We will not make a detailed attempt to harmonize our decision with the myriad factual situations appearing in other antitrust standing decisions. We have found few, if any, which contain a similar configuration **[*406]** of parties with comparable antitrust theories of recovery. And we see little need to decide whether to adopt a "competitor-only" or a "direct and foreseeable" standing test to measure the alleged injury, since such stock phrases add nothing to the analysis of the antitrust policies involved. Courts have recognized "the overriding importance of the facts of each case as opposed to the particular test employed," *Cromar v. Nuclear Materials & Equipment Corp., 543 F.2d 501, 508 n. 13 (3d Cir. 1976)*, **[**36]** so we have concentrated our efforts in that area. We do point to two groups of cases which support our analysis. The first holds that Section 2 prohibits the use of monopoly power by a vertically integrated company on one level of an industry to destroy competition on another level. *Poster Exchange, Inc. v.* ***[***459]*** *National Screen Service Corp., 431 F.2d 334, 339 (5th Cir. 1970)*; *FLM Collision Parts, Inc. v. Ford Motor Company, 406 F. Supp. 224, 245-46 (S.D.N.Y.1975)*, Aff'd in relevant part, *543 F.2d 1019, 1030 (2d Cir. 1976)*, Cert. denied, *429 U.S. 1097, 97 S. Ct. 1116, 51 L. Ed. 2d 545 (1977)*; *Southern Concrete Co. v. United States Steel Corp., 394 F. Supp. 362, 379-80 (N.D.Ga.1975)*, *Aff'd, 535 F.2d 313 (5th Cir. 1976)*; *United States v. United Shoe Machinery Corp., 110 F. Supp. 295, 346 (D.Mass.1953)*, Aff'd per curiam, *347 U.S. 521, 74 S. Ct. 699, 98 L. Ed. 910 (1954)*. The second grants standing to suppliers who are not in a direct contractual or competitive relationship with persons in the market which defendant attempted to monopolize. *Cromar, supra* ; *South Carolina Council of Milk Producers, Inc. v. Newton, 360 F.2d 414 (4th Cir. 1966)*; See also, Berger & Bernstein, Supra, 86 Yale **[**37]** L.J. at 866-70; L. Sullivan, Handbook of the Law of Antitrust 773 (1977). [6]

Westinghouse's motions to dismiss the Section 2 counterclaims are denied.

III. Lanham Act Counterclaim

Westinghouse's final motion seeks to dismiss Count III of Utah's counterclaim, which is based on Section 43(a) of the Lanham Trademark Act, *15 U.S.C. § 1125(a)*. In that count, Utah first repeats ten paragraphs from Count I, which is based on Section 1 of the Sherman Act. Nine of those allegations describe the parties and the structure of the nuclear power industry. The tenth alleges that Westinghouse has contracted with numerous utilities **[**38]** to provide them with nuclear power plants, fabricated fuel, and eighty million pounds of uranium on a long term basis. Utah then adds the allegations in Count III that Westinghouse made two false representations to its utility customers when it negotiated and formed those contracts. First, Westinghouse said "that it had the capability to carry through its commitments to make future deliveries of uranium to the utilities, when it knew or should have known that it had no such capability." Second, Westinghouse said "that it either owned sufficient uranium (or rights thereto) or would be able to obtain sufficient uranium to enable it to meet its commitments to make future deliveries of 80 million or more pounds to the utilities, when it owned only 15 million pounds of uranium (or rights thereto) and had no such ability." Utah claims that these misrepresentations damaged its business and profit position by diverting uranium sales from Utah to Westinghouse and by artificially depressing uranium prices.

---

[6] Sullivan states that "Injured competitor's suppliers, landlord, employees and stockholders . . . (might well be denied standing) unless under the particular circumstances they could show a more immediate relationship to the violation that is typically associated with such status," Quoted in Petroleum for Contractors, Inc. v. Mobil Oil Corp., 1978-2 Trade Cases P 62,352 (S.D.N.Y. Nov. 20, 1978).

In its motion to dismiss, Westinghouse argues that these allegations fall outside the scope of Section 43(a), which only prohibits misuse of a trademark or practices of a similar nature. **[**39]** Westinghouse relies chiefly on *Bernard Food Industries, Inc. v. Dietene Co., 415 F.2d 1279 (7th Cir. 1969)*. In that case, the Seventh Circuit quoted at length the "correct interpretation" of the Lanham Act contained in *Samson Crane Co. v. Union National Sales, Inc., 87 F. Supp. **[*407]** 218 (D.Mass.1949)*, Aff'd per curiam, *180 F.2d 896 (1st Cir. 1950)*, including a statement that Section 43(a) embraces "only such false descriptions or representations as are of substantially the same economic nature as those which involve infringement or other improper use of trademarks." According to Westinghouse's definition, this limiting phrase covers misrepresentations which create consumer confusion over the source or content of defendant's products, or which somehow enable defendant to capitalize on plaintiff's reputation. Westinghouse concludes that its alleged misrepresentations are not of this character, since they only involve Westinghouse's ability to supply its goods to its utility customers.

Utah concedes that it has not accused Westinghouse of trademark misuse or of making misrepresentations concerning the source, qualities or ingredients of its goods. But it argues that Section **[**40]** 43(a) has a much broader scope than Westinghouse urges, and covers any false representation which a defendant uses in connection with his goods or services. Utah claims that its interpretation is consistent with the plain language of the statute, with the statutory purposes, with Bernard Food, and with the weight of judicial authority. And it contends that its counterclaim falls clearly within this interpretation of the Act.

HN8[] Section 43(a) provides, in pertinent part, that

> Any person who shall . . . use in connection with any goods or services . . . any false description or representation . . . and shall cause such goods or services to enter into commerce . . . shall **[***460]** be liable to a civil action by any person . . . who believes that he is or is likely to be damaged by the use of any such false description or representation.

HN9[] Despite its broad language and arguably catholic scope, courts have agreed that this section does not have unlimited application to all deceptive trade practices or to all claims of unfair competition. *Alfred Dunhill Ltd. v. Interstate Cigar Co., Inc., 499 F.2d 232, 237 (2d Cir. 1974)*; *Alberto-Culver Co. v. Gillette Co., 408 F. Supp. 1160, 1162 **[**41]** (N.D.Ill. 1976)*. Instead, it "is directed only against a certain kind of advertising false representation of goods or service in interstate commerce." 1 Callman, Unfair Competition, Trademarks & Monopolies, § 18.2(b) at 620-21 (3d ed. 1967).

In attempting to define what kinds of false advertising are within the Act, courts have established very few firm guidelines. One limitation which has garnered a strong following is the Bernard Food holding that § 43(a) does not apply to a defendant's misrepresentation about a plaintiff's products. The only other clear trend which emerges from the cases is that the Act covers something more than just trademark misuse and something less than all forms of unfair competition. [7]

[42]** We recently described the core concern of the Lanham Act in the following terms:

> In a typical Lanham Act action, a newcomer's product or trademark is confusingly similar to that of a well-established competitor. The confusing similarity supports the conclusion that the newcomer is attempting to divert prospective purchasers and "cash in' on its competitor's well-developed reputation in the market. . . . In these cases there is a direct diversion of trade from plaintiff to defendant. Diversion is also likely **[*408]** where

[7] We agree with Utah that the Seventh Circuit's Bernard Food decision, although quoting the Samson Crane limitations on the Act, was not intended to freeze the statute into so rigid a mold as Westinghouse contends. The quotation is followed by a statement recognizing the Act's applicability to "false or deceitful representations which the manufacturer or merchant makes about his own goods or services" and by a citation to *L'Aiglon Apparel v. Lana Lobell, Inc., 214 F.2d 649 (3d Cir. 1954)*, where the court rejected the argument that the Act should be limited to trademark misuse or "palming off" of one's goods as those of another. The quotation is best viewed as support for the more narrow holding of Bernard Food, namely, that the Act does not embrace representations made by a defendant about a Plaintiff's product. See *Skil Corp. v. Rockwell International Corp., 375 F. Supp. 777, 782-86 (N.D.Ill.1973)*.

> defendants use a mark to describe simulated goods in a manner that suggests they are original goods produced by the plaintiff. . . . In both cases the consumer is deceived, either that defendant's product is more reputable than it is, or that simulated goods are the real thing. That deception influences purchasing decisions, and reduces plaintiff's sales volume.

Chromium Industries, Inc. v. Mirror Polishing & Plating Co., 448 F. Supp. 544, 554-55 (N.D.Ill.1978).

However, courts have gradually expanded upon this theme, extending recognition to economic variations in which one or more characteristics of the basic pattern have been diluted or **[**43]** even absent. Thus, the misrepresentations need not be used in an attempt to "palm off" defendant's product as plaintiff's, and need not involve a trademark. *Alberto-Culver Co. v. Gillette Co., 408 F. Supp. 1160, 1163 (N.D.Ill.1976)*. ***HN10***[] The statute is not limited to false advertising which compares a defendant's product to a plaintiff's. Id. It proscribes misrepresentations about the quality of defendant's own goods, "even where the misrepresentations do not tend to confuse (his) goods with those of a competitor or otherwise misstate the origin of the goods." *Universal Athletic Sales Co. v. American Gym, Recreational & Athletic Equipment Corp., 397 F. Supp. 1063, 1072 (W.D.Pa.1975)*. ***HN11***[] It reaches a seller who exaggerates the scope of his patents, thereby creating a false impression that it is the exclusive source of a product, even though there is no misbranding or mislabelling of the article and no misrepresentation of its inherent attributes. *Chromium Industries, supra.* Finally, ***HN12***[] § 43(a) covers a publisher of a controlled circulation magazine who falsely inflates the size of his audience and thereby causes reduced advertising revenues to a competing publisher, even though the misrepresentations **[**44]** did not refer in any way to plaintiff's magazine or otherwise expressly take aim at an identifiable competitor. *Ames Publishing Co. v. Walker-Davis Publications, Inc., 372 F. Supp. 1 (E.D.Pa.1974)*.

These decisions implicitly or explicitly recognize that the Act proscribes sales diversions caused by false advertising of **[***461]** defendant's goods, and that those diversions can be equally harmful to competitors regardless of whether the misrepresentations falsely describe defendant's products in isolation or falsely connect its products with plaintiff's products. In either case, there is a "false representation used in connection with goods or services," as required by § 43(a).

We see no principled basis for excluding Utah's counterclaim from the logical thrust of these decisions. The "good" at issue here is uranium, a naturally occurring element. Although uranium can be converted and enriched to increase the concentration and facilitate the use of certain fissionable isotopes, it is hardly possible to misrepresent its inherent ingredients or qualities. After the required transformations are performed, it is the same no matter who produces or sells it. It cannot be misbranded, mislabelled, **[**45]** patented, or trademarked. The primary, if not the sole, difference between competitors' products are 1) price and 2) the certainty and mode of delivery. Consequently, a construction of the Lanham Act which limited its applicability to a) trademark misuse or conduct of a similar nature or b) misrepresentations concerning the inherent qualities of uranium or c) other misrepresentations which trade on the goodwill of competitors, would effectively insulate the uranium market from the protections of the Lanham Act. We believe that ***HN13***[] the Act should be read, at minimum, to protect competitors from misrepresentations which a defendant makes about its own products and which relate to the principal bases of competition among sellers. [8] These types of misrepresentations **[*409]** are likely to have direct and major impact in diverting sales to the defendants, which is the same effect as that which is produced by trademark misuses and by related conduct which trades on the goodwill of a competitor. By alleging that Westinghouse has misrepresented its uranium supply capability to its utility customers, Utah has framed an actionable misrepresentation within the

---

[8] On this basis, our decision can be harmonized with such divergent cases as *Ames Publishing, supra*, where the court applied § 43(a) to misrepresentations concerning magazine circulation, which was the primary basis of competition among controlled circulation publishers, and with *Fur Information and Fashion Council, Inc. v. E. F. Timme & Son, Inc., 501 F.2d 1048 (2d Cir. 1974)*, where the court refused to apply § 43(a) to misrepresentations about the environmental virtues of imitation fur garments, since the inherent qualities of the goods provided the major basis for consumer choice. Because of our limited holding, we find it unnecessary to consider Utah's argument that § 43(a) covers Any misrepresentation by a defendant of his merchandise where that merchandise moves in interstate commerce.

scope of § 43(a) of the Lanham **[**46]** Act. Westinghouse's motion to dismiss Count III of Utah's counterclaim is denied.

Westinghouse's motions to dismiss the counterclaims filed by defendants Atlas Corporation, Anaconda Company, Kerr-McGee Corporation, **[**47]** Homestake Mining Company, Western Nuclear, Inc., Getty Oil Company, and Utah International, Inc. are denied.

HN4[] **Antitrust & Trade Law, Sherman Act**

The summary judgment rule in an antitrust case is that the summary procedures are to be used sparingly. Thus where the record establishes a per se violation of the anti-trust laws, summary judgment is proper, but, in other situations, where the impact of the alleged violation is too little known, and the bare bones of the paper record are insufficient to pass judgment thereon, a trial should be had. Both factual inferences and the record as a whole must be viewed in the light most favorable to the party opposing summary judgment. And summary procedures should be used sparingly in complex anti-trust litigation where motive and intent play leading roles, or the proof is in the hands of the movant.

HN5[] **Antitrust & Trade Law, Sherman Act**

The Sherman Act encompasses far more than restraints on trade that are motivated by a desire to limit interstate commerce or that have their sole impact on interstate commerce. Wholly local business restraints can produce the effects condemned by the Sherman Act. As long as the restraint in question "substantially and adversely affects interstate commerce," the interstate commerce nexus required for Sherman Act coverage is established. If it is interstate commerce that feels the pinch, it does not matter how local the operation which applies the squeeze. It is sufficient that the allegations in the complaint, if proved, could show that the conspiracy resulted in unreasonable burdens on the free and uninterrupted flow of commerce.

Opinion

[*1318] This is an antitrust action which is alleged to have arisen under *Section 1* of the Sherman Act, *15 U.S.C. § 1*. The trial court decided the case after a pretrial conference and after hearing evidence on a limited aspect of the case, namely, whether or not there was sufficient impact on interstate commerce to justify **[**2]** the assumption of jurisdiction on its part. The court held, following the hearing, that there was insufficient evidence to support a finding that the acts of the defendants had a substantial effect on interstate commerce. It sustained the defendants' motions for summary judgment which had been filed.

[*1319] The testimony given was that of the plaintiff Gosting, the president of Mac Adjustment, Inc. (Mac), alone and it pertained to the extent to which his business was in commerce. Apparently the trial court concluded that his activities were not sufficiently extensive to be regarded as being substantially involved in commerce.

The plaintiffs' theory of the case is set forth in a general way in the complaint. It alleged that the defendants conspired to eliminate Mac's business as an independent insurance adjuster. The General Adjustment Bureau, Inc. (GAB), one of the defendants, operates an insurance adjustment business throughout the United States. Property Loss Research Bureau, the other defendant, is an unincorporated association of some 100 insurance companies. One of the association's members was Iowa Mutual Insurance Company.

The allegation in the complaint is that **[**3]** the defendants acted in concert to coerce insurance companies, including Iowa Mutual, not to use Mac as an independent adjuster. It is alleged that this coercion was successful as a result of the issuance of false statements by GAB in which it was claimed that the plaintiff was too generous in adjusting losses, in particular the losses from a storm in Tonwaka, Oklahoma, in November of 1973. It is alleged that these statements were made to Iowa Mutual, Southwest Adjustment Company (a company which provided about 75% of Mac's business), various insurance agents, and some individual insureds. Most of the storm losses were covered by Iowa Mutual. The defendant GAB was engaged to audit and readjust plaintiffs' previous adjustments of these losses. The conspiracy to destroy the plaintiffs' business allegedly resulted from a series of meetings which took place in relationship to this auditing procedure.

* Of the United States Court of Customs and Patent Appeals, sitting by designation.

Mac Adjustment was started in 1972, after GAB terminated Mr. Gosting's employment. It had prospered until late 1973, and thereafter the business declined, until by 1976 there was almost nothing remaining. Another allegation in the complaint was that plaintiffs were deprived of a listing **[**4]** in a trade publication which would have served to notify the trade that Gosting was in business. GAB refused to verify Gosting's having been employed as a GAB adjuster from 1963 to 1972.

Also, GAB and the insurance companies allegedly agreed to uniform practices and procedures to be used in the adjustment and settlement of claims. These standards and the "quality control checks" GAB performed on other adjusters allegedly gave GAB an unfair advantage.

Due to the fact that the complaint was vague as to the extent to which Mac was engaged in interstate commerce, the trial court, following a pretrial conference, decided that since it was a jurisdictional matter, evidence should be offered at a special hearing on this question.

On September 15, 1977, the testimony of Mr. Gosting was given before the trial court in Oklahoma City. The testimony generally addressed the question whether the plaintiffs were actually engaged in interstate commerce. He testified that he represented 180 insurance companies. A large number of these representations were obtained through Southwest Adjustment with which he had a business connection, and from this connection investigations were apparently referred **[**5]** to Mac. Gosting testified that a vast majority of these companies were in states other than Oklahoma where his office was located.

One gets the impression from reading the testimony that most of Mac's investigations were conducted inside Oklahoma, although some of the work was indeed outside of Oklahoma, but Mac did have this contractual agreement for adjustment services with Southwest Adjustment Company. Gosting spoke of representing a number of insurance companies who had offices outside of Oklahoma which required him to go to their home offices from time to time. Mac had written contracts with adjusting companies from other states, but there were few written contracts with insurance companies, if any. These tended to be oral.

Gosting testified that his company agreed with the insurance companies it represented to go anywhere in the world for adjustment purposes, but he quickly admitted that it would not be feasible for him to pursue an **[*1320]** investigation in Australia and that it would be better to have a local agent do it.

In answers to interrogatories it was shown that Mac competed with adjusting firms in Oklahoma, but Mac could not point to any firms outside of **[**6]** Oklahoma with which it had competed. The only state in which Gosting was licensed as an insurance adjuster was Oklahoma, but there were some kinds of arrangements which allowed him to function in other states even though he did not have a license issued from other states. He could do this on the basis of having the license in Oklahoma. He persisted, however, in contending that it was necessary to travel across state lines in some of his investigations of storms, fires, and automobile losses. However, a review of the exhibits shows that only 18 adjustments, at the most out of 1400 or 1500 required Gosting or Mac's employees to travel outside of Oklahoma. The out-of-state assignments, for the most part, were trips to neighboring Kansas. Additional cases involved telephone calls for mail across state lines as commerce. Some of the assignments completed in Oklahoma involved adjustments on shipments which had come from outside Oklahoma and had come to rest there.

The appellants, Mac and Gosting, maintain that the adjustment and settlement of claims is an integral part of the insurance business. Accordingly, since many insurance companies conduct their business in commerce by soliciting **[**7]** policies, collecting premiums, and paying claims outside of Oklahoma and in other states, the adjustments made by Mac must be regarded as an integral part of the interstate insurance business.

It is not too simple or easy to link the insurance business with interstate commerce. For a long time, the position that the Supreme Court took was that the insurance business was not interstate commerce. However, in 1944, it decided *United States v. South-Eastern Underwriters Ass'n, 322 U.S. 533, 64 S. Ct. 1162, 88 L. Ed. 1440 (1944)*, which held that the insurance business, although not necessarily in interstate commerce, could be engaged in this kind of commerce. There the charge was that there existed a conspiracy to fix insurance rates in a number of states, and the simple question was whether the Sherman Act prohibited this. The district court had held that the Sherman Act did not apply since the insurance business did not constitute trade or commerce within the meaning of the *commerce clause*. The Supreme Court had to decide this exact question. The price-fixing activities affected commerce because premiums were collected, policies were transmitted, and claims were paid **[**8]** throughout the United States. Also, a nationwide business was not deprived of its interstate character merely because it was built on local sales contracts with policyholders. So, the thrust of the Supreme Court's decision was that under the evidence before it, South-Eastern Underwriters Ass'n was engaged in commerce and was subject to the Sherman Act. It is not, however, an across-the-board decision and therefore had a tendency to be restrictive.

In any event, Congress enacted the so-called ***HN1***[] McCarran-Ferguson Act, *15 U.S.C. § 1011 Et seq.*, the purpose of which was to guarantee that states could continue to regulate the insurance rates. This measure also provided that the Sherman Act applied to the business of insurance only to the extent that such business was not regulated by state law. The Act also provided an exception, whereby the Sherman Act continued to apply to an agreement to boycott, coerce or intimidate in relation to the business of insurance. See *15 U.S.C. § 1013(b)*. It is this boycott aspect and coercion feature that the plaintiffs rely on and emphasize. Mac contends that the defendants-appellees used fraud and deceit **[**9]** in order to destroy its business.

The main injury complained of was that Mac's business gradually diminished as a result of GAB communicating to an insurance trade association, companies, and agents that Mac's adjustment work was incompetent and dishonest and that Mac oversettled claims or (in other words) paid too much.

The essence of the trial court's decision was that the plaintiffs were not in the business of insurance as that is defined by the Supreme Court, and so the consequence **[*1321]** would be that the restraints were not beyond the reach of the Sherman Act because of any exemption under the McCarran-Ferguson Act. This particular ruling has not been appealed.

The ruling that the plaintiffs are not in the business of insurance for the purpose of the McCarran-Ferguson Act creates somewhat of a difficulty because, as a consequence, they must establish that they are in the business of insurance in order to satisfy the interstate commerce requirement of the Sherman Act. It is, of course, possible to argue that the insurance adjustment business is independent of the Supreme Court's decision in *South-Eastern Underwriters Ass'n, supra*, that the McCarran-Ferguson **[**10]** Act does not apply and that Mac was engaged in interstate commerce, but there is a question as to whether anything is gained by taking this tack because you cannot get away from the fact that this is, if not the insurance business, so closely related to it that it is not distinguishable from it. So, the commerce element is more likely present by the treating of insurance as commerce.

The difficulty which we find with the judgment is that there is not any evidence to review to speak of because the only testimony that was offered was that of Mr. Gosting in a special hearing that grew out of the filing of the motions for summary judgment. The purpose of the hearing in the trial court was to determine whether or not the plaintiffs were engaged in interstate commerce and whether the activity had a substantial impact or effect on the commerce. No doubt the ultimate question is whether this was an atmosphere of commerce so that the alleged restraints or obstructions on Mac's business created a sufficient impact on commerce. It is rendered all the more complex by the fact that the trial court appeared to be requiring a great impact on commerce, one that this small company was incapable of **[**11]** producing. Certainly the effect on commerce cannot be tremendous in a total social sense if the company which is the object of the conspiracy is small. Nevertheless, ***HN2***[] if the company is engaged in interstate commerce, it is entitled to the protection of the ***antitrust law***, and particularly so if the conspiracy succeeded in putting it out of business. See, e. g., *Hospital Building Co. v. Trustees of Rex Hospital, 425 U.S. 738, 745-46, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976)*; *DeVoto v. Pacific Fidelity Life Insurance Co., 516 F.2d 1* (9th Cir.), Cert. denied, *423 U.S. 894, 96 S. Ct. 194, 46 L. Ed. 2d 126 (1975)*; Yellow Cab Co. v. Cab Employers, Automotive & Warehousemen, Local # 881, *457 F.2d 1032 (9th Cir. 1972)*.

The testimony of Mr. Gosting is not satisfactory because it is limited to the kinds of activities in which he engaged how frequently he traveled to other states, why he did so, what he did in these other states and so on, but it did not deal at all with the injuries that were allegedly inflicted by the defendants and so that facet of effect upon commerce was not explored at all.

A further problem is that the judgment **[**12]** of the district court contained no findings of fact. It merely concludes in most general terms that there was not a substantial impact on commerce. The wording of that final decree is such that one gets the impression that it had to be an impediment of a very major kind in order for the plaintiffs to prove a case. Actually if the plaintiffs were able to establish an unreasonable restraint on interstate commerce, and were able to establish that they were engaged in interstate commerce, then they would be entitled to go to the jury or to have the court consider the matter of establishing liability. The narrowness of the hearing leaves a reviewing court with a question whether other evidence existed which, if the trial had been full-scale, would have produced a prima facie showing.

There is, of course, no provision in the Rules of Civil Procedure for having a hearing of the kind that was here conducted, that is, an In limine hearing to decide whether or not the plaintiffs could sufficiently satisfy the jurisdictional requirement of being engaged in interstate commerce so as to justify going to trial.

Our disposition is, therefore, to remand the case for further proceedings to enable **[**13]** the trial court to take any further action **[*1322]** that may be necessary in order to prepare the case for trial or to give, at least, the plaintiffs an opportunity to make a further showing if they have additional evidence which would add to this picture of carrying on business in interstate commerce and of the defendants restraining the flow or substantially affecting interstate commerce.

The judgment here was entered pursuant to *Rule 56(c) of the Federal Rules of Civil Procedure*. It was not, however, an orthodox summary judgment proceeding in that an evidentiary hearing was held. It is fundamental that ***HN3***[] summary judgment is appropriate if and only if there is no genuine issue as to any material fact. Only then is the moving party entitled to a judgment as a matter of law. What we are saying above is that the record does not demonstrate that there exists no genuine issue as to any material fact whereby the movants would be entitled to judgment as a matter of law. When such an issue of fact is present, summary judgment is not appropriate.

In the case at bar the issues whether the plaintiffs-appellants were engaged in interstate commerce and whether the impact on commerce was **[**14]** substantial are connected and considered singly or together are factual.

HN4[] The summary judgment rule in an antitrust case is that the summary procedures are to be used sparingly. Thus

> Where it (the record) establishes a Per se violation of the anti-trust laws, summary judgment is proper, but, in other situations, where the impact of the alleged violation is too little known, and the bare bones of the paper record are insufficient to pass judgment thereon, a trial should be had. Both factual inferences and the record as a whole must be viewed in the light most favorable to the party opposing summary judgment. And summary procedures should be used sparingly in complex anti-trust litigation where motive and intent play leading roles, or the proof is in the hands of the movant.

6 Moore's Federal Practice P 56.17(5), at 56-741 to 56-743 (2d ed. 1976). The record in this case is, to say the least, sketchy and it fails to demonstrate beyond a reasonable doubt that there is no question of fact to be tried.

The Supreme Court in recent opinions has considered what is necessary in order to satisfy the commerce requirement of the Sherman Act. Thus in *Hospital Building Co. v. Trustees of Rex Hospital, 425 U.S. 738, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976)*, **[**15]** the Supreme Court held that:***HN5***[]

> It is settled that the Act (Sherman Act) encompasses far more than restraints on trade that are motivated by a desire to limit interstate commerce or that have their sole impact on interstate commerce. "(W)holly local business restraints can produce the effects condemned by the Sherman Act." *United States v. Employing Plasterers Ass'n., 347 U.S. 186, 189 (74 S. Ct. 452, 454, 98 L. Ed. 618, 623)* (1954). As long as the restraint in question "substantially and adversely affects interstate commerce," *Gulf Oil Corp. v. Copp Paving Co., 419 U.S. 186, 195 (95 S. Ct. 392, 398, 42 L. Ed. 2d 378, 386)* (1974); Mandeville Island Farms, Inc. v. American Crystal Sugar Co., 334 U.S. (219) at 234 (*68 S. Ct. 996, 92 L. Ed. 1328*), the interstate commerce nexus required for Sherman Act coverage is established. " "If it is interstate commerce that feels the pinch, it does not matter how local the operation which applies the squeeze.' " *Gulf Oil Corp. v. Copp Paving Co., supra* (419 U.S.) at 195 (*95 S. Ct., at 398, 42 L. Ed. 2d, at 386*), quoting *United States v. Women's Sportswear Assn., 336*

> *U.S. 460, 464 (69 S. Ct. 714, 93 L. Ed. 805) (1949)*. **[**16]** . . . It was sufficient for us that the allegations in the complaint, if proved, could show that the conspiracy resulted in "Unreasonable burdens on the free and uninterrupted flow of plastering materials into Illinois." *347 U.S., at 189 (74 S. Ct. 452*). (emphasis added).

425 U.S. at 743, 746, 96 S. Ct. at 1851-1853.

In *Goldfarb v. Virginia State Bar, 421 U.S. 773, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975)*, the Supreme Court considered the interstate commerce requirement where the activity restrained (title examination) was an integral part of the transaction (financing home purchases). In that case significant **[*1323]** amounts of the loan money came from outside the state, and the lenders required a title examination before loans could be granted.

These two cases we regard as valuable in determining the applicable commerce standards required by the Sherman Act.

In addition to those cited in the Hospital Building Co. and Goldfarb cases, there is a decision of the *Third Circuit, Mortensen v. First Federal Sav. and Loan Ass'n, 549 F.2d 884 (3d Cir. 1977)*, which is useful and should prove to have value on remand, for **[**17]** Mortensen considered the jurisdiction problem arising from treating interstate commerce and the impact on commerce as a jurisdictional matter and as an element in a *Section 1* Sherman Act case. The framework of the opinion is not unlike that at bar because it was disposed of by the district court on a motion for summary judgment. The opinion of the appellate court was written by Judge Hunter. It was painstaking and careful. It considered at length the commerce problem in an antitrust case as it affects jurisdiction and as it affects the merits.

Based upon the foregoing, the judgment of the district court is reversed, and the cause is remanded for further proceedings consistent with the views expressed herein.

Amalgamated Meat Cutters & Butchers Workmen v. Wetterau Foods, Inc.

United States Court of Appeals for the Eighth Circuit

March 14, 1979, Submitted ; May 2, 1979, Decided

HN3[] Conspiracy to Monopolize, Sherman Act

Section 2 of the Sherman Act, 15 U.S.C.S. § 2, provides: Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several states, or with foreign nations, shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by fine not exceeding $ 50,000, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN4[] Antitrust & Trade Law, Sherman Act

Although generally a motion to dismiss does not satisfactorily dispose of a complex antitrust action, the court approves its use in actions where the pleaded allegations are not sufficient to base a claim upon which relief can be granted. A motion to dismiss for failure to state a cause of action can serve a useful purpose in disposing of legal issues with a minimum of time and expense to the interested parties and is applicable to an anti-trust complaint. In testing the legal sufficiency of the complaint the well-pleaded allegations are taken as admitted but conclusions of law and unreasonable inferences or unwarranted deductions of fact are not admitted.

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

Labor & Employment Law > Collective Bargaining & Labor Relations > Strikes & Work Stoppages

HN5[] Exemptions & Immunities, Labor

Under the law employees have the right to refuse to work, the right to strike, and the right to picket to bring economic pressure upon management to accede to their demands, but neither the striking employees nor the union have unlimited control over the employer. The employer in a labor dispute regarding negotiations for a collective bargaining agreement has a right to resist the pressures created by a union's economic strike by replacing striking employees in an effort to carry on business. The continued operation of a business by replacement of economic strikers furthers competition and free interchange of goods in commerce.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

HN7[] **International Aspects, Commerce With Foreign Nations**

While *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*, in terms prohibits all combinations and conspiracies in restraint of interstate or foreign trade or commerce, the scope of the Sherman Act has been narrowed by judicial construction to combinations or conspiracies which "unreasonably" affect trade or commerce in the sense that they violate the "rule of reason" which has long been recognized in antitrust cases. The rule of reason requires that the restraint in question affect market prices or otherwise deprive the consuming public of the benefits of free competition.In the evaluation of whether activity related to labor relations constitutes a restraint of trade or commerce which the Sherman Act condemns there is substantial interplay between the theory of the labor exemption and the "rule of reason" doctrine.

Counsel: Jerome F. X. Waterman of Houlehan & Waterman, Kansas City, Mo. (argued), and Robert L. Kimbrough, Topeka, Kan., on brief, for appellants.

S. Richard Heymann, Bryan, Cave, McPheeters & McRoberts, St. Louis, Mo. (argued), and Thomas C. Walsh, St. Louis, Mo., on brief, for appellee Wetterau.

David F. Yates, Suelthaus, Krueger, Cunningham, Yates & Kaplan, St. Louis, Mo., argued and on brief, for appellees Briggs and Dailey.

Judges: Before GIBSON, Chief Judge, and ROSS and McMILLIAN, Circuit Judges.

Opinion by: GIBSON

Opinion

[*134] This is an appeal from the dismissal, for failure to state a claim upon which relief can be granted, of appellants' complaint seeking treble damages [1.] for an alleged violation of *sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2 (1973)*, [2.] **[**3]** and the Missouri ***antitrust law***, Mo.Rev.Stat. § 416.010 Et seq. (1969). The District Court [3.] found that the complaint portrayed a labor dispute between union and employer and held that since federal labor laws clearly sanctioned the conduct involved, it could not give rise to an antitrust **[**2]** violation. [4.] We affirm.

The five individual appellants are employees in the meat department of Briggs & Dailey IGA, a grocery store in Moberly, Missouri. They constitute a bargaining unit represented by the Amalgamated Meat Cutters & Butchers Workmen **[**4]** of North America, Local Union No. 576, which is also an appellant. The union, as the certified bargaining agent, negotiated for a collective bargaining agreement with Briggs & Dailey for three months without result. When negotiations came to an impasse on March 10, 1978, the union called an economic strike. In order to continue the operation of the meat department, Briggs & Dailey replaced the striking workers with personnel provided by Wetterau, Incorporated, a wholesale food supplier, which supplied food products to Briggs & Dailey. Wetterau continued to pay the salaries of these personnel, and merely loaned them to Briggs & Dailey on a temporary basis to perform retail meat cutting. After only a few weeks Wetterau withdrew the replacement workers when the union allegedly threatened to strike Wetterau. Appellants claim that the agreement between Wetterau and Briggs & Dailey to supply replacement **[*135]** workers constitutes a combination in restraint of trade. [5.]

[5]** ***HN4***[]

[1.] ***HN1***[] *15 U.S.C. § 15 (1973)* provides:

Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of the suit, including a reasonable attorney's fee.

[2.] ***HN2***[] *15 U.S.C. § 1* states in relevant part:

Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal: * * *.

HN3[] *15 U.S.C. § 2* provides:

Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by fine not exceeding fifty thousand dollars, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

[3.] The Honorable James H. Meredith, Chief Judge, United States District Court for the Eastern District of Missouri.

[4.] The District Court did not separately address the state law claim. However, since the District Court found that this case presented merely a normal labor dispute, the doctrine of federal preemption requires that this controversy be governed by federal law. *Connell Construction Co., Inc. v. Plumbers & Steamfitters Local Union No. 100, 421 U.S. 616, 635-37, 654 n.13, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1974)*; *San Diego Building Trades Council v. Garmon, 359 U.S. 236, 79 S. Ct. 773, 3 L. Ed. 2d 775 (1959)*; *California State Council of Carpenters v. Associated General Contractors of California, Inc., 404 F. Supp. 1067, 1072 (N.D.Cal.1975)*. The state ***antitrust law*** claim was properly dismissed with prejudice.

[5.] Neither appellants' complaint nor their brief alleges that appellees have monopolized or attempted to monopolize any product or geographical location, and the factual allegations do not suggest the existence of a monopoly or an attempt to monopolize. Therefore, appellants have failed to state a claim for violation of *section 2* of the Sherman Act, *15 U.S.C. § 2 (1973)*.

Although generally a motion to dismiss does not satisfactorily dispose of a complex antitrust action, See *Bales v. Kansas City Star Co., 336 F.2d 439 (8th Cir. 1964)*, we have approved its use in actions where the pleaded allegations are not sufficient to base a claim upon which relief can be granted. In *Hiland Dairy, Inc. v. Kroger Co., 402 F.2d 968, 973 (8th Cir. 1968)*, Cert. denied, *395 U.S. 961, 89 S. Ct. 2096, 23 L. Ed. 2d 748 (1969)*, we stated:

> A motion to dismiss for failure to state a cause of action can serve a useful purpose in disposing of legal issues with a minimum of time and expense to the interested parties and is applicable to an anti-trust complaint. In testing the legal sufficiency of the complaint the well-pleaded allegations are taken as admitted but conclusions of law and unreasonable inferences or unwarranted deductions of fact are not admitted. See, 2A Moore's Federal Practice § 12.08, p. 2244.

This observation is particularly appropriate in the instant case because appellants' arguments are premised upon an unreasonable characterization of the facts.

Appellants rely upon the proposition that: "Clearly **[**6]** this is conduct which lies wholly outside the context of any collective bargaining relationship and any "normal labor dispute.' " The fallacy of this thesis is blatant. Briggs & Dailey merely used Wetterau employees to temporarily replace the striking meatcutters in order to counter the union's economic pressure on the contract negotiations. The agreement had no purpose or effect beyond the scope of the labor dispute.

The union and striking employees were exercising their right to bring economic pressure upon an employer to meet their demands. ***HN5***[] Under the law they have the right to refuse to work, the right to strike and the right to picket to bring economic pressure upon management to accede to their demands, but neither the striking employees nor the union have unlimited control over the employer. In *NLRB v. Mackay Radio & Telegraph Co., 304 U.S. 333, 345, 58 S. Ct. 904, 82 L. Ed. 1381 (1938)*, the United States Supreme Court recognized the right of an employer in a labor dispute regarding negotiations for a collective bargaining agreement to resist the pressures created by a union's economic strike by replacing striking employees in an effort to carry on business. **[**7]** The continued operation of a business by replacement of economic strikers furthers competition and free interchange of goods in commerce. This court has supported an employer's right to carry on his business by replacing striking employees on numerous occasions. See, e. g., *Little Rock Airmotive, Inc. v. NLRB, 455 F.2d 163, 166 (8th Cir. 1972)*; *Wilkinson Manufacturing Co. v. NLRB, 456 F.2d 298, 305 (8th Cir. 1972)*; *First National Bank of Omaha v. NLRB, 413 F.2d 921, 925 (8th Cir. 1969)*; *NRLB v. Gopher Aviation, Inc., 402 F.2d 176, 183 (8th Cir. 1968)*; *NRLB v. L. G. Everist, Inc., 334 F.2d 312, 317 (8th Cir. 1964)*.

Since Briggs & Dailey's conduct clearly complies with the acceptable framework of labor negotiations contemplated by federal labor policy, it is necessary to examine congressional intent in the context of accommodating the Sherman Act to the policies of federal labor laws. The antitrust laws were enacted to prevent restraints to free competition in business and commercial transactions that tend to restrict production, control prices or otherwise control the market to the detriment of consumers. *Apex Hosiery Co. v. Leader, 310 U.S. 469, 60 S. Ct. 982, 84 L. Ed. 1311 (1940)*. **[**8]** They were not enacted to regulate labor relations.

Congress provided a statutory labor exemption from the antitrust laws. 15 U.S.C.

[*136] §§ 17 and 26; *29 U.S.C. §§ 52*, *104*, *105* and *113*; See *Connell Construction Co., Inc. v. Plumbers & Steamfitters Local Union No. 100, 421 U.S. 616, 621, 622, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)*. Although these statutes do not directly address the activities involved in this case where the agreement is between two employers, these statutes demonstrate a congressional purpose to restrict the application of the antitrust laws when they unduly interfere with the goals of federal labor law. ***HN6***[] In resolving conflicts in areas where federal antitrust and labor policies seemingly overlap, the Supreme Court has recognized a nonstatutory labor exemption. *Federal Maritime Commission v. Pacific Maritime Association, 435 U.S. 40, 58, 98 S. Ct. 927, 55 L. Ed. 2d 96 (1978)*; Connell Construction Co., Inc. v. Plumbers & Steamfitters *Local Union No. 100, supra, 421 U.S. at 622, 95 S. Ct. 1830*; *Volkswagenwerk Aktiengesellschaft v. Federal Maritime Commission, 390 U.S. 261, 287, 88 S. Ct. 929, 19 L. Ed. 2d 1090* **[**9]** (Harlan, J., concurring), Modified regarding taxation of costs, *392 U.S. 901, 88 S. Ct. 2049, 20 L. Ed. 2d 1361 (1968)*; *Local Union No. 189, Amalgamated Meatcutters & Butcher Workmen v. Jewel Tea Co., Inc., 381 U.S. 676, 691-97, 85 S. Ct. 1596, 14 L. Ed. 2d 640 (1965)*; *United Mine Workers of America v. Pennington, 381*

U.S. 657, 666, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965); See also California State Council of Carpenters v. Associated General Contractors of California, Inc., 404 F. Supp. 1067 (N.D.Cal.1975). Defining the boundaries of this exemption has not proved an easy task. A court must balance the degree of interference with federal labor policy with the magnitude of the restraint of trade and whether the restraint directly or indirectly affects market prices and free competition for the consuming public. [6.]

[10]** Briggs & Dailey temporarily accepted the use of Wetterau employees to counteract the effect of the strike and continue operation of the meat department. Appellant union argues that this restrained it in its trade in terms of attracting membership and representing employees. The individual appellants argue that they were restrained in their business and enterprise of earning wages. Since any injury to appellants would flow naturally from the replacement of striking workers, which conduct federal labor policy sanctions, See Mackay, supra, the agreement between Briggs & Dailey and Wetterau cannot constitute a violation of the ***antitrust law***. Federal labor policy sanctions both the goal of resisting union demands and the method of replacing striking workers and the magnitude and nature of any restraint of trade or commerce in this case directly follows from the sanctioned conduct. The agreement had no anticompetitive effect unrelated to the collective bargaining negotiations. [7.]

[11]** **[*137]** Appellants rely upon "sham labor union" cases to support their claim. *Tugboat, Inc. v. Mobile Towing Co., 534 F.2d 1172 (5th Cir. 1976)*; Carpenters District Council v. United Contractors Association of Ohio, Inc., 484 F.2d 119 (6th Cir. 1973), Modified, 539 F.2d 1092 (6th Cir. 1976); International Association of Heat and Frost Insulators and Asbestos Workers v. United Contractors Association, Inc. of Pittsburg, Pennsylvania, 483 F.2d 384 (3d Cir. 1973), Modified, 494 F.2d 1353 (3d Cir. 1974). Although these cases can be distinguished upon various grounds, the mere absence of any "sham" labor organization in the instant case sufficiently destroys their precedential value here. Briggs & Dailey does not dispute the union's status as the certified bargaining representative of the meatcutters in its Moberly, Missouri, store. It did not seek to establish a company-dominated labor organization or to affect any commercial or trade relationship other than its collective bargaining agreement with the union. Briggs & Dailey's sole purpose in using the temporary replacements supplied by Wetterau was to continue **[**12]** its business in order to reinforce its bargaining power in the negotiations regarding a collective bargaining agreement with the union, while the union sought by its economic strike to make unprofitable Briggs & Dailey's operation, and thus enhance the union's bargaining power in the labor dispute. Neither side had the absolute right to unilaterally control the other and the collective bargaining process was free to be carried to its ultimate conclusion.

---

6. In Stifel, Nicolaus & Co., Inc. v. Dain, Kalman & Quail, Inc., 578 F.2d 1256, 1259 (8th Cir. 1978), this court explained a limitation on the antitrust statute appellees allegedly violated.

HN7[] While § 1 of the Sherman Act in terms prohibits all combinations and conspiracies in restraint of interstate or foreign trade or commerce, the scope of the Act has been narrowed by judicial construction to combinations or conspiracies which "unreasonably" affect trade or commerce in the sense that they violate the "rule of reason" which has long been recognized in antitrust cases. See, e. g., Northern Pacific R. Co. v. United States, 356 U.S. 1, 4-5, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958), and Apex Hosiery Co. v. Leader, 310 U.S. 469, 60 S. Ct. 982, 84 L. Ed. 1311 (1940). The rule of reason requires that the restraint in question affect market prices or otherwise deprive the consuming public of the benefits of free competition. Apex Hosiery Co. v. Leader, supra, 310 U.S. at 500-01, 60 S. Ct. 982, and cases cited.

578 F.2d at 1259. See also Standard Oil Co. v. United States, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619 (1911).

In the evaluation of whether activity related to labor relations constitutes a restraint of trade or commerce which the Sherman Act condemns there is substantial interplay between the theory of the labor exemption and the "rule of reason" doctrine, See Apex Hosiery Co. v. Leader, 310 U.S. 469, 60 S. Ct. 982, 84 L. Ed. 1311 (1940), and the protection afforded appellees in the instant case could stem from either basis.

7. The agreement profited Wetterau, the wholesale food supplier, only by continuing the operation of Briggs & Dailey as a retail outlet for Wetterau products in the face of an economic strike which threatened to close this outlet. While Wetterau's conduct may have made it a party to the labor dispute, supplying temporary replacement workers did not have any anticompetitive effect beyond the labor relations at the Moberly, Missouri, store.

The judgment of the District Court is affirmed.

HN2[] **Bad Faith, Fraud & Nonuse, Bad Faith**

An antitrust plaintiff pursuing a bad faith patent prosecution theory must still prove the other requisites of a *15 U.S.C.S. § 2* offense. There is a need to demonstrate the patentee's possession of exclusionary power within the relevant market before antitrust liability would result.

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Fraud

Patent Law > ... > Defenses > Inequitable Conduct > Burdens of Proof

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Fraudulent Procurement of Patent

HN3[] **Bad Faith, Fraud & Nonuse, Fraud**

Wholly inadvertent errors or honest mistakes which are caused by neither fraudulent intent or design, nor by the patentee's gross negligence, do not constitute fraud.

Civil Procedure > ... > Jury Trials > Jury Instructions > General Overview

Patent Law > Infringement Actions > Burdens of Proof

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

HN4[] **Jury Trials, Jury Instructions**

Courts require proof of an overall scheme to monopolize independent of the mere commencement of an infringement suit before permitting the imposition of antitrust liability based on patent enforcement conduct. A proper barrier is that the jury should be instructed that a patentee's infringement suit is presumptively in good faith and that this presumption can be rebutted only by clear and convincing evidence.

HN5[] **Regulated Industries, Sports**

The only damages recoverable in an antitrust suit are those which occur by reason of that which made the defendant's actions unlawful. For plaintiffs to recover treble damages they must prove more than injury causally linked to the antitrust violation. Plaintiffs must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendant's acts unlawful. The injury should reflect the anti-competitive effect either of the violation or of anti-competitive acts made possible by the violation. It should be the type of loss that the claimed violations would be likely to cause.

Counsel: David F. Dobbins (argued), New York City, George S. Frazza, New Brunswick, N.J., Robert M. Dunne, Phelps, Mills, San Francisco, Cal., for defendant-appellant.

Maxwell M. Blecher (argued), Blecher, Collins & Hoecker, Joel R. Bennett, Kendrick, Netter, Orr & Bennett, Los Angeles, Cal., Morrison & Foerster, San Francisco, Cal., for plaintiff-appellee.

Judges: Before SNEED and KENNEDY, Circuit Judges, and VON DER HEYDT, * District Judge.

Opinion by: SNEED

Opinion

[*344]** **[*987]** Ethicon appeals from a judgment rendered after a civil jury trial in which it was found guilty of violating *Section 2* of the Sherman Act by monopolizing or attempting to monopolize the market for heat-sealed plastic gloves sold to manufacturers of home hair care coloring kits. Plaintiff-appellee Handgards bases its private antitrust action upon its contention that Ethicon earlier had initiated and pursued a series **[**2]** of patent infringement suits against it in bad faith, or as an integral part of an overall scheme to monopolize. On appeal, Ethicon argues, Inter alia, that the district court erred in instructing the jury that Ethicon could be found guilty of an antitrust violation upon proof by a mere preponderance of the evidence that it had prosecuted one or more ill-founded patent infringement actions in bad faith and with an intent to monopolize. This court has jurisdiction pursuant to *28 U.S.C. § 1291*. Because we conclude that the district court erred in so instructing the jury and because of certain deficiencies with respect to the court's charge regarding damages, we reverse **[*988]** the judgment entered below and remand the case for a new trial.

I.

Factual Background

It is helpful to set forth a brief description of the patent enforcement conduct which forms the basis for Handgards' antitrust complaint before reviewing the history of the instant action.

A. The Prior Patent Enforcement Conduct.

The plaintiff-appellee Handgards, Inc. is a Nebraska corporation engaged in the business of manufacturing, distributing, and selling disposable plastic gloves adhered **[**3]** to paper. Handgards was formed from the 1966 merger of two constituent disposable plastic glove manufacturers: Plasticsmith, Inc. (Plasticsmith) and Mercury Manufacturing Company (Mercury). The defendant-appellant Ethicon, Inc. is a wholly-owned subsidiary of Johnson & Johnson and is engaged in the business of manufacturing, selling, and distributing surgical supplies. Prior to 1969, Ethicon manufactured, distributed, and sold disposable plastic gloves adhered to paper through its Arbrook division. Ethicon ended its participation in the disposable plastic glove business in 1969, when the assets of its Arbrook division were transferred to another Johnson & Johnson subsidiary named Arbrook, Inc.

In 1961 Ethicon acquired the assets of the Scott Company, which, for several years, had marketed disposable plastic gloves produced in accordance with a process developed by one of its founders, Joe Gerard. In so doing, Ethicon acquired both Gerard's pending application for a patent on his glovemaking process, as well as his glovemaking equipment. [1] In 1961 Ethicon also acquired the pending patent application of one Rene Orsini. [2] On April 3, 1962, the Gerard patent covering a glovemaking **[**4]** process issued to Ethicon. On October 20, 1964, the Orsini product patent covering a heat-sealed glove issued to Ethicon.

Both Plasticsmith and Mercury were engaged in the manufacture of heat-sealed disposable plastic gloves at the time the Gerard patent issued in 1962. After several months of unproductive negotiations concerning a licensing agreement for the Gerard patent between Ethicon and T. Hamil Reidy, the chief executive officer and controlling shareholder of Plasticsmith and Mercury, Ethicon filed patent infringement suits in October 1962 against both

---

* Hon. James A. Von der Heydt, Chief United States District Judge for the District of Alaska, sitting by designation.

1 Gerard filed the patent application covering his glovemaking process on January 2, 1958.

2 Orsini filed an application for a French patent on September 17, 1956; he filed for a United States patent on September 17, 1957.

Plasticsmith and Mercury, alleging infringement of the Gerard patent. [3] In December 1964, after the Orsini patent issued, Ethicon supplemented its patent infringement complaints against Plasticsmith and Mercury by adding a claim **[**5]** that the Orsini patent also was being infringed.

In 1966 Plasticsmith and Mercury were merged into a successor corporation, **[***345]** Handgards, Inc., the plaintiff in this case. Reidy continued as the chief executive officer and controlling shareholder in Handgards. In 1967, after learning that some of the allegedly infringing machines operated by Handgards reportedly were owned by Reidy rather than by Handgards or either of its predecessor corporations, Ethicon filed an infringement action against Reidy individually at his Chicago, Illinois residence. Reidy thereafter voluntarily intervened **[**6]** in the consolidated action then pending in California.

The consolidated patent infringement suit was tried to the court in 1968. Ethicon's trial counsel dropped the claims concerning **[*989]** the Orsini patent from the action, reportedly because he thought Orsini to be the weaker of the two patents and because he believed that narrowing the issues before the court would enhance the chance of successfully prosecuting the Gerard patent. On April 25, 1968, the trial judge entered judgment for Handgards, concluding that the Gerard patent was invalid because of the existence of a "prior public use" of the process by Lyle Shabram, one of the founders of Plasticsmith. [4] **[**7]** On appeal, this court affirmed the district court in a brief per curiam decision. [5]

B. History of the Present Action.

Plaintiff-appellee Handgards filed this civil antitrust action in 1968 seeking to **[**8]** recover treble damages and other equitable relief for the injuries it claimed to its business and property by virtue of the alleged antitrust violations committed by defendant-appellant Ethicon and defendant Johnson & Johnson. The gist of the plaintiff's complaint was that the parent-subsidiary defendants had either unilaterally or in concert, monopolized, attempted to monopolize, and conspired to monopolize trade and commerce for the purpose of eliminating plaintiff as a competitor in the sale of disposable plastic gloves to the hair care and medical markets.

Plaintiff altered its primary theory of recovery dramatically during the eight year period between the time it commenced this action and the time of trial in 1976. Handgards' suit began primarily as a Walker Process case, i. e., a suit alleging antitrust liability for the enforcement of a fraudulently obtained patent (Orsini). [6] **[**10]** See

---

[3] Ethicon filed suit against Plasticsmith, a Delaware corporation, on October 30, 1962, in Delaware. Ethicon filed suit against Mercury, a Nebraska corporation, on October 31, 1962, in Nebraska. After attorneys for Plasticsmith prevailed on a motion to transfer the Delaware action to the Northern District of California, Ethicon's attorneys consented to the transfer and consolidation of the Mercury action with the Plasticsmith action.

[4] The "prior public use" defense arises under *35 U.S.C. § 102(b)*, which provides that:

A person shall be entitled to a patent unless

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of the application for patent in the United States.

[5] ***Ethicon, Inc. v. Handgards, Inc., 432 F.2d 438 (9th Cir. 1970)***, Cert. denied, ***402 U.S. 929, 91 S. Ct. 1525, 28 L. Ed. 2d 863***, Rehearing denied, ***403 U.S. 912, 91 S. Ct. 2204, 29 L. Ed. 2d 690 (1971)***. The complete text of the court's decision reads as follows:

Ethicon's Gerard patent No. 3,028,576 was held invalid because the trial court found that under *35 U.S.C. § 102(b)* there was prior public use for more than one year of the concept of the machine, the subject of the patent.

There is little or no direct contradiction in the oral evidence. In our view, we have a case that could have been decided either way. Ethicon contends the testimony of Handgards' principal was too weak and impaired by certain circumstances. But the trial court was entitled to give more weight to other circumstances which point to Handgards' version being correct.

The decree is affirmed because the findings are not clearly erroneous.

[*346]** *Walker* ***[*990]*** *Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*. This theory ultimately proved not viable. [7] In 1975 Handgards expressly abandoned the Walker Process theory at a hearing on a motion for summary judgment **[**9]** and instead asserted the two theories on which this case ultimately was tried: the first was referred to at trial as the "overall scheme" theory; the second was referred to as the "bad faith" theory. The district court's published opinion on the motion for summary judgment reflected the new orientation of plaintiff's case. *Handgards, Inc. v. Johnson & Johnson, 413 F. Supp. 921 (N.D.Cal.1975)*.

[11]**

> (1) Handgards now largely bases its monopolization charge on the various patent infringement and other lawsuits brought on behalf of Ethicon by J & J house patent counsel. The claim is rooted in *Kobe, Inc. v. Dempsey Pump Co., 198 F.2d 416 (10th Cir. 1952)*, Cert. denied, *344 U.S. 837, 73 S. Ct. 46, 97 L. Ed. 651 (1952)*, and its progeny particularly *Mach-Tronics, Incorporated v. Zirpoli, 316 F.2d 820 (9th Cir. 1963)*, *Rex Chainbelt, Inc. v. Harco Products, Inc., 512 F.2d 993 (9th Cir. 1975)*, and *Prelin Industries, Inc. v. G & G Crafts, Inc., 357 F. Supp. 52 (W.D.Okl.1972)*. The Ethicon suits were purportedly brought as integral ingredients of a scheme to monopolize the disposable glove market. . . .
> (2) Plaintiff charges that defendants attempted to create a monopoly in the disposable glove industry by accumulating a number of the relevant patents no matter how weak or narrow and then instigating a series of lawsuits in order to slowly litigate the competition out of business.

---

[6] Walker Process stands for the proposition that "the enforcement of a patent procured by fraud on the Patent Office may be violative of *§ 2* of the Sherman Act provided the other elements necessary to a *§ 2* case are present." *382 U.S. at 174, 86 S. Ct. at 349*. Mr. Justice Harlan, concurring, stressed that "deliberate fraud" was required and that the Court did not hold

> that private antitrust suits might also reach monopolies practiced under patents that for one reason or another may turn out to be voidable under one or more of the numerous technicalities attending the issuance of a patent (for such a result) might well chill the disclosure of inventions through the obtaining of a patent because of fear of the vexations or punitive consequences of treble-damage suits.

382 U.S. at 180, 86 S. Ct. at 351-352 (Harlan, J., concurring).

Handgards' original complaint charged the defendants with (i) a violation of section 7 of the Clayton Act, allegedly occurring when Ethicon acquired the assets of the Scott Company in 1961 and (ii) violations of the Sherman Act, allegedly occurring as the result of a fraudulent procurement of the Orsini patent. A supplemental complaint was filed in 1974 which also charged that the defendants had continued to violate the antitrust laws since the date of the original complaint by committing certain illegal acts such as the instigation of baseless lawsuits and pricecutting. Neither complaint charged Ethicon with fraudulent procurement of the Gerard patent. Although plaintiff sought to add such a contention in 1974, the district court had denied leave to amend the complaint. The only allegations in either complaint pertaining to the invalidity of the Gerard patent were that the Gerard patent had been found invalid on the basis of a prior public use and that "(during) the pendency of such action, defendants obtained additional information showing and confirming the invalidity of the Gerard patent."

[7] In 1971 Ethicon filed a motion for summary judgment, arguing that the undisputed facts precluded a finding that the Orsini product patent had been fraudulently procured under the criteria set out in *Walker Process, supra.* See note 6 Supra. The district court denied defendant's motion in 1972 pending completion of discovery in the case, but noted that "(a) ruling that no triable issue of fraud in the procurement of the Orsini divisional patent exists would be within . . . (its) sound discretion." Ethicon renewed its motion for summary judgment in 1975, at which time the district court granted the motion in part and denied it in part. *Handgards, Inc. v. Johnson & Johnson, 413 F. Supp. 921 (N.D.Cal.1975)*. The district court's opinion on the motion for summary judgment noted the death of any Walker Process allegations, stating that "Handgards represented at oral argument on the motion and in its post-hearing reply memorandum that it was not proceeding as though this case were governed by Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp.," that the "abandonment by plaintiff of its primary theory of recovery based on the Orsini patent is no surprise," that the "Orsini patent infringement suit was not prosecuted in violation of Walker Process," and that plaintiff's complaint had never contained a Walker Process allegation regarding the Gerard patent. *413 F. Supp. at 923*.

> The bringing of a series of ill-founded patent infringement actions, in bad faith, can constitute an antitrust violation **[**12]** in and of itself If such suits are initiated or pursued with an intent to monopolize a particular industry (and, of course, the other elements of a *Section 2* violation are present). *Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*; *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*; *Kellogg Co. v. National Biscuit Co., 71 F.2d 662, 666 (2d Cir. 1934)*; Bolt Associates, Inc. v. Rix Industries, supra, (1973-1 Trade Cases, P 74,474 (N.D.Cal.1973)).

413 F. Supp. at 923-25 (emphasis in original).

The court defined the term "bad faith" in this context as knowing that the particular patent was invalid because (i) Ethicon allegedly knew (through its agent Gerard) of relevant prior art existing more than a year before the filing of the Gerard patent application; (ii) Ethicon allegedly knew (through its agent Gerard) that the invention had been on sale more than a year prior to the filing of the Gerard patent application; or **[*991]** (iii) Ethicon allegedly knew that the Orsini patent was invalid because material **[**13]** information had been withheld from the patent examiner. [8] *Id. at 925*.

At the trial the parties presented dramatically different versions of the facts to **[***347]** the jury. Plaintiff contended that Ethicon had accumulated the Orsini and Gerard patents, two key patents in the field, intending to monopolize the industry; that Ethicon had initiated and **[**14]** pursued its patent infringement suits against Handgards and its predecessors in bad faith, i. e., with knowledge that the patents were invalid, for the purpose of monopolizing the market; [9] that even if brought in good faith, Ethicon's infringement suits constituted individual predatory acts in an overall scheme to monopolize; and that Ethicon had generated adverse publicity regarding its infringement actions, threatening potential customers of the plaintiff, with the result that vital corporate resources were committed to defense of the infringement actions, Handgards' relations with potential customers were impaired, a proposed joint venture was aborted, and the company found itself unable to obtain outside financing necessary for it to remain competitive in the industry. Defendant Ethicon countered by arguing that it lacked any improper monopolistic motive in its acquisition of the Gerard and Orsini patents; that it had initiated the various infringement actions in complete good faith, after careful investigation, and with the reasonable expectation of success; that it did not publicize its infringement actions within the industry; and that Handgards' competitive problems resulted **[**15]** from its having marketed a lower quality product, provided poorer service, and been unwilling to respond to the competitive demands of the industry.

---

[8] In its 1972 decision on defendant's motion for summary judgment, See note 7 Supra, the district court noted that the failure to supply the Patent Office with the information pertaining to the Orsini patent, which already allegedly was part of its files, did not constitute fraud on the Patent Office in the Walker Process sense. In its 1975 decision on defendant's motion for summary judgment, the district court formally held that Ethicon's "failure to inform the Patent Office of information in its own files does not amount to the extremely circumscribed "intentional fraud' necessary to prove an action under Walker Process." *413 F. Supp. at 923*.

[9] Plaintiffs argued that the Gerard and Orsini patents were known by Ethicon to be invalid because they claimed: (1) a Mr. Babb had testified that Gerard had told him that he knew the Gerard patent was invalid; (2) evidence had been introduced suggesting that Ethicon knew of Shabram's invalidating prior public use; (3) evidence had been introduced suggesting (a) that Ethicon knew that Gerard's invention had been "on sale" more than one year prior to the date of the filing of the patent application within the meaning of *35 U.S.C. § 102(b)* and *(b)* that Ethicon's patent attorneys knowingly falsified an answer to an interrogatory in the prior patent action regarding the "on sale" issue; (4) evidence had been introduced suggesting that Ethicon's patent attorneys knowingly falsified an answer to an interrogatory in the prior patent action concerning the date on which Gerard's invention had been reduced to practice, in an attempt to mislead Handgards' counsel into defending the suit on a more difficult ground; and (5) evidence had been introduced suggesting that Ethicon knew the Orsini patent to have been invalid because of its having been anticipated or made obvious by a prior patent.

[16]** The jury returned a general verdict in favor of Handgards in the amount of $ 2,073,000 prior to trebling and gave the following responses to the special interrogatories submitted in the case: (1) the Orsini patent was not invalid on the basis of prior disclosures of another patent; (2) the relevant market in the case consisted of the market of heat-sealed plastic gloves sold to manufacturers of home hair care coloring kits; (3) Ethicon was guilty of monopolizing or attempting to monopolize the relevant market by prosecuting the patent lawsuits against Handgards and its predecessors in bad faith, that is, with actual knowledge that either the Gerard or the Orsini patent was invalid; (4) Ethicon was guilty of monopolizing or attempting to monopolize the relevant market by prosecuting the prior patent action as a predatory act in an overall scheme designed to exclude Handgards from the market; and (5) & (6) Ethicon and Johnson & Johnson were not guilty of entering into an agreement, combination, or conspiracy to restrain trade or to monopolize the relevant market.

[*992] Ethicon advances six basic arguments on appeal: (1) the trial court erred in instructing the jury that the **[**17]** bad faith enforcement of a patent can, without more, constitute an exclusionary act for which antitrust liability may result; (2) the finding that Ethicon prosecuted its infringement actions in bad faith is based upon pure speculation; (3) the jury's finding that Ethicon possessed a valid patent (Orsini) which covered the market found to have been monopolized precludes entry of a verdict of illegal monopolization of that market; (4) the trial court erred in permitting the jury to determine the relevant market and instead should have found that the relevant market was broader than the one chosen by the jury; (5) Handgards failed to show any injury resulting from the alleged *section 2* violations by Ethicon; and (6) the trial court erred in directing a verdict against Ethicon on its antitrust counterclaim against Handgards. Because we conclude that resolution of appellant's contentions concerning the bad faith theory and the damages recoverable in a case of this sort necessitate reversal and remand for a new trial, we need not, at this time, reach the other issues urged by appellant. All such issues may be presented to the trial court for such reconsideration as it deems proper in the **[**18]** light of this opinion.

II.

Antitrust Liability for Patent Enforcement Conduct.

A. The Problem.

We are confronted in this case with the complex interaction between two conflicting bodies of law: One, the patent law, is **[***348]** concerned with the creation and commercial exploitation of a statutory grant of monopoly power; the other, the ***antitrust law***, is concerned with proscribing various kinds of monopoly power. [10] Reconciling the interrelationship between the patent and antitrust laws has long been a topic of concern to courts as well as to commentators. See, e. g., *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*; *Rex Chainbelt, Inc. v. Harco Products, Inc., 512 F.2d 993* (9th Cir.), Cert. denied, *423 U.S. 831, 96 S. Ct. 52, 46 L. Ed. 2d 49 (1975)*; *Kobe, Inc. v. Dempsey Pump Co., 198 F.2d 416* (10th

---

[10] The power to exclude, which is the essence of every patent, is monopoly power. Hence, "(a)ny action to enforce a patent is in a very explicit sense "exclusionary,' both in purpose and, if successful, in effect." L. Sullivan, Handbook of the Law of Antitrust § 181, at 522 (1977). See P. Areeda & D. Turner, III ***Antitrust Law*** P 704a, at 114-15 (1978). The patent laws contemplate "broad criteria of patentability while lodging in the federal courts final authority to (determine patent validity)," *Blonder-Tongue Laboratories, Inc. v. University Foundation, 402 U.S. 313, 332, 91 S. Ct. 1434, 1444, 28 L. Ed. 2d 788 (1971)*; patentees invoke that authority by initiating infringement suits to enforce their patents. The antitrust laws on the other hand, proscribe certain types of exclusionary conduct that threaten or create monopoly power, including, in at least some situations, the use of vexatious litigation. See, e. g., *Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359*, On remand, *360 F. Supp. 451 (D.Minn.1973)*, aff'd mem., ***417 U.S. 901, 94 S. Ct. 2594, 41 L. Ed. 2d 207 (1974)***. It therefore is necessary to reach an accommodation between the patent and the antitrust laws whenever antitrust liability is premised on a finding regarding a patentee's intent to monopolize or its exercise of exclusionary power. To determine the existence of *section 2* liability properly requires careful distinctions between lawful patent-related exclusionary conduct or intent and unlawful patent-related exclusionary conduct or intent; only unlawful patent-related exclusionary conduct or intent is evidence of an intent to monopolize or the exercise of exclusionary conduct within the meaning attributed to *section 2*. See *SCM Corp. v. Xerox Corp., 463 F. Supp. 983 (D.Conn.1978)*. The task then, is to "identify the point at which . . . (an attempt to enforce a patent), always exclusionary in . . . (the) literal sense, . . . become(s) so intractable as to warrant its being called exclusionary in the sense relevant to the establishment of a *Section 2* violation. . . ." L. Sullivan, Supra, § 181, at 522.

Cir.), Cert. denied, *344 U.S. 837, 73 S. Ct. 46, 97 L. Ed. 651 (1952)*; P. Areeda & D. Turner, III ***Antitrust Law*** P 704a, at 114-15 (1978); L. Sullivan, Handbook of the Law of Antitrust § 181 (1977); and Stedman, Patents and Antitrust The Impact of Varying **[**19]** Legal Doctrines, 1973 Utah L.Rev. 588. This case presents yet another instance in which the boundaries of the patent-antitrust interface must be determined.

[20]** **[*993]** ***HN1***[] Patentees must be permitted to test the validity of their patents in court through actions against alleged infringers. Their status as alleged possessors of a legal monopoly does not cause them to be pariahs before the law. *Eastern Railroad Presidents Conference v. Noerr Motor Freight, 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)* and *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)* require no less. [11] **[**21]** On the other hand, infringement actions initiated and conducted in bad faith contribute nothing to the furtherance of the policies of either the patent law or the ***antitrust law***. [12] The district court was correct in holding, in effect, that such actions may constitute an attempt to monopolize violative of *Section 2* of the ***antitrust law***. [13] "Bad faith," however, is a subjective state of **[***349]** mind the existence of which, while not susceptible to certain proof, easily can spring from suggestive and weakly corroborative circumstances.

[22]** The problem, as we see it, is to provide the means whereby the bad faith infringement action can be identified post hoc with a sufficiently high degree of certainty to make it highly improbable that the action in fact was

---

[11] It is worth emphasizing that the absence of an immunity does not create an antitrust offense. The fact that defendant's conduct is not immune from antitrust scrutiny does not satisfy the plaintiff's burden of proving the usual elements of an antitrust offense, including significant harm causally related to the conduct.

P. Areeda & D. Turner, Supra, I ***Antitrust Law*** P 204e2.

See *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*; *Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359*, On remand, *360 F. Supp. 451 (D.Minn.1973)*, aff'd mem., ***417 U.S. 901, 94 S. Ct. 2594, 41 L. Ed. 2d 207 (1974)***; *Franchise Realty Interstate Corp. v. San Francisco Local Joint Executive Board of Culinary Workers, 542 F.2d 1076 (9th Cir. 1976)*, Cert. denied, ***430 U.S. 940, 97 S. Ct. 1571, 51 L. Ed. 2d 787 (1977)***.

[12] Subjecting a potential rival or actual rival to . . . (the burden of defending an infringement suit) may weaken him or even dissuade him from beginning or continuing the rivalry with the monopolist-patentee and perhaps without regard to the merits of the infringement claim.

P. Areeda & D. Turner, Supra, III ***Antitrust Law*** P 708, at 145. See generally L. Sullivan, Supra, § 181; Stedman, Supra, at 593-94.

[13] ***HN2***[] An antitrust plaintiff pursuing a bad faith patent prosecution theory must still prove the other requisites of a *§ 2* offense. In Walker Process the Supreme Court emphasized the need to demonstrate the patentee's possession of exclusionary power within the relevant market before antitrust liability would result.

To establish monopolization or attempt to monopolize a part of trade or commerce under *§ 2* of the Sherman Act (on a Walker Process theory), it would . . . be necessary to appraise the exclusionary power of the illegal patent claim in terms of the relevant market for the product involved. Without a definition of that market there is no way to measure . . . (defendant's) ability to lessen or destroy competition. It may be that the (patented) device . . . does not comprise a relevant market. There may be effective substitutes for the device which do not infringe the patent. This is a matter of proof, as is the amount of damages . . . .

382 U.S. at 177-78, 86 S. Ct. at 350-51.

We note the existence of a jury finding in this case that the relevant market consisted of the market of heat-sealed plastic gloves sold to manufacturers of home hair care coloring kits, or the home hair care plastic disposable glove market; a market coterminous with that covered by the Gerard patent. In view of that finding, Ethicon's prosecution of a bad faith infringement action likely would constitute an attempt to monopolize violative of *section 2*. The requisite intent to monopolize in this case could be inferred from the finding of bad faith. Not all bad faith infringement actions will necessarily constitute attempts to monopolize violative of *section 2*. Nor will a patentee found guilty of prosecuting an infringement action in bad faith necessarily be guilty of an offense of monopolization. The imposition of antitrust liability will depend upon plaintiff's proof that the defendant-patentee possessed or threatened to possess an ability to lessen competition in the relevant market.

brought in good faith. The imposition of treble damages, a sanction strongly punitive, See *Walker Process, supra, 382 U.S. at 180, 86 S. Ct. 347* (Harlan, J., concurring) and P. Areeda & D. Turner, Supra, II ***Antitrust Law*** PP 311, 331, dictates that such means exist. For reasons which appear below the solution of this problem points the way to the proper disposition of this case.

[*994] B. The Solution.

Our search for a solution commences by distinguishing the facts of this case from those of the cases on which appellee Handgards primarily relies. First, this is not a Walker Process case. Walker Process stands for the proposition that "the enforcement of a patent procured by fraud on the Patent Office" may give rise to antitrust liability. See notes 6 & 7 Supra. Plaintiff Handgards does not contend that Ethicon sought to enforce a fraudulently-procured patent. Instead, Handgards asserts that Ethicon prosecuted infringement actions in bad faith, **[**23]** that is, with knowledge that the patents, though lawfully-obtained, were invalid.

Second, this is not a Kobe case. *Kobe, Inc. v. Dempsey Pump Co., 198 F.2d 416* (10th Cir.), Cert. denied, *344 U.S. 837, 73 S. Ct. 46, 97 L. Ed. 651 (1952)*. In Kobe a patentee had engaged in a plan of monopolization by acquiring all present and future patents relevant to an industry, obtaining covenants not to compete from those from whom it purchased the patents, publicizing its infringement suits throughout the industry, and threatening suit against anyone trading with the alleged infringer. Kobe and its progeny, among which is *Rex Chainbelt, supra*, hold that a patentee may incur antitrust liability for even the good faith prosecution of a valid patent where it is shown that the infringement suit "was brought in furtherance and as an integral part of a plan to violate the antitrust laws." *Rex Chainbelt, supra, 512 F.2d 1005-06*. [14] **[**25]** Our careful examination of the record in this case reveals that no evidence of any overall scheme to monopolize exists Apart from allegations that directly relate to the bad faith prosecution charges. The old wine in this case consists **[**24]** of evidence indicating that Ethicon may have brought the infringement actions in bad faith. It is the same old wine when put in a new bottle labelled "overall scheme." [15]

---

[14] The issue in Rex Chainbelt was whether Harco could recover attorneys' fees incurred in its successful defense of a patent infringement suit as damages resulting from an antitrust violation by Rex Chainbelt. After studying the Report of the Attorney General's National Committee to Study the Antitrust Laws 247-48 (1955) and a line of cases highlighted by *Kobe, supra* and ***Ansul Co. v. Uniroyal, Inc., 448 F.2d 872 (2d Cir. 1971)***, Cert. denied, ***404 U.S. 1018, 92 S. Ct. 680, 30 L. Ed. 2d 666 (1972)***, we concluded that "(t)he mere coincidence of an antitrust violation (an illegal tying arrangement) and a patent infringement suit is not sufficient to entitle Harco to attorney's fees expended in defense of the patent infringement claim absent some showing from which the . . . court can find or infer, that The patent infringement suit was brought in furtherance and as an integral part of a plan to violate the antitrust laws." *512 F.2d at 1005-06* (emphasis added).

[15] The district court instructed the jury on both the "bad faith" and "overall scheme" theories, stating that "(the prosecution) of one or more ill-founded patent infringement actions in bad faith . . . constitutes an antitrust violation in and of itself if such suits are initiated or pursued with an intent to monopolize a particular market or industry," Reporter's Transcript at 2134, and that "if . . . the lawsuits instituted by Ethicon against plaintiff were brought or maintained in whole or in part to further a plan or a scheme . . . to monopolize . . . or in furtherance of a conspiracy or combination to monopolize or restrain trade . . . (then) the institution and maintenance of these suits violate the antitrust laws, even though the defendants may actually have believed that the . . . patents were valid, and even though the defendants believed that Handgards had infringed these patents." Id. at 2151. The court defined "bad faith" in this context as "knowing either at the time the lawsuit is filed or during its pendency that the particular patent sued upon is invalid." Id. at 2134. Proof of bad faith, the court charged, must be shown by a preponderance of the evidence, which it described as proof that the proposition is "more likely true than not true." Id. at 2095.

The district court summarized the evidence pertaining to the overall scheme for the jury as follows:

. . . (Under) the overall scheme theory, the plaintiffs contend that the defendants accumulated numerous patents on plastic gloves to prevent competition; that they threatened to sue manufacturers, or purchasers, of allegedly infringing gloves, and misused the Gerard patent.

To support this claim, the plaintiff introduced Gerard's letter to Sam Porter, claiming that anyone manufacturing gloves on paper was in violation of his patent, and was subject to suit for patent infringement.

[*350] [**26] [*995]** Finally, this is not an Otter Tail case. *Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359*, On remand, *360 F. Supp. 451 (D.Minn.1973)*, aff'd mem., *417 U.S. 901, 94 S. Ct. 2594, 41 L. Ed. 2d 207 (1974)*. Handgards has neither pleaded nor proved that Ethicon engaged in a pattern of baseless, repetitive litigation designed to prevent meaningful access to an adjudicatory tribunal. See generally *Franchise Realty Interstate Corp. v. San Francisco Local Joint Executive Board of Culinary Workers, 542 F.2d 1076, 1081 n.4, 1087 (9th Cir. 1976)*, Cert. denied, *430 U.S. 940, 97 S. Ct. 1571, 51 L. Ed. 2d 787 (1977)*. [16]

The plaintiff also presented the testimony of Mr. Webbe regarding the difficulty that Handgards encountered obtaining financing for its operations.

Mr. Campbell, a past employee of Glore Forgan, also testified that his company would not become involved in underwriting the sale of Handgards' stock, because of the pendency of the infringement suit.

Mr. Webbe also testified as to the reluctance of Sam Porter to enter into a joint venture because of the pending suit. And Porter, similarly, testified regarding his concern over the infringement action.

The defendants presented the following evidence to refute the plaintiff's claim that the patent suits were brought as part of an overall scheme to monopolize.

Messrs. Laff and Neuman both testified that the patent actions were filed against Plasticsmith and Mercury Manufacturing because Ethicon was unsure of the relationship between the two companies.

Mr. Laff explained that Delaware was chosen as the place to sue, because it was more convenient for Ethicon; and that after the court ordered the case transferred to San Francisco, Ethicon did not oppose the consolidation of the lawsuit against Mercury, so the action could be tried as one lawsuit.

Messrs. Laff and Neuman testified that the lawsuit was begun against Mr. Reidy when it was learned that Mr. Reidy paid for some of the accused machines.

The evidence shows Ethicon offered Handgards a license under the Gerard patent prior to the lawsuit.

Mr. Webbe and Mr. Blatz have testified that in their opinion the license offered was not reasonable, and would have put Handgards at a competitive disadvantage.

Messrs. Laff, Neuman, and Schlemmer, testified that the letter from Mr. Gerard to Mr. Porter, dated March 16th, 1965, in which Mr. Gerard enclosed a copy of his patent, did not constitute a misuse of the Gerard patent.

The evidence shows that as of at least the date of that letter, all disposable plastic gloves purchased by hair care kit companies were manufactured under the Gerard process.

Mr. Gerard and Mr. Porter testified that the letter was sent at the specific request of Mr. Porter.

Messrs. Laff, Neuman, and Schlemmer testified that no one except a manufacturer of gloves could have been sued under the Gerard patent, which was the sole object of that letter.

Id. at 2114-16.

As we indicated in the text, our review of the record convinces us that only the bad faith theory of recovery exists in this case. The evidence of an overall scheme to monopolize the relevant market constitutes substantially the same evidence relied upon to show Ethicon's alleged bad faith prosecution conduct. If this evidence, under the instructions our opinion requires, should fail to support the bad faith theory, it should not be sufficient to support the overall scheme theory. To hold otherwise would undercut the protections we here seek to afford the ordinary patentee. For this reason we are unable to affirm the judgment below on the basis of the jury's finding that an overall scheme existed. It is unnecessary for us to address explicitly the issue whether the trial court erred in charging the jury on two theories. It is enough to point out that if on retrial the evidence remains substantially the same, the charge to the jury should reflect only the bad faith theory. We express no opinion on the type of additional evidence that would require an overall scheme charge. *Kobe, Inc. v. Dempsey Pump Co., 198 F.2d 416* (10th Cir.), Cert. denied, ***344 U.S. 837, 73 S. Ct. 46, 97 L. Ed. 651 (1952)*** is the archetype, however.

[16] Judge Kennedy's opinion, concurring in the result and qualifiedly concurring in the majority's opinion, suggests that defendant Ethicon may have available on remand the "immunity" afforded by Franchise Realty. Our opinion treats "infringement actions initiated and conducted in bad faith," established in the manner we require, as violative of *Section 2* of the ***antitrust law***. When

[*351]** **[**27]** Rather, this case involves simply the commencement and maintenance of related infringement actions in what the jury found to be bad faith.

A clash between the policies of patent and antitrust laws also was present in Walker Process and Kobe. In the former the compromise consisted of erecting high **[*996]** barriers to success by the antitrust plaintiff. As we noted in *Cataphote Corp. v. DeSoto Chemical Coatings, Inc., 450 F.2d 769 (9th Cir. 1971)*, cert. denied, *408 U.S. 929, 92 S. Ct. 2497, 33 L. Ed. 2d 341 (1972)*:

> The patent fraud proscribed by Walker is extremely circumscribed. In Walker the Supreme Court excluded from its definition of fraud "an honest mistake as to the effect of prior installation upon patentability so-called "technical fraud.' " *Walker, supra*, (382 U.S.) at 177, *86 S. Ct. 347, 350 (15 L. Ed. 2d 247*). ***HN3***[] Wholly inadvertent errors or honest mistakes which are caused by neither fraudulent intent or design, nor by the patentee's gross negligence, do not constitute fraud under Walker. . . . The road to the Patent **[**28]** Office is so tortuous and patent litigation is usually so complex, that "knowing and willful fraud" as the term is used in Walker can mean no less than *Clear, convincing proof of intentional fraud involving affirmative dishonesty,* "a deliberately planned and carefully executed scheme to defraud * * * the Patent Office." . . . Patent fraud cases prior to Walker required a rigorous standard of deceit. Walker requires no less.

450 F.2d at 772 (emphasis added) (footnote and citations omitted). See *SSP Agricultural Equipment, Inc. v. Orchard-Rite Ltd., 592 F.2d 1096 at 1103 (9th Cir. 1979)*.

In overall scheme cases such as Kobe, ***HN4***[] courts require proof of an overall scheme to monopolize independent of the mere commencement of an infringement suit before permitting the imposition of antitrust liability based on patent enforcement conduct. This requirement diminishes the specter of antitrust liability encountered by an ordinary patentee who brings an infringement action. See Hibner, Litigation as an Overt Act Development and Prognosis, 46 Antitrust L.J. 718, 720 (1977). **[**29]**

The common thread is that in both Walker Process and Kobe barriers were erected to prevent frustration of patent law by the long reach of ***antitrust law***. This suggests our proper course. It is to erect such barriers to antitrust suits as are necessary to provide reasonable protection for the honest patentee who brings an infringement action to protect his legal monopoly.

A proper barrier is, in our opinion, suggested by Walker Process. It is that the jury should be instructed that a patentee's infringement suit is presumptively in good faith and that this presumption can be rebutted only by clear and convincing evidence. See *Cataphote Corp., supra, 450 F.2d at 772*; *SSP Agricultural Equipment, supra.* Such an instruction accords the patentee a presumption commensurate with the statutory presumption of patent validity set forth in the patent laws, 35 U.S.C. P 282, which can only be rebutted by a showing of clear and convincing evidence. See, e. g., *Santa Fe-Pomeroy, Inc. v. P & Z Co., 569 F.2d 1084, 1091 (9th Cir. 1978)*; *Saf-Gard Products, Inc. v. Service Parts, Inc., 532 F.2d 1266, 1271* (9th Cir.), Cert. **[**30]** denied, *429 U.S. 896, 97 S. Ct. 258, 50 L. Ed. 2d 179 (1976)*.

The trial court in this case, however, gave no such instruction. See note 15 Supra. Moreover, it charged that the patentee's subjective bad faith need only be proved by a mere preponderance of the evidence. This constitutes reversible error. The district court charge eliminates a barrier we hold necessary, and were it accepted as proper, "might well chill" legitimate patent enforcement efforts "because of fear of the vexations or punitive consequences of treble-damage suits." *Walker Process, supra, 382 U.S. at 180, 86 S. Ct. at 352* (Harlan, J., concurring).

---

so established, it would be strange to then hold that nonetheless a Franchise Realty immunity might exist. In any event, this is an issue that the present record does not require us to address.

The barrier we impose is not one intended to be utilized in antitrust litigation generally. It is fashioned in response to the unique characteristics of proceedings in which the alleged violation of the ***antitrust law*** consists solely of one or more infringement actions initiated in bad faith.

III.

Damages Recoverable By Victims of Bad Faith Infringement Actions.

Difficulty also exists with respect to the trial court's charge to the jury concerning **[*997]** the nature of the injuries for which plaintiff properly may recover damages in **[**31]** an antitrust suit based upon a bad faith prosecution theory. "The Supreme Court has recently ruled that ***HN5***[] the only damages recoverable in an antitrust suit are those which occur by reason of that which made the defendant's actions unlawful." *Kapp v. National Football League, 586 F.2d 644, 648 (9th Cir. 1978)* (citing *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477,* ***[***352]*** *489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977))*. Brunswick states the applicable rule and is the governing authority:

> . . . (For) plaintiffs to recover treble damages . . . they must prove more than injury causally linked to . . . (the antitrust violation). Plaintiffs must prove Antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendant's acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. It should, in short, be "the type of loss that the claimed violations . . . would be likely to cause." Zenith Radio Corp. v. Hazeltine Research, 395 U.S. (100) at 125 (*89 S. Ct. 1562 at 1577, 23 L. Ed. 2d 129*). **[**32]**

429 U.S. at 489, 97 S. Ct. at 697-698 (emphasis in original) (footnote omitted).

Plaintiff must show that the injury for which it seeks to recover is "the type the antitrust laws were intended to prevent" and "flows from that which makes defendant's acts unlawful." In a suit alleging antitrust injury based upon a bad faith prosecution theory it is obvious that the costs incurred in defense of the prior patent infringement suit are an injury which "flows" from the antitrust wrong. Damages for the loss of profits, however, will not necessarily so flow. We have some doubt, for example, whether plaintiff's damage claim for lost profits allegedly resulting from the entry of an additional competitor into the market during the pendency of the infringement suit is the type of injury for which antitrust recovery is appropriate. "The antitrust laws . . . were enacted for "the protection of Competition, not Competitors.' " *Brunswick, supra, 429 U.S. at 488, 97 S. Ct. at 697* (quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962))*. Moreover, the jury's finding in this case that Ethicon possessed a valid **[**33]** patent covering the market it was accused of monopolizing also raises doubts concerning whether plaintiff's lost profits "flowed from" the antitrust wrong claimed in this case.

The court's charge concerning the damages available to plaintiff for lost profits is ambiguous. Several times the court stated that plaintiff could only recover for lost profits that it would have earned "but for" the antitrust violation by the defendant. See Reporter's Transcript at 2160, 2162. The court also stated however, that plaintiff could recover as damages profits lost as the "proximate result" of the antitrust violation. Id. at 2163. The court earlier had defined the term "proximate cause" to mean "an act . . . (that) played a substantial part in bringing about" the injury. Id. at 2161. According to Brunswick, plaintiff must show more than that it suffered injury causally linked to the antitrust violation; the injury must be shown to have "flowed" from the wrong. To "flow" from the wrong, Brunswick suggests, the loss must be " "the type of loss that the claimed violations . . . would be likely to cause.' " *429 U.S. at 489, 97 S. Ct. at 697*, quoting from *Zenith Radio Corp. v. Hazeltine Research, 395 U.S. 100, 125, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*. **[**34]** To be one of several causes is not enough. The injury must be of the type likely to be caused by the defendant's bad faith infringement action. On the record before us we are left in doubt whether the Brunswick test has been met with respect to plaintiff's claim for lost profits. The failure of the trial court to resolve this doubt specifically constitutes error.

IV.

The Reasonable Balance.

The additional burdens imposed by our holdings on those who seek an antitrust **[*998]** recovery against one who has brought a patent infringement action against them achieve what we believe to be a reasonable accommodation of the policies of patent and ***antitrust law***. Patent holders must be cautious in bringing infringement actions and alleged infringers remain equipped with a strong retaliatory weapon available for use against those who sue them in bad faith. [17] We think this represents a reasonable balance.

[35]** Accordingly, this case is reversed and remanded to the district court for a new trial in accordance with the views expressed herein.

REVERSED and REMANDED.

Each party to this appeal shall bear its own costs and neither party's costs shall be taxed against the other. *Rule 39, F.R.App.P.*

On Petition for Rehearing.

Concur by: KENNEDY

Concur

KENNEDY, Circuit Judge, concurring:

I concur in the result of Judge Sneed's opinion, and think it inappropriate to address the question whether or not Ethicon could rely on an immunity granted to antitrust defendants under the principles set forth in *Franchise Realty Interstate Corp. v. San Francisco Local Joint Executive Board of Culinary Workers, 542 F.2d 1076 (9th Cir. 1976)*, Cert. denied, *430 U.S. 940, 97 S. Ct. 1571, 51 L. Ed. 2d 787 (1977)*. The matter was not raised by Ethicon at any stage of these proceedings. Since a new trial is required in this case, **[***353]** because of the erroneous jury instructions noted by the majority, the district court in the first instance should determine whether Ethicon may raise the question on retrial.

In Franchise Realty we held that an antitrust plaintiff must plead that the litigation **[**36]** or petitions which allegedly caused competitive injury were sham proceedings, the showing required by a line of Supreme Court decisions, See *Eastern Railroad Presidents Conference v. Noerr Motor Freight, 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*; *Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*; *Vendo Co. v. Lektro-Vend Corp., 433 U.S. 623, 97 S. Ct. 2881, 53 L. Ed. 2d 1009 (1977)*. Franchise Realty might be interpreted to require dismissal of antitrust claims unless the plaintiff can show that the defendant's conduct was designed to cause competitive injury by exacting such extraordinary costs that meaningful use of an agency or tribunal was barred, See *542 F.2d at 1080-81* & n. 4, and perhaps to require further that the defendant must have engaged in conduct other than instigation and maintenance of the proceedings, See id. See also *Wilmorite, Inc. v. Eagan Real Estate, Inc., 454 F. Supp. 1124 (N.D.N.Y.1977)*; **[**37]** *Ernest W. Hahn, Inc. v. Codding, 423 F. Supp. 913 (N.D.Cal.1976)*. Whether this is a correct interpretation of Franchise Realty or the Sherman Act, Cf. P. Areeda & D. Turner, ***Antitrust Law*** §

---

[17] We note that substantial disincentives to instigating ill-founded patent infringement suits that are not actionable under the standard of antitrust liability announced today already exist. For example, the patent laws contain a specific remedy for prosecution in bad faith. *35 U.S.C. § 285*; the rule of collateral estoppel announced in *Blonder-Tongue Laboratories, Inc. v. University Foundation, 402 U.S. 313, 91 S. Ct. 1434, 28 L. Ed. 2d 788 (1972)* serves to dissuade ill-founded patent infringement suits; and nothing appears to preclude a successful defendant in an infringement action from bringing a common law malicious prosecution claim. Moreover, this opinion does not limit any antitrust liability that a patentee may incur for conduct actionable under an overall scheme or Walker Process theory.

201-204, 203c n.9 at 44-45 (1978), and whether Ethicon's conduct was actionable under such standards are important questions, but the issues are not presented for consideration here.

The majority opinion seems to suggest that a showing of sham proceedings under Franchise Realty is not required where the claimed antitrust injury flows from patent litigation, but it does not indicate the respects in which patent litigation somehow presents a greater threat to interests protected by the Sherman Act than other types **[*999]** of suits governed by California Motor and Franchise Realty. It is irrelevant that a successful plaintiff in a patent action is enforcing a lawful monopoly. Very costly "sham" unfair competition or tort suits, for example, may produce more anticompetitive injury than less costly but successful infringement actions. Moreover, it is difficult to argue that a successful plaintiff has engaged in sham litigation. But to the extent that the patent plaintiff is unsuccessful, **[**38]** I see little reason to distinguish patent litigation from other kinds of litigation. If attempted enforcement of a patent known to be invalid is the special circumstance which justifies a special rule, the court's opinion states no reason to depart from the requirement that a plaintiff prove knowing, intentional fraudulent procurement as stated in Walker Process. To the extent that abuse of the judicial process by bad faith prosecution of a claim known to be without merit is the essence of the antitrust violation, the court's opinion states no reason for departing from the circuit's precedents, See Franchise Realty, governing this type of antitrust violation. Further, a more lenient rule for patent litigation appears at odds with the principal holding that a special burden of proof is required before an antitrust plaintiff may prevail on the claim of injury from a previous patent litigation, our purpose being to avoid undue discouragement to the adjudication of patent infringement claims. In my view, however, whether and why the kind of antitrust litigation permitted in Walker Process is distinguishable in meaningful ways from that discussed in California Motor, the relationship between **[**39]** the different standards applied in those cases, and the applicability of Franchise Realty to this case, are best left for a later decision when the point has been specifically raised by the parties. [1]

[40]** Finally, the majority states that in proving injury "flowing from" an antitrust violation, "To be one of several causes is not enough." To the extent this language suggests a change in the normal standards regarding causation in antitrust cases, the statement is unexplained. There is no need in this case to reexamine the rule that "proximate cause" in antitrust cases is defined in terms of "a substantial cause." See *Mulvey v. Samuel Goldwyn Productions, 433 F.2d 1073, 1075 n.3 (9th Cir. 1970)*; *Hecht v. Pro-Football, Inc., D.C.Cir., 187 U.S.App.D.C. 73, 570 F.2d 982, 996 (1977)*; *Billy Baxter, Inc. v. Coca-Cola Co., 431 F.2d 183, 187 (2d Cir. 1970)*; E. Devitt & C. Blackmar, Federal Jury Practice and Instructions §§ 90.31, 80.18 (1977) ("proximate cause" in antitrust cases defined in terms of "substantial factor"). To the extent the language applies only to antitrust claims based on prior patent infringement actions, the majority similarly does not explain why a different causation rule is appropriate in this kind of case. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*, is squarely **[**41]** in point for our holding that the injury must result from a competitive wrong prohibited by the antitrust laws, but in my view it should not be interpreted to introduce a new standard for proving causation either in antitrust cases generally or antitrust claims based on prior patent litigation. I am not as sure as Judge Sneed that part of Handgards' damages claim was for lost profits resulting from the entry of an additional competitor, but I agree that the effect of the Orsini patent on plaintiff's claim of injury creates an issue which the district court should decide.

[*1000] With the above observations, I concur in the opinion of the majority.

---

[1] Defendant's position on this appeal was that antitrust claims based on the prior bringing of infringement actions differ from other kinds of antitrust suits based on alleged abuse of the judicial system. It expressly declined to rely on California Motor, stating in its brief: "The only relevance of California Motor Transport, which had nothing to do with patents, is its explicit reaffirmation by the Supreme Court of Walker Process as the applicable standard of fraud in connection with a *§ 2* case charging enforcement of invalid patents." Appellant's Brief at 27. Instead, defendants argued that this case was governed by Walker Process. They claimed plaintiff should have been required to prove common law intentional fraud, not merely bad faith, and that the standard of proof should have been clear and convincing instead of a preponderance of the evidence. Their second argument is adopted in Judge Sneed's opinion.

advertising, newspaper, publish, abbreviations, Printing, monopoly, anti trust law, predatory, costs, refuse to accept, pricing

LexisNexis® Headnotes

Constitutional Law > ... > Freedom of Speech > Free Press > General Overview

HN1[] **Freedom of Speech, Free Press**

The publication of a newspaper is strictly the private business of its publisher, and it has been aptly observed that a publisher in publishing a paper assumes no office, trust, or station in a public sense, nor does he enter into any public or contractual relation with the community at large.

Constitutional Law > ... > Freedom of Speech > Free Press > General Overview

HN2[] **Freedom of Speech, Free Press**

The rights and liabilities of newspaper publishers arising out of contracts are therefore governed by the rules applicable to contracts generally.

Constitutional Law > ... > Freedom of Speech > Free Press > General Overview

HN3[] **Freedom of Speech, Free Press**

A newspaper publisher is under no legal obligation to sell advertising to all who apply for it and is not required to accept for publication any advertisement, although in proper form, even though the charge which the newspaper makes for publishing like advertisements is tendered.

Constitutional Law > ... > Freedom of Speech > Free Press > General Overview

HN4[] Freedom of Speech, Free Press

Newspaper publishers may refuse to publish whatever advertisements they do not desire to publish and this is true even though the newspaper in question may enjoy a virtual monopoly in the area of its publication.

Constitutional Law > ... > Freedom of Speech > Free Press > General Overview

HN5[] Freedom of Speech, Free Press

The publisher of a newspaper has the right to condition its acceptance of advertising upon its being in a form satisfactory to the newspaper and its being placed in a classification which, in the judgment of the newspaper, will result in a truthful and convenient disclosure to its readers. In short, since it may refuse to publish at all, it may require that advertisements submitted to it for publication comply with such rules and regulations as the publishers deem proper.

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

Constitutional Law > ... > Freedom of Speech > Free Press > General Overview

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Scope

HN6[] Communications, Sherman Act

Freedom of the press, like other freedoms, is not absolute. Thus, the constitutional rights of others, such as the right to equal treatment under the equal protection clause of the Fourteenth Amendment, require the recognition of narrow exceptions to the otherwise complete freedom of the publisher to publish or refuse to publish as he pleases. Nor does freedom of the press authorize the newspaper to attempt to monopolize in violation of the Sherman Antitrust Act.

Antitrust & Trade Law > Sherman Act > General Overview

Constitutional Law > ... > Freedom of Speech > Free Press > General Overview

HN7[] Antitrust & Trade Law, Sherman Act

The rejection by a newspaper, acting singly, of advertising because it does not meet the publisher's requirements does not violate the antitrust laws.

Charles Galbreath, pro se.

Judges: Brock, Justice wrote the opinion. Henry, C.J., and Fones, Cooper and Harbison, JJ., concur.

Opinion by: BROCK

Opinion

[*778] The plaintiff, Charles Galbreath, sought to purchase from the defendant newspapers, Tennessean Newspapers, Inc., and The Nashville Banner Publishing Company, and their jointly controlled publishing company, defendant Newspaper Printing Corporation, advertising space for publication of the following advertisement:

> "West End Area -- Lge. apt. 4 rms. 1 b.r., Cent. heat and a/c Drps. Shag cpts. frost free ref. gar. dis. ds. washer. $145 -- 352-4066."

The defendant, Newspaper Printing Corporation, to whom the proposed advertisement was submitted, refused to accept it in the foregoing form and agreed to publish it only after it was modified to read as follows:

> "West End Area -- Large apartment. 4 rooms. 1 bedroom. Central heat and air conditioning. Drapes. Shag carpet, frost free refrigerator. Garbage disposal. Dishwasher. $145. 352-4066."

The action of the defendants prompted the plaintiff, Galbreath, to file this **[**2]** class action in his own behalf and on behalf of all others similarly situated, seeking relief by way of a mandatory injunction requiring the defendant newspapers and their publishing company to "print all advertising, not violative of any law, as composed by the author of same upon the payment or offer of payment of the usual rate," and requiring "that the defendant cease censoring and modifying advertising copy submitted to it for publication by the plaintiff, Charles Galbreath, and all others similarly situated." The complaint also prayed for damages for "the excessive costs incurred because of the arbitrary, invalid and unconstitutional acts of the defendants," and for an award of reasonable attorneys fees and costs.

> The plaintiff alleges that the defendants ". . . have a monopoly in the metropolitan area of Nashville, Tennessee, in that only through the latter defendant [Newspaper Printing Corporation] may advertisement in newspapers with large daily circulations be published. That because of this monopoly there is no competition and the plaintiff and others similarly situated have no recourse but to submit to the excessive charges resulting from the arbitrary refusal **[**3]** of the Newspaper Printing Corporation to accept advertising copy utilizing the universally recognized economical method of reducing advertising costs by using abbreviations recognized in the trade of the business involved.
>
> "That the only reason the defendants refuse to permit liberal use of abbreviations in copy for advertisement is to unjustly enrich themselves at the expense of the advertiser consumer who, because of the monopoly enjoyed by the defendants, has no other source of advertisement in large daily newspapers in the area of the plaintiff's business activities."

The plaintiff further alleges that the refusal of the defendants to publish his tendered advertisement, as above quoted, was **[*779]** "wrongful and arbitrary" and ". . . forced the plaintiff against his will to allow the advertisement to be censored and changed so as to eliminate the economical use of abbreviations as customarily permitted in other advertising markets of the nation in the newspapers, and, forced him to choose between not advertising his property or incurring the substantial additional expense of having the advertisement published without abbreviations so as to require 33 1/2 percent more **[**4]** space and resulting costs."

In stating his legal theory, plaintiff alleges that the policy of the defendants in refusing to accept advertisements containing abbreviations is unreasonable, capricious and arbitrary ". . . and violative of the *First Amendment to the Constitution of the United States* and *Art. I, § 19, of the Constitution of Tennessee*, in that they restrict freedom of the press and because said policy and standards being direct outgrowths of a monopoly the resulting unfair competition is violative of *Art. I, § 22, of the Constitution of Tennessee.*" [1]

[5]** The defendants filed a motion for summary judgment coupled with a motion to dismiss the complaint upon the ground that it failed to state a claim upon which relief could be granted. The Chancellor sustained the motion to dismiss, holding that the complaint failed to state a cause of action. Upon appeal, the Court of Appeals reversed the Chancellor's order of dismissal and remanded the case for trial on the merits. We granted the petition for certiorari filed by the defendants.

I

HN1[] The publication of a newspaper is strictly the private business of its publisher, and it has been aptly observed that a publisher "in publishing a paper, assumes no 'office, trust, or station' in a public sense, nor does he enter into any public or contractual relation with the community at large. ***HN2***[] The rights and liabilities of newspaper publishers arising out of contracts are therefore governed by the rules applicable to contracts generally." 58 Am.Jur.2d *Newspapers, Periodicals, Etc.* § 20 (1971). Moreover, it is well settled in this country that ***HN3***[] a newspaper publisher is under no legal obligation to sell advertising to all who apply for it, and is not required to accept for publication any advertisement, **[**6]** although in proper form, even though the charge which the newspaper makes for publishing like advertisements is tendered. *Burke v. Kingsport Publishing Corporation, 377 F. Supp. 221*, *aff'd* *497 F.2d 923 (1974)*; *In re Louis Wohl, Inc., 50 F.2d 254 (Mich.App. 1931)*; *J.J. Gordon, Inc. v. Worcester Telegram Publishing Co., 343 Mass. 142, 177 N.E.2d 586 (1961)*; *Bloss v. Federated Publications, Inc., 5 Mich.App. 74, 145 N.W.2d 800 (1966)*, *aff'd* *380 Mich. 485, 157 N.W.2d 241 (1968)*; *Camp-of-the-Pines, Inc. v. New York Times Co., 184 Misc. 389, 53 N.Y.S.2d 475 (1945)*; *Approved Personnel, Inc. v. Tribune Company, 177 So.2d 704, 18 A.L.R.3d 1277 (Fla.App.1965)*; *Shuck v. Carroll Daily Herald, 215 Iowa 1276, 247 N.W. 813, 83 A.L.R. 975 (1933)*; *Friedenberg v. Times Pub. Co., 170 La. 3, 127 So. 345 (1930)*; *Mid-West Elec. Coop. v. West Texas Chamber of Comm., 369 S.W.2d 842 (Tex.Civ.App.1963)*; *Modla v. Tribune Publishing Company, 14 Ariz.App. 82, 480 P.2d 999 (1971)*.

HN4[] Newspaper publishers may refuse to publish whatever advertisements they do not desire to publish and this is true even though the newspaper in question may enjoy a virtual monopoly in **[**7]** the area of its publication. *Shuck v. Carroll Daily Herald, **[*780]** supra; J.J. Gordon, Inc. v. Worcester Telegram Publishing Co., supra; Mid-West Elec. Coop. v. West Texas Chamber of Comm., supra;* 66 C.J.S. *Newspapers* § 21c (1950). *Cf.* *Uhlman v. Sherman, 31 Ohio Dec. 54, 22* Ohio N.P.,N.S., 225, *Herald Company v. Seawell, 472 F.2d 1081 (Colo.App.1972)*. ***HN5***[] The publisher of a newspaper has the right to condition its acceptance of advertising upon its being in a form satisfactory to the newspaper and its being placed in a classification which, in the judgment of the newspaper, will result in a truthful and convenient disclosure to its readers. In short, since it may refuse to publish at all, it may require that advertisements submitted to it for publication comply with such rules and regulations as the publishers deem proper.

II

The plaintiff asserts that the freedom of the press provisions of the *First Amendment to the Constitution of the United States* and of *Art. I, § 19, of the Constitution of Tennessee* impose a duty upon the defendants and create a

---

[1] As pertinent here, *Art. I, § 19, of the Constitution of Tennessee* provides:

> "That the printing presses shall be free to every person to examine the proceedings of the Legislature; or of any branch or officer of the government, and no law shall ever be made to restrain the right thereof. The free communication of thoughts and opinions, is one of the invaluable rights of man, and every citizen may freely speak, write, and print on any subject, being responsible for the abuse of that liberty."

Art. I, § 22, of the Constitution of Tennessee provides:

> "That perpetuities and monopolies are contrary to the genius of a free State, and shall not be allowed."

correlative right in the plaintiff to publish his advertisements containing abbreviations, as hereinabove quoted. **[**8]** This assertion of the plaintiff is unsupported by either authority or reason. Indeed, the command of those constitutional provisions requires the opposite conclusion, *i.e.*, freedom of the press means freedom not to publish, as well as freedom to publish, as the publisher sees fit. As noted by the Iowa court in *Shuck v. Carroll Daily Herald, supra*, if a newspaper may be required to accept an advertisement, it may also be compelled to publish a news item or an editorial. [2]

[9]** III

The attempt by the plaintiff to rely upon the anti-monopoly provision of our Constitution is quite obscure; consequently, we are not certain what his theory is. He avers that the policy of the defendants in refusing to accept advertisements containing abbreviations is "unreasonable, capricious and arbitrary" and that

> ". . . said policy and standards, being direct outgrowths of a monopoly, the resulting unfair competition is violative of *Art. I, § 22 of the Constitution of Tennessee.*"
>
> He also alleges that the defendants
>
> ". . . have a monopoly in the metropolitan area of Nashville, Tennessee, in that only through the latter defendant (Newspaper Printing Corporation) may advertisements in newspapers with large daily circulations be published. That because of this monopoly there is no competition and the plaintiff and others similarly situated have no recourse but to submit to the excessive charges resulting from the arbitrary refusal of the Newspaper Printing Corporation to accept advertising copy utilizing the universally recognized economical method of reducing advertising costs by using abbreviations recognized in the trade of the business involved."

[10]** Both the Chancellor and the Court of Appeals have treated the complaint as alleging a violation of the Federal antitrust laws, a construction which we consider to be generous. [3]

[*781] The trial court held that the practice of the defendants in jointly refusing to accept for publication advertisements containing abbreviations such as that tendered by the plaintiff was authorized by the Newspaper Preservation **[**11]** Act, *15 U.S.C., §§ 1801, et seq.*, thus furnishing no basis for an action by the plaintiff. Section 2 of that Act provides:

> "Congressional declaration of policy
>
> "In the public interest of maintaining a newspaper press editorially and reportorially independent and competitive in all parts of the United States, it is hereby declared to be the public policy of the United States to preserve the publication of newspapers in any city, community, or metropolitan area where a joint operating arrangement has been heretofore entered into because of economic distress or is hereafter effected in accordance with the provisions of this chapter [*15 U.S.C.S., §§ 1801, et seq.*]."

Also pertinent here is § 1802(2) which provides:

---

[2] Of course, ***HN6***[] freedom of the press, like other freedoms, is not absolute. Thus, the constitutional rights of others, such as the right to equal treatment under the equal protection clause of the Fourteenth Amendment, require the recognition of narrow exceptions to the otherwise complete freedom of the publisher to publish or refuse to publish as he pleases. *See, Pittsburgh Press Co. v. Pittsburgh Com'n on Human Rel., 413 U.S. 376, 93 S. Ct. 2553, 37 L. Ed. 2d 669 (1973)*; *United States v. Hunter, 459 F.2d 205 (4th Cir. 1972)*; Civil Rights Act of 1968, *42 U.S.C. § 3604(c)*. Nor does freedom of the press authorize the newspaper to "attempt to monopolize" in violation of the Sherman Antitrust Act. *Lorain Journal Co. v. United States, 342 U.S. 143, 72 S. Ct. 181, 96 L. Ed. 162 (1951)*.

[3] Since both parties and both lower courts have treated the case as one alleging a violation of the Federal antitrust laws, we confine our discussion to that theory and do not determine whether the anti-monopoly provision of *Art. I, § 22, of the Constitution of Tennessee* is self executing and may furnish the basis for a civil action by one who claims that another has violated that provision. *See, The Charles River Bridge v. The Warren River Bridge et al., 36 U.S. 420, 11 Pet. 420, 9 L. Ed. 773 (1837)*; *Leeper v. State, 103 Tenn. 500, 53 S.W. 962 (1899)*; 58 C.J.S. *Monopolies* §§ 1, 27 (1948).

"As used in this chapter [*15 U.S.C.S., §§ 1801, et seq.*] --

* * *

"(2) The term 'joint newspaper operating arrangement' means any contract, agreement, joint venture (whether or not incorporated), or other arrangement entered into by two or more newspaper owners for the publication of two or more newspaper publications, pursuant to which joint or common production facilities are established or operated and joint or unified action is **[**12]** taken or agreed to be taken, with respect to any one or more of the following: printing; time, method, and field of publication; allocation of production facilities; distribution; advertising solicitation; circulation solicitation; business department; establishment of advertising rates; establishment of circulation rates and revenue distribution; *Provided*, That there is no merger, combination, or amalgamation of editorial or reportorial staffs, and that editorial policies be independently determined."

The Court of Appeals, while agreeing that the Newspaper Preservation Act applies, was of the opinion that the complaint alleged predatory pricing or practice which was not authorized by that Act. It relied upon § 4(c) of the Act which provides:

"Antitrust [exemptions]

* * *

"Nothing construed in the chapter [*15 U.S.C.S., §§ 1801, et seq.*] shall be construed to exempt from any ***antitrust law*** any predatory pricing, any predatory practice, or any other conduct in the otherwise lawful operations of a joint newspaper operating arrangement which would be unlawful under any ***antitrust law*** if engaged in by a single entity. Except as provided in this chapter, no **[**13]** joint newspaper operating arrangement or any party thereto shall be exempt from any ***antitrust law***."

The Court of Appeals further concluded that whether the joint advertising policy of the defendants constituted predatory pricing or practice presented a factual issue which required that the motion for summary judgment be denied. Accordingly, that court reversed the judgment of the trial court and remanded for a trial on the merits.

The refusal of a newspaper to accept tendered advertising because it fails to meet the standards required by the publisher, whether acting singly or jointly, does not amount to "predatory pricing or practice," as those terms are used in the antitrust laws. As used in such laws, "predatory" refers to pricing or other action aimed at competitors rather than the "gouging" of consumers. *See, International Air Ind., Inc. v. American Excelsior Co., 517 F.2d 714, 722 (5th Cir. 1975)*.

It has been held that ***HN7***[] the rejection by a newspaper, acting singly, of advertising because **[*782]** it does not meet the publisher's requirements does not violate the antitrust laws. *Staff Research Associates, Inc. v. Tribune Company, 346 F.2d 372 (7th Cir. 1965)*. **[**14]**

It follows, then, that the joint action of the defendants in refusing to accept such advertising does not come within the exception contained in § 4(c) of the Newspaper Preservation Act, above quoted, it being one which would not be unlawful if engaged in by a single entity.

We, therefore, conclude that the Court of Appeals erred in reversing the judgment of the Chancellor and in remanding this case for trial on the merits. The judgment of the Court of Appeals is reversed and that of the trial court is affirmed. Costs incurred in this Court will be taxed against the respondent.

Headnotes/Summary

Summary
CALIFORNIA OFFICIAL REPORTS SUMMARY

A district attorney filed an antitrust complaint for injunction, civil penalties and other equitable relief against a city and county. One cause of action alleged a per se violation of the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) by defendants' fixing of taxicab fares. Another cause of action by the Director of the California Department of Consumer Affairs, who was given permission to intervene, alleged that defendants had no lawful authority to set and fix taxicab fares, and that the section of the municipal code under which they purported to act was ultra vires and void. The trial court entered judgment for defendants on the pleadings on both causes of action. (Superior Court of the City and County of San Francisco, No. 715624, John E. Benson, Judge.)

The Court of Appeal affirmed. The court first held that federal antitrust cases had no relevance in determining whether the city was liable under the Cartwright Act, and that only California law needed to be consulted to determine whether the city could set taxicab fares under the act. The court further held that the city, as a political subdivision of the state, could not be sued under the act. While agreeing with the proposition that taxicab rates may be subject to regulation by the state Legislature through the Public Utilities Commission, the court pointed out that the Legislature has not yet claimed jurisdiction or sought control in this area; accordingly, the court held that absent an assertion by the state of its authority to regulate taxicab rates, the city had the power to do so. The court rejected plaintiffs' argument that even if the city was immune under the Cartwright Act, the individual members of the board of supervisors could be sued. (Opinion by Rouse, J., with Taylor, P. J., and Kane J., concurring.)

CA(1)[] **(1)**

Monopolies and Restraints of Trade § 6—Under Cartwright Act—Liability of City—Federal Law.

--In an antitrust action against a city alleging a violation of the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*), arising out of the fixing of taxicab fares, federal antitrust cases did not have any relevance in determining whether the city has liability under the Cartwright Act. Because the state acts as an originator of the antitrust laws in question, not as an intermediate sovereign between the cities and the originator of the antitrust laws, only California law need be consulted.

CA(2a)[] **(2a)** *CA(2b)*[] **(2b)** *CA(2c)*[] **(2c)** *CA(2d)*[] **(2d)**

Monopolies and Restraints of Trade § 6—Under Cartwright Act—Liability of Cities.

--In an antitrust action against a city alleging a violation of the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*), arising out of the fixing of taxicab fares the trial court properly entered judgment for defendant on the pleadings. Because cities are political subdivisions of the state and are specifically defined as persons entitled to sue under the act (*Bus. & Prof. Code, § 16750*), while the definition of "persons" subject to the act does not include cities or political subdivisions, the Legislature did not intend for cities to be subject to the Cartwright Act. Moreover, since the city could not be sued under the act, and the board of supervisors was operating within the scope of its powers in setting taxicab rates, individual members of the board could not be held individually liable for the same immune conduct.

[See **Cal.Jur.3d**, Monopolies and Restraints of Trade, §§ 19, *29; **Am.Jur.2d**, Monopolies, Restraints of Trade, and Unfair Trade Practices, § 472*.]

CA(3)[] **(3)**

Statutes § 39—Construction—giving Effect to Statute—Conformation of Parts.

--A legislative act is to be read as a whole, and its various parts harmonized so as to give effect to legislative intent. Whenever possible, effect should be given to every word, phrase and clause so that no part or provision will be useless or meaningless.

CA(4)[] **(4)**

Municipalities § 13—Legislative Control—Cities as Political Subdivisions of State.

--Municipal corporations are political subdivisions of the state. Subject only to its own laws and Constitution, the state may create, expand, diminish or abolish such subdivisions, conditionally or unconditionally, with or without the consent of the citizens, or even against their protest.

CA(5)[] **(5)**

Municipalities § 15—Powers—Police Power—Regulation of Business and Professions—Setting Taxicab Rates.

--While taxicabs are common carriers and their rates may therefore be subject to regulation by the state Legislature through the Public Utilities Commission, the Legislature has not claimed jurisdiction nor sought control in this area. Accordingly, absent an assertion by the state of its authority to regulate taxicab rates, a city has the power to do so, and the fact that taxicabs occasionally or frequently venture beyond the city and county limits is irrelevant.

Counsel: Joseph Freitas, Jr., District Attorney, Judith D. Ford, Raymond T. Bonner, David C. Moon, Gary G. Devine and Maria P. Rivera, Assistant District Attorneys, for Plaintiffs and Appellants.

Harry M. Snyder and Luana Martilla as Amici Curiae on behalf of Plaintiffs and Appellants.

Richard A. Elbrecht, Steven M. Fleisher and A. Paul Griebel for Intervener and Appellant.

George Agnost, City Attorney, and Edmund A. Bacigalupi, Deputy City Attorney, for Defendants and Respondents.

Judges: Opinion by Rouse, J., with Taylor, P. J., and Kane, J., concurring.

Opinion by: ROUSE

Opinion

[*915] [320]** Plaintiffs appeal from a judgment on the pleadings entered in favor of **[***2]** defendants City and County of San Francisco and its board of supervisors (hereafter City and Board). We are asked to decide whether the provisions of the Cartwright Act apply to the City and whether San Francisco has the authority, under the California Constitution, to set taxicab fares.

The instant action was initiated by the District Attorney of the City and County of San Francisco (hereafter District Attorney), who filed an antitrust complaint for injunction, civil penalties and other equitable **[*916]** relief. Permission to intervene was then granted to Richard Spohn, Director of the California Department of Consumer Affairs. Intervener's complaint was identical to that filed by the District Attorney, except that it added an eighth cause of action. The judgment on the pleadings was granted as to the first cause of action of both complaints and as to the eighth cause of action of the complaint in intervention. [1]

[*3]** The first cause of action alleged a per se violation of the Cartwright Act (*Bus. & Prof. Code, § 16700 et seq.*) by defendants' fixing of taxicab fares. The eighth cause of action in intervener's complaint alleged that defendants City and Board had no lawful authority to set and fix taxicab fares, and that the section of the San Francisco Municipal Code under which they purported to act is ultra vires and void.

The following facts were established by plaintiffs' request for admissions and defendants' response thereto: The Board fixes the fares which all taxicab companies operating in San Francisco must charge. Since January 1971, Yellow Cab has submitted five requests for fare increases to the Board. Although an increase was granted in response to all five requests, defendants denied that the fare was set at the level requested by Yellow Cab in every instance.

---

[1] All counts of plaintiffs' complaint relating to defendants City and Board were decided by the trial court; therefore, the one final judgment rule permits this appeal. (6 Witkin, Cal. Procedure (2d ed. 1971) Pt. I, § 42, p. 4057.)

Summary judgment for defendants was granted as to the third cause of action; however, this decision is not being appealed. The second, third, fourth, fifth, sixth and seventh causes of action do not run against the City or the Board and are therefore irrelevant to this appeal.

The portion of this action concerning Westgate California Corporation, Yellow Cab Company and Charles O'Connor were stayed by pending bankruptcy proceedings; as a result of these proceedings, the action against Yellow Cab was dismissed without prejudice.

[321]** Plaintiffs' [2] first four arguments on appeal are all based on the presumption that federal case law under the Sherman Anti-Trust Act (hereafter Sherman Act; *15 U.S.C.A. 1*) should be followed in this case. [3] They reason that since cases interpreting the Sherman Act are applicable to the California Cartwright **[***4]** Act (*Marin County Bd. of Realtors, Inc. v. Palsson (1976) 16 Cal.3d 920, 926 [130 Cal.Rptr. 1, 549 P.2d 833]*), recent changes in the federal law compel the conclusion that San Francisco is not exempt under the Cartwright Act.

[*917] Defendants' major argument is that *Widdows v. Koch (1968) 263 Cal.App.2d 228 [69 Cal.Rptr. 464]*, controls in this case. That case held that municipalities were not "persons" under *section 16702 of the Business and Professions Code* and therefore were not subject to the provisions of the Cartwright Act (p. 235). Defendants also contend that even though the Sherman Act cases are applicable, they can be distinguished from this case. Finally, they rely **[***5]** upon *In re Martinez (1943) 22 Cal.2d 259 [138 P.2d 10]*, which held that a municipality has the power to set taxicab rates for taxicabs operating within its boundaries.

CA(1)[] **(1)** The first question to be addressed, then, is whether federal antitrust cases have any relevance in determining whether a city has liability under the California Cartwright Act. Our analysis of the federal cases and California law leads us to conclude that, in this limited instance, federal case holdings provide no guide to the interpretation of California ***antitrust law***. Accordingly, plaintiffs' contention that federal law is pertinent to this case must fail.

In *Parker v. Brown (1943) 317 U.S. 341 [87 L.Ed. 315, 63 S.Ct. 307]*, the United States Supreme Court held that federal antitrust laws were not intended by Congress to apply to state action. The court reasoned that there was "nothing in the language of the Sherman Act or in its history which suggests that its purpose was to restrain a state or its officers or agents from activities directed by its legislature. In a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally **[***6]** subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress." (Pp. 350-351 [*87 L.Ed. p. 326]*.) It was pointed out that although previous cases had held that a state could sue under the federal antitrust laws, the legislative history of the act indicated that it prevented only "'business combinations.'" (P. 351 [*87 L.Ed. p. 326]*.) The act "must be taken to be a prohibition of individual and not state action." The state, acting as sovereign, is not prohibited by the Sherman Act from imposing a restraint as an act of government. (P. 352 [*87 L.Ed. p. 326]*.)

Goldfarb v. Virginia State Bar (1975) 421 U.S. 773 [44 L.Ed.2d 572, 95 S.Ct. 2004], held that the state action exemption announced in *Parker* was inapplicable to a minimum fee schedule for lawyers published by a local bar association and enforced by the state bar. In order to come within *Parker*, anticompetitive activities must be compelled by direction of the state acting as a sovereign. (P. 791 [44 L.Ed.2d p. 587].) The Virginia Supreme Court was authorized to regulate the practice of law, and had **[*918]** **[***7]** adopted ethical codes which dealt in part with fees, "and far from exercising state power to authorize binding price fixing, explicitly directed lawyers not 'to be controlled' by fee schedules." (P. 789 [44 L.Ed.2d p. 586].) When the state bar provided for disciplinary action for deviation from fee schedules, it "voluntarily joined in what is essentially a private anticompetitive activity" which is within the reach of the Sherman Act. (Pp. 791-792 [44 L.Ed.2d p. 587].)

In *Cantor v. Detroit Edison Co. (1976) 428 U.S. 579 [49 L.Ed.2d 1141, 96 S.Ct. 3110]*, a **[**322]** private utility distributed, without additional charge, lightbulbs to residential customers, under a longstanding practice antedating state regulation of electric utilities. This practice, challenged as an unlawful "tie-in" of bulbs to electricity, was described in the utilities tariffs, which were binding on the utility until changed. Nevertheless, the challenged tie-in was held not to be immune from antitrust laws. The court pointed out that Chief Justice Stone in *Parker* had carefully selected language which plainly limited the court's holding to official action taken by state officials. (P. 591 **[***8]** [49 L.Ed.2d p. 1150].) "The cumulative effect of these carefully drafted references unequivocally differentiates between official action, on the one hand, and individual action (even when commanded by the State),

---

[2] The District Attorney filed a written brief on appeal. Intervener adopts and joins in all arguments in District Attorney's brief.

[3] An amicus curiae brief filed on behalf of Consumers Union of United States, Inc. and the Gray Panthers of San Francisco takes essentially the same position as plaintiffs.

on the other hand." (P. 591, fn. 24 [94 L.Ed.2d p. 1150].) The court emphasized that *Cantor* was distinguishable from *Parker* because the only defendant in *Cantor* was a public utility and there was no claim that any state action violated the antitrust laws. Since *Parker* involved the issue of whether the sovereign state itself was subject to the antitrust laws, it was not controlling in *Cantor*. (Pp. 591-592 [49 L.Ed.2d p. 1150].) Therefore, since the state had merely approved but had not mandated the "tie-in" arrangement, the state action "exemption" did not apply.

By contrast, a Sherman Act immunity was found in *Bates v. State Bar of Arizona (1977) 433 U.S. 350 [53 L.Ed.2d 810, 97 S.Ct. 2691]*. The United States Supreme Court found that a ban on price advertising, adopted by the Arizona Supreme Court, did not violate the Sherman Act, because the state court itself had adopted the challenged rule, and the state bar's role was completely defined. **[***9]** The court found the restraint to be compelled by direction of the state acting as sovereign. (P. 360 [53 L.Ed.2d p. 821].) Nevertheless, the ban on advertising was invalidated on the ground that it violated the First Amendment because of overbreadth. (Pp. 383-384 [53 L.Ed.2d pp. 835-836].)

Finally, in *Lafayette v. Louisiana Power & Light Co. (1978) 435 U.S. 389 [55 L.Ed.2d 364, 98 S.Ct. 1123]*, the court held that cities were not **[*919]** exempt from the federal antitrust laws, when they owned and operated electric utility systems both within and beyond their city limits. The court pointed out that cities have long been "persons" under the Sherman Act (citing *Chattanooga Foundry v. Atlanta (1906) 203 U.S. 390 [51 L.Ed. 241, 27 S.Ct. 65]*.) The court concluded that the "*Parker* doctrine exempts only anticompetitive conduct engaged in as an act of government by the State as sovereign, or, by its subdivisions, pursuant to state policy to displace competition with regulation or monopoly public service." (P. 413 [55 L.Ed.2d p. 383].)

On the basis of their analysis of the above cases, plaintiffs conclude that, before local government can deprive the public **[***10]** of the benefits of competition, the conduct must be thoroughly analyzed, and the government must establish that it has been compelled by the state to engage in the otherwise unlawful activity.

Defendants subscribe to the concept that federal cases interpreting the Sherman Act are applicable to the Cartwright Act. (*Widdows v. Koch, supra, 263 Cal.App.2d at p. 234*.) However, they conclude that the federal cases can be used to support their position that San Francisco can regulate taxicab fares.

As previously stated, we have concluded that, under the limited circumstances of this case, the federal holdings are irrelevant. All parties ignore the problem of equating the system under which federal ***antitrust law*** is developed with the system under which California ***antitrust law*** is developed.

The Sherman Act cases are all based on the concept of state sovereignty. A city's antitrust liabilities and exemptions under the federal act are derived through an intermediate state sovereign located between the city and the federal government which enacted the law. Thus, in the framework of the federal act, San Francisco would have an antitrust exemption only if it was compelled to set **[***11]** taxicab fares by the State of California, the intermediate sovereign. **[**323]** It appears to us that the above described analysis is meaningless when attempting to determine a city's liability under the Cartwright Act. California is no longer an intermediate sovereign; it is the originator of the ***antitrust law***. Cities are no longer acting through an intermediate sovereign as under the Sherman Act. In California, cities are operating under constraints imposed by the Cartwright Act, and their liabilities are determined solely by the California Legislature. In this instance, the state is acting as an originator of the antitrust laws, not as an intermediate sovereign under federal antitrust **[*920]** concepts. To determine if San Francisco can set taxicab fares under the Cartwright Act, we need look only to California law. There is no intermediate sovereign between the cities and the originator of the antitrust laws.

CA(2a)[↑] **(2a)** To determine the nature and extent of San Francisco's responsibilities under the Cartwright Act, we should first determine whether, in enacting the Cartwright Act, the Legislature intended to allow cities to be sued as defendants. All parties argue the merits **[***12]** of *Widdows v. Koch, supra, 263 Cal.App.2d 228*, which held that cities were not "persons" under the act. While the reasoning of *Widdows* may be questionable, the basic holding is correct. [4] HN1[] The Cartwright Act defines "persons" to include "corporations, firms, partnerships and associations." (Bus. & Prof. Code, § 16702.) It is apparent that this definition does not include cities.

[*13]** On the other hand, we note that section 16750 of the Business and Professions Code, which is located in the Enforcement section of the Cartwright Act, does include a city within its definition of a person. Subdivision (a) of this section provides, in pertinent part, that "Any person who is injured in his business or property by reason of anything forbidden or declared unlawful by this chapter, may sue therefor . . . ." Subdivision (b) states that "The state and any of its political subdivisions and public agencies shall be deemed a person within the meaning of this section."

CA(3)[] **(3)** HN2[] Fundamental rules of statutory interpretation require that a legislative act be read as a whole, and its various parts harmonized so as to give effect to legislative intent. Whenever possible, effect should be given to every word, phrase and clause so that no part or provision will be useless or meaningless. (Smith v. Regents of University of California (1976) 58 Cal.App.3d 397, 403 [130 Cal.Rptr. 118].)

CA(2b)[] **(2b)** It seems reasonable to assume that, in order to prevent its provisions from being useless, and to harmonize it with the earlier definition of "person," the Legislature included subdivision (b) of **[***14]** section 16750 because it had not intended to include the state and its political **[*921]** subdivisions under the definition of "person" in section 16702. Subdivision (b) speaks in terms of "this section," i.e., section 16750. Thus it is clear that the state and its political subdivisions can sue *as plaintiffs* under the authority of this section. However, since they are "persons" *only* under that section, it is implicit that they cannot be sued as defendants. Therefore, if San Francisco is a political subdivision of the state, it cannot be sued under the Cartwright Act.

The City is a municipal corporation known by the name of San Francisco. (City & County of S.F. Charter (1978) art. I, § 1.100.)

CA(4)[] **(4)** HN3[] Municipal corporations are political subdivisions of the state. Subject only to its own laws and Constitution, the state may create, expand, diminish or abolish such subdivisions, and all this may be done, **[**324]** conditionally or unconditionally, with or without the consent of the citizens, or even against their protest. (Weber v. City Council (1973) 9 Cal.3d 950, 957 [109 Cal.Rptr. 553, 513 P.2d 601].)

CA(2c)[] **(2c)** It appears that, since San Francisco is a political subdivision **[***15]** of the state, the Legislature did not intend for it to be subject to the Cartwright Act. Accordingly, we conclude that the judgment on the pleadings in favor of defendants on the first cause of action must be affirmed.

Plaintiffs next argue that defendants have no authority to fix taxicab fares. This issue was raised in the eighth cause of action in the complaint in intervention.

Plaintiffs cite in part from article XII, section 23, of the California Constitution of 1879, as it read prior to the 1911 and 1914 amendments: "From and after the passage by the Legislature of laws conferring powers upon the Railroad Commission respecting public utilities, all powers respecting such public utilities vested in boards of supervisors, or municipal councils, or other governing bodies of the several counties, cities and counties, cities and towns, in this State, or in any commission created by law and existing at the time of the passage of such laws, shall cease so far as such powers shall conflict with the powers so conferred upon the Railroad Commission; *provided, however, that this section shall not affect such powers of control over public utilities as relate to the making and enforcement* **[***16]** *of local, police, sanitary and other regulations, other than the fixing of rates* . . . ." (Italics added.)

---

[4] The internal reasoning of *Widdows* appears to us to be inconsistent. After determining that municipalities do not come within the definition of "persons," the court writes: "The city . . . made no contract or agreement and entered into no conspiracy in restraint of trade or to establish monopoly, but imposed the restraint as an act of government which the Cartwright Act did not undertake to prohibit." (P. 235.) Implicit in this language is the concept that a city is liable under the Cartwright Act if its actions are not characterized as an act of government. This is not consistent with its earlier holding that cities are not "persons" and are not subject to Cartwright Act restrictions.

[*922] Plaintiffs rely on the emphasized portion to support their position that cities cannot fix rates. They point out that, notwithstanding the repeal of this section in 1974, the portion thereof which relates to the setting of fares is still in effect. [5]

However, when the entire clause is read in context, plaintiffs' argument that the emphasized portion of section 23, article XII, *ante*, stands for the proposition that cities are not permitted to fix fares, must fail.

The relevant portion of article XII, section 23, provided, in pertinent part: "From and after the passage by the Legislature of laws conferring powers upon the Railroad **[***17]** Commission . . . all powers respecting such public utilities vested in boards of supervisors . . . of the several . . . cities and counties . . . shall cease so far as such powers shall conflict with the powers so conferred upon the Railroad Commission . . . ." (The Railroad Commission is the predecessor of the Public Utilities Commission.) This phrase indicates that, if there is a conflict between local laws and the powers granted to the commission by the Legislature, the commission powers override.

The next phrase qualifies the foregoing: "[Provided], however, that this section shall not affect such powers of control over public utilities as relate to the making and enforcement of local, police, sanitary and other regulations, other than the fixing of rates . . . ." This provision means that the Legislature cannot give the commission powers over local enforcement of local, police, sanitary or other regulations, with one exception, the setting of rates. Thus, if it so chooses, the Legislature can give the commission power to set rates. However, the clear implication is that if the Legislature fails to do so, the local government can fill the void with its own regulation.

This **[***18]** interpretation is supported by the present constitutional provision concerning regulation of public utilities. In 1974, the electors approved a new article XII which was entitled "Public Utilities" and discussed the powers of the Public Utilities Commission. ***HN4***[] Section 8 of article XII now provides that: "A city, county, or other public body may not regulate matters over which the Legislature grants regulatory power to the Commission. This section does not affect **[**325]** power over public utilities relating to the making and enforcement of police, sanitary, and other **[*923]** regulations concerning municipal affairs pursuant to a city charter existing on October 10, 1911, unless that power has been revoked by the city's electors, or the right of any city to grant franchises for public utilities or other businesses on terms, conditions, and in the manner prescribed by law." This section simply restates an existing rule that local government bodies may not regulate in areas in which the commission acts. Implicit in this provision is that, if the Legislature does not grant powers to the commission, then a city may regulate. Thus, to decide whether San Francisco has the power **[***19]** to regulate taxicab fares, it must first be determined if the Legislature has authorized the Public Utilities Commission to act in that area.

The California Constitution classifies taxicabs and their owners as public utilities. "Private corporations and persons that own, operate, control or manage a . . . system for the transportation of people or property . . . are public utilities subject to control by the Legislature." (*Cal. Const., art. XII, § 3*.) The Legislature has asserted this control in the Public Utilities Code.

Chapter 8 of the Public Utilities Code is entitled the "Passenger Charter-Party Carriers' Act." (*Pub. Util. Code, § 5351 et seq.*) A charter-party carrier of passengers is "every person engaged in the transportation of persons by motor vehicle for compensation, whether in common or contract carriage, over any public highway in this State." (*Pub. Util. Code, § 5360*.) There are exceptions to this definition, one of which is taxicabs. "The provisions of this chapter do not apply to: . . . Taxicab transportation service licensed and regulated by a city or county, by ordinance or resolution, rendered in vehicles designed for carrying not more than eight persons **[***20]** excluding the driver." (*Pub. Util. Code, § 5353, subd. (g)*.)

Thus, it is clear that the Legislature has not given the Public Utilities Commission authority to regulate taxicab fares if they are already licensed and regulated by a city. The Legislature has thereby implicitly approved of local regulation of taxicabs; therefore, it follows that San Francisco is not precluded from regulating them.

---

[5] Plaintiffs rely on article XII, section 9, of the 1974 amendment, which reads: "The provisions of this article restate all related provisions of the Constitution in effect immediately prior to the effective date of this amendment and make no substantive change."

Plaintiffs argue that, even if cities can regulate taxicabs, they are nowhere authorized to set fares. They contend that the words "licensed" and "regulated" in *section 5353, subdivision (g), of the Public Utilities Code*, are not synonymous with "setting fares." They claim that they can find no authority which permits a city to set fares.

[*924] In the case of *In re Martinez, supra, 22 Cal.2d 259*, the California Supreme Court held that the Railroad Commission (forerunner of the Public Utilities Commission) did not have jurisdiction over the regulation of taxicabs and that the City of Sacramento was acting within its power when it chose to fix fares for taxicab companies within the municipality.

Plaintiffs rely on *People v. Western Air Lines, Inc. (1954) 42 Cal.2d 621 [268* ***[***21]*** *P.2d 723]*, which overruled "Anything in the Martinez case which is out of harmony with these conclusions . . . ." (P. 642.)

Western Air Lines, Inc., held that an airline was a public utility within the meaning of the California Constitution. (P. 639.) In reaching this conclusion, the Supreme Court expressed concern about the confusion which is alleged to have resulted from divergent holdings of the court on the question of whether a carrier, which is in fact a common carrier transportation company, should be subject to rate regulation by the commission although not specifically mentioned in the Constitution or the statute. (P. 639.)

The court first examined *Western Assn. etc. R. R. v. Railroad Comm. (1916) 173 Cal. 802 [162 P. 391, 1 A.L.R. 1455]*, where it was held that the commission had jurisdiction over certain motor truck and transportation companies despite the fact that they were not specifically mentioned in the Constitution or statutes. (*People v. Western Air Lines, Inc., supra, 42 Cal.2d at p. 640*.) The court then contrasted that case with *In* **[**326]** *re* *Martinez, supra, 22 Cal.2d 259*, which had reasoned that since taxicabs were not specifically **[***22]** mentioned in the Constitution or statutes, they could *not* be regulated by the commission. (*Western Air Lines, Inc., supra, 42 Cal.2d at p. 641*.) In order to resolve an apparent inconsistency, the *Western Air Lines, Inc*. court overruled this reasoning in *Martinez*.

What remains of *Martinez* is the reasoning that the Legislature intended to exempt taxicabs from state regulation. This portion of the case finds independent support in an amicus curiae brief filed by the commission stating that the commission had consistently taken the position that its jurisdiction did not extend to the regulation of local taxicabs and for that reason it had never attempted to regulate their operation. (*People v. Western Air Lines, Inc., supra, 42 Cal.2d at p. 641*.) Thus, we conclude that the basic holding of *Martinez* that taxicab rates can be set by cities because the Legislature has not given this power to the commission is still good law. For this reason, plaintiffs' argument that there is no authority for the setting of taxicab fares by a city must fail.

[*925] Plaintiffs also argue that *In re Martinez, supra, 22 Cal.2d 259*, is inapposite because it established **[***23]** only the limited rights of local governments to regulate taxicab companies operating wholly within the city or county involved. Since taxis regulated by San Francisco are not wholly operated within the City, it is argued that *Martinez* does not apply. Plaintiffs contend that the growth of the taxicab business compels the conclusion that local jurisdictions no longer have the authority to regulate them; "If there is to be any regulation, it must be by the state."

CA(5)[↑] **(5)** We have no quarrel with the proposition that, as common carriers, taxicab rates may be subject to regulation by the state Legislature through the Public Utilities Commission. We observe, however, that the Legislature has not yet claimed jurisdiction, nor has it sought control in this area. Accordingly, we hold that, absent an assertion by the state of its authority to regulate taxicab rates, the city has the power to do so. Such holding is not "out of harmony" with *People v. Western Air Lines, Inc., supra, 42 Cal.2d at page 642*. Until the state does assume such jurisdiction, the fact that taxicabs occasionally (or even frequently) venture beyond the city and county limits is of no moment.

Plaintiffs' final **[***24]** argument is that even if the City is immune under the Cartwright Act, the individual members of the Board can be sued.

In *Martelli v. Pollock (1958) 162 Cal.App.2d 655 [328 P.2d 795]*, the court found that members of the city council had immunity from liability toward persons affected by decisions made within the scope of their powers. The court reasoned that there was no question but that the council was empowered to pass ordinances and, despite allegations of wrongful motive, are protected by the doctrine of legislative immunity. (Pp. 658-659.) To support this, the court relied on *Hardy v. Vial (1957) 48 Cal.2d 577 [311 P.2d 494]*. In that case, the California Supreme Court stated, "The rule of absolute immunity, notwithstanding malice or other sinister motive, is not restricted to public officers who institute or take part in *criminal* actions. First recognized for the protection of judges [citation], it has been extended by the federal decisions to all executive public officers when performing within the scope of their power acts which require the exercise of discretion or judgment." (*Hardy, supra, p. 582*.) In addition, a city attorney and a clerk-administrator **[***25]** have immunity when acting within the scope of their employment. (*Martelli, supra, at pp. 659-660*.)

CA(2d)[] **(2d)** Here, the Board was operating within the scope of its powers. Its setting of taxicab rates did not violate the Cartwright Act. It strikes us as **[*926]** both illogical and unreasonable to hold that the City cannot be sued under the Cartwright Act, and then permit the Board members to be individually liable for the same immune conduct.

[327]** The judgment on the pleadings in favor of defendants on the first cause of action of both complaints, and on the eighth cause of action of the complaint in intervention, is affirmed.

Hecht Co. v. Southern Union Co.

United States District Court for the District of New Mexico

May 14, 1979

No. 78-958-M Civil

Reporter

474 F. Supp. 1022 *; 1979 U.S. Dist. LEXIS 12416 **; 1979-1 Trade Cas. (CCH) P62,647

The Hecht Company, a New Mexico Corporation, et al., Plaintiffs, v. Southern Union Company, a corporation, et al., Defendants.

Core Terms

natural gas, state action, defendants', regulation, Sherman Act, purchasers, plaintiffs', antitrust, consumers, wellhead, producers, immunity, Brick, interstate commerce, conspiracy, anti trust law, electricity, prices, exempt, farm, primary jurisdiction, Clayton Act, contractor, products, parties, pass-on, laches, rates

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN1[] **Antitrust & Trade Law, Sherman Act**

To meet the "engaged in commerce" requirement of the Clayton Act and to be within the purview of the Sherman Act defendants' activities need not be interstate. The proposition that intrastate activities which adversely affect interstate commerce come within the scope of the Sherman Act is established beyond question. The defendants' activities constitute conduct within the reach of federal ***antitrust law*** if those activities substantially and adversely affect interstate commerce. Likewise the effect on interstate commerce need not be direct.

Antitrust & Trade Law > Regulated Practices > Private Actions > General Overview

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

Transportation Law > ... > Federal Powers > Powers of Congress > Substantial Relations

HN2[] **Regulated Practices, Private Actions**

No special form of pleading is indicated or sanctioned in antitrust cases. Indeed the liberal rules of pleading are as applicable to these cases as any other case.

HN9[] **Natural Gas Industry, Distribution & Sale**

N.M. Stat. Ann. § 62-6-5 (1978) states in pertinent part: A. The commission shall have general and exclusive power and jurisdiction to regulate and supervise every public utility in respect to its rates and service regulations, and in respect to its securities, all in accordance with the provisions; and subject to the reservation of, the Public Utility Act and to do all things necessary and convenient in the exercise of its power and jurisdiction. B. The sale, furnishing or delivery of gas, water or electricity by any person to a utility for resale to or for the public shall be subject to regulation by the commission but only to the extent necessary to enable the commission to determine that the cost to the utility of such gas, water or electricity at the place where the major distribution to the public begins shall be reasonable and that the methods of delivery thereof shall be adequate; provided, however, that nothing herein contained shall be construed to permit regulation by the commission of production or sale price at the wellhead of gas or petroleum, except regulation of abandonment.

Energy & Utilities Law > Utility Companies > Buying & Selling of Power

Energy & Utilities Law > Natural Gas Industry > General Overview

Energy & Utilities Law > Natural Gas Industry > Distribution & Sale

Energy & Utilities Law > Utility Companies > General Overview

HN10[] **Utility Companies, Buying & Selling of Power**

The New Mexico Public Service Commission (Commission) cannot regulate the price of gas at the wellhead. *N.M. Stat. Ann. § 62-6-4* makes it abundantly clear that the Commission can disallow, for rate-making purposes, any portion of a price paid by a utility which the Commission finds to be unreasonable Unless well head transactions are involved. Neither does New Mexico law permit any other governing body to regulate the price of natural gas at the wellhead. The Natural Gas Pricing Act, *N.M. Stat. Ann. § 62-7-1 et seq.* (1978), sets a ceiling on the price of natural gas. It does not require that producers reach or sell at the "maximum allowable base price" nor does it tell producers and purchasers how to arrive at a fair, reasonable and proper price. New Mexico leaves the price of gas at the wellhead to competition. A decision to buy or sell at the "maximum allowable base price" or any other price is not state compelled.

Opinion by: MECHEM

Opinion

[*1024] ORDER

The plaintiff Hecht Company is a New Mexico corporation conducting farming activities in Curry County, New Mexico. The individual plaintiffs also engage in farming in Curry and Roosevelt Counties, New Mexico. The defendants are producers of natural gas sold for consumption in New Mexico. The defendants insist **[**2]** that plaintiffs by their complaint are simply contesting the state-approved rate for natural gas per mcf. The plaintiffs, however, bring their action **[*1025]** pursuant to the Sherman Act, *15 U.S.C. §§ 1* and *2*, and the Clayton Act, *15 U.S.C. §§ 15* and *26*, alleging that the defendants have artificially raised the statewide cost of natural gas in New Mexico by combining and conspiring illegally to increase the wellhead price of all natural gas sold in the State.

Various defendants have moved to dismiss the complaint for lack of subject matter jurisdiction and for failure to state a claim. Some of the defendants have moved that affirmative defenses be treated as motions to dismiss. The defendants have filed numerous exhibits, each accompanied by a certification. The plaintiffs have filed extensive affidavits and exhibits. By these actions the parties have invited consideration of the motions to dismiss as motions for summary judgment. I find the latter to be the better way to treat the pending motions and all parties were so notified by Order entered April 16, 1979.

The defendants raised principally the anti-trust defenses of lack of interstate commerce, lack of standing, state action **[**3]** immunity, the Noerr-Pennington doctrine, and the "pass-on" defense recently considered in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. I have considered as well the doctrine of primary jurisdiction, Res judicata, waiver, laches and estoppel. I conclude that jurisdiction is present, that the plaintiffs state a justiciable claim and that therefore the defendants' motions for summary judgment should be denied and the case heard on the merits.

I. INTERSTATE COMMERCE

The defendants contend that the alleged restraint or price fixing does not involve a transaction within the flow of commerce and that the alleged conspiracy does not involve natural gas other than that produced in New Mexico and sold exclusively intrastate. Thus the defendants assert the complaint fails to allege the requisite effect on interstate commerce and the plaintiffs' claims must be dismissed for lack of federal jurisdiction.

HN1[] To meet the "engaged in commerce" requirement of the Clayton Act and to be within the purview of the Sherman Act defendants' activities need not be interstate. "The proposition that intrastate activities which adversely affect interstate commerce come **[**4]** within the scope of the Sherman Act is established beyond question." *Burke v. Ford, 377 F.2d 901 (10th Cir. 1967)*, rev'd on other grounds *389 U.S. 320, 88 S. Ct. 443, 19 L. Ed. 2d 554 (1968)*. The defendants' activities constitute conduct within the reach of federal ***antitrust law*** if those activities substantially and adversely affect interstate commerce. *Hospital Building Co. v. Trustees of Rex Hospital, 425 U.S. 738, 96 S.*

Ct. 1848, 48 L. Ed. 2d 338 (1976). Likewise the effect on interstate commerce need not be direct. 425 U.S. at 744, 96 S. Ct. 1848, 48 L. Ed. 2d 338.

The defendants state that as to the natural gas supplied to the plaintiffs, "No interstate production, transmission or sale was involved." The defendants, nevertheless, in distribution of their product have the use and benefit of interstate gas lines. The plaintiffs' complaint, in addition, clearly indicates that the acts complained of have a substantial and adverse effect on the plaintiffs' interstate business and on the price of goods the plaintiffs put into interstate commerce. ***HN2***[] No "special form of pleading is indicated or sanctioned in antitrust cases. Indeed the liberal rules of pleading are as applicable to these **[**5]** cases as any other case." *New Home Appliance v. Thompson, 250 F.2d 881, 883 (10th Cir. 1957)*. I conclude, then, that the plaintiffs have adequately set out a nexus between the defendants' concerted activities and interstate commerce sufficient to support federal jurisdiction.

II. STANDING

Defendants argue that the natural gas in the San Juan Basin of New Mexico, the pricing of which is the basis of plaintiffs' complaint, was never physically delivered to the plaintiffs "or anyone else in Curry County or Clovis." Defendants contend **[*1026]** that the plaintiffs attack only a rate making process. Defendants insist that because the plaintiffs are neither producers of natural gas nor direct purchasers of natural gas from the San Juan Basin nor a target of the alleged conspiracy to fix prices, the plaintiffs have no standing to sue under the Clayton Act.

HN3[] Standing to sue pursuant to *15 U.S.C. § 15* is a question of law to be determined by the trial court. *John Lenore and Co. v. Olympia Brewing Co., 550 F.2d 495, 498 (9th Cir. 1977)*. Plaintiffs need not be within a "target area" of an alleged illegal conspiracy to sue under the Clayton Act. A direct injury or any injury in fact is sufficient **[**6]** to give the plaintiffs standing. *Loeb v. Eastman Kodak Co., 183 F. 704, 709 (3rd Cir. 1910)*.

I need not decide which test to apply; I conclude that the plaintiffs have established a sufficient basis for standing under any of the tests utilized in antitrust actions. When the defendants agreed to the price of natural gas in the San Juan Basin they had to know by virtue of other contracts that this price would effect the price of all natural gas in New Mexico. Thus plaintiffs as consumers of natural gas in New Mexico can be said to be a target of defendants' activities and agreements. ***HN4***[] By reason of the increased cost of business and the increased cost of goods bought and sold by the plaintiffs the plaintiffs can be said to have suffered direct "Antitrust injury . . . of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, 429 U.S. 477, 489, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977)*.

III. PRIMARY JURISDICTION AND RES JUDICATA

I find the doctrine of primary jurisdiction and Res judicata inappropriately applied to the present case. ***HN5***[] The doctrine of primary jurisdiction is limited to **[**7]** those instances where an administrative agency by reason of particular expertise in the area or by virtue of statutory authority has adjudicative, investigatory or remedial jurisdiction over the claims. Here no administrative agency, state or federal, has statutory power over plaintiffs' claims. Neither is there any agency where the plaintiffs are required by law to exhaust their remedies nor any agency with unique expertise in the field.

The role of the New Mexico Public Service Commission will be discussed in consideration of defendants' state action defense. It suffices to say here that I am not bound by the Commission's decisions nor do I believe that the Commission has previously considered all that plaintiffs set out in this action. Accordingly, I consider the defenses of primary jurisdiction and Res judicata of little merit.

IV. WAIVER, LACHES AND ESTOPPEL

The defendants present some loosely-woven ideas regarding waiver and estoppel. They contend that because the plaintiffs did not raise all of the present issues with the New Mexico Public Service Commission they have waived a right to raise the issues here. Defendant Continental Oil Company states: "Since plaintiffs had **[**8]** full opportunity and notice to intervene and appear in the proceedings before the Public Service Commission in 1976, plaintiffs also must now be deemed to have waived their right to challenge the action of the Public Service Commission." I see no logic to this argument. The Public Service Commission does not hear antitrust cases. Neither the Public Service Commission nor the State of New Mexico are parties to this action. The plaintiffs are not "challenging" the actions of the Commission. Defendants' point has nothing to do with the plaintiffs' right to bring a federal court action alleging restraint of trade, price-fixing and conspiracy to raise the price of natural gas.

