and *2* [of the Sherman Act]," *Winckler v. Smith Products Co. v. Sunkist Growers, 346 F.2d 1012, 1014 n.1* (9th Cir.), *cert. denied*, *382 U.S. 958, 15 L. Ed. 2d 362, 86 S. Ct. 433 (1965)*. ***HN16***[] A plaintiff who fails to adduce evidence of injury is not entitled to have his claim submitted to the jury, *see Gray, 469 F.2d at 749*. Moreover, ***HN17***[] *15 U.S.C. § 26* provides for private injunctive relief solely "against threatened loss or damage by a violation of the antitrust laws"; a finding of the possibility of future injury is thus as

[13] Tying arrangements may, for example, enable a franchisor to obtain more efficiently accountings of the volume of its franchisees' business. *See also* note 5, *supra*.

much a prerequisite for enjoining a tying arrangement as one of prior injury is for awarding **[**31]** treble damages. [14]

HN18[] The franchisee alleging an illegal tie to the franchised trademark does not meet his burden of proving the injury necessary to recover under *Section 1* merely by establishing that he paid an inflated or noncompetitive price for the *tied* product. As the Ninth Circuit held in *Siegel, 448 F.2d at 52*, where plaintiff franchisees claimed to have been damaged by the supracompetitive price of certain products necessarily purchased from defendant franchisor,

> *HN19*[] to ascertain whether an unlawful arrangement for the sale of products has caused injury to the purchaser, the cost or value of [both the tying and the tied] products involved, free from the unlawful arrangement, must first be ascertained.

HN20[] In other words, a party to a tying **[**32]** arrangement has not suffered economic harm from the inflated price of the *tied* product where the seller might simply have reduced that price to a "competitive level" and correspondingly increased the price of the *tying* product. Thus, to demonstrate the injury necessary to establish defendant's liability, plaintiff must prove that the payment for both the tied and tying product exceeded their combined fair market value. [15]

*Kypta v. McDonald's **[**33]** Corp., 671 F.2d 1282, 1285* (11th Cir.), *cert. denied*, *459 U.S. 857, 74 L. Ed. 2d 109, 103 S. Ct. 127 (1982)*, for example, affirmed summary judgment in favor of defendant fast-food franchisor alleged to have tied its franchised trademark to the lease of restaurant premises. The Court held that the requirement of injury set forth in *Siegel* had not been satisfied both because plaintiff could not establish his ability to secure alternative premises of comparable potential profitability and because he introduced no evidence "that he was charged more than the reasonable value of his lease and license," *id. at 1286*. Although the court acknowledged that *Siegel* had remanded on the issue of the fair market value of the combined products, it found no need to do so **[*1572]** where plaintiff had "conceded his inability to offer any evidence regarding this essential point," *id*.

In the case at bench, plaintiffs rely on two facts to establish that the payments for the franchised trademark and for the Diet Supp exceed the two products' combined market value. First, they contend that while Diet Center sells its Diet Supp at forty-five cents per dieter per day, the same quantity **[**34]** of supplements can be purchased elsewhere for twenty-five to thirty cents. Second, they claim that Diet Center's continuing license fee, effectively a royalty based on a percentage of revenues, exceeds the royalty payments charged by Nutri/System, Diet Center's closest competitor in the weight-control market. According to plaintiffs' calculations, subtracting the forty-five cent payment for Diet Supps from the continuing license fee charged per dieter, Diet Center subfranchisors pay an average of 11.5% of revenues solely for their license and subfranchisees pay an average of 19.3% of revenues. Nutri/System, by contrast, allegedly charges its franchisees only 7% of revenues, 200% less than Diet Center subfranchisees are charged.

Accepting plaintiffs' calculations for purposes of this motion, the issue is whether proof that Diet Center's royalty exceeds those of competing franchisors establishes the cost of the Diet Center franchise package to be supracompetitive, as required by *Siegel*, and hence a basis for antitrust damage. Different franchises possess different attributes and accordingly different degrees of appeal to potential franchisees. Some may have special pricing schemes, **[**35]** others may market a particularly sought after product, and still others may offer an unusually complete package enabling franchisees to commence operations with a minimum of knowhow or financial

---

[14] The damage requirement may differ, of course, depending on whether plaintiff is a buyer forced to purchase the tied product or a competitor allegedly foreclosed from the tied product market. *See* *Ungar, supra* note 4, *531 F.2d at 1221, n. 7*a.

[15] The Supreme Court has at least suggested its accordance with this analysis. In *United States Steel Corp. v. Fortner Enters., Inc., 429 U.S. 610, 97 S. Ct. 861, 51 L. Ed. 2d 80 (1977)*, ("Forner II"), the court rejected an inference of market power based on the existence of the tie itself by noting that

> proof that Fortner paid a higher price for the tied product is consistent with the possibility that the financing [the tying product] was unusually inexpensive and that the price for the entire package was equal to, or below, a competitive price.

resources. The price charged by a franchisor reflects the value franchisees in the market attach to the package he offers: a franchisor who charges a price higher than the market is willing to pay will not long survive. To find that the price of one package is noncompetitive solely because it is different from the price of another is to assume products to be fungible when the marketplace clearly establishes that they are not.

Moreover plaintiffs' reliance on Diet Center's 19.6% royalty to demonstrate non-competitiveness ignores the fact that different franchises collect revenue in different ways. Accepting plaintiffs' calculation of Nutri/System's royalty at 7% and thus lower than Diet Center's as calculated by plaintiffs, the fact remains that Nutri/System's initial franchising fee is substantially higher than Diet Center's. A franchisee opening a Nutri/System outlet must immediately lay out $49,500 while his Diet Center counterpart pays an initial fee of only $24,000, about half as much. **[**36]** Thus the allegedly inflated royalty payments do not establish that plaintiffs paid more for the franchise package than its fair market value; they are simply an alternative to a higher initial investment requirement. [16]

In addition there are significant distinctions between other aspects of the Diet Center and Nutri/System franchises which render direct price comparisons unmeaningful. It appears from the evidence that Diet Center provides its franchisees with financing which is unavailable from Nutri/System, and Diet Center's initial franchising fee is, to a limited extent, refundable when a franchisee desires to withdraw from the operation. Furthermore, while Nutri/System **[**37]** derives approximately 80% of its revenue from a 27% gross margin on food items "purchased at wholesale from the company by the franchisees for resale to clients," (Plf. Ex. PPP), Diet Center's revenues are substantially less dependent on sale to franchisees of items not part of the franchise package.

Comparison of royalty fees charged by other franchisors, therefore, does not tend to prove the fair market value of the Diet **[*1573]** Center franchise. Rather, as Areeda and Turner have stated, the most accurate method of determining the combined market value of the tied and tying products is "by reference to what franchisees have demonstrated a willingness to pay." *2 P. Areeda & D. Turner,* ***Antitrust Law***, § 347b (1978). *See also, Ungar, supra, 531 F.2d at 1223* & n.10. Potential franchisees who are free to choose a franchise will not, by definition, pay a higher price for a franchise than its market value, and there is no contention here that they are constrained in selecting from among a variety of weight control franchises.

Moreover, this is not a case in which the pricing scheme employed by the franchisor somehow disguises the cost of the franchise. In *Siegel*, for **[**38]** example, the Court found that the willingness of the plaintiffs to purchase the tied equipment, spices, and paper goods at inflated prices did not establish the competitiveness of the combined package price because franchisees may well have been unaware of what that cost would

> come to in practice. Had the full amount of the overcharge on the tied items been openly specified as the cost of the tying items agreement might not have been forthcoming. We can hardly rule as a matter of law that it would have been.

448 F.2d at 52-53. The court's concern was not that an initial franchisee would always be unable to predict its eventual costs solely because they would vary with the volume of business, an inevitable characteristic of all royalty arrangements. Rather, the court worried that a franchisee might not realize what the "cost of the arrangement . . . would come to" because his entire payment depended on his eventual and unpredictable requirements of the tied products. The true cost of the franchise in *Siegel* could be considered "buried": franchisees paid no royalty or license fee whatsoever and were charged only for products like equipment, ingredients and paper **[**39]** products whose costs as a function of revenue inexperienced franchisees might find difficult to calculate at the outset of the enterprise.

This danger is absent where, as here, the costs of the franchise are "openly specified." Diet Center franchisees know exactly what their cost per customer (i.e. the "cost of the arrangement") will be from the outset; not only are they charged a set license fee per customer but the amount of Diet Supp they must purchase per customer is fixed.

---

[16] In fact, the compilation from which plaintiffs have drawn their pricing information estimated the "Range of Capital Needed" for setting up a Nutri/System franchise at $65,000-95,000 and a Diet Center franchise at $15,000-30,000. Moreover, of the 26 weight control franchises surveyed, Diet Center had among the lowest ranges of capital required.

Franchisees can predict the eventual price per customer as accurately as if the cost of the Diet Supp had been recharacterized as part of the licensing cost. [17]

[40]** In sum, bare comparison of the royalties charged for other franchises cannot establish the non-competitiveness of the package price charged by Diet Center absent proof that the initial price of the arrangement was somehow disguised. As *Siegel* indicated, *448 F.2d at 52 n.11*, franchisees will thus rarely be able to establish injury from a tying arrangement because the price paid is usually conclusive proof of the franchise package's fair market value. Restricting the class of persons who can sue for an allegedly illegal tie to those who suffer demonstrable injury, however, does not immunize conduct violative of the antitrust laws. The franchisor who illegally **[*1574]** ties separate products to his trademark may still be subject to challenge not only by the government but also by potential competitors in the tied product market who can establish market foreclosure generated by the tying arrangement.

CONCLUSION

For the reasons stated, defendants' motion for partial summary judgment on the tying claim is granted and plaintiffs' motion is denied.

The parties are directed to appear at a status conference on August 10, 1984, at 10 a.m. to discuss the disposition of the remaining **[**41]** claims.

IT IS SO ORDERED.

End of Document

[17] A franchisee may still be able to prove injury if the illegal tie coerces him to buy products or services which are unwanted or of unexpectedly inferior quality causing him to lose customers and revenue. He will thus be able to establish damage arising not from the allegedly anticompetitive price of the package for which he bargained but from the excess cost or inferiority of items which he has no choice but to continue purchasing. *Cf. Roberts, supra.* In *Roberts*, the Court held that defendant franchisor could not, absent justification, tie its trademark to the use of a particular bookkeeping service which plaintiff franchisee complained was incompetent. Although the Court of Appeals did not address the damage issue, plaintiff in *Roberts* might have established injury arising from the unexpectedly poor quality, and thus cost, of the bookkeeping service which he was required to use.

Plaintiffs here do not claim that they were damaged because the Diet Supp they were required to purchase was unwanted, hurt their business or was in any way unsatisfactory. On the contrary, they concede that the Diet Supp is effective and important to the weight-loss program. They merely desire to buy it elsewhere.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN1[] **Private Actions, Standing**

A plaintiff must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendant's acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. The plaintiff must show more than a mere violation of the antitrust laws, he must also show an injury that is a direct result of the anticompetitive behavior of the defendant.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN2[] **Private Actions, Standing**

Before plaintiffs have standing to bring antitrust suits, courts require (1) that the plaintiffs be injured in fact, (2) that the injury be to his "business or property," (3) that the injury be of the type the antitrust laws were intended to prevent, (4) that there be significant causal connection between the defendant's violation and the plaintiff's injury, and (5) that the injury flow from that which makes the defendant's acts unlawful.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN3[] **Private Actions, Standing**

Before a plaintiff can make out a claim for antitrust injury, he must be within the "target area" of the alleged conspiracy, i.e., a person against whom the conspiracy was aimed, such as a competitor of the persons sued.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Copyright Law > ... > Civil Infringement Actions > Defenses > Copyright Misuse

HN4[] **Private Actions, Standing**

Where the holder of a valid copyright brings suit in good faith and based on reasonable grounds, whatever other anticompetitive activity the copyright holder may be guilty of, the copyright laws would seem to authorize him to bring such a non-frivolous suit.

Opinion by: GOETTEL

Opinion

[*1019]** **[*764]** GOETTEL, D.J.:

Before the Court is a motion by plaintiff W. Goebel Porzellanfabrik ("Goebel") to dismiss the antitrust counterclaims brought by defendant Action Industries, Inc. ("AII"), in response to Goebel's complaint charging AII with copyright infringement. AII charges that Goebel's business practices restrained trade in violation of the antitrust laws, that the infringement suit itself was part of the antitrust conspiracy, and that Goebel obtained its copyrights by fraud. Goebel moves to dismiss the counterclaims under *Fed. R. Civ. P. 12(b)(6)* asserting, *inter alia*, that AII has no standing to bring the antitrust claims and so fails to state a claim for which relief can be granted. **[**2]** For the reasons outlined below, the Court grants Goebel's motion to dismiss.

BACKGROUND

Goebel is a West German limited partnership based in Bavaria which manufactures a variety of figurines, plaques, plates, bells, and dolls based on the sketches and drawings of Sister M. Innocentia Hummel (known as "Hummel figures"). Goebel makes the Hummel figures under a license from the Congregation of the School Sisterhood of the Third Order of St. Frances at the Convent of Seissen, of which Sister Hummel was a member until her death in 1946. The convent exercises artistic supervision over the goods produced by Goebel, which holds a number of United States copyrights on the Hummel figures it makes. These figures are imported into the United States by three authorized wholesalers who distribute them to retailers nationwide.

Goebel's complaint alleges that for the past three years, AII has acquired Hummel figures from authorized vendors in Europe and has imported them into this country, thus by-passing Goebel's authorized distributors. [1] Goebel's complaint asserts that AII's importation of these Hummel figures violates those provisions of the copyright laws which prohibit the unauthorized **[**3]** distribution or importation of copyrighted goods. *17 U.S.C. §§ 106* and *602(a) (1982)*. [2] Goebel **[*765]** also charges that this unauthorized importation of Hummel figures constitutes a tortious interference with its exclusive contracts with its United States distributors. Goebel seeks an injunction barring AII from infringing its copyrights by importing the Hummel figures and from interfering with its contracts with its American distributors, and an accounting of the profits that AII earned as a result of its sales of Hummel figures.

---

[1] AII operates in what has become known as the "gray market," in which legitimately produced goods are imported without the authorization of the trademark or copyright holder. A gray market is created when an arbitrageur takes advantage of a price difference between two markets by buying in the market where prices are lower and selling in the market where prices are higher. The Hummel figures at issue here are genuine items produced by Goebel; what Goebel seeks to challenge is AII's unauthorized importation of them into the country.

[2] *Section 106* provides, in pertinent part, that "the owner of a copyright under this title has the exclusive right to do and to authorize any of the following:

. . . .

"(3) to distribute copies . . . of the copyrighted work to the public by sale or other transfer of ownership. . . ." *17 U.S.C. § 106 (1982)*.

Section 602(a) provides: "Importation into the United States, without the authority of the owner of the copyright under this title, of copies . . . of a work that have been acquired outside the United States is an infringement of the exclusive right to distribute copies . . . under *section 106*. . . ." *17 U.S.C. § 602(a) (1982)*.

[4]** In its answer, AII raises several affirmative defenses, including that the Hummel figures are not new and original works and so should not be afforded protection under the copyright laws. AII also counterclaims for $5 million in damages ($15 million, if trebled) under *sections 1* and *2* of the Sherman Anti-Trust Act, **[***1020]** *15 U.S.C. §§ 1* and *2 (1982)*, and under the Wilson Tariff Act, *15 U.S.C. § 8 (1982)*, which prohibits restraints of trade involving imported goods. It is these antitrust claims that are the subject of the instant motion.

The thrust of AII's antitrust counterclaims is that Goebel is using its copyrights to limit the quantity of Hummel figures being imported into this country, thereby keeping prices artificially high and that this amounts to misuse of the copyright which would strip Goebel of the immunity from antitrust protection normally extended by the copyright laws. AII additionally charges that Goebel (or its American distributors, the counterclaim fails to specify which) engaged in a number of other anticompetitive practices such as requiring retailers to sell at or above published list prices; requiring retailers to purchase non-copyrighted goods in order to get copyrighted **[**5]** goods; requiring retailers to carry slow-moving items in order to get fast-selling ones; and prohibiting retailers who purchased Hummel figures from re-selling the merchandise to other retailers.

DISCUSSION

A. *AII's Lack of Standing Bars Its Antitrust Counterclaims*

In considering this litany of antitrust claims, the Court finds one fact to be inescapable: AII fails to allege that it has suffered any injury as a result of any of these practices. As a consequence, AII lacks standing to prosecute these counterclaims. [3] As the Supreme Court has explained: ***HN1***[] "Plaintiffs must prove *antitrust* injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)* (original emphasis). The plaintiff must show more than a mere violation of the antitrust laws, he must also show an injury that is a direct result of the anticompetitive behavior of the defendant. **[**6]** *Id*.

Even before the *Brunswick* decision, the Second Circuit had "committed itself" to the principle that ***HN3***[] before a plaintiff could make out a claim for antitrust injury, he "must be within the 'target area' **[**7]** of the alleged conspiracy, i.e., a person against whom the conspiracy was aimed, such as a competitor of the persons sued." *Calderone Enterprises Corp. v. United Artists Theatre Circuit, Inc., 454 F.2d 1292, 1295 (2d Cir. 1971)*, *cert. denied*, *406 U.S. 930, 92* ***[*766]*** *S. Ct. 1776, 32 L. Ed. 2d 132 (1972)*. In *Calderone*, the court held that the landlord of a motion picture theater was not within the "target area" of the antitrust laws, and so did not have standing to bring suit against motion picture distributors, because all that was alleged was that the distributors had conspired with the tenant operator of the theater to book less popular films for the theater. The court reached this conclusion despite the fact that the lease between the plaintiff landlord and the tenant provided for nominal rentals plus a share of the revenues from the theater's ticket sales. *Id. at 1294*.

The *Calderone* court also noted that in the past, a patent owner was found to lack standing to sue for damages to its licensee, *Productive Inventions, Inc. v. Trico Products Corp., 224 F.2d 678 (2d Cir. 1955)*, *cert. denied*, *350 U.S. 936, 100 L. Ed. 818, 76 S. Ct. 301 (1956)*, and that **[**8]** a franchisor lacked standing to bring suit for damages resulting from an antitrust conspiracy aimed at its franchisee, *Billy Baxter, Inc. v. Coca-Cola Co., 431 F.2d 183* (2d

---

[3] On the question of which plaintiffs have standing to bring antitrust suits, Professors Areeda and Turner have written:

> ***HN2***[] In an effort to cope with the infinite numbers of possible plaintiffs the courts have required (1) that the plaintiffs be injured in fact, (2) that the injury be to his "business or property," (3) that the injury be of the type the antitrust laws were intended to prevent, (4) that there be significant causal connection between the defendant's violation and the plaintiff's injury, and (5) that the injury flow from that which makes the defendant's acts unlawful.

P. Areeda and D. Turner, II ***Antitrust Law*** para. 334a (1978). As is demonstrated below, AII fails to show that it suffered any injury, much less an injury of the sort the antitrust laws were intended to prevent.

Cir.), *cert. denied*, *401 U.S. 923, 27 L. Ed. 2d 826, 91 S. Ct. 877 (1971)*. *Calderone Enterprises Corp. v. United Artists Theater Circuit, supra, 454 F.2d at 1295*.

In those three cases, the plaintiff arguably suffered some loss, though the loss was indirect, flowing from a direct injury suffered by a tenant, licensee, or franchisee. AII, however, is in a much weaker position because it cannot even point to an indirect loss; none of the allegedly anticompetitive practices engaged in by Goebel were aimed at AII itself, or anyone in privity with AII. If anyone at all was affected by the alleged practices, it was the retailers who purchased the Hummel figures for resale and the consumers who ultimately purchased them.

Indeed, AII may actually have been benefited by Goebel's allegedly restrictive trade **[***1021]** practices. Assuming that all of the facts in AII's counterclaim are true, the prices of Hummel figures were artificially inflated to the point where it was possible for AII to purchase the figures in Europe, **[**9]** ship them to the United States and, even after paying the freight costs, still undersell the authorized Goebel distributors and make a profit. Thus, in the absence of the complained of practices, AII would never even have had the financial attraction to import the Hummel figures.

AII does not even allege that Goebel refused to deal with it, which Goebel would, in any event, be free to do. The Supreme Court recently affirmed the right of a manufacturer to refuse to do business with those who decline to comply with the manufacturer's conditions as long as there is no conspiracy between the manufacturer and other competing retailers to cut off any non-complying retailers. *Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 104 S. Ct. 1464, 1469, 79 L. Ed. 2d 775 (1984)*. *See Note, Oligopolistic Interdependence: The FTC Adopts a "No Agreement" Standard to Attack Parallel Non-Collusive Practices*, *50 Brooklyn L. Rev. 255, 265-66* & n.59 (1984) (decisions not to deal, in the absence of some concrete showing of agreement, cannot be attacked under the antitrust laws).

AII does claim that it suffered a direct loss because, after the filing of Goebel's suit, it was "forced" to stop **[**10]** importing the Hummel figures it had already purchased in Europe and thereby incurred storage and other costs. If this is true, the Court notes that this injury is strictly self-inflicted. The decision to stop importing Hummel figures was not made in response to a court order, but was instead a unilateral decision on the part of AII. By no stretch of the imagination can Goebel be held liable for any loss that AII incurred as a result of its decision to cease imports.

For these reasons, the Court finds that AII lacks standing to bring suit for damages resulting from any anticompetitive trade practices that may have been engaged in by Goebel.

B. *The Lawsuit Itself Cannot Be Treated As An Anticompetitive Act*

AII also claims that the mere institution of the lawsuit by Goebel was itself **[*767]** an act in furtherance of the antitrust conspiracy. Aside from the fact that AII has no standing to challenge Goebel's trade practices, the Court notes that lawsuits have only rarely been treated as part of an antitrust conspiracy. ***HN4***[] Where the holder of a valid copyright brings suit in good faith and based on reasonable grounds, "whatever other anti-competitive activity the [copyright holder] **[**11]** may be guilty of, the [copyright laws] would seem to authorize him to bring such a non-frivolous suit." *Ansul Co. v. Uniroyal, Inc., 448 F.2d 872, 882 (2d Cir. 1971)*, *cert. denied*, *404 U.S. 1018, 30 L. Ed. 2d 666, 92 S. Ct. 680 (1972)*. *See also* *Rex Chainbelt, Inc. v. Harco Products, Inc., 512 F.2d 993* (9th Cir.), *cert. denied*, *423 U.S. 831, 46 L. Ed. 2d 49, 96 S. Ct. 52 (1975)*; *Sulmeyer v. Seven-Up Co., 411 F. Supp. 635 (S.D.N.Y. 1976)*.

In *Clipper Exxpress v. Rocky Mountain Motor Tariff Bureau, Inc., 674 F.2d 1252 (9th Cir. 1982)*, *modified*, *690 F.2d 1240*, *cert. denied*, *459 U.S. 1227, 103 S. Ct. 1234, 75 L. Ed. 2d 468 (1983)*, the court explained that ***HN5***[] the seeking of governmental action, whether legislative, judicial, or administrative, is immune from antitrust strictures under the *Noerr-Pennington* Doctrine, absent a showing that the action is sought without probable cause, or is instituted in bad faith. *Id. at 1262-63*.

Here, AII fails to make any showing that there was bad faith behind Goebel's commencement of the instant suit, or that there was any intent to harrass. Given the direct language of *section 602* of the copyright laws, *see supra* **[**12]** note 2, AII's claim that Goebel's suit was part of an antitrust conspiracy must also be dismissed.

C. *Goebel Did Not Obtain Its Copyrights By Fraud*

In another part of its counterclaim, AII alleges that Goebel obtained its copyright by perpetrating a fraud on the copyright office. The gist of this allegation is that the three-dimensional Hummel figures are based on the two dimensional drawings by Sister Hummel and that there may be some doubt as to the true ownership of her drawings. Because Goebel's Hummel figures are based on these drawings, AII's argument continues, there must also be some doubt as to the validity of Goebel's copyrights on the three-dimensional figures.

In pressing these arguments, AII ignores one of the basic principles of copyright law -- that ***HN6***[] derivative works can be copyrighted and that such works and their copyrights exist independently of the original works and whatever copyrights may protect them. *17 U.S.C. § 103(a) (1982)* (derivative works may be copyrighted). For example, under the predecessor to this section, the Second Circuit held that a collection of mezzotints of art works which were in the public domain could be copyrighted. *Alfred Bell &* **[**13]** *Co. v. Catalda* ***[***1022]*** *Fine Arts, Inc., 191 F.2d 99, 104 (2d Cir. 1951)*. [4]

Here, there is no question that the Hummel figures are derivative of the works of Sister Hummel, so the Court need not concern itself with the confused (and confusing) affidavit submitted in opposition to Goebel's motion to dismiss, which attempts to imply that there may be some doubts as to the true ownership of Sister Hummel's drawings. Even if the allegations in that affidavit were true, the artists in the employ of Goebel who translated the sketches into three-dimensional art works have added sufficient creative effort to make the Hummel figures protectible under the copyright laws. Therefore, as a matter of law, Goebel perpetrated no fraud on the copyright office by applying for copyrights on its Hummel figures.

CONCLUSION

For the reasons outlined above, AII lacks standing to bring its claims of antitrust **[**14]** violations against Goebel; therefore, Goebel's motion to dismiss those counterclaims must be, and hereby is, granted.

SO ORDERED.

HN6[] Racketeering, Racketeer Influenced & Corrupt Organizations Act

Acts of racketeering are defined by *18 U.S.C.S. § 1961(1)* as any of a number of acts chargeable under state law, acts indictable under a variety of federal laws, or an offense under the federal securities law.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN9[] Racketeer Influenced & Corrupt Organizations, Remedies

The term "enterprise," as used in the Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, encompasses both legitimate and illegitimate enterprises, and that an enterprise must be an entity separate and apart from the pattern of activity in which it engages. However, as a general proposition, the civil remedies could be useful in eradicating organized crime from the social fabric, whether the enterprise be ostensibly legitimate or admittedly criminal. The aim is to divest the association of the fruits of its ill-gotten gains. It is untenable that the existence of the civil remedies limits the scope of this criminal provision.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN10[] Private Actions, Racketeer Influenced & Corrupt Organizations

The "by reason of" language in *18 U.S.C.S. § 1964(c)* is intended to limit standing to those injured by a racketeering injury, by an injury of the type the Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, was designed to prevent.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN11[] Racketeer Influenced & Corrupt Organizations Act, Elements

The Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, is intended to address the infiltration of legitimate business by organized crime.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN12[] Racketeering, Racketeer Influenced & Corrupt Organizations Act

18 U.S.C.S. § 1964(a) gives the district courts jurisdiction to prevent and restrain violations of 18 U.S.C.S. § 1962. It is not a general grant of jurisdiction and does not relate to § 1964(c). 18 U.S.C.S § 1964(b) permits the Attorney General to institute proceedings under the section. It was drawn when § 1964(c) was not in the statute and relates back to § 1964(a).

Criminal Law & Procedure > ... > Procedures > Return of Indictments > General Overview

Criminal Law & Procedure > ... > Grand Juries > Procedures > General Overview

HN13[] Procedures, Return of Indictments

Courts do not traditionally look at a given set of facts, proved by a preponderance of the evidence only, and say that these facts make out acts which are "indictable" or "chargeable." In the case of indictments that is the purpose of grand juries.

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > Grand Jury Requirement

Criminal Law & Procedure > ... > Accusatory Instruments > Indictments > General Overview

Criminal Law & Procedure > ... > Grand Juries > Indictments > Right to Indictment by Grand Jury

HN14[] Procedural Due Process, Grand Jury Requirement

U.S. Const. amend. V provides that no person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a grand jury.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN15[] Racketeering, Racketeer Influenced & Corrupt Organizations Act

The criminality of the predicate acts to be proved before a private Racketeer Influenced and Corrupt Organizations Act, 18 U.S.C.S. § 1961 et seq., action goes forward. A criminal conviction must precede a private civil suit.

Counsel: Franklyn H. Snitow, New York, New York (William H. Pauley, III, Keith S. Orenstein, Orenstein, Snitow & Pauley, New York, New York, of Counsel), for Appellant.

Richard Eisenberg, Garden City, New York (Shaw, Goldman, Licitra, Levine & Weinberg, Garden City, New York, of Counsel), for Appellees.

Judges: Lumbard, Oakes, and Cardamone, Circuit Judge. Cardamone, Circuit Judge, dissenting.

Opinion by: OAKES

Opinion

[*484] OAKES, Circuit Judge

This is another in the new wave of cases involving "private civil RICO" -- the private right of action found in the Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C. §§ 1961-1968 (1982)*. Appeal **[**2]** is from a judgment, designated as final pursuant to *Fed. R. Civ. P. 54(b)*, of the United States District Court for the Eastern District of New York, I. Leo Glasser, Judge, dismissing the RICO claims in appellant's amended complaint. *574 F. Supp. 963*. We affirm.

Facts

This case involves business fraud. Plaintiff-appellant Sedima S.P.R.L. (Sedima) is a Belgian corporation in the business of importing and exporting to and from Belgium electronic, mechanical and hydraulic parts manufactured in the United States and abroad. Appellee Imrex is an American corporation engaged in exporting aircraft and aircraft-related electronic component parts. Appellees Jacob Armon and Gidon Armon are officers of Imrex.

In 1979, Sedima and Imrex entered into a joint venture to provide electronic component parts for a NATO subcontractor in Belgium. Imrex obtained the parts and shipped them to Europe pursuant to orders secured by Sedima. Sedima allegedly secured approximately $8.5 million worth of orders to be placed through Imrex.

Sedima alleges that Imrex and the Armons fraudulently prepared purchase orders, invoices and credit memoranda for Sedima that they knew falsely overstated purchase prices, **[**3]** attendant costs and shipping and financing charges of the parts purchased on behalf of the joint venture. The complaint further alleges that Imrex received monies belonging to the joint venture pursuant to these fraudulent purchase orders, invoices and credit memoranda. In addition to counts alleging breach of contract, breach of fiduciary duty, unjust enrichment, breach of the joint venture agreement, conversion, breach of a constructive trust and a cause of action based on quasi contract, three of the counts allege violations of RICO, 18 U.S.C. *§ 1962(c)*. [1]

[*485] Two of the RICO counts allege that the fraudulent purchase **[**4]** orders, invoices and credit memoranda constitute a pattern of racketeering activity, the predicate acts being separate and numerous violations of the Mail Fraud Act, *18 U.S.C. § 1341 (1982)* and the Wire Fraud Act, *18 U.S.C. § 1343 (1982)*. The third count charges a RICO conspiracy under *18 U.S.C. § 1962(c)* and *(d)*. [2] Sedima seeks treble damages and reasonable attorneys' fees under these RICO counts. *18 U.S.C. § 1964(c)*. [3]

---

[1] *18 U.S.C. § 1962(c)* provides:

> (c) ***HN1***[] It shall be unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt.

[2] *18 U.S.C. § 1962(d)* provides:

> (d) ***HN2***[] It shall be unlawful for any person to conspire to violate any of the provisions of subsections (a), (b), or (c) of this section.

[3] *18 U.S.C. § 1964* provides:

> *§ 1964*. ***HN3***[] Civil remedies
>
> (a) The district courts of the United States shall have jurisdiction to prevent and restrain violations of *section 1962* of this chapter by issuing appropriate orders, including, but not limited to: ordering any person to divest himself of any interest, direct or indirect, in any enterprise; imposing reasonable restrictions on the future activities or investments of any person, including, but not limited to, prohibiting any person from engaging in the same type of endeavor as the enterprise engaged in, the activities of which affect interstate or foreign commerce; or ordering dissolution or reorganization of any enterprise, making due provision for the rights of innocent persons.

[5]** *The District Court Decision*

Judge Glasser dismissed the RICO counts on the basis that there was a failure to allege a RICO-type injury. In so holding, he relied on a series of decisions, discussed *infra*, which have stated that in order for an injury to be "by reason of a violation of *section 1962*," as required by *section 1964(c)*, something more than or different from injury that would result from the predicate acts alone must be shown by the plaintiff. *Bankers Trust Co. v. Feldesman, 566 F. Supp. 1235, 1240-42 (S.D.N.Y. 1983)*; *Landmark Savings & Loan v. Loeb Rhoades, Hornblower & Co., 527 F. Supp. 206, 206-09 (E.D. Mich. 1981)*; *North Barrington Development, Inc. v. Fanslow, 547 F. Supp. 207, 210-11 (N.D. Ill. 1980)*.

The district court adopted the reasoning of two related lines of cases. One series of cases, relying on an analogy between RICO and the antitrust laws, requires that a RICO plaintiff allege a "competitive injury," that is, an injury to business or property stemming from competitive harm. *North Barrington, 547 F. Supp. at 210-11*, *Harper v. New Japan Securities International, Inc., 545 F. Supp. 1002, 1007 (C.D. Cal. 1982)*; *Feldesman, **[**6]** 566 F. Supp. at 1241*. The other series of cases requires plaintiffs to allege a "racketeering enterprise injury," an injury that occurs where "a civil RICO defendant's ability to harm the plaintiff is enhanced by the infusion of money from a pattern of racketeering acts into the enterprise." *Landmark Savings, 527 F. Supp. at 209*, relying upon Note, *Reading the Enterprise Element Back Into RICO: Sections 1962 and 1964(c)*, 76 NW. U.L. Rev. 100, 125-33 (1981). Judge Glasser found no allegation of any injury in this case apart from that which would result directly from the alleged predicate acts of mail fraud and wire fraud, and accordingly dismissed the RICO counts.

Background

The problem addressed by the district court, which has received much attention **[*486]** both in the courts and among commentators, is that a broad reading of the civil RICO provisions would allow plaintiffs to bring suit in federal court [4] under RICO nearly anytime they could allege injury caused by two acts which are violations of any one of the predicate acts listed in RICO. Since these predicate acts include a great many state law violations, federal securities law violations, and federal **[**7]** mail and wire fraud violations, an expansive interpretation of RICO allows plaintiffs to bring into federal courts many claims formerly subject only to state jurisdiction, and to bypass remedial schemes created by Congress, particularly in the securities area. The fact that successful RICO plaintiffs may obtain treble damages and attorneys' fees provides, of course, additional incentives to plaintiffs to categorize their actions as RICO claims.

Section 1964(c) ***HN4***[] states that anyone "injured" "by reason of" a violation of *section 1962* is entitled to treble damages. *Section 1962* "violations" include conducting "enterprises" "through a pattern of racketeering"; ***HN5***[] a "pattern of racketeering" is defined by *section 1961(5)* as two **[**8]** or more "acts of racketeering" occurring within a given time. ***HN6***[] "Acts of racketeering" are defined by *section 1961(1)*, inter alia, as any of a number of acts "chargeable under State law," acts "indictable" under a variety of federal laws, or an "offense" under the federal

---

(b) The Attorney General may institute proceedings under this section. In any action brought by the United States under this section, the court shall proceed as soon as practicable to the hearing and determination thereof. Pending final determination thereof, the court may at any time enter such restraining orders or prohibitions, or take such other actions, including the acceptance of satisfactory performance bonds, as it shall deem proper.

(c) Any person injured in his business or property by reason of a violation of *section 1962* of this chapter may sue therefor in any appropriate United States district court and shall recover threefold the damages he sustains and the cost of the suit, including a reasonable attorney's fee.

(d) A final judgment or decree rendered in favor of the United States in any criminal proceeding brought by the United States under this chapter shall estop the defendant from denying the essential allegations of the criminal offense in any subsequent civil proceeding brought by the United States.

[4] Recently at least one state court has exercised jurisdiction over a federal civil RICO claim. *See Greenview Trading Co. v. Hershman & Leicher P.C.*, N.Y.L.J. Mar. 13, 1984, at 5, col. 3 (N.Y. Sup. Ct.); Flaherty, *Two States Lay Claim to RICO*, Nat'l L. J., May 7, 1984, at 3, col. 1.

securities law. Thus, ignoring for the moment some troubling ambiguities, the statute on its surface seems to allow private suits for people injured by defendants who have committed two so-called predicate acts.

Given this language it is not surprising that there has been an explosion of civil RICO litigation. Only a few cases including civil RICO claims were published in the decade following passage of the Act in 1970; [5] **[**10]** a law review note asserts that courts published only two opinions dealing with civil RICO by 1978 and only thirteen by early 1981. Note, *Civil RICO: The Temptation and Impropriety of Judicial Restriction*, 95 Harv. L. Rev. 1101 n.7 (1982). There are now over 100 published decisions. Siegel, *"RICO" Running Amok in Board Rooms*, L.A. Times, Feb. 15, 1984, at 1. This development has resulted, no doubt, from the bar's increased awareness of the statute, spawned, perhaps, by an influential law **[**9]** review article coauthored by Professor G. Robert Blakey and Brian Gettings which proposed a broad reading of the statute. Professor Blakey's position as chief counsel to the Senate subcommittee which proposed RICO has evidently given his expansive views of the statute special credence. [6] A veritable wave of commentaries and cases making civil claims along lines suggested by Blakey and Gettings and others has occurred. We are told that there is now indeed a "RICO bar" which specializes in bringing or defending **[*487]** RICO claims. And members of that "bar" have found, as would appear obvious, that the stigma associated with the label "racketeering" is a good settlement weapon. [7] Indeed, a current adage is said to be that "RICO provides the only *civil* action where the defendant pleads not guilty." Bridges, *supra* note 6 at 44.

The problem with civil RICO is not the explosion of federal litigation. Congress is of course free to create federal causes of action for civil litigants within constitutional limits not necessarily **[**11]** in question here. *But see infra* notes 24, 49. But there is simply no evidence that in creating RICO, Congress intended to create the broad civil cause of action that the reading of the statute given by its proponents would allow.

The Racketeer Influenced and Corrupt Organizations Act, as its very name implies, was designed to combat organized crime. The damage done by organized crime was the subject of much public concern and congressional activity throughout the 1950s and 1960s. [8] RICO was enacted as Title IX of the Organized Crime Control Act of 1970, Pub. Law 91-452 (1970), an act designed "to seek the eradication of organized crime in the United States . . . by providing new remedies to deal with unlawful activities of those engaged in organized crime." 116 Cong. Rec. 35191 (1970).

Title IX itself was designed "to protect legitimate businesses against the syndicate's **[**12]** infiltration." [9] It was an attempt to deal with organized crime as an economic phenomenon. In so doing, its enforcement provisions were modeled after the enforcement provisions of the antitrust laws. *See, e.g., infra* text accompanying note 26.

---

[5] This is true though there were some law review commentaries dealing with the subject, particularly in reference to the Seventh Circuit's *United States v. Cappetto, 502 F.2d 1351 (7th Cir. 1974)*. *See* Note, *Equitable Law Enforcement and the Organized Crime Control Act of 1970 -- United States v. Cappetto*, 25 DePaul L. Rev. 508 (1976); Note, *Organized Crime and the Infiltration of Legitimate Business: Civil Remedies for "Criminal Activity,"* 124 U. Pa. L. Rev. 192 (1975).

[6] Blakey & Gettings, *Racketeer Influenced and Corrupt Organizations (RICO): Basic Concepts -- Criminal and Civil Remedies*, 53 Temp. L.Q. 1009 (1980).

Professor Blakey was the chief counsel of the Senate Subcommittee on Criminal Laws and Procedures in 1969-1970 when, as he puts it, "the Organized Crime Control Act of 1970 . . . was processed." *See id.* at 1009 n.*. His writings are listed in Bridges, *Private RICO Litigation Based on "Fraud in the Sale of Securities"*, *18 Ga. L. Rev. 43, 46 n.20 (1983)*; *but see id.* 76-77 n.165; *Kaushal v. State Bank of India, 556 F. Supp. 576, 581 n.16, 582 n.17 (N.D. Ill. 1983)*. *See also infra* note 20.

[8] *See* Bradley, *Racketeers, Congress and the Courts: An Analysis of RICO*, 65 Iowa L. Rev. 837, 837-39 & nn.4, 9-15 (1980).

[9] *Subcomm. No. 5 of the House Comm. on the Judiciary, Hearings on S. 30, and Related Proposals, Relating to the Control of Organized Crime in the United States*, [hereinafter "House Hearings"] 91st Cong., 2d Sess. 157 (1970) (Statement of Attorney General Mitchell). *See also* 116 Cong. Rec. 35200 (1970) ("Title IX . . . is aimed at keeping organized crime out of legitimate

Given the general purpose of the RICO legislation, the uses to which private civil RICO has been put have been extraordinary, if not outrageous. *Section 1964(c)* has not proved particularly useful for generating **[**13]** treble damage actions against mobsters by victimized business people. It has, instead, led to claims against such respected and legitimate "enterprises" as the American Express Company, E. F. Hutton & Co., Lloyd's of London, Bear Stearns & Co., and Merrill Lynch, [10] to name a few defendants labeled as "racketeers" in civil RICO claims resulting in published decisions.

Though there are a few reported cases where RICO has been used against reputed mobsters [11] or at least against organized criminals, [12] it is being far more frequently used for purposes totally unrelated to its expressed purpose. It has become a **[**14]** standard practice, for example, to insert a RICO claim in litigation involving tender offers. [13] It has become commonly used, as here, in typical business fraud cases, [14] in **[*488]** so-called "garden variety" securities fraud cases, [15] and in bank fraud cases. [16]

RICO, then, presents a classic case of a statute whose ambiguous language needs to be construed in light **[**15]** of Congress's purpose in enacting it. [17] The need to discern legislative intent is particularly important when, as here, crucial statutory language is drawn *in haec verba* from another statute where it has a peculiar technical meaning. The law itself calls for reference to legislative intent since the liberal construction clause states that the text should be construed to "effectuate its remedial purpose." We are, then, obliged to study the legislative history of RICO and particularly of *section 1964(c)* to inform our reading of that statute and, in particular, of the scope of the private civil remedy created by the Congress.

[16]** *Legislative History*

The legislative history of the Organized Crime Control Act of 1970 gives little hint of the intended scope of private action under civil RICO. While the Act for the most part originated in the Senate, the civil provision permitting suit by private persons, *18 U.S.C. § 1964(c)*, originated in the House. [18] Consequently it is not mentioned in the Senate

---

businesses through the use of both criminal and civil penalties.") (Statement of Congressman St. Germain); Bradley, *supra* note 8, at 840-42 (review of legislative history).

Ed. 1345, 60 S. Ct. 1059 (1940)* ("Frequently, however, even when the plain meaning did not produce absurd results but merely an unreasonable one 'plainly at variance with the policy of the legislation as a whole' this court has followed that purpose, rather than the literal words" (citing *Ozawa v. United States, 260 U.S. 178, 194, 67 L. Ed. 199, 43 S. Ct. 65 (1922))*).

Report, although the other **[*489]** three subsections of *section 1964* that were included in the Senate bill are discussed. This fact, we believe, is critical to consideration of the legislation. This is true because the "civil approach" discussed in the report of the Senate Judiciary Committee accompanying S. 30, Rep. No. 91-617, 91st Cong., 1st Sess. 80-83 (1969), refers solely to the Government's right to seek and obtain injunctions to prevent and restrain violations of *section 1962* through divestment by individuals of their interest in enterprises, imposing restraints on future activities or investments, or ordering dissolution or reorganization of any enterprise. *Id.* at 24. Consequently any comments in the Senate Report analogizing to the antitrust laws, referring to the American Bar Association **[**17]** position in the Senate hearings, or otherwise pertaining to the Senate's "civil approach" do not pertain to the scope, impact, or purpose of the private treble damage remedy inserted later by the House of Representatives.[19]

---

[18] RICO had a long legislative lineage. The Organized Crime Control Act of 1970 was derived from S. 30, 91st Cong., 1st Sess., 115 Cong. Rec. 769 (1969). Title IX of the Act, RICO, was added to S. 30 by the Senate. The substance of Title IX was contained in an earlier Senate bill, S. 1861, 91st Cong., 1st Sess., 115 Cong. Rec. 9568-71 (1969). Neither S. 1861 nor S. 30 contained a private civil cause of action. An earlier predecessor of RICO, S. 1623, 91st Cong., 1st Sess., 115 Cong. Rec. 6995-96 (1969), did contain a private civil cause of action based closely on the Clayton Act, providing explicitly for injunctive relief as well as for treble damages. S.1623 §§ 3(c), 4(a). That bill was itself patterned on two earlier Senate bills, S. 2048 and S. 2049, 90th Cong., 1st Sess. (1967), both of which contained civil private actions similar to that in S. 1623. The Senate Subcommittee on Criminal Laws and Procedures of the Senate Committee on the Judiciary replaced S. 1623 with S. 1861 apparently in part because S. 1861 provided broader governmental civil relief, such as the investigative demand, and was in other ways a more comprehensive bill. *See Hearings on Measures Relating to Organized Crime Before the Subcomm. on Criminal Laws and Procedures of the Sen. Comm. on the Judiciary*, 91st Cong., 1st Sess. 387 (1969) [hereinafter, "Hearings on S. 30"]; Bradley, *supra* note 8, at 841-42 & nn.27-28. There is no discussion in the legislative history indicating why S. 1861 did not provide a private cause of action. Professor Blakey, then Chief Counsel to the Senate Subcommittee, subsequently has written that the private civil section was dropped "in an effort to streamline [the bill] and sidestep a variety of complex legal issues, as well as possible political problems in trying to process legislation that expressly created a variety of both public and private remedies." Blakey & Gettings, *supra* note 6, at 1017-18.