Neither is laches properly raised. The defendants have suffered no prejudice. ***HN6***[] "Lapse of time alone does not constitute laches." *Shell v. Strong, 151 F.2d 909, 911 (10th Cir. 1945)*. More importantly, ***HN7***[] the **[*1027]** plaintiffs' case is controlled by *15 U.S.C. § 15b*, a four-year statute of limitation. Laches, being an equitable consideration, is not to bar an action prior to expiration of the four-year period set by Congress. See: *International Telephone and Telegraph Corp. v. General Telephone and Electronics Corp.,* ***[**9]*** *518 F.2d 913, 927, 928 (9th Cir. 1975)*.

V. THE NOERR-PENNINGTON DOCTRINE

Defendants, in a shotgun approach, also raise as a defense the doctrine established in *Eastern Railroad Presidents Conf. v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*. Defendant Southland Royalty Company states: "Plaintiffs May claim that it is not the action of the New Mexico Public Service Commission of which they complain, but rather the Defendants' conduct which influenced the administrative body and ultimately affected the gas rates charged Plaintiffs." (Emphasis added.) I do not find anywhere that the plaintiffs have so claimed.

HN8[] The Noerr doctrine is applicable only where the alleged Sherman Act violation is an attempt by private parties to induce governmental action: ". . . no violation of the Act can be predicated upon mere attempts to influence the passage or enforcement of laws." *365 U.S. at 135, 81 S. Ct. at 528*. The defendants either misread the plaintiffs' complaint or failed to consider seriously *Rule 11 of the Federal Rules of Civil Procedure*. Had the defendants looked for "good ground to support" their Noerr-Pennington defense, they could have saved a much **[**10]** over burdened file an additional volume.

VI. THE ILLINOIS BRICK DEFENSE

Defendant Supron contends that the ruling of *Illinois Brick Co. v. Illinois, supra*, demands the plaintiffs' case against Supron be dismissed for lack of direct injury to the plaintiffs. Supron argues:

> . . . the gas delivered to plaintiffs is sold to them by Gas Company of New Mexico. In turn, Gas Company of New Mexico buys its gas from a number of producers, including SUPRON. Plaintiffs are not, however, direct purchasers of gas from SUPRON and are, therefore, not injured within the meaning of the Clayton Act according to the recent Supreme Court ruling in Illinois Brick Co. v. Illinois (cite omitted).

In Illinois Brick petitioners were manufacturers of concrete block. Three price pass-ons occurred in the case: manufacturer to masonry contractor, masonry contractor to general contractor, general contractor to customer.

> The only way in which the antitrust violation alleged could have injured respondents is if all or part of the overcharge was passed on by the masonry and general contractors to respondents, rather than being absorbed at the first two levels of distribution. *431 U.S. at 727, 97 S. Ct.* ***[**11]*** *at 2065*.

The question to be resolved in the present case is whether the plaintiffs are direct or indirect purchasers of natural gas. The gas producer Supron sells to Gas Company of New Mexico who, by benefit of a cost-plus contract, passes the full costs of its purchases to the plaintiffs. It could be said that one pass-on occurs at this point. Supron is to Gas Company of New Mexico, however, more like a supplier of powdered concrete would be to a manufacturer of bricks. The defendant Supron does not place a product on the public market; only the defendant Gas Company of New Mexico does. Supron supplies the product to the defendant Gas Company of New Mexico, who then, without transforming or processing the product, acts as a pass-through or a conduit, delivering the product to the plaintiffs.

Illinois Brick speaks to distribution of a product from one businessman to another, each businessman adding to the price of the product. In every transaction the mark-up of the product is clearly discernible. The product begins and ends as bricks.

Plaintiffs here produce farm products. Their claim, on the other hand, goes not to the price of farm products, but to the price **[*1028]** **[**12]** of natural gas. Plaintiffs are at once consumers of natural gas and businessmen; they may operate their homes and farms by use of natural gas, but they do not transform natural gas into wheat. Plaintiffs are direct purchasers of natural gas. Plaintiffs' customers purchase farm products. Notwithstanding that as farmer-businessmen plaintiffs put a product on the market made costlier by the cost paid for natural gas, the farmers nonetheless remain direct purchasers and ultimate consumers of natural gas. Although the products plaintiffs sell go on to others, any increase in the price of these products due to rising gas prices is not separable and distinguishable in the manner of Illinois Brick and does not engender or even encourage the kind of multiple antitrust claimants Illinois Brick was intended to prevent. The plaintiffs allege a combination and conspiracy of the suppliers of natural gas and the Gas Company of New Mexico which results directly in harm to the plaintiffs. I do not find the kind of chain considered in Illinois Brick and the pass-on theory does not prevent the present case.

VII. STATE ACTION

The Sherman Act "must be taken to be a prohibition of individual and not state **[**13]** action." *Parker v. Brown, 317 U.S. 341, 352, 63 S. Ct. 307, 314, 87 L. Ed. 315*. Citing 62-6-4 NMSA 1978, the defendants argue that the price of natural gas to New Mexico consumers is determined by the New Mexico Public Service Commission and therefore the action of which plaintiffs complain is "governmental action wholly immune from the federal antitrust laws." ***HN9***[] The New Mexico statute states in pertinent part:

> A. The commission shall have general and exclusive power and jurisdiction to regulate and supervise every public utility in respect to its rates and service regulations, and in respect to its securities, all in accordance with the provisions; and subject to the reservation of, the Public Utility Act and to do all things necessary and convenient in the exercise of its power and jurisdiction. . . .
>
> B. The sale, furnishing or delivery of gas, water or electricity by any person to a utility for resale to or for the public shall be subject to regulation by the commission but only to the extent necessary to enable the commission to determine that the cost to the utility of such gas, water or electricity at the place where the major distribution to the public begins shall **[**14]** be reasonable and that the methods of delivery thereof shall be adequate; provided, however, that nothing herein contained shall be construed to permit regulation by the commission of production or sale price at the wellhead of gas or petroleum, except regulation of abandonment . . . . 62-6-4 NMSA 1978.

By their complaint the plaintiffs allege that the defendants acted in restraint of trade by combining and conspiring illegally to raise the price of natural gas. Without reciting a long history of transactions, plaintiffs allege basically that by a collusive and contrived court action and settlement, by a triggering of "favored nation" clauses, and by use of "Rule 20" authorized by the New Mexico Public Service Commission to allow pass-through of gas purchasing costs to the consumer, the defendants artificially raised the wellhead price of natural gas and simultaneously increased natural gas rates to New Mexico consumers.

The purchaser-distributor, defendant Gas Company of New Mexico, and the natural gas producers, the other defendants here, hold contracts which include what is commonly referred to as "favored nation" clauses. These clauses provide that if the gas purchaser enters **[**15]** into a contract to purchase gas from another producer at a price higher than that price specified in the contract, the price agreed upon shall be escalated to equal the higher price of a subsequent contract. The Public Service Commission's "Rule 20" is titled "Adjustment of Rates to Compensate for Changes in Cost of Purchased Gas" and permits Gas Company of New Mexico to pass on to consumers charged on "Affected Rate Schedules", as **[*1029]** are the plaintiffs, the full cost of its gas purchases.

Although the Public Service Commission can inquire as to other costs defendant Gas Company of New Mexico can include in computation of its rate to customers, the Commission cannot inquire into wellhead prices. 62-6-4 B NMSA 1978. *Maestas v. New Mexico Public Service Commission, 85 N.M. 571, 514 P.2d 847 (1973)*. When a "favored nation" clause is invoked, then, and defendant Gas Company of New Mexico increases payments to all its supplier-producers, the full cost of the increase is passed on to New Mexico consumers. Defendants rely on the Public Service Commission's sanctions of the "favored nation" clauses, of the pass-on of gas purchase costs to the consumers and of the ultimate rate charged **[**16]** by Gas Company of New Mexico on its "Affected Rate Schedules" as the requisite state action that bars defendants' liability under federal ***antitrust law***.

By its statement in *Parker v. Brown, supra*, that state action was not subject to antitrust liability, the Supreme Court deferred to the concepts of federalism and affirmed Congressional intent that the Sherman Act not reach action by a state. Although the immunity thus established is without doubt, the scope of the immunity remains undefined, See: The State Action Exemption and Antitrust Enforcement Under the Federal Trade Commission Act, 89 Harv.L.Rev. 715 (1976).

> It is safe to assume that the language of the general exemption in Parker means that Some state action is exempt; nevertheless, the language of limitation indicates that Not all state action is exempt. Slater, Antitrust and Government Action: A Formula for Narrowing Parker v. Brown, 69 Northwestern L.Rev. 71, 73 (1974).

Clearly, Parker "becomes applicable when the state, in pursuit of legitimate police power goals, seeks to replace enforcement competition with a scheme of regulation." 69 Northwestern at 91. New Mexico has a scheme of regulation and actively regulates **[**17]** the gas distribution and rate schedules of the defendant Gas Company of New Mexico and any distributors of natural gas that would operate on the same horizontal lines as Gas Company of New Mexico. The distinction must be made again, however, that plaintiffs are not attacking the rate-making process, but an alleged restraint of trade resulting in increased prices at the wellhead. Plaintiffs complain of actions on a level conceptually beneath that line of operations regulated by the New Mexico Public Service Commission. Plaintiffs are saying that the acts of the defendants, before the rates are subject to review by the Commission, have interjected into the rating scheme an artificial component, that is an illegally increased gas price. Thus plaintiffs maintain, and I agree, that the actions complained of are not state actions, but private actions.

Certain limits of Parker v. Brown can be enumerated by the case itself and by subsequent cases: (1) state action immunity is not conferred merely by a state authorizing Sherman Act violations; (2) a private conspiracy is not saved from Sherman Act liability because a state joins in the conspiracy; (3) only closely supervised anticompetitive **[**18]** practices in an area where a state clearly sets out its intention to substitute regulation for competition provides a clear immunity; (4) only where the individual action is compelled, as opposed to condoned, by the state will the immunity be found. See: *Parker v. Brown, supra* ; Posner, The Proper Relationship Between State Regulation and the Federal Antitrust Laws, 49 N.Y.L.R. 693 (1974).

HN10[] The New Mexico Public Service Commission cannot regulate the price of gas at the wellhead. Quoting first the New Mexico statute set out above, the New Mexico Supreme Court states in *Maestas, supra, at 573, 514 P.2d at 849-850*:

> The above provision makes it abundantly clear that the Commission can disallow, for rate-making purposes, any portion of a price paid by a utility which the Commission finds to be unreasonable Unless well head transactions are involved. Here the subsidiary Producing Company **[*1030]** is involved in such well head transactions and thus is not covered by Commission regulation. (Emphasis added.)

Neither does New Mexico law permit any other governing body to regulate the price of natural gas at the wellhead. The Natural Gas Pricing Act, 62-7-1 et seq. NMSA 1978, sets **[**19]** a ceiling on the price of natural gas. It does not require that producers reach or sell at the "maximum allowable base price" nor does it tell producers and purchasers how to arrive at a fair, reasonable and proper price. New Mexico leaves the price of gas at the wellhead to competition. A decision to buy or sell at the "maximum allowable base price" or any other price is not state compelled. Thus I conclude this case is not within the Parker rule.

New Mexico's regulatory scheme is designed to displace business freedom only on one level. It does not reach the level now called into question. The State acquiesces in a rate to be charged consumers of natural gas and authorizes a maximum wellhead price if buyers and sellers choose to reach that maximum price. Nothing in the

State's scheme, however, acts to prevent the price-fixing alleged by plaintiffs. In natural gas purchasing, the State does not authorize illegal price-fixing, does not condone or join in price-fixing conspiracies, does not regulate or actively supervise the sale of gas at the wellhead and does not compel the agreements, contracts or prices agreed upon among the defendants in this action. If anticompetitive conduct **[**20]** occurs, as the plaintiffs allege, it is not state action.

In *Cantor v. Detroit Edison Co., 428 U.S. 579, 96 S. Ct. 3110, 49 L. Ed. 2d 1141 (1976)*, Michigan regulated pervasively distribution of electricity, but did not regulate the distribution of electric light bulbs. Detroit Edison Company regularly furnished to five million customers both electricity and electric light bulbs. Cantor, a retail druggist selling light bulbs, charged Detroit Edison with a Sherman Act violation, "using its monopoly power in the distribution of electricity to restrain competition in the sale of bulbs . . . ." *428 U.S. at 581, 96 S. Ct. at 3113*.

The Court in Cantor recited an "important distinction between economic action taken by the State itself and private action taken pursuant to a state statute permitting or requiring individuals to engage in conduct prohibited by the Sherman Act." *428 U.S. at 589, 96 S. Ct. at 3117*. I find the Cantor decision much more instructive in the present case than Parker v. Brown.

> In this case, unlike Parker, the only defendant is a private utility. No public officials or agencies are named as parties and there is no claim that any state action violated the antitrust **[**21]** laws. Conversely, in Parker there was no claim that any private citizen or company had violated the law. The only Sherman Act issue decided was whether the sovereign State itself, which had been held to be a person within the meaning of § 7 of the statute, was also subject to its prohibitions. Since the case now before us does not call into question the legality of any act of the State of Michigan or any of its officials or agents, it is not controlled by the Parker decision. *428 U.S. at 591, 96 S. Ct. at 3118*.

Cantor emphasizes, in considering state action immunity, the importance of choice. In Cantor, Detroit Edison, in spite of a comprehensive regulatory scheme, had a choice with regard to the actions found to be proscribed. Similarly in this case I find that defendants have a choice. Cantor involved the same sort of "blend of private and public decision making" I find here. The Cantor court held:

> . . . neither Michigan's approval of the tariff filed by respondent, nor the fact that the lamp-exchange program may not be terminated until a new tariff is filed, is a sufficient basis for implying an exemption from the federal antitrust laws for that program. *428 U.S. at 598, **[**22]** 96 S. Ct. at 3121*.

Thus I conclude that defendants' actions of which plaintiffs complain are neither exempt nor immune from the Sherman Act by reason of state action.

[*1031] VIII. CERTIFICATION

The defendants have failed to establish their motions and the plaintiffs have presented a justiciable controversy. I conclude the motions for summary judgment must be denied on all grounds.

I recognize, however, that the case is a complex one both in law and in fact. The case of *Illinois Brick v. Illinois, supra*, is a difficult one. The state action question is frequently open to controversy. It would not serve the interests of judicial economy to keep these defendants in a lengthy action and to present the case for a jury's determination only to find out that jurisdiction was from the beginning lacking. The questions of jurisdiction presented by this case are controlling questions of law as to which there is substantial ground for difference of opinion. An immediate appeal from this Order may materially advance the ultimate termination of the litigation.

Now, Therefore,

IT IS ORDERED that the defendants' motions for summary judgment are hereby denied.

The recovery of actual single damages must be the basis for the court's assessment of monetary recovery in an antitrust settlement.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN3[] Private Actions, Remedies

Under the antitrust laws an alleged co-conspirator, after settlement with one defendant, will remain liable for the full amount of treble damages that could have been collected from the original defendants, less only the actual amount paid under the settlement. Thus, the court need not examine a partial settlement as closely as it would a complete settlement since a class will relinquish no part of its potential recovery.

Opinion

[*652] MEMORANDUM APPROVING BEECHAM CCS SETTLEMENT

The Court now has before it the Settlement Agreement dated November 1, 1978, between defendants Beecham Group Limited and Beecham Inc. (collectively "Beecham") and the representatives of the city, county and state ("CCS") plaintiff classes. This agreement is conditioned upon the Court's approval of a proposed consent decree between the United States and Beecham. A final judgment in accordance therewith is entered of even date herewith. Beecham's co-defendant, Bristol-Myers Company ("Bristol"), strenuously objects to both settlements. No one else has objected to the Beecham-CCS settlement. The Court has heard arguments of counsel for all parties at preliminary **[**2]** and final hearings concerning both settlement proposals, and has had the benefit of papers filed in support **[*653]** thereof and in opposition thereto, as well as the information and experience the Court has gained in the previous discovery, pretrial and settlement proceedings in these cases.

The agreement provides for the settlement of claims based on the antitrust violations with regard to ampicillin and other semisynthetic penicillin drugs which have been or might be asserted against the Beecham defendants by the CCS plaintiffs and classes in this litigation, and by potential similar plaintiffs in other political entities of the United States. Beecham will give the plaintiffs certain economic relief and other cooperation in return for its dismissal. Beecham will establish a fund of $ 2,070,000, with interest at the average prime rate from November 1, 1978, on behalf of the classes. This amount will not be distributed to class members until the settlement or final adjudication of the CCS case against Bristol. This delayed distribution will preserve the fund against the expense of two separate distributions. The fund will continue to earn interest until the Bristol case is **[**3]** resolved. The settlement also contains a most-favored-nations clause, by which the fund will be reduced proportionally if the CCS plaintiffs agree to a settlement with Bristol of less than $ 6.44 million before October 31, 1980, or more than 30 days before a firm trial date. In addition, Beecham will assist the plaintiffs in their prosecution of this case against Bristol, by helping them to obtain the deposition and trial testimony of certain Beecham employees and former employees.

A preliminary hearing regarding the Beecham-CCS agreement was held in this Court on November 8, 1978. On November 17, 1978, the Court issued an order based upon the information gathered at that hearing. That order preliminarily determined that "the proposed settlement is within the range of possible approval." Implicitly, it rejected the initial objections of Bristol-Myers Company. In addition, the Court conditionally certified for settlement purposes a "Residual CCS-Beecham Settlement Class" composed of certain political entities not already included as plaintiffs in the pending actions, established a date for the final settlement hearing, and ordered that notice be sent to class members and potential **[**4]** members concerning the settlement proposal and hearing date.

Pursuant to the November 17 order, notice of the proposed settlement was sent to some 49,000 potential class members, including cities, counties, states, hospital and school districts which may have purchased the drugs in question. This notice fully informed class members of material aspects of this litigation, of the proposed settlement and their rights to object to, comment upon, or exclude themselves from it. Because no immediate distribution of the fund is contemplated, class members were not asked to respond with proofs of damages at this time. The evidence before the Court indicates that the liaison attorneys for the classes have made every effort to properly notify all potential class members. Individual notice has been afforded to all potential class members who could be identified with reasonable effort. It appears that this has been the best notice practicable under the circumstances, as required by *Fed.R.Civ.P. 23*.

The Court has received 170 timely requests for exclusion from this litigation from recipients of the notice, as well as five late requests. Many of these requests to opt out of the settlement **[**5]** are from non-members of the plaintiff class, who have requested exclusion because they never purchased the drugs in question. Such requests were, of course, unnecessary, and can have no effect on the Court's approval or disapproval of the settlement. So far as the Court knows, no drug purchasers have requested exclusion from the settlement. Section 5 of the settlement agreement gave Beecham the right to withdraw from the agreement if, in its judgment, a substantial proportion of class members requested exclusion from the settlement. Beecham has chosen not to exercise this option. This decision can be understood as Beecham's determination that the requests for exclusion are not substantial enough to create a danger of extensive further litigation by **[*654]** "opt-outs." In the Court's view, the requests for exclusion are of insufficient moment to draw into question the validity of the settlement from the perspective of class members. Furthermore, it is unlikely that Beecham will be prejudiced if the Court accepts those exclusion requests from notice recipients which were filed late but prior to the final settlement hearing. Therefore, all potential class members which filed **[**6]** requests for exclusion prior to April 9, 1979, will be excluded from this litigation, pursuant to *Fed.R.Civ.P. 23(c)(2)*.

No class member has in any way objected to the settlement, nor did any previously unrepresented class member appear at the final settlement hearing to offer advice, evidence, comments or suggestions concerning the settlement agreement. ***HN1***[] This failure of class members to attack the adequacy of the settlement may be considered in determining the value of the settlement to class members.

It is apparent from the Court's own knowledge of this case that this settlement was negotiated at arm's-length, and with the utmost regard for the interests of the classes. Substantial monetary relief is obtained on behalf of the classes. The liaison attorneys estimate that it amounts to at least one-half of the amount of potential damages based on direct purchases which class members could prove at trial before trebling. ***HN2***[] The recovery of actual single damages must be the basis for the Court's assessment of monetary recovery in an antitrust settlement. *Detroit v. Grinnell Corp., 495 F.2d 448 (2d Cir. 1974)*.

Liaison attorneys for the classes express near certainty that an ultimate **[**7]** award if this case is litigated to conclusion will be much greater than the present settlement fund, and that Beecham's share of such an award would amount to a greater sum than it now offers. However, they point out that ***HN3***[] under the antitrust laws, as Beecham's alleged co-conspirator, Bristol-Myers will remain liable for the full amount of treble damages that could have been collected from the original defendants, less only the actual amount paid by Beecham. It is argued that the Court need not examine this partial settlement as closely as it would a complete settlement, since the class will relinquish no part of its potential recovery. This is fair, they argue, since Bristol is probably responsible for the larger share of illegal profits. (See discussion below concerning most-favored-nations clause.) In addition, the class will benefit by Beecham's aid in the litigation against Bristol.

The proposition upon which the attorneys rely is well-established ***antitrust law***. See *Wainwright v. Kraftco Corp., 58 F.R.D. 9 (N.D.Ga.1973)*; *Baughman v. Cooper-Jarrett, Inc., 530 F.2d 529* (3d Cir.), Cert. denied, *429 U.S. 825, 97 S. Ct. 78, 50 L. Ed. 2d 87 (1976)*; *Zenith Radio Corp v. Hazeltine **[**8]** Research, Inc., 401 U.S. 321, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*. While this is indeed an added argument in favor of the settlement, the Court has not relied heavily on this proposition to determine the adequacy of the settlements. Risks inhere in the most airtight of cases. In this Court's view, its present certainty is an important argument in favor of this settlement. Bristol's continuing liability has been of greater significance in this Court's assessment of the value of Beecham's litigation cooperation which is part of its consideration for the settlement. It is apparent that Beecham's assistance in the case against Bristol will prove invaluable to the plaintiffs, and adds substantially to the economic value of the settlement package to the plaintiff classes. (See Order approving U.S.-Beecham Consent Decree, issued of even date.)

The remaining defendant in this litigation, Bristol-Myers, has raised several objections to this settlement. Bristol's objections concerning the discovery provisions of the settlement and Beecham's dismissal from the litigation are dealt with in orders concerning Bristol's motion to amend its answers and the United States-Beecham consent decree, **[**9]** which are issued of even date herewith. It should be noted that ***HN4***[] Bristol has no standing to object to this settlement between Beecham and the CCS plaintiffs. See *In re Nissan Motor Corp. Antitrust Litigation, 552 F.2d 1088, 1103 n. 17 (5th **[*655]** Cir. 1977)*. Furthermore, it seems unlikely that its general objections are raised from any legitimate concern to protect the classes.

Bristol has raised one argument which relates specifically to the Beecham-CCS agreement, and one aspect of which implicates the settlement's fairness to the classes. Bristol argues that the most-favored-nations clause may harm the classes and Bristol as a litigant, by forcing upon them the continued litigation of the case or a reduction in the total CCS recovery. The design of the clause assures that it will not operate prejudicially. The dollar amount of $ 6.44 million at which the clause comes into operation is intended to preserve the Beecham-Bristol damage ratio which was established in a global settlement offer of 1975. The ratio is the same as was approved by the Court for the settlement of other class claims against Beecham and Bristol in this litigation. See Order of October 20, 1978, approving **[**10]** wholesale and retail druggist and private hospital (WRPH) settlement. At one time or another, all of the attorneys in this litigation have represented that this ratio is based on the estimated proportion of Beecham and Bristol ampicillin sales. Assuming that Beecham's settlement payment bears some relation to actual damages, it is unlikely that the $ 6.44 million figure which would trigger the clause is so low as to bar reasonable settlement discussions. Furthermore, by its own terms, the clause is limited in duration. Its inhibiting effect on negotiations will cease by November 1980. The establishment of a firm trial date by this Court would further abbreviate the clause's operation. Therefore, it seems unlikely that either Bristol or the classes will be harmed by the clause. Rather, the classes may benefit from any additional incentive it may create for favorable settlement terms.

The Court has carefully considered all the terms of the proposed Beecham-CCS settlement, and the objections thereto. It has determined that the proposed settlement is fair, reasonable and adequate, and in the best interests of the CCS classes, and will approve it pursuant to *Fed.R.Civ.P. 23(e)*. **[**11]**

HN1[] Regulated Practices, Price Fixing & Restraints of Trade

In determining whether the non-statutory labor exemption applies to the reserve system provisions of a collective bargaining agreement in professional sports, the proper accommodation is: First, the labor policy favoring collective bargaining may potentially be given pre-eminence over the antitrust laws where the restraint on trade primarily affects only the parties to the collective bargaining relationship. Second, federal labor policy is implicated sufficiently to prevail only where the agreement sought to be exempted concerns a mandatory subject of collective bargaining. Finally, the policy favoring collective bargaining is furthered to the degree necessary to override the antitrust laws only where the agreement sought to be exempted is the product of bona fide arm's-length bargaining.

Antitrust & Trade Law > Regulated Industries > Sports > General Overview

Business & Corporate Compliance > ... > Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Subjects

HN2[] Regulated Industries, Sports

The subject of player movement restrictions is a proper one for resolution in the collective bargaining context. When so resolved, the labor exemption to antitrust attack applies, and the merits of the bargaining agreement are not an issue for court determination. The bargaining agreement is subject to change from time to time as it expires and is up for renegotiation.

Opinion

[*1194] The reserve system, [1] in professional athletics, has been the subject of exhaustive and spirited discussion both in the sports and **[**2]** in the legal world. Its supporters urge that it stimulates athletic competition between the teams of a sports league; its opponents urge that it stifles economic competition among those same teams. We have no doubt that there is a measure of truth in both claims.

[3]** I. NHL RESERVE SYSTEM

Involved in this appeal is the validity, under federal antitrust laws, of the reserve system currently in effect in the National Hockey League. In its present form, the system has been termed a "modified Rozelle Rule" because it closely resembles the rule promulgated for the National Football League by its commissioner, Pete Rozelle, but has been modified to the extent that arbitration is not by the commissioner himself but by a professional and independent arbitrator.

At the heart of the NHL reserve system is By-Law Section 9A, which is attached as Appendix A. This section provides the rules governing the acquisition of free agents of other clubs in the league and is specifically made applicable to the players in the league by paragraphs 17 and 18 of the Standard Players Contract, [2] **[**4]** which

---

[1] Mr. Ziegler, the President of the National Hockey League, testified concerning the objectives the National Hockey League's version of the reserve system is designed to serve. According to Ziegler, the reserve system prevents deterioration in competitive balance among the NHL teams, thereby allowing the presentation of an attractive form of competitive entertainment. We note, however, the effectiveness of a reserve system in preserving competitive athletic balance depends in great measure upon its restraint of the free market forces that would otherwise control player movement within the sports league. Historically and continuing to the present day, professional sports leagues have employed various forms of the reserve system. See, e.g., *Flood v. Kuhn, 407 U.S. 258, 259 n. 1, 92 S. Ct. 2099, 32 L. Ed. 2d 728 (1972)* (baseball); *Smith v. Pro-Football, Inc., 193 U.S. App. D.C. 19, 593 F.2d 1173 (1978)* (football); and *Robertson v. National Basketball Ass'n., 389 F. Supp. 867, 874 (S.D.N.Y.1975)* (basketball).

[2] Paragraph 17 describes a player's rights and duties upon the expiration of the term of his contract. In relevant part, Paragraph 17 states:

(a) The Club may no later than August 10th of the final year of this contract, tender the Player a Player's Termination Contract and notify him that he has the choice of executing said Player's Termination Contract and delivering it to the Club on or before September 10th of that year or automatically being unconditionally released from any further obligation to provide services under this contract as of midnight, September 10th of that year. The Player's Termination Contract shall be on the same terms and conditions as this contract except that it shall be for only one additional season at the Player's previous year's salary and shall provide for the Player's unconditional release from any further obligation to provide services under said Player's Termination Contract effective the following June 1st.

(b) If the Club does not take the action permitted under subsection(a), it shall no later than September 1st of the final year of this contract (August 10th if the Player is a "protected" player or played at least fifty NHL games in the preceding season), tender the Player a new Standard Player's Contract upon the same terms and conditions (including this *Section 17*) as this Standard Player's Contract except that salary and the number of years of its fixed term may be different.

(c) Without regard to any action taken by the Club under subsections (a) or (b), the Player may notify the Club no later than September 10th of the final year of this contract that he wishes to sign a Player's Option Contract. If the Player gives such notice, the Club shall no later than September 25th of that year tender the Player a Player's Option Contract, and the Player shall forthwith enter into said contract. The Player's Option Contract shall be on the same terms and conditions as this contract except that it shall be for only one additional season at the Player's previous year's salary and shall provide that effective the following June 1st the Player will be a free agent, without any further obligation to provide services under said Player's Option each player in the NHL is required to sign. Further, **[*1195]** the Standard Players Contract, expressly including Paragraph 17, was approved by both the NHL team owners and the National Hockey League Players Association (NHLPA) in the current collective bargaining agreement, Sections 9.03(a) and (b). [3.]

As can be seen from its terms, By-Law Section 9A mandates that when a player becomes a free agent and signs a contract with a different club in the league, his original club has the right under the By-Law to exact an "equalization payment" from the acquiring club. That payment may be by the assignment of contracts of players, by the assignment of **[**5]** draft choices, or "as a last resort," by the payment of cash. If mutual agreement is not reached, each club submits a proposal to a neutral arbitrator, selected by majority vote of the Board of Governors of the League, who then must select, without change, one of the two proposals submitted.

II. THIS LITIGATION

On October 10, 1977, Dale McCourt, a 21-year-old hockey player from Canada, signed a NHL Standard Players Contract (1974 form) with the Detroit Hockey Club, Inc. to play professional hockey for three years with the Detroit Red Wings. [4.] **[*1196]** McCourt was to be paid $ 325,000 over three years. He subsequently played his rookie year, 1977-78, with the Red Wings and was the leading scorer.

Contract, and as such will have the right, as provided by Section 9A of the League By-Laws, the text of which Section is printed on the reverse side hereof, to negotiate and contract with any club in the League, or with any other club.

(d) If the Club does not take the action permitted under subsection (a) and the Player does not give notice to the Club in accordance with subsection (c), then the parties shall enter into a new Standard Player's Contract by mutual agreement or, failing such agreement, the parties shall enter into a new one-year Standard Player's Contract for the succeeding season upon the same terms and conditions (including this *Section 17*) as this Standard Player's Contract, except as to salary, which shall be determined by neutral arbitration under the applicable collective bargaining agreement providing a mechanism for such arbitration, provided, however, that if no such collective bargaining agreement is then in effect, the Player's salary shall be the same as his salary for the previous year.

Paragraph 18 goes further. By Paragraph 18, the parties "mutually promise and agree to be legally bound by the Constitution and By-Laws of the League and by all the terms and provisions thereof . . . ."

[3.] Section 9.03, in part, provides:

(a) Each hockey player employed by each Club in the National Hockey League shall enter into the form of Standard Players Contract, . . . hereby recognized as valid and binding.

(b) The Association, recognizing that the Clubs have entered into this Agreement in reliance on Section 9.03(a), represents that it has been duly authorized to collectively agree to paragraph 17 of the Standard Players Contract . . . and to the applicability of the provisions of Section 9A of the National Hockey League By-Laws as fair and reasonable terms of employment . . . .

The Association hereby so agrees in its capacity as the exclusive bargaining representative of hockey players in the National Hockey League under this Agreement.

[4.] McCourt has claimed that the Red Wings admitted that his contract included an unwritten understanding with the club that he would not be involuntarily traded. Nevertheless, his contract provided, in Paragraph 11:

It is mutually agreed that the Club shall have the right to sell, assign, exchange and transfer this contract, and to loan the Player's services to any other professional hockey club, and the Player agrees to accept and be bound by such sale, exchange, assignment, transfer or loan, and will faithfully perform and carry out this contract with the same purpose and effect as if it had been entered into by the Player and such other Club . . . .

If the Player fails to report to such other Club he may be suspended by such other club and no salary shall be payable to him during the period of such suspension . . . .

The testimony was that such side agreements were not infrequent, but that any contract which formally incorporates a no-trade provision would automatically be rejected by the Commissioner. This is obviously true, since By-Law Section 9A.8(d), incorporated in McCourt's contract by Paragraphs 17 and 18, specifically provided that the contracts of all players under an acquiring club at the time a free agent is acquired shall be available for equalization purposes. The breach of contract counts have not as yet been decided below or appealed to this court.

[6]** Rogatien Vachon had been a star goaltender for the Los Angeles Kings for six years when he became a free agent in 1978. After rejecting a substantial offer by the Kings, Vachon entered into a contract with the Red Wings at a salary of $ 1,900,000 for five seasons. By signing Vachon, the Red Wings obligated itself to make an equalization payment under By-Law Section 9A to the Kings and, when no agreement was reached, each club submitted to arbitrator Houston a proposal pursuant to By-Law Section 9A.8. The Red Wings offered two of its players as compensation and the Kings proposed that McCourt's contract be assigned to it. The arbitrator selected the Kings' proposal and accordingly, the Red Wings assigned McCourt's contract to Los Angeles. Rather than report to the Kings, however, Dale McCourt brought suit in the United States District Court for the Eastern District of Michigan.

Named as defendants in that suit were the National Hockey League, the Los Angeles Kings, the National Hockey League Players Association, and the Detroit Red Wings. Count I of McCourt's complaint alleged that the reserve system, and consequently the assignment of his contract to the Los Angeles Kings as **[**7]** the compensation for free agent Vachon, violated *Section 1* of the Sherman Act, *15 U.S.C. § 1 (1976)*, and sought injunctive relief under Sections 4 and 10 of the Clayton Act, *15 U.S.C. §§ 15* and *26 (1976)*, to prevent the defendants from enforcing the arbitration award and to require that his contract be reassigned to the Detroit Red Wings. [5.]

On September 19, 1978, following an extensive evidentiary hearing, the district court entered a preliminary injunction restraining the defendants from enforcing the arbitration award and from penalizing McCourt for refusing to play professional hockey with the Los Angeles Kings pursuant to the award. This appeal followed. [6.]

[8]** In an opinion accompanying the preliminary injunction and reported at *460 F. Supp. 904*, the district judge held that By-Law Section 9A unreasonably restrains trade in commerce, in violation of *Section 1* of the Sherman Act:

> Like the "Rozelle Rule," bylaw 9A applies to all players without regard to status or ability; it applies to the average player and to the superstar alike; it is unlimited in duration and acts as a perpetual restriction upon a player's ability to freely contract for his services. Bylaw 9A cannot be justified by any legitimate business purpose to achieve the NHL's announced goal of maintaining competitive balance. It inhibits and deters teams from signing free agents, decreases a player's bargaining power in negotiations, denies players the right to sell their services in a free and open market, and it depresses salaries more than if competitive bidding were allowed. Thus, we conclude that plaintiff has sufficiently established that bylaw 9A, as applied, unreasonably restrains trade and commerce and is violative of *Section 1* of the Sherman **[*1197]** Act. See *Mackey v. National Football League, 543 F.2d 606 (8th Cir. 1976)*.

[9]** *460 F. Supp. at 907* (footnote omitted).

Having thus ruled, the trial judge went on to hold that the defendants were not entitled to the benefit of the non-statutory labor exemption from antitrust sanctions because "(t)he preponderance of evidence . . . establishes that bylaw 9A was not the product of bona fide arm's length bargaining over any of its anticompetitive provisions. The evidence establishes that the bylaw was unilaterally imposed upon the NHLPA and was incorporated into the

---

5. Three other counts in the complaint asserting state contract and antitrust claims and one count alleging a violation of the U.S. Arbitration Act, *9 U.S.C. § 1 Et seq. (1976)*, are not the subject of this appeal.

6. The defendants brought this appeal from the issuance of the preliminary injunction. Following oral argument, the parties filed a stipulation stating:

It is hereby stipulated by and between all the parties to this action: (1) that all parties waive their rights to a trial on the merits of this action as to Count I of plaintiff's Complaint; (2) that the record and the oral and written findings of fact and conclusions of law now before this Court, which were developed at the hearing on plaintiff's motion for preliminary injunction, shall be deemed to constitute the final record and findings of fact and conclusions of law after a trial on the merits as to such Count I; (3) that the appeals filed by defendants under *28 U.S.C. § 1292(a)(1)* from the order granting a preliminary injunction may be treated by this Court as appeals, under *28 U.S.C. § 1291*, from a final decision of the District Court and (4) that plaintiff may renew his remaining claims following this appeal.

collective bargaining agreement in the identical language it contained when it was first adopted by the League." *460 F. Supp. at 910*.

III. ANTITRUST LIABILITY

While the Supreme Court has ruled that other professional sports do not enjoy the unique exemption from antitrust laws which has historically been reserved for the game of baseball, *Flood v. Kuhn, 407 U.S. 258, 92 S. Ct. 2099, 32 L. Ed. 2d 728 (1972)*, it has never directly ruled upon whether the reserve system common to most professional athletics comes within the ban of the Sherman Act, nor has it expressly determined whether the reserve system is a mandatory subject of collective bargaining and, **[**10]** therefore, exempt under federal labor policy from the operation of the federal antitrust laws. [7.]

[11]** Assuming without deciding that reserve systems such a those here are subject to *Section 1* of the Sherman Act and could otherwise be violative of it, we proceed to determine whether the non-statutory labor exemption applies upon the facts here.

IV. LABOR EXEMPTION

A. Legal Standards

The trial court and the parties before us in this appeal have all relied upon Mackey as properly enunciating the governing principles in determining whether the non-statutory labor exemption applies to the reserve system provisions of a collective bargaining agreement in professional sports. *Mackey v. National Football League, 543 F.2d 606 (8th Cir. 1976)*, Cert. dismissed, *434 U.S. 801, 98 S. Ct. 28, 54 L. Ed. 2d 59 (1977)*. There Judge Lay set forth three broad principles:

> ***HN1***[] We find the proper accommodation to be: First, the labor policy favoring collective bargaining may potentially be given pre-eminence over the antitrust laws where the restraint on trade primarily **[*1198]** affects only the parties to the collective bargaining relationship. See Connell Co. v. Plumbers & Steamfitters, supra (421 U.S. 616, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)); Meat **[**12]** Cutters v. Jewel Tea, supra (381 U.S. 676, 85 S. Ct. 1596, 14 L. Ed. 2d 640 (1965)); Mine Workers v. Pennington, supra (381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)). Second, federal labor policy is implicated sufficiently to prevail only where the agreement sought to be exempted concerns a mandatory subject of collective bargaining. See Meat Cutters v. Jewel Tea, supra; *Mine Workers v. Pennington, supra.* Finally, the policy favoring collective bargaining is furthered to the degree necessary to override the antitrust laws only where the agreement sought to be

---

[7.] Jacobs and Winter, in Antitrust Principles and Collective Bargaining by Athletes: Of Superstars in Peonage, 81 Yale L.J. 1 (1971), strongly suggest that the antitrust issue is altogether irrelevant in considering the validity of the reserve system. This article and its conclusion were specifically noted, without comment, by Mr. Justice Blackmun in *Flood v. Kuhn, supra.* In *Radovich v. National Football League, 352 U.S. 445, 77 S. Ct. 390, 1 L. Ed. 2d 456 (1957)*, the Supreme Court reversed the dismissal of a complaint charging Sherman Act violations by the National Football League and in so doing held that a complaint by a former guard on the Detroit Lions team charging that the National Football League had boycotted him and prevented him from becoming a player-coach in the Pacific Coast League, adequately stated a cause of action under the antitrust laws. A majority of the Court made it clear that while Radovich was entitled to an opportunity to prove his charges, it expressed no opinion as to whether or not the respondents had in fact violated the antitrust laws. The precise language of the reserve system provisions does not appear to have been considered by the Supreme Court in Radovich, its emphasis rather having been to hold that its prior decisions relating to the game of baseball did not invariably apply to all team sports. Lower court activity has almost uniformly indicated that the restraints of the reserve system in sports other than baseball amount to a type of group boycott against a player who desires to sell his professional athletic services to another team after having earlier been engaged by a competing team. See, e.g., *Smith, supra, 593 F.2d at 1177-1181*; *Mackey, supra, 543 F.2d at 618-22*; *Robertson, supra, 389 F. Supp. at 893*; *Kapp v. National Football League, 390 F. Supp. 73, 80-83 (N.D.Cal.1974)*, Aff'd in part and appeal dismissed in part as moot, *586 F.2d 644 (9th Cir. 1978)*, Cert. denied, ***441 U.S. 907, 99 S. Ct. 1996, 60 L. Ed. 2d 375 (1979)***; ***Denver Rockets v. All-Pro Management, Inc., 325 F. Supp. 1049, 1056-57 (C.D.Cal.1971)***, Injunction reinstated sub nom. *Haywood v. National Basketball Ass'n., 401 U.S. 1204, 91 S. Ct. 672, 28 L. Ed. 2d 206* (Douglas, J., in chambers, 1971). See generally 7 J. O. Von Kalinowski, ***Antitrust Law*** and Trade Regulation, § 50.01 Et seq. (1978).

> exempted is the product of bona fide arm's-length bargaining. See Meat Cutters v. Jewel Tea, supra. See also *Smith v. Pro-Football, 420 F. Supp. 738 (D.D.C.1976)*; *Philadelphia World Hockey Club v. Philadelphia Hockey Club, 351 F. Supp. 462, 496-500 (E.D.Pa.1972)*; *Boston Professional Hockey Ass'n, Inc. v. Cheevers, 348 F. Supp. 261, 267* (D.Mass.), Remanded on other grounds, *472 F.2d 127 (1st Cir. 1972)*.

543 F.2d at 614-15 (footnotes omitted).

We see no reason to disagree with the judgment of the district court and **[**13]** of the attorneys on both sides that the proper standards are set out in Mackey. In short, it was proper to apply Mackey's standards; the issue is whether those standards were properly applied.

B. Application of legal standards

We have little difficulty in determining that the first two policy considerations favor the exemption. Clearly here the restraint on trade primarily affects the parties to the bargaining relationship. It is the hockey players themselves who are primarily affected by any restraint, reasonable or not. [8.] Second, the agreement concerning the reserve system involves in a very real sense the terms and conditions of employment of the hockey players both in form and in practical effect. As Mackey correctly points out, the restriction upon a player's ability to move from one team to another within the league, the financial interest which the hockey players have and their interest in the mechanics of the operation and enforcement of the rule strongly indicate that it is a mandatory bargaining subject within the meaning of the National Labor Relations Act, Section 8(d), *29 U.S.C. § 158(d) (1976)*.

[14]** The issue, therefore, in our judgment is narrowed to whether, upon the facts of this case, the agreement sought to be exempted was the product of bona fide arm's-length bargaining. The court in Mackey held under the circumstances before it that such arm's-length bargaining was missing. So did the district court here. The underlying facts in the two cases, however, are quite different.

In Mackey it was shown that the National Football League Players Association, at least prior to 1974, had stood in a relatively weak position with respect to the clubs. The Rozelle Rule had remained unchanged in form since it was unilaterally promulgated in 1963, even before the Players Association was formed. The Eighth Circuit specifically found that the Rozelle Rule was not bargained over in the negotiations leading to the 1968 or 1970 collective bargaining agreements:

> At the outset of the negotiations preceding the 1968 agreement, the players did not seek elimination of the Rozelle Rule but felt that it should be modified. During the course of the negotiations, however, the players apparently presented no concrete proposals in that regard and there was little discussion concerning the Rozelle **[**15]** Rule. At trial, Daniel Shulman, a bargaining representative of the players, attributed their failure to pursue **[*1199]** any modifications to the fact that the negotiations had bogged down on other issues and the union was not strong enough to persist.
>
> The 1968 agreement incorporated by reference the NFL Constitution and Bylaws, of which the Rozelle Rule is a part. Furthermore, it expressly provided that free agent rules shall not be amended during the life of the agreement.
>
> At the start of the negotiations leading up to the 1970 agreement, it appears that the players again decided not to make an issue of the Rozelle Rule. The only reference to the Rule in the union's formal proposals presented at the outset of the negotiations was the following:
>
> The NFLPA is disturbed over reports from players who, after playing out their options, are unable to deal with other clubs because of the Rozelle Rule. A method should be found whereby a free agent is assured the opportunity to discuss contract with all NFL teams.

[8.] Indeed, the most logical third party to complain about the reserve system, the World Hockey Association, expressly accepted this system in a settlement to the litigation which produced *Philadelphia World Hockey Club, Inc. v. Philadelphia Hockey Club, Inc., 351 F. Supp. 462 (E.D.Pa.1972)*.

> There was little discussion of the Rozelle Rule during the 1970 negotiations.

543 F.2d at 612-13.

Upon the expiration **[**16]** of the 1970 agreement, however, the NFL players obviously found themselves in a much stronger bargaining position than they previously enjoyed. Although the court in Mackey was not concerned with the 1974 collective bargaining negotiations, it noted that:

> (since) the beginning of the 1974 negotiations, the players have consistently sought the elimination of the Rozelle Rule. The NFLPA and the clubs have engaged in substantial bargaining over that issue but have not reached an accord.

543 F.2d at 613.

Regarding these 1974 negotiations, of particular interest is the Eighth Circuit's subsequent opinion in *Reynolds v. National Football League, 584 F.2d 280 (8th Cir. 1978)*. Reynolds developed when the National Football League Players Association in a class action sought damages and other relief for the alleged injury caused by the anti-competitive effects of the Rozelle Rule, which had earlier been outlawed in Mackey. A settlement of the class action in the district court had been contested by 15 dissenting football players who challenged the validity of the settlement reached. In upholding the settlement, the Eighth Circuit expressly noted that **[**17]** it had been the subject of collective bargaining. The settlement included not only cash payments but a modification of the Rozelle Rule, particularly with a better and refined formula for determining the compensation to be paid the old club when a free agent player is signed by a new club. Reynolds, therefore, represents a reaffirmation of the Eighth Circuit's holding in Mackey:

> We emphasize today, as we did in *Mackey, supra*, that ***HN2***[] the subject of player movement restrictions is a proper one for resolution in the collective bargaining context. When so resolved, as it appears to have been in the current collective bargaining agreement, the labor exemption to antitrust attack applies, and the merits of the bargaining agreement are not an issue for court determination. The bargaining agreement is subject to change from time to time as it expires and is up for renegotiation.

584 F.2d at 289.

Returning to the area of professional hockey, we find its history well chronicled by Judge Higginbotham in *Philadelphia World Hockey Club, Inc. v. Philadelphia Hockey Club, Inc., 351 F. Supp. 462 (E.D.Pa.1972)*. The district judge's opinion in the **[**18]** instant case picks up the history of the reserve system and the National Hockey League where Judge Higginbotham left it in Philadelphia World Hockey Club, Inc. The district judge here stated:

> Mr. John Ziegler, President of the National Hockey League, testified that in March 1973, after discussions between the NHL and the NHLPA, the Board of Governors authorized a special committee to negotiate a new reserve clause. NHL Exh. 1 at 2-4. At a meeting on March 19, 1973, the owners and player representatives tentatively agreed upon a new **[*1200]** reserve clause pending ratification by the players. NHL Exh. 2 at 3. The tentative agreement provided, among other things, that a player with five or more years in the NHL could elect to become a free agent. See NHL Exh. 3 for the full text of the proposed reserve clause. In June 1973, the NHLPA rejected the proposed reserve clause. Thereafter, the NHLPA, on advice of counsel, refused to attend a meeting on August 28, 1973 to further discuss the proposed reserve clause. Plaintiff Exh. 2 at 3. The NHLPA elected instead to await the final outcome of the World Hockey Association's suit attacking the old reserve clause. See *Philadelphia World Hockey Club, Inc. v. Philadelphia Hockey Club, Inc., supra.* **[**19]** When the positions of the parties solidified, the NHL unilaterally adopted bylaw 9A on November 27, 1973. Plaintiff Exh. 2 at 3.
>
> Several months later, in February 1974, the district court approved a consent decree in the World Hockey Association suit. The NHLPA then threatened to file its own antitrust action to challenge the validity of bylaw 9A. To forestall that suit, the NHL agreed on July 9, 1975, that it would not assert laches or equitable estoppel

> as a defense. See Plaintiff Exh. 3 at 1; Exh. 4 at 1. At a subsequent meeting, on August 13, 1975, Mr. Ackerman, counsel for the NHL, implied that there would be no collective bargaining agreement until the dispute over bylaw 9A was resolved. The NHLPA, however, persisted in its refusal to negotiate on the clause. Plaintiff Exh. 5 at 1-2. The NHLPA's threat of an antitrust suit did not alter the NHL's firm position on bylaw 9A. On August 15, 1975, the members of the owner-players' council were advised that:
>
> Mr. Eagleson stated that the commencement of this type of action was still being considered. I replied that decision was, of course, up to them, but that the owners would not negotiate from fear of that **[**20]** possibility. Pl.Exh. 5 at 2.
>
> On May 4, 1976, the NHL and the NHLPA signed their first collective bargaining agreement retroactive from September 15, 1975. Collective Bargaining Agreement (CBA) § 2.01. The collective bargaining agreement provides that paragraph 17 of the Standard Player's Contract and bylaw 9A are "fair and reasonable terms of employment." CBA § 9.03(b).

460 F. Supp. at 910-11.

We believe that in holding that the reserve system had not been the subject of good faith, arm's-length bargaining, the trial court failed to recognize the well established principle that nothing in the labor law compels either party negotiating over mandatory subjects of collective bargaining to yield on its initial bargaining position. Good faith bargaining is all that is required. That the position of one party on an issue prevails unchanged does not mandate the conclusion that there was no collective bargaining over the issue. [9] *NLRB v. American National Insurance Co., 343 U.S. 395, 404, 72 S. Ct. 824, 96 L. Ed. 1027 (1952)*.

[21]** In a case where the collective bargaining negotiations proceeded much like those on By-Law Section 9A, our circuit followed American National Insurance Co. to hold that good faith bargaining did not require the employer to alter its position. *NLRB v. United Clay Mines Corp., 219 F.2d 120 (6th* ***[*1201]*** *Cir. 1955)*. There the NLRB sought enforcement of its order directing the company to bargain collectively with the union. The court refused, holding:

> In the present case, the respondent promptly met with the Union at its request, and interposed no objections or delays to later meetings whenever requested by the Union. Its negotiators were fully authorized to act. It submitted a proposed contract which it was willing to execute. The Union's proposals and its own proposals were discussed in detail in lengthy sessions. From the start respondent made its position clear that it would insist upon certain provisions, which, in its opinion, were basically important to the continued successful operation of the Company, such as the unqualified no-strike clause and settlement of grievances by Company management without compulsory arbitration. The Company's position **[**22]** on these issues was not acceptable to the Union. The Union's counterproposals on these issues were not acceptable to the Company. The negotiations, after a period of months, finally resulted in a tentative agreement with respect to all matters except the settlement of grievances. The failure to execute a contract was not because of a failure or refusal to negotiate, but in the final analysis was because the parties would not agree on one remaining issue, considered by both of them as basically important. To say that the Company should have accepted the Union's proposal on this issue is to ignore the language of the statute that the obligation to bargain collectively "does not compel either party to agree to a proposal or require the making of a concession."

---

[9] Section 8(d) of the National Labor Relations Act, *29 U.S.C. § 158(d)*, describes good faith collective bargaining and makes it clear that the Act does not compel either party to alter its initial stance on an issue. Section 8(d), in relevant part, states:

HN3[] (d) For the purposes of this section, to bargain collectively is the performance of the mutual obligation of the employer and the representative of the employees to meet at reasonable times and confer in good faith with respect to wages, hours, and other terms and conditions of employment, or the negotiation of an agreement, or any question arising thereunder, and the execution of a written contract incorporating any agreement reached if requested by either party, but Such obligation does not compel either party to agree to a proposal or require the making of a concession . . . (emphasis added).

> The board also stresses the fact that the Company refused to submit alternate proposals about the grievance issue at the request of the Union after it had refused to accept the Company's original proposal, and that the inflexible attitude of the Company contributed nothing to the success of the negotiations. But the statutory right to decline to make a concession includes the right to firmly stand on a proposal previously **[**23]** made and not accepted.
>
> In our opinion, the matter resolves itself into purely a question of hard bargaining on the part of the respondent. It is not for the Board or the Court to determine what in their opinion the respondent should have agreed to, and, in effect, make the contract for the parties. To decree enforcement of the order, would, as a practical matter, force the respondent to make a concession or be proceeded against for contempt of court. While the Act compels negotiations, which usually result in reaching an agreement, it contains no authority to force an agreement where the parties have reached an impasse. *N. L. R. B. v. American Nat. Ins. Co., supra*; *N.L.R.B. v. Landis Tool Co., 3 Cir., 193 F.2d 279*; *N.L.R.B. v. Norfolk Shipbuilding & Drydock Corp., 4 Cir., 195 F.2d 632*.

219 F.2d at 125-26. See also *Fetzer Television, Inc. v. NLRB, 317 F.2d 420 (6th Cir. 1963)*. [10.]

[24]** As the Fifth Circuit succinctly observed:

> If the insistence is genuinely and sincerely held, if it is not mere window dressing, it may be maintained forever though it produce a stalemate. Deep conviction, firmly held and from which no withdrawal will be made, may be more than the traditional opening gambit of a labor controversy. It may be both the right of the citizen and essential to our economic legal system . . . of free collective bargaining.

[*1202] *NLRB v. Herman Sausage Co., 275 F.2d 229, 231 (5th Cir. 1960)*.

Contrary to the trial judge's conclusion, the very facts relied upon by him in his opinion illustrate a classic case of collective bargaining in which the reserve system was a central issue. It is apparent from those very findings that the NHLPA used every form of negotiating pressure it could muster. It developed an alternate reserve system and secured tentative agreement from the owner and player representatives, only to have the proposal rejected by the players. It refused to attend a proposed meeting with the owners to discuss the reserve system further. It threatened to strike. It threatened to commence an antitrust suit and **[**25]** to recommend that the players not attend training camp. [11.]

For its part, the NHL, while not budging in its insistence upon By-Law Section 9A, at least in the absence of any satisfactory counter proposal by the players, yielded significantly on other issues. [12.] It agreed as a price of By-Law Section 9A to the inclusion in the collective bargaining agreement of a provision that the entire agreement could be voided if the NHL and the World Hockey Association should merge. The undisputed reason for this provision was

---

10. Other circuits have reached the same conclusions. *NLRB v. Almeida Bus Lines, Inc., 333 F.2d 729 (1st Cir. 1964)*; *NLRB v. Landis Tool Co., 193 F.2d 279 (3rd Cir. 1952)*; *NLRB v. Norfolk Shipbuilding & Drydock Corp., 195 F.2d 632 (4th Cir. 1952)*; *Chevron Oil Co. v. NLRB, 442 F.2d 1067 (5th Cir. 1971)*; *Wal-Lite Div. of United States Gypsum Co. v. NLRB, 484 F.2d 108 (8th Cir. 1973)*; *NLRB v. MacMillan Ring-Free Oil Co., 394 F.2d 26* (9th Cir.), Cert. denied, ***393 U.S. 914, 89 S. Ct. 237, 21 L. Ed. 2d 199 (1968)***; *NLRB v. Tomco Communications, Inc., 567 F.2d 871 (9th Cir. 1978)*.

11. Since the NHLPA represented 100% Of the players, such action would have a profound effect, and thereby, the threat must have carried substantial weight.

12. Mr. Eagleson, the Executive Director of the NHLPA, testified that the union agreed to the provisions of By-Law Section 9A in return for many player benefits. In addition to the benefits described in the district judge's opinion, our review of the record indicates that the players bargained for substantial benefits: (1) increased pension benefits; (2) increased bonus money to players on teams finishing high in their divisions and participating in the Stanley Cup Playoffs; (3) sharing with the owners receipts from international hockey games; (4) greater salary continuation for players injured as a result of playing hockey; (5) increased training camp expense allowances; (6) modification of NHL waiver procedures; and (7) modification in scheduling of games and travel during the season.

player concern that with a merger of the two leagues, the reserve system would be rendered too onerous because the players would, by the merger, lose the competitive advantage of threatening to move to the WHA. Likewise, the NHL team owners obtained a provision voiding the entire agreement should the reserve system be invalidated by the courts. **[**26]** [13.]

[27]** The trial court, while acknowledging that the new collective bargaining agreement contained significant new benefits to the players, held that they were not "directly **[*1203]** related to collective bargaining on bylaw 9A." This observation and the trial court's conclusion that "the NHLPA never bargained for bylaw 9A in the first instance" typifies its approach. It is true that the NHLPA did not "bargain for" By-Law Section 9A; it bargained "against" it, vigorously. That the trial judge concluded the benefits in the new contract were wrung from management by threat of an antitrust suit to void the By-Law merely demonstrates that the benefits were bargained for in connection with the reserve system, although he opined that the threat of a suit was a more effective bargaining tool than the threat of a strike. And while we agree with the trial judge that inclusion of language in the collective bargaining agreement that the reserve system provisions were "fair and reasonable" would not immunize it from antitrust attack, it is manifest from the entire facts found by the court that there was no collusion between management and the players association. Thus, the trial court found **[**28]** that "(t)he NHLPA agreed to include bylaw 9A in the collective bargaining agreement only after the NHL conceded that the NHLPA could terminate the entire agreement if the NHL merged with the World Hockey Association." *460 F. Supp. at 911*. The trial court also credited the testimony of John Ziegler that "the owners took a strong stand toward equalization, that they believed bylaw 9A was fair, and that they wanted it incorporated into the collective bargaining agreement. . . ." Finally, the trial court found that "(t)he NHLPA's acceptance of bylaw 9A was essential to get the parties off dead center. The players had no other alternative. The Standard Player's Contract required them to accept all the bylaws adopted by the NHL." *460 F. Supp. at 911*.

From the express findings of the trial court, fully supported by the record, it is apparent that the inclusion of the reserve system in the collective bargaining agreement was the product of good faith, arm's-length bargaining, and that what the trial court saw as a failure to negotiate was in fact simply the failure to succeed, after the most intensive negotiations, in keeping an unwanted provision out of the **[**29]** contract. This failure was a part of and not apart from the collective bargaining process, a process which achieved its ultimate objective of an agreement accepted by the parties.

V. CONCLUSION

Assuming without deciding that the reserve system incorporated in the collective bargaining agreement was otherwise subject to the antitrust laws, whether the good faith, arm's-length requirement necessary to entitle it to the

---

[13.] The collective bargaining agreement, Sections 9.03(c) and (e), provides that:

(c) It is expressly understood that if the National Hockey League enters into an agreement to merge with the World Hockey Association, the National Hockey League Players Association shall forthwith be entitled to terminate either this entire agreement, or its agreement contained in this Section 9.03 with respect to the said paragraph 17, . . . and the said Section 9A upon written notice to the Clubs within 15 days after notice of said agreement to merge. If the Association elects to terminate as provided in the preceding sentence, the subjects covered by the said termination shall then be reopened for collective bargaining at the request of either party.

(e) The parties hereto recognize that recent court decisions affecting professional sports other than hockey, may give rise to uncertainty as to whether the provisions of Paragraph 17 of the Standard Players Contract . . . and Section 9A of the National Hockey League By-Laws are lawful subjects of collective bargaining. The Association further recognizes that the provisions of this agreement beneficial to the Association and the (sic) the players were entered into by both parties in the good faith belief that subparagraphs (a) and (b) above are lawful subjects of collective bargaining and are valid, and that the Clubs agreed to said beneficial provisions in reliance thereon. In the event of a final judicial determination not subject to appeal that Paragraph 17 of the Standard Players Contract . . . or Section 9A of the National Hockey League By-Laws are not lawful subjects of collective bargaining or are otherwise invalid, the Clubs may within 30 days thereafter terminate this Collective Bargaining Agreement upon written notice to the Association. If the Clubs elect to terminate as provided in the preceding sentence the parties shall promptly thereafter commence collective bargaining negotiations in an effort to arrive at a new collective bargaining agreement.

non-statutory labor exemption from the antitrust laws applies is to be governed by the developed standards of law applicable elsewhere in the field of labor law and as set forth in *Mackey, supra.* So viewed, the evidence here, as credited by the trial court, compels the conclusion that the reserve system was incorporated in the agreement as a result of good faith, arm's-length bargaining between the parties. As such it is entitled to the exemption, and the trial court's conclusion to the contrary must be deemed clearly erroneous.

The injunction is vacated, and the cause remanded for entry of judgment in favor of defendants upon Count I of the complaint. The cause is also remanded for further proceedings not inconsistent herewith.

No costs.

APPENDIX **[**30]** A

NATIONAL HOCKEY LEAGUE BY-LAW SECTION 9A

FREE AGENTS AND EQUALIZATION

(Adopted November 27, 1973)

Free Agents

9A. 1. A player who becomes a "free agent" pursuant to subsections 2 or 3 of this By-Law shall have the right to negotiate and contract with any Member Club or with any club in any other league.

9A. 2. A player who enters into a 1974 Form Standard Player's contract shall have **[*1204]** the right to become a free agent in accordance with the terms of *Section 17* of said contract and in accordance with the Player's Option contract to which said *Section 17* refers.

9A. 3. Any other player under contract to any Member Club on the date this By-Law is adopted, the final year of whose contract ends on or after September 30, 1974, shall become a free agent on June 1 of the final year of that contract, except that any such player whose contract is a 1972 Form Standard Player's contract whose final year ends on September 30, 1974, shall become a free agent on June 1, 1975. For purposes of this subsection 3, the "final year" of a contract shall be the last year of its fixed term specified in *Section 1* of said contract, including, however, any period added to that term by any **[**31]** addendum or exercised special option contracted for by the Member Club and player.

9A. 4. The foregoing subsection 3 shall not be construed to derogate in any way from the rights of any player under any contract but constitutes instead a waiver of any and all rights by each Member Club under the contracts to which said subsection is applicable to require the services of players for periods beyond those set out in said subsection.

Free Agent List

9A. 5. On or before May 15 in each year each Member Club shall deliver to the President a report in writing, by TWX, telegram or by mail, (which report shall remain confidential until the issuance of the Free Agent List described below), setting forth the name of each player under contract to it who, unless signed to a new contract with said Club prior to June 1 of that year, will become a free agent as of that date. Each Member Club shall also furnish to the President after May 15 of such year, by immediate TWX or telegram, information as to any change of status of any such player. The President shall, on June 1 of such year, issue to all Member Clubs a Free Agent List setting forth the names of all players he finds to be free agents as **[**32]** of such date, together with the name of the Member Club with which each such player was last under contract, and shall thereafter promptly issue such bulletins correcting, amending, or updating such list as may be necessary to ensure its accuracy and currency. Except during a period that a player's name remains on the Free Agent List, no Member Club other than the Club with which he was last under contract may sign a contract or negotiate with such player, directly or indirectly, without the prior written consent of the Member Club with which he was last under contract, or otherwise take any action which would violate *Section 15* of these By-Laws.

Obligation to make equalization payment

9A. 6. Each time that a player becomes a free agent and the right to his services is subsequently acquired by any Member Club other than the club with which he was last under contract or by any club owned or controlled by any such Member Club, the Member Club first acquiring the right to his services, or owning or controlling the club first acquiring that right, shall make an equalization payment to the Member Club with which such player was previously under contract, as prescribed by subsection 8 **[**33]** of this By-Law. Each Member Club may acquire the right to the services of as many free agents as it wishes, subject to the provisions of subsection 9 of this By-Law.

Determination of Equalization Payment

Purpose

9A. 7. The purpose of the equalization payment shall be to compensate a player's previous Member Club fairly for loss of the right to his services when that player becomes a free agent and the right to his services is acquired by another Member Club or a club owned or controlled by another Member club.

Procedure

9A. 8. (a) The Member Club acquiring the services of a free agent, or owning or controlling the club acquiring **[*1205]** such services, shall immediately notify the player's previous Member Club and the President of that fact by TWX or telegram. The equalization payment shall be determined, if possible, by mutual agreement of the two Member Clubs involved. If no such agreement is reached within three business days after the date on which the player's services are acquired, each of the Member Clubs involved shall within two additional business days submit by TWX or telegram its proposal for an equalization payment to a neutral arbitrator selected from time **[**34]** to time by majority vote of the Board of Governors of the League.

9A. 8. (b) Within two business days after the deadline for receipt of the Clubs' proposals, the arbitrator shall, unless notified by both Clubs in writing, by TWX or by telegram that they have reached agreement on the equalization payment, select without change one of the proposals submitted to him, and his determination shall be final and not subject to review.

9A. 8. (c) The Clubs' proposals and the arbitrator's determination of equalization must be limited to:

(i) the assignment of a contract or contracts for the services of a player or players binding upon such player or players for at least the next season; and/or

(ii) choices in any intra-league, inter-league and/or amateur drafts to be held at any time subsequent to such proposal and/or unsigned draft choices or negotiation nominees; and/or

(iii) cash.

In making his selection the arbitrator shall be governed by the policy that cash shall be used for equalization purpose only as a last resort.

9A. 8. (d) The contracts of all players under contract to the acquiring Club at the time a free agent is acquired shall be available for equalization purposes.

9A. **[**35]** 8. (e) The cost of the arbitrator shall be borne by the League.

9A. 8. (f) To facilitate a good faith effort to reach agreement on the equalization payment, the acquiring Club shall furnish to the Club entitled to that payment such information as may reasonably be required with respect to any player the assignment of whose contract is proposed by either party as an equalization payment, in whole or in part, including, but not limited to, the salary, bonus, and other compensation of such player, a copy of the player's contract, and any adverse information with respect to the physical, mental, or emotional condition of such player.

9A. 8. (g) The details of the procedure to be followed in the event arbitration is required shall be set forth in the agreement entered into by the League and the arbitrator.

Satisfaction of Equalization Obligation

9A. 9. No Member Club, or any club owned or controlled by such Member Club, shall be entitled to sign or acquire the right to the services of any free agent until it has satisfied in full its equalization obligation under these By-Laws as to each other free agent, the right to whose services it has acquired, by assigning the player contracts **[**36]** and/or draft rights and otherwise consummating the equalization payment required by mutual agreement or by arbitration. It shall be the responsibility of the acquiring Club to notify the President that it has satisfied its equalization obligation.

9A. 10. The President shall disallow the right of any acquiring Member Club to use the services of any signed free agent if he has not received the notice specified in subsection **[*1206]** 9 or otherwise finds that the equalization payment for that player or for any other free agent previously signed has not been fully satisfied by said Member Club in accordance with this By-Law.

Dissent by: EDWARDS

Dissent

EDWARDS, Chief Judge, dissenting.

I respectfully dissent. My basic disagreement with the majority opinion is planted on the proposition that if sports clubs organized for profit are to be exempted from the antitrust laws, this should be accomplished by statutory amendment, in accordance with the Constitution of the United States. Any such amendment would necessarily follow extensive hearings on the possible implications of the exemption, not only on organized sports, but also on the whole of the American economy a process not available **[**37]** to the Judicial Branch.

The essence of the restriction on competition involved in this case is an agreement between all National Hockey League clubs not to hire any hockey player who has become a free agent (by refusing reemployment contract terms offered by his previous club) without undertaking to "equalize" the loss to his former club by agreed on or arbitrated transfer of players or cash. [1.]

[38]** The restriction by its terms is upon the NHL constituent clubs. Its impact, however, is clearly upon star hockey players. Clause 9A.6 obviously diminishes the hockey star's bargaining power, both with his previous employer and any prospective employer. It also may require any player who is transferred under the equalization clause to live in a city and play for a club against his professional (or private) best interests.

The legal question posed by this case is whether an association of employers may in the organized sports industry (here it is hockey) gain exemption from the antitrust laws for an agreement among themselves to restrict otherwise

---

[1.] Obligation to make equalization payment

9A. 6. Each time that a player becomes a free agent and the right to his services is subsequently acquired by any Member Club other than the club with which he was last under contract or by any club owned or controlled by any such Member Club, the Member Club first acquiring the right to his services, or owning or controlling the club first acquiring that right, shall make an equalization payment to the Member Club with which such player was previously under contract, as prescribed by subsection 8 of this By-Law. Each Member Club may acquire the right to the services of as many free agents as it wishes, subject to the provisions of subsection 9 of this By-Law.

free competition in employment of hockey players by imposing their employer-devised agreement upon a union representing that class of employees through use of economic inducement or compulsion. Before we give judicial sanction to such a practice as consistent with the antitrust and labor-management laws of this country, we should take a long, hard look at the implications for sections of the national economy other than organized sports.

Superstars whose services are at a high premium can be found in many areas of industry and commerce **[**39]** other than the world of sports. Is there any distinction to be drawn between Clause 9A and similar restrictions in, for example, the field of dress manufacturing for the services of highly talented designers, or in the metalworking industries for the services of highly talented engineers, designers, or die shop leaders, or the entertainment field for highly talented personnel, or in the publishing field for highly talented writers?

Such a restriction on freedom of competition (and human freedom in choice of employment) in the interest of promotion or maintenance of business profits, has a distinctly predatory ring. While the majority opinion declines to answer the question as to whether, without benefit of an exemption, Clause 9A would be violative of the Sherman Act, I believe that 9A does violate the antitrust laws and that no "labor union exemption" or nonstatutory exemption is applicable.

The most distinguishing feature of the economy of the United States is the statutory prohibition upon monopoly and upon contracts and devices designed to restrict free competition. Sherman Antitrust Act, *15 U.S.C. §§ 1-7 (1976)*; Clayton Antitrust **[*1207]** Act, *15 U.S.C. §§ 12* ***[**40]*** *-27 (1976)*. Through many decades Congress has adhered to a legal ban upon such practices.

The first and crucial sentence of the Sherman Act is sweeping. It provides:

> S 1. Trusts, etc., in restraint of trade illegal; penalty
> Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal. . . .
>
> *15 U.S.C. § 1 (1976)*.

The Sherman Act and Clayton Act also provide:

> S 2. Monopolizing trade a felony; penalty
> Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony, and, on conviction thereof, shall be punished by fine not exceeding one million dollars if a corporation, or, if any other person, one hundred thousand dollars or by imprisonment not exceeding three years, or by both said punishments, in the discretion of the court.
> S 4. Jurisdiction of courts; duty of United States attorneys; procedure

[41]**

> The several district courts of the United States are invested with jurisdiction to prevent and restrain violations of *sections 1 to 7* of this title; and it shall be the duty of the several United States attorneys, in their respective districts, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition the court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition and before final decree, the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.
> S 26. Injunctive relief for private parties; exception
>
> Any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws, including sections 13, 14, 18, **[**42]** and 19 of this title, when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by

courts of equity, under the rule governing such proceedings, and upon the execution of proper bond against damages for an injunction improvidently granted and a showing that the danger of irreparable loss or damage is immediate, a preliminary injunction may issue . . . .
Id. at §§ 2, 4, 26.

This appeal requires us to measure Clause 9A of the National Hockey League By-Laws against the antitrust laws just quoted.

Clause 9A provides:

FREE AGENTS AND EQUALIZATION

(Adopted November 27, 1973)
Free Agents
9A. 1. A player who becomes a "free agent" pursuant to subsections 2 or 3 of this By-Law shall have the right to negotiate and contract with any Member Club or with any club in any other league.
(Clauses 9A2 thru 9A5 omitted. See Appendix to Majority Opinion.)
Obligation to make equalization payment

9A. 6. Each time that a player becomes a free agent and the right to his services is subsequently acquired by any Member Club other than the club with which he was last under **[**43]** contract or by any club owned or controlled by any such Member Club, the Member Club first acquiring **[*1208]** the right to his services, or owning or controlling the club first acquiring that right, shall make an equalization payment to the Member Club with which such player was previously under contract, as prescribed by subsection 8 of this By-Law. Each Member Club may acquire the right to the services of as many free agents as it wishes, subject to the provisions of subsection 9 of this By-Law.
Determination of Equalization Payment
Purpose
9A. 7. The purpose of the equalization payment shall be to compensate a player's previous Member Club fairly for loss of the right to his services when that player becomes a free agent and the right to his services is acquired by another Member Club or a club owned or controlled by another Member club.
Procedure

9A. 8. (a) The Member Club acquiring the services of a free agent, or owning or controlling the club acquiring such services, shall immediately notify the player's previous Member Club and the President of that fact by TWX or telegram. The equalization payment shall be determined, if possible, **[**44]** by mutual agreement of the two Member Clubs involved. If no such agreement is reached within three business days after the date on which the player's services are acquired, each of the Member Clubs involved shall within two additional business days submit by TWX or telegram its proposal for an equalization payment to a neutral arbitrator selected from time to time by majority vote of the Board of Governors of the League.
(Clauses 9A8 (b) and (c) omitted. See Appendix to Majority Opinion.)
9A. 8. (d) The contracts of all players under contract to the acquiring Club at the time a free agent is acquired shall be available for equalization purposes.
9A. 8. (e) The cost of the arbitrator shall be borne by the League.

9A. 8. (f) To facilitate a good faith effort to reach agreement on the equalization payment, the acquiring Club shall furnish to the Club entitled to that payment such information as may reasonably be required with respect to any player the assignment of whose contract is proposed by either party as an equalization payment, in whole or in part, including, but not limited to, the salary, bonus, and other compensation of such player, a copy **[**45]** of the player's contract, and any adverse information with respect to the physical, mental, or emotional condition of such player.
9A. 8. (g) The details of the procedure to be followed in the event arbitration is required shall be set forth in the agreement entered into by the League and the arbitrator.
Satisfaction of Equalization Obligation

> 9A. 9. No Member Club, or any club owned or controlled by such Member Club, shall be entitled to sign or acquire the right to the services of any free agent until it has satisfied in full its equalization obligation under these By-Laws as to each other free agent, the right to whose services it has acquired, by assigning the player contracts and/or draft rights and otherwise consummating the equalization payment required by mutual agreement or by arbitration. It shall be the responsibility of the acquiring Club to notify the President that it has satisfied its equalization obligation.
>
> 9A. 10. The President shall disallow the right of any acquiring Member Club to use the services of any signed free agent if he has not received the notice specified in subsection 9 or otherwise finds that the equalization payment **[**46]** for that player or for any other free agent **[*1209]** previously signed has not been fully satisfied by said Member Club in accordance with this By-Law.

The nature of the national (and international) sports business is such that the acquisition of talented players is the essence of the business of organized sports clubs. Measures like 9A are anticompetitive agreements banning or restricting competition between clubs for players. Such clauses adopted by an already dominating league will also have the effect of restricting competition from other leagues and thus promoting monopoly.

Clauses like 9A would seem to be per se violations of *Section 1* of the Sherman Act. If measured by the preferred "rule of reason," they fail the United States Supreme Court's case law tests. See *Chicago Bd. of Trade v. United States, 246 U.S. 231, 38 S. Ct. 242, 62 L. Ed. 683 (1918)*; *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*; *National Society of Professional Engineers v. United States, 435 U.S. 679, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*.

Appellants' defense of 9A is cast principally in public policy **[**47]** argument. It runs: Star players like McCourt produce the victories and championships for the club. They also attract the paying customers and generate profits. When star players are monopolized by one club, that club gains profits at the expense of all other clubs in the league. When the star players are distributed somewhat evenly throughout the league, team competition is enhanced and the well-being of the league as a whole is protected. The result is beneficial to the league and to the league's sports-minded public.

The point of this dissent is not to disagree with this public policy argument. Congress, which adopted the antitrust laws in the first instance, may choose to exempt nationally organized sports leagues from the antitrust laws by allowing carefully devised controls over player contracts designed to prevent league imbalance. My problem is that I cannot find any rationale for this court's devising such a policy which is 1) consistent with the antitrust statutes, or 2) which could be limited to the field of sports, or 3) which is supported by decisions on antitrust issues in the United States Supreme Court.

THE EXEMPTION CLAIM

The majority opinion relies solely upon **[**48]** judicial extrapolation from one of the rare exceptions to the strictures of the Sherman Act. It was adopted in 1914 and provides:

> The labor of a human being is not a commodity or article of commerce. Nothing contained in the antitrust laws shall be construed to forbid the existence and operation of labor, agricultural, or horticultural organizations, instituted for the purposes of mutual help, and not having capital stock or conducted for profit, or to forbid or restrain individual members of such organizations from lawfully carrying out the legitimate objects thereof; nor shall such organizations, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade, under the antitrust laws.
>
> *15 U.S.C. § 17 (1976)*.

It should be noted that the amendment applies only to organizations "not having capital stock or conducted for profit." Obviously, by its terms, the clubs of the National Hockey League are specifically excluded because they are not "labor, agricultural, or horticultural organizations," and because they do have capital stock and are organized for profit. But in fact, neither the appellants **[**49]** nor my colleagues in the majority rely upon the terms of the statute.

What is relied upon is case law in which the federal courts have sought to reconcile the conflict between the antitrust laws (with their prohibitions against restraint of trade and antimonopoly practices) and the labor union exemption. From the beginning of this conflict it has been recognized that the very purpose of labor organization was to remove wages from the pressures which would otherwise be placed on them by cost competition between competing employers.

[*1210] In *United States v. Hutcheson, 312 U.S. 219, 61 S. Ct. 463, 85 L. Ed. 788 (1941)*, Justice Frankfurter reviewed the history which led to the adoption of the labor union exemption:

> *Section 1* of the Sherman Law on which the indictment rested is as follows: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal." The controversies engendered by its application to trade union activities and the efforts to secure legislative relief from its consequences are familiar history. The Clayton **[**50]** Act of 1914 was the result. Act of October 15, 1914, 38 Stat. 730. "This statute was the fruit of unceasing agitation, which extended over more than 20 years and was designed to equalize before the law the position of workingmen and employer as industrial combatants." *Duplex Co. v. Deering, 254 U.S. 443, 484 (41 S. Ct. 172, 182, 65 L. Ed. 349*). Section 20 of that Act, which is set out in the margin in full, withdrew from the general interdict of the Sherman Law specifically enumerated practices of labor unions by prohibiting injunctions against them since the use of the injunction had been the major source of dissatisfaction and also relieved such practices of all illegal taint by the catch-all provision, "nor shall any of the acts specified in this paragraph be considered or held to be violations of any law of the United States." The Clayton Act gave rise to new litigation and to renewed controversy in and out of Congress regarding the status of trade unions. By the generality of its terms the Sherman Law had necessarily compelled the courts to work out its meaning from case to case. It was widely believed that into the Clayton Act courts read the very beliefs which **[**51]** that Act was designed to remove. Specifically the courts restricted the scope of § 20 to trade union activities directed against an employer by his own employees. *Duplex Co. v. Deering, supra.* Such a view it was urged, both by powerful judicial dissents and informed lay opinion, misconceived the area of economic conflict that had best be left to economic forces and the pressure of public opinion and not subjected to the judgment of courts. Ibid., p. 485-486 (*41 S. Ct. p. 183*). Agitation again led to legislation and in 1932 Congress wrote the Norris-LaGuardia Act. Act of March 23, 1932, 47 Stat. 70, *29 U.S.C. §§ 101-115*.
>
> The Norris-LaGuardia Act removed the fetters upon trade union activities, which according to judicial construction § 20 of the Clayton Act had left untouched, by still further narrowing the circumstances under which the federal courts could grant injunctions in labor disputes. More especially, the Act explicitly formulated the "public policy of the United States" in regard to the industrial conflict, and by its light established that the allowable area of union activity was not to be restricted, as it **[**52]** had been in the Duplex case, to an immediate employer-employee relation. Therefore, whether trade union conduct constitutes a violation of the Sherman Law is to be determined only by reading the Sherman Law and § 20 of the Clayton Act and the Norris-LaGuardia Act as a harmonizing text of outlawry of labor conduct.

Id. at 229-31, 61 S. Ct. at 465-466 (footnotes omitted).

Subsequently, in *Allen Bradley Co. v. Local 3, IBEW, 325 U.S. 797, 65 S. Ct. 1533, 89 L. Ed. 1939 (1945)*, and *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*, the Supreme Court pointed out that the exemption made available to labor would be lost if it was used in connection with corporations organized for profit to aid them in controlling prices of their products and creating monopoly. In the Pennington case Justice White, speaking for the Court, reviewed the history of the exemptions created by the Clayton and Norris-LaGuardia Acts when they were sought to be employed by unions acting in concert with employers:

> The antitrust laws do not bar the existence and operation of labor unions as **[*1211]** such. Moreover, **[**53]** § 20 of the Clayton Act, 38 Stat. 738, and § 4 of the Norris-LaGuardia Act, 47 Stat. 70, permit a union, acting

alone, to engage in the conduct therein specified without violating the *Sherman Act. United States v. Hutcheson, 312 U.S. 219 (61 S. Ct. 463, 85 L. Ed. 788)*; *United States v. International Hod Carriers Council, 313 U.S. 539 (61 S. Ct. 839, 85 L. Ed. 1508*), affirming Per curiam, *37 F. Supp. 191 (D.C.N.D.Ill.1941)*; *United States v. American Federation of Musicians, 318 U.S. 741 (63 S. Ct. 665, 87 L. Ed. 1120*), affirming Per curiam, *47 F. Supp. 304 (D.C.N.D.Ill.1942)*.

But neither § 20 nor § 4 expressly deals with arrangements or agreements between unions and employers. Neither section tells us whether any or all such arrangements or agreements are barred or permitted by the antitrust laws. Thus Hutcheson itself stated:

"So long as a union acts in its self-interest And does not combine with non-labor groups, the licit and the illicit under § 20 are not to be distinguished by any judgment regarding the wisdom or unwisdom, the rightness or wrongness, the selfishness or unselfishness of **[**54]** the end of which the particular union activities are the means." *312 U.S., at 232 (61 S. Ct., at 466*). (Emphasis added.)

And in Allen Bradley Co. v. (Local) Union (No. 3, *IBEW), 325 U.S. 797 (65 S. Ct. 1533, 89 L. Ed. 1939*), this Court made explicit what had been merely a qualifying expression in Hutcheson and held that "when the unions participated with a combination of business men who had complete power to eliminate all competition among themselves and to prevent all competition from others, a situation was created not included within the exemptions of the Clayton and Norris-LaGuardia Acts." *Id., at 809 (65 S. Ct., at 1540*). See also *Brotherhood of Carpenters v. United States, 330 U.S. 395, 398-400 (67 S. Ct. 775, 778, 91 L. Ed. 973*); *United States v. Employing Plasterers Assn., 347 U.S. 186, 190 (74 S. Ct. 452, 98 L. Ed. 618*). Subsequent cases have applied the Allen Bradley doctrine to such combinations without regard to whether they found expression in a collective bargaining agreement, *Brotherhood of Carpenters v. United States, supra* ; see *Teamsters Union v. Oliver, 358 U.S. 283, 296 (79 S. Ct. 297, 304, 3 L. Ed. 2d 312*), **[**55]** and even though the mechanism for effectuating the purpose of the combination was an agreement on wages, see *Adams Dairy Co. v. St. Louis Dairy Co., 260 F.2d 46 (C.A. 8th Cir. 1958)*, or on hours of work, *Philadelphia Record Co. v. Manufacturing Photo-Engravers Assn., 155 F.2d 799 (C.A. 3d Cir. 1946)*.

United Mine Workers v. Pennington, supra at 661-63, 85 S. Ct. at 1589.

Justice Douglas, speaking for himself and two other Justices, concurred, but added some additional thoughts:

I repeat what we said in Allen Bradley Co. v. Union (No. 3, *IBEW), supra* (325 U.S.), at 811 (*65 S. Ct., at 1535*):

"The difficulty of drawing legislation primarily aimed at trusts and monopolies so that it could also be applied to labor organizations without impairing the collective bargaining and related rights of those organizations has been emphasized both by congressional and judicial attempts to draw lines between permissible and prohibited union activities. There is, however, one line which we can draw with assurance that we follow the congressional purpose. We know that Congress feared the concentrated power **[**56]** of business organizations to dominate markets and prices. It intended to outlaw business monopolies. A business monopoly is no less such because a union participates, and such participation is a violation of the (Sherman) Act."

Congress can design an oligopoly for our society, if it chooses. But business alone cannot do so as long as the antitrust laws are enforced. Nor should business and labor working hand-in-hand be allowed to make that basic change in the design of our so-called free enterprise system.

[*1212] *United Mine Workers v. Pennington, supra at 674, 85 S. Ct. at 1595-1596*.

Until this case, I do not know of any instance where profitmaking businesses have succeeded in justifying a cartel arrangement which suits their purposes by dint of securing that arrangement's introduction into a collective bargaining agreement and thus acquiring the right to the "labor union exemption." The majority's approval of this arrangement in this case in fact stands the labor union exemption squarely on its head.

The District Judge heard evidence on plaintiff's complaint for a preliminary injunction so fully that the parties have now stipulated **[**57]** to submit the issues as if the case had been fully tried.

As to the origin of Clause 9A (the restrictive clause complained about) the District Judge found:

> Finally, the defendants argue that plaintiff may not obtain preliminary injunctive relief upon his antitrust claim because they should be afforded the non-statutory labor exemption from antitrust sanctions. The preponderance of evidence, however, establishes that bylaw 9A was not the product of bona fide arm's length bargaining over any of its anticompetitive provisions. The evidence establishes that the bylaw was unilaterally imposed upon the NHLPA and was incorporated into the collective bargaining agreement in the identical language it contained when it was first adopted by the League.
>
> Mr. John Ziegler, President of the National Hockey League, testified that in March 1973, after discussions between the NHL and the NHLPA, the Board of Governors authorized a special committee to negotiate a new reserve clause. At a meeting on March 19, 1973, the owners and player representatives tentatively agreed upon a new reserve clause pending ratification by the players. The tentative agreement provided, among other things, **[**58]** that a player with five or more years in the NHL could elect to become a free agent. In June 1973, the NHLPA rejected the proposed reserve clause. Thereafter, the NHLPA, on advice of counsel, refused to attend a meeting on August 28, 1973 to further discuss the proposed reserve clause. The NHLPA elected instead to await the final outcome of the World Hockey Association's suit attacking the old reserve clause. See Philadelphia World Hockey Club, Inc. v. Philadelphia Hockey Club, Inc., supra (351 F. Supp. 462 (E.D.Pa.1972)). When the positions of the parties solidified, the NHL unilaterally adopted bylaw 9A on November 27, 1973.
>
> Several months later, in February 1974, the district court approved a consent decree in the World Hockey Association suit. The NHLPA then threatened to file its own antitrust action to challenge the validity of bylaw 9A. To forestall that suit, the NHL agreed on July 9, 1975, that it would not assert laches or equitable estoppel as a defense. At a subsequent meeting, on August 13, 1975, Mr. Ackerman, counsel for the NHL, implied that there would be no collective bargaining agreement until the dispute over bylaw 9A was resolved. The **[**59]** NHLPA, however, persisted in its refusal to negotiate on the clause. The NHLPA's threat of an antitrust suit did not alter the NHL's firm position on bylaw 9A. On August 15, 1975, the members of the owner-players' council were advised that:
> Mr. Eagleson stated that the commencement of this type of action was still being considered. I replied that decision was, of course, up to them, but that the owners would not negotiate from fear of that possibility.
>
> On May 4, 1976, the NHL and the NHLPA signed their first collective bargaining agreement retroactive from September 15, 1975. Collective Bargaining Agreement (CBA) § 2.01. The collective bargaining agreement provides that paragraph 17 of the Standard Player's Contract and bylaw 9A are "fair and reasonable terms of employment." CBA § 9.03(b). Like the Eighth Circuit Court **[*1213]** of Appeals in Mackey (*Mackey v. National Football League, 543 F.2d 606 (8th Cir. 1976)*, Cert. dismissed, *434 U.S. 801, 98 S. Ct. 28, 54 L. Ed. 2d 59 (1977))*, however, we find that the mere inclusion of bylaw 9A in the collective bargaining agreement cannot serve to immunize it from antitrust sanctions. **[**60]** The evidence offered at the hearing persuades us that the parties did not collectively bargain for bylaw 9A. Mr. Eagleson testified that:
> (T)he owners made it clear that their bottom line position was non-debatable on the By-Law that they had passed and the contract that they had approved unilaterally.

> He further testified that as late as August 1975, the player representatives agreed that unless further "concessions" were made by the owners, they would recommend that their teammates not attend training camp. The NHLPA agreed to include bylaw 9A in the collective bargaining agreement only after the NHL conceded that the NHLPA could terminate the entire agreement if the NHL merged with the World Hockey Association. The agreement also provided that the owners could terminate the agreement if there was a judicial determination that bylaw 9A was invalid. CBA §§ 9.03(c) and (e). Even after the collective bargaining agreement was signed, the NHLPA suggested modifications of the equalization provision. Mr. Eagleson testified that the suggested modifications would be of "great benefit" to the players, suggesting to us that the NHLPA never bargained for bylaw 9A in **[**61]** the first instance.
> Mr. Ziegler further stated on cross-examination that although the NHL was willing to negotiate on equalization at any time, the players had to adhere to the bylaw because the Standard Player's Contract required them to adhere to all bylaws adopted by the NHL. In effect, although the owners indicated that they were willing to negotiate, the players really had no choice. Mr. Ziegler stated that the owners took a strong stand toward equalization, that they believed that bylaw 9A was fair, and that they wanted it incorporated into the collective bargaining agreement. Moreover, it is apparent that both parties to the collective bargaining agreement realized fully that bylaw 9A could not withstand judicial scrutiny.
>
> To support its contention that bylaw 9A was collectively bargained, the NHL argues that the NHLPA received a substantial quid pro quo for agreeing to include the bylaw in the agreement. In our view, the evidence more logically supports the inference that the benefits were received as a settlement of NHLPA's threatened suit to challenge the bylaw. The NHLPA's acceptance of bylaw 9A was essential to get the parties off dead center. The **[**62]** players had no other alternative. The Standard Player's Contract required them to accept all the bylaws adopted by the NHL. We cannot find from this evidence that the increased pension benefits, the right for players to negotiate salaries and the right to share in the proceeds from international hockey competition are directly related to collective bargaining on bylaw 9A. The evidence suggests, for example, that the players "would not agree to (international hockey competition) . . . unless agreement was reached on their request for increased pension benefits." The bylaw was included in the collective bargaining agreement to give the impression that it was a bargained-for provision. When labor and non-labor groups combine to insert into a collective bargaining agreement a non-negotiated provision, courts will not afford either party the non-statutory labor exemption.

Thus the District Judge found these two important facts: Clause 9A originated exclusively with the National Hockey League and its member clubs, and Clause 9A was not the product of arm's length bargaining.

In my judgment this record does not afford any basis whatever for holding that any of these findings **[**63]** of fact and conclusions of law are without substantial evidentiary support or are clearly erroneous. This **[*1214]** leads inevitably to the conclusion reached by the District Judge that Clause 9A is not protected by any labor exemption, either statutory or nonstatutory.

THE ROZELLE RULE CASES

We, of course, in this case are by no means writing upon a clean tablet. The effort on the part of owners of organized sports leagues and clubs to gain control of their players began long ago and achieved its greatest legal success in *Federal Baseball Club v. National League, 259 U.S. 200, 42 S. Ct. 465, 66 L. Ed. 898 (1922)*. There "Homer nodded" as Mr. Justice Holmes, for a unanimous Court, held "The business is giving exhibitions of baseball, which are purely state affairs." Thus the great American pastime gained exemption from the antitrust laws on the theory that baseball was outside of interstate commerce. That decision has been much criticized both in the courts and in legal literature. See *Flood v. Kuhn, 407 U.S. 258, 280 n. 16, 286, 291-93, 92 S. Ct. 2099, 32 L. Ed. 2d 728 (1972)*; *Radovich v. National Football League, 352 U.S. 445, 450, 77 S. Ct. 390, 1 L. Ed. 2d 456 (1957)*; **[**64]** *Salerno v. American League, 429 F.2d 1003, 1005 (2d Cir. 1970)*, Cert. denied sub nom., *Salerno v. Kuhn, 400 U.S. 1001, 91 S. Ct. 462, 27 L. Ed. 2d 452 (1971)*; *Gardella v. Chandler, 172 F.2d 402, 408-09 (2d Cir. 1949)*. It has, however, never been overruled.

In 1972 the Supreme Court majority in an opinion authored by Mr. Justice Blackmun held that baseball's reserve clause was protected by "positive inaction" of Congress in allowing the Federal Baseball decision to stand without statutory correction. But that opinion also included a clear-cut warning to all other sports not so blessed: "other professional sports operating interstate football, boxing, basketball, and, presumably, hockey and golf are not so exempt." *Flood v. Kuhn, supra, 407 U.S. at 282-83, 92 S. Ct. at 2112*.

Turning from the thus historically protected great American pastime to other less fortunate sports, I simply find no authoritative support for legalizing the sort of reserve clause sought to be imposed by the National Hockey League on its players.

The majority opinion cites and quotes from *Mackey v. National Football League, 543 F.2d 606 (8th Cir. 1976)*, **[**65]** Cert. dismissed, *434 U.S. 801, 98 S. Ct. 28, 54 L. Ed. 2d 59 (1977)*. But there the Eighth Circuit held:

> The district court found, however, that the Rule operates to restrict a player's ability to move from one team to another and depresses player salaries. There is substantial evidence in the record to support these findings. Accordingly, we hold that the Rozelle Rule constitutes a mandatory bargaining subject within the meaning of the National Labor Relations Act.
>
> On the basis of our independent review of the record, including the parties' bargaining history as set forth above, we find substantial evidence to support the finding that there was no bona fide arm's-length bargaining over the Rozelle Rule preceding the execution of the 1968 and 1970 agreements.

Id. at 615-16.

The District Judge in this case has made a similar finding which, as noted above, I cannot on this record characterize as clearly erroneous.

The attempt to distinguish these findings and conclusions in Mackey from those of the District Court in our instant case seems completely unpersuasive to me.

The majority opinion seems to argue that Mackey's holding that **[**66]** the Rozelle rule violated the Sherman Act was reversed in effect by a settlement between the National Football League and the Players' Association. A voluntary settlement of a lawsuit after remand for trial does not diminish the legal value of the remanding opinion. The Mackey case, in my judgment, stands squarely in favor of the result reached by the District Court in this case and is by no means weakened as precedent by a settlement arrived at during subsequent litigation. See *Reynolds v. National Football League, 584 F.2d 280 (8th Cir. 1978)*. Perhaps **[*1215]** in this present case also, if it were remanded, the parties might reach a settlement on less restrictive conditions than those shown herein. No judgment can be made in advance as to whether such conditions would satisfy the antitrust laws.

The majority opinion also quotes from now Circuit Judge Leon Higginbotham's excellent District Court opinion in *Philadelphia World Hockey Club, Inc. v. Philadelphia Hockey Club, Inc., 351 F. Supp. 462 (E.D.Pa.1972)*. As set forth below, however, Judge Higginbotham specifically held that "the National Hockey League cannot invoke the labor exemptions and **[**67]** is thus subject to a prosecution under the Sherman Act." *Id. at 500*.

He also concluded:

> In providing a special exemption from Sherman Act regulations for labor unions and employers who in good faith negotiated with those unions, Congress attempted to accommodate what frequently were conflicting public policies: the fostering and preservation of competitive business conditions in a free enterprise system on one hand, counterbalanced by a legitimate concern in improving and bettering the working conditions of laborers and the reduction of industrial strife through vigorous union organization and collective bargaining. The labor exemption which could be defensively utilized by the union and employer as a shield against Sherman Act proceedings when there was bona fide collective bargaining, could not be seized upon by either party and destructively wielded as a sword by engaging in monopolistic or other anti-competitive conduct. The shield

> cannot be transmuted into a sword and still permit the beneficiary to invoke the narrowly carved out labor exemption from the anti-trust laws. To allow and condone such conduct would frustrate Congress' carefully orchestrated efforts **[**68]** to harmoniously blend together two opposing public policies.

Id. at 499-500.

THE RULE OF REASON

In the Mackey case the District Court had held that the Rozelle rule represented a per se violation of the Sherman Act. The Eighth Circuit was not so sure. As a consequence, its opinion weighed the Rozelle rule under the "Rule of Reason" standard and concluded, "We hold that restraints on competition within the market for players' services fall within the ambit of the Sherman Act." *Mackey, supra at 618*. Assuming that "it (is) more appropriate to test the validity of the Rozelle Rule under the Rule of Reason," *Mackey, supra at 620*, I agree with the analysis of the Eighth Circuit opinion which did not find any legitimate business purpose for the restraints imposed by the Rozelle rule but also held that there were other less onerous (and legally less dubious) methods of achieving reasonable competitive balance in the National Football League. (See pp. 1217-1218 of this opinion)

The kind of restrictions sought to be applied there and here are anti-competitive in purpose and anti-competitive in effect. They are not novel and have frequently **[**69]** been found violative of the antitrust laws in the courts. *Mackey v. National Football League, 543 F.2d 606 (8th Cir. 1976)*, Cert. dismissed, *434 U.S. 801, 98 S. Ct. 28, 54 L. Ed. 2d 59 (1977)*; *Philadelphia World Hockey Club, Inc. v. Philadelphia Hockey Club, Inc., 351 F. Supp. 462 (E.D.Pa.1972)*; *Robertson v. National Basketball Ass'n, 389 F. Supp. 867 (S.D.N.Y.1975)*; *Smith v. Pro-Football, 420 F. Supp. 738 (D.D.C.1976)*, *Aff'd, 193 U.S. App. D.C. 19, 593 F.2d 1173 (D.C. Cir. 1978)*.

MANDATORY BARGAINING

I do reject one feature of the Mackey and Reynolds decisions upon which the majority relies. The fact that a particular provision restricting competition is a mandatory subject of collective bargaining and has been agreed upon by management and labor in a collective bargaining contract does not necessarily exempt the restriction from the Sherman Act. The antitrust laws were adopted to protect the free enterprise system and the general public. It is easy to postulate situations where the profit interests **[*1216]** of capital and the wage-hour interests of labor could be mutually served by introducing **[**70]** into collective bargaining agreements restrictions upon competition which are greatly contrary to the public interest and have nothing to do with the labor interests protected by the Clayton and Norris-LaGuardia Acts. In two instances where there was labor-management agreement (albeit not in the written contracts), the Supreme Court struck down the restrictive practices. *Allen Bradley Co. v. Local 3, IBEW, 325 U.S. 797, 65 S. Ct. 1533, 89 L. Ed. 1939 (1945)*; *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*.

In the Pennington case, as we have previously noted, Justice White, in the opinion of the Court, noted that in *Brotherhood of Carpenters v. United States, 330 U.S. 395, 67 S. Ct. 775, 91 L. Ed. 973 (1947)*, the Supreme Court had applied the Allen Bradley doctrine (barring any exemption) without regard to whether the restrictive practice found expression in a collective bargaining agreement.

It should also be noted that what is proposed here is light years removed from the controversy which divided the Court in United Mine Workers v. Pennington as far as origin and purpose of the restrictive practices **[**71]** here involved are concerned. Nonetheless, it is relevant to the legal posture of this case to note that three Justices dissented in the Pennington case, arguing at least in part that because the wage-hour issues in Pennington were mandatory subjects for bargaining, these issues should be exempt from the antitrust laws. The majority of the Court rejected this specific contention. I am unable to find any Supreme Court authority which may properly be cited for any employment of the labor exemption or the nonstatutory exemption as to the anticompetitive practices disclosed in this case. In more recent consideration, the majority of the Court had this to say about the nonstatutory exemption:

> The nonstatutory exemption has its source in the strong labor policy favoring the association of employees to eliminate competition over wages and working conditions. Union success in organizing workers and standardizing wages ultimately will affect price competition among employers, but the goals of federal labor law never could be achieved if this effect on business competition were held a violation of the antitrust laws. The Court therefore has acknowledged that labor policy requires tolerance **[**72]** for the lessening of business competition based on differences in wages and working conditions. See *Mine Workers v. Pennington, supra, 381 U.S. at 666, 85 S. Ct. 1585*; Jewel Tea, supra, 381 U.S. at 692-693, 85 S. Ct. (1596) at 1603-1604, (14 L. Ed. 2d 640) (opinion of WHITE, J.). Labor policy clearly does not require, however, that a union have freedom to impose direct restraints on competition among those who employ its members. Thus, while the statutory exemption allows unions to accomplish some restraints by acting unilaterally, E.g., *Federation of Musicians v. Carroll, 391 U.S. 99, 88 S. Ct. 1562, 20 L. Ed. 2d 460 (1968)*, the nonstatutory exemption offers no similar protection when a union and a nonlabor party agree to restrain competition in a business market. See *Allen Bradley Co. v. Electrical Workers, 325 U.S. 797, 806-811, 65 S. Ct. 1533, 89 L. Ed. 1939 (1945)*; Cox, Labor and the Antitrust Laws A Preliminary Analysis, 104 U.Pa.L.Rev. 252 (1955); Meltzer, Labor Unions, Collective Bargaining, and the Antitrust Laws, 32 U.Chi.L.Rev. 659 (1965).
>
> *Connell Construction Co. v. Plumbers & Steamfitters, 421 U.S. 616, 622-23, 95 S. Ct. 1830, 1835, 44 L. Ed. 2d 418 (1975)*. **[**73]**

Justice Powell's language just quoted would hardly tend to allow the imposition of the restrictions on employment here sought by the hockey clubs in their own interests, as consistent with a "nonstatutory exemption" extrapolated from the Clayton and Norris-LaGuardia Acts. Even more recently the Supreme Court has dealt with the "Rule of Reason" upon which the appellants seek to rely. In *National Society of Professional Engineers v. United States, 435 U.S. 679, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*, Justice **[*1217]** Stevens, writing for the Court, stated the following as to the true meaning of that rule:

> From Mr. Justice Brandeis' opinion for the Court in *Chicago Board of Trade (V. U. S., 246 U.S. 231, 38 S. Ct. 242, 62 L. Ed. 683*) to the Court opinion written by MR. JUSTICE POWELL in *Continental T. V., Inc. (V. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568*), the Court has adhered to the position that the inquiry mandated by the Rule of Reason is whether the challenged agreement is one that promotes competition or one that suppresses competition. "The true test of legality is whether the restraint imposed **[**74]** is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition." *246 U.S. at 238, 38 S. Ct. at 243*; quoted in *433 U.S. 36, at 49 n. 15, 97 S. Ct. 2549, 2557, 53 L. Ed. 2d 568*.
>
> *National Society of Professional Engineers v. United States, supra at 691, 98 S. Ct. at 1365*. (Footnote omitted.)

I simply see no way that the restrictive practices we deal with in Clause 9A can be held to "promote competition" (unless, of course, we turn from economic competition to competition on ice). Clause 9A is clearly an unreasonable restraint of trade.

STANDING

Finally, appellants have claimed, and do now, that McCourt had no standing to bring this suit. The District Judge in this case found that he had standing. Other courts have similarly found standing for players similarly situated because of threat to a player's earnings and the restriction upon his freedom to contract with a club in a different location or with different opportunities where opportunities appeared to him to be more desirable. See, e.g., *Flood v. Kuhn, 407 U.S. 258, 92 S. Ct. 2099, 32 L. Ed. 2d 728 (1972)*; **[**75]** *Haywood v. National Basketball Assoc., 401 U.S. 1204, 91 S. Ct. 672, 28 L. Ed. 2d 206 (1971)* (Douglas, J., in chambers opinion); *Radovich v. National Football*

League, 352 U.S. 445, 77 S. Ct. 390, 1 L. Ed. 2d 456 (1957); *Mackey v. National Football League, 543 F.2d 606 (8th Cir. 1976)*, Cert. dismissed, *434 U.S. 801, 98 S. Ct. 28, 54 L. Ed. 2d 59 (1977)*.

The Supreme Court of the United States in *Flood v. Kuhn, supra*, did not specifically deal with standing. Since the United States Supreme Court granted certiorari and decided the Flood case on the interstate commerce issue, we must assume that it accepted the proposition that Flood had standing to prosecute his case.

INJUNCTIVE RELIEF

No doubt Clause 9A operates directly on free agents to their obvious economic disadvantage by decreasing markedly their opportunities to get desirable economic terms with clubs other than their last employer. It also operates directly upon the player like McCourt who is chosen to "equalize" the loss occasioned by his former club's signing a "free agent" previously under contract to another club. Here McCourt seeks to enjoin orders **[**76]** from the club (Detroit) he contracted with, to report to and play for another club (Los Angeles) which he claims will provide him with much less satisfactory career opportunity than Detroit. He will also have to move self and family to Los Angeles, which he asserts is not his free choice and which he sees as an interference with his freedom. The District Judge found on his summary of the evidence that McCourt would suffer irreparable injury and granted injunctive relief as follows:

> There is no real dispute in this record that the plaintiff will suffer irreparable injury if the injunction is not granted. All witnesses have agreed that if the plaintiff does not attend training camp with the team he is ultimately going to play with, he will achieve only mediocre success. Moreover, the evidence establishes that Los Angeles now has three exceptional players who play the same position as plaintiff. One of them, Mr. Dionne, is also a first draft choice and is far more established in hockey competition than this plaintiff. To deny plaintiff an injunction would require him to compete for a regular position with those **[*1218]** three players. Mr. Abel's testimony supports plaintiff's **[**77]** contention that plaintiff would achieve greater success if he continued to play in Detroit. In our view, this plaintiff has, like all sports figures, an inalienable right to pursue stardom. To deny him that right is to injure him irreparably. Plaintiff need not prove his contentions to an absolute certainty. He has produced sufficient evidence to satisfy us that he will in fact suffer irreparable injury.
>
> Moreover, on balance, we find that no defendant is threatened with an injury comparable to the plaintiff's irreparable harm. The Los Angeles Kings and the California Sports, Inc., have argued valiantly, but unpersuasively, that to deny them plaintiff's services will damage their franchise, that the team will be less proficient, that their record as a team and their reputation in the community will be seriously damaged and that they have already lost the sale of a large number of season tickets, which the testimony indicates equals upwards of $ 300,000. These alleged consequences, however, flow from defendants' loss of the services of Rogatien Vachon and not the injunction we will enter. Defendants may not recover for their inability or their refusal to renew Mr. Vachon's **[**78]** contract through the operation of a provision that violates the ***antitrust law***. Any injury the Los Angeles Kings may suffer could have been avoided by exercising a greater effort to retain the services of Mr. Vachon. The testimony from his agent, Mr. Rauch, is that Los Angeles was afforded the first opportunity to contract for Vachon. In any event, there is no relationship shown in the record between the loss it claims it suffered and the services that it claimed plaintiff can recoup for it. Moreover, the balance of public interest favors this plaintiff. Professional sports generally and the public specifically are better served when there is open, unfettered competition for playing positions. See *Bowman v. National Football League, 402 F. Supp. 754 (D.Minn.1975)*.

The District Judge's findings of fact are not clearly erroneous (*Fed.R.Civ.P. 52(a)*) and the relief he ordered did not constitute abuse of his discretion.

I would affirm the District Judge in granting injunctive relief against Clause 9A.

Antitrust & Trade Law > Sherman Act > General Overview

HN1[] **Per Se Rule & Rule of Reason, Per Se Violations**

Section 1 of the Sherman Act, 15 U.S.C.S. § 1, provides that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is hereby declared to be illegal.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN2[] **Monopolies & Monopolization, Attempts to Monopolize**

In the absence of any purpose to create or maintain a monopoly, the Sherman Act, 15 U.S.C.S. § 1 et seq., does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal; and, of course, he may announce in advance the circumstances under which he will refuse to sell.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] **Regulated Practices, Price Fixing & Restraints of Trade**

Private companies have the right, in the absence of any purpose to create or maintain a monopoly, to freely choose the parties with whom they will deal.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Actual Monopolization, Anticompetitive & Predatory Practices**

A monopoly is said to exist if there is one, and only one, seller in a well-defined market. Oligopoly exists when more than one seller is in the market, but when the number is not so large as to render negligible the contribution of each. Where there is a single buyer of an input a monopsony is said to exist; if there are several buyers oligopsony is the proper designation. It is generally true that since all firms in a given market producing the same product will need similar inputs, one typically finds oligopsony in the input market when there is a corresponding oligopoly in the seller's output market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Patent Law > Double Patenting > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > General Overview

HN5[] **Monopolies & Monopolization, Actual Monopolization**

The antitrust laws do not guarantee inventors returns on their inventions. The patent laws do protect them against free riders for a period of 17 years, allowing, in effect, a statutory monopoly; however, there is no guarantee of financial success.

Antitrust & Trade Law > ... > Private Actions > Costs & Attorney Fees > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN6[] Private Actions, Costs & Attorney Fees

Section 4 of the Clayton Act, *15 U.S.C.S. § 15*, reads as follows: Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit including a reasonable attorney's fee.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Costs & Attorney Fees > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN7[] Private Actions, Remedies

The availability of relief under § 4 of the Clayton Act, *15 U.S.C.S. § 15*, is confined only to those individuals whose protection is the fundamental purpose of the antitrust laws.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN8[] Clayton Act, Claims

The key language in § 4 of the Clayton Act, *15 U.S.C.S. § 15*, are the phrases "business or property" and "by reason of," which provide the twin requirements for standing. First, a plaintiff must allege an injury to his "business or property" in a strictly commercial sense. Second, a plaintiff must allege that his injury resulted "by reason of" an antitrust violation. In approaching these requirements analytically, courts have tended to adopt one of two methods of analysis: the "direct injury" and the "target area" approaches.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN9[] Private Actions, Standing

The direct injury test looks primarily at the relationship between plaintiff and the alleged antitrust violator. Under the target area test, a court will look at the effect of the alleged violator's activities within a particular area of the economy in which plaintiff claims to have been harmed: To state a cause of action under the anti-trust laws a plaintiff must show more than that one purpose of the conspiracy was a restraint of trade and that an act has been committed which harms him. He must show that he is within that area of the economy which is endangered by a breakdown of competitive conditions in a particular industry. Otherwise he is not injured "by reason" of anything forbidden in the anti-trust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN10[] Private Actions, Standing

The direct injury test raises the issue as to whether consumers have standing to use the passing-on argument offensively, while the target area test presents complications in both identifying real targets and particular areas of the economy which are affected.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

HN11[] Private Actions, Standing

Any final determination as to standing will necessarily turn on the question of the remoteness of the alleged injury, i.e., the relationship between the alleged antitrust violation and the injury inflicted on plaintiffs. Such a determination must consider not only the policies behind allowing recovery under the antitrust laws but also the complicated interrelationships which arise when antitrust and patent law are presented in the same claim. Plaintiffs have the burden of showing (1) that an antitrust violation occurred, and (2) that they were within the "target area" of the anticompetitive activity.The alleged antitrust violation must yield an injury which is "direct" and not "incidental."

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

Business & Corporate Law > Distributorships & Franchises > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

HN12[] Standing, Clayton Act

While a rule of reason approach to standing under § 4 of the Clayton Act, *15 U.S.C.S. § 15*, should be used, it a plaintiff not a target of any antitrust violation does not become a target by virtue of the culpability of its lessee, patentee, franchisee, supplier, customer, or debtor.

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > General Overview

Patent Law > Ownership > General Overview

HN13[] Intellectual Property, Ownership & Transfer of Rights

The patentee receives nothing from the law which he did not have before, and the only effect of his patent is to restrain others from manufacturing, using, or selling that which he has invented. The patent law simply protects him in the monopoly of that which he has invented and has described in the claims of his patent.

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > Assignments

Business & Corporate Compliance > ... > Remedies > Buyer's Damages & Remedies > General Overview

Patent Law > Ownership > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > General Overview

HN14[] **Ownership & Transfer of Rights, Assignments**

The holder of a patent has no greater power to restrict the terms upon which a buyer of the patented product resells at the next vertical level than does the owner of any other product. The patentee can obtain the full reward of the patent in the first sale; a right to restrict the goods in more remote channels of trade is not a traditional part of the patent grant nor is it needed in order for the patentee fully to enjoy the monopoly of the patent.

Patent Law > Ownership > General Overview

HN15[] **Patent Law, Ownership**

The purpose of the patent law is fulfilled with respect to any particular article when the patentee has received his reward for the use of his invention by the sale of the article, and that once that purpose is realized the patent law affords no basis for restraining the use and enjoyment of the thing sold.

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > Assignments

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > Licenses

Patent Law > Ownership > General Overview

HN16[] **Ownership & Transfer of Rights, Assignments**

In construing and applying the patent law so as to give effect to the public policy which limits the granted monopoly strictly to the terms of the statutory grant, the particular form or method by which the monopoly is sought to be extended is immaterial. The first vending of any article manufactured under a patent puts the article beyond the reach of the monopoly which that patent confers. Whether the licensee sells the patented article in its completed form or sells it before completion for the purpose of enabling the buyer to finish and sell it, he has equally parted with the article, and made it the vehicle for transferring to the buyer ownership of the invention with respect to that article. To that extent he has parted with his patent monopoly in either case, and has received in the purchase price every benefit of that monopoly which the patent law secures to him. If he were permitted to control the price at which it could be sold by others he would extend his monopoly quite as much in the one case as in the other, and he would extend it beyond the fair meaning of the patent statutes and the construction which has hitherto been given to them.

Business & Corporate Compliance > ... > Ownership > Conveyances > Licenses

Patent Law > Ownership > Patents as Property

Antitrust & Trade Law > ... > Intellectual Property > Ownership & Transfer of Rights > Licenses

Patent Law > Ownership > General Overview

Patent Law > Ownership > Conveyances > General Overview

Business & Corporate Compliance > ... > Ownership > Conveyances > Royalties

HN17[] **Conveyances, Licenses**

A patentee may negotiate for a minimum royalty payment but a court cannot go beyond the agreement of the parties to establish a minimum royalty where the parties themselves fail to provide one. A bargained-for royalty in licensing agreements does not have to meet a test of reasonableness. It would seem that in a setting in which marketplace economics determine the ultimate value of a new invention, and where that value is determined by negotiations freely entered into between the patentee-owner and the licensee-manufacturer, that a given outcome should not be challenged by the courts, absent, of course, any clearly prohibited anticompetitive behavior. The law has already recognized that a licensor is free to exact from his licensee a price as high as he can get, and a corollary of this ruling in a free market setting would be that a licensee should be accorded the right to bargain for as low a price as he can get, up to and including a zero royalty.

Civil Procedure > ... > Justiciability > Standing > General Overview

Estate, Gift & Trust Law > Wills > Will Contests > No Contest Clauses

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Patent Law > ... > Damages > Collateral Assessments > General Overview

HN18[] **Justiciability, Standing**

The scope of antitrust standing should be determined by reference to the special problems created by treble damage actions, such as ruinous or duplicative recoveries. The scope of substantive protection should be determined in each case by analysis of pertinent substantive antitrust policies. The "distinction between direct and indirect injury is arbitrary, even metaphysical, since all antitrust injuries are "direct" to a greater or lesser degree. The real difficulty with these traditional approaches to standing is their failure to take account of all aspects of antitrust policy, including the in terrorem effect of treble damages and "overkill" liability, as well as relevant economic and social policies. Such a policy approach to standing analysis must, of necessity, consider the nature and severity of the alleged injury, the parties involved, and the relationship of all of these to substantive ***antitrust law***.

Paul V. Niemeyer and David F. Albright, Baltimore, Md., for defendants.

Opinion by: YOUNG

Opinion

[*639] I. THE FACTS

[*464]** Plaintiffs Board and Shapiro spend their spare time as inventors of automotive seat belt equipment. Plaintiff Board is a practicing psychiatrist, and Shapiro an engineer and a patent attorney. In the mid-1960s, the federal government required the installation of seat belts in all new cars sold in the U.S. market. Plaintiffs Board and Shapiro held patents relating to an automatic seat belt retractor, a device which locks seat belts into place and prevents their slippage while being worn by a passenger. In order to realize a return on their investment in the patented articles, plaintiffs sought to license the articles directly with the nation's major car manufacturers. When they approached General Motors ("GM") in 1963, George Cook, the general director of purchasing, told plaintiffs that they had to talk with Hamill Manufacturing Company ("Hamill"), one of GM's suppliers of various automotive parts. According to Cook, GM did not deal directly with outside inventors, preferring **[**2]** instead to route them through suppliers. Plaintiffs also met with representatives from Chrysler and American Motors and with other suppliers of seat belt equipment, including Borg-Warner, American Safety Equipment Company ("American Safety"), and Irvin Industries.

The major car manufacturers told plaintiffs that to license their seat belt retractor device, they had to negotiate directly with the suppliers rather than with the manufacturers themselves. Consequently, plaintiffs commenced licensing negotiations in 1963 with American Safety and completed these negotiations in 1965. It was in conducting these negotiations beginning in 1963 that plaintiffs first became aware of defendants' policy of requiring royalty-free second source licenses. The practice of insisting upon royalty-free second source licenses is an attempt by the car manufacturers to guarantee a steady supply of particular parts used in their automotive production lines from multiple sources. In exchange for a supplier's receiving a certain share of a car manufacturer's business for a given input, the supplier must sign an agreement releasing the car manufacturer from having to pay any item-by-item royalties on the **[**3]** patented products made by the supplier. The obvious effect of such a policy, regardless of whether it is devised to guarantee a steady supply or for other reasons, is to reduce to zero the royalties which the inventors eventually receive. In other words, from a purely competitive standpoint, a licensee-supplier could not expect to remain in business very long if he agreed to pay royalties to inventors where his competitors did not agree, in effect, to cut their own profits by likewise paying royalties. In concluding a licensing agreement with Hamill in 1965, plaintiffs did agree to relinquish their right to 60% Of the potential royalties.

American Safety constructed and tested manufacturing prototypes of plaintiffs' inventions **[*640]** beginning in 1965, and plaintiffs received some $ 95,000, including a $ 25,000 down payment and minimum royalties under the licensing agreement. In 1966, however, American Safety cancelled the licensing agreement before plaintiffs' inventions were actually marketed.

Plaintiffs then renewed negotiations with Hamill in 1967 but were again confronted with a requirement for a royalty-free license provision for 50% Of the procurement needs **[***465]** of the **[**4]** automobile manufacturers. No license agreement was ever concluded with Hamill.

In 1969 and 1970, plaintiffs again negotiated with Hamill to obtain licensing and to develop commercially plaintiffs' inventions. After several meetings, Hamill finally told plaintiffs that it would be economically unfeasible for them to pay plaintiffs' royalties, because Hamill would be operating at a competitive disadvantage vis-a-vis non-royalty-paying second source licensees designated by Ford and GM.

According to plaintiffs, similar negotiations with American Safety, Hamill, and Irvin Industries resulted in no licenses ever being consummated. In the case of negotiations with Irvin Industries, Irvin requested that plaintiffs agree to granting royalty-free licenses to car manufacturers for 90% Of the manufacturers' procurement requirements for plaintiffs' inventions. This meant that plaintiffs would receive royalties on only 10% Of their inventions. These license negotiations were also unsuccessful.

As plaintiffs conclude in their Memorandum arguing for summary judgment,

> In every instance in which plaintiffs either licensed or attempted to license their inventions to a seat belt supplier of **[**5]** the defendants, plaintiffs were faced with a situation in which, because of the royalty-free, second-source licensing policies of the defendants, the prospect of paying reasonable royalties to plaintiffs was economically unattractive to the supplier.

Plaintiffs' Memorandum at 23. [1] On the basis of this alleged injury, plaintiffs filed a suit in this Court in 1971 against defendants GM and Ford. Contesting the legality of the royalty-free second source licensing policies, plaintiffs charged defendants with engaging in trade practices which restructured the entire industry relationship between inventors, licensee-suppliers, and the automakers. According to plaintiffs, the impact of defendants' policies not only tends to foster backward integration in the auto industry since suppliers must increasingly follow the dictates of the car manufacturers but also encourages a trend away from past practices whereby the auto industry relied heavily on various suppliers to discover inventions having new technology. Whereas at one time outside inventors were the principal sources of innovation in the automotive industry, plaintiffs contend that today any innovations come from in-house **[**6]** staff inventors, and the net result, aggravated by defendants' royalty policies, is to make it economically impossible for suppliers to deal with outside inventors.

Since the case was initially filed in 1971, discovery delays and numerous motions have produced seemingly unnecessary complications. While plaintiffs' theories as to patent-antitrust liability may, to some extent, be novel, the issues presented are not insurmountable. In its current posture, the case is before this Court on cross motions for partial summary judgment. Plaintiffs' complaint includes three counts: Count One alleges antitrust violations; Count Two, by reasserting the allegations of Count One, claims unfair competition; and Count Three states a claim for patent infringement. Only Counts One and Two are the subject matter of the partial summary judgment motions **[**7]** presented at this juncture. Claiming defendants' alleged infractions of the antitrust laws to be Per se violations, plaintiffs seek both treble damages and an injunction against further violations.

[*641] Plaintiffs have moved for summary judgment pursuant to *Rule 56(e) of the Federal Rules of Civil Procedure*, stating that the material facts as pleaded are not in dispute. Defendants have responded but suggest that plaintiffs lack standing to pursue their claims and that plaintiffs' suit is barred by the applicable statute of limitations and the doctrine of laches.

II. EVIDENCE OF CONSPIRACY

This case presents several fascinating issues of antitrust-patent litigation. [2] The essence of plaintiffs' complaint is that defendants' alleged policy of requiring royalty-free second source licensing, in effect, made "the prospect of paying reasonable royalties to plaintiffs . . . economically unattractive to the supplier." Plaintiffs' Memorandum at 23. While this result hurts the plaintiffs financially, they also seek to broaden this Court's conception of the real nature of the Social harm involved by stating that the overall impact of defendants' licensing **[***466]** policy is to damage the **[**8]** "market for innovation" in the entire automobile industry:

---

[1] References to "Plaintiffs' Memorandum" hereinafter refer to the Memorandum submitted in support of their motion for summary judgment, filed with this Court on June 15, 1978.

[2] *Article I, § 8, cl. 8 of the Constitution* provides Congress with the authority to grant inventors exclusive rights to their discoveries for limited periods to promote new ideas and innovation. Pursuant to this constitutional grant, Congress passed the Patent Act, *35 U.S.C. §§ 1-293 (1976)*. See Note, Patent Law License Agreements, 18 Vill.L.Rev. 968, 969-70 n.12 (1973).

> Simply stated, defendants have blocked the flow of technological improvements between plaintiffs and automobile buyers, thereby effectively restraining plaintiffs in their efforts to compete in the Market for innovation in original automotive equipment.

Plaintiffs' Memorandum at 26 (emphasis added).

The complaint is artfully phrased, and reading through the various documents filed during the past seven years it becomes apparent that what is actually going on here is an attempt by plaintiffs to make some money on their invention. Both the discovery and their own admissions **[**9]** (see Plaintiffs' Memorandum at 20-23) indicate that they have a relatively weak record in terms of "paying" relationships with suppliers. Consequently, one might suppose that the language about the "market for innovation" is an effort by plaintiffs to temper their profitmaking motives with a general appeal to overall consumer welfare. It would seem, then, that given their theory of harm, plaintiffs have an obligation to explain how their failure to make a significant return on their investment as inventors resulted in an injury to the "market for innovation." What they appear to mean is that without a return for their efforts, they and others like them must give up inventing. As will be discussed in greater detail below, however, the antitrust laws do not automatically guarantee inventors returns for their activities. [3] Insofar as the consumer welfare issue is concerned, it would seem possible for the auto manufacturers to argue that not having to pay royalties might mean lower costs to consumers. If this is so, then plaintiffs should be able to explain how losing them as innovators is more valuable to consumers than paying lower car prices because of defendants' royalty-free **[**10]** licensing policy.

A. Alleged Violations of *Section 1* of the Sherman Act

HN1[] *Section 1* of the Sherman Act provides that:

> Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal.

[*642] *15 U.S.C. § 1 (1976)*. Plaintiffs claim that by combining with their suppliers to enforce their royalty-free license policies, **[**11]** defendants have created a Per se violation of the antitrust laws. In paragraph 15 of their complaint, plaintiffs charge that defendants

> have attempted to and have conspired to monopolize and deliberately and by conscious parallelism have monopolized trade and commerce in the automotive industry in said equipment and apparatus by the policies and acts, among others, enumerated above, in violation of the anti-trust laws, including Section 2 of the Sherman Act.

Complaint at 7. In support of their claims, as advanced in their summary judgment motion, plaintiffs refer to a number of the most important antitrust conspiracy cases; however, in most of these instances, their reliance is misplaced since the conduct prohibited in those cases Clearly involved conspiracy. As will be explained below, to this date there has been no colorable showing of a conspiracy in this case, and at this latest stage in the development of this case, plaintiffs' counsel admit as much.

Plaintiffs argue that "(w)here someone else acts in tandem with the malevolent actor, the parties to the combination may have different, and even conflicting goals, but there is still a combination." Plaintiffs' Memorandum **[**12]** at 26. Their reliance on *United States v. Parke, Davis & Co., 362 U.S. 29, 80 S. Ct. 503, 4 L. Ed. 2d 505 (1960)*, however, is misguided. Parke, Davis was a resale price maintenance case in which the Government had introduced evidence showing that Parke, Davis had actually announced a policy of refusing to deal with retailers who failed to charge the minimum prices required by Parke, Davis. Parke, Davis was active in setting up and maintaining this series of arrangements. As the Court noted, "Each wholesaler was interviewed individually but each was informed that his competitors were also being apprised of this. The wholesalers without exception

---

[3] While the primary objective of patent law is the public benefit, Rep. Att'y Gen. Nat'l Comm. to Study Antitrust Laws 224 (1955), it remains generally true that ". . . whilst the remuneration of genius and useful ingenuity is a duty incumbent upon the public, the rights and welfare of the community must be fairly dealt with and effectually guarded. Considerations of individual emolument can never be permitted to operate to the injury of these. * * * " (Footnote omitted). Id. citing *Kendall v. Winsor, 62 U.S. (21 How.) 322, 327-29, 16 L. Ed. 165 (1859)*.

indicated a willingness to go along." *362 U.S. at 33, 80 S. Ct. at 506*. The Court noted a difference between "mere customer selection" and behavior which "created combinations or conspiracies to enforce resale price maintenance." *362 U.S. at 38, 80 S. Ct. at 508*.

[*467]** Given the previous reasoning in *United States v. Colgate, 250 U.S. 300, 39 S. Ct. 465, 63 L. Ed. 992 (1919)*, it became evident that what was condemned in Parke, Davis was the particular method used to secure enforcement of the resale price maintenance scheme. The Colgate opinion **[**13]** has become celebrated on the basis of the following key passage:***HN2***[]

> In the absence of any purpose to create or maintain a monopoly, the (Sherman) act does not restrict the long recognized right of trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal; and, of course, he may announce in advance the circumstances under which he will refuse to sell.

250 U.S. at 307, 39 S. Ct. at 468. Thus, under Colgate there was room for an agreement between the manufacturer and retailers to fix retail prices so long as their behavior fell short of becoming a conspiracy. Parke, Davis narrowed the Colgate privilege to the "mere announcement of . . . (the manufacturer's) policy (of not dealing with price cutters) and the simple refusal to deal." *362 U.S. at 44, 80 S. Ct. at 512*. See R. Posner, ***Antitrust Law***: An Economic Perspective 153-56 (1976). [4]

[14]** What happened in Parke, Davis, therefore, was the occurrence of activity which went beyond the limits set in Colgate :

> **[*643]** When the manufacturer's actions, as here, go beyond mere announcement of his policy and the simple refusal to deal, and he employs other means which effect adherence to his resale prices, this countervailing consideration is not present and therefore he has put together a combination in violation of the Sherman Act.

362 U.S. at 44, 80 S. Ct. at 512. The Court held that in "involving the wholesalers to stop the flow of Parke, Davis products to the retailers, thereby inducing retailers' adherence to its suggested retail prices," Parke, Davis stepped beyond the limitations permitted in *Colgate. 362 U.S. at 45, 80 S. Ct. at 512*. In seeking assurances of compliance as well as the compliance itself, *362 U.S. at 46, 80 S. Ct. 503*, Parke, Davis was found to have organized a price-maintenance combination or conspiracy in violation of the *Sherman Act. 362 U.S. at 47, 80 S. Ct. 503*.

Plaintiffs' reliance on *Klor's Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*, is likewise misplaced. They characterize Klor's **[**15]** as holding that "concerted action to deprive even a single merchant of the goods he needed to compete effectively was a Per se violation." Plaintiffs' Memorandum at 31. Although technically accurate, this assessment ignores the fact that Klor's involved a group boycott of proportions not alleged in the instant case:

> Alleged in this complaint is a wide combination consisting of manufacturers, distributors and a retailer. This combination takes from Klor's its freedom to buy appliances in an open competitive market and drives it out of business as a dealer in the defendant's products.

359 U.S. at 212-13, 79 S. Ct. at 710. While it remains true that the Sherman Act "has consistently been read to forbid all contracts and combinations "which "tend to create a monopoly," " whether "the tendency is a creeping one' or "one that proceeds at full gallop,' *International Salt Co. v. United States, 332 U.S. 392, 396 (, 68 S. Ct. 12, 92 L.*

---

[4] Posner notes that some commentators believe that the implicit theory in Parke, Davis is that the combination between Parke, Davis and its wholesalers resembled a boycott, which is a Per se violation of the Sherman Act. Posner questions this since resale price maintenance is also a Per se violation. R. Posner, Supra, at 155-56. Colgate has been traditionally criticized on the grounds that it weakens the Per se prohibition against resale price maintenance first enunciated in *Dr. Miles Medical Co. v. John D. Park & Sons Co., 220 U.S. 373, 31 S. Ct. 376, 55 L. Ed. 502 (1911)*.

Ed. 20)." 359 U.S. at 213-14, 79 S. Ct. at 710, as in Parke, Davis, the anticompetitive behavior condemned in Klor's had the characteristics of the type of public wrong proscribed by the Sherman Act.

The list of cases cited by plaintiffs includes **[**16]** some of the most noteworthy precedents in antitrust jurisprudence, yet in the case of virtually every alleged violation market exclusion, blocking entry, and creating "bottlenecks" plaintiffs' allegations describe defendants' behavior in purely conclusory terms so as to make defendants' behavior appear to fit within a given anticompetitive practice.

1 Market exclusion. On this point, plaintiffs cite *American Federation of Tobacco Growers, Inc. v. Neal, 183 F.2d 869 (4th Cir. 1950)*, where the violation consisted of defendants allotting selling time on a tobacco auction market so as to exclude plaintiff, a tobacco farmers' cooperative, from the local market and effectively from competing against defendants, the Danville Tobacco Association. What the court condemned was the concerted behavior of "tobacco warehousemen who use their organization **[***468]** into a board of trade to monopolize the time of the tobacco buyers allotted to the market and thus to exclude another warehouseman from competing on the market with them." *183 F.2d at 873*. See also *Karseal Corp. v. Richfield Oil Corp., 221 F.2d 358 (9th Cir. 1955)* (contract requirements and agreements of exclusive dealing condemned). [5] While **[**17]** market exclusion may describe the impact of defendants' policies upon plaintiffs, there has been no evidence of the sort of "concerted behavior" prohibited in American Federation.

[*644] 2 Blocking entry. Plaintiffs adopt a "but for" argument (Plaintiffs' Memorandum at 23, 49 & 50) to the effect that they would have received royalties and, implicitly, licenses with suppliers, had defendants not engaged in illegal pricing activities. In *Parmelee Transportation **[**18]** Co. v. Keeshin, 144 F. Supp. 480 (N.D.Ill.1956)*, *Aff'd, 292 F.2d 794 (7th Cir. 1961)*, plaintiffs argued that defendants Deliberately closed to them competition in "an important field of interstate commerce," *144 F. Supp. at 484*, and defendants claimed that by conspiracy or otherwise, the railroads might have awarded the terminal contract to a party other than plaintiffs. In refusing to dismiss the complaint, the court stated:

> It is beyond the power of the plaintiff, or anyone else, to say now with certainty what might or might not have happened had the conspiracy not intervened. Facts have been alleged from which it would be possible and reasonable to draw the inference that the contract would have been awarded to plaintiff but for the wrongful conduct of the defendants. This is sufficient.

144 F. Supp. at 485-86. Again, however, Parmelee involved significantly more "deliberate" behavior than the instant case. See also *United States v. General Dyestuff Corp., 57 F. Supp. 642 (S.D.N.Y.1940)*. While it is true that "(n)either the letter of the law nor its purpose "distinguishes between strangling of commerce which has been born and preventing the birth of a commerce which **[**19]** does not exist,' " *United States v. United Shoe Machinery Co., 247 U.S. 32, 53, 38 S. Ct. 473, 480, 62 L. Ed. 968 (1918)*, it can be questioned whether plaintiffs accurately characterize themselves as being engaged in "commerce" in the traditional sense as that word is used in the antitrust laws. For example, does it even make sense to talk of excluding inventors from a market? Unless the inventor manufactures and sells his invention himself, it is not immediately clear how an inventor is being "excluded" from a market or even from entering into commerce. While an inventor would undoubtedly have a financial interest in whatever royalties were generated once his invention were licensed and marketed, unless he manufactured the invention himself (which plaintiffs Board and Shapiro do not), it is doubtful that the inventor could allege that the "birth of a commerce" had been aborted. [6] As the court in Raitport v. General Motors, No. 73-2054 at

---

[5] The Karseal court also reaffirmed the "target area" doctrine as to proximate cause in an antitrust injury:

the rule is that one who is only Incidentally injured by a violation of the antitrust laws, the bystander who was hit but not aimed at, cannot recover against the violator. *Loeb v. Eastman Kodak Co., 3 Cir. 1910, 183 F. 704*; *Gerli v. Silk Ass'n of America, D.C.S.D.N.Y.1929, 36 F.2d 959*; *Corey v. Boston Ice Co., D.C.Mass.1913, 207 F. 465*; *Conference of Studio Unions v. Loew's, Inc., supra (9 Cir., 1951, 193 F.2d 51*).

221 F.2d at 363.

[6] This issue will be treated in considerable detail in the discussion of antitrust standing, Infra.

5 (E.D.Pa.1975), *Aff'd, 547 F.2d 1163 (3rd. Cir. 1976)*, Cert. denied, *431 U.S. 932, 97 S. Ct. 2639, 53 L. Ed. 2d 248 (1977)*, said with respect to a similar claim to the effect that defendant car manufacturers were restraining new companies from **[**20]** entering the automotive components market, neither plaintiff nor any other automotive component "inventor-entrepreneur" has a federally guaranteed right to have his business proposals accepted and financed by private automotive companies. Moreover, the Supreme Court has long recognized ***HN3***[] the right of private companies, in the absence of any purpose to create or maintain a monopoly, to freely choose the parties with whom they will deal. *United States v. Colgate & Company, 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992 (1919)*.

In *Gamco, Inc. v. Providence Fruit and Produce Building, 194 F.2d 484 (1st Cir. 1952)*, the court noted that "(t)he (Sherman) Act does not merely guarantee the right to create markets; it also insures the right of entry to old ones." *194 F.2d at 487*. Articulating the appropriate standard for assessing market exclusion, Judge Clark observed that "(t)he conjunction of power and motive to exclude **[**21]** with an exclusion not immediately and patently justified by reasonable business requirements establishes a prima facie case of the purpose to monopolize." *194 F.2d at 488*. Yet in Gamco, the exclusion affected defendant's com **[***469]** petitors directly, whereas to speak of the automakers and plaintiffs as direct competitors is to engage in an exaggeration.

[*645] On the other hand, plaintiffs and defendants may "compete" to the extent that defendants maintain in-house inventors. In the area of creative innovation, however, the traditional concepts of competition and market behavior seem misplaced. Although Ford and General Motors maintain their own in-house inventors, it seems unlikely that the automakers would rely on their own staffs entirely. New ideas in the automotive field can emerge from noncompany private "Edisons" as well as from company employees, and to the extent that the automakers utilize inventions from men like Board and Shapiro, they may in fact be able to pick and choose among new ideas until they discover what they want. Moreover, they can select from among private inventors' inventions without having to put these inventors on the company payroll. While the patent **[**22]** licensing system prevents companies from thereby getting a "free ride" from others' inventions, it is not at all clear as to whether the use of private inventions is cheaper, even with the royalties, than having in-house inventors. [7] Whether or not the use of private inventors is cheaper than in-house inventors, the use of the latter can be justified not on grounds of excluding people like Board and Shapiro, but rather because the automakers' in-house staff can concentrate on providing inventions which satisfy the automakers' technological requirements at a given time, whereas 100% Reliance on private sources may prove detrimental to the industry (and the public) as a whole. Once a given product proves useful, like retractable seat belts, "backward integration" whereby the defendants would manufacture the input themselves may prove cheaper than dealing with a supplier. However, it is clear that backward integration does not follow automatically in all cases, otherwise Ford and GM would manufacture all of their own inputs, and "suppliers" as such would cease to exist. The thrust of this argument is towards one simple, pragmatic point: innovation, like creativity generally, is a **[**23]** fanciful, unpredictable gift, and plaintiffs' argument that defendants are trying to drive them out of or exclude them from the so-called market for innovation makes little sense. There would be no rational reason for defendants to exclude anyone from such a market because at any given time and for any patented input there is never any guarantee that in-house research and development will be better or cheaper or more successful than research and development supplied by private noncompany inventors. It cannot be seriously stated that defendants want to eliminate a source of potential benefit to themselves.

[24]** Plaintiffs cite *Gamco, supra*, for the view that

> a firm that controls a market must treat those within it evenhandedly. Where a firm gains value from innovation which it adopts for its own use, it must pay for that innovation. Certainly defendants pay their own in-house researchers. To refuse to pay outsiders for their innovation is to destroy those outsiders as competitors, in favor of the defendants' own in-house inventors.

---

[7] At issue here obviously is the difficulty in assessing both the costs of arriving at an invention and the means of providing an appropriate return on the investment undertaken. This problem is complicated whenever a vital product is discovered by accident or as a spin-off from research designed to produce something completely different. For an example involving "teflon" see W. S. Bowman, Jr., Patent and ***Antitrust Law***: A Legal and Economic Appraisal 39 (1973).

Plaintiffs' Memorandum at 46. Plaintiffs are not being destroyed by defendants' refusal to pay them royalties. If anything, plaintiffs are either bad businessmen, poor negotiators, excessively profit-motivated, or all three. The patent laws protect their inventions, and they remain free to charge what they can get for their ideas. If they do not like the price, they simply do not have to sell. An aggrieved prospective purchaser will either do without the input or find available substitutes, possibly through "inventing around" the patent.

3. Bottlenecks. Related to plaintiffs' claim of market exclusion is their assertion that defendants control the market for innovation, **[*646]** thereby constituting a "bottleneck." Plaintiffs' Memorandum **[**25]** at 47. They elaborate upon this claim, explaining that the "theory provides that where a firm controls an essential stage of the production or distribution of a good and it competes at another level of production, it will be guilty of a Section 2 violation if it forecloses in any way access by its competitors to the essential stage." *Id. at 47*. [8] As authority, plaintiffs **[***470]** cite, inter alia, Gamco which is inapposite for the reasons discussed above, and *Packaged Programs, Inc. v. Westinghouse Broadcasting Co., 255 F.2d 708 (3d Cir. 1958)*, which is likewise poor authority to cite in connection with the evidence in this case. In Packaged Programs, the defendant Already possessed a lawful telecasting monopoly and was using that monopoly power to create illegal monopolies elsewhere.

[26]** Lastly, reference should be made to plaintiffs' citation of *Standard Oil Co. of New Jersey v. United States, 221 U.S. 1, 60, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*: "In applying the rule of reason, the touchstone is that the Sherman Act covers all conceivable conduct which could possibly come within its spirit or purpose." Plaintiffs' Memorandum at 42. Standard Oil is one of the most monumental of antitrust cases. According to this Court's reading of the case, plaintiffs' statement inverts what Justice White was really saying for what he actually said was that because the Sherman Act was worded so broadly, it could cause "any act done by any of the enumerated methods anywhere in the whole field of human activity to be illegal if in restraint of trade." *221 U.S. at 60, 31 S. Ct. at 516*. Because of this potential breadth of coverage, Justice White advocated a rule of reason approach for non-Per se cases and called for the "exercise of judgment which required that some standard should be resorted to for the purpose of determining whether the prohibition contained in the statute had or had not in any given case been violated." *221 U.S. at 60, 31 S. Ct. at 516*. Through Standard Oil and **[**27]** his opinion in *United States v. American Tobacco Co., 221 U.S. 106, 31 S. Ct. 632, 55 L. Ed. 663 (1911)*, Justice White gave content to the rule of reason approach to antitrust liability in a three-part form: (1) the "inherent nature" or Per se concept of illegality; (2) the "inherent effect" or market power concept; and (3) the evident purpose or specific intent concept. See R. H. Bork, The Antitrust Paradox: A Policy At War With Itself 37 (1978). Among the major attributes of Justice White's opinion is that it showed concern "that the statute not interfere with means of creating efficiency or with market structures that resulted from efficiency." R. H. Bork, Supra, at 34. Consequently, Standard Oil does not support an expansive application of the Sherman Act but rather suggests an application which, in non-Per se cases, is sensitive to the preservation of economically efficient market structures wherever possible. Although plaintiffs have claimed a Per se violation by defendants, they have failed to provide evidence of a conspiracy to violate the antitrust laws. The evidence presented thus far demonstrates that Ford and GM did insist upon the royalty-free second source licensing **[**28]** policy; however, the mere existence of the requirement does not automatically compel the conclusion that a conspiracy was presented or that the requirement otherwise violates the antitrust laws.

At the hearing on the cross motions for partial summary judgment, plaintiffs' counsel presented considerable evidence establishing that Ford and GM insisted that their suppliers agree to the royalty-free paid up license provisions. [9] Summarizing numerous **[*647]** deposition statements, contract provisions and other documents

---

[8] Section 2 of the Sherman Act reads as follows:

Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons, to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be punished by fine not exceeding fifty thousand dollars, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

[9] The evidence consisted of portions of the depositions of various officials from Ford and GM, including Messrs. Desmarais, Cook, and Fisher who were intimately involved in or knowledgeable about the automakers' patent licensing policies, as well as licensing agreements, correspondence, and an internal Ford Supply Manual outlining the procedures for negotiation of license

discovered during the seven years since this case began, plaintiffs' counsel succeeded in showing that the royalty-free policies existed but not that there was any form of conspiracy between the automakers. At one point during the hearing, plaintiffs' counsel indicated that the record showed that Ford and GM purchase more than three-quarters of all seat belt equipment installed in American cars and between the two of them make three-quarters of all American cars. These observations were made to show that parallel policies exist resulting in independent inventors being prevented from dealing with the relevant market. Yet, when the Court further inquired as to whether **[**29]** there was any indication that this result was a mere happenstance or the consequence of an actual conspiracy, plaintiffs' counsel responded:

> We have no proof of conspiracy. We just say it is a very strange thing that the **[***471]** two giants having some common suppliers of the same product and substantially the same equipment, and even as Mr. Cook says, sometimes possibly interchanging the use of tools, vice versa that they should come up with all the same kind of requirements, those requirements being **[**30]** free licenses, ownership of tools. . . .

Transcript of Hearing on cross motions for summary judgment at 20 (Oct. 20, 1978).

Judging from this candid response as well as from the evidence presented thus far, the true nature of plaintiffs' substantive antitrust argument is not the existence of a conspiracy but the presence of consciously parallel behavior as manifested in the royalty-free second source licensing policy. Both parties have raised the issue of "conscious parallelism" in their memoranda. Conscious parallelism, also known as the "interdependence theory" of oligopoly pricing, refers to the situation alleged to result in markets where there are a few sellers and where, though lacking an express agreement, the sellers appear to establish their prices in a "consciously parallel" fashion. See generally, R. Posner, Antitrust 115-27 (1974). Allegations of conscious parallelism have generally been considered in the light of Justice Clark's famous remarks in *Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 540-41, 74 S. Ct. 257, 259-260, 98 L. Ed. 273 (1954)*:

> The crucial question is whether respondents' conduct toward petitioner stemmed **[**31]** from independent decision or from an agreement, tacit or express. To be sure, business behavior is admissible circumstantial evidence from which the fact finder may infer agreement.
>
> But this Court has never held that proof of parallel business behavior conclusively establishes agreement or, phrased differently, that such behavior itself constitutes a Sherman Act offense. Circumstantial evidence of consciously parallel behavior may have made heavy inroads into the traditional judicial attitude toward conspiracy; but, "conscious parallelism" has not yet read conspiracy out of the Sherman Act entirely. * * *

Justice Clark's approach to the conscious parallelism problem is still valid, although there have been recent signs that antitrust officials will begin prosecuting in the near future the first of a series of "shared monopoly" cases involving large companies in concentrated industries. See, e.g., Ignatius, Taking Aim at "Shared Monopolies,' Wall St.J., Aug. 22, 1978, at 18, col. 4. In light of the uncertain success which the Justice Department is likely to have as well as the absence of any departure from the traditional approach to conscious parallelism, for **[**32]** the purpose of this case, Justice Clark's reasoning is still valid.

[*648] III. THE ECONOMICS OF PLAINTIFFS' POSITION

In light of the discussion as to the nature of the alleged harm complained of in this case and because the antitrust laws have as one of their primary goals the promotion of economic efficiency, See R. H. Bork, Supra, at 91-92, it is instructive to examine several of the economic issues presented.

A. Monopsony and Oligopsony

What is unusual about this case is that it appears to present an example of monopsony rather than monopoly, and this feature serves to complicate not only the legal analysis but the economic and policy aspects of the case as

---

agreements. The highlighted portions of these documents demonstrate the existence of the policy but do not indicate the presence of a conspiracy.

well. *HN4*[] A monopoly is said to exist "if there is one, and only one, seller in a well-defined market." C. E. Ferguson, Microeconomic Theory 284 (1972). Given that neither Ford nor GM alone manages to account for more than half of the total U.S. automobile market, what we would ordinarily have, from a seller's perspective, is an oligopoly. Oligopoly exists "when more than one seller is in the market, but when the number is not so large as to render negligible the contribution of each." C. E. Ferguson, Supra, at 334. **[**33]** In this case, however, plaintiffs are alleging that defendants' behavior as Purchasers of inputs for their final products rather than their behavior as sellers to the public constitutes the gravamen in violation of the antitrust laws. "Where there is a single buyer of an input a Monopsony is said to exist; if there are several buyers Oligopsony is the proper designation." C. E. Ferguson, Supra, at 436. It is generally true that since all firms in a given market producing the same product will need similar inputs, one typically finds oligopsony in the input market when there is a corresponding oligopoly in the seller's output market. K. Lancaster, Introduction to Modern Microeconomics 232 (1969). Ford and General Motors would fit this characterization given their large market shares in the U.S. car market. That it is this alleged monopoly in the input market (monopsony) which is the heart of plaintiffs' complaint is apparent from the following passage in their memorandum: **[***472]**

> In the usual price-fixing case, the producer is accused of fixing the prices charged to its customers higher than would be charged under unrestrained conditions. In this case, Ford and GM fix the prices **[**34]** they Pay the suppliers for innovation at a rate Lower than would be set under unrestrained conditions. But since it is the buyers (the defendant automobile companies), rather than the sellers, who are exercising monopoly power in this case, it is not surprising that the price-fixing results in lower prices to the buyers, rather than higher prices to the sellers.

Plaintiffs' Memorandum at 40. In this passage, plaintiffs come very close to admitting that the royalty-free licensing policy means lower consumer prices. This result would follow in the event that the automakers passed on these savings directly to consumers. In light of this situation, plaintiffs bear a substantial burden in answering two crucial questions: (1) Can they show unambiguously that Ford and General Motors actually conspired to fix the prices at which they purchased their inputs? In other words, if there is no conspiracy or agreement to fix prices, were not the major car manufacturers behaving as rational economic decisionmakers in bargaining with their suppliers (plaintiffs' licensees) to secure the seat belt retractors at lower prices? and (2) Without evidence of a conspiracy, are not the plaintiffs **[**35]** simply presenting a case to the effect that they have been outbargained? Does not the royalty-free policy benefit consumers? Abandoning the royalty-free licensing policy would undoubtedly raise prices for defendants, and, just incidently, line plaintiffs' pockets.

Plaintiffs clearly want to extend the reasoning of *Parke, Davis, supra*, to the facts of this case. They argue, for example, that "GM forced its suppliers to negotiate With each other to shield GM from making payments for innovation. Each supplier knew that the policy applied to all suppliers, and acquiesced in the plan." Plaintiffs' Memorandum at 30. (Emphasis added). **[*649]** Although plaintiffs are absolutely correct as to the impact of defendants' pricing policy, it does not follow necessarily that a negative impact upon plaintiffs is necessarily the type of behavior automatically proscribed by the antitrust laws. Similarly, plaintiffs argue that "(e)ven though the wholesalers were duped, the Court found that the use by one company of other companies to carry out its plan is a conspiracy within the meaning of *Section 1* of the Sherman Act." Plaintiffs' Memorandum at 29. While this passage accurately characterizes **[**36]** the outcome in Parke, Davis, it is only relevant here to the extent that the Court finds facts evidencing a clear plan. In Parke, Davis there was considerable correspondence establishing the alleged conspiracy. There have been no such incriminating materials in this case.

Another difference from Parke, Davis, to be discussed in more detail below in connection with standing, is the element of indirectness which permeates this entire case. Many of plaintiffs' arguments sound as if they really should be made on behalf of the licensees who actually supply the seat belt apparatus to Ford and GM. Plaintiffs argue, for example, that

> By making it impossible for their seat belt suppliers to pay reasonable royalties to independent inventors for innovative contributions to the original automotive equipment art, defendants have deprived plaintiffs of their livelihood from their trade and business of inventing and marketing inventions and have deprived the car-buying public of the benefits of plaintiffs' inventions.