There were also a number of House predecessors to RICO which paralleled S. 30. *See* H.R. 19215, 91st Cong., 2d Sess., 116 Cong. Rec. 31914, H.R. 19586, 91st Cong., 2d Sess., 116 Cong. Rec. 35242 (1970). The private cause of action section eventually inserted by the House was taken from H.R. 19586. H.R. 19215 included a much more complete private cause of action section, explicitly allowing for private party injunctive relief. *See* Blakey & Gettings, *supra* note 6, at 1020.

While one may or may not agree with Blakey & Gettings that it is "unfortunate" that H.R. 19215 was not used, *id.*, it is significant that it was not. The more general H.R. 19586 was obviously less controversial, less likely to promote debate and hence more likely to result in passage of the bill.

All of the amendments made by the House to S. 30 limited its scope, with the exception of the inclusion of a private remedy.

[19] **[**18]** Failure to recognize this crucial point has led a number of courts and commentators astray. For example, the original Eighth Circuit panel in *Bennett v. Berg, 685 F.2d 1053, 1058 (8th Cir. 1982)*, *aff'd en banc*, *710 F.2d 1361*, *cert. denied sub nom.* ***Prudential Ins. Co. of America v. Bennett, 464 U.S. 1008, 104 S. Ct. 527, 78 L. Ed. 2d 710 (1983)***, states that "*section 1964(c)* provides a private cause of action modelled on the antitrust laws" and then for its first citation to this effect refers to S. Rep. No. 617, 80-82, 125, 160 (1969). Yet every statement made in that Senate Report relates exclusively to civil remedies *not* including a private civil right of action, but only concerning the government's right to seek an injunction or forfeiture under the provisions of section 1963(a). This is not to say, of course, that the House insertion of the private treble damage action was not based on an analog to the antitrust laws, for it is obviously somewhat patterned in part after *section 4(a)* of the Clayton Act. *15 U.S.C. § 15(a) (1982)*. Indeed, the testimony of Edward L. Wright, then ABA president, in the House hearings on S. 30, the absolutely critical testimony leading to the inclusion of *section 1964(c)* in the House version of the bill, says only:

> In the portion seeking to add a proposed *Section 1964*, "Civil Remedies," we would recommend an amendment to include the additional civil remedy of authorizing private damage suits based upon the concept of *Section 4* of the Clayton Act. *Section 4* provides as follows: [quoting *15 U.S.C. § 4*].

House Hearings, *supra* note 9, at 543-44.

[19]** Ultimately the Senate accepted the House amendment adding subsection (c). Apparently, as the session was about to end, the Senate did not ask for a conference.

The legislative history on the House side is not much more instructive. The decision to add a civil private damages provision was made by a House subcommittee at the behest of Representative Sam Steiger and the American Bar Association. [20] **[**21]** The addition **[*490]** was not considered an important one, a remarkable fact which in itself indicates that Congress did not intend the section to have the extraordinary impact claimed for it. Indeed, when the Judiciary Committee initially introduced the amended bill, it did not even announce to the House that it had made the addition. [21] It was only in the middle of the second and last day of House discussion of the bill that a member of the committee noted that

---

[20] House Hearings, *supra* note 9, at 520 (Proposal of Rep. Steiger), 548 (Proposal of the American Bar Association). Both proposals were patterned on the private remedy found in the Clayton Act. Significantly Steiger's proposal, like those in the rejected Senate bills, provided explicitly for a private injunctive remedy. *Id. at 521*. The legislative history is silent as to why the subcommittee rejected this language and explicitly created only the private action for treble damages which was eventually enacted as *§ 1964(c)*. The adopted statutory language was drawn from H.R. 19586, 91st Cong., 2d Sess. 56 (1970), one of the two House bills which paralleled S. 30. In choosing H.R. 19586 over H.R. 19215, 91st Cong., 2d Sess. (1970), the House explicitly rejected a private injunctive relief section. *See supra* note 18.

Later, on the House floor, an amendment also offered by Representative Steiger to provide private injunctive relief was withdrawn before the House could vote on it. 116 Cong. Rec. 35346 (1969). In the next term of the Senate the same amendment was proposed as a bill, S. 16, 92nd Cong., 1st Sess. (1971), as a way to "expand the available civil remedies" since "now only the United States can institute injunctive proceedings." *See Victims of Crime, Hearing before the Subcom. on Criminal Laws and Procedures of the Senate Com. of the Judiciary*, 92nd Cong., 1st Sess. 158 (1972) (Statement of Richard Velde, Associate Administrator, Law Enforcement Assistance Administration) [hereinafter "Victims of Crime"]. While post-enactment legislative history is not by any means conclusive, it cannot merely be ignored. *North Haven Bd. of Educ. v. Bell, 456 U.S. 512, 530-35, 72 L. Ed. 2d 299, 102 S. Ct. 1912 (1982)*. It thus seems altogether likely that *§ 1964(c)* as it now stands was not intended to provide private parties injunctive relief. *But see* *Aetna Cas. and Sur. Co. v. Liebowitz, 570 F. Supp. 908, 909-10 (E.D.N.Y. 1983)* (injunctive relief granted), *aff'd on other grounds*, *730 F.2d 905*, slip op. at 2510 (2d Cir. 1984). Two other courts of appeals have reserved judgment on this issue. *Dan River, Inc. v. Icahn, 701 F.2d 278, 290 (4th Cir. 1983)*; *Bennett v. Berg, 685 F.2d at 1064*.

Professor Blakey also disagrees with this conclusion, making a rather remarkable argument based upon the use of the word "and" in *§ 1964(c)*, as follows. He states:

> A Congressional grant of the right to sue in the absence of statutory limitations, conveys the availability of all necessary and appropriate relief. *See, e.g.,* *Sullivan v. Little Hunting Park, Inc., 396 U.S. 229, 239, 24 L. Ed. 2d 386, 90 S. Ct. 400 (1969)*; *Bell v. Hood, 327 U.S. 678, 684, 90 L. Ed. 939, 66 S. Ct. 773 (1946)*. Significantly, the treble damage clause of *§ 1964(c)* is preceded by "and" and not "to." *See* *National R. R. Passenger Corp. v. National Ass'n of R.R. Passengers, 414 U.S. 453, 458, 38 L. Ed. 2d 646, 94 S. Ct. 690 (1974)* (grant of right in one form implies denial of right in another). Consequently, the availability of comprehensive civil relief should prove of particular significance, for example, in the area of government fraud at the state and local level.

Blakey & Gettings, *supra* note 6, at 1038 n.133.

We do not find it significant that the word "and" is used in *§ 1964(c)*, especially since its treble damage antitrust analog, *§ 4* of the Clayton Act, *15 U.S.C. § 15(a) (1982)*, uses the same word, "and," while a different specific statutory provision of that act expressly gives a private antitrust plaintiff the right to seek an injunction (except when a common carrier is a defendant). Clayton Act § 16, *15 U.S.C. § 26 (1982)*. We endorse Judge Shadur's comment that an argument based on the word "and" is "bizarre and wholly unconvincing as a matter of plain English." *Kaushal v. State Bank of India, 556 F. Supp. 576, 582 & n.17 (N.D. Ill. 1983)*. Indeed, the Supreme Court has explicitly held that the parallel language of *§ 4* of the Clayton Act *precluded* private injunctive relief. *Paine Lumber Co. v. Neal, 244 U.S. 459, 61 L. Ed. 1256, 37 S. Ct. 718 (1917)*; *Minnesota v. Northern Secs. Co., 194 U.S. 48, 48 L. Ed. 870, 24 S. Ct. 598 (1904)*.

[21] One Judiciary Committee member indicated on the floor that three changes had been made from the Senate bill "merit[ing] discussion," but did not include the addition of the private cause of action among these three. 116 Cong. Rec. 35197-98 (1970) (remarks of Congressman McCulloch).

> at the suggestion of the gentleman from Arizona (Mr. Steiger) and also the American Bar Association and others, the committee has provided that private persons injured by reason of a violation of the title may recover treble damages in Federal courts -- another example of the antitrust remedy being adapted for use **[**20]** against organized criminality. [22]

This brief remark is one of only three statements regarding section 1964(c) made on the House Floor. *See supra* note 22.

[22]** The House subcommittee hearings [23] are not much more helpful. Although they contain useful analysis of the purposes for creating civil remedies for the government, [24] **[**23]** and generally for applying antitrust **[*491]** type civil remedies in the fight against organized crime, [25] most of this discussion took place before the private remedy was added to the bill. Thus, although there was testimony that section 1964 was too broad, [26] none of that testimony was addressed to the private cause of action provision. The only discussion accompanying the introduction of the private action came in a statement by Representative Steiger, who wrote that such an amendment would enable "those who have been wronged by organized crime [to] at least be given access to a legal remedy" and that it would also "enhance the effectiveness of Title IX's prohibitions." [27]

Nor do the House's broad pronouncements on the purposes of Title IX or on the meaning of its other sections reveal Congress' intent in promulgating the private action. The House Report in its introductory section refers, inter alia, to the purpose of "proscribing the operation of any enterprise engaged in interstate commerce through a 'pattern' o[f] 'racketeering activity.'" H. Rep. No. 91-1549, 91st Cong., 2d Sess. 35, *reprinted in* 1970 U.S. Code Cong. & Ad. News 4007, 4010 (1970). It states that "'racketeering activity' is defined in terms of specific State and Federal criminal statutes." *Id.* It adds that "the title, as amended, also authorizes civil treble damage suits on the part of private **[**24]** parties who are injured." *Id.*

---

[22] 116 Cong. Rec. 35295 (1970) (remarks of Congressman Poff). Beyond this cursory statement, there are only two indications that the House was even made aware of the fact that the bill included a private cause of action. First there was Representative Steiger's amendment, quickly withdrawn, to add an injunctive remedy to the private action. *See* discussion *supra* note 20. More significantly, Representative (now Judge) Mikva offered an amendment providing for treble damages for defendants who became subjects of frivolous suits under the section. *See* 116 Cong. Rec. 35342-43 (1970). The evident purpose of this amendment, which was quickly defeated, *id.*, was to point out the dangerous overbreadth of the section, which Mikva claimed was a "dangerous tool . . . given to a competitor who wants to go after somebody who is competing too vigorously against him." *Id.* at 35342. We decline to infer from Representative Mikva's comments the conclusion that Congress intended to promulgate a statute as broad as the one he feared it was passing. Deriving legislative intent from a dissenting congressman's "parade of horrors" speeches in opposition is a notoriously dubious practice.

[23] House Hearings, *supra* note 9.

[24] *Id. at 106* (Statement of Sen. McClellan). It was thought wise to provide the government with civil remedies as a way around the "one-sided" procedural protections afforded criminal defendants in American courts. *Id.* As to the constitutional permissibility of avoiding the procedural protections built into the criminal law by labelling a proceeding "civil," *see* Note, *Criminal Law -- Enforcing Criminal Laws Through Civil Proceedings: Section 1964 of the Organized Crime Control Act of 1970*, *18 U.S.C. § 1964 (1970)*, 53 Texas L. Rev. 1055 (1975); Note, *Organized Crime and the Infiltration of Legitimate Business: Civil Remedies for "Criminal Activity*," 124 U. Pa. L. Rev. 192 (1975); *see also* Comment, *Constitutional Issues Raised by the Civil-Criminal Dichotomy of the Maine OUI Law*, 35 Me. L. Rev. 385 (1983). Civil remedies were also found to be a useful way to expand the nature of relief available to the federal prosecutors. House Hearings, *supra* note 9, at 107.

[25] *See* House Hearings, *supra* note 9, at 147-49 (report of the ABA).

[26] In particular, representatives of the Association of the Bar of the City of New York and of the American Civil Liberties Union objected to the scope of Title IX. *See* House Hearings, *supra* note 9, at 327-31 (Ass'n of the Bar report), 499-518 (statement and testimony of ACLU).

[27] *Id. at 520*.

The section by section explanation is hardly more helpful. Referring to *section 1961(1)* [28] **[**26]** which defines "racketeering activity," the report says that that term is defined

> to include murder, kidnaping, gambling, arson, robbery, bribery, extortion, narcotic violations, counterfeiting, usury, mail, bankruptcy, wire and securities fraud, and obstruction of justice. State offenses are included by generic designation. Federal offenses are included by specific reference. The term "racketeering **[*492]** activity" is a key statutory term. Under *section 1962* below, racketeering activity is one of three prerequisites to commission of an offense. If there is no racketeering activity, or no collection of an "unlawful debt" there can be no violation of the provisions of this title.

Id. at 56, *reprinted in* 1970 U.S. Code Cong. & Ad. News at 4032. The House Report defines "pattern of racketeering activity" only by referring to the *section 1961(5)* [29] definition that it is the equivalent of at least two acts of racketeering activity occurring within a given time period. *Id.* The report deals with *section 1962* by saying that it **[**25]** "establishes a threefold prohibition aimed at stopping the infiltration of racketeers into legitimate organizations," noting that subsection (c) "prohibits the conduct of the enterprise through the prohibited pattern of activity or collection of debt." *Id. at 57*, *reprinted in* 1970 U.S. Code Cong. & Ad. News at 4033. In reference to the civil remedies provided in *section 1964(c)* for the violation of *section 1962*, the report merely paraphrases the language of *section 1964(c)*.

The most important and evident conclusion to be drawn from the legislative history is that the Congress was not aware of the possible implications of *section 1964(c)*. If Congress had intended to provide a federal forum for plaintiffs for so many common law wrongs, it would at least have discussed it. If Congress had intended to provide an alternate and more attractive scheme for private parties to remedy violations of the securities laws -- involving decades of statutes, regulations, commentaries, and jurisprudence -- it would at least have mentioned it. The House

---

[28] *18 U.S.C. § 1961* provides in part:

> ***HN7***[] As used in this chapter --
>
> (1) "racketeering activity" means (A) any act or threat involving murder, kidnaping, gambling, arson, robbery, bribery, extortion, or dealing in narcotic or other dangerous drugs, which is chargeable under State law and punishable by imprisonment for more than one year; (B) any act which is indictable under any of the following provisions of title *18, United States Code: Section 201* (relating to bribery), section 224 (relating to sports bribery), sections 471, 472, and 473 (relating to counterfeiting), section 659 (relating to theft from interstate shipment) if the act indictable under section 659 is felonious, section 664 (relating to embezzlement from pension and welfare funds), sections 891-894 (relating to extortionate credit transactions), section 1084 (relating to the transmission of gambling information), *section 1341* (relating to mail fraud), *section 1343* (relating to wire fraud), section 1503 (relating to obstruction of justice), section 1510 (relating to obstruction of criminal investigations), section 1511 (relating to the obstruction of State or local law enforcement), section 1951 (relating to interference with commerce, robbery, or extortion), section 1952 (relating to racketeering), section 1953 (relating to interstate transportation of wagering paraphernalia), section 1954 (relating to unlawful welfare fund payments), section 1955 (relating to the prohibition of illegal gambling businesses), sections 2314 and 2315 (relating to interstate transportation of stolen property), sections 2341-2346 (relating to trafficking in contraband cigarettes), sections 2421-24 (relating to white slave traffic), (C) any act which is indictable under title *29, United States Code, section 186* (dealing with restrictions on payments and loans to labor organizations) or section 501(c) (relating to embezzlement from union funds, or (D) any offense involving fraud connected with a case under title 11, fraud in the sale of securities, or the felonious manufacture, importation, receiving, concealment, buying, selling, or otherwise dealing in narcotic or other dangerous drugs, punishable under any law of the United States. . . .

[29] *18 U.S.C. § 1961(5)* provides:

> (5) ***HN8***[] "pattern of racketeering activity" requires at least two acts of racketeering activity, one of which occurred after the effective date of this chapter and the last of which occurred within ten years (excluding any period of imprisonment) after the commission of a prior act of racketeering activity. . . .

Judiciary Committee, which authored the provision, would at least have mentioned the amendment to the full House as a major change in its report had there been any inkling of its **[**27]** possible implications.

The clanging silence of the legislative history, coupled with the section's use in areas far afield from the battle against organized crime, has led some, though concededly not all, courts to read various limitations into the act in order to conform its use to that thought to best effectuate the congressional purpose.

Four such limitations have been widely considered: (1) whether RICO requires some nexus between the challenged activity and organized crime; (2) whether the injury complained of must result from "enterprise" involvement in the racketeering, rather than directly from the activity itself; (3) whether plaintiffs must allege a "competitive" or "racketeering injury"; and (4) whether there must be criminal convictions for the predicate acts underlying a civil RICO suit.

Even a cursory review of the case law indicates that there is simply no consensus on what RICO requires. While some courts have held that only those activities with some connection to organized crime may be the subject of civil RICO suits, [30] others, including this circuit, [31] have rejected this limitation. [32] **[**29]** Similarly, although **[*493]** some courts have read RICO to require **[**28]** a showing of "competitive" [33] or "racketeering" [34] injury, more have held against imposing such limitations. [35] Finally, courts have split on whether there must be criminal convictions for the predicate acts prior to institution of a private civil RICO suit. *See* cases cited at *infra* note 42.

[33] *E.g.,* *Bankers Trust v. Feldesman, 566 F. Supp. 1235, 1241 (S.D.N.Y. 1983)*; *North Barrington Dev., Inc. v. Fanslow, 547 F. Supp. 207, 211 (N.D. Ill. 1980)* ("plaintiff must allege how it was injured competitively by the RICO violation in order to state a cause of action under *§ 1964(c)*").

[34] *Waste Recovery Corp. v. Mahler, 566 F. Supp. 1466, 1468-69 (S.D.N.Y. 1983)*; *Barker v. Underwriters at Lloyd's, London, 564 F. Supp. 352, 358 (E.D. Mich. 1983)*; *King v. Lasher, 572 F. Supp. 1377, 1382 (S.D.N.Y. 1983)*; *In re Action Indus. Tender Offer, 572 F. Supp. 846, 852 (E.D. Va. 1983)*; *Guerrero v. Kafzen, 571 F. Supp. at 721* (injury "by reason of a RICO violation"); *Van Schaick*, 535 F. Supp. at 1137 & n.11 (commercial or business injury required); *Harper v. New Japan Secs. Int'l, Inc., 545 F. Supp. 1002, 1007-08 (C.D. Cal. 1982)*; *Johnsen v. Rogers, 551 F. Supp. 281, 285 (C.D. Cal. 1982)*; *Gitterman v. Vitoulis, 564 F. Supp. 46, 49 (S.D.N.Y. 1982)*; *Landmark Savs. & Loan v. Loeb Rhoades, Hornblower & Co., 527 F. Supp. 206, 208-09 (E.D. Mich. 1981)*.

[35] The following are among the cases that have rejected a "competitive injury" requirement: *Bunker Ramo Corp. v. United Business Forms, Inc., 713 F.2d at 1288*; *Schacht v. Brown, 711 F.2d at 1358*; *Bennett v. Berg, 685 F.2d 1053, 1059 (1982)*, *aff'd en banc*, *710 F.2d 1361* (8th Cir.), *cert. denied sub nom. Prudential Ins. Co. of America v. Bennett, 464 U.S. 1008, 104 S. Ct. 527, 78 L. Ed. 2d 710 (1983)*; *Kimmel v. Peterson, 565 F. Supp. 476, 493-95 (E.D. Pa. 1983)* (also finding racketeering injury indistinguishable from competitive or commercial injury); *Mauriber v. Shearson/American Express, Inc., 567 F. Supp. at 1240*; *Ralston v. Capper, 569 F. Supp. 1575, 1580 (E.D. Mich. 1983)*; *Gitterman v. Vitoulis, 564 F. Supp. at 48*; *USACO Coal Co. v. Carbomin Energy, Inc., 539 F. Supp. 807, 814* (W.D. Ky.), *aff'd on other grounds*, *689 F.2d 94 (6th Cir. 1982)*; *Crocker Nat'l Bank, 555 F. Supp. at 49*.

[30]** We have as yet little guidance from the Supreme Court as to which, if any, of these different understandings of RICO's private civil remedy is appropriate. In holding in *United States v. Turkette, 452 U.S. 576, 69 L. Ed. 2d 246, 101 S. Ct. 2524 (1981)* that ***HN9***[] the term "enterprise" as used in RICO encompasses both legitimate and illegitimate enterprises, and that an enterprise must be an entity separate and apart from the pattern of activity in which it engages, *452 U.S. at 587*, the Court said in reference to the civil remedies that "as a general proposition, however, the civil remedies could be useful in eradicating organized crime from the social fabric, whether the enterprise be ostensibly legitimate or admittedly criminal." It went on to say that "the aim is to divest the association of the fruits of its ill-gotten gains." *Id. at 585*. The Court concluded that it is "untenable" that the existence of the civil remedies "limits the scope of this criminal provision." *Id.*

The Court recognized that Congress, in passing RICO, intended to "alter somewhat the role of the Federal Government in the war against organized crime," *id. at 587*, and rejected the lower court's view **[**31]** that in order to right "the balance between federal and state enforcement of criminal law" it was obliged to read narrowly the statutory definition of "enterprise." *Id. at 586-87*. However, the Court was only discussing congressional intention as to the criminal enforcement provisions of RICO, **[*494]** not the intended scope of the private civil remedy. *Id.* Similarly, the Court's invocation of the plain meaning rule as regards the Congressional definition of "enterprise" in *18 U.S.C. § 1961(4)*, *452 U.S. at 580-81*, provides little or no guidance as to the handling of the very real ambiguities, which we discuss below, surrounding the complex statutory scheme providing for the private civil remedy. *See* *Harper v. New Japan Securities International, Inc., 545 F. Supp. 1002, 1005-06 (C.D. Cal. 1982)*. [36]

[32]** *Discussion*

I. *Injury by Reason of Racketeering Activity*.

We agree with the district court that the appellant has failed to allege any injury to its business "by reason of a violation of *section 1962*," as required by *section 1964(c)*. The "by reason of" standing limitation to RICO has been endorsed by a great many district courts. *See* cases cited in *supra* notes 33-34. They argue that the "by reason of" language was put into the statute by Congress as a way to limit standing to sue under RICO to people hurt by an injury of the type RICO was intended to prevent. RICO was intended not simply to provide additional remedies for already compensable injuries, [37] **[**34]** but rather to provide added remedies and procedures to fight certain specific kinds of organized criminality. The "by reason of" language, therefore, requires that plaintiffs allege injury

---

The following cases have rejected a "racketeering injury" requirement: *Mauriber v. Shearson/American Express, Inc., 567 F. Supp. at 1240*; *Windsor Assocs., Inc. v. Greenfeld, 564 F. Supp. at 278-79* (also finding racketeering injury "analytically indistinguishable" from argument that RICO applies only to organized crime); *Seville Indus. Mach. Corp. v. Southmost Mach. Corp., 567 F. Supp. 1146, 1157 (D.N.J. 1983)*.

Commentators too have disagreed about the propriety of a "racketeering injury" requirement. *Compare* Note, *Civil RICO: The Temptation and Impropriety of Judicial Restriction*, 95 Harv. L. Rev. 1101, 1109-14 (1982) (limitation unprincipled) [hereinafter "Note, Civil RICO"] *with* Comment, *Reading the "Enterprise" Back Into RICO: Sections 1962 and 1964(c)*, 76 Nw. L. Rev. 100, 126-32 (1981) (supporting a standing requirement); Bridges, *supra* note 6, at 71-73 (*id.*).

[36] In another recent criminal RICO case the Court similarly rejected a narrow reading of the word "interest" in § 1963(a)(1). *Russello v. United States, 464 U.S. 16, ___, 104 S. Ct. 296, 300, 78 L. Ed. 2d 17 (1983)*. As it did in *Turkette*, the Court relied upon the plain meaning of the statutory language, also making reference to the liberal construction clause in RICO. *Id. at 302*. The Court also repeated its conclusion that the legislative history of RICO suggests that Congress intended the criminal provisions to be given a broad construction. *Id. at 302-03*.

[37] *United States v. Forsythe, 560 F.2d 1127, 1135 (3d Cir. 1977)* ("State law offenses are not the gravamen of RICO offenses. RICO was not designed to punish state law violations; it was designed to punish the impact on commerce caused by conduct which meets the statute's definition of racketeering activity."). *Cf.* *United States v. Bledsoe, 674 F.2d 647, 659 (8th Cir. 1982)* ("RICO was not designed to serve as a recidivist statute, imposing heavier sentences for crimes which are already punishable under other statutes."), *cert. denied sub nom.* ***Phillips v. United States, 459 U.S. 1040, 103 S. Ct. 456, 74 L. Ed. 2d 608 (1982)***.

caused by an activity which RICO was designed to deter, which, whatever it may be, is different from that caused simply by such predicate acts as are alleged here.

The justification for this limitation is not derived solely from the language of the statute. [38] Instead, many courts focus on the fact that the "by reason of" **[**33]** language is drawn directly from section four of the Clayton Act. In that act the language has been construed to require plaintiffs to allege and prove an "antitrust injury," *e.g.,* ***[*495]*** *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*, which the Supreme Court has defined as "injury of the type the antitrust laws were intended to prevent." *Id.* By analogy, then, ***HN10***[] the "by reason of" language in *section 1964(c)* is intended to limit standing to those injured by a "racketeering injury," by an injury of the type RICO was designed to prevent. *See, e.g.,* *In re Action Industries Tender Offer, 572 F. Supp. at 851-52*; *Johnsen v. Rogers, 551 F. Supp. at 285*.

[35]** Two kinds of questions have, however, been raised in relation to finding a standing requirement analogous to the Clayton Act's in RICO's "by reason of" language. First, courts and commentators have argued that the legislative history demonstrates that Congress did not intend to have the Clayton Act's standing requirement applied to RICO. *E.g.* *Schact v. Brown, 711 F.2d at 1357-58*; Blakey & Gettings, *supra* note 6, at 1015-17 & nn. 24-32, 1041. The second question has to do with defining precisely what is meant by a "racketeering injury."

One of the Senate predecessors to RICO was framed as an amendment to the Clayton Act. S. 2048, 90th Cong., 1st Sess. (1967). This approach was rejected by the House Judiciary Committee in part because it was thought that the strict standing requirements of the Clayton Act should not have to be met by plaintiffs suing under RICO. House Hearings, *supra* note 9, at 149 (Statement of the Antitrust Section of the ABA). Similarly, on the Senate Floor a number of Senators explicitly rejected the idea of "imputing the great complexity of ***antitrust law*** enforcement" to RICO, [39] although this discussion did not refer to the *private* civil action **[**36]** which, as we have noted, was added to the bill only after it had left the Senate. The legislative history suggests that it would therefore be inappropriate to carry over wholesale all of the elaborate antitrust standing case law onto RICO. It would no doubt violate both the congressional purpose and common sense to require RICO plaintiffs to allege an injury of the type the *antitrust* laws were designed to prevent to maintain a RICO suit.

On the other hand, there is nothing in the legislative history which suggests that Congress did not intend to create *analogous* standing barriers to RICO by using the "by reason of" language. By borrowing language imposing a

---

[38] It can be argued that a "pattern of racketeering activity" is defined merely in terms of predicate offenses and nothing more, *§ 1961(1)*, *(5)*, so the fact that racketeering activity must be proved under *§ 1964(c)* does not in itself require that something other than the predicate offenses be proved. On the other hand the statutory definition states that a pattern "*requires* at least two acts of racketeering activity. . . ." *18 U.S.C. § 1961(5)* (emphasis added). An argument can be made that the use of the word "requires" instead of the word "means" implies that Congress left it to the courts to define the contours of the concept of "pattern." *See* Bridges, *supra* note 6, at 64-65 & n.119. Here Senator McClellan's observations, quoted in *id.* at n.118, may assume importance:

> The [ACLU] offers an inaccurate and prejudicial criticism of title IX when it states that "pattern of racketeering activity" is defined as two or more acts of "racketeering activity," and worries that a person could be subjected to the sanctions of title IX simply for committing two widely separated and isolated criminal offenses, one of which related to an interstate business. Again, a careful reading of title IX would have informed the union that a pattern under title IX is not defined as two or more acts of racketeering activity, but requires them.
>
> The term "pattern" itself requires the showing of a relationship, and the committee report . . . thus reinforces that interpretation. So, therefore, proof of two acts of racketeering activity, without more, does not establish a pattern and the ACLU's fears are unwarranted.

116 Cong. Rec. 18940 (1970) (statement of Sen. McClellan).

[39] 115 Cong. Rec. 9567 (1969) (Statement of Senator McClellan). *See also* 115 Cong. Rec. 6993 (1969) (Statement of Senator Hruska).

standing limitation, it is reasonable to believe that Congress indicated a desire to have an analogous standing limitation imposed in RICO. [40]

[37]** The question then becomes what kind of injury is a "racketeering injury"? As has been said, ***HN11***[] RICO was intended to "address the infiltration of legitimate business by organized crime." *Turkette, 452 U.S. at 591*. According to the congressional statement of findings and purpose, the Act was to seek to eradicate organized crime because "organized crime activities in the United States weaken the stability of the Nation's economic system, harm innocent investors and competing organizations, interfere with free competition, seriously burden interstate and foreign commerce, threaten the domestic security, and undermine the general welfare of the Nation and its citizens." *See also* legislative history cited in *Bridges, supra* note 6, at 68-72 & nn. 133-39. RICO was not enacted merely because criminals break laws, but because mobsters, either through **[*496]** the infiltration of legitimate enterprises or through the activities of illegitimate enterprises, cause systemic harm to competition and the market, and thereby injure investors and competitors. It was to help solve this problem that Congress added RICO to the arsenal of weapons used to fight organized crime. It is only when **[**38]** injury caused by this kind of harm can be shown, therefore, that we believe that Congress intended that standing to sue civilly should be granted.

This is, we repeat, by no means to say that standing to sue under RICO should be limited only to people who have standing to sue for a competitive injury under the antitrust laws. [41] This is so because Congress in promulgating RICO was addressing the kind of economic injury which has an effect on competition, but nowhere suggested that actual anticompetitive effect is required for suits under the statute. For purposes of clarity, it is better to identify the RICO standing requirement as a "racketeering injury" requirement rather than a "competitive injury" requirement, as the latter term may incorrectly suggest that all of the details of the ***antitrust law*** standing requirement are being incorporated by reference. This carries with it at least, as the trial judge found, the obligation that the plaintiff show injury different in kind from that occurring as a result of the predicate acts themselves, or not simply caused by the predicate acts, but also caused by an activity which RICO was designed to deter.

[39]** II. *Necessity of a Prior Conviction*.

---

[40] Thus, in an interesting paper in the post-legislative history, the American Law Division of the Library of Congress, after reviewing the purposes of RICO and of the antitrust laws, concluded that "given the similarity of language and circumstances between the antitrust provisions and those of the Organized Crime Control Act, there is no reason to believe that many of these [antitrust] principles and problems would [not] be applicable to both [antitrust and RICO] types of cases." *Reprinted in* Victims of Crime, *supra* note 20, at 331. *See* *Landmark Savs. & Loan, 527 F. Supp. at 208-09* ("Competitive injuries and racketeering enterprise injuries would frequently overlap, but they are not necessarily the same."). *See also* Bridges, *supra* note 6, at 68-73 & nn. 133-34.

[41] For example, recent antitrust cases which focus on market efficiency rather than on damage to business people, *see, e.g., Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 53 n.21, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*, are not relevant to the requirements of RICO standing. Nothing in RICO suggests, then, that only competitors can sue, or that Congress in enacting RICO was more concerned with economic efficiency than with providing remedies for victims of organized crime. *See* Note, *Civil RICO, supra* note 35, at 1113-14 ("RICO's explicit aim to promote free competition focuses as much on insuring a fair market as on insuring an efficient one. Thus, the state should protect the plaintiff injured competitively by a corrupt business even at a cost to market efficiency.").

Similarly, claims alleging the kinds of business fraud which often affect competition should go forward under RICO even if in the particular case no harm to competition results, as, for example, when all competitors are being extorted from equally. For example, in *Hellenic Lines, Ltd. v. O'Hearn, 523 F. Supp. 244 (S.D.N.Y. 1981)*, a company was forced to pay kickbacks to an illegal enterprise for required services. A RICO claim was allowed even though defendant claimed that the inflated price was still reasonable so that no injury to competition had occurred. It was enough that the plaintiff's alleged injury was the *kind* of injury which Congress identified as threatening competition. The fact that the suit may not have been viable under the Clayton Act shows that the two standing requirements overlap but are not identical.

We do not in this business fraud case attempt to define the scope of the standing requirement when the RICO suit is based upon securities law violations.

In *Trane Co. v. O'Connor Securities, 718 F.2d 26, 29 (2d Cir. 1983)*, we left "to another day" the question whether a prior criminal conviction is a prerequisite to a civil RICO action. We now hold that it is. A number of cases have discussed the problem with little or no analysis. Even the commentators who would call for an expansive reading of the Act have done likewise, merely citing those same cases in footnotes. *E.g.*, Note, *Civil RICO, supra* note 35, at 1103 n.17; Blakey and Gettings, *supra* note 6, at n.129. For reasons that appear below, we cannot agree with these decisions and commentators.

A. *The Case Law*.

United States v. Cappetto, 502 F.2d 1351 (7th Cir. 1974), *cert. denied*, *420 U.S. 925, 43 L. Ed. 2d 395, 95 S. Ct. 1121 (1975)*, is the case most frequently relied upon by courts which have held that criminal convictions are not required before private civil actions may be maintained. *Cappetto*, however, dealt solely with the government's right, in the absence of a criminal conviction, to sue for an injunction under *section 1964(a)* to prevent or restrain violations of RICO. The case held **[**40]** that Congress was entitled to make civil equitable **[*497]** relief available to the government to prevent or restrain certain actions under subsection 1964(a). In so doing, the court relied on a long series of cases which hold that the government is entitled to bring civil suits for acts which are also punishable as crimes, especially when it is seeking remedial equitable relief and not punitive relief. *502 F.2d at 1356-57*. Thus, far from determining the question of the intended or appropriate scope of the treble damage remedy provided to private parties under subsection 1964(c), *Cappetto* made no holding with respect to private civil actions. As a matter of policy, government actions and private actions are of course very different. Prosecutorial discretion, and in the case of RICO, guidelines from the Department of Justice, protect against overbroad use of RICO. *See United States Attorneys' Staff Manual, Executive Office for U.S. Attorneys, RICO Guidelines* (Jan. 30, 1981). There is no comparable way to limit private RICO.

Farmers Bank of Delaware v. Bell Mortgage Corp., 452 F. Supp. 1278, 1280 (D. Del. 1978), did squarely hold that *section 1964(c)* "does not condition **[**41]** that cause of action in any way upon a previous conviction under the criminal provisions of the statute," and adds that it is only necessary that the plaintiff prove the elements of the RICO action by a preponderance of the evidence in order to be awarded damages in a civil action. However, as support for these propositions it cites only to *Cappetto*. 452 F. Supp. at 1280. Almost all other cases that hold that criminal convictions are not necessary rely either on *Farmers Bank* or *Cappetto* and offer no other reasoning to support their conclusion. [42]

[42]** The only other argument put forward for the position that criminal convictions are not required for civil RICO suits is contained in *USACO Coal Co. v. Carbomin Energy, Inc., 689 F.2d 94, 95 n.1 (6th Cir. 1982)*. In a footnote the court stated:

> *Section 1962* merely describes acts that are "unlawful" under RICO. Section 1963 provides that violations of *§ 1962* are criminal, just as *§ 1964(c)* provides that violations of *§ 1962* create a private right of action for damages. If Congress had intended to limit liability under *§ 1964(c)* only to those convicted of or charged with RICO crimes, it would have done so within *§ 1964(c)* by referring to § 1963 or by otherwise specifically indicating that a conviction under § 1963 is a basis for civil damages. By referring in *§ 1964(c)* only to the

[42] *See, e.g., Glusband v. Benjamin, 530 F. Supp. 240, 241 (S.D.N.Y. 1981)*; *Harper v. New Japan Secs. Int'l, Inc., 545 F. Supp. 1002, 1007 n.8 (C.D. Cal. 1982)*; *Mauriber v. Shearson/American Express, Inc., 546 F. Supp. 391, 396 (S.D.N.Y. 1982)*; *Heinold Commodities, Inc. v. McCarty, 513 F. Supp. 311, 313-14 (N.D. Ill. 1979)*. *But see Van Schaick v. Church of Scientology of Cal., Inc., 535 F. Supp. 1125, 1137 n.12 (D. Mass. 1982)* (dicta that criminal convictions may be required); *Kleiner v. First Nat'l Bank of Atlanta, 526 F. Supp. 1019, 1022 n.2 (N.D. Ga. 1981)* *(id.), overruled on other grounds, Morosani v. First Nat'l Bank of Atlanta, 703 F.2d 1220 (11th Cir. 1983)*.

Certain other cases holding that criminal convictions are not required have relied in part upon the "liberal construction" language in *Turkette, 452 U.S. at 580-81*. *See USACO Coal Co. v. Carbomin Energy, Inc., 689 F.2d 94, 95 n.1 (6th Cir. 1982)*; *cf. Glusband, 530 F. Supp. at 241* (following *Turkette's* plain meaning analysis). For reasons we stated previously, we do not find the language in *Turkette* particularly helpful in analyzing this problem.

unlawful acts of § 1962, Congress has created a civil remedy that is independent of criminal proceedings under § 1963. [43]

[**43] While this argument is, at least, based upon the statute, we think it is misguided. If Congress had referred to [*498] section 1963 in section 1964(c), the result would have been not only to require criminal convictions for the predicate acts before bringing a civil suit, but to require a conviction under *RICO*. By referring to section 1962 in section 1964(c), it is our view that Congress intended to refer to injuries caused by the "unlawful" pattern of racketeering, defined in section 1961(5) as "requir[ing]" two of the criminal acts listed in section 1961(1). Thus people injured by "racketeering activity" may sue, assuming they have standing to sue, whether or not the government has brought an action *under RICO* to punish that activity. As to whether that racketeering activity itself must already have been proven criminal, the question we are facing here, the reference to section 1962 in section 1964(c) provides no indication.

B. *Statutory Analysis*.

1. *Language*. To determine the scope and content of the civil remedy, the proper place to begin analysis is, as always, the statutory language itself. To start, section 1964 itself draws several distinctions **[**44]** between the government and private persons. Subsection 1964(a) **HN12**[] gives the district courts jurisdiction to "prevent and restrain violations" of section 1962; it is not a general grant of jurisdiction and does not relate to subsection (c). Subsection (b) permits the Attorney General to institute proceedings under the section; it was drawn when subsection (c) was not in the statute and relates back to subsection (a). [44]

[**45] Study of the particular words chosen by Congress in drafting section 1964(c) is also fruitful. Section 1964(c), as has been noted, "is modeled after, but is not identical to, section 4 of the Clayton Act." [45] Therefore, any variations between the language of section four of the Clayton Act and section 1964(c) of RICO are especially instructive.

The Clayton Act provision reads in relevant part: "any person who shall be injured in his business or property *by reason of anything forbidden* in the antitrust laws may sue. . . ." 15 U.S.C. § 15(a) (1982) (emphasis added). RICO section 1964(c), on the other hand, reads: "Any person injured in his business or property *by reason of a violation* of

---

[43] 689 F.2d at 95 n.1.

Two other courts have forwarded versions of this same argument. State Farm Fire & Cas. Co. v. Caton, 540 F. Supp. 673, 675 (N.D. Ind. 1982); Parnes v. Heinold Commodities, Inc., 487 F. Supp. 645, 647 (N.D. Ill. 1980). Other courts have relied on *USACO* while holding or saying that criminal convictions are not necessary. Bunker Ramo Corp. v. United Business Forms, Inc., 713 F.2d 1272, 1287 (7th Cir. 1983); Moss v. Morgan Stanley, Inc., 719 F.2d 5, 19 n.15 (2d Cir. 1983) (dicta), *cert. denied sub nom. Moss v. Newman, 465 U.S. 1025, 104 S. Ct. 1280, 79 L. Ed. 2d 684 (1984)*; Barker v. Underwriters at Lloyd's, London, 564 F. Supp. 352, 356 (E.D. Mich. 1983); In re Longhorn Secs. Litigation, 573 F. Supp. 255, 270-71 (W.D. Okla. 1983).

[44] It would be a strained construction to say that any person by virtue of § 1964(c), which gives such a person only a right to damages, would also have a right to sue for permanent injunctive relief under subsection (a). *See supra* text at note 24. The differences between the private remedy sections in the Clayton Act and in RICO are particularly significant here. There are specific Clayton Act provisions giving the government and individuals the right to bring actions for injunctive relief, 15 U.S.C. §§ 25-26 (government, private persons), something which is not set forth in RICO § 1964 or evidently recognized by the *Cappetto* court when it speaks of the Clayton Act's § 4. 502 F.2d at 1357.

Moreover, section 1964(a) speaks of "jurisdiction to prevent and restrain violations of section 1962," on its face allowing injunctions *before* the violations have occurred or criminal prosecution commenced. Subsection (c), on the other hand, speaks of injury "by reason of a violation of section 1962," language which at least suggests that the violation must be proved criminally before the action commences.

[45] Blakey & Gettings, *supra* note 6, at 1040. *See* House Hearings, *supra* note 9, at 543-44 (ABA report). *Cf.* Bridges, *supra* note 6, at 68-70.

section 1962 of this chapter may sue . . ." (emphasis added). The difference is instructive. It is possible to argue that "violation" is simply a shorthand **[**46]** way of saying "by reason of anything forbidden," and one could suppose that when the House of Representatives reinserted the treble damage private right of action provision which had been rejected by the Senate it approved this change in a desire merely to eschew surplusage. [46] But this interpretation does not seem as compelling as one which suggests that the change was made with a specific intent in mind -- to require that conviction at least of the predicate acts be had before **[*499]** a civil suit may be brought by a private person. [47]

[47]** It is helpful to look back to the definition in section 1961(1) of "racketeering activity," since we are referred to section 1962 by way of section 1964(c), and section 1962(a) makes "a pattern of racketeering activity" "unlawful" in certain circumstances. Section 1961(1) describes four distinct types of such activity. Those under subparagraph (A) include "*any act or threat* involving murder, kidnaping, gambling, arson, robbery, bribery, extortion or dealing in narcotic or other dangerous drugs, which is *chargeable* under State law" and is punishable by imprisonment for more than one year (emphasis added). The "racketeering activity" acts under subparagraph (B) include "*any act which is indictable* under" certain provisions of federal law including mail fraud and wire fraud, in addition to other typical organized crime activities (emphasis supplied). The predicate acts under section 1961(1)(C) are, as in subparagraph (B), "indictable" acts dealing with labor matters. Finally, the predicate acts under subparagraph (D) include "any *offense* involving fraud" in the securities or bankruptcy areas, or in the felonious dealing in narcotic or other dangerous drugs (emphasis **[**48]** supplied).

The difference between the "chargeable under state law" and "indictable under federal law" language can readily be explained by the fact that some matters even involving imprisonment for more than a year may be chargeable by information under state law, as in the State of Connecticut for example. The distinction between "indictable" acts under (B) and (C) or "chargeable" acts under (A), on the one hand, and "offense[s]" under subparagraph (D), on the other, is more troubling. An "offense" speaks to conviction. An indictable or chargeable act refers obviously to an earlier stage in the criminal process. All these terms, however, speak along criminal rather than civil lines.