Plaintiffs' Memorandum at 27. In a typical passing-on situation, one party is attempting to recover damages based on the fact that the antitrust violation occurred **[**37]** further upstream in the chain of dealing. See *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231*, Reh. denied, *393 U.S. 901, 89 S. Ct. 64, 21 L. Ed. 2d 188 (1968)*. At issue then is the question of the remoteness of the alleged injury from the occurrence of the alleged violation. Usually in a passing-on situation, the injury results from higher prices being passed along the chain of distribution to consumers. In an oligopsony setting, however, plaintiffs would be arguing in effect that Lower prices for inputs were being passed on and had an effect which was detrimental to their business. This situation might be termed a "pass-back" since the presence of oligopsonistic conditions means that lower prices (as plaintiffs argue) for the input prevent the plaintiffs from even getting a foot in the door of the relevant market. [10]

[38]** **[*650]** B. Plaintiffs' Economic Analysis

At several points in their memorandum in support of their motion for summary judgment, plaintiffs advance a number of economic arguments of questionable validity. As these arguments touch substantially on the nature of the injury which plaintiffs alleged, as well as on their claim that they have standing, the Court will consider them briefly in light of the economic, legal, and policy issues which they raise.

1. "It is a simple fact that the royalty-free license policies of the defendants have shifted from the inventor to the defendants the profit associated with inventing." Plaintiffs' Memorandum at 37. While it is evident that plaintiffs are losing out here, it does not necessarily follow that defendants pocket the royalty. Although Ford and GM do not have to pay the royalty, it seems to be a meaningless distinction as to whether that money fills the coffers of the car manufacturers or rather permits them to charge less for their cars.

2. "Faced with the unreasonable restraints of having to grant free licenses to competitors, a policy dictated by the defendants, the seat belt suppliers were hardly in a position to deal fairly and **[**39]** at arm's length with plaintiffs." Plaintiffs' Memorandum at 36. The suppliers are not being hurt, apparently, so the reference to fairness and arm's length dealing is not entirely clear. As defendant GM points out in its Memorandum in support of its motion for

---

[10] In their briefs, both sides have addressed the various issues raised in this case which are similar to those presented in *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. Illinois Brick held that the pass-on theory, rejected as a proper defense in *Hanover Shoe, supra*, could not be asserted offensively by an indirect purchaser (plaintiff) against an alleged violator (defendant). *431 U.S. at 726, 97 S. Ct. 2061*. In rejecting the offensive use of passing-on, the court noted that to do otherwise would be to run the risk of duplicative recoveries as well as to complicate the "evidentiary complexities and uncertainties" involved in proving an offense. *431 U.S. at 732, 97 S. Ct. 2061*. With regard to the enforcement policies of the antitrust laws implicated by restricting recovery to direct purchasers only, the court said:

(w)e understand Hanover Shoe as resting on the judgment that the antitrust laws will be more effectively enforced by concentrating the full recovery for the overcharge in the direct purchasers rather than by allowing every plaintiff potentially affected by the overcharge to sue only for the amount it could show was absorbed by it.

431 U.S. at 734, 97 S. Ct. at 2069.

[*473]** On its face, although the court specifically stated that the outcome did not turn on the matter of standing, *431 U.S. at 728 n.7, 97 S. Ct. 2061*, Illinois Brick appears relevant to the instant case, especially as a precedent for defendants. Plaintiffs would minimize its impact by referring to the possibility of Congressional modifications, while defendants cite it but without fully or precisely explaining its relevance. Here, what is being passed-on is lower prices rather than higher ones, and unlike the Illinois Brick situation, recovery would not be concentrated on the intermediate party (I. e., the licensees) since that party has accepted the royalty-free policy. This Court notes the relevance of Illinois Brick in light of what may be called the "pass-back" present in this case. Since the presence of a patent context is vital to understanding the relevant antitrust policies to be applied in this oligopsony context, the value of Illinois Brick as a precedent must await further clarification by the Supreme Court. The standing tests considered Infra are sufficient to dispose of the issues presented in this case, and the Court is mindful of the Supreme Court's distinction that "the question of which persons have been injured by an illegal overcharge (read "undercharge" here) for purposes of § 4 is analytically distinct from the question of which persons have sustained injuries too remote to give them standing to sue for damages under § 4." *431 U.S. at 728, n.7, 97 S. Ct. at 2066, n.7*.

summary judgment, at 22, it would appear that what plaintiffs are really complaining about is the price term I. e., that they are not receiving enough money in order to compensate them adequately for their investment.

3. "By requiring royalty-free licenses, the defendants effectively set the price of innovation under such licenses at zero." Plaintiffs' Memorandum at 39. Is it not the case that every inventor who fails to license or market his innovation or invention achieves a zero return insofar as his "price of innovation" is concerned? ***HN5***[] The antitrust laws do not guarantee inventors returns on their inventions. The patent laws do protect them against free riders for a period of seventeen years, allowing, in effect, a statutory monopoly, *United States v. E. I. DuPont de Nemours & Co., 118 F. Supp. 41 (D.Del.1953)*, *Aff'd, 351 U.S. 377, 76 S. Ct. 994, 100 L. Ed. 1264 (1955)*; [11] however, there is no guarantee of financial **[**40]** success. See generally, W. S. Bowman, Supra at 1-9.

4 "Defendants' policies also have an indirect effect upon the price to be paid for inventions, and that effect has been declared unreasonable per se by the Supreme Court. The case of the *United States v. General Motors Corp., 384 U.S. 127 (86 S. Ct. 1321, 16 L. Ed. 2d 415) (1966)*, furnishes an example." Plaintiffs' Memorandum at 39. The directness of the effect will be considered below as part of the standing analysis. One can read General Motors, however, to support a distinction similar to that offered above in connection with Klor's and Parke, Davis based upon substantially different facts being proved. In General Motors, the anticompetitive behavior involved was a classic conspiracy in restraint of trade involving joint, collaborative behavior by dealers, associations and GM to eliminate **[**41]** a group of competitors and to deprive franchised dealers of the freedom to deal with discounters. *384 U.S. at 138-48, 86 S. Ct. 1321*. **[***474]** At issue was the restrictiveness of a particular "location clause" which GM attempted to enforce. Again, since the pattern of behavior here is admittedly different, **[*651]** plaintiffs' reliance on General Motors is necessarily undermined.

5. "In this case, each defendant has total control over the decision as to what technology is embodied in its cars and each maintains research staffs in competition with outside inventors providing that technology. It is encumbent upon defendants not to use their strategic dominance to favor their in-house staffs." Plaintiffs' Memorandum at 47. This assertion is totally without merit and amounts to stating that although defendants have invested substantial capital in creating their own in-house inventors, this house staff should not receive any special consideration and should be forced to compete against itself! In other words, plaintiffs want to compete against defendants' house inventors upon the condition that the latter do so with one hand tied behind their backs. The Supreme Court has already noted thirty **[**42]** years ago that

> The development of patents by separate corporations or by cooperating units of an industry through an organized research group is a well known phenomenon. However far advanced over the lone inventor's experimentation this method of seeking improvement in the practices of the arts and sciences may be, there can be no objection, on the score of illegality, either to the mere size of such a group or the thoroughness of its research.

United States v. Line Material Co., 333 U.S. 287, 310, 68 S. Ct. 550, 562, 92 L. Ed. 701 (1948).

IV. WHETHER PLAINTIFFS LACK STANDING

It is now clear that not every economic injury to a competitor will give rise to a colorable antitrust violation. In *Hawaii v. Standard Oil Company of California, 405 U.S. 251, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972)*, the Supreme Court stated that "(t)he lower courts have been virtually unanimous in concluding that Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation." *405 U.S. at 263, n.14, 92 S. Ct. at 891-892, n.14*. Furthermore, it should be remembered that the antitrust laws exist to protect competition **[**43]** and not competitors. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. See also R. H. Bork, Supra, at 58. By not receiving royalties for the use of their

---

[11] The patent laws guarantee a patentee the right to "exclude others from making, using, or selling the invention throughout the United States." *35 U.S.C. § 154*.

inventions, plaintiffs are undoubtedly denied the "profit" which they claim is the only incentive for innovation. But as one commentator has remarked:

> All investments are uncertain, all involve risks, and all would be increased if they were made more remunerative. A rational patent system should be able to identify the unique attributes of investment in ideas which qualify them for special treatment as opposed to investment in alternatives.

W. S. Bowman, Supra, at 18. Without opining as to whether the patent system generally undercompensates or overcompensates innovation, it will suffice to observe that seeking patent reward is inextricably connected with the economy's profit system and necessarily involves uncertainty, "uninsurable risks," and what has been called a "moral hazard." See W. S. Bowman, Supra, at 28. Damages in patent litigation will necessarily influence not **[**44]** only the cost of engaging in innovative activity but likewise the costs incurred by society either in purchasing the fruits of that activity or in being deprived of access to such fruits. One commentator has observed, that "(t)he law lets the marketplace determine the value of a new invention and protects the right of the patent owner to receive this value as his reward for his technological advance." J. G. Van Cise, Understanding The Antitrust Laws 187 (1973 ed.).

A. Generally. ***HN6***[] Section 4 of the Clayton Act, *15 U.S.C. § 15*, reads as follows:

> Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may **[*652]** sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit including a reasonable attorney's fee.

Taken literally, this language could provide relief to all persons whose injuries were in the least amount causally related to an antitrust violation. The courts, however, have refused to adopt such a broad approach. **[**45]** See, e.g., *Loeb v. Eastman Kodak Co., 183 F. 704 (3d Cir. 1910)* (limiting standing under section 7 of the Sherman Act, predecessor of section 4 of the Clayton Act). Cf. *Southern Pacific Co. v. Darnell-Taenzer Lumber Co., 245 U.S. 531, 534, 38 S. Ct. 186, 62 L. Ed. 451 (1918)*. See also L. Green, The Rationale of Proximate Cause 122-23, 195-97 (1927); Polock, The "Injury" and "Causation" Elements of a **[***475]** Treble-Damage Antitrust Action, 57 Nw.U.L.Rev. 691, 697-700 (1963). As the Ninth Circuit Court of Appeals has commented:

> a measured approach has prevailed; courts have impressed a standing doctrine so as to confine ***HN7***[] the availability of section 4 relief only to those individuals whose protection is the fundamental purpose of the antitrust laws. Cf. *Barlow v. Collins, 397 U.S. 159, 90 S. Ct. 832, 25 L. Ed. 2d 192 (1970)*; *Association of Data Processing v. Camp, 397 U.S. 150, 90 S. Ct. 827, 25 L. Ed. 2d 184 (1970)*; *Mount Clemens Industries, Inc. v. Bell, 464 F.2d 339, 341-44 (9th Cir. 1972)*. Unfortunately, no "bright line" has yet emerged to divine this group, and courts have formulated varied definitions.

In re Multidistrict Vehicle Air Pollution M. D. L. No. 31, 481 F.2d 122, ***[**46]*** *125 (9th Cir.)*, Cert. denied, *414 U.S. 1045, 94 S. Ct. 551, 38 L. Ed. 2d 336 (1973)*. ***HN8***[] The key language in Section 4 has been the phrases "business or property" and "by reason of," which provide the twin requirements for standing. First, a plaintiff must allege an injury to his "business or property" in a strictly commercial sense. See *Hawaii, supra, 405 U.S. at 264, 92 S. Ct. 885* (the words "business or property" refer to commercial interests or enterprises). Second, a plaintiff must allege that his injury resulted "by reason of" an antitrust violation. *Hawaii, supra, 405 U.S. at 263-64, n.14, 92 S. Ct. 885*. In approaching these requirements analytically, courts have tended to adopt one of two methods of analysis: the "direct injury" and the "target area" approaches. [12] See generally L. Sullivan, Antitrust § 227 (1977); A. Stickels,

---

[12] The In re Multidistrict Court provided a summary as to how the various circuits had approached this analysis:

We do not mean to imply that each circuit falls neatly into one of the two pigeonholes. Only the Eighth Circuit and ours, for example, have consistently followed the "target area" approach, E.g., *Mulvey v. Samuel Goldwyn Productions, 433 F.2d 1073 (9th Cir. 1970)*; *Sanitary Milk Producers v. Bergjans Farm Dairy, Inc., 368 F.2d 679, 688-689 (8th Cir. 1966)* (Blackmun, J.), and even they have diverged occasionally. E.g., ***Perkins v. Standard Oil Co., supra, note 6 (396 F.2d 809 (9th Cir. 1968))***. The

Federal Control of Business: Antitrust Laws § 187 (1972); Sherman, **[*653]** Antitrust Standing: From Loeb to Malamud, 51 N.Y.U.L.Rev. 374 (1976); Lytle & Purdue, Antitrust Target Area Under Section 4 of the Clayton Act: Determination of Standing in Light of the Alleged Antitrust Violation, 25 Am.U.L.Rev. 795 (1976). One court has even adopted the **[**47]** "zone of interests" standing test to be considered in more detail Infra. *Malamud v. Sinclair Oil Corp., 521 F.2d 1142 (6th Cir. 1975)*.

[48]** B. The Direct Injury and Target Area Tests

HN9[] The direct injury test looks primarily at the relationship between plaintiff and the alleged antitrust violator. This test has spawned concern over whether an injury is the direct, indirect, consequential or remote result of the alleged violator's behavior and has been most recently treated from the perspective of "passing-on" in the Illinois Brick decision, Supra. Under the target area test, a court will look at the effect of the alleged violator's activities within a particular area of the economy in which plaintiff claims to have been harmed:

> (T)o state a cause of action under the anti-trust laws a plaintiff must show more than that one purpose of the conspiracy was a restraint of trade and that an act has been committed which harms him. He must show that he is within that area of the economy which is endangered by a breakdown of competitive conditions in a particular industry. Otherwise he is not injured "by reason" of anything forbidden in the anti-trust laws.

Conference of Studio Unions v. Loew's, Inc., 193 F.2d 51, 54-55 (9th Cir. 1951), Cert. denied, *342 U.S. 919, 72 S. Ct. 367, 96 L. Ed. 687 (1952)*. It is obvious **[**49]** that the elements of proof required will vary depending on which test is applied. ***HN10***[] The direct injury test raises the issue as to whether consumers have standing to use the passing-on argument offensively, while the target area test presents complications in both identifying real targets and particular areas of the economy which are affected.

In *Perkins v. Standard Oil Co. of California, 395 U.S. 642, 89 S. Ct. 1871, 23 L. Ed. 2d 599 (1969)*, Reh. denied, *396 U.S. 871, 90 S. Ct. 36, 24 L. Ed. 2d 126 (1969)*, the Supreme Court considered whether "fourth level" price discrimination was forbidden under Section 2 of the Clayton Act, as amended by *Section 13* of the Robinson-Patman Act, *15 U.S.C. § 13*. The Supreme Court reversed the Ninth Circuit which had decided the question in the negative, noting that the direct-indirect "limitation is wholly an artificial one and is completely unwarranted by the language or purpose of the Act." *395 U.S. at 647, 89 S. Ct. at 1874*. The Ninth Circuit has read this opinion (although not speaking directly to Section 4 of the Clayton Act) as constituting direct support for use of the target area test instead of the direct injury test. In *In re Multidistrict, **[**50]** supra*, it said:

> To attain standing, a plaintiff must thus allege that the anti-trust violation injured a commercial enterprise of the plaintiff in the area of the economy in which the elimination of competition occurred. Standing is denied, on the other hand, if the claimant's commercial activity occurred outside that area of the economy.

First, Third, Sixth and Tenth Circuits on the other hand, generally apply the test we label "direct injury." E.g., *Reibert v. Atlantic Richfield Co., 471 F.2d 727 (10th Cir. 1973)*; *Kauffman v. Dreyfus Fund, 434 F.2d 727, 732-734 (3d Cir. 1970)*, cert. denied, ***401 U.S. 974, 91 S. Ct. 1190, 28 L. Ed. 2d 323 (1971)***; *Volasco Products Co. v. Lloyd A. Fry Roofing Co., 308 F.2d 383, 394-395 (6th Cir. 1962)*; *Miley v. John Hancock Mut. Life Ins. Co., 148 F. Supp. 299 (D.Mass.)*, aff'd Per curiam, *242 F.2d 758 (1st Cir.)*, cert. denied, ***355 U.S. 828, 78 S. Ct. 38, 2 L. Ed. 2d 41 (1957)***. The Second, Fourth and Fifth Circuits have formulated their own particular mixtures of the two tests, E.g., *Calderone Enterprises Corp. v. United Artists Theatre Circuit, Inc., 454 F.2d 1292 (2d Cir. 1971)*; *Dailey v. Quality School Plan, Inc., 380 F.2d 484 (5th Cir. 1967)*; *South Carolina Council of Milk Producers, Inc. v. Newton, 360 F.2d 414 (4th Cir. 1966)*, although the approach of the Second more closely resembles the "direct injury" test and that of the Fourth and Fifth, the test of "target area". The Seventh Circuit's approach is uncertain, although it appears closer to "target area". Compare *Sandidge v. Rogers, 256 F.2d 269 (7th Cir. 1958)* *With Congress Building Corp. v. Loew's, Inc., 246 F.2d 587 (7th Cir. 1957)*. In ascribing positions to the various circuits, we have ignored self-descriptions and have attempted to analyze their actual approaches.

481 F.2d at 127, n.7.

481 F.2d at 128. [13] Referring to the target area approach as being "logical and flexible," 481 F.2d at 128, the court, reversing in part the district court, held that crop farmers did not have standing to allege that auto manufacturers had conspired

[51]**

> (a) To eliminate all competition among the automobile manufacturers in the research, development, manufacture and installation of motor vehicle air pollution equipment;
>
> **[*654]** (b) To eliminate competition . . . in the purchase of patents and patent rights from other parties covering motor vehicle air pollution equipment.

481 F.2d at 129. In denying standing under Section 4, the court noted that:

> Perkins therefore clarifies any ambiguity inhering in Hawaii's failure to adopt expressly either of the two predominant judicial glosses on the language "by reason of". By repudiating all those aspects of the "direct injury" test that distinguish it from the "target area" approach, and by embracing and applying the latter, the Court in Perkins, at least inferentially, impresses its imprimatur upon the "target area" approach articulated by this court: a plaintiff has standing under section 4 of the Clayton Act if the claimed losses fall "within that area of the economy which is endangered by a breakdown of competitive conditions in a particular industry." E.g., *Mulvey v. Samuel Goldwyn Productions, 433 F.2d 1073 (9th Cir. 1970)*; *Hoopes v. Union Oil Co., 374 F.2d **[**52]** 480, 485 (9th Cir. 1967)*; *Karseal Corp. v. Richfield Oil Corp., 221 F.2d 358 (9th Cir. 1955)*; *Conference of Studio Unions v. Loew's, Inc., 193 F.2d 51 (9th Cir. 1951)* **[***476]** , cert. denied, *342 U.S. 919, 72 S. Ct. 367, 96 L. Ed. 687 (1952)*. A proper application of "by reason of" focuses on whether the anti-competitive conduct directed against an area of the economy injured business operations conducted by the claimant in that sector of the economy. The resulting two-step approach first requires identification of the affected area of the economy and then the ascertainment of whether the claimed injury occurred within that area.

481 F.2d at 129. Although plaintiffs were denied standing under the target area test, the Ninth Circuit threw in a footnote which spoke to certain other possible plaintiffs:

> Examples of plaintiffs falling within one or more of these markets, as appellants concede, include an alleged inventor and a manufacturer of motor vehicle air pollution control equipment who claim losses from asserted inability to market their devices.

481 F.2d at 129, n.10.

Plaintiffs Board and Shapiro rely on In re Multidistrict as "clear precedent for (their having) standing **[**53]** in this case." Plaintiffs' Reply Memorandum at 17. They assert that the words "seat belt" can be substituted for "air pollution" in the above-quoted passage **[***477]** (481 F.2d at 129, n.10), placing plaintiffs clearly within the target area. Furthermore, plaintiffs cite the fact that in In re Multidistrict, even the crop farmers were found to have standing to seek equitable protection under Section 16 of the Clayton Act. 481 F.2d at 131. On its face, In re Multidistrict is a good precedent for plaintiffs to cite especially in light of the dictum in footnote 10; however, the case is of limited value because, on its facts, it did not analyze in detailed fashion the specific concerns of the antitrust-patent law interface, an interface which of necessity impacts upon traditional notions of antitrust standing in the present case.

---

[13] The Court also considered standing under § 16 of the Clayton Act:

Any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws . . . when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity, under the rules governing such proceedings . . . .

15 U.S.C. § 26.

The Fourth Circuit's only decided case on antitrust standing is *South Carolina Council of Milk Producers v. Newton, 360 F.2d 414, 418, 419 (4th Cir.)*, Cert. denied, *385 U.S. 934, 87 S. Ct. 295, 17 L. Ed. 2d 215 (1966)*. There, the court held that where raw milk producers incurred depressed profits as a result of retailers combining to sell milk as "loss leaders," plaintiffs **[**54]** had incurred an injury sufficient to allow them standing to sue. The court found plaintiffs to belong to the appropriate target area which was defined as follows:

> If a plaintiff can show himself within the sector of the economy in which the violation threatened a breakdown of competitive conditions and that he was proximately injured thereby, then he has standing to sue under section 4.

360 F.2d at 418. Stressing both foreseeability and causation, the court applied the test in the following manner:

> The pivot of decision presently is whether the defendants' asserted conduct was the proximate cause of the plaintiffs' asserted injury. If the damage was **[*655]** merely incidental or consequential, or if the defendants' antitrust acts are so removed from the injury as to be only remotely causative, the plaintiffs have not been injured "by reason of anything forbidden in the antitrust laws" as contemplated by the Clayton Act.

360 F.2d at 419. While the court found that the combination harmed the dairy industry as a whole, the absence of privity among the parties was not a material factor. As appears obvious from the above-quoted material, the Fourth Circuit's **[**55]** approach to the target area question has been to consider also the nature of the damage done. But in using words like "incidental" and "consequential," the court shows a willingness to consider not only the definition of an area and a party's position within that area, but also the qualitative nature of that harm as well. [14] Such an approach is consistent with the reasoning in *Hawaii, supra*, that not every injury traceable to an antitrust violation must result in damages. *405 U.S. 251, 263, n.14, 92 S. Ct. 885, 31 L. Ed. 2d 184*. See *Stern v. Lucy Webb Hayes National Training School for Deaconesses and Missionaries, 367 F. Supp. 536 (D.C.D.C.1973)*. Furthermore, it is clear that in assessing the nature of the harm in light of the intent of the antitrust laws to provide protection and remedies against certain activities:

[56]**

> (E)ach case . . . must be carefully analyzed in terms of the particular factual matrix presented. In making this factual determination courts must look to, among other factors, the nature of the industry in which the alleged antitrust violation exists, the relationship of the plaintiff to the alleged violator, and the alleged effect of the antitrust violation upon the plaintiff. Then, while recognizing that breaches of the antitrust laws have effects throughout society, a court must decide whether this plaintiff is one "whose protection is the fundamental purpose of the antitrust laws."

Cromar Co. v. Nuclear Materials & Equip. Corp., 543 F.2d 501, 506 (3d Cir. 1976). See also the conclusion that the elaboration of the "factual matrix" as proposed in Cromar "recognizes that § 4 standing analysis is essentially a balancing test comprised of many constant and variable factors and that there is no talismanic test capable of resolving all § 4 standing problems." *Bravman v. Bassett Furniture Industries, Inc., 552 F.2d 90, 99 (3d Cir.)*, Cert. denied, *434 U.S. 823, 98 S. Ct. 69, 54 L. Ed. 2d 80 (1977)*. See *Robbins Flooring, Inc. v. Federal Floors, Inc., 445 F. Supp. 4, 11* ***[**57]*** *(E.D.Pa.1977)*.

In assessing standing from the perspective of litigation involving a proposed **[***478]** patent licensing arrangement, the issues such as target, directness, and even injury become less tangible and more susceptible to

---

[14] The Fifth Circuit has developed a two-step approach for focusing on the affected area of the economy. *Yoder Bros. v. California-Florida Plant Corp., 537 F.2d 1347 (5th Cir. 1976)*, Cert. denied, ***429 U.S. 1094, 97 S. Ct. 1108, 51 L. Ed. 2d 540 (1977)***. See also *Hardwick v. Nu-Way Oil Co., 443 F. Supp. 940, 944 (S.D.Tex.1978)*:

First, the affected area of the economy must be identified. Second, the court must determine whether the claimed injury occurred within that area. *Yoder Bros. v. California-Florida Plant Corp., 537 F.2d 1347, 1360 (5th Cir. 1976)* (citing In *Re Multidistrict Vehicle Air Pollution M. D. L. No. 31, 481 F.2d 122, 129 (9th Cir. 1973)*, Cert. denied ***Morgan v. Automobile Mfgrs. Ass'n, 414 U.S. 1045, 94 S. Ct. 551, 38 L. Ed. 2d 336***).

what the philosophers call counter-factual reasoning, I. e., "But for X's activities, I would have licensed my patent and become rich." In this patent case, the "but for" element plays a substantial role, since plaintiffs are alleging that but for defendants' royalty-free second source licensing policy, they would have struck a deal with one or more of defendants' suppliers and received the appropriate royalties.

Pastor v. American Telephone & Telegraph Co., 76 F. Supp. 781 (S.D.N.Y.1940), is a case similar in many respects to the instant one. Plaintiff alleged that defendant exercised its power over the telephone industry so as to "influence and control the character and specification of apparatus constituting or used in conjunction with subscribers' stations, and of any apparatus to be connected thereto." *76 F. Supp.* ***[*656]*** *at 782*. Plaintiff was a patent owner of an automatic repertory dial device to be attached to a dial telephone:

> The amended complaint **[**58]** alleges that the defendant is engaged in the telephone business, operating toll telephone lines which carry upwards of 80% Of the long distance telephone traffic in the United States and that the defendant controls a group of corporations engaged in the telephone business and auxiliary fields known as the Bell System.

76 F. Supp. at 782. Plaintiff alleged that defendant's policies had "restrained" his sale of devices to the potential market and had prevented him from marketing the product. In granting summary judgment for the defendant, the court noted that the testimony showed that plaintiff never made any applications to defendant for installation of the device, and, moreover, none of the devices were even manufactured. The court phrased the relevant question as follows:

> Did the refusal of the defendant to buy plaintiff's patent or ask for a license to manufacture devices under his patent, and its failure to make available to the public a similar device constitute a restraint of trade? Counsel for the plaintiff freely acknowledges that the mere refusal of the defendant to deal with the plaintiff does not constitute a violation of the Anti-Trust Laws, but claims that **[**59]** the policy against foreign attachments has resulted in a restraint of trade to the plaintiff's damage. The argument of counsel seems to be that this policy is against the spirit of the Anti-Trust Laws, but there is a failure to show or in fact to allege any specific violation of a prohibition contained in the Sherman and Clayton Anti-Trust Acts. In the absence of any such showing, plaintiff has no cause of action thereunder. *LaChappelle v. United Shoe Machinery Corporation, D.C., 13 F. Supp. 939*.

76 F. Supp. at 784. When plaintiffs Shapiro and Board approached defendants in connection with licensing their patents, they were told to see the defendants' suppliers. This action alone cannot amount to an antitrust violation since defendants had no obligation to serve as licensees. From the pleadings, therefore, there has been no allegation that plaintiffs here, as in Pastor, manufactured the devices themselves, were in a position to do so, or found any promoter willing to do so. Presumably, the failure to find a promoter can be characterized in either of two fashions: (1) Ford and GM would not change their policies so as to grant royalties, or (2) plaintiffs would not accept **[**60]** less money for their invention.

The court in *Productive Inventions, Inc. v. Trico Products Corp., 224 F.2d 678 (2d Cir. 1955)*, considered the following question:

> Is a patentee who has granted to another an exclusive license for the term of the patent, upon a royalty basis a "person * * * injured in his business or property" (within the meaning of Section 4 of the Clayton Act) so as to enable him to recover treble damages for loss of royalties on sales that might have been made by its licensee save for the antitrust violations of defendant?

224 F.2d at 679. Holding that he was not, the court stated that

> Those harmed only incidentally by anti-trust violations have no standing to sue for treble damages; only those at whom the violation is directly aimed, or who have been directly harmed, may recover.

224 F.2d at 679. [15] Although plaintiffs claim that defendants' **[***479]** actions were "directly aimed at" them, there is no clear evidence on this matter. The Trico court concluded by remarking that

[61]**

> **[*657]** any financial loss suffered by the plaintiff was only incidental to the acts complained of. Here, too, the appellant has no standing under the anti-trust laws to complain of the incidental loss of royalties by activities of Trico, not directed at it.

224 F.2d at 680.

SCM Corp. v. Radio Corporation of America, 407 F.2d 166 (2d Cir.), Cert. denied, *395 U.S. 943, 89 S. Ct. 2014, 23 L. Ed. 2d 461*, Reh. denied, 396 U.S. 869, 90 S. Ct. 38, 24 L. Ed. 2d 125 (1969), was another case involving the deprivation of royalties. RCA claimed that because of certain activities of SCM, RCA was:

> ". . . immediately injured * * *, in that RCA has been wilfully and maliciously deprived of royalties lawfully due * * * (under Patent "539) and has been put to the burden and expense of defending this law suit." Injunctive relief is sought on the theory that RCA has been prevented from enjoying the full benefits of its patents and, in effect, would have prospered "but for" SCM's acts.
>
> RCA contends that SCM's monopolization "if successful" will deprive it of the fruits of licensing, that "even if SCM must pay some royalty, if it is the only available licensee," SCM might **[**62]** insist on a smaller royalty, that "if that event comes to pass, RCA would be "directly' injured"; and that RCA seeks only to avoid threatened loss "if the threat materializes" (RCA reply brief).

407 F.2d at 170. The court found that RCA had not alleged any injury sufficient to give it standing to sue, and furthermore, that its loss of royalties was not an injury sustained because of the plaintiff's antitrust violations. Id.

The holding in Midway Enterprises, Inc. v. Petroleum Marketing Corp., 375 F. Supp. 1339 (D.Md.1974), would appear to provide support for plaintiffs' standing arguments. The case is valuable in providing a nutshell summary of traditional standing doctrines, but, it is distinguishable in light of the particular patent context of the instant case. The plaintiff in Midway sought damages and injunctive relief for alleged wholesale price fixing. The complaint charged defendant and other suppliers of independent service stations of conspiring to raise, fix, maintain, and stabilize the wholesale prices of gasoline in Maryland, Virginia, and the District of Columbia. As a result of defendant's alleged activities, plaintiff claimed it was required to purchase **[**63]** gasoline at excessive prices, and as a direct consequence, suffered losses which led to the destruction of its business. Defendant's motion to dismiss for lack of standing was denied.

In the opinion, the court recognized that "(t)he standing requirement is not satisfied merely by proof that some adverse effect on the plaintiff can be traced to the defendant's unlawful activity." 375 F. Supp. at 1341. Noting that the direct injury test in Loeb v. Eastman Kodak Co., 183 F. 704 (3d Cir. 1910), had been construed to require the plaintiff to "have direct relations (be in privity of contract) with the defendant," 375 F. Supp. at 1341, the opinion reviewed a number of cases denying standing and concluded that "(i)n each of these cases, the plaintiff was not the party which suffered the immediate injury but whose loss resulted from his relationship with another entity." Id. After explaining the reasons behind the Fourth Circuit's adoption of the "target area test" proposed in Karseal Corp. v. Richfield Oil Corp., 221 F.2d 358 (9th Cir. 1955), it concluded that, as opposed to the exaltation of form over

---

[15] The court cited approvingly the following passage from the Ninth Circuit's opinion in Conference of Studio Unions v. Loew's, Inc., 193 F.2d 51, 55 (9th Cir. 1951):

Such a construction is in accordance with the basic and underlying purposes of the anti-trust laws to preserve competition and to protect the consumer. Recovery and damages under the anti-trust law is available to those who have been directly injured by the lessening of competition and withheld from those who seek the windfall of treble damages because of incidental harm.

substance in the direct injury test, the target area test, by focusing on the plaintiff's **[**64]** relationship to the area of the economy allegedly injured by the defendant, "provides a far more logical and flexible tool to analyze the standing question," *375 F. Supp. at 1344*:

> Standing is denied, however, if the plaintiff's business activity occurs outside that area of the economy. See In re Multidistrict Vehicle Air Pollution M.D.L. No. 31, supra. The advantage of the "target area" theory, then, is that it examines the circumstances surrounding the purported violation and prevents a defendant from **[*658]** avoiding the sanctions of the antitrust laws by the simple expedient of interposing entities between himself and the plaintiff.

With respect to the facts presented in Midway, the opinion concluded that

> the primary effect of defendant's alleged practices was on the gasoline sold by plaintiff and other independent service stations, which was competitive with that sold by defendant. The ultimate effect **[***480]** was to eliminate the competitive position of the plaintiff and other independents.

375 F. Supp. at 1344.

Plaintiffs have relied on this case in their opposition to defendants' standing arguments. They have argued that since defendants' suppliers were **[**65]** not harmed by the royalty-free second source licensing policy, the full impact of defendants' pricing policies falls upon them. Rather than approach the question from a direct-indirect labeling perspective, plaintiffs actually do rely on the target area standard claiming that they are the Only target since the suppliers are left unharmed. Conceivably, plaintiffs could argue that unlike *Trico, supra*, and the other cases subsequent to *Loeb, supra*, which developed the direct injury test, they suffered the immediate and direct injury due to defendants' pricing policy.

Under a target area test, however, the directness or indirectness of the injury would be of no consequence; the mere fact of the injury and that the victim was a target would appear to suffice. One could, however, suggest that the target area test itself begs the direct-indirect injury question since one would have to come to grips with what Sort of entity could, under the circumstances, constitute a target. Query, for example, as to whether a target amounts to nothing more than an "entity "directly' aimed at" since presumably targets are not indirectly aimed at with any degree of success. The vitality of the target **[**66]** area test in its pristine form may be showing signs of being undermined. See, for example, the holding in *L & H Investments, Ltd. v. Belvey Corp., 444 F. Supp. 1321 (W.D.N.C.1978)*, where the court said:

> After (NBO Industries Treadway Cos., Inc. v.) *Brunswick (Corp., 523 F.2d 262, 273 (3d Cir. 1975))* it is apparently not enough that plaintiff stand somewhere in the threatened sector of the economy; he must also show that his injury is logically related to the violation. The emphasis is shifted from proximate causation to an analysis of the Type of antitrust violation alleged and the anticompetitive effects it is thought likely to produce.

444 F. Supp. at 1324 (emphasis in original). Presumably this variation of the standard target area test may indicate that merely alleging injury in fact will be insufficient in the future. For a critical analysis of standing which recognizes the inconsistencies and confusion in the direct injury and target area tests, see Berger & Bernstein, An Analytical Framework for Antitrust Standing, 86 Yale L.J. 809, 830, 843 (1977) ("in practice most courts treat the target area as a test for directness of injury").

A further problem with the **[**67]** target area test is that by its language, a plaintiff must show that "he is within that area of the economy which is endangered by a breakdown of competitive conditions in a particular industry." *Conference of Studio Unions v. Loew's Inc., 193 F.2d 51, 54-55 (9th Cir. 1951)*, Cert. denied, *342 U.S. 919, 72 S. Ct. 367, 96 L. Ed. 687 (1952)*. In the present case, it is unclear whether this test can be applied with any significant meaning. What does it mean, for example, for plaintiffs to show that they are in an area of the economy "endangered by a breakdown of competitive conditions" when they are patentees possessing a statutory monopoly in the first place? They are, by law, placed in the position of being monopolists who are capable of negotiating with oligopolists such as Ford or GM (or their suppliers) to obtain the best price for their inventions. The whole concept of fully competitive conditions must be modified in the patent context where it would seem that if a patentee has something of real value, by virtue of his monopoly, he is automatically placed in a better bargaining position from which to exploit his product. The overall result is **[*659]** one in which "the law **[**68]** lets the marketplace determine the value of a new invention." J. G. Van Cise, Supra.

C. A New Standard

In *Malamud v. Sinclair Oil Corp., 521 F.2d 1142 (6th Cir. 1975)*, the court found that the investment companies' allegation that the failure of a supplier to provide the needed financing for a service station effectively foreclosed their ability to expand their operations was a sufficient allegation of injury to entitle plaintiff to standing. Following the language used by the *Supreme Court in Association of Data Processing Service Organizations, Inc. v. Camp, 397 U.S. 150, 153, 90 S. Ct. 827, 25 L. Ed. 2d 184 (1970)*, the court held that the test for standing to sue in a private antitrust action is whether the plaintiff has alleged that the defendant caused him injury in fact and that the interest sought to be protected by the plaintiff is arguably within the zone of interests protected by the antitrust laws. *521 F.2d at 1151*. While the case provides a useful summary of previous standing doctrines, its reliance on Data Processing is surprising since no other case in the intervening five years had even raised the possibility of a zone of interests test outside of the administrative **[**69]** context in which Data Processing arose. See, e.g., Sherman, Antitrust **[***481]** Standing: From Loeb to Malamud, 51 N.Y.U.L.Rev. 374, 378 (1976).

The Malamud court first explored standing as part of the general concept of justiciability, I. e., as a means of controlling access to the federal courts. To meet these requirements, there must be a showing of injury in fact in order to satisfy the Constitution's case or controversy provision. *U.S. Const. art. III, § 2*. Additionally, standing allowed the courts some leeway in determining whether a given plaintiff is "the proper litigant in a suit." *521 F.2d at 1147*. To accomplish this, the court should assess " "the party seeking to get his complaint before a federal court and not on the issues he wishes to have adjudicated.' " Id., Citing *Flast v. Cohen, 392 U.S. 83, 89, 88 S. Ct. 1942, 20 L. Ed. 2d 947 (1968)*. On these grounds, however, the court rejected the current approaches to standing as being inadequate. Expressing dissatisfaction with the traditional standing doctrine, the opinion stated:

> As we see it . . . by using either approach a court is enabled to make a determination on the Merits of a Claim under the guise of assessing the **[**70]** Standing of the Claimant. Under either theory the entire question of directness is one that must be resolved upon some factual showing, but standing is a preliminary determination ordinarily to be evaluated upon the allegations of the complaint. . . .

Id. at 1150 (emphasis in original) (footnote omitted).

The Sixth Circuit's promulgation of the zone of interests test in Malamud has been criticized on a number of grounds. See generally, Sherman, Supra, and Lytle & Purdue, Antitrust Target Area Under Section 4 of the Clayton Act: Determination of Standing in Light of the Alleged Antitrust Violation, 25 Am.U.L.Rev. 795 (1976). First, the zone of interests standard articulated in Data Processing must be confined to its original context, namely, that of administrative standing. The test was not intended by the Supreme Court to apply across the board to all standing issues, and Sherman has referred to its use by the Malamud court as an "unwarranted excursion into the law of administrative standing." 51 N.Y.U.L.Rev. at 405. Administrative cases, unlike most private antitrust litigation, rarely seek damages, hoping instead to obtain injunctive relief. This likelihood of damages **[**71]** automatically trebled in the antitrust context, *15 U.S.C. § 15* presents the substantial possibility of "overkill", *Calderone Enterprises Corp. v. United Artists Theatre Circuit, Inc., 454 F.2d 1292 (2d Cir. 1971)*, Cert. denied, *406 U.S. 930, 92 S. Ct. 1776, 32 L. Ed. 2d 132 (1972)*, especially when the maintenance of private antitrust actions brought by "private attorneys general" allegedly acting in the public interest poses the increased likelihood of windfall recoveries. To quote Sherman:

> **[*660]** By equating administrative standing with antitrust standing, the Malamud court thus failed to heed Professor Scott's sound advice that "to understand the functions of the doctrine, it is necessary at the outset to distinguish the different contexts in which an issue of standing is said to arise." (Citing Scott, Standing in the Supreme Court A Functional Analysis, 86 Harv.L.Rev. 645, 646 (1973)).

51 N.Y.U.L.Rev. at 378. Focusing on the economic and policy differences presented in the present case distinguishes it from *Midway, supra*, and supports a denial of standing. Moreover, even under a zone of interests test, it is by no means certain that plaintiffs would have standing, **[**72]** since the test explicitly invited consideration of the interests at stake in light of the particular statutory or constitutional guarantee being invoked. *397 U.S. at 153, 90 S. Ct. 827*.

The Supreme Court has recently observed that "although standing in no way depends on the merits of the plaintiff's contention that particular conduct is illegal . . . it often turns on the nature and source of the claim asserted." *Warth v. Seldin, 422 U.S. 490, 500, 95 S. Ct. 2197, 2206, 45 L. Ed. 2d 343 (1975)*. The Malamud court ignored considerations such as these. Given the possibility of treble damages should the plaintiff prevail, one can readily understand that even from the outset, the In terrorem effect of an antitrust complaint has a settlement value to the plaintiff "out of any proportion to its prospect of success at trial so long as he may prevent the suit from being resolved against him by dismissal or summary judgment." [16] *421 U.S. at 740, 95 S. Ct. at 1927*.

[*482]** **[**73]** D. The Standing Tests and This Case

HN11[] Any final determination as to standing will necessarily turn on the question of the remoteness of the alleged injury, I. e., the relationship between the alleged antitrust violation and the injury inflicted on plaintiffs. Such a determination must consider not only the policies behind allowing recovery under the antitrust laws but also the complicated interrelationships which arise when antitrust and patent law are presented in the same claim. Plaintiffs have the burden of showing (1) that an antitrust violation occurred, and (2) that they were within the "target area" of the anticompetitive activity. See *Calderone Enterprises Corp. v. United Artists Theatre Circuit, Inc., 454 F.2d 1292 (2d Cir. 1971)*, Cert. denied, *406 U.S. 930, 92 S. Ct. 1776, 32 L. Ed. 2d 132 (1972)*; *Long Island Lighting Co. v. Standard Oil Co. of California, 521 F.2d 1269, 1274 (2d Cir. 1975)*, Cert. denied, *423 U.S. 1073, 96 S. Ct. 855, 47 L. Ed. 2d 83 (1976)* ("even parties whose injuries may be both immediate and foreseeable may lack standing to pursue a private remedy if that injury is indirect or incidental, or if their business was not in the target area of the allegedly **[**74]** illegal acts.") It will be recalled that in terms of substantive violations of the antitrust laws, those found in Parke, Davis and Klor's were substantially less "incidental" than those alleged by plaintiffs here.

The alleged antitrust violation must yield an injury which is "direct" and not "incidental." See *SCM, supra*; *Flood v. Kuhn, 312 F. Supp. 404 (S.D.N.Y.1970)*. The specifics of the "target area" test have been refined and amplified as a result of the opinion in *Calderone, supra.* That case specifically concerned standing under Section 4 **[*661]** of the Clayton Act and involved an action brought by a nonoperating landlord of motion picture theatres for treble damages against movie distributors and exhibitors who charged an antitrust conspiracy to restrain trade in the distribution and exhibition of motion pictures throughout the New York metropolitan area. The Calderone court acknowledged that "while many remotely situated persons may suffer damages in some degree as the result of an antitrust violation, their damage is usually much more speculative and difficult to prove than that of a competitor who is an immediate victim of the violation." *454 F.2d at 1295*. [17] ***HN12***[] While the **[**75]** court made it clear that a rule of reason approach to standing under Section 4 of the Clayton Act should be used, it went on to observe that

---

[16] The quotation is from Mr. Justice Rehnquist's opinion in *Blue Chip Stamps v. Manor Drug Stores, 421 U.S. 723, 95 S. Ct. 1917, 44 L. Ed. 2d 539 (1975)*, in which the Court upheld the Birnbaum rule limiting private damages for violations of *rule 10b-5*, *17 C.F.R. § 240.10b-5 (1975)*, to purchasers and sellers of securities. Although the context of private antitrust litigation obviously differs from that presented in Blue Chip Stamps, the analogy is a fitting one since it indicates that policy considerations frequently shape a court's evaluation of standing arguments. The Birnbaum rule had, in fact, been criticized as being "an arbitrary restriction which unreasonably prevents some deserving plaintiffs from recovering damages which have in fact been caused by violations of *Rule 10b-5*." *Id. at 738, 95 S. Ct. at 1926*. The Court went on to hold that such a limitation was based on "countervailing" policy considerations. *Id. at 739, 95 S. Ct. 1917*.

[17] The court proceeds to define a target as "a person or business against which competitive aim is taken. The line is clearly drawn by requiring that to have standing one must be an object of an antitrust conspiracy." *454 F.2d at 1296 n. 2*.

"(a) plaintiff not a target of any antitrust violation does not become a target by virtue of the culpability of its lessee, patentee, franchisee, supplier, customer, or debtor." *454 F.2d at 1296*.

Under the Court's evaluation of the facts of this case, the injury to plaintiffs Board and Shapiro appears to be both indirect and incidental. While they may consider themselves a "target area," the impact reaches them only as a result of the loss of royalties which, in turn, follows from the business agreement between the licensees (suppliers) and the car manufacturers. In Plaintiffs' Reply Memorandum they state that "(t)he antitrust injury **[**76]** is to plaintiffs' licensing business, not to plaintiffs' patent." Plaintiffs' Reply Memorandum at 25. This is a curious statement, especially in light of the fact that without any initial patent, plaintiffs would not even have any license to grant. Furthermore, the bulk of plaintiffs' complaint as well as their Memorandum opposing defendants' motions for summary judgment address the issue of the serious injury done to the market for innovation and their role as innovators. In light of this relationship between patenting and licensing, a distinction between the two businesses is untenable. Without being licensed, a patent will yield no return for the inventor. What plaintiffs seek to prove is that because of their failure to negotiate a profitable licensing agreement, they likewise cannot earn a profitable return on their seat belt retractor patent. The net result, they claim, is injury to the "market for innovation." Yet the injury to plaintiffs' efforts to turn a profit follows from their own unsuccessful licensing negotiations with defendants' suppliers. In one sense, their failure indicates the value which the marketplace establishes for their invention. They did have a **[**77]** monopoly on the patented product and did not have to license it for free. In the event that defendants required plaintiffs' inventions, the automakers could do one of two things: either pay the royalties demanded or invent around the patent and run the risk of a possible patent infringement suit. A finding that plaintiffs lack standing to bring their antitrust claims will have the effect of **[***483]** narrowing this case to a more appropriate focus, namely, the patent infringement count remaining in the original complaint.

For these reasons, the standing requirements must be narrowly construed, especially in view of the fact that the patent aspects of this case remove it from the straightforward analysis of standing involved in pure antitrust cases. Also, one cannot overlook the patent aspects of the case and the corresponding rights which Mr. Justice Clarke found to be accorded the patentee:

> It has long been settled that ***HN13***[] the patentee receives nothing from the law which he did not have before, and that the only effect of his patent is to restrain others from manufacturing, using, or selling that which he has invented. The patent law simply protects him in the monopoly of that which he **[**78]** has invented and has described in the claims of his patent. *United States v. American Bell Tel. (Teleph.) Co., 167 U.S. 224, 239, 17 S. Ct. 809, 42 L. Ed. 144, 154*; *Continental Paper Bag **[*662]** Co. v. Eastern Paper Bag Co., 210 U.S. 405, 424, 28 S. Ct. 748, 52 L. Ed. 1122, 1130*; *Bauer & Cie v. O'Donnell, 229 U.S. 1, 10, 33 S. Ct. 616, 57 L. Ed. 1041, 1043, 50 L.R.A., N.S., 1185*, Ann.Cas. 1915A, 150.

Motion Picture Patents Co. v. Universal Film Manufacturing Co., 243 U.S. 502, 510, 37 S. Ct. 416, 418, 61 L. Ed. 871 (1917).

The fact that plaintiffs may be concerned about what happens to their invention "down the line" does not mean that whenever they do not like an outcome they can allege an injury. As one commentator has recently observed:

> ***HN14***[] The holder of a patent has no greater power to restrict the terms upon which a buyer of the patented product resells at the next vertical level than does the owner of any other product. The patentee can obtain the full reward of the patent in the first sale; a right to restrict the goods in more remote channels of trade is not a traditional part of the patent grant nor is it needed in order for the patentee fully to enjoy the **[**79]** monopoly of the patent.

L. A. Sullivan, Antitrust 572 (1978). See also *United States v. Univis Lens Co., 316 U.S. 241, 62 S. Ct. 1088, 86 L. Ed. 1408 (1942)*, where Chief Justice Stone, writing for the Court, said:

> Our decisions have uniformly recognized that ***HN15***[] the purpose of the patent law is fulfilled with respect to any particular article when the patentee has received his reward for the use of his invention by the sale of the article, and that once that purpose is realized the patent law affords no basis for restraining the use and

> enjoyment of the thing sold. *Adams v. Burke, supra, 17 Wall. 453, 456, 21 L. Ed. 700*; *Keeler v. Standard Folding Bed Co., 157 U.S. 659, 15 S. Ct. 738, 39 L. Ed. 848*; *Motion Picture Co. v. Universal Film Co., 243 U.S. 502, 37 S. Ct. 416, 61 L. Ed. 871*, L.R.A. 1917E, 1187 Ann.Cas. 1918A, 959; and see cases collected in General (Talking) Pictures Co. v. (*Western) Electric Co., 305 U.S. 124, 128, n. 1, 59 S. Ct. 116, 118, 83 L. Ed. 81*. ***HN16***[] In construing and applying the patent law so as to give effect to the public policy which limits the granted monopoly strictly to the terms of the statutory grant, Morton Salt Co. v. (*G.S.) Suppiger Co., 314 U.S.* ***[**80]*** *488, 62 S. Ct. 402, 86 L. Ed. 363*, the particular form or method by which the monopoly is sought to be extended is immaterial. The first vending of any article manufactured under a patent puts the article beyond the reach of the monopoly which that patent confers. Whether the licensee sells the patented article in its completed form or sells it before completion for the purpose of enabling the buyer to finish and sell it, he has equally parted with the article, and made it the vehicle for transferring to the buyer ownership of the invention with respect to that article. To that extent he has parted with his patent monopoly in either case, and has received in the purchase price every benefit of that monopoly which the patent law secures to him. If he were permitted to control the price at which it could be sold by others he would extend his monopoly quite as much in the one case as in the other, and he would extend it beyond the fair meaning of the patent statutes and the construction which has hitherto been given to them.

316 U.S. at 251-52, 62 S. Ct. at 1094 (Emphasis added). The theory of recovery advanced by plaintiffs would extend the scope of their patent monopoly **[**81]** well into the licensing stage, enabling them to exercise leverage as to the deal eventually concluded between its licensee (supplier) and the automakers, obviously an improper result. The success of such a theory would mean that a patentee could effectively force a form of resale price maintenance scheme upon parties further down the line. Such an effect has been held unlawful in *Dr. Miles Medical Co. v. John D. Park & Sons Co., 220 U.S. 373, 31 S. Ct. 376, 55 L. Ed. 502 (1911)*. Plaintiffs have already indicated their prior acquiescence in a marketing arrangement in which they voluntarily waived 60% of their royalties. Under plaintiffs' conception of their right to be rewarded for innovation, it would seem that anything less than 100% of the full royalties obtainable would underreward them for their activities.

[*663] Plaintiffs' arguments, taken to their logical conclusion, would mean that they **[***484]** were, in all circumstances, entitled to a minimum royalty which was equal to what they felt was the value of their innovation. Anything less would undercompensate them and tend to destroy the "market for innovation." Yet it remains clear that a royalty is only one form of compensation **[**82]** or reward allowed an inventor. While it is recognized that patent licenses are generally granted in exchange for some form of monetary consideration, that remuneration may be fixed or variable, the latter representing a royalty form. See generally T. Costner, 14 Business Organizations Patents § 3.04(1) (1975). It should also be recalled that the actual royalty basis arrived at may be the hardest aspect of concluding a licensing negotiation. Id. at § 3.01. [18] ***HN17***[] A patentee may negotiate for a minimum royalty payment but a court cannot go beyond the agreement of the parties to establish a minimum royalty where the parties themselves fail to provide one. *DeStubner v. United Carbon Co., 67 F. Supp. 884 (S.D.W.Va.1946)*, *Aff'd, 163 F.2d 735 (4th Cir. 1947)*, Cert. denied, *334 U.S. 829, 68 S. Ct. 1328, 92 L. Ed. 1757 (1948)*. Similarly, *United States v. General Electric Co., 272 U.S. 476, 489, 47 S. Ct. 192, 71 L. Ed. 362 (1926)*, held that a bargained-for royalty in licensing agreements does not have to meet a test of reasonableness. It would seem that in a setting in which marketplace economics determine the ultimate value of a new invention, and where that value is determined by negotiations **[**83]** freely entered into between the patentee-owner and the licensee-manufacturer, that a given outcome should not be challenged by the courts, absent, of course, any clearly prohibited anticompetitive behavior. The law has already recognized that a licensor is free to exact from his licensee a price as high as he can get, *Brulotte v. Thys Co., 379 U.S. 29, 33, 85 S. Ct. 176, 13 L. Ed. 2d 99 (1964)*,

[18] Some of the factors to be considered in such negotiations are: the patent's strength, availability of competing technology, the cost to develop the invention, the savings (or profit) to be realized, the cost of the suit, the nature of the license, negotiation costs, the costs of assembling concomitant technical information for the licensee, costs of servicing the agreement, and the licensee's investment. T. Costner, Supra, at § 3.01.

and a corollary of this ruling in a free market setting would be that a licensee should be accorded the right to bargain for as low a price as he can get, up to and including a zero royalty. [19]

[84]** Given the facts of licensing, plaintiffs have not been denied compensation altogether merely variable compensation has been foreclosed to them. The record even shows, by their own admission, that they have already received some $ 95,000 from American Safety, including a $ 25,000 down payment prior to the termination of this licensing agreement in 1966 before any of plaintiffs' inventions were marketed. Plaintiffs' Memorandum at 21. The negotiation of a licensing agreement is a difficult and often risky enterprise. Parties entering into such negotiations are not guaranteed any return whatsoever. What is strange is the way plaintiffs characterize these initial negotiations with American Safety in 1963:

> Although plaintiffs were not happy with the prospect of losing a large protion (sic) of the potential royalties on their inventions, They were compelled, as a condition of consummating the license agreement with American Safety in 1965, to relinquish their right to 60% of the potential royalties based upon procurement of their inventions by automobile companies, including the defendants.

Plaintiffs' Memorandum at 20 (emphasis added). What do plaintiffs mean when they **[**85]** say they were compelled to give up over half of their royalties? There is no evidence or even innuendo that the result of which plaintiffs complain was anything but the by-product of negotiations freely entered into. Again, the suspicion arises that plaintiffs are upset primarily because they did not receive more money. Receiving $ 95,000 for an invention which was not even marketed and which was produced by a **[*664]** lawyer and a psychiatrist in their spare time is not necessarily a return so insufficient as to deter plaintiffs from ever inventing again.

After the agreement with American Safety was cancelled, plaintiffs conducted licensing negotiations with Hamill a year later, in 1967. Once again they agreed to waive some of their royalties, this time, 50%. By plaintiffs' own admissions, however, and as explained to them by Hamill's attorney, "the burden of paying royalties to plaintiffs and competing with non-royalty-paying suppliers who would benefit from royalty-free licenses under plaintiffs' inventions would be too heavy." Plaintiffs' Memorandum, at 22. One can interpret this remark to mean that plaintiffs' insistence on variable compensation put them at a competitive **[**86]** disadvantage.

V. CONCLUSION

Commenting on the purposes of standing analysis, Berger and Berstein note that it is:

> designed to narrow this broad class of injured persons to a subclass of plaintiffs **[***485]** who are deemed proper parties to sue. ***HN18***[] The scope of antitrust standing should be determined by reference to the special problems created by treble damage actions, such as ruinous or duplicative recoveries. The scope of substantive protection should be determined in each case by analysis of pertinent Substantive antitrust policies.

86 Yale L.J. at 836. They recognize that the "distinction between direct and indirect injury is arbitrary, even metaphysical, since all antitrust injuries are "direct' to a greater or lesser degree." *Id. at 842-43*. The real difficulty with these traditional approaches to standing is their failure to take account of all aspects of antitrust Policy, including the In terrorem effect of treble damages and "overkill" liability, as well as relevant economic and social policies. Such a policy approach to standing analysis must, of necessity, consider the nature and severity of the alleged injury, the parties involved, and the relationship of all of these **[**87]** to substantive ***antitrust law***. Plaintiffs' recovery in this case, if any, must be confined to their claim of patent infringement. Having failed to provide evidence of a conspiracy for purposes of *Section 1* of the Sherman Act, they also lack standing by virtue of the fact that the injury alleged is not one which is cognizable under the antitrust laws. Given the protections already afforded plaintiffs by the patent laws, granting them standing would enable them to obtain benefits far beyond those provided by law. By virtue of their patent monopoly, they are free to negotiate whatever price they can obtain for their invention; however, they cannot invoke the antitrust laws to guarantee that such a return, if any, approximates even their minimum expectations.

---

[19] See comment by J. G. Van Cise, Supra.

Thus, in light of the admitted absence of any conspiracy in this case and because plaintiffs as a matter of law lack standing to sue as to counts one and two, defendants' motions for partial summary judgment as to these counts shall be granted. The Court expresses no opinion on the claim by defendants that laches or the statute of limitations bars plaintiffs' action.

Accordingly, it is this 29th day of May, 1979, by the United **[**88]** States District Court for the District of Maryland, ORDERED:

1. That defendants' motions for partial summary judgment be, and the same are hereby GRANTED; and

2. That plaintiffs' motion for partial summary judgment be, and the same is, hereby DENIED.

Antitrust & Trade Law > Clayton Act > General Overview

Torts > ... > Multiple Defendants > Contribution > General Overview

HN1[] **Antitrust & Trade Law, Sherman Act**

The deterrent policies underlying the Sherman and Clayton Acts are best served by retaining a rule which can result in any defendant found to have engaged in intentional wrongful acts being held liable for the full sum of injuries caused by its acts and those of its partners. A defendant who is found not be an intentional violator of the antitrust laws will not pay a penny in damages.

Governments > Courts > Judicial Precedent

HN2[] **Courts, Judicial Precedent**

The Supreme Court has listed three factors to consider on the retroactivity of a new rule of law: that it work a substantial change in law upon which parties may have relied; that its policy be furthered by retrospective application; and that such application not be unfair.

Opinion

[*40] MEMORANDUM OPINION:

On May 16, 1979, a pretrial hearing was held before this court on the motions of Westvaco, Packaging Corporation of America, Georgia-Pacific, and Crown Zellerbach for leave to amend their answers to assert cross-claims for contribution against certain other defendants who have entered into settlement agreements with plaintiffs' class. The question presented by these motions is whether, in an antitrust action such as this, contribution among defendants is proper. This question has been very thoroughly briefed and argued. It is the conclusion of the court, after careful consideration of all the arguments presented, that such a claim would not be proper in this case.

The threshold question is whether contribution should be allowed in any antitrust **[*41]** case brought under the federal laws. The Eighth Circuit, in the recent case **[**2]** of *Professional Beauty Supply, Inc. v. National Beauty Supply, Inc., 594 F.2d 1179 (8th Cir. 1979)*, has allowed contribution in an antitrust action; no other circuit has done so. In fact, the law has appeared uniformly contrary to the position advanced by Westvaco. *Goldlawr, Inc. v. Shubert, 276 F.2d 614, 616 (3d Cir. 1960)*; Olson Farms, Inc. v. Safeway Stores, Inc., 1977-2 Trade Cas. § 61,698 (D.Utah 1977); El Camino Glass v. Sunglo Glass Co., 1977-1 Trade Cas. § 61,533 (N.D.Calif.1976); *Sabre Shipping Corp. v. American President Lines, Ltd., 298 F. Supp. 1339 (S.D.N.Y.1969)*. In recent years, however, it is argued that a trend towards allowing contribution can be discerned. Two cases are currently on appeal before the Fifth Circuit which may clarify this point, *Abraham Construction Corp. v. Texas Industries, Inc., No. 78-1788, 604 F.2d 897*, and Iowa Beef Processors, Inc. v. Spencer Foods, Inc., No. 78-3346; and it has been suggested that this court defer ruling on this question until it has the benefit of that clarification.

It is the court's conclusion, however, that contribution would be inappropriate in these cases even should it be proper in some federal antitrust cases, **[**3]** and for that reason the court will not delay its ruling.

It appears that Westvaco seeks contribution primarily to avoid the coercive impact to it, as a late-settling or non-settling defendant, of the possibility of enormous damages being assessed against it. That this possibility is inherently coercive is indisputable the estimates of total damages in these cases range from just under two hundred million dollars to over one billion dollars, and of course any jury verdict would be subject to the trebling provisions of the Act. Twenty-three defendants, representing approximately 80% Of the market, have entered into settlement agreements for a total sum of almost three hundred million dollars. Even a defendant relatively certain of a judgment in his favor must have serious doubts about risking such exposure by going to trial. Movants here seek a means to insure that they will not be ultimately liable for more than their market share, or perhaps than their percentage of culpability, in the event they go to trial and lose.

On the other hand, the settling defendants and class plaintiffs urge that allowing contribution in any case such as this will make settlements impossible to achieve **[**4]** and will thereby contribute to the already notorious complexity and unmanageability of antitrust cases. Defendants have little incentive to buy peace from plaintiffs if they may be obliged to litigate the same claims against other defendants. Further complications to the efficient management of a suit such as this would arise from the processing of the many possible cross-claims and impleader actions and from the fact that joint defense efforts, with their savings in court, staff, and attorney time, would be hindered or deterred altogether. The court has recently completed the trial of United States of America v. *International Paper, et al. and United States of America v. Boise Cascade, et al., D.C., 457 F. Supp. 571*; those cases involved the prosecution of nine defendants with well-coordinated joint defense efforts. The trial lasted approximately fifteen weeks. It is difficult to judicially foresee how these cases, with the class and opt-out plaintiffs and thirty-seven defendants asserting cross-claims against each other, could be managed. Liberal use of severance would be required for trial, and that would lead to the consumption of courts' time in duplicative efforts.

It **[**5]** seems to the court that a policy of allowing contribution would complicate litigation procedurally, frustrate settlements, and inhibit joint defense efforts to such an extent that this type of litigation would be virtually impossible to manage. Weighing the possible unfairness to a defendant such as Westvaco against the ills which would arise from contribution in such a case as this leads this court to the belief that contribution would be improper and undesirable. The court is also mindful of the arguments advanced by Judge Hanson in his dissent in Professional Beauty Supply that the problems attendant on such a rule would be likely to deter private plaintiffs from exercising their option to serve as private attorneys general in the antitrust area. *594 F.2d at 1189*.

[*42] In addition to the management problems such a rule would present, the court finds Westvaco's arguments unpersuasive in the context of intentional torts. The court notes that even in jurisdictions which allow contribution among joint tortfeasors it is usual to restrict such recovery to negligent joint tortfeasors. ***HN1***[] The deterrent policies underlying the Sherman and Clayton Acts would appear to be best served **[**6]** by retaining a rule which can result in any defendant found to have engaged in such intentional wrongful acts being held liable for the full sum of injuries caused by its acts and those of its partners. It must, of course, be borne in mind at all times that a defendant who is found not be an intentional violator of the antitrust laws will not pay a penny in damages.

For these reasons, the court does not feel that contribution should be allowed in any such antitrust case as this. If, however, the rule were eventually to be otherwise in this circuit, there is a compelling reason not to grant the motions of Westvaco and the three other defendants in this case, at this time. Such a rule should not be applied retroactively where the settling litigants have relied on unvarying past precedent in reaching agreements with the plaintiffs' class and in undertaking joint defense efforts which may have worked very substantially to their detriment should those defendants who have not chosen to settle be allowed to use information gained under the guise of mutual aid to bring cross-claims now. ***HN2***[] The Supreme Court has listed three factors to consider on the retroactivity of a new rule of law: that **[**7]** it work a substantial change in law upon which parties may have relied; that its policy be furthered by retrospective application; and that such application not be unfair. *Chevron Oil Co. v. Huson, 404 U.S. 97, 106-07, 92 S. Ct. 349, 30 L. Ed. 2d 296 (1971)*. In applying these three factors to the case in hand, it is clear that a holding by this court now, or by the Fifth Circuit on the appeals before it, that contribution claims are proper under federal ***antitrust law*** would be a substantial departure from existing law. If such a rule is ultimately effectuated, the policy behind it must be one of fairness to non-settling defendants; perhaps it could be argued that that policy would be favored by retrospective application, but in this court's view fairness does not require allowing non-settling defendants to participate in joint defense efforts and use information gained there against those who have chosen to settle, in reliance on the then current state of the law. As to the third factor it seems unfair to all parties to change the rules underlying settlement in so complex a case at this stage of the litigation. Settling defendants have paid three hundred million dollars to buy their **[**8]** peace. Almost a year has passed since the first settlement agreement was reached. The settling defendants, under the terms of their settlements, have been cooperating with class plaintiffs in their discovery. As has been mentioned, all defendants, at this court's request, participated in joint defense work. It would be inequitable to apply such a rule retroactively to this case.

For these reasons, the motions of the several non-settling defendants to amend their answers to assert cross-claims for contribution are DENIED.

HN1[] **Specific Cases Removed, Federal Questions**

Generally the plaintiff determines by the allegations of his complaint whether the case is removable as one arising under the laws of the United States, since the existence of a federal question must appear on the face of a complaint. A plaintiff alleging facts that would support both a federal and a state law claim is free to confine his claim to one based on state law and proceed in state court.

Opinion by: NEWMAN

Opinion

[*365] RULING ON PLAINTIFF'S MOTION FOR REMAND

The State of Connecticut seeks to remand the antitrust damage suit that it brought in state court against Levi Strauss & Company (Levi Strauss), which Levi Strauss removed on both federal question and diversity grounds. *28 U.S.C. § 1441(b)*. Connecticut claims that its suit involves no federal question, *28 U.S.C. § 1331*, and that diversity jurisdiction is unavailable because Connecticut is not a citizen and because the jurisdictional amount requirement has not been met, *28 U.S.C. § 1332*.

The action was filed in the Hartford Superior Court on August 7, 1978. The State charged Levi Strauss with violations of the Connecticut Antitrust Act, *Conn.Gen.Stat. §§ 35-24 to 35-45*, between roughly October 1, 1971, and January 1, 1977. Specifically, Connecticut claims that Levi Strauss acted with co-conspirators to restrain trade in connection with the distribution and retail sale of its products ("jeans" and other **[**2]** casual clothing) to consumers in Connecticut. *Conn.Gen.Stat. §§ 35-26*, *35-28*. Levi Strauss, a large national firm incorporated in Delaware and headquartered in San Francisco, is alleged to have engaged in Connecticut in a continuing contract, combination **[*366]** or conspiracy to fix prices by threatening and coercing its dealers in various ways, by terminating dealers who did not comply, and by refusing to deal with prospective dealers who Levi Strauss believed would not comply. The State has brought the action in its enforcement capacity, *Conn.Gen.Stat. § 35-32(a)*, and as Parens patriae for (or class representative of) its residents who have suffered damages from alleged artificially high prices and impaired competition, *Conn.Gen.Stat. § 35-32(c)*.

Federal Question Jurisdiction

Levi Strauss asserts that the facts alleged in the complaint are sufficient to state a claim within the federal question jurisdiction of this Court. Whatever the statutory label that Connecticut applies to its cause of action, Levi Strauss says that the factual allegations state a claim for violation of the federal antitrust laws. Connecticut acknowledges that the facts would support a federal antitrust **[**3]** claim, if it had chosen to plead a violation of federal law. But

Connecticut insists that it is entitled to exercise its prerogative to plead only a state ***antitrust law*** claim to the exclusion, it contends, of other available claims. [1.]

HN1[] Generally the plaintiff determines by the allegations of his complaint whether the case is removable as one arising under the laws of the *United States, Great Northern Railway v. Alexander, 246 U.S. 276, 282, 38 S. Ct. 237, 62 L. Ed. 713 (1918)*, since the existence of a federal question must appear on the face of a complaint, *Phillips Petroleum Co. v. Texaco, **[**4]** Inc., 415 U.S. 125, 127-28, 94 S. Ct. 1002, 39 L. Ed. 2d 209 (1974)*; *Gully v. First National Bank, 299 U.S. 109, 113, 57 S. Ct. 96, 81 L. Ed. 70 (1936)*. "(T)he party who brings a suit is master to decide what law he will rely upon, and therefore does determine whether he will bring a "suit arising under' (the laws) of the United States by his declaration or bill." *The Fair v. Kohler Die & Specialty Co., 228 U.S. 22, 25, 33 S. Ct. 410, 411, 57 L. Ed. 716 (1913)*. A plaintiff alleging facts that would support both a federal and a state law claim is free to confine his claim to one based on state law and proceed in state court. *La Chemise Lacoste v. Alligator Co., 506 F.2d 339 (3d Cir. 1974)*; *Brough v. United Steelworkers of America, AFL-CIO, 437 F.2d 748 (1st Cir. 1971)*; *Peterson v. Brotherhood of Locomotive Firemen and Enginemen, 272 F.2d 115, 119 (7th Cir. 1959)*; *Fischer v. Holiday Inn of Rhinelander, Inc., 375 F. Supp. 1351 (W.D.Wis.1973)*; *Cue Publishing Co. v. Colgate-Palmolive Co., 233 F. Supp. 443 (S.D.N.Y.1964)*; *J. H. Smith Co. v. Jordan Marsh Co., 161 F. Supp. 659 (D.Mass.1958)*; *M. & D. Simon Co. v. R. H. Macy Co., 152 F. Supp. 212 (S.D.N.Y.1957)*; see *Pan American Petroleum Corp. **[**5]** v. Superior Court, 366 U.S. 656, 662-63, 81 S. Ct. 1303, 6 L. Ed. 2d 584 (1961)*; *Hearst Corp. v. Shopping Center Network, Inc., 307 F. Supp. 551, 556 (S.D.N.Y.1969)*; see generally, 1A Moore's Federal Practice P 0.160 at 185 (2d ed. 1974).

Standing in arguable opposition to this substantial line of authority are two decisions within the *Second Circuit, Beech-Nut, Inc. v. Warner-Lambert Co., 346 F. Supp. 547 (S.D.N.Y.1972)*, *Aff'd, 480 F.2d 801 (2d Cir. 1973)*, and *Ulichny v. General Electric Co., 309 F. Supp. 437 (N.D.N.Y.1970)*, both approving removal of what the plaintiffs may have believed were state law claims, on the ground that the complaints pleaded causes of action arising under the Lanham Act, *15 U.S.C. § 1125(a)*. Neither case establishes a sufficient basis for ignoring the settled rule that the pleader may elect to pursue only a state law claim. In Beech-Nut both the District Court, *346 F. Supp. at 548*, and the Court of Appeals, 480 F.2d at 803, observed that the case "could have been" brought in federal court under the Lanham Act. The absence of any discussion obscures whether the courts meant that the facts alleged in the complaint were **[*367]** sufficient to support **[**6]** a federal claim that "could have been" pleaded by the plaintiff, or that the plaintiff did in fact plead a federal claim that "could have been" brought initially in the federal court. In the Court of Appeals the appellee urged the latter position, pointing out that papers attached to the complaint were properly to be interpreted as the pleading of a federal claim. Appellee's Br. 2, 5. Apparently the Court of Appeals agreed with that contention. Ulichny also contains a similar ambiguity. The District Court stated that the "heart of the suit" related to "an integral issue involving federal law." *309 F. Supp. at 440*. If this meant the pleader had alleged a claim that was really federal, the result is consistent with the weight of authority; if it meant that a state claim was pleaded, but a federal claim was available to be pleaded, removal jurisdiction on that basis would be contrary to controlling precedent.

Despite the pleader's intention to plead only a claim under state law, many courts have held that the suit may nonetheless be deemed to arise under federal law if the state law relied on by the pleader has been preempted by federal law. Avco Corp. v. Aero *Lodge No. 735, Int'l **[**7]** Ass'n of Machinists & Aerospace Workers, 390 U.S. 557, 88 S. Ct. 1235, 20 L. Ed. 2d 126 (1968)*; *New York v. Local 144, Hotel, Nursing Home & Allied Health Services Union, 410 F. Supp. 225 (S.D.N.Y.1976)*; *Hearst Corp. v. Shopping Center Network, Inc., supra*; *Sylgab Steel & Wire Corp. v. Strickland Transportation Co., 270 F. Supp. 264 (E.D.N.Y.1967)*; *Minkoff v. Scranton Frocks, Inc., 172 F. Supp. 870 (S.D.N.Y.1959)*; *Fay v. American Cystoscope Makers, Inc., 98 F. Supp. 278 (S.D.N.Y.1951)*. Other courts have noted the rule that preemption is a matter of defense to a state law claim and concluded that

---

[1.] Connecticut also suggests that the facts pleaded would support a claim for violation of the Connecticut Unfair Trade Practices Act, *Conn.Gen.Stat. § 42-110a Et seq.*, and of various common law standards. Nevertheless Connecticut prefers to stand or fall on its state ***antitrust law*** claim, an election specified on the face of the complaint. Cf. *Minkoff v. Scranton Frocks, Inc., 172 F. Supp. 870, 873 n. 4 (S.D.N.Y.1959)*.

preemption does not convert an invalid state law claim into a sufficient and removable federal law claim. *Washington v. American League of Professional Baseball Clubs, 460 F.2d 654, 660 (9th Cir. 1972)*; *Lowe v. Trans World Airlines, Inc., 396 F. Supp. 9, 12 (S.D.N.Y.1975)* (alternate holding); see also *Application of New York, 362 F. Supp. 922, 928 (S.D.N.Y.1973)*. [2.]

[8]** This dispute among the cases concerns the consequences of traditional preemption, I. e., circumstances where the substantive state law relied on by the plaintiff has been entirely displaced by Congress, expressly or impliedly, by the enactment of federal legislation. Preemption in that sense is not present in this case, since ***HN2***[] in the area of ***antitrust law***, Congress has neither expressed the clear intent, see *Jones v. Rath Packing Co., 430 U.S. 519, 525, 97 S. Ct. 1305, 51 L. Ed. 2d 604 (1977)*, nor acted so as to imply, *Cloverleaf Butter Co. v. Patterson, 315 U.S. 148, 62 S. Ct. 491, 86 L. Ed. 754 (1942)*, that it has displaced state law from the field. See *Exxon Corp. v. Governor of Maryland, 437 U.S. 117, 131-33, 98 S. Ct. 2207, 57 L. Ed. 2d 91 (1978)*; *Giboney v. Empire Storage & Ice Co., 336 U.S. 490, 495, 69 S. Ct. 684, 93 L. Ed. 834 (1949)*; *Standard Oil v. Tennessee, 217 U.S. 413, 30 S. Ct. 543, 54 L. Ed. 817 (1910)*; 1 P. Areeda & D. Turner, ***Antitrust Law*** P 208, at 58-59 (1978) (hereafter "Areeda & Turner"). Even state law that prohibits more than federal antitrust statutes is not necessarily in conflict with, and preempted by, federal law, since the toleration of certain conduct **[**9]** by federal law does not imply an affirmative policy in favor of that conduct. Ibid. [3.]

[*368] Aside from the question of preemption, however, there remains the possibility that Connecticut's ***antitrust law*** has been displaced by the negative implication **[**10]** of the *Commerce Clause*. The statute would be unconstitutional if it operated to impose an undue burden on interstate commerce, I. e., when the significance of the effects on commerce outweigh legitimate local benefits. See *Pike v. Bruce Church, Inc., 397 U.S. 137, 142, 90 S. Ct. 844, 25 L. Ed. 2d 174 (1970)*; *Flood v. Kuhn, 443 F.2d 264, 267-68 (2d Cir. 1971)*, *Aff'd, 407 U.S. 258, 92 S. Ct. 2099, 32 L. Ed. 2d 728 (1972)*. Such a balancing test may resemble preemption analysis, see G. Gunther, Constitutional Law 357-60 (9th ed. 1975), but does not involve the often illusory search for congressional intent concerning matters that might never have been considered at the time a federal law was enacted. See 1 Areeda & Turner, Supra, P 220e, at 131-33.

Levi Strauss contends that the Connecticut statutes in issue here do impose undue burdens on interstate commerce. The "local" interests are said to be minimal, in that the objective of attacking price-fixing is not differentiated from other states' interest in the same goal. The burdens, on the other hand, are asserted to be substantial: if state ***antitrust law*** is the same as federal law, Levi Strauss faces a series of what it terms costly **[**11]** and duplicative suits in the courts of different states; to the extent state and federal laws differ and state statutes are more exacting, Levi Strauss fears that it will have to comply with the strictest standard, which would then in effect preempt federal law, Cf. *Southern Pacific Co. v. Arizona, 325 U.S. 761, 65 S. Ct. 1515, 89 L. Ed. 1915 (1945)*.

[2.] It is not clear whether the courts that view preemption as a defense and therefore leave the pleader of a preempted state law claim to proceed (to defeat) in state court would permit the pleader to file a new suit based on the preempting federal law either in state court, from which it would clearly be removable, or directly in federal court. If the claim can be refiled as a federal claim, it seems pointless to remand the losing state law claim. On the other hand, if these courts would hold the pleader to have split his cause of action and would consider the adverse ruling on the state law claim as Res judicata with respect to a subsequent allegation of the same facts as a federal law claim, then a remand, though harsh, is at least dispositive.

[3.] A difference in remedies available under state and federal law is not necessarily a conflict resulting in preemption. See Ohio ex rel. Brown v. Klosterman French Baking Co., (1977-1) Trade Cases (CCH) P 61,361 (S.D.Ohio 1976) (four-year statute of limitations for federal antitrust claims does not preempt longer state statute of limitations and damage period). Thus, the fact that a federal Parens patriae remedy is available only for events after the Hart-Scott-Rodino amendments came into effect in October, 1976, See Pub.L.No.94-435, § 301, 90 Stat. 1394-95 (1976), does not automatically preclude a more severely retroactive application of the Connecticut Parens patriae statute, *Conn.Gen.Stat. § 35-32*, if that law is construed to differ from federal law.

It is not at all clear that the Pike criterion of a "legitimate local interest" requires an objective of Peculiarly and predominantly local character. Price-fixing in a region or a state is no less local because it may also occur elsewhere. Nor is a burden on a company to defend a variety of lawsuits an undue burden (if any burden at all) on commerce. ***HN3***[] The *Commerce Clause* protects the interstate market, not particular interstate firms. Cf. *Exxon Corp. v. Governor of Maryland, supra, 437 U.S. at 127-28, 98 S. Ct. 2207*. Uniformly applied prohibitions of price-fixing would not seem to inhibit the flow of goods between states. Cf. *Procter & Gamble Co. v. City of Chicago, 509 F.2d 69, 77 (7th Cir. 1975)*. Even if Levi Strauss had to meet in Connecticut a stricter standard concerning resale price maintenance than that imposed by other states **[**12]** or by federal law, variation in permissible pricing practices is not inevitably an undue burden on commerce. Such a burden is far less than that of different and possibly conflicting requirements for equipment moving along interstate highways, for example. Cf. *Bibb v. Navajo Freight Lines, Inc., 359 U.S. 520, 79 S. Ct. 962, 3 L. Ed. 2d 1003 (1959)*.

These issues are not appropriate for resolution at this point, however, because they depend on questions of state law that have not yet been authoritatively answered. In construing the Connecticut Antitrust Act, the courts of Connecticut may be guided by decisions of federal courts concerning similar provisions of the federal antitrust laws. See *Mazzola v. Southern New England Telephone Co., 169 Conn. 344, 348, 363 A.2d 170 (1975)*; *Connecticut Association of Clinical Laboratories v. Connecticut Blue Cross, Inc., 31 Conn.Supp. 110, 115, 324 A.2d 288 (1973)*. But state law will not necessarily be interpreted identically to federal provisions, and the extent of the differences may affect constitutionality.

The uncertainty concerning state law suggests the possibility of abstention. Difficult and undecided questions of state law have been **[**13]** presented "bearing on policy **[*369]** problems of substantial public import whose importance transcends the result in the case . . . at bar. *Louisiana Power & Light Co. v. City of Thibodaux, 360 U.S. 25 (, 79 S. Ct. 1070, 3 L. Ed. 2d 1058) (1959)* . . . . ." *Colorado River Water Conservation District v. United States, 424 U.S. 800, 814, 96 S. Ct. 1236, 1244, 47 L. Ed. 2d 483 (1976)*. Cf. *Burford v. Sun Oil Co., 319 U.S. 315, 63 S. Ct. 1098, 87 L. Ed. 1424 (1943)*. The way Connecticut courts interpret the local ***antitrust law***, virtually unconstrued at present, will have significant effects on business and regulatory practices alike. The sensitive issues presented here should be first considered by the courts of the state.

In the situation presented, the proper course is not for this Court to stay its hand and retain jurisdiction, see *England v. Louisiana State Board of Medical Examiners, 375 U.S. 411, 84 S. Ct. 461, 11 L. Ed. 2d 440 (1964)*, but to remand the case entirely. Cf. *Washington v. American League of Professional Baseball Clubs, supra, 460 F.2d at 659-60*. Any construction given Connecticut ***antitrust law*** by a state court would prevent removal to this Court. Were the state **[**14]** court to construe the law in a way that avoids any undue burden on interstate commerce, the case could proceed in state court on the state law claim. See *California v. California & Hawaiian Sugar Co., 588 F.2d 1270 (9th Cir. 1978)* (complaint asserting claims under California ***antitrust law*** found not to state a federal claim, and remanded); *Caraway v. Ford Motor Co., 148 F. Supp. 776 (W.D.Mo.1957)* (common law action for fraudulent misrepresentation and conspiracy, not preempted by federal ***antitrust law***; case remanded); *Massachusetts v. McHugh, 71 F. Supp. 516 (D.Mass.1947)* (complaint alleging violations of state ***antitrust law*** did not present federal question, despite similarity of state and federal laws; remanded).

On the other hand, if the Connecticut court should feel impelled to give the state statute a construction that encounters insurmountable constitutional objections, then that court would have no alternative but to find the state law unconstitutional. In that event, only federal ***antitrust law*** would be available in this case. But any claim resting solely on federal ***antitrust law*** would be within the exclusive jurisdiction of the federal court. The claim would have to be dismissed **[**15]** by a state court, and could not be removed to a federal court. Since a federal court's derivative removal jurisdiction is available only as to a case within a state court's jurisdiction, removal of such a claim from state court would be improper, and dismissal would be required under the anomalous but enduring authority of *Lambert Run Coal Co. v. Baltimore & Ohio Railroad, 258 U.S. 377, 382, 42 S. Ct. 349, 66 L. Ed. 671 (1922)*. See *Freeman v. Bee Machine Co., 319 U.S. 448, 451, 63 S. Ct. 1146, 87 L. Ed. 1509 (1943)*; *Washington v. American League of Professional Baseball Clubs, supra, 460 F.2d at 658-59*; *Meyer v. Indian Hill Farm, Inc., 258 F.2d 287, 290 (2d Cir. 1958)*.

It would be inappropriate to anticipate the results of deliberations by the state court. [4.] As of now, the complaint presents **[*370]** no claim arising under federal law. Any resolution of unsettled issues of state ***antitrust law*** that could lead to presentation of a federal claim should be made by the courts of Connecticut.

[16]** Diversity Jurisdiction

Levi Strauss' contention that Connecticut's claim is removable within the diversity jurisdiction of this Court raises issues concerning the status of the plaintiff as a citizen of a state and the existence of a claim in excess of the required $ 10,000 jurisdictional amount. [5.] Analysis is complicated by the fact that Connecticut seeks several types of monetary awards, and it does so in different ***HN4***[] capacities. Diversity jurisdiction requires diverse citizenship and a claim in excess of the jurisdictional amount. Connecticut's suit does not satisfy both requirements simultaneously with respect to any single element of its monetary claim. Cf. *Title Guaranty & Surety Co. v. Idaho ex rel. Allen, 240 U.S. 136, 140-41, 36 S. Ct. 345, 60 L. Ed. 566 (1916)*.

[17]** Connecticut seeks four types of monetary awards. The basic claim is for recovery of the alleged unlawful overcharges incurred by the citizens of Connecticut who purchased Levi Strauss products. Connecticut intends to return the overcharges to all identifiable purchasers. Second, Connecticut seeks to collect and proposes to keep as state funds all provable overcharges that cannot feasibly be returned to identifiable purchasers. Third, Connecticut sues for $ 250,000 as a civil penalty authorized by *Conn.Gen.Stat. § 35-38*. Finally, Connecticut seeks an award of attorney's fees.

Consideration of the status of the plaintiff in seeking to recover these four elements of the money claim must start with the longstanding, if somewhat metaphysical, principle that "***HN5***[] a state cannot, in the nature of things, be a citizen of any State." *Stone v. South Carolina, 117 U.S. 430, 433, 6 S. Ct. 799, 800, 29 L. Ed. 962 (1886)*; see also *Illinois v. City of Milwaukee, 406 U.S. 91, 97 n.1, 92 S. Ct. 1385, 31 L. Ed. 2d 712 (1972)*; *Postal Telegraph Cable Co. v. Alabama, 155 U.S. 482, 487, 15 S. Ct. 192, 39 L. Ed. 231 (1894)*. Thus to the extent that Connecticut is suing in its sovereign capacity, its claim **[**18]** cannot be brought within the diversity jurisdiction of a district court. [6.]

[4.] It would be equally inappropriate, and unavailing, for this Court to proceed with construction of the state statute. If this Court construed state law to be constitutional, a remand to proceed under valid state law would occur. If this Court found state law, as construed, unconstitutional, the plaintiff's available claim under federal ***antitrust law*** would still not be within the removal jurisdiction of this Court, because of Lambert Run.

Moreover, any constitutional objection to the validity of the state statute is technically a matter of defense, which traditionally cannot be used as the basis for federal question jurisdiction. *Louisiana & Nashville Railroad v. Mottley, 211 U.S. 149, 29 S. Ct. 42, 53 L. Ed. 126 (1908)*. A federal court's disregarding the defensive nature of the contention that the state law is unconstitutional, and adjudicating that question before the state court has a chance to do so, would propel it into adjudication not only of the constitutional issue but also, preliminarily, of the contours of the state statute. This is a further reason not to rest federal question jurisdiction on what is in essence a defense contention.

The danger of anticipatory federal court construction of a state statute does not normally arise in cases involving statutory preemption. In those cases the issue is typically whether federal law has filled the field; the focus of inquiry is on the reach and effect of the federal statute, and construction of state statutes is rarely involved. In such a situation, it may be legitimate for a federal court to which a state claim has been removed to adjudicate the contention that state law has been preempted by a federal statute, rather than treat preemption as a defense and remit to the state court what is obviously an important federal question, even though one that occurs in a suit arguably not arising under federal law.

[5.] Although this is a suit between a state and a citizen of another state, it may not be brought under *28 U.S.C. § 1251(b)(3)*. That section, giving original but not exclusive jurisdiction of such suits to the Supreme Court, allows for concurrent jurisdiction in the district courts. But it does not confer jurisdiction on those courts. *Ohio v. Wyandotte Chemicals Corp., 401 U.S. 493, 498 n.3, 91 S. Ct. 1005, 28 L. Ed. 2d 256 (1971)*; C. Wright, Federal Courts 559 (3d ed. 1976). A specific statutory basis for district court jurisdiction is required, such as the diversity grant of *28 U.S.C. § 1332*.

[6.] Clearly Connecticut would be acting as a sovereign if it were considered to be bringing this suit in its enforcement capacity. Access to diversity jurisdiction is not aided by considering Connecticut as representative of a class, even assuming that

But Levi Strauss contends that this case is different because Connecticut is suing to some extent as Parens patriae for the victims of defendant's allegedly unlawful pricing practices.

If Connecticut were suing as Parens patriae **[**19]** for the benefit of all of its citizens, its capacity would be essentially sovereign, and it would not be a citizen for diversity purposes. But it has long been recognized that ***HN6***[] a state can act as Parens patriae for a circumscribed group of its **[*371]** citizens. Indeed, states seeking to invoke the original jurisdiction of the Supreme Court in their capacities as sovereigns, see *New York v. New Jersey, 256 U.S. 296, 41 S. Ct. 492, 65 L. Ed. 937 (1921)*; *Georgia v. Tennessee Copper Co., 206 U.S. 230, 27 S. Ct. 618, 51 L. Ed. 1038 (1907)*, have been rebuffed whenever it appeared that their real claim was being brought only on behalf of particular citizens. *Pennsylvania v. New Jersey, 426 U.S. 660, 665-66, 96 S. Ct. 2333, 49 L. Ed. 2d 124 (1976)*; *Oklahoma v. Atchison, Topeka & Santa Fe Railroad, 220 U.S. 277, 31 S. Ct. 434, 55 L. Ed. 465 (1911)*; see *Louisiana v. Texas, 176 U.S. 1, 20 S. Ct. 251, 44 L. Ed. 347 (1900)*; *New Hampshire v. Louisiana, 108 U.S. 76, 2 S. Ct. 176, 27 L. Ed. 656 (1883)*. [7.] Presumably, a state's role in suing on behalf of particular citizens sufficiently dispenses with its sovereign capacity not only to bar access to the Supreme Court's original jurisdiction but **[**20]** also to gain access to the district courts' diversity jurisdiction (assuming diverse citizenship of the defendant and jurisdictional amount).

[21]** When Connecticut claims refunds to be distributed to identifiable purchasers, the citizen status of the purchasers rather than the sovereign status of their benefactor controls for diversity purposes. However, while that analysis satisfies the citizenship requirement, it fails to satisfy the requirement of jurisdictional amount. ***HN7***[] The aggregation of distinct claims of separate individuals in one suit does not permit an aggregation of the amount of their claims. See *Snyder v. Harris, 394 U.S. 332, 89 S. Ct. 1053, 22 L. Ed. 2d 319 (1969)* (class actions). Each individual from whom Connecticut seeks a refund has a claim of no more than a few dollars; no one seeks anything close to the $ 10,000 required of each claimant. See *Zahn v. International Paper Co., 414 U.S. 291, 94 S. Ct. 505, 38 L. Ed. 2d 511 (1974)*; Cf. *Hunt v. Washington State Apple Advertising Commission, 432 U.S. 333, 346-48, 97 S. Ct. 2434, 53 L. Ed. 2d 383 (1977)*. Insofar as Connecticut presents claims of individuals, and thereby satisfies the citizenship requirement for diversity jurisdiction, it seeks discrete recoveries upon separate proof, and fails to meet the jurisdictional amount requirement.

The second, third, **[**22]** and fourth elements of Connecticut's money claim satisfy the jurisdictional amount requirement, but as to these elements, Connecticut is acting in its sovereign capacity and cannot satisfy the citizenship requirement. In seeking recovery of overcharges, Connecticut is not necessarily limited to evidence of purchases by identifiable buyers. If Connecticut's Parens patriae statute, *Conn.Gen.Stat. § 35-32*, were construed to be the same as the federal provision, Pub.L.No.94-435, § 301, 90 Stat. 1395 (1976), damages could be proved in the aggregate by sampling or other statistical methods, or any other reasonable computation. Any fund thus collected would exceed the refunds available for identifiable purchasers and leave some portion available for disbursement to the state. Cf. *West Virginia v. Charles Pfizer & Co., 440 F.2d 1079, 1090-91 (2d Cir. 1971)*; see also *In re Antibiotic Antitrust Actions, 333 F. Supp. 278, 281-82 (S.D.N.Y.1971)*. Connecticut's ***antitrust law*** provides for the receipt of such funds. *Conn.Gen.Stat. § 35-32a*. The funds deposited with the state and not returned to purchasers may well exceed $ 10,000.

Connecticut could be a member of a consumer class and its adequate representative, with typical claims. The citizenship of a class is determined by the citizenship of its representative, *Snyder v. Harris, 394 U.S. 332, 340, 89 S. Ct. 1053, 22 L. Ed. 2d 319 (1969)*; *Supreme Tribe of Ben Hur v. Cauble, 255 U.S. 356, 41 S. Ct. 338, 65 L. Ed. 673 (1921)*, and in pressing any claim of its own as representative of a class, Connecticut would be acting as a sovereign.

[7.] In *Hawaii v. Standard Oil Co., 405 U.S. 251, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972)*, which included a Parens patriae claim alleging violations of federal antitrust laws, complaints of injury to the "general economy" of the state did not change the nature of the claim from one in which the state was really putting forth the claims of many individuals. *Id. at 262-64, 92 S. Ct. 885*. The subsequently enacted § 4C of the Clayton Act, added by the Hart-Scott-Rodino Antitrust Improvement Act of 1976, Pub.L.No.94-435, § 301, 90 Stat. 1394-95 (1976), now authorizes the attorney general of any state to bring a Parens patriae suit, in the name of the state, on behalf of those who have sustained injury through violations of the Sherman Act. But cf. *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. A similar provision exists in Connecticut law. *Conn.Gen.Stat. § 35-32*. But those authorizations do not change the nature of the suits.

Moreover, the $ 250,000 sought as a civil penalty obviously **[**23]** exceeds the requisite jurisdictional amount. Finally, ***HN8***[] the attorney's fees Connecticut seeks are an element of damages to be included in satisfying the **[*372]** jurisdictional amount, since they are authorized by statute as recoverable in an antitrust action, *Conn.Gen.Stat. § 35-35*. See *Missouri State Life Ins. Co. v. Jones, 290 U.S. 199, 54 S. Ct. 133, 78 L. Ed. 267 (1933)*; *Batts Restaurant, Inc. v. Commercial Insurance Co., 406 F.2d 118, 120 (7th Cir. 1969)*; Cf. *Givens v. W. T. Grant Co., 457 F.2d 612, 614* (2d Cir.), Vacated on other grounds, *409 U.S. 56, 93 S. Ct. 451, 34 L. Ed. 2d 266 (1972)*. The amount of such fees can reasonably be expected to exceed $ 10,000.

However, the claim Connecticut makes for the remainder of overcharges not to be distributed to identifiable purchasers, for civil penalties, and for attorney's fees is brought in its sovereign capacity. These funds are not sought for any specific individuals or group of individuals. The funds would belong to the state. In seeking them, Connecticut cannot satisfy the citizenship requirement of diversity jurisdiction.

Thus, as to no one element of its money claim can Connecticut simultaneously satisfy the citizenship **[**24]** and jurisdictional amount requirements.

Conclusion

Neither federal question nor diversity jurisdiction is properly invoked in this case. The motion of the State of Connecticut to remand is granted.

End of Document

Minnesota by Spannaus v. American Crystal Sugar Co.

United States District Court for the District of Minnesota, Fourth Division.

May 31, 1979, Filed

Civil No. 4-79-116.

Opinion by: **[*1]** ALSOP

Opinion

Order of Remand

ALSOP, D.J.: This matter came on for hearing before this Court on May 25, 1979, on the motion of plaintiff State of Minnesota, by its Attorney General, for an Order remanding this action to the District Court of the State of Minnesota, Fourth Judicial District, and awarding to plaintiff the costs incurred by reason of the removal of the action to this Court.

This antitrust action was originally filed on February 16, 1979, in the District Court of the State of Minnesota, Fourth Judicial District. The plaintiff State sought relief for itself, for a class of subordinate governmental entities, and for a class of Minnesota consumers on the basis of alleged violations of the Minnesota ***Antitrust Law*** of 1971, *Minnesota Statutes § 325.8011 et seq.*, and its predecessor statute, *Minnesota Statutes § 325.81*. On March 15, 1979, the defendant sugar refiners and processors removed the action to this Court on the basis of a Petition for Removal, which stated that:

[This] action is a civil action of which this Court has original jurisdiction under the provisions of *28 U.S.C. Sections 1331* and *1337* and *15 U.S.C. Section 15*, and is one which may be removed to **[*2]** this Court by Petitioners pursuant to the provisions of 28 U.S.C. Section 1141(b) in that it is founded on a claim or right arising under the laws of the United States including, inter alia, *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2*.

Petition for Removal, p. 3, § 6

On March 30, 1979, plaintiff State of Minnesota filed its motion for an Order remanding this action to State court.

The Court has considered the Complaint, the Petition for Removal and accompanying documents, the arguments of counsel, and the memoranda and other documents submitted in connection with the Court's consideration of the pending motion.

On the basis of the foregoing, the Court finds that:

1. This action is not a civil action of which this Court has original jurisdiction under *28 U.S.C. Section 1331*, *1337* or *15 U.S.C. Section 15*.

2. This action is not founded on a claim or right arising under the laws of the United States, including *Sections 1* and *2* of the Sherman Act, *15 U.S.C. Section 1* and *2*.

3. This action is not removable to this Court under *28 U.S.C. Section 1441(b)* and has been removed improperly, improvidently, and without jurisdiction.

4. The removal of the action **[*3]** to this Court was not undertaken by the defendants or their counsel in bad faith.

It Is Therefore Ordered That:

A. This action is hereby remanded, pursuant to *28 United States Code § 1447(c)*, to the District Court of the State of Minnesota, Fourth Judicial District.

B. The request of plaintiff State of Minnesota for an award of attorneys fees as costs under *28 United States Code § 1447(c)* is denied.

C. The Clerk shall mail a certified copy of this Order of Remand to the Clerk of the District Court of the State of Minnesota, Fourth Judicial District, Hennepin County Government Center, Minneapolis, Minnesota.

HN2[] Remedies, Damages

The right of a private litigant to injunctive relief in an antitrust action is governed by § 16 of the Clayton Act, *15 U.S.C.S. § 26*. That section states in part that any person, firm, corporation, or association is entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity, under the rules governing such proceedings. The standing requirement of § 16 of the Clayton Act is less restrictive than that contained in § 4 of the Clayton Act since the right to sue under the former provision extends to threatened as well as actual injuries, and is not limited to injuries to a party's business or property.

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN3[] Amendment of Pleadings, Leave of Court

Fed. R. Civ. P. 15(a) provides that leave to amend a complaint shall be freely given when justice so requires.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

HN4[] Clayton Act, Claims

In a suit for treble damages under § 4 of the Clayton Act, a party seeking injunctive relief under § 16 of the Clayton Act, *15 U.S.C.S. § 26*, must demonstrate that the injury he has suffered, or is threatened with, proximately results from the antitrust violation. Thus, there must be a causal connection between an antitrust violation and an injury sufficient for the trier of fact to establish that the violation was a material cause of or a substantial factor in the occurrence of damage.

HN5[] Antitrust & Trade Law, Sherman Act

The Sherman Act prohibits every contract, combination, or conspiracy in restraint of trade or commerce among the states. 15 U.S.C.S. § 1. It also outlaws any monopolization of, attempt to monopolize, or combination or conspiracy to monopolize a part of the trade or commerce among the states. 15 U.S.C.S. § 2.

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] Antitrust & Trade Law, Sherman Act

The "interstate commerce" requirement of the Sherman Act is established if the plaintiff is able to demonstrate either that the alleged anticompetitive conduct occurred in the flow of interstate commerce or that the activity in question, although occurring on a local or state level, has a substantial effect upon interstate commerce. The source of the restraint may be intrastate, as the making of a contract or combination usually is. The application of the restraint may be intrastate, as it often is, but neither matters if the necessary effect is to stifle or restrain commerce among the states. If it is interstate commerce that feels the pinch, it does not matter how local the operation that applies the squeeze.

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] Antitrust & Trade Law, Sherman Act

In making a determination as to whether there is a substantial effect on interstate commerce under the Sherman Act, the court must consider whether there is a sufficient nexus between the complained of conduct and the interstate commerce involved and whether the volume or amount of commerce so affected is substantial.

HN8[] Regulated Industries, Higher Education & Professional Associations

Section 1 of the Sherman Act proscribes all agreements in restraint of trade. If this provision were to be read literally, all commercial contracts would be regarded as violative of the Act since every agreement binds the contracting parties to its terms, and, accordingly, restrains their commercial dealings to a certain extent. The Supreme Court adopted the rule of reason as the standard of analysis for scrutinizing most business relations under the Sherman Act. Under this rule, all the circumstances presented by a particular case must be evaluated by the trier of fact to determine whether the complained of conduct imposes an unreasonable restraint on competition.

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] Antitrust & Trade Law, Sherman Act

In making a determination as to whether an agreement is in restraint of trade in violation of the Sherman Act, consideration must be given to the facts peculiar to the business in which the restraint is applied, the nature of the restraint and its effects, the history of the restraint, and the reasons for its adoption. The focus of the analysis must be upon the impact of the challenged activity on competitive conditions in the relevant market. Any benefits to competition are to be weighed against the competitive evils of the practice in question.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

HN10[] **Antitrust & Trade Law, Sherman Act**

The rule of reason is used to evaluate the validity of most activity challenged under the Sherman Act. The doctrine of per se illegality has been applied to certain conduct that is manifestly anticompetitive. There are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable, and therefore illegal, without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. This principle of per se unreasonableness not only makes the type of restraints which are proscribed by the Sherman Act more certain to the benefit of everyone concerned, but it also avoids the necessity for an incredibly complicated and prolonged economic investigation into the entire history of the industry involved, as well as related industries, in an effort to determine at large whether a particular restraint has been unreasonable an inquiry so often wholly fruitless when undertaken.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN11[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

A price fixing agreement is a combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity. The per se rule is applied even if the effect upon prices is indirect. However, not all arrangements that have an impact on prices are per se unlawful as price fixing combinations.

Contracts Law > Types of Contracts > Lease Agreements > General Overview

HN12[] **Causes of Action, Restraints of Trade**

An exclusivity clause in a shopping center lease is similar, in many respects, to an exclusive dealing arrangement between a manufacturer and a distributor since in both situations a business entity in control of a product restrictively selects the parties to whom it will sell the commodity. Exclusive distributorships between manufacturers and sellers have generally been upheld by the courts under the rule of reason.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN13[] **Regulated Practices, Market Definition**

The geographic market, which is the area of effective competition, must correspond to commercial realities. It has been characterized as the area in which the seller operates, and to which the purchaser can practicably turn for supplies. While the relevant geographic market is often the nation, it can, in an appropriate case, be as small as a city or even part of a city.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

HN14[] **Regulated Practices, Market Definition**

An exclusivity clause will properly be regarded as an unreasonable restraint of trade only if this provision has an adverse impact on competitive conditions as they exist generally in the field of commerce in which the parties engaged. Thus, the significance of the competition eliminated must be viewed in the context of the total competition extant in the relevant market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN15[] **Monopolies & Monopolization, Conspiracy to Monopolize**

An essential element of a conspiracy to monopolize is proof of specific intent to monopolize the designated segment of commerce. The requisite intent may be proved by circumstantial evidence in an appropriate case.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN16[] **Monopolies & Monopolization, Conspiracy to Monopolize**

A claim of conspiracy to monopolize does not require a showing of power to exclude competition, but the absence of any serious likelihood of successfully achieving monopolization is evidence that can be used to support a finding of lack of specific intent.

Antitrust & Trade Law > Sherman Act > General Overview

HN17[] **Antitrust & Trade Law, Sherman Act**

The mode of analysis utilized under the Donnelly Act, *N.Y. Gen. Bus. Law § 340*, is similar to that developed under the federal Sherman Act. Only agreements which constitute unreasonable restraints of trade are prohibited under the Donnelly Act.

Real Property Law > ... > Lease Agreements > Commercial Leases > General Overview

HN19[] **Defenses, Ambiguities & Mistakes**

Under New York law, notice exercising a lease option is legally effective only if given within the specified time and in the designated manner. A tenant will be relieved from the forfeiture of a valuable leasehold resulting from the tenant's failure to exercise his renewal option in a timely manner if his failure to do so was the result of an honest mistake or similar excusable fault, provided that the landlord will not be prejudiced by the late renewal. This doctrine has been applied where the failure to renew by the designated date was due to an ambiguity in the lease, was due to the tenant's reliance upon the actions of a third party, or where the failure to make a timely renewal was due to the tenant's own negligence or inadvertence. In appropriate circumstances, New York courts have found that a landlord had waived strict compliance with the notice requirements of a renewal option or was equitably estopped from mandating strict adherence to the terms of such a provision.

Opinion by: MUNSON

Opinion

[*670] MEMORANDUM DECISION AND ORDER

On January 15, 1974, Optivision, Inc., which operates a wholesale and retail optical goods business, entered into a lease agreement with Syracuse Shopping Center Associates ("Syracuse Associates") to rent a small commercial unit within the Northern Lights Shopping Center for use as a retail store for the dispensing of eyeglasses, contact lenses, and other optical devices. The lease was for five years, commencing on March 1, 1974 and ending on February 28, 1979. A rider to the lease gave the tenant the option to extend the term for an additional five-year period at a slightly increased rental, and provided that **[**2]** the tenant must give the landlord notice of his exercise of the option at least six months prior to the expiration date of the original term. The lease required such notice to be delivered in person or sent by certified mail to Syracuse Shopping Center Associates at 17 Court Street, Buffalo, New York. There is disagreement among the parties as to whether Optivision validly exercised this renewal option.

On September 6, 1978, the landlord leased a different commercial unit in the Northern Lights Shopping Center to a competitor of Optivision, DeWitt's Optical World, Inc. ("DeWitt"), for use as a retail optical goods store. The lease agreement with DeWitt contains an exclusivity clause, providing that the landlord will not rent space in the shopping center to any other optical store unless the center is expanded to include a third department store.

In this action, Optivision challenges the validity of the exclusivity clause in DeWitt's lease under *§§ 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*, and under the New York State Donnelly Act. *New York General Business Law § 340*. Optivision also asserts that, under the legal or equitable principles applied by the New York courts, the lease **[**3]** should be regarded as having been properly renewed, and further alleges that defendants have tortiously interfered with plaintiff's contractual relations. Optivision seeks declaratory and injunctive relief as well as damages.

Presently before the Court is Optivision's motion for a preliminary injunction to restrain defendants from taking any action to enforce the exclusivity clause contained in the lease between the landlord and DeWitt and to restrain defendants from taking any action to remove plaintiff from its present Northern Lights location, pending a determination on the merits of this lawsuit. An evidentiary hearing was held before the Court on March 27 and 28, 1979. At that time, four witnesses testified: John Ransom, Chairman of the Board of Optivision; John Carter, New York State Regional Manager for Optivision; Irving Rosenberg, President of International Business & Realty Corporation ("International") and the leasing and managing agent for Northern Lights; and Morris DeWitt, President and principal shareholder of DeWitt's Optical World, Inc. Certain documentary proof was received in evidence during the hearing.

It is well established ***HN1***[] in this circuit that a party seeking **[**4]** a preliminary injunction must make a clear showing of either

> (1) probable success on the merits And possible irreparable injury, Or (2) sufficiently serious questions going to the merits to make them a fair ground for litigation And a balance of hardships tipping decidedly toward the party requesting the preliminary relief.

Selchow & Righter Co. v. McGraw-Hill Book Co., 580 F.2d 25, 27 (2d Cir. 1978); *State of New York v. Nuclear Regulatory Commission, 550 F.2d 745, 750 (2d Cir. 1977)*; *Jacobson & Co. v. Armstrong Cork Co., 548 F.2d 438, 441 n. 2 (2d Cir. 1977)*; *Sonesta International Hotels Corp. v. Wellington Associates, 483 F.2d 247, 250 (2d Cir. 1973)*.

I.

A.

Initially, defendants argue that plaintiff does not have standing to maintain the antitrust claims since there is not a sufficient **[*671]** causal relationship between the harm to Optivision and defendants' alleged anticompetitive conduct. Defendants argue that the damage suffered by Optivision is a direct and proximate result of its own ineptitude in failing to properly exercise the renewal option in its lease rather than the result of any combination or conspiracy among the defendants.

HN2[] The right of a private **[**5]** litigant to injunctive relief in an antitrust action is governed by § 16 of the Clayton Act, *15 U.S.C. § 26*, [1] which states in pertinent part:

---

1. Section 16 of the Clayton Act, *15 U.S.C. § 26*, is not specifically cited in the Complaint, but leave to amend the Complaint to include this statutory provision as a jurisdictional basis could be granted. ***HN3***[] *Rule 15(a), Fed.R.Civ.P.*, provides that leave to amend "shall be freely given when justice so requires."

> Any person, firm, corporation, or association shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws . . . when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity, under the rules governing such proceedings . . .

See also *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 130, 89 S. Ct. 1562,* ***[**6]*** *23 L. Ed. 2d 129 (1969)*; *SCM Corp. v. Xerox Corp., 507 F.2d 358, 360 (2d Cir. 1974)*. The standing requirement of § 16 is less restrictive than that contained in § 4 since the right to sue under the former provision extends to threatened as well as actual injuries, and is not limited to injuries to a party's "business or property." *Hawaii v. Standard Oil Co., 405 U.S. 251, 260-62, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972)*; *DeGregorio v. Segal, 443 F. Supp. 1257, 1265 n. 13 (E.D.Pa.1978)*; 15 J. Von Kalinowski, Antitrust Laws and Trade Regulation § 114.01(1) (1978).

However, as ***HN4***[] in a suit for treble damages under § 4, a party seeking injunctive relief under § 16 must demonstrate that the injury he has suffered (or is threatened with) proximately results from the antitrust violation. *Credit Bureau Reports, Inc. v. Retail Credit Co., 476 F.2d 989, 992 (5th Cir. 1973)*; *Burkhead v. Phillips Petroleum Co., 308 F. Supp. 120, 123 (N.D.Cal.1970)*. Thus, "(t)here must be a causal connection between an antitrust violation and an injury sufficient for the trier of fact to establish that the violation was a "material cause' of or a "substantial factor' in the occurrence of damage." *Bowen v. New* ***[**7]*** *York News, Inc., 522 F.2d 1242, 1255 (2d Cir. 1975)*, Cert. denied, *425 U.S. 936, 96 S. Ct. 1667, 48 L. Ed. 2d 177 (1976)*; *Billy Baxter, Inc. v. Coca-Cola Co., 431 F.2d 183, 187 (2d Cir. 1970)*, Cert. denied, *401 U.S. 923, 91 S. Ct. 877, 27 L. Ed. 2d 826 (1971)*.

On the basis of the present record in this case, the Court concludes that there is a sufficient causal relationship between the harm plaintiff is threatened with and the alleged anticompetitive conduct. While Optivision may not have validly exercised its renewal option, there is a substantial possibility that it would have been able to enter into a new lease agreement with the landlord at an increased rental if the exclusivity clause had not been granted to DeWitt. The nexus between the threatened harm and the activity in question can be seen from the letter sent by the landlord's counsel to the attorney for Optivision in which it is stated that Syracuse Associates have made "lease commitments which preclude their further interest in . . . (Optivision's) staying at Northern Lights." Defendants correctly point out that if Optivision has not properly renewed its lease, it will be in the same position with respect to the enforcement **[**8]** of the exclusivity clause as any other optical goods store in the Syracuse area, but the Court feels that such a party does have standing to seek injunctive relief, provided that there is space available in the shopping center which the landlord refuses to rent because of the exclusivity clause. See Pay Less Drug Stores Northwest, **[*672]** Inc. v. City Products Corp., 1975-2 Trade Cases P 60,385 (D.Ore.1975). [2.]

[9]** Thus, plaintiff has shown a probability of successfully demonstrating that it has standing to maintain this suit.

B.

Defendants also contend that the federal antitrust claims must be rejected, because plaintiff has failed to satisfy the interstate commerce requirement of the Sherman Act. ***HN5***[] That Act prohibits every contract, combination, or conspiracy "in restraint of trade or commerce among the several States," *15 U.S.C. § 1*, and also outlaws any monopolization of, attempt to monopolize, or combination or conspiracy to monopolize a "part of the trade or commerce among the several States." *15 U.S.C. § 2*.

[2.] The Court believes that, for similar reasons, the causation requirement under New York State ***antitrust law*** is also satisfied in this case. The decision in *Mobil Oil Corp. v. Rubenfeld, 48 A.D.2d 428, 370 N.Y.S.2d 943 (2d Dept. 1975)*, *Aff'd, 40 N.Y.2d 936, 390 N.Y.S.2d 57, 358 N.E.2d 882 (1976)* is not to the contrary since the court in that case did not find that there was an insufficient causal relationship between the landlord's antitrust violations and the tenant's eviction, but rather found that the recognition, in those circumstances, of a retaliatory defense would impose a disproportionate penalty upon the landlord whereas monetary damages would adequately effectuate the purpose of the antitrust laws.

HN6[] The interstate commerce requirement of the Sherman Act will be established if the plaintiff is able to demonstrate either that the alleged anticompetitive conduct occurred in the flow of interstate commerce or that the activity in question, although occurring on a local or state level, has a substantial effect upon interstate commerce. *Burke v. Ford, 389 U.S. 320, 321, 88 S. Ct. 443, 19 L. Ed. 2d 554 (1967)*; *Tiger Trash v. Browning-Ferris Industries, Inc., 560 F.2d 818, 825 (7th Cir. 1977)*, Cert. denied, *434 U.S. 1034, 98 S. Ct. 768, 54 L. Ed. 2d 782 (1978)*; *Taxi Weekly, Inc. v.* **[**10]** *Metropolitan Taxicab Board of Trade, Inc., 539 F.2d 907, 909 (2d Cir. 1976)*; *United States v. Greater Syracuse Board of Realtors, Inc., 449 F. Supp. 887, 891 (N.D.N.Y.1978)*.

> The source of the restraint may be intrastate, as the making of a contract or combination usually is; the application of the restraint may be intrastate, as it often is; but neither matters if the necessary effect is to stifle or restrain commerce among the states. If it is interstate commerce that feels the pinch, it does not matter how local the operation which applies the squeeze.

United States v. Women's Sportswear Manufacturers Association, 336 U.S. 460, 464, 69 S. Ct. 714, 716, 93 L. Ed. 805 (1949).

The substantiality of the effect under the affecting commerce theory must be viewed in terms of practical economics. *Goldfarb v. Virginia State Bar, 421 U.S. 773, 784 n. 11, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975)*; *Doctors, Inc. v. Blue Cross of Greater Philadelphia, 490 F.2d 48, 51 (3d Cir. 1973)*; *Rasmussen v. American Dairy Association, 472 F.2d 517, 523 (9th Cir. 1972)*, Cert. denied, *412 U.S. 950, 93 S. Ct. 3014, 37 L. Ed. 2d 1003 (1973)*. HN7[] In making this determination, the court must consider whether **[**11]** there is a sufficient nexus between the complained of conduct and the interstate commerce involved and whether the volume or amount of commerce so affected is substantial. *Hospital Building Co. v. Trustees of Rex Hospital, 425 U.S. 738, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976)*; *Harold Friedman Inc. v. Thorofare Markets Inc., 587 F.2d 127, 132 (3d Cir. 1978)*; *United States v. Greater Syracuse Board of Realtors, Inc., supra, 449 F. Supp. at 891, 897*; *Joe Westbrook, Inc. v. Chrysler Corp., 419 F. Supp. 824, 837 (N.D.Ga.1976)*.

Testimony concerning the contacts between Optivision's Northern Lights store and interstate commerce was received at the hearing held in this case. In the Court's opinion, the most significant of those contacts is the purchase of products from out-of-state suppliers for resale in the Northern Lights retail outlet. Both Mr. Ransom and Mr. Carter listed several Optivision suppliers which were located in other states, but the record does not contain the precise figure representing the volume **[*673]** of products sent from outside the state to the Northern Lights store. Mr. Ransom stated that the projected gross retail sales for the Northern Lights store for the year **[**12]** 1979 is $ 200,000, and said that approximately 40% Of the gross retail sales figure is represented by the wholesale cost of the products delivered to that store for resale (which would make the wholesale cost in 1979 $ 80,000). It is unclear exactly what portion of the $ 80,000 wholesale cost reflects the purchase of goods from out-of-state suppliers, but it is reasonable to infer from the testimony that a significant portion of the $ 80,000 figure represents the purchase of out-of-state products since Mr. Ransom stated that Optivision's largest supplier of optical lenses, from which it purchases the great bulk of its lenses, is located in Philadelphia, Pennsylvania, and lenses constitute one of the two principal items bought from wholesalers (the other principal item being frames). [3.]

The Optivision **[**13]** representatives also testified that, while the vast majority of customers going to the Northern Lights store were from the Greater Syracuse Metropolitan Area, a small percentage (perhaps 1 or 2% According to Mr. Carter) came from other states. [4.] In this regard, it was noted that customers of other Optivision stores are given guarantees that will be honored at the Northern Lights retail outlet, and that the Northern Lights Shopping Center is located near several interstate highways.

---

3. Mr. Ransom also said that the proportion of out-of-state as opposed to in-state products purchased for the Northern Lights store was probably about the same as that purchased for the other Optivision retail outlets.

4. Testimony was received at the hearing showing that Optivision accepts credit cards from customers, but the Court does not have to consider what significance this might have in establishing the required nexus with interstate commerce, because the witness, who was asked this question, was unable to state where the credit card payments came from.

There was also testimony that materials are sometimes transferred between the Northern Lights store and Optivision stores located outside New York State. Optivision has six stores in Georgia **[**14]** in addition to twelve in New York State. Optivision is also affiliated, under a concept known as Vision World, with stores located in Maryland and the Washington, D. C. area. The stores associated with Vision World engage in joint purchasing and promotional programs.

The alleged anticompetitive conduct here the enforcement of the exclusivity clause in DeWitt's lease will result in a cessation of the interstate movement of supplies and customers to the Northern Lights store operated by Optivision. This will cause a reduction in the total amount of commerce moving between the states or, at least, will cause the diversion of such commerce from Optivision's Northern Lights store to DeWitt's store situated in that shopping center or to retail optical outlets located elsewhere. In either event, there would be the required nexus between the acts in question and the interstate commerce involved. See *Harold Friedman Inc. v. Thorofare Markets Inc., supra, 587 F.2d at 132*; *Hudson Valley Asbestos Corp. v. Tougher Heating & Plumbing Co., 510 F.2d 1140, 1142-43 n. 1* (2d Cir.), Cert. denied, *421 U.S. 1011, 95 S. Ct. 2416, 44 L. Ed. 2d 679 (1975)*. [5.]

[15]** While it is not clear from the present record what the exact amount of interstate commerce implicated here is, it appears that a substantial portion of the $ 80,000 worth of supplies purchased annually by the Northern Lights store comes from companies situated in other states. This factor, either alone, or in combination with the sale of goods to out-of-state customers, the transfer of materials between stores in **[*674]** different states, and other factors that may be demonstrated at a trial on the merits, [6.] **[**17]** may quite possibly be sufficient to show that interstate commerce has been substantially affected. In *Feminist Women's Health Center, Inc. v. Mohammad, 586 F.2d 530, 539-41 (5th Cir. 1978)*, the Fifth Circuit found that there was a substantial effect upon interstate commerce so as to establish Sherman Act jurisdiction where the principal connections with interstate commerce were the plaintiff's purchases of $ 4,000 or $ 5,000 worth of out-of-state supplies a year, and the plaintiff's receipt of $ 12,000 worth of business a year from out-of-state patients. [7.] Also, in a civil rights case *Katzenbach v. McClung, 379 U.S. 294, 85 S. Ct. 377, 13 L. Ed. 2d 290 (1964)* the Supreme **[**16]** Court found a sufficient effect upon commerce so as to bring a restaurant within the purview of Congressional supervision under the *Commerce Clause*, where the restaurant purchased $ 70,000 worth of meat from a local supplier who had procured it from outside the state. The latter case, while not decided under the Sherman Act, is relevant here, because it has repeatedly been held that, in passing the Sherman Act, Congress intended to exercise the fullest extent of its constitutional power to regulate commerce. See, e.g., *United States v. American Building Maintenance Industries, 422 U.S. 271, 278, 95 S. Ct. 2150, 45 L. Ed. 2d 177 (1975)*; *United States v. Frankfort Distilleries, Inc., 324 U.S. 293, 298, 65 S. Ct. 661, 89 L. Ed. 951 (1945)*; *United States v. South-Eastern Underwriters Association, 322 U.S. 533, 558, 64 S. Ct. 1162, 88 L. Ed. 1440 (1944)*.

While the present record has certain deficiencies, the Court believes that it is likely that the plaintiff will be able to successfully demonstrate, at a trial on the merits, that the complained of conduct substantially affects interstate commerce. [8.]

C.

---

5. While there is a sufficient nexus between the complained of conduct and the interstate commerce engaged in by the Northern Lights store, there would not be an adequate nexus between the activities in question and the other seventeen retail stores owned and operated by Optivision, at least in the absence of proof that Optivision will be driven out of business by the defendants' actions. There is no evidence that Optivision as a corporate entity will be so affected.

6. The purchases which DeWitt makes from out-of-state suppliers could also be considered in determining the substantiality of the effect which the complained of conduct has upon interstate commerce, see *Harold Friedman Inc. v. Thorofare Markets Inc., supra, 587 F.2d at 132-33*, but no proof in this regard was introduced at the hearing.

7. The interstate connections in Mohammad also included very limited payments received from out-of-state insurance companies and relatively small amounts spent on interstate travel by the plaintiff's officers or employees.

8. Since the Court believes that it is likely that the plaintiff will be able to prevail on the "affecting commerce" theory, it is unnecessary to consider the "in commerce" theory.

Optivision contends that exclusivity clauses in shopping center leases should be treated as Per se unlawful under § 1 of the Sherman Act, and, in the alternative, argues that if the Court decides to apply a rule of reason analysis, the exclusivity clause in DeWitt's lease **[**18]** should be found to be unreasonable in the circumstances of this case.

HN8[] *Section 1* of the Sherman Act proscribes all agreements "in restraint of trade." If this provision were to be read literally, all commercial contracts would be regarded as violative of the Act since every agreement binds the contracting parties to its terms, and, accordingly, restrains their commercial dealings to a certain extent. *National Society of Professional Engineers v. United States, 435 U.S. 679, 687-88, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*; *Chicago Board of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 62 L. Ed. 683 (1918)*. Recognizing that it was not Congress' intention to prohibit all contracts nor even all contracts that cause an insignificant or attenuated restraint of trade, the Supreme Court adopted the rule of reason as the standard of analysis for scrutinizing most business relations under the *Sherman Act. Continental T. V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 49, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*; *United States v. Topco Associates, Inc., 405 U.S. 596, 607, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*; *Standard Oil Co. v. United States, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619* ***[**19]*** *(1911)*. Under this rule, all the circumstances presented by a particular case must be evaluated by the trier of fact to determine whether the complained of conduct imposes an unreasonable restraint **[*675]** on competition. *Continental T. V., Inc. v. GTE Sylvania Inc., supra 433 U.S. at 49, 97 S. Ct. 2549*; *White Motor Co. v. United States, 372 U.S. 253, 261, 83 S. Ct. 696, 9 L. Ed. 2d 738 (1963)*; *Hunt v. Mobil Oil Corp., 465 F. Supp. 195, 213 (S.D.N.Y.1978)*.

HN9[] In making this inquiry, consideration must be given to "the facts peculiar to the business in which the restraint is applied, the nature of the restraint and its effects, and the history of the restraint and the reasons for its adoption." *United States v. Topco Associates, Inc., supra, 405 U.S. at 607, 92 S. Ct. at 1133*. See *Chicago Board of Trade v. United States, supra, 246 U.S. at 238, 38 S. Ct. 242*; *National Auto Brokers Corp. v. General Motors Corp., 572 F.2d 953, 960 (2d Cir. 1978)*. The focus of the analysis must be upon the impact of the challenged activity on competitive conditions in the relevant market. *National Society of Professional Engineers v. United States, supra, 435 U.S. at 688-92, 98 S. Ct. 1355*; *American* ***[**20]*** *Motor Inns, Inc. v. Holiday Inns, Inc., 521 F.2d 1230, 1247 (3d Cir. 1975)*. Any benefits to competition are to be weighed against the competitive evils of the practice in question. *Gough v. Rossmoor Corp., 585 F.2d 381, 388-89 (9th Cir. 1978)*.

While ***HN10***[] the rule of reason is used to evaluate the validity of most activity challenged under the Sherman Act, the doctrine of Per se illegality has been applied to certain conduct that is manifestly anticompetitive. Thus, in *Northern Pacific Railway Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545 (1958)*, the Supreme Court stated,

> (T)here are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. This principle of Per se unreasonableness not only makes the type of restraints which are proscribed by the Sherman Act more certain to the benefit of everyone concerned, but it also avoids the necessity for an incredibly complicated and prolonged economic investigation into the entire history **[**21]** of the industry involved, as well as related industries, in an effort to determine at large whether a particular restraint has been unreasonable an inquiry so often wholly fruitless when undertaken.

See also *Continental T. V., Inc. v. GTE Sylvania Inc., supra, 433 U.S. at 50, 97 S. Ct. 2549*; *United States v. Topco Associates, Inc., supra, 405 U.S. at 607, 92 S. Ct. 1126*. Courts have been willing to classify specific types of business relationships as Per se violations only after having had considerable experience in evaluating them. *Broadcast Music, Inc. v. CBS, Inc., 441 U.S. 1*, -- , *441 U.S. 1, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*; *White Motor Co. v. United States, supra, 372 U.S. at 263, 83 S. Ct. 696*; *Evans v. S.S. Kresge Co., 544 F.2d 1184, 1191 (3d Cir. 1976)*, Cert. denied, *433 U.S. 908, 97 S. Ct. 2973, 53 L. Ed. 2d 1092 (1977)*. Examples of activity held to be Per se unlawful include price fixing, *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*, group boycotts, *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*, and horizontal divisions of markets. *Timken Roller Bearing Co. v.* ***[**22]*** *United States, 341 U.S. 593, 71 S. Ct. 971, 95 L. Ed. 1199 (1951)*.

The Court believes that this is not an appropriate case to apply a Per se rule. There has not been extensive judicial experience with exclusivity clauses in shopping center leases. There have been only a limited number of reported opinions dealing with such clauses. Most of those opinions involve rulings on preliminary motions, and do not contain a detailed economic evaluation of this type of activity. See *Harold Friedman Inc. v. Thorofare Markets Inc., supra, 587 F.2d at 141* & n. 56. Moreover, while the Federal Trade Commission, see, e.g., *Tysons Corner Regional Shopping Center, 85 F.T.C. 987, 1973-76* FTC Complaints & Orders P 20,933 (1975); Gimbels Brothers, Inc., 1973-76 FTC Complaints & Orders P 20,478 (1974), and at least one commentator, Note, The Antitrust Implications of Restrictive **[*676]** Covenants in Shopping Center Leases, 86 Harv.L.Rev. 1201 (1973), have taken the position that restrictive covenants in shopping center leases should be subject to the Per se doctrine, all courts considering this matter have indicated that a rule of reason approach should be applied. *Harold Friedman Inc. v. Thorofare **[**23]** Markets Inc., supra*; *Borman's, Inc. v. Great Scott Super Markets, Inc., 433 F. Supp. 343 (E.D.Mich.1975)*; Dart Drug Corp. v. Peoples Drug Stores, Inc., 1977-1 Trade Cases P 61,281 (D.D.C.1977); Pay Less Drug Stores Northwest, Inc. v. City Products Corp., supra. See also *Savon Gas Stations No. 6, Inc. v. Shell Oil Co., 309 F.2d 306 (4th Cir. 1962)*, Cert. denied, *372 U.S. 911, 83 S. Ct. 725, 9 L. Ed. 2d 719 (1963)*; *Dalmo Sales Co. v. Tysons Corner Regional Shopping Center, 308 F. Supp. 988, 995* (D.D.C.), *Aff'd, 139 U.S.App.D.C. 22, 429 F.2d 206 (1970)*.

The Court rejects plaintiff's suggestion that exclusivity clauses should be treated as veiled attempts at price fixing. [9.] ***HN11***[] A price fixing agreement is "a combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price of a commodity." *United States v. Socony-Vacuum, supra, 310 U.S. at 223, 60 S. Ct. at 844*. See also *United States v. Parke, Davis & Co., 362 U.S. 29, 47, 80 S. Ct. 503, 4 L. Ed. 2d 505 (1960)*; *United States v. Nu-Phonics, Inc., 433 F. Supp. 1006, 1011 (E.D.Mich.1977)*. The Per se rule will be applied even if the effect upon prices is indirect. *United States v. General **[**24]** Motors Corp., 384 U.S. 127, 147, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*; *Simpson v. Union Oil Co., 377 U.S. 13, 16-22, 84 S. Ct. 1051, 12 L. Ed. 2d 98 (1964)*. However, not all arrangements that have an impact on prices are Per se unlawful as price fixing combinations. *Broadcast Music, Inc. v. CBS, Inc., supra, 441 U.S. 1* at -- , *99 S. Ct. 1551*; L. Sullivan, Antitrust § 73 (1977). Here there is no indication that the purpose of the complained of conduct was to fix prices, and any effect, which this activity might have upon prices, will be merely incidental, and will depend upon the market power of DeWitt. Therefore, the Court is of the opinion that it would be inappropriate to treat an exclusivity clause as a Per se unlawful price fixing arrangement.

[25]** Moreover, the Court is unable to conclude that exclusivity clauses in shopping center leases are unreasonable in all possible circumstances. The competitive impact of such arrangements may vary considerably depending upon the availability of suitable alternate locations in the relevant market, and upon the strength of the remaining competition. In addition, there is a possible economic justification for a provision of this nature. In some situations, it may be necessary to include such a clause in a shopping center lease in order to attract to the center a certain type of store which might be unwilling to commit itself to a lease with high rentals if it knows that a competing store will be present in the center.

Also, the impact upon competitive conditions may differ depending upon the type of exclusivity clause involved. A provision that is to be enforceable for a set period of time or one that is to remain in effect until the shopping center expands (i. e., until an additional department store is added) does not necessarily have as great an effect upon competition as one not so limited in duration. Thus, the Court concludes that the validity of the exclusivity clause in DeWitt's **[**26]** lease with the landlord must be determined under the rule of reason rather than under a Per se approach. [10.]

[9.] In support of its argument that exclusivity clauses are, in essence, sophisticated attempts at price fixing, plaintiff relies upon State of Ohio ex rel. Brown v. Zayre of Ohio, Inc., 1974-2 Trade Cases P 75,232 (Ohio Ct.Comm.Pl.Cuyahoga Co.1974). This Court notes that while the decision in Zayre discussed federal precedents, it was actually based upon state ***antitrust law***.

[10.] ***HN12***[] An exclusivity clause in a shopping center lease is similar, in many respects, to an exclusive dealing arrangement between a manufacturer and a distributor since in both situations "a business entity in control of a product restrictively selects the parties to whom it will sell the commodity." *Harold Friedman Inc. v. Thorofare Markets Inc., supra, 587 F.2d at 142*. See also

[*677] It **[**27]** appears that the relevant product market in which the alleged anticompetitive conduct must be examined involves the retail sale of eyeglasses, contact lenses, and other optical devices along with the customer services pertaining thereto. However, there is disagreement among the parties concerning the relevant geographic market. Defendants contend that the geographic market is the Greater Syracuse Metropolitan Area while plaintiff argues that the relevant market is the vicinity of the Northern Lights Mall or the North Syracuse area. ***HN13***[] The geographic market, which is the area of effective competition, must correspond to commercial realities. *Brown Shoe Co. v. United States, 370 U.S. 294, 336, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. It has been characterized as the area "in which the seller operates, and to which the purchaser can practicably turn for supplies." *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 327, 81 S. Ct. 623, 628, 5 L. Ed. 2d 580 (1961)*. See also *Hudson Valley Asbestos Corp. v. Tougher Heating & Plumbing Co., supra, 510 F.2d at 1144 n. 2*; L. Sullivan, Supra, § 19. While the relevant geographic market is often the nation, it can, in an appropriate case, be as **[**28]** small as a city or even part of a city. *Lorain Journal Co. v. United States, 342 U.S. 143, 72 S. Ct. 181, 96 L. Ed. 162 (1951)* (City of Lorain), *William Goldman Theatres, Inc. v. Loew's, Inc., 150 F.2d 738 (3d Cir. 1945)* (Central theatre district of Philadelphia).

The Court concludes, on the basis of the present record, that the relevant geographic market is the northern part of the Greater Syracuse Metropolitan Area. This conclusion is supported by the testimony of Mr. Carter, Mr. Rosenberg, and Mr. DeWitt. Mr. Carter described the North Syracuse-Mattydale-Liverpool region as being the primary marketing area of the Northern Lights store; Mr. DeWitt characterized the same general vicinity as the drawing area for Northern Lights; and Mr. Rosenberg indicated that commercial properties in that area are in competition with Northern Lights for tenants.

The record now before the Court reveals that there are numerous commercial properties in the relevant geographic market which are suitable as alternate locations for a retail optical store. Several such properties were listed by Mr. Rosenberg in his testimony given at the hearing. The availability of such market alternatives is an important **[**29]** factor that supports a determination that the exclusivity clause here does not unreasonably restrain competition. See *Borman's, Inc. v. Great Scott Super Markets, Inc., supra, 433 F. Supp. at 351*. See also *Elder-Beerman Stores Corp. v. Federated Department Stores, Inc., 459 F.2d 138 (6th Cir. 1972)*. It is significant that in the only case in which an exclusivity clause in a shopping center lease was invalidated Pay Less Drug Stores Northwest, Inc. v. City Products Corp., supra the court found that alternate sites in the area were unavailable, and that a site within the shopping center in question was the only place from which the plaintiff could effectively compete in the market. This is not the case here.

Optivision contends that the restraint in question is an unreasonable one since the Northern Lights Shopping Center, from which plaintiff is being excluded, is an enclosed regional mall while the other commercial properties in the area (with the exception of Penn Can Mall where DeWitt already has a retail optical store) are strip shopping centers or plazas. However, there is not an adequate basis for the Court to compare accurately the alternate locations in question. While certain **[**30]** very basic information concerning the Northern Lights Shopping Center was received in evidence, there is no indication in the record of the size or configuration of the various strip **[*678]** centers or plazas in the relevant market area. Also, plaintiff has offered no proof concerning the amount of traffic passing by the Northern Lights regional mall in comparison to that passing by the strip centers and plazas or the amount of business which an optical store located in one of these strip centers or plazas has been able to generate in comparison to the amount of business done by a retail optical outlet located in Northern Lights. The only evidence in the record on this question is adverse to the plaintiff. Mr. DeWitt testified, based upon his experience with a store in the K-Mart Plaza, that a store in one of the strip centers in that area was exposed to the same volume of traffic as a store in the Northern Lights Mall. [11.] It is possible that, upon a trial on the merits, plaintiff will

---

Borman's, Inc. v. Great Scott Super Markets, Inc., supra, 433 F. Supp. at 351. Exclusive distributorships between manufacturers and sellers have generally been upheld by the courts under the rule of reason. b *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126 (2d Cir. 1978)*; *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F.2d 71 (9th Cir. 1969)*, Cert. denied, ***396 U.S. 1062, 90 S. Ct. 752, 24 L. Ed. 2d 755 (1970)***; *Bay City-Abrahams Bros., Inc. v. Estee Lauder, Inc., 375 F. Supp. 1206 (S.D.N.Y.1974)*.

be able to establish that a store in Northern Lights is exposed to a larger volume of traffic than a store in one of the strip centers or that the amount of business done by an optical store in **[**31]** Northern Lights is greater than that generated by a retail outlet in a strip center. However, this will not necessarily establish the unreasonableness of the restraint involved here. The extent of the disparity between the amount of traffic passing by or business done at the different locations will have to be considered.

Moreover, ***HN14***[] the exclusivity clause in DeWitt's lease will properly be regarded as an unreasonable restraint of trade only if this provision has an adverse impact on competitive conditions as they exist generally in the field of commerce in which plaintiff is engaged. *Gough v. Rossmoor Corp., supra, 585 F.2d at 386*. Thus, the significance of the competition eliminated must be viewed in the context of the total **[**32]** competition extant in the relevant market. *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 615, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*; *Associated Press v. United States, 326 U.S. 1, 27, 65 S. Ct. 1416, 89 L. Ed. 2013 (1945)* (Frankfurter, J., concurring); *American Motor Inns, Inc. v. Holiday Inns, Inc., supra, 521 F.2d at 1247*; 1 J. Von Kalinowski, Supra, § 6.02(4)(a).

According to Mr. DeWitt (and there is no evidence to the contrary), there are nine or ten retail optical stores competing in the northern part of the Greater Syracuse Metropolitan Area. [12.] In addition, Mr. Ransom acknowledged that the retail sale of optical goods is a highly competitive business. It seems doubtful to the Court, in view of the prevailing market conditions, that the elimination of one retail outlet would have a significant competitive impact. [13.] It has frequently been stated that the "antitrust laws . . . were enacted for "the protection of Competition, not Competitors ' . . . ." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977)* (Emphasis in original). See also *Gough v. Rossmoor Corp., supra, 585 F.2d at 386*; *Oreck Corp. v. Whirlpool **[**33]** Corp., 579 F.2d 126, 134 (2d Cir. 1978)*.

The type of exclusivity clause involved in this case should also be considered. The provision in question provides:

> Landlord agrees that after the date of execution of this lease, Landlord will not execute any new leases or renew any existing leases for any other **[**34]** optical store in the shopping center or mall, or any **[*679]** other adjacent building owned, operated or managed by Landlord, or any other such building owned or operated by Landlord situated within three blocks of the premises leased herein, except in the event that the shopping center is expanded to add a third department store, in which case one more optical store could be added, but Tenant shall have first right of refusal on the leasing of such additional store. Landlord states that he has not made or renewed any lease of any other optical store as of date of this agreement.

This clause does not exclude competition from the Northern Lights Mall under all circumstances since an additional optical store will be permitted if a third department store is added. However, the potential effect of this portion of the clause is limited by the fact that DeWitt is given the first right of refusal on the leasing of such additional store.

Another factor that should be considered is whether there is an economic justification for the exclusivity clause in his case. As previously noted, it is possible that high rentals in a regional mall such as Northern Lights would make it necessary **[**35]** for the landlord to provide a particular type of specialty store with an exclusivity provision in order to attract it as a tenant. Mr. DeWitt testified that he would not have entered into a lease for the rental of space in Northern Lights if he knew that another optical store would be present in the mall. He indicated that other

---

11. Mr. Ransom testified that the volume of traffic passing by Northern Lights was significant, but when asked by plaintiff's counsel to compare the amount of traffic going by Northern Lights with that on Route 11, he was unable to do so because of his lack of familiarity with the area.

12. There are perhaps thirty or more optical stores in the Greater Syracuse Metropolitan Area.

13. Of course, when a Per se violation of the Sherman Act has been established, the applicability of the antitrust laws is not affected by the fact that only one competitor has been eliminated, *Klor's, Inc. v. Broadway-Hale Stores, Inc., supra*, but the Court has previously indicated that a Per se Approach is not appropriate here. Also, it should be pointed out that Optivision is not being completely eliminated as a competitor. It has another retail outlet in the market area a small store adjacent to its factory in Liverpool. Moreover, Optivision has four other stores in the Greater Syracuse Metropolitan Area.

shopping centers provide optical stores with protection similar in nature to that provided by the clause in question here. [14.] On the other hand, it is not known whether any other specialty stores in Northern Lights have exclusivity provisions in their leases, [15.] although it appears that at least some of them do not, since the mall contains a number of shoe stores and several stores specializing in women's fashions. If an exclusivity provision is necessary to attract an optical store, such a clause has a beneficial impact on competition that will have to be considered along with any adverse competitive effects. On the basis of the present record, the Court is unwilling to reach a conclusion concerning the economic necessity for the exclusivity provision here. However, the fact that a particular restraint does not provide an affirmative benefit to competition **[**36]** does not necessarily mean that the activity violates *§ 1*, provided that the harm to competition is not significant. See *Gough v. Rossmoor Corp., supra, 585 F.2d at 389*.

The Court concludes that plaintiff has not shown a probability **[**37]** of successfully demonstrating, at a trial on the merits, that the exclusivity clause in DeWitt's lease violates *§ 1* of the Sherman Act. It is unlikely that Optivision will be able to establish the applicability of the Per se doctrine or be able to prove that the restraint in question violates the rule of reason. In finding that the complained of conduct is probably not an unreasonable restraint of trade, the Court places particular emphasis upon the facts that there are numerous alternate locations, which are suitable for a retail optical store, and that substantial competition remains in the relevant market despite the enforcement of this clause. The Court also questions whether plaintiff has raised sufficiently serious issues concerning the validity under *§ 1* of the present exclusivity clause to make them a fair ground for litigation, but it is unnecessary to decide definitely whether the issues raised are of such doubt and magnitude since (as will be discussed **[*680]** later) it is clear that the balance of hardships does not tip decidedly in plaintiff's favor.

D.

Optivision also alleges that the exclusivity clause in DeWitt's lease violates *§ 2* of the Sherman Act as a combination **[**38]** or conspiracy to monopolize trade or commerce.

HN15[] An essential element of a conspiracy to monopolize is proof of specific intent to monopolize the designated segment of commerce. *Bowen v. New York News, Inc., supra, 522 F.2d at 1258*; *Lewis v. Pennington, 400 F.2d 806, 811* (6th Cir.), Cert. denied, *393 U.S. 983, 89 S. Ct. 450, 21 L. Ed. 2d 444 (1968)*; L. Sullivan, Supra, § 49. The present record does not contain evidence from which the Court could find the existence of such a specific intent on part of the defendants. Of course, the requisite intent may be proved by circumstantial evidence in an appropriate case, 2 J. Von Kalinowski, Supra, § 9.02(5), but the Court does not believe that the existence of an agreement between the landlord and DeWitt to exclude other retail optical stores from one specific shopping center is sufficient, by itself, to show an intent to monopolize the relevant segment of commerce. [16.]

[39]** Moreover, there is no indication that defendants have the power to control the market for the retail sale of optical goods in the northern part of the Greater Syracuse Metropolitan Area, but, rather, there appears to be vigorous competition among a number of different competitors which have stores in that region. Of course, ***HN16***[] a claim of conspiracy to monopolize does not require a showing of power to exclude competition, *American Tobacco Co. v. United States, 328 U.S. 781, 789, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*, but the absence

---

[14.] Mr. DeWitt stated that other shopping centers will not put in a second optical store until there are two or three department stores. He said that his lease at Penn Can Mall does not contain an exclusivity clause, but does provide him with the first right of refusal if a second optical store is to be opened there. It is also noted that there is an exclusivity clause in Optivision's lease although Optivision states that, if it is allowed to remain at Northern Lights, it would not seek to enforce this provision.

[15.] Mr. Rosenberg testified that he was not aware of exclusivity clauses in any other leases at Northern Lights, but he also said that he was not responsible for negotiating provisions of that nature. Such negotiations are apparently conducted directly by the landlord.

[16.] In view of the vigorous competition in the relevant market and the lack of any other evidence of specific intent, the Court is also unwilling to infer specific intent on the part of DeWitt from the fact that DeWitt, in addition to securing an exclusivity clause in its Northern Lights lease, has received assurance of the first right of refusal on the leasing of a second optical store in Penn Can Mall.

of any serious likelihood of successfully achieving monopolization is evidence that can be used to support a finding of lack of specific intent. *Hudson Valley Asbestos Corp. v. Tougher Heating & Plumbing Co., supra, 510 F.2d at 1144*.

The Court concludes that, with respect to plaintiff's *§ 2* claim, [17.] Optivision has demonstrated neither a probability of success on the merits nor sufficiently serious questions going to the merits to make them a fair ground for litigation.

[40]** E.

Another claim asserted by Optivision is that the exclusivity clause in DeWitt's lease violates the New York State Donnelly Act. *New York General Business Law § 340*. [18.] The Donnelly Act was modeled after the Sherman Act, and, therefore, ***HN17***[] the mode of analysis utilized under the state statute is similar to that developed under the federal legislation. *State v. Mobil **[*681]** Oil Corp., 38 N.Y.2d 460, 463, 381 N.Y.S.2d 426, 428, 344 N.E.2d 357, 359 (1976)*; *Hsing Chow v. Union Central Life Insurance Co., 457 F. Supp. 1303, 1308 (E.D.N.Y.1978)*. Only those agreements which constitute unreasonable restraints of trade are prohibited under the *Donnelly Act. Dawn to Dusk, Ltd. v. Frank Brunckhorst Co., 23 A.D.2d 780, 258 N.Y.S.2d 746, 748 (2d Dept.1965)*; *Triple D & E, Inc. v. Van Buren, 72 Misc.2d 569, 339 N.Y.S.2d 821, 830 (S. Ct.Nassau Co.1972)*, *Aff'd, 42 A.D.2d 841, 346 N.Y.S.2d 737 (2d Dept.1973)*; *Big Toy Stores, Inc. v. Ardsley Toy Shoppe, Ltd., 64 Misc.2d 894, 315 N.Y.S.2d 897, 905 (S. Ct.Westchester Co.1970)*, *Aff'd, 36 A.D.2d 582, 318 N.Y.S.2d 924 (2d Dept.1971)*. In *Peoples Savings Bank v. County Dollar Corp., 43 A.D.2d 327, 351 N.Y.S.2d 157* (2d Dept.), *Aff'd, 35 N.Y.2d 836, 362 **[**41]** N.Y.S.2d 864, 321 N.E.2d 784 (1974)*, an exclusivity clause in a shopping center lease was upheld under the rule of reason. In doing so, the court emphasized the existence of alternate locations where the excluded merchant could do business:

> ***HN18***[] Not all agreements which restrain trade are proscribed by statute (General Business Law, *§ 340*). The **[**42]** test is whether the restraint is unreasonable (*Dawn to Dusk, Ltd. v. Brunckhorst Co., 23 A.D.2d 780, 258 N.Y.S.2d 746*). The City of Yonkers is the fourth largest city in the State of New York, with a population in excess of 200,000. The Cross County Shopping Center is but a small part of the City of Yonkers and there are many other locations within that city where Seamen's can locate a branch without violating the restrictive covenant in question. Indeed (and this was conceded on the argument of the appeal), there are sites on Central Avenue, only a short distance from the Cross County Shopping Center, but just outside of the restricted area, upon which Seamen's can locate a branch bank. Clearly, therefore, the covenant under review, limited as it is to the lessor's holdings in a small area, is a reasonable restriction.

[17.] From the wording of the *§ 2* claim in the Complaint, it is possible that plaintiff may be alleging that defendants' conduct constitutes attempted monopolization as well as a conspiracy to monopolize, but a letter sent by plaintiff's counsel to the Court after the hearing appears to disclaim this theory. In any event, the Court's discussion of the failure to establish proof of a conspiracy to monopolize shows that the two essential elements of an attempt to monopolize specific intent to build a monopoly and dangerous probability of success have not been demonstrated in this case. See *Buffalo Courier-Express, Inc. v. Buffalo Evening News, Inc., 601 F.2d 48*, (2d Cir. 1979); *Bowen v. New York News, Inc., supra, 522 F.2d at 1252 n. 7*.

[18.] The Court has pendent jurisdiction over this claim and the other causes of action arising under New York State law. While plaintiff has not made a sufficient showing on the merits to be entitled to preliminary injunctive relief on the federal antitrust claims, those claims are not properly characterized as wholly insubstantial or patently frivolous. Therefore, the federal causes of action form a sufficient basis upon which to predicate pendent jurisdiction over the state claims. See *Bell v. Hood, 327 U.S. 678, 682-83, 66 S. Ct. 773, 90 L. Ed. 939 (1946)*; *George C. Frey Ready-Mixed Concrete, Inc. v. Pine Hill Concrete Mix Corp., 554 F.2d 551, 554 n. 3 (2d Cir. 1977)*.

351 N.Y.S.2d at 161. With respect to the present case, it has been shown that there are numerous alternate sites for the location of a retail optical store in the relevant market area, and, therefore, the restraint in question would probably be regarded as a reasonable one under the Donnelly Act.

Thus, plaintiff has not established a probability of success **[**43]** on the merits with regard to its Donnelly Act claim, and it is questionable whether sufficiently serious issues going to the merits have been raised to make them a fair ground for litigation.

II.

In addition to arguing that the exclusivity clause in DeWitt's lease violates federal and state antitrust laws, Optivision maintains that, under controlling legal or equitable principles of New York State law, it should be regarded as having properly exercised the option to renew its Northern Lights lease for the five-year period following February 28, 1979.