A person who is charged in a civil case with securities fraud (for example, by way of willful misrepresentations in a proxy statement), proof of which is by a preponderance of the evidence, can surely not be said to have committed "an offense," conviction of which requires proof beyond a reasonable doubt, with all of the traditional constitutional and other safeguards. Criminal violation of the securities laws occurs only with the requisite criminal scienter. Is one to be held liable under a lesser **[**49]** standard of proof in a private right of civil action and, not incidentally, thereby stigmatized as a "racketeer"? It is hard to believe that in adopting civil RICO Congress intended to permit proof of "willful" violations by only a preponderance of the evidence. [48] Otherwise, two misstatements in a proxy solicitation could subject any director in any national corporation to "racketeering" charges and the threat of treble damages and attorneys' fees.

---

[46] We are fully aware that the "by reason of a violation" language can be found in the earlier Senate and House bills which did contain private civil remedies. S. 1623, 91st Cong., 1st Sess., *§ 4(a)* (1969); S. 2048, S. 2049, 90th Cong., 1st Sess. (1967); H.R. 19586, H.R. 19215, 91st Cong., 2d Sess. (1970). *See supra* note 18 for a discussion of these bills. Nevertheless, the question remains why the House chose this language over the language of the Clayton Act.

[47] We note in the post-legislative history that this conclusion was rejected by the American Law Division of the Library of Congress in its comparative study of RICO and the Clayton Act, *see* Victims of Crime, *supra* note 20, at 323, 329, on the basis that "violation" is used elsewhere in the antitrust laws, e.g., in *15 U.S.C. §§ 4*, *25*, *26*. But two of the provisions cited in that study have their own parallels in RICO: *15 U.S.C. §§ 4* and *25* are equivalents of *18 U.S.C. § 1964(a)* giving district courts jurisdiction to prevent and restrain violations at the behest of the government. And the other Clayton Act provision cited, *15 U.S.C. § 26*, which has no parallel in RICO, gives similar jurisdiction at the behest of private parties, a matter which the American Law Division study sought explicitly to remedy as to RICO. Thus, the American Law Division statement does not meet the argument based on the difference in language between the treble damage private action provisions which are otherwise parallel, *15 U.S.C. § 15* and *18 U.S.C. § 1964(c)*.

[48] The Securities and Exchange Act of 1934 makes only "willful" violations criminally punishable. Section 32(a), *15 U.S.C. § 78ff (1982)*. On "offense" under the securities laws in RICO, *see generally* Bridges, *supra* note 6, at 63-64.

As for the language "any act which is indictable" (or "chargeable"), conceivably Congress meant by the choice of these words to suggest either that indictments or, in the case of certain state felonies informations, are not required, since the **[*500]** acts need only be "indictable or "chargeable" (emphasis added). But **[**50]** a plausible alternative view of the words "indictable" and "chargeable," found in RICO's definitional section, is that Congress did not intend to give civil courts power to determine whether an act is "indictable" in the absence of a properly returned indictment or "chargeable" absent an information. ***HN13***[] Courts do not traditionally look at a given set of facts -- proved by a preponderance of the evidence only -- and say that these facts make out acts which are "indictable" or "chargeable." *See* Kleiner v. First National Bank of Atlanta, 526 F. Supp. 1019, 1022 (N.D. Ga. 1981), *overruled on other grounds sub nom.* Morosani v. First National Bank of Atlanta, 703 F.2d 1220 (11th Cir. 1983). In the case of indictments that is the purpose of grand juries. ***HN14***[] The Fifth Amendment provides that "no person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a grand jury. . . ." Surely, being declared a "racketeer" or being held responsible for being one is being held to "answer for" an "infamous crime." [49] Whatever else one may think of grand juries or the processes by which they pursue their deliberations, they may stand as a bulwark **[**51]** between the individual and the government. Under the interpretation given RICO by those courts which do not require criminal convictions of the predicate acts before the bringing of a civil action, every private plaintiff becomes his own one-person grand jury, or in the case of state felonies chargeable by information, his own prosecutor.

[52]** 2. *Intent*. But we need not rest the argument for this narrow interpretation of RICO on parsing of the words of the statute, since concededly they are ambiguous and could be construed to relate to underlying conduct. The structure of RICO as a whole leads one to the narrower interpretation requiring criminal convictions by a more direct route. The Act is designed to provide new penalties and remedies to combat conduct which explicitly has already been found criminal. Thus it has been noted by the very commentators who have most strenuously urged a broad reading of civil RICO that RICO did not itself "draw a line between criminal and innocent conduct," but rather "authorized the imposition of different criminal or civil remedies on conduct *already criminal*, when performed in a specified fashion." Blakey & Gettings, *supra* note 6, at 1032 (emphasis supplied). [50] **[**54]** In this sense RICO **[*501]** is significantly different from the antitrust laws, where it is possible to bring a civil action even in the absence of criminal conduct. [51] RICO liability simply does not exist without criminal conduct, [52] though of course, in

---

[49] The American Bar Association has recommended that the RICO statute be amended to replace the term "racketeering activity" with the phrase "criminal activity" as a way to resolve this problem. Report to the House of Delegates, 1982 ABA Sec. Crim. Just. Rep. 3-4 (Jan. 1982). *Cf.* United States v. Guiliano, 644 F.2d 85, 89 (2d Cir. 1981) (prejudicial taint inevitably surrounds label of "racketeer").

As we have indicated in *supra* note 24, there are potential constitutional problems created by the broad reading of RICO endorsed by many courts. At some point defendants are entitled to the constitutional protections of the criminal law regardless of how the government chooses to characterize a given cause of action. *See* Boyd v. United States, 116 U.S. 616, 634-35, 29 L. Ed. 746, 6 S. Ct. 524 (1886). Relevant factors in characterizing an action as "criminal" are the nature of the underlying offense, the stigma attached to the charge made, In re Gault, 387 U.S. 1, 23-25, 18 L. Ed. 2d 527, 87 S. Ct. 1428 (1967), the nature of the punishment authorized by the statute, Trop v. Dulles, 356 U.S. 86, 94-95, 2 L. Ed. 2d 630, 78 S. Ct. 590 (1958), the intent of Congress in promulgating the statute, *id.*, and whether the government or a private party is bringing the action. *See generally* Note, *infra* note 59, at 210-12. Reading private civil RICO suits not to require criminal convictions would provide civil remedies for offenses criminal in nature, stigmatize defendants with the appellation "racketeer," authorize the award of damages which are clearly punitive, including attorney's fees, and constitute a civil remedy aimed in part to avoid the constitutional protections of the criminal law. Thus, the construction advanced in this opinion avoids serious constitutional questions.

[50] This structure is, of course, altered to some extent by the provision which allows the government to seek injunctive relief in the absence of criminal convictions. As we have indicated, however, injunctive relief to *prevent* violations is simply a very different kind of remedy than a treble damages action and is accordingly subject to a unique regimen. It would be contrary to the entire purpose of equitable remedies if their utilization had to await the imposition of criminal sanctions.

The argument made in text is nowhere answered by our dissenting brother.

[51]

a criminal RICO case, the proof of the predicate act **[**53]** convictions may be made under the same indictment, in the same trial and coordinately with the proof of the RICO offense(s). But in a civil context, there is no way to know whether the conduct in question is "already criminal," a problem compounded by the fact that ordinarily there is a lower burden of proof in civil actions. We conclude that had Congress considered this problem, it would have explicitly required previously established convictions in the context of *section 1964(c)*. Absent such explicit congressional direction, such a narrow reading of *section 1964(c)* best integrates that subsection into the entire structure of the Act. On the other hand, if the broad reading is accepted, problems are created of which there is no indication that Congress even dreamed.

[55]** Chief among these problems, as the foregoing argument suggests, is the proper burden of proof in proving predicate offenses in the absence of a criminal conviction. It is not surprising that courts which have allowed civil suits to go forward have wrestled with the proper burden of proof required to maintain the action. The problem, of course, relates to the burden to which a plaintiff must be put to prove that a defendant is a "racketeer" because he has committed two predicate acts. At least three different standards of proof are within the realm of plausibility: proof beyond a reasonable doubt, [53] **[**56]** proof by clear and convincing evidence, [54] and proof by preponderance of the evidence. [55] Courts in addition have indicated that probable cause must be alleged with reference to the predicate acts, although how this is meant to relate to the burden of the plaintiff at trial remains something of a mystery. [56]

Insofar as the RICO scheme calls for only criminal conduct to be punished, it thus appears that in the absence of previous convictions a civil plaintiff must carry a burden equal to that in a criminal case in **[*502]** proving that

---

> [There is] a significant distinction between *section 1964* and the antitrust laws . . . . [Sherman Act] civil actions may be brought in cases in which criminal prosecution would not have been justified . . . . Thus, a civil action may succeed . . . [even] if the government [does] not show that the violation constituted a *criminal* act.
>
> . . .
>
> Thus, *the charge that a section 1964 action is "inherently criminal" is true*. (emphasis added) (footnote omitted).

Note, *Organized Crime and the Infiltration of Legitimate Business: Civil Remedies for "Criminal Activity*," 124 U. Pa. L. Rev. 192, 208-09 (1975). *See also Matz, Determining the Standard of Proof in Lawsuits Brought Under RICO*, Nat'l L. J., Oct. 10, 1983, at 21, col. 1.

[52] *United States v. Campanale, 518 F.2d 352, 365 n.36 (9th Cir. 1975)* ("The acts constituting racketeering activity must themselves be criminal offenses."), *cert. denied sub nom.* ***Mathews v. United States, 423 U.S. 1050, 96 S. Ct. 777, 46 L. Ed. 2d 638 (1976)***; *Salisbury v. Chapman, 527 F. Supp. 577, 579 (N.D. Ill. 1981)* ("RICO does not contain any substantive prohibitions unknown to other sections of federal criminal law. Instead, it confers upon victims of certain *criminal violations* the right to proceed in a civil suit against the offenders." (Emphasis added.))

[53] No court to date has held that the criminal burden is appropriate. The standard is mentioned in Matz, *supra* note 51. *See also Note, Enforcing Criminal Laws Through Civil Proceedings: Sec. 1964 of the Organized Crime Control Act of 1970, 18 U.S.C. § 1964 (1970)*, 53 Tex. L. Rev. 1055, 1062 n.52 (1975) ("Where, as with *section 1964*, proof of a violation of the statute requires proof of the commission of a crime, the defendant should arguably receive the benefit of a traditional criminal trial.").

[54] *Swanson v. Wabash, Inc., 577 F. Supp. 1308 (N.D. Ill. 1983)* (suggesting appropriateness of clear and convincing standard, citing Matz, *supra* note 51, at 21, col. 1).

[55] *Farmers Bank of Del. v. Bell Mortgage Corp., 452 F. Supp. 1278, 1280 (D. Del. 1978)*; *Parnes, 487 F. Supp. at 647* ("civil burden of proof"); *State Farm Fire & Cas. Co., 540 F. Supp. at 676* (citing *Farmers Bank); Heinhold Commodities, 513 F. Supp. at 313 (id.); Eaby v. Richmond, 561 F. Supp. 131, 133-34 (E.D. Pa. 1983)*.

[56] *Taylor v. Bear Stearns & Co., 572 F. Supp. 667, 682-83 (N.D. Ga. 1983)*; *Bache Halsey Stuart Shields Inc. v. Tracy Collins Bank & Trust Co., 558 F. Supp. 1042, 1045 (D. Utah 1983)*.

criminal conduct. Yet it would be extraordinarily difficult for juries to understand the different burdens of proof required for different elements **[**57]** of a civil case. Moreover, if Congress had intended to impose such an unusual scheme, one would think that some suggestion of it would have occurred in the extensive legislative history. Instead, that history indicates that Congress assumed a preponderance standard was appropriate. [57] The most logical conclusion to be drawn is that ***HN15***[] Congress expected the criminality of the predicate acts to be proved before the private action went forward -- that a criminal conviction must precede a private civil suit.

[58]** In addition to burden of proof problems, allowing private civil RICO claims to proceed without criminal convictions would make a hash of the very "liberal construction" provision said to require just such a result. It has been argued by the leading proponents of a broad reading of civil RICO that liberal construction is appropriate because RICO merely penalizes conduct already criminal; thus, it is said, requirements of strict construction have already been applied in construing the predicate criminal offenses. [58] Acknowledging that due process, of course, requires that criminal statutes be strictly construed, *e.g., Dunn v. United States, 442 U.S. 100, 112, 60 L. Ed. 2d 743, 99 S. Ct. 2190 (1979)*, these proponents argue that since proof of criminal conduct could already be presumed in RICO suits, there would then be no need to "*further* restrict the scope of the statute by *re* applying these policies." Blakey & Gettings, *supra* note 6, at 1032 (emphasis added).

[59]** In the civil context, absent predicate act convictions, the policy of strict construction simply cannot be implemented. As one commentator has suggested, "if the liberal construction clause is applicable to determine the scope of criminal liability under Title IX, the provision is therefore unconstitutional." Tarlow, *RICO Revisited*, *17 Ga. L. Rev. 291, 309 (1983)*. How could the line be crossed into the sphere of criminality simply by bringing a civil action? It is this peculiar structure of RICO that strongly suggests that, had Congress considered the problem, it would have intended criminal convictions of at least the predicate crimes as a prerequisite for a civil RICO action. RICO's statutorily mandated requirement of liberal construction cannot fairly be relied upon in interpreting *section 1964(c)* without undermining its very justification. Nor is this anomaly surprising given that private civil RICO was added to RICO in the House as an afterthought, **[*503]** subsequent to the inclusion of the liberal construction clause in the Senate version of the bill. The statute, we repeat, is simply not a symmetrical whole.

In sum, after reviewing the words and structure of the **[**60]** enacted statute, its legislative history, and the prior case law interpreting the statute, we find it impossible to believe that in enacting RICO, Congress intended to

---

[57] House Hearings, *supra* note 9, at 106-07, 664, 687. All of this discussion referred only to the government's private action. Nevertheless, some witnesses in the House hearings assumed that the "pattern of racketeering activity" element in a civil suit would have to be proved beyond a reasonable doubt. *See id. at 328-29* (Report of the Association of the Bar of the City of New York).

Our dissenting brother does not directly confront the burden of proof problems except by apparently suggesting that a preponderance standard is sufficient (dissenting op., [slip op.] page 6), but that if it is not some heightened standard would be (dissenting op., [slip op.] pp. 7-8). Having in mind Congress's omission to examine this problem except very obliquely, as we point out in text, to attempt to draw a jury charge dealing with different burdens of proof is not only a very difficult task, likely to cause great confusion, but also not a little bit of the judicial legislation Judge Cardamone decries. And to accept the proposition that you can prove *criminal* acts, notes 50 *supra* and 58 *infra*, by a preponderance of the evidence raises its own problems of a higher magnitude, as we point out in text.

[58] *See* Blakey & Gettings, *supra* note 6, at 1031-32:

> Congress believed that the normal practice of following a policy of strict construction . . . was inappropriate in the context of RICO, since *RICO did not draw a line between criminal and innocent conduct*. Instead, *RICO authorized the imposition of different criminal or civil remedies on conduct already criminal, when performed in a specified fashion*. Once the policies of strict construction or leniency had been implemented in the construction of the underlying "racketeering activity," *and the line had been crossed into the sphere of criminality*, it was *inappropriate to further restrict the scope of the statute by reapplying these policies*.

(Emphasis added) (footnote omitted). This point is simply not addressed by our dissenting brother. See note 50 *supra*.

sweep all ordinary injuries occasioned by the predicate criminal acts within the dragnet of the treble damage remedy provided by *section 1964*. To bring a private civil action, there must be a "violation," that is, criminal convictions on the underlying predicate offenses. Of course, a conviction under RICO itself will do, a fortiori. Moreover, plaintiffs must satisfy the standing requirement set out in this opinion and by the court below, a requirement that, as a practical matter, will not create an added barrier to a plaintiff's suit following upon criminal convictions under RICO, though it may present a problem in the case of convictions only of predicate acts, a problem which we need not here address.

Neither should the criminal conviction requirement create a significant additional barrier to a RICO plaintiff with proper standing to sue. Even without such a requirement, if a criminal prosecution is possible, it is unlikely that private RICO actions can progress very far, since defendants will block discovery by **[**61]** invoking the *Fifth Amendment*. *See* Bridges, *supra* note 6, at 53 n.66.

We therefore reject arguments based on the supposed "plain meaning" of a statute that, whatever its virtues and vices, is hardly a model of clarity. Being required, then, to look to the legislature's intent as demonstrated in the legislative history, we find nothing conclusive, but discern in the legislative silence a purpose that is entirely at odds with the open-ended reading of the statute adopted by a number of the courts and promoted by certain commentators. The legislative history indicates that the private action provision is modeled upon the Clayton Act, and we hold that standing requirements analogous but not identical to those in the Clayton Act should be required in RICO. We also note that the civil RICO provisions differ in some significant ways from the Clayton Act provisions.[59] In particular, the Clayton Act allows suits in the absence of criminal conduct, and therefore obviously in the absence of criminal convictions. Private civil RICO, on the other hand, is designed only to penalize conduct already determined to be criminal. In addition, the analysis of the RICO private treble damage provision **[**62]** must necessarily be differentiated from analysis of the injunctive provisions of RICO, both because of the differences between the government and a private party as a plaintiff, and because of the inherent differences between injunctive and punitive damages relief. Finally, we have tried to suggest that RICO's "liberal construction" clause actually requires that criminal convictions be obtained before civil suits under *section 1964(c)* commence.

We need not rest the argument on the burdens to which the courts would otherwise be subjected, though other things being equal that might carry weight. We do strongly suggest, however, that if Congress had intended to permit defendants in every "garden-variety" **[**63]** fraud or securities violation case to be stigmatized as "racketeers," on the basis of a preponderance of the evidence, it would have said so in plainer language than it did. Before we impute to Congress the intention of federalizing a large portion of the common law which, since the time of the Constitution, has been left to the courts of the several states, and of providing treble damages and attorneys' fees for violations of these laws, or of altogether replacing or eliminating much of the need for extensive bodies of federal law **[*504]** specifically directed at extensively considered evils, we will require more explicit language from Congress indicative of such intent.

Judgment affirmed.

Dissent by: CARDAMONE

Dissent

CARDAMONE, Circuit Judge, dissenting.

[59] Proponents of a broad reading of the statute apply Clayton Act provisions by analogy when they suggest that since criminal convictions are not required there, they should not be required under RICO. At the same time they urge that the Clayton Act standing provisions should *not* be applied in interpreting RICO.

I disagree with the majority's conclusion that this Court should create a requirement of prior criminal conviction for the predicate acts forming the pattern of racketeering activity for all civil RICO claims. In so doing, the panel majority takes this Circuit far from the shores of principled and disciplined reasoning, and leads it unnecessarily into a sea of uncertainty. In the panel's view, Congress would have intended -- had **[**64]** it thought about the implications of *§ 1964* -- that prior convictions be required. Not only does the majority turn the ordinary rules of statutory construction on their head by ignoring the plain meaning of the statutory language, but it also ignores the sound policy reasons for permitting civil RICO cases to proceed absent prior convictions for the predicate acts. In my view, the civil RICO provisions mean just what they say. Because these and other considerations have convinced me that the majority has crossed the line and trespassed in an area exclusively reserved to Congress, I dissent.

I. *Prior Criminal Conviction Requirement*

Looking at the reasoning that creates a "prior predicate act criminal conviction" requirement one is struck that it -- in Alice's words -- gets "curiouser and curiouser." [1] No support for this proposition is found in the statute or its legislative history. Almost none of the decisions or the commentators argue for such drastic redrafting of the statute. In fact, they support the opposite conclusion, *i.e.* that no prior conviction is necessary to bring a civil claim under RICO.

[65]** Along the way to reaching its novel conclusion, the panel misconstrues Congress' reasons for the enactment of this statute and makes a number of faulty assumptions. The panel majority's position seems bottomed on: (1) disapproval of cases that have taken a contrary view; (2) a view that Congress did not give civil courts power to decide when acts are "indictable" or "chargeable"; (3) a view that *§ 1964* would constitute an unconstitutional "quasi-criminal" statute were a prior criminal conviction for the predicate acts not required; (4) a fear that defendants will be " stigmatizes" by a civil "conviction" for racketeering activity; and (5) analysis based on the word "violation" contained in *§ 1964*. I propose to deal with each of these premises *seriatim*.

(1) *Disapproval of Contrary Decisions*

The majority begins by analyzing those decisions that have refused to adopt a prior criminal conviction requirement, and disapproves of them because they supposedly are not well-reasoned. For example, *United States v. Cappetto, 502 F.2d 1351 (7th Cir. 1974)*, *cert. denied*, *420 U.S. 925, 43 L. Ed. 2d 395, 95 S. Ct. 1121 (1975)* is dismissed almost without comment because " **[**66]** *Cappetto* made no holding with respect to private civil actions." Others are discarded because they merely cite to *Cappetto. USACO Coal Co. v. Carbomin Energy, Inc., 689 F.2d 94, 95 n.1 (6th Cir. 1982)*, which rejected a prior conviction requirement, and reasoned that Congress would have defined the *§ 1964* "violation" differently had it desired such a requirement, is labelled "misguided."

This panel's evaluation of *Cappetto* puts it at odds with other panels of this Circuit that have cited that decision with apparent approval in other respects. *See* *United States v. Huber, 603 F.2d 387, 393 (2d Cir. 1979)*, *cert. denied*, *445 U.S. 927, 63 L. Ed. 2d 759, 100 S. Ct. 1312 (1980)*; *United States v. Altese, 542 F.2d 104, 107 (2d Cir. 1976)*, *cert. denied*, *429 U.S. 1039, 97 S. Ct. 736, 50 L. Ed. 2d 750 (1977)*. *Cappetto* involved a government prosecuted civil RICO claim. Ordinarily more, not less, protection is expected for a defendant **[*505]** when the government is plaintiff. When the plaintiff is a private party, as here, the quick dismissal of *Cappetto* totally ignores the "private attorney general" rationale built into RICO.

Discarding the numerous decisions **[**67]** of other courts that have not raised the bar of a prior conviction requirement will not make them go away. Virtually every court that has directly addressed the issue has decided no prior conviction is required. *E.g.,* *State Farm Fire and Cas. Co. v. Estate of Caton, 540 F. Supp. 673 (N.D.Ind. 1982)* (holding no prior conviction is required based on statutory interpretation); *Farmers Bank of State of Del. v. Bell Mtg. Corp., 452 F. Supp. 1278, 1280 (D. Del. 1978)* (*§ 1964(c)* "does not condition that cause of action in any way upon a criminal previous under the criminal provisions of the statute"). *See* *Bunker Ramo Corp. v. United Business*

---

[1] L. Carroll, *Alice's Adventures in Wonderland*, (Children's Classic ed.) 25.

Forms, Inc., 713 F.2d 1272, 1287 (7th Cir. 1983) (Civil RICO action available "without any requirement of a prior criminal conviction for that conduct," citing USACO, supra). Morosani v. First Nat'l Bank of Atlanta, 703 F.2d 1220 (11th Cir. 1983) (overruling Kleiner v. First Bank National Bank, 526 F. Supp. 1019 (N.D. Ga. 1981) without discussing prior criminal conviction dictum in *Kleiner*); Parnes v. Heinold Commodities, Inc., 487 F. Supp. 645, 647 (N.D. Ill. 1980); (private RICO action need not be proceeded by criminal **[**68]** conviction). The majority's dismissal of these holdings as uninformed or as simply "following *Cappetto*" ignores the obviously simple explanation for their resounding rejection of any prior conviction requirement -- it does not appear in the statute.

(2) *"Indictable" or "Chargeable" Acts*

Congress, the majority further tells us, did not intend to give civil courts power to determine whether an act is 'indictable' absent a properly returned indictment or 'chargeable' absent an information." How can this view be correct? To begin, the words themselves connote the contrary -- *i.e.*, Congress did not use the phrase "for which an indictment or information has been *returned* or *filed*"; much less did it say "for which the defendant has been criminally *convicted*." More significantly, Congress clearly used the terms "indictable" or "chargeable" in reference to "acts" forming a pattern of racketeering activity under § 1961, to which sanctions specifically labelled as "civil remedies" were then directed. To stretch this language into a requirement that a prior *conviction* must be obtained strains credulity. Had that been Congress' aim, § 1964's title would have been **[**69]** "Post Criminal Conviction Civil Remedies," not "Civil Remedies."

Further, the statute as Congress enacted it does not require civil courts to determine that the RICO predicate acts are in fact criminal acts. All that need be determined is that they are acts which, if proved by the government in a criminal proceeding, would subject the violator to criminal sanctions. The use of criminal and civil sanctions for the same conduct is common. Congress has frequently enacted legislation giving private litigants civil remedies for acts which may also be punished criminally. In addition to the antitrust example, Congress has provided for multiple damages, statutory punitive damages, civil penalties and counsel fees in scores of statutes, including *inter alia*, the patent (35 U.S.C. § 281) and trademark laws (15 U.S.C. § 1117), the Truth in Lending Act (12 U.S.C. § 1640), the water pollution control statute (33 U.S.C. § 1321), the false claims statute (31 U.S.C. § 3729), the wiretap statute (18 U.S.C. § 2520), and the tax laws (26 U.S.C. 6653(b)). In some of these areas, Congress has gone further and accorded to the *government* a civil remedy for acts that are also punishable under **[**70]** federal criminal law. Helvering v. Mitchell, 303 U.S. 391, 82 L. Ed. 917, 58 S. Ct. 630 (1938) (after an acquittal for criminal tax fraud, the government obtained a 50 per centum penalty in a civil proceeding against the taxpayer and the court held this a civil, not criminal, sanction); *see* One Lot Emerald Cut Stones v. United States, 409 U.S. 232, 237, 34 L. Ed. 2d 438, 93 S. Ct. 489 (1972) (*per curiam*) (forfeiture proceeding, civil in nature, not barred under Double Jeopardy Clause after defendant's **[*506]** acquittal on criminal charges). Rather than asking what kind of sanctions, *i.e.*, criminal or civil, are imposed against a defendant, the majority mistakenly focuses on the nature of the proceeding taken under § 1964. Here the sanction is treble damages. Treble damages have been part of our jurisprudence for centuries -- since first appearing as a remedy for waste in the Statute of Gloucester (1278) -- and they have never been viewed as "criminal" sanctions.

(3) *Constitutionality of* § 1964 *Absent Criminal Conviction*

As just noted, the majority analyzes a proceeding under § 1964 and implicitly finds it "quasi-criminal." It then seems to conclude that **[**71]** such finding necessitates holding the section unconstitutional were a prior criminal conviction not to be required. If true, this implicit conclusion is at odds with analogous case law in such areas as civil forfeitures, penalties and deportation cases which teaches that the correct procedure is for a court in a civil case to assure, on a selective basis, the existence of certain procedural safeguards, that would otherwise be applicable only in criminal cases. That is, only those criminal procedural remedies necessary to protect a defendant are required in the civil action. *See, e.g.*, Boyd v. United States, 116 U.S. 616, 29 L. Ed. 746, 6 S. Ct. 524 (1886); Lopez-Mendoza v. I.N.S., 705 F.2d 1059 (9th Cir. 1983) (*en banc*) (applicability of Fourth Amendment exclusionary rule in civil deportation proceeding), *cert. granted*, *464 U.S. 1037, 104 S. Ct. 697, 79 L. Ed. 2d 163, 52 U.S.L.W. 3509 (1984)*. Bramble v. Richardson, 498 F.2d 968, 973 (10th Cir.) (rejecting claim that In re Winship, 397 U.S. 358, 25 L. Ed. 2d 368, 90 S. Ct. 1068 (1970), requires proof beyond a reasonable doubt in a forfeiture proceeding), *cert.*

denied, *419 U.S. 1069, 95 S. Ct. 656, 42 L. Ed.* **[**72]** *2d 665 (1974)*; *accord,* *United States v. Regan, 232 U.S. 37, 58 L. Ed. 494, 34 S. Ct. 213 (1914)* (standard of proof in action for penalty for violation of Alien Immigration Act is preponderance of the evidence). *Cf.* *In re Ruffalo, 390 U.S. 544, 552, 20 L. Ed. 2d 117, 88 S. Ct. 1222 (1968)* (absence of fair notice of charges deprived petitioner of due process in disbarment proceeding). Close to 90 years ago the Supreme Court rejected the view that a civil forfeiture proceeding of the type involved in *Boyd v. United States, supra*, is a "criminal prosecution" in which the *Sixth Amendment* right of confrontation is implicated. *United States v. Zucker, 161 U.S. 475, 482, 40 L. Ed. 777, 16 S. Ct. 641 (1896)*. Despite this teaching, the panel holds in effect that *§ 1964* is "criminal" for *all* purposes by requiring a prior criminal conviction before a civil RICO plaintiff can sue.

Thus, even accepting *arguendo* the view that *§ 1964* cannot be constitutionally applied in the absence of unspecified safeguards, the proper course is not to require a prior criminal conviction, but to insist on application of those safeguards (*e.g.*, the exclusionary rule, a heightened standard **[**73]** of proof or other criminal protections) within the context of a civil proceeding. The majority's response that imposing criminal safeguards in a civil case would confuse juries is not borne out in practice. Juries already apply heightened standards of proof to specific issues, in fraud, defamation, paternity and other types of civil actions. *See McCormick on Evidence* §§ 339-40 (2d ed. 1972) (citing cases).

Moreover, the Supreme Court has outlined the proper method of analysis for challenges to statutory civil remedies on the ground they are "quasi-criminal" or sufficiently "punitive" to require the procedural protections of a criminal trial. In *United States v. Ward, 448 U.S. 242, 65 L. Ed. 2d 742, 100 S. Ct. 2636 (1980)*, the Court analyzed a challenge to section 311(b)(6) of the Federal Water Pollution Control Act (FWPCA) which permitted the government to assess a civil penalty of up to $5000 for each violation of the FWPCA. To decide whether a statute is "civil" or "criminal" involves a two-step test: first, courts must examine whether Congress indicated a preference for one label or the other; second, where Congress has signalled a preference for a civil penalty, there **[**74]** must be further inquiry to determine whether the **[*507]** statutory scheme is "so punitive either in purpose or effect as to negate that intention." *Id. at 248-249*. The Court concluded after considering the seven factors set forth in *Kennedy v. Mendoza-Martinez, 372 U.S. 144, 168-69, 9 L. Ed. 2d 644, 83 S. Ct. 554 (1963)*, that the penalty in *Ward* was analogous to traditional civil damages and held it not sufficiently punitive to require *Fifth Amendment* criminal safeguards. *United States v. Ward, supra, 448 U.S. at 251*. Justice Blackmun's concurrence emphasized "that monetary assessments are traditionally a form of civil remedy" and found it significant that the FWPCA § 311(b)(6), like *18 U.S.C. § 1964*, does not provide for "an affirmative disability or restraint" (such as imprisonment, deportation or disbarment). *Id. at 257* (Blackmun, J.) (concurring).

More recently, in *United States v. One Assortment of 89 Firearms*, 465 U.S. 354, *104 S. Ct. 1099, 79 L. Ed. 2d 361, 52 U.S.L.W. 4228 (1984)*, the Supreme Court held that neither the *Fifth Amendment double jeopardy clause* nor collateral estoppel bars a forfeiture proceeding where the defendant in the prior **[**75]** criminal proceeding was acquitted. A unanimous Court applying the two-level *Ward* test indicated that even "discouraging unregulated commerce in firearms" and "removing [them] from circulation" are remedial, not punitive, purposes. *Id.* 465 U.S. at 364, 104 S. Ct. at 1106. The Court stressed that "Congress may impose both a criminal and a civil sanction in respect to the same act or omission," (*citing* *Helvering v. Mitchell, supra*) and held forfeiture to be a "separate civil sanction, remedial in nature." *Id.*

Applying the *Ward* test to *§ 1964* demonstrates that it is not a "quasi-criminal" statute even for purposes of *Fifth Amendment* guarantees, much less all criminal protections. The remedial purpose expressed in the statute is evident from its legislative history. Congress specifically provided that RICO "shall be liberally construed to effectuate its remedial purposes." Pub. L. 91-452, 84 Stat. 941 (1970) § 904(a). *Section 1964* is designed to *compensate* private parties who are victims of tortious activity. *See* *United States v. Bornstein, 423 U.S. 303, 314, 46 L. Ed. 2d 514, 96 S. Ct. 523 (1975)* (double damages under False Claims Act designed to ensure **[**76]** government is made completely whole); *United States ex rel. Marcus v. Hess, 317 U.S. 537, 549, 87 L. Ed. 443, 63 S. Ct. 379 (1943)* (holding that double damages under False Claims Act are compensatory even if recovered by federal government). Its treble damage provision is therefore primarily remedial, and only partly punitive. The recovery in excess of actual damages constitutes statutory punitive damages designed in part to punish the defendant for tortious conduct, but traditionally allowable in civil proceedings without special criminal law safeguards. *See* Missouri Pacific Ry. Co. v. Humes, 115 U.S. 512, 29 L. Ed. 463, 6 S. Ct. 110 (1885) (multiple damages partly compensatory, partly punitive). Thus, § 1964 is "primarily remedial" under the Supreme Court's tests in *Helvering* and *Ward* because its principal purposes are to compensate victims of racketeering activity and to encourage them to vindicate their rights. In serving as private attorneys general, civil RICO plaintiffs aid in the eradication of such activity. In short, Congress' "civil" and "remedial" labels should not therefore be disregarded.

The majority apparently faced the dilemma of either upholding **[**77]** this statute as written or declaring it unconstitutional as punitive and hence quasi-criminal in nature. It chose neither of these straightforward alternatives. It specifically rejected the former. And, since a statute as written may be held unconstitutional only if the challenger presents "the clearest proof" of it, United States v. Ward, supra, 448 U.S. at 249 (quoting Flemming v. Nestor, 363 U.S. 603, 617, 4 L. Ed. 2d 1435, 80 S. Ct. 1367 (1960)), and because such proof is absent here, it could not choose the latter. Instead, to resolve the problem, the majority inserts the prior criminal conviction requirement to avoid perceived "serious constitutional questions." The premise is flawed because this course of "avoidance" has actually created **[*508]** a constitutional question of even greater significance. Addition of this new requirement to civil RICO -- one which Congress did not vote on and which the President did not endorse -- has raised a question as to whether such judicial creativity is an unwarranted and unconstitutional intrusion into the legislative process.

(4) *Stigma*

The panel opinion stresses a fear that defendants will be "stigmatized" by their "indictment" **[**78]** at the hands of a "one-man grand jury" for racketeering activity. Yet, stigma alone ordinarily does not suffice to convert a proceeding from civil to criminal. *See* Ullmann v. United States, 350 U.S. 422, 100 L. Ed. 511, 76 S. Ct. 497 (1956) (contempt conviction for refusing to testify before grand jury upheld following grant of immunity over claim defendant would be stigmatized by revealing past connection with the Communist party). One commentator observed that the holding of *In re Gault, 387 U.S. 1, 18 L. Ed. 2d 527, 87 S. Ct. 1428 (1967)*, relied on by the majority, has been largely limited to sanctions threatening loss of liberty, and that stigma alone does not trigger the need for criminal safeguards. Note, *Organized Crime and The Infiltration of Legitimate Business: Civil Remedies for "Criminal Activity*," 124 U.Pa.L. Rev. 192, 214-15 (1975).

Further, the majority's sensitivity to the stigma that may attach to decent citizens named as defendants in civil RICO cases seems a bit overstated. Today, defendants in civil suits are labelled as violators of environmental laws when pumping coal by-products into the atmosphere, despoilers of our rivers when emptying oil from **[**79]** their tanker's bilges, adulterers in state divorce actions, and killers in vehicular wrongful death actions. The allegations of the civil complaint do not make these citizens criminals, although their conduct may well subject them to separate criminal prosecutions. Why the outcry over RICO? I, for one, believe the public is sophisticated enough to distinguish between a criminal conviction and a civil claim. To be named as a RICO defendant is not quite the Sword of Damocles that the majority would have it. Repeated often enough, it will either lose its effect as a settlement weapon or create enough public pressure to cause Congress to amend the statute. Again, it is not for this Court to alter the statute.

(5) *Use of Word "Violation"*

The opinion also places heavy reliance on Congress' use of the term "violation," and finds this word supports its thesis for a prior criminal conviction. In *Ward*, the statute also specifically referred to "violations" of the FWPCA. That Court notably attached no special significance to this term, presumably because the word "violation" is commonly used to designate civil wrongs.

Finally, the effect of this ruling will leave victims of those **[**80]** defendants whose activities were at the heart of Congress' concern without the remedy Congress envisioned. Regardless of whether a defendant is a member of an organized crime family and no matter how lawless his pattern of racketeering activity may be, if he escapes conviction -- through acquittal, a beneficial plea, or a decision not to prosecute -- then the remedy granted the victim of these activities is lost.

II. *Racketeering Injury*

Concern that the RICO civil remedy will permit recovery of treble damages and attorneys' fees in every "garden variety" civil fraud case leads the majority to impose an additional standing requirement. Limiting RICO's broad reach by requiring, for example, an "organized crime" connection was rejected by Congress and by this court, *see* *Moss v. Morgan Stanley, supra, 719 F.2d at 21 n. 17*. Similarly, a "competitive injury" requirement has been rejected in the Seventh and Eighth Circuits. *Schacht v. Brown, 711 F.2d 1343, 1359* (7th Cir.), *cert. denied*, *464 U.S. 1002, __, 104 S. Ct. 508, 509, 78 L. Ed. 2d 698*, (1983). *Bennett v. Berg, 685 F.2d 1053, 1058 (8th Cir. 1982)*, *aff'd in part on rehearing en banc*, *710 F.2d 1361* **[**81]** (8th Cir.), *cert. denied*, *464 U.S. 1008, 104 S. Ct. 527, 78 L. Ed. 2d 710 (1983)*. The Supreme Court has specifically rejected an approach that would require an **[*509]** allegation that the enterprise be "illegitimate." *United States v. Turkette, 452 U.S. 576, 586-87, 69 L. Ed. 2d 246, 101 S. Ct. 2524 (1981)*. [2]

[82]** What remains is the theory adopted by some courts and that, together with the prior conviction requirement, the majority embraces here. That is, there must be an allegation of an injury from the "racketeering enterprise," a so-called "racketeering injury." Such has also been described as an injury "by reason of conduct the RICO act was designed to prevent," and as "something more than" the injury caused by the predicate acts alone. How one can distinguish between the injury caused by the predicate acts and the injury done by the enterprise is not explained. My colleagues state that "only when injury caused by this *kind of harm* can be shown" (emphasis added) does a plaintiff have standing under *§ 1964*. "This kind of harm," in turn, occurs when "mobsters, either through the infiltration of legitimate enterprises or through the activities of illegitimate enterprises, cause systemic harm to competition and the market, and thereby injure investors and competitors." This formulation is no more than a euphemism for an "organized crime" nexus requirement that should not be adopted by this Court after its rejection by the lawmakers. Other courts, the statute's congressional sponsors **[**83]** and commentators do not assign to civil RICO a scope on such a Lilliputian scale.

In *Schacht v. Brown, supra*, the Seventh Circuit evaluated a similar standing requirement and stated that one trouble with "judicial pruning of RICO's civil provisions . . . where business fraud is alleged [is that] . . . there is simply no legitimate principled criterion" that accomplishes the distinction between ordinary "garden variety" fraud and fraud by an organized crime syndicate. *Schacht, 711 F.2d at 1356*. The *Schacht* court concluded that since the organized crime limitation on civil RICO had been rejected, it did not want it "revived under the guise of determining the kinds of activity covered by RICO." *Id. See* *Ralston v. Capper, 569 F. Supp. 1575, 1580 (E.D. Mich. 1983)* (racketeering enterprise injury "undefined"). *Accord*, Note, *Civil RICO and "Garden Variety" Fraud -- A Suggested Analysis*, 58 St. John's L. Rev. 93, 107-08 (1983). *See also* *Bennett v. Berg, supra, 685 F.2d at 1059* (rejecting "racketeering injury" requirement which is just another way of arguing that no "enterprise" existed). *Hokama v. E.F. Hutton & Co., 566 F. Supp. 636, 643 (C.D.Cal. 1983)* **[**84]** (racketeering enterprise injury "little more than indirect statements" of requirement of "a 'nexus to organized crime'"). *Eisenberg v. Gagnon, 564 F. Supp. 1347, 1353 (E.D.Pa. 1983)* (cases do not make clear "what that 'something more' would be"); *Windsor Associates, Inc. v. Greenfeld, 564 F. Supp. 273, 279 (D.Md. 1983)* (racketeering enterprise injury "analytically indistinguishable" from organized crime requirement).

Again, the majority's reliance on *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*, is misplaced for two reasons. First, Congress, at the suggestion of the ABA Antitrust section, indicated an intent *not* to incorporate technical antitrust standing and proximate cause notions into *§ 1964*. *See* 115 Cong. Rec. at 6995 (1969) (discussing private civil actions). Second, in *Brunswick*, the Court found no clear

---

[2] I cannot agree with the majority's view that *Turkette* and other Supreme Court cases in the criminal area have no application to the issues raised on this appeal. In the first place, *Turkette* itself specifically refers to the civil provisions, noting that they "could be useful in eradicating organized crime from the social fabric, whether the enterprise be ostensibly legitimate or admittedly criminal." *Id. at 585*. Further, the majority's concerns over "federalization" of the common law of fraud are identical to the concern in *Turkette* regarding the balance between federal and state enforcement of criminal law, which the Supreme Court noted was considered specifically by Congress, and which provided no basis for courts "to restrict the application of the statute." *Id. at 587*.

expression of Congressional purpose to allow suits for "losses which are of no concern to the antitrust laws." *Brunswick, 429 U.S. at 487*. **[*510]** Fraud, however, was one of Congress' specifically targeted activities in enacting RICO, and plaintiff has alleged injury from fraudulent conduct. **[**85]** Whatever *Brunswick's* contours may be, its holding has no application where injury from two acts of mail or wire fraud is alleged, since such injury *is* of the type RICO was "intended to prevent and that flows from that which makes defendants' acts unlawful," *id. at 489*.

To cast a net sufficiently wide to catch organized criminals, Congress took the calculated risk that others, whose activities are chargeable as crimes under other federal or state laws, would also be netted. Courts should not "creat[e] standing requirements that would preclude liability in many situations in which legislative intent would compel it." Note, *Civil RICO: The Temptation and Impropriety of Judicial Restriction*, 95 Harv. L. Rev. 1101, 1120-21 (1982). *See* *Moss v. Morgan Stanley, Inc., supra, 719 F.2d at 21*. As with the majority's prior conviction requirement, the danger is that the racketeering injury standing requirement might well exclude plaintiffs in other cases where defendant's conduct "would be near the heart of Congress' concern." *Mauriber v. Shearson/American Exp., Inc., 567 F. Supp. 1231, 1240 (S.D.N.Y. 1983)*.

Finally, despite the majority's thesis that the House of Representatives **[**86]** was unaware of the consequences of civil RICO, Congressman Poff, its sponsor, stated:

> The curious objection has been raised to [RICO's provisions] that they are not somehow limited to organized crime -- as if organized crime were a precise and operative legal concept, like murder, rape or robbery. Actually, of course, it is a functional concept like white-collar or street crime serving simply as a shorthand method of referring to a large and varying group of individual criminal offenses committed in diverse circumstances.

116 Cong. Rec. at 35,344. Senator McClellan further noted that RICO "will have some application to individuals who are not themselves members of LaCosa Nostra or otherwise engaged in organized crime." 116 Cong. Rec. at 18,945 (1970). Congress recognized the possibility of enacting a statute aimed only at "mobsters" or organized crime members and *consciously* chose not to do so. The majority simply rewrites the statute in a manner Congress rejected under the guise of restricting *§ 1964* to "mobster" activity. Congress chose means to achieve its ends that imposed a risk of RICO liability on those like appellee Imrex in this case. The allegations **[**87]** alleging wire and mail fraud against defendant Imrex -- assumed on a motion to dismiss to be true -- are indictable offenses. Fraud is a typical activity of organized crime and Congress specifically noted it in its statement of findings and purpose. Pub. L. No. 91-452, § 1, 84 Stat. 941 (1970). The legislative branch fully considered the possibility of vexatious litigation and took that risk advisedly. H.R. Rep. No. 1549, 91st Cong., 2d Sess. 187 (1970). Moreover, since the lawmakers explicitly provided in *§ 1964(c)* for a private right of action, quite distinct from one judicially inferred, the judiciary's duty is to administer the law Congress passed and to defer its views on the policy considerations to the legislature. Note, *Civil RICO, supra*, 95 Harv. L. Rev. at 1117. Judicial creativity can only lead to inconsistency and confusion in the application of civil RICO. Whatever limitation is made should come not from the courts, but from Congress.

Accordingly, I vote to reverse the order appealed from and would reinstate the complaint.

HN8[] Racketeer Influenced & Corrupt Organizations, Claims

To state a civil claim under the Racketeer Influenced and Corrupt Organization Act (RICO), *18 U.S.C.S. §§ 1961-68*, a plaintiff must allege a racketeering injury, which includes an injury different in kind from that occurring as a result of the predicate acts themselves. Such an injury as one caused by an activity which RICO was designed to deter. This type of injury occurs only where mobsters, either through legitimate or illegitimate businesses, cause systemic harm to competition and the market, and thereby injure investors and competitors.

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN9[] Racketeering, Racketeer Influenced & Corrupt Organizations Act

A civil claim under the Racketeer Influenced and Corrupt Organization Act (RICO), *18 U.S.C.S. §§ 1961-68*, requires an allegation of some kind of proprietary injury caused by defendant's use of a pattern of racketeering activity in connection with a RICO enterprise, as opposed to an injury caused merely by the individual racketeering acts. Without an allegation of this distinct RICO injury, a civil RICO complaint is legally insufficient.

Opinion by: PRATT

Opinion

[*525] PRATT, Circuit Judge

The main issue on this appeal is one of considerable importance in view of the rapidly growing number of civil actions based on *18 U.S.C. § 1964(c)*, commonly known as "civil RICO". That issue is whether a plaintiff, in order to state a claim under *§ 1964(c)*, must allege a "separate, distinct racketeering enterprise injury", above **[**2]** and beyond the injury caused by the predicate acts of racketeering activity. Noting that the damage allegations in plaintiffs' RICO cause of action were identical to those in their common law fraud claims, the district court, *578 F. Supp. 1535*, concluded that no "separate, distinct racketeering enterprise injury" had been alleged, that the RICO claim was therefore legally deficient, and, there being no other basis for federal jurisdiction, that the complaint should be dismissed. Although this panel concludes that neither the language of the statute nor its legislative history imposes such a requirement, we are compelled to affirm the district court's judgment based on the two recently filed, controlling opinions in this court: *Sedima, S.P.R.L. v. Imrex Co., 741 F.2d 482*, slip op. (2d Cir. 1984), and *Bankers Trust Co. v. Rhoades, 741 F.2d 511 (2d Cir. 1984)*. Both of these cases were argued before the case now before us. The filings of the opinions in all three cases were held up pending a vote by the entire court on a request made within the court for in banc consideration of all three cases. When the in banc request was denied, the opinions were filed, by agreement of the court, **[**3]** in the order in which they were completed. We publish this opinion to express our disagreement with the majority views of the panels in those two cases and to reaffirm the views expressed by Judge Cardamone in his dissents in *Sedima, S.P.R.L.*, and *Bankers Trust Co.* This opinion will also serve as a record of the dissents by Judge Cardamone and Judge Pratt to this circuit's denial of in banc consideration to *Sedima, S.P.R.L., Bankers Trust Co.*, and the instant case. Without necessarily accepting the rationale of this opinion, Judge Winter also dissents from the denial of in banc consideration.

BACKGROUND

This lawsuit arises out of the sale of the brokerage firm of Bruns, Nordeman, Rea & Co. ("Bruns") to Bache, Halsey, Stewart, Shields, Inc. ("Bache"). Plaintiffs and defendants were all general partners of Bruns. Defendants Rea and Coleman were the managing directors of Bruns; the other defendants, along with Rea and Coleman, comprised the executive committee which formulated Bruns's policies, exercised exclusive control over its affairs, and negotiated the sale to Bache.

Plaintiffs allege that until it was too late in the sale negotiations to help them, defendants **[**4]** did not reveal that Bache had refused to complete the sale unless each **[*526]** partner of Bruns, including the plaintiffs, signed the purchase agreement; that defendants Rea and Coleman made payments, in the form of severance pay, to the other members of the executive committee in order to induce certain misrepresentations to plaintiffs; that defendants negotiated for themselves "sweetheart" employment arrangements with Bache, simultaneously misrepresenting to plaintiffs that these arrangements could not be altered; and that defendants made no effort to explore the merits of another offer to buy Bruns.

The complaint sets forth three causes of action, two of which are pendent state law claims based on common law fraud and breach of fiduciary duty. The civil RICO claim asserts that Bruns constituted an "enterprise" under *18 U.S.C. § 1961(4)*; that by virtue of their positions defendants "conducted and participated in the affairs" of Bruns within the meaning of *§ 1962(c)*; that defendants engaged in a fraudulent scheme of misrepresentations and concealments during their negotiations with Bache; that defendants conducted Bruns's affairs through "a pattern of racketeering activity", **[**5]** as that term is used in *§ 1962(c)*; and that, as part of the pattern of racketeering activity and in furtherance of the fraudulent scheme, defendants committed the predicate acts of using mail and wire facilities in violation of *18 U.S.C. §§ 1341* and *1343*.

Plaintiffs allege "injury in their business and property" in that (1) had they been aware from the beginning that their consent was necessary to consummate the sale to Bache, they would have been able to bargain for and receive sums comparable to those received by members of the executive committee from Rea and Coleman; (2) these payments caused the committee members receiving them to refrain from seeking a higher price from an alternate purchaser; (3) had defendants negotiated in good faith on behalf of all the partners, instead of just themselves, each plaintiff could have obtained employment arrangements superior to those that they actually received; and (4) the consideration Bache paid to the partnership was substantially reduced, because Bache absorbed the cost of funding the lucrative employment arrangements negotiated by defendants for themselves. Plaintiffs seek the treble damages and attorney's fees authorized by *18 U.S.C.* ***[**6]*** *§ 1964(c)*.

Defendants moved in the district court to dismiss the complaint pursuant to *Fed. R. Civ. P. 12(b)(6)* for failure to state a claim upon which relief can be granted. Alternatively, they sought an order compelling plaintiffs to arbitrate the controversy as provided in the partnership agreement. The district court rejected most of defendants' arguments: it concluded that, on the allegations of the complaint, Bruns was an "enterprise", that the sale to Bache was part of the "affairs" of the enterprise, and that defendants had engaged in a "pattern of racketeering activity", all within the meaning of those terms in the RICO statute. However, on the sole ground that plaintiffs were required, but failed, to allege "a separate, distinct racketeering enterprise injury", the district court dismissed the complaint. It did not reach the arbitration question.

On appeal, therefore, we are presented with the narrow issue of whether, in order to state a claim under *§ 1964(c)*, a plaintiff must allege "a separate, distinct racketeering enterprise injury". We are *not* considering whether plaintiffs must allege a connection to organized crime, *cf. Moss v. Morgan Stanley, 719 F.2d* ***[**7]*** *5, 21 (2d Cir. 1983)*, *cert. denied*, *465 U.S. 1025, 104 S. Ct. 1280, 79 L. Ed. 2d 684 (1984)*, whether plaintiffs must show some "competitive injury" as a result of defendants' actions, *cf. Schacht v. Brown, 711 F.2d 1343, 1356-58 (7th Cir. 1983)*, *cert. denied*, *464 U.S. 1002, 104 S. Ct. 508, 78 L. Ed. 2d 698, 104 S. Ct. 509 (1983)*; *Bennett v. Berg, 685 F.2d 1053, 1059 (8th Cir. 1982)*, *aff'd in part and rev'd in part on other grounds*, *710 F.2d 1361* (en banc), *cert. denied*, *464 U.S. 1008, 104 S. Ct. 527, 78 L. Ed. 2d 710 (1983)*, or whether the statute requires a criminal conviction of the predicate offenses, or of a RICO offense, before a civil RICO claim can be maintained, *see Sedima, S.P.R.L. v. Imrex Co.*, slip op. at ; **[*527]** *cf. USACO Coal Co. v. Carbomin Energy, Inc., 689 F.2d 94, 95 n.1 (6th Cir. 1982)*; *Farmers Bank of Delaware v. Bell Mortgage Corp., 452 F. Supp. 1278, 1280 (D. Del. 1978)*.

DISCUSSION

In 1970 congress enacted the Organized Crime Control Act, Pub. L. No. 91-452, 84 Stat. 941. Title IX thereof, codified at *18 U.S.C. §§ 1961-68*, is entitled ***HN1***[] "Racketeer Influenced and Corrupt Organization Act" (RICO) and prescribes criminal **[**8]** penalties, *18 U.S.C. § 1963*, as well as civil remedies, *18 U.S.C. § 1964*, for violation of its substantive provisions, *18 U.S.C. § 1962*. The case before us concerns the private civil remedies under *§ 1964(c)*, particularly treble damages and attorney's fees.

Our analysis must begin with the statutory language. *Lewis v. United States, 445 U.S. 55, 60, 63 L. Ed. 2d 198, 100 S. Ct. 915 (1980)*. ***HN2***[] If unambiguous that language controls, absent "clearly expressed legislative intent to the contrary". *United States v. Turkette, 452 U.S. 576, 580, 69 L. Ed. 2d 246, 101 S. Ct. 2524 (1981)* (quoting *Consumer Product Safety Commission v. GTE Sylvania, Inc., 447 U.S. 102, 64 L. Ed. 2d 766, 100 S. Ct. 2051 (1980))*. Further, in construing this statute we should keep in mind that congress intended that its provisions "shall be liberally construed to effectuate its remedial purposes." Pub. L. No. 91-452, § 904(a), 84 Stat. 947 (1970); *see also United States v. Turkette, 452 U.S. at 587*.

RICO's private civil remedies are authorized by *§ 1964(c)*, which provides:

> ***HN3***[] Any person injured in his business or property by reason of a violation of *Section 1962* of this chapter may sue **[**9]** therefor in any appropriate United States district court and shall recover three fold the damages he sustains and the cost of the suit, including a reasonable attorney's fee.

Section 1962(c), the substantive provision that plaintiffs' claim was violated here, provides:

> ***HN4***[] It shall be unlawful for any person employed by or associated with any enterprise engaged in, or the activities of which affect, interstate or foreign commerce, to conduct or participate, directly or indirectly, in the conduct of such enterprise's affairs through a pattern of racketeering activity or collection of unlawful debt.

Congress has carefully defined for us some of the unfamiliar terms it used:

> ***HN5***[] "Enterprise" includes any individual, partnership, corporation, association, or other legal entity, and any union or group of individuals associated in fact although not a legal entity. *§ 1961(4)*. ***HN6***[]

> "Racketeering activity" means [any of a large number of specified acts which are chargeable under state law, indictable under federal law, or constitute an offense under federal bankruptcy, securities, or drug laws]. § 1961(1). ***HN7***[]
>
> "Pattern of racketeering activity" requires at least **[**10]** two acts of racketeering activity [within a ten year period]. § 1961(5).

When these provisions and definitions are applied to the instant complaint, it is apparent that plaintiffs have sufficiently alleged those facts required by the statutory language -- that they were injured in their business and property by the conduct of the defendants, who violated § 1962 by conducting the enterprise's affairs through a pattern of racketeering activity. The alleged pattern of racketeering activity was a repeated use of the mails and the wires, in furtherance of defendants' underlying scheme to defraud plaintiffs by concealing from them, until the last possible moment, the true conditions for the sale of Bruns.

The court below, however, construed the phrase "by reason of a violation of § 1962", contained in § 1964(c), as requiring plaintiffs to allege "something more" than injury from defendants' predicate acts of mail and wire fraud. The "something more" was characterized as a "separate, distinct racketeering enterprise injury". The two recent decisions by panels of this court referred to at the beginning of this **[*528]** opinion address this same issue and essentially agree **[**11]** with the district court in this case. In *Sedima, S.P.R.L. v. Imrex Co.*, a divided panel of this court held that, in order ***HN8***[] to state a civil RICO claim, a plaintiff must allege a "racketeering injury" which it defined as including an "injury different in kind from that occurring as a result of the predicate acts themselves". *741 F.2d at 496*. The panel identified such an injury as one "caused by an activity which RICO was designed to deter." *Id.* More specifically, it held that this type of injury occurs only where "mobsters", either through legitimate or illegitimate businesses, "cause systemic harm to competition and the market, and thereby injure investors and competitors." *741 F.2d at 496*.

In *Bankers Trust Co. v. Rhoades*, another divided panel of this court held that ***HN9***[] a civil RICO claim requires an allegation of some kind of "proprietary injury" caused by defendant's use of a pattern of racketeering activity in connection with a RICO enterprise, as opposed to an injury caused merely by the individual racketeering acts. The panel concluded that, without an allegation of this "distinct RICO injury", a civil RICO complaint is legally insufficient. 741 F.2d Slip op. at **[**12]** . In addition to this circuit's recent decisions, some district courts have imposed a similar restriction on civil RICO, sometimes in the form of a "standing" requirement, *e.g., Dakis on behalf of the Dakis Pension Plan v. Chapman, 574 F. Supp. 757, 761 (N.D. Cal. 1983)*; *Barker v. Underwriters at Lloyd's London, 564 F. Supp. 352, 358 (E.D. Mich. 1983)*; *Johnsen v. Rogers, 551 F. Supp. 281, 284-85 (C.D. Cal. 1982)*; *Harper v. New Japan Securities International, Inc., 545 F. Supp. 1002, 1007-08 (C.D. Cal. 1982)*; *Alton v. Alton*, No. 82 Civ. 0795, slip op. at 5-6 (S.D.N.Y. July 9, 1982), *Landmark Savings & Loan v. Loeb Rhoades, Hornblower & Co., 527 F. Supp. 206, 208-09 (E.D. Mich. 1981)*, but other district courts have rejected such a restriction, *see, e.g., Wilcox v. Ho-Wing Sit, 586 F. Supp. 561*, slip op. at 17-18 (N.D. Cal. 1984); *Ralston v. Capper, 569 F. Supp. 1575, 1580 (E.D. Mich. 1983)*; *Mauriber v. Shearson/American Express, Inc., 567 F. Supp. 1231, 1240-41 (S.D.N.Y. 1983)*; *Seville Industrial Machinery Corp. v. Southmost Machinery Corp., 567 F. Supp. 1146, 1157 (D.N.J. 1983)*; *Eisenberg v. Gagnon, 564 F. Supp. 1347, 1352-53 (E.D. Pa. 1983)*; **[**13]** *Windsor Associates, Inc. v. Greenfeld, 564 F. Supp. 273, 278-79 (D. Md. 1983)*.

To us, the language of § 1964(c) is clear. It contains no requirement for a "racketeering enterprise injury"; nor does it limit the protected injury to one sustained "by reason of" the racketeering enterprise; it grants civil relief for "injury", which logically includes *any* injury, "by reason of a violation of § 1962".

Despite the clarity of congress's language, defendants argue that, since RICO's primary purpose is to eradicate organized crime, it is directed only against "racketeers" such as hoodlums and thugs, and not against businessmen engaged in "garden variety fraud", as alleged in this case. However, defendants and others who advocate this position ignore the larger purposes of RICO. While RICO's primary focus may have been on organized crime, when considering the statute congress also recognized that fraud is a pervasive problem throughout our society, *see* Statement of Findings and Purpose, Organized Crime Control Act of 1970, 84 Stat. 922-23 (1970); Blakey, *The*

RICO Civil Fraud Action in Context: Reflections on Bennett v. Berg, *58 Notre Dame L. Rev. 237, 245-48 (1982)*, which **[**14]** causes billions of dollars in economic loss each year. *Id. at 342-48*. Congress further acknowledged that existing state and federal law was not capable of dealing with this problem. *United States v. Turkette, 452 U.S. at 586*.

Thus, in order to deter and help eliminate fraud from interstate commerce, congress included in its *§ 1961(1)* definition of predicate acts of racketeering activity not only criminal activity which had formerly been "within the police power of the State", thereby essentially federalizing certain specific state crimes, *id. at 586-87* (citing legislative history), but also the common federal crimes of fraud, such as **[*529]** mail fraud, wire fraud, bankruptcy fraud and securities fraud. Congress was well aware that in so doing, it was altering the federal-state balance in these areas, elevating "garden variety" common law fraud claims to the status of federal offenses, and subjecting violators to enhanced criminal penalties and severe civil remedies. *Id.* Since congress unquestionably had the power to do this, "the courts are without authority to restrict the application of the statute." *Id. at 587* (citation omitted). Yet, restriction is precisely **[**15]** what some courts, like defendants and the court below, seek to impose through an artificial standing requirement on plaintiffs who seek relief under *§ 1964(c)*.

Further, the statute is not aimed at "racketeers"; indeed, the word "racketeer" is not used in the statute except in its title. Instead, it is aimed at "racketeering", and even then only in the context of "racketeering activity", which congress has defined carefully and precisely in terms of conduct. When congress provided severe sanctions, both civil and criminal, for conducting the affairs of an "enterprise" through a "pattern of racketeering activity", it provided no exception for businessmen, for white collar workers, for bankers, or for stockbrokers. If the conduct of such people can sometimes fairly be characterized as "garden variety fraud", we can only conclude that by the RICO statute congress has provided an additional means to weed that "garden" of its fraud.

It seems almost too obvious to require statement, but fraud is fraud, whether it is committed by a hit man for organized crime or by the president of a Wall Street brokerage firm. As we view RICO, fraud by anyone, when furthered by multiple use of the mails, **[**16]** constitutes a "pattern of racketeering activity". And when that pattern is used to conduct the affairs of an "enterprise", congress intended to provide the victims with the private civil RICO remedies of treble damages and attorney's fees for all injuries caused by the defendant's conduct.

By construing the "by reason of" language to require more than injury resulting from the predicate acts, courts simply assume that congress could not have intended to provide treble damages and attorney's fees to persons "whose only injury stems directly from the predicate acts." *Harper v. New Japan Securities International, Inc., 545 F. Supp. at 1007*; *see also* *Johnsen v. Rogers, 551 F. Supp. at 285*; *Landmark Savings & Loan v. Loeb Rhoades, Hornblower & Co., 527 F. Supp. at 208-09*. As a practical matter, however, the only injury suffered by an injured party in most cases will flow from the predicate acts; the enterprise is merely the means or vehicle through which those acts are accomplished. To require injury to result from "something more" than the predicate acts is to sterilize civil RICO as a weapon against the conduct congress sought to curtail.

Moreover, it is not true that **[**17]** absent a "racketeering enterprise injury" a claim under *§ 1964* represents no more than a claim brought under the statutes which define the predicate acts. *United States v. Forsythe, 560 F.2d 1127, 1135 (3d Cir. 1977)*; *cf.* *Johnsen v. Rogers, 551 F. Supp. at 285*; *North Barrington Development, Inc. v. Fanslow, 547 F. Supp. 207, 211 (N.D. Ill. 1980)*; *Harper v. New Japan Securities International, Inc., 545 F. Supp. at 1007-08*. What distinguishes a civil RICO claim from an ordinary fraud claim is that RICO requires a "pattern of racketeering activity" (two acts within 10 years) used to conduct the affairs of an "enterprise." *See* *United States v. Forsythe, supra.* The existence of the "enterprise" is a *sine qua non* of a RICO claim, and "at all times remains a separate element which must be proved", *United States v. Turkette, 452 U.S. at 583*. By requiring "proof of a fact other than the facts required to prove the predicate acts of racketeering", *Bennett v. Berg, 685 F.2d at 1060*, RICO transforms conduct that is already criminal under other statutes into a federal RICO crime with its severe maximum penalties of 20 years in prison and a $25,000 fine. Similarly, **[**18]** with equal force, **[*530]** and for the same deterrent purpose, the statute transforms ordinary common law fraud claims into federal civil RICO claims, with enhanced remedies of treble damages and attorney's fees.

Those district courts, like the one below, which have dismissed complaints for failure to allege a separate and distinct "racketeering enterprise injury", have not provided guidance as to what constitutes such an injury. *See* *Ralston v. Capper, 569 F. Supp. at 1580*. One court has posited that a "racketeering enterprise injury" might occur "if a civil RICO defendant's ability to harm the plaintiff is enhanced by the infusion of money from a pattern of racketeering activity into the enterprise." *Landmark Savings & Loan v. Loeb Rhoades, Hornblower & Co., 527 F. Supp. at 209*. But this example does little to define a "racketeering enterprise injury", and it does even less in terms of limiting the statute's reach, because almost every defendant's ability to inflict harm on a plaintiff would be enhanced by the fruits of the racketeering activity. It follows then that almost every complaint that alleges a *§ 1962* violation and a concomitant injury would satisfy this test. **[**19]** The difficulty in understanding or even defining a "racketeering enterprise injury" is more fully demonstrated in Part III of Judge Cardamone's dissenting opinion in *Bankers Trust Co. v. Rhoades*, 741 F.2d slip op. at .

Defendants and others have decried the use of RICO in "far-reaching civil contexts" where it has the potential to "tarnish the reputations" of ostensibly legitimate businesspersons. We are unmoved by the argument. By defining "racketeering activity" in functional rather than status terms, congress sought to avoid serious constitutional hazards. If defendants are surprised or offended that their "garden variety" fraudulent conduct is now statutorily characterized as "racketeering", they should address their grievance to congress, which clearly and specifically included mail, wire, and securities frauds as predicate acts of "racketeering activity" under *§ 1961(1)*. *See also* Blakey, *supra*, at 268-70. Since such conduct is more frequently associated with "white collar" crime than with "organized crime", as those terms are generally used in the everyday world, we conclude that congress wanted RICO to reach, among other illegal conduct, precisely those kinds **[**20]** of activities that are at issue in this case.

The legislative history of Title IX does not support a contrary interpretation of the statute. When it enacted RICO, congress was on notice that the statute had potentially far-ranging effects. Some members of the house who opposed the statute argued:

> Title IX * * * seeks to stymie organized crime's growing infiltration of legitimate business.
>
> But it runs amuck. It embodies poor draftsmanship, and it employs penalties and investigative procedures which are both abusive and pregnant with the potential for abuse.

H.R. Rep. No. 1549, 91st Cong., 2d Sess., *reprinted in* 1970 U.S. Code Cong. & Ad. News, 4007, 4081 (dissenting views of Reps. Conyers, Mikva, and Ryan); *see also* 116 Cong. Rec. 35204-05 (1970) (remarks of Rep. Mikva). Despite this opposition, however, congress chose to enact the statute as written, and we would exceed our proper function were we to rewrite its provisions in order to restrict its application. *United States v. Turkette, 452 U.S. at 587*.

A few courts have seized upon references to ***antitrust law*** in RICO's legislative history, specifically to § 4 of the Clayton Act, *15 U.S.C. § **[**21]** 15*, which contains language similar to that in *§ 1964(c)*, as evidence that congress, in enacting RICO, intended to impose proof requirements on RICO plaintiffs similar to those imposed on antitrust plaintiffs. *See* *Johnsen v. Rogers, 551 F. Supp. at 285*; *Landmark Savings & Loan v. Loeb Rhoades, Hornblower & Co., 527 F. Supp. at 208-09*. While RICO's legislative history does contain some references to antitrust principles, attempts to impute the restrictive standing requirements of ***antitrust law*** to RICO, **[*531]** based on similar language in both statutes, are flawed.

Section 4 of the Clayton Act, *15 U.S.C. § 15*, enables a person "injured in his business or property by reason of anything forbidden in the antitrust laws [to recover treble damages] and the cost of suit, including a reasonable attorney's fee." To recover under this provision, " antitrust injury" must be proved, which is "injury of the type antitrust laws were intended to prevent and that flows from that which makes defendant's acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1971)*.

Relying on this language in *Brunswick*, some courts have required **[**22]** that a plaintiff demonstrate a distinct RICO injury in order to state a civil RICO claim. *See* *Johnsen v. Rogers, 551 F. Supp. at 285* (plaintiff must allege "a commercial injury caused by the conducting of an 'enterprise's affairs through a pattern of racketeering activity.'"); *Harper v. New Japan Securities International, Inc., 545 F. Supp. at 1007* (plaintiff must allege "injury of the type the RICO statute was intended to prevent"); *Landmark Savings & Loan v. Loeb Rhoades, Hornblower & Co., 527 F. Supp. at 208*. (although RICO does not require a competitive injury as that term is defined by antitrust cases, plaintiff must allege a "racketeering enterprise injury").

But the antitrust analogy has several defects. While RICO copied the treble damages and attorney's fee language of § 4, this was simply "another example of the antitrust remedy being adapted for use against organized criminality." 116 Cong. Rec. 35295 (1970) (remarks of Rep. Poff); *see also* Note, *Civil RICO: The Temptation and Impropriety of Judicial Restriction*, 95 Harv. L. Rev. 1101, 1112 (1982). Moreover, these concepts that were borrowed from the Clayton Act, treble damages and injunctive relief, **[**23]** pertain to remedies rather than what is necessary to establish a claim under RICO.

Senator McClellan, one of the sponsors of the bill, stated:

> There is, however, no intention here of importing the great complexity of ***antitrust law*** enforcement into this field. Nor is there any intention of using the antitrust laws for a purpose beyond the legislative intent at the time of their passage.
> The many references to antitrust cases are necessary because the particular equitable remedies desired have been brought to their greatest development in this field, and in many instances they are the primary precedents for the remedies in this bill.

115 Cong. Rec. 9567 (1969).

> Senator Hruska echoed these remarks:
> Patterned closely after the Sherman Act, [RICO] provides for private treble damage suits, prospective injunctive relief, discovery procedures and all the other devices which bring to bear the full panoply of our antitrust machinery in aid of the businessman competing with organized crime.

115 Cong. Rec. 6993 (1969).

Moreover, the Antitrust Section of the American Bar Association argued against a proposal which would have amended the Sherman **[**24]** Act to provide for civil RICO remedies, and instead recommended the enactment of separate statutes, contending that the use of antitrust laws to combat organized crime

> could create inappropriate and unnecessary obstacles in the way of persons injured by organized crime who might seek treble damage recovery. Such a private litigant would have to contend with the body of precedent -- appropriate in a purely antitrust context -- setting strict requirements on questions such as "standing to sue" and "proximate cause."

115 Cong. Rec. 6995 (1969).

This recommendation, adopted by congress, recognized that the application of antitrust commercial injury standing requirements would not be appropriate in the RICO context. *Kimmel v. Peterson, 565 F. Supp. 476, 494 (1983)*.

[*532] ***Antitrust law*** has very little relevance to RICO, as each area of law serves different purposes. "Congress did not see the objectives of RICO and antitrust laws as coterminous." *Bennett v. Berg, 685 F.2d at 1059*. Antitrust regulation is designed to promote market place competition and is increasingly focused on market efficiency rather than harm suffered by individual businesses. **[**25]** *See, e.g., Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 53 n.21, 53 L. Ed. 2d 568, 97 S. Ct. 2549 (1977)*; *Schacht v. Brown, 711 F.2d at 1358*; *Ralston v. Capper, 569 F. Supp. at 1580*. RICO, on the other hand, is not concerned with either market efficiency or promoting competition, but instead is designed to inflict severe financial injury on those who commit crimes in operating an enterprise or who use an enterprise to insulate themselves from less severe penalties. *See* 115 Cong. Rec. 9567 (remarks of Sen. McClellan); Note, *supra*, at 1112-14.

As Judge Posner of the Seventh Circuit has noted, "analogies to Section 4 of the Clayton Act are forced", *Cenco Inc. v. Seidman & Seidman, 686 F.2d 449, 457* (7th Cir.), *cert. denied*, *459 U.S. 880, 103 S. Ct. 177, 74 L. Ed. 2d 145 (1982)*. Still another court has observed:

> [RICO] is precisely designed to *ruin* those individuals and enterprises it is aimed at. It is not designed to increase their efficiency or protect them from insolvency. Thus, the rationale behind the antitrust standing concerns have [sic] no applicability here.

Ralston v. Capper, 569 F. Supp. at 1580 (citation **[**26]** omitted).

Standing in antitrust cases has been strictly limited in order to confine treble damages to extreme situations and to avoid ruining violators and reducing market place competition. However, because RICO's essential aim is to strip violators of "the fruits of [their] ill-gotten gains", *United States v. Turkette, 452 U.S. at 585*; *see also* 115 Cong. Rec. 602 (1970) (remarks of Sen. Hurska), such concerns are not present under RICO.

In short, a limitation of RICO standing to those who suffer a "racketeering enterprise injury", whether based on similar language in antitrust laws, analogous antitrust concepts, or merely a judicial desire to restrict the statute's scope, not only would run counter to the intent expressed by congress when it enacted RICO, but also would "lead to the anomalous result of denying standing to direct victims of racketeering activity." *Seville Industrial Machinery Corp. v. Southmost Machinery Corp., 567 F. Supp. at 1157*. As Judge Duffy of the Southern District of New York has pointed out:

> A brokerage enterprise infiltrated by organized crime and engaged in defrauding its customers * * * might injure no one but the customers of **[**27]** the enterprise. There would be no injury above and beyond that caused by the predicate acts of fraud forming the "pattern of racketeering activity." Such conduct, however, would violate RICO and would lie near the center of Congress' concern. In addition, *§ 1964(c)* simply provides that "any person * * * injured by reason of a violation of *§ 1962*" may invoke RICO's civil remedies. I can imagine no construction of those words which would exclude from their coverage the primary victims of such a scheme and which would render such defendants immune from civil sanctions.

Mauriber v. Shearson/American Express, Inc., 567 F. Supp. at 1240.

While it may appear that congress, by enacting RICO, has "created a runaway treble damage bonanza for the already excessively litigious", *Schacht v. Brown, 711 F.2d at 1361*, congress has also spoken in clear and unambiguous terms. Although RICO is a complex statute, we find it to have been carefully drafted, and congress knowingly adopted provisions of potentially far-reaching application. Efforts by various courts across the country to restrict the statute's application seem to be based more on "judicial discomfort with the broad **[**28]** sweep of RICO", *Kimmel v. Peterson, 565 F. Supp. at 493 n.21*, than on a close reading of the statute's language or an **[*533]** accurate study of its legislative history. We think that any restriction of RICO along the lines urged by defendants must come from congress, not the judiciary. It is not our proper role to superimpose additional requirements for establishing a RICO claim on what is a clearly delineated statutory cause of action. As the Seventh Circuit concluded in *Schacht*:

> The legislature having spoken, it is not our role to reassess the costs and benefits associated with the creation of a dramatically expansive, and perhaps insufficiently discriminate, tool for combating organized crime. *United States v. Turkette, 452 U.S. at 586-87, 101 S. Ct. at 2530-31 (1981)*.

711 F.2d at 1361.

We therefore conclude that the district court erred when it dismissed plaintiffs' complaint for failing to allege a "separate, distinct racketeering enterprise injury".

As an alternative ground for dismissal, defendants below moved to compel arbitration of plaintiffs' claims, based on an arbitration clause in the partnership agreement. Although the district **[**29]** court did not rule on that part of defendants' motion, plaintiffs now urge us to hold that their civil RICO claims are not subject to arbitration. Since we are compelled to uphold the dismissal of plaintiffs' complaint, we do not have to reach this issue.

CONCLUSION

The judgment of the district court is affirmed on the authority of *Sedima, S.P.R.L. v. Imrex Co.* and *Bankers Trust v. Rhoades*.

Clark Equip. Co. v. Lift Parts Mfg. Co.

United States District Court for the Northern District of Illinois Eastern Division

July 31, 1984

No. 82 C 4585

HN8[] Defenses, Demurrers & Objections, Affirmative Defenses

In order to invoke the fraudulent concealment doctrine as a basis for distinct liability in tort it must appear from the complaint that something more is involved than a party's lack of awareness that it is being victimized by a tort-feasor, at least where no fiduciary relationship is involved.

Civil Procedure > ... > Statute of Limitations > Tolling of Statute of Limitations > Fraud

Governments > Legislation > Statute of Limitations > General Overview

Torts > ... > Fraud & Misrepresentation > Nondisclosure > General Overview

Torts > Procedural Matters > Statute of Limitations > General Overview

HN9[] Tolling of Statute of Limitations, Fraud

To toll a limitations period under the fraudulent concealment theory, a plaintiff is required to show (1) that defendant wrongfully concealed its actions from plaintiff; (2) that plaintiff failed to discover the operative facts that are the basis of its cause of action within the limitations period; and (3) that plaintiff acted with due diligence until discovery of these facts.

HN15[] **Entitlement as Matter of Law, Genuine Disputes**

A motion for summary judgment should be granted only if the movant establishes that there are no genuine issues of material fact and that it is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. For purposes of such motion, the record, of course, is to be construed in the light most favorable to the nonmovant.

Opinion by: [*1] LEIGHTON

Opinion

[944]** Before the Honorable George N. Leighton U.S. District Judge

Memorandum

This is an action by Clark Equipment Company (Clark), a manufacturer and distributor of lift trucks and their replacement parts, against Lift Parts Mfg. Co. (LPM), a competitor which distributes but does not manufacture replacement parts for lift trucks. In its first amended complaint, Clark claims that it has been injured by LPM's alleged violations of federal copyright laws, federal trademark laws, federal unfair competition law, and Illinois statutory and common law. LPM has filed a first amended counterclaim alleging, inter alia, that Clark has administered its Master Parts System in a manner that violates antitrust laws. The cause is before the court on three motions by LPM: one to dismiss specified portions of the first amended complaint, another to strike as insufficient various defenses asserted in Clark's answer to the first amended counterclaim, and a third for summary judgment on Clark's copyright infringement claim. For the following reasons, the motion to dismiss and the motion to strike are granted in part and denied in part, whereas, the motion for summary judgment is denied **[*2]** in its entirety. **[**945]**

I

A

The first objection raised by LPM with respect to the motion to dismiss is directed at paragraph 37 of Clark's first amended complaint in which it is alleged that LPM, in violation of section 43(a) of the Lanham Act, sold lift truck parts to unnamed Clark dealers "in unmarked boxes without any LPM Trademarks or identification appearing on the box or on the part." It is further alleged in paragraph 37 that "the purpose and intent of this procedure was to permit these products to be palmed off as Clark brand parts. . . ." Clark, in essence, is attempting to impose accessorial liability on LPM for subsequent trademark infringement that may have occurred when dealers placed Clark trademarks on the unmarked boxes and parts that were obtained from LPM. However, ***HN1***[] the law is clear that LPM may be contributorily liable under the Lanham Act only if it intentionally induced the dealers to infringe Clark's trademark, or it continued to supply the dealers with the unmarked boxes and parts after it knew or had reason to know that they were engaging in infringing activities. See *Inwood Laboratories v. Ives Laboratories, 102 S.Ct. 2182, 2188 (1982)*; *Warner & Co. v. Eli **[*3]** Lilly & Co., 265 U.S. 526 (1924)*. ***HN2***[] LPM is not subject to the proscriptions of the Lanham Act simply because it may have anticipated or, as is alleged in this case, intended "to permit" the ensuing trademark infringement. See *Inwood Laboratories, 102 S.Ct. at 2188 n.13*. Accordingly, paragraph 37 of Clark's first amended complaint is dismissed without prejudice.

The allegations in paragraph 37 are realleged in paragraphs 42 and 44 of the first amended complaint as the basis of respective claims under the Illinois Uniform Deceptive Trade Practices Act, Ill.Rev.Stat. ch. 121-1/2, § 312, and the Illinois Consumer Fraud and Deceptive Business Practices Act, Ill.Rev.Stat., ch. 121-1/2, § 262. As recognized in *Duo-Tint Bulb & Battery Co. v. Moline Supply Co., 46 Ill. App. 3d 145, 360 N.E.2d 798, 804 (1977)*, Illinois law may impose a labeling requirement on a distributor to insure that buyers are not purchasing its products under the impression that the goods are those of another manufacturer when "functional aspects dictate the physical characteristics of . . . competing articles such that they become identical in appearance." For purposes of this motion, the court presumes that the physical **[*4]** appearance of various lift truck replacement parts are primarily a product of their intended functions; a brake shoe manufactured by LPM for a particular lift truck model should, by in large, approximate the appearance of a comparable brake shoe manufactured by Clark. Therefore, it is conceivable that Clark may be able to prove a set of facts establishing that LPM should be required under Illinois law to place its trademark on the replacement parts it sells to Clark dealers to insure that consumers are not buying the parts under the impression that they were manufactured by Clark. [1] Therefore, the motion to dismiss is denied insofar as it is directed at allegations incorporated in paragraphs 42 and 44 pertaining to LPM's failure to place identifying marks on replacement parts sold to Clark dealers.

A different **[*5]** result is in order, however, with respect to the unmarked boxes that the replacement parts come in. The ***HN3***[] appearance of the boxes is not mandated by the function of replacement parts contained therein; it is "trade dress." See *Duo-Tint Bulb & Battery, 360 N.E.2d at 804*.A party's trade dress is infringed only when it is copied.Id. Clark replacement parts presumably come in boxes bearing the Clark trademark; the blank boxes provided by LPM, in and of themselves, therefore, do not infringe Clark's trade dress because they are not copies of Clark boxes. The unmarked boxes can only become infringing if subsequently the Clark trademark is placed on them by the dealers. In essence, therefore, this aspect of the claim is a reprise of the claim for contributory infringement brought under the Lanham Act: Clark is attempting to impose liability on LPM for infringements

---

[1] LPM argues that "consumers of lift truck replacement parts obviously do not base their purchasing decisions on the appearance of such parts." This contention, however, nowhere finds support in the amended complaint, the pleading before the court; moreover, it is not a proper subject of judicial notice. It obviously is a defense that should be asserted in LPM's answer.

perfected by the dealers. As was the case with federal law, LPM should be held liable under Illinois law for the acts of others only if it fairly can be said that it instigated or knowingly acquiesced in their conduct.

Accordingly, the court finds that the allegation that LPM somehow intended to "permit" such infringing activity **[*6]** is also insufficient under Illinois law to impose liability on LPM. Consequently, the motion to dismiss is granted without prejudice insofar as it is directed at allegations, incorporated in paragraphs 42 and 44, that LPM sold parts to Clark dealers in unmarked boxes. **[**946]**

B

Paragraph 38 of the first amended complaint also, according to LPM, fails to state a claim upon which relief may be granted under the Lanham Act. This paragraph alleges that LPM has used the Clark trademark in LPM catalogs and has photoccopied and distributed various Clark parts materials bearing the Clark trademark. It is asserted in paragraph 39 that these acts were done so as to create a false impression as to the origins of the materials and were likely to confuse recipients. LPM argues that, as a matter of law, plaintiff fails to allege circumstances which would create a likelihood of confusion; for instance, LPM contends, Clark's trademark was employed in LPM catalogs to advertise that LPM replacement parts are equivalent to certain Clark parts, a use that undoubtedly is acceptable. See, e.g., *B.H. Bunn Co. v. AAA Replacesment Parts Co., 451 F.2d 1254, 1265-67 (5th Cir. 1981)*. But on this motion to dismiss **[*7]** the allegations of the complaint must be construed favorably to Clark; the court should not dismiss a claim on the basis of factual defenses that LPM may later be able to establish. Applying the appropriate standard, the court finds without hesitancy that Clark can conceivably establish, within the framework of the allegations, a set of facts establishing that LPM used the Clark Trademark in a manner creating a likelihood of confusion. Therefore, the motion to dismiss is denied insofar as it seeks dismissal of paragraph 38 of Clark's first amended complaint.

The allegations of paragraph 38 are incorporated into paragraphs 42 and 44 of the first amendedm complaint as the basis of claims under the Illinois Fraud and Deceptive Business Practices Act and the Uniform Deceptive Trades Practices Act. Clark's purported failure to plead circumstances which would create a likelihood of confusion is also the asserted basis for dismissing the incorporated allegations. However, the court's prior discussion applies with equal forces to the likelihood-of-confusion issue as it relates to Illinois law. The motion to dismiss, therefore, is also denied insofar as it is directed at allegations **[*8]** incorporated in paragraphs 42 and 44 from paragraph 38.

C

Raised in conjunction with the present motion is LPM's argument that paragraphs 1(f) and 52-56 should be dismissed for failure to state a claim for misappropriation of trade secrets under Illinois law. The gravamen of these paragraphs is that LPM wrongfully induced Clark employees or former employees to breach confidentiality agreements by giving dealer marketing plan materials and related marketing information to LPM that had been collected, compiled, and analyzed by Clark at great cost and expense and distributed only to a small number of Clark employees under confidential and restrictive conditions. LPM argues that it follows as a matter of law that Clark's claim in this regard must fail because it is not alleged that each dealer treated the information they provided Clark as confidential prior to divulgence. ***HN4***[] The inquiry into whether information is a trade secret depends on a variety of factors including:

(1) the extent to which the information is known by others in the field; (2) the extent to which the information is known by the business' employees; (3) the extent to which the employer takes measures to guard **[*9]** the secrecy of the information; (4) the value of the information to the employer and his competitor; (4) the value of the information to the employer and his competitor; (5) the amount and effort or money spent in developing the information; and (6) the ease or difficulty in acquiring or duplicating the information.

Lincoln Towers Insurance Agency v. Farrell, 99 Ill. App. 3d 353, 425 N.E.2d 1034, 1037 (1981). That Clark dealers may not have treated the information as confidential prior to providing Clark is of arguable relevance only to the first and last of the factors salient to the determination whether the allegedly pirated information is protected by Illinois law; and, even with respect to these factors, the significance of the consideration is not readily determinable at the pleading stage when facts underlying the claim have not been fleshed out. Since the information collected, compiled, and analyzed by Clark came from its dealers, LPM contends that, of necessity, it must be known by others in the field. This argument disregards, however, the fact that the extent of an individual dealer's knowledge of the marketing information is limited to that which it provided Clark, **[*10]** in essence, to one piece of the overall puzzle. No dealer, presumably, is in possession of the entirety of the dealer marketing information. Moreover, LPM would require the court to assume that the allegedly purloined documents consisted entirely of raw data collected from dealers; it appears from the complaint, however, that they also contained market analysis done by Clark at great expense.Such analysis conceivably would involve Clark's mental impressions; consequently, even if the dealers collectively pooled the information, it would not of necessity provide an exact equivalent **[**947]** of the marketing plans compiled by Clark and allegedly misappropriated by LPM.

That the dealers may have provided Clark information that they themselves may not have treated as confidential also arguably is of significance to a determination of the ease or difficulty with which LPM itself could have acquired or duplicated the information contained in the subject documents. If the information was not considered confidential by the dealers, LPM argues, it could have collected the data from them. Construing matters favorably to Clark, however, the court cannot presume that, therefore, LPM necessarily could **[*11]** have created an equivalent of the Clark marketing plan and related documents with little difficulty. Clark maintains that such a compilation requires a considerable expenditure of time, effort, and money; moreover, as previously pointed out, the documents may have contained analysis and mental impressions that are uniquely attributable to Clark. In making the argument against Clark's claim for misappropriation of trade secrets, LPM also disregards the fact that ***HN5***[] where it is shown, as is alleged here, that the subject information was obtained by wrongful means, Illinois courts are not receptive to argments by defendants that they could have, if they wished, obtained the same information by lawful means. See, e.g., *Crocan Corp. v. Sheller-Globe Corp., 385 F. Supp. 251, 254 (N.D. Ill. 1974)*; *ILG Industries v. Scott, 49 Ill. 2d 88, 273 N.E.2d 393, 396 (1971)*; Affiliated Hospital Products v. Baldwin, 57 Ill. App. 3d 800, *373 N.E.2d 1,000, 1,006 (1978)*. In short, the court cannot say beyond doubt that Clark can prove no set of facts establishing that the information contained in the marketing documents is not entitled to protection from misappropriation under Illinois law. The motion **[*12]** to dismiss, therefore, is denied to the extent it is directed at paragraphs 1(f) and 52-56 of the first amended complaint.