HN19[] Under New York law, notice exercising an option is legally effective only if given within the specified time and in the designated manner. *J.N.A. Realty Corp. v. Cross Bay Chelsea, Inc., 42 N.Y.2d 392, 396, 397 N.Y.S.2d 958, 960, 366 N.E.2d 1313, 1315 (1977)*; *Sy Jack Realty Co. v. Pergament Syosset Corp., 27 N.Y.2d 449, 452, 318 N.Y.S.2d 720, 721, 267 N.E.2d 462, 463 (1971)*; *Goldberg v. Himlyn, 121 Misc. 580, 201 N.Y.S. 837, 841 (Kings Co.Ct.1923)*; 34 N.Y.Jur., Landlord and Tenant § 419 (1964); 1A Corbin on Contracts § 264 (1963). However, the New York courts will relieve a tenant from the forfeiture of a valuable leasehold resulting **[**44]** from the tenant's failure to exercise his renewal option in a timely manner if his failure to do so was the result of an honest mistake or similar excusable fault, provided that the landlord will not be prejudiced by the late renewal. *Sy Jack Realty Co. v. Pergament Syosset Corp., supra*; *Jones v. Gianferante, 305 N.Y. 135, 111 N.E.2d 419 (1953)*; *Rizzo v. Morrison Motors, Inc., 29 A.D.2d 912, 289 N.Y.S.2d 903 (4th Dept.1968)*; *Gallagher v. Marconi, 68 Misc.2d 319, 326 N.Y.S.2d 697 (Dist.Ct.Suffolk Co.1971)*; *Gordon v. Barash, 67 Misc.2d 764* ***[*682]*** *325 N.Y.S.2d 213 (Civil Ct.N.Y.C.1971)*. This doctrine has been applied where the failure to renew by the designated date was due to an ambiguity in the lease, *Jones v. Gianferante, supra*; *Rizzo v. Morrison Motors, Inc., supra*; *Ringelheim v. Karsch, 112 N.Y.S.2d 130 (S. Ct.Kings Co.1952)*; *Application of Topp, 81 N.Y.S.2d 344 (S. Ct.Queens Co.1948)*, or was due to the tenant's reliance upon the actions of a third party. *Sy Jack Realty Co. v. Pergament Syosset Corp., supra* (reliance upon the United States Postal Service to deliver mail); *Eva Donut Shop, Inc. v. Pace, 54 A.D.2d 575, 387 N.Y.S.2d 139 (2d Dept.1976)* (reliance upon assignor to renew **[**45]** the lease). In *J.N.A. Realty Corp. v. Cross Bay Chelsea, Inc., supra*, the New York Court of Appeals extended this principle to a situation where the failure to make a timely renewal was due to the tenant's own negligence or inadvertence. See also *Blake Service Center v. J.C.R. Realty Corp., 59 A.D.2d 931, 399 N.Y.S.2d 444 (2d Dept.1977)*; *George W. Millar & Co. v. Wolf Sales & Service Corp., 65 Misc.2d 585, 318 N.Y.S.2d 24 (Civil Ct.N.Y.C.1971)*.

In addition, the New York courts have found, in appropriate circumstances, that a landlord had waived strict compliance with the notice requirements of a renewal option or was equitably estopped from mandating strict adherence to the terms of such a provision. *Modlin v. Town & Country Tux, Inc., 42 A.D.2d 586, 344 N.Y.S.2d 703 (2d Dept.1973)*; *Adelman v. Applefield, 22 Misc.2d 95, 203 N.Y.S.2d 602 (Mun.Ct.N.Y.C.1959)*.

The evidence received in the present case establishes that Optivision did not provide notice of the exercise of its renewal option to Syracuse Associates at 17 Court Street, Buffalo, New York either in person or by certified mail prior to August 31, 1978. Thus, it is clear that notice has not been given in accordance with the **[**46]** terms of the lease between Optivision and Syracuse Associates.

However, a more detailed consideration of the evidence is necessary to determine whether there is an equitable basis for finding that Optivision has properly renewed its lease. Sharply conflicting testimony was received on certain crucial questions, and, therefore, the resolution of this matter requires the Court to make a careful assessment of the witnesses' credibility.

In early August, 1978, Mr. Ransom and Mr. Carter met with Mr. Rosenberg in a trailer, used by Mr. Rosenberg as an office at the Northern Lights Shopping Center, to discuss the options available to Optivision for leasing space at Northern Lights. Mr. Ransom and Mr. Carter both testified that Mr. Ransom informed Mr. Rosenberg, at that time, of

Optivision's decision to exercise the renewal provision of its lease, and thereby keep its store location in the mall. Mr. Ransom further said, that shortly after the meeting, he sent a letter to Mr. Rosenberg, confirming the substance of the conversation. Defendants dispute plaintiff's account of what was said at the early August meeting. Mr. Rosenberg testified that he was not informed, at that time, of a decision **[**47]** by Optivision, but, rather, was told by the Optivision representatives that they would get back to him later. Also, Mr. Rosenberg denied receiving any letters concerning exercise of the renewal option by Optivision.

After carefully considering all the testimony, as well as the documentary evidence before it, the Court concludes, for purposes of the present proceeding, that Mr. Rosenberg's account of the August meeting was essentially correct, and that the Optivision representatives did not tell Mr. Rosenberg, at that time, that they intended to exercise the renewal option. In particular, the Court notes that this conclusion is supported by the language used in the letter written by Mr. Ransom after the August meeting. The letter, dated August 15, 1978, states, in pertinent part:

> Thanks for the discussion with us of our options regarding our space in Northern Lights. We have decided to renew our lease and remain where we are. I think you will be pleased with the total renovation of our store that we plan.
>
> Please, therefore, consider this letter notice of our formal renewal of our lease **[*683]** in the Northern Lights Shopping Center for a period of five years, commencing **[**48]** at the expiration of the initial term of our lease, February 28, 1979.

The foregoing language suggests that Optivision intended to inform the landlord of its decision to exercise the renewal option by means of that letter, and that it was not merely confirming a decision it had previously informed the landlord of.

The Court also observes that, immediately after the meeting with Mr. Rosenberg, Mr. Carter and Mr. Ransom (while riding in an automobile) had a discussion concerning the alternate courses of action which were open to Optivision, and it is likely that a decision with respect to the exercise of the renewal option was not made prior to this conversation.

The parties have argued, at considerable length, as to whether plaintiff has adequately proven whether the August 15, 1978 letter, signed by Mr. Ransom, was actually mailed. However, the Court feels that, in the present posture of this case, it is unnecessary to resolve that question. [19] The Court finds that, even if the letter was mailed, it was not received by either Mr. Rosenberg or by Syracuse Associates. The letter was addressed:

[49]**

> Mr. Irving Rosenberg
> Syracuse Shopping Center Associates
> Northern Lights Shopping Center
> North Syracuse, NY 13202

This address is improper. While the management of Northern Lights regularly receives mail at its offices in the shopping center, such mail is addressed to International Business & Realty Corporation or simply to Northern Lights Shopping Center rather than to Syracuse Shopping Center Associates. As previously indicated, Syracuse Associates have their offices at 17 Court Street, Buffalo, New York. Also, the proper zip code for the Northern Lights Mall was not used in the above address, and Mr. Ransom acknowledged that it was quite possible that there was no return address on the envelope. Of course, there is no presumption that an incorrectly addressed letter was duly received, cf. *Nassau Insurance Co. v. Murray, 46 N.Y.2d 828, 414 N.Y.S.2d 117, 386 N.E.2d 1085 (1978)*, and the Court accepts Mr. Rosenberg's testimony that the letter signed by Mr. Ransom was not received by himself or by Syracuse Associates.

The Court concludes that the landlord did not receive notice (oral or written) of Optivision's intention to exercise the option in its lease until October, **[**50]** 1978. Evidently, Optivision became aware of the exclusivity clause in

---

[19] At the time of the hearing, the Court reserved decision on the admissibility of Mr. Ransom's letter of August 15, 1978. The Court now rules that the letter is admissible to establish the propositions discussed in the text.

DeWitt's lease sometime during the fall of 1978, and then decided to find out if anything was wrong with the purported renewal of its own lease. Optivision representatives contacted Mr. Rosenberg in October, 1978, concerning this matter, [20] and were advised by Mr. Rosenberg that he had not received a letter from them, and were told to contact Mr. Weinstein in Buffalo. For purposes of deciding the present motion, it is particularly significant that the landlord did not receive notice of Optivision's decision to renew its lease until after the signing of the lease between the landlord and DeWitt on September 6, 1978 which was also after the August 31, 1978 contractual deadline. The Court finds that the landlord entered into the arrangement with DeWitt in the good faith belief that Optivision had not exercised its option. While the negotiations with Mr. DeWitt, for the rental space in Northern Lights, began before August 31, 1978, the terms of the lease, including the exclusivity clause, were not agreed upon until after that date. It appears that the landlord would be liable in damages to DeWitt for breach of the exclusivity **[**51]** clause if Optivision is allowed to remain **[*684]** in Northern Lights. [21] Hence, the landlord changed its position before learning of Optivision's decision on renewal. Because of the prejudice, which the landlord would suffer by giving effect to Optivision's late renewal, this case is distinguishable from the previously cited cases in which the New York courts granted equitable relief to tenants who exercised options to renew in an untimely manner.

Contrary to the suggestion made by Optivision, the landlord was under no duty to advise the tenant that the time for exercising the renewal provision **[**52]** had passed. In certain limited circumstances (i. e., when renewal is automatic, *New York Gen.Oblig.L. § 5-905*), a landlord is required to advise a tenant of the contents of a renewal clause, but the Court is not aware of any statutory provision that is applicable here. The principle that ***HN20***[] a landlord is not required to give notice to a tenant of the renewal clause in its lease is supported by the New York Court of Appeals' decision in *J.N.A. Realty Corp. v. Cross Bay Chelsea, Inc., supra.* In that case, the landlord, throughout the term of the leasehold, regularly informed the tenant of its obligations under the lease, but did not advise it of the time limitation on the exercise of the renewal option. Nonetheless, the court, in remanding the case for a new trial, said that the tenant would not be entitled to relief if the landlord, relying on the agreement had, in good faith, made other commitments before receiving notice from the tenant of its decision on renewal.

Moreover, there is no basis for finding a waiver or an estoppel under the facts appearing in the present record. The Court determines that the landlord did not take any actions which would show that it did not expect strict **[**53]** compliance with the requirements of the renewal provision nor did it take any actions that should have caused Optivision to believe that its lease had been properly renewed. The record reveals that a letter, dated September 28, 1978, was sent by Mr. Rosenberg to Optivision, concerning the Shopping Center's "Mall Sign Criteria" that were to be followed in the installation of exterior signs, but this was a form letter sent to all tenants at Northern Lights, and in any event, Optivision did not take any action in reliance upon it. Prior to receipt of the "Mall Sign Criteria" letter, Optivision entered into a contract with the Garfield Construction Company for the making of permanent renovations to its Northern Lights store, but it failed to obtain the landlord's approval for the making of such improvements, as is required by terms of the lease between Optivision and Syracuse Associates.

Accordingly, the Court concludes that plaintiff has failed to demonstrate a probability of success on the merits with respect to its claim that it should be regarded as having properly exercised its renewal option under legal or equitable principles of New York law. However, because of the difficult credibility **[**54]** questions involved, the Court does find that Optivision has raised sufficiently serious questions going to the merits to make them a fair ground for litigation.

III.

Plaintiff also asserts a cause of action for alleged tortious interference by DeWitt with the contractual relations between Optivision and Syracuse Associates. ***HN21***[] An action for tortious interference with a party's contractual

---

[20] There is a conflict in the testimony as to whether the contact in October, 1978 between Optivision representatives and Mr. Rosenberg was in person or by telephone, but it is unnecessary to resolve this conflict.

[21] This is based upon the assumption that the exclusivity clause itself is valid. If the provision were found to be invalid, DeWitt presumably would not be able to collect any damages for its breach.

relations will lie only if there is a valid contract between the plaintiff and another; the defendant has knowledge of the contract; the defendant intentionally procures the breach of that contract; and damages are suffered. *Israel v. Wood Dolson Co., 1 N.Y.2d 116, 120, 151 N.Y.S.2d 1, 5, 134 N.E.2d 97, 99 (1956)*; *Bryce v. Wilde, 39 A.D.2d 291, 333 N.Y.S.2d 614, 616* (3d Dept.), *Aff'd, 31 N.Y.2d 882, 340 N.Y.S.2d 185, 292 N.E.2d 320 (1972)*; *Welch v. Campbell, 197 Misc. 165, 94 N.Y.S.2d 860, 864 (S. Ct.Otsego Co.1950)*, *Aff'd, 278 App.Div. 605* **[*685]** *102 N.Y.S.2d 51 (3d Dept.1951)*. On the other hand, interference with pre-contractual relations is actionable where a contract would have been entered into had it not been for the malicious, fraudulent, or deceitful actions of a third party. *A. S. Rampell,* ***[**55]*** *Inc. v. Hyster Co., 3 N.Y.2d 369, 376, 165 N.Y.S.2d 475, 481, 144 N.E.2d 371, 375 (1957)*; *Susskind v. Ipco Hospital Supply Corp., 49 A.D.2d 915, 373 N.Y.S.2d 627, 629 (2d Dept.1975)*; *Franklin Enterprises Corp. v. King Refrigerator Corp., 207 Misc. 956, 141 N.Y.S.2d 734, 736 (S. Ct.Queens Co.1955)*. The "would have been entered into" standard is a strict one as it is more stringent than "being reasonably certain" or "having a reasonable expectation." *Union Car Advertising Co. v. Collier, 263 N.Y. 386, 401, 189 N.E. 463, 469-70 (1934)*; *DeSantis v. City of Troy, 83 Misc.2d 195, 371 N.Y.S.2d 310, 316 (S. Ct.Rensselaer Co.1975)*.

The evidence considered earlier shows that plaintiff did not properly exercise its renewal option, and, therefore, there does not exist a valid lease agreement between Optivision and the Syracuse Associates for the five-year period after February 29, 1979. Since there is not a valid contract in existence, a claim for tortious interference with contractual relations is not viable. Even if a valid lease renewal had been effected, there is no showing that DeWitt had knowledge of that. In addition, a claim for tortious interference with pre-contractual relations will **[**56]** not lie since there is no showing that DeWitt engaged in malicious, fraudulent, or deceitful actions. Rather, it appears that DeWitt had a legitimate business motivation in seeking an exclusivity clause. Also, it is questionable whether the contract (new lease agreement) would necessarily have been entered into if it had not been for DeWitt's actions in negotiating an exclusivity clause. While the record shows that the landlord would have evidently been willing to negotiate with Optivision concerning a new lease agreement if the exclusivity provision had not been included in DeWitt's lease, it is not absolutely clear that the negotiations would have been successfully concluded since a new rental amount would have to have been agreed upon. [22.]

[57]** The Court concludes that, with respect to a claim for tortious interference with contractual or pre-contractual relations, plaintiff has not established either a probability of success on the merits or sufficiently serious questions going to the merits to make them a fair ground for litigation.

IV.

The Court has found that plaintiff has not demonstrated a probability of success on any of the causes of action it has asserted, but even if a likelihood of success were shown on one or more claims, Optivision's motion for a preliminary injunction would have to be denied because of its failure to demonstrate irreparable harm. Optivision's principal claim of harm is that it will lose a valuable business asset the location of its Northern Lights store and the good will of the customers who patronize that retail outlet. However, this claim is essentially one for lost profits. It appears that, if plaintiff prevails at trial, it will be possible to compute, with a reasonable degree of certainty, the damages it will suffer. In fact, at the hearing, Mr. Ransom was able to predict the approximate annual dollar volume of sales that Optivision would expect to receive under the conditions then prevailing **[**58]** at the Northern Lights Shopping Center. ***HN22***[] The ability to compute monetary damages establishes that the harm which plaintiff would suffer is not irreparable in nature. *Jackson Dairy, Inc. v. H. P. Hood & Sons, Inc., 596 F.2d 70, at 72 (2d Cir. 1979)*; *Triebwasser & Katz v. American* ***[*686]*** *Telephone & Telegraph Co., 535 F.2d 1356, 1359-60 (2d Cir. 1976)*; *SCM Corp. v. Xerox Corp., supra, 507 F.2d at 363*; *American Brands, Inc. v. Playgirl, Inc., 498 F.2d 947, 949-50 (2d Cir. 1974)*.

[22.] The causation requirement for tortious interference with pre-contractual relations appears to be more stringent than the causation requirement under the antitrust laws. See section I.A. of the text Supra. Thus, it is quite possible that there might be a sufficient causal relationship between the activity in question and the asserted injury to establish antitrust standing even though there is not a sufficient degree of certainty that plaintiff would have received the contract to establish the tort of intentionally interfering with pre-contractual relations.

HN23[] A threat that a party will be driven out of business if a preliminary injunction is not granted may constitute irreparable harm, *John B. Hull, Inc. v. Waterbury Petroleum Products, Inc., 588 F.2d 24, 28-29 (2d Cir. 1978)*; *Semmes Motors, Inc. v. Ford Motor Co., 429 F.2d 1197, 1205 (2d Cir. 1970)*, but there is no evidence that the plaintiff here would suffer such consequences. In addition to its Northern Lights store, Optivision has a number of other retail outlets in New York State and Georgia. The continued operation of Optivision as a corporate entity does not appear to be threatened.

Also, *HN24*[] loss of customer good will may constitute irreparable harm where a distributor is deprived totally of the opportunity **[**59]** to sell an entire line of merchandise, *John B. Hull, Inc. v. Waterbury Petroleum Products, Inc., supra, 588 F.2d at 29*; *Jacobson & Co. v. Armstrong Cork Co., supra, 548 F.2d at 444-45*; *Interphoto Corp. v. Minolta Corp., 417 F.2d 621, 622 (2d Cir. 1969)*, but that is not the situation here. Optivision will continue to be able to provide its customers with a full line of optical goods at locations other than the Northern Lights Shopping Center.

As previously indicated, plaintiff has shown, with respect to at least one of its causes of action, sufficiently serious questions going to the merits to make them a fair ground for litigation. However, because of its failure to demonstrate irreparable harm, plaintiff has failed to satisfy the second test of the Second Circuit preliminary injunction standard as well as the first. See *State of New York v. Nuclear Regulatory Commission, supra, 550 F.2d at 750*; *Triebwasser & Katz v. American Telephone & Telegraph Co., supra, 535 F.2d at 1359*. The second test is not satisfied here for the further reason that the balance of hardships does not tip decidedly in plaintiff's favor. If a preliminary injunction is not granted, Optivision will suffer a loss **[**60]** of profits by not being able to do business in the Northern Lights Shopping Center and will have to pay a small amount of damages to the Garfield Construction Company, [23.] but if a preliminary injunction is granted, the Syracuse Associates will lose the higher rentals that could be obtained by leasing Optivision's store site to another tenant and will lose the opportunity to obtain a different kind of tenant (perhaps a type of store not already represented in the mall) who might make the shopping center a more attractive place to shop. Also, the granting of an injunction will cause DeWitt to experience lost sales and correspondingly, lost profits. [24.] **[**61]** It cannot be said that the balance tips sharply in plaintiff's favor. [25.]

Accordingly, plaintiff's motion for a preliminary injunction is denied.

It is so ordered.

End of Document

---

23. The contract with Garfield Construction Company is for $ 17,502, of which $ 2,000 constitutes a down payment and $ 5,000 represents work already commenced. Thus, Optivision's liability to Garfield will be $ 7,000 plus the construction company's profit margin.

24. The landlord would probably be liable to DeWitt for such lost profits if the validity of the exclusivity clause were upheld and an injunction were issued solely on the state law claims.

25. Defendants contend that since Optivision's lease, as well as the one to which DeWitt is a party, contains an exclusivity clause, the doctrines of unclean hands and In pari delicto require the motion for a preliminary injunction to be denied. It is unnecessary to consider the extent to which these doctrines might be relevant to a motion for preliminary injunctive relief since the Court has determined that an exclusivity clause, in the circumstances presented here, is probably not unlawful.

HN3[] **Regulated Practices, Trade Practices & Unfair Competition**

A New York common law tort claim of unfair competition and unfair trade practices contemplates some type of commercial misappropriation or misrepresentation.

Counsel: **[*1]** For plaintiff: Baron & Vesel (Edward Vesel, of counsel), Forest Hills, N.Y. For defendants: Rosenman Colin Freun Lewis & Cohen (Gilbert S. Edelson and Jeffrey L. Braun, of counsel), New York, N.Y.

Opinion by: NICKERSON

Opinion

Memorandum and Order

NICKERSON, D.J.: Plaintiff, a jobber of coconut products, brought this suit under *15 U.S.C. § 15*, alleging that commencing in May 1972 defendants conspired to boycott plaintiff with intent to damage its business and drive it out of the competitive market by refusing to sell it desiccated, sweetened and toasted coconut in violation of *Section 1* of the Sherman Act (*15 U.S.C. § 1*). The complaint also alleges that defendant's conduct violated the Donnelly Act (*New York General Business Law § 340*) and constituted unfair trade practices and unfair competition.

The defendants are: Sun-Ripe Coconut Products, Inc. ("Sun-R9p5/Manila"), a family owned and operated Philippine corporation which processes and exports coconut products; Sun-Ripe Coconut Corporation ("Sun-Ripe/New Jersey"), a New Jersey corporation which is owned and operated largely by the same family and imports and sells the products exported by the Philippine corporation; Francisco **[*2]** Chua, a resident of the Philippines, who is the president and chief operating officer and a director and shareholder of both corporate defendants; and McKee Lau, a New York resident, who is treasurer of Sun-Ripe/New Jersey and was, until December 1977, a director of that corporation.

Defendants have moved for summary judgment. They say that they are all part of one entity and that as a matter of law they could not have entered into a "contract, combination, or conspiracy"within the meaning of *Section 1* of the Sherman Act. They also claim that in any event plaintiff has neither alle7ed nor can show the unreasonable impact on competition required under the "rule of reason" said to be applicable in this case. Defendants assert that the same considerations apply with respect to the Donnelly Act claim, and that plaintiff's common law tort claims of unfair trade practices and unfair competition are insufficient since they do not allege commercial misappropriation.

Section 1 of the Sherman Act provides, in pertinent part, that ***HN1***[] "[every] contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign **[*3]** nations, is declared to be illegal." The individual defendants are officers of the corporated defendants and cannot conspire under the Sherman Act with the corporations of which they are officers. *Nelson Radio & Supply Co. v. Motorola, Inc., 200 F.2d 911 (5th Cir. 1952)* cert. denied *345 U.S. 925 (1953)*; *Person v. New York Post Corp., 427 F.Supp. 1297 (E.D.N.Y. 1977)*. Thus Chua and Lau, who were officers of Sun Ripe/New Jersey at the time of the alleged boycott, to the extent they both acted on behalf of that corporation cannot be held as conspirators between themselves or with the corporation. But acting in their official capacities on behalf of one of the corporate defendants they can conspire with another corporation.

Defendants say that the two corporate defendants could not have conspired because, for purposes of the Sherman Act, Sun-Ripe/New Jersey and Sun-Ripe/Manila constitute essentially a single economic entity. See, e.g., *Harvey v. Fearless Farris Wholesale, Inc., 589 F.2d 451 (9th Cir. 1979)*; *Knutson v. Daily Review, Inc., 548 F.2d 795 (9th Cir. 1976)*. Defendants claim that the two corporations are owned and managed by the same family, do not compete with each other, and are part of a single enterprise which produces coconut in the **[*4]** Philippines and sells it here. An affidavit of Arthur Kesselhart, former vice-president of Sun-Ripe/New Jersey, states that from the beginning the New Jersey corporation was always viewed as the sales arm or agency of the Manila corporation and that all of the policies of the New Jersey corporation were controlled and governed by the Manila corporation, specifically by Francisco Chua who was president of both corporations. corporations is owned by a single individual. Compare *Harvey v. Fearless Farris Wholesale, Inc., supra.* While 90% of the stock of each corporation is owned in the same proportions by Francisco Chua, his son Joseph, his brothers Antonio and Gabriel, and Gabriel's wife Josephine, the remaining 10% of Sun-Ripe/New Jersey by Francisco Chua's sister Mary Chua. There are thus differing economic interests among the shareholders of the two corporations. Some members of the two boards of directors are different.

Defendants acknowledge that Sun-Ripe/Manila does from time to time make sales of its desiccated coconut to American purchasers other than Sun-Ripe/New Jeresey. Similarly, Sun-Ripe/New Jersey occasionally purchases coconut from suppliers other than Sun-Ripe/Manila.

[*5] On this record the court cannot find that the two corporate defendants constitute a single economic entity incapable of violating the Sherman Act. Having availed themselves of the privilege of doing business through separate corporations, the defendants must also bear the attendant liabilities. *Perma Life Mufflers, Inc. v. International Parts Corp., 392 U.S. 134, 88 S.Ct. 1981 (1968)*.

Defendants argue that, even if there were a conspiracy cognizable under the Sherman Act, the boycott alleged would not have been illegal per se because the relationship between the alleged corporate conspirators is vertical not horizontal, and that, if the "rule of reason" is applied in assessing the alleged refusal to deal, there is no Sherman Act claim because plaintiff has not shown an unreasonable impact on competition.

Defendants say that Sun-Ripe/Manila is the smallest Philippine coconut exporter and Sun-Ripe/New Jersey is the smallest United States importer selling mainly to end-users of coconut. In addition, defendants maintain that Sun-Ripe/New Jersey supplied less than 5% of plaintiff's purchases prior to the alleged refusal to deal and that alternate suppliers of coconut were readily **[*6]** available to plaintiff, which was able to increase its coconut purchases by more than 400% during the period of the alleged boycott.

Plaintiff argues that increased dollar figures of plaintiff's purchases merely reflect the more than three-fold increase in coconut prices during the period in question. Plaintiff also asserts that the other five importer-distributors do not have excess stocks of coconut available for sale and do not offer a realistic alternative source of supply for plaintiff.

Thus, even assuming arguendo that the "rule of reason" applies, there are triable issues of fact as to the impact on competition of defendants' actions. Summary judgment on the Sherman Act claim is thus denied.

The same is true with regard to the Donnelly Act claim. The act provides, in pertinent part, that

HN2[] Every contract, agreement, arrangement, or combination whereby

* * *

Competition or the free exercise of any activity in the conduct of any business, trade or commerce or in the furnishing of any service in this state is or may be restrained

* * *

is hereby declared to be against public policy, illegal and void. (*N.Y. Gen. Bus. Law § 340*)

The Donnelly Act is modelled **[*7]** after the Sherman Act, and both acts are addressed to similar kinds of activities. For the reasons given for denial of summary judgment on plaintiff's Sherman Act claim, summary judgment is denied as to the Donnelly Act claim.

HN3[] A New York common law tort claim of unfair competition and unfair trade practices contemplates some type of commercial misappropriation. See, e.g., *Dior v. Milton, 155 N.Y.S.2d 443 (1st Dept. 1956)* (unfair competition); *Findlay v. Findlay, 18 N.Y.2d 12*; *271 N.Y.S.2d 652 (1966)* (unfair trade practices). misappropriation, or misrepresentation. Plaintiff's allegations of a refusal to sell do not involve this type of deception or misappropriation and are insufficient to sustain a claim under New York law.

Defendants' motion for summary judgment is granted with respect to the claims of unfair competition and unfair trade practices but denied in all other respects. So ordered.

End of Document

Arizona v. Maricopa County Medical Soc.

United States District Court for the District of Arizona.

June 5, 1979.

No. CIV-78-800 PHX WPC.

Reporter

1979 U.S. Dist. LEXIS 11918 *; 1979-1 Trade Cas. (CCH) P62,694

State of Arizona v. Maricopa County Medical Society, Maricopa Foundation for Medical Care, Pima County Medical Society, and Pima Foundation for Medical Care.

Core Terms

professions, rule of reason, Sherman Act, antitrust, anti trust law, subject-matter, policyholders, underwriting, maximum, interstate commerce, state line, plans, insurance business, per se rule, practices, partial summary judgment, participating, exemption, spread, insurance company, price-fixing, premiums

LexisNexis® Headnotes

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

HN1[] **Scope, Exemptions**

The McCarran-Ferguson Act exempts from the Sherman Act that conduct which constitutes the business of insurance and which is regulated by state law. *15 U.S.C.S. § 1011 et seq* . To be within the McCarran-Ferguson Act exemption, the conduct must involve the underwriting or spreading of a risk.

Antitrust & Trade Law > Procedural Matters > Jurisdiction > General Overview

Constitutional Law > ... > Commerce Clause > Interstate Commerce > Prohibition of Commerce

Transportation Law > Interstate Commerce > Federal Powers

HN2[] **Procedural Matters, Jurisdiction**

Subject-matter jurisdiction under federal ***antitrust law*** is co-extensive with the Congressional power under the Constitution to regulate interstate commerce. Whether a court has subject-matter jurisdiction over the complaint depends on whether the acts allegedly restrained by the acts complained of occur in the flow of commerce, or whether those acts, although local, substantially affect interstate commerce.

Antitrust & Trade Law > Procedural Matters > Jurisdiction > General Overview

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > Antitrust Regulations

Transportation Law > Interstate Commerce > Definition of Commerce

Insurance Law > Industry Practices > Federal Regulations > General Overview

HN3[] **Procedural Matters, Jurisdiction**

Interstate insurance transactions fall within the definition of interstate commerce as that term is applied pursuant to federal antitrust regulation, and if it is interstate commerce that feels the pinch, it does not matter how local the operation which applies the squeeze.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Civil Procedure > Judgments > Summary Judgment > Partial Summary Judgment

HN4[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

Although the question of subject-matter jurisdiction is normally addressed by a motion to dismiss and a finding of lack of subject-matter jurisdiction requires dismissal, finding jurisdiction does not preclude entering partial summary judgment on that issue.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN5[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Price-fixing has for some time been viewed as per se unlawful. Under the per se approach, there is no inquiry into whether the challenged practice actually has an anticompetitive effect. The per se rule has been applied to fixing maximum prices as well as minimum prices.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN6[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Under the Rule of Reason approach, an inquiry is made to determine whether the purpose or effect of the practice in question would significantly hamper competition. Although the per se approach avoids inquiry into difficult economic issues, a recent antitrust trend appears to be emerging where the Rule of Reason is the preferred method of determining whether a particular practice is in violation of the ***antitrust law***.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

A court will no longer have to wear per se blinders in passing upon the many business restrictions which do have "redeeming virtues" and may actually help to promote competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] Antitrust & Trade Law, Sherman Act

The professions differ fundamentally from ordinary commercial businesses and, consequently, merit more liberal treatment under the antitrust laws. The essence of the concept of "profession" is the power to self-regulate and to promote standards of practice that benefit the public at large as well as the individual practitioners. The United States Supreme Court has recognized the distinction between a purely commercial business and a profession. The fact that a restraint operates upon a profession as distinguished from a business is, of course, relevant in determining whether that particular restraint violates the Sherman Act. The public service aspect, and other features of the professions, may require that a particular practice, which could be properly viewed as a violation of the Sherman Act in another context, be treated differently. Conduct of professions allegedly in violation of the antitrust laws may be subjected to a Rule of Reason analysis. Certain practices by members of a learned profession might survive scrutiny under the Rule of Reason even though they would be viewed as a violation of the Sherman Act in another context.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN9[] Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason

To survive a Sherman Act challenge a particular practice, rule, or regulation of a profession, whether rooted in tradition or the pronouncements of its organizations, must serve the purpose for which the profession exists, viz. to serve the public. That is, it must contribute directly to improving service to the public. Those which only suppress competition between practitioners will fail to survive the challenge.

Counsel: [*1] For plaintiff: Kenneth R. Reed, Chief Counsel, Antitrust Div., Patricia A. Metzger, Asst. Atty. Gen., Antitrust Div., Phoenix, Ariz. For defendants: Daniel J. McAuliffe, of Snell & Wilmer, Phoenix, Ariz., for Maricopa County Medical Society; Jennifer Beaver and Philip P. Berelson, of Brown & Bain, Phoenix, Ariz., for Maricopa Foundation for Medical Care; Robert O. Lesher, of Lesher, Kimble & Rucker, P.C., Tucson, Ariz., for Pima County Medical Society and Pima Foundation for Medical Care.

Opinion by: COPPLE

Opinion

Memorandum and Order

COPPLE, D.J.: The State of Arizona has charged the Maricopa County Medical Society, Maricopa Foundation for Medical Care, Pima County Medical Society and Pima Foundation for Medical Care with violations of *section 1* of the Sherman Act, *15 U.S.C. § 1*, and the Arizona Uniform State Antitrust Act, *A.R.S. §§ 44-1401 et seq.* Arizona, in particular, asserts that the defendants have combined and conspired with others to fix, raise and maintain prices charged by doctors, and to establish and maintain systems for determining prices charged by doctors which include establishing and maintaining relative value schedules and conversion factors. Maricopa Foundation **[*2]** for Medical Care and Pima Foundation for Medical Care are associations of doctors. The foundations approve and administer insurance plans underwritten by private insurers. The foundation-approved insurance plans allegedly offer an alternative to health maintenance organizations.

It is undisputed that the foundations set the maximum amount to be paid physicians who agree to provide services to patients who are enrolled in insurance plans approved by the foundations. It is further undisputed that the doctors who agree to participate in the foundation-approved plans are free to set the prices they charge their patients.

Maricopa Foundation has moved to dismiss the complaint for failure to state a claim, arguing that any conduct that would otherwise constitute an antitrust violation is exempt from antitrust liability by virtue of the McCarran-Ferguson Act, *15 U.S.C. § 1012*. Arizona has moved for partial summary judgment determinations as to subject-matter jurisdiction and liability.

HN1[] The McCarran-Ferguson Act exempts from the Sherman Act that conduct which constitutes the business of insurance and which is regulated by state law. See *15 U.S.C. § 1011 et seq* . The Supreme **[*3]** Court has recently narrowly construed the statutory phrase "the business of insurance" to exclude an arrangement where insurance companies agreed with pharmacists on the maximum amount that the pharmacists would be reimbursed for prescriptions they filled. See *Group Life & Health Ins. Co. v. Royal Drug Co., Inc., 99 S. Ct. 1067(1979)*. The Court held that to be within the McCarran-Ferguson Act exemption, the conduct must involve the underwriting or spreading of a risk. *Id. at 1073-74*.

The defendants have argued that the agreements between physicians participating in the foundation-approved plans and the insurers underwriting the plans spread the risk that the cost of providing services to a foundation policyholder will be more than the maximum amount a participating physician would receive. Yet every contract for the sale of goods or services in the future at a specified price protects the parties against future fluctuations in the market price. Such an underwriting of a risk is not peculiar to the "business of insurance."

The risk that is peculiar to the "business of insurance" is the risk that policyholders cannot afford the services of a physician when needed. The participating **[*4]** insurance companies underwrite or assume this risk in return for the payment of premiums. The effect is that the risk is spread among all policyholders such that the magnitude of the risk to the individual policyholder is reduced. Merely because an insurance company acts to reduce the risk that it has underwritten does not directly further underwrite or spread the risk that the policyholders sought to insure against.The obligations that the participating insurance companies have incurred remains constant. How they go about satisfying that obligation does not involve the business of insurance since a reduction in liability and thus the risk they have assumed does not change the risk against which the policyholder obtained insurance. The Supreme Court in Royal Drug wrote in relevant part:

The fallacy of the petitioners' position is that they confuse the obligations of Blue Shield under its insurance policies, which insure against the risk that policyholders will be unable to pay for prescription drugs during the period of coverage, and the agreements between Blue Shield and the participating pharmacies, which serve only to minimize the costs Blue Shield incurs in fulfilling its **[*5]** underwriting obligations….

The… Agreements… do not involve any underwriting or spreading of risk, but are merely arrangements for the purchase of goods and services by Blue Shield…. Such cost savings arrangements may well be sound business practice, and may well inure ultimately to the benefit of policyholders in the form of lower premiums, but they are not the "business of insurance."

Group Life & Health Ins. Co. v. Royal Drug Co., Inc., supra, 99 S. Ct. at 1074-75. Because the agreements between the defendants and the insurance companies underwrite or spread no risk peculiar to the business of insurance, the McCarran-Ferguson Act exemption does not apply to exempt the defendants' conduct from possible antitrust liability and the defendants' motion to dismiss is denied.

HN2[] Subject-matter jurisdiction under federal ***antitrust law*** is co-extensive with the Congressional power under the Constitution to regulate interstate commerce. *United States v. South-Eastern Underwriter's Ass'n, 322 U.S. 533, 558-59, 64 S. Ct. 1162, 88 L. Ed. 1440(1944)*. Whether the Court has subject-matter jurisdiction over the complaint depends on whether the acts allegedly restrained by the acts **[*6]** complained of occur in the flow of commerce, or whether those acts, although local, substantially affect interstate commerce. See *Hospital Building Co. v. Trustees of Rex Hospital, 425 U.S. 738, 743, 96 S. Ct. 1848, 1851-52, 48 L. Ed. 2d 338 (1976)*. The alleged price-fixing of services, goods and products sold by participating physicians to foundation policyholders presumably restrains the sale of the services, goods and products sold by the participating physicians. The sales are not interstate transactions, since the sales occur wholly within the state. No services cross state lines and any goods or products that cross state lines are no longer in the flow of interstate commerce when sold at retail. See P. Areeda & D. Turner, ***Antitrust Law*** P31-32 (1978). That the doctors are paid with funds that cross state lines according to contracts that cross state lines or prescribe drugs that cross state lines does not make the services or products they sell something that is in the flow of interstate commerce.

However, it cannot be disputed that health insurance is an interstate business where premiums and payments on claims cross state lines. The alleged price-fixing affects the **[*7]** sale of services by physicians and the sale of services rendered by physicians directly affects the premiums and payments that cross state lines. It is undisputed that the amount of premiums and payments on claims that annually cross state lines exceeds the amounts involved in *Hospital Building Co. v. Trustees of Rex Hospital, supra* . Thus, the criteria of *Goldfarb v. Virginia State Bar, 421 U.S. 773, 95 S. Ct. 2004, 44 L. Ed. 2d 575 (1975)*, that there must be both substantial interstate commerce and a necessary or integral relationship between the allegedly restrained activity and the interstate commerce are satisfied, thereby establishing subject-matter jurisdiction. See *Ohio v. Ohio Medical Indemnity, Inc., 1976-2 TRADE CASES (CCH) P61,128 (S.D. Ohio 1976)*. See also *De Voto v. Pacific Fidelity Life Ins. Co., 516 F. 2d 1, 5 (9th Cir.)*, cert. denied, *423 U.S. 894* ***HN3***[] ("Interstate insurance transactions fall within the definition of interstate commerce as that term is applied pursuant to federal antitrust regulation, and '[if] it is interstate commerce that feels the pinch, it does not matter how local the operation which applies the squeeze.'").

HN4[] Although the question of subject-matter **[*8]** jurisdiction is normally addressed by a motion to dismiss and a finding of lack of subject-matter jurisdiction requires dismissal, finding jurisdiction does not preclude entering partial summary judgment on that issue. See *Page v. Work, 290 F. 2d 323 (9th Cir.)*, cert. denied, *368 U.S. 875 (1961)*. Because the Court finds it has subject-matter jurisdiction over the plaintiff's antitrust claim, the motion by the plaintiff for partial summary judgment on the issue of subject-matter jurisdiction is granted.

Based on the affidavit of Anthony D. Mitten, it is clear that the defendant Maricopa Foundation for Medical Care (and presumably the Pima Foundation for Medical Care as well) sets the maximum fees paid by the insurance companies underwriting foundation-approved plans to the physicians associated with the foundation for services, performed by them on patients covered by the Foundation-endorsed plans. That the participating physicians are free to charge whatever price they wish is of no consequence as they have agreed in advance to accept in full satisfaction the amount determined by the medical foundation when the amount they charge exceeds that established by the foundation. ***HN5***[]

[*9] Price-fixing has for some time been viewed as per se unlawful. See *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*. Under the per se approach, there is no inquiry into whether the challenged practice actually has an anticompetitive effect. The per se rule has been applied to fixing maximum prices as well as minimum prices. *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 71 S. Ct. 259, 95 L. Ed. 219 (1951)*. No evidence has been submitted that the insurance companies individually determined the maximum prices to be paid and that the physicians individually agreed to those terms which presumably would preclude finding any antitrust violation even under a per se analysis. See Department of Justice Clearance Letter, January 15, 1968, Appendix E, Amicus Curiae Brief of the Blue Shield Association, Group Life and Health Ins. Co. v. Royal Drug Co., Inc. (1977).

The defendants urge that the challenged practices should be analyzed under the "Rule of Reason" approach. ***HN6***[] Under the Rule of Reason approach, an inquiry is made to determine whether the purpose or effect of the practice in question would significantly hamper competition. **[*10]** See Sullivan, Handbook on Antitrust §§ 68-72 (1977). Although the per se approach avoids inquiry into difficult economic issues, a recent antitrust trend appears to be emerging where the Rule of Reason is the preferred method of determining whether a particular practice is in violation of the ***antitrust law***. See *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)* (vertical restraints, formerly per se violations, are now to be analyzed under the Rule of Reason be analyzed under the Rule of Reason approach); General Glass Co., Inc. v. Globe Glass and Trim Co., TRADE CASES 75,487, 75,490 (N.D. Ill. 1978) ("That all price-fixing is per se violative of antitrust laws is a concept that is presently being revised in favor of a 'rule of reason' approach."). See also Handler, "Changing Trends in Antitrust Doctrines: An Unprecedented Supreme Court Term -- 1977," 77 Columb. L. Rev. 979, 989 (1977):

Sylvania marks not only the reinstatement of the rule of reason, but also a reawakening to the requirements of business… It is clear… that ***HN7***[] the courts will no longer have to wear per se blinders in passing upon the many business restrictions which **[*11]** do have "redeeming virtues" and may actually help to promote competition.

Additionally, the two Supreme Court cases invalidating maximum price-fixing, *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., supra* and *Albrecht v. Herald Co., 390 U.S. 145, 88 S. Ct. 869, 19 L. Ed. 2d 998 (1968)*, need not be read as establishing a per se rule. According to one commentator,

[most] writers have determined that Kiefer-Stewart and Albrecht should not be read to denounce maximum RPM [resale price maintenance] under the per se rule. Unlike normal per se cases, these decisions were not the culmination of a long series of rulings establishing that the challenged practice can rarely, if ever, be justified and that the usual evidentiary inquiry into purpose, power and effect would be wasteful. Nor did these decisions discuss the possible benefits and detriments to efficiency and competition posed by the restraint under attack, so as to conclude that virtually no defense would be successful, as have most per se cases. It is plan, moreover, that the results of Kiefer-Stewart and Albrecht can be explained by rule of reason analysis.Consequently, there is no need to read them as per se holdings **[*12]** condemning maximum RPM.

Kallstrom, "Health Care Cost Control by Third Party Payors: Fee Schedules and the Sherman Act," 1978 Duke L.J. 645, 666-68.

Another consideration in determining whether to apply the Rule of Reason approach is that a profession is involved here.

It has long been recognized that ***HN8***[] the professions differ fundamentally from ordinary commercial businesses and, consequently, merit more liberal treatment under the antitrust laws. Courts have generally assumed that the professions exist for reasons in addition to the profit motive. The essence of the concept of "profession" is the power to self-regulate and to promote standards of practice that benefit the public at large as well as the individual practitioners.

Comment, "The Professions and Noncommercial Purposes: Applicability of Per Se Rules Under the Sherman Act," 11 U. Mich. J. L. Reform 387, 394 (1978). See also Note, "Application of the Antitrust Laws to Anticompetitive Activities by Physicians," 30 Rutgers L. Rev. 991, 1019 (1977) ("Recognizing that the per se rules were fashioned in a wholly commercial context, courts traditionally have not included highly regulated but traditionally noncommercial **[*13]** industries within the scope of those rules."). The Supreme Court has recognized the distinction between a purely commercial business and a profession, commenting in *Goldfarb, supra* :

The fact that a restraint operates upon a profession as distinguished from a business is, of course, relevant in determining whether that particular restraint violates the Sherman Act. It would be unrealistic to view the practice of professions as interchangeable with other business activities and automatically apply to the professions antitrust concepts which originated in other areas. The public service aspect, and other features of the professions, may require that a particular practice, which could be properly viewed as a violation of the Sherman Act in another context, be treated differently.

421 U.S. at 788 N. 17, *95 S. Ct. at 2013*.

In *National Society of Professional Engineers v. United States, 435 U.S. 679, 68 S. Ct. 1355 (1978)*, the Supreme Court further indicated that conduct of professions allegedly in violation of the antitrust laws may be subjected to a Rule of Reason analysis. Although the Court concluded that no elaborate industry analysis was necessary to find that the challenged **[*14]** conduct was in violation of the antitrust laws, the Court did discuss at length the Rule of Reason, stating that "certain practices by members of a learned profession might survive scrutiny under the Rule of Reason even though they would be viewed as a violation of the Sherman Act in another context." Id. 435 U.S. at , 98 S. Ct. at 1362. Nowhere did the Court state that the defendant could assert no defense that the conduct challenged was reasonable, only that the particular defense of protecting against inferior work was legally insufficient.

The Ninth Circuit, when confronted with an alleged tying arrangement, normally a per se violation, by a profession, wrote:

[The] Supreme Court does not require that the practices challenged here be treated the same as would be proper if dentistry were merely a commercial enterprise.

As we interpret the Court, ***HN9***[] to survive a Sherman Act challenge a particular practice, rule, or regulation of a profession, whether rooted in tradition or the pronouncements of its organizations, must serve the purpose for which the profession exists, viz. to serve the public. That is, it must contribute directly to improving service to the public. **[*15]** Those which only suppress competition between practitioners will fail to survive the challenge. This interpretation permits a harmonization of the ends that both the professions and the Sherman Act serve.

Boddicker v. Arizona State Dental Ass'n 549 F. 2d 626, 632 (9th Cir.), cert. denied, *434 U.S. 825 (1977)*. Reversing the dismissal of the case and remanding the case for further proceedings to permit the defendants to show how the challenged conduct promoted the improvement of professional services to the public indicates that the Rule of Reason is to be applied when analyzig practices of professions alleged to be in violation of the antitrust laws. See also *Mackey v. National Football League 543 F 2d 606 (8th Cir. 1976)* (the challenged rule characterized as a refusal to deal and a group boycott was held to be more appropriately tested under the Rule of Reason than to be declared per se violative of the Sherman Act). It has been aptly observed that

[although] no firm consensus exists as to the social and economic goals of the Sherman Act, it is at least clear that per se rules arose out of the courts' experience with commercial activities whose purposes and anticompetitive **[*16]** effects differ significantly from those of the professions. The mechanical application of per se rules of illegality in the professional setting contradicts the basic rule that only unreasonable restraints are condemned by the Sherman Act... [Without] the benefit of long experience with the professions in the antitrust arena, the conclusions garnered from traditional commercial practices should not be carried over unthinkingly to professional practices.

Comment, supra, 11 U. Mich. J.L. Reform, at 415.

In light of the above, the Court concludes that the Rule of Reason approach should be used in analyzing the challenged conduct in the instant case. Choosing the Rule of Reason approach precludes granting the plaintiff's motion for partial summary judgment on the issue of liability because there is insufficient evidence as to the purpose and effect of the allegedly unlawful practices and the power of the defendants. As a consequence of adopting the Rule of Reason, the December 18, 1978, order of the Court denying defendant Maricopa Foundation's motion for an order compelling discovery of certain information and documents such as the relative value schedules, unit conversion **[*17]** factors or fee schedules used by the plaintiff is vacated. Under the Rule of Reason approach, such information is relevant in determining the purpose and effect of the challenged conduct. Therefore,

It Is Ordered:

1. The defendants' motion to dismiss based on the McCarran-Ferguson Act exemption is denied.

2. The plaintiff's motion for partial summary judgment on the issue of subject-matter jurisdiction is granted.

3. The plaintiff's motion for partial summary judgment on the issue of liability is denied with leave to file a similar motion based on additional evidence if appropriate.

4. The December 18, 1978, order of the Court denying defendant Maricopa Foundation's motion for an order compelling discovery is vacated.

Civil Procedure > Trials > Bench Trials

Constitutional Law > ... > Case or Controversy > Constitutional Questions > General Overview

Constitutional Law > ... > Fundamental Rights > Criminal Process > Right to Jury Trial

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN3[] Maritime Forfeitures & Penalties, Constitutional Implications

The right to jury trial may, of course, be expressly provided by the terms of a federal statute. Because there is no constitutional right to a nonjury trial, the *Seventh Amendment* does not prevent either judicial or legislative extension of the right to jury trial, and such statutes raise no constitutional difficulties.

Civil Procedure > Trials > Jury Trials > Right to Jury Trial

Constitutional Law > ... > Fundamental Rights > Criminal Process > Right to Jury Trial

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN4[] Jury Trials, Right to Jury Trial

When a statute creating new rights or remedies is silent as to the mode of trial, the availability of a jury as of right generally becomes a *Seventh Amendment* question. Courts fit the statutory claim into the nearest historical analogy to determine whether there is a constitutional right to jury trial.

Civil Procedure > Trials > Jury Trials > Jury Demands

Governments > Legislation > Statutory Remedies & Rights

Civil Procedure > Trials > Jury Trials > Right to Jury Trial

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN5[] Jury Trials, Jury Demands

The *Seventh Amendment* does apply to actions enforcing statutory rights, and requires a jury trial upon demand, if the statute creates legal rights and remedies, enforceable in an action for damages in the ordinary courts of law.

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN6[] **Fundamental Rights, Trial by Jury in Civil Actions**

See *U.S. Const. amend. VII*.

Civil Procedure > Trials > Jury Trials > Right to Jury Trial

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN7[] **Jury Trials, Right to Jury Trial**

The scope of the *Seventh Amendment* has traditionally been determined by applying a comparatively static, historical test, which looks to the English common law as it existed in 1791, when the *Seventh Amendment* became part of the constitution.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Concurrent Jurisdiction

Civil Procedure > Trials > Jury Trials > Right to Jury Trial

Constitutional Law > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Concurrent Jurisdiction

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN8[] **Jurisdiction Over Actions, Concurrent Jurisdiction**

The grounds which permit the exercise of the equitable jurisdiction in cases with concurrent law and equity jurisdictions, are the existence of some distinctively equitable feature of the controversy which cannot be determined by a court of law, or some fraudulent or otherwise irregular incidents of the legal proceedings sufficient to warrant their being enjoined, or the necessity of a discovery, either of which grounds would render the legal remedy inadequate. This rule results in part, in the United States, from the provisions of the national and state constitutions securing the right to a jury trial.

Civil Procedure > Trials > Jury Trials > Right to Jury Trial

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN9[] **Jury Trials, Right to Jury Trial**

Fed. R. Civ. P. 38(a) requires only that the right as declared by the *Seventh Amendment to the Constitution* or as given by a statute shall be preserved to the parties inviolate.

Civil Procedure > ... > Jury Trials > Right to Jury Trial > Actions in Equity

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

Civil Procedure > Trials > Jury Trials > Right to Jury Trial

HN10[] **Right to Jury Trial, Actions in Equity**

Where both legal and equitable issues are presented in a single case, only under the most imperative circumstances, can the right to a jury trial of legal issues be lost through prior determination of equitable claims.

Civil Procedure > Judicial Officers > Masters > Appointment of Masters

Constitutional Law > ... > Fundamental Rights > Criminal Process > Right to Jury Trial

Civil Procedure > Judicial Officers > Masters > General Overview

Civil Procedure > Judicial Officers > References

Civil Procedure > ... > Jury Trials > Right to Jury Trial > Actions in Equity

Civil Procedure > Trials > Jury Trials > Right to Jury Trial

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN11[] **Masters, Appointment of Masters**

The constitutional right to trial by jury cannot be made to depend upon the choice of words used in the pleadings. The necessary prerequisite to the right to maintain a suit for an equitable accounting, like all other equitable remedies, is the absence of an adequate remedy at law. Consequently, in order to maintain such a suit on a cause of action cognizable at law, the plaintiff must be able to show that the accounts between the parties are of such a complicated nature that only a court of equity can satisfactorily unravel them. In view of the powers given to district courts by *Fed. R. Civ. P. 53(b)* to appoint masters to assist the jury in those exceptional cases where the legal issues are too complicated for the jury adequately to handle alone, the burden of such a showing is considerably increased and it will indeed be a rare case in which it can be met.

Civil Procedure > Preliminary Considerations > Equity > General Overview

HN12[] **Preliminary Considerations, Equity**

Mere complication of facts alone and difficulty of proof are not a basis of equity jurisdiction.

Civil Procedure > Preliminary Considerations > Equity > General Overview

Real Property Law > Purchase & Sale > Remedies > Specific Performance

HN13[] **Preliminary Considerations, Equity**

Equity could properly resolve corporate claims of any kind, including normally legal claims, without a jury when properly pleaded in derivative suits complying with the equity rules.

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN14[] **Subject Matter Jurisdiction, Jurisdiction Over Actions**

Claims for treble damages the relief sought by the plaintiffs in this suit have traditionally been among those properly cognizable only at law.

Civil Procedure > Trials > Jury Trials > Right to Jury Trial

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN15[] **Jury Trials, Right to Jury Trial**

Where equitable and legal claims are joined in the same action, there is a right to jury trial on the legal claims which must not be infringed either by trying the legal issues as incidental to the equitable ones or by a court trial of a common issue existing between the claims. The *Seventh Amendment* question depends on the nature of the issue to be tried rather than the character of the overall action.

Civil Procedure > Trials > Jury Trials > Right to Jury Trial

Constitutional Law > Bill of Rights > Fundamental Rights > Trial by Jury in Civil Actions

HN16[] **Jury Trials, Right to Jury Trial**

The available evidence shows that the Supreme Court never intended that the Ross footnote be a "test" for *Seventh Amendment* questions. The proposed "test" is unworkable and application of the Ross "test" in the manner proposed would be fundamentally inconsistent with the policies underlying the role of the jury in civil actions in the United States.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN17[] **Trials, Judgment as Matter of Law**

The courts must examine the record in a light most favorable to the party against whom the verdict is to be directed, and review the specific evidence in the record and all inferences reasonably capable of being drawn therefrom. The courts must determine whether, as a matter of law, the record is critically deficient of that minimum quantum of evidence from which a jury might reasonably afford relief. If the evidence is of such character that reasonable men, in the impartial exercise of their judgment may reach different conclusions, the case should be submitted to the jury. Because a directed verdict motion deprives a party of jury fact-determination, it should be granted sparingly and circumspectly. Nevertheless the federal courts do not follow the rule that a scintilla of evidence is enough. The question is not whether there is literally no evidence supporting the party against whom the motion is directed but whether there is evidence upon which the jury could properly find a verdict for that party.

Opinion by: [2]** BECKER

Opinion

[*891] OPINION

TABLE

[*892] I. Preliminary Statement

Certain defendants in these consolidated antitrust cases, alleging that they are so "extraordinarily complex," "so massive as to make them unique in the annals of United States antitrust and trade regulation litigation," and "beyond the practical abilities and limitations of a jury," have moved for an order striking the jury demands of the plaintiffs, Zenith Radio Corporation ("Zenith") and National Union Electric Corporation ("NUE"). [1] This opinion will address and deny defendants' motion.

NUE **[**3]** is the corporate successor to Emerson Radio Co., one of the pioneers in the radio and TV industry. NUE ceased all production of television receivers in February, 1970; [2] that December, it filed the first of these suits, [3] **[**4]** alleging that the Japanese defendants and others had conspired to take over the American consumer electronic products industry and to drive NUE out of business. In 1974, after experiencing large operating losses, Zenith filed an action making similar allegations. [4] The NUE action was then transferred to this district for coordinated or consolidated pretrial proceedings with the Zenith action. See *In re Japanese Electronic Products*

---

[1] The motion to strike the jury demand was first filed by Mitsubishi Corp. and the Toshiba, Matsushita, and Sony defendants. Motorola, Inc., and the Sharp defendants subsequently joined in the motion. The Mitsubishi Electric Corporation ("Melco"), Hitachi, Sanyo and Sears defendants have not participated in this motion. Except where the context indicates otherwise, "defendants" will be used herein to mean only the moving defendants.

[2] After ceasing production of television receivers, NUE then resold television receivers purchased from other manufacturers until discontinuing its television business entirely in 1972.

[3] National Union Electric Corp. v. Matsushita Electric Industrial Co., Civil No. 1706-70 (D.N.J., filed December 21, 1970).

[4] Zenith Radio Corp. v. Matsushita Electric Industrial Co., Civil Action No. 74-2451 (E.D.Pa., filed Sept. 20, 1974).

Antitrust Litigation, 388 F. Supp. 565 (J.P.M.D.L.1975). [5] **[*893]** In Pretrial Order # 182, filed this date, we made the transfer of the NUE action to this district unconditional, and consolidated it for trial with the Zenith action.

The ten principal defendants are Mitsubishi Corporation, a Japanese trading company; Matsushita Electric **[**5]** Industrial Co., Ltd., Toshiba Corporation, Hitachi, Ltd., Sharp Corporation, Mitsubishi Electric Corporation (Melco), Sanyo Electric Co., Ltd., and Sony Corporation, all Japanese manufacturers of consumer electronic products; and two American companies, Motorola, Inc. and Sears, Roebuck & Co. Fourteen other defendants are subsidiaries of the principal Japanese defendants. Of the twenty-four defendants, fifteen are defendants in both suits, seven in the Zenith action only, and two in the NUE action only. [6] In addition to the twenty-four named defendants, the plaintiffs have identified close to 100 alleged co-conspirators whose business operations span the globe, ranging from dozens of Japanese companies, large and small, to such world industrial giants as N.V. Phillips Gloeilampenfabrieken and General Electric Co.

[6]** In capsule form, plaintiffs' complaints allege that the Japanese defendants and their co-conspirators are and have been participants in a conspiracy which, by artificially lowering export prices, has for more than twenty years sought the methodical destruction of the United States' domestic consumer electronic products industry. [7] The defendants are accused of carrying out the aims of this conspiracy by flooding the United States' market with imported goods at prices so attractive to consumers that domestic producers suffered serious losses, and were either unable to compete or able to do so only by moving some or all of their own production facilities to Mexico and the Far East. [8]

[7]** The particular offenses charged in the complaints span the laws of antitrust. The overall conspiracy is alleged to violate *§§ 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2*, and *§ 73* of the Wilson Tariff Act, *15 U.S.C. § 8*. [9] **[**8]** However, the cornerstone of **[*894]** the plaintiffs' case is the allegation that the Japanese defendants have

---

[5] This case was transferred to our docket from the docket of Judge A. Leon Higginbotham, Jr., following his elevation to the Court of Appeals. Although the progress of the case had been slowed by the illnesses and subsequent deaths of two judges to whom the case had previously been assigned, Judge Higginbotham moved the litigation forward vigorously. One of the most important events of Judge Higginbotham's stewardship was the filing of an opinion, based on a voluminous record, disposing of the defendants' challenges to jurisdiction and venue, and to the constitutionality of the 1916 Antidumping Act. See *Zenith Radio Corp. v. Matsushita Electric Industrial Co., 402 F. Supp. 251 (E.D.Pa.1975)* (opinion on constitutionality of antidumping act); *Zenith Radio Corp. v. Matsushita Electric Industrial Co., 402 F. Supp. 262 (E.D.Pa.1975)* (opinion on jurisdiction and venue).

[6] Sony Corporation and its sales subsidiary, Sony Corporation of America, were originally named in both suits. However, they were dismissed from the Zenith action after settling with Zenith in April, 1977, and are defendants now only in the NUE action.

The seven other principal Japanese defendants are named in both actions, as are eight of their subsidiaries: Matsushita Electric Corporation of America, Toshiba America, Inc., Hitachi Sales Corporation of Japan, Hitachi Sales Corporation of America, Sharp Electronics Corporation, Sanyo Electric, Inc., Sanyo Electric Trading, Inc., and Mitsubishi International Corporation.

Sears and Motorola are named only in the Zenith suit, as are Melco Sales, Inc., Sanyo Manufacturing Co., Matsushita Electronics Corporation, Matsushita Electric Trading Co., Ltd., and Quasar Electronics Corp., also a Matsushita subsidiary.

[7] The NUE suit is limited to television receivers; the lines of commerce encompassed in the Zenith complaint also include radios, phonographs, tape and audio equipment, televisions, and electronic components. We refer to all of these collectively as "consumer electronic products."

[8] Every major television manufacturer, including Zenith and RCA, now operates production facilities outside the United States.

[9] That act provides:

§ 8. Trusts in restraint of import trade illegal; penalty

Every combination, conspiracy, trust, agreement, or contract is declared to be contrary to public policy, illegal, and void when the same is made by or between two or more persons or corporations, either of whom, as agent or principal, is engaged in importing any article from any foreign country into the United States, and when such combination, conspiracy, trust, agreement, or contract is intended to operate in restraint of lawful trade, or free competition in lawful trade or commerce, or to increase the market price in any part of the United States of any article or articles imported or intended to be imported into the United States, or of any violated the 1916 Revenue Act, better known as the 1916 Antidumping Act, *15 U.S.C. § 72*, [10] **[**9]** by "commonly and systematically" selling their products in this country for substantially less than their actual market value or wholesale price in Japan, and with predatory intent. The defendants are also charged with violating the Robinson-Patman Act, *15 U.S.C. § 13(a)*, by discriminating in price among American purchasers. [11] Finally, Zenith charges that Sears, Motorola, and the Matsushita and Sanyo defendants violated § 7 of the Clayton Act, *15 U.S.C. § 18*, in connection with the Japanese companies' acquisitions of interests in domestic consumer electronic products manufacturers. [12]

Plaintiffs' claims, adumbrated above, have been spelled out in greater detail in **[**10]** two preliminary pretrial memoranda totalling 410 pages, as well as in answers to numerous contention interrogatories. The plaintiffs' papers seek to portray a worldwide conspiracy said to have lasted over a period of some 30 years and to have involved close to 100 manufacturers, exporters, and importers of consumer electronic products of various national origins.

The defendants maintain that, notwithstanding their voluminous submissions, plaintiffs have failed to elucidate their claims with any degree of precision. They also deny both the legal and factual validity of the plaintiffs' claims. Additionally, certain of the defendants have asserted counterclaims against Zenith.

---

manufacture into which such imported article enters or is intended to enter. Every person who shall be engaged in the importation of goods or any commodity from any foreign country in violation of this section, or who shall combine or conspire with another to violate the same, is guilty of a misdemeanor, and on conviction thereof in any court of the United States such person shall be fined in a sum not less than $ 100 and not exceeding $ 5,000, and shall be further punished by imprisonment, in the discretion of the court, for a term not less than three months nor exceeding twelve months.

[10] *§ 72*. Importation or sale of articles at less than market value or wholesale price

It shall be unlawful for any person importing or assisting in importing any articles from any foreign country into the United States, commonly and systematically to import, sell or cause to be imported or sold such articles within the United States at a price substantially less than the actual market value or wholesale price of such articles, at the time of exportation to the United States, in the principal markets of the country of their production, or of other foreign countries to which they are commonly exported after adding to such market value or wholesale price, freight, duty, and other charges and expenses necessarily incident to the importation and sale thereof in the United States: Provided, That such act or acts be done with the intent of destroying or injuring an industry in the United States, or of preventing the establishment of an industry in the United States, or of restraining or monopolizing any part of trade and commerce in such articles in the United States.

Any person who violates or combines or conspires with any other person to violate this section is guilty of a misdemeanor, and, on conviction thereof, shall be punished by a fine not exceeding $ 5,000, or imprisonment not exceeding one year, or both, in the discretion of the court.

Any person injured in his business or property by reason of any violation of, or combination or conspiracy to violate, this section, may sue therefor in the district court of the United States for the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages sustained, and the cost of the suit, including a reasonable attorney's fee.

The foregoing provisions shall not be construed to deprive the proper State courts of jurisdiction in actions for damages thereunder.

[11] The original complaints included counts alleging that price discrimination between Japanese and American purchasers violated the Robinson-Patman Act. These counts were dismissed for failure to state a claim upon which relief may be granted. *Zenith Radio Corp. v. Matsushita Electric Industrial Co., 402 F. Supp. 244 (E.D.Pa.1975)* (Higginbotham, J.).

[12] Zenith challenges two acquisitions. The first is the 1974 sale by Motorola of its consumer electronic products division and its "Quasar" tradename to Matsushita. The other is the 1976 acquisition by Sanyo of a majority interest in Warwick Electronics, Inc. Warwick had manufactured television receivers for sale to U.S. private label customers, the largest of which was Sears. Sears owned 25% Of Warwick's common shares, and after the transactions was 25% Owner of Warwick's successor, Sanyo Manufacturing Co. (an American corporation). Zenith alleges that Sears has contracted to purchase 70% Of its console color television requirements from Sanyo Manufacturing.

The counterclaims attack Zenith on two fronts. First, they allege that Zenith, acting alone and in combination and conspiracy with others, used territorial allocations, price discrimination, horizontal and vertical price fixing arrangements and certain "key dealer preferences" in violation of the Robinson-Patman Act and *§§ 1* and *2* of the **[*895]** Sherman Act. Second, they accuse Zenith and its co-conspirators of seeking to interfere with its competitors, including the counterclaimants, "by every means available, **[**11]** including the submission of complaints, petitions, testimony and other information to various federal governmental agencies and officials, federal courts, and the United States Congress which were based upon sham, false and misleading allegations and information, without regard to the truth or merits of the claims made." The counterclaiming defendants thus invoke the "sham litigation" theory of antitrust liability recognized in *Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*. Defendants have likewise filed extensive preliminary pretrial memoranda detailing their counterclaims. [13]

We are now approaching the end of pretrial discovery. To say that the discovery has been massive would be a considerable understatement. To **[**12]** date over 20 million documents have been produced for inspection. A considerable number of these have had to be translated from Japanese into English. The deposition transcripts completed to date total well over 100,000 pages, and many depositions remain to be taken. The interrogatory practice has been voluminous, coming in wave after wave. We have been inundated with a plethora of discovery motions; in the past few months we have dealt with over 50 Rule 37 motions of various descriptions, and pretrial conferences with counsel for the parties are consuming at least 3 full days per month, mostly to resolve discovery problems. We have entered a comprehensive pretrial order which fixed discovery deadlines and times for filing annotated final pretrial statements and other pretrial material, and set the case for trial in February, 1980. [14] It is anticipated that the trial will consume approximately one year.

[13]** Following the filing of the motion to strike the jury demand, we heard extensive argument thereon. Since it appeared to us that a helpful way of framing the complexity issue was to request the parties to prepare proposed forms of special interrogatories which might be submitted to a jury, we did so and defendants made extensive submissions. Numerous legal memoranda have been filed in connection with the motions, many of them dwelling upon the rash of recent cases where complexity has led to the striking of timely jury demands. We address defendants' motion at this time because we are satisfied that we have an adequate record on which to decide it and because we believe it to be fair to decide the issue sufficiently in advance of trial that the losing party may attempt to obtain appellate review.

We write at length for a number of reasons. First is the current importance of the problem, which appears on the agenda of almost every seminar on class actions, ***antitrust law*** and federal practice concerning which we have recently received brochures. Second, we suspect that given the enormous scope of contemporary class action and antitrust litigation, this will not be the last occasion on **[**14]** which the enormous tension between the demands of these massive cases and the mandate of the *Seventh Amendment* will generate a motion to strike a jury demand on grounds of complexity. Hence, our discussion of the case law may be of help to the bench and bar. [15]

---

[13] The counterclaims described in the text are asserted by certain of the Matsushita, Mitsubishi, Hitachi, Sharp, Sanyo, and Toshiba defendants. In addition, Sears asserts a counterclaim against Zenith based on the Lanham Act, *15 U.S.C. §§ 1051-1127*.

[14] The time remaining before trial will be devoted to the disposition of numerous motions for summary judgment, and to the preparation by counsel of annotated final pretrial statements setting forth all facts to be proved, and trial briefs.

[15] We draw much sustenance from the excellent discussions of this problem already extant in the literature. Among the cases which we find particularly helpful are *Bernstein v. Universal Pictures, Inc., 79 F.R.D. 59 (S.D.N.Y.1978)* (Brieant, J.); *Radial Lip Machine, Inc. v. International Carbide Corp., 76 F.R.D. 224 (N.D.Ill.1977)* (Marshall, J.); and *In re U.S. Financial Securities Litigation, 75 F.R.D. 702 (S.D.Cal.1977)* (Turrentine, J.). Of equal value is an article by Judge Patrick Higginbotham, Continuing the Dialogue: Civil Juries and the Allocation of Judicial Power, 56 Tex.L.Rev. 47 (1977).

[*896] We consider herein only the defendants' arguments that the jury trial demand should be struck on grounds of complexity. We find the other two asserted **[**15]** grounds for their motion plainly without merit, and reject them out of hand. [16]

---

[16] These grounds are that plaintiffs have waived a jury and that the plaintiffs have engaged in a publicity campaign so prejudicial to the defendants that striking the jury demand is appropriate both as a sanction for this alleged misbehavior and because the publicity has made it impossible to impanel an impartial jury.

The defendants concede that both plaintiffs made timely demands for jury trial. Their waiver argument is based instead on excerpts from the transcripts of numerous pretrial conferences.

In several of these colloquies, plaintiffs' counsel indicated a willingness to agree to a non-jury trial if All parties so agreed, but "A demand for trial by jury made as herein provided may not be withdrawn without the consent of the parties." *Rule 38(d), Fed.R.Civ.P.* 39(a) permits the withdrawal of jury demands "by written stipulation filed with the court or by an oral stipulation made in open court and entered in the record . . . ." See *Collins v. Government of the Virgin Islands, 366 F.2d 279* (3d Cir.) Cert. denied, ***386 U.S. 958, 87 S. Ct. 1026, 18 L. Ed. 2d 105 (1966)***.

We have carefully reviewed the cited portions of the record, and find that at no time did the plaintiffs state an unequivocal much less irrevocable intention to withdraw their jury demands. Even if they had, it would be manifestly unjust to treat an unaccepted offer to enter into a Rule 39(a) stipulation as irrevocable throughout the pendency of the pretrial stages in any case. Moreover, at no time have all parties agreed to dispense with a jury, and several defendants continue to join the plaintiffs in seeking a jury trial. The alleged "waiver" or "withdrawal" therefore fails to meet the clear requirements of the Federal Rules.

Defendants' argument based on allegations of plaintiff-inspired prejudicial publicity fails for several reasons.

First, we simply do not believe that the "massive publicity campaign" characterized by the Sharp defendants as "a plan to corrupt the minds of the ultimate triers of fact" could possibly have more than a marginal effect on the venire in this district. The 40-odd press clippings presented as evidence of "Zenith's publicity crusade" are, for the most part, collected from the inner pages of the Japan Times, Home Furnishings Daily, Electronics News, the Chicago Tribune, and other periodicals of limited circulation in this area. Even if every single one of the allegedly prejudicial articles had been published on the front pages of the general circulation Philadelphia dailies, they would not even begin to compare with the press coverage given to Watergate or the My Lai massacre yet impartial juries were selected in cases dealing with those events. See *United States v. Haldeman, 181 U.S.App.D.C. 254, 282-294, 559 F.2d 31, 59-71 (1976)* Cert. denied, sub noms. Ehrlichman v. ***United States and Mitchell v. United States, 431 U.S. 933, 97 S. Ct. 2641, 53 L. Ed. 2d 250 (1977)***; *Calley v. Callaway, 519 F.2d 184, 203-13 (5th Cir. 1975)* (en banc) Cert. denied, ***423 U.S. 888, 96 S. Ct. 182, 46 L. Ed. 2d 119 (1976)***. Moreover, this district is comprised of 10 counties, in most of which the Philadelphia newspapers are not widely read. There has been no evidence of publicity on radio and television.

Second, in the absence of prejudicial publicity so outrageous and pervasive that "any subsequent court proceedings in (the) community . . . could be but a hollow formality," *Rideau v. Louisiana, 373 U.S. 723, 726, 83 S. Ct. 1417, 1419, 10 L. Ed. 2d 663 (1963)*, any conclusion as to the impact of publicity on prospective jurors in this case now, almost a year before trial, would necessarily be speculative. See *Nebraska Press Ass'n. v. Stuart, 427 U.S. 539, 563, 96 S. Ct. 2791, 49 L. Ed. 2d 683 (1976)*. The Voir dire will provide an opportunity to determine whether the prospective jurors have, in fact, been prejudiced; it would clearly be improper to strike the jury demand on no more than speculation.

Third, a variety of less drastic measures may be available to cure or ameliorate any prejudice which might be found. See, e.g., *id. at 563-64, 96 S. Ct. 2791*. The alternatives listed in Nebraska Press must be carefully considered before resort may be had to a step as extreme as denying the constitutional right to jury trial.

If at Voir dire we find that Zenith's "publicity campaign" has in fact "corrupted the minds" of the potential jurors, and if we also find the prejudice so substantial that the defendants' right to a fair trial can best be protected by a remedy as drastic as striking the plaintiffs' jury demands, we would then have to confront a number of difficult constitutional questions. Several courts have recently discussed the extent to which the paramount interest in preserving the integrity of the judicial process can justify interference with activities normally protected by the *First Amendment*. See, e.g., *Hirschkop v. Snead, 594 F.2d 356 (4th Cir. 1979)*; *In re Halkin, 194 U.S.App.D.C. 257, 598 F.2d 176 (1979)*; *Rodgers v. United States Steel Corp., 536 F.2d 1001 (3d Cir. 1976)*; *CBS Inc. v. Young, 522 F.2d 234 (6th Cir. 1975)*; *Chicago Council of Lawyers v. Bauer, 522 F.2d 242 (7th Cir. 1975)* Cert. denied, ***427 U.S. 912, 96 S. Ct. 3201, 49 L. Ed. 2d 1204 (1976)***. Because the possibility that the Voir dire will uncover substantial prejudice is remote at best, we need not decide the *First Amendment* issues now, and express no opinion thereon.

[16]** **[*897]** II. The Parties' Contentions Regarding the Size & Complexity of the Litigation

The defendants' motion is based, as we have noted, on the contention that this litigation is so extraordinarily massive and complex as to be beyond the practical abilities and limitations of a jury. In support of this contention, the defendants emphasize the nature of the conspiracy charged, the statutory claims asserted, the procedural posture of the case, and the anticipated length of trial. The defendants provided the following summary of their contentions in their first memorandum in support of their motion to strike the jury demand:

> 1. The alleged conspiracy is claimed to have been worldwide, to have lasted over a period of 30 years and to have involved more than 97 manufacturers, exporters and importers of consumer electronic products ("CEP's") of various national origins.
>
> 2. Over seventy of the alleged co-conspirators are not defendants in this proceeding. Necessarily plaintiffs will attempt to produce evidence to support their allegations that the non-defendant co-conspirators participated in the alleged conspiracy with the various defendants who are charged in the complaints. **[**17]** This will create complicated and confusing issues for the jury as to whether the defendants and alleged non-defendant co-conspirators knew of, joined and participated in the alleged conspiracy. More confusing will be the question of whether evidence presented as to specific defendant(s) and specific non-defendant co-conspirator(s) has been connected to and is admissible against the various defendants in the litigation.
>
> 3. The plaintiffs assert violations based upon various sophisticated and esoteric antitrust and trade regulation laws which few American lawyers let alone untrained laymen or jurors can understand and interpret. The allegations are further complicated by the fact that one of the laws, the Wilson Tariff Act (*15 U.S.C. § 18*), is rarely used and interpreted in litigation, and the 1916 Antidumping Act (*15 U.S.C. § 72*) has never been construed or interpreted in a trial situation in its over 60 year history. Even if appropriate and legally sufficient instructions are given to the jury as to the meaning of these laws and the standards of proof which must be met, application of complicated and detailed accounting, marketing, economic and legal evidence to such legal standards **[**18]** and guidelines would be mindboggling for a jury.
> 4. The trial of these litigations is anticipated to last at least one year.
> 5. The majority of the defendants are Japanese, their native language has no common basis with the English language and their business records and therefore much of the evidence in these litigations will be Japanese language documents.
> 6. At the time the trial commences almost nine years of discovery will have been completed, including the production of untold millions of documents and literally hundreds of depositions which will constitute the evidence to be presented. As noted above, a major portion of these documents are in Japanese and will require translation and interpretation. Further, much of the documentation whether in English, Japanese or other languages is of a highly technical engineering and accounting nature.
>
> 7. The evidence at trial will consist in part of the testimony of expert witnesses as to the nature of competition and marketing practices in both the United States and Japan CEP industries, accounting practices in both the United States and Japan CEP industries, the engineering and scientific developments of CEPs in both the Japanese **[**19]** and United States markets which will have to be applied to the vast quantity of factual information which will be introduced in both English and Japanese.
>
> 8. The cases involve overlapping and different products (the NUE case deals only with television receivers; while the **[*898]** Zenith case deals not only with television receivers but also with radios, stereos, audio equipment, tape recorders and components of such products); the injury claims involve overlapping and different time periods of the alleged conspiracy (NUE 1966 to 1970 and Zenith, 1968 to 1977). Further, the Zenith case challenges the acquisition by two Japanese manufacturers of failing American CEP manufacturers (Matsushita's acquisition of Motorola's color television receiver business and Sanyo's acquisition of Warwick). The Zenith case also includes charges of violations of the Robinson-Patman Act (*15 U.S.C. 13(a)*) which the NUE case does not.
> 9. The cases involve overlapping and different parties. The Zenith action involves six parties who are not parties in the NUE action. The Sony defendants are a party to the NUE action but not the Zenith action.

> 10. The defendants have asserted extensive counterclaims **[**20]** against plaintiff Zenith charging it with engaging in marketing practices in violation of the United States antitrust laws and in a conspiracy with certain other American CEP manufacturers, distributors, labor unions and others to prevent and impede the ability of the defendants in these litigations, particularly the Japanese defendants, from competing in the United States CEP industries through a series of sham and harassing charges, allegations, investigations and legal proceedings. The counterclaims involve highly sophisticated and technical legal and factual evidence which will require the presentation of vast quantities of materials.
>
> 11. While these cases are individually extraordinarily complex and involve diverse claims as to products, parties, statutes involved and damage periods, plaintiffs claim they involve a single conspiracy against the defendants and the alleged non-defendant co-conspirators. In such a situation consolidation for trial might seem a logical and efficient utilization of counsels' and the Court's time. However, to consolidate cases which individually are incapable of comprehension by a jury for a trial before a jury would exacerbate and expand the complexity **[**21]** of the trial by a geometric progression which defies quantification.

This summary has been expanded and supplemented in a lengthy affidavit and numerous other submissions.

In their affidavit, the defendants assert that they have produced more than ten million pages of documents; that the plaintiffs have copied one million pages and "expect to introduce several thousand documents into evidence." For their own part, the defendants plan to offer an undefined "major portion" of the 2 million pages they have copied from the more than twenty million pages produced by the plaintiffs.

The defendants' views are also illustrated by the sample special interrogatories submitted so that we might identify the issues to be decided by the jury and assess their complexity.

With respect to the conspiracy claims, the defendants' proposed sample interrogatory contains 23 subparts, to be asked of the jury "for each of the 24 defendants with respect to each of the 108 other defendants and alleged co-conspirators." Together with other subparts which may be required, the defendants suggest that the jury might therefore be asked "over 15,000 separate interrogatories for each relevant product market" **[**22]** as to the conspiracy claims alone. In addition, the defendants argue that because of the thousands of models of consumer electronics products imported and sold by each of the defendants, thousands upon thousands of special interrogatories will have to be propounded to the jury on the dumping claims as well as the other statutory causes of action asserted by the plaintiffs.

The plaintiffs' response to these contentions is simply that the case is large, but not complex. First, they emphasize that they charge only one conspiracy, not many. Therefore, it would serve no purpose to ask the jury to answer a complete set of conspiracy interrogatories for each of the 2,316 **[*899]** possible pairings of each defendant with every other co-conspirator. Instead, they suggest posing "simply the question whether the plaintiffs have proved that the individual defendants have been engaged in an unlawful combination or conspiracy in restraint of trade." As regards the thousands of special interrogatories which defendants say would have to be propounded on the dumping claims, plaintiffs submit that the jury need not decide separately whether there has been dumping as to each of the thousands of models **[**23]** of consumer electronic products involved, and need not perform a separate computation of dumping margins for each of these models.

According to the plaintiffs, the jury's task will be simplified by other factors. First, although there are 24 defendants, they are grouped into no more than ten separate enterprises. Second, the difficulties attending class actions are not present here. Third, plaintiffs note that there are only two cases involved, compared with the 18 separate cases involved in one litigation in which a jury demand has been struck. [17] In sum, the plaintiffs conclude,

---

[17] See *In re U. S. Financial Securities Litigation, 75 F.R.D. 702 (S.D.Cal.1977)* (striking jury demand in litigation involving eighteen cases consolidated for trial in which five classes had been certified). Permission to appeal from the order of the District Court was granted by the Ninth Circuit on August 29, 1977. That appeal is currently pending.

> the fact remains that the present litigation involves classic conspiracy claims **[**24]** and proof of exactly the same nature as that which has been presented in dozens and dozens of private antitrust actions and criminal prosecutions across the nation. . . . The issues of motive, intent and conspiracy . . . are of the type routinely submitted to juries in the federal courts on a daily basis. As in most cases involving a number of discrete transactions, the jury will be assisted by presentation of the evidence in a summarized format easily grasped by individual jurors.

We expect that the actual size and complexity of this litigation falls somewhere in between the two extremes portrayed by the parties. We are skeptical of the plaintiffs' efforts to portray this litigation as an essentially simple, "single conspiracy" case, although of course we express no opinion as to what they may be able to prove at trial. We are equally skeptical of the defendants' contentions regarding the number of documents they will introduce and the number of special interrogatories which would have to be submitted to a jury. [18] By any yardstick, this case is at least as large and complex as the others in which jury demands have been struck. See pp. 923-925 Infra. However, resolution of these **[**25]** disputes as to the Degree of complexity of this case is unnecessary in light of our discussion of the legal issues, to which we now turn.

III. Discussion

A. Introduction

The issue before us is whether trial by jury, usually available as of right **[**26]** in private, treble-damage antitrust cases, is guaranteed even in a case so massive and complex as to be beyond "the practical abilities and limitations of juries."

The plaintiffs, relying heavily on the decision of the Supreme Court in *Fleitmann v. Welsbach Street Lighting Co., 240 U.S. 27, 36 S. Ct. 233, 60 L. Ed. 505 (1916)*, argue vigorously that the *Seventh Amendment* guarantees their right to a jury trial, regardless of considerations of size and complexity. **[*900]** In Fleitmann, the Court held that a shareholders' derivative action could not be brought in equity when the underlying corporate claim was one for treble damages for violation of the antitrust laws, because to permit equity jurisdiction over such actions would deprive the defendants of their right to trial by jury:

> (T)he inquiry . . . arises why the defendants' right to a jury trial should be taken away . . . .
> (W)e agree with the courts below that when a penalty of triple damages is sought to be inflicted, the statute should not be read as attempting to authorize liability to be enforced otherwise than through the verdict of a jury in a court of common law.
>
> On the contrary, it plainly provides the latter **[**27]** remedy, and it provides no other.

Id., 240 U.S. at 28-29, 36 S. Ct. at 234. [19] Since the Fleitmann decision, it has been regarded as "well settled" that ***HN1***[] antitrust claims for treble damages are "triable by jury on timely demand of a party." *Ring v. Spina, 166*

---

[18] In this respect, we note that Rule 52(a) requires the judge in a bench trial to find both ultimate and subsidiary facts with "detail and exactness." See *EEOC v. United Virginia Bank, 555 F.2d 403 (4th Cir. 1977)*; *O'Neill v. United States, 411 F.2d 139, 146 (3d Cir. 1969)*; *Roberts v. Ross, 344 F.2d 747, 751 (3d Cir. 1965)*. The number of findings which a court would have to make might therefore equal or exceed the number of interrogatories which would have to be submitted to a jury. If this number were a mere 50,000 a number well within the defendants' projections and if the finder of fact were to work 40 hours a week without respite, spending a mere five minutes on each, it would take the court or jury two full years just to make the requisite findings of fact.

[19] At the time that the Fleitmann suit was brought, only the government could seek an injunction to restrain an antitrust violation. Before the Supreme Court issued its decision, the Clayton Act extended that right to private parties; however, the Court rejected the notion that this effected any change in the right to a jury trial on treble damage claims. *240 U.S. at 29, 36 S. Ct. 233, 60 L. Ed. 505*.

F.2d 546, 550 (2d Cir.) Cert. denied, *335 U.S. 813, 69 S. Ct. 30, 93 L. Ed. 368 (1948)*. See, e.g., *Beacon Theatres, Inc. v. Westover, 359 U.S. 500, 504, 79 S. Ct. 948, 3 L. Ed. 2d 988 (1959)*; *Calnetics Corp. v. Volkswagen of America, Inc., 532 F.2d 674, 690* (9th Cir.) Cert. denied, *429 U.S. 940, 97 S. Ct. 355, 50 L. Ed. 2d 309 (1976)*; *Siegfried v. Kansas City Star Co., 298 F.2d 1* (8th Cir.) Cert. denied, *369 U.S. 819, 82 S. Ct. 831, 7 L. Ed. 2d 785 (1962)*; *Hartford-Empire Co. v. Glenshaw Glass Co., 3 F.R.D. 50 (W.D.Pa.1943)*.

[28]** The defendants concede "the applicability of the *Seventh Amendment* to all but the most lengthy and complex damage actions." They frame the issue as "whether or not there is a certain small class of cases which are too lengthy and complex to be handled by a jury, and, therefore, must be tried before the Bench." In support of their argument that this litigation can be placed in such a class of cases without offending the constitution, the defendants first argue that complex cases were historically tried in equity. Moreover, they urge us to follow the example of several courts which have recently struck jury demands in large and complex actions, including two antitrust cases. See pp. 923-925, Infra. These courts have found the *Seventh Amendment* inapplicable to such matters, largely on the authority of dicta in a recent Supreme Court decision implying that the constitutional right to a jury trial in civil actions may sometimes depend on "the practical abilities and limitations of juries." *Ross v. Bernhard, 396 U.S. 531, 538 n. 10, 90 S. Ct. 733, 738, 24 L. Ed. 2d 729 (1970)*.

B. Construction of the Antitrust Statutes: Need We Reach the *Seventh Amendment* Issue ?

Although the parties have **[**29]** treated the issue before us as depending solely on the scope of the *Seventh Amendment* right to jury trial, we must first determine whether it is necessary to reach the constitutional issue. " "If there is one doctrine more deeply rooted than any other in the process of constitutional adjudication, it is that we ought not to pass on questions of constitutionality . . . unless such adjudication is unavoidable.' *Spector Motor Co. v. McLaughlin, 323 U.S. 101, 105, 65 S. Ct. 152, 154, 89 L. Ed. 101 (1944)*. ***HN2***[] Before deciding **[*901]** the constitutional question, it (is) incumbent on . . . courts to consider whether . . . statutory grounds might be dispositive." *New York City Transit Authority v. Beazer, 440 U.S. 568, 582, 99 S. Ct. 1355, 1364, 59 L. Ed. 2d 587 (1979)*. See *Ashwander v. TVA, 297 U.S. 288, 346-48, 56 S. Ct. 466, 80 L. Ed. 688 (1936)* (Brandeis, J., concurring).

HN3[] The right to jury trial may, of course, be expressly provided by the terms of a federal statute. See, e.g., Great Lakes Act, *28 U.S.C. § 1873* (tort and contract actions in admiralty jurisdiction involving shipping on the Great Lakes); *28 U.S.C. § 1874* (jury to assess sum due on forfeiture of bond); 11 U.S.C. § 42(a) **[**30]** (right of involuntary bankrupt to jury trial). Because there is no constitutional right to a Nonjury trial, the *Seventh Amendment* does not prevent either judicial or legislative extension of the right to jury trial, and such statutes raise no constitutional difficulties. See e.g., The Propeller Genesee *Chief v. Fitzhugh, 53 U.S. (12 How.) 443, 459-50, 13 L. Ed. 1058 (1852)* (Great Lakes Act); 9 Wright and Miller, Federal Practice and Procedure § 2302, at 15 (1971).

On the other hand, ***HN4***[] when a statute creating new rights or remedies is silent as to the mode of trial, the availability of a jury as of right generally becomes a *Seventh Amendment* question. Courts fit the statutory claim "into the nearest historical analogy to determine whether there is a (constitutional) right to jury trial." James, Right to a Jury Trial in Civil Actions, 72 Yale L.J. 655, 656 (1963); *Ross v. Bernhard, 396 U.S. 531, 543 n. 1, 90 S. Ct. 733, 24 L. Ed. 2d 729 (1970)* (Stewart, J., dissenting); *Patzig v. O'Neil, 577 F.2d 841, 848 (3d Cir. 1978)*; *Nedd v. Thomas, 316 F. Supp. 74, 77 (M.D.Pa.1970)*; 5 Moore's Federal Practice P 38.11(7), at 128-128.4 (2d ed. 1978); 9 Wright and Miller, Federal Practice and Procedure **[**31]** §§ 2302, 2316 at 16, 79-80 (1971). See, e.g., *Pernell v. Southall Realty, 416 U.S. 363, 375-76, 94 S. Ct. 1723, 40 L. Ed. 2d 198 (1974)*; *Curtis v. Loether, 415 U.S. 189,*

The plaintiff in Fleitmann sought relief in equity because shareholder derivative suits were purely equitable actions, not cognizable at law. See *United Copper Co. v. Amalgamated Copper Co., 244 U.S. 261, 37 S. Ct. 509, 61 L. Ed. 1119 (1917)* (shareholder had no standing to sue at law on a corporate cause of action).

The merger of law and equity, effected by the adoption of the Federal Rules of Civil Procedure in 1938, eliminated the dilemma. The legal claims in a derivative action can now be tried by a jury after a court determination of the plaintiff's right to proceed on the corporation's behalf. See *Ross v. Bernhard, 396 U.S. 531, 535-37* & n. 6, *90 S. Ct. 733, 24 L. Ed. 2d 729 (1970)*.

193-97, 94 S. Ct. 1005, 39 L. Ed. 2d 260 (1974); Porter v. Warner Holding Co., 328 U.S. 395, 66 S. Ct. 1086, 90 L. Ed. 1332 (1946); Luria v. United States, 231 U.S. 9, 34 S. Ct. 10, 58 L. Ed. 101 (1913); United States v. Jepson, 90 F. Supp. 983 (D.N.J.1950); Olearchick v. American Steel Foundries, 73 F. Supp. 273 (W.D.Pa.1947). As the Court said in Curtis :

> (W)e have often found the Seventh Amendment applicable to causes of action based on statutes. See, e.g., Dairy Queen, Inc. v. Wood, 369 U.S. 469, 477, 82 S. Ct. 894, 899, 8 L. Ed. 2d 44 (1962) (trademark laws); Hepner v. United States, 213 U.S. 103, 115, 29 S. Ct. 474, 479, 53 L. Ed. 720 (1909) (immigration laws); Cf. Fleitmann v. Welsbach Street Lighting Co., 240 U.S. 27, 36 S. Ct. 233, 60 L. Ed. 505 (1916) (antitrust laws), and the discussion of Fleitmann in Ross v. Bernhard, 396 U.S. 531, 535-536, 90 S. Ct. 733, 736-737, 24 L. Ed. 2d 729 (1970). Whatever doubt may have existed should now be dispelled. **HN5**[] The Seventh Amendment does apply to actions enforcing **[**32]** statutory rights, and requires a jury trial upon demand, if the statute creates legal rights and remedies, enforceable in an action for damages in the ordinary courts of law.

415 U.S. at 193-94, 94 S. Ct. at 1008 (footnotes omitted).

Thus, if in enacting the antitrust laws Congress has granted the right to trial by jury in antitrust damage suits regardless of their size and complexity, any such limitation to the scope of the Seventh Amendment would be irrelevant. But if the antitrust laws do not themselves guarantee trial by jury on demand, we would have to decide the constitutional issue. [20]

[33]** **[*902]** Private damage suits for relief under the antitrust laws are authorized by § 4 of the Clayton Act, 15 U.S.C. § 15, which replaced § 7 of the Sherman Act, ch. 647, § 7, 26 Stat. 210 (1890). Neither section makes any express mention of trial by jury, but the matter does not end there. In Lorillard v. Pons, 434 U.S. 575, 98 S. Ct. 866, 55 L. Ed. 2d 40 (1978), the Court interpreted the Age Discrimination in Employment Act of 1967 as requiring a jury trial on demand, even though that statute is also silent on the issue. In drafting the ADEA, Congress incorporated by reference the remedial provisions of the Fair Labor Standards Act, which courts had held to carry a constitutional right to trial by jury. Because of this, the Court held, the statutory scheme showed that congress "intended that in a private action under the ADEA a trial by jury would be available where sought by one of the parties." 434 U.S., at 585, 98 S. Ct. at 872. The Court's analysis thus applied the "principle of reenactment," a settled canon of statutory construction which presumes that when language with an accepted meaning derived from judicial or administrative interpretation is thereafter used in **[**34]** a statute, Congress intended the language to carry its accepted meaning

---

[20] Although decisions of the Supreme Court have necessarily assumed that there is a right to a jury trial in antitrust suits, the Court has never had to decide whether the right is grounded in the statute or in the Seventh Amendment. The rather oblique statement of the Court in Fleitmann that "the statute should not be read as attempting to authorize liability to be enforced otherwise than through the verdict of a jury . . . . (but) it plainly provides the latter remedy, and it provides no other," 240 U.S. at 29, 36 S. Ct. at 234, can be read as finding the right in the statute, or it could be read as confirming and adding to the clear holding of the Court of Appeals in that case that the right is constitutional, See Fleitmann v. United Gas Improvement Co., 211 F. 103 (2d Cir. 1914), Aff'd sub nom. Fleitmann v. Welsbach Street Lighting Co., 240 U.S. 27, 36 S. Ct. 233, 60 L. Ed. 505 (1916), especially in view of the settled principle that "courts of equity do not award . . . damages penal in character without express statutory authority" Decorative Stone Co. v. Building Trades Council, 23 F.2d 426, 427-28 (2d Cir.) Cert. denied, ***277 U.S. 594, 48 S. Ct. 530, 72 L. Ed. 1005 (1928)***.

Later decisions of the Court have been equally ambiguous. In Beacon Theatres, Inc. v. Westover, 359 U.S. 500, 79 S. Ct. 948, 3 L. Ed. 2d 988 (1959), the Court discussed the right to a jury trial on the issues presented by an antitrust counterclaim. At one point in its opinion the jury trial right in antitrust cases is described as "an essential part of the congressional plan for making competition rather than monopoly the rule of trade . . .," id., at 504, 79 S. Ct. at 953 (dictum); at another the Court refers to the right involved as constitutional. Id., at 510, 79 S. Ct. 948 (dictum). In Ross v. Bernhard, 396 U.S. 531, 90 S. Ct. 733, 24 L. Ed. 2d 729 (1970), the Court described Fleitmann and said, "Although the decision had obvious Seventh Amendment overtones, its ultimate rationale was grounded in the antitrust laws." Id., at 536, 90 S. Ct. at 737 (dictum). See id., at 547, 90 S. Ct. 733 (Stewart, J., dissenting).

into the statute. See United States v. Board of Commissioners, 435 U.S. 110, 132-35, 98 S. Ct. 965, 55 L. Ed. 2d 148 (1978); Douglas v. Seacoast Products, Inc., 431 U.S. 265, 278-79, 97 S. Ct. 1740, 52 L. Ed. 2d 304 (1977).

Although the legislative history of the Sherman and Clayton Acts may be susceptible to a similar interpretation, the effort would be somewhat strained. Scattered remarks of several Senators during the debates prior to passage of the Sherman Act show that they assumed that jury trials would be available in antitrust damage actions. See 21 Cong.Rec. 1767 (1890) (remarks of Sen. George); id., at 2643 (remarks of Sen. Gray); id., at 3149 (remarks of Sens. Morgan and George). A belief that parties in treble damage antitrust litigation were entitled to jury trial as a matter of constitutional right is also evident in the remarks of several members of Congress during the debates prior to passage of the Clayton Act. See 51 Cong.Rec. 1466, 88 (1914) (remarks of Reps. Scott and Volstead); id., at 9489 (remarks of Reps. Floyd and Volstead); id., at 9491 (remarks of Reps. Green and Scott). [21] Moreover, **[**35]** because damages and especially penal damages were a traditional remedy of the courts of law, See pp. 921-922, Infra, Congress was almost certainly aware that litigants in antitrust damage suits would be entitled to trial by jury as a matter of constitutional right. However, mindful of "the difficulty of discerning congressional intent where the statute provides no express answer," Lorillard v. Pons, 434 U.S. at 585, 98 S. Ct. at 872, we find this evidence insufficient to allow an extension of the reasoning of Lorillard to the antitrust statutes.

[*903] We note first that since Parsons v. Bedford, 28 U.S. (3 Pet.) 433, 7 L. Ed. 732 (1830), it has been clear and Congress has presumably been aware that the constitutional jury trial right attaches to statutory causes **[**36]** of action involving "legal" rights and remedies. [22] See Pernell v. Southall Realty, 416 U.S. 363, 374-75, 94 S. Ct. 1723, 40 L. Ed. 2d 198 (1974); Curtis v. Loether, 415 U.S. 189, 193-94, 94 S. Ct. 1005, 39 L. Ed. 2d 260 (1974). In spite of this, and with the sole exception of Lorillard v. Pons, the Supreme Court has consistently used constitutional analysis to determine the availability of trial by jury when the statute creating a cause of action is silent on the subject. This resort to Seventh Amendment analysis for most causes of action based on statutes implies strongly that mere congressional Awareness of the applicability of the Seventh Amendment, like that evident in the legislative history of the antitrust laws, is not enough to make jury trial available as a matter of statutory construction.

[37]** By way of contrast, the legislative history of the ADEA provides much stronger evidence that Congress was not only aware of, but intended that jury trials be available.

In Lorillard, the Court stressed Congress' deliberate choice of certain of the FLSA's remedial provisions, and its rejection both of other portions of the FLSA and of the remedial provisions of Title VII, which, though they accord similar relief, do so in terms not held to carry a right to jury trial. Clearly, Congress could have chosen to incorporate instead the remedial provisions of Title VII, thereby entitling plaintiffs to virtually identical relief, but without a jury.

The Congresses that enacted the antitrust laws were in a very different position. Unlike the backpay available under Title VII, the damages available for antitrust violations cannot be fairly described as "restitution" or other equitable relief. See Bernstein v. Universal Pictures, Inc., 79 F.R.D. 59, 66-67 (S.D.N.Y.1978). And in suits for penal damages, the right to a jury was then as much a part of the constitutional landscape as it is now in trials for criminal offenses punishable by lengthy imprisonment and large fines. When Congress defines **[**38]** certain conduct as a serious offense, it certainly "intends" that the conduct be severely punished, and necessarily Assumes that defendants would have the right to trial by jury. However, it need not "intend" this to be the case; indeed, it might devoutly wish just the opposite, but feel constrained by the constitution.

---

[21] Prior to consideration of the Clayton Act, it had been held that damage suits under the Sherman Act were actions at law in which the parties were entitled to trial by jury. See Meeker v. Lehigh Valley R. R., 162 F. 354 (C.C.S.D.N.Y.1908).

[22] The presumption that Congress intends to "reenact" the meaning given to language by judicial interpretation is particularly strong when the interpretation at issue is that of the Supreme Court. Ward v. Northern Ohio Telephone Co., 251 F. Supp. 606, 610 (N.D.Ohio 1966) Aff'd. per curiam 381 F.2d 16 (6th Cir. 1967). See Shapiro v. United States, 335 U.S. 1, 16, 68 S. Ct. 1375, 92 L. Ed. 1787 (1948); Hecht v. Malley, 265 U.S. 144, 153, 44 S. Ct. 462, 68 L. Ed. 949 (1924).

Such constraint was evidently felt by the Congress that passed the Clayton Act; the discussion there of trial by jury showed less concern for the right to a jury trial than for the constitutionality of the proposed changes in the antitrust laws then being debated. See, e.g., 51 Cong.Rec. 9491 (1914) (remarks of Reps. Green and Scott). [23] Whereas Congress in the ADEA deliberately **[*904]** chose statutory language known to carry a right to a jury trial when it could instead have provided equivalent "equitable" relief, Congress in enacting the antitrust laws had no such choice, because equity had no remedy equivalent to treble damages. Clearly, it makes much more sense to discern an "intention" in the first situation than in the second.

[39]** Thus, because the legislative history of the antitrust laws does not yield the positive evidence of congressional intent required to hold that the plaintiff's right to a jury trial is guaranteed by the statute, we must address the constitutional issue. [24]

---

[23] The debates in the House concerned a proposal that final judgments in suits brought by the government have conclusive collateral estoppel effect, both for and against the defendant, in subsequent private actions. Since there would be no right to a jury in suits brought by the government in equity to restrain antitrust violations, Congress was concerned that the statute might unconstitutionally foreclose presentation of those issues to a jury in later damage suits.

The colloquy included the following statement by Representative Green:

I am not entirely clear as to whether this section is constitutional even as against the defendant corporation, but I am inclined to think that the provision might stand in that respect. . . . The suit commenced by a third party might be a suit for damages commenced in a case at law, in which either party is entitled to a trial by jury. . . . (T)he trial by jury will still go on as to the extent of the damages; . . . (b)ut I agree with the gentleman from Texas (Mr. BEALL) in saying that even as to that matter the section is of doubtful constitutionality. . . . He can use, presumably, and obtain the same evidence which the Government has used, even though the decree be not made conclusive in his favor; but if it is possible, if it can constitutionally be made conclusive in his favor, I would be in favor of having it done. In any event, the amendment of the gentleman from Minnesota (Mr. VOLSTEAD) ought to be agreed to. . . ." (Emphasis added)

And this response from Representative Scott:

I think there is a grave question also as to the constitutionality of the statute, even if changed to conform to the amendment offered by the gentleman from Minnesota. However, I am not clear upon that question. I am satisfied, however, that the matter never will be settled until it reaches the Supreme Court of the United States. When you enact into this statute a provision which deprives a corporation of the right to a hearing before a jury as provided by the Constitution you will find that statute challenged and you will never know what the law is upon the question until the court of last resort speaks the last word. . . .

However, upon no course of reasoning could it be held that this statute in its present form would be constitutional, and, therefore, I believe that the amendment of the gentleman from Minnesota should prevail.

The proposal being debated was eventually rejected in favor of what is now *15 U.S.C. § 16(a)*, providing that the judgment in a government suit is only prima facie evidence, and only against the defendant.

[24] Even if we were able to find the right to jury trial implicit in the statutory scheme, it would still be necessary to address the constitutional question in order to determine the scope of the statutory right, because the right incorporated by such an exercise of statutory construction Is the constitutional right. We might also have to decide whether the right thus incorporated is "frozen" despite later changes in what the *Seventh Amendment* is thought to require, or whether the statutory right is now whatever the *Seventh Amendment* now requires, even if it was thought to require something else at the time of enactment of the statute in question. For example, at the time that the Clayton Act became law, Congress doubtless thought not only that treble damage actions required juries, but that they required juries of twelve. See e.g., *Capital Traction Co. v. Hof, 174 U.S. 1, 13-14, 19 S. Ct. 580, 43 L. Ed. 873 (1899)*; *Maxwell v. Dow, 176 U.S. 581, 586, 20 S. Ct. 448, 44 L. Ed. 597 (1900)* ("And as the right of trial by jury in certain suits at common law is preserved by the *Seventh Amendment*, such a trial implies that there shall be a unanimous verdict of twelve jurors in all Federal courts where a jury trial is held."). Now that the *Seventh Amendment* is known Not to require a jury of twelve, See *Colgrove v. Battin, 413 U.S. 149, 93 S. Ct. 2448, 37 L. Ed. 2d 522 (1973)*, courts in districts that do not make a jury of twelve available as of right would need to decide whether such juries must nevertheless be available to the parties in antitrust suits and other actions based on statutes whose legislative histories show some expectation that the constitution would require juries of twelve.

[40]** C. The *Seventh Amendment* and the Historical Test

HN6[] The *Seventh Amendment* provides:

> In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury, shall be otherwise reexamined in any Court of the United States, than according to the rules of the common law.

Although the continuing vitality of the *Bill of Rights* after nearly two centuries may be partly due to our courts' recognition of the need to read twentieth-century **[*905]** meanings into eighteenth-century terms, [25] *HN7*[] the scope of the *Seventh Amendment* has traditionally been determined by applying a comparatively static, "historical test," which looks to the English common law as it existed in 1791, when the *Seventh Amendment* became part of the constitution. [26] See, e.g., *Parklane Hosiery Co., Inc. v. Shore, 439 U.S. 322, 99 S. Ct. 645, 58 L. Ed. 2d 552 (1979)*; *Curtis v. Loether, 415 U.S. 189, 193, 94 S. Ct. 1005, 39 L. Ed. 2d 260 (1974)*; *Baltimore & Carolina Line, Inc. v. Redman, 295 U.S. 654, 657, 55 S. Ct. 890, 891, 79 L. Ed. 1636 (1935)* ("The right of trial by jury thus preserved is the right which existed under the English **[**41]** common law when the amendment was adopted."); *Dimick v. Schiedt, 293 U.S. 474, 476, 55 S. Ct. 296, 79 L. Ed. 603 (1935)*. See generally F. James & G. Hazard, Civil Procedure § 8.1 at 347 (1977); 5 Moore's Federal Practice P 38.08(5), at 79-80 (2d ed. 1978). [27]

This type of puzzle would be presented here by the alternate possibilities that there was a "complexity" exception to the jury trial rule at the time that the antitrust laws were enacted, (a possibility suggested by the defendants' reliance on *Kirby v. Lake Shore & M. S. R. R., 120 U.S. 130, 7 S. Ct. 430, 30 L. Ed. 569 (1887)*, decided just three years before the Sherman Act), or that such an exception was first recognized to be of constitutional dimension in *Ross v. Bernhard, 396 U.S. 531, 538 n. 10, 90 S. Ct. 733, 24 L. Ed. 2d 729 (1970)*. The decisions of the Court in Colgrove and in *Parklane Hosiery Co. v. Shore, 439 U.S. 322, 99 S. Ct. 645, 58 L. Ed. 2d 552 (1979)*, would seem to imply that the statutory right is whatever the constitution would require, complete with exceptions and limitations, but that issue is not before us.

[25] See, e.g., *Jackson v. Bishop, 404 F.2d 571, 578-79 (8th Cir. 1968)* (Blackmun, J.) (scope of the *Eighth Amendment* ban on cruel and unusual punishment is determined by society's "evolving standards of decency").

[26] The first ten amendments were submitted to the states by Congress on September 25, 1789, 1 Stat. 97 (1789), and became effective on December 15, 1791, when Virginia brought to eleven the number of states approving them. See Wolfram, The Constitutional History of the *Seventh Amendment*, 57 Minn.L.Rev. 639, 725-726 (1973).

[27] The historical test may have evolved almost by accident. See generally, Wolfram, Supra, note 26 at 639-642. The reference to the law of England appears to have been first used by Justice Story in *United States v. Wonson, 1 Gall. 5, 28 F.Cas. 745, 750 (C.C.D.Mass.1812)*:

Beyond all question, the common law here alluded to (in the *Seventh Amendment*) is not the common law of any individual state, (for it probably differs in all), but it is the common law of England, the grand reservoir of all our jurisprudence. It cannot be necessary for me to expound the grounds of this opinion, because they must be obvious to every person acquainted with the history of the law.

According to Wolfram, this rule has never been seriously questioned: "perhaps later judges have hesitated to appear to be the kind of intractable person that would require Mr. Justice Story to elaborate on the obvious." Wolfram, Supra, 57 Minn.L.Rev. at 641. Nevertheless, Wolfram's thorough canvass of the debates in the Constitutional Convention and in the state ratification conventions demonstrates that the reference to English law could hardly have been "obvious." See *id., at 712-18, 721-22, 734*.

Once the use of English common law had become settled, the historical test followed, though not until the end of the nineteenth century. See id., at 642. Wolfram suggests that this is because earlier cases involved issues as to which changes in the English common law were irrelevant. Id. However, since England had no parallel constitutional guarantee, Parliament was free to change the scope of the right to a jury, and it did. The Judicature Acts of 1873-75 permitted the court "to dispense with a jury in chancery cases, cases requiring review of voluminous documents, and cases requiring any scientific or other type of investigation not conveniently made with a jury." Higginbotham, Continuing the Dialogue: Civil Juries and the Allocation of Judicial Powers, 56 Tex.L.Rev. 47, 51 (1977). Thus, the historical reference may have been required to prevent the scope of an

[42]** In looking to the English common law of 1791, the critical distinction is that between "law" and "equity:"

> By common law, (the framers of the amendment) meant what the constitution denominated in the third article "law;" not merely suits, which the common law **[*906]** recognized among its old and settled proceedings, but suits in which legal rights were to be ascertained and determined, in contra-distinction to those where equitable rights alone were recognized, and equitable remedies were administered; or where, as in the admiralty, a mixture of public law, and of maritime law and equity, was often found in the same suit. Probably, there were few, if any, states in the Union, in which some new legal remedies, differing from the old common-law forms, were not in use; but in which, however, the trial by jury intervened, and the general regulations in order respects were according to the course of the common law. Proceedings in cases of partition, and of foreign and domestic attachment, might be cited as examples variously adopted and modified. In a just sense, the amendment then may well be construed to embrace all suits, which are not of equity and admiralty jurisdiction, whatever **[**43]** may be the peculiar form which they may assume to settle legal rights.

Parsons v. Bedford, 28 U.S. (3 Pet.) 433, 446, 7 L. Ed. 732 (1830). Accord, e.g., *Atlas Roofing Co., Inc. v. OSHRC, 430 U.S. 442, 449, 97 S. Ct. 1261, 51 L. Ed. 2d 464 (1977)*; *Pernell v. Southall Realty, 416 U.S. 363, 374-75, 94 S. Ct. 1723, 40 L. Ed. 2d 198 (1974)*; *Curtis v. Loether, 415 U.S. 189, 193, 94 S. Ct. 1005, 39 L. Ed. 2d 260 (1974)*; *Ross v. Bernhard, 396 U.S. 531, 533, 90 S. Ct. 733, 24 L. Ed. 2d 729 (1970)*. Because the Court has applied this rule in such a way as to "preserve the substance of the common-law right of trial by jury, as distinguished from mere matters of form or procedure," *Baltimore & Carolina Line, supra, 295 U.S. at 657, 55 S. Ct. at 891*, it has been able to accommodate procedural change without being unfaithful to the historical test. See, e.g., *Colgrove v. Battin, 413 U.S. 149, 156-57, 93 S. Ct. 2448, 37 L. Ed. 2d 522 (1973)* (twelve-member jury not required by *Seventh Amendment*); *Galloway v. United States, 319 U.S. 372, 390, 63 S. Ct. 1077, 87 L. Ed. 1458 (1943)* (directed verdict permitted by *Seventh Amendment*); *Gasoline Products Co. v. Champlin Refining Co., 283 U.S. 494,* ***[**44]*** *498, 51 S. Ct. 513, 75 L. Ed. 1188 (1931)* (New trial on less than all issues in case may be ordered, even though at common law there was no practice of setting aside a verdict in part); *Ex parte Peterson, 253 U.S. 300, 309, 40 S. Ct. 543, 64 L. Ed. 919 (1920)* (court appointment of auditor to examine complex accounts between the parties in order to simplify and define issues does not violate *Seventh Amendment*, as long as ultimate determination of disputed issues is left to the jury); *Walker v. New Mexico & S.P.R.R., 165 U.S. 593, 596, 17 S. Ct. 421, 41 L. Ed. 837 (1897)* (where jury's general verdict is inconsistent with jury's answers to special interrogatories, *Seventh Amendment* is not violated by entry of judgment on the basis of the special verdict, setting the general verdict aside). Although in each of these cases the Court approved procedural incidents of jury trials different from those that had been in practice in 1791, in none was the right to a jury trial lost where that right had been enjoyed at the time of the adoption of the *Seventh Amendment*. [28]

American constitutional right from depending on changes in English practice a century after independence. See Wolfram, Supra, at 642.

Although English decisions from the 1780's and 90's are obviously the most helpful in determining which issues were tried to juries there in 1791, *Seventh Amendment* questions frequently require recourse to earlier or later cases, which "presumably would be authoritative only to the extent that they themselves accurately reflect the English state of practice in 1791." Id., at 642, n. 8. But since the constitution itself has sought to "preserve" that state of practice in the federal courts, federal cases may be presumed to reflect that position somewhat more accurately than cases from the English courts or the state courts, other things being equal. Most state constitutions also "preserve" the right to trial by jury in similar terms, but the scope of those guarantees varies widely. This is because the practices in the original 13 colonies varied and because states admitted later sometimes used a different referent. For example, in California the scope of the right is determined by reference to the English common law in 1850, when California's constitution was adopted. See F. James & G. Hazard, Civil Procedure § 8.1 at 347-348 & n. 4 (1977).

[28] In *Parklane Hosiery Co. v. Shore, 439 U.S. 322, 99 S. Ct. 645, 58 L. Ed. 2d 552 (1979)*, the Court held that a defendant in a private damage suit may be collaterally estopped from relitigating before a jury issues adversely determined in an earlier injunctive action brought by the SEC, where no jury was available. Whether he is thereby denied a jury determination of an issue on which he would have been entitled to one in 1791 depends on how the question is put. It is true that there would have been no estoppel in 1791 because at that time collateral estoppel was available only between parties in the prior litigation; on the other hand, it is equally the case that at common law, "a litigant was not entitled to have a jury determine issues that had been

[45]** We have noted earlier the defendants' concession that the *Seventh Amendment* applies "to all but the most lengthy and **[*907]** complex damage actions." [29] The issue, therefore, as framed by the historical test, is whether jury trials were unavailable in complex matters in 1791.

[46]** 1. The Accounting Cases

In support of their contention that "at the time that the *Seventh Amendment* was ratified, . . . litigations involving complex facts or sophisticated business transactions were tried before the Court and not a jury," the defendants cite a number of cases in which plaintiffs proceeded in equity to obtain "an accounting." In some of these cases, the jurisdiction of a court of equity was sustained, even though the matter was cognizable at law, because the complexity of the accounts between the parties rendered the remedy at law inadequate. For example, in *Kirby v. Lake Shore & M. S. R. R., 120 U.S. 130, 7 S. Ct. 430, 30 L. Ed. 569 (1887)*, the Court said:

> The case made by the plaintiff is clearly one of which a court of equity may take cognizance. The complicated nature of the accounts between the parties constitutes itself a sufficient ground for going into equity.

Id., at 134, 7 S. Ct. at 432. And in *Fowle v. Lawrason, 30 U.S. (5 Pet.) 495, 8 L. Ed. 204 (1831)*, while holding that the case at bar was not sufficiently complex to justify equity jurisdiction, the Court stated the rule as being that "in transactions (not involving certain fiduciary relationships), **[**47]** great complexity ought to exist in the accounts, or some difficulty at law should interpose, some discovery should be required, in order to induce a court of chancery to exercise jurisdiction." *Id., at 503*. Accord, *H. B. Zachry Co. v. Terry, 195 F.2d 185 (5th Cir. 1952)*; *Quality Realty Co. v. Wabash Ry. Co., 50 F.2d 1051 (8th Cir. 1931)*; *Goffe & Clarkener, Inc. v. Lyons Milling Co., 26 F.2d 801 (D.Kan.1928)* (discussing cases), Aff'd on other grounds, *46 F.2d 241 (10th Cir. 1931)*; Harrington v. Churchward, 29 Law J. Ch. 521 (1860); O'Connor v. Spaight, 1 Sch. & Lefr. 305, 309 (Irish Ch.1804). See *Kilbourn v. Sunderland, 130 U.S. 505, 9 S. Ct. 594, 32 L. Ed. 1005 (1889)*; *Standard Oil Co. v. Atlantic Coast Line R. Co., 13 F.2d 633 (W.D.Ky.1926)* Aff'd on other grounds, *275 U.S. 257, 48 S. Ct. 107, 72 L. Ed. 270 (1927)*. Thus, complexity was sometimes a factor in determining the mode of trial. However, because in these cases the plaintiffs could choose whether to seek relief in law or equity, jury trials Were available even if only at the plaintiff's opinion. Moreover, the merger of law and equity in the federal courts casts considerable doubt on the survival of the plaintiff's historical **[**48]** ability to choose a non-jury trial in such matters. These "accounting" cases, therefore, do not help the defendants here.

a. Complex Accounting Cases and the Concurrent Jurisdiction of Law and Equity

---

previously adjudicated by a chancellor in equity." Compare *id. 99 S. Ct. 652 at 652-55* (opinion of the Court) With id. at 659-61. (Rehnquist, J., dissenting). See generally Shapiro and Coquillette, The Fetish of Jury Trials in Civil Cases: A Comment on Rachal v. Hill, 85 Harv.L.Rev. 442 (1971).

[29] In view of this concession, it is unnecessary to engage in the extensive historical analysis which would be required to determine conclusively the question of the applicability of the *Seventh Amendment* to antitrust actions. For examples of this type of analysis, see Mr. Justice Marshall's opinion for the Court in *Pernell v. Southall Realty, 416 U.S. 363, 94 S. Ct. 1723, 40 L. Ed. 2d 198 (1974)*, tracing the history of actions for the recovery of real property, and Judge Friendly's opinion for the majority in *Damsky v. Zavatt, 289 F.2d 46 (2d Cir. 1961)*, tracing the history of the Court of Exchequer in order to determine whether there was a constitutional right to a jury in a suit by the government to collect taxes allegedly due.

Although in view of the defendant's position we assume without deciding that there is a constitutional right to jury trial in antitrust cases, we note that this assumption is supported by abundant evidence. The acts prohibited by the antitrust laws are similar to those banned by the Statute of Laborers, 1349, 23 Edw. Ch. 3, c. 6, and the Statute of Monopolies, 1623, 21 Jac. c. 3, both of which gave a right to penal damages in the courts of common law. In addition, antitrust actions have been held to sound in tort, classically a "legal" cause, See n. 61, Infra. Finally, treble damages are traditionally a remedy available only in the courts of law. See pp. 921-922, Infra.

Actions seeking an accounting are the descendants of the old action of "Account" or "Account-render," one of the earliest **[*908]** forms of action at common law. [30] **[**49]** The common-law action of account was never very popular perhaps because it was procedurally cumbersome [31] and of limited scope [32] and by the eighteenth century it was largely replaced by other remedies, both legal and equitable. [33]

[50]** In some cases there were no incidents of equitable jurisdiction, and the plaintiff had to proceed at law. See, e.g., *Fowle v. Lawrason, 30 U.S. (5 Pet.) 495, 8 L. Ed. 204 (1831)* (lessor's action for an accounting of rent allegedly due). When the claims underlying the demand for an accounting were equitable claims, equity jurisdiction was exclusive. 5 Moore's Federal Practice P 38.25, at 199 (2d ed. 1978). See, e.g., *Newberry v. Wilkinson, 199 F. 673, 678 (9th Cir. 1912)* (suit for accounting against administratrix of a decedent's estate); *Miller v. Weiant, 42 F. Supp. 760 (S.D.Ohio 1942)* (action to compel directors to account for corporate assets); *Williams v. Collier, 32 F. Supp. 321 (E.D.Pa.1940)* (suit by trustee in bankruptcy to void fraudulent transfer and impose constructive trust); 4 Pomeroy's Equity Jurisprudence §§ 1420, 1421 (5th ed. 1941).

Those cases in which resort to equity was based on the complication of the accounts between the parties fell into a third category the concurrent jurisdiction of law and equity. [34] 5 Moore's Federal Practice P 38.25, at 199 (2d ed. 1978). See e.g., *Kirby v. Lake Shore & M. S. R. R., 120 U.S. 130, 7 S. Ct. 430, 30 L. Ed. 569 (1887)*; *Fowle **[**51]** v. Lawrason, 30 U.S. (5 Pet.) 495, 8 L. Ed. 204 (1831)*; *H. B. Zachry Co. v. Terry, 195 F.2d 185 (5th Cir. 1952)*; *McNair v. Burt, 68 F.2d 814, 815 (5th Cir. 1934)*; *Goffe & Clarkener, Inc. v. Lyons Milling Co., 26 F.2d 801 (D.Kan.1928)*; Aff'd on other grounds, *46 F.2d 241 (10th Cir. 1931)*. This overlap in the jurisdictions of law and equity gave plaintiffs in such cases the practical ability to choose the forum and thereby the mode of trial. When the plaintiff chose to bring his action at law, the defendant's ability to obtain a non-jury trial was severely limited:

> (T)he doctrine is well settled that **[**52]** when the jurisdictions of law and equity are concurrent the one which first takes actual cognizance of any particular controversy **[*909]** ordinarily thereby becomes exclusive. If,

---

[30] See *Williams v. Collier, 32 F. Supp. 321 (E.D.Pa.1940)* (Kalodner, J.); Belsheim, The Old Action of Account, 45 Harv.L.Rev. 466 (1932); 5 Moore's Federal Practice P 38.25, at 198 (2d ed. 1978); 2 Story's Equity Jurisprudence §§ 580-602, at 1-17 (14th ed. 1918). Belsheim traces Account back to the early thirteenth century when, in a system of land ownership where "it was common for (feudal) lords to grant out manors to bailiffs, who were to account for the rents and profits thereof, deduction being made for the expenses incurred," the action provided redress for the lord "in case such a bailiff refused to account." Belsheim, Supra, at 467-68.

[31] In order to obtain relief, the plaintiff needed first to establish before a jury the defendant's obligation to account to him. The defendant would then be compelled by physical arrest and imprisonment, if necessary to appear before auditors appointed by the court, who would settle the accounts between the parties. Disputed issues of fact arising before the auditors would also be resolved by a jury. See *Ex parte Peterson, 253 U.S. 300, 308, 40 S. Ct. 543, 64 L. Ed. 919 (1920)*. Finally, the plaintiff could submit the auditors' final computation to the court of law to obtain a final judgment for any amount due. Belsheim, Supra note 30, at 493-499.

[32] During the earlier middle ages, account could be brought only against bailiffs, guardians in socage, receivers ad computandum, and certain few others; it was later extended to other types of receivers, to partners, to the plaintiff's executors, to the defendant's executors, and to third party beneficiaries. See id., at 475-493.

[33] Though the old action of account fell into general disuse, it had not entirely disappeared at the close of the eighteenth century. See, Belsheim, Supra note 27, at 466; 2 Story's Equity Jurisprudence § 581, at 2 & n. 1 (14th ed. 1918). According to Story, such actions were also brought "in the form of assumpsit, covenant, and debt . . . in the Courts of Common Law," or by a bill in equity. Id.

[34] The concurrent jurisdiction in matters of account also included cases involving mutual accounts, an accounting between two partners, an accounting by the principal where the agent's compensation depended upon the principal's profits, and others. See 4 Pomeroy's Equity Jurisprudence §§ 1420, 1421 (5th ed. 1941). For a survey of other matters within the concurrent jurisdiction, See 1 id. §§ 139, 140, at 191-194.

> therefore, the subject-matter of primary right or interest, although legal, is one of a class which may come within the concurrent jurisdiction of equity, and an action at law has already been commenced, a court of equity will not, unless some definite and sufficient ground of equitable interference exists, entertain a suit over the same subject-matter. . . . ***HN8***[] The grounds which permit the exercise of the equitable jurisdiction in such cases are the existence of some distinctively equitable feature of the controversy which cannot be determined by a court of law, or some fraudulent or otherwise irregular incidents of the legal proceedings sufficient to warrant their being enjoined, or the necessity of a discovery, either of which grounds would render the legal remedy inadequate. This rule results in part, in the United States, from the provisions of the national and state constitutions securing the right to a jury trial.

1 Pomeroy's Equity Jurisprudence § 179, at 251-252 (5th ed. 1941).

Because **[**53]** Story's view was that "(t)he whole machinery of Courts of Equity is better adapted to the purpose of an account. . . ." 2 Story's Equity Jurisprudence § 591, at 9 (14th ed., 1918), he was distressed by the ability of plaintiffs to bring such actions in the courts of law where they would be tried by juries:

> (N)ow the (equity) jurisdiction extends not only to cases of an equitable nature, but to many cases where the form of the account is purely legal, and the items constituting the account are founded on obligations purely legal. Upon such legal obligations however suits, although not in the form of actions of account, yet in the form of assumpsit, covenant, and debt, are still daily prosecuted in the Courts of Common Law, and legal defenses are there brought forward. But even in these cases, as the courts possess no authority to stop the ordinary progress of such suits for the purpose of subjecting the matters in dispute to the investigation of a more convenient tribunal than a jury, unless the parties agree to a voluntary arrangement for this purpose the cause often proceeds to trial in a manner wholly unsuitable to its real merits.

Id., § 581, at 2 (footnotes omitted).

[54]** Thus, defendants were not able to have such matters transferred to equity after the plaintiff had brought an action at law. For example, in *Williams v. Herring, 183 Iowa 127, 165 N.W. 342 (1917)*, the defendant sought to have an action transferred to equity on the ground that "the number of items involved" in the business between the parties was "so great that same can be properly tried and determined only by a court of chancery." Although agreeing that "the number of items . . . will be cumbersome and difficult to present to a jury," the court was of the view that they could be presented "in such a way as to reasonably be within the understanding and comprehension of a jury," and held:

> The fact that the controversy involves a large number of items of debit and credit arising out of many business transactions, and that same could be more conveniently tried to the court, is not a ground of equitable jurisdiction. The test is not whether the cause can be more conveniently or satisfactorily tried and determined by the court than a jury, but the accounts must be mutual requiring an accounting, or there must be some other ground of equitable cognizance not shown to exist in this case. **[**55]**
>
> In our opinion, plaintiff's cause of action upon both counts was properly brought at law, and he is entitled to a trial thereof by jury.

Id., 165 N.W. at 344-45. See also *Crane v. Ely, 37 N.J.Eq. 564 (1883)*.

These "complex" cases for an accounting therefore reflect only the availability of a jury or nonjury trial at the Plaintiff's option. There is nothing in any of these cases **[*910]** to indicate that the plaintiff could not have chosen to proceed at law, with a jury. [35] **[**56]** In this respect, they are no different from many other kinds of actions

---

[35] The proposition that complex accounting cases were within the concurrent jurisdiction of law and equity might best be described as the majority view. At least one court has expressed the opinion that some cases might be complex enough to justify an injunction against a pending action at law. See *Crane v. Ely, 37 N.J.Eq. 564, 571 (1883)* (dictum). Other authorities imply that mere complication of accounts, in the absence of some trust or fiduciary relation, may not be enough to sustain equity jurisdiction:

presenting issues which, before the merger of law and equity, would be tried to a jury or to the court depending on the manner in which the plaintiff chose to proceed. [36]

It is held that equity has jurisdiction to award an accounting between parties where there are involved mutual accounts or accounts of such complication that it is not practicable to try the case at law before a jury. . . . This has been denied where no trust relationship is involved. . . . But, however this may be, it is settled that equity will not take jurisdiction because of the complication of accounts unless the remedy at law is clearly inadequate; and where the practice at law permits reference to auditors or referees there is seldom occasion for the exercise of the jurisdiction. . . . Under the federal practice, cases involving complicated accounts can be referred to auditors for the simplification of the issues involved, and the difficulties of trial at law of actions involving such accounts are thus in large measure obviated.

Broderick v. American General Corp., 71 F.2d 864, 867-68 (4th Cir. 1934) (citations omitted). See Sedalia v. Standard Oil Co., 66 F.2d 757, 761 (8th Cir. 1933) Cert. denied, ***290 U.S. 706, 54 S. Ct. 374, 78 L. Ed. 607 (1934)***; 2 Story's Equity Jurisprudence § 598, at 13-14 (14th ed. 1918). We may well conclude with Story that "where there is a remedy at law there is no small confusion and difficulty in the authorities . . . which . . . seem to deliver over the subject to interminable doubts." Id., § 595, at 11-12.

That the *Seventh Amendment* guaranty of jury trial extends to the plaintiffs in such cases was assumed by the Court in *Ex parte Peterson, 253 U.S. 300, 40 S. Ct. 543, 64 L. Ed. 919 (1920)*. The plaintiff brought an action at law on an account including 298 items; the defendant's answer and counterclaim "set up another account containing 402 items." In the trial court, Judge Augustus Hand appointed an auditor

to make a preliminary investigation as to the facts, hear the witnesses, examine the accounts of the parties, and make and file a report in the office of the clerk of this court, with a view to simplifying the issues for the jury, but not to finally determine any of the issues in the action, the final determination of all issues of fact to be made by the jury on the trial . . . .

Id., at 304, 40 S. Ct. at 544. The plaintiff then sought a writ of mandamus, complaining that the appointment of the auditor interfered with his *Seventh Amendment* right.

In an opinion by Justice Brandeis, the Court approved Judge Hand's appointment of an auditor, comparing it to the traditional practice of appointing such auditors to aid courts of equity "where the facts are complicated and the evidence voluminous." *Id., at 313, 40 S. Ct. at 547*.

What the District Judge was seeking when he appointed the auditor in the case at bar was just such aid. He required it himself, because without the aid to be rendered through the preliminary hearing and report, the trial judge would be unable to perform his duty of defining to the jury the issues submitted for their determination and of directing their attention to the matters actually in issue. *United States v. Reading Railroad, 123 U.S. 113, 114, 8 S. Ct. 77, 31 L. Ed. 138*. The hearing and report were also essential as shown above to enable the jury to perform their specific duty. Owing to the difference in the character of the proceedings and of the questions ordinarily involved, the occasion for seeking such aid as is afforded to a judge by special masters, auditors, or examiners arises less frequently at law than in equity.

Id., at 313-14, 40 S. Ct. at 547. Thus, the Court recognized that matters complex enough to require the aid of an auditor, though more often found in courts of equity, were cognizable at law as well. And as long as the auditor's report was no more than prima facie evidence, "(t)he limitation imposed by the (Seventh) amendment . . . that enjoyment of the right of trial by jury be not obstructed, and that the ultimate determination of issues of fact by the jury be not interfered with," was respected. *Id., at 310, 40 S. Ct. at 546*.

Provision for such appointments in complex matters to be tried to juries is now made in *Rule 53(b), Fed.R.Civ.P.* See *Dairy Queen, Inc. v. Wood, 369 U.S. 469, 478, 82 S. Ct. 894, 8 L. Ed. 2d 44 (1962)*.

[36] Issues as to which the plaintiff was able to choose the mode of trial arose in two basic patterns. They are explained by Professors James and Hazard:

B's violation of A's statutory right (e.g., to a patent or copyright) might entitle A to an injunction, to compensatory damages, and to a penalty. The right to any relief would turn on whether B violated the statute. A might get a determination of that issue without a jury in an equity suit, seeking an injunction and perhaps compensatory damages as incidental to an injunction. Or he might get such determination in an action at law for damages or for the penalty. Since equity refused to enforce a penalty and the law would not give an injunction, two suits would be required for complete relief. A had the choice which to bring first. And the first

[57] [*911]** b. The Concurrent Jurisdiction of Law and Equity After Merger

In the federal courts, the merger of law and equity was not intended to affect the scope of the jury trial right; ***HN9***[] *Rule 38(a)* requires only that the right "as declared by the *Seventh Amendment to the Constitution* or as given by a statute . . . shall be preserved to the parties inviolate." However, a problem was presented by those matters in which the plaintiff had previously

> had an option as to the mode of trial that excluded any option by defendant or any discretion by the court. . . . (T)he (post-merger) question, properly put, is between giving effect to the plaintiff's former option and giving defendant a counter-option and this involves a decision as to whether jury trial is to be preferred when either party (and not just the plaintiff) wants a jury trial.

F. James & G. Hazard, Civil Procedure § 8.7, at 374-75 (1977).

The problem as it was encountered in the federal system has been ably summarized by Judge Wisdom:

> In 1938 merger of the federal courts of law and equity caused considerable uncertainty in the determination of jury trial rights; the liberal joinder provisions and the broad, **[**58]** sometimes mandatory, counterclaim provisions of the Federal Rules mixed legal and equitable causes in a single litigation with unprecedented frequency. . . . The difficulty comes in deciding whether the legal or the equitable cause should be tried first an issue of practical importance to litigants, since the determination of either cause acts as collateral estoppel on common questions of fact in the other. The broad grant of discretion under Rule 42 for a trial judge to order separate trials would seem to imply authority to decide the order of the separate trials, but courts struggled with this problem without clear guidelines. Some decisions rested on the "basic nature" of the case taken as a whole. In many other decisions this test was not recognized and the choice was left to the discretion of the trial judge. On occasion, attempts to apply the "basic nature" test have led to inconsistent results.

Thermo-Stitch, Inc. v. Chemi-Cord Processing Corp., 294 F.2d 486, 488-89 (5th Cir. 1961) (footnotes omitted). The problem reached the Supreme Court in *Beacon Theatres, **[*912]** Inc. v. Westover, 359 U.S. 500, 79 S. Ct. 948, 3 L. Ed. 2d 988 (1959)*, and *Dairy Queen, Inc. v. Wood, **[**59]** 369 U.S. 469, 82 S. Ct. 894, 8 L. Ed. 2d 44 (1962)*. Beacon Theatres Involved a legal counterclaim to an equitable claim; [37] in Dairy Queen the plaintiff sought a court

---

determination of the common issue (violation vel non) would bind the parties in the second action. The plaintiff thus had the power to choose the mode of trial of the common issue, and he could so exercise it as to leave no room for judicial discretion.

If the statute did not provide for a penalty, A might be able to get complete relief in a suit in equity. But he would also have the option to sue for damages at law and for an injunction in equity separately, in whichever order he chose. So here again A could control the mode of trial of the common issue, without leaving room for judicial discretion.

In another class of cases A also had a choice, but it was a more limited one. Breach of certain kinds of contracts (e.g., to convey land) would entitle the injured party to either specific performance (with incidental damages for delay of performance, and the like) or to damages for breach (measured on the assumption that the contract would not be performed). Here A could in no case get both forms of relief he had to elect one or the other. His election would govern the mode of trial of issues (the making of the contract, performance of conditions precedent, breach, and the like), which would be presented in a claim for Either kind of relief.

F. James & G. Hazard, Civil Procedure § 8.7, at 370-72 (1977) (footnotes omitted); James, Right to a Jury Trial in Civil Actions, 72 Yale L.J. 655, 671-73 (1963). Actions within the concurrent jurisdiction of law and equity fall into the latter pattern, except that, instead of choosing between "legal" and "equitable" remedies for the same right, the plaintiff simply chooses between the remedy provided in the law courts and the remedy "of the same general nature" made available by equity because for some reason the remedy administered at law is not "full, adequate, and complete." 1 Pomeroy's Equity Jurisprudence § 139, at 191-92 (5th ed. 1941).

[37] The complaint in Beacon Theatres sought a declaratory judgment that the plaintiff was not violating the antitrust laws, and an injunction to prevent the defendant from instituting an antitrust suit against the plaintiff. The defendant counterclaimed for treble damages, and the trial court then ordered that the plaintiff's "essentially equitable" claims be tried without a jury before the jury trial on the counterclaim, even though the issue of violation of the Sherman Act was common to both claims, and the party against whom that issue was determined in the court trial would be collaterally estopped from relitigating it before the jury. The Supreme Court granted mandamus and ordered a jury trial on all issues in defendant's claim.

trial of an action presenting both legal and equitable claims. [38] In both cases there were factual issues common to both the legal and equitable claims.

[60]** Writing for the Court in Dairy Queen, Justice Black left no room for doubt about the solution to the problem that was to be followed in the federal courts:

> After the adoption of the Federal Rules, attempts were made indirectly to undercut (the constitutional jury trial) right by having federal courts in which cases involving both legal and equitable claims were filed decide the equitable claim first. The result of this procedure in those cases in which it was followed was that any issue common to both the legal and equitable claims was finally determined by the court and the party seeking trial by jury on the legal claim was deprived of that right as to these common issues. This procedure finally came before us in Beacon Theatres, Inc. v. Westover . . . .
>
> Our decision (in Beacon Theatres defines) the protection to which that right is entitled in cases involving both legal and equitable claims. The holding in Beacon Theatres was that ***HN10***[] where both legal and equitable issues are presented in a single case, "only under the most imperative circumstances, circumstances which in view of the flexible procedures of the Federal Rules we cannot now anticipate, can the right to a jury trial **[**61]** of legal issues be lost through prior determination of equitable claims."

Id., at 472-73, 82 S. Ct. at 897. Therefore, the Court reasoned,

> the sole question which we must decide is whether the action now pending before the District Court contains legal issues.

Id., at 473, 82 S. Ct. at 897. The Court then examined the relief sought in the complaint, which had been brought by the owners of the "Dairy Queen" trademark against one of their licensees. The plaintiffs asked for injunctive relief to restrain the licensee from using the trademark or collecting any money from its sublicensees, "an accounting to determine the exact amount of money owing . . . and a judgment for that amount." Determining that the claim for a money judgment was "wholly legal in its nature however the complaint is construed," the Court held that the Defendant had a right to a jury trial of the legal claim, including the common factual issues of breach of contract and trademark infringement. *Id., at 475-80, 82 S. Ct. at 898-99*. Thus, the federal courts, preferring a jury trial at the demand of either party, have **[*913]** determined to give defendants a "counter-option." James & Hazard, Supra, **[**62]** at 377. [39]

---

[38] In Dairy Queen, a franchiser alleging breach of the franchise agreement sued to restrain the franchisee from use of the franchise and trademark, and from collecting funds from subfranchisees. It also sought "an accounting to determine the exact amount of money owing . . ." *369 U.S., at 475, 82 S. Ct. at 898*. The district court struck the defendant's jury demand on the alternate theories that the action was "purely equitable" or that, if not, then the legal issues were "incidental" to the equitable ones. The Supreme Court reversed, holding that the claim for a money judgment for breach of contract is not equitable merely because it is "cast in terms of an "accounting,' rather than in terms of an action for "debt' or "damages.' " *Id., at 477-78, 82 S. Ct. at 900*. And it strongly rejected the notion that it is ever permissible to characterize legal issues as "incidental" in order to restrict the right to a jury trial.

[39] The expanded boundaries for the right to jury trial established in Beacon Theatres and Dairy Queen seem to have been regarded in those opinions as constitutionally required. Consequently, some commentators have viewed *Beacon Theatres, Dairy Queen, and Ross v. Bernhard, 396 U.S. 531, 90 S. Ct. 733, 24 L. Ed. 2d 729 (1970)* as representing an abandonment of the historical test in favor of a "dynamic" or "flexible" or "rational" approach to the *Seventh Amendment*. See 9 C. Wright and A. Miller, Federal Practice and Procedure § 2302, at 24 (1971); McCoid, Procedural Reform and the Right to Jury Trial; A Study of Beacon Theatres, Inc. v. Westover, 116 U.Pa.L.Rev. 1 (1967); Redish, *Seventh Amendment* Right to Jury Trial: A Study in the Irrationality of Rational Decision Making, 70 Nw.U.L.Rev. 486, 526 (1975). Note, The Right to a Jury Trial in Complex Civil Litigation, 92 Harv.L.Rev. 898, 900-904 & n. 28 (1979). However, the Court in later cases has referred to the Beacon Theatres/Dairy Queen holding as an "equitable doctrine." See *Katchen v. Landy, 382 U.S. 323, 339, 86 S. Ct. 467, 15 L. Ed. 2d 391 (1966)*. To the extent that Beacon Theatres And Dairy Queen have expanded the right to jury trial further than required by a strict application of the historical test, the characterization in Katchen is accurate. The *Seventh Amendment*, of course, does not prohibit such an expansion, but merely prohibits any contraction of the jury trial right to limits narrower than those permitted by

[63]** There are dicta in Dairy Queen implying that a defendant would not have the same "counter-option" in a complex accounting case. In response to the plaintiff's contention that its money claim was "purely equitable," because it was "cast in terms of an "accounting' rather than . . . "debt' or "damages'," the Court said:

> But ***HN11***[] the constitutional right to trial by jury cannot be made to depend upon the choice of words used in the pleadings. The necessary prerequisite to the right to maintain a suit for an equitable accounting, like all other equitable remedies, is, as we pointed out in Beacon Theatres, the absence of an adequate remedy at law. Consequently, in order to maintain such a suit on a cause of action cognizable at law, as this one is, the plaintiff must be able to show that the "accounts between the parties" are of such a "complicated nature" that only a court of equity can satisfactorily unravel them.
>
> In view of the powers given to District Courts by *Federal Rule of Civil Procedure 53(b)* to appoint masters to assist the jury in those exceptional cases where the legal issues are too complicated for the jury adequately to handle alone, the burden of such a showing is considerably **[**64]** increased and it will indeed be a rare case in which it can be met. But be that as it may, this is certainly not such a case.

Id., at 477-78, 82 S. Ct. at 900. [40]

[65]** The matter, therefore, is in some doubt: In its holding in Dairy Queen, the Court extended the defendant's jury trial right to an issue on which, before merger, the plaintiff could have obtained the court trial it wanted; yet in dicta it suggested that the plaintiff's choice of mode of trial may yet be preserved in complex accounting cases. This question does not appear to have been resolved by any court, although federal courts in other types of cases have generally held that the federal policy favoring trial by jury, expressed in Beacon Theatres and Dairy Queen, requires that either party be able to demand a jury when the action **[*914]** presents issues so triable. James & Hazard, Supra, at 377. See, e.g., *Johns Hopkins University v. Hutton, 488 F.2d 912, 916 (4th Cir. 1973)* (defendant entitled to jury trial on factual issues in plaintiff's action for recission of contract so long as plaintiff holds claim for damages in reserve should court find that it is not entitled to recission) Cert. denied, *416 U.S. 916, 94 S. Ct. 1622, 40 L. Ed. 2d 118 (1974)*; *Minnesota Mutual Life Ins. Co. v. Brodish, 200 F. Supp. 777 (E.D.Pa.1962)* (defendant entitled to jury trial on issues common to **[**66]** plaintiff's equitable claim and defendant's legal counterclaim). Cf. *Leimer v. Woods, 196 F.2d 828 (8th Cir. 1952)* (jury available upon demand of either party when consolidated or joined legal and equitable claims have common question of fact).

For two reasons, we need not now determine whether the plaintiff's limited right to a court trial of complex accounting cases has survived the merger of law and equity. First, if this Were an action for an accounting, the plaintiff's clearly expressed demand for a jury trial would be controlling, just as it would have been in 1791. Second, this is simply not an accounting case. "There are no accounts between the parties. The cause of action is one arising in tort, and cannot be converted into one for an account." *United States v. Bitter Root Development Co., 200 U.S. 451, 478, 26 S. Ct. 318, 327, 50 L. Ed. 550 (1906)*. See e.g., *Broderick v. American General Corp., 71 F.2d 864, 868 (4th Cir. 1934)*. None of the fiduciary or trust relationships giving rise to an obligation to account are present. See *American Air Filter Co., Inc. v. McNichol, 527 F.2d 1297, 1300 (3d Cir. 1975)*; *Sulzer v. Watson, 39 F.*

---

the historical test. Moreover, the Court's more recent decisions have eliminated any doubt about the continuing validity of the historical test. See pp. 926-929, Infra.

[40] The dicta in Dairy Queen were themselves based on earlier dicta in *Kirby v. Lake Shore & M. S. R. R., 120 U.S. 130, 7 S. Ct. 430, 30 L. Ed. 569 (1887)*. In Kirby, after holding that "The complicated nature of the accounts between the parties constitutes itself a sufficient ground for going into equity," *id., at 134, 7 S. Ct. at 432*, the Court went on to observe,

> It would have been difficult, if not impossible, for a jury to unravel the numerous transactions involved in the settlements between the parties, and reach a satisfactory conclusion as to the amount of drawbacks to which Alexander & Co. were entitled on each settlement. 1 Story, Eq.Jur. § 451. Justice could not be done except by employing the methods of investigation peculiar to courts of equity. When to these considerations is added the charge against the defendants of actual concealed fraud, the right of the plaintiff to invoke the jurisdiction of equity cannot well be doubted.

Id., at 134, 7 S. Ct. at 432.

414, 415 (C.C.D.Vt.1889). Nor do the plaintiffs **[**67]** seek an accounting in the sense of disgorgement of "profits made from the unfair use of a plaintiff's trademark or tradename." Robert Bruce, Inc. v. Sears, Roebuck & Co., 343 F. Supp. 1333, 1348 (E.D.Pa.1972).

2. Other Complex Litigation

Because this suit is not an action for an accounting, it is important to determine whether complexity permitted a resort to equity only in accounting cases, or in other kinds of litigation as well.

The availability of equity jurisdiction in cases involving complicated facts was addressed in United States v. Bitter Root Development Co., 200 U.S. 451, 26 S. Ct. 318, 50 L. Ed. 550 (1906) and Curriden v. Middleton, 232 U.S. 633, 34 S. Ct. 458, 58 L. Ed. 765 (1914). In Bitter Root, the United States sought relief in equity after millions of feet of timber were allegedly removed and sold by means of an involved conspiracy. Equity jurisdiction was invoked because, "by reason of the frauds and conspiracies . . . and the complications which have resulted therefrom, no plain, adequate, and complete remedy can be given . . . at law . . . ." 200 U.S., at 462, 26 S. Ct. at 323. But the Court ruled that there was no equity jurisdiction:

> The principal ground **[**68]** upon which it is claimed that the remedy at law is inadequate is really nothing more than a difficulty in proving the case against the defendants. The bill shows that whatever was done in the way of cutting the timber and carrying it away was done by the defendants as tort feasors, and the various devices alleged to have been resorted to by the deceased, Daly, by way of organizing different corporations, in order to, as alleged, cover up his tracks, and to render it more difficult for the complainant to make proof of his action, does not in the least tend to give a court of equity jurisdiction on that account. It is simply a question of evidence to show who did the wrong and upon that point the fact could be ascertained as readily at law as in equity.

Id., at 472-73, 26 S. Ct. at 324-25. And in Curriden v. Middleton, the Court reaffirmed this holding, saying, **HN12**[] "(M)ere complication of facts alone and difficulty of proof are not a basis of equity jurisdiction." 232 U.S. at 636, 34 S. Ct. at 458.

Moreover, there is evidence that the English recognized the difficulty of large and complex matters for ordinary juries, and found a solution not in equity, but in the **[*915]** "special **[**69]** jury." The early procedures for trial by special jury were unregulated. See Thayer, The Jury and Its Development, 5 Harv.L.Rev. 295, 301 (1892). But in 1730, it was provided by statute that "on the motion of any plaintiff or plaintiffs, defendant or defendants in any action, cause, or suit whatsoever, depending or to be brought and carried on in the . . . courts of king's bench, common pleas and exchequer, or in any of them, . . . said courts are hereby respectively authorized and required, upon motion as aforesaid, in any of the cases before-mentioned, to order and appoint a jury to be struck . . . in such manner as special juries have been, and are usually struck in such courts. . . ." 3 Geo. 2, c. 25, § 15 (1730). The act also provided that the party applying for a special jury was to pay the fees incurred thereby, id., § 16, and that qualification to serve on a special jury was determined on the basis of income. Id., § 18. Some years later, the procedure was altered so that the party applying for the special jury was to pay not only the extra sheriff's fee, but all additional expenses due to the use of a special jury. These amounts were not taxable as costs to the losing party **[**70]** unless the judge certified that "the same was a cause proper to be tried by a special jury." 24 Geo. 2, c. 18 (1751). [41]

---

[41] Later statutes further modifying the procedures for special juries include 6 Geo. 4, c. 50, §§ 30-35 (1825), and 3 & 4 Will. 4, c. 42, § 35 (1833). For a discussion of special juries in nineteenth-century England, See 18 Halsbury's Laws of England, Juries §§ 634-640, at 259-63 (1st ed. 1911).

By 1958, the use of special juries in England was limited to "cases as entered in the commercial list in the Queen's Bench Division of the High Court at the Royal Courts of Justice." 23 Halsbury's Laws of England, Juries P 4 (3d ed. 1958). Special juries were abolished altogether by the Courts Act, 1971, § 40. See 23 Halsbury's Laws of England, Juries P 4 (1978 cum.supp.).

According to Blackstone, "Special juries were originally introduced in trials at bar when the causes were of too great nicety for the discussion of ordinary freeholders, or where the sheriff was suspected of partiality, though **[**71]** not upon such apparent cause as to warrant an exception to him." 3 W. Blackstone, Commentaries *357. [42] The continuing relevance of complexity as a cause for impaneling special juries appears in reported opinions discussing certifications requested pursuant to the 1751 Act. Compare London Bank of Scotland v. Marshall, 4 Foster & Finlason's Nisi Prius Reports 1046 (1865) (certifying the case as proper for a special jury "because the plea, which if proved would have raised a difficult question of law, would in its proof raise difficult questions of fact,") With Humber Iron Co. v. Jones, 4 Fos. & Fin. 1047 (1865) (The judge "declined to certify for a special jury, as it was the ordinary evidence under the general issue."); Cf. Linscott v. Jepp, 8 T.L.R. 130 (Q.B.1891) (In refusing to overturn the decision of a trial judge in a slander case not to allow a special jury, Lord Coleridge said, "There is . . . no difficulty in the trial of such a case so as to require a special jury."); Price v. Williams, 5 Dowl. 160 (Exch.1836) (special jury could be called to determine damages on writ of inquiry).

[72]** The defendants' argument that equity was generally available whenever a case presented matters too difficult for a jury relies heavily on two English decisions: Wedderburn v. Pickering, 13 Ch.D. 767 (1879), and Clench v. Tomley, 21 Eng.Rep. 13 (Ch.1603). [43]

In Wedderburn, an action concerning a dispute as to the location of the boundary **[*916]** between the parties' properties, the court found that the matter "cannot be conveniently tried before a jury" and denied the defendant's request for a jury, relying not on any common-law tradition but on Order XXXVI, rules 3 & 26, Rules of Court, 1875. [44] These rules were promulgated as part of the merger of law and equity in the English Courts effected by the Judicature Act, 1873, 36 & 37 Vict. c. 66, as amended by the Judicature Act, 1875, 38 & 39 Vict. c. **[**73]** 77.