D

The next subjects of LPM's motion to dismiss are paragraphs 1(h) and 63-64 of the first amended complaint. In these paragraphs, Clark alleges that LPM "fraudulently concealed" the facts and circumstances of wrongs detailed in previous paragraphs by entering into confidentiality agreements with its dealers, by destroying, suppressing or not maintaining accurate records, and by paying off informants and suppliers of materials through secretive transactions. Though it is not clear from the complaint, Clark maintains in its briefs in opposition to the motion to dismiss that these allegations serve to state a claim for tortious fraudulent concealment and to toll any applicable statutes of limitation. In either case, the averments are required to comply with ***HN6***[] the mandate of *Rule 9(b), Fed.R.Civ.P.*, that circumstances constituting fraud be stated with particularity. See *Pitts v. Unarco Industries, Inc., 712 F.2d 276, 279* (7th Cir.), cert. denied, *104 S.Ct. 509 (1983)*.

HN7[] Consequently, concealment of facts can give rise to liability in tort under Illinois law only **[*13]** if a plaintiff alleges with particularity, inter alia, specific facts and circumstances sufficient to impose a duty on a defendant to make disclosures. See, e.g., *Manning v. Ashland Chemical Co., 498 F. Supp. 1382, 1383 (N.D. Ill. 1980)*. Clark maintains that the existence of a duty to disclose on the part of LPM may fairly be implied in this case because LPM, "by [its] conduct, contribute[d] to [Clark's] misapprehension . . . as to a material matter and intentionally fail[ed] to correct the misapprehension." *Tcherepnin v. Franz, 393 F. Supp. 1197, 1217 (N.D. Ill. 1975)*; *Manning v. Ashland Chemical Co., supra.* Clark, however, never specifies the nature of the material matter as to which it was misled. The only possibility that can be gleaned from a review of the complaint is that it did not know that LPM was engaging in tortious activity that affected its interests. But ***HN8***[] in order to invoke the fraudulent concealment doctrine as a basis for distinct liability in tort it must appear from the complaint that something more is involved than a party's lack of awareness that it is being victimized by a tortfeasor, at least where, as here, no fiduciary relationship is involved. See **[*14]** *Fure v. Sherman Hospital, 64 Ill. App. 3d 259, 380 N.E.2d 1376, 1380 (1978)*.

The court concludes, accordingly, that as presently drafted, the complaint does not adequately describe facts and circumstances that would impose on LPM a duty to disclose its misdeeds.

The subject paragraphs also do not allege facts and circumstances constituting fraudulent concealment sufficient to toll applicable statutes of limitations. ***HN9***[] To toll a limitations period under this theory, Clark is required to show (1) that LPM wrongfully concealed its actions from Clark; (2) that Clark failed to discover the operative facts that are the basis of its cause of action within the limitations period; and (3) that Clark acted with due diligence until discovery of these facts. See, e.g., *Dayco Corp. v. Goodyear Tire & Rubber Co., 523 F.2d 389, 394 (6th Cir. 1975)*. Although Clark pleads the first requirement, the latter two are conspicuously absent from the complaint. Therefore, since they cannot support either of the fraudulent-concealment **[**948]** theories advanced by Clark, paragraphs 1(h) and 63-64 of the amended complaint are dismissed without prejudice.

The last aspect of LPM's motion to dismiss calls upon the **[*15]** court to determine which, if any, of Clark's claims can support an award of punitive damages. Feeling that consideration of the availability of punitive damages at this stage is premature, the court hereby reserves this issue for trial. Clark is granted leave to file a second amended complaint within 35 days.

II

LPM moves pursuant to *Rule 12(f), Fed.R.Civ.P.*, to strike as insufficient certain defenses asserted by Clark in its answer to LPM's first amended counterclaims. The first focus of the motion to strike is paragraph 67 of the answer in which Clark defends against LPM's antitrust counterclaims by asserting that violations of ***antitrust law***, such as those alleged by LPM, cannot insulate LPM from liability for copyright infringement. As conceded by Clark, this response is an "affirmative defense" in name only. It does not attack the validity, or lack thereof, of LPM's antitrust counterclaim; rather it is a digression aimed at the misuse defense raised by LPM in its answer to Clark's amended complaint. ***HN10***[] A reply to an answer is permitted under *Rule 7, Fed.R.Civ.P.*, only when specifically ordered by the court; this has not been done in this case. Therefore, as a matter of **[*16]** pleading, paragraph 67 is not properly before the court. It is ordered stricken.

Paragraphs 69-71 are the next points of attack of the motion to strike. It is asserted in paragraph 69 that a consent decree and release entered into by LPM bars the company, pursuant to the doctrines of res judicata and collateral estoppel, from raising its antitrust counterclaims. ***HN11***[] Res judicata and collateral estoppel, however, presuppose an adjudication by a court on the merits of a controversy. See *County of Cook v. MidCon Corporation, 574 F. Supp. 902 (N.D. Ill. 1983)*. ***HN12***[] But a consent decree, in essence is a contract between the parties; it does not reflect a court's determination of the underlying merits. Therefore, a consent decree is not the proper basis for invoking the doctrines of res judicata and collateral estoppel.Paragraph 69, therefore, is ordered stricken.

That this is more or less a technical distinction is made apparent in paragraphs 70 and 71 in which the terms of the consent decree and release are invoked in their own right as the basis for barring the counterclaims raised by LPM. LPM objects on grounds that the consent decree and release should not bar recovery for injuries **[*17]** it sustained after their execution. Since it is undisputed that they were executed in 1963, and it is plain from LPM's counterclaims that it, at least in part, is seeking recovery for injuries sustained after such date, LPM argues convincingly that the consent decree and release cannot properly be asserted as a basis for totally denying the recovery it seeks. Accordingly, paragraphs 70 and 71 are stricken, and Clark is given leave to amend these allegations to reflect the understanding that the consent decree and release cannot bar claims asserted by LPM arising after the date on which they were executed.

LPM next finds fault with the affirmative defense asserted in paragraph 74 of Clark's answer to the antitrust counterclaims. There Clark alleges that LPM must be denied equitable relief because of its unclean hands and inequitable conduct. Clark informs the court that the basis for the assertion of these defenses is LPM's attempt to copyright a "Clark catalog" that copied materials pirated from Clark, materials which, on the other hand, LPM claims were copyrighted by Clark in violation of the antitrust laws. ***HN13***[] It is well settled that defenses such as unclean hands and in pari **[*18]** delicto have limited applicability in an antitrust context. See, e.g., *General Beverage Sales Co.-Oshkosh v. East Side Winery, 396 F. Supp. 590, 593 (E.D. Wis. 1975)*. They are available to

Clark only if it can establish that LPM jointly participated with it in the scheme that is the basis of LPM's antitrust counterclaims; that LPM may have implemented a similar scheme is not enough. See *Premier Electrical Construction Co. v. Miller-Davis Co., 422 F.2d 1132, 1138* (7th Cir.), cert. denied, *400 U.S. 828 (1970)*; *General Beverage Sales, supra.* Accordingly, the affirmative defense raised in paragraph 74 of Clark's answer to LPM's counterclaims is stricken.

LPM also takes exception to paragraph 75 in which Clark asserts that LPM's counterclaims are barred by conduct contemptuous of the 1963 consent decree between the parties. On February 22, 1983, the Honorable Bernard M. Decker of this district court denied relief to Clark in contempt proceedings against LPM for allegedly violating the 1963 consent decree. LPM argues, and Clark concedes, that Judge Decker's order bars this affirmative defense. Accordingly, it is ordered that paragraph 75 be stricken without prejudice to the defense's **[*19]** renewal in the event Judge Decker's ruling is overturned on appeal.

The final objection raised by LPM in connection with the motion to strike is against **[**949]** paragraph 77 in which Clark suggests that LPM's damage recovery may be limited by standing considerations. LPM points out that ***HN14***[] it is well established that a direct competitor who is a participant in a relevant market has standing to bring an antitrust action. Clark, however, does not oppose this general proposition; instead it argues that there are various factual considerations which may limit any recovery by LPM in this case. For instance, Clark points out that LPM has taken the position in prior litigation that it did not come into existence until it was spun off from Echlin Manufacturing Co. in 1978 and, consequently, shares no identity with the Lift Parts Mfg., Inc., that entered into the 1963 consent decree. If this is the case, LPM possibly can be denied recovery with respect to any damages sustained by separate entities during periods when it was not in existence. The court concludes that the affirmative defense asserted in paragraph 77 raises a question of fact which Clark is entitled to assert; consequently, the motion **[*20]** to strike must be denied insofar as it is directed at this paragraph. See *Taylor v. Orton, 216 F.2d 62, 64 (7th Cir. 1954)*. Clark is granted leave to file amended affirmative defenses to LPM's counterclaims within 35 days.

III

LPM's motion for summary judgment is directed at copyright infringement claims raised in Counts 30 through 34 of the first amended complaint.Clark maintains that substantial portions of its Master Parts System, a protected unpublished work under the Copright Act of 1976, have been copied, reproduced, plagiarized, and even recopyrighted by LPM. For purposes of this motion, LPM does not deny having done the copying; instead it argues that Clark's Master Parts System is not entitled to copyright protection (1) because it is comprised of part number information that by its very nature cannot be copyrighted and, alternatively, (2) because it has been "generally" published.

HN15[] The motion for summary judgment should be granted only if LPM establishes that there are no genuine issues of material fact and that it is entitled to judgment as a matter of law. *Rule 56(c), Fed.R.Civ.P.* For purposes of this motion, the record, of course, is to be construed in the light **[*21]** most favorable to Clark. See Trulson v. Trane Company, No. 83-1189, slip op. at 2 (7th Cir. April 19, 1984).

In arguing its first ground for summary judgment, LPM characterizes the Master Parts System as consisting of little more than part number information generated by Clark at nominal cost in an arbitrary manner aimed more so at stifling competition than facilitating the expeditious replacement of lift truck parts.LPM maintains, accordingly, that the Master Parts System is not a product of the industry or the inventiveness which the copyright laws are intended to reward. Granting copyright protection to Clark's compilation, LPM further argues, only would serve to promulgate profound anticompetitive effects.

When the record before the court is construed favorably to Clark, however, the factual underpinnings of LPM's position collapse. It appears that the Master Parts System is a great deal more than a compilation of part numbers; it, in addition, contains thousands of technical illustrations, groupings, correlations and arrangements that were developed by Clark at a cost of millions of dollars over a period of 22 years. [2] Before **[**950]** numbers, standing alone, can be copyrighted, **[*22]** it is the development of the Master Parts System, it was necessary for Clark dealers to scan a myriad of space-consuming, separate parts booklets in order to service the needs of their customers. Because of the system, these dealers now can obtain from a single, compact source necessary information about replacement parts in a fraction of the time formerly required. Clark maintains, and for purposes of the present motion the court must agree, that LPM could have obtained the substantial equivalent of the information contained in the Master Parts system from alternative sources; moreover, through industry, LPM could have independently developed its own parts identification system with its own illustrations, arrangements, groupings, and correlations. [3] Therefore, the court finds that it cannot say on the basis of this record that, as a matter of law, the Master Parts System is not entitled to copyright protection either as an inventive arrangement or as an industrious collection. See, e.g., *17 U.S.C. §§ 101* and *103*; *National Business Lists, Inc. v. Dun & Bradstreet, Inc., 552 F. Supp. 89 (N.D. Ill. 1982)*; *Schroeder v. William Morrow & Co., 566 F.2d 3 (7th Cir. 1977)*; *Toksvig v. Brace **[*23]** Publishing Co., 181 F.2d 664 (7th Cir. 1950)*.

[*24] Summary judgment also must be denied with respect to the alternative ground proposed by LPM.After reviewing the record and the submissions of the parties, the court finds that numerous facts genuinely in dispute preclude it from making a determination that Clark has relinquished the protection of the copyright laws by generally publishing its Master Parts System. See generally 3 *Nimmer, Copyright § 12.10* (1983). The motion for summary judgment, therefore, is denied in its entirety.

IV

In summary, LPM's motion to dismiss the first amended complaint is granted with respect to paragraphs 1(h), 37, 63, and 64; moreover, paragraphs 42 and 44 are dismissed insofar as they incorporate allegations from paragraph 37 that LPM sold parts to Clark dealers in unmarked boxes. LPM's motion to strike insufficient defenses asserted in Clark's answer to LPM's first amended counterclaims is granted with respect to paragraphs 67, 69, 70, 71, 74, and 75. In all other respects, the motion to dismiss and the motion to strike are denied. Clark is granted leave to file within 35 days of the date hereof a second amended complaint and amended affirmative defenses to LPM's first amended counterclaims. **[*25]** LPM's motion for summary judgment is denied in its entirety.

---

[2] LPM's motion and its initial supporting memorandum sought summary judgment as to the entirety of Clark's copyright infringement claim on the ground that part number information cannot be copyrighted; the general publication theory was clearly asserted as an alternative, independent ground for summary judgment on the copyright claim. As described in the main text, however, when the record is construed in Clark's favor it appears that LPM copied a great deal more than part number information. Consequently, the extent of the copyright protection due part number information, standing alone, cannot be dispositive of the infringement claim. Recognizing this, LPM in its reply memorandum shifts gears and asserts, in effect, that it intended to advance the parts-number ground as a basis for partial summary judgment on the infringement claim. It would be fundamentally unfair if the court allowed LPM to revise the scope and underlying theory of its motion in a reply memorandum to which Clark had no opportunity to respond; it is too late for LPM to argue that it wants something other than that which it originally requested. However, even if the court were to address separately the issue of whether part numbers, standing alone, can be copyrighted, it is doubtful that the issue would be resolved in LPM's favor. The gravamen of its argument is that the part number information cannot be copyrighted by Clark as an industrious collection because it was self-generated. There is no case law to support this novel proposition; indeed, by consistently affording copyright protection to self-generated compilations like telephone directories, courts have by implication rejected LPM's position on numerous occasions. See, e.g., *Leon v. Pacific Telephone & Telegraph Co., 91 F.2d 484 (9th Cir. 1937)*; *Central Telephone Co. of Virginia v. Johnson Publishing Co., 526 F. Supp. 838 (D. Colo. 1981)*; *Southwestern Bell Telephone Co. v. Nationwide Independent Directory Service, Inc., 371 F. Supp. 900 (W.D. Ark. 1974)*. The court, however, reserves final judgment on this issue for trial.

[3] LPM maintains that these considerations actually militate in favor of summary judgment. Since there is a tremendous disparity between Clark's expenses and what it would cost LPM to obtain or generate similar information, it reasons that granting copyright protection to Clark would have pronounced anti-competitive effects. There is, however, nothing in the record establishing either the extent of costs LPM would incur if it compiled its own information or the existence of the anticompetitive effects it describes. The court, of course, cannot grant summary judgment in LPM's favor based on bare conjecture and speculation.

So ordered

Southern Pac. Communications Co. v. American Tel. & Tel. Co.

United States Court of Appeals for the District of Columbia Circuit

March 20, 1984, Argued ; July 31, 1984

No. 83-1864

Reporter

740 F.2d 1011 *; 1984 U.S. App. LEXIS 20012 **; 238 U.S. App. D.C. 340; 1984-2 Trade Cas. (CCH) P66,132

SOUTHERN PACIFIC COMMUNICATIONS COMPANY, et al., Appellants v. AMERICAN TELEPHONE & TELEGRAPH COMPANY, et al.

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN1[] **Antitrust & Trade Law, Clayton Act**

See 15 U.S.C.S. § 16(a).

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

Civil Procedure > Judgments > Relief From Judgments > General Overview

HN2[] **Estoppel, Collateral Estoppel**

Fed. R. Civ. P. 60(b)(6) provides a district court discretion to grant relief from a judgment for any reason justifying relief.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN3[] Estoppel, Collateral Estoppel

The preferable approach for dealing with the offensive use of collateral estoppel is not to preclude its use in the federal courts, but to grant trial courts broad discretion to determine when it should be applied.

Civil Procedure > Appeals > Standards of Review > Abuse of Discretion

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

HN4[] Standards of Review, Abuse of Discretion

In reviewing the propriety of the district court's determinations both to deny Fed. R. Civ. P. 60(b)(6) relief and to deny offensive use of collateral estoppel, this court is bound by the abuse of discretion standard.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN5[] Estoppel, Collateral Estoppel

Collateral estoppel may be applied to a trial court finding even while the judgment is pending on appeal.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN6[] Estoppel, Collateral Estoppel

Collateral estoppel serves three main purposes. It protects litigants from the burden of relitigating an issue which the other party has already litigated and lost. It promotes judicial economy by preventing needless litigation. Finally, it fosters reliance on judicial action by minimizing the possibility of inconsistent decisions.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN7[] Estoppel, Collateral Estoppel

At least when it is possible to raise collateral estoppel claims prior to trial, the court does not think that it unduly burdens litigants by requiring them to raise the claims or to forego them forever.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

Civil Procedure > Judgments > Relief From Judgments > General Overview

HN8[] Estoppel, Collateral Estoppel

Fed. R. Civ. P. 60(b) cannot be employed simply to rescue a litigant from strategic choices that later turn out to be improvident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] Monopolies & Monopolization, Attempts to Monopolize

The definition of the relevant market has no independent significance under the Sherman Act. It relates only to the determination of whether a defendant possesses monopoly power.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN10[] Estoppel, Collateral Estoppel

Collateral estoppel, under which a prior judgment operates as an absolute bar to relitigation of the issues estopped, is governed by common law principles.

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN11[] **Antitrust & Trade Law, Clayton Act**

The Clayton Act, *15 U.S.C.S. § 16(a)*, limits the discretion of the courts to decide whether to give effect to a prior judgment. The section, however, accords prior judgments only prima facie effect, thus, creating a rebuttable presumption with respect to those issues determined in the prior judgment.

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Civil Procedure > Settlements > Settlement Agreements > General Overview

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN12[] **Estoppel, Collateral Estoppel**

Some courts give collateral estoppel effect to consent judgments. The courts have allowed such effect only when it is clear that the parties intended the stipulation of settlement and judgment entered thereon to adjudicate once and for all the issues raised in that action. The consent decree must contain far-reaching, preclusive language.

Antitrust & Trade Law > Clayton Act > Scope

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

HN13[] **Antitrust & Trade Law, Clayton Act**

The Clayton Act, *15 U.S.C.S. § 16(a)*, by its terms, applies to consent judgments entered after testimony has been taken. Although the judgment need not make a specific finding of liability, the judgment must be to the effect that a defendant has violated the antitrust laws.

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Antitrust Procedures & Penalties Act

Civil Procedure > ... > Preclusion of Judgments > Estoppel > Collateral Estoppel

Antitrust & Trade Law > ... > US Department of Justice Actions > Settlements > Consent Judgments

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN14[] Settlements, Antitrust Procedures & Penalties Act

With increasing frequency, parties to antitrust agreements are inserting into consent agreements non-liability clauses. The court does not believe that the mere appendage of such a clause should automatically make 15 U.S.C.S. § 16(a) inapplicable; such a per se rule would contravene the congressional mandate contained in the statute. The question in each case must be whether the judgment, considered as a whole, is to the effect that the defendant has violated the antitrust laws.

Counsel: Frederick P. Furth, with whom Thomas R. Fahrner, Daniel S. Mason, Charles P. Wolff, Michael P. Lehmann, Craig C. Corbitt, Stephen Ailes, Richard A. Whiting, Richard Diamond and James H. Pipkin were on the brief, for Appellants. Edmund W. Burke also entered an appearance for Appellants.

George L. Saunders, Jr., with whom Michael S. Yauch, C. John Buresh, Stewart A. Block, Howard J. Trienens and Raymond Brenner were on the brief, for Appellees. Julie D. Nelson also entered an appearance for Appellees.

Judges: Wald and Edwards, Circuit Judges, and Swygert, [*] Senior Circuit Judge, United States Court of Appeals for the Seventh Circuit. Opinion for the Court filed by Senior Circuit Judge Swygert.

Opinion by: SWYGERT

Opinion

[*1014] SWYGERT, Senior Circuit Judge:

This appeal arises out of an antitrust action brought by Southern Pacific Communications Company and Transportation Microwave Corporation ("SPCC") against American Telephone and Telegraph Company and the local Bell Operating Companies ("AT & T"). **[**2]** Following a bench trial, the district court entered judgment for AT & T and this court affirmed. *SPCC v. AT & T, 556 F. Supp. 825 (D.D.C. 1982)*, *aff'd*, *740 F.2d 980 (D.C. Cir. 1984)*. Prior to our affirmance, SPCC had moved the district court, pursuant to *Fed. R. Civ. P. 60(b)(6)*, [1] to vacate the judgment. The motion was denied. *SPCC v. AT & T, 567 F. Supp. 326 (D.D.C. 1983)*. We now affirm the district court's denial of SPCC's *Rule 60(b)* motion to vacate.

I

The facts of the antitrust action underlying this appeal are fully set forth in *SPCC v. AT & T*, *supra*, 740 F.2d 980, slip op. at 4-11. We will discuss only the additional facts relevant to SPCC's *Rule 60(b)* motion.

1. *SPCC's Rules 60(b) Motion*

[3]** The district court issued a Memorandum Opinion and Order entering judgment for AT & T and dismissing the case with prejudice on December 21, 1982. In February 1983 SPCC moved the district court, pursuant to *Fed. R. Civ. P. 60(b)(6)*, to vacate the judgment in light of judgments in two other antitrust actions against AT & T, *MCI Communications Corp. v. AT & T*, No. 74-C-633 (N.D. Ill. 1980), *aff'd in part and rev'd in part*, *708 F.2d 1081 (7th Cir.)*, *cert. denied*, *464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)* ("the *MCI* case"); and *United States v. AT*

---

[*] Sitting by designation pursuant to 28 U.S.C. § 294(d) (1982).

[1] *Fed. R. Civ. P. 60(b) (6)* provides:

> On motion and upon such terms as are just, the court may relieve a party or his legal representative from a final judgment, order, or proceeding for . . . any . . . reason justifying relief from the operation of the judgment.

& T, 552 F. Supp. 131 (D.D.C. 1982), *aff'd summarily sub nom.* Maryland v. United States, 460 U.S. 1001, 103 S. Ct. 1240, 75 L. Ed. 2d 472 (1983).

SPCC claims that the jury verdict in the *MCI* case precludes relitigation by AT & T of five factual issues. [2] The first issue is the definition of the relevant market. [3] **[**5]** The other four issues are whether AT & T willfully maintained its monopoly power by: (1) negotiating interconnection contracts in bad faith and then abandoning the contract process in bad faith to file tariffs with state regulatory commissions; [4] (2) improperly denying FX and CCSA interconnections; **[**4]** [5] (3) providing inappropriate or ineffective equipment and procedures for interconnection; [6] and (4) refusing to **[*1015]** provide interconnections outside strictly limited geographical areas.

SPCC also claims that the judgment in *United States v. AT & T, supra, 552 F. Supp. 131*, together with the court's denial in that case of AT & T's motion to dismiss the government's suit, *United States v. AT & T, 524 F. Supp. 1336 (D.D.C. 1981)*, conclusively establish that AT & T monopolized the relevant market of intercity telecommunications service in violation of section 2 of the Sherman Act by: (1) refusing to provide FX and CCSA interconnections; (2) providing inappropriate or inefficient equipment and procedures for interconnection; (3) pricing access to local distribution facilities in a discriminatory manner; [7] (4) negotiating interconnection contracts and then filing tariffs with state regulatory commissions in bad faith; and (5) pricing Telpak and Hi/Lo without regard to cost. [8] According to SPCC, AT & T is precluded from relitigating these issues under section 5(a) of the Clayton Act, which **[**6]** provides:

> ***HN1***[] A final judgment or decree . . . rendered in any . . . proceeding brought by . . . the United States under the antitrust laws to the effect that a defendant has violated said laws shall be prima facie evidence against such defendant in any action or proceeding brought by any other party against such defendant under said laws as to all matters respecting which said judgment or decree would be an estoppel as between the parties thereto: *Provided*, That this section shall not apply to consent judgments or decrees entered before any testimony has been taken. Nothing contained in this section shall be construed to impose any limitation on the application of collateral estoppel. . . .

15 U.S.C. § 16(a) (1982).

2. *The MCI Case*

---

[2] In *Parklane Hosiery Co. v. Shore, 439 U.S. 322, 331, 58 L. Ed. 2d 552, 99 S. Ct. 645 (1979)*, the Supreme Court held that a plaintiff may, when appropriate, preclude a defendant from relitigating issues that the defendant litigated and lost against another plaintiff. This practice, which SPCC seeks to use in this case, is called offensive collateral estoppel. Offensive use of collateral estoppel is distinguished from defensive use of collateral estoppel. The latter occurs when a defendant seeks to preclude a plaintiff from relitigating an issue that the plaintiffs has litigated and lost against another defendant. *See id. at 326 n.4*. Although offensive and defensive collateral estoppel are quite similar, the former raises certain considerations that are not raised by the latter. *See id. at 329-31*.

[3] The relevant market is the market in which an entity's power is measured to determine whether the entity is a monopolist for ***antitrust law*** purposes. The relevant market is generally defined in both geographic and product terms. *See United States v. E. I. duPont De Nemours & Co., 351 U.S. 377, 394-96, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*; L. Sullivan, *Handbook of the Law of Antitrust* 41-74 (1977). For a discussion of SPCC's claim, *see SPCC v. AT & T, supra*, 740 F.2d 980, slip op. at 32-34.

[4] For a discussion of this claim, *see SPCC v. AT & T, supra*, 740 F.2d 980, slip op. at 46-47.

[5] *See id.*, slip op. at 4 n.3,47.

[6] *See id.*, slip op. at 47-48.

[7] *See id.*, slip op. at 48.

[8] *See id.*, slip op. at 7 n.5, 37.

In 1974 MCI filed a complaint against AT & T in the United States District Court for the Northern District of Illinois under section 4 of the Clayton Act, *15 U.S.C. § 15* ***[**7]*** *(1982)*, alleging monopolization and conspiracy in restraint of trade. The case was tried to a jury between February and June 1980. Fifteen of MCI's monopolization charges were ultimately submitted to the jury which was instructed to make a separate finding of liability as to each charge but permitted to award damages in a lump sum. The jury found in favor of MCI on ten of the fifteen charges and awarded MCI $600 million in damages. After losing various posttrial motions, AT & T filed notice of appeal in August 1980. In September 1980 MCI filed notice of cross-appeal. On January 12, 1983 the United States Court of Appeals for the Seventh Circuit issued its opinion sustaining in part and reversing in part the jury verdict and remanding the case for a new trial on the issue of damages. *MCI v. AT & T, 708 F.2d 1081 (7th Cir.)*, *cert. denied*, *464 U.S. 891, 104 S. Ct. 234, 78 L. Ed. 2d 226 (1983)*.

SPCC filed its complaint against AT & T on March 27, 1978. In February 1982 SPCC made a motion *in limine* for an order defining legal issues under section 2 of the Sherman Act. In one of its briefs filed in connection with the motion, SPCC argued that the jury verdict in the **[**8]** *MCI* case precluded AT & T from relitigating the issue of the relevant market. Plaintiffs' Reply Memorandum on Section 2 of the Sherman Act, at 2-3 (filed Feb. 17, 1982). This issue, among others, was referred to two Special Masters. On April 22, 1982 the Special Masters ruled:

> In *MCI v. AT & T* a finding of fact was made by the jury as to the relevant market. The finding was in response to a charge to the jury reciting that MCI contended the relevant market was "inter-city business and data communication services in the United States during the period from 1969 through mid-1974," consisting of "private line services, and other services which can be used instead of private line services, such as WATS and business long distance." That finding is the basis of a judgment now on appeal. **[*1016]** If that finding is not reversed on appeal, it may be relied on by SPCC. The issue is obviously substantially the same, and should be treated as such unless AT & T can suggest some reason why it should not be regarded as the same issue. On the premise that it is the same issue, the finding is preclusive against AT & T, *Parklane Hosiery Co. v. Shore, 439 U.S. 322, 58 L.* ***[**9]*** *Ed. 2d 552, 99 S. Ct. 645 (1979)*, unless AT & T can show "compelling circumstances" permitting it to relitigate this issue. . . . If the finding in *MCI v. AT & T* is reversed, or compelling reasons are shown why the finding should not be preclusive here, then the definition of the market in this case is a question of fact to be determined afresh according to accepted antitrust legal standards.

Opinion of the Special Masters at 5-6 (filed Apr. 22, 1982) (hereinafter "Special Masters' April 22 opinion").

AT & T appealed the Special Masters' April 22 Opinion and, in response, SPCC filed a motion to adopt the Opinion with modifications, Plaintiffs' Motion to Adopt, with Modifications, the Special Masters' April 22 Opinion, at 7-9 (filed May 3, 1982). The district court deferred consideration of the appeal pending trial. Order Holding in Abeyance Special Masters' 4-22-82 Opinion (May 6, 1982). Trial in the case commenced on May 10, 1982 and lasted for more than thirty days. In July 1982 SPCC filed proposed conclusions of law, in which SPCC proposed that AT & T be estopped from challenging the definition of the relevant market adopted by the jury in the *MCI* case. Plaintiffs' **[**10]** Proposed Findings of Fact and Conclusions of Law, at 355 (filed July 21, 1982). On December 21, 1982 the district court issued a Memorandum Opinion and Order entering judgment for AT & T. Without reference to the Special Masters' April 22 Opinion, the court defined the relevant market as interstate, intercity private line services to customers other than the federal government. *SPCC v. AT & T, supra, 556 F. Supp. at 871-77*.

3. *The Government Case, United States v. AT & T*

In 1949 the United States filed an antitrust action against Western Electric Company and AT & T in the United States District Court for the District of New Jersey. *United States v. Western Electric Co.*, C.A. No. 17-49 (D.N.J.). The action resulted in a consent decree entered in 1956. *United States v. Western Electric Co.*, 1956 Trade Cas. (CCH) para. 68,246 (D.N.J. 1956) (Final Judgment). The 1956 decree limited the business that defendants could engage in but did not direct any divestiture or other structural relief originally sought by the government. In 1974 the United States filed a second antitrust action against AT & T, Western Electric Company, and Bell Telephone Laboratories in **[**11]** the United States District Court for the District of Columbia. Trial commenced in the action in January 1981. After the conclusion of the government's case-in-chief, the defendants moved to dismiss the action on a number of grounds. The motion was denied by the court on September 11, 1981. *United States v. AT & T, supra, 524 F. Supp. 1336*. Defendants commenced their case-in-chief in August 1981 and were scheduled to complete the presentation of their evidence in January 1982. The trial was scheduled to terminate in February after presentation of the government's rebuttal evidence. However, on January 8, 1982 the parties filed a stipulation with the United States District Court for the District of New Jersey agreeing to entry of a consent decree. The decree purported to be a modification of the 1956 judgment and was designated "Modification of Final Judgment" ("MFJ"). Simultaneously with the filing in the New Jersey court, the parties sought to enter the MFJ as a settlement of the action in the United States District Court for the District of Columbia and to file a dismissal of the action. The District of Columbia court, however, ordered that the dismissal be reviewed and **[**12]** approved by the court. The actions were consolidated in the District of Columbia court. The court determined that any settlement was subject to the provisions of the **[*1017]** Tunney Act, *15 U.S.C. § 16 (1982)*, which requires compliance with specified procedures before entering a consent judgment in an action brought by the United States under the antitrust laws. After adhering to the Tunney Act procedures, including making a finding that the judgment was in the public interest, the court entered the MFJ with certain modifications in August 1982. *United States v. AT & T, supra, 552 F. Supp. 131*.

The MFJ as modified by the court required the defendants to divest themselves of their local operating companies. *Id. at 226-27*. The MFJ provides: "Neither this Modification of Final Judgment nor any of its terms or provisions shall constitute any evidence against, an admission by, or an estoppel against any party or BOC." *Id. at 228*. In its opinion approving the MFJ, the court discussed the applicability of section 5(a) of the Clayton Act, *15 U.S.C. § 16(a) (1982)*: "The statute establishes a presumption usable in private litigation only on the basis of a judgment 'to **[**13]** the effect that a defendant has violated the antitrust laws.'" *552 F. Supp. at 211*. The court noted that neither its opinion nor the MFJ included a finding or an admission that AT & T violated the antitrust laws. In view of the MFJ's "unequivocal position" that it did not constitute evidence or an estoppel against or an admission by any party, the court stated, "it would appear to this Court that the judgment herein would not have a prima facie effect in private litigation." The court, however, following the suggestion of the Department of Justice, declined to make a final decision on the applicability of section 5(a). The court stated that the ultimate decision whether to apply section 5(a) to the MFJ in future private antitrust actions rests with the courts in which the actions are brought. *Id.*

4. *The District Court Decision*

In a written opinion and order issued on July 7, 1983 the district court denied SPCC's *Rule 60(b)* motion. *SPCC v. AT & T, supra, 567 F. Supp. 326*. The court found that SPCC had waived its collateral estoppel claims with respect to the *MCI* case. *Id. at 329-30*. With respect to the denial of AT & T's motion to dismiss the government's **[**14]** case, the court found that the ruling was not a final resolution of the issues involved and thus could not be the basis of a collateral estoppel claim. *Id. at 328*. The court refused to give collateral estoppel effect to the MFJ because the MFJ specifically provided that it should not be given such effect. *Id.* The court found that section 5(a) of the Clayton Act was inapplicable because the consent decree "did not constitute a judgment to the effect that AT & T violated the antitrust laws." *Id. at 329*. Finally, the court held that even if the MFJ could be understood to contain a finding that AT & T violated the antitrust laws, section 5(a) provided only that it be admitted as prima facie evidence against AT & T. The court concluded that the outcome of the litigation would have been the same if the MFJ had been admitted against AT & T because evidence submitted by AT & T successfully rebutted any prima facie effect of the MFJ. *Id.*

II

HN2[] *Fed. R. Civ. P. 60(b)(6)* provides a district court discretion to grant relief from a judgment for any reason justifying relief. *See SEC v. Clifton, 226 U.S. App. D.C. 173, 700 F.2d 744, 746 (D.C. Cir. 1983)*. In the instant case, **[**15]** SPCC requested, pursuant to *Rule 60(b)(6)*, that the district court vacate its findings and apply offensive collateral estoppel to findings contained in two other judgments against AT & T. In *Parklane Hosiery Co. v. Shore, supra*, the Supreme Court concluded that ***HN3***[] "the preferable approach for dealing" with the offensive use of collateral estoppel was "not to preclude" its use in the federal courts, "but to grant trial courts broad discretion to determine when it should be applied." *439 U.S. at 331*. Thus, ***HN4***[] in reviewing the propriety of the district court's determinations both to deny *Rule 60(b)(6)* relief and to deny offensive use of collateral estoppel, this court is bound by the abuse of discretion standard.

[*1018] III

1. *Waiver*

The district court found that SPCC waived its collateral estoppel claims with respect to the *MCI* case. *SPCC V. AT & T, supra, 567 F. Supp. at 329-30*. Although SPCC mentioned to the district court on more than one occasion that it might seek to preclude relitigation of certain issues determined adversely to AT & T in the *MCI* case, *see, e.g.*, Plaintiffs' First Statement of Contentions and Proof, at 2-3 (filed Nov. 24, 1980); **[**16]** Plaintiffs' Second Statement of Contentions and Proof, vol. 1, at 3 (filed Aug. 10, 1981), SPCC never moved to preclude any issues other than the issue of the relevant market and never even informed the court of the additional issues it was contemplating having precluded. We conclude that the court did not abuse its discretion in finding that SPCC waived these claims. *Cf.* *Grantham v. McGraw-Edison Co., 444 F.2d 210, 217 (7th Cir. 1971)* (per curiam) (Memorandum on Petition for Rehearing) ("A party normally may not rely on an estoppel which was available to him in the trial court but which was not raised prior to appeal.").

SPCC claims that it felt constrained by the Special Masters' April 22 Opinion to wait for the Seventh Circuit's decision to issue before seeking to preclude relitigation of the MCI jury findings. The Opinion stated that SPCC could rely on the jury finding as to the relevant market "if that finding is not reversed on appeal. . . ." We note that the federal rule and the rule in this circuit is that ***HN5***[] collateral estoppel may be applied to a trial court finding even while the judgment is pending on appeal. *See* *Huron Holding Corp. v. Lincoln Mine Operating Co.* ***[**17]*** *, 312 U.S. 183, 189, 85 L. Ed. 725, 61 S. Ct. 513 (1941)*; *Nixon v. Richey, 168 U.S. App. D.C. 172, 513 F.2d 430, 438 n.75 (D.C. Cir. 1975)*; 1B J. Moore, *Federal Practice* para..416[3] (2d ed. 1983). Thus, SPCC should have been permitted to press its collateral estoppel claims at trial. Nevertheless, if the Special Masters' April 22 Opinion operated to bar SPCC from seeking the application of collateral estoppel until the Seventh Circuit's decision issued, SPCC should not be held responsible for the misapplication of the law. SPCC was bound by the law of the case as formulated by the district court unless and until it was corrected on appeal after a final judgment. We conclude, however, that the Special Masters' April 22 Opinion did not prohibit SPCC from pursuing its collateral estoppel claims and, to the extent that SPCC believed the Opinion operated as such a bar, that belief was unreasonable.

First, the discussion of collateral estoppel in the Special Masters' Opinion is ambiguous. The reference to the pending appeal of the *MCI* jury verdict could be interpreted to mean that the appellate court's decision would be considered only if and when it issued; if the district **[**18]** court issued its decision on SPCC's complaint before the Seventh Circuit issued its decision in the *MCI* case, the district court would be required to give collateral estoppel effect to the jury verdict provided the propriety of giving such effect was established by SPCC; if, however, the Seventh Circuit issued its decision before the district court issued its decision, the district court obviously would be required to give collateral estoppel effect only to those findings upheld by the Seventh Circuit. Under this interpretation of the Special Masters' April 22 Opinion, an interpretation which comports with the federal rule, *see* 1B J. Moore, *Federal Practice, supra*, para..416[3], SPCC remained free to pursue its collateral estoppel claims at trial.

The foregoing approach to collateral estoppel presents a potential dilemma for every litigant seeking to preclude litigation of certain issues on the basis of a prior judgment that is pending on appeal. If a litigant relies on the trial court judgment for proof of a contested issue and the judgment is rendered in the litigant's case, the litigant has no remaining proof on the issue. The remedy for this problem, however, **[**19]** is to permit the litigants to reopen their case after a reversal to present their evidence on the issue, or to **[*1019]** permit the litigants to submit independent proof on the issue at the same time they argue for the application of collateral estoppel. The remedy is not to refrain from raising collateral estoppel claims until the prior judgment has been affirmed on appeal. *See* *Grantham v. McGraw-Edison Co., supra, 444 F.2d at 216-17* (party barred from raising estoppel for first time on appeal even though judgment relied upon for estoppel was pending on appeal during trial). More important than the ambiguity of the Special Masters' April 22 Opinion, however, the district court never adopted the Opinion. The court deferred consideration of the Opinion pending trial. Order filed May 6, 1982. Thus, whatever the Special Masters' April 22 Opinion held, SPCC was not bound by it.

HN6[] Collateral estoppel serves three main purposes. It protects litigants from the burden of relitigating an issue which the other party has already litigated and lost. *See* Parklane Hosiery, supra, 439 U.S. at 326. It promotes judicial economy by preventing needless litigation. [9] *See id.* Finally, **[**20]** it "fosters reliance on judicial action by minimizing the possibility of inconsistent decisions." Montana v. United States, 440 U.S. 147, 154, 59 L. Ed. 2d 210, 99 S. Ct. 970 (1979). Although the application of collateral estoppel to the *MCI* judgment in the instant case arguably serves the purpose of consistency, it serves neither of the other purposes of the doctrine. The time and expense of relitigating the issues has already been borne by the parties and the court. HN7[] At least when it is *possible* to raise collateral estoppel claims prior to trial, as it was here, we do not think that we unduly burden litigants by requiring them to raise the claims or to forego them forever. *See also* Safe Flight Instrument Corp. v. McDonnell-Douglas Corp., 482 F.2d 1086, 1089 (9th Cir.), *cert. denied*, *414 U.S. 1113, 94 S. Ct. 843, 38 L. Ed. 2d 740 (1973)*; Grantham v. McGraw-Edison Co., supra, 444 F.2d at 216-17; Donald v. J. J. White Lumber Co., 68 F.2d 441, 442 (5th Cir. 1934); Carman Industries, Inc. v. Wahl, 472 F. Supp. 877, 879 (D.N.J. 1976) ("waiver has been found where a party has chosen to relitigate rather than assert the benefit of a prior adjudication of **[**21]** an issue in dispute").

Finally, we are concerned, as was the district court, *see* SPCC v. AT & T, supra, 567 F. Supp. at 330, that SPCC may have made a strategic decision to present its own evidence on the issues rather than to pursue possible **[**22]** collateral estoppel claims with respect to the *MCI* jury verdict. HN8[] "Rule 60(b) cannot . . . be employed simply to rescue a litigant from strategic choices that later turn out to be improvident." Good Luck Nursing Home, Inc. v. Harris, 204 U.S. App. D.C. 300, 636 F.2d 572, 577 (D.C. Cir. 1980). *See also* Ackermann v. United States, 340 U.S. 193, 198, 95 L. Ed. 207, 71 S. Ct. 209 (1950). SPCC's failure to even mention the findings which, if affirmed by the Seventh Circuit, it desired to have precluded suggests that SPCC was making a deliberate decision not to seek collateral estoppel of these issues. The earnestness of SPCC's claim that it felt constrained to wait for the appellate court's decision before it raised its collateral estoppel claims is further undermined by the fact that SPCC continued to seek to preclude relitigation of the jury finding on the relevant market even though the Seventh Circuit opinion affirming this finding had not yet issued. *See* Plaintiffs' Proposed Findings of Fact and Conclusions of Law, at 355 (filed July 21, 1982). If SPCC truly believed that collateral estoppel would be applied only after the Seventh **[*1020]** Circuit issued a decision, **[**23]** we do not understand why SPCC continued to seek to preclude relitigation of this one issue.

2. *Definition of the Relevant Market*

We are unable to conclude, however, that SPCC waived its collateral estoppel claim regarding the *MCI* jury finding on the relevant market. SPCC filed a motion *in limine* to preclude relitigation of the relevant market issue, filed a motion to adopt the opinion of the Special Masters which found collateral estopped applicable to the *MCI* jury finding on the relevant market, and filed a proposed conclusion for law that AT & T be estopped from relitigating the relevant market issue.

We find, however, that error, if any, committed by the district court in failing to adopt the *MCI* jury verdict with respect to the definition of the relevant market is harmless. HN9[] The definition of the relevant market has no independent significance under the Sherman Act. It relates only to the determination of whether a defendant possesses monopoly power. *See* United States v. E. I. duPont De Nemours & Co. supra, 351 U.S. at 394-95; L. Sullivan, *Handbook of the Law of Antitrust, supra*, at 41. In *SPCC v. AT & T, No. 83-1102, supra*, slip op. **[**24]** at 34-36, this court rejected the analysis underlying the district court's conclusion that AT & T did not possess monopoly power. We affirmed the judgment of the district court solely on the basis that SPCC failed to prove AT & T's willful maintenance of its monopoly power. *Id.*, slip op. at 36-53. Because the definition of the relevant market is

---

[9] In Parklane Hosiery, supra, the Supreme Court recognized that offensive use of collateral estoppel could be employed in a manner that, in fact, promotes judicial diseconomy. 439 U.S. at 329-30. Offensive collateral estoppel may encourage plaintiffs to "wait and see" while other plaintiffs engage in test litigation against a common adversary because plaintiffs will never be bound by a previous judgment against another plaintiff but, with offensive use of collateral estoppel, may rely on another plaintiff's favorable judgment. *See id.* Nevertheless, the promotion of judicial economy remains a goal of offensive collateral estoppel. The Court decided to leave to the district courts the task of protecting against abuse of the doctrine. *See* id. at 331.

irrelevant to the analysis of willful maintenance of monopoly power, we need not determine the propriety of the district court's definition of the relevant market. *See* 28 U.S.C. § 2111 (1982).