[74]** Rule 3 provided that either party could obtain trial by jury of Any action, both those formerly "legal" and those formerly "equitable." Rule 26 was a limitation on Rule 3, and allowed the court discretion to order a trial without a jury in cases which "previously to the passing of the Act could, without any consent of parties, be tried without a jury." This rule "was framed expressly to meet cases which would under the old system (before merger) have been tried in the Chancery Division, And which might be considered, by reason of involving a mixture of law and fact, or from great complexity, or otherwise, not capable of being tried before a jury." Clarke v. Cookson, 2 Ch.D. 746 (1876) (emphasis added). As we would expect in view of this statement of Rule 26 and its purpose, the

---

[42] For a more extended discussion of special juries, see Thayer, The Jury and Its Development, 5 Harv.L.Rev. 295, 300-302 (1892). According to Thayer, "there seems always to have existed the power of selecting those especially qualified for a given service . . . . What we call the "special jury" . . . was a natural result of the principle that those were to be summoned who could best tell the veritatem rei. . . . For the handling of these greater and more complicated causes, there was picked out a better class of jurymen . . . ." Id., at 300-301.

[43] The defendants appear to adopt the presentation of this argument found in *In re U. S. Financial Securities Litigation, 75 F.R.D. 702, 708-709 (S.D.Cal.1977)* Appeal pending # 77-8213 (9th Cir. 8/29/77).

[44] The relevant rules provide:

2. Actions shall be tried and heard either before a Judge or Judges, or before a Judge sitting with assessors, or before a Judge and jury, or before an official or special referee, with or without assessors.

3. Subject to the provisions of the following Rules, the plaintiff may, with his reply, or at any time after the close of the pleadings, give notice of trial of the action, and thereby specify one of the modes mentioned in Rule 2; and the defendant may, upon giving notice within four days from the time of the service of the notice of trial, or within such extended time as the Court or Judge may allow, to the effect that he desires to have the issues of fact tried before a Judge and jury, be entitled to have the same so tried.

26. The Court or a Judge may, if it shall appear desirable, direct a trial without a jury of any question or issue of fact, or partly of fact and partly of law, arising in any cause or matter which previously to the passing of the Act could, without any consent of parties, be tried without a jury.

Order XXXVI, Rules 2, 3, 26, Rules of Court, 1875. The 1873 Judicature Act had significantly limited the availability of trial by jury, but the 1875 Act and Rules generally restored the jury trial right to its pre-1873 limits. See Judicature Act, 1875, § 22; Sugg v. Silber, 1 Q.B.D. 362, 366 (1876) (opinion of Pollock, B.).

decisions applying it involved matters which were clearly "equitable" regardless of their complexity. See, e.g., Powell v. Williams, 12 Ch.D. 234 (1879) (suit to enjoin nuisance); Swindell v. Birmingham Syndicate, 3 Ch.D. 127 (1876) (action for specific performance, counterclaim for recission). And in Wedderburn itself, the defendant would have had no right to a jury trial before merger because, as the plaintiff's **[**75]** counsel argued, the action might have been tried at common law, "or the Plaintiff might have come to the Court of Chancery for an injunction." 13 Ch.D., at 770.

Thus, the 1875 rules and the cases applying them do not support the proposition that complexity can make a "legal" issue into an "equitable" one. Indeed, this very question was raised in Sugg v. Silber, 1 Q.B.D. 362 (1876), a patent infringement case which, according to Chief Justice Cockburn, could "be adequately dealt with only by assessors who have the requisite scientific knowledge." Nevertheless, the court concurred in his conclusion that the Judicature Acts and the Rules did not allow a judge "to take away from a defendant the right which he previously had of trying his case before a jury." We conclude that the English post-merger cases demonstrate only that the English used the relative difficulty of trying complex cases before juries as a limitation on the Extension of jury trials to formerly equitable matters. The defendants' reliance on them is therefore misplaced.

The report of the Clench case is set forth in full:

> Possession bound by decree, and the party prohibited to sue at common law. Inter Tomley and Clench, **[**76]** it appeared by testimony of ancient witnesses **[*917]** speaking of sixty years before, and account books and other writings, that Francis Vaughan, from whom Tomley claimed, was mulier (legitimate); and Anthony, from whom Clench claimeth, was a bastard; and the possession had gone with Tomley fifty years. In this case the Lord Egerton not only decreed the possession with Tomley, but ordered also that Clench should not have any trial at the common law for his right till he had shewed better matter in the Chancery, being a thing so long past; it rested not properly in notice De pais, but to be discerned by books and deeds, of which the Court was better able to judge then (sic) a jury of ploughmen, notwithstanding that exceptions were alleged against those ancient writings; and that for the copyhold land, the verdict went with Clench upon evidence given three days before Sergeant Williams that Anthony was mulier (31st May, 1 Jacob. 1603).

Clench v. Tomley, 21 Eng.Rep. 13 (1603). This case seems to be the sole support offered for the defendants' contention that "at early common law, at a time when jurors were often illiterate and uneducated, matters involving complex writings **[**77]** were determined by the court." See *Bernstein v. Universal Pictures, Inc., 79 F.R.D. 59, 67 (S.D.N.Y.1978)*. One court has relied upon Clench for the broader proposition that "since long before the American Revolution, the common law recognized that the sheer complexity of a case, in particular a case which involved many complicated documents, was sufficient grounds to deny a jury trial . . .." *In re U. S. Financial Securities Litigation, 75 F.R.D. 702, 708-09 (S.D.Cal.1977)* Appeal pending, # 77-8213 (9th Cir. 8/29/77).

Initially, we note that a single report of such a venerable case should be approached with caution, because such reports were frequently inaccurate and were "only of those parts of the opinion deemed by the particular reporter to be useful to the lawyer." *Dawson v. Contractors Transport Corp., 151 U.S.App.D.C. 401, 411, 467 F.2d 727, 737 (1972)* (Fahy, J., dissenting) Citing M. Price & H. Bitner, Effective Legal Research 283 (1953). In any event, we think that the state of development of the jury system in 1603 the historical context of that case demonstrates that defendants' reliance on it is misplaced.

The practice of submitting documentary evidence to juries was, **[**78]** at the time, already long-established. According to one scholar, "Our earliest records show the practice of exhibiting charters and other writings to the jury." Thayer, The Jury and Its Development (II), 5 Harv.L.Rev. 295, 307 (1892). Thayer traces the development of the showing of documents to juries from about 1200 until the fifteenth century "to bring (it) down . . . to the modern form." See id., at 307-311. Thus, if Clench is not to be dismissed as an aberration, it must be explained on some grounds other than the inaccurate supposition that matters involving documentary evidence were kept from juries.

These grounds might be found in the fact that the jury was then still expected to bring its own knowledge of the disputed issues to court. The presentation to the jury of the testimony of witnesses, in fact, came centuries after the presentation of documentary evidence, developing during the fourteenth and fifteenth centuries. See *id., at 310,* *357-363*. The transformation of the jury from a body which came to court knowing the truth of the matter to one which came untainted by prior knowledge, to find the truth from the evidence presented, seems to have occurred largely between the **[**79]** middle of the seventeenth and the end of the eighteenth centuries. See *id., at 380-87*; 3 W. Blackstone, Commentaries *374-75. In Bushell's Case, Vaughan 135, 124 Eng.Rep. 1006 (C.P. en banc, 1670), habeas corpus was granted to jurors who had been imprisoned for returning a verdict contrary to the evidence and the direction of the court. The opinion of Chief Justice Vaughan in Bushell's case, Supra, demonstrates the continuing importance, long after Clench v. Tomley, of the jurors' personal knowledge of the matters in dispute.

> (A) court, Vaughan says, does not charge a jury with matter of law in the abstract, **[*918]** but only upon the law as growing out of some supposition of fact. This matter of fact is for the jury; it is not for the judge, "having heard the evidence given in court (for he knows no other)," to order the jury to find the fact one way rather than the other; for if he could, "the jury is but a troublesome delay, great charge, and of no use." The judge cannot know all the evidence which the jury goes upon; they have much other than what is given in court. They are from the vicinage, because the law supposes them to be able to decide the case though no evidence **[**80]** at all were given in court on either side. They may, from their private knowledge of which the judge knows nothing, have ground to discredit all that is given in evidence in court. They may proceed upon a view. "A man cannot see by another's eye, nor hear by another's ear; no more can a man conclude or infer the thing to be resolved by another's understanding or reasoning." It is absurd that a judge should fine a jury for going against their evidence, when he knows but part of it, "for the better and greater part of the evidence may be wholly unknown to him; and this may happen in most cases, and often doth, as in Granby and Short's Case."

Thayer, supra, at 382-83 (footnotes omitted). It may well have been that the sixty-year old facts of the Clench case "rested not properly in notice De pais " (of the country) because they were matters of which jurors would have had no personal knowledge; since the matter had to be decided solely on the basis of evidence produced in court documents and "the testimony of ancient witnesses" Lord Egerton could easily have felt that a jury would have been, in Vaughan's words, "but a troublesome delay, great charge, and of no use. [45]

[81]** Even if Clench demonstrated an unequivocal rejection of jury trials in complex matters, however, it would still be of limited relevance to the matter before us. The historical test, after all, defines the *Seventh Amendment* right with reference to the practice in 1791 not 1603. Because of the continuing development of the jury system and the constantly shifting boundaries of the jurisdictions of law and equity during those two centuries, any decision as old as Clench provides little evidence of what the practices were 188 years later. See Thayer, Supra, at 380-87; James, Right to a Jury Trial in Civil Actions, 72 Yale L.J. 655, 658 (1963). Moreover, of course, what evidence we do have from the eighteenth century indicates that complex matters were heard in the common law courts, albeit by "special" juries.

We therefore conclude that, as a matter of actual historical practice, matters cognizable at law were tried to juries in the courts of common law, regardless of complexity. Though there was an exception to this general rule, that exception was limited to matters of "account," and further limited by the plaintiff's ability to choose a jury or non-jury trial in such matters.

---

[45] We suggest the above reading of Clench largely for the purpose of showing that defendants' reading is not necessarily the only or the best one. We do not claim ours to be definitive; nevertheless, given the fact that juries had long considered documentary evidence, any "recognition" in Clench that equity would enjoin jury trials of matters involving complex documents would have been out of step with the prior and subsequent developments in the common law.

Other grounds for the Clench decision can easily be hypothesized. In view of the significance of documentary evidence, Lord Egerton may have kept the matter in equity because only in equity could discovery be compelled. And there is certainly a hint of the doctrine of laches in the order enjoining trial of a 50-year-old claim "till he had shewed better matter . . ., being a thing so long past." Cf. *Gee v. CBS, Inc., 471 F. Supp. 600 (E.D.Pa.1979)* (50 year old claim for breach of fiduciary duty barred by statute of limitations).

Finally, it is possible that a complete reading of Clench would have to take account of the temptations to excess at a time when the famous struggle between law and equity was approaching its climax. See F. James & G. Hazard, Civil Procedure § 1.5, at 15-17 (1977).

3. The **[**82]** Rationale of the Complex Accounting Cases

The defendants also suggest that the complex accounting cases demonstrate an **[*919]** "implicit . . . belief that if a jury could not understand the matter being presented, there was not the requisite "plain, adequate and complete remedy at law'." We find the actual historical practice in complex cases sufficiently clear that no recourse to "implicit beliefs" is necessary. However, dicta in a few of these cases show enough mistrust of juries that some inquiry is warranted into the rationale (if any) implicit in the availability of equity jurisdiction in complex accounting matters. [46]

[83]** As an initial matter, it is clear that the difficulty of an accounting for juries cold not have had anything to do with the original extension of equity jurisdiction into matters of account, since in the common-law action of account the actual "accounting" was never performed by the jury. The jury's verdict was that the defendant was obliged to account, and the account was then taken by court-appointed auditors. Similarly, when equity took cognizance of such matters, the chancellor appointed a master to undertake the accounting. See 2 Story's Equity Jurisprudence §§ 587, 590 at 5, 6, 8 (14th ed. 1918); note 31, Supra.

Some later courts have, indeed, justified the recourse to equity in such cases on the ground of their difficulty for juries, or at least used that difficulty to determine whether equity jurisdiction was properly invoked. See James, Right to a Jury Trial in Civil Actions, 72 Yale L.J. 655, 663 & n. 48 (1963). However, according to Blackstone, the existence of the concurrent jurisdiction of equity in matters of account is to be explained by the power of courts of equity to compel the production of books and records: "But, for want of this discovery at law, the courts **[**84]** of equity have acquired a concurrent jurisdiction with every court in all matters of account." 3 W. Blackstone, Commentaries *437. [47] And Story's opinion that "the whole machinery of Courts of Equity is better adapted to the purpose of an account" was expressed without any special mention of juries. [48] Moreover, since **[*920]** trial to the

---

[46] See p. 902 & n. 40, Supra ; *Goffe & Clarkener, Inc. v. Lyons Milling Co., 26 F.2d 801 (D.Kan.1928)*, and sources cited therein. Perhaps the most extreme example is provided by *Bennett v. United Lumber & Supply Co., 110 Conn. 536, 148 A. 369 (1930)*:

The action upon the second count was in reality an action for an accounting involving many charges and credits between the parties aggregating upwards of $ 50,000. The trial was a protracted one; the account a difficult one to unravel. The printed evidence consists of 366 pages of the record while there were introduced in evidence 64 exhibits. No action for an accounting, or one of this character, should be tried to the jury. It imposes upon a jury an impossible task to expect them to carry in memory the details of a case of this character. It is unfair to a litigant to have his case determined by a tribunal which cannot fulfill that duty with accuracy or justice, however intelligent and desirous of doing their full duty the tribunal may be.

Id. Surprisingly enough, the court in Bennett then proceeded to reinstate the jury's verdict, reversing the judgment n. o. v. won by the defendant in the trial court.

Dicta such as those in Bennett must be read with extreme caution, not only because they are dicta, but also because "the courts of the nineteenth and early twentieth century simply did not share (the unequivocal commitment to the virtue of jury trials shown in Beacon Theatres. There was instead) a more or less distinctly conscious judicial aversion to jury trial, especially in the federal courts and the court systems of the Northeastern states." F. James & G. Hazard, Civil Procedure § 8.5, at 364 (1977) (footnotes omitted). The Bennett dictum must be read with even greater caution, coming as it does from a state system which, at the time of the adoption of the federal constitution, "had a procedure all its own, going beyond anything in English practice, by which all issues of fact or law could be decided by the court," Henderson, The Background of the *Seventh Amendment*, 80 Harv.L.Rev. 289, 317 (1966), and in which such procedures apparently survived well into the twentieth century. See *Ex parte Peterson, 253 U.S. 300, 308-09* & n. 3, *40 S. Ct. 543, 64 L. Ed. 919 (1920)*; *Sulzer v. Watson, 39 F. 414 (C.C.D.Vt.1889)* (in action of "book-account" in Connecticut, trial is by court-appointed auditor rather than by jury; Connecticut procedure could not be used in federal court because of *Seventh Amendment*).

[47] Blackstone's Commentaries were first published in 1765 and may, therefore, be especially valuable as a guide to the theory and practice of late eighteenth-century England.

[48] Story was responding to Blackstone's view that discovery was the sole ground for equity jurisdiction in matters of account.

According to Story, discovery

court or a jury was just one element of the choice between law and equity in a system where the procedures of one or the other had to be taken as a package, it is difficult to assess with any confidence the importance of that one element in any particular change in the respective jurisdictions.

[85]** The difficulties attending such speculation have been well described by Professor James:

> At no time in history was the line dividing equity from law altogether or even largely the product of a rational choice between issues which were better suited to court or to jury trial. There is little to suggest that the chancellor's initial choice of a procedure borrowed from canon law reflected a considered rejection of jury trial. Rather, the choice between law and equity frequently was made upon considerations of other factors. For when equity procedure took shape it differed from the procedure at law in several important respects. Evidence in equity was produced largely by sworn pleadings and written depositions taken upon written interrogatories, rather than by testimony taken orally and subject to oral cross-examination, all in the presence of the trier of fact. At law the parties to an action were neither competent nor compellable to testify, whereas in equity each party could offer his own sworn statements and also "probe the conscience" of his adversary by propounding written interrogatories, which had to be answered under oath. The chancellor used specific remedies which were **[**86]** not available to the law courts, and the chancellor could handle multiple parties and the possibility of multiple suits in a way that the law courts had not developed. The procedure of each tribunal had to be taken as a package, and each procedure had substantial limitations which the other did not share. In equity the procedure was epistolary, included the statements of both parties, might provide for specific relief and handle multiple parties and suits, and involved no jury. At law the procedure involved oral testimony and cross-examination at a jury trial, relief In rem, and the unavailability of the testimony of either party.
>
> From the above it may be seen that even where the allocation of issues between the jurisdictions was based on rational considerations, it would often be dictated by some factor other than jury trial. When the chancellor was faced with a prickly question of credibility of witnesses, his rational desire for the benefits of demeanor evidence could be satisfied only by sending the issue to the law court with its jury. Where an accounting between business associates was sought, if the inquiry was to have the benefit of the testimony of the parties (the two witnesses **[**87]** who could shed the most sometimes the only light on the matter), it would have to be conducted in equity, where the chancellor would decide questions of fact without a jury. The same thing was true where specific performance of a contract was appropriate rather than damages for its breach, or when unnecessary multiplicity of suits was to be prevented. To put it colloquially, jury trial (or court trial) was often merely the tail of the dog under a system where you had to take the whole dog.

[*921] James, Right to a Jury Trial in Civil Actions, 72 Yale L.J. 655, 661-62 (1963) (footnotes omitted; emphasis added). Sometimes, of course, the choice between law and equity had nothing to do with any of the procedural advantages of either system, reflecting instead the political struggle between the King and Parliament. See id., at 663; F. James & G. Hazard, Civil Procedure § 8.2, at 358 & n. 32 (1977).

The proposition that these cases demonstrate some sort of policy or belief that complex matters should not be decided by juries is further weakened by the apparent fact that the "complexity exception" to the "jury trial rule" was limited to matters of account. See pp. 914-918, **[**88]** Supra. This limitation has been explained by some by distinguishing between complication in determining liability and complication in determining damages. See *Tights,*

. . ., although a strong yet is not the sole ground of (concurrent) jurisdiction (in matters of account). The whole machinery of Courts of Equity is better adapted to the purpose of an account in general, and in many cases independent of the searching power of discovery, and supposing a Court of Law to possess it, it would be impossible for the latter to do entire justice between the parties; for equitable rights and claims not cognizable at law are often involved in the contest. Lord Redesdale has justly said that in a complicated account a Court of Law would be incompetent to examine it at Nisi Prius with all the necessary accuracy. This is the principle on which Courts of Equity constantly act by taking cognizance of matters which though cognizable at law are yet so involved with a complex account that it cannot be properly take at law; and until the result of the account is known, the justice of the case cannot appear.

2 Story's Equity Jurisprudence § 591, at 9 (14th ed. 1918). (footnote omitted).

Inc. v. Stanley, 441 F.2d 336, 340-41 (4th Cir.) Cert. denied, *404 U.S. 852, 92 S. Ct. 90, 30 L. Ed. 2d 91 (1971)*; *Radial Lip Machine, Inc. v. International Carbide Corp., 76 F.R.D. 224, 228 (N.D.Ill.1977)*. [49] This explanation is attractive in that it harmonizes two groups of cases by enunciating a rational principle for distinguishing between them. However, it would imply that complex remedial issues in cases other than accounting cases have been (or can be) withdrawn from juries for that reason something of which there is no evidence. Moreover, the assumption that some rational principle is embedded in a practice which may be no more than an anachronistic remnant of legal history is hardly deserving of uncritical acceptance.

[89]** We therefore see no basis for finding in the complex accounting cases a rationale, policy, or "implicit belief" that complex and difficult questions of fact, whether of liability or of damages, must be decided by judges rather than juries.

4. Treble Damages and Juries

Earlier in this opinion, we noted that the complex accounting cases were within the concurrent jurisdiction of equity, I. e., they were cognizable at law but could, for some reason, also be brought in equity. See pp. 907-911, Supra. There were many other instances in which, for reasons other than complexity, rights and remedies normally "legal" could be determined in equity. For example, compensatory damages could be awarded in equity as "incidental" in suits seeking specific performance for breach of a contract to convey land, or actions for injunctions against copyright infringement. See F. James & G. Hazard, Civil Procedure § 8.7, at 370-372 (1977). And the "general understanding" prior to merger was that ***HN13***[] "equity could properly resolve corporate claims of any kind (including normally "legal' claims) without a jury when properly pleaded in derivative suits complying with the equity rules." *Ross v. Bernhard, 396* ***[**90]*** *U.S. 531, 536-37, 90 S. Ct. 733, 737, 24 L. Ed. 2d 729 (1970)*.

But there were certain kinds of claims which were exclusively legal and could never be the subject of an action in equity. *Scott v. Neely, 140 U.S. 106, 109-111, 117, 11 S. Ct. 712, 716, 35 L. Ed. 358 (1891)* (court of equity has no jurisdiction in a suit where "a claim properly cognizable only at law is united in the same pleadings with a claim for equitable relief.") See *Dairy Queen, Inc. v. Wood, 369 U.S. 469, 470-72, 82 S. Ct. 894, 8 L. Ed. 2d 44 (1962)*. ***HN14***[] Claims for treble damages the relief sought by the plaintiffs in this suit have traditionally been among those "properly cognizable only at law:"

> The right to recover penal damages still remains a right enforceable only in a common-law action. Courts of equity do not award as incidental relief damages penal in character without express statutory (authorization), as has frequently been held in copyright and patent cases.

Decorative Stone Co. v. Building Trades Council, 23 F.2d 426, 427-28 (2d Cir.) Cert. denied, *277 U.S. 594, 48 S. Ct. 530, 72 L. Ed. 1005 (1928)*. See *Fleitmann v. Welsbach* ***[*922]*** *Street Lighting Co., 240 U.S. 27, 36 S. Ct. 233, 60 L.* ***[**91]*** *Ed. 505 (1916)*; 5 Moore's Federal Practice PP 38.19(2) & 38.37(2), at 171, 308-308.3 (2d ed. 1978). Thus, even if the exercise of equity jurisdiction over complex legal claims were not limited to matters of account, it would still not extend to this case because of the exclusively legal nature of the relief sought. [50]

[92]** D. The Historical Test and Complexity After Ross v. Bernhard

---

[49] It is noteworthy that in the case before us the alleged complexity is in the determination of liability, not damages.

[50] The defendants' claim of an absolute right to a non-jury trial in this litigation must be based upon the unarticulated premise that matters deemed too complex for juries were within the Exclusive jurisdiction of equity, much as derivative actions were cognizable only in equity. But, had defendants been able to establish this premise, the exclusively legal nature of treble damages would create a potential conflict of rights in every complex antitrust case not unlike the conflict that left the plaintiff in the Fleitmann case without a remedy. See n. 19, Supra. However, the refusal of the law courts to entertain derivative suits was a mere "procedural impediment" to the trial by jury of legal claims presented in such suits, a problem eliminated by merger. See *Ross v. Bernhard, 396 U.S. 531, 90 S. Ct. 733, 24 L. Ed. 2d 729 (1970)*. The conflict of rights which the defendants here seek to create would admit of no solution unless one of the rights is preferred, or all parties agree on the mode of trial.

1. Ross and Recent Decisions Striking Jury Demands

In *Ross v. Bernhard, 396 U.S. 531, 90 S. Ct. 733, 24 L. Ed. 2d 729 (1970)*, the Court continued the expansion of the right to jury trial begun in Beacon Theatres and Dairy Queen. The issue decided in Ross was the one that left the plaintiff in Fleitmann without a remedy the presentation of a "legal" claim in a shareholders derivative action, previously cognizable only in equity. [51] The Court held that the merger of law and equity had removed the procedural barriers to the trial of such claims by jury; derivative actions were thereafter to be viewed as having a "dual nature." The Court held that the purely equitable question of the right of the shareholders to proceed on behalf of the corporation was to be determined by the court, and that the corporation's underlying claims could then be tried by the appropriate method by the court if "equitable," and by a jury if "legal." In order to reach this result, the Court drew from Beacon Theatres and Dairy Queen the lesson that

[93]**

> where equitable and legal claims are joined in the same action, there is a right to jury trial on the legal claims which must not be infringed either by trying the legal issues as incidental to the equitable ones or by a court trial of a common issue existing between the claims. The *Seventh Amendment* question depends on the nature of the issue to be tried rather than the character of the overall action.

396 U.S., at 537-38, 90 S. Ct. at 738. [52] It then added the following footnote:

> As our cases indicate, the "legal" nature of an issue is determined by considering, first, the pre-merger custom with reference to such questions; second, the remedy sought; and Third, the practical abilities and limitations of juries. Of these factors, the first, requiring extensive and possibly abstruse historical inquiry, is obviously the most difficult **[**94]** to apply. See James, Right to a Jury Trial in Civil Actions, 72 Yale L.J. 655 (1963).

Id. at 538, n. 10, 90 S. Ct. at 738 (dictum) (emphasis added). Since Ross, several courts have struck jury demands on the authority of this dictum, which has been described by one commentator as "a suggestion of infidelity to the (historical) test." **[*923]** Wolfram, The Constitutional History of the *Seventh Amendment*, 57 Minn.L.Rev. 639, 643 (1973).

The first was *Hyde Properties v. McCoy, 507 F.2d 301 (6th Cir. 1974)*, an interpleader action instituted by the purchaser of a building to resolve conflicting claims to the amount it owed on the notes issued in payment for the building. The building had been purchased from a corporation (IHPT) which then used the notes to redeem the shares held by McCoy, a principal stockholder. "The United States maintained that the redemption of McCoy's stock with the notes was a fraudulent conveyance as to it as a tax lien creditor. McCoy contended that the transfer was a legal redemption of the stock by a solvent corporation." *Id., at 304*. A four-day jury trial [53] followed the district judge's denial of the Government's motion to strike McCoy's jury demand, **[**95]** and, after the jury determined

---

[51] The plaintiffs in Ross were shareholders in a closed-end investment company, which they claimed had paid excessive brokerage fees because of improper control by its broker. The plaintiffs alleged breach of the contract between the investment company and its broker; they accused the directors of breach of fiduciary duty, conversion of corporate assets, bad faith, gross negligence, and misconduct. The suit sought to require that the defendants, including the brokerage house, "account for and pay to the Corporation . . . their profits and gains and its losses." *396 U.S. at 531-32, 90 S. Ct. at 734*.

HN15[] -

[52] Because there were no factual questions common to both issues in Ross, the principles of Beacon Theatres were not offended by resolving the equitable issue first.

[53] Letter from Ronald Lee Gilman, Esquire to Judge Edward R. Becker (March 2, 1979), filed of record. Mr. Gilman, who represented McCoy, was kind enough to furnish this information at our request.

that the conveyance was not fraudulent, the court granted judgment n. o. v. for the Government. The court of appeals viewed the *Seventh Amendment* question as a "threshold issue . . . because it bears directly upon the district court's rulings subsequent to the verdict." Id. [54]

[96]** In order to determine whether the issues presented were "legal" or "equitable," the court looked to the Ross footnote as a three-part test, finding as to the first part that "questions involving fraud cannot be classified from custom as solely legal or solely equitable and, as a result, the nature of the remedy sought becomes considerably more important . . .. If a fraudulent conveyance action is brought to set aside a transfer, such a remedy is cognizable solely in equity." *507 F.2d at 305*. After noting that the case was "hybrid" because both legal and equitable remedies were theoretically available, the court decided that "equitable relief was necessary for enforcement of the Government's claim." *Id., at 306*.

Finally, the court considered the practical abilities of juries:

> At trial the fraudulent conveyance issue depended upon the solvency or insolvency of IHPT at the time of or immediately after the transfer. The determination of this question involved conflicting issues of fact concerning accounting procedures used to list the assets and liabilities of the corporation. In its opinion, the district court acknowledged that "the issues between the parties were both complex and **[**97]** likely to be confusing in light of the underlying facts and circumstances. . . ." We agree with this observation and consequently find as to the third factor that a jury is not especially well-qualified to dispose of such issues and that a non-jury trial of the issues is both more efficient and more likely to produce a just result.

It then concluded that "there is no constitutional right to a jury trial in an interpleader action when the creditor is proceeding against the fund and seeking to annul the conveyance to the transferee." Id.

The court's view that non-jury trials in such cases are "more efficient and more likely to produce a just result," though contributing to the court's holding, does not appear to have been a major ground for it. The court seemed instead to rely largely on the need for equitable relief; [55] certainly its **[*924]** opinion cannot be read as holding that complexity alone is sufficient to make "equitable" an otherwise "legal" issue. Similarly, in *SEC v. Associated Minerals, Inc., 75 F.R.D. 724, 725-26 (E.D.Mich.1977)*, the court struck a jury demand after finding that the claims presented and remedies sought were equitable, adding that "to the extent **[**98]** that a jury's ability to properly decide an action may be relevant . . . the issues of fraud and noncompliance with the registration provisions of the securities laws . . . are indeed complex and for this reason are not especially suited by resolution for a jury." However, several other courts have struck jury demands on the Sole ground of size and complexity in cases that would traditionally have been viewed as purely "legal."

The first of these decisions was *In re Boise Cascade Securities Litigation, 420 F. Supp. 99 (W.D.Wash.1976)*, a securities fraud litigation growing out of two corporate acquisitions in which the plaintiffs had received Boise Cascade stock **[**99]** shortly before write-downs of corporate assets caused the stock to lose more than 80% Of its value. Although recognizing that there was no apparent authority for the third part of the Ross footnote, the court found it to be "of constitutional dimensions. It must be seen as a limitation to or interpretation of the *Seventh Amendment*." *Id. at 105*. After a review of the complex issues involved in the case convinced the court that "it would

---

[54] Had McCoy been entitled to a jury trial, the court of appeals could have affirmed the judgment n. o. v. only if there was insufficient evidence to support the jury's verdict. See *Upton v. Western Ins. Co., 492 F.2d 148 (6th Cir. 1974)*; *DeGarmo v. City of Alcoa, 332 F.2d 403 (6th Cir. 1964)*. Since the court of appeals determined that McCoy was not entitled to a jury, the trial court's findings of fact on the fraudulent conveyance issue were reviewed under the "clearly erroneous" standard applicable after a bench trial.

[55] The court may also have been influenced by the fact that interpleader, like the derivative action, had been a remedial device belonging to equity alone, although it interpreted Ross as requiring that in interpleader suits, as in derivative actions, the legal or equitable nature of the underlying issues was to determine the *Seventh Amendment* question.

be more capable of fairly deciding the facts" than a jury, the plaintiffs' jury demands were struck to preserve both "the appearance and fact of fairness." Id. [56]

[100]** The following year, jury demands were struck by the court Sua sponte in *In re U. S. Financial Securities Litigation, 75 F.R.D. 702 (S.D.Cal.1977)* Appeal pending, # 77-8213 (9th Cir. Aug. 29, 1977). The litigation comprised eighteen separate actions, consolidated for pretrial purposes by the Judicial Panel on Multidistrict Litigation. Five plaintiff classes had been certified; they asserted various securities law claims against "20 or so individual defendants and . . . 80-odd corporate or partnership defendants." *Id., at 706*. The court's review of the scope of pretrial discovery and the probable extent of the trial reveals a litigation whose magnitude is comparable in many ways to that of the case now before us. See *id., at 706-708, 711-714*. After reviewing many of the cases discussed above, including the accounting cases, *Id., at 708-11*, the court distilled the following:

> general guidelines . . . for deciding whether a particular case is so complex that equity jurisdiction will attach and permit the case to be tried without a jury.
>
> First, although mere complexity is not enough, complicated accounting problems are not generally amenable to jury resolution. Although such problems **[**101]** often arise only during the damages portion of a trial, they sometimes are present during the liability portion as well. Also, given the comments in Dairy Queen regarding special masters, only a case in which such a special master could not assist the jury meaningfully may be subject to removal from the province of the jury because of complex accounts.
> Second, the jury members must be capable of understanding and of dealing rationally with the issues of the case.
> And third, an unusually long trial may make extraordinary demands upon a jury which would make it difficult for the jurors to function effectively throughout the trial.

[*925] *Id. at 711*. Because the court found that all three of its guidelines militated against a jury trial, it determined to try the cases without a jury. The only factors considered were size and complexity; the court did not discuss the otherwise legal or equitable nature of the claims made and the remedies sought.

The next decision striking a jury on the authority of Ross was *Bernstein v. Universal Pictures, Inc., 79 F.R.D. 59 (S.D.N.Y.1978)*, a class action asserting antitrust claims on behalf of the composers and lyricists who have written **[**102]** for television and motion pictures. As in the U. S. Financial litigation, the question of a jury's ability to handle the case was raised by the court Sua sponte.

The court in Bernstein regarded the Ross footnote as announcing "a three-fold test to determine the "legal nature of an issue'." It recognized that "(t)he third prong of this test is devoid of cited authority and has been regarded by some as a departure, perhaps unintentional, from former law," but thoughtfully related the practical abilities of juries to the "remedy sought," since "the adequacy of the legal remedy necessarily involves the adequacy of the jury and its competency to find the facts," and concluded after review of many of the cases discussed above that consideration of the practical abilities of juries "(f)ar from being an innovation . . . is actually the restatement of . . . traditional equity powers." *Id., at 66-67*. [57]

[103]** In applying the Ross test, the Bernstein court determined that the pre-merger custom in antitrust cases was to require jury trials, and that the demands for declaratory relief and treble damages were "clearly not

---

[56] The court's analysis of the third Ross factor emphasized the centrality of "an impartial and capable fact finder" to the fairness which, under the *due process clauses of the Fifth* and *Fourteenth Amendments*, measures "the legitimacy of government action. . . ." *420 F. Supp., at 104*. The court then considered the need to excuse employed persons from the jury because of an estimated trial time of four to six months, the possibility that evidence of settlement of other litigation against the defendant would prejudice the jury, and the advantages enjoyed by the court as fact finder, including experience in other commercial cases, familiarity with the case from the pretrial proceedings, the ability to review daily transcripts, etc. *Id., at 103, 104-05*.

[57] The cases considered by the court in reaching this conclusion included the Clench and Wedderburn cases discussed above at 49-55, and several of the complex accounting cases discussed above at 33-40.

equitable," [58] but that the estimated trial time of more than four months would make it impossible to empanel a representative jury. Moreover, the court found that "the sheer size of the litigation and the complexity of the relationships among the parties render it As a whole beyond the ability and competence of any jury to understand and decide with rationality." *Id., at 66-67, 70*. Thus, the order striking the plaintiffs' jury demand was based entirely on the "third prong" of the Ross "test."

[104]** The most recent decision striking a jury demand on the authority of Ross v. *Bernhard is ILC Peripherals Leasing Corp. v. I. B. M. Corp., 458 F. Supp. 423, 445-449 (N.D.Cal.1978)*, a treble damage antitrust case. Evaluating the case in the terms of the Ross dictum, the court found that both the premerger custom and the remedy sought were traditionally legal, but that "the third factor of the equation, the practical abilities and limitations of jurors, . . . causes the court to conclude that the issues in this case must be considered to be equitable." *Id. at 445*. [59]

[105]** **[*926]** Many other courts have also indicated that *Seventh Amendment* questions are to be determined by applying the three factors identified in the Ross dictum. See, e.g., *Pons v. Lorillard, 549 F.2d 950, 953 (4th Cir. 1977)* ("the three-pronged classical test"), Aff'd on other grounds, *434 U.S. 575, 98 S. Ct. 866, 55 L. Ed. 2d 40 (1978)*; *Minnis v. UAW, 531 F.2d 850, 852-53 (8th Cir. 1975)*; *Farmer-Peoples Bank v. United States, 477 F.2d 752 (6th Cir. 1973)*; *Dawson v. Contractors Transport Corp., 151 U.S.App.D.C. 401, 405, 467 F.2d 727, 731 (1972)*; *Id., 151 U.S.App.D.C. at 410, 414, 467 F.2d at 736, 740* (Fahy, J., dissenting); *Fellows v. Medford Corp., 431 F. Supp. 199, 201-02 (D.Or.1977)*; *Polstorff v. Fletcher, 430 F. Supp. 592, 593-94 (N.D.Ala.1977)*; *General Tire & Rubber Co. v. Watson-Bowman Associates, 74 F.R.D. 139, 140-142 (D.Del.1977)*; *Jones v. Orenstein, 73 F.R.D. 604, 606 (S.D.N.Y.1977)*; *Marshall v. Electric Hose & Rubber Co., 413 F. Supp. 663, 667 (D.Del.1976)*; *Cayman Music, Ltd. v. Reichenberger, 403 F. Supp. 794, 796-97 (W.D.Wis.1975)*; *Cleverly v. Western Electric Co., 69 F.R.D. 348, 350-52 (W.D.Mo.1975)*; *Rowan v. Howard Sober, Inc., 384 F. Supp. 1121, 1124-25 (E.D.Mich.1974)*; **[**106]** *VanErmen v. Schmidt, 374 F. Supp. 1070, 1074-75 (W.D.Wis.1974)*; *Chilton v. National Cash Register Co., 370 F. Supp. 660, 662-65 (S.D.Ohio 1974)*; *Richards v. Smoltich, 359 F. Supp. 9 (N.D.Ill.1973)*. Cf. *Rogers v. Loether, 467 F.2d 1110, 1118 (7th Cir. 1972)* (alternative ground for holding), Aff'd on other grounds sub nom *Curtis v. Loether, 415 U.S. 189, 94 S. Ct. 1005, 39 L. Ed. 2d 260 (1974)*.

Not all the lower federal courts have used Ross as the definitive *Seventh Amendment* test the Second and Fourth Circuits, for example, have questioned the scope and validity of the Ross footnote. See *Barber v. Kimbrell's, Inc.,*

---

[58] The court rejected the defendants' suggestion that the damages be characterized as equitable restitution. The plaintiffs also sought injunctive relief, but it is of course well settled that the joinder of legal and equitable claims does not waive the right to a jury on the legal claims, including any common issues. See *Beacon Theatres, Inc. v. Westover, 359 U.S. 500, 79 S. Ct. 948, 3 L. Ed. 2d 988 (1959)*.

[59] In ILC Judge Conti had denied a pretrial motion to strike the jury demand on the ground of complexity. The trial took 96 days but ended in a mistrial, declared when the jury was deadlocked after 19 days of deliberations. Judge Conti then directed a verdict for the defendants, and struck the jury demand in the event that a remand necessitated a second trial.

In finding that the case was beyond the abilities of jurors, Judge Conti relied heavily on his own observations during trial:

The jurors were conscientious and diligent, but their past experience had not prepared them to decide a case involving technical and financial questions of the highest order.

Throughout the trial, the court felt that the jury was having trouble grasping the concepts that were being discussed by the expert witnesses, most of whom had doctorate degrees in their specialities. This perception was confirmed when the court questioned the jurors during the course of their deliberations and after they were discharged. When asked by the court whether a case of this type should be tried to a jury, the foreman of the jury said, "If you can find a jury that's both a computer technician, a lawyer, an economist, knows all about that stuff, yes, I think you could have a qualified jury, but we don't know anything about that." (Tr. 19,548). Several of the other jurors indicated that they thought the major stumbling block was the requirement that the verdict be unanimous. When they were questioned after the trial, most of the jurors indicated that they thought a complex antitrust case like this one should be tried to the court.

458 F. Supp., at 447-48.

577 F.2d 216, 225 & n. 25 (4th Cir. 1978); United States v. J. B. Williams Company, Inc., 498 F.2d 414, 428-29 (2d Cir. 1974). But see id., at 452-53 (Oakes, J., dissenting). And in a later Seventh Amendment decision, the Second Circuit ignored the Ross footnote entirely. See SEC v. Commonwealth Chemical Securities, Inc., 574 F.2d 90 (2d Cir. 1978). But in no decision of which we are aware has a court reached the conclusion that we reach here that the Ross footnote may not be read as requiring or permitting the consideration of "the practical abilities and limitations of **[**107]** juries" in determining whether the constitutional right to trial by jury extends to matters committed by Congress or the common law to federal district courts.

We have reached this conclusion with great respect for, and mindful of the authority of, the many courts that have reached the opposite result. Our conclusion is based on three considerations: ***HN16***[] (1) the available evidence shows that the Supreme Court never intended that the Ross footnote be a "test" for Seventh Amendment questions; (2) the proposed "test" is unworkable; and (3) application of the Ross "test" in the manner proposed would be fundamentally inconsistent with the policies underlying the role of the jury in civil actions in the United States. Our reasoning will be set out in the balance of this opinion; because of the extensive authority to the contrary, we do so at somewhat greater length than is customary.

2. Construing Ross

a. Jury Trial Decisions in the Supreme Court Since Ross

It would be at least unusual for the Supreme Court to announce a new rule of constitutional magnitude in dicta, in a footnote, and unsupported by any explanation or citation of authority. [60] **[**109]** The use of such **[*927]** means to modify **[**108]** Sub silentio a rule of constitutional interpretation that has been consistently followed for decades, if not centuries, would be even more unusual. As one commentator has written, "(T)he footnote is so cursory, conclusory and devoid of cited authority or reasoned analysis that it is difficult to believe it could have been intended to reject such established historical practice or Supreme Court precedent." Redish, Seventh Amendment Right to Jury Trial: A Study in the Irrationality of Rational Decision Making, 70 Nw.U.L.Rev. 486, 526 (1975). Thus, "absent a much clearer statement by the Supreme Court," Skehan v. Board of Trustees, 590 F.2d 470, 490 (3d Cir. 1978), to the effect that Ross authorized a departure from the historical test, we would most likely consider ourselves bound by the prior decisions of the Court approving the historical test. [61] But we need not decide on that basis, because the Ross dictum is not the most recent entry on the Court's Seventh Amendment slate. We think it very significant that, despite many opportunities to do so, the Court has never proclaimed or apparently recognized that the Ross footnote prescribed a test for the Seventh Amendment.

The Ross case itself is the first and best example of this. In Ross, the argument that the case was too complex for determination by a jury had been raised at every level. The district court found that the issues in the case were not too complicated for a jury, while the court of appeals expressed its doubts that juries were competent to try derivative suits "because of the exceedingly complex nature of many of these actions," but considered it irrelevant because "the Seventh Amendment does not ask that we assess the suitability of a given type of litigation for jury trial." See Ross v. Bernhard, 275 F. Supp. 569, 570 (S.D.N.Y.1967), Rev'd on other grounds, 403 F.2d 909, 915 (2d Cir. 1968), Rev'd on other grounds, 396 U.S. 531, 90 S. Ct. 733, 24 L. Ed. 2d 729 (1970). Opposing the petition for certiorari, the respondents **[**110]** contended that the case was unsuitable for a jury because "a precise and obviously difficult measurement of claimed disadvantage" to the corporation would be required for "each of many thousands of transactions." Respondents' Brief in Opposition to Petition for Writ of Certiorari, at 6-7. The respondents argued that statements in Kirby and Dairy Queen described a general exception to the Seventh

---

[60] Even the famous dictum in United States v. Carolene Products Co., 304 U.S. 144, 152 n. 4, 58 S. Ct. 778, 82 L. Ed. 1234 (1938) did not go nearly as far as some have suggested for the Ross footnote. See Regents of the University of California v. Bakke, 438 U.S. 265, 98 S. Ct. 2733, 2748 n. 28, 57 L. Ed. 2d 750 (1978).

[61] In Skehan, the court of appeals was discussing the question whether Edelman v. Jordan, 415 U.S. 651, 94 S. Ct. 1347, 39 L. Ed. 2d 662 (1974) had been overruled Sub silentio by Monell v. Department of Social Services, 436 U.S. 658, 98 S. Ct. 2018, 56 L. Ed. 2d 611 (1978).

Amendment, and that Ross fell within it. See id.; Brief for Respondents, at 17-19. [62] The petitioners in Ross did not dispute the respondents' position that some cases were too complex for juries, but argued instead that their case was not the "rare case" referred to in Dairy Queen. See Brief for Petitioners at 18; Reply Brief for Petitioners at 10-12.

Thus, the arguments made by the defendants here were squarely presented to the Court in Ross, and the cryptic mention in footnote 10 of "the practical abilities and limitations of juries" may possibly be explained by reference **[**111]** to these arguments. Yet, when the Court considered the claims asserted on behalf of the corporation in Ross, it determined that the claims were "at least in part . . . legal" without any evaluation or even mention of the ability of a jury to understand the issues:

> The relief sought is money damages. There are allegations in the complaint of a breach of fiduciary duty, but there are also allegations of ordinary breach of contract and gross negligence. The corporation, had it sued on its own behalf, would have been entitled to a jury's determination, at a minimum, of its damages against its broker under the brokerage contract and of its rights against its own directors because of their negligence.

Ross v. Bernhard, 396 U.S. 531, 542, 90 S. Ct. 733, 740, 24 L. Ed. 2d 729 (1970). The omission **[*928]** of any discussion of the jury's ability to deal with the complex issues presented in Ross implies strongly that the Court did not deem it relevant to the Seventh Amendment issue there.

The next case in which the Court could have applied the Ross "test" was Curtis v. Loether, 415 U.S. 189, 94 S. Ct. 1005, 39 L. Ed. 2d 260 (1974), in which a unanimous Court decided that the **[**112]** Seventh Amendment required jury trials of actions brought under § 812 of the Civil Rights Act of 1968, 42 U.S.C. § 3612. It did not analyze the problem in the terms of the Ross footnote, but instead stated the rule to be that "(t)he Seventh Amendment . . . requires a jury trial upon demand, if the statute creates legal rights and remedies, enforceable in an action for damages in the ordinary courts of law." Id., at 194, 94 S. Ct. at 1008. The Court then found that trial by jury must be available because the action was analogous to common-law torts, [63] Id., at 195, 94 S. Ct. 1005, and because the "relief sought here actual and punitive damages is the traditional form of relief offered in the courts of law," Id., at 196, 94 S. Ct. at 1009.

[113]** The Supreme Court's omission of the Ross "test" from its discussion of the constitutional issue stands in marked contrast to the opinion of the court of appeals in that case. Expressing uncertainty about the "full implications" of Ross, the court of appeals had first determined that traditional Seventh Amendment analysis required trial by jury, and then independently considered the second and third criteria identified in the Ross footnote, determining that they, too, were consistent with a jury trial. See Rogers v. Loether, 467 F.2d 1110, 1116-18 (7th Cir. 1972), Aff'd on other grounds sub nom. Curtis v. Loether, 415 U.S. 189, 94 S. Ct. 1005, 39 L. Ed. 2d 260 (1974). Thus, the Supreme Court's exclusive reliance on traditional Seventh Amendment analysis in Curtis represents at least a Sub silentio rejection of the Ross footnote as the appropriate test. Cf. Barber v. Kimbrell's, Inc., 577 F.2d 216, 225 n. 25 (4th Cir. 1978) (questioning continued validity of Ross test in light of its omission from Curtis).

Later the same term, the Court decided in Pernell v. Southall Realty, 416 U.S. 363, 94 S. Ct. 1723, 40 L. Ed. 2d 198 (1974), that the Seventh Amendment mandated trial by jury of **[**114]** actions under the District of Columbia's summary procedure for evictions. Again, the Court's decision was based on the historical test alone, without any reference at all to the Ross dictum. Id., at 370-81, 94 S. Ct. 1723. [64] **[**115]** Moreover, in rejecting the analysis of

---

[62] See pp. 907, 913-914 & n. 40, Supra.

[63] Antitrust actions have similarly been held to sound in tort. See, e.g., Solomon v. Houston Corrugated Box Co., 526 F.2d 389, 392 n. 4 (5th Cir. 1976); Tondas v. Amateur Hockey Ass'n., 438 F. Supp. 310, 315 (W.D.N.Y.1977); Albert Levine Associates v. Bertoni & Cotti, S.p.A., 314 F. Supp. 169, 171 (S.D.N.Y.1970); Fagan v. Sunbeam Lighting Co., 303 F. Supp. 356 (S.D.Ill.1969).

[64] One commentator draws the opposite inference from the failure of the Curtis and Pernell decisions to mention the Ross footnote, thinking it "unlikely . . . that the Court would overturn so significant a decision without some comment." Note, The Right

the D. C. Court of Appeals as "fundamentally at odds with The test we have formulated for resolving Seventh Amendment questions," id., at 374, 94 S. Ct. at 1729 (emphasis added), the Court described that "test" by quoting from the distinction between law and equity drawn in Parsons v. Bedford, [65] concluding that the Seventh Amendment "requires trial by jury in actions unheard of at common law, provided that the action involves rights and remedies of the sort traditionally enforced in an action at law, rather than in an action in equity or admiralty." Id., at 374-75, 94 S. Ct. at 1729.

This view of the Seventh Amendment was reaffirmed by the Court in Atlas Roofing Co., Inc. v. OSHRC, 430 U.S. 442, 449, **[*929]** 97 S. Ct. 1261, 51 L. Ed. 2d 464 (1977) and Lorillard v. Pons, 434 U.S. 575, 98 S. Ct. 866, 55 L. Ed. 2d 40 (1978). [66] Moreover, in Parklane Hosiery Co., Inc. v. Shore, 439 U.S. 322, 99 S. Ct. 645, 58 L. Ed. 2d 552 (1979), the Court has once again decided a Seventh Amendment issue by applying a historical test, without any mention of the abilities of jurors or the Ross dicta. [67] Thus, instead of using the Ross dicta as a test for Seventh Amendment questions, the Court's opinions during this decade have consistently reaffirmed the continuing validity of the historical test.

[116]** b. Explanations of the Ross Footnote

Because the Court's mention of the "practical abilities and limitations of juries" in Ross was without any citation of authority and unrelated to anything else in the opinion of the Court, there has been no small measure of speculation about its source. In Bernstein v. Universal Pictures, Inc., 79 F.R.D. 59 (S.D.N.Y.1978), the court explained the "third prong" of the Ross test by relating it to the traditional availability of equity when the remedy at law is inadequate, since

> where the "remedy sought" necessarily involves determination of complexities that "only a court of equity can satisfactorily unravel," the "practical abilities and limitations of juries" are also necessarily involved and must be considered in evaluating the right to a jury trial. The adequacy of the legal remedy necessarily involves the jury and its competency to find the facts.

Id. at 66. And in In re Boise Cascade Securities Litigation, 420 F. Supp. 99, 104 (W.D.Wash.1976), the court related the third part of the Ross dictum to concepts of fundamental fairness and due process. Scholars, too, have joined the debate. Compare Wolfram, Supra note 25, at 644-45 (a **[**117]** "fleeting expression . . . of infidelity to the centrality of the traditional historical test . . . (which) would suggest, for the first time, . . . an explicitly functional approach. . . .") With Note, Congressional Provision for Nonjury Trial Under the Seventh Amendment, 83 Yale L.J. 401, 411-12 (1973) (finding a "long and distinguished" lineage for the third part of the Ross test in the traditional resort to equity because of "procedural inadequacies" such as "rules against multifarious actions . . . or limited provisions for discovery. . . . One such failing (jury trial) has not been mitigated by merger.").

Our own research discloses two very limited circumstances in which functional aspects of jury trials have been considered by the Supreme Court in Seventh Amendment contexts and to which, therefore, the Ross dictum might refer, but neither supports the position of the defendants. One of these is the traditional availability of equity jurisdiction in complex accounting cases which was discussed in dicta in Kirby and Dairy Queen in terms of the

---

to a Jury Trial in Complex Civil Litigation, 92 Harv.L.Rev. 898, 902 n. 28. But this argument Assumes that the Ross footnote announced a significant constitutional doctrine, and is also based on the questionable premise that the Court had abandoned the historical test in favor of a "dynamic" interpretation of the Seventh Amendment. See note 39, Supra.

[65] See pp. 905-906, Supra.

[66] Although in Pons the Court described the parameters of the Seventh Amendment in terms of "legal relief . . . and legal rights," the holding of the Court was based on statutory grounds.

[67] Because the "legal" or "equitable" nature of a claim was not an issue in Parklane, the Court's failure to use the Ross "test" does not of itself vitiate the claim that the Ross footnote is the appropriate test for such issues. However, both the majority and dissenting opinions in Parklane clearly subscribed to the historical test. Compare Parklane Hosiery Co. v. Shore, 439 U.S. 322, 99 S. Ct. 645, 652-55, 58 L. Ed. 2d 552 (1979), With id., at 337-350, 99 S. Ct. at 655-61 (Rehnquist, J., dissenting).

difficulty of such matters for juries, See pp. 913-914 & n. 40, Supra, even though the available evidence suggests that this consideration **[**118]** had little or no relation to the existence of that part of equity jurisdiction. See pp. 918-921, Supra. As we have already noted, this argument was so fully presented to the Court in Ross that the mention of the limitations of juries in the footnote may be a reference to it, but could hardly be an endorsement. *Supra, at 927-928*.

The second circumstance, and the only one in which functional considerations have actually contributed to a Holding that there is no jury trial right in certain cases, involves actions committed by Congress to **[*930]** special adjudicatory bodies as part of a statutory scheme. The rationale of *NLRB v. Jones & Laughlin Steel Corp., 301 U.S. 1, 57 S. Ct. 615, 81 L. Ed. 893 (1937)* and *Katchen v. Landy, 382 U.S. 323, 86 S. Ct. 467, 15 L. Ed. 2d 391 (1966)* was explained by the Court in *Curtis v. Loether, 415 U.S. 189, 94 S. Ct. 1005, 39 L. Ed. 2d 260 (1974)*:

> Jones & Laughlin . . . stands for the proposition that the *Seventh Amendment* is generally inapplicable in administrative proceedings, where jury trials would be incompatible with the whole concept of administrative adjudication[n8] and would substantially interfere with the NLRB's role in the statutory **[**119]** scheme. *Katchen v. Landy, 382 U.S. 323, (86 S. Ct. 467, 15 L. Ed. 2d 391*), . . . is to like effect. There the Court upheld, over a *Seventh Amendment* challenge, the Bankruptcy Act's grant of summary jurisdiction to the bankruptcy court over the trustee's action to compel a claimant to surrender a voidable preference; the Court recognized that a bankruptcy court has been traditionally viewed as a court of equity, and that jury trials would "dismember" the statutory scheme of the Bankruptcy Act. *Id., at 339, 86 S. Ct., at 478*. See also *Guthrie National Bank v. Guthrie, 173 U.S. 528, 19 S. Ct. 513, 43 L. Ed. 796 (1899)*. These cases uphold congressional power to entrust enforcement of statutory rights to an administrative process or specialized court of equity free from the strictures of the *Seventh Amendment*. But when Congress provides for enforcement of statutory rights in an ordinary civil action in the district courts, where there is obviously no functional justification for denying the jury trial right, a jury trial must be available if the action involves rights and remedies of the sort typically enforced in an action at law.
>
> [n8] "(T)he concept of expertise on which the administrative agency rests is not consistent with the use by it of a jury as fact finder." L. Jaffe, Judicial Control of Administrative Action 90 (1965).

[120]** *Id., at 194-95, 94 S. Ct. at 1008*. See *Atlas Roofing Co. Inc. v. OSHRC, 430 U.S. 442, 97 S. Ct. 1261, 51 L. Ed. 2d 464 (1977)*; *Pernell v. Southall Realty, 416 U.S. 363, 94 S. Ct. 1723, 40 L. Ed. 2d 198 (1974)*.

Significantly, Justice White, the author of the Ross opinion, had written for the Court in Katchen v. Landy just a few years earlier. It is therefore likely that the "practical abilities and limitations of juries" language of Ross refers to the established exception to the *Seventh Amendment* in administrative proceedings and specialized courts of equity. As Justice White has more recently written for the Court in another decision based on this principle: "History and our cases support the proposition that the right to a jury trial turns not solely on the nature of the issue to be resolved, but also on the forum in which it is to be resolved. . . . The *Seventh Amendment* prevents Congress from depriving a litigant of a jury trial in a "legal" action Before a tribunal customarily utilizing a jury as its fact-finding arm . . . ." *Atlas Roofing Co., Inc. v. OSHRC, 430 U.S. 442, 460-61* & n. 16, *97 S. Ct. 1261, 51 L. Ed. 2d 464 (1977)* (emphasis added). This exception to the *Seventh **[**121]** Amendment* is obviously inapplicable in any action in a United States District Court.

Whether the Ross footnote referred to one or the other (or both) of these two possible limitations to the *Seventh Amendment*, it clearly did not purport to expand either exception beyond its narrow limits into a general "test" for the right to jury trial. These interpretations would provide a meaning for the footnote that does not reduce it to mere surplusage, but are consistent with the Court's continued adherence to the historical test. See *supra, at 926-929*. We think it clear, therefore, that the Court has never intended that the Ross footnote change the historical test. This judgment is buttressed by the problems that would attend any attempt to articulate standards governing the Ross "test," and by our perception of the policies underlying the *Seventh Amendment*. It is to these problems and policies that we now turn.

[*931] 3. Problems Inherent in the Ross "Test"

We believe that the Ross footnote is also unsuitable for use as a test for *Seventh Amendment* issues because there is no satisfactory method for the consistent application of such a test.

a. The Case-by-Case Approach

In each of **[**122]** the decisions in which the right to jury trial has been denied on the sole ground of the size and complexity of the case, the test was applied on an Ad hoc basis. The courts did not decide that all antitrust cases or class actions were beyond the ken of juries, but only that the particular actions before them were. See *ILC Peripherals Leasing Corporation v. IBM, 458 F. Supp. 423, 448-49 (N.D.Cal.1978)*; *Bernstein v. Universal Pictures, Inc., 79 F.R.D. 59, 70 (S.D.N.Y.1978)*; *In re U. S. Financial Securities Litigation, 75 F.R.D. 702, 712-14 (S.D.Cal.1977)*; *In re Boise Cascade Securities Litigation, 420 F. Supp. 99, 104-05 (W.D.Wash.1976)*. [68] **[**123]** Although none of these decisions considered the possibility of applying Ross on a "generic" basis, a case-by-case approach would seem to be required by the nature of the Ross "test." [69]

[124]** However, a case-by-case approach would be a major departure from the settled method of *Seventh Amendment* analysis used by the Supreme Court in its own decisions, both before and after Ross. In these decisions, the Court has either indicated or clearly assumed that they apply to all cases or claims of the same class. See, e.g., *Pernell v. Southall Realty, 416 U.S. 363, 94 S. Ct. 1723, 40 L. Ed. 2d 198 (1974)* (jury required in actions to recover real property in courts of general jurisdiction); *Curtis v. Loether, 415 U.S. 189, 94 S. Ct. 1005, 39 L. Ed. 2d 260 (1974)* (jury trial guaranteed in all damage suits under *42 U.S.C. § 3612*); *Ross v. Bernhard, 396 U.S. 531, 90 S. Ct. 733, 24 L. Ed. 2d 729 (1970)* (damage actions against corporate directors for negligence and breach of contract); *Dairy Queen, Inc. v. Wood, 369 U.S. 469, 477, 82 S. Ct. 894, 8 L. Ed. 2d 44 (1962)* (actions on debts allegedly due under a contract or for damages for trademark infringement); *Whitehead v. Shattuck, 138 U.S. 146, 11 S. Ct. 276, 34 L. Ed. 873 (1891)* (suits to quiet title to real estate). [70]

[125]** Second, the standard of complexity is an extraordinarily difficult one to apply, even on a case-by-case basis. The problems of speculation about the abilities of a hypothetical jury and the complexities of the issues in the case would be compounded by the need to speculate about the degree to which partial settlements or summary judgments **[*932]** may simplify matters before a trial actually begins or even in the midst of a trial. [71] And, because

---

[68] The decision in the Hyde Properties case would seem to apply not only to the action then before the court, but to all such actions. However, as we have noted, the alleged difficulty of such matters for juries did not seem to be important to the holding of the court. See ***supra, at 923***.

[69] In *Radial Lip Machine, Inc. v. International Carbide Corp., 76 F.R.D. 224 (N.D.Ill.1977)*, the court read Ross as "clearly (directing) federal courts to inquire into the competence of juries to handle different kinds of issues," *Id., at 226*, but considered and rejected the case-by-case approach:

The inquiry is a generic one, directed toward classifying a group of claims. Thus, the historical portion of the Ross test evaluates the entire line of judicial precedents to determine the traditional characterization of a particular claim. Once the court finds that the nature of an issue is basically legal, the right to a jury trial exists for that entire class of claims. The portion of the Ross test which weighs the practical abilities and limitations of juries contemplates a general analysis of the problems typically presented by those claims, not a specific case-by-case analysis of the complexity of the litigation. Otherwise, the courts would be forced to apply an unmanageable standard of complexity in every case before them.

Id., at 227-28. While we agree with Judge Marshall that the case-by-case approach is unmanageable, it is difficult for us to see how the proposed "generic" inquiry is any less so. On what basis would the court find the relevant facts and decide that patent or tax or antitrust or securities issues are, as a class, too difficult for juries? Clearly, issues within each of these classes (or almost any other that might be named) range from the very simple to the very complex. The judgment that some generic class of issues is "too complex" for decision by jury is the type of judgment better made in the political or legislative process.

[70] Actions seeking an accounting, maintainable in equity if sufficiently complicated, would seem to have been an exception to this general rule. See ***supra, at 923-924***.

there is nothing in Ross to say How complex a case must be before a jury demand may be struck, it would likely be a long time before a consistent pattern of decision emerged. [72] **[**127]** A related problem is the absence of any guide to the relationship among the three factors identified in the Ross footnote. [73] We agree **[*933]** with Judge

---

[71] In an attempt to avoid such speculation, a court may indicate, as the court did in *In re U. S. Financial Securities Litigation, 75 F.R.D. 702, 714 (S.D.Cal.1977)* that the jury demand will be reinstated if subsequent developments sufficiently simplify the case. This would give the party seeking trial by jury an incentive to settle part of the case in order to obtain a jury trial of the remainder. At the same time, the party opposing trial by jury is given a countervailing and similarly strong incentive Not to settle even when he otherwise would, since by settling some of the claims he jeopardizes his new-found "right" to a non-jury trial of the remainder.

[72] The line-drawing problems awaiting any attempt to apply the Ross test in a principled and consistent manner are obvious. Compare, e.g., *In re Boise Cascade Securities Litigation, 420 F. Supp. 99, 105* (court would be "more capable of fairly deciding the facts"); *SEC v. Associated Minerals, Inc., 75 F.R.D. 724, 726 (E.D.Mich.1977)* ("issues . . . are indeed complex and for this reason are not especially suited for resolution by a jury"); With *Bernstein v. Universal Pictures, Inc., 79 F.R.D. 59, 70 (S.D.N.Y.1978)* (matter is "beyond the ability and competence of any jury to understand and decide with rationality").

[73] See Note, Ross v. Bernhard: The Uncertain Future of the *Seventh Amendment*, 81 Yale L.J. 112, 128-29 (1971). Decisions in which the Supreme Court has explicitly prescribed multi-pronged "tests" provide examples of the kinds of rules that there might be, and a contrast to the absence, in Ross, of any such rule defining the role of each "prong" in the test.

In *Committee for Public Education and Religious Liberty v. Nyquist, 413 U.S. 756, 93 S. Ct. 2955, 37 L. Ed. 2d 948 (1973)*, the Court enumerated the three factors relevant in determining whether a government program violates the *establishment clause*: "To pass muster under the *Establishment Clause* the law in question first must reflect a clearly secular legislative purpose . . ., second, must have a primary effect that neither advances nor inhibits religion . . ., and, third, must avoid excessive government entanglement with religion . . . ." *Id., at 773, 93 S. Ct. at 2965*. Accord, e.g., *Meek v. Pittenger, 421 U.S. 349, 358, 95 S. Ct. 1753, 44 L. Ed. 2d 217 (1975)*; *Lemon v. Kurtzman, 403 U.S. 602, 91 S. Ct. 2105, 29 L. Ed. 2d 745 (1971)*. Although this test does not set "the precise limits to the necessary constitutional inquiry," *Meek, supra, 421 U.S. at 358-59, 95 S. Ct. 1753*, See *id., at 373-74, 95 S. Ct. 1753* (Brennan, J., concurring and dissenting), the language used by the Court makes clear that a law or government program which fails Any of these three "prongs" is invalid.

A different type of rule was used in *Barker v. Wingo, 407 U.S. 514, 92 S. Ct. 2182, 33 L. Ed. 2d 101 (1972)*. There the Court held that the question of deprivation of the *Sixth Amendment* right to a speedy trial was to be determined by balancing four factors: "Length of delay, the reason for the delay, the defendant's assertion of his right, and prejudice to the defendant." *Id., at 530, 92 S. Ct. at 2192*. Because the test prescribed is a "balancing" test, "none of the four factors identified above (is) either a necessary or sufficient condition to the finding of a deprivation of the right of speedy trial." *Id., at 533, 92 S. Ct. at 2193*.

A third type of test prescribes one or more factors which are normally dispositive, and one or more others to be used only if the first level of the test yields no result. Examples of this type are rules permitting the presiding officer in a legislative body to vote only to break a tie and rules in athletic leagues for determining which team is "champion" when the won-lost records produce a tie for first place. Some tests of this sort prescribe a factor or set of factors (themselves to be ordered by some rule) which are sufficient but not necessary for membership in a given category. Examples are the rules for Per se antitrust violations and the SEC's "safe harbor" rules. There are doubtless other types of rules as well, and endless variations and combinations of the types described here.

The courts in the Boise Cascade, U. S. Financial, Bernstein, and ILC cases struck the jury demands on the strength of the third factor listed in the Ross dictum, without regard to the other two. Although this approach could be consistent with any of the three types of tests just described, it probably indicates an assumption that the test was like the test in Nyquist that the "equitable" nature of Any of the factors was sufficient to mandate a non-jury trial. But such an assumption is without support in Ross itself, and seems to fly in the face of Fleitmann, which held that a defendant may not be deprived of his right to a jury determination of treble damage claims in spite of the "equitable" nature of derivative actions.

At least one court seems to regard the Ross dictum as prescribing a kind of balancing test. See *Radial Lip Machine, Inc. v. International Carbide Corp., 76 F.R.D. 224, 227 (N.D.Ill.1977)* ("The three Ross criteria are guides for determining whether a claim typically has a sufficient quantum of legal elements so that it must be tried to a jury."). But a balancing approach to these *Seventh Amendment* questions is also without warrant in Ross or in other cases and, at least as an approach to an entire case, has been rejected by the modern cases.

Marshall that "(t)he likely result (of a case-by-case application of Ross) would be a dilution of the right to a jury trial," *Radial Lip Machine, Inc., supra, 76 F.R.D. at 228*, and with Wolfram's observation that the Ross footnote raises "the spectre of federal judges using a disturbingly broad discretion in their determination of whether a jury ought to be interposed in particular cases." Wolfram, supra, **[**126]** 57 Minn.L.Rev. at 644.

[128]** Third, recognition of the possible validity of motions to strike jury demands on the grounds of complexity would impose yet one more burden on courts managing "big" cases. There would doubtless be motions to dispense with juries in most or all of these cases, and the motion could serve as a dilatory tactic, with potential interlocutory appeals adding to the delay. [74]

[129]** b. The Whole-case Approach

While the relationship between size and complexity has led courts to apply the Ross "test" to each case as a whole, See *ILC Peripherals Leasing Corp. v. IBM, 458 F. Supp. 423, 448 (N.D.Cal.1978)*; *Bernstein v. Universal Pictures, Inc., 79 F.R.D. 59, 70 (S.D.N.Y.1978)*; *In re U. S. Financial Securities Litigation, 75 F.R.D. 702, 714 (S.D.Cal.1977)*; *In re Boise Cascade Securities Litigation, 420 F. Supp. 99, 103-05 (W.D.Wash.1976)*, [75] **[**130]** Ross itself in the very sentence explained by footnote ten emphasizes that "(t)he *Seventh Amendment* question depends on The nature of the issue to be tried rather than the character of the overall action." *396 U.S. at 538, 90 S. Ct. at 738* (emphasis added). The "nature of the issue" test, as it developed in Beacon Theatres, Dairy Queen, and Ross, was a response to the jury trial problems created by the merger of law and equity, [76] and represents an expression of the "federal policy favoring jury trials . . . of historic and continuing strength." *Simler v. Conner, 372 U.S. 221, 83 S. Ct. 609, 9 L. Ed. 2d 691 (1963)*. It now comprises at least two similar but distinct propositions.

First, the jury trial right may not be sacrificed merely because a "legal" issue comes into Court wearing the "equitable" procedural clothing of a class action, a derivative **[*934]** action, or an interpleader, even though jury trials were not available in such actions before a merger. *Ross v. Bernhard, 396 U.S. at 540-42* & n. 15, *90 S. Ct. 733, 24 L. Ed. 2d 729* .

Second, because the federal rules permit and require the joinder of legal and equitable claims in a single civil action, the right to jury trial on the legal claims may not be compromised by characterizing the case as "basically equitable," by characterizing the legal claims as "incidental" to the equitable ones, or by trying factual issues

---

The relation of the third Ross factor to the other two (and of the first two to each other) may, of course, be determined by reference to history. But to do so is to jettison any claim that the Ross footnote authorizes a departure from the historical test. And, as we have already determined, the history of jury practice and of *Seventh Amendment* adjudication provide no support for the deprivation of the jury trial right in all cases deemed "too difficult" for juries.

[74] Cf. *Community Broadcasting of Boston v. FCC, 178 U.S.App.D.C. 256, 261, 546 F.2d 1022, 1027 (1976)* ("A rule allowing interlocutory appeals (from orders denying motions to disqualify counsel on ethical grounds) would provide litigants with yet another device by which to delay final determination on the merits, and would lead the court to divert its attention from the central issues in the case."); *Melamed v. ITT Continental Baking Co., 592 F.2d 290 (6th Cir. 1979)*. In spite of the potential for abuse, interlocutory review may be desirable because of the importance of jury trial and the likelihood that erroneous decisions to strike juries would necessitate retrials. We note that the courts in the Boise Cascade, U. S. Financial, and Bernstein cases certified their orders for interlocutory review pursuant to *28 U.S.C. § 1292(b)*. Should a trial court decline such certification in an effort to move the case along, "the right to grant mandamus to require jury trial where it has been improperly denied is settled." *Beacon Theatres, Inc. v. Westover, 359 U.S. 500, 511, 79 S. Ct. 948, 957, 3 L. Ed. 2d 988 (1959)*.

[75] In *Hyde Properties v. McCoy, 507 F.2d 301 (6th Cir. 1974)*, the jury demand was struck after trial, and only as to certain issues deemed equitable by the court of appeals; the jury's verdict on a breach of contract issue was not challenged. The court recognized the need to deal separately with the legal and equitable issues presented in a single case. *Id., at 303, n. 1*. Because the jury demand in Hyde was struck after trial and because the trial lasted only four days the court was not as concerned with the size of the litigation and the length of trial as were the courts in ILC, Bernstein, U. S. Financial, and Boise Cascade.

[76] See pp. 911-913, Supra.

common to both legal and equitable claims to the court. *Beacon Theatres, supra, 359 U.S. at 507-511, 79 S. Ct. 948*; *Dairy Queen, supra, 369 U.S. at 471-473, 82 S. Ct. 894*; *Ross, supra, 396 U.S. at 537-38, 90 S. Ct. 733*. [77] Thus,

[131]**

> complex lawsuits with multiple claims and parties must be broken down into their constituent parts. If any legal cause is apparent, the right to a jury trial exists. The presence of a maze of other equitable claims in the litigation cannot obliterate defendants' right to a jury.

Radial Lip Machine, Inc. v. International Carbide Corp., 76 F.R.D. 224, 228 (N.D.Ill.1977). The use of the Ross footnote as a test would therefore place on the party seeking a non-jury trial the burden of showing that Each otherwise legal claim or issue in the case was too complex for a jury, with the right to jury trial, including the preclusive effect of the jury's findings on any common issues of fact, preserved for all issues as to which that burden is not met. The defendants here have made no attempt to meet such a burden.

4. Public Policy and the *Seventh Amendment*: The Role of the American Jury

The argument that the administration of justice would be improved by the elimination of juries in some or all civil litigation is hardly new, although it seems to have gained additional impetus in recent years. [78] However, this argument is based on a number of premises that should not be accepted **[**132]** without critical examination.

a. The Competence of the Jury as Finder of Fact

First, those who would dispense with juries in complex cases overlook the fact that the alternative to a lay jury is a lay judge. [79] We agree with Judge Patrick Higginbotham, who has written: "Apart from the occasional situation in which a judge possesses unique training . . . the assumption that a jury collectively has less ability to comprehend complex material than does a single judge is an unjustified conclusion." P. Higginbotham, Continuing **[*935]** the Dialogue: Civil Juries and the Allocation of Judicial Power, 56 Tex.L.Rev. 47, 53 (1977). [80] Trial lawyers and judges and we are no exception **[**133]** often ponder the question whether judges are superior to juries in arriving at the truth in complex or technical cases. After eight and a half years on the bench, we remain convinced that judges are not. Our view is that a jury, applying its collective wisdom, judgment and common sense to the facts of a case (in

---

[77] The Court in Beacon Theatres did indicate that "only under the most imperative circumstances, circumstances which in view of the flexible procedures of the Federal Rules we cannot now anticipate, . . . the right to a jury trial of legal issues (might) be lost through prior determination of equitable claims." *359 U.S. at 510-11, 79 S. Ct. at 957*. Such circumstances have since arisen, if at all, only in *Parklane Hosiery Co. v. Shore, 439 U.S. 322, 99 S. Ct. 645, 58 L. Ed. 2d 552 (1979)* (defendant in private damage suit may be estopped from relitigating before jury issues adversely determined in prior SEC injunctive action, where no jury was available), and *Katchen v. Landy, 382 U.S. 323, 86 S. Ct. 467, 15 L. Ed. 2d 391 (1966)* (Bankruptcy Court in summary proceeding may order creditor to surrender voidable preference before considering creditor's claim, even though if the creditor had filed no claim, preference could be recovered by trustee only in an action where the creditor would have a right to jury trial).

[78] See, e.g., Note, The Right to a Jury Trial in Complex Civil Litigation, 92 Harv.L.Rev. 898 (1979); Note, Congressional Provision for Nonjury Trial under the *Seventh Amendment*, 83 Yale L.J. 401 (1973); Comment, The Right to an Incompetent Jury: Protracted Commercial Litigation and the *Seventh Amendment*, 10 Conn.L.Rev. 775 (1978).

[79] Matters requiring decision by an expert factfinder may, within certain limits, be committed by Congress to an administrative agency or specialized court. See, e.g., *Atlas Roofing Co. v. OSHRC, 430 U.S. 442, 461* & n. 16, *97 S. Ct. 1261, 51 L. Ed. 2d 464 (1977)*; *Pernell v. Southall Realty Co., 416 U.S. 363, 383, 94 S. Ct. 1723, 40 L. Ed. 2d 198 (1974)*. But in a United States District Court, experts are available only as witnesses or special masters. See *Rule 53, Fed.R.Civ.P.*; *Rule 706, Fed.R.Ev.*

[80] Judge Higginbotham also demonstrates that the abandonment of the civil jury in England, widely believed to be a recognition of its inefficiency, actually resulted from manpower shortages during the two World Wars, and the inertial failure to do anything to resume the use of juries once the manpower shortages had ended. 56 Tex.L.Rev. at 50-52.

the light of proper instructions on the law) is brighter, more astute, and more perceptive than a single judge, even in a complex or technical case; at least it is not less so.

[134]** The foreperson of Judge Conti's jury in the ILC case, See n. 59, Supra, responded to the court's questioning with the view that "a jury that's both a computer technician, a lawyer, (and) an economist" would be qualified to try that case. But no judge is all of these, and one is more likely to find a computer technician or an economist on a jury than on the bench. Complex and technical cases, no less than other cases, require judgments on the credibility of witnesses and inferences to be drawn from facts. These are the tasks at which jurors, interacting with other jurors in the crucible of trial, particularly excel.

We also note our dissent from the proposition that a jury trial in a complex matter must necessarily yield an irrational verdict because of the cumbersomeness of presenting an enormous mass of evidence to a lay jury. A strong argument can be made that the presence of a jury actually disciplines and improves the fact-finding process by imposing on both court and counsel the obligation to streamline, clarify, and teach. Judge Patrick Higginbotham puts it well:

> Both the "technical" case and the "big" case arguments overlook an enormously valuable contribution made by **[**135]** the presence of a jury. The process of distilling complex material into a comprehensible form operates less effectively in bench trials than in jury trials. Although the rules of evidence purport to discipline an advocate's presentation, they are generally only loosely followed in bench trials, on the assumption that the trial judge will consider only admissible evidence. I have found that as counsel drop their evidentiary antennae they also tend to lose their sensitivity to questions of relevance; correspondingly, the marshaling of proof so essential to clarity suffers. Trial to a jury imposes a fierce discipline on the advocates. The virtue of forcing counsel to organize a complex mass of information into a form understandable by the uninitiated is that counsel ultimately must understand the issues and evidence in the case well enough to teach. If counsel cannot comprehensibly present their case to lay persons, is it likely that counsel do, in fact, understand the case? One need only view how trials of complicated matters are conducted by able counsel to appreciate the powerful contribution that the presence of a jury makes to clarity of argumentation. The jury's presence not only **[**136]** encourages the clear presentation of facts during a trial, but the process of drafting the charge also contributes to the clarification of the controlling legal issues. When properly designed and freed of obscure "legalese," the charge enhances understanding by the court and counsel, as well as by the jury.

Higginbotham, Supra, at 54.

While not essential to our decision in view of our *Seventh Amendment* analysis, it is appropriate, we believe, to relate the foregoing general discussion to the trial of this case.

At the heart of both the plaintiffs' claims and the defendants' counterclaims are allegations of conspiracy and predatory intent. These allegations, if legally sufficient, will call for just the kind of judgments of fact that are traditionally within a jury's competence and for which a jury's unique abilities **[*936]** are especially valued.[81] **[**137]** Moreover, we believe that with proper and frequent judicial guidance (we contemplate a preliminary charge and periodic interim charges on the law) as well as thoughtful organization of evidentiary presentation by counsel, the jury will be able to understand and deal intelligently with all the facts and issues.[82]

---

[81] We do not intend by this reference to intimate a view on the issues raised by defendants' motion for summary judgment in which it is alleged that the predatory intent question must now be decided in favor of defendants as a matter of law on the developed record.

[82] The need for improved techniques in managing jury trials of complex antitrust litigation has recently received attention from a Presidential Commission, and we note with interest their suggestions:

Even if the role of juries in some antitrust cases is limited, juries will continue to try many antitrust cases, including some that cannot be considered simple, and a number of innovative techniques can help juries understand those cases better. It has proved useful for courts to instruct the jury on the relevant legal issues at the beginning of trial as well as at the end. It may also be useful for courts to refresh juries on the factual and legal relationships of the different parts of the trial, such as evidence and argument on the "relevant" market. Counsel may assist the jury's early understanding of the case by giving more comprehensive

[138]** The foregoing observations demonstrate why we reject as plainly lacking in merit the defendants' suggestion that the extraordinary complexity of this matter would make a trial by jury fundamentally unfair, thereby denying them the due process of law guaranteed by the *Fifth Amendment*, [83] and the related argument that, in

---

and focused opening statements. If the case is to be submitted on interrogatories, a preliminary set of interrogatories may be given to the jury at the start of the trial. These procedures collectively should facilitate the jury's understanding and assessment of the evidence presented.

The parties might provide the jurors with a binder containing important exhibits. During trial, the expanded use of visual aids may contribute to ready comprehension. Jurors may be permitted to take notes during trial and the exhibits, trial transcript (if ready), and jury instructions can be made available in the jury room during deliberations. Counsel should also evaluate the utility of preparing summaries of the evidence for the jury's use.

Report to the President and the Attorney General of the National Commission for the Review of Antitrust Laws and Procedures 107 (1979) (footnote omitted).

[83] This due process argument was the basis for the decision in *In re Boise Cascade Securities Litigation, 420 F. Supp. 99, 104 (W.D.Wash.1976)*, in which the court specifically related the Ross footnote's mention of "the practical abilities and limitations of juries" to considerations of fairness and due process.

As part of their "due process" argument, the defendants contend that the anticipated length of the trial makes it impossible to obtain a fair trial by jury: Because business people and professionals would have to be excused for cause pursuant to *28 U.S.C. § 1866(c)*, "the jury that is impaneled . . . will not be representative of the community . . . and will not have on it persons best able to cope with the issues." See *ILC Peripherals Leasing Corp. v. IBM, 458 F. Supp. 423, 448 (N.D.Cal.1978)*; *Bernstein v. Universal Pictures, Inc., 79 F.R.D. 59, 69-70 (S.D.N.Y.1978)*; *In re Boise Cascade Securities Litigation, 420 F. Supp. 99, 104 (W.D.Wash.1976)*; Comment, The Right to an Incompetent Jury: Protracted Commercial Litigation and the *Seventh Amendment*, 10 Conn.L.Rev. 775 (1978). The student Comment presents a statistical analysis of the jury selection process in *SCM Corp. v. Xerox Corp., 463 F. Supp. 983 (D.Conn.1978)*, showing that excuses for cause and peremptory challenges eliminated disproportionate numbers of prospective jurors who were employed in technical or managerial fields, who were male, or who had attended college.

It may well be that factors of "undue hardship or extreme inconvenience," *28 U.S.C. § 1866(c)*, will persuade the court to excuse many business executives and professionals, but this certainly does not mean that the defendants will be forced to submit their case to a jury selected from society's incompetents and misfits.

Moreover, the factors justifying excuse from jury service will have to be reassessed in light of the Jury System Improvements Act of 1978, P.L. 95-572, 92 Stat. 2453 (1978). Congress recognized that economic hardship to jurors threatened the statutory policy of providing to all litigants the right to juries "selected at random from a fair cross-section of the community in that judicial district," and sought in the 1978 Act to correct that problem. H.R.Rep.No.95-1652, 95th Cong., 2d Sess. (1978), U.S.Code Cong. & Admin.News 1978, pp. 5477, 5479. The Act increases jurors' compensation to $ 30 per day for the first thirty days of service and $ 35 per day thereafter, and also increases travel allowances. The Act also protects employees from intimidation, coercion, or discharge as a result of their jury service, and guarantees the resumption of their employment rights without loss of seniority, as if they had been on furlough or leave of absence. Finally, the Act defines the terms "undue hardship or extreme inconvenience" as they are used in *28 U.S.C. § 1866(c)* to mean:

. . . great distance, either in miles or travel-time, from the place of holding court, grave illness in the family or any other emergency which outweighs in immediacy and urgency the obligation to serve as a juror when summoned, or any other factor which the court determines to constitute an undue hardship or to create an extreme inconvenience to the juror; and in addition, in situations where it is anticipated that a trial or grand jury proceeding may require more than thirty days of service, the court may consider, as a further basis for temporary excuse, severe economic hardship to an employer which would result from the absence of a key employee during the period of such service; . . .

28 U.S.C. § 1869(j). Thus, the Act necessarily limits the number of prospective jurors who might be excused from service in this case because of economic hardship to themselves or their families. We therefore expect that the pool from which the jury is drawn will include a fair number of people of considerable sophistication and intelligence, drawn from the ranks of the employed as well as from those men and women who have chosen not to have a "job" or who are retired or unemployed.

[*937] complex litigation, a right to trial by jury would carry with it the "right to an irrational verdict." Juries like judges may sometimes render irrational verdicts, but in such an event the court serves as a check on the power of the jury. It is well settled that the court may direct a verdict without infringing the constitutional right to trial by jury. See *Galloway v. United States, 319 U.S. 372, 63 S. Ct. 1077, 87 L. Ed. 1458 (1943)*. The standard for directed verdicts in this circuit has been expressed as follows:

[139]**

> (W)e must examine the record in a light most favorable to the (party against whom the verdict is to be directed), and review the specific evidence in the record and all inferences reasonably capable of being drawn therefrom. We must determine whether, as a matter of law, the record is critically deficient of that minimum quantum of evidence from which a jury might reasonably afford relief. *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*; *Lebrecht v. Bethlehem Steel Corp., 402 F.2d 585* (2 Cir. 1968); *Schad v. Twentieth Century-Fox Film Corp., 136 F.2d 991* (3 Cir. 1943); *Rawleigh, Moses & Co. v. Kornberg, 210 F.2d 176* (8 Cir. 1954); *Denneny v. Siegel, 407 F.2d 433, 439 (3d Cir. 1969)*. "If the evidence is of such character that reasonable men, in the impartial exercise of their judgment may reach different conclusions, the case should be submitted to the jury." *Silverii v. Kramer, 314 F.2d 407, 409 (3d Cir. 1963)*. See *Rogers v. Exxon Research & Engineering Co., 404 F. Supp. 324, 335-36 (D.N.J.1975)*. Since a directed verdict motion deprives a party of jury fact-determination, it should be granted sparingly and circumspectly. **[**140]** "Nevertheless the federal courts do not **[*938]** follow the rule that a scintilla of evidence is enough. The question is not whether there is literally no evidence supporting the party against whom the motion is directed but whether there is evidence upon which the jury could properly find a verdict for that party." 9 Wright & Miller, Federal Practice and Procedure, § 2524, at 542-43 (1971) (footnotes omitted).

Patzig v. O'Neil, 577 F.2d 841, 846 (3d Cir. 1978).

Since issues are presented to the jury only when "reasonable" men and women "in the impartial exercise of their judgment may reach different conclusions," when a jury "may properly find a verdict" for either party, there is little or no no room for an "irrational" verdict. And if the court erroneously sends issues to a jury which thereafter decides them "irrationally," further safeguards are available in the power of either the trial court or the court of appeals to grant judgment notwithstanding the verdict. See *Neely v. Martin K. Eby Construction Co., 386 U.S. 317, 87 S. Ct. 1072, 18 L. Ed. 2d 75 (1967)*; *Rule 50(b), Fed.R.Civ.P.*

Moreover, it is clear that the right to trial by jury does not include the right to have any particular number of economics professors or bankers on the jury. The Supreme Court has described the requirements of due process and the *Sixth Amendment* in criminal trials:

It should also be emphasized that in holding that petit juries must be drawn from a source fairly representative of the community we impose no requirement that petit juries actually chosen must mirror the community and reflect the various distinctive groups in the population. Defendants are not entitled to a jury of any particular composition, *Fay v. New York, 332 U.S. 261, 284, 67 S. Ct. 1613, 1625, 91 L. Ed. 2043 (1947)*; Apodaca v. Oregon, 406 U.S. (404, *92 S. Ct. 1628, 32 L. Ed. 2d 184*), at 413, *92 S. Ct. at 1634* (plurality opinion); but the jury wheels, pools of names, panels, or venires from which juries are drawn must not systematically exclude distinctive groups in the community and thereby fail to be reasonably representative thereof.

Taylor v. Louisiana, 419 U.S. 522, 538, 95 S. Ct. 692, 702, 42 L. Ed. 2d 690 (1975). Whatever due process may require in the civil context, it cannot be more than is required in criminal trials by the *Sixth Amendment's* guarantee of "an impartial jury"; certainly here there is no threat of systematic exclusion of distinctive groups in the community. The legislative policy declared in *28 U.S.C. § 1861* goes no further, though its requirements could not in any event overcome the clear command of the *Seventh Amendment*. See Comment, Supra, 10 Conn.L.Rev. at 783 n. 27.

Finally, even if defendants' "cross-section" contentions had some merit, we think it would be premature to act on them at this time, rather than after the voir dire has reduced the element of speculation. See note 16, Supra.

HN17[] -

b. Other Functions of the Jury

The foregoing discussion has addressed the relative **[**141]** skill of judges and juries at making accurate findings of fact. What is at issue here is more; it is the very nature or character of justice provided by our judicial system. In this respect, the *Seventh Amendment* reflects societal values deeply rooted in our notions of democracy values which require that factual decisions affecting the life, liberty, and property of litigants should, at least at their option, be made by a cross section of the community, I. e., a jury of their peers. Thus, even if judges were "better" than juries at finding facts accurately in complex litigation, no decision to exclude juries from participation in these cases should be made without weighing the other important values promoted by the use of juries.

One unique virtue of the jury is its "black-box" function; it gives results without reasons. [84] In contrast, the court in a bench trial must "find the facts specially." [85] The "black-box" jury allows our courts to deliver individualized justice to do "equity" without sacrificing our expressed devotion to the uniform rule of law. See Higginbotham, Supra, at 56-57; Wigmore, A Program for the Trial of a Jury Trial, 12 Judicature 166, 170 (1929). Thus, when **[**142]** "justice" requires, juries can reach results at variance with the law. Because these decisions are not explained, they remain exceptions; the same results from opinion-writing judges would be precedents. [86]

[143]** The materials constituting the *Seventh Amendment's* "legislative history" demonstrate that this part of the jury's "practical abilities" [87] was of great importance to the antifederalists who are largely responsible for the constitutionalization of the civil jury:

> **[*939]** There is, moreover, a generalized but weighty premise that underlies every one of the antifederalist arguments in favor of constitutional protection of the right of jury trial in civil cases. It is unquestionable, but nonetheless sometimes overlooked, that the general intention of antifederalist agitation for mandatory jury trial was to achieve results from jury-tried cases that would not be forthcoming from trials conducted by judges **[**144]** alone. Clearly the antifederalists were not arguing for jury trial on the ground that it was a more efficient form of trial or in some procedural way inherently superior to trial by the court. It is common today to oppose the institution of the civil jury and its preservation in the *Seventh Amendment* on the asserted ground that trials in which juries sit are long, expensive, prone to unseemly forensics, and sometimes productive of decisions that are probably at odds with the substantive rules that the judge instructs the jury to apply. But the antifederalists were not arguing for the institution of civil jury trial in the belief that jury trials were short, inexpensive, decorous and productive of the same decisions that judges sitting without juries would produce. The inconveniences of jury trial were accepted precisely because in important instances, through its ability to disregard substantive rules of law, the jury would reach a result that the judge either could not or would not reach. Those who favored the civil jury were not misguided tinkerers with procedural devices; they were, for the

---

84 Professor Calabresi therefore calls the jury an "aresponsible agency." See G. Calabresi & P. Bobbitt, Tragic Choices 57-79 (1977).

85 *Rule 52(a), Fed.R.Civ.P.* This rule requires the court to state its findings as to both ultimate and subsidiary facts, *O'Neill v. United States, 411 F.2d 139, 146 (3d Cir. 1969)*, and to do so with sufficient "detail and exactness" to facilitate appellate review. *EEOC v. United Virginia Bank, 555 F.2d 403, 406 (4th Cir. 1977)*; *Roberts v. Ross, 344 F.2d 747, 751 (3d Cir. 1965)*. See note 18, Supra.

86 Mr. Justice Black, the author of the Court's opinions in Beacon Theatres and Dairy Queen, has been reported as suggesting, in conversation, "that the jury system was accorded its prominence and protection in the Constitution because its aresponsibility allowed it to disregard legal rules when the rules produced results contrary to community standards, and its representativeness insured that it would do just that." Calabresi & Bobbitt, Supra note 84, at 208 n. 12.

87 Our rejection of the notion that the Ross footnote prescribes the test for *Seventh Amendment* questions, ***Supra at 926-930***, eliminates the need to parse each word and comma in it. Those who are so moved, however, might well consider the "practical abilities" of juries and not only their "limitations."

> day, libertarians who avowed that important areas of protection for litigants in general, **[**145]** and for debtors in particular, would be placed in grave danger unless it were required that juries sit in civil cases.

Wolfram, The Constitutional History of the *Seventh Amendment*, 57 Minn.L.Rev. 639, 671-72 (1973) (footnotes omitted). [88] **[**146]** According to Wolfram, this is particularly evident **[*940]** in the antifederalists' concern with the protection of debtor-defendants, [89] **[**147]** the frustration of unpopular or unwise law through jury nullification, [90] and the protection of **[*941]** individuals in litigation with the federal government. See id., at 667-708.

---

[88] Two of Wolfram's observations on the ratification debates are of interest here. First, the antifederalists' arguments showing the importance of the jury's ability to produce results that sometimes were at variance with the law were usually very indirect. Wolfram explains this as made necessary by the politics and the "instincts of public morality" of the time. 57 Minn.L.Rev., at 703-05.

Second, there were some "scattered references" during and after the debates to the utility of jury trials in particular types of cases, "(b)ut none of these seem to have contemplated that these issues of utility could be evolved into a standard for determining the extent of the right to jury trial." *Id., at 718, 719*. For some of these scattered references, See *id., at 671 n. 86, 719*.

A contemporaneous expression of the view that complex matters were properly tried in equity, without juries, may be found in The Federalist No. 83 (A. Hamilton):

My convictions are equally strong that great advantages result from the separation of the equity from the law jurisdiction, and that the causes which belong to the former would be improperly committed to juries. The great and primary use of a court of equity is to give relief in Extraordinary cases, which are Exceptions * to general rules. To unite the jurisdiction of such cases with the ordinary jurisdiction, must have a tendency to unsettle the general rules, and to subject every case that arises to a Special determination; while a separation of the one from the other has the contrary effect of rendering one a sentinel over the other, and of keeping each within the expedient limits. Besides this, the circumstances that constitute cases proper for courts of equity are in many instances so nice and intricate, that they are incompatible with the genius of trials by jury. They require often such long, deliberate, and critical investigation as would be impracticable to men called from their occupations, and obliged to decide before they were permitted to return to them. The simplicity and expedition which form the distinguishing characters of this mode of trial require that the matter to be decided should be reduced to some single and obvious point; while the litigations usual in chancery frequently comprehend a long train of minute and independent particulars.

* It is true that the principles by which that relief is governed are now reduced to a regular system; but it is not the less true that they are in the main applicable to SPECIAL circumstances, which form exceptions to general rules. PUBLIUS

Id., at 549-550 (Mod. Library ed.) (emphasis in original). This argument is proposed by Hamilton in defense of the omission from the constitution of a right to jury trial in civil actions. Certainly the widespread opposition to the constitution expressed because of this omission, and the adoption of the *Seventh Amendment* in response thereto, represent a resounding rejection of Hamilton's conclusions; whether his premises were also rejected is not clear.

[89] The concern for debtors was due in part to the provision in the 1783 treaty of peace with Great Britain "that creditors on either side, shall meet with no lawful impediment to the recovery of the full value in sterling money, of all bona fide debts heretofore contracted." Wolfram, Supra note 25, at 673-679 & n. 92. During the preconstitutional period, creditors from Britain or another of the states had to sue in the courts of the debtor's state "where, under the protection of favorable local laws, the debtor might receive a sympathetic hearing before a jury composed of his friends and relatives." *Id., at 676*. Several provisions in the new constitution, including those for federal diversity and alienage jurisdiction, were intended to provide some measure of relief for creditors. *Id., at 677-78* & n. 95.

Wolfram canvasses the ratification debates in each state, and concludes that "concern for local debtors faced with the threat of suit in a federal court, without a jury, was one of the chief motivations for opposition to the Constitution." *Id., at 678*. A good example is the remark with which Patrick Henry concluded a speech in the Virginia ratification convention: "If previous amendments are not obtained, the trial by jury is gone. British debtors will be ruined by being dragged to the federal court, and the liberty and happiness of our citizens gone, never again to be recovered." *Id., at 691*.

[90] The power of a jury to disregard the court's instructions in accordance with the equities of the individual case or with what they thought the law should be had been rather dramatically demonstrated to colonial America in the celebrated libel trial of John

[148]** "Black-box" juries are also important in borderline cases calling for decisions and distinctions that might otherwise seem arbitrary. Mr. Justice Holmes described this function as follows:

> When he has discovered that a difference is a difference of degree, that distinguished extremes have between them a penumbra in which one gradually shades into the other, a tyro thinks to puzzle you by asking where you are going to draw the line, and an advocate of more experience will show the arbitrariness of the line proposed by putting cases very near to it on one side or the other. But the theory of the law is that such lines exist. . . . As that difference has no gradation about it, when applied to shades of conduct that are very near each other it has an arbitrary look. We like to disguise the arbitrariness, we like to save ourselves the trouble of nice and doubtful discriminations. . . . And so, as we get near the dividing point, we call in the jury.

Holmes, Law in Science and Science in Law, 12 Harv.L.Rev. 443, 457 (1899). Cf. *Duncan v. Louisiana, 391 U.S. 145, 161, 88 S. Ct. 1444, 20 L. Ed. 2d 491 (1968)* ("This (line-drawing) process, although essential, cannot be wholly satisfactory, **[**149]** for it requires attaching different consequences to events which, when they lie near the

---

Peter Zenger in 1735. At the time, truth was no defense in a criminal libel case, and the jury was to determine only whether the defendant had published the allegedly libelous material; the presiding judge charged the jury that "whether the words . . . make a libel . . . is a matter of law . . . which you may leave to the Court." Alexander, A Brief Narrative of the Case and Trial of John Peter Zenger 100 (Katz ed. 1963). But Andrew Hamilton, perhaps the original "Philadelphia lawyer," had argued eloquently to the jury that truth should be a defense to libel, and that a jury "are by law at liberty . . . to find both the law and the fact . . .;" the jury returned a general verdict of not guilty. *Id., at 12-13, 23, 91-93, 101*. Somewhat ironically, one of the "libels" for which Zenger was tried was "that it seems trials by juries are taken away when a governor pleases." *Id., at 64*.

Although the Zenger trial was a criminal one, it seems to have contributed to "a widespread popular conviction at the time of the adoption of the *seventh amendment* that a jury in a civil case (had) the right to "decide the law'." Compare Wolfram, Supra, at 669 n. 84 With Henderson, The Background of the *Seventh Amendment*, 80 Harv.L.Rev. 289, 289-291, 327-335 (1966).

The evidence from the ratification debates that the possibility of jury nullification was important to the antifederalists consists mainly of expressions "that trial by jury is a safeguard against an oppressive exercise of the power of taxation." Wolfram, Supra, at 705-709. The words are Alexander Hamilton's in The Federalist No. 83, used to describe an antifederalist argument which he goes on to rebut by pointing out, Inter alia, that in most states summary procedures of distress and sale were available to collect taxes without a jury trial. *Id., at 705 n. 183*. But cf. *Damsky v. Zavatt, 289 F.2d 46 (2d Cir. 1961)* (In 1791 in England, taxes could be collected in action of debt, which carried right to jury trial). And Hamilton himself argues that the possibility of disregard of the law makes prize cases especially unsuitable for determination by juries:

Juries cannot be supposed competent to investigations that require a thorough knowledge of the laws and usages of nations; and they will sometimes be under the influence of impressions which will not suffer them to pay sufficient regard to those considerations of public policy which ought to guide their inquiries. There would of course be always danger that the rights of other nations might be infringed by their decisions, so as to afford occasions of reprisal and war. Though the proper province of juries be to determine matters of fact, yet in most cases legal consequences are complicated with fact in such a manner as to render a separation impracticable.

Hamilton, The Federalist No. 83, at 548-49 (Mod. Lib. ed.).

A clear statement of the power of nullification may be found in Chief Justice John Jay's charge to the jury in *Georgia v. Brailsford, 3 U.S. (3 Dall.) 1, 1 L. Ed. 483 (1794)*, a jury trial in the Court's original jurisdiction arising on a feigned issue in an equity case, and tried to a "special jury":

It may not be amiss, here, gentlemen, to remind you of the good old rule, that on questions of fact, it is the province of the jury, on questions of law, it is the province of the court, to decide. But it must be observed, that by the same law, which recognizes this reasonable distribution of jurisdiction, you have, nevertheless, a right to take upon yourselves to judge of both, and to determine the law as well as the fact in controversy. On this, and on every other occasion, however, we have no doubt, you will pay that respect which is due to the opinion of the court: for as, on the one hand, it is presumed, that juries are the best judges of facts; it is, on the other hand, presumable, that the court are the best judges of law. But still, both objects are lawfully within your power of decision.

Id., at 4 (footnotes omitted).

line, actually differ very little."). Holmes points out later in the same article that the question of negligence Vel non was originally a question of law for the court:

> But about the middle of the last century, when the rule of conduct was complicated with practical details the court began to leave some of these questions to the jury. Nevertheless, Mr. Starkie, a man of intellect, who was not imposed upon by phrases, very nearly saw the ground upon which it was done, and puts it on the purely practical distinction that when the circumstances are too special and complicated for a general rule to be laid down the jury may be called in.

Id., at 459. There is thus a common-law tradition of calling in juries to decide certain questions only when there is enough complexity to require one. To impose a new rule taking very complex cases away from juries would imply a conception of the jury as a kind of Goldilocks, to be used only when the amount of complexity is "just right." [91]

[150]** In all cases where our system needs a "black-box" decider, the use of a representative jury seeks to insure that the decisions will reflect contemporary community values in courts otherwise dominated by judges with life tenure. See id., at 460. Also, by enhancing the public's sense of participation, **[*942]** the use of representative juries contributes significantly to the legitimacy of our courts and of our entire system of government. See Higginbotham, Supra, at 52, 59-60; Kaufman, A Fair Jury The Essence of Justice, 51 Judicature 88, 91 (1967).

The jury also provides a needed check on judicial power. Although the allocation of the fact-finding role to the jury serves most obviously to limit the authority of the trial judge, the second clause of the *Seventh Amendment* [92] demonstrates the importance of the limit on appellate invasion of the province of the jury as well. Because judicial fact-finding is more closely reviewed than jury fact-finding, the elimination of juries from complex or protracted litigation would increase the power of both trial and appellate judges. See Higginbotham, Supra, at 57. [93] There is no reason to believe that any of the jury's functions are less **[**151]** important in complex and protracted litigation than in smaller and simpler cases. Indeed, as "big" cases proliferate and consume an increasing share of our judicial resources, the survival of the peculiar quality of justice traditionally delivered by juries in our courts of law may depend on the continued availability of juries in such cases.

IV. Conclusion

This opinion has addressed a number of questions in order to determine whether the *Seventh Amendment* right to trial by jury applies even in a case so massive and so complex that serious questions **[**152]** of jury competence may be raised.

---

[91] Holmes himself seems to have had a rather Hamiltonian view of juries; he looked forward to the day when the "democratic verdict of the jury" might eventually be replaced by "the commercial and rational test of the judgment of a man trained to decide." Id., at 445. And his view, expressed with only a touch of sarcasm, was that

. . . every time that a judge declines to rule whether certain conduct is negligent or not he avows his inability to state the law, and the meaning of leaving nice questions to the jury is that while if a question of law is pretty clear we can decide it, as it is our duty to do, if it is difficult it can be decided better by twelve men taken at random from the street.

Id., at 457. An example of the classic Holmes-Knowlton debate on the relative merits of simple or per se liability rules which can be applied by courts "as a matter of law" against those of more complex rules which require a jury, is *Lorenzo v. Wirth, 170 Mass. 596, 49 N.E. 1010 (1898)* (Holmes, J.); *Id., 49 N.E. at 1011* (Knowlton, J., dissenting). For discussions of this choice, See Calabresi & Bobbitt, Supra note 84, at 206 n. 5; G. Calabresi, Access to Justice and Substantive Law Reform: Legal Aid for the Lower Middle Class, in 3 Emerging Perspectives and Issues in the "Access-to-Justice" Movement, (Cappelletti ed. 1978). Cf. Nixon, Changing Rules of Liability in Automobile Accident Litigation, 3 Law & Contemp. Prob. 476, 477-78 (1936).

[92] " . . . And no fact tried by a jury, shall be otherwise re-examined in any Court of the United States, than according to the rules of the common law."

[93] Indeed, in view of the jury's role as a check on judicial power, it "might be thought to be particularly inappropriate . . . for the federal courts to claim a broad and loosely structured power to determine whether this civilian check on their own functioning should be interposed." Wolfram, Supra at 644.

Because the historical test for the *Seventh Amendment* defines the parameters of the constitutional right to a jury trial by reference to English practice in 1791, we have explored the traditional boundaries of the jurisdictions of courts of law and courts of equity. Our survey demonstrated that some cases normally belonging to the courts of common law could, if sufficiently complex, be brought in equity. But this was possible only in actions seeking an "accounting," and only at the plaintiff's option. Because this is not an "accounting" case, and because here the plaintiffs actively seek a jury trial, the historical test requires that a jury be available. This conclusion is buttressed by other considerations as well. There is little evidence that the plaintiff's historical ability to bring complex accounting matters to a court of equity was attributable to considerations of jury competence and, in any event, it may not have survived the merger of law and equity. Moreover, the remedy of treble damages sought in the case before us is one which was traditionally available Only on the verdict of a jury in a court of common law.

We next examined the Supreme **[**153]** Court's recent decisions in order to determine whether questions of jury competence had been elevated to constitutional stature by the mention in Ross v. Bernhard of "the practical abilities and limitations of juries." We determined that to so read the Ross dictum would be inconsistent with the intentions of the Supreme Court, with settled principles of jurisprudence, and with the very policies expressed in the *Seventh Amendment* itself. We have concluded, therefore, that the complexity of the case before us is not a constitutionally permissible reason for striking the plaintiffs' jury demands.

The defendants' motion is denied. An appropriate order follows.

Lawyers' Edition Display

Decision

Consumers paying higher price for goods because of ***antitrust law*** violations, held to sustain injury to "property" and to be entitled to sue for treble damages under Clayton Act (*15 USCS 15*).

Summary

On behalf of herself and all other persons in the United States who purchased hearing aids manufactured by five corporations, a woman brought a class action in the United States District Court for the District of Minnesota, seeking treble damages under 4 of the Clayton Act (*15 USCS 15*)--which authorizes such treble damage actions by "[a]ny person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws"--on the ground that because of the corporations' violation of federal antitrust laws, including vertical and horizontal price fixing, she and all other members of the class she represented were forced to pay illegally fixed higher prices for hearing aids and related services they purchased from the corporations' retail dealers. The corporations moved for dismissal of the complaint or summary judgment, arguing, among other things, that a retail purchaser of goods for personal use lacks standing to sue for treble damages under 4 of the Act because such a consumer has not been injured in his "business or property" within the meaning of the Act. The District Court held that under 4 a retail purchaser is injured in "property" if the purchaser can show that antitrust violations caused an increase in the price paid for the article purchased, but determining that the defendants had raised a controlling question of law as to which there was substantial ground for difference of opinion, the District Court stayed futher proceedings in the case and certified the question of consumer treble damage suits to the *United States Court of Appeals for the Eighth Circuit (435 F Supp 933)*. The Court of Appeals reversed, ruling that retail purchasers of consumer goods and services who allege no injury of a commercial or business nature are not injured in their "business or property" for purposes of 4 (*579 F2d 1077*).

On certiorari, the United States Supreme Court reversed and remanded. In an opinion by Burger, Ch. J., expressing the unanimous view of the eight participating members of the Court, it was held that consumers who pay a higher price for goods purchased for personal use as a result of antitrust violations, thus having their money diminished, sustain an injury in their "property" within the meaning of 4 of the Clayton Act, and thus may bring an action under 4 to recover treble damages.

Rehnquist, J. concurring, expressed the view that although the intrepretation of 4 of the Act as authorizing consumer suits might add a substantial volume of litigation to the strained dockets of the federal courts, and might be used to exact unfair settlements from retail businesses, any such problems were for Congress and not for the courts.

Brennan, J., did not participate.

Headnotes

MONOPOLIES §67 > treble damages -- consumer suits -- injury to "business or property" -- > Headnote:
LEdHN[1A][] [1A]***LEdHN[1B]***[] [1B]***LEdHN[1C]***[] [1C]

Consumers who, as a result of violations of federal antitrust laws, pay a higher price for goods purchased for personal use, thus having their money diminished, sustain an injury in their "property" within the meaning of 4 of the Clayton Act (*15 USCS 15*) and may bring an action to recover treble damages under 4, which authorizes treble damage actions by "[a]ny person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws."

STATUTES §163 > federal law -- construction -- language -- > Headnote:
LEdHN[2][] [2]

In every case involving the construction of a federal statute, the starting point must be the language employed in the statute by Congress.

MONEY §1 > nature -- > Headnote:
LEdHN[3][] [3]

Money is a form of property.

STATUTES §110 > construction -- giving effect to all language -- > Headnote:
LEdHN[4][] [4]

In construing a federal statute a court is obliged to give effect, if possible, to every word Congress used.

STATUTES §179 > construction -- use of disjunctive -- > Headnote:
LEdHN[5][] [5]

Under canons of construction, terms connected by a disjunctive ordinarily should be given separate meanings, unless the context dictates otherwise.

STATUTES §154 > Clayton Act -- interpretation -- belief of Congress after enactment -- > Headnote:
LEdHN[6A][] [6A]***LEdHN[6B]***[] [6B]

The fact that Congress, as evidenced by the text and legislative history of a federal statute enacted subsequent to the enactment of 4 of the Clayton Act (*15 USCS 15*), believed that consumers have a cause of action to recover treble damages for violations of federal antitrust laws under 4 of the Clayton Act will not be viewed as a controlling consideration by the United States Supreme Court in determining whether consumers who pay a higher price for goods purchased for personal use as a result of federal antitrust violations sustain an injury in their "business or property" within the meaning of 4 so as to be entitled to bring treble damage actions.

COURTS §105 > interpretation of statute -- adverse effects -- considerations for legislature -- > Headnote:
LEdHN[7][] [7]

For purposes of the United States Supreme Court's determining whether consumers who pay a higher price for goods purchased for personal use as a result of federal antitrust violations sustain an injury in their "business or property" within the meaning of 4 of the Clayton Act (*15 USCS 15*), so as to be entitled to bring an action for treble damages under 4, the argument that the cost of defending consumer actions brought as class actions will have a potentially ruinous effect on small businesses and will ultimately be paid by consumers relates to policy considerations more properly addressed to Congress than to the court, and such considerations cannot govern the court's interpretation of the language of 4.

Syllabus

Petitioner brought a class action on behalf of herself and all persons in the United States who purchased hearing aids manufactured by respondents, alleging that, because of antitrust violations committed by respondents, she and the class she seeks to represent have been forced to pay illegally fixed higher prices for the hearing aids and related services they purchased from respondents' retail dealers. Treble damages were sought under § 4 of the Clayton Act, which provides that "[any] person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws" may bring suit and recover treble damages. Respondents moved to dismiss the damages claim on the ground **[****2]** that petitioner had not been injured in her "business or property" within the meaning of § 4. The District Court held that under § 4 a retail purchaser is injured in "property" if it can be shown that antitrust violations caused an increase in the price paid for the article purchased; however, it certified the question to the Court of Appeals. The Court of Appeals reversed, holding that retail purchasers of consumer goods and services who allege no injury of a commercial or business nature are not injured in their "business or property" within the meaning of § 4, and that the phrase "business or property" was intended to limit standing to those engaged in commercial ventures.

Held: Consumers who pay a higher price for goods purchased for personal use as a result of antitrust violations sustain an injury in their "property" within the meaning of § 4. Pp. 337-345.

(a) Statutory construction must begin with the language employed by Congress. The word "property" has a naturally broad and inclusive meaning comprehending, in common usage, anything of material value owned or possessed. Congress' use of the disjunctive "or" in the phrase "business or property" indicates "business" **[****3]** was not intended to modify "property," nor was "property" intended to modify "business." Giving the word "property" the independent significance to which it is entitled in this context does not destroy the restrictive significance of the phrase "business or property" as a whole. Pp. 337-339.

(b) Monetary injury, standing alone, may be injury in one's "property" within the meaning of § 4. *Chattanooga Foundry & Pipe Works v. Atlanta, 203 U.S. 390*. Thus, the fact that petitioner was deprived of only money is no reason to conclude that she did not sustain a "property" injury. Pp. 339-340.

(c) Nor does petitioner's status as a "consumer" who purchased goods at retail for personal use change the nature of the injury she suffered or the intrinsic meaning of "property" in § 4. Pp. 340-342.

(d) The legislative history reflects that the treble-damages remedy was designed to protect consumers, and that no one questioned the right of consumers to sue under § 4. Thus, to the extent that § 4's legislative history is relevant, it also supports the conclusion that a consumer deprived of money by reason of anticompetitive conduct is injured in "property" within the **[****4]** meaning of § 4. Pp. 342-344.

(e) The fact that allowing class actions such as this may add a significant burden to the federal courts' already overcrowded dockets is an important but not a controlling consideration, since Congress created the § 4 treble-damages remedy precisely for the purpose of encouraging *private* challenges to antitrust violations. P. 344.

(f) Respondents' arguments that the cost of defending consumer class actions will have a potentially ruinous effect on small businesses in particular and will ultimately be paid by consumers, are policy considerations more properly addressed to Congress than to this Court; in any event they cannot govern the reading of the plain language of § 4. Pp. 344-345.

Counsel: John E. Thomas argued the cause and filed a brief for petitioner.

Julian R. Wilheim and Elliot S. Kaplan argued the cause for respondents. With them on the brief were Fred L. Woodworth, Joseph C. Basta, and Deborah J. Palmer.

Assistant Attorney General Shenefield argued the cause for the United States as amicus curiae urging reversal. With him on the brief were Solicitor General McCree, Deputy Solicitor General Easterbrook, Stephen M. Shapiro, Barry **[****5]** Grossman, and Bruce E. Fein. Warren Spannaus, Attorney General of Minnesota, argued the cause for the States of Alabama et al. as amici curiae urging reversal. With him on the brief were Richard B. Allyn, Solicitor General of Minnesota, Alan H. Maclin, Stephen P. Kilgruff, and Thomas Kenyon, Special Assistant Attorneys General; and John Ashcroft, Attorney General of Missouri, Walter O. Theiss, Assistant Attorney General, and Rogert Bern; joined by other officials for their respective States as follows: Charles A. Graddick, Attorney General, for Alabama; Avrum M. Gross, Attorney General, and Mark E. Ashburn, Assistant Attorney General, for Alaska; Robert K. Corbin, Attorney General, and Kenneth R. Reed for Arizona; Steve Clark, Attorney General, and Royce O. Griffin, Jr., Deputy Attorney General, for Arkansas; George Deukmejian, Attorney General, Warren J. Abbott, Assistant Attorney General, and Linda L. Tedeschi, Deputy Attorney General, for California; J. D. MacFarlane, Attorney General, B. Lawrence Theis, First Assistant Attorney General, and William E. Walters, Assistant Attorney General, for Colorado; Carl R. Ajello, Attorney General, Gerard J. Dowling and Larry H. Evans, Assistant **[****6]** Attorneys General, for Connecticut; Richard S. Gebelein, Attorney General, and William E. Kirk III, Assistant Attorney General, for Delaware; Jim Smith, Attorney General, Charles R. Ranson, Special Assistant Attorney General, and Douglas C. Kearney, Assistant Attorney General, for Florida; Wayne Minami, Attorney General, and Thomas T. Wood, Deputy Attorney General, for Hawaii; David H. [*] David Berger, H. Laddie Montague, Jr., Merrill G. Davidoff, Stanley J. Friedman, Frederick P. Furth, Thomas R. Fahrner, Aaron M. Fine, and Josef D. Cooper filed a brief for the plaintiffs in Kennedy Smith v. Toyota Motor Sales U.S.A. et al. as amici curiae urging reversal.

[1] Specifically, Reiter alleges that respondents violated *§§ 1* and *2* of the Sherman Act, 26 Stat. 209, as amended, *15 U. S. C. §§ 1* and *2*, and *§ 3* of the Clayton Act, 38 Stat. 731, *15 U. S. C. § 14*. She claims respondents restricted the territories, customers, and brands of hearing aids offered by their retail dealers, used the customer lists of their retail dealers for their own purposes, prohibited unauthorized retailers from dealing in or repairing their hearing aids, and conspired among themselves and with their retail dealers to fix the retail prices of the hearing aids.

higher prices for the hearing aids and related services they purchased from respondents' retail dealers. Treble damages and injunctive relief are sought under §§ 4 and 16 of the Clayton Act, 38 Stat. 731, 737, as amended, *15 U. S. C. §§ 15* and *26*.

[**11]** Respondents moved for dismissal of the complaint or summary judgment in the District Court. Among other things, respondents argued that Reiter, as a retail purchaser of hearing aids for personal use, lacked standing to sue for treble damages under § 4 of the Clayton Act because she had not been injured in her "business or property" within the meaning of the Act.

The District Court held that under § 4 a retail purchaser is injured in "property" if the purchaser can show that antitrust violations caused an increase in the price paid for the article purchased. The District Court relied on *Chattanooga Foundry & Pipe Works v. Atlanta, 203 U.S. 390, 396 (1906)*, and the legislative history of the Clayton Act set forth in *Brunswick Corp*. v. *Pueblo Bowl-O-Mat, Inc., 429 U.S. 477,* ***[*336]*** *486 n. 10 (1977)*, indicating that Congress intended to give a § 4 remedy to consumers. *435 F.Supp. 933, 935-938 (Minn. 1977)*.

The District Court determined, however, that the respondents had raised a "controlling question of law as to which there is substantial ground for difference of opinion," *id., at 938*, and accordingly **[****12]** certified the question for interlocutory review under *28 U. S. C. § 1292 (b)*. It then stayed further proceedings in the case and declined to express any opinion on the merits of the other issues raised by respondents' motions or on the certifiability of the class.

The Court of Appeals reversed, holding that retail purchasers of consumer goods and services who allege no injury of a commercial or business nature are not injured in their "business or property" within the meaning of § 4. *579 F.2d 1077 (CA8 1978)*. Noting the absence of any holdings on this precise issue by this Court or other courts of **[***936]** appeals, the court reasoned that the phrase "business or property" was intended to limit standing to those engaged in commercial ventures. It relied on the legislative history and this Court's statement in *Hawaii v. Standard Oil Co., 405 U.S. 251, 264 (1972)*, that "business or property" referred to "commercial interests or enterprises." A contrary holding, the Court of Appeals observed, would add a substantial volume of litigation to the already strained dockets of the federal courts and could be used to exact unfair **[****13]** settlements from retail businesses. Small and medium-sized retailers would be especially hard hit by "gigantic consumer class actions," and granting standing to retail consumers might actually have an anticompetitive impact as a consequence. Accordingly, the Court of Appeals thought "it sensible as a matter of policy and compelled as a matter of law that consumers alleging no injury of a commercial or competitive nature are not injured in their property under section 4 of the Clayton Act." *579 F.2d, at 1087*.

[*337] **[**2330]** We granted certiorari, *439 U.S. 1065 (1979)*. [2] **[****14]** We reverse. [3]

II

LEdHN[1B][] [1B] ***LEdHN[2]***[] [2]As is true in every case involving the construction of a statute, our starting point must be the language employed by Congress. ***HN1***[] Section 4 of the Clayton Act, 38 Stat. 731, provides:

---

[2] Differing views on this issue have been expressed by various courts. See, *e. g.,* ***Reiter v. Sonotone Corp., 579 F.2d 1077 (CA8 1978)*** (case below); *Bravman v. Bassett Furniture Industries, 552 F.2d 90, 98-99*, and n. 23 (CA3), cert. denied, ***434 U.S. 823 (1977)***; *Cleary v. Chalk, 159 U. S. App. D. C. 415, 419 n. 17, 488 F.2d 1315, 1319 n. 17 (1973)*, cert. denied, ***416 U.S. 938 (1974)***; *Theophil v. Sheller-Globe Corp., 446 F.Supp. 131 (EDNY 1978)*; *Gutierrez v. E. & J. Gallo Winery Co., 425 F.Supp. 1221 (ND Cal. 1977)*, appeal docketed, No. 77-1725 (CA9).

[3] The Court of Appeals expressly noted that Reiter's claim for injunctive relief under § 16 of the Clayton Act was not before it on interlocutory appeal. ***579 F.2d, at 1087 n. 19***. The court therefore expressed no view as to Reiter's standing to raise this claim. It also expressly refused to decide whether Reiter's claim for treble damages under § 4 was barred by the direct-purchaser rule of *Illinois Brick Co*. v. *Illinois, 431 U.S. 720 (1977)*. ***579 F.2d, at 1079 n. 3***. Accordingly, these issues are not before us.

"Any person who shall be injured in his business *or property* by reason of *anything* forbidden **[****15]** in the antitrust laws may sue therefor in any district court of the United States . . . without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee." *15 U. S. C. § 15* (emphasis added).

On its face, § 4 contains little in the way of restrictive language. In *Pfizer Inc*. v. *Government of India, 434 U.S. 308 (1978)*, we remarked:

"***HN2***[] 'The Act is comprehensive in its terms and coverage, protecting all who are made victims of the forbidden practices **[*338]** by whomever they may be perpetrated.' *Mandeville Island Farms, Inc*. v. *American Crystal Sugar Co., 334 U.S. 219, 236*; cf. *Perma Life Mufflers, Inc*. v. *International Parts Corp., 392 U.S. 134, 138-139*. **[***937]** And the legislative history of the Sherman Act demonstrates that Congress used the phrase 'any person' intending it to have its naturally broad and inclusive meaning. There was no mention in the floor debates of any more restrictive definition. **[****16]** " *Id., at 312*.

LEdHN[3][] [3]Similarly here, ***HN3***[] the word "property" has a naturally broad and inclusive meaning. In its dictionary definitions and in common usage "property" comprehends anything of material value owned or possessed. See, *e. g*., Webster's Third New International Dictionary 1818 (1961). Money, of course, is a form of property.

Respondents protest that, if the reference to "property" in § 4 means "money," the term "business" then becomes superfluous, for every injury in one's business necessarily involves a pecuniary injury. They argue that if Congress wished to permit one who lost only money to bring suit under § 4, it would not have used the restrictive phrase "business or property"; rather, it would have employed more generic language akin to that of § 16, for example, which provides for injunctive relief against any "threatened loss or damage." *15 U. S. C. § 26*. Congress plainly intended to exclude *some* category of injury in choosing the phrase "business or property" **[****17]** for § 4. Only a "commercial interest" gloss, they argue, both gives the phrase the restrictive significance intended for it and at the same time gives independent significance to the word "business" and the word "property." The argument of respondents is straightforward: the phrase "business or property" means "business activity or property related to one's business." Brief for Respondents 11 n. 7.

[2331]** ***LEdHN[4]***[] [4]***LEdHN[5]***[] [5]That strained construction would have us ignore the disjunctive "or" and rob the term "property" of its independent **[*339]** and ordinary significance; moreover, it would convert the noun "business" into an adjective. ***HN4***[] In construing a statute we are obliged to give effect, if possible, to every word Congress used. *United States v. Menasche, 348 U.S. 528, 538-539 (1955)*. Canons of construction ordinarily suggest that terms connected by a disjunctive be given separate meanings, unless the context dictates **[****18]** otherwise; here it does not. See *FCC v. Pacifica Foundation, 438 U.S. 726, 739-740 (1978)*.***HN5***[] Congress' use of the word "or" makes plain that "business" was not intended to modify "property," nor was "property" intended to modify "business."

LEdHN[1C][] [1C]When a commercial enterprise suffers a loss of money it suffers an injury in both its "business" and its "property." But neither term is rendered redundant by recognizing that a consumer not engaged in a "business" enterprise, but rather acquiring goods or services for personal use, is injured in "property" when the price of those goods or services is artificially inflated by reason of the anticompetitive conduct complained of. The phrase "business or property" also retains restrictive significance. It would, for example, exclude personal injuries suffered. *E. g., Hamman v. United States, 267 F.Supp. 420, 432 (Mont. 1967)*.Congress must have intended to exclude some class of injuries by the phrase "business or property." But it **[****19]** taxes the ordinary meaning of common

[*938]** terms to argue, as respondents do, that a consumer's monetary injury arising directly out of a retail purchase is not comprehended by the natural and usual meaning of the phrase "business or property." We simply give the word "property" the independent significance to which it is entitled in this context. ***HN6***[] A consumer whose money has been diminished by reason of an antitrust violation has been injured "in his . . . property" within the meaning of § 4.

Indeed, this Court indicated as much in *Chattanooga Foundry & Pipe Works v. Atlanta, 203 U.S. 390 (1960)*. There the city alleged that the anticompetitive conduct of the defendants **[*340]** had caused the city to pay more for water pipes purchased for use in the city's water system. The defendants answered that the pecuniary injury resulting from the alleged overcharges did not injure the city in its "business or property" within the meaning of § 4. This Court, without relying on the fact that the city was engaged in a business enterprise, stated:

"The city was **[****20]** . . . injured in its property, at least, if not in its business of furnishing water, by being led to pay more than the worth of the pipe. A person whose property is diminished by a payment of money wrongfully induced is injured in his property." *203 U.S., at 396*.

The holding of *Chattanooga Foundry* could well have been grounded on the undisputed fact that the city was engaged in the commercial enterprise of supplying water for a charge and, therefore, engaged in a business. It was not uncommon for both municipalities and private companies to own and operate competing waterworks at the turn of the century. In operating a municipal public utility, the city was in a real sense engaged in the "business of furnishing water" when it purchased the pipe to carry water from the city's reservoirs to its customers. *Ibid*.

Yet, the Court's holding in *Chattanooga Foundry* was deliberately grounded on the premise that the city had been injured in its "property" -- independent of any injury it had sustained in its "business of furnishing water" -- because the defendants' antitrust violation caused it to pay a higher price for the pipe than it otherwise would have paid. **[****21]** *Ibid. Chattanooga Foundry* therefore establishes that ***HN7***[] monetary injury, standing alone, may be injury in one's "property" within the meaning of § 4. Thus, the fact that petitioner Reiter was deprived of only money, albeit a modest **[**2332]** amount, is no reason to conclude that she did not sustain a "property" injury.

Nor does her status as a "consumer" change the nature of **[*341]** the injury she suffered or the intrinsic meaning of "property" in § 4. ***HN8***[] That consumers of retail goods and services have standing to sue under § 4 is implicit in our decision in *Goldfarb v. Virginia State Bar, 421 U.S. 773, 780, 782 (1975)*. There we held that a bar association was subject to a treble-damages suit brought under § 4 by persons who sought legal services in connection with the purchase of a residence. Furthermore, we have often referred to "consumers" as parties entitled to seek damages under § 4 without intimating that consumers **[***939]** of goods and services purchased **[****22]** for personal rather than commercial use were in any way foreclosed by the statutory language from asserting an injury in their "property." *E. g., Pfizer Inc*. v. *Government of India, 434 U.S., at 313-315*; *Brunswick Corp*. v. *Pueblo Bowl-O-Mat, Inc., 429 U.S., at 486 n. 10*; *Hanover Shoe, Inc*. v. *United Shoe Machinery Corp., 392 U.S. 481, 494 (1968)*; *Mandeville Island Farms v. American Crystal Sugar Co., 334 U.S. 219, 236 (1948)*.

Hawaii v. Standard Oil Co., 405 U.S. 251 (1972), is not to the contrary. There we held that injury to a state's total economy, for which the state sought redress in its *parens patriae* capacity, was not cognizable under § 4. It is true we noted that the words "business or property" refer to "commercial interests or enterprises," and reasoned that Hawaii could not recover on its claim for damage done to its "general economy" because such injury did not harm Hawaii's "commercial interests." *405 U.S., at 264*.

However, the language of an opinion is not always to be parsed as though we were dealing with language of a statute. Use of **[****23]** the phrase "commercial interests or enterprises," read in context, in no sense suggests that only injuries to a business entity are within the ambit of § 4. Respondents ignore the Court's careful use of the disjunctive and the naturally broad meaning of the term "interests" in *Hawaii v. Standard Oil Co., supra.* The phrase "commercial interests" was used there as a generic reference to the interests of the **[*342]** State of Hawaii as a party to a commercial transaction. This is apparent from *Hawaii*'s explicit reaffirmance of the rule of *Chattanooga Foundry* and statement that, where injury to a state "occurs in its capacity as a consumer in the marketplace" through a "payment of money wrongfully induced," treble damages are recoverable by a state under the Clayton Act. *Hawaii v. Standard Oil Co., supra, at 263 n. 14*. A central premise of our holding in *Hawaii* was concern over duplicative recoveries. We noted that a "large and ultimately indeterminable part of the injury to the 'general economy'" for which the State sued was "no more than a reflection of injuries to the 'business or property' of consumers" for which, on a **[****24]** proper showing, they could recover in their own right. *405 U.S., at 263-264*.

Consumers in the United States purchase at retail more than $ 1.2 trillion in goods and services annually. 1978 Economic Report of the President 257 (Table B-1). It is in the sound commercial interests of the retail purchasers of goods and services to obtain the lowest price possible within the framework of our competitive private enterprise system. The essence of the antitrust laws is to ensure fair price competition in an open market. Here, where petitioner alleges a wrongful deprivation of her money because the price of the hearing aid she bought was artificially inflated by reason of respondents' anticompetitive conduct, she has alleged an injury in her "property" under § 4.

Nothing in the legislative history of § 4 conflicts with our holding today. **[***940]** Many courts and commentators have observed that the respective legislative histories of § 4 of the Clayton Act and § 7 of the **[**2333]** Sherman Act, its predecessor, shed no light on Congress' original understanding of the terms "business or property." [4] **[****26]** Nowhere in the legislative record **[*343]** is specific reference **[****25]** made to the intended scope of those terms. Respondents engage in speculation in arguing that the substitution of the terms "business or property" for the broader language originally proposed by Senator Sherman [5] was clearly intended to exclude pecuniary injuries suffered by those who purchase goods and services at retail for personal use. None of the subsequent floor debates reflect any such intent. On the contrary, they suggest that Congress designed the Sherman Act as a "consumer welfare prescription." R. Bork, The Antitrust Paradox 66 (1978). Certainly the leading proponents of the legislation perceived the treble-damages remedy of what is now § 4 as a means of protecting consumers from overcharges resulting from price fixing. *E. g*., 21 Cong. Rec. 2457, 2460, 2558 (1890). Because Congress in 1890 rejected a proposal to allow a group of consumers to bring a collective action as a class, some legislators questioned whether individual consumers would be willing to bring actions for relatively small amounts. See, *e. g., id*., at 1767-1768, 2569, 2612, 3147-3148, 3150. At no time, however, was the *right* of a consumer to bring an action for damages questioned. [6]

LEdHN[6A][] [6A]In *Brunswick Corp*. v. *Pueblo Bowl-O-Mat, Inc., supra*, after examining the legislative history of § 4, we described the Sherman Act as "conceived of primarily as a remedy for '[the] people of the United States as individuals,' especially consumers," and the treble-damages provision of the Clayton Act as "conceived primarily as '[opening] the door of justice **[*344]** to every man . . . and [giving] the injured party ample damages for the wrong suffered.'" *429 U.S., at 486 n. 10*. Thus, to the extent that the legislative history is relevant, **[****27]** it supports our

---

[4] See, *e. g., Hawaii v. Standard Oil Co., 405 U.S. 251, 261 (1972)*; *Weinberg v. Federated Department Stores, Inc., 426 F.Supp. 880, 882-883 (ND Cal. 1977)*, appeal docketed, No. 77-1547 (CA9); M. Forkosch, Antitrust and the Consumer 2-3 (1956); Comment, Closing the Door on Consumer Antitrust Standing, 54 N. Y. U. L. Rev. 237, 242-243, 249-252 (1979). See also 1 P. Areeda & D. Turner, ***Antitrust Law*** para. 106, pp. 14-16 (1978).

[5] As originally introduced, the bill that ultimately became the Sherman Act authorized "any person or corporation injured or damnified by [an unlawful] arrangement, contract, agreement, trust, or combination" to sue for damages thereby sustained. S. 1, 51st Cong., 1st Sess., *§ 2* (1889).

[6] Of course, the treble-damages remedy of § 4 took on new practical significance for consumers with the advent of *Fed. Rule Civ. Proc. 23*.

holding that a consumer deprived of money by reason of allegedly anticompetitive conduct is injured in "property" within the meaning of § 4. [7]

LEdHN[6B][] [6B]

Respondents **[***941]** also argue that allowing class actions **[****28]** to be brought by retail consumers like the petitioner here will add a significant burden to the already crowded dockets of the federal courts. That may well be true but cannot be a controlling consideration here. HN9[] We must take the statute as we find it. Congress created the treble-damages remedy of § 4 precisely for the purpose of encouraging *private* challenges to antitrust violations. These private suits provide a significant supplement to the limited resources available to the Department of Justice for enforcing the antitrust laws and deterring violations. Indeed, nearly 20 times as many private antitrust actions are currently pending in the federal courts as actions filed by the Department of Justice. Administrative Office **[**2334]** of the United States Courts Ann. Rep. 101, Table 28 (1978). To be sure, these private suits impose a heavy litigation burden on the federal courts; it is the clear responsibility of Congress to provide the judicial resources necessary to execute its mandates.

LEdHN[7][] [7]Finally, **[****29]** respondents argue that the cost of defending consumer class actions will have a potentially ruinous effect on small businesses in particular and will ultimately be paid by **[*345]** consumers in any event. These are not unimportant considerations, but they are policy considerations more properly addressed to Congress than to this Court. However accurate respondents' arguments may prove to be -- and they are not without substance -- they cannot govern our reading of the plain language in § 4.

District courts must be especially alert to identify frivolous claims brought to extort nuisance settlements; they have broad power and discretion vested in them by Fed. Rule Civ. Proc. 23 with respect to matters involving the certification and management of potentially cumbersome or frivolous class actions. See generally Durham & Dibble, Certification: A Practical Device for Early Screening of Spurious Antitrust Litigation, 1978 B.Y.U.L. Rev. 299. Recognition of the plain meaning of the statutory language "business or property" need not result in administrative chaos, class-action harassment, or "windfall" settlements if the district courts exercise sound discretion and use **[****30]** the tools available.

The judgment of the Court of Appeals is reversed, and the case is remanded for further proceedings consistent with this opinion.

Reversed and remanded.

MR. JUSTICE BRENNAN took no part in the decision of this case.

Concur by: REHNQUIST

Concur

MR. JUSTICE REHNQUIST, concurring.

I join the Court's opinion and write separately only to point out that the concern expressed by the Court of Appeals that an interpretation of "business or property" in the manner in which the Court interprets it today would "add a substantial **[***942]** volume of litigation to the already strained dockets of the federal courts and could be used to

[7] Although in no sense a controlling consideration, we note that our holding is consistent with the assumption on which Congress enacted the Hart-Scott-Rodino Antitrust Improvements Act of 1976, 90 Stat. 1394, 15 U. S. C. § 15c et seq. The text and legislative history of this statute make clear that in 1976 Congress believed that consumers have a cause of action under § 4, which the statute authorizes the states to assert in a *parens patriae* capacity. See, *e. g*., 15 U. S. C. §§ 15c (a)(1), 15c (a)(1)(B)(ii), 15c (b)(2); H. R. Rep. No. 94-499, pp. 6, 9 (1975). See also *Illinois Brick Co*. v. Illinois, 431 U.S., at 734 n. 14.

exact unfair settlements from retail businesses," *ante*, at 336, is by no means an unfounded one. And pronouncements from this Court exhorting district courts to be "especially alert to identify frivolous **[*346]** claims brought to extort nuisance settlements" will not be a complete solution for those courts which are actually on the firing line in this type of litigation. *Ante*, at 345. But I fully agree that we must take the statute as Congress wrote it, and I also fully agree with the Court's construction of the phrase "business **[****31]** or property." I think that the Court's observation, *ante*, at 343 n. 6, that "the treble-damages remedy of § 4 took on new practical significance for consumers with the advent of *Fed. Rule Civ. Proc. 23*" is a miracle of understatement; and in the absence of any jurisdictional limit, there is considerable doubt in my mind whether this type of action is indeed ultimately of primary benefit to consumers themselves, who may recover virtually no monetary damages, as opposed to the attorneys for the class, who stand to obtain handsome rewards for their services. Be that as it may, the problem, if there is one, is for Congress and not for the courts.

Antitrust & Trade Law > Clayton Act > General Overview

HN4[] **Antitrust & Trade Law, Sherman Act**

Since the enactment of the declaration in § 6 of the Clayton Act that the labor of a human being is not a commodity or article of commerce nor shall such labor organizations, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade, under the anti-trust laws, restraints on the sale of the employee's services to the employer, however much they curtail the competition among employees, are not in themselves combinations or conspiracies in restraint of trade or commerce under the Sherman Act.

Antitrust & Trade Law > Sherman Act > General Overview

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

Labor & Employment Law > Collective Bargaining & Labor Relations > Strikes & Work Stoppages

HN5[] **Antitrust & Trade Law, Sherman Act**

Strikes or agreements to not work, entered into by laborers to compel employers to yield to their demands, may restrict to some extent the power of employers who are parties to the dispute to compete in the market with those not subject to such demands. But under the doctrine applied to non-labor cases, the mere fact of such restrictions on competition does not in itself bring the parties to the agreement within the condemnation of the Sherman Act. Furthermore, successful union activity, as for example consummation of a wage agreement with employers, may have some influence on price competition by eliminating that part of such competition which is based on differences in labor standards. Since, in order to render a labor combination effective it must eliminate the competition from non-union made goods, an elimination of price competition based on differences in labor standards is the objective of any national labor organization. But this effect on competition has not been considered to be the kind of curtailment of price competition prohibited by the Sherman Act.

Opinion

[*252] MEMORANDUM OPINION RELATING TO ORDER GRANTING MOTION FOR PARTIAL SUMMARY JUDGMENT

Introduction and Outline

Defendants' Motion for Partial Summary Judgment seeks to eliminate the plaintiffs' antitrust allegations from this case. Defendants' motion seeks no relief from plaintiffs' cause of action based on alleged unfair labor practices in violation of the National Labor Relations Act. This memorandum will set out the reasons for the court's action in granting defendants' motion.

This memorandum opinion will:

I. Summarize the record (pp. 252 to 266);

II. Discuss the controlling authorities (pp. 266 to 273); and

III. Distinguish those authorities which are arguably applicable but not controlling (p. 273).

The issue here is not whether Kane has a cause of action of some type the issue is whether he is entitled to Treble damages and attorneys fees under the antitrust laws.

I.

SUMMARY OF THE RECORD

[2]** Record before the Court

The record consists of the following documentary material and testimony: Deposition of Harry Lieberman, a/k/a Larry Kane, taken on January 30, 1976 (Kane deposition); Affidavit of Eleanor S. Glass, counsel for plaintiffs, authenticating minutes **[*253]** of the meeting of the Board of Directors of AFTRA Dallas-Fort Worth Local and additional significant correspondence relating to the matters in controversy (Glass affidavit); Affidavit of Harry Lieberman, a/k/a Larry Kane (hereinafter "Kane"), filed in this court on January 12, 1979 (Kane affidavit); Affidavit of Sanford R. Wolff, National Executive Secretary of defendant AFTRA; Defendants' Supplemental Answers to Plaintiffs' Second Request for Production of Documents, filed herein on January 3, 1979; transcript of a two-day hearing conducted before Administrative Law Judge Lloyd Buchanan, on January 8 and 9, 1974 (hereinafter "NLRB transcript"); Defendants' Answers to Plaintiffs' First Set of Interrogatories, filed on March 14, 1978, along with voluminous exhibits to the answers appearing in this record in a folder labeled "Attachments No. 28" and numbered 1-A et seq. (hereinafter "Defendants Answers"); **[**3]** and a detailed First Amended Complaint setting out the alleged antitrust cause of action.

Nature of Defendants and Their Collective Bargaining Agreements

The nature of defendant AFTRA is established by Exh. 3 to Defendants Answers constituting the Articles of Agreement and Constitution of the American Federation of Television and Radio Artists (hereinafter referred to as the "AFTRA Constitution"). AFTRA is a voluntary association formed to advance and benefit ". . . all those connected with performances in the field of radio, television and phonograph recordings . . ." Among other things, its objectives are

> . . . to protect and secure the rights of the above-described persons in their professional activities;
>
> . . . to promulgate and carry into effect such policies as shall secure the united action of all members of the said professions for the common good;
>
> . . . to assist such persons in securing just and equitable contracts, agreements, working conditions, and minimum compensation in their dealings with employers, producers, networks, stations, advertising agencies, sponsors, independent packagers, transcription companies, phonograph recording companies, agents, **[**4]** managers, impresarios, and others connected directly or indirectly with radio, television, or phonograph record business;
>
> . . . to investigate the practices of such employers, producers, networks, stations, advertising agencies, sponsors, independent packagers, transcription companies, phonograph recording companies, agents, managers, impresarios, and others and to take united action to abolish unfair dealings or abuses or other conditions which are detrimental to persons engaged in the said professions;
>
> . . . to bargain collectively on behalf of its members and to deal with employers, producers, networks, stations, advertising agencies, sponsors, independent packagers, transcription companies, phonograph recording

companies, agents, managers, impresarios and others whose activities affect the members concerning grievances, standard contractual relations, minimum wages and conditions, and concerning all related and collateral abuses that may affect the welfare of the members.

Persons eligible for membership in AFTRA are:

Any person who has performed, or intends to perform, as an actor, singer, dancer, announcer, newsperson, narrator, commentator, lecturer, **[**5]** analyst, M.C., sound effects artist, graphic artist, manual artist, demonstrator, moderator, panel member, specialist, quiz person, disc jockey, sportscaster, specialty act, puppeteer, model, walk-on, extra or supernumerary in the fields of radio, television and phonograph recordings . . .

Article V of the AFTRA Constitution provides that:

No person shall become a member of the Association, or of any Local thereof, unless and until such person signs an application which shall substantially provide that such person agrees to be bound by the respective constitutions of the Association **[*254]** and the Local and by such amendments thereto as may thereafter be lawfully made, and by any bylaws, rules, regulations and orders existing or thereafter lawfully enacted pursuant to such constitutions and any amendments thereto.

Article VIII of the AFTRA Constitution provides for the establishment of local unions whose constitutions and bylaws "shall be consistent with the constitution and bylaws of the Association approved by the National Board . . ."

Article XXII of the AFTRA Constitution provides that:

The Association through its National Board may order the members **[**6]** of all Locals to refrain for a given time . . . from working for, dealing with, or having any business or professional relations with, any one or more employers, producers, networks, stations, advertising agencies, sponsors, independent packagers, transcription companies, phonograph recording companies, agents, managers, impresarios or other persons connected with the radio or phonograph record business . . .

The remaining portions of Article XXII deal with certain limitations upon the exercise of this power and prescribe definite procedures which must be followed before such an order may be issued. Article XVIII of the AFTRA Constitution provides that:

Any member who shall be guilty of an act, omission, or conduct which in the opinion of the Board is prejudicial to the welfare of the Association, or any of its Locals, or of any of its members, as such . . . may . . . be either fined, censored, suspended or expelled from membership.

Article XVIII of the AFTRA Constitution sets forth the relationship between AFTRA and its Locals, and provides in its pertinent parts:

The relation of each Local to this Association is that of an organization accepting certain rights **[**7]** vested in this Association, and agreeing in consideration of the giving of said rights, to assume the obligation set forth in this Constitution; and the acceptance of rights hereunder by the several Locals, shall not be deemed, at this time, to create any partnership or joint venture between them.

Article XXV provides that any member who has or asserts a claim against the Association, or any of its Locals, must submit his dispute to compulsory arbitration.

The nature of the Dallas-Fort Worth Local is established by Exh. 3-A to Defendants' Answers, and constitutes the Articles of Agreement, Constitution and Bylaws of the Dallas-Fort Worth Local of the American Federation of Television and Radio Artists (hereinafter "AFTRA Local Constitution"). The AFTRA Local Constitution provides that all members becoming members of the Local shall be deemed members of the national Association and subject to its jurisdiction. (See Art. 3, Sec. 3 of the AFTRA Local Constitution).

The AFTRA Local Constitution repeats many of the provisions contained in the AFTRA Constitution, including the provision that every applicant for membership ". . . shall sign an application on such form as shall be **[**8]** prescribed by the Local Board which shall substantially provide that he agrees to be bound by the respective constitutions of the Federation and of the Dallas-Fort Worth Local . . ." (see Art. V, Sec. 1)

Article XII Sec. 1 of the AFTRA Local Constitution provides that:

> Subject to the approval of the National Board, the Local, through its Local Board, may order its members to refrain for a given time or until further order of the Local Board under specified conditions or in any manner whatsoever from working for, dealing with, or having any business or professional relations with any one or more employers, agents, managers, impresarios, or other persons connected with the radio, television or phonograph record business . . .

Article XX of the AFTRA Local Constitution also provides that unless the national Board grants an exemption, ". . . the exclusive remedy of any member who has **[*255]** or asserts a claim against the Federation, any of its Locals, or other subdivisions . . ." shall be by a compulsory arbitration procedure.

Collective Bargaining Agreements Negotiated By AFTRA

The collective bargaining agreements which AFTRA and its Locals negotiate with various ". **[**9]** . . employers, producers, networks, stations, advertising agencies, sponsors, independent packagers, transcription companies, phonograph recording companies, agents, managers, impresarios and others connected directly or indirectly with radio, television, phonograph record business . . ." are established by a number of the exhibits to Defendants' Answers. The AFTRA collective bargaining agreement applicable to the television industry is in the record as Exh. 6 to Defendants Answers. The pertinent parts are:

Paragraphs 1 through 74 basically set forth detailed rules concerning wages, hours and conditions of employment.

Paragraph 75 contains detailed provisions concerning "People Covered" and provides essentially that those persons covered are "All persons who perform as talent, e.g., Masters of Ceremonies, . . ."

Paragraph 78 entitled "Waivers" is significant. This paragraph plus the agreement which AFTRA Dallas-Fort Worth Local eventually worked out with Kane in December 1971 (see discussion, p. 262, Infra) establish that nothing in the rules, procedures or customary practices of AFTRA or AFTRA locals prevent them from bargaining separately with each employer group. The second **[**10]** paragraph of Paragraph 78 provides:

> The wages and working conditions set forth herein are the minimum wages and working conditions for the employment of television artists in the categories mentioned above and no waiver of any such wages or working conditions by any artist shall be effective unless the written consent of AFTRA to such waiver is first had and obtained.

Pursuant to the authority granted by this paragraph, AFTRA Dallas-Fort Worth Local (its action later confirmed by AFTRA) agreed with Kane that during his formative period, while he was attempting to get his business on its feet, he was not required to pay union scale but was to pay only $ 50 per artist per performance and make a 6 1/2 % Contribution to the AFTRA Pension and Welfare Fund. This provision is, it seems to the court, significant in the light of Pennington, infra, in that it demonstrates that defendants were not required to and did not here attempt to impose union scale upon those employers who were financially unable to pay.

Paragraph 84 entitled "Union Shop" contains the following significant provision:

> American Federation of Television and Radio Artists agrees that it is and will continue to **[**11]** be an open union and that it will keep its membership rolls open and will admit to membership all eligible television artists engaged by the producers. American Federation of Television and Radio Artists agrees not to impose unreasonable entrance fees or dues upon its members and wherever necessary for the producers' program purposes to qualify members within 24 hours after notice from the producer.

This provision is significant in view of the concern expressed in Carroll, infra, and Allen Bradley, infra, where the courts apparently believed it wise to deny a union the power to exclude a particular group of businessmen from a relevant market. In the context of this case, the union could never prevent a "top star" from appearing on the Larry Kane Show since such person would always have a virtually absolute right to become a union member.

Paragraph 92 of the collective bargaining agreement defines the situation in which a producer may be declared an "unfair producer."

Paragraph 93 contains a commitment that AFTRA will not strike any producer who performs in accordance with the Code.

Paragraph 95 sets up a detailed arbitration procedure to resolve controversies between **[*256]** **[**12]** any producer and AFTRA or between any producer and a member of AFTRA.

Paragraph 102 of the collective bargaining agreement relates to the detailed provisions with reference to the collection of funds for the AFTRA Pension & Welfare Fund.

The collective bargaining agreement, entitled "1969-1972 National Code of Fair Practice for Network Television Broadcasting" construed in conjunction with the AFTRA Constitution and the AFTRA Local Constitution, makes it clear that the union and the signatories of the collective bargaining agreement contemplated that the "employer group" would include

> . . . employers, producers, networks, stations, advertising agencies, sponsors, independent packagers, transcription companies, phonograph recording companies, agents, managers, impresarios, and others connected directly or indirectly with the radio, television or phonograph record business . . .

The agreement contemplated that the "employee group" would include

> . . . any person who has performed or intends to perform as an actor, singer, dancer, announcer, newsperson, narrator, commentator, lecturer, analyst, Master of Ceremonies, sound effects artists, graphic artists, manual artists, demonstrator, **[**13]** moderator, panel member, specialist, quiz person, disc jockey, sportscaster, speciality act, puppeteer, model, walk-on, extra, or supernumerary, in the field of radio, television and phonograph recordings . . .

Part of the key to this case is that some persons, like Larry Kane and Dick Clark, would be both "employees" and also part of the "employer group" similar to the orchestra leaders, whose activities were in issue in American Federation of Musicians v. Carroll, infra, pg. 260. A person like Larry Kane or Dick Clark, who was both an employer and a member of the "labor group," is also, in the undersigned's analysis, to some degree analogous to the truck driver who owns his own rig in International Brotherhood of Teamsters v. Oliver, infra, pg. 266, and *California Dump Truck Owners Association v. Associated General Contractors, 562 F.2d 607 (9th Cir. 1977)*.

The nature of the "employer group" is illustrated by Exh. 7 to Defendants Answers, listing literally hundreds of employers who have agreed to comply with one or another of the various AFTRA Codes. Examination of this exhibit reveals that members of the employer group include record companies, advertising agencies, charitable **[**14]** organizations such as the Lutheran Church; well-known entertainers who are also producers such as Ray Charles; political organizations such as various branches of the Democratic Party; the various political action committees such as the Committee to Elect Joseph Early to Congress and the Committee to Elect Judge Nicholas Tsoucalas; major corporate entities such as Cook Paint & Varnish Company through their advertising manager; the Ford Motor Company, Photo-Media Department. Examination of Exh. 7 also reveals that apparently AFTRA and the AFTRA Dallas Local have never been particularly active in organizing activities in the Houston area since very few of the signatories listed in Exh. 7 appear to be Houston-based companies. This fact is at least a partial explanation of why defendants exhibited little interest in Kane during the years when he operated his show locally as an employee of Channel 13.