IV

Waiver has not been raised with respect to SPCC's collateral estoppel claims based upon the judgment entered in the government's suit against AT & T. The MFJ was approved by the district court in August 1982. United States v. AT & T, supra, 552 F. Supp. 131. Although the district court did not issue its Memorandum and Order in SPCC's action until December 1982, the trial, including the submission by the parties of their proposed findings of fact, was completed in July 1982. It is not argued and the district court did not find on this record that SPCC waived its estoppel claims based on the MFJ. Rather, the court refused to **[**25]** give any effect to the decision denying AT & T's motion to dismiss the government's action because the decision was not a final judgment on the merits. SPCC does not argue to this court, at least, that the denial of AT & T's motion to dismiss contained any findings entitled to either collateral estoppel or prima facie effect. *See* Appellant's Opening Brief, No. 83-1864, at 38. Therefore, we need not address this issue. The court refused to grant either collateral estoppel or prima facie effect to the MFJ because the language contained in the judgment expressly stated that it was not to have any such effect. We conclude that this decision was not an abuse of the court's discretion.

SPCC appears to try to root a collateral estoppel argument in the 1980 amendment to section 5(a) of the Clayton Act, 15 U.S.C. § 16(a). *See* Appellant's Opening Brief, No. 83-1864, at 42-43. The amendment provides: "Nothing in this section shall be construed to impose any limitation on the application of collateral estoppel. . . . " Act of Sept. 12, 1980, Pub. L. 96-346, § 5(a), 94 Stat. 1157. We believe that the correct approach is to analyze collateral estoppel and section 5(a) separately. **[**26]** ***HN10***[] Collateral estoppel, under which a prior judgment operates as an absolute bar to relitigation of the issues estopped, is governed by common law principles. *See,* Parklane Hosiery Co. v. Shore, supra, 439 U.S. at 326-31; 1B J. Moore, *Federal Practice, supra*, para..441. ***HN11***[] Section 5(a) of the Clayton Act, in so far as it reflects a congressional determination that prior antitrust judgments shall have **[*1021]** carryover effect in subsequent litigations, limits the discretion of the courts to decide whether to give effect to a prior judgment. The section, however, accords prior judgments only prima facie effect, thus creating a rebuttable presumption with respect to those issues determined in the prior judgment. *See* McCook v. Standard Oil Co. of California, 393 F. Supp. 256, 259-60 (C.D. Cal. 1975). Because the rules for and result of applying collateral estoppel and section 5(a) are different, we shall treat each in turn.

1. *Collateral Estoppel*

HN12[] Some courts have given collateral estoppel effect to consent judgments. *But see* Seaboard Air Line R.R. v. George F. McCourt Trucking, Inc., 277 F.2d 593, 597 (5th Cir. 1960); *cf.* United States v. International **[**27]** Building Co., 345 U.S. 502, 506, 97 L. Ed. 1182, 73 S. Ct. 807 (1953) (unless a consent judgment entered in tax case is shown to involve a judicial determination of question of fact and law, "the judgment has no greater dignity, so far as collateral estoppel is concerned, than any judgment entered only as a compromise of the parties"); Otherson v. Department of Justice, I.N.S., 228 U.S. App. D.C. 481, 711 F.2d 267, 274 (D.C. Cir. 1983) ("Generally speaking, when a particular fact is established not by judicial resolution but by stipulation of the parties, that fact has not been 'actually litigated' and thus is not a proper candidate for issue preclusion."). The courts have allowed such effect only when "it is clear that the parties intended the stipulation of settlement and judgment entered thereon to adjudicate once and for all the issues raised in that action." Yachts America, Inc. v. United States, 230 Ct. Cl. 26, 673 F.2d 356, 362, *cert. denied*, *459 U.S. 839, 74 L. Ed. 2d 81, 103 S. Ct. 86 (1982)*; Green v. Ancora-Citronelle Corp., 577 F.2d 1380, 1383 (9th Cir. 1978). *See generally* 1B J. Moore, *Federal Practice, supra*, paras. 444[1], [3]. The consent **[**28]** decree must contain "far-reaching, preclusive language." Yachts America, Inc. v. United States, supra, 673 F.2d at 362; *cf.* Otherson v. Department of Justice, I.N.S., supra, 711 F.2d at 274 n.6 ("Preclusion is appropriate when the stipulation clearly manifests the parties' intent to be bound in future actions."); Kaspar Wire Works, Inc. v. Leco Engineering & Machine, Inc., 575 F.2d 530, 539-40 (5th Cir. 1978). The language contained in the MFJ was anything but far-reaching or preclusive. The judgment expressly stated that it did not constitute a finding of liability against AT & T and that it was to have no estopping effect. The district court did not abuse its discretion in respecting the express intent of the parties to the MFJ.

The district court's refusal to allow the use of collateral estoppel is further supported on the ground that it would be unfair to AT & T to give estopping effect to the MFJ. The MFJ settled a complicated antitrust action involving a fast-changing communications market. We will not pretend to be able to understand the various, complex considerations of the parties to the settlement. We recognize only that AT & T could have agreed to the **[**29]** settlement for a variety of reasons and not necessarily because AT & T was convinced that the government could establish an antitrust violation. *Cf.* *United States v. AT & T, supra, 552 F. Supp. at 152* ("The divestiture of the Operating Companies, combined with the entry of AT & T into new competitive markets, will be an enormous undertaking . . . with a potential for substantial private advantage. . . ."). This is precisely the type of unfairness that the Supreme Court warned should result in a refusal to allow offensive use of collateral estoppel. *See* *Parklane Hosiery Co. v. Shore, supra, 439 U.S. at 330-31*; *cf.* *United States v. International Building Co., supra, 345 U.S. at 505-06* ("As the case reaches us, we are unable to tell whether the [consent decree] was based on the merits or on some collateral consideration. . . . But unless we can say that [the judgments] were an adjudication of the merits, the doctrine of [collateral **[*1022]** estoppel] would serve an unjust cause. . . .").

2. *Section 5(a)*

HN13[] Section 5(a) of the Clayton Act, by its terms, applies to consent judgments entered after testimony has been taken. *See United States v. National* ***[**30]*** *Ass'n of Broadcasters, 553 F. Supp. 621, 623 n.5 (D.D.C. 1982)*; *Michigan v. Morton Salt Co., 259 F. Supp. 35, 61 (D. Minn. 1966)*, *aff'd sub nom.* *Hardy Salt Co. v. Illinois, 377 F.2d 768 (8th Cir.)*, *cert. denied*, *389 U.S. 912, 19 L. Ed. 2d 260, 88 S. Ct. 238 (1967)*; *Sablosky v. Paramount Film Distributing Corp., 137 F. Supp. 929, 935 (E.D. Pa. 1955)*. *But see* *Cinema Service Corp. v. Twentieth Century-Fox Film Corp., 477 F. Supp. 174, 178 (W.D. Pa. 1979)* (consent decree in government civil antitrust suit is not admissible in antitrust treble damage action). Although the judgment need not make a specific finding of liability, *see Michigan v. Morton Salt Co., supra*, 529 F. Supp. at 62, the judgment must be "to the effect that a defendant has violated the antitrust laws," *id.*; *15 U.S.C. § 16(a)*. ***HN14***[] With increasing frequency, parties to antitrust agreements are inserting into consent agreements nonliability clauses such as that contained in the MFJ. We do not believe that the mere appendage of such a clause should automatically make section 5(a) inapplicable; such a per se rule would contravene the congressional mandate contained in the statute. The question **[**31]** in each case must be whether the judgment, considered as a whole, is "to the effect that" the defendant has violated the antitrust laws. *See also Michigan v. Morton Salt Co. supra, 259 F. Supp. at 62* (recital in consent decree that decree was entered before the taking of any testimony and without adjudicating any question of law or fact does not prevent "the courts from considering whether it would be consistent with the purpose of § 5(a) to allow the decree to exempt a defendant from the prima facie rule").

The MFJ contains no liability findings. The only mention of liability is the nonliability clause. Although the district court which approved the MFJ considered the evidence of an antitrust violation, the court expressly stated that its observations were based on incomplete evidence and were not intended to be a final determination on the liability of AT & T. *United States v. AT & T, supra, 552 F. Supp. at 161-63*. The court also explicitly expressed doubt about the applicability of section 5(a) to the MFJ. *Id.* at 211. As we noted earlier, AT & T could have had motives for consenting to the MFJ unrelated to the question whether AT & T was guilty or believed it **[**32]** was guilty of any antitrust violations. On these facts, we conclude that the district court did not err in finding that the MFJ was not a judgment to the effect that AT & T violated the antitrust laws.

Because we conclude that the district court did not err in denying SPCC's request to apply section 5(a) to the MFJ, we need not address the question whether AT & T successfully rebutted any prima facie effect of the MFJ.

V

We sustain the district court's denial of SPCC's *Rule 60(b)(6)* motion on the ground that any error involving the definition of the relevant market was harmless. SPCC waived its other estoppel claims with respect to the MCI case, and the MFJ entered in the government's case was entitled to neither collateral estoppel nor prima facie effect. The judgment is AFFIRMED.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Sherman Act Violations

HN2[] **Tying Arrangements, Clayton Act**

A tying arrangement is an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier. Such an agreement can be found to violate section 1 of the Sherman Act, 15 U.S.C.S. § 1, and/or section 3 of the Clayton Act, 15 U.S.C.S. § 14. The Clayton Act can be violated only if the tying arrangement involves two distinct products; in contrast, the Sherman Act can be violated if the tying arrangement involves either products or services.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN3[] **Sherman Act, Claims**

Under either *section 1* of the Sherman Act, *15 U.S.C.S. § 1*, or *section 3* of the Clayton Act, *15 U.S.C.S. § 14*, a tying arrangement constitutes a per se antitrust violation if three elements are established. First, there must be two separate products or services, with the purchase of one (the "tying product") conditioned upon the purchase of the other (the "tied product"). Second, the seller must possess sufficient economic power in the market for the tying product so that competition in the market for the tied product is appreciably restrained. Finally, a "not insubstantial" amount of commerce in the market for the tied product must be affected.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN4[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Market power is defined as the ability of a single seller to raise price and restrict output, and the necessary inquiry is described as follows: The proper focus of concern is whether the seller has the power to raise prices or impose other burdensome terms, such as a tie-in, with respect to any appreciable number of buyers within the market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN5[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Economic power in the market for the tying product can be established in one of three ways. First, it may be shown that the defendant occupies a dominant position in the market for the tying product. Second, it may be shown that the tying product is "unique." Finally, it may be shown that a number of the defendant's customers have accepted the tie-in, that there is no explanation other than the defendant's economic power for their willingness to do so, and that the defendant possesses the power to raise prices.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN6[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The mere existence of a trademark does not give rise to a presumption that the holder of the trademark possesses economic power in the relevant market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN7[] Price Fixing & Restraints of Trade, Tying Arrangements

It is not sufficient to show economic power in the market for plaintiff to establish that defendants' customers accepted the alleged tie-ins. Plaintiff also bears the burden of proving that defendants possessed "power over price," and there must be an absence of evidence that the customers accepted the alleged tie-ins for other reasons.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN8[] Price Fixing & Restraints of Trade, Tying Arrangements

Vague terms of quantity will only establish proof of economic power provided (1) there is also evidence of the seller's power over price and (2) there is no evidence of any other explanation such as price competition for the willingness of the customers to accept the seller's tie-in.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > Per Se Rule

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN9[] Tying Arrangements, Per Se Rule

A finding that an alleged tying arrangement is not a per se violation usually does not end the court's inquiry, as a plaintiff may also attempt to prove that a tying arrangement violates the rule of reason. Under this theory, a plaintiff is required to establish the facts peculiar to the business involved, its condition before and after the alleged restraint was applied, the nature and history of the alleged restraint, the reason for adopting the alleged restraint, and its actual or probable effect.

Opinion by: PRATT

Opinion

[*1353] MEMORANDUM OPINION AND ORDER

Plaintiff 3 P.M., Inc. ("3PM") brought this action against defendants Basic Four Corporation ("B/4"), Sorbus, Inc. ("Sorbus"), and Management Assistance, Inc. ("MAI"), alleging four violations of the Sherman and Clayton Acts [1] and bringing pendent state claims of fraud and breach of contract. Now before the Court are defendants' motion for summary judgment as to all counts of plaintiff's complaint, and plaintiff's cross-motion for summary judgment as to Counts I and II of its complaint. For the following reasons, the Court hereby grants defendants' motion in full and denies plaintiff's cross-motion.

The following facts are undisputed. 3PM sells, installs, and services small **[**2]** business computer systems in the Detroit metropolitan area. MAI is a holding company which owns all of the stock in both B/4 and Sorbus. [2] Sorbus installs and maintains computer systems, including those manufactured by B/4. B/4 designs and manufactures computer systems. Its systems consist of a Central Processing Unit along with one or more "peripheral" items, such as video display terminals and printers, which are sold as a unitary system under the B/4 trademark. Some of the peripherals are not manufactured by B/4, but are rather purchased by B/4 from other manufacturers and then resold as part of the B/4 system. B/4's practice was to charge a "foreign device fee" for each such peripheral, allegedly for the cost of adapting the peripheral for use in the B/4 system.

[1] *15 U.S.C. § 1 et seq.*; *15 U.S.C. § 12 et seq.*

[2] In October, 1980, B/4 and Sorbus merged into and became divisions of MAI. However, the defendants were separate corporations when this suit was instituted, and at all times relevant to the allegations in plaintiff's complaint.

B/4 markets its **[**3]** products both through company-owned branch sales offices and through independent dealers. B/4 assigns each independent dealer the exclusive right to sell B/4 systems within a designated territory, subject to provisions included in a dealer agreement.

On March 25, 1977, B/4 and 3PM executed a dealer agreement under which 3PM became the B/4 dealer in the Detroit metropolitan area. The agreement included the following provisions:

> 2. (C) Whenever the Dealer has a potential order for installation of Products outside the Territory, the Dealer shall register with the Seller in writing the name of the potential customer and shall advise the Seller, to the extent known, of the terms of any such prospective sale . . .
>
> * * * *
>
> (D) Whenever the Seller has a potential order for Products from an existing or potential user of Systems involving the installation of Products within and outside the Territory and such sale is consummated between the customer and a party unaffiliated with Dealer, the Seller shall notify the Dealer . . .
>
> * * * *
>
> 6. (A) This agreement may be cancelled:
>
> * * * *
>
> (2) By the Seller:
>
> * * * *
>
> (d) At its discretion, if the Dealer fails to meet the Purchase **[**4]** Quota established in Schedule D hereto for any of the successive six (6) month periods commencing with the "Purchase Quota Commencement Date" specified in Schedule D hereto, the cancellation to be effective thirty (30) days after delivery of notice to the Dealer as to its failure to meet the Purchase Quota, provided that such notice is **[*1354]** delivered within sixty (60) days after the end of any such six (6) month period . . .
>
> * * * *
>
> 10. (A) The Dealer shall promote the sale and distribution of Products in the Territory and provide adequate support, which efforts shall include the following:
>
> * * * *
>
> (2) To provide an adequate size, caliber and trained sales force to promote and maximize the sale of the Products. . . .
>
> * * * *
>
> 16. . . . the Dealer will, and will use its best efforts to require purchasers from it of Products to, make arrangements with Sorbus for the installation and maintenance of Products during at least the two (2) year period commencing with delivery to a user . . .
>
> * * * *
>
> 23. The Dealer shall not purchase from any source other than the Seller any item manufactured or sold by the Seller except for the purchase of any Product installed in **[**5]** the Territory.
>
> 29. (A) The entire Agreement between the Seller and Dealer covering the Products is set forth herein and any amendment or modification shall be in writing and shall be executed by duly authorized representatives in the same manner as this Agreement.

Schedule D to the agreement included the following quota provisions:

Quota Year	**First Six Month Purchase Quota Period**	**Second Six Month Purchase Quota Period**
Year 1	$210,000	$280,000
Year 2	$437,500	$437,500
Year 3	$647,500	$647,500

* * * *

3. . . . Eligibility of accepted orders for (quota) credit as to products sold by Dealer and installed outside the Territory shall be at Seller's sole discretion.

The dealer agreement was executed only after rather protracted negotiations. The draft of the agreement initially sent to 3PM contained para. 6(A)(2)(d) as set forth above, and quota requirements which were higher than those eventually included in the agreement. After reviewing the proposed draft, Robert Yanover and George Squillace, 3PM's president and vice-president, met with B/4 officials. Yanover specifically requested that para. 6(A)(2)(d) be deleted from the agreement, **[**6]** and that the quota requirements be "substantially reduced". Yanover Deposition at 338-9. B/4 officials agreed to reduce the quota figures to those set forth above. B/4 officials further stated that B/4 planned to have long-term relationships with its dealers, and that the quotas contained in the agreement were attainable.

However, B/4 emphatically refused to delete para. 6(A)(2)(d) from the agreement. B/4 also refused to include a provision, requested by Yanover, to the effect that 3PM would not be terminated if it was using its best efforts. Yanover Deposition at 339. Despite B/4's refusal to make these requested changes in the agreement, 3PM executed the dealer agreement and began promoting the sales of B/4 products.

3PM attained its quota for the first six-month period set forth in the agreement, which ended December 31, 1977. However, its sales in the second six-month period declined dramatically. Its total sales for this six-month period were only $63,662.00, a figure which was approximately 23% of the quota requirement. During the last three months of this period, moreover, 3PM did not employ a single full-time salesperson.

B/4 was aware of this dramatic decrease in sales, **[**7]** and it warned 3PM that it was required to meet the quota requirements in the agreement. On July 28, 1978, within the 60-day period required by para. 6(A)(2)(d) of the agreement, B/4 notified 3PM that it was terminating 3PM's dealership because of 3PM's failure to achieve the quota requirements. The termination led to 3PM's institution of this action.

Three events which occurred during 3PM's tenure as a B/4 dealer are relevant to certain portions of 3PM's complaint. The first involved 3PM's dealings with the R.L. Polk Company, a firm which had its headquarters in 3PM's Detroit sales territory. 3PM learned that Polk was considering a purchase of five computer systems, for **[*1355]** use in its regional offices. 3PM sought to register Polk as a "national account" [3] with B/4. B/4 refused this request, and instead permitted 3PM to compete with its Nashville dealer for the Polk sale. B/4 arranged a demonstration which was presented to Polk, but no sale ever resulted.

[8]** The second involved a sale by B/4's Atlanta branch to RCA Distributing Corp. of a computer system to be installed in the Detroit territory. 3PM assisted with the sale and installation of this system, and was initially promised 50% of the sale price as credit toward its quota requirement. However, B/4 ultimately awarded 3PM only 40% of the price as quota credit.

Finally, 3PM requested B/4 to permit it to sell to customers in Florida, well outside its sales territory. B/4 refused this request.

A. COUNTS I AND II

In Count I of its complaint, 3PM alleges that the inclusion of para. 16 in the dealer agreement violated the Sherman and Clayton Acts. 3PM alleges that defendants were able to include this paragraph in the agreement as a result of their economic power in the market for interactive mini-computers. 3PM alleges that because of this paragraph, it was unable to compete with defendants in the market for computer servicing and maintenance, and that a not insubstantial amount of interstate commerce was restrained as a result.

In Count II, 3PM alleges that para. 23 of the dealer agreement was a similar violation. 3PM alleges that this paragraph was included because of defendants' **[**9]** economic power in the market for interactive mini-

[3] This was pursuant to para. 2(C) and (D) of the dealer agreement, which regulated the sales of B/4 products to customers outside of a dealer's exclusive territory.

computers. It alleges that because of para. 23, it was prevented from buying peripherals from defendants' competitors, at prices far less than those charged by defendants. It alleges that a not insubstantial amount of interstate commerce was similarly restrained by this provision of the agreement.

As an initial matter, the parties disagree as to what type of antitrust violations are alleged in these counts. Defendants contend that Count I alleges merely an ancillary restraint, while Count II alleges an exclusive dealing arrangement. 3PM contends that both Counts allege tying arrangements. The Court will adopt 3PM's characterization of the complaint. [4] Even when the complaint is read to allege tying arrangements, however, the Court finds that defendants are entitled to judgment on Counts I and II as a matter of law.

[10]** A tying arrangement is "an agreement by a party to sell one product but only on the condition that the buyer also purchases a different (or tied) product, or at least agrees that he will not purchase that product from any other supplier." *Northern Pacific Railroad Co. v. United States, 356 U.S. 1, 5-6, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*. [5] Such an agreement can be found to violate *§ 1* of the Sherman Act, *15 U.S.C. § 1*, and/or *§ 3* of the Clayton Act, *15 U.S.C. § 14*. The Clayton Act can be violated only if the tying arrangement involves two distinct products; in contrast, the Sherman Act can be violated if the tying arrangement involves either products or services.

HN3[] Under either act, [6] a tying arrangement **[**11]** constitutes a *per se* antitrust violation **[*1356]** if three elements are established. First, there must be two separate products or services, with the purchase of one (the "tying product") conditioned upon the purchase of the other (the "tied product"). Second, the seller must possess sufficient economic power in the market for the tying product so that competition in the market for the tied product is appreciably restrained. Finally, a "not insubstantial" amount of commerce in the market for the tied product must be affected. *See In Re Data General Corp. Antitrust Litigation, 490 F. Supp. 1089, 1100 (N.D. Cal. 1980)*.

Defendants contend that none of these elements are present in the case at bar, as a matter of law. 3PM, on the other hand, **[**12]** contends that all three have been established as a matter of law. The Court finds that 3PM has produced no evidence that defendants possessed economic power in the market for the tying product, and that these counts must therefore be dismissed.

The requirement that the seller possess sufficient economic power was most recently explained by the Supreme Court in *Fortner Enterprises, Inc. v. United States Steel Corp., 394 U.S. 495, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1969)*(*Fortner I*) and *United States Steel Corp. v. Fortner Enterprises, Inc., 429 U.S. 610, 51 L. Ed. 2d 80, 97 S. Ct. 861 (1977)*(*Fortner II*). Plaintiff in *Fortner* brought an action under the Sherman Act, alleging that in order to obtain loans in excess of $2,000,000 from defendant, to be used to purchase and develop certain land, it had been required to purchase prefabricated homes manufactured by defendant to be erected on this land. It alleged that the prefabricated homes were sold at unreasonably high prices. On defendant's motion, the district court granted summary judgment in favor of defendant. It found that defendant did not have sufficient economic power in the market for credit, and that the agreements **[**13]** involved did not restrain a substantial amount of commerce in the market for prefabricated homes.

---

[4] ***HN1***[] *Fed.R.Civ.P. 8(a)* requires only that a plaintiff set forth "a short and plain statement of the claim showing that the pleader is entitled to relief." As discussed *infra*, 3PM's complaint adequately alleges the elements of a tying arrangement.

HN2[]

[5] Thus Count II can be regarded as alleging a tying arrangement, even though para. 23 of the dealer agreement does not *require* the purchase of the peripheral units which defendants offered for sale. This provision of the agreement forbade 3PM to purchase such units from any of defendants' competitors.

[6] Although the Sherman and Clayton Acts were earlier considered to set forth differing standards in this regard, it is now well accepted that the same standards apply under both Acts. *See, e.g. Moore v. James H. Matthews & Co., 550 F.2d 1207 (9th Cir. 1977)*.

In *Fortner I*, the Court reversed the district court's grant of summary judgment. The Court first found that the agreements at issue *did* restrain a substantial amount of commerce in the market for the tied product, holding that the relevant figure was the *total* volume of sales tied by the policy being challenged, not merely that portion of the total accounted for by the plaintiff. The Court then found that there were factual disputes as to whether defendant possessed sufficient economic power in the market for the tying product, and that the grant of summary judgment was therefore improper.

The Court defined ***HN4***[] market power as "the ability of a single seller to raise price and restrict output" and described the necessary inquiry as follows:

> The proper focus of concern is whether the seller has the power to raise prices, or impose other burdensome terms such as a tie-in, with respect to any appreciable number of buyers within the market.

394 U.S. at 503-4. The Court noted that plaintiff had produced evidence to the effect that defendant's competitors sold similar **[**14]** prefabricated homes at a price which was $400 less than defendant's price, and that credit on defendant's advantageous terms was not available from any other source at the time the loans were executed. The Court found that this evidence could tend to prove that defendant had "unique economic advantages over (its) competitors", explaining that defendant "may well have had a substantial competitive advantage in providing this type of financing because of economies resulting from the nationwide character of its operations." *Id. at 505-6*. The Court held that these disputed facts were sufficient to preclude a grant of summary judgment.

On remand, the district court conducted a bench trial and found that the defendant's acts did indeed violate *§ 1* of the Sherman Act. The district court concluded that defendant did possess the requisite economic power in the market for the tying product.

This ruling was also appealed; in *Fortner II*, a unanimous Court reversed the judgment which had been entered in favor of plaintiff. The Court first reviewed the evidence which plaintiff had introduced to establish that defendant possessed economic power in the market for credit. Plaintiff **[*1357]** **[**15]** had established that defendant had entered into similar tying arrangements with many other customers. Plaintiff had further established that defendant charged a noncompetitive price for its prefabricated homes. Finally, plaintiff had established that the terms of defendant's loan were unique [7] and that a loan on similar terms could not be acquired from any other source at the time in question.

The Court held that this evidence was insufficient as a matter of law to support a finding that defendant possessed economic power in the market for credit. The Court found that economic power could not be inferred from the fact that plaintiff and others had accepted the alleged **[**16]** tie-in and paid a noncompetitive price for the tied product, explaining:

> Fortner contends that acceptance of the package by a significant number of customers is itself sufficient to prove the seller's economic power. But this approach depends on the absence of other explanations for the willingness of buyers to purchase the package.

429 U.S. at 618, n. 10.

The Court further held that the requisite uniqueness was not established by plaintiff's showing that defendant's competitors *did not* offer credit on similar terms, but rather that plaintiff was required to show that defendant's competitors *could not* offer credit on such terms. The Court stated:

> The question is whether the seller has some advantage not shared by his competitors in the market for the tying product.
>
> * * * *

---

[7] The terms of this loan were unique in three respects. First, the loan covered 100% of the cost of acquiring and developing certain real estate. Second, the loan was not guaranteed by any of the shareholders or officers of the plaintiff corporation. Finally, the loan was offered at an unusually low rate of interest. *Fortner II, 429 U.S. at 616*.

> Without any evidence that [defendant] had some cost advantage over its competitors - or could offer a form of financing that was significantly differentiated from that which other lenders could offer if they so elected - the unique character of its financing does not support the conclusion that [defendant] had the kind of economic power which Fortner had the burden of **[**17]** proving in order to prevail in this litigation.

Id. at 620-22.

After *Fortner I* and *Fortner II*, ***HN5***[] economic power in the market for the tying product can be established in one of three ways. First, it may be shown that the defendant occupies a dominant position in the market for the tying product. Second, it may be shown that the tying product is "unique", as that term has been further defined in *Fortner II*. Finally, it may be shown that a number of the defendant's customers have accepted the tie-in, that there is no explanation other than the defendant's economic power for their willingness to do so, and that the defendant possesses the power to raise prices. *See e.g., In Re Data General Corp. Antitrust Litigation, supra, 490 F. Supp. at 1111-2*.

In both Count I and Count II of its complaint, 3PM alleges that the tying product in this action is the B/4 series of interactive mini-computers. *See* complaint at paras. 11, 17. Accordingly, the Court must determine whether 3PM has produced any evidence on these motions which tends to prove under any of these three theories that defendants possessed economic power in the market for interactive mini-computers.

[18]** 1. *Dominant Market Position*

In its initial brief, 3PM conceded that it does not even know what defendants' share of this market is, and that it was therefore not attempting to show that defendants occupied a dominant position in this market. In any event, defendants have produced evidence that their share of the Detroit area market for interactive mini-computers was less than 1% at the times relevant to this action. 3PM's only response on this issue is an affidavit from John H. Tipton, in which he asserts that B/4's share of the California market for small business computers was 10% in 1977. The California market, however, is irrelevant to the claims **[*1358]** raised in 3PM's complaint. [8] The Court finds that no material disputes of fact remain in this regard, and that defendants did not have a dominant position in the Detroit market as a matter of law.

[19]** 2. *Uniqueness of Tying Product*

---

[8] *See* complaint at paras. 7, 9, 10, and 12:

> Plaintiff has been for many years in the business of servicing and marketing computers for various businesses within the Detroit metropolitan area.
>
> * * * *
>
> Basic/Four Corporation agreed that plaintiff would become the distributor for Basic/Four computer equipment in the Detroit market area.
>
> * * * *
>
> Sorbus' ability to install and maintain Basic/Four equipment in the Detroit area was inadequate in a number of respects . . .
>
> * * * *
>
> The purpose and effect of the requirement for the use of Sorbus by plaintiff was financially to benefit Sorbus and its parent company MAI and to establish a customer base for Sorbus, Inc. in the Detroit area to the detriment of plaintiff.

3PM has attempted to establish that defendants possessed economic power in the market for the tying product primarily by asserting that the B/4 products were unique at the time in question. For example, 3PM asserts that B/4's software was "exceptionally easy to program." Plaintiff's initial memorandum at 13. 3PM has relied heavily on defendants' promotional literature as "evidence" of this uniqueness. The Court has serious doubts that defendants' sales literature can properly be utilized to create a dispute of fact. Even assuming that this proposition has been established, however -- i.e. that B/4's equipment had capabilities which were unmatched by the equipment of any of defendants' competitors -- this does not establish that the B/4 units were "unique" as that term was defined in *Fortner II*.

As discussed above, under *Fortner II*, plaintiff's burden is not satisfied by showing that none of defendants' competitors offered a similar product at the time in question. Indeed, it was undisputed in *Fortner II* that none of the defendant's competitors offered credit on similarly advantageous terms. The Court held that this showing was insufficient **[**20]** to establish economic power.

3PM's burden, rather, is to prove that none of defendants' competitors *could have* produced products which would perform the functions performed by defendants' products, because defendants possessed some advantage not shared by their competitors. [9] 3PM has not even attempted to make such a showing. In fact, the only evidence on this record which is relevant to this issue suggests that defendants' competitors *could have* produced similar products, and had actually begun to produce such products subsequently. Robert Yanover, 3PM's president, testified at his deposition that 3PM now sells equipment manufactured by one of B/4's competitors which is the "functional equivalent" of the B/4 equipment which 3PM earlier sold. Yanover Deposition at 70. In addition, William Bittick, a programer for 3PM, has stated in an affidavit that "other computer manufacturers are now offering new business basic programming languages patterned after the Basic/Four Business Basic Language." [10] 3PM has produced no evidence which tends to show that none of defendants' **[*1359]** competitors could have offered similar products during the period at issue. The Court therefore **[**21]** finds that no material disputes of fact remain in this respect.

[22]** In a further attempt to establish that the B/4 units were unique, 3PM asserts that only these units were sold under the B/4 trademark, that some of B/4's software is protected by copyright, and that defendants possess trade secrets which were used in producing the B/4 units. Even if these assertions are accepted as true, however, they are insufficient to establish the economic power which is required by *Fortner II*.

The majority view is that ***HN6***[] the mere existence of a trademark does not give rise to a presumption that the holder of the trademark possesses economic power in the relevant market. *Capital Temporaries, Inc. v. Olsten Corp., 506 F.2d 658 (2d Cir. 1974)*; *Carpa, Inc. v. Ward Foods, Inc., 536 F.2d 39 (5th Cir. 1976)*; *Northern v. McGraw-Edison Co., 542 F.2d 1336 (8th Cir. 1976)*, *cert. denied*, *429 U.S. 1097, 97 S. Ct. 1115, 51 L. Ed. 2d 544 (1977)*. A contrary rule has been applied only in the Ninth Circuit, and the application of that rule has been questioned even within that Circuit. *See* *Siegel v. Chicken Delight, Inc., 448 F.2d 43 (9th Cir. 1971)*, *cert. denied*,

[9] *See* II E. Kintner, *Federal* ***Antitrust Law*** at 238 (1980):

> Under the rule of *Fortner II*, inquiry into the uniqueness of a given product must focus on whether the seller in the tying market has the ability either to charge a price or impose a burden that he would not be able to extract in a competitive market. Without a showing of either (1) some cost advantage on the part of the seller, or (2) a characteristic of the tying item that sufficiently differentiates the product so that no competitor could offer the product if he so chooses, the uniqueness of the product will not support a finding of economic power. Thus, the mere fact that a product is attractive will not establish sufficient economic power. (Footnotes omitted.)

[10] Bittick asserts that none of these other manufacturers offered such products until 1978, and that the other products were still inferior to those manufactured by defendants at the time of his affidavit. These statements may create a factual dispute as to whether defendants' competitors *did* produce substantially equivalent products. As discussed above, however, this is not the pertinent inquiry. 3PM is required to establish that defendants' competitors *could not* produce equivalent products, and Bittick's statements do not tend to prove this proposition.

405 U.S. 955, 92 S. Ct. 1172, 31 L. Ed. 2d 232 (1972); *c.f.* *Krehl v. Baskin-Robbins Ice* **[**23]** *Cream Co., 78 F.R.D. 108 (C.D. Cal. 1978)*.

Similarly, the fact that some of B/4's software is copyrighted does not establish that defendants possessed economic power. *See In Re Data General Corp. Antitrust Litigation, supra, 490 F. Supp. at 1112* ("The sole fact of the existence of a copyright notice has not been held sufficient to prove economic power"). In arguing to the contrary, 3PM relies upon *United States v. Loew's, Inc., 371 U.S. 38, 9 L. Ed. 2d 11, 83 S. Ct. 97 (1962)*. In *Loew's*, the Court held that each of a number of copyrighted motion pictures was a unique product, and that the defendants who sold or licensed these films therefore possessed economic power. However, this finding was not based merely upon the fact that each film was copyrighted; rather, the Court found that each of the films "varied in theme, in artistic performance, in stars, in audience appeal, etc.". *Id. at 48*. [11] Thus the copyrighted nature of the B/4 software, standing alone, similarly fails to establish that the B/4 units were "unique" as that term has been defined in *Fortner II*.

[24]** Finally, 3PM's contention that the existence of trade secrets confers economic power upon defendants is completely unsupported by authority. Defendants have presented unrebutted authority to the contrary, and this contention is clearly not well-founded. *In Re Data General Corp. Antitrust Litigation, supra, 490 F. Supp. at 1113-4* ("It has never been held that trade secrets protection is sufficient to create a presumption of economic power.").

In sum, neither the existence of the B/4 trademark, the copyrighted character of B/4's software, nor the existence of trade secrets relieves 3PM of its burden under *Fortner II* to prove that defendants possessed "some advantage not shared by (their) competitors in the market for the tying product." *Id., 429 U.S. at 620*, and that defendants' competitors therefore *could not have* produced a product which was similar to the B/4 unit. The existence of the trademark and the copyright are not irrelevant to 3PM's burden in this regard. For example, 3PM could perhaps carry its burden, or at least create a dispute of fact for the purposes of these motions, by producing evidence which tends to show that because defendants' products were **[**25]** sold under the B/4 trademark, competing products which performed the same functions but were not sold under the B/4 trademark would not be substantially similar products. [12] Similarly, 3PM **[*1360]** could perhaps carry its burden, or at least create a dispute of fact, by producing evidence which tends to show that because some of B/4's software was copyrighted, none of defendants' competitors *could have* created substantially similar products. *But see Data Cash Systems, Inc. v. JS&A Group, Inc., 480 F. Supp. 1063 (N.D. Ill. 1979)*, *aff'd*, *628 F.2d 1038 (7th Cir. 1980)* (copyright notices attached to computer software do not prevent others from developing functionally equivalent programs).

Either showing would tend to prove that defendants' products were "unique" under *Fortner* **[**26]** *II*; if 3PM had produced *any* evidence along these lines, the resulting factual dispute would preclude a grant of summary judgment. On this record, however, 3PM has produced no evidence whatsoever which would tend to prove these propositions, or which otherwise tends to prove that defendants' units were unique. The Court is therefore constrained to find that defendants' units were not unique, as a matter of law.

3. *Customers' Acceptance of Tie-in*

In *Fortner I*, the Court suggested that economic power in the market for the tying product could be established merely by showing that the alleged tie-in had been imposed on a large number of customers. In describing the degree of economic power which must be shown to establish *per se* liability, the Court stated:

---

[11] *See Capital Temporaries, Inc. v. Olsten Corp., supra, 506 F.2d at 663*:

> The appellant misreads *Loew's* if he concludes that the mere existence of the copyrighted tying motion pictures was enough to create the tying. The *tied* films were also copyrighted . . . The tying was created by the attractiveness of some of the films, as contrasted to the inferior quality of the others also required to be purchased in the package.

[12] This would require a showing that the B/4 trademark has attained national preeminence, and is usually attractive as a result. *See Krehl v. Baskin-Robbins Ice Cream Co., supra; see generally* Kintner, *supra*, at 249.

> Market power is usually stated to be the ability of a single seller to raise price and restrict output, for reduced output is the almost inevitable result of higher prices. Even a complete monopolist can seldom raise his price without losing some sales; many buyers will cease to buy the product, or buy less, as the price rises. Market power is therefore a source of serious concern for essentially the same **[**27]** reason, regardless of whether the seller has the greatest economic power possible or merely some lesser degree of appreciable economic power. In both instances, despite the freedom of some or many buyers from the seller's power, other buyers -- whether few or many, whether scattered throughout the market or part of some group within the market -- can be forced to accept the higher price because of their stronger preferences for the product, and the seller could therefore choose instead to force them to accept a tying arrangement that would prevent free competition for their patronage in the market for the tied product. Accordingly, the proper focus of concern is whether the seller has the power to raise prices, or impose other burdensome terms such as a tie-in, with respect to any appreciable number of buyers within the market.

394 U.S. at 503-4.

3PM has relied heavily upon this language, and has stressed the undisputed facts that the tie-in alleged in Count I was accepted by 27 of defendants' 29 dealers, while the tie-in alleged in Count II was accepted by all 29 dealers. 3PM contends that these facts alone establish that defendants possessed economic power in the market **[**28]** for the tying product.

However, after *Fortner II*, it is clear that these facts alone do not establish that defendants possessed economic power. [13] In *Fortner II*, the Court explicitly qualified the language quoted above in two respects. First, the Court indicated that even if the alleged tie-in has been accepted by a large number of buyers, this fact does not relieve the plaintiff of its burden to show that the seller possesses economic power in the sense of the power to raise prices. The Court quoted with approval from a commentator's analysis of the above-quoted language from *Fortner I*:

> One important question in interpreting the *Fortner* decision is the meaning of this language. Taken out of context, it might be thought to mean that, just as **[*1361]** the "host of tying arrangements" was "compelling evidence" of "great power" in *Northern Pacific*, so the inclusion of tie-in clauses in contracts with "any appreciable number of buyers" establishes market power. But the passage read in context does not warrant this interpretation. For the immediately preceding sentence makes clear that market power in the sense of power over price must still exist. If **[**29]** the price could have been raised but the tie-in was demanded in lieu of the higher price, then -- and presumably only then -- would the requisite economic power exist.

Dam, *1969 Supreme Court Review* at 25-26, quoted in *Fortner II, 429 U.S. at 620, n. 13*.

Second, as noted above, the Court noted that the buyers' acceptance of the tie-in is indicative of economic power only in the absence of any other explanation for their willingness to accept such an arrangement. *See Fortner II, 429 U.S. at 618, n. 10*.

Accordingly, after *Fortner II*, ***HN7***[] it is not sufficient that 3PM has established that defendants' dealers accepted the alleged tie-ins. 3PM also bears the burden of proving that defendants **[**30]** possessed "power over price", and there must be an absence of evidence that the dealers accepted the alleged tie-ins for other reasons. [14] **[**31]**

---

[13] Indeed, it was undisputed in *Fortner II* that defendant had entered into the alleged tying arrangements with a large number of its customers. The Court held that this evidence was insufficient as a matter of law to establish that defendant possessed economic power in the market for the tying product.

[14] *See* 2 J. von Kalinowski, *Antitrust Laws and Trade Regulation* at § 6G.05[2] (1983):

> The number of tying arrangements that would constitute some evidence of economic power in the market for the tying product was referred to as *a host* of tying arrangements in *Northern Pacific* and as *any appreciable number* in *Fortner I. Fortner II* makes clear, however, that these ***HN8***[] vague terms of quantity will only establish proof of economic power

Because 3PM does not agree that it is required to establish the defendants' power over price, it has not even attempted to do so. *See* reply brief at 20. This renders insufficient as a matter of law 3PM's attempt to establish that defendants possessed economic power in the market for the tying product. [15]

In sum, 3PM has raised no disputes of fact which are relevant to a determination of the defendants' share of the relevant market, of the uniqueness *vel non* of the tying product, or of the defendants' economic power in the market for the tying product generally. Accordingly, 3PM has failed as a matter of law to establish that the tying arrangements alleged in Counts I and II of its complaint constitute *per se* violations of the antitrust laws. Counts I and II of its complaint must therefore be dismissed. [16]

[32]** **[*1362]** B. COUNTS III AND IV

The allegations set forth in Counts III and IV of 3PM's complaint involve defendants' enforcement of paras. 2(C), 2(D), and 3 of the dealer agreement. Para. 2(C) of the agreement regulated the pricing of items which 3PM sold to customers not within the territory, and otherwise governed such sales. Conversely, para. 2(D) governed the sales of B/4 products within 3PM's territory by other B/4 branches and dealers. Finally, as noted above, para. 3, included in Schedule D to the agreement, provided that if 3PM were to sell any B/4 products outside its territory, an award of quota credit for such sales would be "at (B/4's) sole discretion".

3PM alleges the same factual basis for both Count III and Count IV. It alleges that B/4 denied its request to register R.L. Polk Company as a national account, and instead arranged an unsuccessful sales presentation. It alleges that it assisted in the sale and installation of computer equipment for RCA Distributing Corp., as requested by B/4. It

---

> provided (1) there is also *evidence* of the seller's power over price and (2) there is no evidence of any other explanation such as price competition for the willingness of the customers to accept the seller's tie-in. (original emphasis.)

[15] In addition, defendants have produced unrebutted evidence which offers other explanations for the buyers' willingness to accept the tie-ins alleged. *See* defendants' reply brief at 30, n. 19.

[16] ***HN9***[] A finding that an alleged tying arrangement is not a *per se* violation usually does not end the court's inquiry, as a plaintiff may also attempt to prove that a tying arrangement violates the rule of reason. *See* *Fortner I, 394 U.S. at 500*. Under this theory, a plaintiff is required to establish the facts peculiar to the business involved, its condition before and after the alleged restraint was applied, the nature and history of the alleged restraint, the reason for adopting the alleged restraint, and its actual or probable effect. *Chicago Board of Trade v. United States, 246 U.S. 231, 62 L. Ed. 683, 38 S. Ct. 242 (1918)*.

3PM's only comments on this issue suffer from the same infirmity which permeates much of its arguments on these motions: a propensity to allege every imaginable form of tying arrangement, coupled with a refusal to indicate clearly what is alleged or what evidence is proffered in support. In this regard, 3PM has consistently contended that the tying arrangements alleged are *per se* illegal, and has made no attempt whatsoever to present any evidence which would establish liability under the rule of reason. In the final paragraph of its reply brief, however, 3PM states:

> Plaintiff believes the claims here stated are properly characterized and correctly analyzed, and that these claims may be inexpensively decided without the necessity of submitting to the jury the issue of the unreasonableness of defendants' conduct and without the necessity of presenting market study evidence and expert witness evidence from economists. But should the Court conclude otherwise, it is respectfully requested that plaintiff be given the opportunity to submit such issues and to explore the availability of such evidence, and to present it, if needed.

Id. at 41.

HN10[] *Fed.R.Civ.P. 56(e)* provides:

> When a motion for summary judgment is made and supported as provided in this rule, an adverse party may not rest upon the mere allegations or denials of his pleading, but his response, by affidavits or otherwise provided in this rule, must set forth specific facts showing that there is a genuine issue for trial.
>
> Defendants have here moved for summary judgment on all counts of 3PM's complaint. 3PM cannot avoid a grant of summary judgment merely by requesting an "opportunity . . . to explore the availability of . . . evidence", and the Court therefore must deny 3PM the "opportunity" requested.

alleges that it was promised 50% of the profit on the sale, but was ultimately awarded only 5%. 3PM also complains that it was promised a 50% quota credit but was granted **[**33]** only a 40% credit. Finally, it alleges that it requested of B/4 permission to solicit certain customers in Florida, and that such permission was denied.

COUNT III

In Count III, 3PM alleges that defendants violated *§ 1* of the Sherman Act by arbitrarily and unevenly enforcing these provisions of the agreement. It alleges that defendants enforced these provisions in such a manner as to favor company-owned branch offices over independent dealers. More particularly, 3PM alleges that defendants enforced these provisions in this manner so that they could terminate 3PM's dealership under para. 6(A)(2)(d) of the agreement and then replace 3PM with a company-owned branch office.

Even if 3PM's factual allegations are accepted as true, this conduct clearly did not violate the Sherman Act. It is well settled that ***HN11***[] a manufacturer does not violate the Sherman Act merely by replacing one distributor with another, or even by taking over a distributorship itself. In *Ace Beer Distributors, Inc. v. Kohn, Inc., 318 F.2d 283 (6th Cir. 1963)*, *cert. denied*, *375 U.S. 922, 11 L. Ed. 2d 166, 84 S. Ct. 267 (1963)*, plaintiff alleged that it had been terminated as a distributor for the Stroh Brewery **[**34]** Company. It alleged that the defendants, including Stroh, had conspired to cancel plaintiff's distributorship and award it to another of the defendants. All defendants moved to dismiss, and the district court granted their motion. The Court of Appeals affirmed, holding that plaintiff's allegations failed to state a claim under the Sherman Act. The Court noted:

> The present case does not involve price fixing. Nor does it involve an attempt to create a monopoly. The Stroh Brewery Company had one distributor in the territory under consideration before it terminated the plaintiff's franchise. It continued to have only one distributor thereafter.

318 F.2d at 287.

Ace Beer was applied in a case very similar to the case at bar in *B & B Oil & Chemical Co. v. Franklin Oil Corp., 293 F. Supp. 1313 (E.D. Mich. 1968)*. Plaintiff had been defendant's exclusive distributor in a specified territory. It alleged that two of its salesmen and defendant had conspired to take over one of plaintiff's most profitable accounts, and that it was ultimately terminated as a distributor. Plaintiff brought an action under *§ 1* of the Sherman Act as a result of the termination.

The court **[**35]** granted summary judgment in favor of defendant, finding that plaintiff **[*1363]** had failed to state a claim under the Sherman Act. The court stated:

> It is obvious at this point that what (defendant) did here was to eliminate the dealership of a distributor who enjoyed a lucrative account and take over the account itself.
> * * * *
>
> It is just at this point that plaintiff's case fails, even conceding the inequities charged, since the result of the defendants' activities is not destructive of competition but merely the substitution of one supply source for another, whether it be the manufacturer himself or another distributor.

293 F. Supp. at 1316-7; *accord*, *Aaron E. Levine & Co. Inc. v. Calkraft Paper Co., 429 F. Supp. 1039 (E.D. Mich. 1976)*.

It should be noted that 3PM's factual allegations in the case at bar are inconsistent with its claim that defendants enforced the dealer agreement in such a way as to favor branch offices over independent dealers. 3PM claims generally that branch offices were accorded preferential treatment, yet two of the three incidents upon which 3PM relies in support of this claim did not even involve branch offices. In its attempts **[**36]** to obtain the Polk sale, 3PM was required merely to compete with B/4's independent dealer in Nashville. Similarly, B/4's refusal to allow 3PM to solicit sales in Florida was designed to protect the territory of B/4's independent dealer in that area. Accordingly, these allegations do not tend to support 3PM's theory of liability under the Sherman Act.

Even if defendants *had* been pursuing a policy designed to replace independent dealers with branch offices, however, it is clear under *Ace Beer* and *B & B* that such a course of action does not offend the Sherman Act. [17] Defendants' motion for summary judgment as to Count III must therefore be granted.

[37]** COUNT IV

In Count IV, 3PM alleges that the same acts alleged in Count III constituted a breach of contract. 3PM alleges that defendants' arbitrary and uneven enforcement of the provisions described above prevented 3PM from meeting its quota requirements. It concludes that this interference and B/4's termination of its dealership were material breaches of the dealer agreement.

This count must also be dismissed as a matter of law. 3PM claims that defendants' alleged denial of quota credit for sales outside its territory was a breach of the dealer agreement, and claims that its termination for failure to achieve its quota requirements was the result of this breach. Yet it is undisputed that 3PM had no contractual *right* to receive any quota credit for out-of-territory sales, and that defendants therefore had no contractual duty to award such credit. The dealer agreement unambiguously provides that an award of quota credit for such sales was to be within defendants' "sole discretion", and 3PM has made no argument that this provision of the agreement is unenforceable for any reason. Because the parties' agreement did not require defendants to award any quota credit under these circumstances, **[**38]** defendants' alleged failure to do so cannot be regarded as a breach of that agreement. [18]

[39]** **[*1364]** Moreover, the factual basis which is asserted for this claim is clearly deficient. It is undisputed that defendants never prevented 3PM from making a sale to Polk; they merely required 3PM to compete with B/4's Nashville dealer for the sale. There is no indication that 3PM would have been denied quota credit if it had been able to make the sale to Polk.

3PM's complaint does not even allege that it was denied quota credit for the sale of RCA Distributing Corp.; it merely alleges that the allocation of profits was improper. Even if 3PM had alleged and established that the allocation of quota credit was improper, however, this would have awarded to 3PM only an additional 10% of the sale. [19] Even if this disputed amount were to be added to 3PM's sales for the second six-month period, its sales would still have been far less than the quota requirement.

---

[17] The only contrary authority offered by 3PM is *Eiberger v. Sony Corp. of America, 622 F.2d 1068 (2d Cir. 1980)*. For two reasons, *Eiberger* does not aid 3PM in the case at bar. First, the acts alleged in *Eiberger* were significantly different from those alleged in the case at bar. *Eiberger* did not involve a practice which allegedly resulted in the termination of one distributor so that another could be appointed. Rather, it involved a restraint which prohibited *all* distributors from engaging in price competition. Second, the court in *Eiberger* noted that any liability under the Sherman Act resulting from territorial restrictions arose solely under the rule of reason. Plaintiff in that case had presented evidence which established that the alleged restraints maintained retail prices at an artificially high level, eliminated intrabrand competition, but did not enhance interbrand competition. Such a showing is a fundamental element of the offense which 3PM has attempted to allege, and it is an element as to which 3PM has presented no evidence whatsoever.

[18] 3PM relies upon 5 *Williston on Contracts* § 677 (3d Ed. 1961), which provides: "If a promisor is himself the cause of the failure of performance, either of an obligation due him or of a condition upon which his own liability depends, he cannot take advantage of the failure." 3PM contends that its failure to achieve the quota requirements was caused by defendants' refusal to award quota credit, and that defendants should not have taken advantage of that failure by terminating 3PM's dealership. However, the above quoted language is qualified in the following section: "An exception to this principle must be made where the hindrance is due to some action of the promisor which under the terms of the contract or the customs of business he was permitted to take." *Id*. at § 677A. Under the parties' agreement, defendants were granted discretion to deny quota credit for out-of-territory sales; they were accordingly not prevented from terminating 3PM on the ground that it had failed to meet its quota requirements.

[19] 3PM asserts that it received only 40% quota credit for this sale, while it should have received 50%. This represents a difference of only $2,111.04 in quota credit. Even if this additional quota credit had been granted to 3PM it would have fallen short of its quota requirement by more than $150,000.00.

[40]** In sum, the allegations in Count IV are clearly lacking in both legal and factual support. Defendants' motion for summary judgment as to this count must therefore be granted.

C. COUNTS V AND VI

In Counts V and VI, 3PM alleges that B/4 officials made four misrepresentations during the negotiations which led to the execution of the dealer agreement. 3PM alleges that B/4 officials stated that:

1. B/4 intended to have long-term relationships with all of its dealers, including 3PM;
2. B/4 would "protect" its dealers by enforcing the territorial provisions included in the dealer agreement;
3. 3PM would be able to attain the quota requirements set forth in the dealer agreement; and
4. B/4 would not terminate 3PM's dealership for failure to achieve its quota requirements, so long as 3PM was "progressing" in its sales of B/4 equipment.

Complaint at paras. 34, 43.

Defendants do not dispute that the first three statements were made. They do contend, however, that their officials did not make the fourth statement. This dispute of fact is immaterial to a resolution of defendants' motion for summary judgment on these counts. The Court finds that even if all the **[**41]** alleged statements *were* made, defendants are nevertheless entitled to judgment on these counts as a matter of law.

COUNT V

In Count V, 3PM alleges that it expended considerable money and effort to promote the sale of B/4 products, in reliance on B/4's statement that it would not be terminated for failure to achieve its quota requirements if it was progressing in its sales of B/4 products. Because of this alleged statement and reliance, 3PM contends that B/4 is estopped to terminate its dealership for failure to achieve its quota.

In order to set up such an estoppel, 3PM must establish that:

1. B/4 intentionally or negligently induced it to believe that it would not be terminated for failure to achieve its quota;

2. 3PM justifiably relied on B/4's statements; and

[*1365] 3. 3PM will be prejudiced unless B/4 is estopped to terminate 3PM's dealership.

Michigan National Bank of Detroit v. Kellam, 107 Mich. App. 669, 309 N.W.2d 700 (1981); *Berkeley Police Ass'n v. City of Berkeley, 76 Cal.App. 3d 931, 143 Cal.Rptr. 255 (1977)*. [20] The Court finds that even if this representation were made, and even if 3PM acted in reliance upon it in entering **[**42]** into the agreement and promoting B/4 sales, this reliance was clearly not justifiable. As noted above, Yanover and Squillace requested during the contract negotiations that 3PM's quota requirement be reduced and that B/4 delete from the agreement the provision which permitted B/4 to terminate 3PM's dealership if 3PM failed to meet its quota. B/4 did reduce the quota requirement, but it unequivocally insisted upon retaining the power to terminate 3PM for failure to achieve a provision requested by Yanover, to the effect that 3PM would not be terminated if it was using its best efforts on behalf of B/4.

Knowing that B/4 insisted upon retaining the power to terminate 3PM for failure to achieve quota, 3PM executed the written agreement which conferred this power upon B/4. Even if a B/4 official **[**43]** made a statement to the effect that B/4 did not intend to exercise this power, it was clearly unreasonable for 3PM to rely upon this statement in light of the provisions which were included in the written agreement. *Cf.* *Kearns v. Ford Motor Co., 203 U.S.P.Q.*

---

[20] The parties' dealer agreement provided that "this Agreement and the rights and obligations of the parties hereto shall be governed by and construed in accordance with the laws of the State of California." *Id. at P 30*.

884 (E.D. Mich. 1978). Accordingly, 3PM has failed as a matter of law to establish the elements of the estoppel it has alleged, and defendants' motion for summary judgment as to Count V must be granted. [21]

[44]** COUNT VI

In Count VI, 3PM alleges that each of the four statements set forth above was made with the intent to induce 3PM to invest in a B/4 dealership, and that 3PM reasonably relied on them in entering into the dealer agreement. 3PM alleges that each of these representations was false, and was known to be false by B/4. [22] 3PM claims that it has suffered damages as a result of this alleged fraud.

HN12[] In order to sustain its claim of fraud, 3PM must establish the following elements:

1. Defendants made a false representation;

2. Defendants knew or believed that the representation was false;

3. Defendants intended to induce 3PM to act in reliance upon the misrepresentation;

4. 3PM justifiably relied upon the misrepresentation; **[**45]** and

5. 3PM suffered damages as a result.

Cormack v. American Underwriters Corp., 94 Mich.App. 379, 288 N.W.2d 634 (1979); *Crocker-Citizens National Bank v. Control Metals Corp., 566 F.2d 631 (9th Cir. 1977)* (applying California law). Examining each of the alleged misrepresentations in turn, the Court finds that 3PM has failed as a matter of law to make this showing as to each.

1. *B/4's Intent to Have Long-term Relationships with Dealers*

3PM has presented a great deal of evidence which indicates that even before it executed the dealer agreement, B/4 was **[*1366]** considering the possibility of opening a branch office in Detroit. Nevertheless, it is far from clear that the statement at issue here was false at the time it was made by B/4. As noted above, 3PM took the position during contract negotiations that the quotas included in the agreement were too high. On March 11, 1977, Donald Kirkwood [23] wrote a letter to Yanover and Squillace in which he stated:

> There is no benefit to Basic/Four Corporation, Walt Schramm or myself to assign unrealistic and unreachable quota objectives. It is our aim to have long term relationships with our dealers and, **[**46]** therefore, it is incumbent on us to be realistic in the demands we set forth. *Conversely, every marketing area in which we have plans to expand has an opportunity value and quota assignments must be made in accordance with these*. By establishing the goals at too low a marketing level we do not realize the potential that is expected, and we enter into a preferential quota restructing which is neither consistent with nor equitable to the other dealers in the program.

Plaintiff's Exhibit 20 (emphasis added). B/4 clearly did *not* represent that it intended to have long-term relationships with its dealers, no matter how poorly those dealers performed under the parties' agreement. Rather, B/4 consistently emphasized the importance of its dealers meeting the quota requirements.

---

[21] In addition, 3PM's arguments in relation to Counts V and VI are anomalous in one other respect. The misrepresentation which was allegedly made by B/4 was that 3PM would not be terminated if its sales of B/4 products were "progressing". It is undisputed, however, that 3PM's sales were *not* progressing at the time of its termination. On the contrary, its sales had diminished dramatically, from a six-month period in which it surpassed its quota requirement to a period in which it achieved less than 23% of its quota. Accordingly, B/4's actions in terminating 3PM were not inconsistent with the representation it allegedly made.

[22] The gravamen of 3PM's claim in this Count is that B/4 did not intend to have a long-term relationship with 3PM as a dealer. 3PM contends that B/4 hoped to open a company-owned branch office in Detroit, and that 3PM's dealership was terminated so that this could be accomplished.

[23] Kirkwood was B/4's Regional Manager of Dealerships.

Indeed, this latter point is corroborated by the events which occurred during the parties' contract negotiations. Assuming *arguendo* that this statement was false and **[**47]** that 3PM entered into the dealer agreement in reliance upon it, such reliance was plainly unreasonable. Despite its unhappiness with the provision of the agreement which permitted B/4 to terminate 3PM for failure to meet its quota, 3PM knowingly executed an agreement which included this provision. [24] Even if a B/4 official made a statement during contract negotiations to the effect that B/4 intended to have a "long term relationship", 3PM could therefore not have reasonably believed that it would not be terminated no matter how poor its sales were. Because there remains no material dispute of fact with respect to this essential element of 3PM's claim, the Court finds that this alleged misrepresentation is not actionable as a matter of law.

2. *B/4's Intent to Enforce Territorial Provisions in Agreement*

3PM has apparently abandoned its claim that **[**48]** this alleged statement was an actionable misrepresentation, as it has not addressed it at all in its briefs on these motions. In any event, 3PM has produced no evidence that any such statement was false, or that 3PM acted in reliance upon it. Accordingly, no material disputes of fact remain, and this portion of Count VI must be dismissed as well.

3. *3PM's Ability to Attain Quota Requirements*

In his March 11, 1977 letter to Yanover and Squillace, Kirkwood stated:

> It would appear at this writing that your only reluctance is the quota assignment. Let me state again unequivocally that I am convinced this is a fair assignment and one which you can accomplish.
>
> * * * *
>
> My personal observation is that you established in your own minds, because of a lack of experience with Basic/Four and the small business systems market in Detroit, sales objectives that were far too low, and, therefore, the numbers which we have proscribed (sic) appear to you to be unreachable. Obviously we do not agree, and if you will consider the point that your quota is our quota you must realize that we are confident that you can attain the goals and, in fact, surpass them.

Plaintiff's Exhibit **[**49]** 20. 3PM characterizes this statement as a misrepresentation that **[*1367]** it would be able to achieve its quota, and contends that it entered into the dealership agreement in reliance upon it.

For two reasons, the Court finds that this statement did not constitute actionable fraud as a matter of law. First, 3PM has produced no evidence whatsoever that this statement was false -- i.e. that the quotas set by B/4 were *not* attainable. In fact, all of the evidence which appears in this record is to the contrary. It is undisputed that the branch office which replaced 3PM in Detroit surpassed the quota requirements which B/4 had earlier imposed on 3PM. Indeed, even 3PM was able to meet its quota requirement in its first six-month period under the dealer agreement. It is clear beyond dispute that 3PM's failure to meet its quota requirement in the second six-month period was not caused by the setting of an excessively high quota, but was rather caused solely by 3PM's poor performance under the agreement. 3PM has raised no dispute of fact on this issue, and the Court must find as a matter of law that the quotas set by B/4 were not unrealistic. [25]

[50]** Second, Kirkwood's letter merely set forth his opinion regarding 3PM's ability to meet the quota requirements; it was not a statement of fact. Such a statement of opinion cannot provide the basis for an action for fraud. *Connellan v. Himelhoch, 506 F. Supp. 1290 (E.D. Mich. 1981)* (applying Michigan law); *Hauter v. Zogarts, 14 Cal.3d 104, 534 P.2d 377, 120 Cal. Rptr. 681 (1975)*.

4. *B/4's Intent Not to Terminate 3PM if Sales Were Progressing*

---

[24] The dealer agreement further provided that it could be terminated by either party, for any reason, at the end of its three-year duration. *Id. at P 5(B)*.

[25] 3PM has attempted to place into issue the method by which B/4 established quota requirements for each of its dealers. 3PM did not include in its complaint any claims along these lines, and its arguments in this regard are therefore irrelevant to any issue before the Court on these motions.

As noted above, there is a dispute of fact as to whether B/4 officials told 3PM that it would not be terminated as a dealer if its sales were progressing. This is an immaterial dispute, however; even if the statement were made, it did not constitute actionable fraud.

As an initial matter, it cannot be said that this "statement" was false. It is undisputed that 3PM's sales were *not* progressing when it was terminated; B/4's actions in terminating 3PM were therefore not inconsistent with its alleged earlier statements.

Furthermore, even if 3PM actually relied on this alleged statement in entering into the dealer agreement, its reliance was clearly unreasonable. As noted above, 3PM knowingly entered into an agreement under which **[**51]** it could be terminated if it failed to achieve its quota. 3PM could not have reasonably relied on an inconsistent oral statement, particularly after B/4 had expressly refused to include a similar provision in the agreement. 3PM has raised no material dispute of fact relating to this alleged statement, and the Court finds that it did not constitute fraud as a matter of law.

In sum, 3PM has failed as a matter of law to establish that any of the statements allegedly made by B/4 constituted an actionable fraud. Defendants' motion for summary judgment as to Count VI must therefore be granted.

D. Count VII

In Count VII, 3PM merely incorporates all of the allegations included in Counts I through VI. 3PM contends that all of the actions alleged in those counts constituted a conspiracy to restrain trade, in violation of *§ 1* of the Sherman Act. It is, at best, unclear what sort of antitrust violation is alleged in this count. [26] In any event, 3PM has presented no authority to the effect that this combination of alleged actions may be found to violate the Sherman Act, even though each individual action does not **[*1368]** violate the Act. Furthermore, the Court has found that each of the **[**52]** claims incorporated into Count VII is without merit as a matter of law. Defendants' motion for summary judgment as to Count VII is therefore granted.

E. CONCLUSION

3PM has not raised a material dispute of fact as to any of the claims set forth in its complaint. The Court therefore grants defendants' motion for summary judgment, and will dismiss all counts of 3PM's complaint.

IT IS SO ORDERED.

End of Document

[26] 3PM's characterization of this claim in its brief is equally cryptic: "Count VII is a composite of the previous six claims and relies upon their cumulative effect." *Id. at 3*.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

HN3[] **Summary Judgment, Motions for Summary Judgment**

In deciding a motion for summary judgment, the moving party bears the burden of proving that there are no genuine issues of fact, and doubts as to the existence of genuine issues of fact are to be resolved against the moving party. The non-moving party is entitled to have all inferences viewed in a light most favorable to the non-moving party.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN4[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The "per se" unreasonableness rule in tying cases will be applied when there is a showing of sufficient economic power to impose an appreciable restraint on free competition in the tied product (assuming all the time, of course, that a "not insubstantial" amount of interstate commerce is affected). The proper focus of concern in determining whether a seller has sufficient economic power is whether the seller has the power to raise prices, or impose other burdensome terms such as a tie-in, with respect to any appreciable number of buyers within the market. Even absent a showing of market dominance, the crucial economic power may be inferred from the tying product's desirability to consumers or from uniqueness in its attributes.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN5[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. When such "forcing" is present, competition on the merits in the market for the tied item is restrained and the Sherman Act is violated.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN6[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The court has condemned tying arrangements when the seller has some special ability -- usually called "market power" -- to force a purchaser to do something that he would not do in a competitive market. When "forcing" occurs, the court has found the tying arrangement to be unlawful.

Opinion

[*89]** **[*64]** Opinion and Class Action Order No. 126

I. *Background*

[3]** VANARTSDALEN, J.:

Class Action Order No. 63, entered February 8, 1983, provided a detailed schedule for pretrial proceedings. That order, as amended, provided that "dispositive motions" were to be filed on a specified date, which was to be after the conclusion of discovery, excluding deposition discovery of certain trial "fact" witnesses. All remaining defendants [1] **[**4]** have filed, either **[*65]** jointly or individually, motions for summary judgment and decertification

[1] Of the original fifteen defendants, Sun Oil Company and Getty Oil Company entered into agreements of settlement that have been approved by the court. The remaining thirteen defendants are: Amerada Hess, Amoco Oil Company, Atlantic Richfield Company, BP Oil, Inc., Chevron Oil Company, Cities Service, Exxon Corporation, Gulf Oil Corporation, Mobil Oil Corporation, Phillips Petroleum Company, Shell Oil Company, Texaco, Inc., and Union Oil Company.

of the class. Extensive briefs have been filed and two days of oral argument were held on the motions. [2] To be decided is whether this case shall proceed to trial, and, if so, whether as a class action.

Subsequent to the opinion of the court of appeals in *Bogosian v. Gulf Oil Corporation, 561 F.2d 434 (3d Cir. 1977)*, *cert. denied*, *434 U.S. 1086, 55 L. Ed. 2d 791, 98 S. Ct. 1280 (1978)*, I certified a nationwide class of plaintiffs composed of all gasoline service station dealers who, during the class period of May 11, 1967 through December 31, 1977, leased their respective gasoline service stations from any of the fifteen defendants. The plaintiffs seek treble damages under section 1 of the Sherman Act, and injunctive relief. In the pending motions, defendants, not surprisingly, raise numerous issues, including many of the same issues raised in the original **[**5]** motions to dismiss and in opposition to class certification. However, because discovery is virtually complete, and a substantially full record, through depositions, pleadings, and responses to discovery requests, is available for review, defendants contend that it is abundantly clear that (1) plaintiffs cannot present sufficient evidence at trial to defeat a motion for a directed verdict; and (2) that individual issues are so extensive as to preclude an adjudication on a class-wide basis. **[***90]**

The court of appeals has ruled in *In Re Japanese Electronic Products Antitrust Litigation, 723 F.2d 238, 257-259 (3d Cir. 1983)*, that ***HN1***[] a district court may rule upon summary judgment motions under Federal Rule of Civil Procedure 56 in protracted cases, based on the developed record where the record is complete, proper notice has been given, and the party resisting the motion has a fair opportunity to present facts essential to justify its position. Although plaintiffs have, to some extent, asserted that at trial they will have "more" or "different" evidence to present, plaintiffs do not contend that the record is not sufficiently established to rule on the motions. The plaintiffs do, of course, **[**6]** maintain that as to many of defendants' contentions, there are issues of material fact in dispute that must be determined by a jury at trial.

The essence of plaintiffs' claim is that the defendant oil company refiners as landowner-lessors in combination with each other impose illegal tie-in agreements upon the lessee service station dealers in the leasing of their respective service stations, by requiring the lessees to buy and sell only the gasoline supplied by their respective lessors.

A brief review of the thirteen-year procedural chronology of the case is in order. On December 19, 1973, I entered a memorandum opinion and order refusing to certify a class action on behalf of plaintiffs. *Bogosian v. Gulf Oil Corp., 62 F.R.D. 124 (E.D. Pa. 1973)*, *vacated*, *561 F.2d 434 (3d Cir. 1977)*, *cert. denied*, *434 U.S. 1086, 98 S. Ct. 1280, 55 L. Ed. 2d 791 (1978)*. Subsequently, on April 15, 1975, I granted the motions for summary judgment of defendants Exxon, Shell and Getty. [3] *Bogosian v. Gulf Oil Corp., 393 F. Supp. 1046 (E.D. Pa. 1975)*, *vacated*, *561 F.2d 434 (3d Cir. 1977)*, *cert. denied*, *434 U.S. 1086, 98 S. Ct. 1280, 55 L. Ed. 2d 791 (1978)*. On July 21, 1977, the **[**7]** Court of Appeals for the Third Circuit **[*66]** vacated and remanded both the denial of class certification and the grant of summary judgment. *Bogosian v. Gulf Oil Corp., 561 F.2d 434 (3d Cir. 1977)*, *cert. denied*, *434 U.S. 1086, 55 L. Ed. 2d 791, 98 S. Ct. 1280 (1978)*. I thereafter certified a class of "all present and all former gasoline service station lessee-dealers of any of the defendants who are or were lessee-dealers of any of the defendants at any time between May 11, 1967 and December 31, 1977" for damages, and injunctive relief for the present lessee-dealers. Class Action Order No. 1.

This is not the first time since the court of appeals' **[**8]** decision that defendants have sought summary judgment. On March 31, 1980 and again on April 12, 1983, I denied defendants' motions for partial summary judgment. Class Action Order Nos. 6 & 69. Both motions for partial summary judgment were asserted as to the plaintiffs' trademark claim. In the memorandum opinion accompanying Class Action Order No. 69, I did not foreclose the possibility of

---

[2] Approximately 1,250 pages of memoranda in support of the motions, responses and replies were submitted to the court, with approximately five times that amount submitted in various appendices. I reviewed all of the memoranda in support of the parties' positions and parsed the appendices when necessary. June 25, 1984 was devoted to oral argument on the motions for summary judgment; the following day for the decertification motions.

[3] Summary judgment was granted in favor of Shell and Getty against both Paul J. Bogosian and Louis J. Parisi, the individuals who filed the original actions. Summary judgment in favor of Exxon was granted as to Bogosian but not Parisi because as an Exxon lessee-dealer, Parisi had a possible vertical tying claim against Exxon. *Bogosian, 393 F. Supp. at 1053*.

summary disposition at a future date. I decided that on the existing state of the record genuine issues of material fact remained in dispute.

According to Plaintiffs' Preliminary Statement of Claim, filed pursuant to Class Action Order No. 63, as amended, the plaintiffs charge that:

> Defendants, acting in concert, have undertaken over a long period of time a course of consciously parallel conduct to restrain competition in the sale of gasoline to their respective lessee-dealers, and in particular, to eliminate or substantially restrain price competition in the sale of their gasoline to lessee-dealers.
>
> Plaintiffs contend that the concerted action of defendants, as hereinafter described, gives rise to five separate and distinct, but related claims, as follows, each of which constitutes a violation **[**9]** of Section 1 of the Sherman Act:
>
> *Claim No. 1*: Defendants, acting in concert, have adopted and implemented various restrictive provisions in their leases, dealer supply agreements and other related agreements which have had the purpose and/or effect of requiring each branded lessee-dealer of a defendant to purchase all its gasoline from that lessee-dealer's lessor.
>
> *Claim No. 2*: Defendants, acting in concert, and under the guise of protecting their respective trademarks, have imposed overbroad restrictions on the economic freedom of their branded lessee-dealers to purchase gasoline at wholesale and at competitive prices, and that, even if lawful in themselves, in concert, defendants' trademark practices have been used to accomplish an unlawful end -- division of the wholesale market for gasoline and elimination or at least substantial restraint of price competition in the sale of gasoline to branded lessee-dealers of defendants.
>
> *Claim No. 3*: Defendants, acting in concert, have refused to sell gasoline to the branded lessee-dealers of other defendants.
>
> *Claim No. 4*: Each defendant, by a constellation of provisions contained in their **[***91]** package of leases and related agreements, **[**10]** tied the purchase of gasoline from the lessor to such lease and its related agreements.
>
> *Claim No. 5*: Each defendant created a tying arrangement whereby the lessee-dealer was required to purchase exclusively from the lessor all gasoline pumped through lessor's trademarked dispensers regardless of the source or quality of the gasoline furnished by the lessor.
> While each of the above claims are separate, they are also related; each claim supports and is a part of Claims Nos. 1, 2 and 3.

Considering the multitude of materials submitted on behalf of and in opposition to the dispositive motions, I will present only the defendants' general positions on both the motions for summary judgment and the motions to decertify the class. [4]

[11]** **[*67]** The defendants' joint motion for summary judgment contends that summary judgment is appropriate as outlined in their brief, inter alia, for the following reasons:

> 1. Plaintiffs' trademark claims raise no genuine issue of fact and are insufficient as a matter of law because branded gasoline is a single product; and plaintiffs have failed to raise a triable issue of fact concerning the existence of an unlawful horizontal conspiracy to impose a tie-in because each defendant acted in its own economic self-interest.
> 2. Plaintiffs have failed to establish the fact of injury or impact resulting from defendants' trademark practices because gasoline is not homogenous; there is no element of causation; plaintiffs failed to take into account

---

[4] With both dispositive motions, the defendants jointly filed a motion addressing points common to all of the defendants. In addition, certain of the defendants filed individual motions emphasizing particular circumstances which such defendants contended would require summary disposition in their favor even if denied on behalf of all the defendants generally.

offsets; the use of Lundberg data is scientifically unsupportable and widely speculative; the margin requirements of the federal price controls preclude a finding of impact; the wholesale gasoline market was fully competitive; and plaintiffs' proposed damage formula involves an impermissible aggregate approach.

3. Plaintiffs have failed to demonstrate any genuine issue of material fact as to an alleged horizontal conspiracy to impose **[**12]** leasehold-gasoline tying arrangements because plaintiffs cannot demonstrate there is a tying arrangement at all; defendants lack the requisite economic power in the tying product, service station sites, to restrain competition in the tied product market, gasoline; the defendants' leases and supply agreements do not constitute unlawful tying arrangements; there is no direct or circumstantial evidence of a conspiracy; and plaintiffs have no theory of impact or damages to support their lease tie claims.

With regard to the motion for decertification, defendants' joint motion contends the class should be decertified for, inter alia, the following reasons:

1. Despite their representations to the Third Circuit, plaintiffs' method of proof is not class-wide in nature.
2. Plaintiffs' proposed proof of the alleged tie-in is not class-wide in nature.
3. Plaintiffs cannot establish market power on a class-wide basis.
4. Proof of fact of injury or impact would raise individual issues.
5. Plaintiffs do not have a legally permissible theory for proving the amount of damage to each class member on a common basis.

II. *Summary Judgment Standard*

Before addressing the merits of defendants' **[**13]** contentions, the appropriate standards of review need be set out.

HN2[] The summary judgment standard is well known: if the record reveals that "there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law," then the "judgment sought shall be rendered forthwith." *Fed. R. Civ. P. 56(c)*. ***HN3***[] In deciding a motion for summary judgment, the moving party bears the burden of proving that there are no genuine issues of fact, and doubts as to the existence of genuine issues of fact are to be resolved against the moving party. The non-moving party is entitled to have all inferences viewed in a light most favorable to the non-moving party. *Hollinger v. Wagner Mining Equipment Co., 667 F.2d 402, 405 (3d Cir. 1981)*. The Court of Appeals for the Third Circuit has characterized the grant of summary judgment as a "drastic remedy." *Tomalewski v. State Farm Life Ins. Co., 494 F.2d 882, 884 (3rd Cir. 1974)*.

To the foregoing standards must be added the Supreme Court's admonition that in complex antitrust cases involving charges of conspiracy, summary procedures should only be used "sparingly":

> We believe that summary procedures should **[**14]** be used sparingly in complex antitrust **[***92]** **[*68]** litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot. It is only when the witnesses are present and subject to cross-examination that their credibility and the weight to be given their testimony can be appraised. Trial by affidavit is no substitute for trial by jury which has so long been the hallmark of "even handed justice."

Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473, 7 L. Ed. 2d 458, 82 S. Ct. 486 (1962) (footnote omitted). The Court has recognized that *Poller* involves a "concededly rigorous standard." *Hospital Building Co. v. Trustees of REX Hospital, 425 U.S. 738, 746, 48 L. Ed. 2d 338, 96 S. Ct. 1848 (1976)*. While both the Supreme Court and the Third Circuit Court of Appeals have allowed summary disposition in antitrust cases, the above citations make plain that the district court must be absolutely certain there is no issue of material fact to be decided by the fact finder.

III. *Summary Judgment Motions*

Although Plaintiffs' Preliminary Statement of Claim lists five claims, the **[**15]** primary thrust of plaintiffs' action involves three claims: (1) the refusal to deal claim (Claim No. 3 of Plaintiffs' Preliminary Statement of Claim); (2) the trademark claim (Claim Nos. 2 & 5); and (3) the lease claim (Claim Nos. 1 & 4). I will deal first with the question of conspiracy, which is involved in all three claims, then each claim seriatim, and lastly the questions of impact or fact of injury (damage) and damages.

1. *Conspiracy Claims*

In order to recover against non-lessor defendants on any of their claims, plaintiffs must prove a "contract," "combination" or "conspiracy" in restraint of trade by the defendants. [5] Plaintiffs contend that they can present evidence through expert testimony and material obtained through discovery that exhibits consciously parallel behavior that is not in the defendants' economic self-interest, and, in addition, that defendants had an opportunity to conspire. Defendants maintain that as a matter of law they acted in their economic self-interest and that plaintiffs have, at most, evidence of nothing more than parallel behavior coupled with a possible opportunity to conspire.

[16]** As a preliminary matter, it must be noted that throughout the voluminous briefs defendants referred extensively to deposition testimony of plaintiffs' expert witnesses in support of their motions for decertification and summary judgment. Reference to such testimony in the appendices superficially appears to confirm at least some of the defendants' contentions. In each instance, however, plaintiffs' responsive briefs cite other testimony by the same or another expert witness that supports plaintiffs' position. Considering that the only testimony of record was basically cross-examination by the defendants, it is not surprising to find many apparently contradictory statements in the several thousand pages of deposition testimony, spanning weeks of intensive questioning. [6] Such apparent contradictions or inconsistencies in the testimony do not mandate summary disposition. Rather, they create a classic example of issues of fact for the jury.

[17]** **[*69]** Plaintiffs, not surprisingly, do not have direct evidence of a conspiracy. Plaintiffs do, however, have certain circumstantial evidence. Plaintiffs offer the testimony of expert witnesses that the defendants engaged in consciously parallel action which the experts assert was against each defendant's rational economic self-interest. Defendants maintain that as a matter of economic logic the conduct engaged in by all was in their own self-interest. As the record presently stands, I cannot say that there is no genuine issue of material fact on the conspiracy issue.

The isolated portions of the testimony of plaintiffs' experts that defendants cite fail to recognize that the issue whether certain conduct is or was against one's economic self-interest is a matter of perspective. When viewed with the alleged conspiracy in place, it may be that the defendants' actions were in **[***93]** their own economic interest as the market existed because of the alleged unlawful acts of defendants. Plaintiffs maintain, however, that the market must be viewed as it would have been absent defendants' alleged illegal conduct. Given that hypothetical market structure, would it have been in defendants' **[**18]** economic self-interest to act as they did? On the present state of the facts, I cannot say that there is no issue of fact in dispute concerning what would have been in defendants' self-interest.

The plaintiffs also have circumstantial evidence concerning the Petroleum Industry Marketing Attorneys' (PIMA) meetings which began in the middle 1950's. This evidence at least raises a possible inference concerning the opportunity to conspire. Defendants are correct that an opportunity to conspire alone is insufficient to establish a conspiracy. The PIMA materials, however, combined with plaintiffs' expert witness testimony regarding consciously parallel behavior against the defendants' economic self-interests creates genuine issues of fact as to whether there was an agreement, conspiracy, or combination among defendants in restraint of trade.

---

[5] In Class Action Order No. 103, I expressly ruled that individual vertical claims against lessor defendants had not been and would not be certified for class treatment. Because class representatives Bogosian and Parisi were, at one time, lessee-dealers of Exxon, Gulf and Arco, plaintiffs possibly retained individual vertical claims against those three defendants. However, I declined to certify a class against those three defendants. The result of Class Action Order No. 103 is that class representatives Bogosian and Parisi may be able to maintain individual vertical claims against their respective lessors. I have not decided as of this time whether such claims will be tried together with or separate from the class-action horizontal conspiracy claims, if tried at all.

[6] Nevertheless, I do not accept plaintiffs' argument that the court should not consider responses made by plaintiffs' experts in answer to defense counsels' questions that are unfavorable to plaintiffs' theories because it was only cross-examination.

2. *The Refusal to Deal Claim*

Recognizing that plaintiffs' primary claims involve the trademark and lease claims, suffice it to say that as the record stands there is a genuine issue of fact whether defendants' failure to solicit lessee-dealers of a competitor was a result of concerted action on behalf of defendants.

3. *The Trademark Claims*

[19]** Plaintiffs' two trademark claims are related but not dependent. First, plaintiffs claim that the use of the trademarks themselves is overbroad because defendants could protect their trademarks by less restrictive alternatives. Plaintiffs assert that an otherwise lawful use of trademarks to achieve the alleged unlawful end of supra competitive prices constitutes an antitrust violation. Second, plaintiffs claim defendants have created a tying arrangement by requiring lessee-dealers to purchase exclusively from the lessor all gasoline pumped through lessor's trademarked dispensers regardless of the source or quality of the gasoline.

Defendants, in their briefs and at oral argument, contend that summary judgment on the trademark claims is appropriate for any one of a number of reasons. Even if all of defendants' contentions were correct, it would affect only the second of plaintiffs' two trademark claims set out above. Plaintiffs would still be entitled to present their claim that defendants have used lawful trademarks to accomplish an illegal end, imposition of supra competitive prices on the market. Further, there are, at least on the present state of the record, genuine issues of **[**20]** fact as to two material issues: the "fungibility" issue and the "single product" question.

Plaintiffs concede that in order to prove their case on the trademark issue they must prove gasoline is fungible. Defendants cite and quote at least two of plaintiffs' expert witnesses who they maintain testified in deposition that all gasoline was not fungible. Plaintiffs counter with different quotations from the same witnesses **[*70]** in support of their contentions. Once again, such conflicting testimony creates a factual issue for resolution. In addition, there is a question concerning the definition of "fungibility." Defendants evidently contend that plaintiffs' experts have testified that all gas must be chemically identical to be fungible, while in other instances, such experts defined "fungible" to mean interchangeable in the perception of the consumers, *i.e.*, the consumer perceives no difference. It would be difficult for me to rule as a matter of law that all gasoline is or is not fungible, if the definition of the term as referred to by the experts is uncertain.

As a final note on fungibility, plaintiffs will offer extensive proof that the defendant oil companies themselves **[**21]** regularly exchange large quantities of gasoline, which gasoline is then resold under a different defendant's trademark. Plaintiffs evidently have proof that in certain instances such gasoline is sold to the public by the acquiring defendant without that defendant's additives or meeting its own specifications for gasoline sold under its trademark. If nothing else, such evidence at least raises a possible inference that the defendants either considered or acted as if all gasoline is fungible.

As to the trademark claims, another genuine issue of material fact exists on the present state of the record, concerning the relationship between the trademark itself and the trademarked product. If the trademark is not separate from the gasoline, then only a single product would be involved and there could logically be no tie-in arrangement. Plaintiffs contend under *Siegel v. Chicken Delight, Inc., 448 F.2d 43 (9th Cir. 1971)*, *cert. denied*, *405 U.S. 955, 92 S. Ct. 1172, 31 L. Ed. 2d 232 (1972)*, and its progeny that there are two distinct products here involved. Defendants rely on *Redd v. Shell Oil Co., 524 F.2d 1054 (10th Cir. 1975)*, *cert.* ***[***94]*** *denied*, *425 U.S. 912, 47 L. Ed. 2d 762,* ***[**22]*** *96 S. Ct. 1508 (1976)*, and its progeny to distinguish this case from *Siegel*. [7] In both Class Action Orders Nos. 6 & 69, I denied defendants' motion for summary judgment on the trademark issue without deciding whether the instant defendants' trademarks were separate products, preferring to wait for a fully developed record. While the present state of the record is quite developed, I have decided again to defer resolution of this crucial issue until the record is complete upon presentation of plaintiffs' case in chief at trial.

---

[7] I will not repeat the arguments of counsel or set out the cases here. For an analysis of the parties' respective positions and the applicable case law, *see* Class Action Orders Nos. 6 & 69.

It may very well be that this single product issue will be suitable for deciding as a matter of law. Nevertheless, given the particular circumstances present, it may be that there is at least one critical fact issue for the jury to decide, *i.e.*, are the defendants engaged in the business **[**23]** of operating a total service package or are they primarily engaged in the distribution of gasoline?

The final issue under plaintiffs' trademark claims currently existing on the state of the record involves plaintiffs' claim that there was a less restrictive alternative means than use of the trademark restrictions for enforcing defendants' quality control standards. Plaintiffs claim that defendants could have protected their respective gasoline products by setting specification standards for their products that a lessee-dealer would have to meet in order to sell gasoline under that defendant's trademark. The lessee-dealer would then be free to purchase the gasoline from any source and sell it under his lessor-defendant's trademark; provided the gasoline met the specifications established by the lessor. This claim by plaintiffs essentially involves a contention that defendants by agreement or concerted action have used their trademarks, which in themselves may be lawful, to achieve the unlawful result of imposing supra competitive prices on their lessee-dealers. On the current state of the facts, even if all defendants' points were correct, this issue would remain. Under the antitrust **[**24]** laws, even if all of the defendants had a valid trademark pursuant to which each defendant individually could legally require **[*71]** a lessee-dealer to purchase all his gasoline from the lessor trademark holder, the defendants could not jointly agree, combine or conspire to use their lawful trademarks to achieve an illegal purpose.

4. *The Lease Claim*

The gravamen of plaintiffs' lease claim is that the defendants, acting in concert, adopted and implemented a constellation of lease provisions that had the practical economic effect of requiring each lessee-dealer to purchase all of his gasoline from his lessor. One of defendants' primary contentions concerning the lease claim is that defendants as a matter of law do not possess the requisite economic power in the tying product, service station sites, to restrain competition in the allegedly tied product market, gasoline. [8] Application of the relevant case law to the current state of the record convinces me to the contrary.

[25]** The Supreme Court set out ***HN4***[] the appropriate standard for application of the "per se" unreasonableness rule in tying cases in *Northern Pacific Railway Company v. United States, 356 U.S. 1, 11, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958)*. In *Northern Pacific* the Court stated:

> We do not construe this general language as requiring anything more than sufficient economic power to impose an appreciable restraint on free competition in the tied product (assuming all the time, of course, that a "not insubstantial" amount of interstate commerce is affected).

Id. at 11. The "sufficient economic power" standard was further explained in *Fortner Enterprises, Inc. v. United States Steel Corp. (Fortner I), 394 U.S. 495, 22 L. Ed. 2d 495, 89 S. Ct. 1252 (1969)*, and *United States v. Loew's, Inc., 371 U.S. 38, 9 L. Ed. 2d 11, 83 S. Ct. 97 (1962)*. In *Fortner I*, the Court stated that "the proper focus of concern is whether the seller has the power to raise prices, or impose other burdensome terms such as a tie-in, with respect to any appreciable number of buyers within the market." *Fortner I, 394 U.S. at 504*. In *Loew's*, the Court opined: "Even absent a showing **[**26]** of market dominance, the crucial economic power may be inferred from the tying product's desirability to consumers or from uniqueness in its attributes." *Loew's, 371 U.S. at 45*.

Plaintiffs, during oral argument, stated that according to one of their sources of information the defendants at one time controlled **[***95]** in excess of eighty percent of the developed service station sites in the country. Surely, that data, if presented at trial, would permit a finding of sufficient economic power. Even absent such proof, there is support for a finding that defendants have sufficient economic power to appreciably restrain free competition. Under

[8] Defendants' other major contention is that the lease agreements do not tie the purchase of lessor's gasoline to the leasehold. As support, defendants cite plaintiffs' expert witness testimony. Plaintiffs, however, cite other testimony of those same expert witnesses in support of their position that the leases do have the practical effect alleged. Once again, the apparently conflicting testimony along with plaintiffs' other evidence reveals a record with genuine issues of fact regarding the practical economic effect of the defendants' leases.

the teaching of *Loew's*, the crucial economic power could be inferred from the combined total share of the national gasoline sales of all the defendants. That the defendants control a large share of the wholesale gasoline market provides them with an advantage in the market for retail service station outlets. Individuals seeking to operate a service station site as a lessee-dealer, might find it preferable and more desirable to become a lessee-dealer of a major oil company defendant rather than a lessee-dealer of an independent or a jobber. The "tying **[**27]** product's desirability to consumers" under *Loew's* involves obtaining a developed service station leasehold owned by a major oil company refiner.