The Larry Kane Show and Its Demise

In 1959 Kane, an ex-disc jockey and then a student at the University of Houston began to host the "Larry Kane Show" on KTRH-TV, Channel 13, a local Houston, Texas television station. Kane continued his endeavor for a decade as an employee of Channel 13.

[15]** Kane's program was successful and popular locally.

The basic concept of Kane's program was that for one or two hours on a Saturday afternoon, he would host what was essentially a party in the Channel 13 studio at which a number of teenagers would dance **[*257]** to recorded music. In addition, during the course of the program, two or three "top stars" would appear in person, sing or otherwise perform, and then participate in an interview with Kane. Intervals for commercials were interspersed through the show.

Despite the simplicity of the concept, a fairly elaborate production staff was required to produce the show. It was necessary to have a director, an assistant director, a dance director, cameramen, makeup personnel and talent directors to schedule and care for the "top stars." Studio facilities were necessary.

Kane, while in charge of this entire operation, was himself a performer. The program typically commenced with Kane being introduced, thereafter participating in the first dance; this activity would normally be followed by a commercial break, and thereafter the first top star would be interviewed by Kane. Kane prepared for his performance by acquainting himself with **[**16]** the top star and determining what the top star wished to talk about during the interview. (See NLRB transcript, p. 227, et seq; and p. 274, et seq).

The concept of the Larry Kane Show is not unique. Similar shows have appeared in Chicago, Los Angeles, Nashville and in other markets. Sanford Wolff, National Executive Secretary and the chief executive officer of AFTRA, has testified, without contradiction, that Kane-type shows produced in Chicago, Los Angeles, Nashville and others of which he had knowledge, were produced under AFTRA collective bargaining agreements in which recording artists were paid for performing services on the programs. (NLRB transcript pp. 307-315). Probably the best known of these shows is Dick Clark's "American Bandstand" program.

While Mr. Wolff testified before the NLRB hearing (see NLRB transcript p. 315, et seq) that shows like the Larry Kane Show were customarily produced with the producer paying union scale, it is inferable from certain of Mr. Wolff's correspondence (see letter, Infra, p. 261) and from the fact that Kane was able to continue to obtain "top stars" even after he was placed on the unfair list that both AFTRA and the American Federation of **[**17]** Musicians have had considerable difficulty in persuading their own members to refrain voluntarily from working on record promotion shows like the Larry Kane Show. This inference could also arise from the fact that the AFTRA Dallas Local was obviously very reluctant to undertake the chore of persuading Kane to sign a "letter of adherence" and pay union scale to the top stars who appeared on his show.

During the decade from 1959 to 1969, while Kane was an employee of Channel 13 and acting as host of the Larry Kane Show, he devised a method of obtaining the services of the "top stars" without making a monetary payment to the top stars. As a general rule, each of the "top stars" was attempting to promote a record or his own career. Many "top stars" were willing to appear on the Kane show simply for the public exposure which they received. Generally, Channel 13 would pay only for the performer's lodging and ground transportation while in the Houston area. Kane would normally arrange for the appearance of the "top stars" through the star's agent, or through a record company with which the star had a contract.

During the actual performance, Kane exercised little detailed control over the **[**18]** manner in which the star performed. For example, Kane did not tell the star what to sing or how to sing, or prescribe his costume. Administrative Law Judge Buchanan accurately observed that Kane would not demand that Al Jolson refrain from singing on his knees. On the other hand, Kane did control totally the environment in which the star performed in the sense of controlling the teenaged dancers, the cameramen, directors, dancing coordinators, and the time allotted to the "top stars." Administrative Law Judge Buchanan, who conducted the detailed hearing described above, has found that the "top stars" had the legal status of independent contractors.

[*258] For purposes of this motion, it must be assumed that the "top stars" did in fact have the legal status of independent contractors. It is apparent, however, that they were "independent contractors" of a specialized variety. The manner in which they performed their function was certainly considerably different from the manner in which an independent contractor in the construction business performs his work. Additionally, Kane, while his corporation ultimately became an "employer" of some of the personnel putting on his show, **[**19]** was also always a performer. He actively participated in and was a vital part of the entire show.

On occasion, a star's agent or the record company with whom Kane was dealing would ask whether or not Kane paid the union scale. Kane would reply that he did not. Significantly, Kane has testified on his deposition that his basic plan throughout the entire period of his syndication was that the performers would be paid nothing. (Kane deposition pp. 66-68). Despite this plan, however, as will be shown at a later point in this narrative, Kane did ultimately agree to pay the performers. (See discussion of meeting of December 1971, Infra, p. 262).

In 1969 and 1970, Kane because restive in his relationship with Channel 13. In March of 1969, Kane formed a corporation, LK Productions, Inc., one of the plaintiffs herein, for the purpose of syndicating the Larry Kane Show. By "syndication" in this context is meant that the Kane show would be taped and an effort made to market the tapes to television stations or other possible purchasers located in other areas of the country.

Contemporaneously with Kane's formation of LK Productions, Inc., or shortly thereafter, the management of Channel 13 changed. **[**20]** The new management of Channel 13 was not enthusiastic about Kane's plans to syndicate his show and attempted to persuade him to continue to produce the show locally as he had done successfully over the last ten years. Kane was unwilling to accept this advice and continued with his plans to syndicate his show.

Eventually Kane terminated his employer/employee relationship with Channel 13 and intensified his efforts to syndicate his show. Initially he continued to produce the show at Channel 13 but became dissatisfied with the charges which Channel 13 levied upon him for the use of its facilities, and thus he moved his office close to an entity known as Mobile Color, Inc., where he was able to continue to produce his shows. At the time he moved from Channel 13, Kane also entered a business relationship with an entity known as Bing Crosby Productions, later Tele-Com (hereinafter "Crosby/Tele-Com").

Kane's arrangement with Crosby/Tele-Com was that Crosby/Tele-Com was to syndicate Kane's show nationally on a "barter" basis. A show is syndicated on a barter basis by making arrangements with networks and local television stations to use the syndicated show, without charge. The syndicator, **[**21]** however reserves the right to sell to advertisers some of the time which has been reserved during the shows.

Kane's relationship with Crosby/Tele-Com, which extended from the time Kane left Channel 13 in 1970 until Kane terminated with Crosby/Tele-Com in August of 1971, was ultimately unhappy.

Kane testifies that Crosby/Tele-Com did an excellent job of placing his show with non-paying stations in various markets, but did not succeed in selling the advertising spaces or obtaining sponsors. In this connection, some of Kane's regular advertisers during the period that he was an employee of Channel 13 were Gordon's Jewelry, Texas State Optical, and O. J. Beauty Lotion. All of these advertisers are local or regional advertisers. These advertisers remained with him when he established his relationship with Crosby/Tele-Com. The only additional substantial advertiser that Crosby/Tele-Com was ever able to obtain was Vicks, for their product Clearasil. This relationship with Vicks terminated in June 1971.

By January 1971, Crosby/Tele-Com had been successful in "placing" Kane's show on **[*259]** non-paying television stations in over 25 states. The only problem was that Crosby/Tele-Com was **[**22]** unsuccessful in selling the advertising spots, or obtaining "sponsors" for the Larry Kane Show. The television stations paid nothing for the use of the Kane show under the arrangement with Crosby/Tele-Com.

During the decade when Kane was an employee of Channel 13 and was producing the Larry Kane Show locally, none of the defendants exhibited any interest in him, possibly because the Houston area has apparently never been actively or extensively organized by defendants. That disinterest changed in 1971 when Kane's show began to be aired in Los Angeles, New York and other areas in which there were strong and active local AFTRA chapters.

A detailed understanding of events which occurred from the spring of 1971 until the fall of 1972 may be obtained from correspondence which appears in this record appended to the affidavit of Eleanor S. Glass, and also appended as exhibits to "Defendants Answers." The parties to this detailed correspondence are John Kunsak, Jr., a/k/a "Johnny K," a/k/a "Johnny," the Executive Secretary of the AFTRA Dallas-Fort Worth local; David Tytherleigh, Executive Secretary of the AFTRA Los Angeles Local; Sanford Wolff, Executive Secretary of AFTRA National;

Claude **[**23]** McCue, Executive Secretary of AFTRA Los Angeles Local; and Sharon Mayhew, an employee and representative of the Dallas-Fort Worth Local.

The record (Eleanor Glass affidavit, Exh. I-A) contains a copy of a letter from David O. Tytherleigh, Assistant Executive Secretary of the Los Angeles Local, to Sanford Wolff, the National Executive Secretary, advising that the Larry Kane Show was to be shown at Station KTLA in Los Angeles on April 24, 1971. Wolff was advised that the program was made available free on a barter deal by the distributor, Tele-Com Productions. Tytherleigh concludes his letter to Wolff by stating:

I realize how difficult it is to control these record promotion shows. . . .

It is a fair inference that the AFTRA Dallas-Fort Worth Local, in response to pressure from Wolff, began efforts to persuade Kane to pay the union scale to "top stars." In the spring or summer of 1971 Kunsak told Kane that AFTRA and its Dallas-Fort Worth Local would place his show on the unfair list and cut off the supply of entertainers if Kane did not sign a "letter of adherence." Letters of adherence are described in Paragraph 89(a) of the 1969-1972 National Code of Fair Practice for Network **[**24]** Television Broadcasting (see Exh. 6 to Defendants Answers). The signer of a letter of adherence basically acknowledges receipt of a number of AFTRA codes, and agrees to abide by and conform to the codes, which prescribe wages, hours and terms of employment. The signer of the letter of adherence also agrees to the arbitration provisions of the various codes and agrees to make contributions to the AFTRA Pension & Welfare Fund according to the AFTRA Pension & Welfare Fund's Agreement and Declaration of Trust, dated November 16, 1954.

A "letter of adherence" is visualized more accurately by examination of Exh. 6(a) to Defendants Answers; it is the type of letter agreement which AFTRA and its locals attempt to obtain from producers like Kane, in which Kane in effect acknowledges receipt of the national code and agrees to be bound by the terms and provisions of the code, except as modified in any supplemental letter agreements.

In addition to the collective bargaining agreement entitled "1969-1972 National Code of Fair Practice for Network Television Broadcasting" which obviously covers television broadcasting, AFTRA also promulgated and attempted to negotiate adherence to codes of fair **[**25]** practice for commercial radio broadcasting (see Exh. 6 to Defendants Answers) for radio recorded commercials, or television recorded commercials, and for radio transcribed commercials.

Also illustrative of a typical "letter of adherence" is Exh. 83 to Defendants Answers, entitled "Screen Actors Guild American Federation of Television and Radio Artists **[*260]** Texas Local and Regional Contract Letters of Adherence." This letter of adherence is similar to that set out in the collective bargaining agreement itself and states that the "producer/advertising agency signatory . . . " acknowledges receipt of the American Federation of Television and Radio Artists Code of Fair Practice for Transcriptions for Broadcast Purposes, and the 1969-1972 AFTRA National Code of Fair Practice for Recorded Commercials for Television Broadcasting Purposes, and agrees to comply with the terms and conditions of said documents and also sets out certain rates for appearances on commercials which are applicable in Texas, Arkansas, Oklahoma, Louisiana and New Mexico areas. See also Exh. 8(a) (10) to the Defendants Answers to illustrate a typical form of letter of adherence.

The inference could be drawn **[**26]** from the record, and in fact it may be established almost conclusively that the reluctant AFTRA Dallas-Fort Worth Local responded to pressures from the Los Angeles Local and that the Los Angeles Local succeeded in enlisting Mr. Wolff of the National Association in encouraging the AFTRA Dallas-Fort Worth Local to take action against Kane. It could also be fairly inferred that the Dallas Local was motivated by complaints from Dick Clark, who paid union scale and was the signatory to an AFTRA letter of adherence. While the record contains no detailed information concerning Clark's operation, it is undisputed in the evidence that Clark's operation was basically similar to that of Kane's. This is important because Clark, being a performer himself, was clearly not an "employer group." (See *American Federation of Musicians v. Carroll, 391 U.S. 99, 88 S. Ct. 1562, 20 L. Ed. 2d 460 (1968)*, and International Brotherhood of Teamsters v. Oliver, infra.)

The record is unclear as to what response Kane made to Kunsak's demands, but the record does establish that in the summer of 1971, Kane himself became a member of AFTRA (NLRB transcript p. 240). Kane was still a member of AFTRA at the time of **[**27]** his testimony before Administrative Law Judge Buchanan in January of 1973.

Kane's application for membership in AFTRA is not before the court; however, the AFTRA Articles of Agreement and Constitution are before the Court (Defendants Answers Exh. 3). Article V of the AFTRA Constitution provides that "No person shall become a member of the Association, or of any Local thereof, unless and until . . . " such person executes an application agreeing to abide by the constitution, bylaws, rules, regulations and orders of AFTRA and its locals.

In August of 1971, Kane terminated his relationship with Crosby/Tele-Com. Kane has testified that the reason for this termination was that Crosby/Tele-Com had failed to make accurate and detailed accountings of the moneys due Kane and because Crosby/Tele-Com had obtained only one national advertiser, Vicks, and the relationship with Vicks had terminated the previous June. Kane determined in August 1971 that he was going to syndicate his own show and was going to make his own efforts to sell the show to various markets and to obtain advertisers. He was hindered in this connection, however, because Kane and LK Productions, Inc. did not have sufficient **[**28]** funds to enable its sales personnel to travel. Kane also determined that he was no longer going to market his show on a "barter" basis but was going to demand payment from a television station before furnishing his product.

In August of 1971, LK Productions, Inc. "went into reruns." A television show goes into reruns when it ceases producing shows regularly and begins to show again those shows which have been previously performed and taped. Kane testifies that following the severance of his ties with Crosby/Tele-Com in August 1971, he had a sequence of 18 simultaneous reruns, which caused remaining sponsors to become very concerned. (Kane deposition, p. 54).

Kane's strained financial circumstances and the nature of his conversations with AFTRA Dallas Local representatives during the summer of 1971 is further illustrated by Sharon Mayhew's letter of August 9, **[*261]** 1971 to David Tytherleigh of the Los Angeles Local. Sharon Mayhew was a representative of the Dallas Local. Mayhew's letter of August 9 reports that Kane had told Kunsak (another representative of the Dallas local) that Crosby/Tele-Com had advanced Kane $ 10,000 and was dunning him for repayment and that Kane's principal **[**29]** objection to paying scale was that he simply had no money. Mayhew reported to Tytherleigh that:

> The gist of the matter, however, is that Kane has no money to pay performers because TCP has not paid him; that TCP is dunning him for repayment of an "advance"; that performers have all agreed to do the show strictly for the promotion aspect.

(TCP is Tele-Com Productions, herein called Crosby/Tele-Com). (See Exh. 13 to Defendants Answers).

Tytherleigh's letter to Mayhew of August 12, 1971 (Exh. 13 to Defendants Answers) reveals that Tytherleigh was not impressed with Kane's financial difficulties and that he insisted that so long as Kane continued to produce shows, he should be a required signatory to the AFTRA network TV code.

During August, October and November of 1971, the Larry Kane Show was still being seen in a number of states, although Kane was not being adequately compensated because of the failure of Crosby/Tele-Com to obtain sponsors. Both AFTRA and the Los Angeles Local continued to encourage the Dallas-Fort Worth Local to take more vigorous action toward obtaining what they regarded as compliance from Kane. The record (Eleanor Glass affidavit Exh. II) contains a letter **[**30]** from Mr. Tytherleigh of the Los Angeles Local to the Dallas-Fort Worth Local, stating:

> Thank you for your letter of August 9, 1971 together with the enclosures thereto.
>
> If Larry Kane made a bad deal with TCP, AFTRA, so far as I know, is in no position to collect his money for him as a producer. Herb Neuer, being in Chicago where TCP is located, is in a better position to know if there is any lever to be used. In the meanwhile, Kane continues to produce shows and is not a signatory to the AFTRA Network TV Code, which covers syndicated shows such as his. It is my feeling that there is no alternative but to have the Dallas Local Board of Directors request the National Board to declare his company and Larry Kane as

> an individual "unfair,' and for AFTRA to so notify its members thereafter ordering them not to perform services for or on behalf of Larry Kane or LK Productions. When work is performed that is applicable to one of the national codes and when the result of such production is exhibited in other cities, it is not the prerogative of the Local where the production occurs to waive compliance with the applicable Code. At least that is what I have always understood to be **[**31]** the rule.

One possible inference from this letter is that Kane had joined AFTRA in the hope that AFTRA would aid him in his continuing controversy with Crosby/Tele-Com. Another possible inference is that the defendants were attempting to place Kane in a better financial position by assisting him in his controversy with Crosby/Tele-Com.

On October 5, 1971, Tytherleigh of the Los Angeles Local wrote another letter to the Dallas-Fort Worth Local inquiring what action was to be taken with reference to Kane and encouraging the Dallas-Fort Worth Local to take action to declare Kane "unfair." (See Eleanor Glass affidavit Exh. III).

On October 28, 1971, Claude McCue, the Executive Secretary of the Los Angeles Local, directed another letter to the Dallas Local complaining about Kane and the failure of the Dallas Local to take some action with reference to Kane. In response to this letter, a copy of which went to Sanford Wolff, National Executive Secretary, Mr. Wolff responded to the Los Angeles Local, with copies to the Dallas-Fort Worth Local, in a letter containing the following language:

> Dear Claude:
>
> By copy of this letter John Kunsak will know that I agree with your strong **[**32]** recommendations and I hope that the action **[*262]** recommended by you is taken by the Dallas Local Board on November 8th.
>
> I think that out of Johnny's letter comes one thought that should give us significant pause. I believe that we need a strong rule with regard to members working on programs that are non-signatories and concerning which fees are not paid. This afternoon I will discuss such a rule with Morty Becker and hopefully prepare something for presentation at our Board Meeting on November 9th. This will have to be a rule, put on deferred agenda and brought before all three sections of the Board. It will have to be well publicized and promulgated by all locals and I guess that a real campaign for its enforcement will have to be made in New York, Chicago, Los Angeles and Nashville. It will be the kind of rule that the musicians' union has in the past successfully promulgated and enforced even though it has caused that Union a great deal of difficulty. Our members must realize that appearances on tape programs which are then going to be syndicated is doing nothing but eating away the limited number of hours during which live performers are working on television.

[33]**

> I would like to start a campaign immediately after November 16th amongst all locals, members and franchised agents and in any instance in which an agent books one of our people with a non-signatory I am going to ask Morty to take action to revoke the franchise. I am tired of hearing this stuff about pushing records and pushing books and otherwise appearing free so as to promote some individual's career.

It is significant, it seems to the writer, that while it can be demonstrated persuasively that considerable pressure was placed upon the Dallas-Fort Worth Local, the pressure was all from other AFTRA locals, and not from "employer groups." This entire record is devoid of any indication that any "employer group" had any interest whatsoever in eliminating Kane as a competitor.

In December of 1971, AFTRA Dallas Local, finally stirred to action by the continual correspondence from AFTRA and the Los Angeles Local, invited or urged Kane to attend a meeting of the Dallas board. This meeting is documented by detailed minutes which are introduced into this record through the Eleanor Glass affidavit. These minutes, the accuracy of which is not disputed, described the portion of the **[**34]** meeting relating to Kane as follows:

LARRY KANE PRODUCTIONS

> The next guest to appear before the Board was Larry Kane of Larry Kane Productions, Inc. The reason for his appearance was to decide what to do about the pressure from both Coasts to put Mr. Kane on the unfair list for

> not paying scale. Mr. Kane explained the problems that he has had and is still having with the show, mainly due to the failure of Tele-Com to come through with the money as per the contract.
> Mr. Kane is now in the process of withdrawing his show from all current markets. Mr. Kane stated that his main problem was in not knowing the difference in syndication and network shows. He was never asked by any performer on his show for scale. All performers appear to plug something . . . a book, a record, or a movie. Mr. Kane currently has a suit against Tele-Com to get the money owed.
> The markets on which his show is now running are all on a barter basis, set up by Tele-Com. He has no money coming in from the show, and has received no money before now.
>
> His plans are to re-call all the shows and then offer them to paying markets only. All shows currently running on a barter basis will be **[**35]** off the air by January 1. After then, only the stations who will pay for the show will receive it. Mr. Kane currently has enough shows taped to last until January 1. His show is on once a week.
>
> Larry asked the Board to help him work out an arrangement whereby he could stay on the air, because he would be able **[*263]** to pay the performers after his show goes on a paying basis.
> A discussion was held on regional rates, etc. Mr. Kane was asked if he would be willing to sign a regional Letter of Adherence. He said that he would, and he would know within a month what the future of this show will be . . . whether to go ahead with it or just forget it. The Board decided to set a temporary regional rate that Mr. Kane can live with for 30 days until he can see what the future is.
> A motion was made that the Larry Kane Productions, Inc. will pay single performance $ 50.00 per performance per show; $ 100.00 for a group per show, one performance, effective January 1, 1972, for a period of 30 days, subject to ratification by National AFTRA. This approval of the Dallas/Fort Worth AFTRA Local. Motion carried unanimously.
>
> Said motion was acceptable to Mr. Kane. **[**36]** Also, it was agreed that an additional 6 1/2 % Of that fee will be paid for each performer to the AFTRA Pension and Welfare Fund.
> Mr. Kane stated that there was a chance he would have at least one major market Philadelphia and it is understood that the above rates are only for this five state region. A new agreement will be negotiated with Mr. Kane and Larry Kane Productions, Inc. every thirty days to re-evaluate the situation. The agreement from January 1 to February 1 will be negotiated on January 15, 1972.

Kane testifies that the agreement documented by the minutes of the meeting of December 13, 1971 was acceptable to him at that time. (Kane testimony before NLRB, pp. 287-8). Shortly thereafter he received a telephone call from Kunsak, the representative of the Dallas Local, who advised him that AFTRA had agreed to the plan set forth in the minutes of the meeting of December 13, 1971.

It is significant, in light of Pennington, infra, that defendant unions did not rigidly insist upon Kane paying exactly the same wages paid by other similar producers. According to the undisputed evidence, the defendants and Kane worked out an arrangement which was then acceptable to **[**37]** Kane.

One of the key facts in this pattern is that (according to the undisputed evidence) Kane later simply decided that he would not or could not comply with the agreement that he had made with the AFTRA Dallas-Fort Worth Local in December 1971. At some undetermined time between December 1971 and March 1972, Kane again discussed the situation with Kunsak, the representative of the Dallas Local, and told Kunsak that since Kane was not producing shows, it would be superfluous to discuss additional agreements or to discuss performance of the agreement made at the December 1971 meeting.

In March of 1972, events occurred which, according to Kane's view of the facts, dramatically improved Kane's prospects for creating a successful enterprise. It is undisputed that the period from the time of Kane's severance of relations with Crosby/Tele-Com until March 1972 had been a very discouraging period. Kane, apparently because of financial pressures, had stopped production of shows and was selling only reruns. Two of his sponsors who had been faithful to him over the years were disturbed by the reruns and either dropped their sponsorship or were on the verge of doing so. Kane had taken the position **[**38]** with the Dallas Local, through Mr. Kunsak, at some time between December 13, 1971 and March 2, 1972, that because of the fact that he was not producing, he could not pay even the $ 50 per performance per artist which he had agreed with the Dallas Local to pay.

In March 1972, Kane made a new agreement with Channel 2, another local television station. According to his arrangement with Channel 2, Kane was allowed to use Channel 2's production facilities. Channel 2 made no charge to Kane and LK Productions, Inc. for the use of its production facilities, but entered an agreement with Kane that Channel 2 would enjoy 10% Of LK Productions' gross revenues in return for the use of its production facilities.

[*264] In March of 1972, Kane again talked with Kunsak and advised that he was prepared to resume production of the show on March 25, 1972 and offered to pay Pension & Welfare Fund contributions. Kunsak informed Kane that paying the pension fund contributions would not be satisfactory but that he, Kunsak, would still like to work out a satisfactory overall agreement (NLRB transcript, p. 288-289). It seems to the undersigned to be established conclusively, and as a matter of law, **[**39]** that Kane was withdrawing from and refusing to perform the agreement he had previously made in December of 1971.

Kane's situation in March of 1972, and his position with reference to the agreement which he had previously made in December 1971, is set forth graphically and without substantial dispute, in Kane's letter to Kunsak of March 6, 1972, copied verbatim:

> As we agreed, I am apprising you that we plan to resume production of the Kane Show on March 25, 1972 under a special arrangement with KPRC-TV wherein our production costs are reduced substantially. If such arrangement were not available to us, there would be no way we could begin producing the show at this time.
>
> I have attached a copy of our current market list, which vividly reflects the type of bleak position in which we presently exist. The only positive steps accomplished have been reduction of production expense, dropping non-revenue producing stations, and launching an all-out attempt to try earning our way out of debt. Operating efficiently and taking a hard line on overhead, we can work out of this. All the assistance that you can offer will make a vast difference in our success or failure. It is perfectly **[**40]** obvious that, with the attached market list, we are in business by the skin of our teeth and in no position to be paying scale to performers. Even the reduced scale appears momentous at this stage. The P & W is realistically all that I feel we can handle; and I ask that you consider our present position and the task that we have undertaken. Naturally, we plan to increase this market list. We must in order to progress. However, this time, if the list increases, so must our revenue and eventually our ability to pay performers. Until such time as our revenues are meaningful, we are strictly treading water for survival. I assure you that these past few months of consecutive re-runs have done us no good, and we have a tremendous rebuilding process ahead.
>
> Since we have no information or appropriate forms in our files covering the P & W payments for performers, I will appreciate your sending some down with any pertinent information as to the exact procedure we are to follow in filing these. Whatever procedure is to be settled upon, I want to be certain that our office is well aware and equipped to handle it.
>
> Also, please advise me of my present membership status, and requirements **[**41]** for the insurance coverage. Thanks again, John, and I look forward to your reply, and hopefully to your full cooperation as we fight the setbacks and work out of this dilemma. Right down the line, we have been 100% Factual with you, and we obviously need your reciprocal assistance until we are healthier.

Kunsak wrote Sanford Wolff, the National Executive Secretary on March 14, 1972 in effect urging Wolff to accept Kane's proposition. AFTRA National was unable and unwilling to agree to Kane's new proposition, and thus eventually Kane was placed upon the unfair list in July of 1972.

The action of AFTRA and AFTRA Locals in placing Kane on the unfair list obviously did not absolutely prevent Kane from obtaining "top stars." On October 6, 1972, Kunsak wrote Claude McCue, Executive Secretary of the Los Angeles Local, that on August 5, 1972, Mike Murphy, member of the New York Local, Rick Springfield who records for Capitol Records, the Gary Lewis Group, Neil Sedow and Messrs. Boatman, Rosenthrow and Ramsey had all appeared live on the Larry Kane Show.

On various other dates in August and September, according to Kunsak's letter, **[*265]** other AFTRA members appeared on Kane's **[**42]** show. (See Exh. 24-1 to Defendants Answers).

It should be recalled that Kane normally had three performers on each of his shows. The performance of the agreement which he had made in December 1971 would thus cost Kane $ 150 per show plus 6 1/2 % Of that sum for contribution to the AFTRA Pension & Welfare Fund. While there is no direct evidence in the record concerning the cost of producing one show, it is apparent from the testimony concerning the number of personnel required to produce the show and the obvious costs of the production equipment required, that $ 150 per show was a very nominal addition to the total expense of producing a show of this nature.

This court is fully aware of the fact that in deciding a motion for summary judgment, it cannot make decisions concerning disputed facts; however, the undersigned believes that no reasonable juror could ever believe that Kane's ultimate financial failure was caused by the union's demand that he pay something in the range of $ 50 per performance to the "top stars" who appeared on his show. The undersigned is totally persuaded (and persuaded to the point where this court is willing to hold as a matter of law) that Kane's ultimate **[**43]** difficulties with the union in 1972, and his being placed on the unfair list, were the result of his unexplained refusal to perform the agreement he had made in December 1971, and not to any violation of the antitrust laws.

Kane has testified about this set of circumstances twice. He has executed and filed an affidavit setting out matters which he apparently feels are helpful to his cause. In his testimony and his affidavit, Kane does not explain or state that following his March 1972 contact with Kunsak he ever attempted again to work out any form of accommodation with the union except for the letter of March 6, 1972 which is an obvious repudiation of the agreement made in December 1971. His conduct is consistent with his testimony upon his disposition in which he testified that his basic plan and intent throughout was to avoid making any payments to the "top stars" because he did not feel that any payments were justified. (See Kane deposition, p. 65-66).

Kane contends that his ultimate lack of success in his arrangement with Channel 2 was caused by the union activities; however, Kane was able to operate during March, April, May, June and July, of 1972 with no union interference **[**44]** whatever because the union did not actually place him on its "unfair list" until July 21, 1972.

There is no evidence in the record as to how many shows were actually produced after March 28, 1972 or concerning Kane's success or lack of success in marketing those shows or the advertising spots on such shows.

On September 11, 1972 the Board of Directors of the Dallas-Fort Worth Local met and their minutes (See Exh. 14(a)-2 of Defendants Answers) contained the following notation:

> Johnny K. informed the Board that as per communication from Morty Becker, attorney for AFTRA, the following action should be taken and that he had followed the instructions. Larry Kane was notified by "registered letter' of his rights to appear on his own behalf (sic) represented by counsel to explain his actions in appearing on the Larry Kane Show following notification that the show had been placed on the "unfair' list by the National Board. Mr. Kane did not appear at this time nor did he appear later in the evening, but Carter Smith reported that he had personally observed an audio-tape (sic) recorded by Mr. Kane's appearance on at least three shows since the National Board action. Action on the matter **[**45]** was delayed to give Mr. Kane sufficient time to appear at the meeting and the business of the Board moved to another item on the agenda.

This entire history of this matter would justify an inference that after Kane made his agreement with the AFTRA representative in December 1971, he thereafter simply decided to ignore his agreement and his commitments as an AFTRA member.

[*266] The minutes of the meeting of September 11, 1972 also reflect some details concerning AFTRA Dallas Local's efforts to organize in the Houston area. These efforts were apparently meeting with only limited, if any success. After a discussion of the organizing activities in the Houston area, the minutes contain the following notation:

> Carter then mentioned that at this time Larry Kane had still not arrived to appear before the Board and that appropriate action needed to be taken. Johnny Kunsak said that we must inform Kane that he is being

> suspended and is being fined for each performance on his show since August 5. At the last meeting Annabelle Weenick had moved that he be fined the rate for his type of show $ 185 per show. Such fine will continue to accrue for all future appearances.

In 1972, **[**46]** Kane, as the charging party, filed two complaints with the National Labor Relations Board. These complaints proceeded to hearing before the Honorable Lloyd Buchanan, Administrative Law Judge on January 8 and 9, 1972.

On November 7, 1972 AFTRA Los Angeles Local gave notice to all entities who had previously been notified that Kane was on the unfair list, that AFTRA would not do anything to interfere with the employment of any AFTRA artist on the Larry Kane Show during the pendency of NLRB Cases Nos. 23-CC-463 and 23-CC-467.

In October of 1973, Judge Buchanan rendered his decision, finding that the "top stars" were independent contractors, and for that reason AFTRA and the AFTRA locals had committed an unfair labor practice. Thereafter the National Labor Relations Board obtained an injunction, to which the AFTRA entities agreed, prohibiting the retention of Kane and his companies upon the "unfair list." This injunction was entered in October of 1973.

In the spring and summer of 1972, Kane formed a joint enterprise with Leroy Golger, and they together produced a number of taped shows which they attempted to market. Their efforts to market these shows was not successful, and Kane contends **[**47]** that the lingering effects of his "unfair" listing was responsible for his inability to market these shows.

The earlier "unfair" listing did not inhibit Kane's efforts to obtain performers for the Golger shows, and it is thus difficult to perceive how an "unfair listing" which had been removed and which the defendants had been enjoined from enforcing, would have had any inhibiting effect upon the sale of these programs; nevertheless, it is conceivable that this would be a fact issue which this court cannot decide.

As this court views the facts, however, the entire Golger enterprise is essentially immaterial. The Golger enterprise occurred long after the conduct which is complained of in this case. If the union's conduct did not fall within the ambit of the ***antitrust law***, then later damages stemming from that conduct may provide the plaintiff some basis for damages under the labor laws, but cannot provide the basis for treble damages under the antitrust laws.

II.

ANALYSIS OF CONTROLLING AUTHORITIES

This case is controlled by the following authorities: *Apex Hosiery Co. v. Leader, 310 U.S. 469, 60 S. Ct. 982, 84 L. Ed. 1311 (1940)*; *Milk Wagon Drivers' Union v. Lake Valley Farm Products, **[**48]** 311 U.S. 91, 61 S. Ct. 122, 85 L. Ed. 63 (1940)*; *United States v. Hutcheson, 312 U.S. 219, 61 S. Ct. 463, 85 L. Ed. 788 (1941)*; *Local Union 189 Amalgamated Meat Cutters v. Jewel Tea Co., 381 U.S. 676, 85 S. Ct. 1596, 14 L. Ed. 2d 640 (1965)*; *International Brotherhood of Teamsters v. Oliver, 358 U.S. 283, 79 S. Ct. 297, 3 L. Ed. 2d 312 (1959)*; *American Federation of Musicians v. Carroll, 391 U.S. 99, 88 S. Ct. 1562, 20 L. Ed. 2d 460 (1968)*; *Hunt v. Crumboch, 325 U.S. 821, 65 S. Ct. 1545, 89 L. Ed. 1954 (1945)*; *California Dump Truck Owners Assn. v. Associated General Contractors of America, 562 F.2d 607 (9th Cir. 1977)*; Dissents by Justice Brandeis in *Duplex Printing Co. v. Deering, 254 U.S. 443, 41 S. Ct. 172, 65 L. Ed. 349 (1924)*; *Bedford Cut **[*267]** Stone Co. v. Journeymen Stone Cutters' Assn., 274 U.S. 37, 47 S. Ct. 522, 71 L. Ed. 916 (1927)*.

Apex Hosiery v. Leader, supra, was an effort to recover treble damages from a union and its officers for damages incurred during a violent sitdown strike at the Apex Hosiery factory. The facts bear no resemblance to the case at bar, but Apex teaches the following relevant lessons:

> 1. ***HN1***[] The mere fact that union conduct may violate established **[**49]** law (in that case state laws against trespass and willful destruction of property) does not justify a conclusion that the union conduct violated the antitrust laws;

2. ***HN2***[] The Sherman Act is not applicable unless the facts present ". . . some form of restraint upon commercial competition in the marketing of goods or services . . ." *310 U.S. at 495, 60 S. Ct. at 993*.

3. In analyzing all of the pre-1940 cases involving the conflict between the antitrust laws and those Congressional enactments to labor policy, Justice Stone said at *310 U.S. 469, at 500, 60 S. Ct. 982 at 996, 84 L. Ed. 1311* :

> In the cases considered by this Court since the Standard Oil case of 1911 ***HN3***[] some form of restraint of commercial competition has been the sine qua non to the condemnation of contracts, combinations or conspiracies under the Sherman Act, and in general restraints upon competition have been condemned only when their purpose or effect was to raise or fix the market price.

Justice Stone's opinion goes on to point out that the anti-trust laws were not applicable to the conduct involved in Apex because it was plain that the strike did not have as its purpose restraint in competition **[**50]** in the market for Apex's goods.

Similarly in the case at bar, the union's challenged conduct did not prevent Kane from competing in any market, but merely required that if he was to compete, he must pay those sums to the performers which he had agreed to pay in his meeting in December of 1971.

In focusing upon the fact that any successful union activity to some degree acts as a restraint upon competition, Justice Stone said:

> A combination of employees necessarily restrains competition among themselves in the sale of their services to the employer; yet such a combination was not considered an illegal restraint of trade at common law when the Sherman Act was adopted, either because it was not thought to be unreasonable or because it was not deemed a "restraint of trade." ***HN4***[] Since the enactment of the declaration in § 6 of the Clayton Act that "the labor of a human being is not a commodity or article of commerce * * * nor shall such (labor) organizations, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade, under the anti-trust laws', it would seem plain that restraints on the sale of the employee's services to the employer, **[**51]** however much they curtail the competition among employees, are not in themselves combinations or conspiracies in restraint of trade or commerce under the Sherman Act.
>
> ***HN5***[] Strikes or agreements to not work, entered into by laborers to compel employers to yield to their demands, may restrict to some extent the power of employers who are parties to the dispute to compete in the market with those not subject to such demands. But under the doctrine applied to non-labor cases, the mere fact of such restrictions on competition does not in itself bring the parties to the agreement within the condemnation of the Sherman Act. . . . Furthermore, successful union activity, as for example consummation of a wage agreement with employers, may have some influence on price competition by eliminating that part of such competition which is based on differences in labor standards. Since, in order to render a labor combination effective it must eliminate the competition from non-union made goods, . . . an elimination of price competition based on differences in labor standards **[*268]** is the objective of any national labor organization. But this effect on competition has not been considered to **[**52]** be the kind of curtailment of price competition prohibited by the Sherman Act.

It is significant that no one in the current case was trying to eliminate Kane as a competitor. Persons like Dick Clark, and the union officials who responded to urgings from him, were attempting to create a situation in which if Kane competed in the markets in which they operated, Kane would be required to make some payment to the "top stars" and make contributions to the AFTRA pension fund. The only competition which this would eliminate, however, would be "price competition based on differences in labor standards . . ." Elimination of price competition based on differences in labor standards does not give rise (according to the language of Apex v. Leader) to a cause of action under the antitrust laws.

Milk Wagon Drivers Union v. Lake Valley Farm Products, supra, (like the case at bar) involved a secondary boycott and was the first Supreme Court case (with the possible exception of the New Negro Alliance (*New Negro Alliance v. Sanitary Grocery Co., 303 U.S. 552, 58 S. Ct. 703, 82 L. Ed. 1012*) case) in which the Supreme Court gave effect to the Norris-LaGuardia Act. Defendant was an AF of L union **[**53]** which had for many years represented Chicago milkmen. Before the advent of the Great Depression the normal method of distributing milk in Chicago was that the various dairies which produced milk would own their own wagons, which they operated through employees, who became members of the defendant Milk Wagon Drivers Union.

During the depression, in response to the economic pressures of that era, a number of dairies attempted to devise means of underselling the established dairies, and for this purpose commenced the sale of their milk to independent contractors, called "vendors" who in turn resold the milk to retail establishments called "cut-rate stores" which then proceeded to undersell conventional dairies. This competition gravely injured the conventional dairies causing them to lay off many of the members of the defendant union.

Defendant union and its members began to picket the "cut-rate stores." The cut-rate stores then sued to enjoin the continued picketing.

Justice Black held that the trial court properly refused to enjoin the picketing because of the provisions of the Norris-LaGuardia Act and because the dispute in question properly involved a "labor dispute" within the **[**54]** meaning of the Norris-LaGuardia Act, 29 U.S.C. § 101-115.

In *Milk Wagon Drivers Union v. Lake Valley Farm Products, supra* and in *United States v. Hutcheson, 312 U.S. 219, 61 S. Ct. 463, 85 L. Ed. 788 (1941)*, Justices Black and Frankfurter explained in detail the history of the Clayton and Norris-LaGuardia Acts. In this connection, Justice Black said:

> The Norris-LaGuardia Act passed in 1932, is the culmination of a bitter political, social and economic controversy extending over half a century. Hostility to "government by injunction' had become the rallying slogan of many and varied groups. Indeed, as early as 1914 Congress had responded to a widespread public demand that the Sherman Act be amended, and had passed the Clayton Act, itself designed to limit the jurisdiction of federal courts to issue injunctions in cases involving labor disputes. But the proponents of the Norris-LaGuardia Act felt that the jurisdictional limitations of the Clayton Act had been largely nullified by judicial decision. Thus, the Senate Judiciary Committee, reporting the Norris-LaGuardia Act, said: "That there have been abuses of judicial power in granting injunctions in labor disputes is hardly open **[**55]** to discussion. The use of the injunction in such disputes has been growing by leaps and bounds. * * * For example approximately 300 were issued in connection with the railway shopmen's strike of 1922, * * * ' And on the same subject, the House Judiciary Committee said: "These are the same character of acts which Congress in § 20 **[*269]** of the Clayton Act of October 15, 1914 (*20 U.S.C.A. § 52*) sought to restrict from the operation of injunctions, but because of the interpretations placed by the courts on this section of the Clayton Act, the restrictions as contained therein have become more or less valueless to labor, and this section is intended by more specific language to overcome the qualifying effects of the decisions of the courts in this respect.' As an example of the judicial interpretation of the Clayton Act which the Committee said was "responsible in part for this agitation for further legislation,' the Committee referred to the cases of *Duplex Printing Press Co. v. Deering, 254 U.S. 443, 41 S. Ct. 172, 65 L. Ed. 349, 16 A.L.R. 196*; *American Steel Foundries v. Tri-City Central Trades Council, 257 U.S. 184, 42 S. Ct. 72, 66 L. Ed. 189, 27 A.L.R. 360* and *Bedford Cut **[**56]** Stone Co. v. Journeymen Stone Cutters' Assn., 274 U.S. 37, 47 S. Ct. 522, 71 L. Ed. 916, 54 A.L.R. 791*. In these cases, the jurisdiction of the courts to grant injunctions had been upheld upon allegations and findings that the Sherman Anti-Trust Act had been violated.
>
> Whether or not one agrees with the committees that the cited cases constituted an unduly restricted interpretation of the Clayton Act, one must agree that the committees and the Congress made abundantly clear their intention that what they regarded as the misinterpretation of the Clayton Act should not be repeated in the

> construction of the Norris-LaGuardia Act. For us to hold, in the face of this legislation, that the federal courts have jurisdiction to grant injunctions in cases growing out of labor disputes, merely because alleged violations of the Sherman Act are involved, would run counter to the plain mandate of the Act and would reverse the declared purpose of Congress.

Milk Wagon Drivers Union v. Lake Valley Farm Products, 311 U.S. at 102, 61 S. Ct. at 127, 128.

It is apparent that the Supreme Court in the Milk Wagon Drivers case did not perceive that the attempted secondary boycott which the union **[**57]** was undertaking in that case violated the antitrust laws. This is true even though the secondary boycott, if successful, would have sheltered the conventional dairies from competition from the "cut-rate" dairies and the "cut-rate" stores.

The first comprehensive effort by the Supreme Court to correlate the Sherman Act, the Clayton Act and the Norris-LaGuardia Act appears in *United States v. Hutcheson, 312 U.S. 219, 61 S. Ct. 463, 85 L. Ed. 788 (1941)*.

The Hutcheson case was one in which the local chapter of the United Brotherhood of Carpenters had clearly breached its agreement with Anheuser-Busch, refused to arbitrate a jurisdictional dispute which it had agreed to arbitrate, and had attempted to mount a secondary boycott against Anheuser-Busch products. Despite this clearly reprehensible conduct, and despite the fact that the union conduct would have been clearly violative of the antitrust laws under the previous cases of *Duplex Printing Press Co. v. Deering, 254 U.S. 443, 41 S. Ct. 172, 65 L. Ed. 349*, and *Bedford Cut Stone Co. v. Journeymen Stone Cutters' Assn., 274 U.S. 37, 47 S. Ct. 522, 71 L. Ed. 916*, Justice Frankfurter, speaking for the majority of the Court, held that Clayton **[**58]** and Norris-LaGuardia Acts precluded the applicability of the antitrust laws to union activities.

The United Brotherhood of Carpenters and the International Association of Machinists both had collective bargaining agreements with Anheuser-Busch, and both had agreements that any jurisdictional disputes would be submitted to arbitration. The machinists were awarded certain work which the carpenters felt was legitimately theirs. The carpenters declined to submit the jurisdictional dispute to arbitration and instead struck Busch, picketed Busch, struck certain construction companies working on Busch premises to build a new brewery, and instituted or attempted to institute a secondary boycott of Busch products among its members and their friends. Justice Frankfurter carefully analyzed the Clayton and Norris-LaGuardia Acts and found that these statutes, by their terms, **[*270]** precluded the courts from holding that the union's activities violated the antitrust laws. The heart of Justice Frankfurter's reasoning, clearly applicable to the present case, appears in the following language:

> In so far as the Clayton Act is concerned, we must therefore dispose of this case as though we had **[**59]** before us precisely the same conduct on the part of the defendants in pressing claims against Anheuser-Busch for increased wages, or shorter hours, or other elements of what are called working conditions. The fact that what was done was done in a competition for jobs against the Machinists rather against, let us say, a company union is a differentiation which Congress has not put into the federal legislation and which therefore we cannot write into it.
>
> It is at once apparent that the acts with which the defendants are charged are the kind of acts protected by § 20 of the Clayton Act. The refusal of the Carpenters to work for Anheuser-Busch or on construction work being done for it and its adjoining tenant, and the peaceful attempt to get members of other unions similarly to refuse to work, are plainly within the free scope accorded to workers by § 20 for "terminating any relation of employment,' or "ceasing to perform any work or labor,' or "recommending, advising, or persuading others by peaceful means so to do.' The picketing of Anheuser-Busch premises with signs to indicate that Anheuser-Busch was unfair to organized labor, a familiar practice in these situations, comes **[**60]** within the language "attending at any place where any such person or persons may lawfully be, for the purpose of peacefully obtaining or communicating information, or from peacefully persuading any person to work or to abstain from working.' Finally, the recommendation to union members and their friends not to buy or use the product of Anheuser-Busch is explicitly covered by "ceasing to patronize . . . any party to such dispute, or from recommending, advising, or persuading others by peaceful and lawful means so to do.'

United States v. Hutcheson, 312 U.S. at 232, 61 S. Ct. at 466-467.

Justice Frankfurter's treatment in the Hutcheson case, of Bedford Cut Stone v. Journeymen Stone Cutters' Assn., supra, and Duplex Printing Press v. Deering, supra, is also extremely significant. Justice Frankfurter points out:

> The underlying aim of the Norris-LaGuardia Act was to restore the broad purpose which Congress thought it had formulated in the Clayton Act but which was frustrated, so Congress believed, by unduly restrictive judicial construction. . . . The Norris-LaGuardia Act was a disapproval of Duplex Printing Press Co. v. Deering, 254 U.S. 443, 41 S. Ct. 172, 65 L. Ed. 349, and **[**61]** Bedford Cut Stone Co. v. Journeymen Stone Cutters' Assn., 274 U.S. 37, 47 S. Ct. 522, 71 L. Ed. 916, as the authoritative interpretation of § 20 of the Clayton Act, for Congress now placed its own meaning upon that section.

United States v. Hutcheson, 312 U.S. at 236, 61 S. Ct. at 468.

Duplex Printing Press Co. v. Deering and Bedford Cut Stone v. Journeymen Stone Cutters were both cases decided after the enactment of the Clayton Act in 1914 but before the enactment of the Norris-LaGuardia Act of 1932. Both involved similar facts. Both arose from situations in which unions which had been unsuccessful in obtaining their objectives by strikes, attempted to impose secondary boycotts upon employers with whom they had long-standing disputes. In both instances, the majority of the Supreme Court interpreted the Clayton Act with extreme narrowness and placed the conduct of the unions within the ambit of the anti-trust laws. In 1932, Congress, stirred by what it perceived as the Supreme Court's refusal to follow what Congress thought it had done in the Clayton Act, clarified the matter in the Norris-LaGuardia Act. Finally, in Milk Wagon Drivers and Hutcheson, the intent of Congress was **[**62]** eventually vindicated. In both Duplex Printing and Bedford Cut Stone, Justice Brandeis prepared eloquent dissents, which **[*271]** now in the light of the Norris-LaGuardia Act and Hutcheson have considerable precedential force and which make it totally clear that the conduct which the plaintiffs here seek to bring within the ambit of the antitrust laws is immunized from the antitrust laws by the congressional will as expressed in the Clayton and Norris-LaGuardia Acts.

None of the subsequent cases in any way dilute the absolute holding of the Supreme Court in Hutcheson and Milk Wagon Drivers that secondary boycott activity by unions, acting alone, does not violate the antitrust laws.

Plaintiffs here seek to avoid the clear thrust of the Hutcheson case by arguing that Dick Clark was in effect an "employer group" and thus the union's action in placing Kane on the unfair list may be regarded as a conspiracy between a union and an "employer group." The undersigned is persuaded that the record, as a matter of law, will not permit such a construction of the facts because:

1. Clark himself is a performer and an AFTRA member and not an "employer group"; and

2. The teaching **[**63]** of American Federation of Labor v. Carroll, supra, precludes such a result.

Defendants' motion for partial summary judgment could be persuasively predicated upon Justice Frankfurter's opinion in Hutcheson and Justice Brandeis' dissents (which history and the Norris-LaGuardia Act have rendered authoritative) in Bedford Cut Stone and Duplex Printing. [1.] More recent cases confirm the conclusion that the motion should be granted.

[1.] See Justice Goldberg's statement in Jewel Tea, supra, and Pennington, supra, that:

Mr. Justice Brandeis' dissent in Duplex has, however, carried the day in the courts of history as evidenced by subsequent congressional action and decisions of this Court. The Norris-LaGuardia Act, 97 Stat. 70, 29 U.S.C. § 101 (1958 ed.), was passed by congress in 1932 expressly to overrule the majority opinion of Duplex and the cases that followed it and to affirm the philosophy of the dissenters in those cases . . .

Hunt v. Crumboch, 325 U.S. 821, 65 S. Ct. 1545, 89 L. Ed. 1954 (1945) (decided **[**64]** contemporaneously with Allen Bradley Co. v. Local Union No. 3, infra) arose from a bitter union-employer dispute between Transportation Workers Local 197 and Hunt Motor Freight. The union struck all truckers and haulers serving A& P's Philadelphia operations for the purpose of enforcing a closed shop. Violence occurred. One of the Hunt partners was indicted for murder of a union official and acquitted. At the end of the successful strike, the union had successfully organized all of the contractor haulers except Hunt. The union refused to negotiate with Hunt. A&P had entered a closed shop agreement whereby all contract haulers were required to operate with union employees. Hunt lost his contract with A&P at the union's instigation and later had a similar experience with another employer who had agreed to a closed shop agreement. The union effectively punished Hunt for his alleged murder of a union official by driving him out of business.

The majority, in an opinion by Justice Black, refused to apply the antitrust laws to the union activity because:

1. The union had acted alone and not in combination with employer groups. This fact distinguished Allen Bradley.

2. A refusal **[**65]** by a union group to sell the labor of its members is not a violation of the Sherman Act. Reliance was placed on *Apex Hosiery, supra* and *Hutcheson, supra.*

The heart of the majority reasoning is expressed in the following language:

> The controversy in the instant case, between a union and an employer, involves nothing more than a dispute over employment, and the withholding of labor services. It cannot therefore be said to violate the Sherman Act, as amended. The act does not purport to afford remedies for all torts committed by or against persons engaged in interstate commerce.

Hunt v. Crumboch, 325 U.S. at 826, 65 S. Ct. at 1548.

[*272] *Amalgamated Meat Cutters v. Jewel Tea Co., supra*, like the case at bar, involved union efforts to persuade its members to refrain from working for a certain employer. In the case at bar, had the union efforts been successful, Kane could have competed in the Los Angeles and New York markets only by paying his "top stars" the compensation he had agreed to pay in the December 1971 meeting. In Jewel Tea, Jewel was, by the union's action, effectively prohibited from competing by selling meat in Chicago in the evening hours. Jewel was understandably **[**66]** disturbed because it had equipped 174 of its 196 stores to vend meat in pre-packaged, self-service systems which Jewel contended did not require a butcher's services. These restrictions upon uninhibited competition in Jewel Tea were permissible under the antitrust laws primarily because the restrictions were, in Justice White's language ". . . intimately related to wages, hours and working conditions."

Jewel Tea's controversy with the union arose from Jewel's desire to compete by selling meat after 6:00 p.m., and the meat cutters' desire to spend their evenings at home. The collective bargaining agreement between the Meat Cutters' Union (representing almost all Chicago butchers) and the Associated Food Retailers of Greater Chicago, a trade association of 1,000 merchants accepted a collective bargaining agreement providing that fresh meat would not be sold before 9:00 a.m. or after 6:00 p.m. in either service or self-service markets. During the 1957 contract negotiations Jewel contended that butchers were not necessary in self-service meat sections and sought a relaxation of the previously existing rule. Jewel's demand was ultimately rejected and the new collective bargaining agreement **[**67]** continued the previous restriction. Jewel, under threat of strike, finally accepted the contract but then brought suit alleging that the marketing hours restriction violated the Sherman Act and that the union and its officers had conspired with the employers who were willing to abide by the marketing hours restrictions. As evidence of the conspiracy, Jewel relied upon:

1. The acceptance by Associated Food Retailers of the market-hours restriction;
2. Union's strike threat against Jewel to compel acceptance of the restriction;
3. Refusal of the union to permit its members to work after 9:00 p.m. or before 9:00 a.m.;
4. Refusal by the union to permit any grocery firm to sell meat after 6:00 p.m. or before 9:00 a.m. even in self-service facilities;

5. An agreement by the members of Associated Food Retailers to insist upon the marketing hours restriction in all collective bargaining agreements between the unions and any store operator;

6. Associated Food Retailers' agreement with other employer groups that no firm would sell meat after 6:00 p.m. or before 9:00 a.m. and the action of the union and its officers in enforcing compliance with **[**68]** that agreement.

The Supreme Court opinion by Justice White held that the challenged agreement was exempt from Sherman Act attack because:

1. The trial court had properly found, As a matter of law, that there was no evidence of a union-employer conspiracy. This finding was obviously predicated upon the reasoning that negotiations upon a mandatory subject of bargaining and a subsequent collective bargaining agreement would not constitute a conspiracy. In this connection, Justice White said: ". . . We therefore have a situation where the unions, having obtained a marketing-hours agreement from one group of employers, have successfully sought the same terms from a single employer, Jewel, not as a result of a bargain between the unions and some employers directed against other employers, but pursuant to what the unions deemed to be in their own labor union interests." *85 S. Ct. at 1601*.

[*273] 2. The union's demands were "intimately related" to hours and conditions of employment.

In 1942 Justice Frankfurter in Hutcheson attempted to render consistent all of the then existing labor laws and the Sherman Act. Justice Goldberg persuasively and skillfully repeated **[**69]** this task in his Jewel Tea (concurring) opinion (*381 U.S. 676, 85 S. Ct. 1596, 14 L. Ed. 2d 640*), which also served as his dissent in *United Mine Workers of America v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626*. Justice Goldberg's comprehensive, eloquent opinion, and the judicial and legislative history teach that courts should be most reluctant to engage in ". . . intervention via the antitrust route in legitimate collective bargaining." *381 U.S. at 697, 85 S. Ct. at 1608*. Justice Goldberg said:

Stripped of all the pejorative adjectives and reduced to their essential facts, both Pennington and Jewel Tea represent refusals by judges to give full effect to congressional action designed to prohibit judicial intervention via the antitrust route in legitimate collective bargaining. The history of these cases furnishes fresh evidence of the observation that in this area, necessarily involving a determination of "what public policy in regard to the industrial struggle demands,' *Duplex Printing Press Co. v. Deering, 254 U.S. 443, 479, 485, 41 S. Ct. 172, 183, 65 L. Ed. 349* (dissenting opinion of Mr. Justice Brandeis), "courts have neither the aptitude nor the criteria **[**70]** for reaching sound decisions.' Cox, Labor and the Antitrust Laws A Preliminary Analysis, 104 U.Pa.L.Rev. 252, 269-70 (1955); see Winter, Collective Bargaining and Competition: The Application of Antitrust Standards to Union Activities, 73 Yale L.J. 14 (1963).

Amalgamated Meat Cutters v. Jewel Tea Co., 381 U.S. 676, 85 S. Ct. 1596, 14 L. Ed. 2d 640 .

III.

AUTHORITIES ARGUABLY APPLICABLE BUT NOT CONTROLLING

Allen Bradley Co. v. Local Union No. 3, 325 U.S. 797, 65 S. Ct. 1533, 89 L. Ed. 1939 (1945) and *United States v. Brims, 272 U.S. 549, 47 S. Ct. 169, 71 L. Ed. 403* were cases in which the union had participated in employer conspiracies to fix prices or allocate markets. The consistent holding has been that unions have no exemption or immunity from antitrust liability when the union participates in and becomes a party to a conspiracy of businessmen, even though such participation may result in higher wages and better working conditions.

The evidence in the case at bar establishes lack of "employer group" participation in the defendant's conduct because:

1. Dick Clark, applying the analysis of *American Federation v. Carroll, supra*, was not an "employer group."

2. **[**71]** Even if it were assumed (and there is a complete lack of evidence to support such an assumption) that "employer groups" had complained to the defendants about Kane and that the union responded, no fact issue concerning a "conspiracy" would be created. The defendant unions did nothing to "drive" Kane out of business but on the contrary attempted to and did reach an agreement with him in December 1971 which would enable him to get his business feet on the ground by paying temporarily a wage less than "union scale." Certainly any producer of a "Kane type" show who was required by the union to pay scale to performers who could have been induced to work without monetary compensation might legitimately feel discriminated against if the union made no efforts to obtain similar commitments from Kane. A producer's action in expressing dissatisfaction and the union's response to such a rational complaint could not, in the undersigned's view, provide the basis for a finding of an illegal employer-union conspiracy to violate the antitrust laws.

Connell Construction Co. v. Plumbers and Steamfitters Local No. 100, 421 U.S. 616, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975) is distinguishable from the **[**72]** case at bar.

[*274] A key element in Connell was that the union did not seek to represent and did not represent Connell's employees. In the case at bar, most of the "top stars" were AFTRA members.

The union strategy in Connell could have, if successful, given the union the power to exclude subcontractors from the Dallas area. The defendants' activities here could not have excluded Kane from any area because the union attempted to work out a financial arrangement with which Kane could live. In addition, the pertinent documents obligated the union defendants to admit performers to membership, virtually immediately and upon demand.

Local No. 10 in Connell had negotiated with the Mechanical Contractors Association a contract containing a "most favored nation" clause, providing that if the union granted more favorable contract terms to any other employee, it would extend the same terms to all members of the association. This inhibited the union's ability to negotiate with individual subcontractors. The defendants here were not similarly inhibited, had committed themselves to no "most favored nations" clause and did in fact negotiate individually with Kane, working out an agreement **[**73]** satisfactory to him in December 1971.

Local No. 10's conduct was improper because it gave the union the power to exclude from the Dallas market a subcontractor whose employees enjoyed wages and working conditions equal to or superior to those of union members but who were able to bid competitively because of greater efficiency. AFTRA and AFTRA locals neither possessed nor sought power of that nature in the case at bar.

The union in Connell sought the agreement with the general contractor ". . . solely as a way of pressuring mechanical subcontractors in the Dallas area to recognize it as the representative of their employees." *421 U.S. at 632, 95 S. Ct. at 1839*. In the case at bar, AFTRA directly represented most of the "top stars" and sought only an agreement to pay their normal scale and make contributions to AFTRA's pension fund.

The majority opinion (*421 U.S. at 616, 95 S. Ct. 1830, 44 L. Ed. 2d 418*) condemned the union's conduct on the ground that the union strategy, if approved, would give the union ". . . an almost unlimited organizational weapon." No similar statement can be made concerning the defendants' activities in the present case. The defendants here already represented **[**74]** most of the "top stars" and Kane himself. From one point of view, defendants here were merely seeking to enforce an agreement Kane made in the December 1971 meeting.

A key factor in Connell was that the challenged agreement was "outside the context of a collective-bargaining relationship." *421 U.S. at 636, 95 S. Ct. at 1841*. The defendants here were endeavoring to enforce Kane's agreement in December to place himself within the bounds of a collective bargaining relationship.

CONCLUSION

For the reasons stated herein, defendants' motion for partial summary judgment is GRANTED, and plaintiffs' case, insofar as it purports to assert a cause of action predicated on the antitrust laws, is DISMISSED. Plaintiffs' case predicated upon alleged violations of the National Labor Relations Act, the Taft-Hartley Act and the other labor statutes will remain pending.

Civil Procedure > ... > Justiciability > Exhaustion of Remedies > General Overview

Civil Procedure > ... > Justiciability > Exhaustion of Remedies > Failure to Exhaust

HN1[] **Reviewability, Exhaustion of Remedies**

The failure to exhaust administrative remedies precludes judicial relief, but in a particular case other factors may outweigh the preference for a preliminary agency determination. The propriety of judicial intervention is tested under a three part standard which requires the court to weight: (1) The extent of injury from pursuing an administrative remedy, (2) the degree of doubt about agency jurisdiction, and (3) the involvement of agency expertise in the question of jurisdiction.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Civil Procedure > ... > Justiciability > Exhaustion of Remedies > General Overview

HN3[] Reviewability, Exhaustion of Remedies

Only a clear showing of irreparable injury from anticipated agency action excuses the exhaustion of administrative remedies and permits judicial intervention in the agency process.

Administrative Law > Judicial Review > Reviewability > Exhaustion of Remedies

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

HN4[] Reviewability, Exhaustion of Remedies

Litigation expenses which are normal incidents of participation in the agency process do not constitute irreparable injury. Nor does asserted waste of government resources by the Federal Trade Commission (FTC) in allegedly frivolous litigation amount to irreparable injury when determining the propriety of judicial intervention. Obviously, Congress has empowered the FTC to decide which actions are worthy of its attention.

Administrative Law > Judicial Review > Reviewability > Exhaustion of Remedies

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > General Overview

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Constitutional Controls > General Overview

HN5[] Reviewability, Exhaustion of Remedies

In certain circumstances the assertion of a constitutional right may be, by itself, enough to give a district court jurisdiction to hear an attack on an interlocutory order. The rationale underlying this exception is that resolving a claim founded solely upon a constitutional right is singularly suited to a judicial forum and clearly inappropriate to an administrative board. This limited exception is not intended, however, to provide an automatic escape route from the exhaustion requirement. The fact that the attack is voiced in conclusory language of a denial of due process and like constitutional rights does not warrant stopping an administrative agency in its tracks.

Administrative Law > Judicial Review > Reviewability > Exhaustion of Remedies

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Evidence > ... > Testimony > Judicial Intervention in Trials > General Overview

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Legislative Controls > General Overview

HN6[] **Reviewability, Exhaustion of Remedies**

The judicially-created exhaustion requirement is intended to facilitate the development of a full factual record, to encourage the exercise of administrative expertise and discretion, and to promote judicial and administrative efficiency. Doubts about an agency's subject matter jurisdiction in a proceeding are only one factor in a district court's decision whether or not to interrupt an agency adjudication.

Antitrust & Trade Law > Public Enforcement > US Federal Trade Commission Actions > Judicial Review

Constitutional Law > ... > Freedom of Speech > Commercial Speech > General Overview

HN7[] **US Federal Trade Commission Actions, Judicial Review**

The Federal Trade Commission's final decision is subject to review by the court of appeals. *15 U.S.C.S. § 45(c)*.

Administrative Law > Judicial Review > Reviewability > Exhaustion of Remedies

Civil Procedure > Parties > Intervention > General Overview

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

HN8[] **Reviewability, Exhaustion of Remedies**

An unambiguous statutory or constitutional right justifies the extraordinary remedy of judicial intervention in an agency proceeding.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Antitrust & Trade Law > Clayton Act > Jurisdiction

Civil Procedure > Appeals > Appellate Jurisdiction > General Overview

Administrative Law > Judicial Review > Reviewability > Questions of Law

Administrative Law > Separation of Powers > Jurisdiction

HN9[] **Reviewability, Jurisdiction & Venue**

In the absence of a "clear jurisdictional defect," an agency should have the opportunity to make the initial determination of its own jurisdiction, subject to appellate court review.

Antitrust & Trade Law > Clayton Act > General Overview

HN10[] **Antitrust & Trade Law, Clayton Act**

Most courts and authorities that have addressed the question have concluded that newspaper advertising is not a "commodity" under *§ 2(a)* of the Clayton Act. It cannot be said, however, that the jurisdictional question is free from doubt, or that the Federal Trade Commission's jurisdictional conclusion is frivolous.

Administrative Law > Judicial Review > Standards of Review > Deference to Agency Statutory Interpretation

Civil Procedure > ... > Justiciability > Exhaustion of Remedies > General Overview

Administrative Law > Judicial Review > Reviewability > General Overview

Administrative Law > Judicial Review > Reviewability > Exhaustion of Remedies

Administrative Law > Judicial Review > Reviewability > Reviewable Agency Action

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Judicial Review > Reviewability > Questions of Law

HN11[] **Standards of Review, Deference to Agency Statutory Interpretation**

Some courts have distinguished between legal and factual questions in assessing the importance of administrative expertise. But the requirement of exhaustion of remedies often applies as well to questions of law as to questions of fact. Courts should accord deference to an agency's own construction of its authorizing statute when reviewing final agency action.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > Federal Trade Commission Act

Banking Law > Federal Acts > Federal Trade Commission Act > Unfair Competition & Practices

Antitrust & Trade Law > Federal Trade Commission Act > General Overview

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Investigations > General Overview

Antitrust & Trade Law > ... > US Federal Trade Commission Actions > Remedial Powers > General Overview

HN12[] **Trade Practices & Unfair Competition, Federal Trade Commission Act**

Section 5 of the Federal Trade Commission Act empowers the Federal Trade Commission to initiate proceedings to prevent unfair methods of competition in or affecting commerce and unfair or deceptive acts or practices in or affecting commerce. *15 U.S.C.S. § 45*.

Administrative Law > Agency Rulemaking > Rule Application & Interpretation > General Overview

Antitrust & Trade Law > Public Enforcement > US Federal Trade Commission Actions > General Overview

HN13[] **Agency Rulemaking, Rule Application & Interpretation**

The Federal Trade Commission's power to act to prevent unfair methods of competition and unfair or deceptive acts or practices includes the power to define and proscribe an unfair competitive practice, even though the practice does not infringe either the letter or spirit of the antitrust laws.

Opinion by: [*1] WATERS

Opinion

Memorandum of Decision

Background

WATERS, D. J.: In this suit, plaintiff Times Mirror Company, publisher of The Los Angeles Times, seeks injunctive and declaratory relief from an adjudicative proceeding initiated by the Federal Trade Commission. The FTC issued its twocount complaint, Commission Docket No. 9103, on July 27, 1977. Count I charges that Times Mirror's practice of offering cumulative annual volume discounts to purchasers of retail display advertising space in the Los Angeles Times violates Section 5 of the Federal Trade Commission Act (*15 U.S.C. § 45*). Count II of the complaint charges that the practice violates *Section 2(a)* of the Clayton Act as amended by the Robinson-Patman Act (*15 U.S.C. § 13(a)*).

On November 4, 1977, Times Mirror filed a motion to dismiss Count II of the complaint on the ground that newspaper advertising space is not a "commodity" within the meaning of *Section 2(a)*. The motion was granted by the administrative law judge who certified his order for interlocutory appeal to the Commission pursuant to *Section 3.23(b)* of the Commission's Rules of Practice (*16 C.F.R. § 3.23(b)*). The Commission granted review and on July 27, **[*2]** 1978, issued an order reinstating Count II of the complaint.

On September 1, 1978, Times Mirror filed this action to enjoin the Commission from pursuing any future proceedings under either count of its complaint in Docket No. 9103. The plaintiff contends that the FTC lacks subject matter jurisdiction over the proceeding under either Section 5 of the Federal Trade Commission Act or *Section 2(a)* of the Clayton Act. Moreover, Times Mirror asserts that it will suffer irreparable injury if it is forced to pursue an administrative remedy. The case is now before this court on Times Mirror's motions for a preliminary injunction and summary judgment, and the FTC's motion to dismiss.

Merits

It is clear that no final FTC decision has been rendered on the issues and proceedings involved in Docket No. 9103. Consequently, the plaintiff has not exhausted its administrative remedies and the FTC argues that judicial intervention is premature. It is certainly the general rule that HN1[] failure to exhaust administrative remedies precludes judicial relief, but in a particular case other factors may outweigh the preference for a preliminary agency determination. *Casey v. FTC 578 F. 2d 793 (9th* ***[*3]*** *Cir. 1978)*; *California ex rel. Christensen v. FTC 549 F. 2d 1321 (9th Cir. 1977)*, cert. denied, *434 U.S. 876, 98 S. Ct. 227, 54 L. Ed. 2d 156 (1977)*. The propriety of judicial intervention is tested under the three part standard adopted in *Lone Star Cement Corp. v. FTC, 339 F. 2d 505 (9th Cir. 1964)*, which requires the court to weight: (1) The extent of injury from pursuing an administrative remedy, (2) the degree of doubt about agency jurisdiction, and (3) the involvement of agency expertise in the question of jurisdiction. The two counts of the complaint in Docket No. 9103 will be tested against this standard in reverse order.

Count II

In Count II of the complaint, the FTC alleges that Times Mirror's practice of offering cumulative annual volume discounts to purchasers of retail display advertising space violates ***HN2***[] *Section 2(a)* of the Clayton Act, which prohibits discrimination in price "between purchasers of commodities of like grade and quality" where the effect is substantially to lessen competition or a tendency to create a monopoly. *15 U.S.C. § 13(a)*. Times Mirror filed its motion to dismiss this count for lack of subject matter jurisdiction on November 4, 1977, arguing **[*4]** that newspaper advertising does not fall within the scope of the term "commodities" under the Clayton Act.

The administrative law judge agreed, holding that *Section 2(a)* covers only tangibles. Of newspaper advertising space, he stated: "But here the respondent sells the service of taking the advertiser's message into a million homes, with its own circulation list and its own means of distribution. That the message is carried on a tangible piece of paper does not make the delivery of the message any less a service."

The Commission disagreed. It found that the Clayton Act was clearly intended to apply to tangibles and not to apply to intangibles, but that newspaper advertising space falls somewhere in between. Analyzing the problem in terms of the policies underlying the Clayton Act, the Commission concluded that newspaper advertising space "is sufficiently fungible in nature to be susceptible to the kind of non-discriminatory pricing which the legislative scheme seeks to encourage" and that "there is nothing inherent in the sale of newspaper advertising space that requires particularized skills or treatment for different customers." As a result, the Commission refused to follow **[*5]** two recent district court decisions, *National Tire Wholesale, Inc. v. Washington Post Co., 441 F. Supp. 81 (D.D.C. 1977)*, and *National Auto Brokers Corp. v. General Motors Corp., 1974-2 TRADE CASES P97,856*, (S.D.N.Y. 1974), in which it has been held that newspaper advertising space is not a commodity under the Clayton Act. Times Mirror argues that Lone Star justifies its suit for relief from the effect of the Commission's decision on Count II.

I. Extent of Injury

It is well established that ***HN3***[] only a clear showing of irreparable injury from anticipated agency action will excuse the exhaustion of administrative remedies and permit judicial intervention in the agency process. *Christensen, supra*; *Renegotiation Board v. Bannercroft Clothing Co., 415 U.S. 1, 94 S. Ct. 1028, 39 L. Ed. 2d 123 (1974)*.

Times Mirror alleges that it will suffer five separate types of harm if it is forced to pursue this action through the administrative system: (1) the expense and inconvenience of further litigation before the Commission, (2) waste of government resources which will hurt Times Mirror as a member of the taxpaying public, (3) the possibility of private treble damage suits pending ultimate **[*6]** judicial review, (4) violation of Times Mirror's due process rights, and (5) a chilling effect upon the flow of news, editorial and commercial information to the public.***HN4***[]

Litigation expenses which are normal incidents of participation in the agency process do not constitute irreparable injury. *Myers v. Bethlehem Shipbuilding Corp., 303 U.S. 41, 58 S. Ct. 459, 82 L. Ed. 638 (1938)*; *Christensen, supra*. Nor does asserted waste of government resources by the FTC in allegedly frivolous litigation amount to irreparable injury under the Lone Star test. "Obviously, Congress has empowered the FTC to decide which actions are worthy of its attention." *Christensen, supra, at 1323 n. 2*.

The plaintiff next argues that if the FTC proceeding is allowed to result in a cease and desist order, Times Mirror might have to defend a multitude of private treble damage suits pending reversal of an adverse decision. The same argument was rejected in *Casey, supra*: "If the FTC lacks jurisdiction, however, no party would be collaterally estopped by an FTC finding." *578 F. 2d at 796 n. 5*, citing *Paramount Transportation Systems, 436 F. 2d 1064, 1066 (9th Cir. 1971)*; but see *McCulloch Interstate Gas Corp.* **[*7]** *v. Federal Power Commission, 536 F. 2d 910 (10th Cir. 1976)*.

Times Mirror's last two asserted elements of injury relate to constitutional rights it claims will be violated if the FTC is allowed to proceed in Docket No. 9103. Some courts have held that ***HN5***[] in certain circumstances the assertion of a constitutional right may be, by itself, enough to give a district court jurisdiction to hear an attack on an interlocutory order. *Downen v. Warner, 481 F. 2d 642 (9th Cir. 1973)*; *Coca-Cola Company v. FTC, 475 F. 2d 299 (5th Cir. 1973)*; *Fay v. Douds, 172 F. 2d 720 (2d Cir. 1949)*. The rationale underlying this exception is that "[resolving] a claim founded solely upon a constitutional right is singularly suited to a judicial forum and clearly inappropriate to an administrative board." *Downen v. Warner, supra, at 643*.

This limited exception is not intended, however, to provide an automatic escape route from the exhaustion requirement. "The fact that the attack is voiced in conclusory language of a denial of due process and like constitutional rights does not warrant stopping [an administrative agency] in its tracks." *Bokat v. Tidewater Equipment Co., 363 F. 2d 667, 672 (5th Cir. 1966)*; **[*8]** accord, *Coca-Cola Co. v. FTC, 475 F. 2d 299, 303 (5th Cir. 1973)*; see also *Writers Guild of America, West, Inc. v. FCC, 423 F. Supp. 1064, 1082 (C.D. Cal. 1976)*.

Here, Times Mirror alleges two potential violations of its constitutional rights. First, it claims that to allow the FTC to pursue its "unlawful proceeding" deprives Times Mirror of due process. This is the kind of "conclusory language of a denial of due process" that has been held not to justify judicial intervention. *Bokat, supra* . In essence, Times Mirror asserts that due process requires that it be allowed to seek judicial intervention in any agency proceeding in which it challenges the agency's jurisdiction. This argument is at direct odds with the policies underlying the exhaustion requirement. ***HN6***[] "The judicially-created exhaustion requirement is intended to facilitate the development of a full factual record, to encourage the exercise of administrative expertise and discretion, and to promote judicial and administrative efficiency." *Downen v. Warner, supra, at 643*. Doubts about an agency's subject matter jurisdiction in a proceeding are only one factor in a district court's decision whether or not to interrupt an **[*9]** agency adjudication. Times Mirror will have a full opportunity to present its contentions in the proceeding before the Commission, and ***HN7***[] the Commission's final decision is subject to review by the court of appeals. *15 U.S.C. § 45(c)*.

Times Mirror's second claim of constitutional injury is based on *first amendment* freedom of speech. The plaintiff contends that if it is forced to cut back on volume discounts, the result will be a reduction in total advertising.Less advertising will mean less space for news and editorial material with the resultant "... chilling effect on the flow of news... to the public." This attenuated argument falls far short of the ***HN8***[] "unambiguous statutory or constitutional right" that justifies the extraordinary remedy of judicial intervention in an agency proceeding. *Coca-Cola, supra, at 304*.

II. FTC Jurisdiction

The second factor of the Lone Star test requires this court to assess the degree of doubt about agency jurisdiction to proceed. ***HN9***[] In the absence of a "clear jurisdictional defect," an agency should have the opportunity to make the initial determination of its own jurisdiction, subject to appellate court review. *Christensen, supra, at 1324*. Relying **[*10]** on (1) the plain language of the Clayton Act, (2) legislative history, (3) contemporaneous interpretation by the FTC, (4) judicial decisions, and (5) statements of authorities in the field, Times Mirror contends that newspaper advertising space clearly lies outside the reach of the Clayton Act.

First, Times Mirror argues that under the wording of the Clayton Act "commodities" can only include tangible goods and merchandise. *Section 2(a)* speaks of "commodities of like grade and quality," and allows for price differentials based on "cost of manufacture, sale or delivery," "actual or imminent deterioration of perishable goods, obsolescence of seasonal goods," etc. Times Mirror quotes the statement of antitrust authority F. Rowe that "any extension of the price discrimination prohibitions beyond the area of tangibles would make nonsense of this language." Price Discrimination Under the Robinson-Patman Act 61-62 (1962).

Next, Times Mirror argues that the legislative history of both the original *Section 2* of the Clayton Act and *Section 2* as amended by the Robinson-Patman Act in 1936 reflects an intention to limit its applicability to tangible products and merchandise.

Third, Times **[*11]** Mirror points to an informal ruling of the FTC, recorded at 81 Cong. Rec. App. 2336-37 (1937) soon after the passage of the Robinson-Patman Act. In the ruling the FTC announced that it was dropping a case against periodical publishers who charged proportionally higher rates for less than full page advertisements. The FTC concluded that "the sale of advertising space in the circumstances in this case does not involve the sale of a 'commodity' within the meaning of the act." Id.

In 1953, however, the Supreme Court, in *Times-Picayune Pub. Co. v. United States, 345 U.S. 594, 610 n. 27, 73 S. Ct. 872, 881, 97 L. Ed. 2d 1277, 1290*, explicitly referred to the status of advertising space under the Clayton Act as an open question:

On oral argument here, the government explanatorily referred to an early informal Federal Trade Commission opinion to the effect that advertising space was not a "commodity" within the meaning of *§ 2* of the Clayton Act. We express no views on that statutory interpretation. Compare note 11, supra.

In footnote 11, the Court had listed cases demonstrating its broad interpretation of the "interstate commerce" requirement of the Sherman Act. The reference **[*12]** suggests that if it had ruled on the point, the Court would also have given a broad interpretation to the term "commodities."

Times Mirror points out that four years later a bill was introduced, but not enacted, in Congress to amend the Clayton and Robinson-Patman Acts "to include the sale of services by independent contractors." H.R. 8277, 85th Cong., 1st Sess., 103 Cong. Rec. 9898 (1957). The bill reflected congressional understanding that *Section 2(a)* covered "only tangible commodities and not services." H.R. Rep. No. 607, 85th Cong., 1st Sess. 66 (1957). But the Commission decision here does not conflict with this understanding. The Commission found that newspaper advertising space is neither pure tangible nor pure intangible. Since the tangible/intangible distinction provided no easy answer, the Commission looked to Clayton Act policy in deciding that newspaper advertising space is a commodity under *Section 2(a)*.

Finally, Times Mirror argues that most recent cases and commentary support their contention that newspaper advertising space is not a commodity under *Section 2(a)*. Their point is well taken. In a number of decisions involving products other than newspaper advertising **[*13]** space, but which also fall in between the tangible and intangible categories, it has been held that *Section 2(a)* of the Clayton Act is inapplicable. See, e. g., *Baum v. Investors Diversified Services, Inc., 409 F. 2d 872 (7th Cir. 1969)* (mutual fund shares); *American Bankers Club, Inc. v. American Express Co., 1977-1 TRADE CASES P70,740 (D.D.C. 1977)*(travelers checks); *Kennedy Theater Ticket Service v. Ticketron, Inc., 342 F. Supp. 922 (E.D. Pa. 1972)* (reserved seat tickets). And in *Columbia Broadcasting System, Inc. v. Amana Refrigeration, Inc., 295 F. 2d 375 (7th Cir. 1961)*, cert denied, *369 U.S. 812 (1962)*, the court held the Clayton Act inapplicable to the sale of television advertising.

Also, in *ALW, Inc. v. United Air Lines, Inc., 510 F. 2d 57 (9th Cir. 1975)*, the court cited *Amana, supra*, in dictum for the proposition that "[advertising] does not fall within the traditional definition of 'commodities' within the purview of Section 3" of the Clayton Act. Finally, two recent district court cases have specifically held that newspaper advertising space is not a "commodity." *National Tire Wholesale, Inc. v. Washington Post Co., 441 F. Supp. 81 (D.D.C. 1977)*; *National Auto* ***[*14]*** *Brokers Corp. v. General Motors Corp., 1974-2 TRADE CASES 97,856 (S.D.N.Y. 1974)*.

Authorities in the field have also concluded that newspaper advertising space has been excluded from the Clayton Act. P. Areeda states that *Section 2(a)* "applies only to transactions in 'commodities' which are customarily understood to exclude services and such intangibles as newspaper or broadcast advertising." Antitrust Analysis 846 (1974), cited in *National Tire, supra, at 85*. E. Kintner argues that "[what] is being sold is in the nature of a service, the circulation of ideas to the newspaper's readers. The printed paper is merely a tangible vehicle for the conveyance of these ideas. It is only incidental to the dominant tangible nature of the transaction." A Robinson-Patman Primer 49 (1970), cited in *National Tire, supra, at 85*. J. von Kalinowski states in his treatise that newspaper and magazine advertising are intangibles not within the term "commodities."3 ***Antitrust Law*** and Trade Regulation § 24.05. Finally, co-sponsor Patman stated in his book on the subject that the act was not intended to apply to magazine or other advertising. W. Patman, The Robinson-Patman Act 75 (1938).

But the **[*15]** cases are not unanimous. In Scott Publishing Co. v. Columbia Basin Publ shers, *Inc., 180 F. Supp. 754 (W.D. Wash. 1959)*, aff'd *293 F. 2d 15 (9th Cir. 1961)*, cert. denied *368 U.S. 940 (1961)*, the district court expressed "considerable doubt" about whether newspaper advertising was a "commodity," but neither the district nor the circuit court found it necessary to decide the question. In *Syracuse Broadcasting Corp. v. Newhouse, 236 F. 2d 522, 527 (2nd Cir. 1956)*, the court stated that whether or not newspaper advertising is a "commodity"remained an "important and apparently unresolved question" under the Clayton Act. And in *United States v. Wichita Eagle Publishing Co., 1959 TRADE CASES 75,535 (D. Kan. 1959)*, newspaper advertising was treated as a commodity without discussion. Finally, in *National Tire, supra*, while the court concluded that newspaper advertising space is not a "commodity," it noted that "[there] is little legal authority on the issue" and that "the characterization of newspaper advertising is not clearly established." *441 F. Supp. at 85*.

Overall, it is clear that ***HN10***[] most courts and authorities that have addressed the question have concluded that newspaper advertising **[*16]** is not a "commodity" under *Section 2(a)*. It cannot be said, however, that the jurisdictional question is free from doubt, or that the Commission's jurisdictional conclusion is frivolous. *Lone Star, supra, at 511*. Since it is not clear that the FTC is operating outside the scope of its statutory authority, intervention is not warranted under this branch of the Lone Star test. Christiansen, supra, at 1324.

III. Involvement of Agency Expertise in the Question

Times Mirror has argued that there is no need for specialized administrative expertise to decide a purely legal question of statutory interpretation. ***HN11***[] Some courts have distinguished between legal and factual questions in assessing the importance of administrative expertise. See, e.g., *McKart v. United States, 395 U.S. 185, 198-99, 89 S. Ct. 1657, 1665, 23 L. Ed. 2d 194, 205-06 (1965)*. But "the requirement of exhaustion of remedies often applies as well to questions of law as to questions of fact. Courts should accord deference to an agency's own construction of its authorizing statute when reviewing final agency action." *Christensen, supra, at 1324*; accord, *Casey, supra, at 798*.

The question of FTC jurisdiction to proceed **[*17]** against Times Mirror under the Clayton Act in the present case appears to be an example of a legal issue to which the exhaustion requirement should apply. The FTC has special expertise in the area of federal ***antitrust law*** and a thoughtful jurisdictional decision by the Commission may prove helpful to a reviewing court. See *National Tire, supra, at 85*. The Commission has already issued an opinion upholding FTC jurisdiction under Count I of the complaint involved in Docket No. 9103, but further proceedings in the case could result in clarification or even reversal of that decision.

In summary, Times Mirror fails to establish a basis for judicial intervention. Both of the primary goals of the exhaustion doctrine, promotion of judicial economy and administrative efficiency, will be served by allowing the FTC to proceed with the adjudication. It is not clear that the FTC is exceeding its jurisdiction and Times Mirror has asserted no cognizable injury it will suffer if it is forced to defend itself in the FTC proceeding.

Count I

In Count I of the complaint, the FTC alleges that Times Mirror's practice violates Section 5 of the Federal Trade Commission Act. ***HN12***[] Section 5 empowers **[*18]** the FTC to initiate proceedings to prevent "unfair methods of competition in or affecting commerce and unfair or deceptive acts or practices in or affecting commerce." *15 U.S.C. § 45 (1976)*. Times Mirror's argument for district court action relieving it from further FTC proceedings under Count I of the complaint is even less convincing than its argument for relief from Count II. Its claims for relief under the injury and administrative expertise branches of the Lone Star test are the same for both counts. With regard to agency jurisdiction, however, its allegations of agency overreaching in Count I are much weaker.

Times Mirror has raised no challenge to Section 5 jurisdiction in the proceeding now before the FTC. Consequently, Times Mirror is asking this court to decide against the FTC on the issue of Section 5 jurisdiction before the agency has been offered the opportunity to give even a preliminary justification for its action. Times Mirror attempts to circumvent this problem by arguing that the jurisdictional questions under Section 5 and *Section 2(a)* are identical and that the FTC decision on *Section 2(a)* is also a decision on Section 5. In fact, however, it is clear **[*19]** that ***HN13***[] the FTC's power to act to prevent unfair methods of competition and unfair or deceptive acts or practices includes the power "to define and proscribe an unfair competitive practice, even though the practice does not infringe either the letter or spirit of the antitrust laws." *FTC v. Sperry and Hutchinson Co., 405 U.S. 233, 239, 92 S. Ct. 898, 903, 31 L. Ed. 2d 170, 176 (1972)*.

In response, Times Mirror argues that Section 5 jurisdiction may exist in proceedings involving conduct that has been inadvertently omitted from the Clayton Act, but not where the conduct involved has been deliberately excluded from the Act. See *Grand Union Co. v. FTC, 300 F. 2d 92 (2d Cir. 1962)*. It is unnecessary to pass on the validity of this argument since, as discussed above, it is not clear that the sale of newspaper advertising space has been deliberately excluded from the coverage of the Clayton and Robinson-Patman Acts.

With regard to Count I of the complaint, the FTC has not had the opportunity to make even a preliminary decision on its jurisdiction under Section 5 of the FTC Act, and it appears likely that its authority to act under that section is broader in the present case than its authority **[*20]** under *Section 2(a)* of the Clayton Act. Consequently, the plaintiff again fails to meet the Lone Star test for judicial intervention and must pursue its claims in the proceeding before the FTC.

The plaintiff's motions for a preliminary injunction and summary judgment are denied; the FTC's motion to dismiss is granted.

HN1[] **Clayton Act, Claims**

The Clayton Act § 4, *15 U.S.C.S. § 15*, authorizing private antitrust suits for damages, provides that any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor. This statute confers standing to sue only upon those persons causally injured by antitrust violations.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN2[] **Sherman Act, Claims**

In order to prevail in an action under the Sherman Act, *15 U.S.C.S. § 2*, the plaintiff must prove not only injury causally linked to the asserted violation, but also that the injury is of the type the antitrust laws were intended to prevent. The plaintiff's burden of proving the former is satisfied by proof of some damage flowing from the antitrust violation. Satisfying the latter burden is dependent on a showing that the injury was caused by a reduction, rather than an increase, in competition flowing from the defendant's acts, since the antitrust laws were enacted for the protection of competition not competitors.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] **Private Actions, Standing**

A plaintiff in an action under the Sherman Act, *15 U.S.C.S. § 2*, must demonstrate that the defendant's conduct was intended to or did have some anticompetitive effect beyond plaintiff's own loss of business or the market's loss of a competitor. Moreover, it is not sufficient for an antitrust plaintiff to allege an indirect ripple effect. It is not enough to confer standing that plaintiff just prove some injury and show that this injury is within the affected area of the economy. Antitrust violations admittedly create many foreseeable ripples of injury to individuals, but the law has not allowed all of those merely affected by the ripples to sue for treble damages.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN4[] **Trials, Judgment as Matter of Law**

As a general rule, the district court has the power to direct a verdict if the evidence permits only one reasonable conclusion as to the verdict.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

Evidence > Burdens of Proof > General Overview

HN5[] **Trials, Judgment as Matter of Law**

On a motion for a directed verdict, the district court must consider all the evidence both favorable and unfavorable. But in order to avoid passing on the credibility of witnesses and weighing contradictory evidence, the court must resolve all inferences in favor of the party with the burden of persuasion, because it is the jury, not the judge, which weighs the contradictory evidence and inferences, judges the credibility of witnesses, and draws the ultimate conclusion as to the facts.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN6[] **Trials, Judgment as Matter of Law**

On a motion for a directed verdict, the court must view the evidence in the light most favorable to the party opposing the motion and it must examine all the evidence.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN7[] **Trials, Judgment as Matter of Law**

In order to benefit from the favorable inferences available under the motion for directed verdict standard, the party against whom the motion is made must present "substantial evidence."

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

Civil Procedure > ... > Standards of Review > Substantial Evidence > Sufficiency of Evidence

HN8[] **Antitrust & Trade Law, Sherman Act**

In considering a motion for a directed verdict, the court must give the party against whom the motion is made the benefit of all reasonable evidentiary inferences. This is no less true in an antitrust case. However, if there is no substantial evidence to support the claim, the court must direct a verdict.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN9[] **Trials, Judgment as Matter of Law**

The sole issue in an appeal from a directed verdict against the party with the burden of persuasion is the sufficiency of the evidence of the appellant's claim. The correct standard is whether or not, viewing the evidence as a whole, there is substantial evidence present that could support a finding for the nonmoving party.

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN10[] **Trials, Judgment as Matter of Law**

The standard for determining the propriety of a directed verdict, identical to that for determining the propriety of a judgment notwithstanding the verdict, is the same for district and appellate judges.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

A directed verdict is proper, even in an antitrust case, when there is no substantial evidence to support the claim.

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] **Antitrust & Trade Law, Sherman Act**

See the Sherman Act, *15 U.S.C.S. § 2*.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Claims

HN13[] **Robinson-Patman Act, Claims**

There are three essential elements to a successful claim of the Sherman Act, *15 U.S.C.S. § 2* monopolization (a) the possession of monopoly power in the relevant market; (b) the willful acquisition or maintenance of that power; and (c) causal "antitrust" injury.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN14[] **Monopolies & Monopolization, Attempts to Monopolize**

Monopoly power is the power to control prices or to exclude competition. This definition of monopoly power has been applied principally with reference to the defendant's share of the relevant product and geographic markets.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN15[] **Monopolies & Monopolization, Actual Monopolization**

The second element of a successful monopolization claim requires that the conceded monopolist have engaged in "willful" acts directed at establishing or retaining its monopoly, as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN16[] **Monopolies & Monopolization, Actual Monopolization**

The plaintiff in a monopolization claim under the Sherman Act, *15 U.S.C.S. § 2* need not show that the conceded monopolist's acts were of a kind that would be unlawful for an ordinary enterprise. Rather, the plaintiff must show that the defendant's acts "unnecessarily excluded competition" from the relevant market. Nor is it necessary to show a specific intent to eliminate a competitor.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN17[] **Monopolies & Monopolization, Actual Monopolization**

The defendant's acts in a monopolization claim are properly analyzed analogously to contracts, combinations and conspiracies under the Sherman Act, *15 U.S.C.S. § 1*. The test is whether the defendant's acts, otherwise lawful, were unreasonably restrictive of competition.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Jury Trials > Jury Instructions > General Overview

Governments > Legislation > Overbreadth

HN18[] **Antitrust & Trade Law, Sherman Act**

The Sherman Act, *15 U.S.C.S. § 1* is limited to concerted activity and contractual restraints, while under the Sherman Act, *15 U.S.C.S. § 2* individual activity may also give rise to liability.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN19[] **Sherman Act, Claims**

There are four elements to a successful claim of the Sherman Act, *15 U.S.C.S. § 2* attempt to monopolize: (a) specific intent to control prices or destroy competition with respect to a part of commerce; (b) predatory or anticompetitive conduct directed to accomplishing the unlawful purpose; (c) a dangerous probability of success; and (d) causal "antitrust" injury.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > General Intent

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Specific Intent

HN20[] **Antitrust & Trade Law, Sherman Act**

While the completed offense of monopolization under the Sherman Act, *15 U.S.C.S. § 2* demands only a general intent to do the act a specific intent to destroy competition or build monopoly is essential to guilt for the mere attempt.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Evidence > Inferences & Presumptions > Inferences

Antitrust & Trade Law > Sherman Act > General Overview

HN21[] **Monopolies & Monopolization, Attempts to Monopolize**

"Direct evidence" of specific intent to control prices or destroy competition is not always necessary when the attempt claim is founded upon a substantial claim of restraint of trade, that is, a Sherman Act, *15 U.S.C.S. § 1* violation. In these circumstances the requisite specific intent may be inferred. Market power is relevant to determining whether such an inference is proper; but where a *§ 1* violation "clearly" exists, proof of market power is unnecessary to support an inference of specific intent.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN22[] **Sherman Act, Claims**

Since under the rule of reason market definition is required to establish the Sherman Act, 15 U.S.C.S. § 1 violation, such evidence is necessary where specific intent is sought to be shown by inference unless a per se violation of § 1 is made out.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN23[] Monopolies & Monopolization, Attempts to Monopolize

The third element of the Sherman Act, 15 U.S.C.S. § 2 attempt, the requirement that a defendant's demonstrated specific intent to control prices or destroy competition have a dangerous probability of success, may be satisfied either by direct proof of market power, or by inference from the proven specific intent itself. Because this element may be inferred from the existence of a specific intent in proper cases, it is not an "essential" element of an attempt claim. For the same reason, neither is proof of any particular degree of market power necessarily an "independent" element of such a claim.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

Antitrust & Trade Law > Sherman Act > Remedies > Damages

HN24[] Clayton Act, Claims

In addition to the first three elements necessary to establish a prima facie case of attempted monopolization, the fourth element, causal "antitrust" injury, is as necessary to confer standing to sue and to support a claim for damages under the Sherman Act, 15 U.S.C.S. § 2 attempt as it is under § 2 monopolization. The Clayton Act § 4, 15 U.S.C.S. § 15.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN25[] Monopolies & Monopolization, Attempts to Monopolize

The Sherman Act does not draw a distinction between competition on the bases of price and of performance: the two are inseparable parts of any competitive offering. Where the opportunity exists to increase or protect market share profitably by offering equivalent or superior performance at a lower price, even a virtual monopolist may do so.

Civil Procedure > Trials > Judgment as Matter of Law > Directed Verdicts

Civil Procedure > Trials > Judgment as Matter of Law > General Overview

HN26[] **Judgment as Matter of Law, Directed Verdicts**

The complexity of a plaintiff's case, however, does not entitle it to avoid a directed verdict if the evidence no matter how much of it there may be is weak.

Counsel: Maxwell M. Blecher, Harold R. Collins, Jr., Daphne M. Stegman, of Blecher, Collins & Hoecker, Los Angeles, Cal., for plaintiffs-appellants.

David Boies, Ronald S. Rolfe, Stuart W. Gold, Cravath, Swaine & Moore, New York City, Ernest J. Getto, Kadison, Pfaelzer, Woodward, Quinn & Rossi, Los Angeles, Cal., David Boies, Scarsdale, N. Y., for defendant-appellee.

Judges: Before CHOY and KENNEDY, Circuit Judges, and PALMIERI, * District Judge.

Opinion by: CHOY

Opinion

[*731] California Computer Products, Inc. ("CalComp") appeals from the judgment entered on a directed verdict in favor of appellee International Business Machines Corp. ("IBM") as to all counts of its complaint charging IBM with violations of *§ 2* of the Sherman Act, *15 U.S.C. § 2*. We affirm.

I. Background and Proceedings Below

IBM is one of the largest industrial corporations in the world. It achieved technical leadership in the computer industry **[**2]** over other early entrants, such as Sperry Rand, in the mid-1950's and thereafter pioneered the development of many electronic data processing products, including the disk products involved in this litigation.

Disk products are part of a broader category of what is known as peripheral equipment, such as disks, tapes, printers, and terminals, which is connected to the central processing unit ("CPU") to enable the data processing system to perform particular functions. Included in the reference to disk products are disk drives, devices using magnetic disks similar in appearance to phonograph records to store information, and controllers, used for communication between disk drives and the CPU. Occasionally these devices are built into the CPU; alternatively, they exist as external components that may be "plugged into" the CPU. As a general purpose computer systems manufacturer, IBM sells both CPUs and peripherals, including disk products.

CalComp began manufacturing computer products in 1960, when it made plotting devices peripheral equipment that provides graphic, printed or pictorial output. CalComp claims no injury with respect to these products. With the acquisition of Century Data **[**3]** Systems in 1969, CalComp entered the disk products market, manufacturing disk drives and controllers that were "plug compatible" with IBM's and other suppliers' CPUs. CalComp's business strategy with respect to IBM-compatible disk products was straightforward: copy and, where possible, improve upon an IBM design, and undersell IBM to its own customers. By the "reverse engineering" of simply buying a device

---

* The Honorable Edmund L. Palmieri, Senior United States District Judge for the Southern District of New York, sitting by designation.

from IBM, taking it apart, and building a similar one, CalComp was able to avoid IBM's expenditures for research and development and pass the savings on through lower prices.

CalComp commenced this lawsuit on October 3, 1973. The complaint alleged that IBM's introduction of new CPUs and disk products, its price cuts on existing disk products, its leasing policies, and other marketing practices prevented CalComp from effectively competing with IBM for disk product sales and thus violated *§ 1* and *§ 2* of the Sherman Act. [1] CalComp alleged and attempted to prove that these acts by IBM took place within a ten year span, from late 1963 to 1972, resulting in treble damages of $ 306 million. Following over three years of discovery and pretrial, trial to a jury began on November 15, 1976. **[**4]** At the conclusion of fifty-four days of trial covering three months, the district court granted IBM's motion for directed verdict on February 11, 1977.

The records and transcript on this appeal comprise 132 volumes. Voluminous briefs **[*732]** and supplemental briefs by the parties and Amicus briefs were permitted. We have considered all of the arguments advanced and scrutinized pertinent parts of the record, particularly in view of the nature of the appellate task on review of a directed verdict.

II. Antitrust Standing

CalComp has asserted that IBM's actions created anticompetitive effects on three classes of IBM competitors: (1) general purpose computer systems manufacturers, (2) leasing companies and (3) IBM-compatible peripheral equipment manufacturers. We believe that CalComp, an IBM-compatible peripheral equipment manufacturer, lacks antitrust standing as to the first two categories of claims.

Section 4 of the Clayton Act, *15 U.S.C. § 15*, ***HN1***[] authorizing **[**5]** private antitrust suits for damages, provides in part:

> Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor . . . .

This statute confers standing to sue only upon those persons causally injured by antitrust violations. *Kapp v. National Football League, 586 F.2d 644, 648-49 (9th Cir. 1978)*; *John Lenore & Co. v. Olympia Brewing Co., 550 F.2d 495, 498-99 (9th Cir. 1977)*. Moreover, ***HN2***[] in order to prevail the plaintiff must prove not only injury causally linked to the asserted violation, but also that the injury is of the type the antitrust laws were intended to prevent. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; *John Lenore & Co. v. Olympia Brewing Co., 550 F.2d at 498-99*; *In re Multidistrict Vehicle Air Pollution M.D.L. No. 31, 481 F.2d 122, 125 (9th Cir. 1973)*, Cert. denied, *414 U.S. 1045, 94 S. Ct. 551, 38 L. Ed. 2d 336 (1975)*. The plaintiff's burden of proving the former is satisfied by proof of Some damage flowing from the antitrust violation. *Zenith Radio Corp. v. Hazeltine Research Inc., 395 U.S. 100, 114 n.9, 89 S. Ct. 1562, 23 L. Ed.* ***[**6]*** *2d 129 (1969)*. Satisfying the latter burden is dependent on a showing that the injury was caused by a reduction, rather than an increase, in competition flowing from the defendant's acts, since "(t)he antitrust laws . . . were enacted for "the protection of Competition not Competitors,' " *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. at 488, 97 S. Ct. at 697*, Quoting *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. See *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126, 133 (2d Cir. 1978)*. Accordingly, the ***HN3***[] plaintiff must demonstrate that the defendant's conduct was intended to or did have some anticompetitive effect beyond his own loss of business or the market's loss of a competitor. See *Knutson v. Daily Review, Inc., 548 F.2d 795, 803 (9th Cir. 1976)*. Moreover, it is not sufficient for an antitrust plaintiff to allege an indirect ripple effect. As this court wrote in John Lenore & Co.:

> It is not enough to confer standing that plaintiff just prove some injury and show that this injury is within the affected area of the economy. Antitrust violations admittedly create many foreseeable ripples of injury to individuals, but the law has not **[**7]** allowed all of those merely affected by the ripples to sue for treble damages.

---

[1] CalComp has dropped its *§ 1* claim on this appeal.

550 F.2d at 499.

In the present case CalComp has alleged that IBM's actions injured general purpose computer systems manufacturers and leasing companies. But CalComp does not include itself among these two classes of IBM competitors. Nor does CalComp's evidence demonstrate a direct causal injury which would afford it standing. Rather, at best CalComp argues that injury to these two groups has had an indirect ripple effect upon it. As John Lenore & Co. indicates, such an indirect ripple effect is not sufficient to allow CalComp to sue for treble damages on its first two categories of claims.

III. CalComp's Claims as to IBM-Compatible Peripheral Equipment Manufacturers

A. Standard of Review on Appeal from Directed Verdict

HN4[] As a general rule, the district court has the power to direct a verdict if **[*733]** "the evidence permits only one reasonable conclusion as to the verdict." *Fountila v. Carter, 571 F.2d 487, 489-90 (9th Cir. 1978)*, Quoting *Kay v. Cessna Aircraft Co., 548 F.2d 1370, 1372 (9th Cir. 1977)*; See *Syufy Enterprises v. National General Theatres, 575 F.2d 233, 235 (9th Cir. 1978)*. [2] **[**8]** **HN5**[] The district court must consider all the evidence both favorable and unfavorable. But in order to avoid passing on the credibility of witnesses and weighing contradictory evidence, the court must resolve all inferences in favor of the party with the burden of persuasion, because

> (i)t is the jury, not **[**9]** the judge, which "weighs the contradictory evidence and inferences, judges the credibility of witnesses, . . . and draws the ultimate conclusion as to the facts . . . ."

Fount-Wip, Inc. v. Reddi-Wip, Inc., 568 F.2d 1296, 1301 (9th Cir. 1978), Quoting *Cockrum v. Whitney, 479 F.2d 84, 86 (9th Cir. 1973)* and *Tennant v. Peoria & Pekin Union Ry., 321 U.S. 29, 35, 64 S. Ct. 409, 88 L. Ed. 520 (1944)*; See *Marquis v. Chrysler Corp., 577 F.2d 624, 639 (9th Cir. 1978)*; *Kay v. Cessna Aircraft Co., 548 F.2d at 1372*. [3]

[10]** Thus, this court in *Maheu v. Hughes Tool Co., 569 F.2d 459, 464 (9th Cir. 1977)*, upholding the denial of a directed verdict against the party with the burden of persuasion, made it clear that application of the general standard of Fountila and Kay, supra, required it to **HN6**[] view the evidence "in the light most favorable to the party opposing the motion," and that it "must examine All the evidence" (emphasis added). See also *id. at 481* (concurring and dissenting opinion); *Wescott v. Impresas Armadoras, S.A., 564 F.2d 875, 882 (9th Cir. 1977)*;

---

[2] Although the district court may direct a verdict either against the party who does not bear the burden of persuasion or the party who does bear that burden, the amount of evidence required for a directed verdict differs. The party seeking a directed verdict must make a stronger showing of evidence if he bears the burden of persuasion. See *United California Bank v. THC Financial Corp., 557 F.2d 1351, 1356 (9th Cir. 1977)*; *Juhnke v. EIG Corp., 444 F.2d 1323, 1325 (9th Cir. 1971)*; Comment, "Directing the Verdict in Favor of the Party with the Burden of Proof," 50 N.C.L.Rev. 843 (1972). Thus directed verdicts for defendants are more frequent than for plaintiffs. See C. Wright, Federal Courts 464 (3d ed. 1976).

[3] This test is a hybrid of the so-called "new trial" and "most favorable evidence" tests. Shortly after the power of the federal courts to grant directed verdicts consistently with the *seventh amendment* was established in *Galloway v. United States, 319 U.S. 372, 63 S. Ct. 1077, 87 L. Ed. 1458 (1943)*, two polar tests were proposed for determining whether the evidence in a particular case is sufficient to warrant a directed verdict against the bearer of the persuasion burden. The first, the "setting aside" or "new trial" test, permitted a directed verdict against the party with the burden of persuasion if the judge, looking at All the evidence, both favorable and unfavorable, determined that he would be duty bound to set aside a verdict for that party. In the second, the "most favorable evidence" test, the court was to consider only the evidence favorable to the party with the persuasion burden, completely disregarding all unfavorable evidence, and determine whether a reasonable jury, viewing the evidence in the light most favorable to that party, could find every essential part in that party's favor. If it could not, a directed verdict for the other party would be proper. See McBaine, "Trial Practice: Directed Verdicts; Federal Rule," 31 Calif.L.Rev. 454, 460-61 (1943). The principal differences between these polar tests were that the "setting aside" test involved passing upon the credibility of witnesses and weighing contradictory evidence, while the "most favorable evidence" test did not; and the former test permitted consideration of all the evidence, while the latter did not.

Santa Clara Valley Distributing Co. v. Pabst Brewing Co., 556 F.2d 942, 944 (9th Cir. 1977); Kay v. Cessna Aircraft Co., 548 F.2d at 1372; Chisholm Brothers Farm Equipment Co. v. International Harvester Co., 498 F.2d 1137, 1140 (9th Cir.), Cert. denied, *419 U.S. 1023, 95 S. Ct. 500, 42 L. Ed. 2d 298 (1974)*.

HN7[] In order to benefit from the favorable inferences available under this standard, the party against whom the motion is made must present "substantial evidence." As stated in Rutledge v. Electric Hose & Rubber Co., 511 F.2d 668 (9th Cir. 1975):

> **HN8**[] In considering a motion for a directed verdict, the court must give the party against whom the motion **[**11]** is made the benefit of all reasonable evidentiary inferences. (Cited authority omitted.) This is no less true in an antitrust case. **[*734]** However, if there is no substantial evidence to support the claim, the court must direct a verdict.

Id. at 677 (emphasis added), Quoting Cleary v. National Distillers & Chemical Corp., 505 F.2d 695, 696 (9th Cir. 1974). **HN9**[] The "sole issue" in an appeal from a directed verdict against the party with the burden of persuasion is thus the sufficiency of the evidence of the appellant's claim. Cleary v. National Distillers & Chemical Corp., 505 F.2d at 696. As stated in Chisholm Brothers Farm Equipment Co. v. International Harvester Co., 498 F.2d at 1140, "the correct standard is whether or not, viewing the evidence as a whole, there is substantial evidence present that could support a finding . . . for the nonmoving party." Accord, Janich Bros., Inc. v. American Distilling Co., 570 F.2d 848, 853 & n.2 (9th Cir. 1977) (substantial evidence is "more than a mere scintilla" and consists of "such relevant evidence as a reasonable mind might accept as adequate to support a conclusion"), Cert. denied, *439 U.S. 829, 99 S. Ct. 103, 58 L. Ed. 2d 122* ***[**12]*** *(1978)*.

HN10[] The standard for determining the propriety of a directed verdict identical to that for determining the propriety of a judgment n. o. v., Fountila v. Carter, 571 F.2d at 489; Cockrum v. Whitney, 479 F.2d at 85 is the same for district and appellate judges. Maheu v. Hughes Tool Co., 569 F.2d at 481 (concurring and dissenting opinion).

In its Amicus brief the Department of Justice argues that:

> Because of the generally complex nature of antitrust litigation and the important role which motive and intent often play therein, the Supreme Court has generally disapproved of the use of summary procedures, such as motions for directed verdicts, in antitrust cases. Poller v. Columbia Broadcasting, 368 U.S. 464, 473 (, 82 S. Ct. 486, 7 L. Ed. 2d 458) (1962); Hospital Bldg. Co. v. Rex Hospital Trustees, 425 U.S. 738, 746 (, 96 S. Ct. 1848, 48 L. Ed. 2d 338) (1976); See also Chisholm Bros. Farm Equip. Co. v. International Harvester Co., supra, 498 F.2d at 1139. Complex Section 2 cases, such as this case, involve numerous factual issues such as market definition, whether the defendant possesses monopoly power in a relevant market and whether the defendant had the purpose or intent to **[**13]** exercise that monopoly power. These issues must be resolved by the jury after receiving appropriate instructions from the court.

However, in Santa Clara Valley Distributing Co. v. Pabst Brewing Co., 556 F.2d at 944-45 n.1, this court dealt extensively and definitively with the meaning of Poller and Hospital Building Co. in the context of a directed antitrust verdict. That case, emphasizing that the Supreme Court's disapproval of "summary proceedings" dealt with "Pre trial motions" (emphasis original), concluded that "the same circumspection is not required in the case of directed verdicts." Rather, the usual standard described above applies:

> **HN11**[] a directed verdict is proper, even in an antitrust case, when "there is no substantial evidence to support the claim."

Id., quoting Rutledge v. Electric Hose & Rubber Co., 511 F.2d at 677, and Cleary v. National Distillers & Chemical Corp., 505 F.2d at 696. See Marquis v. Chrysler Corp., 577 F.2d at 639 & n.25. [4]

---

[4] That directed verdicts in antitrust cases have not been "generally disapproved" is evident from the fact that Santa Clara Valley, like Syufy, Janich Brothers, Cleary and Chisholm Brothers, affirmed a directed verdict in favor of the antitrust defendant. In

[14]** B. General *§ 2* Doctrine

CalComp contends that the evidence was sufficient to show that particular conduct **[*735]** on the part of IBM, detailed below, violated either or both the monopolization and attempt to monopolize clauses of *§ 2* of the Sherman Act. [5] In order to reverse the district court's judgment as to either of these claims, it must be that after viewing the evidence in the light most favorable to CalComp, there is substantial evidence of every essential element of that claim.

1. Monopolization

HN13[] There are three essential elements to a successful claim of *§ 2* monopolization:

(a) the possession of monopoly power in the relevant market;

(b) the willful acquisition or maintenance of that power; and

(c) causal "antitrust" injury.

[15]** The first two elements are derived from *§ 2* itself, and were explicated in *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. See *Greyhound Computer Corp. v. IBM, 559 F.2d 488, 492 (9th Cir. 1977)*; *Moore v. Jas. H. Matthews & Co., 550 F.2d 1207, 1218 (9th Cir. 1977)*.

As reiterated in Greyhound, ***HN14***[] monopoly power the first element "is the power to control prices or exclude competition." *559 F.2d at 496*, Quoting *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 391, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*. The Du Pont definition of monopoly power has been applied principally with reference to the defendant's share of the relevant product and geographic markets. *Greyhound, 559 F.2d at 496*. See *United States v. Grinnell Corp., 384 U.S. 563 at 563, 86 S. Ct. 1698, 16 L. Ed. 2d 778* ; *United States v. E. I. du Pont de Nemours & Co., 351 U.S. at 377, 404, 76 S. Ct. 994, 100 L. Ed. 1264* ; *American Tobacco Co. v. United States, 328 U.S. 781, 797, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*; *Twin City Sportservice, Inc. v. Charles O. Finley & Co., 512 F.2d 1264, 1274 (9th Cir. 1975)*. But see *Moore v. Jas. H. Matthews & Co., 550 F.2d at 1219* ("the **[**16]** requisite power also can be demonstrated by evidence of the exercise of actual control over prices or exclusion of competitors").

HN15[] The second element of a successful monopolization claim requires that the conceded monopolist have engaged in "willful" acts directed at establishing or retaining its monopoly, "as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. at 571, 86 S. Ct. at 1704*. [6] That case found the defendant's acts sufficient to meet the *§ 2* conduct requirement because they constituted "unlawful and exclusionary practices." *Id. at 576, 86 S. Ct. 1698*.

---

addition, See *Hanson v. Shell Oil Co., 541 F.2d 1352, 1357-59 (9th Cir. 1976)*, Cert. denied, ***429 U.S. 1074, 97 S. Ct. 813, 50 L. Ed. 2d 792 (1977)***; *Peltier v. Exxon Corp., 527 F.2d 757, 759 (9th Cir. 1975)*; *Hallmark Industry v. Reynolds Metals Co., 489 F.2d 8, 11-13 (9th Cir. 1973)*, Cert. denied, ***417 U.S. 932, 94 S. Ct. 2643, 41 L. Ed. 2d 235 (1974)***. As the Supreme Court has noted, "(t)he same rule" generally applicable in civil cases "governs in ruling upon motions for directed verdict in treble damage suits under the antitrust laws." *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 696 n.6, 82 S. Ct. 1404, 1409 n.6, 8 L. Ed. 2d 777 (1962)*.

[5] Sherman Act *§ 2*, *15 U.S.C. § 2*, provides:

HN12[] Every person who shall monopolize, or attempt to monopolize . . . any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a felony . . . .

[6] "The Act was deemed by its sponsors not to be applicable to one "who merely by superior skill and intelligence . . . got the whole business because nobody could do it as well.' (T)he exception was an indication that power obtained or maintained by the kind of behavior that competition is thought to foster, if not compel, was immune even though businesses and business opportunities were destroyed in the process. In short, . . . protection of incentives to competitive behavior would prevail over dispersion of market power." C. Kaysen & D. Turner, Antitrust Policy 20 (1959), Quoting 21 Cong.Rec. 3151-52 (1890) (remarks of Sen. Hoar).

[17]** ***HN16***[] The plaintiff need not show that the conceded monopolist's acts were of a kind that would be unlawful for an ordinary enterprise. *Greyhound Computer Corp. v. IBM, 559 F.2d at 498*. Rather, the plaintiff must show that the defendant's acts "unnecessarily excluded competition" from the relevant market. Id. Nor is it necessary to show a specific intent to eliminate a competitor. *Sunkist Growers, Inc. v. Winckler & Smith Citrus Products Co., 284 F.2d 1, 26 (9th Cir. 1960)*, *Modified, 289 F.2d 933 (1961)*, Rev'd on other grounds, *370 U.S. 19, 82 S. Ct. 1130, 8 L. Ed. 2d 305 (1962)*. ***HN17***[] The defendant's acts are properly analyzed analogously to contracts, combinations and conspiracies under *§ 1* of the Sherman Act: the test is whether the defendant's acts, otherwise lawful, were **[*736]** Unreasonably restrictive of competition. [7] See *Gough v. Rossmoor Corp., 487 F.2d 373, 376 (9th Cir. 1973)*. [8] **[**19]** While this "in large measure" has the effect of making acts of monopolization "merely the end products of conduct which violates *§ 1*," "that is not always true." *United States v. Griffith, 334 U.S. 100, 106, 68 S. Ct. 941, 92 L. Ed. 1236 (1948)*. *Section 1* ***HN18***[] is limited to concerted activity and contractual **[**18]** restraints, while under *§ 2*, individual activity may also give rise to liability. See Moore v. Jas. H. Matthews & Co., 473 F.2d at 332-33. [9]

The third element plaintiff's resultant "antitrust" injury has already been discussed, Part II Supra.

2. Attempt to Monopolize

HN19[] There are four elements to a successful claim of *§ 2* attempt to monopolize:

(a) specific intent to control prices or destroy competition with respect to a part of commerce;
(b) predatory or anticompetitive conduct directed to accomplishing the unlawful purpose;
(c) a dangerous probability of success; and
(d) causal "antitrust" injury.

The first element was explained in *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 626, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*, wherein the Supreme Court differentiated the requisite levels of **[**20]** intent under the monopolization and attempt to monopolize clauses of the Sherman Act:

> ***HN20***[] While the completed offense of monopolization under *§ 2* demands only a general intent to do the act . . . a specific intent to destroy competition or build monopoly is essential to guilt for the mere attempt . . . .

The intent to "build monopoly," given the Du Pont definition of monopoly power, is logically synonymous with the intent to control prices or exclude competition in the relevant market. See *Gough v. Rossmoor Corp., 585 F.2d 381, 390 (9th Cir. 1978)*; *Marquis v. Chrysler Corp., 577 F.2d 624, 641 (9th Cir. 1978)*; *Janich Bros., Inc. v. American Distilling Co., 570 F.2d 848, 853 (9th Cir. 1977)*, Cert. denied, *439 U.S. 829, 99 S. Ct. 103, 58 L. Ed. 2d 122 (1978)*;

---

[7] Thus, appellant's contention that "Any act taken by the monopolist satisfies the literal "monopolizes' language of the statute" is overly broad. See *Sunkist Growers, Inc. v. Winckler & Smith Citrus Products Co., 284 F.2d at 23* (after noting that jury instruction susceptible of similar interpretation was overly broad since under it, it was "difficult . . . to see how a monopolist can make any business decision . . . nor how it can make any sale or purchase (for example) at an advantageous price," court held its use not reversible error in view of other instructions which "modified and tempered its broadness").

[8] Rossmoor involved claims under *§ 1* and both the monopolization and attempt to monopolize clauses of *§ 2*. *487 F.2d at 376*. We held that whether the conduct requirement of each of these statutory proscriptions was met depended, under all three clauses, on the effect on "commercial competition: whether the defendant's conduct . . . unreasonably restrains competition in the market place." Id. See also *FTC v. Motion Picture Advertising Service Co., 344 U.S. 392, 397, 73 S. Ct. 361, 365, 97 L. Ed. 426 (1953)* ("when the Sherman Act is involved the crucial fact is the impact of the particular practice on competition"); *Appalachian Coals, Inc. v. United States, 288 U.S. 344, 360, 53 S. Ct. 471, 77 L. Ed. 825 (1933)* (both *§ 1* and *§ 2* "set up the essential standard of reasonableness").

[9] Conversely, not all violations of *§ 1* constitute acts of monopolization under *§ 2*. The monopoly must be "acquired or maintained . . . By means of " the *§ 1* violation, *United States v. Griffith, 334 U.S. 100, 106, 68 S. Ct. 941, 92 L. Ed. 1236 (1948)* (emphasis added), "and not all violations of *§ 1* have the requisite causal effect." 3 P. Areeda & D. Turner, ***Antitrust Law*** P 626, at 81 (1978).

Greyhound Computer Corp. v. IBM Corp., 559 F.2d at 504; *Knutson v. Daily Review, Inc., 548 F.2d at 813-14*; *Lessig v. Tidewater Oil Co., 327 F.2d 459, 474* (9th Cir.), Cert. denied, *377 U.S. 993, 84 S. Ct. 1920, 12 L. Ed. 2d 1046 (1964)*. "Direct ***HN21***[] evidence" of specific intent to control prices or destroy competition, however, is not always necessary when the attempt claim is "founded upon a substantial claim of restraint of **[**21]** trade" i. e., a *§ 1* violation. In these circumstances the requisite specific intent may be inferred. *Trixler Brokerage Co. v. Ralston Purina Co., 505 F.2d 1045, 1051-52 (9th Cir. 1974)*; See **[*737]** *Gough v. Rossmoor Corp., 585 F.2d at 390*; *Janich Bros., Inc. v. American Distilling Co., 570 F.2d at 854*; *Knutson v. Daily Review, Inc., 548 F.2d at 814*; *Bushie v. Stenocord Corp., 460 F.2d 116, 120-21 (9th Cir. 1972)*. Market power is relevant to determining whether such an inference is proper; but where a *§ 1* violation "clearly" exists, proof of market power is unnecessary to support an inference of specific intent. [10] *Janich Bros., Inc. v. American Distilling Co., 570 F.2d at 854 n.4*; *Hallmark Industry v. Reynolds Metals Co., 489 F.2d 8, 12-13 (9th Cir. 1973)*, Cert. denied, *417 U.S. 932, 94 S. Ct. 2643, 41 L. Ed. 2d 235 (1974)*.

[22]** Conversely, "even though the restraint effected may be reasonable under *§ 1*, it may constitute an attempt to monopolize forbidden by *§ 2* if a specific intent to monopolize may be shown." *United States v. Columbia Steel Co., 334 U.S. 495, 531-32, 68 S. Ct. 1107, 1126, 92 L. Ed. 1533 (1948)*. However, "ordinarily specific intent is difficult to prove," *Hallmark Industry v. Reynolds Metals Co., 489 F.2d at 12*; See, e. g., *United States v. Columbia Steel Co., 334 U.S. 495 at 532-34, 68 S. Ct. 1107, 92 L. Ed. 1533*, and thus more commonly it is shown indirectly by proof of illegal conduct and, where necessary, market power.

The "predatory or anticompetitive conduct" element of *§ 2* attempt, like the conduct element of monopolization, encompasses more than violations of *§ 1*. See, e. g., *Knutson v. Daily Review, Inc., 548 F.2d at 814* (attempt requires proof of "some illegal (under *Section 1*) Or predatory activity") (emphasis added). The reason for this was stated in Moore v. Jas. H. Matthews & Co., 473 F.2d at 332:

> *Section 2* is not limited to concerted activity. A jury, therefore, could find that individual actions . . . constituted monopolization or attempted monopolization violating **[**23]** *section 2*, even if it found no concerted activity.

Additionally, "*section 1* also prohibits "contracts' that restrain trade," *Id. at 333*, and since individual actions may violate *§ 2*, no contractual agreement is required. Nonetheless, under *§ 2* attempt as with *§ 1* monopolization individual conduct is measured against the same "reasonableness" standard governing concerted and contractual activity under *§ 1*. See Note 7 Infra; *Greyhound Computer Corp. v. IBM Corp., 559 F.2d at 505 n.37* ("s 2 was intended to prohibit Unreasonable restraints of trade that exclude competition even when they are imposed by a single trader") (emphasis added). [11]

[24]** ***HN23***[] The third element of *§ 2* attempt, the requirement that a defendant's demonstrated specific intent to control prices or destroy competition have a "dangerous probability of success," may be satisfied either by direct proof of market power, See *Janich Bros., Inc. v. American Distilling Co., 570 F.2d at 853*, or by inference from the proven specific intent itself, See *Greyhound Computer Corp. v. IBM Corp., 559 F.2d at 504*. Because this element may be inferred from the existence of a specific intent in proper cases, it is not an "essential" element of an attempt claim, *Lessig v. Tidewater Oil Co., 327 F.2d at 474*. For the same reason, neither is proof of any particular degree

---

[10] ***HN22***[] Since "under the rule of reason market definition is required to establish a *§ 1* violation," such evidence is necessary where specific intent is sought to be shown by inference unless a Per se violation of *§ 1* is made out. *Gough v. Rossmoor Corp., 585 F.2d at 390*; See *Chisholm Brothers Farm Equipment Co. v. International Harvester Co., 498 F.2d 1137, 1140* (9th Cir.), Cert. denied, ***419 U.S. 1023, 95 S. Ct. 500, 42 L. Ed. 2d 298 (1974)***.

[11] See generally *Janich Bros., Inc. v. American Distilling Co., 570 F.2d at 854-58*; *Greyhound Computer Corp. v. IBM Corp., 559 F.2d at 505*; *Chisholm Brothers Farm Equipment Co. v. International Harvester Co., 498 F.2d at 1145*. Because monopoly power is a necessary element of the completed offense of *§ 2* monopolization but is not necessary for attempt, it follows that the same conduct may provide a basis for the monopolization offense and yet be excluded as a basis for the attempt offense. This is so since a defendant's monopoly power or lack thereof is part of the "reasonableness" calculus; conduct reasonable for other firms is not necessarily reasonable for the monopolist.

of market power necessarily an "independent" element of such a claim. *Hallmark Industry* **[*738]** *v. Reynolds Metals Co., 489 F.2d at 12 n.3*. [12]

HN24[] In addition to the first **[**25]** three elements necessary to establish a prima facie case of attempt, the fourth element causal "antitrust" injury is as necessary to confer standing to sue and to support a claim for damages under *§ 2* attempt as it is under *§ 2* monopolization. *15 U.S.C. § 15*; See *Greyhound Computer Corp. v. IBM Corp., 559 F.2d at 505* & n.38; Part II supra.

C. CalComp's Evidence

The foregoing analysis of the elements of *§ 2* monopolization and attempt to monopolize demonstrates that if CalComp presented sufficient evidence to go to the jury on the issue of IBM's monopoly power in a relevant market, both of its *§ 2* claims may be analyzed together. The only remaining elements necessary to establish the monopolization offense in this case would be monopolizing conduct and causal "antitrust" injury. If CalComp failed to show either of these, its attempt claim must necessarily also fail: first, because as discussed Supra, [13] **[**26]** "conduct lawful for a monopolist must, a fortiori, be excluded as a basis for the attempt offense," [14] and second, because the requirement of causal "antitrust" injury is common to both.

1. Market Evidence

Earlier it was noted that CalComp sought to define three relevant product markets: (a) a general purpose computer systems market; (b) an all disk drive and associated controller market; and (c) a plug-compatible disk drive and associated controller market (which excluded disk products for use with the CPU's of other manufacturers). [15] Several experts and industry executives testified, and a great deal of documentary evidence was admitted, in an effort to support each of these market definitions. Not only did the evidence concerning the various market definitions often conflict, but also the testimony and documents purportedly supporting a single market were sometimes internally inconsistent. Still, we assume Arguendo that the third category is an appropriately defined product market. As noted earlier, it is the only market about which CalComp has **[**27]** standing to sue. See Part II Supra.

The evidence of IBM's share of the product markets was similarly irresolute. For example, CalComp introduced the testimony of employees of IBM and other industry members concerning IBM's share of the loosely defined general purpose computer systems market; their estimates ranged from as low as 60% To as high as 80%, while IBM's proof was designed to show that none of these figures was even based on the particular market alleged. CalComp offered expert testimony that in 1970, 1971 and 1972, IBM's share of the all disk drive and associated controller market was 79.4%, 70.1% And 67.6% Respectively, while IBM's evidence was that its share was under 30% During these years: CalComp's figures reflected cumulative shipments of disk products, while IBM's data was based on annual shipments. IBM contended that because its share of market was rapidly declining (from 100% When it invented **[**28]** disk products in 1960 to 25% In 1975), cumulative measures were misleading. In the plug-compatible market, IBM again, because it invented these products began with a 100% Share; here too, CalComp's own evidence showed that IBM's share of market declined steadily.

While the district judge expressly made no finding on the adequacy of proof of share of a relevant market, he noted "in passing" that he was not inclined to direct a **[*739]** verdict solely on that ground. Because we conclude that there was no substantial evidence that any of IBM's alleged acts both constituted unreasonable conduct for a

---

[12] Of course, proof of market power may be necessary to establish specific intent. See note 10 Supra; *Janich Bros., Inc. v. American Distilling Co., 570 F.2d at 854 n.4*.

[13] See note 11 Supra.

[14] 3 P. Areeda & D. Turner, ***Antitrust Law*** P 828, at 321 (1978). As stated there, "(i)t would be perversely illogical to hold a defendant without (monopoly) power liable for conduct practiced with legal immunity by a monopolist."

[15] The data presented by both parties assume that the relevant geographic market is the United States.

monopolist and produced causal "antitrust" injury to CalComp, we need not become enmeshed in the hundreds of pages of conflicting and complex evidence on this element of CalComp's claim. For purposes of this decision, we assume that IBM possessed monopoly power in the third purported market during the period 1963 to 1972.

We may therefore accept, with one important addition, CalComp's statement in its brief that the main issue of this appeal is "whether the Acts and Practices of IBM . . . constitute a violation of either the monopolization or attempt to monopolize clauses of *Section 2* **[**29]** of the Sherman Act, or both." Should we decide this question in the affirmative, the additional question we must answer would be whether any loss CalComp suffered actually resulted from the asserted *§ 2* violation (as opposed to lawful competitive practices).

2. Evidence of *§ 2* Violations

CalComp argues that IBM directly injured it in three ways. Principally, CalComp contends that IBM engaged in "predatory" pricing by cutting its peripheral equipment prices in response to competition from CalComp and other manufacturers. CalComp also attempts to show that IBM made design changes on certain of its CPUs, disk drives and controllers of no technological advantage and solely for the purpose of frustrating competition from plug-compatible manufacturers. Finally, it urges that IBM raised CPU prices in an effort to offset revenue losses caused by its price reductions on peripheral equipment, and that these price increases constituted impermissible conduct for a monopolist. [16]

[30]** a. Price cuts on peripherals

When IBM introduced its new System 370 Model 145 in September, 1970, it designated as the standard disk drive for use with this CPU a reworked version of earlier disk drives that had been replaced by competitive equipment and returned to IBM. The monthly rental for this three-drive disk product, the 2319A, was 30% Below that for IBM's other four-, two-, and single-drive disk products on a per-drive basis in part because the reuse of earlier disk drives permitted reduced development and manufacturing costs. The integrated control function in the Model 145-2319A system was also priced 60% Lower than earlier stand-alone controllers, also due at least in part to cost-saving design changes. As opposed to the System 370 Models 155 and 165, which were "high-end" processors using the newly-designed 3300 high-speed disk product, the Model 145 was to be the lower-priced mainstay of System 370 for commercial applications. Viewing all of the relevant evidence in the light most favorable to CalComp, IBM's purpose in offering the lower-priced 2319A disk drive in conjunction with its Model 145 was twofold: primarily, to regain market share from peripheral equipment **[**31]** manufacturers who were flourishing under IBM's high price umbrella; [17] **[**32]** and secondarily, to reduce the overall **[*740]** price of the 145 system, thereby providing the lower-priced alternative to the higher-performance, higher priced models using the 3300 disk product that was to be

---

[16] CalComp also claims that prior to IBM's price cuts on disk products, it offset losses on CPUs with "monopolistic profits" from its then high-priced disk equipment. Even if we were to accept that CalComp's evidence was sufficient to go to a jury on the issue of whether such an antitrust violation occurred, a directed verdict would still be required because of the lack of any showing of causal injury. CalComp did not introduce substantial evidence (and indeed, would have had difficulty if it had attempted to do so) that it was "injured in (its) business or property by reason of" IBM's High prices on disk products. *15 U.S.C. § 15*. Cf. *Greyhound Computer Corp. v. IBM Corp., 559 F.2d at 499* ("Greyhound can hardly complain of IBM's increase in its rental rates for main frame equipment, since this change could only work to the advantage of leasing companies").

[17] CalComp quoted the chief financial officer of IBM's Data Processing Group as saying, "(w)e have strategically put ourselves into a weak position as a result of IBM's very high profit on disk products." CalComp's Chairman stated that IBM's loss of disk products business "was heading straight toward 100%, like in two or three years," and that IBM "had to react because they were losing so much business that no other choice was open to them. I wouldn't call that a punitive reaction. I'd call it a defense of market position." Another of CalComp's witnesses, a securities analyst who followed the computer industry in general and IBM in particular, testified that IBM "was facing very strong competition in the marketplace" from plug-compatible manufacturers, and that there was "an acceleration in terms of migration to non-IBM equipment." The same witness had earlier described IBM's disk price cuts in one of his reports as "dropping the traditional price umbrella for drive manufacturers." Still another CalComp witness, a former IBM employee, testified that if IBM had not responded to the "accelerating" competition for peripheral equipment sales, it would have lost "most or all" of this business.

the 145's market niche. [18] CalComp introduced no evidence that the lower-priced 2319A was not "substantially profitable," as IBM asserted. [19]

[33]** Three months after the announcement of the 2319A, IBM introduced the 2319B disk drive for use with all System 360 models. Like the 2319A, this was also a "retread" manufactured from older IBM disk drives that had been replaced with other equipment and returned by customers. IBM similarly priced the three- drive 2319B more than 30% Below its other disk drives on a per-drive basis. Also, it made no "additional use" charges (for use above a fixed number of hours per month) for the 2319B as it did with its other disk drives, in effect a further reduction in price Vis-a-vis these other products. [20] **[**34]** The 2319B, viewing all of the evidence in the light most favorable to CalComp, was introduced for the express purpose of abating competitive inroads by other peripheral manufacturers. [21] CalComp introduced no evidence that the 2319B, like the 2319A, was not "substantially profitable." [22]

Following IBM's 2319B announcement, virtually all of the plug compatible manufacturers reduced their own prices below the 2319B. [23] As a further response to this **[*741]** competition, [24] IBM reduced its prices on peripheral

---

[18] Other evidence indicated that by reducing the price of the system, the 2319A also helped IBM in competing with systems manufacturers such as RCA.

[19] IBM's evidence was that the profit on each of its disk products was greater than 20% Of revenue before taxes, and that the 2319A in particular was expected to yield a profit of 33%.

In its Amicus brief, Memorex Corp., another peripheral products manufacturer, contended that IBM's cost accounting system is too "inexact" to rely on for such determinations of profitability. Its argument is that by allocating the fixed cost burden for a particular product in part according to the product's revenues, "costs" are artificially reduced when a product's price is cut, and hence profitability is artificially increased. The evidence at trial, however, supports the single conclusion that IBM indeed fairly expected significant profits from its disk products even after price reductions. In response to IBM's price cuts, CalComp and other manufacturers reduced their prices again below IBM's, with the effect that, according to CalComp, they "received much smaller profit margins" as opposed to incurring losses. CalComp's own evidence established that prior to its price cuts, IBM's projected profits on its disk products ranged from 47% To 58%. In addition, IBM's evidence on profitability that Memorex challenges consisted of its internal calculations relied on at the time the decision to go forward with each product was made. As one of CalComp's experts testified, profit expectations at announcement or introduction of a product at a particular price are the primary consideration in analyzing a firm's pricing behavior. Finally, there is Absolutely no evidence that IBM priced its disk products below marginal cost, which ordinarily is required to show predatory pricing as a means of obtaining or maintaining a monopoly in violation of *§ 2*. See *Janich Brothers, Inc. v. American Distilling Co., 570 F.2d at 855-58*, and text Infra.

[20] CalComp argues on appeal that IBM's failure to cut prices on existing disk products for use with System 360 CPUs to the level of the 2319B constituted "discrimination." Since the 2319B "retread" was available to all IBM System 360 users, however, this fact is of little consequence.

[21] See note 17 Supra.

[22] See note 19 Supra. IBM's evidence was that the 2319B was expected to return a profit before taxes equal to 32% Of revenues.

[23] According to CalComp's Chairman, CalComp, like other plug-compatible manufacturers, generally had to offer discounts from the systems manufacturers' prices in order to convince users to take their copy instead of the original.

[24] CalComp introduced evidence of IBM studies reviewed by IBM management shortly before the announcement of FTP that included an analysis of the extent to which two of IBM's competitors, Telex and Memorex, could afford to increase manufacturing and sales volume and reduce prices on disk products. In particular, the studies concluded that Memorex would remain viable despite IBM's introduction of its 2319 disk drives, and that by 1976 IBM would lose 28.8% Of the plug compatible disk market. IBM's financial group also reported, however, that if Memorex achieved 60% Of the plug-compatible disk market, such rapid growth in marketing overhead and working capital requirements would require substantial additional financing particularly if Memorex met IBM price cuts in the area of 17%-22%.

The obvious concern in these reports to management was the increasing gains by peripheral manufacturers and the lengths to which price competition by Memorex in particular might be carried. Accepting CalComp's inferences from this evidence, FTP products in still another way with the introduction of its Fixed Term Plan ("FTP") on May 27, 1971, described by CalComp as "the single most important act in the CalComp litigation and the principal basis for its damage claim." Prior to the introduction of FTP, IBM offered its products only for sale or 30-day lease, although virtually all of its competitors offered reduced prices for longer leases ranging from one to eight years. Under FTP, IBM customers were given the additional option of an 8% Discount for signing a one-year lease and a 16% Discount for a two-year lease on certain peripheral equipment, principally disk drives, tapes and printers. "Additional use" charges were also eliminated on FTP leases, consistent **[**35]** with the practice of most of IBM's competitors. Customers but not IBM could cancel the leases in return for a termination charge. Purchase prices on FTP products were also reduced by 15%. The evidence at trial was uncontroverted that FTP price reductions were expected to return a profit of 30% Of revenue before taxes. Lease revenues would be reduced through 1972, but through 1975, FTP was expected to generate $ 165 million more profit than would have been the case without FTP lease options. This increased profitability due to FTP stemmed not only from an expected increase in market share, but also from longer average lease lives and reduced sales, reconditioning and reinstallation costs.

[36]** Finally, following its adoption of FTP, IBM introduced two other new products: the Integrated Storage Controller ("ISC") and the Integrated File Adaptor ("IFA"). ISC and IFA were options available for use with certain System 370 models, allowing direct attachment of disk products to the CPU. Customers choosing one of these "inboard" storage control units could save money by avoiding purchase or lease of a separate controller for some of their disk products, because the price of the ISC and IFA options were lower. Thus, ISC and IFA represented price cuts Vis-a-vis IBM's "outboard" controllers. [25] However, there is little evidence in the record that the ISC and IFA inboard storage control units were priced in response to competition. Rather, the evidence indicates that these products were less expensive to produce. CalComp's chairman, for example, testified that IFA enabled the CPU to perform functions "which had been performed in the standalone controller," at a "much cheaper" cost of design and manufacture. For purposes of analysis, however, we will assume that the IFA and ISC options, like the 2319A, 2319B and FTP products, were priced primarily in response to competition from the **[**37]** plug compatible manufacturers.

The test of the reasonableness of the foregoing pricing actions, and the principal question facing us in this case, is whether IBM which was the inventor and dominant supplier of the disk products in question had the right to respond to the lower prices of its competitors with reduced, **[*742]** but still substantially profitable, prices on its own products. We conclude that it did.

CalComp's principal damages claim is for lost revenues as a result of price reductions it made following IBM's 2319B and FTP announcements. [26] But since these price reductions admittedly resulted from competition by IBM and since, as both CalComp's and IBM's evidence clearly demonstrates, IBM's stimulus to price competition was in turn competition from peripheral **[**38]** equipment manufacturers such as CalComp it is impossible to say that CalComp's losses represent compensable "injury" from acts of IBM unnecessarily Excluding or Restricting competition. See *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701* . Rather, IBM's price cuts were a part of the very competitive process the Sherman Act was designed to promote. To accept CalComp's position would be to hold that IBM could not compete if competition would result in injury to its competitors, an ill-advised reversal of the Supreme Court's pronouncement that the Sherman Act is meant to protect the competitive process, not competitors. See id.

In Grinnell, as noted Supra, the Supreme Court excepted from monopolizing conduct those actions directed toward **[**39]** establishing growth by means of "a superior product, business acumen, or historic accident." *384 U.S. at 571, 86 S. Ct. at 1704*. IBM's dominance in disk products, of course, was not due to historic accident.

was a direct response to these competitor gains, and the level of FTP price cuts was determined by IBM's estimation of the extent of its competitors' willingness to lower prices still further.

[25] CalComp's argument that ISC and IFA, by placing part of the control function "inboard," were designed solely to preclude plug-compatible manufacturers from part of the controller market is discussed under the heading "Design Changes" Infra.

[26] CalComp attributed its price reductions and consequent lost revenues solely to the 2319B and FTP price reductions. We need not discuss the resultant question of causation with respect to IBM's other price cuts in view of our result.

CalComp witnesses repeatedly testified that IBM's position and success were due to its capable management, technological leadership, market orientation and superior products. Particularly relevant is the fact that IBM invented the disk products that CalComp and other manufacturers copied. As one of CalComp's witnesses, a former chairman of Scientific Data Systems, acknowledged, "IBM pioneered in the use of moveable head disk technology . . . ." More bluntly, according to CalComp's Chairman:

> (I)f they (IBM) weren't there and hadn't created the market and hadn't made installations, we wouldn't have any market at all. So it's hard to call the guy who's created your opportunity a competitor although certainly IBM doesn't give up easily on any particular order.

Granted that IBM's technological innovations resulted in "growth as a consequence of a superior product," it was entitled to maintain its consequent dominant position in the market it created through "business acumen," **[**40]** which we take to include shrewdness in profitable price competition. ***HN25***[] The Sherman Act does not draw a distinction between competition on the bases of price and of performance: the two are inseparable parts of any competitive offering. Where the opportunity exists to increase or protect market share profitably by offering equivalent or superior performance at a lower price, even a virtual monopolist may do so. Cf. *United States Steel Corp. v. Fortner Enterprises, Inc., 429 U.S. 610, 612 n.1, 97 S. Ct. 861, 864, n.1, 51 L. Ed. 2d 80 (1977)* (in attempt context, purposes of " "increasing sales' and "increasing market share' are normal business goals, not forbidden by *§ 2*" without more). As Judge Aldrich observed in *Dehydrating Process Co. v. A. O. Smith Corp., 292 F.2d 653, 657 (1st Cir. 1961)*, "the antitrust laws do not require a business to cut its own throat."

The boundaries of reasonable price competition have recently been defined in this circuit. In *Hanson v. Shell Oil Co., 541 F.2d 1352, 1359 (9th Cir. 1976)*, Cert. denied, *429 U.S. 1074, 97 S. Ct. 813, 50 L. Ed. 2d 792 (1977)*, we affirmed a directed verdict for a defendant charged with attempted monopolization, holding that the **[**41]** plaintiff's failure to show that the defendant's prices were below its marginal or average variable costs [27] "was a failure as a matter of law to **[*743]** present a prima facie case under *§ 2*." More recently in Janich Brothers, also an attempt case, we stated that " "pricing at marginal cost is the competitive and socially optimal result' " of *§ 2* enforcement. *570 F.2d at 857*, Quoting Areeda & Turner, Predatory Pricing and Related Practices Under *Section 2* of the Sherman Act, 88 Harv.L.Rev. 697, 711 (1975). The analysis in Hanson and Janich Brothers is precisely apposite in the monopolization context. Indeed, the preceding passage quoted in Janich Brothers dealt specifically with pricing by a monopolist. The thrust of this analysis is that price reductions up to the point of marginal cost are consistent with competition on the merits, since in this case only less efficient firms will be disadvantaged, while a firm pricing below marginal cost by definition incurs losses, so that competition on the basis of efficiency in this situation is frustrated.

[42]** We recognize that refinement of the marginal or average variable cost test will be necessary as future cases arise. For instance, limit pricing by a monopolist might, on a record which presented the issue, be held an impermissible predatory practice. See, e. g., P. Areeda & D. Turner, ***Antitrust Law*** P P 711-722 (1978); Williamson, Predatory Pricing: A Strategic and Welfare Analysis, 87 Yale L.J. 284 (1977); Areeda & Turner, Williamson on Predatory Pricing, 87 Yale L.J. 1337 (1978); Williamson, A Preliminary Response, 87 Yale L.J. 1353 (1978); Scherer, Predatory Pricing and the Sherman Act: A Comment, 89 Harv.L.Rev. 868 (1976); Areeda & Turner, Scherer on Predatory Pricing: A Reply, 89 Harv.L.Rev. 891 (1976); Scherer, Some Last Words on Predatory Pricing, 89 Harv.L.Rev. 901 (1976). And we do not foreclose the possibility that a monopolist who reduces prices to some point above marginal or average variable costs might still be held to have engaged in a

[27] "Marginal cost" refers to the variable cost of the last unit of output, while "average variable cost," appropriately, refers to the average variable cost of all units. See Janich Brothers, 570 F.2d at 857 n.8, 858 n.11. Hanson determined that "because marginal cost is often impossible to ascertain" average variable cost was a sufficient judicial surrogate, *541 F.2d at 1358*; Janich Brothers concurred that "average variable cost is likely to approximate marginal cost." *570 F.2d at 858*. Given the variation in cost accounting systems among business firms and the likelihood of the significant differences in capacity utilization from case to case, we expect that acceptance of this rule of thumb would first require careful scrutiny of the particular facts in a case where the defendant's prices are very near average variable cost. That is not the case here.

predatory act because of other aspects of its conduct. On this record, however, IBM's pricing policies were not predatory.

The case before us presents an A fortiori situation as compared to Hanson and Janich Brothers. CalComp has not **[**43]** only failed to produce evidence of pricing below marginal or average variable cost, but it has also failed as well to introduce any evidence to controvert IBM's substantial proof that its price cuts were highly profitable. Moreover, the evidence of both parties established that IBM's disk price reductions were a response to lower-priced competition to which IBM was rapidly losing its disk business. Were *§ 2* interpreted not to exempt price cuts from attack under these circumstances, there could be no adequate guidelines for a jury to decide the issue of whether the prices at issue were "reasonable." The directed verdict as to CalComp's claims based on IBM's price competition was therefore proper.

b. Design changes

As noted above, when IBM introduced its System 370 Model 145 in September, 1970, it announced the 2319A as the standard disk product for use with the 145. The control function for the 2319A disk drive was integrated into the Model 145 CPU, and thus the interface between the disk drive and its control function was different from earlier models. [28] CalComp claimed that it was competitively disadvantaged as a result of these design changes, because it could not legally begin **[**44]** to copy the 2319A until IBM shipped the first of these disk drives, thereby disclosing the design requirements.

[*744] In February, 1971, IBM introduced its optional Integrated Storage Controller for use with its System 370 Models 158 and 168 which integrated the disk control function into the CPU. CalComp claimed it was injured by the introduction of ISC and the similar IFA, described above, because it was thereby precluded from replacing the control functions on CPUs with these options. [29]

[45]** CalComp characterized these design changes as "technological manipulation" which did not improve performance. It also complained of the fact that the newly integrated functions were priced below their non-integrated counterparts. But as we have stated, price and performance are inseparable parts of any competitive offering; and equivalent function at lower cost certainly represents a superior product from the buyer's point of view. The evidence at trial was uncontroverted that integration was a cost-saving step, consistent with industry trends, which enabled IBM effectively to reduce prices for equivalent functions. Moreover, there was substantial evidence as well that in the case of Models 145, 158 and 168 the integration of control and memory functions also represented a performance improvement.

One of CalComp's witnesses stated: "I think in general the manufacturer will try and minimize his costs and where he integrates the control unit the assumption must be that he is achieving a lower cost solution." [30] **[**47]** Other of CalComp's evidence showed that among the reasons a separate control unit is more expensive than integrated control circuitry are that the former requires its own cabinet, **[**46]** frames, power supply, additional cabling and electronics. According to an IBM witness, the monolithic systems technology that preceded the 145-2319A system required a large standalone controller, whereas the new generation technology represented by the 145-2319A system produced a comparable control function "which was in the area of ten times smaller . . . . (Y)ou could now

---

[28] Unlike the 2319A, the 2319B introduced for use with all System 360 models attached to IBM's 2314 stand-alone controller.

[29] The System 370 Models 158 and 168 also featured substantial minimum memory integrated within the CPU. CalComp claimed that this redesign injured add-on memory manufacturers by making it impossible for them to compete for the integrated portion of these models' memories.

[30] This same witness reported that the inclusion of a minimum memory capacity within the CPU was made possible by the reduction in memory size, "reflecting the product evolution from relatively large magnetic cores to high density semi-conductor packaging." He continued:

As the basic cycle speed of the memory increases, it becomes important to minimize the distance between components. It may well be impractical to keep the new memories external to the processor . . . .

put that into the 145 system, utilizing its frames and its covers and then passing on the advantages of that to the customer in a price reduction." CalComp's Chairman stated that as a result of integration, the customer uses less floor space which "tends to be relatively expensive in a computer room." [31]

IBM, assuming it was a monopolist, had the right to redesign its products to make them more attractive to buyers whether by reason of lower manufacturing cost and price or improved performance. It was under no duty to help CalComp or other peripheral equipment manufacturers survive or expand. IBM need not have provided its rivals with disk products to examine and copy, See 3 P. Areeda & D. Turner, ***Antitrust Law*** P 738, at 286 (1978), nor have constricted its product development so as to facilitate sales of rival products. The reasonableness of IBM's conduct in this regard did not present a jury issue.

c. **[**48]** Increases in CPU prices

In July, 1971, IBM announced price increases on certain of its CPUs of up to 8%. **[*745]** The weighted average price increase of all CPUs was 1.5%. CalComp argued that these price increases, instituted two months after FTP was announced, were designed to offset the short-term revenue losses expected from FTP price cuts. After FTP users were "locked into" IBM peripherals for one or two year lease terms, according to CalComp, they would be unable to change CPUs, thus enabling IBM to raise CPU prices without appreciably affecting demand or profitability.

However, CalComp's own evidence indicated that the net effect of FTP and the CPU price increases was not expected to be a "wash" with respect to either CPU demand or overall profitability. CalComp introduced an IBM memo written after the CPU price increases went into effect stating that "the net effects of the Fixed Term Plan and (CPU) price change will probably be a wash insofar as Business volumes are concerned." (Emphasis added). The author of this memo went on to explain that FTP would have the effect of increasing peripheral volume, while the CPU price increases would probably induce "adverse reaction **[**49]** on the part of some customers . . . ." In terms of overall business volume, the author concluded, "(a)ny decrease in system acceptances which occurs will probably be offset by . . . the Fixed Term Plan." In other words, there was not a single demand function for CPUs and peripherals; IBM did not expect to raise CPU prices "with impunity," as CalComp asserts, by virtue of the effects of FTP.