Using the teaching of *Fortner I*, the defendants certainly have the power to impose burdensome terms such as a tie-in, with respect to an appreciable number of prospective lessee-dealers. This power comes in part from their status as major oil **[*72]** refiners as well as plaintiffs' evidence that many, if not all, of the defendants engaged their marketing departments in the study and acquisition of attractive service station sites. The potential power to restrain any appreciable number of prospective lessee-dealers by thirteen major oil companies, many of whom undertook market surveys of proposed service station sites, cannot be totally ignored.

5. *Impact or Fact of Damage*

It was obvious to anyone present at oral argument on the summary judgment motion that I have serious problems with a number of aspects of plaintiffs' case. These perceived problems are especially acute with regard to both proof of the fact of damage and amount of damage. Although I am presently ruling that the state of the record reveals issues of fact preventing **[**28]** summary judgment, if at trial some of these serious problems remain, plaintiffs may not be entitled to go to a jury.

Plaintiffs' expert witness on damages, Dr. Paul Davidson, has testified in deposition that in his opinion the lowest Dealer Tankwagon (DTW) price paid by any of the defendants' lessee-dealers would still have been higher than the price gasoline would have been sold in the freely competitive market as proposed by plaintiffs. On the present state of the record such testimony is sufficient to withstand summary disposition. Defendants have brought to light, however, the following: Dr. Davidson has evidently admitted that he has no way of proving the accuracy of his statement, and that implementation of plaintiffs' proposed competitive market would result in the charging of higher service-station rents, franchise fees and other offsets that plaintiffs' expert witness agrees he has not considered. Defendants contend that such additional charges to the lessee-dealers would have driven the cost of gasoline purchased in such a freely competitive market above the cost to lessee-dealers in the existing marketing system. The end result, according to defendants, is that plaintiffs **[**29]** cannot prove that they, as a class, suffered any damage.

I have not decided at this time whether an expert witness's unsupported opinion without more would be sufficient at trial for plaintiffs to go to the jury on the question of fact of damage. I have decided such testimony as disclosed by existing depositions is enough to withstand summary judgment. Plaintiffs are aware, however, that they must "prove" some injury to all members of the class to succeed at trial. *See* Bogosian, 561 F.2d at 454 ("so long as the common proof adequately demonstrates some damage to each individual"). The proper time to decide whether plaintiffs have "proved" injury or fact of damage sufficient to present a jury issue will come at trial, after plaintiffs have presented their case.

6. *Damages*

This aspect of plaintiffs' case troubles me the most. Putting aside for the moment defendants' contentions regarding plaintiffs' proposed calculation of damages, I have a basic problem with plaintiffs' apparent proposal to submit only a damage formula. Evidently, plaintiffs contemplate a bifurcated trial where they could prove liability and fact of damage separate from actual damages. If and when the jury **[**30]** found in plaintiffs' favor, the plaintiffs' damage formula would then be submitted to a jury in a separate proceeding. Plaintiffs would then determine how much gasoline each plaintiff class member purchased during the relevant period and inject the numbers into the damage formula.

Notwithstanding the court of appeals' suggestion that bifurcation may be appropriate, I have not as yet ruled on the propriety of such a procedure. If I decline to do so, plaintiffs must be prepared to prove a total damage figure as opposed to a "measure of damage" or "damage formula."

The defendants challenge, inter alia, plaintiffs' ability to prove damages because the **[***96]** data plaintiffs are using itself is suspect and it only covers twelve randomly selected cities for brief periods, all of which are after the 1974 federal price controls. Defendants further contend that plaintiffs **[*73]** could not possibly have suffered any damage during the period of mandatory price controls. Defendants also contend that the formula plaintiffs have chosen for calculating damages bears no relation to any supposed injury. Although defendants have raised a number of points that may have to be dealt with at trial if plaintiffs **[**31]** are to go to the jury, none of the contentions, individually or collectively, mandate summary judgment at this time. Plaintiffs, however, are on notice that at trial they must be able to "prove" damages in accordance with the applicable standards set out in antitrust cases.

IV. *Decertification Motions*

Although the defendants' individual and joint motions raise a number of issues concerning class decertification, I will deal only with the three most serious contentions.

1. *Class-wide Proof of Coercion*

In the *Bogosian* opinion the court of appeals held that "if plaintiffs are able to show that the lease agreements in use by all defendants have similar clauses which have the practical economic effect of precluding sale of other than the lessor's gasoline" then "the lease agreement itself conditions the sale of one product (here a lease) upon purchase of another" and "proof of coercion is not an element of plaintiffs' case." *561 F.2d at 452* (footnote omitted). Thus, under the law of the case, the vexatious questions of whether proof of coercion is a required element of a tie-in claim and, if so, whether such proof could be done on a class-wide basis or need be proved individually, **[**32]** were decided in plaintiffs' favor. [9] Defendants contend that the Supreme Court's recent decision in *Jefferson Parish Hospital Dist. No. 2 v. Hyde, 466 U.S. 2, 104 S. Ct. 1551, 80 L. Ed. 2d 2 (1984)*, overrules the court of appeals' holding in *Bogosian* that "proof of coercion is not a required element of plaintiffs' case." *561 F.2d at 452* (footnote omitted). Thus, the "coercion" issue that had been temporarily laid to rest in this case once again has reared its troublesome head.

In *Ungar v. Dunkin' Donuts of America, Inc., 531 F.2d 1211* (3d Cir.), *cert. denied*, *429 U.S. 823, 97 S. Ct. 74, 50 L. Ed. 2d 84 (1976)*, the court of appeals specifically rejected the district court's statement that "'the Supreme Court has not set forth a coercion requirement in the tying cases.' 68 F.R.D. at 98." *Ungar, 531 F.2d at 1218*. After discussing the relevant Supreme Court cases, the court unambiguously **[**33]** stated:

> In view of these teachings, we simply cannot accept the district court's view that the Supreme Court has not set forth a coercion requirement in tying cases.

Ungar, 531 F.2d at 1219. In the very next paragraph, the court reiterated its view that coercion was an essential element of a tying case when it discussed the logical question concerning proof of the element of coercion in a class action tying claim:

> Saying that coercion is an element of a tying claim is, of course, not the same thing as saying that it must be established on an individual basis, but we think the two statements are logically related. . . . In the context of a class action, the question is whether "individual coercion" must be established by each plaintiff.

Id.

The court of appeals went on to conclude in *Ungar*:

> The district court erred in rejecting the individual coercion doctrine under the circumstances of this case. Where, as here, plaintiff franchisees place no reliance on express contractual tie-ins, each, individually, must prove that his purchases were coerced as an element of establishing a prima facie case of illegal tying.

[9] Provided, of course, that plaintiffs could show the leases themselves had the practical economic effect alleged.

Id. at 1226. **[**34]**

As I read *Ungar*, it seems apparent that the court of appeals decided two things: coercion is a requirement or essential element **[*74]** of a tying claim, and in putative class action tie-in suits not based on express contractual provisions, the requirement of individual coercion prevents class treatment. Sixteen months after *Ungar*, however, the court of appeals in *Bogosian* stated:

> Relying upon *Ungar*, defendants appear to argue that coercion is a requirement of proof in all tying cases. Neither *Ungar* nor any other case has so held. . . .
> * * * *
>
> We therefore conclude that once a plaintiff proves that a defendant has conditioned the sale of one product upon the purchase of another there is no requirement that he prove that his purchase was coerced by the seller's requirement.

Bogosian, 561 F.2d at 449, 450. The court, per then Chief Judge Seitz, stated that the *Ungar* court held, *only on the facts present*, **[***97]** that coercion was a necessary element of a prima facie case and that each franchisee must prove coercion on an individual basis. However, the *Bogosian* court stated that in *Ungar* the court was "not articulating a separate **[**35]** legal element of proof" because "coercion is implicit when plaintiff proves the conditioning of sales of one product upon purchase of another." The *Bogosian* court read *Ungar* to have required coercion to be proven only because conditioning of the sale of one product upon purchase of another was not reflected in the agreement or in the operation of its terms. The *Bogosian* court went on to conclude that the "individual coercion doctrine" of *Ungar* had no application because *Ungar* expressly did not decide that doctrine's application to express contractual provisions, which may be the case in *Bogosian*.

The Supreme Court had the opportunity recently to consider per se tie-ins under the antitrust laws. In *Jefferson Parish*, the Court considered the validity of an exclusive contract between a hospital and a firm of anesthesiologists. In upholding the contract under the Sherman Act, the Court, after canvassing its seminal tie-in cases, stated:

> Our cases have concluded that the essential ***HN5***[] characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to force the buyer into the purchase of a tied product that **[**36]** the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms. When such "forcing" is present, competition on the merits in the market for the tied item is restrained and the Sherman Act is violated. . . .
>
> Accordingly, we have condemned ***HN6***[] tying arrangements when the seller has some special ability -- usually called "market power" -- to force a purchaser to do something that he would not do in a competitive market. . . . When "forcing" occurs, our cases have found the tying arrangement to be unlawful.

104 S. Ct. at 1558, 1559 (citations and footnotes omitted).

Absent the Supreme Court's holding in *Jefferson Parish*, I, of course, would have no cause to reconsider the court of appeals' binding decision in *Bogosian*. If, however, *Jefferson Parish* changed the law of tie-ins, I would be duty bound to follow such shift in the law. The determination of whether *Jefferson Parish* has changed the law in this circuit involves re-examination of both *Ungar* and *Bogosian*.

At the outset, there are certain parts of the two cases that are difficult to reconcile. In *Ungar*, Judge Aldisert, writing for the majority, plainly stated **[**37]** that "coercion is an element of a tying claim." *531 F.2d at 1219*. In *Bogosian*, then Chief Judge Seitz, writing for the majority, stated with equal clarity that "once a plaintiff proves that a defendant has conditioned the sale of one product upon purchase of another there is no [coercion] requirement." *561 F.2d at 450*. [10] Also, in *Bogosian* the court focused upon the *act of the seller*:

---

[10] The court in *Bogosian* attempted to distinguish *Ungar* by stating that *Ungar* had only decided on the facts present that coercion was a requirement in a tying case. Further, the facts of *Ungar* required coercion "only because the conditioning of the

> **[*75]** The antisocial conduct which the rule seeks to deter is the *act of the seller conditioning* sale of one product upon purchase of another. One can hardly imagine anything which would vitiate that purpose more than a requirement that a violation depends upon proof that the buyer bringing suit would not have purchased tied product but for the tie requirement. The issue is whether the seller acted in a certain way, not what the buyer's state of mind would have been absent the seller's action.

Bogosian, 561 F.2d at 450 (emphasis in original). In *Ungar*, however, the court had focused precisely on the *buyer's state of mind*:

> The practical effect of [the district court's decision] is to substitute proof of economic power for proof of tie-in. **[**38]** Proof of economic power, must perforce, focus on the seller; but proof of a tie-in must focus on the buyer because a voluntary purchase of two products is simply not a tie-in.

Ungar, 531 F.2d at 1224.

> It is only when the buyer's freedom to choose a given product is restricted that the tying doctrine comes into play: so long as "the buyer is free to take either product by itself there is no tying problem." [citation omitted] Moreover, we are aware of no principle that courts will not inquire into state of mind where that is relevant.

Id. at 1226. **[***98]**

[39]** Unfortunately, the *Jefferson Parish* opinion does not explicitly state whether coercion is a required element of a tying case. As I read the opinion, the Court's language is much more akin to the language in *Ungar* than that in *Bogosian* on the issue of coercion as a requirement in a tying case. Primary support for this position comes from the statement in *Jefferson Parish* that "the essential characteristic of an invalid tying arrangement lies in the seller's exploitation of its control over the tying product to *force* the buyer into the purchase of a tied product that the buyer *either did not want at all, or might have preferred to purchase elsewhere on different terms*." 104 S. Ct. at 1558 (emphasis added). Although the Court uses the terms "forcing" or "force" rather than "coerce" or "coercion," the concept is the same. The Court clearly focuses upon the buyer's state of mind, *i.e.*, a product "the buyer either did not want at all, or might have preferred to purchase elsewhere on different terms." *Id*. This focus on the buyer represents the same concern as the *Ungar* court expressed: "Proof of a tie-in must focus on the buyer because a voluntary purchase **[**40]** of two products is simply not a tie-in." Ungar, 531 F.2d at 1224.

There are at least two other portions of the *Jefferson Parish* opinion that focus on the buyer's state of mind:

> When, however, the seller does not have either the degree or the kind of market power that enables him to *force customers to purchase a second, unwanted product* in order to obtain the tying product, an antitrust violation can be established only by evidence of an unreasonable restraint on competition in the relevant market.

104 S. Ct. at 1561 (citations omitted) (emphasis added).

> The question remains whether this arrangement involves the use of market power to *force patients to buy services they would not otherwise purchase*.

104 S. Ct. at 1566 (emphasis added). There is no indication in *Jefferson Parish* that the "force" or "forcing" to which the Court constantly referred would be "implicit when plaintiff proves the conditioning of sales of one product upon purchase of another," as the court stated was the case **[*76]** with "leverage or coercion" in Bogosian. See 561 F.2d at 450.

---

sale of one product upon purchase of another was not reflected in an agreement or in the operation of its terms." 561 F.2d at 450. I have several problems with this. In *Ungar* the court did not speak of the coercion requirement in any limited sense. Further, it seems logically inconsistent to posit that coercion is only necessary when there is no express contractual tie but not when there is one. Rather, it seems consistent to posit that coercion is always a requirement but in certain cases it may be presumed or inferred because of the existence of an express contractual tie.

Based upon the above analysis, it is my view that *Jefferson Parish* **[**41]** may well have finally settled the question of whether proof of coercion or forcing is an element of a tying claim. If I decided as much, that part of the court of appeals' decision in *Bogosian* providing that proof of coercion is not an element of plaintiffs' case would no longer be controlling. There is, however, no need for me to make such a determination for even if I did, such a ruling alone would not require decertification of the class. As the court explicated in *Ungar*: "Saying that coercion is an element of a tying claim is, of course, not the same thing as saying that it must be established on an individual basis." *Ungar, 531 F.2d at 1219*.

In *Ungar*, the court expressly limited application of the "individual coercion doctrine" [11] to the situation where the plaintiffs placed no reliance on express contractual tie-ins. In *Bogosian*, the court noted that plaintiffs may be able to prove reliance on the lease agreements themselves, thus rendering the "individual coercion doctrine" of *Ungar* inapposite. Because *Jefferson Parish* did not involve a class action tying claim, the Court did not address how coercion could be proved (if it is indeed an element) **[**42]** in a class action. As such, there is no authority for me to disregard the court of appeals' prior rulings in this case. In other words, in order for me to decertify the class, as defendants contend, I must not only rule that *Jefferson Parish* requires proof of coercion in a tying claim, but also that such proof must always be done individually as to each class member, thus, effectively precluding litigation of tying claims by class action. Such a novel ruling in ***antitrust law*** must come from the court of appeals or the Supreme Court, not a trial court extrapolating a Supreme Court opinion dealing with a related issue. I will not, therefore, decertify the class for lack of class-wide proof of coercion.

[43]** 2. *Class-Wide Proof of Impact and Damages*

Although there are serious problems with both plaintiffs' proof of impact or fact of injury and damages, such problems do not warrant decertification of the class. I have already outlined these problems in discussing the motions for summary judgment and will not do so here. Defendants' arguments are primarily matters dealing with the substance **[***99]** or merits of plaintiffs' claims, and, therefore, do not require decertification. Suffice it to say that if the serious problems referred to earlier are not sufficiently addressed at trial, plaintiffs may not be entitled to have their case go to the jury.

V. *Conclusion*

After considering a veritable mountain of briefs and appendices and after two full days of oral argument, it is my conclusion, as stated in the foregoing opinion, that both the motions for summary judgment and decertification of the class must be denied. Considering everything involved in light of the court of appeals' and the Supreme Court's strict views upon the propriety of granting summary judgment in such cases as the present (and the court of appeals' prior opinion), I cannot say at this time that there are no genuine **[**44]** issues of material fact that can proceed on a class basis. As a final note, although I have reached the merits of both motions, Judge Weinfeld's cogent analysis in *United States v. Bethlehem Steel Corp., 157 F. Supp. 877, 879 (S.D.N.Y. 1958)*, albeit in a different context, rings true here as well:

> The Court does not reach the classical summary judgment question of whether there is a genuine issue as to any material fact. Upon further close study of the record, briefs and argument of counsel and considering the size of the industry, **[*77]** the vast amount of factual material to be analyzed and reviewed in reaching a decision, the multitude of problems in the case, the likely impact of a decision upon the [oil] industry in

---

[11] The court in *Ungar* used the district court's definition of the "individual coercion doctrine":

> "Although the individual coercion doctrine has nowhere been explicated in detail, it appears to require proof by the plaintiff of such events and circumstances surrounding the relationship between the franchisor and *each* franchisee as will demonstrate that the franchisee was *coerced* into agreeing to an anticompetitive tie, usually of equipment or supplies." 68 F.R.D. at 78.

Ungar, 531 F.2d at 1219.

> particular, and upon the economy of the country in general, and the admitted significance of a ruling under [Section I of the Sherman Act], I am persuaded that a decision after trial will be the more desirable procedure in the matter. It will serve to bring into sharper focus certain issues of importance which have been obscured by the voluminous affidavits with their statements, counterstatements and alternative positions, and the conflicting **[**45]** conclusions which the parties contend are to be drawn from the multitude of facts and statistics presented.

The case will proceed to trial as heretofore scheduled.

Indium Corp. of America v. Semi-Alloys, Inc.

United States District Court for the Northern District of New York

August 2, 1984

No. 82-CV-482

Reporter

591 F. Supp. 608 *; 1984 U.S. Dist. LEXIS 24610 **; 224 U.S.P.Q. (BNA) 404 ***; 1984-2 Trade Cas. (CCH) P66,182

INDIUM CORPORATION OF AMERICA, Plaintiff, v. SEMI-ALLOYS, INC., Defendant

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > General Overview

Patent Law > Infringement Actions > Defenses > General Overview

HN1[] **Conveyances, Licenses**

For a court to have jurisdiction over plaintiff's declaratory judgment claim, the complaint must allege conduct on the part of defendant that has given plaintiff a "well grounded fear" or "reasonable apprehension" of an impending infringement suit.

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > General Overview

HN2[] **Jurisdiction & Review, Subject Matter Jurisdiction**

An examination of the totality of the circumstances must be made to determine whether there is a controversy arising under the patent laws.

Civil Procedure > ... > Justiciability > Case & Controversy Requirements > General Overview

Patent Law > Jurisdiction & Review > Subject Matter Jurisdiction > General Overview

HN3[] **Justiciability, Case & Controversy Requirements**

In determining whether a case or controversy exists, it is improper to ignore the realities of business life.

Antitrust & Trade Law > Clayton Act > Claims

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Requirements

HN4[] **Clayton Act, Claims**

Antitrust standing limits the availability of a private right of action to any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws; *15 U.S.C.S. § 15*.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN5[] **Private Actions, Standing**

Allegations of injury will support standing only if they are not unduly speculative or duplicative of injuries sustained by others.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN6[] **Private Actions, Standing**

Plaintiff has undoubted standing to recover for injuries resulting from the antitrust violations of his "direct" competitor. Such standing is so clear that it is seldom challenged.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > General Overview

HN7[] **Bad Faith, Fraud & Nonuse, Fraud**

In order to state a "Walker-Process type-claim," plaintiff must at least be able to allege facts that indicate that defendant has enforced, or has sought to enforce, or has threatened to enforce its fraudulently obtained patents against plaintiff itself.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Patent Law > Infringement Actions > General Overview

Patent Law > Infringement Actions > Burdens of Proof

Patent Law > Infringement Actions > Defenses > General Overview

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Fraudulent Procurement of Patent

HN8[] **Intellectual Property, Bad Faith, Fraud & Nonuse**

Thus, "enforcement" in the context of claim that plaintiff was injured by the enforcement of a fraudulently procured patent, does not require proof that defendant expressly threatened plaintiff with an infringement suit.

Opinion

[*405] [*610]** NEAL P. McCURN, D.J.

MEMORANDUM-DECISION AND ORDER

Plaintiff Indium Corporation of America ("Indium") commenced this action in June of 1982, seeking a declaratory judgment of the invalidity, unenforceability, and non-infringement of three patents held by defendant Semi-Alloys, Inc. ("Semi-Alloys"); treble damages for alleged antitrust violations by Semi-Alloys; and damages based on a pendent state law claim of unfair competition. Upon motion by the defendant pursuant to *Rules 12(b)(1)* and *(6), Fed. R. Civ. P.*, this Court dismissed the original Complaint, but granted plaintiff leave to file an Amended Complaint. *Indium Corporation of America v.* ***[**2]*** *Semi-Alloys, Inc., 566 F. Supp. 1344 (N.D.N.Y. 1983)*, *as amended by Order dated July 21, 1983*. Plaintiff duly filed an Amended Complaint on August 22, 1983. Presently before the Court is defendant's motion to dismiss the Amended Complaint, which is based upon essentially the same grounds as its prior motion to dismiss the original Complaint.

For reasons set forth herein, the Court concludes that the Amended Complaint sufficiently remedies the defects of the original Complaint to withstand the instant motion to dismiss.

[*611] *Declaratory Judgment Jurisdiction*

The patents challenged herein are for an "Hermetic Sealing Cover for Container for a Semiconductor Device" (U.S. Patent 3,874,549), and a method for fabricating such cover (U.S. Patent 3,946,190) and such container (U.S. Patent 3,823,468). Defendant describes the patented device, generally, as a "tack-welded frame lid." *Amended Complaint* para. 9. In support of its claim that such patents are invalid and unenforceable, plaintiff alleges, in substance, (a) that Norman Hascoe (the president of Semi-Alloys and the patent applicant) and Semi-Alloys failed to reveal highly relevant prior art to the Patent **[**3]** Office; (b) that Semi-Alloys had sold thousands of the patented units more than a year prior to the filing dates of the patent applications; (c) that the subject matter claimed was obvious; and (d) that Hascoe was not the true and sole inventor, and had misrepresented himself as such to the Patent Office. *Amended Complaint* para. 86.

HN1[] For the Court to have jurisdiction over plaintiff's declaratory judgment claim, the Complaint must allege conduct on the part of Semi-Alloys that has given Indium a "well grounded fear" or "reasonable apprehension" of an impending infringement suit. *Indium v. Semi-Alloys at 1346*. Plaintiff's original Complaint contained allegations that the defendants had asserted the patents-in-suit against competitors in three previous lawsuits; that the defendant had sent a letter to the plaintiff offering to license Indium under the patents; and that the defendant had previously sued Indium for unfair competition, and had indicated in its pleading in that suit an awareness of Indium's "program to develop, manufacture and market packaging devices similar to plaintiff's COMBO(R)" (Semi-Alloy's tradename for the patented device). The alleged conduct was held "insufficient **[**4]** to create a 'reasonable apprehension' of an infringement action on the part of Indium," and plaintiff's declaratory judgment claims were consequently dismissed for lack of subject matter jurisdiction. *Id. at 1346-48*.

The Amended Complaint, however, places the previously alleged acts in a new light by alleging, in considerable detail, the business context in which such conduct occurred. Plaintiff alleges, for instance, that between 1975 and 1982 the defendant had threatened with infringement suit or had actually sued *every* other supplier of tack-welded frame lids, and had driven all from the market except its co-conspirator, Williams Gold Refining Company, Inc.

More specifically, plaintiff alleges that, in 1975, the relevant market for gold tin frames was supplied by a maximum of seven suppliers: Alpha Metals, Inc., Cominco American, Inc., Consolidated Refining Corp., Plessey, Inc., Williams Gold Refining Company, Inc., **[***406]** Semi-Alloys, Inc. and Indium Corporation of America. Only three of those firms other than Semi-Alloys supplied tack-welded frame lids to the relevant market: CRC, Plessey, and Williams Gold. Semi-Alloys allegedly threatened CRC with a patent infringement suit, **[**5]** and CRC gradually ceased supplying tack-welded frame lids, withdrawing from the market entirely in 1981. Semi-Alloys actually sued Plessey for infringement in 1975, which suit was resolved by a settlement, whereupon Plessey allegedly withdrew entirely from the relevant market. Also in 1975, Semi-Alloys brought an infringement suit against a customer of Williams Gold, which provoked a countersuit by Williams Gold challenging the validity of Semi-Alloys' patents. Those suits were settled in 1981 by an agreement whereby Williams Gold is licensed to supply tack-welded frame lids to the relevant market -- an agreement which plaintiff maintains is an illegal effort to preserve Semi-Alloys' fraudulently procured patents for enforcement.

Plaintiff also alleges that those suppliers that had not entered the submarket in tack-welded frame lids experienced decreased sales, *i.e.*, Cominco, Alpha Metals, Indium, and in one case withdrew from the relevant market entirely, *i.e.*, Alpha Metals.

Hence, when Indium entered the submarket in February of 1982, it became not simply one supplier among a field of competitors **[*612]** operating in that submarket; it became the only supplier of tack-welded **[**6]** frame lids that had not yet been sued, or threatened with suit, by Semi-Alloys for patent infringement.

Plaintiff also specifies in its Amended Complaint that the tack-welding equipment that it purchased in February of 1982 from CRC was the same equipment CRC had been using at the time it was threatened with a patent infringement suit by Semi-Alloys.

It was in this rather omnious business context that Semi-Alloys' conduct in early 1982 occurred. As described more fully in this Court's prior Decision, Semi-Alloys sent Indium a letter in February informing Indium that its patents were available for licensing; and it then sued Indium in March, alleging in its pleading that Indium "has embarked upon an expansion program to develop, manufacture and market high technology packaging devices similar to plaintiff's COMBO(R)."

The distinction between those declaratory judgment actions which present a case or controversy and those which are hypothetical is "necessarily one of degree." *Maryland Casualty Co. v. Pacific Coal Oil & Co., 312 U.S. 270, 273, 85 L. Ed. 826, 61 S. Ct. 510 (1941)*. In holding that no case or controversy was presented by plaintiff's original Complaint, this Court **[**7]** focused upon the allegations therein of particular acts by the plaintiff that were directed toward the defendant, and found that none of those acts constituted a threat of infringement. However, in its Amended Complaint, plaintiff develops the business context in which such acts occurred, and has thereby added weight to its contention that Semi-Alloys' conduct gave it a "reasonable apprehension" of an infringement suit. As a recently decided Federal Circuit case instructs, "an ***HN2***[] examination of the totality of the circumstances must be made to determine whether there is a controversy arising under the patent laws." *C.R. Bard, Inc. v. Schwartz, 716 F.2d 874 (Fed. Cir. 1983)*. Moreover, as this Court noted in its prior Decision, ***HN3***[] in determining whether a case or controversy exists, it is improper to "ignore the realities of business life." *Indium v. Semi-Alloys at 1347*, *quoting* *Muller v. Olin Mathieson Chemical Corp., 404 F.2d 501, 505 (2d Cir. 1968)*. After viewing the allegations in the Amended Complaint in light of these principles, the Court now concludes that the plaintiff herein has set forth sufficient grounds for contending that it had a "reasonable apprehension" of an **[**8]** infringement suit at the time it commenced this action, and that a case or controversy between these parties therefore exists. Defendant's motion to dismiss the declaratory judgment action for lack of subject matter jurisdiction is therefore denied.

The Antitrust Claims

Plaintiff maintains that in Count I of its Amended Complaint it has alleged at least three distinct violations of federal antitrust laws. First, it asserts a claim of a Sherman *§ 1* conspiracy, *15 U.S.C. § 1*, based on allegations of a conspiratorial settlement by the defendant and Williams Gold of their patent-related litigation, which settlement left intact patents that both knew were invalid. Second, plaintiff claims that the defendant violated Sherman *§ 2*, *15 U.S.C. § 2*, by attempting, and succeeding, in monopolizing the relevant market and submarket by enforcing patents that it had fraudulently procured and which were, consequently, invalid. Third, plaintiff claims that the defendant violated both Sherman *§ 1* and *§ 2* by instituting a series of suits, including its state court suit against Indium, with the intent to monopolize the relevant market.

In dismissing plaintiff's original Complaint, this **[**9]** Court pointed to a number of deficiencies, but emphasized its insufficiency in "alleging plaintiff's harm, and the relationship between the defendant's wrongdoing and the plaintiff's harm." *Indium v. Semi-Alloys at 1352*. Both of those **[***407]** elements were deemed crucial for the plaintiff to satisfy the requirement of "anti-trust ***HN4***[] standing," which limits the availability of a private right of action to **[*613]** "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws. . . ." Clayton Act § 4, *15 U.S.C. § 15*.

Although the Court expressed in that decision its doubt that plaintiff could overcome the inadequacies in its Complaint, *id*. at 1354, it nevertheless now concludes that plaintiff's Amended Complaint states a claim upon which relief can be granted.

First, with respect to the harm sustained, plaintiff now specifies several types of injury. For instance, plaintiff alleges that "Indium's existing business of making and selling separate frames . . . was radically decreased from a volume of several million units annually in 1978 to a small volume of about one hundred thousand units in 1982. . . ." *Amended Complaint* para. **[**10]** 62A. It estimates losses in that regard of "at least about $100,000." *Id*. P 64A. More prominently, plaintiff alleges that it lost profits of "at least about $12.8 million" that it could have earned through sales of tack-welded frame lids, had it not been restrained by Semi-Alloy's unlawful conduct. paras. 62B, 64B. Finally, plaintiff alleges as damages the legal expenses it incurred in conducting a defense in the state court action brought against it by Semi-Alloys. *Id*. PP 62C, 64C.

HN5[] Allegations of injury will support standing only if they are not unduly speculative or duplicative of injuries sustained by others. *Associated General Contractors of California, Inc. v. California State Council of Carpenters,* 459 U.S. 519, 103 S. Ct. 897, 911, 912, 74 L. Ed. 2d 723 (1983). Although the losses alleged by plaintiff preclude calculation with exactitude, particularly the loss of profits that the plaintiff allegedly *could have earned* had it not been excluded from the market in tack-welded frame lids, such losses are not more speculative than those typically encountered by the courts. *See* Zenith Radio Corp. v. Hazeltine Research, 395 U.S. 100, 23 L. Ed. 2d 129, 89 S. Ct. **[**11]** 1562 (1969); *see generally* P. Areeda, D. Turner, ***Antitrust Law*** para. 344b-c (1978), and "should be proveable under the liberal principles long recognized in antitrust cases." Crimpers Promotions, Inc. v. Home Box Office, Inc. 724 F.2d 290 (2d Cir. 1983). Nor does there appear to be a significant risk of duplicative recoveries here: Plaintiff seeks to recover the profits that *it* lost as a restrained competitor, based on estimates of its projected share of an unrestrained market. Without regard, at this juncture, to any other challenge to these bases for recovery, it is apparent that plaintiff is seeking damages that are distinct from, and do not duplicate, injuries that other potential antitrust plaintiffs might have sustained.

Turning next to the "conceptually more difficult question" of the relationship between the defendant's wrongdoing and the plaintiff's harm, Blue Shield of Virginia v. McCready, 457 U.S. 465, 476, 73 L. Ed. 2d 149, 102 S. Ct. 2540 (1982), it should be noted at the outset that, as plaintiff emphasizes, it was a direct competitor in the relevant market; hence "there are no vague links in a lengthy chain of causation. . . ." *Plaintiff's Brief* **[**12]** at 16. *Cf. Associated General* (Union lacked standing to sue for damages it sustained as a result of defendant's coercion of third persons). Indeed, as Areeda and Turner state, "[***HN6***[] a] plaintiff has undoubted standing to recover for injuries resulting from the antitrust violations of his 'direct' competitor. Such standing is so clear that it is seldom challenged. . . ." ***Antitrust Law*** para. 340a at 205.

Despite the above-mentioned general rule, plaintiff's original Complaint was found deficient in setting forth the causal link between the wrongdoing and plaintiff's injury because of the absence of two crucial elements. First, plaintiff failed to allege in its original Complaint that it "was ready, willing or able to produce and market the patented device." *Indium v. Semi Alloys* at 1352. Where, as here, the claim asserted is that the defendant unlawfully prevented the plaintiff from engaging in a business, particularized allegations of preparedness are essential. *See* Grip Pak, Inc. v. Illinois Tool Works, Inc., 694 F.2d 466, 475 (7th Cir. 1982). *See generally*, P. **[*614]** Areeda, D. Turner, ***Antitrust Law*** para. 335, 173-175. In its Amended Complaint, plaintiff **[**13]** amply corrects the previous deficiency by alleging, *inter alia*, that at least since 1976 it had the ability and incentive to expand from its existing business of manufacturing separate gold-tin frames into the related business of manufacturing tack-welded frame-lid combinations. *Amended Complaint* paras. 32-35. On this motion to dismiss, such allegations must be construed liberally and their truth must be assumed.

Second, plaintiff failed, in its original Complaint, to adequately allege that the defendant had "enforced" its allegedly fraudulently-obtained patents. In that regard, the Court expressed the view that ***HN7***[] in order to state a "*Walker-Process* type-claim," *see* Walker Process Equipment Inc. v. Food Machinery and Chemical Corp., 382 U.S. 172, 15 L. Ed. 2d 247, 86 S. Ct. 347 (1965), **[***408]**

> the plaintiff must at least be able to allege facts that indicate that the defendant has enforced, or has sought to enforce, or has threatened to enforce its fraudulently obtained patents against the plaintiff itself. . . .

Indium v. Semi-Alloys at 1352-53.

Before considering the allegations in the Amended Complaint, the Court is constrained to acknowledge, after **[**14]** consideration of the argument of counsel and further review of the relevant cases and authorities, that it would be a mistake to interpret "enforcement" too narrowly, and thereby limit the remedy of a *Walker Process* type antitrust action to competitors that have actually been sued or threatened with suit by the defendant. The concept must be broad enough to afford a remedy not only to those who actually produced an infringing article and were forced to stop by infringement suit or the threat thereof, but also to those who were ready, willing, and able to produce the article and would have done so but for the exercise of exclusionary power by the defendant. *See* SCM Corp. v. Xerox Corp., 645 F.2d 1195, 1206 (2d Cir. 1981) ("Where . . . the acquisition [of the patent] itself is unlawful, the subsequent exercise of the ordinarily lawful exclusionary power inherent in the patent would be a continuing wrong, *a continuing exclusion of potential competitors*.") (Emphasis added); *See also*, P. Areeda, D. Turner, ***Antitrust Law*** para. 335c at 174 ("It is as unlawful to prevent a person from engaging in a business as it is to drive him from it . . .

."). ***HN8***[] Thus, "enforcement" **[**15]** in the context of claim that the plaintiff was injured by the enforcement of a fraudulently procured patent, does not require proof that the defendant expressly threatened plaintiff with an infringement suit. *See* *Zenith Radio Corp. v. Hazeltine Research, Inc., supra, 395 U.S. 100*. (Despite absence in record of any specific instance of infringement suit against manufacturer's existing or potential distributors or dealers, evidence of the defendant's more general acts of patent enforcement enabled trial court to infer "that the necessary causal relationship between the pool's conduct and the claimed damages existed." *Id. at 125*).

In this instance, plaintiff alleges, inter alia, that it was a direct competitor among a relatively small field of suppliers to the relevant market; that the defendant fraudulently procured the patents in question, and then commenced a course of vigorously enforcing such patents; that between 1975 and 1982 the defendant had threatened with infringement suit or had actually sued every other supplier of tack-welded frame lids, driving all from the market except its co-conspirator; that since 1976, plaintiff was ready, willing, and able to produce tack-welded **[**16]** frame lids but was restrained by the defendant's vigorous course of enforcement; that after learning of grounds upon which the defendant's patents might be held invalid, plaintiff actually commenced producing tack-welded frame lids, whereupon defendant immediately contacted it regarding licensing, and filed suit against it in state court. The Court has already held, *supra*, that such allegations supply the grounds for a "reasonable apprehension" of an impending infringement suit, and therefore create a case or controversy within the Court's declaratory **[*615]** judgment jurisdiction. The Court now holds that such allegations are also sufficient to state that the plaintiff is a person "injured in his property by reason of anything forbidden in the antitrust laws. . . ." Clayton Act § 4, *15 U.S.C. § 15*.

Without belaboring the point, it is also clear that the Amended Complaint also supplies allegations that correct the other deficiencies identified in the original Complaint, *e.g.*, the relevant market, the scope of defendant's monopoly power.

Accordingly, defendant's motion to dismiss the Complaint pursuant to *Rule 12(b)(1)*, *(6)* is hereby denied. [1] In view of the length **[**17]** and complexity of the Amended Complaint (and also in view of the season) defendant is afforded 30 days from the date of entry to answer.

IT IS SO ORDERED.

End of Document

---

[1] On July 19, the Clerk's Office received from the plaintiff a motion for leave to file a Supplemental Amended Complaint and a request for expedited procedure. The Supplemental Amended Complaint would add allegations *that*, in May of this year, Semi-Alloys, through its Japanese agent, expressly threatened legal action under Semi-Alloy's corresponding patent against a Japanese would/be purchaser of Indium's tack-welded frame-lids.

Plaintiff's motion, which did not recite a return date, will be placed on the calendar for the Court's next regularly scheduled motion day, September 11, 1984, unless withdrawn of adjourned by mutual consent of the parties. It is assumed that any need for an "expedited procedure" is obviated by this Memorandum-Decision.

United States v. LTV Corp.

United States District Court for the District of Columbia

The standard of review of anti-trust consent decrees is established by § 2 of the Tunney Act, which provides: (e) Before entering any consent judgment proposed by the United States under § 2, the court shall determine that the entry of such judgment is in the public interest. For the purpose of such determination, the court may consider--(1) the competitive impact of such judgment, including termination of alleged violations, provisions for enforcement and modification, duration or relief sought, anticipated effects of alternative remedies actually considered, and any other considerations bearing upon the adequacy of such judgment; (2) the impact of entry of such judgment upon the public generally and individuals alleging specific injury from the violations set forth in the complaint including consideration of the public benefit, if any, to be derived from a determination of the issues at trial. 15 U.S.C.S. § 16(e).

HN2[] **Settlements, Antitrust Procedures & Penalties Act**

The public interest in a consent decree under the Tunney Act is to be determined in the context of the anti-trust laws whose fundamental premise is the protection and safeguarding of free competition. The effect on competition of the proposed settlement is of paramount importance in the determination which a federal district court is required to make. Other factors, however, enter into the calculus. Any remedy should be framed with a view to causing the least possible injury to interests of the general public and relevant private interests. The federal district court should consider the impact of the remedy in relation to other important public policies and avoid any unnecessary conflict or friction. It is not free, in making its public interest determination, to decide whether the settlement is the best that could have been reached or, if not, to substitute its own separate notions as to the proper remedy.

Civil Procedure > Judgments > Entry of Judgments > Consent Decrees

Antitrust & Trade Law > ... > Settlements > Consent Judgments > General Overview

HN3[] **Settlements, Consent Judgments**

A federal district court's function in reviewing anti-trust consent decrees is not to determine whether it is the best possible settlement that could have been obtained if the government had bargained a little harder. The federal district court is not settling the case. It is determining whether the settlement is within the reaches of the public interest. Basically, a federal district court must look at the overall picture not hypercritically, nor with a microscope, but with an artist's reducing glass. Although under statutory authority, a federal district court is required to scrutinize closely all consent decrees, it is not unmindful that the power to negotiate the terms of any particular consent decree is lodged in the executive branch.

Opinion by: **[*1]** PRATT

Opinion

MEMORANDUM OPINION

JOHN H. PRATT, UNITED STATES DISTRICT JUDGE

This matter is now before the court upon the parties' request that the proposed Final Judgment stipulated to by plaintiff and defendants [1] on March 21, 1984 be entered pursuant to the provisions of the Anti-Trust Procedures and Penalties Act (APPA), the so-called Tunney Act. *15 U.S.C. § 16(b)-(h) (1976).*

A. FACTUAL BACKGROUND

1. The Complaint

Together with the stipulation, plaintiff on March 21, 1984 filed a complaint against defendants asking for injunctive relief to prevent the carrying out of a purchase agreement executed by LTV and Republic on September 28, 1983. As a result of that agreement, Republic would be merged into LTV through an exchange of common and preferred stock valued at $ 770 million at the time of the announcement. **[*2]** *The complaint charges that this proposed acquisition may substantially lessen competition or tend to create a monopoly in violation of Section 7 of the Clayton Act. According to the complaint, it may do so in the following ways, among others:*

a. Competition in carbon and alloy hot rolled sheet and strip, carbon and alloy cold rolled sheet and strip and stainless cold rolled sheet and strip may be substantially lessened; and

b. Concentration in the manufacture and sale of carbon and alloy hot rolled sheet and strip, carbon and alloy cold rolled sheet and strip and stainless cold rolled sheet and strip will be substantially increased.

Complaint, p. 16.

The complaint seeks both a permanent injunction and a judgment that the proposed acquisition represents a violation of Section 7 of the Clayton Act. The complaint reflects the position of the Department of Justice (DOJ) on February 15, 1984 when it announced its opposition to the defendants' 4 1/2 month-old merger agreement. In its press statement of that day, the DOJ stated, in pertinent part:

After an exhaustive investigation of the proposed deal, we concluded that the merger would sharply increase concentration **[*3]** *in critical parts of the steel industry where only a few domestic companies compete. We concluded that the increased competition would be unacceptably high under the standards contained in the Departments' merger guidelines* [2] and under the applicable law. On that basis we have decided to oppose the merger.

At the same time, the DOJ indicated that it was willing to consider alternatives to the proposed merger.

2. The Events Occurring Between February 15, 1984 and March 21, 1984

Immediately following the February 15, 1984 announcement, the DOJ and its Anti-Trust Division came under sharp criticism from Commerce Secretary Malcolm Baldridge and United States Trade Representative William Brock. There followed a period of intense negotiation between the parties about alternative solutions to the problem. As reflected in the certifications filed pursuant to 15 U.S.C. § 16(g) of the APPA by LTV and Republic on April 2, 1984 and April 3, 1984, respectively, defendants met several times with the DOJ between March 5 and March 21, 1984 concerning the pending transaction and kept Mr. Baldridge **[*4]** *regularly informed as to the status of the discussions with the DOJ. They also discussed with Mr. Brock the matter of an alleged voluntary restraint agreement with the Japanese and the impact on domestic prices of Japanese imports and the European Economic Community Arrangement (EEC). All these conversations took place in face-to-face meetings or by telephone. Communications made solely by counsel of record with the Attorney General or with employees of the DOJ alone were not required to be reported. No written communications were reported. In response to demands from Cyclops*

---

[1] *The defendants are LTV Corporation, Jones & Laughlin Steel, Incorporated J & L Specialty Steels, Inc, and Republic Steel Corporation. Hereinafter "LTV" will refer to the first three defendants collectively. Jones & Laughlin Steel Incorporated (hereinafter J & L) and J & L Specialty Steels, Inc. (hereinafter J & L Stainless) are the wholly owned subsidiaries of LTV.*

[2] *The 1982 Merger Guidelines were superseded by Revised Merger Guidelines on June 14, 1984.*

Corporation and Wheeling-Pittsburgh Steel Corporation, participants in this proceeding, for "documents which the United States considered determinative in formulating" the proposed Final Judgment, the DOJ responded that it did not possess such determinative documents and hence could not produce them.

However characterized, the DOJ's treatment of this problem plainly was, and continues to be, a matter of extreme interest to other parts of the Executive Branch, and we can only speculate as to the nature and extent of any inter-departmental communications. [3] This deep concern underscores that the public interest **[*5]** *determination to be made by this court implicates not only the competitive impact of such a judgment upon those immediately concerned, but also broad considerations of public policy having to do with the impact of the entry of such a judgment upon the overall economy and the public generally.*

3. The Terms of the Proposed Final Judgment filed March 21, 1984