Moreover, there was no evidence that CPU price increases actually offset the FTP price cuts. According to CalComp's amended complaint, "peripheral devices . . . account for between 50% And 75% Of the total value of a system configuration." The trial testimony of Richard Whitcomb, Director of Product Planning at Itel and a former IBM employee, and Edwin McCollister, Director of Market Development at Burroughs, confirmed this. Since, as discussed Supra, the FTP price cuts amounted to 8% And 16%, a jury would be hard pressed to conclude from CalComp's evidence that the CPU price increases in fact offset FTP losses i. e., that a weighted average price increase of 1.5% On CPUs made up for price cuts of 8% And 16% On peripheral products of equal or greater value.

Other evidence portrayed IBM's decision **[**50]** to raise CPU prices as motivated by inflation and cost concerns. IBM had not raised its mainframe prices in over four years; its 1971 increases were approved as cost-justified by the newly-formed Price Commission under the Economic Stabilization Program then in effect.

Viewed in the light most favorable to CalComp, this evidence does not provide support for its "offset" theory. Especially since we have already determined that the FTP price cuts allegedly facilitated by the CPU price

---

[31] In *Telex Corp. v. IBM Corp., 367 F. Supp. 258, 304 (N.D.Okl.1973)*, Rev'd on other grounds, *510 F.2d 894 (10th Cir. 1975)*, dealing with a different record developed from the same underlying facts, the district court found with respect to IFA and ISC that there had been a "preponderant showing that these integrations represented a legitimate technological and performance advance consistent with trends in the industry and at significant decreased cost." No appeal was taken from this ruling.

increases were themselves profitable and reasonable even for a monopolist in any event, [32] it was proper to take the case from the jury on this issue.

[51]** IV. Conclusion

In its Amicus brief, the Department of Justice questioned that the district court could have directed a verdict in view of the complexity of the facts in this case. CalComp, too, contends that "this Court has (neither) the power (nor) obligation, to sift through the record to determine who should prevail" on appeal from the district court's directed verdict.

HN26[] The complexity of a plaintiff's case, however, does not entitle it to avoid a directed **[*746]** verdict if the evidence no matter how much of it there may be is weak. It is in fact the duty of both the trial and appellate courts to "sift through the record" to make this determination. Having closely analyzed each of CalComp's arguments and the evidence on both sides in support thereof, drawing all reasonable inferences in CalComp's favor, we conclude that the district judge was correct in taking the case from the jury.

(37) Nor does viewing the various acts of IBM collectively change our conclusion. The number of legal and evidentiary issues has required us to consider each instance of IBM's alleged monopolizing conduct separately for purposes of analytical clarity. However, we are mindful of the fact that **[**52]** "plaintiffs should be given the full benefit of their proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each." *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 1410, 8 L. Ed. 2d 777 (1962)*; See *Knutson v. Daily Review, Inc., 548 F.2d 795, 814 (9th Cir. 1976)*. But there can be no synergistic result such as CalComp claims from a number of acts none of which show causal antitrust injury to CalComp.

In Continental Ore, the Supreme Court held that the plaintiffs were entitled to introduce evidence "that there was a conspiracy and monopolization in existence when they came into the industry, And that they were eliminated in furtherance thereof." *370 U.S. at 710, 82 S. Ct. at 1416* (emphasis added). Such proof connecting the acts allegedly directed against systems manufacturers and leasing companies to the acts affecting CalComp was lacking in this case. Moreover, even assuming that IBM gained monopoly power in a relevant market by virtue of the former categories of acts, the latter acts constituted reasonable, pro-competitive conduct for a monopolist. CalComp suffered no "antitrust" **[**53]** injury from these, nor indeed any injury at all as that term is defined in § 4 of the Clayton Act. See *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*.

Accordingly, the judgment of the district court entered on its directed verdict is

AFFIRMED.

End of Document

[32] In its Telex decision, the Tenth Circuit held that IBM's conduct in this regard was not violative of *§ 2*, focusing on the profitability of both the CPU and FTP prices rather than on IBM's possible motivation. Regardless of intent, the court implied, *§ 2* condemns only the monopolist's "use of monopoly power," and the facts in Telex showed that IBM's lowering peripheral prices and raising CPU prices was not a case of "an economic giant (dropping) prices to a level where it is not receiving an adequate return and . . . instead (relying) on its reserves or other activities to continue producing and marketing the particular product." See *510 F.2d at 925-26*.

Outboard Marine Corp. v. Pezetel

United States District Court for the District of Delaware

June 22, 1979

Civ. A. No. 77-51

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > Sham Exception

HN3[] **Noerr-Pennington Doctrine, Right to Petition Immunity**

The antitrust immunity conferred by the Noerr-Pennington Doctrine is not absolute. The Supreme Court recognized in Noerr that a case could arise in which the conspiracy involving political activity was a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor and (in such a case) the application of the Sherman Act would be justified.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN4[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

There are many forms of illegal and reprehensible practice which may corrupt the administrative or judicial processes and which may result in antitrust violations. Misrepresentations, condoned in the political arena, are not immunized when used in the adjudicatory process. Such misconduct could not be deemed "political expression," entitled to antitrust immunity. As examples of the types of conduct not immunized in the adjudicatory setting: perjury, bribery, a conspiracy in which a governmental authority participated and fraud.

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN5[] **Pleadings, Rule Application & Interpretation**

Fed. R. Civ. P. 8 does not require a detailed statement of facts, but it does require a plain statement showing entitlement to relief, not conclusions of law.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN6[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

There is no privilege to resort to governmental processes as a sham or in bad faith.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN7[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

There certainly is no privilege for misrepresentations to administrative agencies which base their decisions on information provided by the parties.

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] **Antitrust & Trade Law, Sherman Act**

Isolated instances of unethical business practices do not rise to the level of Sherman Act § 1 liability.

Opinion by: SCHWARTZ

Opinion

[*170] OPINION

In this civil antitrust action, the plaintiff Outboard Marine Corporation ("OMC") has moved for the dismissal of the defendants' Counterclaim for failure to state a claim upon which relief can be granted pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. The Counterclaim has been asserted by Pezetel and Melex, Inc., two of the three remaining defendants in this litigation. [1.] Pezetel is a trade organization of the People's Republic **[**2]** of Poland and a manufacturer and exporter of electric golf carts to the United States. Melex USA, Inc., is its wholly owned subsidiary and as such, it functions as a domestic distributor of Pezetel's golf carts in those territories where Pezetel has not established a relationship with a domestic distributor. [2.] The plaintiff, Outboard Marine Corporation, is an American manufacturer whose subsidiary, Cushman, formerly manufactured gas and electric golf carts and has now been dissolved.

A detailed description **[**3]** of the American golf-cart market has already been set forth in this Court's prior opinion on defendants' motion to dismiss. See *Outboard Marine Corporation v. Pezetel, 461 F. Supp. 384 (D.Del.1978)*, and will only be repeated here to the extent necessary to provide a background for an illustration of the bases upon which the defendants' Counterclaim rests. In 1970 a predecessor of Pezetel, Electrim Foreign Trade Company for Electrical Equipment, Ltd., commenced manufacturing of an electric golf cart duplicative of one sold in the American market. Three years later, Pezetel succeeded Electrim as a Polish manufacturer and it then brought Melex into existence, a wholly owned subsidiary incorporated in Delaware, and at about the same time established agreements with several American distributors. In that year Polish-made golf carts constituted seventeen percent of the United States electric golf cart market and by 1975, Melex carts allegedly represented thirty-five percent of sales in the electric golf cart market in the United States. Meanwhile, OMC, unable to meet Pezetel's low prices, gave up the manufacture of electric and gas golf carts in 1975. In 1977, it filed this suit seeking **[**4]** treble damages resulting from its declining sales and eventual departure from the market place.

All defendants moved to dismiss the complaint for failure to state a claim on a number of grounds, none of which are particularly **[*171]** relevant to the present motion. Suffice it to say that as a result of their motion, several of plaintiff's counts and claims against two defendants were dismissed.

---

1. On an earlier motion to dismiss the complaint for failure to state a claim, this Court ruled that several of the distributors against whom a cause of action had been asserted were not amenable to this Court's jurisdiction. *Outboard Marine Corporation v. Pezetel, 461 F. Supp. 384 (D.Del.1978)*. Ross Products and Fern Clo Golf Car, Inc., the only independent domestic distributors of Polish golf carts still in the litigation after the motion to dismiss, are not parties to the counterclaim.

2. *Id. at 389*.

HN1[] On a motion to dismiss for failure to state a claim, this Court is of course bound to construe the Counterclaim in the light most favorable to the defendants, taking all facts stated therein and all reasonable inferences therefrom as admitted. *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*. Defendants' Counterclaim contains four operative paragraphs, paraphrased below: (1) Counterclaim P 16: OMC, in conspiracy with other manufacturers of golf carts, has "misused and abused" governmental processes by submitting complaints, petitions, testimony and other information to federal governmental agencies and offices including but not limited to the Treasury Department and United States Customs Service, the International Trade Commission, the Congress of the United States, **[**5]** and the federal court. (2) Counterclaim P 17: OMC and its coconspirators submitted to the Treasury Department and the United States Customs Service "knowingly false information" respecting the prices of electric golf carts built in Canada, in the course of agency proceedings that resulted in the imposition of dumping duties against Pezetel's distributors and eventually against Melex. (3) Counterclaim P 18: OMC conspired with other American manufacturers of golf carts to engage in "a joint program of threatened litigation and publicity." (4) Counterclaim P 19: OMC joined with other manufacturers in order to falsely convey to potential Melex customers that Melex "was about to go out of business." Although the Counterclaim is not crystal clear with respect to the precise impact of each of these challenged practices upon the financial well-being of Pezetel in the market place, the Counterclaim alleges that all four courses of action were undertaken with the intent "to arouse fear among (Pezetel's) distributors that they would be required to pay dumping duties or post bonds for the payment of such duties, and by arousing fear among customers of the prospective discontinuance of service **[**6]** and spare parts by Melex."

As to the first two charges above, the plaintiff invokes the immunity of the Noerr-Pennington doctrine, discussed more fully below. Both the claim of disparagement and the charge relating to the publicity campaign, PP 18, 19, do not implicate that doctrine and thus will be discussed separately.

I. SHERMAN ACT CLAIMS

A. APPLICATION OF THE NOERR-PENNINGTON DOCTRINE TO THE ALLEGATIONS OF THE COUNTERCLAIM

In *Eastern Railroad Presidents Conference v. Noerr Motor Freight, 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*, and *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*, the Supreme Court held that *HN2*[] collaborative efforts by competitors to influence the legislative or executive branch of the government were immune from antitrust scrutiny even though undertaken with anti-competitive intent. "No violation of the (Sherman) Act can be predicated upon mere attempts to influence the passage or enforcement of laws." *Eastern Railroad Conference v. Noerr Motor Freight, Supra, 365 U.S. at 135, 81 S. Ct. at 528*. The Supreme Court founded its decision in Noerr upon two considerations:

> In the first place, such a holding (that **[**7]** the Sherman Act applied to efforts to influence the passage or enforcement of laws) would substantially impair the power of government to take action through its legislature and executive that operate to restrain trade. In a representative democracy such as this, these branches of government act on behalf of people and, to a very large extent, the whole concept of representation depends upon the ability of the people to make their wishes known to their representatives. . . . Secondly, and of at least equal significance, such a construction of the Sherman Act would raise important constitutional questions. The right of petition is one of **[*172]** the freedoms protected by the *Bill of Rights*, and we cannot, of course, lightly impute to Congress an intent to invade these freedoms.

365 U.S. at 137-38, 81 S. Ct. at 529-530.

HN3[] The antitrust immunity conferred by the Noerr-Pennington Doctrine is not absolute, however. The Supreme Court recognized in Noerr that a case could arise in which the conspiracy involving political activity was "a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor and (in **[**8]** such a case) the application of the Sherman Act would be justified." *Id. at 144, 81 S. Ct. at 533*. Until the Supreme Court's decision in *California Motor Transport v. Trucking Unlimited, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*, the scope of the so-called "sham" exception remained unexplored. In California Motor

Transport, several trucking firms brought suit against some of their competitors alleging that the latter had conspired "to institute state and federal proceedings to resist and defeat applications by (plaintiffs) to acquire operating rights or to transfer or register those rights." *Id. at 509, 92 S. Ct. at 611*. The Supreme Court held that a claim had been stated under the Sherman Act. What provoked the invocation of the "sham" exception were allegations in the complaint:

> that the power, strategy, and resources of the petitioners (defendants) were used to harass and deter respondents in their use of administrative and judicial proceedings so as to deny them "free and unlimited access" to those tribunals. The result, . . ., was that the machinery of the agencies and the courts was effectively closed to (plaintiffs), and petitioners indeed became "the regulators **[**9]** of the grants of rights, transfers and registrations" to respondents thereby depleting and diminishing the value of the businesses of respondents and aggrandizing petitioners' economic and monopoly power.

Id. at 511, 92 S. Ct. at 612 (citation omitted). Most troublesome to the Supreme Court were allegations that the concerted efforts of the defendants to bar the plaintiffs from any and all access to administrative and judicial tribunals "with or without probable cause, and regardless of the merits of the cases" resulted in a deprivation of meaningful access to the agencies and courts. Although the Court painstakingly emphasized that the Noerr-Pennington immunity extended to the adjudicatory setting, it distinguished between unethical practices in the legislative setting and unethical conduct in an adjudicatory proceeding: ***HN4***[] "There are many other forms of illegal and reprehensible practice which may corrupt the administrative or judicial processes and which may result in antitrust violations. Misrepresentations, condoned in the political arena, are not immunized when used in the adjudicatory process." *Id. at 513, 92 S. Ct. at 612*. Such misconduct, the Court emphasized, could not **[**10]** be deemed "political expression," entitled to antitrust immunity. Id. As examples of the types of conduct not immunized in the adjudicatory setting the Court listed perjury, bribery, a conspiracy in which a governmental authority participated and fraud. *Id. at 512-13, 92 S. Ct. 609, 613*.

Paragraph 16 of the Counterclaim contains a variety of broadly worded and nonspecific charges that OMC has participated in or instituted a variety of baseless and harassing proceedings and has "abused and misused" the governmental process in a large number of governmental forums, "including but not limited to the United States Treasury Department and Customs Service, the International Trade Commission, the Congress of the United States, and the federal court." OMC argues that this charge is conclusory in its entirety, failing to specify what legal proceedings or what testimony before Congress was objectionable and on what ground, and therefore fails to comply with the minimal notice-pleading standards of *Rule 8* because OMC cannot discern what behavior must be defended. Moreover, OMC refers to a thread in the Noerr-Pennington case law that requires more specific pleading of facts arguably protected **[**11]** by the Noerr-Pennington Doctrine to counteract any possible "chilling" of *First Amendment* rights:

> **[*173]** (T)o state a claim for relief under the (California Motor Transport) exception, a complaint must include allegations of the specific activities, not protected by Noerr, which plaintiffs contend have barred their access to a governmental body.
>
> In holding that plaintiffs' allegations are insufficient in this case, we are not adopting a rule that so-called "fact" pleading, as distinguished from "notice" pleading, is required in antitrust cases. . . . What we do hold is that in any case, whether antitrust or something else, where a plaintiff seeks damages or injunctive relief, or both, for conduct which is prima facie protected by the *First Amendment*, the danger that the mere pendency of the action will chill the exercise of *First Amendment* rights requires more specific allegations than would otherwise be required.

Franchise Realty Interstate Corp. v. San Francisco Local Joint Executive Board, 542 F.2d 1076, 1082-83 (9th Cir. 1976) (citations omitted), Cert. denied, *430 U.S. 940, 97 S. Ct. 1571, 51 L. Ed. 2d 787 (1977)*. [3] **[**14]** The Court

---

[3] To like effect is the thesis of the writer of Note, Limiting the Antitrust Immunity for Concerted Attempts to Influence Courts and Adjudicatory Agencies: Analogies to Malicious Prosecution and Abuse of Process, 86 Harv.L.Rev. 715, 725 (1973), which

agrees that P 16, conceded **[**12]** by defendant to be a "general" allegation, [4.] cannot stand alone. In so holding, however, the Court does not intimate that the higher pleading standard of Franchise Realty is adopted. The broadly worded claim simply encompasses too many unformulated subsidiary allegations. For example, the Counterclaim mentions some agencies specifically but intimates that others have also been subjected to abuse by OMC. Most perplexing is the language "including but not limited to." Moreover, the misconduct alleging "misusing and abusing governmental process" and the submission of "sham, false and misleading allegations and information without regard to the truth or merits made," [5.] does little or nothing to put the plaintiff on notice. Obviously, ***HN5***[] *Rule 8* does not require a detailed statement of facts, but it does require a plain statement showing entitlement to relief, not conclusions of law, like "misusing and abusing" and "sham, false and misleading," and vague references to generalized abuses in a variety of unspecified governmental forums. Such conclusory phraseology begs the question. See *Franchise Realty, supra at 1079*; *Clayton v. Clayton Bank, 424 F. Supp. 163, 166 (E.D.Mo. 1976)*. [6.] It is **[**13]** concluded that to the extent that P 16 was intended by the defendants to stand alone as a claim under the Sherman Act, it is hopelessly vague and would have to fail. As a consequence, Pezetel-Melex's claim that OMC has "abused and misused" Congress and unnamed federal agencies will be dismissed. The language relating to Pezetel-Melex's economic injury, however, will be deemed to have survived and read as applicable to each remaining operative paragraph. The charge of abuse of the federal court contained in P 16, however, creates problems of its own and will be discussed below.

[*174] Despite the breadth of the introductory paragraph, later claims, taken together with briefs and oral argument, demonstrate that the charges against OMC relating to the Noerr-Pennington Doctrine, **[**15]** focus on two distinct undertakings: (1) OMC has harassed the defendants by filing and/or threatening to file baseless and harassing lawsuits in the outcome of which OMC has no real interest. (2) OMC submitted or caused to be submitted knowingly false information to the Treasury Department and the United States Custom Service respecting the prices of golf carts built in Canada, with the intent and hope that the Department would determine that Pezetel-Melex was selling golf carts at less than their fair market value and that dumping duties would then be assessed, causing defendants competitive injuries. Discussed first will be the allegations respecting "threatened" and/or actual litigation, and then attention will be turned to the charge that OMC conspired with others to submit knowingly false information to a federal agency.

Unfortunately, a reading of the Counterclaim does not reveal whether defendants' antitrust claim involves the Threatening Of lawsuits, as P 18 of the Counterclaim suggests in the language: "OMC combined and conspired with (others) to engage in a joint program of threatened litigation and publicity" or alternatively, whether defendants claim that OMC has actually **[**16]** commenced harassing and baseless suits in federal court, as P 16 suggests. At oral argument counsel for defendants stressed the latter point, whereas P 18 itself focuses on a course of action that falls short of actual litigation. To the extent that the "joint program of threatened litigation" took the form of a publicity campaign and that no actual litigation was contemplated, the allegation involves the Noerr-Pennington

---

suggests the burden of proving misconduct before an administrative tribunal be upon clear and convincing evidence, to prevent a chilling of *First Amendment* rights. At this stage of the proceedings, of course, the Court need not address the question whether a higher standard of proof should apply to the charges of the Counterclaim.

4. Doc. 70 at 100.

5. *Doc. 48 P 16*.

6. Specific identification of the governmental agency is particularly significant in the Noerr-Pennington area because the scope of the defense widens with the discretion of the forum. Professors Areeda and Turner emphasize:

HN6[] (T)here is no privilege to resort to governmental processes as a "sham" or in bad faith. Identifying such situations is difficult least difficult for judicial processes, more difficult for administrative adjudication, much more difficult for executive processes where it is virtually impossible to identify the "sham."

The breadth of a government organ's discretion indicates the sweep of facts and arguments which may legitimately be presented to it. In a political forum, almost no contention can be characterized categorically as frivolous.

Areeda & Turner, ***Antitrust Law*** I, P 203c at 44 (1978) (hereinafter "***Antitrust Law*** ").

Doctrine only peripherally, if at all, since no exercise of the *First Amendment* right of petition would have been implicated in a mere publicity campaign directed at the public generally and only at government incidentally. As such, the allegation will be discussed below in connection with the claim of business disparagement. [7.] To the extent that it is suggested by P 18, either alone or in combination with the abuse of judicial process charge of P 16, that OMC threatened to bring lawsuits against the defendants that it had every intention of actually filing, this Court agrees with the court in Clairol, Inc. v. Boston Discount Center, 1976-2 Trade Cas. P 61,108, at 70,021 (E.D.Mich.1976), that if resort to the courts is protected by Noerr-Pennington, then threats **[**17]** to do so, without more, are likewise immune from liability.

The Counterclaim P 16, however, may quite generously be read to allege that OMC has actually brought abusive and harassing suits in federal court. At oral argument, counsel of defendants amplified on this allegation by suggesting that the inference be drawn that Outboard Marine has abused the judicial process to Pezetel-Melex's antitrust injury by filing frivolous lawsuits in Michigan and North Carolina against two of Pezetel's distributors, Boylan, Inc., and Eddietron, Inc., respectively, both entities having been dismissed as parties to this lawsuit for lack of in personam jurisdiction. [8.] It is argued by the defendants that the baselessness of the lawsuits is obvious from the very economic nature of the defendant distributors. Because golf-cart distributorships are such low capital-investment enterprises, OMC cannot and does not reasonably expect to recover from them the losses attributable to OMC's **[**18]** demise as a golf-cart manufacturer, and hence the only purpose of such a maneuver, defendants argue, must be to harass. More specifically, it is urged that the plaintiff filed the suits against unlikely defendants in an effort to intimidate the distributors and harass Pezetel-Melex. The defendants have not alleged that OMC has acted illegally or improperly in its conduct of the litigation, but merely that the litigation was commenced for no reason other than its harassment value.

[*175] Because the spectre of the North Carolina and Michigan suits as an embellishment upon the Counterclaim only arose at oral argument, OMC has not squarely addressed the merits of Pezetel-Melex's contentions. [9.] It is held, however, that the defendants' allegation respecting abuse of the federal court, must be rejected for the reason that Pezetel-Melex has not shown, either by factual allegations or argument, that these suits are harassing and baseless other than by merely **[**19]** denominating them as such. First, no great effort need be expended in emphasizing that the merits of the lawsuits, as distinct from the particular parties named, are identical to those of the case presently pending before this Court. [10.] OMC's complaint here has in measure survived a motion to dismiss and no question exists that this litigation is not frivolous on its merits. [11.]

[20]** If the merits of the North Carolina and Michigan suits are not baseless, and the Court is confident in holding that any complaint identical to the one filed here is not, then defendants are left with their theory that harassment should be inferred from the relative impecunity of the distributors, Boylan and Eddietron. As defendants point out, however, Outboard Marine is no longer a participant in a golf-cart market and cannot be seriously interested in

---

7. See notes 20-21 Infra and accompanying text.

8. *Outboard Marine Corp. v. Pezetel, Supra at 393*.

9. OMC has, however, voiced a continuing objection to the sufficiency of the Counterclaim on the basis that a "pattern" of baseless or repetitive acts has not been alleged. At least with respect to the two federal-court actions, however, the Supreme Court has strongly suggested that one harassing piece of litigation may be enough to invoke the protection of the antitrust laws under the California Motor Transport exception. *Vendo Co. v. Lektro-Vend Corp., 433 U.S. 623, 635 n.6, 652-53, 97 S. Ct. 2881, 53 L. Ed. 2d 1009 (1977)* (plurality opinion of Rehnquist, J., and concurring opinion of Stevens, J.).

10. Doc. 70 at 101-02.

11. Nor is this Court particularly concerned that OMC may have included counts in the North Carolina and Michigan suits that were dismissed by this Court as against the remaining defendants here. Any cautious litigator interested in recovery would have adopted the same approach. Other courts may well view OMC's complaint in a different light and the plaintiff is entitled to act on that hope or expectation. Stated simply, the counts dismissed here were by no means dismissed as frivolous. See *Outboard Marine Corp. v. Pezetel, supra, at 399-403, 408-09*.

injunctive relief. Presumably for the same reason, OMC would have little interest at this late date in so harassing Pezetel's allegedly impecunious distributors that the latter determine to terminate business relationships with the Polish concern. Conversely, it is highly improbable that the elimination of two distributors would deliver a mortal wound to the defendants' American enterprise.

More fundamentally, however, this Court is unwilling to hold that a claim of harassing and baseless litigation can be stated merely through the allegation that an abuse of the judicial process has occurred and the argument that deeper-pocket defendants either are available or have already been sued. Nor do the Supreme Court decisions on the subject **[**21]** suggest anything to the contrary. In Vendo Co., Supra, the harassing aspect of the state-court litigation upon which the "sham" claim was founded were the merits themselves: the underlying covenants against competition sought to be enforced in the allegedly harassing litigation. Similarly, in *Otter Tail Power Co. v. United States, 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*, the government obtained a decree against a utility company, restraining them "from instituting, supporting, or engaging in litigation, directly or indirectly, against municipalities . . . who have voted to establish municipal electric power systems." *Id. at 369, 93 S. Ct. at 1025*. Even that case, however, involved at least four separate lawsuits, all carried by Otter Tail to the highest state court and all unsuccessful on the merits. *Otter Tail Power Co. v. United States, 331 F. Supp. 54, 61-62* & 62 n.4 (D.Minn.1971). [12.] It is concluded **[*176]** that the defendants' Counterclaim has not alleged harassment or similar misconduct with respect to the North Carolina and Michigan suits sufficient to come within the "sham" exception to the Noerr-Pennington Doctrine.

[22]** In support of the charge OMC combined with others to submit knowingly false information to federal agencies, Pezetel-Melex point to the following language of California Motor Transport for the proposition that Counterclaim P 17, without more, constitutes a violation:

> There are many other forms of illegal and reprehensible practice which may corrupt the administrative or judicial processes and which may result in antitrust violations. Misrepresentations, condoned in the political arena, are not immunized when used in the adjudicatory process. Opponents before agencies or courts often think poorly of the other's tactics, motions, or defenses and may readily call them baseless. One claim, which a court or agency may think baseless, may go unnoticed; but a pattern of baseless, repetitive claims may emerge which leads the factfinder to conclude that the administrative and judicial processes have been abused. That may be a difficult line to discern and draw. But once it is drawn, the case is established that abuse of those processes produced an illegal result, viz., effectively barring respondents from access to the agencies and courts. Insofar as the administrative or judicial processes **[**23]** are involved, actions of that kind cannot acquire immunity by seeking refuge under the umbrella of "political expression."

California Motor Transport, supra, 404 U.S. at 513, 92 S. Ct. at 613 (emphasis added). On the one hand, Outboard Marine would have this Court focus very narrowly on the emphasized sentence above and dismiss the Counterclaim on the basis of Pezetel's concession that Melex, its distributor, has participated in the agency proceedings at which the false data is alleged to have been submitted and which ultimately resulted in an assessment of dumping duties against defendants. On the other hand, although Pezetel-Melex has conceded that it had access in the physical sense to the proceedings, [13.] **[**24]** it urges that the foregoing passage sketches with a broad brush several variations on the "sham" exception, only one of which is alleged by Pezetel in P 17 of the Counterclaim. [14.] Both sides' readings of the passage would be plausible if the case stood alone; although

---

[12.] The Supreme Court in Otter Tail, Supra, ordered a remand for a determination whether the lawsuits fell within the "sham" exception of California Motor Transport, decided after the district court's opinion. While it is true that the complaint in Otter Tail, to the extent that it is quoted in the district court's opinion, See *331 F. Supp. at 56*, appears every bit as generally drafted as the Counterclaim here, the district court in that case was evidently under the impression, possibly correct at the time but certainly erroneous in light of California Motor Transport, that the Noerr-Pennington doctrine had no application to judicial proceedings such as state-court litigation. Now, it is clear that resort to the courts, even if taken with anti-competitive intent, is protected under the Noerr-Pennington doctrine.

[13.] Doc. 70 at 76-77.

subsequent lower-court decisions, however, discussed below, throw additional weight on defendants' side of the scale.

Initially, it is observed that if plaintiff's argument were accepted and access in the physical sense were enough to vitiate a "sham" claim under California Motor Transport, then it is exceedingly difficult to imagine how a claim could arise in a judicial setting, where the due process clause guarantees access and full participation for all parties. Certainly, the Court's **[**25]** language above included judicial proceedings. For this reason alone, plaintiff's bright-line argument respecting access would have to be rejected.

[*177] Pezetel places great reliance on a Fifth Circuit case predating *California Motor Transport, Woods Exploration & Producing Co. v. Aluminum Company of America, 438 F.2d 1286 (5th Cir. 1971)*, Cert. denied, *404 U.S. 1047, 92 S. Ct. 701, 30 L. Ed. 2d 736 (1972)*, in which the court held that the submission of false data respecting the productivity of certain wells by Texas gas producers to a state regulatory body, in an attempt to persuade that body to reduce the allowable amount of gas that plaintiffs could take from their gas fields stated a claim under the Sherman Act. The similarity between Woods and the present dispute, defendants argue, is that in both instances, the complaint centered upon the fact that the governmental agency involved was forced by the regulatory process itself to rely on factual materials submitted by private parties and in both cases, the submission of false data resulted in a subversion of the regulatory process and deprived the claimants of any meaningful opportunity to take advantage of any access to **[**26]** the proceeding available to them. Although the Woods Exploration holding that the Noerr-Pennington Doctrine applies only to the political processes has been overruled in California Motor Transport, the Supreme Court's dicta quoted above strongly suggests that the Court did not consider the sort of misconduct exemplified by Woods Exploration outside the scope of antitrust attack. [15.]

[27]** The post-California Motor Transport case most directly on point is *Israel v. Baxter Laboratories, Inc., 151 U.S.App.D.C. 101, 103, 466 F.2d 272 (D.C. Cir. 1972)*, in which the plaintiff drug manufacturers complained that certain of their competitors had conspired to prevent plaintiff's new drug from being approved by the Food and Drug Administration by "suppressing, concealing and misconstruing information concerning the two drugs before the FDA; by arranging for the employment as a consultant to the FDA of a medical doctor who had a financial interest in (defendant); . . . and by misrepresenting the safety and efficacy of (plaintiff's product)." *Id. 151 U.S.App.D.C. at 103, 274*. Although the Israel court ultimately ordered a remand to the agency for a second determination whether plaintiff's drug should be given FDA approval, the Court of Appeals expressly preserved plaintiffs' right to prove their antitrust claims, plaintiffs having alleged that "the real purpose of defendants' joint efforts (before the FDA was) to

---

14. As Pezetel-Melex read California Motor Transport, the sham exception may be based on a variety of models including: (1) upon the perjury-fraud-bribery model, as alleged in Counterclaim P 17; (2) upon an assertion that the conspirators participated in agency or court action with little or no interest in obtaining government action but simply to harass, a purely "sham" undertaking as described by the Supreme Court in Noerr, Supra ; (3) upon the charge that the antitrust plaintiff was excluded in a literal sense from the administrative forum that would lead to participation in a market, See California Motor Transport, Supra, so that the government merely acted as an unwitting surrogate for the conspirators. Doc. 70 at 69-71.

15. Even more factually apposite is the Supreme Court's own opinion in *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*, in which the counterclaim in a patent infringement action alleged that the plaintiff had obtained the patent by knowing and willful misrepresentations before the Patent Office. The Court held that such fraud, if proven in combination with the necessary market power, would violate § 2 of the Sherman Act. Of course, competitors possess no right of access to Patent Office initial patent application proceedings and thus in a limited sense, Walker Process does OMC no harm on its access argument. In that case, however, the Supreme Court rejected the argument made here that if misconduct occurred in the agency, the agency itself must rectify the error and the antitrust court cannot intervene:

The trial court dismissed its suit not because Walker failed to allege the relevant market, the dominance of the patented device therein, and the injurious consequences to Walker of the patent's enforcement, but rather on the ground that the United States alone may "annul or set aside" a patent for fraud in procurement. The trial court has not analyzed any economic data. Indeed, no such proof has yet been offered because of the disposition below. In view of these considerations, as well as the novelty of the claim asserted and the paucity of guidelines available in the decided cases, this deficiency cannot be deemed crucial.

Id. at 178, 86 S. Ct. at 351.

preclude, not induce, fair FDA consideration" of plaintiff's product. *Id. 151 U.S.App.D.C. at 108, 279*. In discussing *Woods Exploration, supra*, and the Circuit Court decision **[**28]** in California Motor Transport, the District of Columbia Circuit observed, "(t)he basic concern of the courts of appeal (and one District Judge) in both Woods and Trucking Unlimited may be deemed the integrity of the regulatory process. No actions which impair the fair and impartial functioning of an administrative agency should be able to hide behind the cloak of an antitrust exemption. **[*178]** " *Israel v. Baxter Laboratories, Inc., supra, 151 U.S.App.D.C. at 107, 466 F.2d at 278-79*. Other courts, although not all directly confronted by the allegation pleaded here, have interpreted California Motor Transport as creating a cause of action based upon unethical or illegal behavior before an adjudicatory body. See, e.g., *Rodgers v. Federal Trade Commission, 492 F.2d 228, 232 n.6* (9th Cir.), Cert. denied, *419 U.S. 834, 95 S. Ct. 60, 42 L. Ed. 2d 60 (1974)*; *Semke v. Enid Automobile Dealers Association, 456 F.2d 1361, 1366-67 (10th Cir. 1972)*. Similarly, lower federal courts have interpreted California Motor Transport as excluding gross misconduct in an adjudicatory setting or abuse of process from the Noerr-Pennington immunity. [16.] See *Rush-Hampton Industries v. Home Ventilating Institute, **[**29]** 419 F. Supp. 19, 24 (M.D.Fla.1976)*; *Control Data Corp. v. International Business Machines Corp., 306 F. Supp. 839, 849 (D.Minn.1969)*, *Aff'd, 430 F.2d 1277 (8th Cir. 1970)*. None of the cases cited above appear to concur with plaintiff's interpretation that the "sham" exception can only be successfully invoked when literal exclusion from the agency proceedings has occurred.

[30]** Having rejected plaintiff's objections respecting access, the Court turns to plaintiff's more troubling argument that any decision by the Treasury Department adverse to the defendants was the product of agency action, not of any impropriety on the part of plaintiff. Although OMC does not express it as such, this argument is essentially addressed to the not insignificant problem of causation raised by the Counterclaim. Even assuming that plaintiff conspired with others in the submission of false data to the Treasury Department, is the Court to assume that the Department made no independent fact-finding but relied exclusively on the data submitted by interested private parties? [17.] OMC makes much of the fact that Pezetel has not alleged reliance by the agency in its Counterclaim. Given that the matter is before the Court on a motion to dismiss, it is abundantly clear that all assumptions with respect to the quality of the proof must be in defendants' favor. Although the Court essentially agrees that Pezetel faces substantial difficulties in proving the elements of the violation charged in the Counterclaim: that a conspiracy existed for the purpose alleged, that the material was indeed **[**31]** knowingly false, that the governmental agency relied exclusively or in large measure on false material in reaching its conclusion, and that the antitrust injury actually flowed to Pezetel from the use of the data. But these difficulties in proof are simply that, and on a motion to dismiss, the pleadings will be construed in light of what can most optimistically be inferred from them. Consequently, although the Court agrees that causation is a formidable obstacle to success on the merits of the pleading presently before the Court, it is no barrier to survival of a motion to dismiss. See generally ***Antitrust Law*** I, supra, P 204 at 50.

[16.] The commentators agree with defendants' reading of California Motor Transport :

As compared with the legislative process, improper behavior in the adjudicatory or judicial context is more readily identified as improper and more widely regarded as reprehensible. To be sure, adjudication explicitly relies on the adversary process to develop "truth" and thus might seem to expect, and therefore to excuse, overstatements or even misstatements by a party. In fact, however, the expected standards of conduct are much higher. The Supreme Court recognized this by observing, for example, "Misrepresentations, condoned in the political arena, are not immunized when used in the adjudicatory process." Indeed, there are well developed and highly elaborated definitions of what is or is not proper behavior by litigating parties. . . . ***HN7***[] There certainly is no privilege for misrepresentations to administrative agencies which base their decisions on information provided by the parties.

Antitrust Law I, supra, P 204, at 48 (footnotes omitted).

[17.] In the case's present posture, no record has been made regarding the internal procedures of the Treasury Department both in general and with respect to the particular proceeding in which the misconduct is alleged to have occurred. Of course, the administrative law applicable to the proceeding involved is a question of law, inquiry into which could be made on a motion to dismiss; still, a question of fact would remain regarding the particular agency proceeding collaterally challenged here.

[32]** **[*179]** Finally, focusing narrowly on the language of Noerr defining the "sham" exception as government solicitation that is actually "nothing more than an attempt to interfere directly with the business relationships of a competitor," OMC argues that the fact that OMC was successful before the agency, in that the Treasury Department actually assessed dumping duties against Melex, takes OMC out from under any possible interpretation of the "sham" exception. Plaintiff asserts that "the absence of an antitrust violation is most obvious when the petitioner actually obtains the result he seeks . . .." ***Antitrust Law*** I, supra, P 202b at 38. It is observed, however, that the treatise quoted above excepted from this rule those cases in which improper means to achieve particular government action have been used. *Id. at 38 n.5*.

Moreover, the cases relied upon by OMC in support of its theory that success before the agency vitiates prior wrong-doing are distinguishable on the same ground, Viz., that no improper or illegal conduct was involved. In *Franchise Realty Interstate Corp. v. San Francisco Local Joint Executive Board, supra, at 1079*, the allegations were simply that the conspirators' **[**33]** opposition before the Board was "sham" and "frivolous." Moreover, in light of the state agency's relatively political nature, "the relatively precise legal standards in light of which certain arguments may be characterized as "frivolous' are simply absent from the rough and tumble of the political arena." Id. As Outboard Marine well realizes, the action of the Treasury Department in assessing dumping duties against an importer is no more "political" than any adjudicatory (i. e., fact-finding) proceeding. Similarly, in *Central Bank of Clayton v. Clayton Bank, supra*, the allegations were nothing more than that the conspirators had propounded "sham and spurious" arguments to a state banking commissioner and bank board in opposition to plaintiff's application for a charter. The district court in Central Bank, while it interpreted California Motor Transport as including perjury within the sham exception held that "sham and spurious" were insufficient to state such a claim. [18.] *424 F. Supp. at 167*. Here, while concededly scant, the allegation concerns knowingly false statements before a particular adjudicatory body. In short, neither California Motor Transport's language that perjury is **[**34]** not condoned in the administrative context nor the other authorities reviewed above support plaintiff's position that the fact of success before a governmental agency can excuse improper conduct. Accordingly, that argument is rejected. [19.]

In summary, it is held that P 17 of the Counterclaim, alleging a conspiracy to submit knowingly false information to the Treasury Department and the United States Custom Service, is sufficient to state **[**35]** a claim under § 1 of the Sherman Act.

B. OTHER SHERMAN ACT § 1 CLAIMS

Paragraphs 18 and 19 of the Counterclaim allege in their entirety:

> 18. In furtherance of the conspiracy and combination described in P 16, OMC combined and conspired with other American manufacturers, including AMF and Johns-Manville, with the aid of common counsel and public relations counsel, to engage in a joint program of threatened litigation and publicity in order calculatedly to foment false impressions and fears among prospective Melex distributors as to the nature of Melex's competition, in order to discourage such distributors from selling Melex golf carts.
>
> 19. On information and belief, OMC, alone and in combination and conspiracy **[*180]** with other manufacturers, falsely conveyed to potential customers of Melex golf carts that Melex was about to go out of business.

As earlier observed, P 17, if interpreted to allege empty and harassing threats of litigation, is outside the scope of the Noerr-Pennington immunity. Presumably, if OMC possessed no intent to resort to the courts, then the crucial

---

18. See notes 3-5 Supra and accompanying text.

19. As the discussion regarding "sham" litigation demonstrated, OMC's avoidance of dismissal of its federal-court claim here weighed heavily in favor of dismissal of Pezetel-Melex's charge that virtually identical federal-court complaints were harassing. The apparent inconsistency in these two positions is explained by the allegation that knowingly false information was considered by the Treasury Department, a charge which, if proven, would undermine the validity of any agency action taken in reliance upon the information.

connection between the conduct and the *First Amendment* is lacking, and neither the **[**36]** tort of business disparagement nor publicity campaigns generally implicates the *First Amendment*, at least under these circumstances. Unfortunately, neither side had adduced any case authority for its position that publicity campaigns and disparagement of rivals are or are not actionable under Sherman Act § 1, and the Court is left primarily with the remarks of the treatise-writers, which of course arise in a vacuum.

Although the Court would be unimpressed with the sufficiency of these claims, as they are alleged, under the Sherman Act if they stood alone, the focus of the inquiry shifts dramatically when they are viewed in light of the charge, which now must be accepted as true, that OMC conspired to submit false information to a government agency. If the latter claim is taken at face value, then Pezetel-Melex's assertions of unfair competition and business disparagement arise in the context of a counterclaim charging a concerted campaign that has at its center an antitrust violation. It is evident that such actions, even if taken in concert, however, must be subject to a de minimus rule, if the antitrust courts are not to become the battleground for a variety of intentional-tort **[**37]** suits. Whether such a de minimus rule could ever be enforced against an antitrust plaintiff at the pleading stage need not be faced by this Court, since the presence of a well-pleaded Sherman § 1 claim in P 17 removes the allegations from the area in which any de minimus rule could legitimately operate. For example, in *Control Data Corp. v. International Business Machines Corp., supra, at 848-49*, an allegation that IBM "wrongfully and deceptively developed, fostered an maintained a viewpoint among computer users . . . that computer software is an intangible without (market) value" survived a motion to dismiss. As here, that charge was accompanied by a serious allegation of agency misconduct, fraud in the United States Patent Office. Consequently, if OMC combined with others to take action violative of the antitrust laws, then other courses of action against identical competitors for identical anticompetitive goals might be actionable. [20.]

[38]** Having so concluded, however, it is emphasized that charges of unfair competition, such as those alleged in P P 18 and 19 of the Counterclaim, could only result in antitrust liability irrespective of whether defendants ultimately succeed in their proof of the agency misconduct allegation when the conduct is systematic, wide-ranging and has a clearly discernible market effect. [21.] ***HN8***[] Isolated instances of unethical business practices do not rise to the level of Sherman Act § 1 liability.

In the case of the business disparagement of Pezetel-Melex's product to customers by OMC and its conspirators, a pervasive and systematic campaign must be proven, and the elements of a demonstrated violation must include "cumulative proof that the representations (to buyers) were **[*181]** **[**39]** clearly false, clearly material, clearly likely to induce reasonable reliance, made to buyers without knowledge of the subject matter, continued for prolonged periods, and not readily susceptible of neutralization or other offset" by Pezetel-Melex. ***Antitrust Law*** III, § 738a, at 279.

As for P 18, in which the ***HN9***[] "joint program of threatened litigation and publicity" is alleged, the defendants must demonstrate (1) the presence of a systematic conspiracy; (2) the coercive goal as charged; (3) clearly false representations in a pattern arising above isolated incidents; (4) upon which prospective distributors might reasonably rely; (5) that these would-be distributors did so rely; and (6) that Pezetel-Melex suffered clearly identifiable market injury therefrom.

II. CHARGES UNDER THE WILSON TARIFF ACT

[20.] It is emphasized, however, that this holding is perfectly in accord with the position of Areeda and Turner, much pressed by Outboard Marine, that unfair competition of the sort alleged by the Counterclaim should generally be ignored in the antitrust forum. ***Antitrust Law*** III, supra, P 737, at 278. First, as defendants argue, the suggestion of the authors that business disparagement of rivals should "presumptively be ignored," necessarily contemplates that the charge survive a motion to dismiss. Otherwise, the result would be to completely exclude such charges from the antitrust realm. Second, to permit the defendants to proceed with the claim does not relieve them of a formidable burden of proof.

[21.] Of course, if defendants did prevail on their claim that OMC submitted knowingly false information to the Treasury, then some overlap in the market effect (i. e., damages) flowing from the two courses of conduct would probably exist.

Incorporating all the factual allegations of the complaint, the defendants assert that Outboard Marine's practices violated ***HN10***[] the Wilson Tariff Act, *15 U.S.C. § 8*, which provides in pertinent part:

> Every combination, conspiracy, trust, agreement, or contract is declared to be contrary to public policy, illegal, and void when the same is made by or between two or more persons or corporations, **[**40]** either of whom, as agent or principal, is engaged in importing any article from any foreign country into the United States, and when such combination, conspiracy, trust, agreement, or contract is intended to operate in restraint of lawful trade, or free competition in lawful trade or commerce, or to increase the market price in any part of the United States of any article or articles imported or intended to be imported into the United States, or of any manufacture into which such imported article enters or is intended to enter.

Id. *§ 8*. Pezetel-Melex did not mention this count of the Counterclaim either in its brief or its oral argument. Plaintiff urges, however, that the Act only applies to combinations "by or between two or more persons or corporations, either of whom . . . is engaged in importing any article . . . into the United States." Pezetel-Melex have not alleged either that OMC is an importer or that the conspiracy involves any other importer of goods. It is concluded that the Counterclaim fails to allege conduct falling within the scope of the Wilson Tariff Act and the latter will be dismissed.

An order will be entered in conformity with this Opinion.

Berkey Photo, Inc. v. Eastman Kodak Co.

United States Court of Appeals for the Second Circuit

April 18, 1979, Argued;April 30, 1979, Submitted ; June 25, 1979, Decided

Nos. 1019, 1070, Dockets 78-7445, 78-7448

Reporter

603 F.2d 263 *; 1979 U.S. App. LEXIS 13692 **; 1979-1 Trade Cas. (CCH) P62,718; 53 A.L.R. Fed. 768

BERKEY PHOTO, INC., Plaintiff-Appellee-Cross Appellant, v. EASTMAN KODAK COMPANY, Defendant-Appellant-Cross Appellee.

Prior History: [1]** Appeal and cross-appeal from a judgment of the United States District Court for the Southern District of New York, Marvin E. Frankel, District Judge. The district court upheld certain jury verdicts in this private antitrust action; set aside others; entered judgment for plaintiff in the amount of $87,091,309.47, comprising attorneys' fees, costs, and treble damages; and decreed certain equitable relief.

Disposition: Affirmed in part, reversed in part, and remanded for further proceedings.

LexisNexis® Headnotes

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN1[] **Monopolies & Monopolization, Actual Monopolization**

The existence of monopoly power, the power to control prices or exclude competition, is the primary requisite to a finding of monopolization.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Criminal Law & Procedure > ... > Acts & Mental States > Mens Rea > Willfulness

HN2[] **Monopolies & Monopolization, Actual Monopolization**

After possession of monopoly power is found, the second element of the *15 U.S.C.S. § 2* offense is the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN3[] **Monopolies & Monopolization, Actual Monopolization**

The mere existence of monopoly power, whether lawfully or unlawfully acquired, is in itself violative of *15 U.S.C.S. § 2*, provided it is coupled with the purpose or intent to exercise that power.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN4[] **Monopolies & Monopolization, Actual Monopolization**

The key to analysis under *15 U.S.C.S. § 2* is the concept of market power. Although power may be derived from size, the two are not identical. A firm that has lawfully acquired a monopoly position is not barred from taking advantage of scale economies by constructing, for example, a large and efficient factory. These benefits are a consequence of size and not an exercise of power over the market. Nevertheless, many anticompetitive actions are possible or effective only if taken by a firm that dominates its smaller rivals.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN5[] **Monopolies & Monopolization, Actual Monopolization**

The mere possession of monopoly power does not ipso facto condemn a market participant. But, to avoid the proscriptions of *15 U.S.C.S. § 2*, the firm must refrain at all times from conduct directed at smothering competition. This doctrine has two branches. Unlawfully acquired power remains anathema even when kept dormant. And it is no less true that a firm with a legitimately achieved monopoly may not wield the resulting power to tighten its hold on the market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN6[] **Monopolies & Monopolization, Actual Monopolization**

The use of monopoly power attained in one market to gain a competitive advantage in another is a violation of *15 U.S.C.S. § 2*, even if there has not been an attempt to monopolize the second market. It is the use of economic power that creates the liability. But a large firm does not violate *§ 2* simply by reaping the competitive rewards attributable to its efficient size, nor does an integrated business offend the Sherman Act whenever one of its departments benefits from association with a division possessing a monopoly in its own market. So long as a firm is allowed to compete in several fields, it must be expected to seek the competitive advantages of its broad-based activity. These are gains that accrue to any integrated firm, regardless of its market share, and they cannot by themselves be considered uses of monopoly power.

Civil Procedure > ... > Jury Trials > Verdicts > General Verdicts

Civil Procedure > ... > Jury Trials > Verdicts > General Overview

Civil Procedure > Appeals > Standards of Review

HN7[] **Verdicts, General Verdicts**

Where the jury returns a general verdict for the plaintiff, the court is bound to construe the evidence and the possible inferences in the light most favorable to the plaintiff.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN8[] **Monopolies & Monopolization, Actual Monopolization**

A monopolist is not forbidden to publicize its product unless the extent of this activity is so unwarranted by competitive exigencies as to constitute an entry barrier. And in its advertising, a producer is ordinarily permitted, much like an advocate at law, to bathe his cause in the best light possible. Advertising that emphasizes a product's strengths and minimizes its weaknesses does not, at least unless it amounts to deception, constitute anticompetitive conduct violative of *15 U.S.C.S. § 2*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN9[] **Monopolies & Monopolization, Actual Monopolization**

Where a course of action is ambiguous, consideration of intent may play an important role in divining the actual nature and effect of the alleged anticompetitive conduct.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN10[] **Monopolies & Monopolization, Actual Monopolization**

Although the antitrust laws afford latitude in permitting the factfinder to estimate the extent of the damages where precise calculation is impossible, they do not allow recovery where there has been no showing that plaintiff suffered cognizable injury.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Civil Procedure > Judicial Officers > Judges > Discretionary Powers

HN11[] **Monopolies & Monopolization, Actual Monopolization**

Although an injunction need not be limited to prohibiting repetition of past misconduct, it does not lie within the discretion of the trial judge to restructure a market that the defendant has neither monopolized nor attempted to monopolize.

Antitrust & Trade Law > ... > Private Actions > Purchasers > Direct Purchasers

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] **Purchasers, Direct Purchasers**

Excessive prices, maintained through exercise of a monopolist's control of the market, constituted one of the primary evils that the Sherman Act was intended to correct. Where a monopolist has acquired or maintained its power by anticompetitive conduct, therefore, a direct purchaser may recover the overcharge caused by the violation of *15 U.S.C.S. § 2*.

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN13[] **Sherman Act, Remedies**

For a purchaser to recover damages under *15 U.S.C.S. § 2*, it must demonstrate that the monopolist has engaged in some anticompetitive conduct. Two further questions must be resolved, however, to give shape to the purchaser's treble damage suit: (1) if an overcharge paid during the limitations period was caused by the defendant's monopoly power, may a plaintiff satisfy the conduct element of the *§ 2* offense by proving anticompetitive actions that occurred more than four years prior to the commencement of suit? (2) If a defendant has violated *§ 2*, may a purchaser recover the excess of its price over a competitive price, or merely the increment attributable to its anticompetitive conduct?

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN14[] **Private Actions, Purchasers**

By statute, *15 U.S.C.S. § 15b*, a four-year period of limitations applies in private antitrust suits. The plaintiff, therefore, clearly can recover only for overcharges suffered since the beginning of the limitations period.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN15[] Private Actions, Purchasers

It is plain from the treble-damage statute itself, *15 U.S.C.S. § 15*, that a cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business. Although the business of a monopolist's rival may be injured at the time the anticompetitive conduct occurs, a purchaser, by contrast, is not harmed until the monopolist actually exercises its illicit power to extract an excessive price.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Governments > Legislation > Statute of Limitations > Time Limitations

Governments > Legislation > Statute of Limitations > General Overview

HN16[] Private Actions, Purchasers

So long as a monopolist continues to use the power it has gained illicitly to overcharge its customers, it has no claim on the repose that a statute of limitations is intended to provide. Thus, in this setting, as in the context of a continuing conspiracy to violate the antitrust laws, each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover the damages caused by that act. As to those damages, the statute of limitations runs from the commission of the act.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN17[] Private Actions, Purchasers

Even if injury and a cause of action have accrued as of a certain date, further damages that might arise from the conduct sued on are unrecoverable if the fact of their accrual is speculative or their amount and nature unprovable.

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

HN18[] Private Actions, Purchasers

Plainly, at the time a monopolist commits anticompetitive conduct it is entirely speculative how much damage that action will cause its purchasers in the future. Indeed, some of the buyers who will later feel the brunt of the violation may not even be in existence at the time. Not until the monopolist actually sets an inflated price and its customers determine the amount of their purchases can a reasonable estimate be made. The purchaser's cause of action, therefore, accrues only on the date damages are "suffered."

Antitrust & Trade Law > ... > Private Actions > Purchasers > General Overview

Governments > Legislation > Statute of Limitations > Time Limitations

HN19[] Private Actions, Purchasers

A purchaser suing a monopolist for overcharges paid within the previous four years may satisfy the conduct prerequisite to recovery by pointing to anticompetitive actions taken before the limitations period.

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN20[] **Sherman Act, Remedies**

The true measure of damages in a *15 U.S.C.S. § 2* claim, the wrongful conduct rule, is the price increment caused by the anticompetitive conduct that originated or augmented the monopolist's control over the market.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Commercial Law (UCC) > Sales (Article 2) > Remedies > General Overview

HN21[] **Private Actions, Remedies**

Plaintiffs in an antitrust action must prove injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. Excessive prices are injury of the type the antitrust laws were intended to prevent. It is equally evident, however, that more than monopoly power is necessary to make the charging of a noncompetitive price unlawful. Accordingly, a purchaser may recover only for the price increment that "flows from" the distortion of the market caused by the monopolist's anticompetitive conduct.

Business & Corporate Law > Joint Ventures > General Overview

Mergers & Acquisitions Law > Antitrust > Joint Ventures

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN22[] **Types of Contracts, Joint Contracts**

Joint ventures involving a monopolist have sufficient anticompetitive potential that they must be scrutinized with care lest they be permitted to fortify the already substantial entry barriers inherent in a monopolized market. The relevant variables might include: the size of the joint venturers; their share of their respective markets; the contributions of each party to the venture and the benefits derived; the likelihood that, in the absence of the joint effort, one or both parties would undertake a similar project, either alone or with a smaller firm in the other market; the nature of the ancillary restraints imposed and the reasonableness of their relationship to the purposes of the venture. In analyzing joint development agreements, as elsewhere in *15 U.S.C.S. § 1*, the factfinder must weigh all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition.

Opinion

[*267] INTRODUCTION

To millions of Americans, the name Kodak is virtually synonymous with **[**2]** photography. Founded over a century ago by George Eastman, the Eastman Kodak Company has long been the preeminent firm in the amateur photographic industry. It provides products and services covering every step in the creation of an enduring photographic record from an evanescent image. Snapshots may be taken with a Kodak camera on Kodak film, developed by Kodak's Color Print and Processing Laboratories, and printed on Kodak photographic paper. The firm has rivals at each stage of this process, but in many of them it stands, and has long stood, dominant. It is one of the giants of American enterprise, with international sales of nearly $ 6 billion in 1977 and pre-tax profits in excess of.$ 1.2 billion.

This action, one of the largest and most significant private antitrust suits in history, was brought by Berkey Photo, Inc., a far smaller but still prominent participant in the industry. Berkey competes with Kodak in providing photofinishing services the conversion of exposed film into finished prints, slides, or movies. Until 1978, Berkey sold cameras as well. It does not manufacture film, but it does purchase Kodak film for resale to its customers, and it also buys photofinishing **[**3]** equipment and supplies, including color print paper, from Kodak.

The two firms thus stand in a complex, multifaceted relationship, for Kodak has been Berkey's competitor in some markets and its supplier in others. In this action, Berkey claims that every aspect of the association has been infected by Kodak's monopoly power in the film, color print paper, and camera markets, willfully acquired, maintained, and exercised in violation of *§ 2* of the Sherman Act, *15 U.S.C. § 2*. It also charges that Kodak conspired with flashlamp manufacturers in violation of *§ 1* of the Act, *15 U.S.C. § 1*. Berkey alleges that these violations caused it to lose sales in the camera and photofinishing markets and to **[*268]** pay excessive prices to

Kodak for film, color print paper, and photofinishing equipment. [1.] A number of the charges arise from Kodak's 1972 introduction of the 110 photographic system, featuring a "Pocket Instamatic" camera and a new color print film, Kodacolor II, but the case is not limited to that episode. It embraces many of Kodak's activities for the last decade and, indeed, from preceding years as well.

[4]** After more than four years of pretrial maneuvering, the trial got under way in July 1977 before Judge Marvin E. Frankel of the Southern District of New York. Despite the daunting complexity of the case the exhibits numbered in the thousands Kodak demanded a jury. Accordingly, the trial was conducted in two parts, one to determine liability and the other to measure damages. It ran continuously, except for a one-month hiatus between the two segments, until the final verdict was rendered on March 22, 1978. The liability phase of the trial by itself consumed more than six months, and the damages aspect required approximately another month. Except for a few specific questions relating primarily to market definitions, the jury was asked to render what was essentially a general verdict on each count.

After deliberating for eight days on liability and five on damages, the jury found for Berkey on virtually every point, awarding damages totalling $ 37,620,130. Judge Frankel upheld verdicts aggregating $ 27,154,700 for lost camera and photofinishing sales and for excessive prices on film and photofinishing equipment, but he entered judgment n. o. v. for Kodak on the remainder. Trebled and **[**5]** supplemented by attorneys' fees and costs pursuant to § 4 of the Clayton Act, *15 U.S.C. § 15*, Berkey's judgment reached a grand total of $ 87,091,309.47, with interest, of course, continuing to accrue.

Kodak now appeals this judgment, as well as the two forms of equitable relief that we shall discuss below. It challenges virtually every aspect of the district court proceedings, from the theories of liability and damages presented to the jury to the sufficiency of the evidence to sustain them. It argues, furthermore, that Judge Frankel committed prejudicial error in the conduct of the trial. For its part, Berkey contends that the trial judge erred in not entering judgment on the full amount of the jury's verdict and in computing improperly the costs and fees that Berkey should recover.

Resolution of these competing claims requires us to settle a number of important and novel issues concerning *§ 2* of the Sherman Act. We believe that the district court committed several significant errors as it charted its course through the complexities of this case, and we are therefore compelled to reverse the judgment below in certain major respects. But we cannot accept Kodak's contention that **[**6]** a properly charged jury could not find monopolization of any of the relevant markets and resulting damage to Berkey. Accordingly, we remand for a new trial on several of the claims.

I. THE AMATEUR PHOTOGRAPHIC INDUSTRY

Before plunging into the welter of issues raised in this appeal, we must understand the industry out of which the litigation arose. It is, of course, a basic principle in the law of monopolization that the first step in a court's analysis must be a definition of the relevant markets. See, e. g., *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 391-93, 76 S. Ct. 994,* ***[*269]*** *100 L. Ed. 1264 (1956)*. Although Kodak does not now challenge the jury's delineation of the markets, a survey of this terrain remains essential. The jury found monopolization or other anticompetitive conduct in no fewer than five distinct markets within the amateur photographic industry, and in several instances Kodak was held to have misused its control over one market to disadvantage rivals in another.

[1.] Berkey had charged several other violations that are not before us on this appeal. During the liability trial, Berkey withdrew or the court dismissed claims under the Clayton Act, §§ 3 & 7, *15 U.S.C. §§ 14* & *18*, as well as allegations arising from some of Kodak's early acquisitions, its use of patents, its relations with Polaroid Corp., and its other activities in the instant photography field. Despite jury findings of *§ 2* liability, Berkey did not attempt to prove damages with respect to color negative printers and chemicals, and the jury found no damages with respect to amateur movie cameras. Kodak's purchases of flashcubes, magicubes, and flipflash arrays led to a $ 245,100 jury verdict under the Robinson-Patman Act, *§ 2(f)*, *15 U.S.C. § 13(f)*, which was set aside by Judge Frankel because there was no evidence of injury to Berkey.

Accordingly, to evaluate the verdicts, it is necessary to describe not only the individual markets but also the interrelationships among them.

The principal markets relevant here, **[**7]** each nationwide in scope, are amateur conventional still cameras, conventional photographic film, photofinishing services, photofinishing equipment, and color print paper. The numerous technological interactions among the products and services constituting these markets are manifest. To take an obvious example, not only are both camera and film required to produce a snapshot, but the two must be in compatible "formats." This means that the film must be cut to the right size and spooled in a roll or cartridge that will fit the camera mechanism. Berkey charges that Kodak refused to supply on economical terms film usable with camera formats designed by other manufacturers, thereby exploiting its film monopoly to obstruct its rivals in the camera market. Similarly, Berkey contends, since the emulsions and other constituents of a film determine the chemicals and processes required to develop it, Kodak was able to project its power over film into the photofinishing market as well.

These and other market interactions will be discussed in depth as we analyze the verdicts and rulings below. First, however, we must describe in detail the individual markets themselves.

A. The Camera Market

[8]** The "amateur conventional still camera" market now consists almost entirely of the so-called 110 and 126 instant-loading cameras. These are the direct descendants of the popular "box" cameras, the best-known of which was Kodak's so-called "Brownie." Small, simple, and relatively inexpensive, cameras of this type are designed for the mass market rather than for the serious photographer. [2.]

Kodak has long been the dominant firm in the market thus defined. Between 1954 and 1973 it never enjoyed less than 61% Of the annual unit sales, nor less than 64% Of the dollar volume, and in the peak year of 1964, Kodak cameras accounted **[**9]** for 90% Of market revenues. Much of this success is no doubt due to the firm's history of innovation. In 1963 Kodak first marketed the 126 "Instamatic" instant-loading camera, [3.] and in 1972 it came out with the much smaller 110 "Pocket Instamatic." Not only are these cameras small and light, but they employ film packaged in cartridges that can simply be dropped in the back of the camera, thus obviating the need to load and position a roll manually. Their introduction triggered successive revolutions in the industry. Annual amateur still camera sales in the United States averaged 3.9 million units between 1954 and 1963, with little annual variation. In the first full year after Kodak's introduction of the 126, industry sales leaped 22%, and they took an even larger quantum jump when the 110 came to market. Other camera manufacturers, including Berkey, copied both these inventions but for several months after each introduction anyone desiring to purchase a camera in the new format was perforce remitted to Kodak.

[10]** Berkey has been a camera manufacturer since its 1966 acquisition of the Keystone Camera Company, a producer of movie **[*270]** cameras and equipment. [4.] In 1968 Berkey began to sell amateur still cameras made by other firms, and the following year the Keystone Division commenced manufacturing such cameras itself. From 1970 to 1977, Berkey accounted for 8.2% Of the sales in the camera market in the United States, [5.] reaching a peak of 10.2% In 1976. In 1978, Berkey sold its camera division and thus abandoned this market.

---

2. More complicated cameras, such as those in the 135 format ("35-millimeter") commonly used by professionals and photographic hobbyists, were found not to be part of this market. The jury also rejected Kodak's request to include in the definition "instant" cameras, pioneered by the Polaroid Corporation, which produce a finished print within minutes, or even seconds, after the shutter is snapped.

3. Instant-loading cameras are not to be confused with the "instant" cameras referred to in the previous footnote.

4. In 1967 Berkey acquired a manufacturer of amateur photographic accessories, the Atlas-Warner Corp., along with three distributors of Atlas-Warner products.

5. Berkey entered into the manufacture of instant cameras in 1972, but discontinued this line in settlement of patent litigation instituted by Polaroid Corp.

B. The Film Market

The relevant market for photographic film comprises color print, color slide, color movie, and black-and-white film. [6.] Kodak's grip on this market is **[**11]** even stronger than its hold on cameras. Since 1952, its annual sales have always exceeded 82% Of the nationwide volume on a unit basis, and 88% In revenues. Foreign competition has recently made some inroads into Kodak's monopoly, but the Rochester firm concedes that it dominated film sales throughout the period relevant to this case. Indeed, in his summation, Kodak's trial counsel told the jury that "the film market . . . has been a market where there has not been price competition and where Kodak has been able to price its products pretty much without regard to the products of competitors."

Kodak's monopoly in the film market is particularly important to this case, because the jury accepted Berkey's contention, noted above, that it had been used **[**12]** to disadvantage rivals in cameras, photofinishing, photofinishing equipment, and other markets. Of special relevance to this finding is the color print film segment of the industry, which Kodak has dominated since it introduced "Kodacolor," the first amateur color print film, in 1942. [7.] In 1963, when Kodak announced the 126 Instamatic camera, it also brought out a new, faster color print film Kodacolor X which was initially available to amateur photographers only in the 126 format. [8.] Nine years later, Kodak repeated this pattern with the simultaneous introduction of the 110 Pocket Instamatic and Kodacolor II film. For more than a year, Kodacolor II was made only for 110 cameras, and Kodak has never made any other color print film in the 110 size.

[13]** C. Photofinishing Services and Photofinishing Equipment

Before 1954, Kodak's Color Print and Processing Laboratories (CP&P) had a nearly absolute monopoly of color photofinishing maintained by a variety of practices. Accounting for over 95% Of color film sales, Kodak sold every roll with an advance charge for processing included. Consumers had little choice but to purchase Kodak film, and in so doing they acquired the right to have that film developed and printed by CP&P at no further charge. Since few customers would duplicate their costs to procure the services of a non-Kodak photofinisher, Kodak was able to parlay its film monopoly to achieve equivalent market power in photofinishing. [9.]

[14] [*271]** This film/processing "tie-in" attracted the attention of the Justice Department, and in 1954 a consent decree changed the structure of the color photofinishing market drastically. Kodak was forbidden to link photofinishing to film sales, and it agreed to make its processing technology, chemicals, and paper available to rivals at reasonable rates. As a result, CP&P's share of the market plummeted from 96% In 1954 to 69% Two years later, and it has declined sharply ever since. In 1970, CP&P accounted for but 17% Of the market, and by 1976 its share reached a low of 10%. There are now approximately 600 independent photofinishers in the United States.

[6.] The jury included movie film and 35-millimeter film in this market, presumably because they are substantially identical to the film used in amateur still cameras. Instant film, however, a product chemically distinct from laboratory-processed film, was excluded.

[7.] Kodak marketed improved versions of Kodacolor in 1945, 1949, and 1955.

[8.] The new film was also initially sold for use in 35-millimeter cameras, which are not part of the amateur market. It did not replace Kodacolor in the amateur 127 and 620 sizes until one year later. "Film speed" refers to an emulsion's sensitivity to light. Thus Kodacolor X as compared to its predecessor could produce acceptable images under markedly inferior lighting conditions.

[9.] To be sure, Kodak could not in this fashion control the market for color reprints production of additional prints from slides or negatives. Here it resorted to other tactics. By refusing to sell the special paper or chemicals necessary to produce such reprints to rival photofinishers, it ensured since there was no other adequate source for these supplies that even this segment of the market did not escape its grip.

Berkey is one of the largest of these processors. It has been a photofinisher since 1933, but until 1954 its principal business was developing and printing black-and-white film. [10.] In addition, Berkey purchased Kodak black-and-white film, which was sold without a processing tie-in, for resale to its photofinishing customers. After the 1954 decree, Berkey applied to Kodak for the appropriate licenses and in 1956 began to process significant amounts of color film. It now finishes more 126 and 110 color print film than does Kodak. **[**15]**

A variety of equipment is used to process film, and the Kodak Apparatus Division (KAD) designs and produces most of the machinery used by CP&P. Kodak also sells some equipment to other photofinishers, but this is an insignificant portion of its business; indeed, until the introduction of the 110 system, Kodak made still film processing equipment for its own use only. Several other firms supply photofinishing equipment to the rival processors, and Berkey does not contend that Kodak monopolized or attempted to monopolize this market.

D. The Color Paper Market

The market for color paper that is, paper specially treated so that images from color film may be printed on it effectively came into being after entry of the 1954 consent decree. **[**16]** Before then, Kodak was for all practical purposes the only color photofinisher, and its requirements for color paper were met entirely by the paper division of Kodak Park Works in Rochester. The remaining processors, who dealt with non-Kodak color film and used non-Kodak paper, occupied only four percent of the color photofinishing market. Consequently, the vertical foreclosure created by CP&P's lock on photofinishing and its exclusive use of Kodak color paper was virtually complete.

Although the 1954 decree steadily loosened Kodak's grip in photofinishing, it did not immediately affect the firm's control of color paper. For more than a decade, the independent photofinishers that sprang up after the decree was entered looked only to Kodak for their paper supplies. Indeed, although entry by both foreign and domestic paper manufacturers has reduced Kodak's share substantially, to a low of 60% In 1976, the firm's color paper operations have remained remarkably profitable. Between 1968 and 1975, while its market share was falling from 94% To 67%, Kodak's earnings from operations as a percentage of sales remained virtually constant, averaging 60% For the period. Moreover, the most recent **[**17]** telling event in the market has not been entry but exit: GAF Corporation announced in 1977 that it was abandoning its effort to sell color paper, leaving Kodak with only one domestic and two foreign competitors.

Kodak, then, is indeed a titan in its field, and accordingly has almost inevitably invited attack under *§ 2* of the Sherman Act. Few, if any, cases have presented so many diverse and difficult problems of *§ 2* analysis. It is appropriate, therefore, to elucidate some fundamental principles of law relating to that statutory provision.

II. *§ 2* OF THE SHERMAN ACT

The Sherman Antitrust Act of 1890 has been characterized as "a charter of freedom, **[*272]** " *Appalachian Coals, Inc. v. United States, 288 U.S. 344, 359, 53 S. Ct. 471, 77 L. Ed. 825 (1933)*. For nearly ninety years it has engraved in law a firm national policy that the norm for commercial activity must be robust competition. The most frequently invoked section of the Act is the first, which forbids contracts, combinations, or conspiracies in restraint of trade. But the prohibition of *§ 1* is incomplete, *Standard Oil Co. of New Jersey v. United States, 221 U.S. 1, 60-61, 31 S. Ct. 502, 55 L. Ed. 619 (1911)*, for **[**18]** it only applies to conduct by two or more actors. If sufficiently powerful, however, a single economic entity may also stifle competition. 1 R. Callmann, The Law of Unfair Competition, Trademarks, and Monopolies 341-42 (3d ed. 1967). Accordingly, in *§ 2* of the Sherman Act, Congress made it unlawful to "monopolize, or attempt to monopolize, or combine or conspire . . . to monopolize" any part of interstate or foreign commerce. It is *§ 2* to which we give our principal attention in analyzing this case.

In passing the Sherman Act, Congress recognized that it could not enumerate all the activities that would constitute monopolization. *Section 2*, therefore, in effect conferred upon the federal courts "a new jurisdiction to apply a

---

[10.] Prior to 1954 a small part of Berkey's business consisted of processing Anscocolor film manufactured by a rival of Kodak's, Ansco into both slides and color prints. Using paper and chemicals supplied by Ansco, Berkey was also able to produce color prints from Kodachrome slides.

"common law' against monopolizing." 3 P. Areeda & D. Turner, ***Antitrust Law*** 40 (1978). In performing that task, the courts have enunciated certain principles that by now seem almost elementary to any student of ***antitrust law***. But, because *§ 2* must reconcile divergent and sometimes conflicting policies, it has been difficult to synthesize the parts into a coherent and consistent whole. To provide a framework for deciding the issues presented by this case, therefore, **[**19]** we begin by stating what we conceive to be the fundamental doctrines of *§ 2*.

A. Monopoly Power as the Essence of the *§ 2* Violation

The gravamen of a charge under *§ 1* of the Sherman Act is conduct in restraint of trade; no fundamental alteration of market structure is necessary. Thus, certain restrictive practices among competitors, such as price fixing, are illegal Per se. That the conspirators lack the market power to affect prices is immaterial. *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 224 n.59, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*. *Section 2*, by contrast, is aimed primarily not at improper conduct but at a pernicious market structure in which the concentration of power saps the salubrious influence of competition.

HN1[] Indeed, there is little argument over the principle that existence of monopoly power "the power to control prices or exclude competition," *E. I. du Pont de Nemours & Co., supra, 351 U.S. at 391, 76 S. Ct. at 1005* is "the primary requisite to a finding of monopolization." 1 M. Handler, Twenty-five Years of Antitrust 691 (1973). The Supreme Court has informed us that "monopoly power, whether lawfully or unlawfully acquired, may itself constitute an evil **[**20]** and stand condemned under *§ 2* even though it remains unexercised." *United States v. Griffith, 334 U.S. 100, 107, 68 S. Ct. 941, 945, 92 L. Ed. 1236 (1948)*.

This tenet is well grounded in economic analysis. There is little disagreement that a profit-maximizing monopolist will maintain his prices higher and his output lower and the socially optimal levels that would prevail in a purely competitive market. E. g., F. Scherer, Industrial Market Structure and Economic Performance 13-19 (1970). The price excess represents not a reasonable return on investment but the spoils of the monopolist's power. E.g., L. Sullivan, Handbook of the Law of Antitrust 25-26 (1977); 2 P. Areeda & D. Turner, Supra, at 323-34.

It is not a defense to liability under *§ 2* that monopoly power has not been used to charge more than a competitive price or extract greater than a reasonable profit. Learned Hand stated the rationale in the Alcoa case, *United States v. Aluminum Co. of America, 148 F.2d 416, 427 (2d Cir. 1945)*. He said in his incisive manner that the Sherman Act is based on the belief:

> that possession of unchallenged economic power deadens initiative, discourages thrift and depresses energy; that **[**21]** immunity **[*273]** from competition is a narcotic, and rivalry is a stimulant, to industrial progress; that the spur of constant stress is necessary to counteract an inevitable disposition to let well enough alone.

Judge Hand explained, in addition, that Congress was not "actuated by economic motives alone" in enacting *§ 2*. Id. Considerations of political and social policy form a major part of our aversion to monopolies, for concentration of power in the hands of a few obstructs opportunities for the rest.

Because, like all power, it is laden with the possibility of abuse; because it encourages sloth rather than the active quest for excellence; and because it tends to damage the very fabric of our economy and our society, monopoly power is "inherently evil." *United States v. United Shoe Machinery Corp., 110 F. Supp. 295, 345 (D.Mass.1953)*, Aff'd per curiam, *347 U.S. 521, 74 S. Ct. 699, 98 L. Ed. 910 (1954)*; See *United States v. Grinnell Corp., 236 F. Supp. 244, 258 (D.R.I. 1964)*, Aff'd in part, *384 U.S. 563, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. If a finding of monopoly power were all that were necessary to complete a violation of *§ 2*, our task in this case would be **[**22]** considerably lightened. Kodak's control of the film and color paper markets clearly reached the level of a monopoly. And, while the issue is a much closer one, it appears that the evidence was sufficient for the jury to find that Kodak possessed such power in the camera market as well. [11.] But our inquiry into Kodak's liability cannot end there.

[11.] See our discussion of the relevant markets, Part I Supra. Kodak sold approximately two-thirds of all amateur conventional still cameras throughout most of the relevant period. The frequency with which flashlamp manufacturers approached Kodak with

B. The Requirement of Anticompetitive **[**23]** Conduct

Despite the generally recognized evils of monopoly power, it is "well settled," See J. von Kalinowski, Antitrust Laws & Trade Regulation P 802(3), at 8-41 (1979), that *§ 2* does not prohibit monopoly Simpliciter or, as the Supreme Court phrased it in the early landmark case of *Standard Oil Co. of New Jersey, supra, 221 U.S. at 62, 31 S. Ct. 502*, "monopoly in the concrete."

Thus, while proclaiming vigorously that monopoly power is the evil at which *§ 2* is aimed, courts have declined to take what would have appeared to be the next logical step declaring monopolies unlawful Per se unless specifically authorized by law. To understand the reason for this, one must comprehend the fundamental tension one might almost say the paradox that is near the heart of *§ 2*. This tension creates much of the confusion surrounding *§ 2*. It makes the cryptic Alcoa opinion a litigant's wishing well, into which, it sometimes seems, one may peer and find nearly anything he wishes.

The conundrum was indicated in characteristically striking prose by Judge Hand, who was not able to resolve it. Having stated that Congress "did not condone "good trusts' and condemn "bad' ones; it forbad all," *Alcoa,* ***[**24]*** *supra, 148 F.2d at 427*, he declared with equal force, "The successful competitor, having been urged to compete, must not be turned upon when he wins," *Id. at 430*. Hand, therefore, told us that it would be inherently unfair to condemn success when the Sherman Act itself mandates competition. Such a wooden rule, it was feared, might also deprive the leading firm in an industry of the incentive to exert its best efforts. Further success would yield not rewards but legal castigation. The antitrust laws would thus compel the very sloth they were intended to prevent. We must always be mindful lest the Sherman Act be invoked perversely in favor of those who seek protection against the rigors of competition. E.g., *Buffalo Courier-Express, Inc. v. Buffalo Evening News, Inc., 601 F.2d 48 (2d Cir. 1979)*.

In Alcoa the crosscurrents and pulls and tugs of *§ 2* law were reconciled by noting **[*274]** that, although the firm controlled the aluminum ingot market, "it may not have achieved monopoly; monopoly may have been thrust upon it." *148 F.2d at 429*. In examining this language, which would condemn a monopolist unless it is "the passive beneficiary of a monopoly," *Id. at 430*, we perceive Hand **[**25]** the philosopher. As an operative rule of law, however, the "thrust upon" phrase does not suffice. It has been criticized by scholars, 3 P. Areeda & D. Turner, Supra, at 20; L. Sullivan, Supra, at 96-97; Handler, Some Unresolved Problems of Antitrust, 62 Colum.L.Rev. 930, 934 (1962), and the Supreme Court appears to have abandoned it. See *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; 1 M. Handler, Supra, at 692. Grinnell instructs that ***HN2***[] after possession of monopoly power is found, the second element of the *§ 2* offense is "the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *384 U.S. at 570-71, 86 S. Ct. at 1704*.

This formulation appears to square with the understanding of the draftsmen of the Sherman Act that *§ 2* does not condemn one "who merely by superior skill and intelligence . . . got the whole business because nobody could do it as well." *United Shoe Machinery Corp., supra, 110 F. Supp. at 341* (quoting legislative history). Thus the statement in Alcoa that even well-behaved monopolies are forbidden by *§* ***[**26]*** *2* must be read carefully in context. Its rightful meaning is that, if monopoly power has been acquired or maintained through improper means, the fact that the power has not been used to extract improper benefits provides no succor to the monopolist.

But the law's hostility to monopoly power extends beyond the means of its acquisition. Even if that power has been legitimately acquired, the monopolist may not wield it to prevent or impede competition. Once a firm gains a measure of monopoly power, whether by its own superior competitive skill or because of such actions as restrictive combinations with others, it may discover that the power is capable of being maintained and augmented merely by

---

suggestions for joint development of products and their willingness to acquiesce in arguably one-sided agreements is further evidence of Kodak's power in the camera market. See our discussion of Berkey's *§ 1* allegations, Part V Infra. The precipitous decline, beginning in 1976, of Kodak's share of the camera market was evidence that the jury could consider, although it was not dispositive.

using it. E. g., *Lorain Journal Co. v. United States, 342 U.S. 143, 72 S. Ct. 181, 96 L. Ed. 162 (1951)*. That is, a firm that has achieved dominance of a market might find its control sufficient to preserve and even extend its market share by excluding or preventing competition. A variety of techniques may be employed to achieve this end predatory pricing, lease-only policies, and exclusive buying arrangements, to list a few.

Even if the origin of the monopoly power was innocent, therefore, the **[**27]** Grinnell rule recognizes that maintaining or extending market control by the exercise of that power is sufficient to complete a violation of *§ 2*. As we have explained, only considerations of fairness and the need to preserve proper economic incentives prevent the condemnation of *§ 2* from extending even to one who has gained his power by purely competitive means. The district court judge correctly indicated that such a monopolist is tolerated but not cherished. Thus, the rule of Grinnell must be read together with the teaching of Griffith, ***HN3***[] that the mere existence of monopoly power "whether lawfully or unlawfully acquired," is in itself violative of *§ 2*, "provided it is coupled with the purpose or intent to exercise that power." *334 U.S. at 107, 68 S. Ct. at 945*.

HN4[] The key to analysis, it must be stressed, is the concept of market power. Although power may be derived from size, E. g., *United States v. Swift & Co., 286 U.S. 106, 116, 52 S. Ct. 460, 76 L. Ed. 999 (1932)*, the two are not identical. F. Scherer, Supra, at 352. A firm that has lawfully acquired a monopoly position is not barred from taking advantage of scale economies by constructing, for example, a large and efficient factory. **[**28]** These benefits are a consequence of size and not an exercise of power over the market. [12.] Nevertheless, many anticompetitive **[*275]** actions are possible or effective only if taken by a firm that dominates its smaller rivals. See *Telex Corp. v. International Business Machines Corp., 510 F.2d 894, 925-26 (10th Cir.)*, Cert. dismissed, *423 U.S. 802, 96 S. Ct. 8, 46 L. Ed. 2d 244 (1975)*. A classic illustration is an insistence that those who wish to secure a firm's services cease dealing with its competitors. See, e. g., *Lorain Journal Co., supra.* Such conduct is illegal when taken by a monopolist because it tends to destroy competition, although in the hands of a smaller market participant it might be considered harmless, or even "honestly industrial." *Alcoa, supra, 148 F.2d at 431*.

[29]** In sum, although the principles announced by the *§ 2* cases often appear to conflict, this much is clear. ***HN5***[] The mere possession of monopoly power does not Ipso facto condemn a market participant. But, to avoid the proscriptions of *§ 2*, the firm must refrain at all times from conduct directed at smothering competition. This doctrine has two branches. Unlawfully acquired power remains anathema even when kept dormant. And it is no less true that a firm with a legitimately achieved monopoly may not wield the resulting power to tighten its hold on the market.

C. Monopoly Power as a Lever in Other Markets

It is clear that a firm may not employ its market position as a lever to create or attempt to create a monopoly in another market. See, e. g., *Griffith, supra*; *Smith-Kline Corp. v. Eli Lilly & Co., 575 F.2d 1056 (3d Cir.)*, Cert. denied, *439 U.S. 838, 99 S. Ct. 123, 58 L. Ed. 2d 134 (1978)*. Kodak, in the period relevant to this suit, was never close to gaining control of the markets for photofinishing equipment or services and could not be held to have attempted to monopolize them. [13.] Berkey nevertheless contends that Kodak illicitly gained an advantage in these areas by leveraging its **[**30]** power over film and cameras. Accordingly, we must determine whether a firm violates *§ 2* by using its monopoly power in one market to gain a competitive advantage in another, albeit without an attempt to monopolize the second market. We hold, as did the lower court, that it does.

This conclusion appears to be an inexorable interpretation of the antitrust laws. We tolerate the existence of monopoly power, we repeat, only insofar as necessary to preserve competitive incentives and to be fair to the firm

---

[12.] Nor is a lawful monopolist ordinarily precluded from charging as high a price for its product as the market will accept. True, this is a use of economic power; indeed, the differential between price and marginal cost is used as an indication of the degree of monopoly power, 2 P. Areeda & D. Turner, Supra, at 323-24; See Borden, Inc., 3Trade Reg. Rep. (CCH) P 21,490, at 21,502-03 (FTC 1978). But high prices, far from damaging competition, invite new competitors into the monopolized market. See Part IV Infra. Excessive prices may, however, create an illegal "price squeeze" in another market. See *Alcoa, supra, 148 F.2d at 438*.

[13.] The jury rejected this contention, which was submitted to them Dubitante.

that has attained its position innocently. There is no reason to allow the exercise of such power to the detriment of competition, in either the controlled market or any other. That the competition in the leveraged market may not be destroyed but merely distorted does not make it more palatable. Social and economic effects of an extension of monopoly power militate against such conduct.

The Griffith case confirms this view. There, a **[**31]** chain of motion picture exhibitors operated the only theaters in a number of towns, and used its concomitant buying power to extract from distributors certain exclusive rights in other localities where it faced challengers. The Court held that monopoly power had been illegally used "to beget monopoly," *334 U.S. at 108, 68 S. Ct. 941*. Its rationale swept more broadly, however, for it admonished that "the use of monopoly power, however lawfully acquired, to foreclose competition, to gain a competitive advantage, or to destroy a competitor, is unlawful." *Id. at 107, 68 S. Ct. at 945*.

This rule is linked to the prohibition against tying arrangements in the sale of goods and services. See 3 P. Areeda & D. Turner, Supra, at 223-24. *Indeed, in Northern Pacific Railway v. United States, 356 U.S. 1, 11, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958),* **[*276]** the Supreme Court described the "vice" of ties in language evocative of Griffith: "the use of economic power in one market to restrict competition on the merits in another." And to condemn a tie, the market for the tied product need not be monopolized. It suffices that a "substantial" amount of competition is foreclosed. *Times-Picayune Publishing **[**32]** Co. v. United States, 345 U.S. 594, 608-09, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*; *International Salt Co. v. United States, 332 U.S. 392, 396, 68 S. Ct. 12, 92 L. Ed. 20 (1947)*.

We need not rely solely on policy considerations or an analysis of the Griffith dictum to support the view asserted here. Indeed, whatever problems of murkiness may plague the Alcoa opinion, on this point it is pellucid. The defendant had employed its monopoly power in the ingot market to impose a price squeeze on the manufacturers of aluminum sheet. [14.] Although this court expressly noted that there was no attempt to monopolize the sheet market, it held the challenged practice to be "an unlawful exercise of "Alcoa's' power." *148 F.2d at 438*. A more recent case arriving at the same conclusion is *Sargent-Welch Scientific Co. v. Ventron Corp., 567 F.2d 701, 711-13 (7th Cir.)*, Cert. denied, *439 U.S. 822, 99 S. Ct. 87, 58 L. Ed. 2d 113 (1978)*. There a manufacturer of precision scientific instruments with a monopoly in the market for electromagnetic microbalances allegedly threatened to refuse to sell these devices to retailers who did not stock its millibalances as well. The court ruled that this practice would **[**33]** violate *§ 2*, even though Ventron did not seek or gain a monopoly in the market for millibalances. [15.]

HN6[] Accordingly, the use of monopoly power attained in one market to gain a competitive advantage in another is a violation of *§ 2*, even if there has not been an attempt to monopolize the second market. It is the use of economic power that creates the liability. But, as we have indicated, a large firm does not violate *§ 2* simply **[**34]** by reaping the competitive rewards attributable to its efficient size, nor does an integrated business offend the Sherman Act whenever one of its departments benefits from association with a division possessing a monopoly in its own market. So long as we allow a firm to compete in several fields, we must expect it to seek the competitive advantages of its broad-based activity more efficient production, greater ability to develop complementary products, reduced transaction costs, and so forth. These are gains that accrue to any integrated firm, regardless of its market share, and they cannot by themselves be considered uses of monopoly power.

We shall now apply to the case at bar the principles we have set forth above.

III. THE 110 SYSTEM

[14.] That is, Alcoa sold ingot to rival sheetmakers at such a high price that it gained a distinct competitive advantage for its own sales of sheet.

[15.] We cannot accept Kodak's argument that, read literally, *§ 2* prevents a plaintiff from recovering unless there was at least an attempt to monopolize the market in which it claims to have been injured. Since monopoly power itself is the target of *§ 2*, it is unreasonable to suggest that a firm that possesses such power in one market and uses it to damage competition in another does not "monopolize" within the meaning of the statute.

We turn now to the events surrounding Kodak's introduction of the 110 photographic system in 1972. In many respects, the factors present here are representative of the case as a whole. They involve four of the five principal markets and provide the basis for several of the damages verdicts upheld by the district court, including the largest, an award of $ 15,250,000, before trebling, for lost camera sales.

We commented earlier on the camera revolution **[**35]** sparked by Kodak's introduction of the 126 Instamatic in 1963. Ben Berkey, chairman of Berkey Photo, described the camera's cartridge-loading feature as "foolproof" and remarked that the new simple system gave the industry "a great boost." Even before the 126 was introduced, however, Kodak had set its sights on a new, smaller line of Instamatic cameras. The **[*277]** aim of Kodak's Project 30, or P-30, as it was often called, was a camera barely one inch thick but capable of producing photographs as clear and large as its bulkier cousins.

Kodak's desire to produce large, high-quality snapshots from a small camera created successive ripples in a number of ponds. As camera size decreases, so does the area of film exposed when the shutter is opened. Thus the negative must be substantially enlarged to produce a print, and the P-30 group was concerned that the Kodak color print film then in use, Kodacolor X, might not be equal to the task. There was fear that it was too "grainy" that full-size photographs printed from tiny Kodacolor X negatives would have an unacceptably speckled, pebbly appearance, reflecting the extreme magnification of the small light-sensitive grains constituting **[**36]** the film.

The early view at P-30 had been that despite this problem Kodacolor X would prove "quite adequate" for the new format. By 1966, however, the Kodacolor Future System Committee, considering Kodak's film sales in the 126 size as well as in the format being created by Project 30, began actively to consider the possibility of developing a new type of Kodacolor film. This engendered the second set of ripples, for the committee realized that basic changes in the film would require a new photofinishing process, conducted at temperatures higher than those used in the so-called C-22 method by which prints were made from Kodacolor X. Some committee members, therefore, expressed concern about the effect that a new process might have on independent photofinishers, who developed Kodak film and were purchasers of Kodak equipment and supplies. These concerns were shared by a number of Kodak scientists, such as D. M. Zwick, who feared an "unethical" attempt to create a "deliberate . . . incompatibility with systems other than Kodacolor." [16.]

[37]** Nevertheless, on May 10, 1967, the committee recommended that Kodak proceed with the development of the new film and finishing process, tentatively labeled P-118. This recommendation was adopted at a meeting of the Kodak management on September 20. Although management believed that many of the film improvements were desirable "without regard to the P-30 program," it decided that Kodak should consider marketing the new film in the P-30 size for approximately one year before introducing it in the 126 format. A firm date was not set at that time for introduction of P-118, but by 1969 Kodak decided that P-118 should be used to help launch the P-30 camera system in March 1972. This decision appears to have been influenced by the views of those Kodak officers who believed that

> (without) a new film, the (camera) program is not a new advertisable system. Without the film, our splicer and processors (for the new high-temperature photofinishing process) are not required.

To meet this self-imposed deadline for P-118, Kodak was required to act in great haste. Indeed, the minutes of a Film Process Subcommittee meeting of August 29, 1969, noted that the decision for a 1972 release date **[**38]** required a "crash program" by all participating divisions. Development schedules were altered and some tests

---

16. Writing on March 9, 1967, Zwick saw "no need" for a new film, which would require a higher-temperature process: "We can make Small improvements in Kodacolor X grain and sharpness, in a film which could go through the C-22 process." On the same day, another Kodak scientist, N. H. Groet of the Color Photography Division, wrote that he was "convinced that Project 30 could go with the presently available Kodacolor X film." Like Zwick, Groet conceded that a finer-grained film "would be most welcome for P-30," but he did not believe that major changes in Kodacolor X would be necessary. Indeed, he believed that the new finishing process being considered by the Kodacolor Future System Committee

would raise hell in the photofinishing business, would do little to decrease the cost of the operation, and that the ultimate customer would not benefit.

eliminated altogether. Not surprisingly, then, as the target date approached, Kodak realized that its new film was plagued by a number of difficulties.

[*278] Shortly after initial production runs began in October 1971, Kodak recognized that "several product deficiencies" would exist in the film, now called Kodacolor II, at the time of introduction. Indeed, just eight days before the joint announcement of the new camera, film, and photofinishing process, a technical committee listed eleven "presently identified" problems that could affect "the customer's ultimate quality." Not only did Kodacolor II have a significantly shorter shelf life than had been anticipated, but it also proved grainier than Kodak had originally hoped. This problem was highly significant, of course, because low graininess was supposedly the quality that made Kodacolor II especially suitable for the Pocket Instamatic cameras. [17.]

[39]** Despite these deficiencies, Kodak proceeded with its plans for introduction of the 110 system, of which Kodacolor II had become an integral part. On March 16, 1972, amid great fanfare, the system was announced. Finally, said Kodak, there was a "little camera that takes big pictures." Kodacolor II was "a remarkable new film" indeed, the best color negative film Kodak had ever manufactured. There had long been other small cameras, Kodak explained:

> But they weren't like these. Now there are films fine enough, and sharp enough, to give you big, sharp pictures from a very small negative.

In accord with Kodak's 1967 plan, Kodacolor II was sold only in the 110 format for eighteen months after introduction. It remains the only 110-size color print film Kodak has ever sold. [18.]

As Kodak had hoped, the 110 system proved to be a dramatic success. **[**40]** In 1972 the system's first year the company sold 2,984,000 Pocket Instamatics, more than 50% Of its sales in the amateur conventional still camera market. The new camera thus accounted in large part for a sharp increase in total market sales, from 6.2 million units in 1971 to 8.2 million in 1972. Rival manufacturers hastened to market their own 110 cameras, but Kodak stood alone until Argus made its first shipment of the "Carefree 110" around Christmas 1972. The next year, although Kodak's competitors sold over 800,000 110 cameras, Kodak retained a firm lead with 5.1 million. Its share of 110 sales did not fall below 50% Until 1976. Meanwhile, by 1973 the 110 had taken over most of the amateur market from the 126, and three years later it accounted for nearly four-fifths of all sales.

Berkey's Keystone division was a late entrant in the 110 sweepstakes, joining the competition only in late 1973. Moreover, because of hasty design, the original models suffered from latent defects, and sales that year were a paltry 42,000. With interest in the 126 dwindling, Keystone thus suffered a net decline of 118,000 unit sales in 1973. The following year, however, it recovered strongly, in large **[**41]** part because improvements in its pocket cameras helped it sell 406,000 units, 7% Of all 110s sold that year.

Berkey contends that the introduction of the 110 system was both an attempt to monopolize and actual monopolization of the camera market. It also alleges that the marketing of the new camera constituted an impermissible leveraging of Kodak's film monopoly into the two photofinishing markets, services and equipment. [19.]

HN7[] Because the jury returned what amounted to general verdicts for the plaintiff on each of these charges, we are bound in the following discussion to construe the **[*279]** evidence and the possible inferences in the light most favorable to Berkey. See, e. g., *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 696* & n.6, *82 S. **[**42]** Ct. 1404, 8 L. Ed. 2d 777 (1962)*. We note En passant, however, that in large and complex cases such as

---

17. Kodacolor II's grain, though disappointing, was clearly superior to that of Kodacolor X. Berkey does not appear to dispute the point. Shortly after introduction of the 110 system, a confidential memorandum prepared by a competitor in the film market compared Kodacolor II with Kodacolor X and found that the new film "yields a less granular image structure and, therefore, better detail rendition in an enlarged color print."

18. Three pre-existing Kodak films were, however, sold for other uses: Verichrome Pan for black-and-white snapshots, and Kodachrome X and Ektachrome X for color slides.

19. The jury found Kodak guilty of leveraging its monopoly power into the market for photofinishing chemicals, See note 1, Supra. Berkey withdrew this claim during the damages trial, citing its inability to obtain statistical proof of its own harm.

this, involving many novel legal issues, the better practice would have been to require special verdicts or the submission of interrogatories to the jury pursuant to *Fed.R.Civ.P. 49*. In that way the right to a jury trial of all factual issues is preserved [20.] while the probability of a laborious and expensive retrial is reduced. See *SCM Corp. v. Xerox Corp., 463 F. Supp. 983, 988-90* & nn.13, 15 (D.Conn.1978), Remanded on other grounds, *599 F.2d 32 (2d Cir.1979)*. Certainly the already difficult task of reviewing a case of this magnitude would have been eased somewhat for this court if we knew precisely what the jury's findings were on several specific factual issues.

[43]** A. Attempt to Monopolize and Monopolization of the Camera Market

There is little doubt that the evidence supports the jury's implicit finding that Kodak had monopoly power in cameras. [21.] The principal issues presented to us regarding the effect of the 110 introduction in the camera market are whether Kodak engaged in anticompetitive conduct and, if so, whether that conduct caused injury to Berkey.

It will be useful at the outset to present the arguments on which Berkey asks us to uphold its verdict:

(1) Kodak, a film and camera monopolist, was in a position to set industry standards. Rivals could not compete effectively without offering products similar to Kodak's. Moreover, Kodak persistently refused to make film available for most formats other than those in which it made cameras. Since cameras are worthless without film, this policy effectively prevented other manufacturers from introducing cameras in new formats. Because of its dominant position astride two markets, and by use **[**44]** of its film monopoly to distort the camera market, Kodak forfeited its own right to reap profits from such innovations without providing its rivals with sufficient advance information to enable them to enter the market with copies of the new product on the day of Kodak's introduction. This is one of several "predisclosure" arguments Berkey has advanced in the course of this litigation.

(2) The simultaneous introduction of the 110 camera and Kodacolor II film, together with a campaign advertising the two jointly, enabled Kodak to garner more camera sales than if it had merely scaled down Kodacolor X to fit the new camera. The jury could conclude that Kodacolor II was an inferior product and not technologically necessary for the success of the 110. In any event, Kodak's film monopoly prevented any other camera manufacturer from marketing such a film-camera "system" and the joint introduction was therefore anticompetitive.

(3) For eighteen months after its introduction, Kodacolor II was available only in the 110 format. Thus it followed that any consumer wishing to use Kodak's "remarkable new film" had to buy a 110 camera. Since Kodak was the leading and at first the only manufacturer **[**45]** of such devices, its camera sales were boosted at the expense of its competitors.

For the reasons explained below, we do not believe any of these contentions is sufficient on the facts of this case to justify an award of damages to Berkey. We therefore reverse this portion of the judgment.

1. Predisclosure

Through the 1960s, Kodak followed a checkered pattern of predisclosing innovations to various segments of the industry. Its purpose on these occasions evidently was to ensure that the industry would be able to **[*280]** meet consumers' demand for the complementary goods and services they would need to enjoy the new Kodak products. But predisclosure would quite obviously also diminish Kodak's share of the auxiliary markets. It was therefore, in the words of Walter Fallon, Kodak's chief executive officer, "a matter of judgment on each and every occasion" whether predisclosure would be for or against Kodak's self-interest. Thus, well before the 1965 introduction of Super-8 movie films, Kodak, which had a relatively small share of the movie camera market, provided sufficient information to companies such as Keystone and Bell & Howell to enable them to make cameras to use the new **[**46]** film. It

---

[20.] Since the issue is not presented on this appeal, we need not express our view on whether some actions may be too complex to be tried to a jury. The relevant cases are canvassed in Note, The Right to a Jury Trial in Complex Civil Litigation, 92 Harv.L.Rev. 898 (1979).

[21.] See note 11 Supra.

also released processing information so that photofinishers could develop the film. But in 1963, when Kodak came out with Kodacolor X and the 126 Instamatic, it kept its own counsel until the date of introduction.

As early as 1968, some Kodak employees urged that advance warning of the P-30 system would be needed, at least to film processors and manufacturers of photofinishing equipment, to give them time to prepare for Kodacolor II and the new high-temperature finishing process, which was eventually labeled C-41. One memorandum noted that "P-30 will require more changes in photofinishing techniques than were required for P-13 (the 126 system). These differences . . . seem to indicate a minimum 6 month advance disclosure to other firms." [22.] Nevertheless, Kodak decided not to release advance information about the new film and format. The decision was evidently based on the perception of Dr. Louis K. Eilers, Kodak's chief executive officer at that time, that Kodak would gain more from being first on the market for the sale of all goods and services related to the 110 system than it would lose from the inability of other photofinishers to process Kodacolor II. An important **[**47]** factor in Eilers's thinking may have been that Kodak had already decided to manufacture the new film initially in the 110 format only. Since Kodacolor II could not be used in any pre-existing cameras, the demand for photofinishing services and equipment in the first several months would be within the capacities of CP&P and KAD.

Although Kodak had most seriously considered divulging advance information of the 110 system to processors and equipment manufacturers, it was a rival camera maker that forced a small breach in its wall of secrecy. In the summer of 1971, Bell & Howell, implicitly threatening legal action, began to pressure Kodak "to notify photographic equipment manufacturers in advance of its introduction of new films or film formats which require changes in equipment design." Harmer Brereton, Kodak's general counsel, insisted in letters to Bell & Howell that such predisclosure was not necessary and would **[**48]** raise legal problems of its own. Nevertheless, afraid that the two companies "were getting ready to get into the ring," Kodak determined to avoid litigation if it could, and it proposed an experimental predisclosure arrangement with the 110 system. On January 3, 1972, Brereton informed Bell & Howell that Kodak would soon introduce "a new cartridge-loading still camera and (slide) projector to accommodate a new film format." More information, Brereton explained, would be forthcoming only for a fee, necessary to compensate Kodak for its "very considerable research and development expenses" and to represent the value of such knowledge to the recipient.

Brereton's letter made clear that the information would be available to other camera makers "on a nondiscriminatory basis," and within the next two weeks Kodak explained the offer to Berkey. For a fee of $ 10,000 Kodak would provide a general description of the new film format and cartridge, a view of the cartridge and sample prints and slides, the anticipated dates of announcement and commercial introduction, and an outline of the terms on which Kodak would further disclose "such information **[*281]** as we believe will enable you to **[**49]** design and manufacture cameras to accept our new cartridge and film format." Berkey paid the $ 10,000 fee and also the supplemental fees, totalling $ 50,000 for eleven sheets of specifications and notes. For the $ 60,000 Berkey gained somewhat less than two months advance knowledge of information it needed to compete with Kodak in the sale of 110 cameras. The jury could unquestionably conclude that this was far from adequate to permit Berkey to be "at the starting line" when the 110 was introduced.

Judge Frankel did not decide that Kodak should have disclosed the details of the 110 to other camera manufacturers prior to introduction. Instead, he left the matter to the jury, instructing them as follows:

> Standing alone, the fact that Kodak did not give advance warning of its new products to competitors would not entitle you to find that this conduct was exclusionary. Ordinarily a manufacturer has no duty to predispose its new products in this fashion. It is an ordinary and acceptable business practice to keep one's new developments a secret. However, if you find that Kodak had monopoly power in cameras or in film, and if you find that this power was so great as to make it impossible **[**50]** for a competitor to compete with Kodak in the camera market unless it could offer products similar to Kodak's, you may decide whether in the light of other conduct you determine to be anticompetitive, Kodak's failure to predisclose was on balance an exclusionary course of conduct.

[22.] The same memorandum also recommended six-month predisclosure to competing film manufacturers.

We hold that this instruction was error and that, as a matter of law, Kodak did not have a duty to predisclose information about the 110 system to competing camera manufacturers.

As Judge Frankel indicated, and as Berkey concedes, a firm may normally keep its innovations secret from its rivals as long as it wishes, forcing them to catch up on the strength of their own efforts after the new product is introduced. See, e. g., *Kewanee Oil Co. v. Bicron Corp., 416 U.S. 470, 481, 94 S. Ct. 1879, 40 L. Ed. 2d 315 (1974)*. It is the possibility of success in the marketplace, attributable to superior performance, that provides the incentives on which the proper functioning of our competitive economy rests. If a firm that has engaged in the risks and expenses of research and development were required in all circumstances to share with its rivals the benefits of those endeavors, this incentive would very likely **[**51]** be vitiated.

Withholding from others advance knowledge of one's new products, therefore, ordinarily constitutes valid competitive conduct. Because, as we have already indicated, a monopolist is permitted, and indeed encouraged, by *§ 2* to compete aggressively on the merits, any success that it may achieve through "the process of invention and innovation" is clearly tolerated by the antitrust laws. *United Shoe Machinery Corp., supra, 110 F. Supp. at 344*.

The Supreme Court's language in *United States v. National Lead Co., 332 U.S. 319, 67 S. Ct. 1634, 91 L. Ed. 2077 (1947)*, is instructive on this score. There, National Lead and du Pont were found to have engaged in an illegal patent pool that restrained commerce in titanium products. As part of its decree, the district court ordered the firms to make licenses available at reasonable fees and also to make available for a period of three years and at a reasonable fee certain information on processes exploiting these patents. The Supreme Court upheld these requirements as a reasonable remedy for the antitrust violations. *Id. at 334-35, 67 S. Ct. 1634*. It squarely rejected, however, the Government's attempt to extend the decree by requiring **[**52]** the defendants to furnish again for only three years and at a reasonable fee all information desired by any applicant relating to the methods and processes for manufacturing titanium pigments:

> The attempt of the Government to throw the field of technical knowledge in the titanium pigment industry wide-open would reduce the competitive value of the independent research of the parties. It **[*282]** would discourage rather than encourage competitive research. *Id. at 359, 67 S. Ct. at 1653*.

Moreover, enforced predisclosure would cause undesirable consequences beyond merely encouraging the sluggishness the Sherman Act was designed to prevent. A significant vice of the theory propounded by Berkey lies in the uncertainty of its application. Berkey does not contend, in the colorful phrase of Judge Frankel, that "Kodak has to live in a goldfish bowl," disclosing every innovation to the world at large. [23.] However predictable in its application, such an extreme rule would be insupportable. Rather, Berkey postulates that Kodak had a duty to disclose limited types of information to certain competitors under specific circumstances. But it is difficult to comprehend how a major corporation, **[**53]** accustomed though it is to making business decisions with antitrust considerations in mind, could possess the omniscience to anticipate all the instances in which a jury might one day in the future retrospectively conclude that predisclosure was warranted. [24.] And it is equally difficult to discern workable guidelines that a court might set forth to aid the firm's decision. For example, how detailed must the information conveyed be? And how far must research have progressed before it is "ripe" for disclosure? These inherent uncertainties would have an inevitable chilling effect on innovation. They go far, we believe, towards explaining why no court has ever imposed the duty Berkey seeks to create here.

[54]** An antitrust plaintiff urging a predisclosure rule, therefore, bears a heavy burden in justifying his request. Berkey recognizes the weight of this burden. It contends that it has been met. Kodak is not a monolithic monopolist, acting in a single market. Rather, its camera monopoly was supported by its activity as a film manufacturer. Berkey therefore argues that by not disclosing the new format in which it was manufacturing film, Kodak unlawfully

---

[23.] This is apparent from the transcript of the conference to settle the language of the charge to the jury.

[24.] Berkey's argument that Kodak considered predisclosing the 110 system, and so could not be surprised when found liable for failing to do so, is thus a two-edged sword. It illustrates the difficulties in prediction even when the problem has been squarely faced.

enhanced its power in the camera market. Indeed, Kodak not only participates in but monopolizes the film industry. The jury could easily have found that, when Kodak introduced a new film format, rival camera makers would be foreclosed from a substantial segment of the market until they were able to manufacture cameras in the new format. Accordingly, Berkey contended that Kodak illegitimately used its monopoly power in film to gain a competitive advantage in cameras. Thus Berkey insists that the jury was properly permitted to consider whether, on balance, the failure to predisclose the new format was exclusionary. We disagree.

We note that this aspect of Berkey's claim is in large measure independent of the fact that a new film, Kodacolor **[**55]** II, was introduced simultaneously with the new format. It is primarily introduction of the format itself the size of the film and the cartridge in which it is packaged of which Berkey complains. Indeed, at oral argument counsel for Berkey contended that predisclosure would have been required even had Kodak merely cut down Kodacolor X to fit the new 110 camera and cartridge.

We do not perceive, however, how Kodak's introduction of a new format was rendered an unlawful act of monopolization in the camera market because the firm also manufactured film to fit the cameras. The 110 system was in substantial part a camera development. After all, P-30 existed long before the P-118 film project began, and much of the creative energy behind it was consumed by efforts to produce the camera itself. [25.] Indeed, Berkey not only argues **[*283]** that a new film was not necessary to introduce the new pocket cameras; it also concedes that the early models of its own 110 cameras, brought to market some eighteen months after it first learned of the new format, suffered because of the haste with which they were designed.

[56]** Clearly, then, the policy considerations militating against predisclosure requirements for monolithic monopolists are equally applicable here. The first firm, even a monopolist, to design a new camera format has a right to the lead time that follows from its success. The mere fact that Kodak manufactured film in the new format as well, so that its customers would not be offered worthless cameras, could not deprive it of that reward. Nor is this conclusion altered because Kodak not only participated in but dominated the film market. Kodak's ability to pioneer formats does not depend on it possessing a film monopoly. Had the firm possessed a much smaller share of the film market, it would nevertheless have been able to manufacture sufficient quantities of 110-size film either Kodacolor X or Kodacolor II to bring the new camera to market. It is apparent, therefore, that the ability to introduce the new format without predisclosure was solely a benefit of integration and not, without more, a use of Kodak's power in the film market to gain a competitive advantage in cameras.

Indeed, such authority as exists supports this conclusion. *ILC Peripherals Leasing Corp. v. International Business* ***[**57]*** *Machines Corp., 458 F. Supp. 423 (N.D.Cal.1978)* (Memorex), was a case similar in some respects to this one. IBM was the leading manufacturer of central data processing units (CPUs) and competed with Memorex and others to supply peripheral equipment for use in conjunction with IBM CPUs. When IBM made changes in the intricate interface the "computer "plug' " by which peripherals are attached to the central system, it did not provide advance information to Memorex, thereby forcing its rival to learn what it could after the new CPUs were shipped to customers. Memorex contended that to compete effectively in the peripherals market it needed to know, under some form of licensing arrangement, about interface changes as soon as IBM announced its products. *Id. at 436-37*. Noting the total absence of authority in support of this position, the district court indicated that plaintiff could properly be left to rely on "reverse engineering" to develop IBM-compatible equipment. IBM would thus be unchallenged for a time in the market for certain peripherals, but "(depriving) IBM of its lead time would remove its incentive to invent." *Id. at 437*.

The predisclosure demanded here is much more radical **[**58]** than that sought and rejected in Memorex. Berkey claims that it should have been given the information about Kodak's new film format long before product announcement and without any licensing fee. Moreover, the possibility lurking in Memorex that IBM, by creating technological incompatibilities, was tying peripherals sales to its CPUs is not present here. Cf. *Response of Carolina, Inc. v. Leasco Response, Inc., 537 F.2d 1307, 1330 (5th Cir. 1976)*. Kodak's new format was primarily a

---

[25.] The "red-eye" problem experienced by the early 110 models, See note 35 Infra, does not detract from the fact that the new camera was indeed smaller and more convenient than its predecessors.

camera development, and the use of Kodacolor II did not in itself create any incompatibilities with an existing camera. Regardless of whether the district court decided Memorex correctly a question we are pleased to leave to our colleagues in the Ninth Circuit the case makes it manifest that there is no authority for the extreme position asserted by Berkey.

Our analysis, however, must proceed beyond the conclusion that introduction of film to meet Kodak's new camera format was not in itself an exercise of the company's monopoly power in film. Berkey contends that Kodak in the past used its film monopoly to stifle format innovations by any other camera manufacturer. Accordingly, it argues that Kodak was **[**59]** barred from reaping the benefits of such developments without making predisclosure to allow its rivals to share from the beginning in the rewards.

There is, indeed, little doubt that the jury could have found that Kodak, by refusing **[*284]** to make film available on economical terms, obstructed sales of cameras in competing formats. Thus, Kodak has never supplied film to fit the Minox, a small camera [26.] **[**60]** that uses a cartridge similar to that of the Instamatics and that has been on the market since the 1930s, or similar cameras by Minolta and Mamiya that were also introduced before the Kodak 126. Merchants of these cameras, including Berkey, made numerous requests that Kodak sell film packaged in their formats, with or without the Kodak name. As an alternative, they asked Kodak to sell bulk film rolls large enough to permit the camera manufacturers economically to cut the film down to the appropriate size and spool it. Kodak denied all such appeals. Some of the miniature cameras did survive but, as even Kodak's own economic expert testified, its policy drastically reduced the ability of rival manufacturers to compete by introducing new camera formats. [27.]

We accept the proposition that it is improper, in the absence of a valid business policy, for a firm with monopoly power in one market to gain a competitive advantage in another by refusing to sell a rival the monopolized goods or services he needs to compete effectively in the second market. Indeed, Kodak itself was the defendant in the leading case establishing this point. *Eastman Kodak Co. v. Southern Photo Materials Co., 273 U.S. 359, 375, 47 S. Ct. 400, 71 L. Ed. 684 (1927)*; Accord, *Poster Exchange, Inc. v. National Screen Service Corp., 431 F.2d 334, 339-40 (5th Cir. 1970)*, Cert. denied, *401 U.S. 912, 91 S. Ct. 880, 27 L. Ed. 2d 811 (1971)*. Moreover, as indicated by our discussion of *§ 2* principles, such a use of power would be illegal regardless of whether the film monopoly were legally or illegally acquired. It may be that Kodak violated **[**61]** the Sherman Act when it refused to sell Berkey bulk film for use in the Minolta camera, and Berkey might well have recovered for its loss of Minolta sales and for any additional expenses incurred because of Kodak's conduct.

But Berkey did not sue Kodak then for its refusal to sell film, and it concedes that it is not now claiming a right to damages on this basis. Rather, it contends that Kodak's past offenses created a continuing duty to disclose its new formats to competing camera manufacturers, and that its violation of that obligation supports the jury's verdict. For two reasons, however, we decline to recognize such a duty.

First, the benefits that would flow to Kodak's rivals in the camera market from such a rule bear no relationship to the injury caused them by the monopolist's refusal to sell films for their competing camera formats. There is no reason to suppose, for example, that the loss suffered by Berkey because Kodak undercut Minolta sales was at all comparable to the boon Berkey would have received had Kodak given it the opportunity to participate from the beginning in the 110 revolution. [28.] Indeed, some of the **[*285]** camera manufacturers who would be

---

[26.] The Minox "spy camera" was even smaller, but substantially more expensive, than the 110.

[27.] Although Kodak does not manufacture cameras in the 135 format, it does sell film for them. This policy may represent a perception that the 135 format competes less directly with Kodak's popular cameras than do the Minolta and other miniature models.

[28.] Even if the format obstructed by Kodak were comparable to the 110, predisclosure would not be a necessary remedy, as the following example demonstrates. Suppose that Berkey, unaware that Kodak is planning to bring forth the 110 camera, asks Kodak to make film available for a new camera it has designed that happens to be identical in all respects to the 110 except that it requires a slightly different film format. Kodak, without a legitimate competitive reason and solely to prevent Berkey's camera benefited **[**62]** by predisclosure might not have participated in or even contemplated entering the market at the time Kodak committed its alleged violations. For them, predisclosure would be pure windfall.

[63]** Second, it would be inappropriate to hold that Kodak should spontaneously have recognized a duty to release advance information of its new products to its competitors. It is important to note that Berkey, which no longer sells cameras, does not advance its predisclosure argument as part of a demand for equitable relief. Where a firm has engaged in monopolistic practices, a court is not limited, in fashioning prospective remedies, to an injunction against future violations of law. See, e. g., *Schine Chain Theatres, Inc. v. United States, 334 U.S. 110, 128, 68 S. Ct. 947, 92 L. Ed. 1245 (1948)*. Hence the function of the court includes "undoing" what the monopoly achieved by its illegal acts. *United States v. Paramount Pictures, Inc., 334 U.S. 131, 171, 68 S. Ct. 915, 92 L. Ed. 1260 (1948)*.

Accordingly, if Berkey were still a camera maker, it might be able to demand that Kodak, to nullify the effect of its monopolistic obstruction of new formats for competing cameras, be required to allow its rivals to share from the start in the business created by its own changes in format. Even in the equitable context, National Lead Would caution against a decree that might stifle future innovations. **[**64]** But Berkey, in any event, does not demand prospective relief. Instead it asks us to condemn Kodak retrospectively, holding that it violated *§ 2* and so is liable for damages, because it did not decide on its own initiative to take unusual, self-abnegatory actions as a corrective for unadjudicated prior offenses. This is without justification.

Conclusion. We have held that Kodak did not have an obligation, merely because it introduced film and camera in a new format, to make any predisclosure to its camera-making competitors. Nor did the earlier use of its film monopoly to foreclose format innovation by those competitors create of its own force such a duty where none had existed before. In awarding Berkey $ 15,250,000, just $ 828,000 short of the maximum amount demanded, the jury clearly based its calculation of lost camera profits on Berkey's central argument that it had a right to be "at the starting line when the whistle blew" for the new system. [29.] The verdict, therefore, cannot stand.

[65]** 2. Systems Selling

Berkey's claims regarding the introduction of the 110 camera are not limited to its asserted right to predisclosure. The Pocket Instamatic not only initiated a new camera format, it was also promoted together with a new film. As we noted earlier, the view was expressed at Kodak that "(without) a new film, the (camera) program is not a new advertisable system." Responding in large measure to this perception, Kodak hastened research and development of Kodacolor II so that it could be brought to market at the same time as the 110 system. Based on such evidence, and the earlier joint introduction of Kodacolor X and the 126 camera, the jury could readily have found that the simultaneous release of Kodacolor II and the Pocket Instamatic was part of a plan by which Kodak sought to use its

---

sales, declines to supply the film. Berkey then concludes that marketing of its new camera would be economically unfeasible. Just three months later, without predisclosure to Berkey, Kodak introduces the 110, which is a great commercial success.

At first it might appear that in this extreme hypothetical case Berkey has a right to share the initial profits of the 110 camera through predisclosure. On closer examination, it becomes clear that the wrong to Berkey is not the absence of knowledge of the 110 but exclusion from the market of its own essentially identical camera. To be sure, most of Kodak's 110 sales would have been captured earlier by Berkey had it not been prevented from introducing its camera, so the volume of Kodak's 110 sales may assist in computation of Berkey's damages. That, however, is the only relevance of the 110 system to this hypothetical case. As the premise is varied to bring the hypothetical closer to the actual case at bar for example, by attenuating the physical similarity between the two cameras or the proximity of their arrival in the market even this relevance disappears. Kodak's violation is completed when it blocks Berkey's new camera format; nothing is added to the offense by its decision to introduce its own new format without predisclosure.

[29.] The three 110 damages theories, submitted to the jury in the alternative, attempted to measure the displacement of Berkey camera sales from the moment the 110 system was introduced. One theory, allocating to Berkey its "fair share" of all Kodak post-introduction camera sales, indicated untrebled damages of $ 16,073,000. The other two theories, addressing 110 sales only, suggested $ 13,668,000 and $ 15,835,000 respectively.

combined film and camera capabilities to bolster faltering camera sales. Berkey contends that this program of selling was anticompetitive and therefore violated *§ 2*. We disagree.

[*286] It is important to identify the precise harm Berkey claims to have suffered from this conduct. It cannot complain of a product introduction Simpliciter for the same reason it could not demand **[**66]** predisclosure of the new format: any firm, even a monopolist, may generally bring its products to market whenever and however it chooses. [30.] Rather, Berkey's argument is more subtle. It claims that by marketing the Pocket Instamatics in a system with a widely advertised new film, Kodak gained camera sales at Berkey's expense. And, because Kodacolor II was not necessary to produce satisfactory 110 photographs and in fact suffered from several deficiencies, these gains were unlawful. [31.]

[67]** It may be conceded that, by advertising Kodacolor II as a "remarkable new film" capable of yielding "big, sharp pictures from a very small negative," Kodak sold more 110 cameras than it would have done had it merely marketed Kodacolor X in 110-size cartridges. The quality of the end product a developed snapshot is at least as dependent upon the characteristics of the film as upon those of the camera. It is perfectly plausible that some customers bought the Kodak 110 camera who would have purchased a competitor's camera in another format had Kodacolor II not been available and widely advertised as capable of producing "big, sharp pictures" from the tiny Pocket Instamatic. Moreover, there was also sufficient evidence for the jury to conclude that a new film was not necessary to bring the new cameras to market. Walter Fallon testified that in 1967, as manager of Kodak's Film Emulsion and Plate Organization, he expressed the view that Kodacolor X "would give satisfactory pictures, satisfactory customer results" in the P-30 format. Documents introduced at trial indicated that this opinion was shared by at least two Kodak research scientists. [32.]

[68]** But necessity is a slippery concept. Indeed, the two scientists, Zwick and Groet, conceded that improvements in the quality of Kodacolor X would be "most welcome." Even if the 110 camera would produce adequate snapshots with Kodacolor X, it would be difficult to fault Kodak for attempting to design a film that could provide better results. The attempt to develop superior products is, as we have explained, an essential element of lawful competition. Kodak could not have violated *§ 2* merely by introducing the 110 camera with an improved film.

Accordingly, much of the evidence at trial concerned the dispute over the relative merits of Kodacolor II and Kodacolor X. There was ample evidence that for some months following the 110 introduction, Kodacolor II was inferior to its predecessor in several respects. Most notably, it degenerated more quickly than Kodacolor X, so that its shelf life was shorter. [33.] **[**69]** It is undisputed, however, that the grain of Kodacolor II, though not as fine as Kodak had hoped, was better than that of the older film. [34.]

In this context, therefore, the question of product quality has little meaning. A product that commends itself to many users because superior in certain respects may be rendered unsatisfactory to others by flaws they considered fatal. Millions of consumers, for example, evidently found the 110 **[*287]** camera highly attractive because of its "pocketability." Others, perhaps more concerned over the quality of their flash pictures, found the original models

---

30. This is not to say, of course, that new product introductions are Ipso facto immune from antitrust scrutiny, and we do not agree with Kodak's argument that they are, See, e. g., *Sargent-Welch Scientific Co. v. Ventron Corp., 567 F.2d 701 (7th Cir. 1977)*, Cert. denied, ***439 U.S. 822, 99 S. Ct. 87, 58 L. Ed. 2d 113 (1978)*** (use of power over old product to promote sale of new); in all such cases, however, it is not the product introduction itself, but some associated conduct, that supplies the violation.

31. To the extent that Berkey argues that Kodak's past monopolization of film hindered any other firm from introducing a new photographic system, the contention is merely a repetition of that rejected in Part III.A.1 Supra.

32. See note 16 Supra.

33. Testimony and documents introduced at trial indicated that Kodacolor II lost much of its "speed", See note 8, Supra, within three to six months of manufacture. In addition, there were problems with "latent image keeping" the ability of the film to retain a scene until the film was developed.

34. See note 17 Supra.

unsatisfactory because of the high incidence of "red-eye." [35.] **[**70]** Similarly, some individuals would, if given the option and aware of the relevant factors, [36.] select Kodacolor II over Kodacolor X because of its superior grain, which was especially useful for a small camera; others might choose Kodacolor X because the original variety of Kodacolor II had to be used more quickly to produce attractive pictures.

It is evident, then, that in such circumstances no one can determine with any reasonable assurance whether one product is "superior" to another. Preference is a matter of individual taste. The only question that can be answered is whether there is sufficient demand for a particular product to make its production worthwhile, and the response, so long as the free choice of consumers is preserved, can only be inferred from the reaction of the market.

When a market is dominated by a monopolist, of course, the ordinary competitive forces of supply may not be fully effective. Even a monopolist, however, must generally be responsive to the demands of customers, for if it persistently markets unappealing goods it will invite a loss of sales and an increase of competition. [37.] If a monopolist's products gain acceptance in the market, therefore, it is of no importance that a judge or jury may later regard them as inferior, so long as that success was not based on any form of coercion. Certainly the mere introduction of Kodacolor II along with the Pocket Instamatics did not coerce **[**71]** camera purchasers. [38.] Unless consumers desired to use the 110 camera for its own attractive qualities, they were not compelled to purchase Kodacolor II especially since Kodak did not remove any other films from the market when it introduced the new one. If the availability of Kodacolor II spurred sales of the 110 camera, it did so because some consumers regarded it as superior, at least for the smaller format. [39.]

[72]** Of course, Kodak's advertising encouraged the public to take a favorable view of both Kodacolor II and the 110 camera, but that was not improper. ***HN8***[] A monopolist is not forbidden to publicize its product unless the extent of this activity is so unwarranted by competitive exigencies as to constitute an entry barrier. See *American Tobacco Co. v. United States, 328 U.S. 781, 797, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*; Borden, Inc., 3Trade Reg. Rep. (CCH) P 21,490 (FTC 1978). And in its advertising, a producer is ordinarily permitted, much like an advocate at law, to bathe his cause in the best light possible. [40.] **[**73]** Advertising that emphasizes **[*288]** a product's

---

35. "Red-eye" is the appearance of a red glint in the eye of the snapshot's subject on a picture taken with a flashlamp. It is a result in large part of the small distance between the flash device and the camera lens. Hence, it was a greater problem for the original 110 cameras than for their larger predecessors in the 126 format.

36. See note 42 Infra.

37. See 3 P. Areeda & D. Turner, Supra, at 41-42.

38. Similarly, it appears that the Pocket Instamatic spurred sales of Kodak's film at the expense of its competitors, despite a red-eye problem that made the camera unacceptable to many consumers. But it would appear unreasonable on its face to allow a jury to conclude from this that the introduction of the 110 camera, which millions of other customers welcomed eagerly, was improper conduct.

39. Thus, the situation might be completely different if, upon the introduction of the 110 system, Kodak had ceased producing film in the 126 size, thereby compelling camera purchasers to buy a Kodak 110 camera. Or had Kodak shifted production in all formats from Kodacolor X to Kodacolor II before other photofinishers could process the new film, it would force photographers to procure their photofinishing services from CP&P. In such a case the technological desirability of the product change might bear on the question of monopolistic intent. See *Response of Carolina, Inc. v. Leasco Response, Inc., 537 F.2d 1307, 1330 (5th Cir. 1976)*.

40. Indeed, Kodak apparently did precisely that in introducing the 110 camera. Aware of the camera's substantial red-eye problem, the firm evidently decided "to provide enough ambient light for exposure without flash" at the press conference announcing the new system. This rather obvious ploy certainly did not amount to the type of deception that might, as we indicate in the following footnote, support an action under *§ 2*.

strengths and minimizes its weaknesses does not, at least unless it amounts to deception, constitute anticompetitive conduct violative of *§ 2*. [41]

We conclude, therefore, that Kodak did not contravene the Sherman Act merely by introducing **[**74]** Kodacolor II simultaneously with the Pocket Instamatic and advertising the advantages of the new film for taking pictures with a small camera.

3. Restriction of Kodacolor II to the 110 Format

There is another aspect to Berkey's claim that introduction of Kodacolor II simultaneously with the Pocket Instamatic camera was anticompetitive. For eighteen months after the 110 system introduction, Kodacolor II was available only in the 110 format. Since Kodak was the first to have the 110s on the market, Berkey asserts it lost camera sales because consumers who wished to use the "remarkable new film" would be compelled to buy a Kodak camera. This facet of the claim, of course, is not dependent on a showing that Kodacolor II was inferior in any respect to Kodacolor X. Quite the opposite is true. The argument is that, since consumers were led to believe that Kodacolor II was superior to Kodacolor X, they were more likely to buy a Kodak 110, rather than a Berkey camera, so that the new film could be used.

HN9[] Where a course of action is ambiguous, "consideration of intent may play an important role in divining the actual nature and effect of the alleged anticompetitive conduct," *United States **[**75]** v. United States Gypsum Co., 438 U.S. 422, 436 n.13, 98 S. Ct. 2864, 2873 n.13, 57 L. Ed. 2d 854 (1978)*; Accord, e. g., *Sargent-Welch Scientific Co., supra, 567 F.2d at 712*. We shall assume Arguendo that Kodak violated *§ 2* of the Sherman Act if its decision to restrict Kodacolor II to the 110 format was not justified by the nature of the film but was motivated by a desire to impede competition in the manufacture of cameras capable of using the new film. This might well supply the element of coercion we found lacking in the previous section. We shall assume also that there was sufficient evidence for the jury to conclude that the initial decision to market Kodacolor II exclusively in the 110 format during its introductory period was indeed taken for anticompetitive purposes. [42]

[76]** But to prevail, Berkey must prove more, for injury is an element of a private treble damages action. Berkey must, therefore, demonstrate that some consumers who would have bought a Berkey camera were dissuaded from doing so because Kodacolor II was available only in the 110 format. This it has failed to establish. The record is totally devoid of evidence that Kodak or its retailers actually attempted to persuade **[*289]** customers to purchase the Pocket Instamatic because it was the only camera that could use Kodacolor II, or that, in fact, any consumers did choose the 110 in order to utilize the finer-grained film.

To be sure, some of Kodak's advertisements emphasized the superior qualities of Kodacolor II, but the gist of these messages was merely that Kodacolor II, unlike previous films, would yield, "big, sharp pictures" from a small

---

[41] There was evidence that Kodak indicated on the boxes in which Kodacolor II was sold that the film had a shelf life of 14 months, whereas in fact the film lost half its speed within three to six months. We need not decide whether this action amounted to deceptive advertising, or whether and under what circumstances such deception might amount to a violation of *§ 2*. See 3 P. Areeda & D. Turner, Supra, at 278-79. The Sherman Act is not a panacea for all evils that may infect business life. Before we would allow misrepresentation to buyers to be the basis of a competitor's treble damage action under *§ 2*, we would at least require the plaintiff to overcome a presumption that the effect on competition of such a practice was De minimis. See id. Berkey, however, has failed to provide any evidence that a significant number of Kodak 110 purchasers would have, if the Kodacolor II boxes had included accurate information on the shelf life of the film, bought a Berkey camera in a pre-existing format instead.

[42] We have already stated that in September 1967 Kodak's management noted that development of the new film was justified, even if Project 30 were never brought to fruition, because of the benefits it would yield to pre-existing formats. Kodak, however, tentatively decided at the same meeting that Kodacolor II would at first be sold in the 110 format only. See Part III.A Supra. Kodak's explanation for the initial restriction of Kodacolor II to the 110 size is that the advantages of the new film were most useful for small cameras; until the defects in Kodacolor II were eliminated, therefore, Kodak preferred to continue selling Kodacolor X in pre-existing formats. That Kodak did not advertise the restriction was evidence in support of its assertion that the plan was not undertaken for an anticompetitive purpose.

camera. In short, Kodak simply claimed to have achieved its goal of truly developing a Pocket Instamatic system whose color prints would be "as close as possible to the prints currently obtained from 126-size Kodacolor X." Stressing the "pocketability" of the 110 format, Kodak did not emphasize Kodacolor II as an independent reason to choose a **[**77]** photography system. Little of the advertising mentioned Kodacolor II by name. Of even greater weight is the fact that none in any way implied that the new film was available only in the 110 size. Accordingly, the content of Kodak's publicity, standing alone, would not permit a jury rationally to infer that Berkey was injured by the restriction of Kodacolor II to the 110 format.

The abstract possibility nevertheless remains that there might have been some customers who would have purchased a Berkey camera in one of the pre-existing formats but decided to select a Kodak 110 instead because they were aware that there was no alternative means of using Kodacolor II, even in the absence of advertising to that effect. Yet, although millions of amateur photographers bought Pocket Instamatics, Berkey did not produce anyone at the trial to testify that he was so motivated. Nor did Berkey present the testimony of camera dealers, or evidence of any kind, to establish that such customers existed. Indeed, Berkey declined to challenge the testimony of a camera dealer that he never promoted the fact that Kodacolor II was available only in the 110 size. [43.] We expressed our concern over the absence **[**78]** of such evidence at oral argument, but Berkey's post-argument brief [44.] did not point to any relevant items in the record that we had overlooked. We conclude, therefore, that the jury could not find that Berkey suffered more than De minimis injury, if any, because Kodacolor II was limited to the 110 format. ***HN10***[] Although the antitrust laws afford latitude in permitting the factfinder to estimate "the extent of the damages" where precise calculation is impossible, they do not allow recovery where there has been no showing that plaintiff suffered cognizable injury. *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 562-63, 51 S. Ct. 248, 26 L. Ed. 2d 83 (1931)*; See *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 123, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*; *Gottesman v. General Motors Corp., 436 F.2d 1205, 1210 (2d Cir. 1971)*.

[79]** Voluminous discovery and a prolonged trial have already given Berkey more than ample opportunity to adduce evidence, which it failed to do, in support of its consistently maintained claim that it lost camera sales because of restriction of Kodacolor II to the 110 format. It would make a mockery of the adversary system in a case of this character, where great expenditures of time and money have been made and where the plaintiff was represented by counsel of extraordinary ability and experience, to afford a new trial so that missing elements of proof could be produced, if, indeed, they exist.

To summarize our conclusions on the 110 camera claims, we hold:

1. Kodak was under no obligation to predisclose information of its new film and format to its camera-making competitors.

2. It is no basis for antitrust liability that Kodacolor II, despite certain deficiencies compared to Kodacolor X, may have encouraged sales of the 110 camera.

[*290] 3. Finally, although the restriction of Kodacolor II to the 110 format may have been unjustified, there was no evidence that Berkey was injured by this course of action.

We, therefore, reverse so much of the judgment **[**80]** as awarded Berkey damages based on the introduction of the 110 camera. [45.]

B. Photofinishing and Photofinishing Equipment Markets

---

43. Advertisements of dealers, like those of Kodak, emphasized that Kodacolor II would yield sharp pictures but not that the film was exclusively available in the 110 size.

44. Because of the extraordinary complexity of this case, we invited the parties to submit post-argument briefs on any aspect of the case they felt merited further attention.

45. But see Part V Infra, where we hold that Berkey's claim arising from the introduction of the "flipflash" in 1975, the damages for which were not considered separately but were included in the total computation of damages for lost 110 camera sales, must be submitted to a new trial on these damages only.

The introduction of the 110 system provided the foundation not only for the enormous camera award but also for the much smaller damage items $ 55,700 and.$ 19,000, respectively, before trebling allotted for lost photofinishing profits and for overcharges on photofinishing equipment. These verdicts, moreover, were the basis for the only injunctive relief decreed below. We reverse and remand for a new trial so much of the judgment as was based on damages for the photofinishing and equipment claims, and we vacate and remand the equitable decree for further consideration in light of **[**81]** the principles set forth in this opinion.

1. Damages

Berkey's damages claims here are based on the fact that Kodacolor II, introduced along with the 110 camera, required the new, high-temperature C-41 finishing process instead of the C-22 process used for Kodacolor X and similar films. Thus independent photofinishers could not offer processing service for Kodacolor II the only color print film Kodak ever offered in the 110 size until they bought new equipment and received instruction in and supplies for C-41 processing. Moreover, Kodak did not give advance warning to the independents that the new film would be introduced, nor did it predisclose the C-41 process to other makers of photofinishing equipment. Accordingly, CP&P was able to begin processing Kodacolor II several weeks before its competitors.

Furthermore, it is urged that Berkey faced greater expense in finishing Kodacolor II than did CP&P, because Kodak refused to divulge the formulae for chemicals used in the C-41 process. Large photofinishers like Berkey preferred to buy these compounds from chemical suppliers in bulk, both to save money and to gain flexibility. But to be able to process Kodacolor II, they were forced **[**82]** to buy pre-mixed "kits" from Kodak at twice the price. Kodak, meanwhile, provided all but one of the CP&P plants with bulk chemicals. [46.] And, because for some time Kodak was the only manufacturer of machinery capable of processing the new film, the independent photofinishers were required to purchase this equipment in order to proceed at all. The jury found that Kodak's prices were excessive and almost certainly found also that the equipment Kodak sold to the independents was vastly inferior to its product for CP&P.

Because of its early jump and greater efficiency in the C-41 process, CP&P gained a disproportionately high share of 110 finishing, an effect Berkey contends lasted **[**83]** through the end of 1973. There was clear evidence that Kodak was aware of the impact its conduct would have on the business of its photofinishing rivals. One Kodak marketing officer urged introduction of Kodacolor II along with the 110 cameras in part to compel the independent photofinishers to buy Kodak C-41 equipment, [47.] and Kodak engineers realized that the machinery their firm planned to sell would not allow independents to do more than "limp through the C-22 to P-118 transition **[*291]** stage." Not surprisingly, one Kodak scientist noted early in the development of the 110 system that the new process would "raise hell in the photofinishing business" without benefit to the consumer. [48.] And, shortly after Kodacolor II came to market, a worried Kodak employee predicted that CP&P's announcement of its early readiness to process the new film would "cause some photofinishing reaction due to the fact that we are using 110 to gain business over their operations."

[84]** Kodak's conduct with respect to the independent photofinishers perhaps may be criticized as shoddy treatment of firms providing an essential service for Kodak products. Indeed, largely for that reason a number of Kodak employees urged that photofinishers and equipment manufacturers be given advance warning of the C-41 process. The purpose of the Sherman Act, however, is not to maintain friendly business relations among firms in the same industry nor was it designed to keep these firms happy and gleeful. See *Kestenbaum v. Falstaff Brewing Corp., 575 F.2d 564 (5th Cir. 1978)*. Moreover, it is clear that Kodak did not monopolize or attempt to monopolize the photofinishing or equipment markets. [49.] Thus, it is not liable under § 2 for the actions described above unless it

---

[46.] Kodak also did not inform independent photofinishers, or even its own technical sales representatives assigned to help the independents process Kodak films, that there were two distinct "populations" of Kodacolor II with markedly different color characteristics. CP&P, however, was told of this divergence as soon as it was discovered.

[47.] See Part III.A Supra.

[48.] See id.

gained a competitive advantage in these markets by use of the monopoly power it possessed in other segments of the industry.

[85]** It bears emphasis that only the wielding of power will support recovery in this context; advantages inuring to Kodak's photofinishing and equipment arms by virtue of membership in an integrated firm will not. As we suggested earlier, a use of monopoly power is an action that a firm would have found substantially less effective, or even counterproductive, if it lacked market control. Thus, the classic example of such a use is a refusal to deal in goods or services needed by a competitor in a second market. E. g., *Eastman Kodak Co. v. Southern Photo Materials Co., 273 U.S. 359, 47 S. Ct. 400, 71 L. Ed. 684 (1927)*. But, a firm without control of the market that attempts this will simply drive the purchaser to take its patronage elsewhere.

Similarly, suppose that Kodak was aware that most consumers would prefer Kodacolor X but nevertheless decided to replace it by Kodacolor II, hoping thereby to place competing photofinishers at a disadvantage. A small film manufacturer attempting this tactic would find it ineffective and self-destructive the slack in C-22 films would be filled by other firms, and consumers would have no reason to buy a film they did not like. Kodak, by contrast, would **[**86]** face a far different calculus: consumers desiring film would have little choice but to buy Kodacolor II and would thereby ineluctably strengthen CP&P's hand in photofinishing.

It is not clear, however, whether in bringing forth the 110 system Kodak did anything that a smaller firm with integrated capabilities but no market control might not have done. [50.] Kodak did not use its power to shift the entire photofinishing market from C-22 to the C-41 process, for **[*292]** Kodacolor II was introduced only in the 110 size and at first represented a minuscule percentage of all color print photofinishing. Indeed, the film was not marketed in other formats until eighteen months later, long after the original surprise had worn off. [51.] **[**88]** In sum, Kodak's ability to gain a rapidly diminishing competitive advantage with the introduction of the 110 system may have been attributable to its innovation of a new system of photography, and not to its monopoly power. On the other hand, we cannot dismiss the possibility that Kodak's monopoly power in other markets was at least a partial root of its ability to gain an advantage over its photofinishing competitors and to sell them overpriced equipment. **[**87]** For example, it may be that, had Kodak possessed only a small portion of the film market, other manufacturers would have found it more feasible to bring out their C-22 films in the 110 size. CP&P would then have had no competitive advantage for a large percentage of 110 photofinishing. Moreover, absent a Kodak film monopoly, the independent photofinishers might not have felt an urgent need to buy expensive equipment for the C-41 process. [52.]

[49.] See Part II.C. & n.13 Supra. Although Kodak was for a time the only firm able to finish Kodacolor II, and for a longer period the only company able to provide equipment for the C-41 process, the new process and the machinery used in it did not define separate markets; rather, they were, like Kodacolor II and the 110 camera itself, new entries in markets of wider scope. Kodak held a temporary monopoly in C-41 processing and equipment only in the sense that every firm initially possesses a 100% Market share in its own innovations and the peripheral products and services associated with it. See *Telex Corp. v. International Business Machines Corp., 510 F.2d 894, 915 (10th Cir.)*, Cert. dismissed, ***423 U.S. 802, 96 S. Ct. 8, 46 L. Ed. 2d 244 (1975)*** (endorsing district court statement).

[50.] We do not, of course, intend to cast any doubt on the well-established doctrine, which we have reaffirmed, See Part II.B Supra, that certain actions may violate *§ 2* when taken by a monopolist even though they would be perfectly legitimate in the hands of a firm lacking market control. Rather, our consideration rests on a simple proposition: if an action that gains a firm a competitive advantage is effective because of the company's efficiency, prestige, and innovativeness, and not because of its control over the market, the action is not a use of power.

[51.] In 1972, fewer than one-tenth as many rolls of Kodacolor film were processed in the 110 format as were finished in the 126 size, and CP&P processed only about 15% Of the 110 rolls. Even in 1973, photofinishers processed more than three times as many 126 Kodacolor rolls nearly all of it Kodacolor X as Kodacolor rolls in the 110 format, and CP&P's share in the 110 size fell to approximately 6%.

[52.] We do not hold that Kodak, which did not have a monopoly in photofinishing equipment, was required to provide such machinery for other photofinishers. But a violation might be found if Kodak's ability to market equipment at an excessive price was attributable to its monopoly power in other areas.

We cannot resolve this ambiguity. The instructions to the jury did not draw with sufficient sharpness the distinction between exercises of power and the natural benefits of size and integration. Nor is the record so clear that we can say with certainty on which side of this demarcation the facts fall. The parties quite naturally gave relatively little attention to this aspect of the case, in light of the comparatively small sums involved. If the parties wish to pursue these claims to a final determination, therefore, a new trial will be necessary.

2. Equitable Relief

Although Berkey's claim for damages in the photofinishing market was limited to the events surrounding the 110 introduction, the plaintiff also made extensive allegations that Kodak had used its control over other markets to disadvantage **[**89]** photofinishing competitors. For example, Berkey complained about Kodak's policy, evidently discontinued after the commencement of this suit, in the sale of color paper. The emulsions on each production run of paper are slightly different, yielding a variance of color characteristics. Because tests and machinery adjustments are necessary each time a roll of paper from a new "emulsion run" is used, large photofinishers like Berkey naturally wish to buy as many rolls as possible from a single run. Kodak, however, refused to sell more than 400 rolls from any one run to each photofinisher. Given Kodak's monopoly power in color paper, this refusal to deal would, unless justified by a valid business reason, appear to violate *§ 2* and form the basis for a grant of equitable relief.

Citing several examples of what he considered to be uses of Kodak's "spectrum of monopoly powers" as a lever in the photofinishing field, Judge Frankel issued a wide-ranging decree that requires the defendant, as he explained, "to treat all photofinishers, including CP&P, alike in relevant respects." Accordingly, any technical information made available by any other branch of Kodak to CP&P must also be offered **[**90]** promptly on the payment of a $ 200 annual fee to cover postage, printing, and handling to all domestic firms providing amateur photofinishing services.

It is evident from our discussion, however, that this decree forecloses not only the use of monopoly power but the legitimate benefits of integration as well. **[*293]** ***HN11***[] Although an injunction need not be limited to prohibiting repetition of past misconduct, it does not lie within the discretion of the trial judge to restructure a market that Kodak has neither monopolized nor attempted to monopolize. Cf. *Schine Chain Theatres, Inc., supra, 334 U.S. 125-30, 68 S. Ct. 947*; *Paramount Pictures, Inc., supra, 334 U.S. at 166-75, 68 S. Ct. 915*. This portion of the judgment must therefore be vacated. On remand the district court may consider whether a narrower decree, limited to the prevention of uses of monopoly power, may be appropriate. In this regard, the court should consider to what extent the erosion of Kodak's share in the camera and color paper markets lessens the need for injunctive relief.

The decree also mandated the sale of color paper without a Kodak backprint, at the option of the purchaser. Judge Frankel indicated that Kodak's **[**91]** insistence on placing its backprint on the paper "was, or could be found to be, a device to force Kodak's photofinishing rivals to advertise their competition." Judge Frankel did not expressly consider whether his prohibition was a justifiable curtailment of Kodak's trademark rights. Whatever the merits of such a decree may be in the abstract and the judge himself indicated at one point that its primary impact would be to benefit Kodak's color paper competitors [53.] the need for its is nullified by Judge Frankel's own observation that Berkey's purchases of Kodak paper fell in 1977 to 7% Of its requirements. We therefore direct that the "backprint" relief be eliminated from any decree to be entered on remand.

IV. FILM AND COLOR PAPER CLAIMS

The second and third largest jury awards were those for monopolization of film and color paper, $ **[**92]** 11,500,000 and $ 8,803,000, respectively. Judge Frankel upheld the film verdict but granted judgment n. o. v. for Kodak on color paper. Kodak therefore appeals the former judgment and Berkey the latter. In each of these claims Berkey's contention is that it paid an excessive price for Kodak products. They therefore raise similar issues and we shall discuss them together. We remand both claims for retrial.

[53.] Judge Frankel's opinion appears to contradict itself on this point. Compare ***Berkey Photo, Inc. v. Eastman Kodak Co., 457 F. Supp. 404, 425 (S.D.N.Y.1978)*** With id. at 433.

It is clear that Kodak possessed a monopoly in the film and color paper markets during the period relevant to this suit. Berkey contends that this power, which enabled Kodak to overcharge its customers, was acquired and maintained, at least in part, by anticompetitive conduct. Some of the evidence introduced by Berkey in support of its claims concerned events that occurred many years ago. In particular, Berkey succeeded in introducing a 1915 decision which was to play a dramatic role in an unfortunate incident near the close of the liability trial [54.] holding Inter alia that Kodak, by illegal acquisitions and other improper conduct, had monopolized the photographic paper market. Judge Frankel admitted this evidence as "background" only. Over Berkey's objection, he instructed the **[**93]** jury that it could not base liability on anticompetitive actions that Kodak had committed earlier than the beginning of the limitations period on January 29, 1969, four years before the commencement of suit.

Berkey contends, however, that Kodak has also bolstered its power since 1969 by numerous exclusionary means. In upholding the film verdict against Kodak's motion for judgment n. o. v., Judge Frankel pointed to two particular tactics that he considered to be exclusionary. Most importantly, he held that there was sufficient evidence for the jury to conclude that the introduction of the 110 system illegitimately buttressed Kodak's film sales. The judge also indicated that Kodak improperly stifled film competition by preventing CP&P, its photofinishing arm, from servicing non-Kodak films.

[*294] Judge Frankel concluded, with some hesitation, that the evidence of anticompetitive conduct within the limitations period was sufficient to support the entire liability award. The trial judge **[**94]** also had misgivings about his instruction to the jury on the measure of film damages, in which he explained that Berkey could recover the difference between Kodak's monopoly price and the price it would have paid for film in a competitive market. Nevertheless, he denied Kodak's motion for judgment n. o. v., sustaining the award of damages In toto.

Berkey's color paper claim did not fare as well in Judge Frankel's hands, however. As with the film claim, Berkey presented numerous instances of conduct that, it contended, were anticompetitive. Kodak, it charged, manipulated the structure of the photofinishing market to inhibit color paper competition and used its monopoly power in film to advantage its paper sales, designing its films so that they would not be as compatible with competitors' paper as with Kodak's. Moreover, CP&P received instructions to buy only Kodak paper, even though competing products offered advantages in both cost and quality. Judge Frankel surveyed these and other allegations and concluded that in each case either Kodak's conduct was perfectly proper, or that there was insufficient proof that it was tainted by anticompetitive purpose or effect, or that it had no **[**95]** impact on the color paper market. Accordingly, although there was clear evidence that Kodak's monopoly power had enabled it to maintain its color paper prices at a high level, the judge granted Kodak's motion for judgment n. o. v. on this claim.

HN12[] Excessive prices, maintained through exercise of a monopolist's control of the market, constituted one of the primary evils that the Sherman Act was intended to correct. Letwin, Congress and the Sherman ***Antitrust Law***: 1887-1890, 23 U.Chi.L.Rev. 221, 249-52 (1956). Where a monopolist has acquired or maintained its power by anticompetitive conduct, therefore, a direct purchaser may recover the overcharge caused by the violation of *§ 2*. E. g., *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 487-94, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*.

But unless the monopoly has bolstered its power by wrongful actions, it will not be required to pay damages merely because its prices may later be found excessive. Setting a high price may be a use of monopoly power, but it is not in itself anticompetitive. Indeed, although a monopolist may be expected to charge a somewhat higher price than would prevail in a competitive market, there is **[**96]** probably no better way for it to guarantee that its dominance will be challenged than by greedily extracting the highest price it can. See, e. g., L. Sullivan, Supra, at 117; 3 P. Areeda & D. Turner, Supra, at 41-42. If a firm has taken no action to destroy competition it may be unfair to deprive it of the ordinary opportunity to set prices at a profit-maximizing level. Thus, no court has required a lawful monopolist to forfeit to a purchaser three times the increment of its price over that which would prevail in a competitive market. 1 M. Handler, Supra, at 56-57. Indeed, as one commentator who might favor such a rule concedes, such judicial oversight of pricing policies would place the courts in a role akin to that of a public

---

[54.] See Part V Infra.

regulatory commission. Id. We would be wise to decline that function unless Congress clearly bestows it upon us. See L. Sullivan, Supra, at 117-18.

HN13[] For a purchaser to recover damages under *§ 2*, therefore, it must demonstrate that the monopolist has engaged in some anticompetitive conduct. Two further questions must be resolved, however, to give shape to the purchaser's treble damage suit:

1. If an overcharge paid during the limitations period was caused **[**97]** by the defendant's monopoly power, may a plaintiff satisfy the conduct element of the *§ 2* offense by proving anticompetitive actions that occurred more than four years prior to the commencement of suit?

2. If a defendant has violated *§ 2*, may a purchaser recover the excess of its price over a competitive price, or merely the increment attributable to its anticompetitive conduct?

[*295] We hold that Judge Frankel erred in Kodak's favor on the first of these questions but that he was overly generous to Berkey on the second.

A. Conduct Prior to the Limitations Period

HN14[] By statute, *15 U.S.C. § 15b*, a four-year period of limitations applies in private antitrust suits. The plaintiff, therefore, clearly can recover only for overcharges suffered since the beginning of the limitations period. It remains to be decided, however, whether the conduct element of the offense may be satisfied by wrongful action occurring before the limitations period but that nevertheless made an enduring contribution to the monopolist's ability to charge an excessive price. Judge Frankel, without articulating reasons, concluded that *§ 15b* requires a negative answer.

Unless tolled, that provision **[**98]** requires suit to be "commenced within four years after the cause of action accrued." In effect, therefore, the judge held that the cause of action of a purchaser seeking to recover an illegal overcharge accrues when the defendant engages in the anticompetitive conduct that is a prerequisite for suit. We believe that the purchaser's claim cannot accrue until it actually pays the overcharge. Accordingly, Judge Frankel's ruling was erroneous.

HN15[] It is "plain from the treble-damage statute itself (*15 U.S.C. § 15*)" that "a cause of action accrues and the statute begins to run when a defendant commits an act that injures a plaintiff's business." *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 338, 91 S. Ct. 795, 806, 28 L. Ed. 2d 77 (1971)*. Although the business of a monopolist's rival may be injured at the time the anticompetitive conduct occurs, a purchaser, by contrast, is not harmed until the monopolist actually exercises its illicit power to extract an excessive price. The case of predatory pricing illustrates the point clearly. As soon as the dominant firm commences such a policy, other producers, who may be driven out of the market, are injured. But, clearly, purchasers **[**99]** are not, for they receive the temporary boon of artificially low prices. It is only when the monopolist, having devoured its smaller rivals, enjoys the spoils of its conquest by boosting its price to excessive levels that a purchaser "feels the adverse impact" of the violation. *Id. at 339, 91 S. Ct. 795*. And if the monopolist never consummates its scheme by taking this final step, the purchaser has no cause of action.

HN16[] So long as a monopolist continues to use the power it has gained illicitly to overcharge its customers, it has no claim on the repose that a statute of limitations is intended to provide. Thus, in this setting, as in "the context of a continuing conspiracy to violate the antitrust laws. . . . each time a plaintiff is injured by an act of the defendants a cause of action accrues to him to recover the damages caused by that act. . . . . (A)s to those damages, the statute of limitations runs from the commission of the act." *Id. at 338, 91 S. Ct. at 806*.

Untoward consequences would follow were we to hold that the anticompetitive conduct itself triggered the running of the limitations period. As the Supreme Court stated in Zenith Radio:

> *HN17*[] (I)t is hornbook law, in antitrust **[**100]** actions as in others, that even if injury and a cause of action have accrued as of a certain date, further damages that might arise from the conduct sued on are unrecoverable if the fact of their accrual is speculative or their amount and nature unprovable. *Id. at 339, 91 S. Ct. at 806*.

HN18[] Plainly, at the time a monopolist commits anticompetitive conduct it is entirely speculative how much damage that action will cause its purchasers in the future. Indeed, some of the buyers who will later feel the brunt of the violation may not even be in existence at the time. Cf. *Continental Ore Co., supra, 370 U.S. at 709-10, 82 S. Ct. 1404*. Not until the monopolist actually sets an inflated price and its customers determine the amount of their purchases can a reasonable estimate be made. The purchaser's cause of action, therefore, accrues only on the date damages are "suffered":

> **[*296]** Otherwise future damages that could not be proved within four years of the conduct from which they flowed would be forever incapable of recovery, contrary to the congressional purpose that private actions serve "as a bulwark of antitrust enforcement." *Perma Life Mufflers, Inc. v. International Parts Corp., **[**101]** 392 U.S. 134, 139, 88 S. Ct. 1981, 1984, 20 L. Ed. 2d 982 (1968)*. . . .

Zenith Radio Corp., supra, 401 U.S. at 340, 91 S. Ct. at 807.

Our view is supported by the fundamental principles of *§ 2* that we outlined earlier in this opinion. Monopoly power, we indicated, is itself the primary target of *§ 2*. To be sure, a showing of anticompetitive conduct is necessary to support liability for damages, for otherwise the law would be unfair to a firm that has gained success solely by fair means. But there can be no unfairness in preventing a monopolist that has established its dominant position by unlawful conduct from exercising that power in later years to extract an excessive price. After all, it is only a pristine "origin," *Alcoa, supra, 148 F.2d at 429*, that may save a monopoly so long as it continues to refrain from anticompetitive activity from the condemnation of *§ 2*. The taint of an impure origin does not dissipate after four years if a monopolist continues to extract excessive prices because of it.

Moreover, it would undercut enforcement of the Sherman Act to hold that, if a monopolist merely retains its illicit market control for four years after its last anticompetitive **[**102]** action, it may charge an exorbitant price until its power is eviscerated in an appropriate suit for equitable relief. [55.] The rule urged by Kodak would mean that, as the Supreme Court has indicated in a related context:

> those who had unlawfully built their empires could preserve them intact. They could retain the full dividends of their monopolistic practices and profit from the unlawful restraints of trade which they had inflicted on competitors. Such a course would make enforcement of the Act a futile thing unless perchance the United States moved in at the incipient stages of the unlawful project.

Schine Chain Theatres, Inc., supra, 334 U.S. at 128, 68 S. Ct. at 957. An **[**103]** unlawful monopolist must be "deprived of the fruits" of its wrongful conduct, *Id. at 129*, and one of the forbidden fruits is an excessive price. In Grinnell, Judge Wyzanski also used the biological metaphor: *§ 2* requires "the rooting out of a plant . . . (that) represents an ultimate growth from seeds which have been declared unlawful." *236 F. Supp. at 258*. So long as a monopolist enjoys "the flower of evil," Id., at the expense of its customers, those victims must have a remedy.

HN19[] We hold, therefore, that a purchaser suing a monopolist for overcharges paid within the previous four years may satisfy the conduct prerequisite to recovery by pointing to anticompetitive actions taken before the limitations period. It should not be inferred that this ruling grants antitrust plaintiffs a license to embark on a search for Ichthyosauria that is, on a time-warped fishing expedition. A trial court in its discretion may always "set a

---

[55.] If, as the Ninth Circuit has held in *International Telephone & Telegraph Corp. v. General Telephone & Electronics Corp., 518 F.2d 913, 922 (9th Cir. 1975)*, dissolution or divestiture may only be ordered in a Government suit a question that we of course do not reach the rule for which Kodak argues would be even less tolerable.

reasonable cut-off date, evidence before which point is to be considered too remote to have sufficient probative value to justify burdening the record with it." *Continental Ore Co., supra, 370 U.S. at 710, 82 S. Ct. at 1416*. Moreover, the trial court might not be **[**104]** without flexibility to limit the proof where delay in bringing suit may have caused injustice to the defendants. See 3 P. Areeda & D. Turner, Supra, at 93.

B. Damages to a Monopolist's Purchaser

Assuming that a purchaser establishes a monopolist's liability to it for an unlawful price, two potential rules of damages come into view. Judge Frankel apparently stated, and in any event the jury **[*297]** clearly acted upon, what may be called the competitive price theory that a purchaser may recover for the entire excess of the monopolist's price over that which would prevail in a competitive market. We believe that this was error, and that ***HN20***[] the true measure of damages, which we shall refer to as the wrongful conduct rule, is the price increment caused by the anticompetitive conduct that originated or augmented the monopolist's control over the market.

There is a dearth of cases on point. Indeed, the only citation in Judge Frankel's discussion of this point is to a rather vague Dictum in Alcoa. The reason for this lack of authority is that in most successful monopolization suits brought by purchasers the *§ 2* violation was merely a consequence of a *§ 1* offense that provided the rule **[**105]** of damages. Often, for example, the *§ 2* violation consists of a price-fixing conspiracy among firms controlling a large share of the market. The measure of the damages to one of the conspirators' customers is the difference between the price actually paid and the one at which the product would have sold absent the conspiracy. E. g., *Reiter v. Sonotone Corp., 442 U.S. 330, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)*; *Chattanooga Foundry & Pipe Works v. City of Atlanta, 203 U.S. 390, 396, 51 L. Ed. 241, 27 S. Ct. 65 (1906)*. In such a case, the monopoly price is entirely attributable to the anticompetitive conduct. The two alternative rules of *§ 2* damages therefore merge and it is impossible to tell which would apply if the monopoly power, and hence the excessive price, resulted only in part from wrongful conduct. [56.]

[106]** Without any clear precedent to guide us, we must determine the proper measure of damages in a *§ 2* case by juxtaposing the basic rule for antitrust damages with the fundamental principles of law under *§ 2* that we outlined earlier in this opinion. The basic rule was set forth in *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*, where the Supreme Court declared that ***HN21***[] plaintiffs in an antitrust action must prove "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." It is true, as we have previously indicated, that excessive prices are "injury of the type the antitrust laws were intended to prevent." See Part II.A Supra. It is equally evident, however, that more than monopoly power is necessary to make the charging of a noncompetitive price unlawful. Accordingly, a purchaser may recover only for the price increment that "flows from" the distortion of the market caused by the monopolist's anticompetitive conduct.

Were the law otherwise, it would establish an unnecessary and unwarranted trigger mechanism. See 3 P. Areeda & D. Turner, Supra, at 86-87. A pristine **[**107]** monopolist, we have held, may charge as high a rate as the market will bear. But under the competitive price rule, if it committed any anticompetitive conduct beyond a De minimis Level it would suddenly be held liable for threefold the entire excess of its price over a competitive price. In effect,

---

[56.] To the extent that any inference may be gleaned from the extended Hanover Shoe litigation, it favors the wrongful conduct rule. After the Supreme Court affirmed Judge Wyzanski's judgment in the celebrated United Shoe case, Hanover, a United customer, brought an action to recover illegal overcharges. The calculation of Hanover's damages was based on "the excess of leasing costs over what it would have cost to own the same machines had they been available for purchase," *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 245 F. Supp. 258 (M.D.Pa.1965)*; See *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 487, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*. Significantly, the hypothetical purchase prices for prior years were determined from the actual prices for 1955 the first year the lease-only machines were offered for sale and clearly, as later litigation would demonstrate, a period in which United retained its monopoly. See *United States v. United Shoe Machinery Corp., 266 F. Supp. 328, 331 (D.Mass.1967)*, rev'd on other grounds, *391 U.S. 244, 88 S. Ct. 1496, 20 L. Ed. 2d 562 (1968)*. Moreover, United's anticompetitive leasing policy was only a partial source of its monopoly power; the other roots were, as Judge Wyzanski indicated in his original opinion, "plainly beyond reproach." *110 F. Supp. at 344*. It appears, therefore, that damages in Hanover Shoe were limited to the price excess caused by United's wrongful conduct.

[*298] instead of being required simply to compensate its customers for the consequences of its wrongful action, it would be required to forfeit its legitimately acquired advantage. But the Sherman Act does, as we have said, tolerate the lawfully acquired and maintained monopoly. This principle would be undercut if a monopolist whose position has for the most part been attained legitimately is required to forfeit all fruits of its success because its power has merely been supplemented by improper conduct. [57.]

[108]** We recognize that if the monopolist, but for its illegitimate actions, would have had little or no market power, the wrongful conduct and competitive price rules may yield very similar results. The proper standard, though, is one that bases damages on the monopolist's actual record of misconduct. [58.]

C. Summary and Dispositions

The two issues we have discussed above establish the framework for a purchaser's action under *§ 2* of the Sherman Act. We believe this structure is not only compelled by law but sensible as well. The wrongful conduct rule indicates that a purchaser can recover for an overcharge paid to a violator of *§ 2* only to the extent that the price he paid exceeds **[**109]** that which would have been charged in the absence of anticompetitive action. An intermediate step in the analysis may be an attempt to estimate what the monopolist's market share would likely have been but for the illegitimate conduct; it would then be possible to gauge approximately what price the defendant would have been able to charge with that degree of market control. In any event, courts applying this rule must be aware of the practical limits of the burden of proof that may be demanded of treble damage plaintiffs. See *Zenith Radio Corp., supra, 395 U.S. at 123, 91 S. Ct. 795*; *Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251, 264-65, 66 S. Ct. 574, 90 L. Ed. 652 (1946)*; *Story Parchment Co., supra, 282 U.S. at 563, 51 S. Ct. 248*.

It may, of course, be difficult for a purchaser to demonstrate that conduct occurring many years before the commencement of suit contributed to an overcharge that it paid within the limitations period. That, however, is no reason for denying it the opportunity to do so. The treble damage provision, *15 U.S.C. § 15*, was intended in large part as an inducement to encourage potential plaintiffs to endure the considerable expense and labor of seeking recovery **[**110]** against violators of the antitrust laws. E. g., *Reiter, supra*, -- - U.S. at -- , *99 S. Ct. 2326*.

It is clear from our holdings that we believe both the film and color paper claims must be remanded for retrial. Judge Frankel upheld the film award for the entire excess of Kodak's prices over a hypothetical competitive price, although the only two examples of post-1969 conduct that he believed were wrongful could not have had a very large impact on Kodak's film prices. The verdict therefore cannot stand, but Berkey has a right to establish at a new trial that anticompetitive conduct, both before and after 1969, enhanced the price it paid for Kodak film.

Similarly, the judgment for Kodak on the color paper claim must be vacated. Judge Frankel did not allow the jury to consider pre-1969 conduct as a foundation for the verdict despite the concession by Kodak's own economic expert, to be discussed later, that the company's unlawful activities in **[*299]** years past may still have had a bearing on its power in the photographic paper market. Because Judge Frankel erred by instructing the jury on the competitive price theory of damages, however, we could not simply reinstate the large **[**111]** color paper award, even if we were to hold that the jury may validly have found that Kodak committed anticompetitive conduct in that market since 1969.

---

57. The situation might be different in a Government equity action. It is interesting to note that Areeda and Turner would allow the break-up of a persistent monopoly in such a suit even in the absence of exclusionary conduct, 3 P. Areeda & D. Turner, Supra, at 63-64. They strongly advocate the position we are asserting here, however that "an injured plaintiff is not entitled to have damages based on the excess of the monopoly price over the competitive price but only to the price increment reasonably attributable to actionable behavior." *Id. at 73*; See *id. at 99*.

58. We express no view on how the trial judge should allocate the burden of proving this causal relation, or lack of it, when plaintiff makes a preliminary showing of persistent monopoly power and a substantial history of anticompetitive conduct. Cf. *Ohio Valley Electric Corp. v. General Electric Co., 244 F. Supp. 914, 946 (S.D.N.Y.1965)*.

We have no occasion to consider the parties' arguments concerning the numerous other Kodak activities that, Berkey contends, were anticompetitive. Because of the general form of the verdicts, we have no way of knowing what the jury's findings were on these matters or which actions were believed to be anticompetitive. Nor do we know what the findings will be on retrial, if this litigation should continue. Indeed, now that we have set forth the broad outlines of principles in this area we earnestly hope that able counsel on both sides will find a way to dispose of this mammoth lawsuit without consuming more court time or incurring more legal expenses. If so, it will not be necessary to resolve any of the lesser questions. If not, there will be no need to retry the issue of monopoly power. Judge Frankel's instruction on this point appears to have been essentially correct, and there was clear evidence supporting the jury's implicit finding that Kodak held such power in the film and color paper markets.

V. THE *SECTION 1* CLAIMS

Our discussion **[**112]** thus far has centered around interpretation and application of the provisions of the Sherman Act to actions taken by Kodak alone. Berkey claims in addition, however, that Kodak engaged in two separate conspiracies, with the General Electric Company and Sylvania Electric Products, Inc., to restrain trade in the use of new flash devices with amateur cameras.

A. Background

Amateur photography performed in dim lighting ordinarily requires separate illumination so the scene may be captured on film. This is usually achieved by affixing some type of flash device to the camera. Its purpose is to produce a brief, high-intensity burst of light when the shutter is released.

Kodak does not make such devices. For approximately fifteen years, however, it has engaged in three separate "joint development programs" with lamp manufacturers to ensure that the desired lighting innovations would be compatible with Kodak cameras. In 1963, Sylvania Electric Products, Inc. approached Kodak with a prototype of a new battery-powered light device the flashcube [59.] and a modified Kodak 126 camera to fire it. Berkey argued that although Kodak did not make meaningful technical contributions to the flashcube, **[**113]** it nevertheless required Sylvania not to disclose its invention to any other camera manufacturer. Accordingly, for some time after the flashcube was introduced along with a line of Kodak flashcube cameras in 1965, Kodak was the only manufacturer able to sell cameras to use the device. [60.]

[114]** Berkey is barred by the statute of limitations from seeking damages for what it terms the "flashcube conspiracy," but it urges that the events in 1963-65 do much to illuminate two more recent incidents. Viewed in the light most favorable to Berkey, as we have indicated the law requires us to do at this appellate juncture, the evidence established that in 1967 Sylvania came to Kodak with another flash invention the magicube. This device was similar **[*300]** to the flashcube in appearance but did not require batteries. Instead, each of the four lamps in the cube was ignited by percussion, much as a bullet is fired when the firing pin strikes the cartridge. This was a major advance over the flashcube, eliminating dead batteries and other electrical malfunctions that were major causes of lamp failures and consequent missed pictures.

Once more, the two firms entered into a joint project to exploit the Sylvania invention. Over Sylvania's protests, Kodak insisted again that details of the new device be withheld from the public and the trade. Kodak, Berkey contended, maintained this position until just two months before magicubes and magicube cameras were ready for shipment. [61.] Sales **[**115]** of Kodak magicube cameras commenced in July 1970. Berkey, it appears, was the first

---

59. The flashcube contains four flashbulbs mounted on the face of a small cube, each containing its own reflector. The cube is rotated after each shot, so four flash pictures may be taken without the need to change cubes.

60. Several other camera makers complained bitterly to Sylvania following this episode. They were particularly disturbed that Sylvania had assigned its camera patents to Kodak, keeping only its lamp patents. One Sylvania official wrote:

Also during the past years the royalties other camera manufacturers have paid to EK to use Sylvania flashcubes on their equipment have disturbed them deeply. They keep telling us that the flashcube was a Sylvania development . . . why did they have to pay royalties?

competitor to offer its own magicube cameras, reaching the market in October, but its production capacity was at first limited. It was not until late 1971 that Berkey's magicube cameras were truly competitive with Kodak's.

[116]** Kodak's joint flash programs, however, were not confined to Sylvania. In 1969, the General Electric Company approached Kodak with proposals for several new flash devices. One was a percussion lamp similar to the magicube; another used a small crystal that could be economically built into a camera and that would, when struck, produce an electrical current sufficient to ignite flash material. The latter device, called "piezo" or "PE" because it used a piezoelectric crystal, provides the focus for the second conspiracy charged by Berkey.

Kodak was troubled by the GE proposal. It was already committed to Sylvania on the magicube project, and there was abundant evidence from which the jury could conclude that Kodak did not wish to introduce two new flash systems at approximately the same time. [62.] Rather, its marketing strategy was, as we noted in connection with our discussion of the 110 system, to withhold introduction of improved camera models until the maximum benefit from the prior model had been reaped. The jury's verdict could reflect its belief that Kodak embarked on a carefully balanced campaign. Kodak desired to cool GE's ardor for its inventions sufficiently to delay introduction **[**117]** of the piezo device for several years, and, at the same time, to avoid the appearance of deferment so that the lamp manufacturer would not seek another camera maker to exploit its invention. [63.]

After several years of intermittent discussion, Kodak and GE decided to move forward with the piezo device. In a contract executed on October 31, 1972, they agreed to aim for a Spring 1975 introduction of GE piezo flashlamps and Kodak cameras designed to fire them. Disclosure before hand to other lamp and camera manufacturers was forbidden. At a joint press conference **[**118]** in April 1975, the two firms announced the GE "flipflash" [64.] and two **[*301]** new lines of Kodak 110 cameras designed to accommodate it. Kodak had the field to itself for several months. This time, however, Berkey was not the first non-Kodak camera manufacturer to enter the arena. It did not market its own flipflash cameras until early 1976, months after Japanese and Chinese models had begun to appear.

B. Joint Development Projects and § 1

Berkey contends that Kodak's agreements with the magicube and flipflash manufacturers violated § 1 of the Sherman Act. In particular, it charges that although Kodak did not make any meaningful technological contribution to either system, the secrecy agreements it extracted from GE and Sylvania prevented other camera makers from competing in the production of cameras **[**119]** that could cooperate with the new flash devices. Evaluating all the evidence presented on these issues, the jury found Kodak's conduct to be unreasonable restraints of trade.

---

61. As Kodak's trial counsel conceded, there was conflicting evidence concerning the terms of the secrecy agreement. The written agreement permitted disclosure to "other responsible camera manufacturers," but Sylvania never made disclosure to anyone but Polaroid, which only manufactured instant cameras and was thus not a competitor of Kodak's. In October 1968, Sylvania pressed Kodak for an early announcement to the trade, but Kodak resisted, in part to "make sure that our foreign manufacturing plants could change to the new system." Kodak then instituted a "crash program" to get to market before, as the jury could have found, Sylvania unilaterally decided to disclose its invention to the trade.

In March 1970, Sylvania again complained to Kodak about delay, noting that rumors of the Kodak-Sylvania project had caused other camera manufacturers to press Sylvania for disclosure. Kodak agreed to a limited form of disclosure, but refused to permit release of, Inter alia, the design of the camera socket into which the magicube would fit.

62. In addition to the evidence adduced in connection with the 110 camera that Kodak had a policy of cyclical product introduction, a Kodak official testified that if the piezo would not be ready for the initial 110 introduction, Kodak could not use it for another two or three years.

63. For example, at a time when Kodak was committed to Sylvania and had shelved its own piezo plans, it complimented GE on its devices and urged them to continue development.

64. This device was a rectangular array of eight bulbs, set in four rows of two. The top four bulbs would be fired and the array would then be "flipped" and the remaining bulbs, now on top, would be used.

Kodak's challenge to these verdicts is relatively simple. It argues that both projects "involved millions of dollars of research and development expense by Kodak," and "led directly to the introduction of innovative new products" that "gained wide success." Accordingly, it urges, Berkey's *§ 1* claims are nothing more than "a mirror image" of the *§ 2* predisclosure arguments we rejected in Part II of this opinion.

There is a vast difference, however, between actions legal when taken by a single firm and those permitted for two or more companies acting in concert. To repeat a simple example, a monopolist may, assuming he acquired his power legally, charge any nonpredatory price for his product, but agreements among competitors to raise prices have been recognized as Per se violations of the Sherman Act since Socony-Vacuum. See Part II Supra. We have stated that we respect innovation, and we have construed *§ 2* of the Act to avoid an interpretation that would stifle it. But this is Toto caelo different from an **[**120]** agreement among a few firms to restrict to themselves the rewards of innovation. Such conduct is not immune to examination under *§ 1*. Citing a case we believe to be inapposite, [65.] Kodak contends that it is "not a "restraint of trade,' reasonable or unreasonable, jointly to develop a new product." Where a participant's market share is large, however, we believe joint development projects have sufficient anticompetitive potential to invite inquiry and thus stand on a different footing.

Joint development programs can benefit competition, See *United States v. Line Material Co., 333 U.S. 287, 310, 68 S. Ct. 550, 92 L. Ed. 701 (1948)*, but they are not without their costs. In analyzing joint research by direct competitors, one commentator **[**121]** has suggested that if several substantial firms in an industry join in research at a scale the remaining firms could not attain, and if the others are not permitted to join the group, the favored competitors might obtain a decisive and unjustified advantage over the rest. L. Sullivan, Supra, at 298-303. The benefits and detriments of joint research will vary with the circumstances, Sullivan suggests, and the market power of the participant firms is likely to be the most significant factor. Id.; accord, Turner, Patents, Antitrust and Innovation, 28 U.Pitt.L.Rev. 151, 158-59 (1966).

Kodak and GE, of course, are not direct competitors, and Kodak and Sylvania were at best potential competitors when the magicube was being developed. [66.] Nevertheless, **[*302]** because of Kodak's market power over cameras, the exclusionary potential of horizontal research pools was present. In the case of the flipflash, for example, GE indicated early in 1971 that it could be at maximum production in two years. Kodak, however, counselled delay, at one point urging GE project officials to make a show of progress, "even if all you do is "paint the red base black,' " so that "we'll feel free to work with **[**122]** you." Otherwise, Kodak said, GE could not be assured of being part of Kodak's future flash plans, for "we would then have to ask all (lamp) manufacturers" to submit ideas. A few months later, the two firms executed the formal agreement binding them to joint development of flipflash and nondisclosure to rival lamp and camera manufacturers. From this and other evidence, the jury could have found in the verdict it returned that, without any technological justification, GE kept a desirable innovation off the market for two years solely to suit Kodak's convenience. There is a hollow ring to a claim of justification by appeal to the need to promote innovation, where the result of the conduct was such a clear loss to consumers.

[123]** We hasten to add that we do not hold that joint development agreements between a monopolist and a firm in a complementary market are Per se violations of *§ 1*. It may be, for example, that the market structure is such that only a dominant firm will have the resources necessary to exploit the complementary technology being offered. If such were the case, the alternative to joint development could be no development at all. Accordingly, Judge Frankel appropriately rejected Berkey's request for a Per se charge. See generally *Continental T. V., Inc. v. GTE*

[65.] *United States v. Citizens & Southern National Bank, 422 U.S. 86, 95 S. Ct. 2099, 45 L. Ed. 2d 41 (1975)*, involved the antitrust implications of an attempt to evade Georgia's branch banking laws and has nothing to do with joint development ventures by firms in complementary markets.

[66.] Until 1962, Argus Camera was operated as a division of Sylvania. In May of that year, Sylvania sold Argus for a small amount of cash and $ 7.8 million in promissory notes. Over the next seven years, as a result of recapitalizations of Argus, Sylvania was, at various times, a major creditor, common shareholder, and preferred shareholder of its former division, on occasion placing a nominee on Argus's Board of Directors. Berkey contended that Sylvania's relationship with Argus permitted the jury to infer that the lamp manufacturer was a potential camera competitor as well.

Sylvania, Inc., 433 U.S. 36, 49-50 & n.16, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977). Nevertheless, as Areeda and Turner have noted, **HN22**[] joint ventures involving a monopolist have sufficient anticompetitive potential that they must be scrutinized with care lest they be permitted to fortify the already substantial entry barriers inherent in a monopolized market. 3 P. Areeda & D. Turner, Supra, at 114. The relevant variables might include: the size of the joint venturers; their share of their respective markets; the contributions of each party to the venture and the benefits derived; the likelihood that, in the absence of the joint effort, one **[**124]** or both parties would undertake a similar project, either alone or with a smaller firm in the other market; the nature of the ancillary restraints imposed and the reasonableness of their relationship to the purposes of the venture. This list is not intended to be exhaustive, nor do we suggest that each element applies to every case. In analyzing joint development agreements, as elsewhere in § 1, "the factfinder (must) weigh all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition," Continental T. V., supra, 433 U.S. at 49, 97 S. Ct. at 2557.

On the record before us, we have little doubt that a properly instructed jury could find that the magicube and flipflash agreements violated § 1. [67.] It remains, therefore, to examine Kodak's challenges to the charge to the jury. Kodak asserts that Judge Frankel erred in instructing the jury to consider whether (1) Sylvania's substantial interest in Argus Camera Co. rendered it a potential camera competitor of Kodak, and (2) the "legitimate purposes" of the **[*303]** magicube and flipflash agreements might be accomplished by "less restrictive alternatives" **[**125]** than those actually chosen. We believe, however, that the charge provided accurate guidance for the jury's deliberations.

Kodak claims that there was an absence of evidence that an agreement between it and Sylvania not to compete existed; this assertion, **[**126]** however, misses the point. As we noted above, the possibility of individual entry or expansion into the monopolized market is a highly relevant consideration in assessing a joint venture such as the magicube agreement. We agree with the district judge that Sylvania's large interest in Argus was sufficient to raise for the jury the possibility that absent the joint project with Kodak, Sylvania might have produced magicube cameras with Argus.

More troublesome is the contention that Berkey would not have benefited had Sylvania chosen to "go it alone" and therefore lacked standing to raise the Argus issue. Cf. Brunswick Corp., supra. But magicube entry on the small scale available to Argus may well have been less harmful to Berkey and to camera competition in general than was entry by a monopolist such as Kodak. See 3 P. Areeda & D. Turner, Supra, at 114. In any event, the only objection to the Argus charge that Kodak presented to the district court related to whether Sylvania's ownership of Argus was too remote in time to be relevant to the magicube project, not the "standing" and "non-competing agreements" contentions now raised on appeal. Accordingly, the latter objections have been **[**127]** waived. Fed.R.Civ.P. 51; Spano v. N. V. Koninklijke Rotterdamsche Lloyd, 472 F.2d 33 (2d Cir. 1973).

Kodak also challenges a direction that the jury

> should consider whether, under all the circumstances, the legitimate objectives of the programs might have been achieved by alternative means with less restrictive effects, including predisclosure or provisions for royalty-free licensing.

Kodak contends that this in effect directed a verdict for Berkey because, in retrospect, lawyers can always "conjure up some method of achieving the business purpose in question that would result in a somewhat lesser restriction of trade," American Motor Inns, Inc. v. Holiday Inns, Inc., 521 F.2d 1230, 1249 (3d Cir. 1975). We agree with the Third Circuit that a better charge would be to require that "the restraints . . . not exceed "the limits Reasonably necessary

---

[67.] In particular, there was in each instance evidence that Kodak used its camera monopoly to extract secrecy agreements from the lamp manufacturers, and that the benefits it derived from the agreements far exceeded the value of its technological contributions. We note, in passing, that Kodak contends that Berkey should be barred from recovery because a Berkey official once told an officer of GE that Berkey was not interested in innovation, preferring to copy Kodak designs. The evidence concerning this conversation was conflicting, however, and we must assume the jury resolved the conflict in Berkey's favor. Accordingly, we need not determine the effect such a Berkey policy would have on its right to complain of Kodak's illicit agreements with the lamp makers.

to meet the competitive problems,' " Id. (quoting *United States v. Arnold, Schwinn & Co., 388 U.S. 365, 380-81, 87 S. Ct. 1856, 18 L. Ed. 2d 1249 (1967)* (emphasis added by the court)). American Motor Inns noted, however, *Id. at 1248*, that the existence of alternatives is obviously of vital concern in evaluating putatively anticompetitive **[**128]** conduct. See, e. g., *White Motor Co. v. United States, 372 U.S. 253, 271-72, 83 S. Ct. 696, 9 L. Ed. 2d 738 (1963)* (Brennan, J., concurring); *Foster v. Maryland State Savings & Loan Association, 191 U.S.App.D.C. 226, 590 F.2d 928, 934-35 (1978)*, Cert. denied, *439 U.S. 1071, 99 S. Ct. 842, 59 L. Ed. 2d 37 (1979)*; 1 M. Handler, Supra, at 708. Read as a whole, See, e. g., *Chavis v. Finnlines Ltd., O/Y, 576 F.2d 1072, 1076 (4th Cir. 1978)*, Judge Frankel's *§ 1* charge simply presented the availability of less restrictive alternatives to the jury as one among many possibilities to be considered. The quoted paragraph did not in any way diminish the earlier instructions based on the rule of reason, including the specific admonition that no single test determines reasonableness.

Finally, we must address Kodak's contention that even if the less restrictive language passes muster, the reference in this context to predisclosure as a specific alternative does not. [68.] As is clear from both the charging conference and Kodak's requests to charge, Kodak views the "fact that these products were developed by two **[*304]** companies, rather than by Kodak alone" as immaterial to the issue of predisclosure. **[**129]** But, given the significantly different posture of single-firm and multi-firm conduct under the Sherman Act and Kodak's arguably minimal technological contributions to the two projects, we believe it was quite appropriate for the jury to consider whether Kodak's refusal to permit Sylvania or GE to disclose their inventions to other camera manufacturers was unreasonable.

Accordingly, we affirm the judgment insofar as it holds Kodak liable for violating *§ 1* of the Sherman Act by its conduct in the flash programs. The question of appropriate damages, however, still remains.

C. Damages

The flipflash introduction was not the subject of a separate damage claim but rather was used as a secondary ground for the 110 camera award. Because we decided in Part III that the judgment must be reversed insofar as it allowed damages in connection with the introduction of the original 110 cameras, **[**130]** there must be a new trial to assess Berkey's damages arising out of the flipflash episode.

As for the magicube, Judge Frankel presented the damages claim to the jury in two parts, one for the latter half of 1970 and the other for 1971. The jury awarded Berkey $ 330,000, pretrebling, for lost camera sales in 1970. Judge Frankel upheld this award, and Kodak does not challenge it here. Berkey calculated its 1971 damages to be $ 1,759,000, but the jury awarded $ 1,417,330, a reduction of approximately 20%. Judge Frankel, however, granted judgment n. o. v. for Kodak on this award, and Berkey appeals.

Berkey's computation for 1971 was reached by comparing its 126 camera sales in that year to those in 1972. By then, Berkey argued, the deleterious consequences of the magicube conspiracy had dissipated, and so 1972 sales represented a fair estimate of the record Berkey's Keystone Division would have achieved the previous year had it been "at the starting line" when the magicube was introduced. The trial court, however, rejected this theory as speculative. Judge Frankel pointed out that the dramatic 400% Rise in Berkey camera sales in 1972 was not due solely to an increase in the availability **[**131]** and popularity of Berkey's magicube camera; indeed, Berkey's 126 magicube camera sales declined substantially in 1972. Rather, the augmentation of Berkey's market share was attributable to the introduction of a new and greatly improved version of its Everflash camera, which utilized a built-in electronic strobe light rather than a disposable cube. Thus, Judge Frankel held, the comparison urged by plaintiff "invited an award of damages measured by the success of Berkey's own innovation."

Berkey contends that the judge's ruling was based on an erroneous perception that the Everflash and magicube cameras were to be regarded as noncompeting products with no impact on one another. As Berkey points out, the jury's finding of a single relevant still camera market, including all 126 cameras as well as 110s, suggests that these

---

[68.] Kodak has waived its right to contest the charge on royalty-free licensing by failing to raise an objection below. *Fed.R.Civ.P. 51*.

products do compete with each other. The strobe built into the Everflash perhaps may be regarded merely as an alternative to the magicube as a light source for cameras that are otherwise similar. On the other hand, a Berkey executive testified that the Everflash introduced in late 1971 was a very different and markedly superior camera. These were factors that the jury **[**132]** was properly given to consider. Its verdict, representing a 20% Deduction from Berkey's demand for 1971, suggests that it did so. [69.]

Moreover, there was substantial evidence that Berkey suffered injury into 1971 as a result of the magicube conspiracy. Berkey was not able to introduce a magicube camera until late 1970, and even then its inventories remained low. Because of its haste, Berkey's original cameras were defective for some time. Where there is a basis on which a jury can reasonably infer significant antitrust injury, we should be very hesitant before determining that damages cannot be awarded. *Story Parchment **[*305]** Co., supra, 282 U.S. at 561-62, 51 S. Ct. 248*. ***HN23***[] On a motion for judgment n. o. v., the evidence must be viewed in the light most favorable to the party for whom the verdict was rendered, and it must be given the benefit of all reasonable inferences. E. g., *Simblest v. Maynard, 427 F.2d 1, 4 (2d Cir. 1970).* **[**133]** In our view, Judge Frankel gave insufficient weight to this standard.

The trial judge's decision, however, clearly represented a legitimate concern over the size of the award. It may be true, as the jury evidently found, that most Everflash buyers would have bought a magicube camera in 1972 had the strobe camera not become suddenly successful. It does not necessarily follow, however, that the magicube camera selected by most of those consumers would likely have been, as Berkey's damages theory seems to assume, a Keystone model. Accordingly, if Judge Frankel had merely ordered a remittitur on the ground that the award was excessive, we could not say that he had abused his discretion. See *Heyman v. Kline, 456 F.2d 123, 130-31 (2d Cir. 1972)*. As it is, however, we reverse the grant of judgment n. o. v. and remand for retrial the question of damages for lost camera sales in 1971. In this instance, as in the others where we have directed a new trial, we hope the parties will find another means of disposition.

VI. THE PECK INCIDENT

The lengthy proceedings below were unfortunately marred by a bizarre series of events in the closing days of the trial on liability. Berkey charged that one **[**134]** of Kodak's attorneys had joined forces with an important witness to destroy or conceal evidence unfavorable to the defense. As the facts unfolded at several side bar conferences, the district judge granted Berkey permission to attempt to impeach the witness by cross-examining him concerning the alleged concealment. Kodak challenges this ruling, asserting irreparable prejudice in the eyes of the jury due to the tale that ultimately unfolded from the witness stand. In addition, also on grounds of prejudice, it attacks Judge Frankel's decision to admit into evidence a 1915 decision entered against Kodak in a Government antitrust suit. To explain why we believe the district judge did not abuse his broad discretion in ruling on these matters, we must set forth the events in greater detail.

Professor Merton J. Peck, a former chairman of the Yale Economics Department, was Kodak's sole expert witness. His task was to explain Kodak's view of the relevant markets and the reasons for Kodak's persistently high market shares. In April 1977, several weeks before the trial began, Berkey availed itself of the right to depose its adversary's expert witness under *Fed.R.Civ.P. 26(b) (4)*. Pursuant to **[**135]** a ruling by Magistrate Sol Schreiber, Mahlon Perkins, a Kodak attorney, furnished Berkey with several documents before the deposition commenced. These consisted of interim reports that Peck had drafted, along with Peck's appointment book for the first four months of 1977, the time sheets he kept while working as a consultant to Kodak, and a three-page summary of the materials supplied by Kodak that Peck had reviewed in preparing for his testimony. At the deposition, which was held at the offices of Berkey's counsel, Perkins represented in Peck's presence that all of the information and data upon which the witness had relied was now available to Berkey, and that there was no record of those documents Peck had read but did not utilize.

In the course of the deposition it came to light that Peck had periodically forwarded all his own notes and papers to Donovan Leisure Newton & Irvine, the law firm then representing Kodak. He explained that he had done so because the materials were covered by a confidentiality order and because he lacked the requisite storage space.

[69.] By contrast, the jury awarded all but $ 4,000 of the claimed amount for 1970.

Perkins then represented to Berkey that all of these documents had been destroyed evidently before the magistrate's order **[**136]** under his personal supervision. Peck averred that he could not recall when he first became aware that the documents were being destroyed, but that he continued to return material to Perkins's firm after learning that it was not being retained.

[*306] In another pretrial maneuver, Berkey sought an advisory ruling as to the admissibility of the district court opinion in *United States v. Eastman Kodak Co., 226 F. 62 (W.D.N.Y.1915)*, Appeal dismissed, *255 U.S. 578, 41 S. Ct. 321, 65 L. Ed. 795 (1921)*. In that decision, somewhat inaccurately referred to throughout this litigation as "the 1915 decree," Kodak was found to have monopolized the amateur camera, film, and paper industries through acquisitions and other exclusionary practices. Judge Frankel ruled that the "decree" was too ancient to be probative of the current structure of the relevant markets, and that its value would be outweighed by the danger that the jury would give excessive weight to a judicial holding. See *Fed.R.Evid. 403*. The judge indicated, however, that he would reassess this decision should Kodak raise the defense that monopoly power had been "thrust upon" it.

Peck took the stand as the final witness for Kodak **[**137]** at the liability trial. When John Doar, lead trial counsel for Kodak and a man of national repute, asked him to explain how Kodak had obtained its market power, Alvin Stein, who has represented Berkey from the inception of this litigation, immediately asked for a conference at side bar. He argued that if Peck were allowed to testify that Kodak's strength was drawn from its innovative capacities, Berkey should be permitted to introduce the 1915 "decree," both as substantive rebuttal evidence and to impeach Peck. Judge Frankel twice offered to permit Mr. Doar to withdraw the question. When Kodak's counsel declined the invitation, the court ruled that the 1915 "decree" could be admitted as background only, representing "one source, though it is far in the past, of Kodak's power over the years." But, as Mr. Stein commenced his cross-examination of Peck, Judge Frankel reversed his course, deciding that, even considering the need to impeach Peck, the prejudicial potential of the decree overwhelmed its probative value.

On Friday, January 6, the 109th day of trial, Mr. Doar requested a ruling as to the scope of the cross-examination concerning the nonproduction and purported destruction of **[**138]** Peck's work papers. Judge Frankel responded by noting that it was irrelevant to Peck's credibility whether Kodak documents that the expert had testified he merely studied and returned to defense counsel had been destroyed. The court ruled, however, that if Peck had yielded his own papers to counsel with knowledge that they might be destroyed, this fact would certainly bear on the weight of his testimony. Stein was admonished to be "low key, brief, and to the point" on cross-examination.

Mr. Stein then began to question Peck about his preparation of a memorandum dated April 21, 1975, the earliest report over his name that had been produced at the deposition. When Stein inquired if this was the earliest writing Peck had prepared for Kodak, the economist replied in the negative. The jury was excused as Kodak for the first time produced a letter dated November 25, 1974, from Peck to a member of the team of Kodak attorneys. The contents of the document, marked as PX 666, were stunning, for in it Peck admitted that he had not yet formulated a fully persuasive answer to two questions:

1. On what economic grounds can the 1915 court decision be rejected as irrelevant to the present situation?

[139]**

2. On what economic grounds can the argument that Kodak's dominant position since 1915 is not based on superior skills be rejected?

In short, the missive, which examined various aspects of the 1915 "decree," conceded that the anticompetitive conduct found in the court's opinion could not be ruled out as at least a partial explanation of Kodak's present market position. Attempting to explain why this explosive document had not been produced earlier, Doar stated that he did not believe it was within the scope of Magistrate Schreiber's order. Kodak had therefore never acknowledged that the letter existed.

Mr. Stein, of course, immediately requested permission to delve into Peck's knowledge of the circumstances surrounding the **[*307]** concealment and sudden appearance of the letter. Counsel also renewed his request that the 1915 "decree" itself be admitted into evidence to rebut Peck's assertions. Since Kodak's own expert had indicated that it might be relevant to the present day market, Judge Frankel admitted portions of the "decree" and ruled that Stein could inquire of Peck how it had come about that he had overlooked PX 666 when he stated in his deposition that he **[**140]** did not recall having written any letters prior to April 1975. Peck replied that he had forgotten that the letter existed. Stein then read excerpts from Peck's deposition testimony, establishing before the jury that Peck continued to send materials to Donovan Leisure after learning that they were not being preserved.

But the most striking revelation of all was still to come. Judge Frankel asked Kodak's counsel to search its files over the weekend of January 7-8 for any other relevant documents. On Monday morning, out of the presence of the jury, Mr. Doar made known his discovery that in fact all the documents that Perkins told Berkey had been destroyed still existed. Moreover, Peck, who had steadfastly maintained that his own files on the case were empty, discovered during the weekend copies of two documents including PX 666 that he had forwarded to Kodak's attorneys. Expressing his concern over the "delicate and troublesome" issues raised by these disclosures, Judge Frankel advised the attorneys that he believed the incident bore on Peck's credibility. Accordingly, he ruled that Mr. Stein should now be permitted to cross-examine Peck on his relations with Perkins.

Stein questioned **[**141]** Peck in some detail. Although the economist steadfastly denied he had deliberately concealed the fact that he had studied the 1915 decision, he conceded that Berkey was kept in ignorance of the fact. Peck agreed that a Kodak attorney had probably shown him the three-page summary of the documents on which he relied before it was submitted to Berkey at his deposition. The 1915 "decree" was not on the list. At the time of Peck's deposition, Stein pointed out, the professor had failed to recall the existence of PX 666 and had denied retaining copies of any of his working papers although his weekend search had uncovered a copy of the letter, which referred throughout to the Western District decision.

Stein also inquired into the circumstances of Peck's delivery of his papers to Perkins, and established that the material was sent to Perkins with impending discovery proceedings in mind, rather than merely because of the confidential nature of the documents. Additionally, Stein established that, although Peck had stated in his deposition of April 1977 that he did not recall when he first learned that documents were being destroyed, in fact he had discovered this fact only weeks before he **[**142]** was deposed. Counsel then went on to question Peck about the decree and its bearing on his testimony concerning the origins of Kodak's market position.

Kodak argues that Judge Frankel committed prejudicial error in allowing even limited reference to the 1915 court "decree," and A fortiori in permitting cross-examination of Peck on the subject of the alleged destruction of documents. But because the scope of cross-examination, especially when it pertains to the credibility of witnesses, is peculiarly within the province of the trial court, See *Lewis v. Baker, 526 F.2d 470, 475 (2d Cir. 1975)*, and in light of the exceptional circumstances we have recited, we cannot say that Judge Frankel's rulings constituted an abuse of discretion.

As the trial court's continuing efforts to reassess the balance of prejudice and probative value of the 1915 "decree" attest, this question was not susceptible of facile resolution. But we think it clear that when PX 666 came to light the scales were decidedly tipped in favor of the limited admissibility that he approved. The Peck letter demonstrated that Kodak's lone expert witness had seriously considered the relevance of the market activities described **[**143]** in the 1915 "decree" to the present market structure of the industry, and that he had serious doubts whether the violations found there could be **[*308]** safely characterized as irrelevant to Kodak's current power in the marketplace.

We are also of the view that the cross-examination of Peck remained within permissible channels, particularly in light of the extraordinary revelations that preceded it. Peck conceded at his deposition that he continued to forward research materials to Kodak's lawyers after learning they were destroyed upon receipt, thereby providing more than a sufficient threshold showing of relevance to permit further inquiry on cross-examination. Suspicion could only have been increased by the sudden appearance of PX 666, a letter of great importance to Berkey's efforts to impeach Peck, which the writer claimed to have forgotten existed. And when Peck revealed on Monday that his files had contained a copy of this letter from the outset, deeper inquiry was certainly justified. As each new fact came to light, Judge Frankel carefully reassessed its relevance to Peck's credibility and gradually enlarged the scope of permissible inquiry into the witness's actions.

[144]** Mr. Stein's questions, therefore, far from consisting of the mere compendium of inflammatory rhetoric that Kodak describes, were legitimate challenges to Peck's credibility and to the independence of his judgment. [70.] Indeed, Judge Frankel, who throughout the unusual disclosures described here maintained an attitude of cautious restraint, noted in a colloquy with the attorneys that Peck's credibility had, in his judgment, been destroyed on the witness stand. To be sure, the jury need not have believed Berkey's argument that Peck had deliberately collaborated with Perkins in an effort to destroy or conceal documents unfavorable to Kodak's cause. But there was certainly more than an adequate basis to permit Berkey to contend that this inference was justified, and that, at best, Peck was a willing tool of Kodak.

[145]** We are not unmindful that the incidents described, as presented to the jury, led to the unfortunate consequence of casting Kodak's attorneys, and the defendant itself, in a highly unfavorable light. It is no less true, however, that the cross-examination elicited information that was highly relevant to an assessment of the independence of judgment and probity of one of Kodak's principal witnesses. [71.] ***HN24***[] Where the trial judge has taken great care to balance the probative value of the evidence against the prejudice that may accrue from its introduction, we think it inappropriate to substitute our judgment for his. See *Perel v. Vanderford, 547 F.2d 278 (5th Cir. 1977)*; *Hood v. United States, 125 U.S.App.D.C. 16, 365 F.2d 949, 951-52 (1966)*. [72.]

[146] [*309]** VII. ATTORNEYS' FEES AND COSTS

Under Section 4 of the Clayton Act, *15 U.S.C. § 15*, the successful plaintiff in a suit for treble damages may be awarded reasonable attorneys' fees. Judge Frankel awarded $ 5.3 million in counsel fees, calculated essentially on the hourly rate at which counsel agreed to bill their client. Berkey, which had asked for a fee of over $ 30 million, contends that because the trial court failed to take into account the difficulty of the litigation, the employment opportunities foregone by counsel, and the result achieved, the reduction of its request was arbitrary and must be reconsidered by this court. Judge Frankel's computation appears to be in conformity with the agreement between Berkey and Parker Chapin Flattau & Klimpl, its principal counsel in this case. [73.] **[**147]** And were it not for our holdings on appeal we would be inclined not to disturb this award. [74.] But inasmuch as we have reversed the

---

[70.] A careful reading of the transcript reveals one brief interchange that was not relevant to Peck's own veracity, but only to that of Perkins himself. Peck was asked if he now was aware of the falsity of the representations Perkins made to Berkey that all the expert's papers had been destroyed. Peck replied that he did know this. Although we believe that the reference to Perkin's dissembling and Peck's present knowledge of it was immaterial, we do not think that this dialogue, or the reference to it in Mr. Stein's summation, was so prejudicial as to warrant a new trial. It was proper to argue to the jury that Peck played a role in the attempt to conceal information from Berkey, and to urge the jury to infer that Peck was either aware, or consciously chose not to recognize, that material was not in fact being destroyed, but withheld. The sole additional fact that it was Perkins who actively misrepresented the facts to Berkey was, at worst, incremental. We do not think that Kodak has met its heavy burden of demonstrating that this interchange, standing alone, caused it prejudice so severe as to call for reversal. See, e. g., *Gray v. Shell Oil Co., 469 F.2d 742, 751-52 (9th Cir. 1972)*, Cert. denied, ***412 U.S. 943, 93 S. Ct. 2773, 37 L. Ed. 2d 403 (1973)***.

[71.] See *Walker v. Firestone Tire & Rubber Co., 412 F.2d 60 (2d Cir. 1969)* (expert may be cross examined concerning falsity of testimony in earlier unrelated trial).

[72.] We have examined Kodak's other objections to the conduct of the trial and believe they are without merit. We also find insubstantial Kodak's contentions that the Sherman Act and the treble damages provision of the Clayton Act are unconstitutional on their face. Moreover, we do not think that our interpretation of the former statute has effected a fundamental alteration of the law of monopolization. Accordingly, we reject the view that the Sherman Act is unconstitutional as applied to the facts of this suit. See generally *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 495-502, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*.

[73.] In a letter dated March 4, 1976, Mr. Stein of Parker Chapin wrote to co-counsel that "the client has no commitment to any of the firms representing it in the case to pay a contingent fee or to compensate us on any measure other than time and effort expended." Moreover, despite the trial court's repeated requests, counsel failed to provide any information from which the judge could determine the size of the "success premium" Berkey allegedly agreed to pay its law firm.

[74.] Because of the conclusions we have reached on appeal, we have decided not to award costs to either party.

judgment for Berkey on its single most significant claim, and have remanded other claims for a new trial, it is plain that the award of attorneys' fees must be vacated for reconsideration by the district court. [75.]

[148]** VIII. SUMMARY

The disposition of this appeal may be summarized in schematic form as follows:

The Court below	This Court's holding
1. Awarded Berkey $45,750,000 treble damages for lost profits on 110 cameras.	Reversed.
2. Awarded Berkey $167,100 treble damages for lost photo finishing profits.	Reversed and remanded for a new trial.
3. Awarded Berkey $57,000 treble damages for excessive prices paid for photo finishing equipment.	Reversed and remanded for a new trial.
4. Awarded Berkey $34,500,000 treble damages for excessive prices paid for film.	Reversed and remanded for a new trial.
5. Granted judgment n.o.v. to Kodak on Berkey's claim for damages for excess prices paid for color print film	Reversed and remanded for a new trial.

[75.] Since the question was neither briefed nor argued, we do not decide under what circumstances a court may award fees for time expended by counsel on claims that ultimately prove unsuccessful. Compare *Union Leader Corp. v. Newspapers of New England, Inc., 218 F. Supp. 490, 493 (D.Mass.1963)*, Set aside on other grounds sub nom. *Haverhill Gazette Co. v. Union Leader Corp., 333 F.2d 798 (1st Cir.)*, Cert. denied, ***379 U.S. 931, 85 S. Ct. 329, 13 L. Ed. 2d 343 (1964)*** *With Trans World Airlines, Inc. v. Hughes, 312 F. Supp. 478, 483 (S.D.N.Y.1970)*, Modified on other grounds, *449 F.2d 51 (2d Cir. 1971)*, rev'd on other grounds, *409 U.S. 363, 93 S. Ct. 647, 34 L. Ed. 2d 577 (1973)* And L. Sullivan Supra, at 794.

Judge Frankel also awarded Berkey $ 343,794.97 in costs, comprising court costs taxable under ***28 U.S.C. § 1920***, and certain expenses incurred in taking depositions. This award must also be vacated and reconsidered by the district court. We do make two observations for the guidance of the court below. Berkey's contention that the trial court erred in refusing to allow reimbursement for expert witness fees is clearly foreclosed by our decision in *Trans World Airlines, Inc. v. Hughes, 449 F.2d 51, 81 (2d Cir. 1971)*, rev'd on other grounds, *409 U.S. 363, 93 S. Ct. 647, 34 L. Ed. 2d 577 (1973)*, in which we indicated that the only costs recoverable by a successful plaintiff in a private antitrust suit are those normally allowable under ***28 U.S.C. § 1920*** and *Fed.R.Civ.P. 54(d)*. Accord, *Twentieth Century Fox Film Corp. v. Goldwyn, 328 F.2d 190, 224 (9th Cir.)*, Cert. denied, ***379 U.S. 880, 85 S. Ct. 143, 13 L. Ed. 2d 87 (1964)***. Similarly, Berkey may not recover as costs of suit its expenditures for use of a computer retrieval service.

The Court below	This Court's holding
($8,803,000, pretrebling, awarded by the jury).	
6. Held that Kodak has violated § 1 of the Sherman Act by conspiring with Sylvania and General lectric in the introduction of the magicube and flipflash systems.	Affirmed. Because the flipflash conspiracy was not made a separate subject of damages at the first trial, a retrial is necessary to determine the resultant damages.
7. Awarded Berkey $990,000 treble damages for lost camera sales in 1970 resulting from the magicube conspiracy.	Affirmed.
8. Granted Kodak judgment n.o.v. on Berkey's claim for damages in 1971 arising from the same conspiracy ($1,417,330, pretrebling, awarded by the jury).	Reversed and remanded for a new trial on damages only.
9. Granted Berkey equitable relief.	Vacated and remanded for further proceedings consistent with this opinion.
10. Awarded Berkey attorneys fees and costs of $5,627,209.47.	Vacated for further consideration on remand.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN1[] **Monopolies & Monopolization, Attempts to Monopolize**

To prevail in a claim of attempted monopolization, plaintiff must demonstrate that the defendant committed acts with specific intent to monopolize trade in the relevant market, and that there is a dangerous probability that the defendant will succeed in its attempt to monopolize the relevant market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN2[] **Regulated Practices, Market Definition**

Relevant market is defined in terms of product and geography. Defining a given product market requires that the definition be broad enough to include all substitutes yet narrow enough to exclude non-substitutes. The concept of substitutability requires an assessment of consumer use of the product in order to determine what other products are price sensitive to changes in the price of the original product so as to constitute interchangeable goods for the original product. The presence of substitutes within a given product market can have the effect of constraining monopoly pricing, since a monopolist's attempt to raise his price above a competitive level will, given substitution, prompt competitors already in the market or facing low entry barriers to begin underselling the monopolist. An economist assesses substitution by measuring the cross-elasticity of demand for a given product within the trade, and the cross-elasticity of demand may be defined as the percentage change in the quantity demanded of a product resulting from a small percentage change in the price of the product.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN3[] **Monopolies & Monopolization, Actual Monopolization**

Illegal power must be appraised in terms of the competitive market for the product. Determination of the competitive market for commodities depends on how different from one another are the offered commodities in character or use, how far buyers will go to substitute one commodity for another. When a product is controlled by one interest, without substitutes available in the market, there is monopoly power. But where there are market alternatives that buyers may readily use for their purposes, illegal monopoly does not exist merely because the product said to be monopolized differs from others.

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Trademark Law > Conveyances > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN4[] **Ownership & Transfer of Rights, Assignments**

A manufacturer has a natural monopoly over his own products, especially when the products are sold under trademark. Unless the manufacturer used his natural monopoly to gain control of the relevant market in which his products compete, the antitrust laws are not violated.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN5[] **Regulated Practices, Market Definition**

A single manufacturer's products might be found to comprise, by themselves, a relevant market for the purpose of a monopolization claim, if they are so dominant in the market in which they compete that any action by the manufacturer to increase his control over his product virtually assures that competition in the market will be destroyed.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

HN6[] **Monopolies & Monopolization, Actual Monopolization**

Every manufacturer has naturally a complete monopoly of his particular product especially when sold under his own private brands.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

HN7[] **Monopolies & Monopolization, Actual Monopolization**

A manufacturer is not forever bound to use the same system of distribution when sound business considerations suggest that a different method be used. Thus, a manufacturer can lawfully terminate an independent distributor and therefore sell exclusively through its own outlets.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN8[] **Regulated Practices, Market Definition**

Proof of the relevant market is essential in an attempted monopolization case as well as a monopolization case.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

HN9[] **Monopolies & Monopolization, Attempts to Monopolize**

It is well settled that a manufacturer may discontinue dealing with a particular distributor for business reasons which are sufficient to the manufacturer, and adverse effect on the business of the distributor is immaterial in the absence of any arrangement restraining trade.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN10[] **Monopolies & Monopolization, Actual Monopolization**

Generally speaking, the right of customer selection is sanctioned by both statute and case law. Absent conspiracy or monopolization, a seller engaged in a private business may normally refuse to deal with a buyer for any reason or with no reason whatever.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Remedies > General Overview

Business & Corporate Compliance > ... > Sales of Goods > Performance > Rights of Buyers

HN11[] **Remedies, Damages**

A manufacturer has a right to select its customers and to refuse to sell its goods to anyone, for reasons sufficient to itself. A refusal to deal becomes illegal under the Sherman Act only when it produces an unreasonable restraint of trade, such as price fixing, elimination of competition or the creation of a monopoly. The fact that a refusal to deal with a particular buyer without more, may have an adverse effect upon the buyer's business does not make the refusal to deal a violation of the Sherman Act. Damage alone does not constitute liability under the Act.

HN13[] **Judgment as Matter of Law, Directed Verdicts**

Summary procedures should be used sparingly in complex antitrust litigation where motive and intent may play leading roles. The standard for granting a judgment notwithstanding a verdict under *Fed .R. Civ. P. 50* is the same as that for granting a motion for a directed verdict. Accordingly, directed verdicts must be reviewed carefully in light of the standard which asks whether, viewing the evidence in the light most favorable to the non-moving party and without weighing the credibility of the witnesses, a reasonable jury could have reached but only one conclusion as to the verdict.

Counsel: **[**1]** Arnold Fleischmann, John A. Austin, and Charles E. Rosolio, Towson, Md., for plaintiff.

Edmund P. Dandridge, Jr., and J. Frederick Motz, and Richard L. Wasserman, Baltimore, Md., for defendants.

Opinion by: YOUNG

Opinion

[*1057] The plaintiff, Robert F. Neugebauer, has been an authorized carrier for the delivery of newspapers published by the defendant, the A. S. Abell Company, ("Abell"), under the direction of the named defendants. Abell publishes three newspapers, the Morning Sun, Evening Sun, and Sunday Sun ("Sunpapers") which have over ninety percent of their circulation in the Baltimore Standard Metropolitan Statistical Area ("SMSA") consisting of Baltimore City and Anne Arundel, Baltimore, Carroll, Harford and Howard counties. This more "urban" area of the Sunpapers' market is known as the Primary Market Area ("PMA"). Since November 8, 1956, plaintiff has been an authorized carrier, having purchased his delivery business, known as "Route 155" with defendants' approval and consent. In purchasing the route, plaintiff obtained the right to buy Sunpapers from the defendants and, in turn, sell them to customers located in a designated territory known as the area of "primary **[**2]** responsibility."

By an amended complaint in six counts, [1] plaintiff charged defendants with various antitrust violations in their dealings with him. The principal allegation is that defendants have acted to "squeeze" plaintiff out of the home delivery business by increasing the wholesale price charged for their newspapers. Since defendants also sell their newspapers directly in the retail market themselves through vending machines on the street and through their own direct delivery service, plaintiff claims that defendants' raising of the wholesale price has reduced his profits so as to drive him out of the home delivery business.

[3]** The case was tried before a jury for four days, and after some eight hours of deliberations, the jury was unable to agree upon a verdict. Prior to sending the case to the jury, the Court had denied defendants' motions for directed verdicts. Defendants have now renewed these motions by filing a Motion for Verdict under *Rule 50(b) of the Federal Rules of Civil Procedure*. After reviewing the evidence in this case, including the trial transcript, this Court will grant defendants' motion for a directed verdict and enter judgment accordingly.

I. THE FACTS

Since purchasing the delivery route, plaintiff has been continually involved in the servicing of his contract area, an operation which he claims is a full-time, seven-day-a-week business and which involves the assistance of his wife and some part-time employees in collecting the subscription price, sending out bills, and maintaining seven-day answering services. Plaintiff's difficulties began around May 8, 1968 when defendant Abell raised its wholesale rate for the newspapers sold to him. Five days later, plaintiff raised the retail price to his contract area's customers. By raising his prices, plaintiff was then charging his customers **[**4]** a rate in excess of Abell's suggested home delivery price, presumably to maintain his previous profit margin. This pattern continued for each increase of Abell's wholesale price thereafter.

Plaintiff alleges that in October, 1968, Abell began to retaliate for his failure to abide by the suggested prices and initiated a direct delivery solicitation of customers in Neugebauer's contract area to persuade plaintiff's customers to terminate their delivery service with him and enter into a cheaper direct subscription agreement with Abell. This solicitation period for direct delivery service continued until 1972. Plaintiff claims that Abell's solicitors informed his customers that the same delivery service was directly available from the Sunpapers at a lower subscription price.

Since Abell operates its direct delivery service at a loss, plaintiff suggests the only motivation for commencing the solicitation and direct delivery system was to retaliate **[*1058]** for plaintiff's unilateral price decisions and to coerce him into abiding by Abell's suggested rates. Thus, plaintiff faced the problem of being caught in a "price squeeze" since Abell set both the retail price charged to consumers **[**5]** as well as the wholesale price charged to carriers such as Neugebauer. If Neugebauer had to pay more for his newspapers at wholesale and could not pass on the price increase because of Abell's upper limit on the retail prices, then obviously he had to absorb the difference through decreased profits. Plaintiff alleges that the harm caused by Abell's price squeeze continues even now and serves to allow Abell to coerce plaintiff and other authorized carriers to adhere to Abell's suggested retail prices and to permit Abell to attempt to monopolize the newspaper retail market. Plaintiff submits that since Abell had no appropriate or substantial business reason for establishing the direct home delivery system, its activities were motivated by the misuse of its monopoly power in the PMA. He also asserts that defendants were in part motivated to take these actions against him because of his position in the Carriers Council, a group of independent newspaper carriers within the Sunpapers' Route Owners' Association, and as Chairman of the Maryland Independent Newspaper Distributors Association.

Defendants have responded arguing that they have never attempted to subject plaintiff to a price **[**6]** squeeze, and that they lack the requisite monopoly power to effectuate the practices of which plaintiff complains. Plaintiff's

---

[1] The six counts are (1) price fixing and monopolization, *15 U.S.C. § 1*, *(2)* end use restrictions, *15 U.S.C. § 1*, *(3)* exclusive dealing, *15 U.S.C. § 14*, *(4)* price discrimination, *15 U.S.C. § 13a*, *(5)* monopolization, *15 U.S.C. § 2*, and *(6)* violations of the Maryland Antitrust Laws, Md.Com.L.Code Ann. § 11-204(a) & (b). By Memorandum and Order dated April 5, 1978, this Court granted defendants' motion for summary judgment as to counts 1 and 4 only.

theory amounts to an allegation that by virtue of its ability to control retail and wholesale prices, Abell is creating a price squeeze which has the effect of eliminating the wholesale market entirely.

Abell admits that plaintiff is an authorized carrier under contract to deliver Sunpapers to homes in a designated area of the Linthicum section of Anne Arundel County, an area within the PMA. When plaintiff entered into his present contract with Abell in 1972, Abell was using its own employees to deliver Sunpapers to some home subscribers in plaintiff's area. Abell has apparently continued the delivery service but does not solicit for it and has undertaken direct delivery service to new subscribers only at their specific request.

While Abell acknowledges its decision to raise its wholesale prices in May, 1968, it claims that the subsequent solicitation program has been mischaracterized by plaintiff. Toward the end of July, 1968, Abell, at its own expense, sent solicitors into plaintiff's area to make a door-to-door solicitation for subscriptions; however, **[**7]** Abell conducted this campaign at plaintiff's then-prevailing rates and turned over any new subscriptions to him. Transcript at 320-21. Three months later, faced with a serious decline in subscriptions, Abell decided to try to expand its circulation on a limited basis by soliciting in areas adjacent to those served by the independent authorized carriers. Abell offered these subscriptions at its then-prevailing suggested home delivery prices in areas where it already had responsibility for home deliveries. People hired as solicitors received explicit instructions to be followed "Without any deviation " and were told by Arthur Rode, the person in charge of solicitations in Baltimore City, that they were not to be competing with the independent carriers:

> I want to stress that you are not to make any attempt to take present subscribers away from the carrier. However, in the event the customer voluntarily expresses her dissatisfaction over her present service or price, we can then offer our services and prices direct to her from The Sunpapers.

Instructions for Solicitors from Arthur Rode (emphasis in original). See also Rode Affidavit of October 25, 1977. The record further **[**8]** indicates that when one of Abell's solicitors ignored these instructions, he was promptly dismissed from service.

II. PLAINTIFF'S THEORY OF THE CASE

Given Abell's direct delivery solicitation program, plaintiff concludes that Abell has acted so as to ensure itself a monopoly in the relevant newspaper Wholesale market. Since Abell is the sole distributor of Sunpapers **[*1059]** in the Baltimore Metropolitan Area, it constitutes plaintiff's sole source of supply. Plaintiff's theory about monopolization in the newspaper wholesale market is premised upon his claim that each of the separate Sunpapers editions (Morning, Evening, and Sunday) constitutes a unique product for which there is no substitute in the Baltimore market. In other words, Abell controls a one-brand market which has no effective substitute or competition. According to plaintiff, Baltimore's News American, an afternoon newspaper, appeals to a substantially different customer and is not a substitute for the Sunpapers.

Plaintiff also advances the novel theory of the Sunpapers competing directly with itself by selling at one price to the wholesale buyer (Neugebauer) and at another, higher, price to the retail buyer **[**9]** (the consumer). [2.] Increasing the wholesale price effectively reduces an independent carrier's profit by reducing the overall spread between wholesale and retail prices. By making plaintiff's activities uneconomical, Abell can then effectively terminate his wholesale activities and have the retail market all to itself.

[2.] In the Memorandum accompanying his Motion for Summary Judgment, at 19, plaintiff argued as follows:

Abell, a monopolist in the newspaper wholesale market in the Baltimore Metropolitan Area, in competing with plaintiff for customers on his route, has in effect sold newspapers to itself at the retail level of distribution and by virtue of its monopoly power at the wholesale level, has made it impossible for plaintiff to compete with the price charged by Abell through its direct delivery system.

Plaintiff raised the same point again in his Trial Memorandum at 18. As will be explained below, this argument makes sense only on the assumption that Abell can be found to have a "natural monopoly" of its own products in violation of the antitrust laws.

[10]** As the case went to trial, two main issues were to be presented to the jury: (1) whether the defendants were guilty of monopolizing the newspaper wholesale market in violation of *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*, and *(2)* what that market consisted of. In order to make these determinations, the Court must first consider the nature of the market which plaintiff is claiming defendants monopolized.

III. RELEVANT MARKET

A. Proving a product market

HN1[] To prevail in a claim of attempted monopolization, plaintiff must demonstrate that the defendant committed acts with specific intent to monopolize trade in the relevant market, and that there is a dangerous probability that the defendant will succeed in its attempt to monopolize the relevant market. *Swift & Co. v. United States, 196 U.S. 375, 396, 25 S. Ct. 276, 49 L. Ed. 518 (1905)*; *American Tobacco Co. v. United States, 328 U.S. 781, 785, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*.

Plaintiff contends that for the purposes of determining whether Abell has violated the anti-monopoly provisions of *15 U.S.C. § 2*, the relevant market must be narrowly construed to include Only the Sunpapers rather than some broader market **[**11]** which might include other newspapers regularly available in the SMSA such as the Washington Post, the News American, the Washington Star, the Annapolis Capital, and numerous community newspapers, as well as broadcast media like radio and television. Obviously, the narrower the market, the easier it is to show "possession of monopoly power in the relevant market." *United States v. Grinnell Corp., 384 U.S. 563, 570, 86 S. Ct. 1698, 1699, 16 L. Ed. 2d 778 (1966)*.

According to plaintiff, there are several reasons for considering the Sunpapers alone to constitute the relevant product market. First, and somewhat obviously, no one other than Abell can supply the Sunpapers. Second, there are no other major newspapers which adult independent carriers can deliver in the Baltimore Metropolitan Area. [3.] Third, plaintiff claims that his contract **[*1060]** with Abell effectively prevents him from delivering other papers on his route. Finally, Abell publishes the only morning newspaper available for home delivery in the Baltimore Metropolitan Area. Thus, plaintiff's relevant market contentions relate to both the nature of the products sold and the area in which they are sold.

[12]** ***HN2***[]

Relevant market is defined in terms of product and geography. [4.] *United States v. E. I. duPont de Nemours, 351 U.S. 377, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)* (hereinafter cited as the Cellophane case). Defining a given product market requires that the definition be broad enough to include all substitutes yet narrow enough to exclude non-substitutes. The concept of substitutability requires an assessment of consumer use of the product in order to determine what other products are price sensitive to changes in the price of the original product so as to constitute interchangeable goods for the original product. The presence of substitutes within a given product market can have the effect of constraining monopoly pricing, since a monopolist's attempt to raise his price above a competitive level will, given substitution, prompt competitors already in the market or facing low entry barriers to begin underselling the monopolist. An economist assesses substitution by measuring the cross-elasticity of demand for a given product within the trade, and the cross-elasticity of demand may be defined as "the percentage change in the quantity demanded of a product resulting from a small percentage **[**13]** change in the price of the product." R. A. Posner, Antitrust 437 (1974). See also C. E. Ferguson, Microeconomic Theory 106-08 (3d ed. 1972).

For example, if the price of a morning newspaper increased slightly and resulted in a large increase in consumer demand for afternoon or evening papers (or even a morning newspaper from a different publisher) the latter would constitute substitutes for the former, and the presence of interchangeability would demonstrate elastic demand. Conversely, if the newspapers were poor substitutes for each other, a small price rise in one would have little if any

3. The News American employs a different delivery system which primarily utilizes young boys and girls, known as "Little Merchants," who provide independent delivery services. Some adult carriers, however, are also used. Transcript at 246, 366.

4. The parties have agreed that the relevant geographical market is the PMA, or the Baltimore Metropolitan area.

impact on demand for the other. The concept of cross-elasticity of demand relates to the ability to use monopoly pricing as follows:

> The higher the cross-elasticity of demand between two products, the less will be the ability of a sole seller of one of the products to raise his price without suffering a **[**14]** reduction in sales volume so great as to offset the positive effect of the higher on profits.

R. A. Posner, Supra, at 438.

The Cellophane Court expressly sanctioned this cross-elasticity of demand analysis, recognizing that its application was necessary in order to determine if there had been monopolization:

> ***HN3***[] Illegal power must be appraised in terms of the competitive market for the product.
>
> Determination of the competitive market for commodities depends on how different from one another are the offered commodities in character or use, how far buyers will go to substitute one commodity for another.

351 U.S. at 393, 76 S. Ct. at 1006. In addressing the relevant market aspects of the case, the Court reasoned as follows:

> When a product is controlled by one interest, without substitutes available in the market, there is monopoly power. . . .
>
> But where there are market alternatives that buyers may readily use for their purposes, illegal monopoly does not exist merely because the product said to be monopolized differs from others. If it were not so, only physically identical products would be part of the market. . . . What is called for is an **[**15]** appraisal of the "cross-elasticity" of demand in the trade. . . . The varying circumstances **[*1061]** of each case determine the result. In considering what is the relevant market for determining the control of price and competition, no more definite rule can be declared than that commodities reasonably interchangeable by consumers for the same purposes make up that "part of the trade or commerce", monopolization of which may be illegal.

351 U.S. at 394-95, 76 S. Ct. at 1006-7.

Defining cross-elasticity of demand may be theoretically simple, however actually measuring it in a particular market presents certain practical difficulties. As a result, courts have wisely followed the Supreme Court's lead in recognizing the availability of certain "proxies" which may be indicative of the contours of a specific "market." Noting that the tests to be applied remain constant although the individual market being studied may vary, the Cellophane Court proposed that a market would be "composed of products that have reasonable interchangeability for the purposes for which they are produced price, use and qualities considered." 351 U.S. at 404, 76 S. Ct. at 1612.

The Supreme Court's **[**16]** subsequent application of the Cellophane test has emphasized the relevance of use and qualities rather than price elasticity [5.] and has developed into a functional interchangeability test eschewing the inconclusiveness of microeconomic data for the more practical but perhaps subjective standard of use and qualities. In *United States v. Grinnell Corp., 384 U.S. 563, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*, the Court rejected defendants' arguments that burglar alarm services were not interchangeable with fire alarm services and therefore could not be included in the same market of central station protection services. The Court, after looking at the use for which the various devices were intended, concluded that:

---

5. Reliance on price elasticity has been discussed in E. Gellhorn, ***Antitrust Law*** and Economics 123-25 (1976) and R. A. Posner, Supra, at 438-41.

> there is here a single use, I. e., the protection of property, through a central station that receives signals. It is that service, accredited, that is **[**17]** unique and that competes with all the other forms of property protection. We see no barrier to combining in a single market a number of different products or services where the combination reflects Commercial realities. To repeat, there is here a single basic service the protection of property through use of a central service station that must be compared with all other forms of property protection.

384 U.S. at 572, 86 S. Ct. at 1704 (emphasis added).

B. Plaintiff's natural monopoly theory

At trial, plaintiff attempted to prove that the relevant product market was the wholesale newspaper market in the PMA. In advancing this argument, plaintiff suggested, however, that the monopolization was occurring at the Retail level. See Plaintiff's Trial Memorandum at 7-9. Presumably plaintiff means that by squeezing out plaintiff from the wholesale market, Abell can somehow further its attempt to monopolize the retail market. Yet this explanation makes no sense at all since, as a matter of law, defendant Abell would, under certain conditions, be perfectly capable of eliminating plaintiff altogether without a "squeeze" and without any antitrust liability. As will be explained **[**18]** below, Abell could do this directly by unilaterally ending its independent carriers program in order to conduct all home deliveries itself. In advancing his theory even further, plaintiff tries to show that the Sunpapers is a one-brand market, however, insofar as plaintiff contends that Abell constitutes the scope of the relevant market because it is the sole source of Sunpapers, plaintiff has merely stated the obvious while proving nothing.

Conceivably, plaintiff could show that consumers' preferences and willingness to buy a product regardless of how high its costs may create such an inelastic product that it is a one-brand market, I. e., one with no substitution. To demonstrate this, however, plaintiff would have the Court believe that Abell faces no competition whatsoever **[*1062]** from the News American and three other daily papers, a large number of weekly community papers, four television stations and several radio stations. See Transcript at 119A-20 (admission of such multimedia competition by plaintiff's expert witness). Each type of media is in the business of disseminating news to the general public, and from the "commercial realities" standard of *Grinnell, supra*, **[**19]** it would be exceedingly myopic to conclude that the Sunpapers and, say, the News American or perhaps even the Washington Post, are not basically fulfilling similar functions and are to some degree price sensitive in the Baltimore area.

The essential fallacy in plaintiff's argument, however, lies in his attempting to define the relevant product market not on the basis of commercial realities such as use and quality of the item but rather on the basis of the distribution system utilized by Abell. If accepted, the logic of plaintiff's argument would mean that the definition of the product market would turn on How defendant Abell distributed its product rather than on the nature of what was being distributed. [6] Additionally, plaintiff's theory would premise liability on the presence of two types of alleged monopoly, with monopoly again being defined in terms of the product distribution system. The first monopoly is that which defendant has over its own product when sold at wholesale. The second monopoly, one which plaintiff has failed to prove, is that acquired in competing with other products in the relevant market. Obviously, by definition, no one competes with Abell at wholesale: **[**20]** plaintiff can purchase Sunpapers for resale only from Abell because no one else makes them. Yet this type of "monopoly" is clearly not the sort forbidden by the antitrust laws.

---

6. Plaintiff's arguments concerning demand cross-elasticities show a flaw parallel to that manifested in his attempt to define the relevant market in terms of the newspaper distribution system. For example, plaintiff contends that cross-elasticity of demand in the wholesale market is zero because each Sunpaper is a unique product unavailable from any supplier other than Abell. This argument is nothing more than the "natural monopoly" argument which, as a matter of law, fails to allege a violation of the antitrust laws. Plaintiff reasons that since He cannot demand Sunpapers from anyone other than Abell, Abell has no competition from possible substitutes. This logic would sap Cellophane and Grinnell of any meaning whatsoever and would hardly comport with Grinnell's requirement that "commercial realities" be evaluated. When these realities are considered, it becomes readily apparent that the relevant market for the application of the antitrust laws and cross-elasticity of demand principles is the newspaper retail market.

[21]** This conclusion follows directly from the ruling in *Bushie v. Stenocord Corporation, 460 F.2d 116 (9th Cir. 1972)*, which affirmed the trial court's grant of summary judgment as to counts alleging violations of *sections 1* and *2* of the Sherman Act. In Bushie, plaintiffs were terminated from their position as distributors of Stenocord dictating machinery products. The defendant had hired an employee to help vertically integrate its operation. Arguing that Stenocord was the relevant market, plaintiff advanced the theory "that the exclusive control which Stenocord has over the sale and servicing of Stenocord products, as a result of the termination of his dealership, constitutes a monopoly proscribed by Section Two." *460 F.2d at 120*. The court, however, held otherwise: "***HN4***[] A manufacturer has a "natural monopoly over his own products, especially when the products are sold under trademark . . . .' (Citation omitted). Unless the manufacturer used his natural monopoly to gain control of the relevant market in which his products compete, the antitrust laws are not violated." Id. (emphasis added). The analogy to the instant case is clear. Plaintiff Neugebauer, as a wholesale distributor of **[**22]** Sunpapers, faces a "natural monopoly" when dealing with Abell at the wholesale level. Yet, in arguing that the wholesale market is the relevant market, plaintiff must also show how the natural monopoly there somehow turns into an Illegal monopoly in the retail market which lessens competition in some impermissible, perhaps even predatory, manner.

[*1063] The Bushie court further amplified its explanation of the plaintiff's erroneous antitrust theories:

> ***HN5***[] A single manufacturer's products might be found to comprise, by themselves, a relevant market for the purpose of a monopolization claim, if they are so dominant In the market in which they compete that any action by the manufacturer to increase his control over his product virtually assures that competition in the market will be destroyed. Cf. United States v. United Shoe Machinery Corp. (D.C.), *Supra, 110* F. Supp. (295) at 341-344; Industrial Building Materials, Inc. v. Interchemical Corp. (9 Cir.), *Supra, 437* F.2d (1336) at 1344. There is no suggestion in this case, however, that Stenocord dominated the market for office dictating machines generally, or that it controlled a major share of the market for machines of its **[**23]** particular type. To the extent that Bushie's argument suggests that the "relevant market" to be used in considering Stenocord's market share is to be arrived at by disregarding those other sellers of dictating equipment whose products are similar, both in design and function, because Bushie did not "consider" them competitors, we reject it. It is only by excluding such competition from the determination of the relevant market that Bushie hopes to show a market in which Stenocord would be the dominant figure. Since none of his proof would establish a "dangerous probability" of monopolization (*American Tobacco Co. v. United States, 328 U.S. 781, 785, 66 S. Ct. 1125, 90 L. Ed. 1575* . . .) in a properly defined market, summary judgment was proper.

460 F.2d at 121 (emphasis added). This passage makes it clear that the relevant market is the "market in which (the products) compete" which in the instant case is the retail market since, as plaintiff in effect argues, the wholesale market in Sunpapers is a natural monopoly lacking competition. It is clear, then, that for purposes of proving the relevant market, plaintiff has confused the natural monopoly in the wholesale market **[**24]** with the type of monopoly in the competitive retail market which, if found, might be the basis for imposing antitrust liability. [7.]

[7.] Plaintiff's Trial Memorandum, at 5, displays the confusion of relevant markets in the following passage:

Under any interpretation of the term "relevant market" it is clear that Abell has monopoly power in the newspaper wholesale market. First, Abell is the sole supplier of the Sunpapers and by reason of this fact, plaintiff and other authorized carriers have no alternative source of supply for their business, regardless of the wholesale price Abell charges them for the newspapers. Even under the broad DuPont definition for plaintiff's purpose there are no other products that are reasonably interchangeable because of the nature of his contractual relationship with Abell and the nature of the business in general. The Sunpapers is a "unique and distinctive" product to him because if he wishes to remain in his current business as a Sunpapers authorized carrier, the Sunpapers are the only product available to him for resale to his customers. For this reason, the situations in which the courts have defined the relevant market as simply the single product of the defendant is clearly applicable here.

The real issue raised here is whether plaintiff and Abell actually compete in the newspaper wholesale market. Plaintiff claims that they do and argues that defendant Abell, when selling at retail itself, establishes a stipulated "shadow" wholesale price for its own newspapers. In other words, plaintiff claims that Abell the wholesaler sells Abell papers to Abell the retailer. See note 2 Supra. Plaintiff must invent such a fictional wholesale price in order to overcome the natural monopoly argument; however, his efforts in this respect are belied by the cases, such as Bushie, which recognize that such a natural monopoly is not actionable under the antitrust laws. See Transcript at 129 where one of plaintiff's expert witnesses comments that "(plaintiff), in fact, is

[25]** These conclusions find support in numerous other cases which have rejected the notion that a natural monopoly in a case such as this can be converted into an illegal monopoly. See, e.g., *Carlo C. Gelardi Corp. v. Miller Brewing Co., 421 F. Supp. 237, 244 **[*1064]** n.11 (D.N.J.1976)*; V. & *L. Cicione, Inc. v. C. Schmidt & Sons, Inc., 403 F. Supp. 643, 651 (E.D.Pa.1975)*, *Aff'd, 565 F.2d 154 (3d Cir. 1977)*; *Allied Electric Supply Co. v. Motorola, Inc., 369 F. Supp. 133, 138 (W.D.Pa.1973)*; *A-1 Business Machine Co. v. Underwood Corp., 216 F. Supp. 36, 37 (E.D.Pa.1963)*. This issue was explicitly addressed by Judge Chestnut in *Arthur v. Kraft-Phenix Cheese Corp., 26 F. Supp. 824, 828 (D.Md.1938)*:

> ***HN6***[] Every manufacturer has naturally a complete monopoly of his particular product especially when sold under his own private brands, and no private controversy with a distributor could legally tend to increase that type of a natural monopoly. The Sherman Act is, therefore, clearly not really involved.

See also *Mogul v. General Motors Corp., 391 F. Supp. 1305, 1314 (E.D.Pa.1975)*, *Aff'd, 527 F.2d 645 (3d Cir. 1976)*; *Schwing Motor Co. v. Hudson Sales Co., 138 F. Supp. 899, 906* (D.Md.), **[**26]** *Aff'd, 239 F.2d 176 (4th Cir. 1956)*, Cert. denied, *355 U.S. 823, 78 S. Ct. 30, 2 L. Ed. 2d 38 (1957)* (". . . a real monopoly in the commodity (is necessary) and not the natural monopoly which a manufacturer has in his own product").

A recent Fifth Circuit case, *H & B Equipment Co. v. International Harvester Co., 577 F.2d 239 (5th Cir. 1978)*, also undercuts plaintiff's argument that the relevant product market is the Sunpapers alone. In H & B, a distributor sued a manufacturer who had commenced a direct distribution system of its own in competition with distributor-plaintiff's. Plaintiff alleged that the manufacturer wanted to drive him out of business in order to monopolize the hydraulic excavator market. Affirming the lower court's directed verdict for defendant, the Fifth Circuit held that "(t)he hydraulic excavator market . . . cannot be confined to International Harvester products alone." At 242. The Court required that other rival producers in the hydraulic excavator market also be considered. Having found that the relevant product market was at the retail level, the H & B court held that plaintiff had failed to prove the market share necessary to establish a monopoly: **[**27]**

> (H & B) introduced no statistics on the number and size of firms in the market, and every hint the record gives indicates International Harvester's market position fell far short of being dominant.

Id. at 243. See also *Diehl & Sons, Inc. v. International Harvester Co., 426 F. Supp. 110, 121 (E.D.N.Y.1976)* (test of relevant product market in area of "effective competition in which the defendant operates").

Knutson v. Daily Review, Inc., 383 F. Supp. 1346 (N.D.Cal.1974), is persuasive authority for this Court's findings as to plaintiff's theories of antitrust liability and relevant product market. In Knutson, plaintiffs were independent dealers who purchased, distributed, and resold daily newspapers. As in the instant case, plaintiffs bought the papers at wholesale from the publisher. The defendant publisher established retail subscription charges which the independent dealers could then charge their customers. Although they had acquiesced in defendants' suggested pricing policies, the plaintiff dealers complained about the illegality of the price-fixing and other restraints and were terminated by the publisher which instituted its own in-house distribution facilities. **[**28]** Although plaintiffs were offered jobs as salaried district managers, they refused the offer and instead challenged the distribution practices under the antitrust laws.

Despite having found evidence of price-fixing under the independent dealership arrangement, the court held that there was no evidence of conspiracy or other ***antitrust law*** violations so as to make illegal the termination of the independent dealers. *383 F. Supp. at 1361*. The court held that:

> ***HN7***[] a manufacturer (is not) forever bound to use the same system of distribution when sound business considerations suggest that a different method be used. Thus, a manufacturer can lawfully terminate an independent distributor and therefore sell exclusively through its own outlets.

---

paying the higher wholesale price. Now, we can't see directly what wholesale price the Sun charges itself; that is not something you can't (sic) document because the sale never takes place." Defendant has a natural monopoly at the wholesale level, and it is this fact, plus the fact that defendant also distributes at the retail level, which constitutes the basis of plaintiff's grievance.

383 F. Supp. at 1360-61. In pressing these section 1 claims, plaintiffs, like Neugebauer here, had to explain the scope of the relevant **[*1065]** product and geographic market; however, the court found their definition that the relevant product markets were community or suburban daily newspapers in specified areas of southern Alameda county was too narrow:

> While plaintiffs contend that the relevant product and geographic markets are community **[**29]** or suburban daily newspapers in specified areas of southern Alameda County where defendants publish the only community daily papers, the Court finds that this asserted market definition fails to take into account the cross-elasticities of demand among the community, satellite and metropolitan daily newspapers which circulate in southern Alameda County as well as the other media (television, radio, and free and controlled circulation papers) which competes for advertising in that area. See *United States v. duPont & Co., 351 U.S. 377, 393-400, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*; *United States v. Grinnell Corp., 384 U.S. 563, 571-576, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; *Plastic Packaging Materials, Inc. v. Dow Chemical Co., 327 F. Supp. 213, 229-230 (E.D.Pa.1971)*; *United States v. Chas. Pfizer & Co., 246 F. Supp. 464 (E.D.N.Y.1965)*.

383 F. Supp. at 1360 n.16. The Knutson court's reasoning is particularly relevant insofar as the instant case is concerned because in making its findings as to cross-elasticities and the presence of illegal restraints of trade, the court specifically based its findings on facts peculiar to the individual business involved. *383 F. Supp. at **[**30]** 1361*. Taking these factors into consideration, the Knutson court found substantial evidence of competition between Bay area newspapers and other forms of communications media in the vicinity. *383 F. Supp. at 1366*. [8] **[*1066]** In

[8] In making these factual findings, the Knutson court distinguished the holding in ***Bowen v. New York News, Inc., 366 F. Supp. 651, 675-76 (S.D.N.Y.1973)***, Aff'd in pertinent part, rev'd in part, *552 F.2d 1239 at 1242 (2d Cir. 1975)*. In Bowen, the trial court found that the daily paper in question there was a distinct line of commerce having no real substitute. The court specifically rejected the defendant's efforts to show that other media competed with the newspaper; however, it did recognize the existence of competition from numerous other newspapers. Yet the cases which the court relied on for this narrow definition of the relevant product market were premised upon factual determinations of the particular record. ***366 F. Supp. at 675 n.56***.

The issue presented in this case can be looked at in two ways: (1) whether defendants have shown the existence of the high cross-elasticity of demand which they claim is present, or (2) whether plaintiff has succeeded in showing the narrow relevant product market and low cross-elasticity needed to support his antitrust claims. This Court made it clear to plaintiff what his burdens were in its earlier ruling on the parties' cross-motions for summary judgment. Because plaintiff has failed to meet this initial burden, the Court does not have to reach a finding that defendants' description of their competition necessarily extends to other media. See *Knutson, 383 F. Supp. at 1366 n.24*.

Finally, Bowen undermines plaintiff's claim here that in his dealings with defendants he was functioning as a wholesaler. The trial court found that "franchise dealers also function as wholesalers in selling to their carrier boys," and that the News acted as a "wholesaler" in selling to various retail dealers and independent wholesalers. ***366 F. Supp. at 666***. The appeals court rejected the trial court's reasoning and went on to interpret "wholesaler" in terms of commercial realities: in determining whether a party to a Fair Trade Agreement is a "wholesaler," we must look to whether the franchisee buys for the purpose of reselling in gross and whether the persons to whom he sells actually resell at retail.

Judged by these standards, the franchise dealer here performs no true "wholesale" functions. Unlike the normal wholesaler, who buys in bulk and distributes to a broad spectrum of independent merchants who then resell for their own profits, here the Carrier Agreement clearly contemplates "sales" only to home subscribers. Although Paragraph (a)(5) of the McGuire Act prohibits Fair Trade agreements between wholesalers, its thrust is the prevention of price fixing between those in competition with sellers at the same functional level. *United States v. McKesson & Robbins, Inc., 351 U.S. 305, 313, 76 S. Ct. 937, 100 L. Ed. 1209*. Even accepting the characterization of the transactions involved here as "resales" by the franchise dealers to the delivery boys, the distribution was exclusively through the franchise dealers to the delivery boys, so that The News, however its function is described, would never be engaged in selling directly to delivery boys or to home subscribers and thus would not have any occasion to agree with competing sellers upon the resale price. It would therefore be anomalous to classify as "wholesalers" buyers whose resales are solely to a narrow group of this nature. 522 F.2d at 1251 (footnote omitted). Although the court's reasoning was framed with reference to the McGuire Act's prohibitions of unfair methods of competition, *15 U.S.C. § 45(a)*, its conclusions are generally applicable to the present case. While both Neugebauer and defendants sold directly to home subscribers there has been no evidence of any conspiracy, or unfair or anticompetitive practices insofar as defendants' light of these authorities, plaintiff has not demonstrated that the relevant product market should be narrowly defined so as to include only the Sunpapers.

[31]** In the instant case, not only is there no basis for concluding that the wholesale market is the relevant product market, but there is no evidence showing that Abell has a dominant share of the newspaper retail market in the PMA. [9.] At trial defendants demonstrated that they face effective competition in the PMA from the News American, the Annapolis Evening Capital, the Washington Post, the Washington Star, plus weekly papers, radio, and television, Transcript at 443, 449, and plaintiff himself admits the presence of such competition in paragraph nine of his Amended Complaint. [10.] Plaintiff has not shown that Abell does not face substantial competition in the market for which its product was intended, I. e., the newspaper retail market. Furthermore, plaintiff has not shown that the Sunpapers are so unique as to create a one-brand market, and plaintiff cannot meet this burden by showing either that Abell has a natural monopoly of its own product or that the particular distribution system employed somehow makes the Sunpapers unique. *Telex v. International Business Machines Corp., 510 F.2d 894, 917-19* (10th Cir.), Cert. dismissed, *423 U.S. 802, 96 S. Ct. 8, 46 L. Ed. 2d 244 (1975)*; **[**32]** *Mullis v. Arco Petroleum Corp., 502 F.2d 290 (7th Cir. 1974)* (Stevens, J.); *Bushie v. Stenocord Corp., supra* ; *Nelligan v. Ford Motor Co., 262 F.2d 556 (4th Cir. 1959)*; *Packard Motor Car Co. v. Webster Motor Car Co., 100 U.S.App.D.C. 161, 243 F.2d 418*, Cert. denied, *355 U.S. 822, 78 S. Ct. 29, 2 L. Ed. 2d 38 (1957)*; *H. L. Moore Drug Exchange v. Eli Lilly & Co., 457 F. Supp. 75 (S.D.N.Y.1978)*; *Merit Motors, Inc. v. Chrysler Corp., 417 F. Supp. 263 (D.D.C.1976)*, *Aff'd, 187 U.S.App.D.C. 11, 569 F.2d 666 (1977)*, V. & *L. Cicione, Inc. v. C. Schmidt & Sons, Inc., 403 F. Supp. 643 (E.D.Pa.1975)*, *Aff'd, 565 F.2d 154 (3d Cir. 1977)*; *Mogul v. General Motors Corp., 391 F. Supp. 1305 (E.D.Pa.1975)*, *Aff'd, 527 F.2d 645 (3d Cir. 1976)*; *Varney v. Coleman Co., 385 F. Supp. 1337 (D.N.H.1974)*; *Allied Electric Supply Co. v. Motorola, Inc., 369 F. Supp. 133 (W.D.Pa.1973)*; *Cal. Distributing Co. v. Bay Distributors, Inc., 337 F. Supp. 1154 (M.D.Fla.1971)*; Brewer Sewing Supplies Co. v. Fritz Gegauf, Ltd., 1970 Trade Cas. P 73,139 (N.D.Ill.1970); *E. A. Weinel Construction Co. v. Mueller Co., 289 F. Supp. 293 (E.D.Ill.1968)*; *South End Oil Co. v. Texaco, Inc., 237 F. Supp. 650 (N.D.Ill.1965)*; *A-1 Business Machine **[**33]** Co. v. Underwood Corp., 216 F. Supp. 36 (E.D.Pa.1963)*; *Johnny Maddox Motor Co. v. Ford Motors Co., 202 F. Supp. 103 (W.D.Tex.1960)*; *Schwing Motor Co. v. Hudson Sales Co., 138 F. Supp. 899* (D.Md.), *Aff'd, 239 F.2d 176 (4th Cir. 1956)*, Cert. denied, *355 U.S. 823, 78 S. Ct. 30, 2 L. Ed. 2d 38 (1957)*.

[34]** Having failed to show that defendants have exercised monopoly power in the relevant product market, plaintiff has obviously **[*1067]** failed to show that this power created a "dangerous probability" of success in controlling prices and excluding competition. *Swift & Co. v. United States, 196 U.S. 375, 25 S. Ct. 276, 49 L. Ed. 518 (1905)*. See also *E. J. Delaney Corp. v. Bonne Bell, Inc., 525 F.2d 296, 305 (10th Cir. 1975)*, Cert. denied, *425 U.S. 907, 96 S. Ct. 1501, 47 L. Ed. 2d 758 (1976)*; *McElhenney Co. v. Western Auto Supply, 269 F.2d 332, 339 (4th Cir. 1959)*. The Supreme Court has held that ***HN8***[] proof of the relevant market is essential in an attempted monopolization case as well as a monopolization case. *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 177, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*.

IV. A SQUEEZE WAS UNNECESSARY

---

behavior has been concerned. The testimony at trial showed that defendants began their home delivery solicitations to increase circulation and not to deprive plaintiff of any customers.

9. Defendants note that in H & B, supra, plaintiff attempted to establish a submarket consisting solely of one particular International Harvester model. The court concluded that while the 3960 model was sold only by International Harvester, this fact was insufficient to create an issue for the jury. Accordingly, defendants note that there is no evidence that the Sunpapers is unique enough in the newspaper market to constitute a proper submarket. Defendants' Memorandum In Support of Motion for Directed Verdict at 16 n.13.

10. Paragraph 9 of the Amended Complaint refers to the News American as "another high quality newspaper of general circulation in the Baltimore area with a circulation almost as great as that of the Sun. . . ." Plaintiff continues, adding that "(o)ther papers from nearby cities such as the Washington Post do compete at retail with the Sun but account for a relatively small portion (5%-25%) of the job market sales in the area which constitutes defendant's marketing area."

Even more detrimental to plaintiff's cause than his mistaken theories about relevant market is the fact that defendant Abell could eliminate independent carries directly, without resorting to a squeeze tactic, and still be immune from antitrust liability. The fact that plaintiff and defendant may compete in their retail **[**35]** pricing in and of itself is not contrary to the antitrust laws, unless, of course, predatory tactics or other anticompetitive practices are employed to destroy competition in order to permit prices to rise in the long run. Yet, again, why would defendants want to wipe out plaintiff through costly and frequently wasteful predatory pricing when they could simply terminate his carrier position by fiat?

Because Abell has a natural monopoly over its own product, the extent of any retail competition is obviously dependent upon the will of Abell. See *United States v. Klearflax Linen Looms, 63 F. Supp. 32, 38 (D.Minn.1945)*, Citing *Federal Trade Commission v. Beech-Nut Packing Co., 257 U.S. 441, 456-57, 42 S. Ct. 150, 66 L. Ed. 307 (1922)* (Holmes, J., dissenting). At trial it was argued that since Abell depended on advertising revenue rather than subscription revenue for 80 to 85% Of its income it did not need to begin a direct delivery campaign and that consequently the only motive for direct delivery was Abell's intent to monopolize the newspaper retail market. Testimony showed, however, that Abell's solicitation program was simply intended to generate additional revenue to offset the **[**36]** effect of recent circulation losses. There was no evidence that Abell intended to monopolize the newspaper retail market or drive plaintiff out of business. See Transcript at 263-66.

As an integrated industry, Abell made and sold directly its own product. In doing so, it also made use of independent carriers such as plaintiff in a delivery or distribution system which also utilized street sales and direct home delivery. Although termination of a dealership, franchise or other type of distribution system might, in particular situations, give rise to actions sounding in contract law, the termination standing by itself is not necessarily an antitrust violation.

The Bushie court, Supra, not only faced a so-called natural monopoly situation but also dealt with a set of facts involving termination of plaintiff's retail dealership. Holding that such termination was proper absent evidence of conspiracy to eliminate competition in the relevant product market, the court reasoned as follows:

> ***HN9***[] It is well settled that a manufacturer may discontinue dealing with a particular distributor "for business reasons which are sufficient to the manufacturer, and adverse effect on the business of **[**37]** the distributor is immaterial in the absence of any arrangement restraining trade." *Ricchetti v. Meister Brau, Inc., 431 F.2d 1211, 1214 (9th Cir. 1970)*, cert. denied, *401 U.S. 939, 91 S. Ct. 934, 28 L. Ed. 2d 219*; *Jos. E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F.2d 71 (9th Cir. 1969)*, cert. denied, *396 U.S. 1062, 90 S. Ct. 752, 24 L. Ed. 2d 755*, reh. denied, *397 U.S. 1003, 90 S. Ct. 1113, 25 L. Ed. 2d 415*; *Scanlan v. Anheuser-Busch, Inc., 388 F.2d 918 (9th Cir. 1968)*, cert. denied, *391 U.S. 916, 88 S. Ct. 1810, 20 L. Ed. 2d 654*.
>
> True, the effect of the agreement was to eliminate Bushie as a Stenocord dealer. **[*1068]** But this alone would not support a conclusion that Stenocord's motive was anticompetitive. A manufacturer is free to agree with a third party to give him an exclusive distributorship "even if this means cutting off another distributor," *Jos. E. Seagram & Sons, Inc. v. Hawaiian Oke Liquors, Ltd., supra, 416 F.2d at 76*, so long as in doing so there would be no resulting restraint of trade. *Ricchetti v. Meister Brau, Inc., supra.* To hold otherwise would be to "saddle (defendant) with (plaintiff's) services forever." *Cartrade, Inc. v. Ford **[**38]** Dealers Advertising Ass'n, 446 F.2d 289, 294 (9th Cir. 1971)*. Bushie's proof shows, and Stenocord admits, an agreement; but it does not show that the agreement was for any purpose prohibited by Section One.

460 F.2d at 119-20. See also *Lorain Journal v. United States, 342 U.S. 143, 155, 72 S. Ct. 181, 96 L. Ed. 162 (1951)*; *Associated Press v. United States, 326 U.S. 1, 15, 65 S. Ct. 1416, 89 L. Ed. 2013 (1945)*; *United States v. Bausch & Lomb Co., 321 U.S. 707, 721-23, 64 S. Ct. 805, 88 L. Ed. 1024 (1944)*; *United States v. Colgate & Co., 250 U.S. 300, 307, 39 S. Ct. 465, 63 L. Ed. 992 (1919)*. The Fourth Circuit reached a similar conclusion in a franchise cancellation case where it held that:

> ***HN10***[] Generally speaking, the right of customer selection is sanctioned by both statute and case law. Absent conspiracy or monopolization, a seller engaged in a private business may normally refuse to deal with a buyer for any reason or with no reason whatever. Thus, the courts have until now not held a seller liable in

> damages for refusing to deal with one who is unwilling to enter into an unlawful vertical price agreement or an exclusive dealing arrangement. Clothed with this privilege, **[**39]** the seller not only may, but ordinary fairness would require that he should announce in advance the circumstances under which he will do business with others.

McElhenney Co. v. Western Auto Supply Company, 269 F.2d 332, 337 (4th Cir. 1959) (Sobeloff, C. J.). See also *Marquis v. Chrysler Corp., 577 F.2d 624, 640 (9th Cir. 1978)* (Citing *Bushie, supra*); *Call Carl, Inc. v. BP Oil Corporation, 403 F. Supp. 568, 574-76 (D.Md.1975)* (Young, J.), Aff'd in part, rev'd in part, *554 F.2d 623* (4th Cir.), Cert. denied, *434 U.S. 923, 98 S. Ct. 400, 54 L. Ed. 2d 280 (1977)*.

In *Diehl & Sons, Inc. v. International Harvester Co., 426 F. Supp. 110 (E.D.N.Y.1976)*, a truck distributor and its subsidiary lessor brought an antitrust action against International Harvester Co. ("Harvester") claiming that the latter was conspiring to eliminate them as retailers of Harvester products. Holding that there was no conspiracy in restraint of trade and that the relevant market could not consist solely of the brand of vehicle produced only by Harvester, the court noted that "Harvester could unilaterally have driven Diehl out of the market for Harvester products, as it ultimately did on April 21, 1975." *426 **[**40]** F. Supp. at 117*. Insofar as any restraint of trade was concerned, the court reasoned as follows:

> Thus, even assuming that some conspiracy did exist between Harvester and someone else to eliminate Diehl and TRAC as retailers of Harvester products, such conduct is without antitrust significance. No antitrust objective would be served by holding that a manufacturer cannot terminate its independent distributors and replace them with its own distribution system, absent a showing that the termination was designed to further some collateral prohibited activity, such as, enforcing a tying arrangement, eliminating price-cutters, or creating or strengthening a monopoly position, see *Bushie v. Stenocord Corp., 460 F.2d 116, 119 (9th Cir. 1972)*; *Ace Beer Distributors, Inc. v. Kohn, Inc., 318 F.2d 283, 287* (6th Cir.), cert. denied, *375 U.S. 922, 84 S. Ct. 267, 11 L. Ed. 2d 166 (1963)*, none of which are even arguably present here.

426 F. Supp. at 119 (footnote omitted). See also *Marquis, supra, 577 F.2d at 640*; *Knutsen v. Daily Review, 548 F.2d 795, 803 (9th Cir. 1976)*; *Chisholm Bros. Farm Equipment Co. v. International Harvester Co., 498 F.2d 1137, 1143* (9th Cir.), Cert. denied, **[**41]** **[*1069]** *419 U.S. 1023, 95 S. Ct. 500, 42 L. Ed. 2d 298 (1974)*; *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F.2d 71, 76 (9th Cir. 1969)*; Cert. denied, *396 U.S. 1062, 90 S. Ct. 752, 24 L. Ed. 2d 755* Reh. denied, *397 U.S. 1003, 90 S. Ct. 1113, 25 L. Ed. 2d 415 (1970)*.

Ace Beer Distributors, supra, involved a situation in which a brewer allegedly conspired to destroy one distributor's business by terminating its franchise and conducting its business through another distributor. As the court concluded,

> That, without the results proscribed by the Sherman Act, is not a violation of the Act. ***HN11***[] A manufacturer has a right to select its customers and to refuse to sell its goods to anyone, for reasons sufficient to itself. *United States v. Colgate & Co., 250 U.S. 300, 39 S. Ct. 465, 63 L. Ed. 992*. A refusal to deal becomes illegal under the Act only when it produces an unreasonable restraint of trade, such as price fixing, elimination of competition or the creation of a monopoly. *United States v. Parke, Davis & Co., 362 U.S. 29, 32, 80 S. Ct. 503, 4 L. Ed. 2d 505*; *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, 340 U.S. 211, 71 S. Ct. 259, 95 L. Ed. 219*; *Lorain **[**42]** Journal Co. v. United States, 342 U.S. 143, 72 S. Ct. 181, 96 L. Ed. 162*. The fact that a refusal to deal with a particular buyer without more, may have an adverse effect upon the buyer's business does not make the refusal to deal a violation of the Sherman Act. Damage alone does not constitute liability under the Act.
>
> Unless it can be said that the refusal to deal with plaintiff had the result of suppressing competition and thus constituted "restraint of trade" within the meaning of *Section 1* of the Sherman Act, there is no violation of the Act.

318 F.2d at 286-87. Both Diehl and Ace Beer would seem to be dispositive authority for the outcome of the present case: while the impact of Abell's activities may have been detrimental to plaintiff, there has been no showing whatsoever that it was "designed to further some collateral prohibited activity." Diehl, supra, 426 F. Supp. at 119.

V. PLAINTIFF'S EXPERT WITNESSES

There is every good reason to believe that if plaintiff had sold Sunpapers at a price which maintained His prior profit spread and exceeded Abell's suggested retail price, he would have incurred circulation losses which would likewise, in turn, have hurt **[**43]** the Sunpapers. He obviously could not charge more than Abell's direct delivery service charged or he would have lost sales to Abell directly. Hence, the Sunpapers' suggested retail prices put an upper limit on plaintiff's ability to compensate for this declining profit margin due to the increase in wholesale prices to him. As his wholesale prices increased, his profit margin therefore decreased.

At trial, plaintiff called two expert witnesses to testify to the economic impact of Abell's activities upon his independent carrier business. One of the experts, Dr. Paul Gallagher explained that the problem which plaintiff faced was two-fold: (1) after May, 1968 his profit margin began to decline because (2) Abell would not raise its retail price so as to maintain the profit spread which existed before it raised its wholesale price to Neugebauer. Abell's refusal to raise its retail price similarly meant that plaintiff could not raise his retail price, and he found himself caught in a squeeze between a fixed upper retail price and a gradually escalating wholesale price. While Dr. Gallagher's explanation of the squeeze on Neugebauer made sense in terms of its overall effect, his testimony **[**44]** as to damages recoverable by plaintiff made very little sense at all. In moving to strike Dr. Gallagher's testimony, defendant explained that there was a "logical fallacy" in the expert's conclusion that plaintiff should recover damages including lost profits because plaintiff was prevented from raising his retail price to maintain his profit spread.

As defendant Abell correctly pointed out, Dr. Gallagher stated at trial that plaintiff would have no case at all against Abell if it **[*1070]** had continued to charge a retail price in its own direct delivery service which maintained its pre-May, 1968 profit spread. Presumably, doing this would enable plaintiff to continue to raise his prices whenever Abell increased its retail prices. Yet, defendant points out that the evidence shows that if Abell Had maintained this spread, its retail prices would have actually been Lower than the price Neugebauer actually charged. Transcript at 347-52. Consequently, plaintiff would have been forced to Lower not raise his prices to meet any effective competition from Abell. Defendant therefore concludes that plaintiff is not entitled to lost profits for his inability to Raise his price when **[**45]** Abell's hypothetically maintaining the pre-May, 1968 profit spread would have forced him to Lower his price. [11.] Transcript at 173-79, 201.

[46]** VI. THE REMAINING COUNTS

A. Territorial restriction

Plaintiff claims that his contract with Abell violates section 1 of the Sherman Act because of certain language therein which allegedly limits plaintiff's delivery activities to an "area of primary responsibility." Consequently,

---

[11.] Although not explained clearly at trial, presumably Abell itself faced an upper limit on its own retail price, and this upper limit was set by competition from other newspapers selling or publishing in the PMA. Depending on the demand elasticity at the newspaper retail level, raising retail prices beyond a certain point might, given the slope of the demand curve, actually decrease overall revenues since the income lost from circulation decrease might well exceed that generated by the higher retail price. Looked at from a different perspective, "a manufacturer is likely to view the difference between the price at which it sells to its retailers and their price to the consumer as its "cost of distribution,' which it would prefer to minimize." Continental T. V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 56 n.24, 97 S. Ct. 2549, 2561, 53 L. Ed. 2d 568, citing Posner, Antitrust Policy and the Supreme Court: An Analysis of the Restricted Distribution, Horizontal Merger and Potential Competition Decisions, 75 Colum.L.Rev. 282, 283 (1975). See also Recent Cases, 88 Harv.L.Rev. 636, 641 (1975) ("generally a manufacturer would prefer the lowest retail price possible, once its price to dealers has been set, because a lower retail price means increased sales and higher manufacturer revenues").

plaintiff alleges that he is effectively prevented from delivering newspapers outside the geographic area described in the contract. Nothing at trial indicated that plaintiff had either tried to deliver or had been prevented from delivering Sunpapers outside the area specified in the contract. Since ***HN12***[] a "primary responsibility" provision has been held not to be invalid unless it violates the rule of reason, *Continental T. V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 58-59, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*, plaintiff bore the burden of demonstrating the impropriety of such a restriction. Defendant, on the other hand, has argued that such a clause is reasonably related to its distribution goals such as customer referrals and servicing complaints. No anticompetitive effects have been demonstrated by plaintiff.

B. Exclusive dealing

Plaintiff's exclusive dealing arguments also submit allegations which **[**47]** are more hypothetical than real. Paragraphs 5(b) and 5(d) of plaintiff's contract with Abell require him to "devote substantially his full working time" to delivering Sunpapers in order to protect the newspaper's "good-will". The contract furthermore forbade him from "making simultaneous delivery of, or inserting in, attaching or placing with the newspapers any printed matter or material not supplied by Publisher. . . ." The latter restriction makes sense in terms of the defendant's wishes to retain its good-will and prohibits, therefore, Simultaneous delivery. Plaintiff is free, therefore, to make additional deliveries in any fashion other than simultaneously with his delivery of Sunpapers. Finally, testimony at trial showed that plaintiff and his family spend virtually all of their working time on the Sunpapers delivery route. Transcript at 12-18. Plaintiff has not alleged that he has endeavored to distribute other newspapers than the Sunpapers, that other newspapers are available for an independent adult carrier service, or that he **[*1071]** would have the time to make such distributions. Accordingly, these claims must fail.

C. Maryland ***antitrust law***

The Maryland Antitrust **[**48]** Act, Md.Com.L.Code Ann. §§ 11-201 through 11-213 is intended "to complement the body of federal law governing restraints of trade, unfair competition, and unfair, deceptive, and fraudulent acts or practices in order to protect the public and foster fair and honest intrastate competition." Portions of the Maryland statute were "carefully and purposefully patterned after their counterparts in the federal law," General Revisor's Note to the Maryland Antitrust Act, and the specific section relied on by plaintiff, § 11-204(a) and (b), adds nothing new to his allegations brought under federal ***antitrust law***. Since plaintiff's federal cause of action must fail, his state claims which merely duplicate the federal ones must meet a similar fate.

VII. THE PROPRIETY OF A DIRECTED VERDICT

The Supreme Court has admonished that "***HN13***[] summary procedures should be used sparingly in complex antitrust litigation where motive and intent may play leading roles . . . ." *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*. The standard for granting a judgment notwithstanding a verdict under *F.R.Civ.P. 50* is the same as that for granting a motion for a directed **[**49]** verdict. *Hawkins v. Sims, 137 F.2d 66, 67 (4th Cir. 1943)*. Accordingly, directed verdicts must be reviewed carefully in light of the standard which asks whether, viewing the evidence in the light most favorable to the non-moving party and without weighing the credibility of the witnesses, a reasonable jury could have reached but only one conclusion as to the verdict. *Brady v. Southern Ry., 320 U.S. 476, 479, 64 S. Ct. 232, 88 L. Ed. 239 (1943)*; *Marquis v. Chrysler Corp., 577 F.2d 624 (9th Cir. 1978)*; *Ralston Purina Co. v. Edmunds, 241 F.2d 164, 167* (4th Cir.), Cert. denied, *353 U.S. 974, 77 S. Ct. 1059, 1 L. Ed. 2d 1136 (1957)*; *Call Carl, Inc., supra, 403 F. Supp. at 576*. See also *Continental Ore Co. v. Union Carbide & Carbon Co., 370 U.S. 690, 696, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*.

Plaintiff has brought this case under *sections 1* and *2* of the Sherman Act. To show an unreasonable market restraint under *section 1*, plaintiff must first isolate the relevant market which the alleged restraint affects. As already explained, plaintiff has failed to show that the relevant market is the newspaper wholesale market. Effective competition in terms of the commercial realities of the **[**50]** product involved in this case lies not in the area of natural monopoly but rather in the retail market.

Insofar as *section 2* is concerned, plaintiff claims that defendants monopolized or attempted to monopolize the relevant product market, that they did so with specific intent to monopolize, and that there was a dangerous probability of their succeeding. The definition of relevant market is, therefore, of immense relevance in examining an attempt to monopolize. *Walker, Inc. v. Food Machinery, 382 U.S. 172, 177, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*; *Joe Westbrook, Inc. v. Chrysler Corp., 419 F. Supp. 824, 844 (N.D.Ga.1976)*; *Southern Concrete Co. v. United States Steel Corp., 394 F. Supp. 362, 379 (N.D.Ga.1975)*, *Aff'd, 535 F.2d 313 (5th Cir. 1976)*, Cert. denied, *429 U.S. 1096, 97 S. Ct. 1113, 51 L. Ed. 2d 543 (1977)*. Having failed in his claim as to the appropriate relevant market, plaintiff's *section 2* claim must meet a similar fate. Since the relevant market is the newspaper retail market and plaintiff has failed to show defendant's specific intent to drive out competitors, engage in unlawful predatory conduct, or have a dangerous probability of success, a directed verdict in **[**51]** defendants' favor is mandated. Additionally, there is no evidence in the record from which any of the relevant anticompetitive activities may be inferred. *Marquis, supra, 577 F.2d at 641*; *Knutson, supra, 383 F. Supp. at 1360*. While defendants may have harmed plaintiff by terminating his distributorship, this alone is insufficient to constitute a claim under the antitrust laws.

[*1072] Accordingly, it is this 25th day of June, 1979, by the United States District Court for the District of Maryland, ORDERED: That the defendants' motion for a verdict under *Rule 50(b) of the Federal Rules of Civil Procedure* dismissing the remaining counts of plaintiff's Amended Complaint be, and the same is, hereby GRANTED.

HN3[] Discovery, Methods of Discovery

Wis. Stat. § 802.08, entitled Summary Judgment, reads in part: (2) Motion . The motion shall be served at least 20 days before the time fixed for the hearing. The adverse party prior to the day of hearing may serve opposing affidavits. The judgment sought shall be rendered if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. A summary judgment, interlocutory in character, may be rendered on the issue of liability alone although there is a genuine issue as to the amount of damages.

HN4[] Opposing Materials, Accompanying Documentation

The court first examines the moving papers and documents to determine whether the moving party had made a prima facie case for summary judgment under Wis. Stat. § 802.08(2).To make a prima facie case for summary judgment, a moving defendant must show a defense which would defeat the plaintiff. If the defendant does not make out a prima facie case for summary judgment we need go no further. If the affidavit in support of the motion makes out a prima facie case for summary judgment we must then examine the affidavits in opposition to the motion. To defeat the motion the statute requires the opposing party to set forth facts showing that there is a genuine issue for trial.

Civil Procedure > ... > Summary Judgment > Supporting Materials > General Overview

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

HN5[] **Summary Judgment, Supporting Materials**

The supporting affidavits and documents, if any, of the moving party are carefully scrutinized. The inferences to be drawn from the underlying facts contained in the moving party's material must be viewed in the light most favorable to the party opposing the motion. If the movant's papers before the court fail to establish clearly that there is no genuine issue as to any material fact, the motion must be denied. If the material presented on the motion is subject to conflicting interpretations or reasonable men might differ as to its significance, it is improper to grant summary judgment.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN6[] **Summary Judgment, Entitlement as Matter of Law**

Under the mandatory language of *Wis. Stat. § 802.08(2)*, an appellate court reviews the ruling of the trial court anew to determine if it erred and does not accord the trial court the wide discretion it had under the predecessor to *Wis. Stat. § 802.08*.

Affidavits in a case alleging breach of contract, restraint of trade, and slander necessarily go to the intent of the parties, a question that ordinarily should not be determined on a motion for summary judgment.

Judges: Before Gartzke, P.J., Bablitch, J. and Dykman, J.

Opinion by: DYKMAN

Opinion

DYKMAN, J. The complaint in this action alleges three claims: breach of contract, conspiracy in restraint of trade, [1] and slander. This appeal concerns only the conspiracy in restraint of trade claim. The trial court granted the respondents' motions for summary judgment, and appeal is taken from the resulting orders.

The complaint alleges that the individual appellants are insurance agents and owners of appellant Grams Insurance Services, Inc., a Madison-based corporation engaged as a general agent in marketing **[*2]** hospital, health, and life insurance through its agents.

The individual respondents are agents and owners of respondent Ketterhagen, Beggs and Boss, Inc., a Madison-based corporation engaged as a general agent in marketing hospital, health, and life insurance through its agents.

The respondent Associated Hospital Services, Inc. (AHS) is a hospital service corporation organized under sec. 182.032, Stats. (1973), for the purpose of selling Blue Cross and Blue Shield hospital and medical insurance through general insurance agents and individual agents.

The individual appellants were at one time employed by respondent Ketterhagen, Beggs and Boss, Inc. In the spring of 1975, they opened their own business, Grams Insurance Services, Inc. AHS licensed Grams Services, Inc. to sell Blue Cross/Blue Shield, American Banker's Life, and HIC insurance. The complaint sets forth facts and

---

[1] **HN1[]** *Section 133.01(1)*, Stats. provides in part:

Every contract or combination in the nature of a trust or conspiracy in restraint of trade or commerce is hereby declared illegal.

Section 133.01 is an reenactment of the Sherman Antitrust Act with application to intrastate as distinguished from interstate transactions. *Reese v. Associated Hospital Service, 45 Wis.2d 526, 532, 173 N.W.2d 661 (1970)*.

ultimately alleges that the respondents "agreed, combined and conspired" to cause the termination of the appellants' licenses to sell Blue Cross, American Banker's Life, or HIC insurance, and that the agreement among the respondents did result in the cancellation of appellants' licenses. The complaint **[*3]** alleges a conspiracy in restraint of trade in violation of *sec. 133.01*, Stats., and demands damages.

STANDARD OF REVIEW

The trial court granted AHS's motion for summary judgment because it was "persuaded that even if the allegations can be proved, recourse by the plaintiffs is pursuant to Ch. 207, *Stats.* and not Wisconsin's mini-Sherman Act *[sec. 133.01*, Stats.]." [2] The trial court stated that the appellants were alleging unfair competition or unfair practice and that this type of action was not contemplated under *sec. 133.01*, Stats.

The trial court granted the summary judgment motions of the other respondents because they were agents of AHS and subject to the same control of the Insurance Commissioner under **[*4]** ch. 207, Stats. (1973), and because the appellants' claim was in the nature of a ch. 207 unfair method of competition claim, not a *sec. 133.01*, Stats. (1973), restraint of trade claim.

HN2[] *Section 802.08(2)*, Stats., provides that summary judgment shall be rendered when no material facts are in dispute and only a question of law is presented. [3] The Wisconsin Supreme Court recently set forth the proper procedure in determining motions for summary judgments in *Kraemer Bros. v. United States Fire Insurance Co.,* Wis.2d , , N.W.2d (1979):

[*5] ***HN4***[] The court first examines the moving papers and documents to determine whether the moving party had made a *prima facie* case for summary judgment under *sec. 802.08(2)*.To make a *prima facie* case for summary judgment, a moving defendant must show a defense which would defeat the plaintiff. If the defendant does not make out a *prima facie* case for summary judgment we need go no further. If the affidavit in support of the motion makes out a *prima facie* case for summary judgment we must then examine the affidavits in opposition to the motion. To defeat the motion the statute requires the opposing party to set forth facts showing that there is a genuine issue for trial. *Leszczynski v. Surges, supra,* 30 Wis.2d at 538-540, 141 N.W.2d 261 (1966); *Marshall v. Miles, 54 Wis.2d 155, 194 N.W.2d 630 (1972)*.

HN5[] The supporting affidavits and documents, if any, of the moving party are carefully scrutinized. The inferences to be drawn from the underlying facts contained in the moving party's material must be viewed in the light most favorable to the party opposing the motion. *Adickes v. Kress & Co., 398 U.S. 144, 157-158* ***[*6]*** *(1970)*. If the movant's papers before the court fail to establish clearly that there is no genuine issue as to any material fact, the motion must be denied. 6 Moore on Federal Practice, 56.15[3], p. 56-463 *et seq* (2d ed. 1976). If the material presented on the motion is subject to conflicting interpretations or reasonable men might differ as to its significance, it is improper to grant summary judgment. 10 Wright & Miller, *Federal Practice & Procedure: Civil* sec. 2725, p. 515 (1973); *United States v. Diebold, Inc., 369 U.S. 654, 655 (1962)*; *Mogle v. Sevier County School Dist., 540 F.2d 478, 482 (10th Cir. 1976)*. (Footnote omitted.)

---

[2] Chapter 207, Stats. (1973), provides for the regulation of "unfair insurance business methods." The chapter lists certain unfair methods of competition (sec. 207.04) and authorizes the insurance commissioner to hold hearings, and, if necessary, apply for cease and desist order in circuit court (sec. 207.09). Chapter 207 was replaced and recreated by ch. 371, sec. 25, Laws of 1975, effective June 17, 1976. The newer statute is not applicable to this case.

[3] *Section 802.08*, Stats., reads in part:

HN3[] 802.08 *Summary Judgment* .... (2) *Motion* . The motion shall be served at least 20 days before the time fixed for the hearing. The adverse party prior to the day of hearing may serve opposing affidavits. The judgment sought shall be rendered if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. A summary judgment, interlocutory in character, may be rendered on the issue of liability alone although there is a genuine issue as to the amount of damages.

HN6[] Under the mandatory language of *sec. 802.08(2)*, Stats., this court reviews the ruling of the trial court anew to determine if it erred and does not accord the trial court the wide discretion it had under the predecessor to *sec. 802.08*. *Wright v. Hasley, 86 Wis.2d 572, 578, 273 N.W.2d 319 (1979)*.

In this case, it does not appear that the trial court followed the procedure set forth above. We proceed, nonetheless, to determine whether the trial court erred in granting **[*7]** respondents' motions for summary judgments.

The trial court impliedly ruled that the complaint did not state a claim under *sec. 133.01*, Stats., and that it was therefore unnecessary for the court to consider whether material facts were in dispute.

ASSOCIATED HOSPITAL SERVICES, INC.

Section 182.032, Stats. (1973), [4] under which AHS was organized, provides for the creation of hospital service corporations to ease the economic burden of the high costs of health care. Section 182.032(3)(d) and (5) reads:

(3) The articles of incorporation of any corporation organized under this section shall provide:

(d) *Such hospital service corporations,* heretofore or hereafter so formed and conducted, *shall be governed by the provisions* of this section and s. **[*8]** *200.26 and by no other law relating to insurance* unless such law is referred to in s.200.26 and no law hereinafter enacted shall apply to such plans unless they are expressly designated therein or refer to such corporations as are responsible for the operation of such plans.

(5) Such corporation shall be governed by ch. 181, and unless express reference is made in this section, or unless expressly designated therein, no law other than ch. 71 and ch. 73, shall apply to such corporation. Every such corporation, except for purposes of the franchise tax measured by net income, is hereby declared to be a charitable and benevolent corporation, and its property, real, personal and mixed, and the transfer of property to it by gift or inheritance, shall be exempt from taxation as provided in ss. 70.11, 72.15, and subch. IV of ch. 72, and its employees shall be excluded from the provisions of ch. 108 as provided in s.108.02. (Emphasis supplied.)

In *Reese v. Associated Hospital Service, 45 Wis.2d 526, 173 N.W.2d 661 (1970)*, the supreme court held that ***HN7***[] while a hospital service corporation may be subject to the ***antitrust law*** of *sec. 133.01*, Stats., the corporation **[*9]** is not subject to that law when acting "within sec. 182.032, legislatively authorized acts and activities." In the latter event, AHS is held to automatically meet the "rule of reason" embodied in *sec. 133.01* through judicial interpretation. *Reese, 45 Wis.2d 526, 532*.

It is apparent that if the actions alleged in appellant's complaint fall within the purview of "authorzed acts" under sec. 182.032, Stats. (1973), then a *sec. 133.01*, Stats., action against AHS cannot stand, and the only recourse of appellants is through a ch. 207, Stats. (1973), proceeding.

Appellants maintain that the activities alleged fall outside of the legislative authorization. The complaint in this matter alleges that AHS and the other respondents agreed, combined and conspired to cause the termination of appellants' licenses to sell Blue Cross, American Bankers Life or HIC insurance, that AHS entered into that conspiracy because of pressure from the other respondents, and that AHS did because of the pressure cancel plaintiffs' licenses and thereby restrained or prevented plaintiff insurance company from acting as a general agency for the sale of insurance. The complaint ultimately alleges a restraint **[*10]** of trade.

The licensing of agents is clearly within the authority of AHS. ***HN8***[] Section 182.032(3)(d), Stats. (1973), provides that hospital service corporations are to be subject to sec. 200.26, Stats. (1973), which in turn provides

---

[4] In 1975, the legislature completely revised Wisconsin insurance law. Section 182.032, Stats., was repealed by ch. 223, sec. 4, Laws of 1975 effective May 5, 1976. Throughout this opinion, the citations to sec. 182.032, Stats. (1973), refers to the statute as it existed prior to May 5, 1976. out this opinion, the citation to sec. 182.032, Stats. (1973), refers to the statute as it existed prior to May 5, 1976.

that the corporations are to be subject to sec. 209.04(1), Stats. (1973). Section 209.04(11), is the statute regulating insurance agents in this state. The statutes, taken together with the purpose enunciated in sec. 182.032, show that AHS is authorzed to use independent agents in making contracts available to the public. Because the licensing or the refusal to license agents is within the authority of its enabling act, AHS is ordinarily not subject to suit under *sec. 133.01*, Stats., for activities related to licensing.

While licensing or the refusal to license is ordinarily protected under sec. 182.032, Stats. (1973), the complaint here does not merely challenge the termination of appellants' licenses. The complaint alleges that AHS conspired and combined to drive appellants out of the insurance business, in restraint of trade. In enacting sec. 182.032, Stats. (1973), the legislature did not authorize AHS to act in restraint of trade. The court **[*11]** in *Reese v. Associated Hospital Service, 45 Wis.2d 526*, recognized that when it held that only when AHS acts within legislatively authorized areas is it free from an antitrust claim. *Reese* rejects the view that sec. 182.032 "supersedes" any contrary policy of *sec. 133.01*, Stats., stating the argument uses "a meat cleaver to carve out a broad area of near-complete exemption from antitrust provisions where a scalpel can more effectively be used to permit a hospital service corporation to do exactly what the legislature has authorized, in fact required, it to do." *45 Wis.2d 526, 531-32*.

HN9[] *Section 133.01*, Stats., declares that "*Every* contract or combination in… restraint of trade or commerce is hereby declared illegal." (emphasis added). Because we believe that sec. 182.032, Stats. (1973), cannot be said to authorize AHS to intentionally drive general agents out of the insurance business, and because the complaint so alleges, we believe the complaint states a claim under *sec. 133.01*, Stats.

On the motion for summary judgment, both sides presented affidavits. ***HN10***[] Affidavits in this kind of case necessarily go to the intent of the parties, a question that **[*12]** ordinarily should not be determined on a motion for summary judgment. *Lecus v. American Mut. Ins. Co. of Boston, 81 Wis.2d 183, 190, 260 N.W.2d 241 (1977)*. Because we conclude that appellants have stated a claim against AHS, and because the facts and inferences are disputed, we reverse the trial court's grant of AHS's motion for summary judgment.

OTHER RESPONDENTS

The trial court granted the remaining respondents' motions for summary judgment because they were agents of AHS, subject to the control of sec. 207, Stats. (1973), and because the appellants' claim was in the nature of a ch. 207 unfair method of competition claim, not a claim is restraint of trade. The trial court in effect granted respondents' motions because it had granted AHS's motion.

We reverse the trial court's grant of respondents' motions for summary judgment. The complaint alleges that the respondents conspired together in restraint of trade. Disposition of that claim rests in large part on the intent of the respondents, the determination of which is inappropriate on summary judgment.

We would reach this conclusion even if the trial court were correct in granting AHS's **[*13]** motion for summary judgment. In cases where sec. 182.032, Stats. (1973), does create certain "immunity" from *sec. 133.01*, Stats., for hospital service corporations, the question becomes whether that limited immunity extends to the agents of these corporations.

By enacting sec. 182.032, Stats. (1973), the legislature intended to put hospital service corporations in a position of competitive advantage as compared to commercial corporations providing hospitalization insurance. This "special category," referred to in *Reese v. American Hospital Service,* applies to the corporation, not to its agents.

There is no policy justification, much less a specific statutory provision, exempting general insurance agents from anti-trust law merely because they sell insurance policies written by AHS. The immunity accorded AHS in order to promote efficient, lower-cost insurance coverage does not logically extend to these general agents. [5]

The trial court concluded that because **[*14]** the respondents could be regulated under ch. 207, Stats. (1973), the appellants could not bring the private action under *sec. 133.01*, Stats. We do not view ch. 207 as providing an exclusive remedy, especially in light of the language of *sec. 133.01*: "*Every* contract or combination in the nature of a… restraint of trade or commerce is hereby declared illegal." (Emphasis added.) Chapter 207 does not limit the application of *sec. 133.01*.

Because we hold that appellants have stated a claim and that the inferences from the facts presented are disputed, we reverse the trial court's grant of summary judgment.The trial court on remand should enter orders denying the motions of the respondents.

By the Court.--Orders granting summary judgments reversed.

---

[5] This is in accord with *Restatement (Second) of Agency sec. 347(1)* at 110 (1958): "An agent does not have the immunities of his principal although acting at the direction of the principal."

HN1[] **Reviewability, Factual Determinations**

Upon review, the Federal Trade Commission's (Commission) findings of fact, if supported by substantial evidence, shall be conclusive, *15 U.S.C.S. § 21(c)*, and the reviewing court may not substitute its inferences for those drawn by the Commission simply because the court might have evaluated the facts differently as an original matter.

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

HN2[] **Antitrust & Trade Law, Sherman Act**

The Clayton Act, *15 U.S.C.S. § 18* is intended to arrest a trade restraint or a substantial lessening of competition in its incipiency; it is not concerned with certainties. Requiring a plaintiff to prove that substantial lessening of competition is inevitable would thwart the express intent of Congress to nip anticompetitive practices in the bud before they blossom into a Sherman Act restraint of trade and would run counter to Congress' view that neither the Federal Trade Commission nor the courts should be charged with possession of powers of prevision that no one else has achieved. Yet there must be the reasonable probability of a substantial impairment of competition to render a merger illegal under *15 U.S.C.S. § 18*. A mere possibility will not suffice.

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Antitrust > Vertical Acquisitions

HN3[] **Vertical Restraints, Price Fixing**

A vertical merger, unlike a horizontal one, does not eliminate a competing buyer or seller from the market. It does not, therefore, automatically have an anticompetitive effect, or reduce competition. Accordingly, a vertical merger, as distinguished from price-fixing boycotts, or similar arrangements between competitors, does not amount to a per se substantial lessening of competition. Indeed, it may even operate to increase competition.

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Antitrust > Vertical Acquisitions

HN4[] **Antitrust Statutes, Clayton Act**

The fountainhead of Clayton Act, *15 U.S.C.S. § 18* analysis of vertical mergers, the competitive significance of a vertical merger results primarily from the degree, if any, to which it may increase barriers to entry into the market or reduce competition by (1) foreclosing competitors of the purchasing firm in the merger from access to a potential source of supply, or from access on competitive terms, (2) by foreclosing competitors of the selling firm from access to the market or a substantial portion of it, or (3) by forcing actual or potential competitors to enter or continue in the market only on a vertically integrated basis because of advantages unrelated to economies attributable solely to integration. The ultimate objective, however, is to determine whether and how the particular merger in issue may lessen competition, i. e., what its anticompetitive effect on the market, if any, is likely to be.

HN5[] **Antitrust & Trade Law, Clayton Act**

When a merger is challenged under the Clayton Act, *15 U.S.C.S. § 18*, it becomes necessary to undertake an examination of various economic and historical factors in order to determine whether the arrangement under review is the type Congress sought to proscribe.

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Antitrust > Vertical Acquisitions

HN6[] **Antitrust, Antitrust Statutes**

Most important among factors to be considered in predicting probable future conduct of parties and thus probable effects of merger are nature and economic purpose of the arrangement, likelihood and size of any market foreclosure, extent of concentration of sellers and buyers in industry, capital cost required to enter market, market share needed by buyer or seller to achieve profitable level of production (sometimes referred to as scale economy), existence of trend toward vertical concentration or oligopoly in industry, and whether merger will eliminate potential competition by one of merging parties. To these factors may be added degree of market power that would be possessed by merged enterprise and number and strength of competing suppliers and purchasers, which might indicate whether merger would increase risk that prices or terms would cease to be competitive. This list, with some variations, is the standard framework for analysis of legality of vertical merger.

Antitrust & Trade Law > Public Enforcement > US Federal Trade Commission Actions > General Overview

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

HN7[] **Public Enforcement, US Federal Trade Commission Actions**

The Federal Trade Commission bears the burden of showing the likelihood that the future effect of a merger may be substantially to lessen competition.

Administrative Law > Judicial Review > Standards of Review > General Overview

Administrative Law > Agency Adjudication > Review of Initial Decisions

HN8[] **Judicial Review, Standards of Review**

The decision whether to reopen an administrative proceeding is within the complete discretion of the agency and will not be reversed except perhaps when an agency adheres to a decision in the face of an epochal change in conditions.

Counsel: John R. Ferguson, Washington, D. C. (William H. Wentz, Phillip A. Proger, Janine H. Coward, Timothy F. Bannon, Pettit & Martin, Washington, D. C., Walter, Conston, Schurtman & Gumpel, P. C., New York City, of counsel), for petitioner.

D. Barry Morris, Atty., F. T. C., Washington, D. C. (Michael N. Sohn, Gen. Counsel, Gerald P. Norton, Deputy Gen. Counsel, W. Dennis Cross, Asst. Gen. Counsel, F. T. C., Washington, D. C., of counsel), for respondent.

Judges: Before MANSFIELD and OAKES, Circuit Judges, and BARTELS, District Judge.[*]

Opinion by: MANSFIELD

Opinion

[*347] Pursuant to *15 U.S.C. § 21* Fruehauf Corporation ("Fruehauf"), the nation's largest manufacturer of truck trailers, petitions to review and set aside a decision and **[**2]** order of the Federal Trade Commission ("FTC") finding that Fruehauf's 1973 acquisition of Kelsey-Hayes Company ("Kelsey"), a manufacturer of components for the motor vehicle and related industries, violated § 7 of the Clayton Act, *15 U.S.C. § 18*, [1] **[**3]** and directing that Fruehauf divest itself of Kelsey's Auto Truck Group, the preponderant division of Kelsey, and that for 10 years Fruehauf not acquire, without prior FTC approval, any company engaged in manufacture, distribution, or sale of heavy duty wheels ("HDW"), truck trailers or heavy duty antiskid braking devices ("ASBD"). [2] **[*348]** *91 F.T.C. 132 (1978)*. For reasons set out below, we decline to enforce the divestiture order.

Both Fruehauf and Kelsey are based in Michigan, the former in Detroit and the latter in Romulus. In 1972 Fruehauf had truck trailer sales and rentals of $ 550 million and assets of $ 556 million. For the comparable period, Kelsey had net sales of its entire product line of $ 455 million and assets of $ 243 million. It is undisputed that the relevant geographic market is the United States and that the product markets in which it was found by the FTC that

[*] Of the United States District Court for the Eastern District of New York, sitting by designation.

[1] "No corporation engaged in commerce shall acquire, directly or indirectly, the whole or any part of the stock or other share capital and no corporation subject to the jurisdiction of the Federal Trade Commission shall acquire the whole or any part of the assets of another corporation engaged also in commerce, where in any line of commerce in any section of the country, the effect of such acquisition may be substantially to lessen competition, or to tend to create a monopoly. . . ."

[2] Fruehauf also appeals the Commission's refusal to reopen consideration of its analysis of the impact of the merger on one of the relevant product markets in light of developments subsequent to the publication of its decision. *91 F.T.C. 1153 (1978)*. For reasons discussed within, see pp. 3489-3492, Infra, we need not decide whether this refusal to reopen was improper and, if so, whether we could order the Commission to reopen the proceedings.

competition may be substantially lessened as a result of the merger are those for (1) heavy duty wheels (HDW), (2) antiskid brake devices (ASBD), and (3) truck trailers. Kelsey manufactures heavy duty **[**4]** wheels and antiskid brake devices. Both of these products (HDWs and ASBDs) are sold to manufacturers of trucks and tractors (e. g., Ford, International Harvester, General Motors, Rockwell, Chrysler, Caterpillar), as well as to manufacturers of trailers (e. g., Fruehauf, Trailmobile). Fruehauf manufactures trailers for sale to truck fleets such as P.I.E. and United Parcel Service.

The Products

(1) HDW

A heavy duty wheel or HDW is the assembly connecting the tire to the axle of a vehicle. It consists of a center member, a rim, and a brake drum, which components can be bought as an assembled unit or separately from different manufacturers. There are two different wheel assemblies in use, which are not interchangeable. One is the cast spoke wheel, which consists of a "spider" or cast steel spoke center member with an integral hub, a brake drum, and a detachable rim or rims. The other is the disc wheel assembly, which consists of a steel center member or disc with rim permanently attached (by welding), a hub, and a brake drum. A spider with two rims performs essentially the same function as two disc wheels (with attached rims) and a hub.

(2) ASBD

The antiskid brake device or **[**5]** ASBD is a supplement to an air brake system which is designed to prevent wheel lock-up, and thereby possible skidding, during emergency braking. This sophisticated device consists of a sensor, a computer or logic module and a valve. The sensor (one at each end of the axle) determines the speed at which the wheel is actually rotating. The computer or logic module calculates the speed at which the wheel should be turning in order to achieve maximum braking efficiency. The logic can determine when a wheel lock-up is impending, and, on signal from the computer or logic, the valve regulates the air pressure to release the brakes momentarily and so prevents lock-up. These components are ordinarily, but not necessarily, produced by the same manufacturer.

The ASBD was developed as the result of a regulation issued by the National Highway Traffic Safety Administration of the Department of Transportation (NHTSA), which is known as Federal Motor Vehicle Standard No. 121 (Standard 121), *49 C.F.R. § 571.121*. Standard 121 sets forth performance standards for air-braked vehicles. It does not expressly require the use of ASBD, but experience proved that as applied to trucks Standard 121 could **[**6]** not be satisfied without the ASBD. See *Paccar, Inc. v. NHTSA, 573 F.2d 632, 639, n.26 (9th Cir. 1978)*, cert. denied, *439 U.S. 862, 99 S. Ct. 184, 58 L. Ed. 2d 172 (1979)*.

(3) Trailers

A truck trailer, of which thousands are seen on public highways, is a nonpowered vehicle, usually looking somewhat like a railroad box car on rubber-tired wheels, designed to be pulled by a power vehicle (truck tractor) and used for the purpose of transporting products over public highways. It consists essentially of a chassis or frame on wheels and a body attached to the frame. The principal purchasers of trailers are trucking fleets (such as United Parcel Service). Most fleets develop their own respective detailed specifications designating the components to be used in the manufacture **[*349]** of trailers to be used by them, which are then submitted to trailer manufacturers for bidding, rather than accept standardized designs or products made by any specific manufacturer.

The Markets

The ALJ and the Commission found that the Fruehauf-Kelsey merger might "substantially . . . lessen competition" in three product markets: the truck trailer market, the HDW market, and the ASBD market. In essence, **[**7]** they determined that the merger would impair competition in the trailer market by giving Fruehauf an advantage over other trailer manufacturers in obtaining a supply of HDWs, which have been subject to periodic shortages in the past. In the Commission's view the merger would also impair competition in the HDW and ASBD markets by foreclosing other competing manufacturers of these products from selling to Fruehauf and thus deterring expansion on the part of small existing competitors in these markets or the entry into these markets of new competitors. [3] See 91 F.T.C. at 228-29, 234-36. Fruehauf argues that the Commission's decision is factually erroneous, legally misguided, and economically groundless.

[8]** (1) Trailer Market

Before proceeding to Fruehauf's contentions, some pertinent information about the three relevant markets is essential. The total value of truck trailer shipments in the United States approximates $ 1 billion per year. In 1973 Fruehauf accounted for about 25% Of the sales, with the top four firms accounting for about 49% Of the truck trailer market and the top eight firms for 64%, respectively. Despite these figures there are scores of other firms engaged in trailer production. Moreover, these figures reflect a modest decline in the market shares of the leading firms in the period from 1968 to 1973, a period during which the dollar volume of sales steadily increased, due in part to inflation, and the quality of trailers improved. 91 F.T.C. at 153-54. HDWs are essential components in the construction of truck trailers, as are ASBDs if Standard 121 is to be in effect.

(2) ASBD Market

In 1975 and 1976 seven ASBD manufacturers competed in the ASBD market, which had total sales in 1975 of about $ 40 million. Kelsey, the leading firm in the ASBD market, accounted for 32.5% Of sales by unit, 28.6% By dollar volume. The two top firms accounted for over 50% Of total **[**9]** ASBD sales by unit in 1975, and the top four accounted for about 75%. In 1975 Fruehauf purchased 5.4% Of the ASBD market's unit volume, 4.7% Of the dollar volume. Id. at 207. There is evidence that prior to the 1973 Fruehauf-Kelsey merger, which took place before Standard 121 went into effect, Fruehauf was not expected to obtain its ASBD requirements from Kelsey because Kelsey lacked an in-axle sensor design. In 1975, however, Fruehauf purchased 42% Of its ASBD requirements from Kelsey. Id. at 150, 207.

The most critical information concerning the ASBD market, however, is not market shares or the costs of entry but the status of the government regulation which is the Raison d'etre of this market. Standard 121 was first proposed in 1967 and, after several postponements and revisions, went into effect in early 1975. [4] The record evidence leaves little doubt that truck tractor and trailer buyers will not order ASBDs unless required to do so by the government. Representatives of the trucking industry have protested that available antiskid devices **[*350]** used in order to comply with Standard 121 are so prone to malfunction that they create a greater hazard than the one they **[**10]** are intended to eliminate. See Paccar, supra, 573 F.2d at 637, 641-42.

In March 1978 NHTSA, bowing to this pressure, proposed a suspension of the "no lockup" requirement for truck trailers, *43 Fed.Reg. 9626* (March 9, 1978). If put into effect this suspension would remove the need for ASBDs. In the following month the Ninth Circuit enjoined enforcement of those parts of Standard 121 requiring installation of antilock devices (i. e., the stopping distance requirements for a vehicle traveling at 60 m.p.h.) until NHTSA had more persuasive evidence that the devices were reliable and effective. The court found that in light of the available evidence the standards necessitating installation of the devices were not "reasonable" and "practicable" as required by the enabling legislation. See 573 F.2d at 643; National Traffic and Motor Vehicle Safety Act of 1966, § 103(f), 15

---

3 The Commission reversed the finding of the ALJ that the merger violated § 7 by removing Fruehauf as a potential entrant in the HDW market. The Commission found insufficient evidence that Fruehauf was likely to enter this market. 91 F.T.C. at 238. The ALJ also ruled that the merger was illegal because it would entrench Fruehauf in the truck trailer market. The Commission determined that this theory overlapped with the "captive supply" theory, and saw no reason to inquire into entrenchment as a separate basis for condemning the merger. 91 F.T.C. at 240.

4 The history of Standard 121 through April 1978 is recounted in considerable detail in Paccar, Inc., supra, 573 F.2d at 634-39.

*U.S.C. § **[**11]** 1392(f)*. Following the decision in Paccar, NHTSA amended Standard 121 to exempt heavy-hauler trailers from the stopping distance requirements, *43 Fed.Reg. 58820, 58823* (Dec. 18, 1978). [5]

Neither the judicial nor the administrative action lifting the antilock requirements for truck trailers precludes the possibility that antiskid devices will be required in the future or that advancing technology will so lower the cost and improve the reliability of these devices that truck, tractor and trailer buyers will voluntarily instal them. At the present time, however, the evidence indicates that neither the ASBD market nor Fruehauf's **[**12]** purchases in that market are likely to be significant.

(3) The HDW Market

The HDW market presents a different picture. Combined sales of cast spoke and disc wheels to manufacturers of trucks, tractors and trailers averaged about $ 210 million from 1970 through 1972. Kelsey was the fourth largest supplier during this period, accounting for about 15% Of the market sales. The top four HDW producers together accounted for between 65% And 71% Of the market during this period, while the top eight firms were responsible for 93% To 95% Of the market. *91 F.T.C. at 202-203, 208*. During this same period, Fruehauf purchased an average of 5.8% Of total HDW production (3.3% As cast spokes). [6]

There is no significant difference between heavy duty wheels for trucks and trailers. Discs for these two vehicular units are **[**13]** identical. Cast spoke wheels differ only slightly, and they can be and are cast in the same foundry, with no more than an hour needed to change castings, and machined on the same lines.

Manufacture of disc and cast wheels does involve substantially different processes, however, and most firms which produce a center member specialize in one type or the other, i. e., cast spoke or disc. The center member of a cast spoke wheel is produced by pouring molten steel into a mold, allowing it to harden, and, after removal of the mold, treating and machining the spoke. [7] **[**14]** A disc center member is produced by cutting a disc from a steel sheet, spinning or stamping it into shape, and punching holes for the hub and for screws and bolts. [8] The rims for cast spoke and disc wheels are **[*351]** similar and can be produced in the same facility with only a minor effort needed to shift from production of one to another. The brake drums for cast spoke and disc wheels are also substantially the same except for machining.

DISCUSSION

---

[5] The release containing these amendments to the regulation states that the exclusion for trailers is "temporary," although no termination date is provided. *43 Fed.Reg. at 58821*. Recently, NHTSA announced its intent to study further the question of braking standards for trucks and trailers and solicited comments on a standard to replace Standard 121. 44 Fed.Reg. 9786 (Feb. 15, 1979).

[6] The Commission's opinion uses the figure 3.9% For Fruehauf's share of cast wheel production, but this figure is in error, as the brief for the Commission tacitly concedes. See FTC Br. at 18, n.10.

[7] One firm, Erie Malleable Iron Co., produces cast iron spoke wheels, but in light of Erie's small share of the market, it is safe to assume that case iron wheels have limited appeal. See text at note 18, Infra.

[8] For the period 1970-72, the top eight firms (in descending order) in the HDW market, measured in dollar sales, and the type of wheel they produce were: Firestone (disc), Dayton-Walther (cast), Kelsey-Hayes (principally cast), Budd (disc), Motor Wheel Division of Goodyear (disc), Rockwell, Webb Wheel Division of Marmon Industries (cast), and Reyco. Rockwell and Reyco do not produce center members.

Usually the purchaser of the truck or trailer specifies the type of wheel to be used, spoke or disc. Fleet operators generally standardize their fleets by adopting one or the other for exclusive use. For reasons not fully made clear, truckers operating primarily west of the Mississippi, and particularly those operating on the West Coast, tend to use disc wheels, whereas cast spoke wheels predominate east of the Mississippi. Each type of wheel enjoys a number of relative advantages over the other, and cast spoke and disc producers compete vigorously with each other to convince fleet operators of the superiority of their respective products.

A few general principles deserve mention **[**15]** at the outset. ***HN1***[] Upon review, the Commission's findings of fact, "if supported by substantial evidence, shall be conclusive," *15 U.S.C. § 21(c)*, and we may not substitute our inferences for those drawn by the Commission simply because we might have evaluated the facts differently as an original matter. See *FTC v. Pacific States Paper Trade Ass'n, 273 U.S. 52, 63, 47 S. Ct. 255, 71 L. Ed. 534 (1927)*; *Simeon Management Corp. v. FTC, 579 F.2d 1137, 1142 (9th Cir. 1978)*. However, the Commission's findings must be supported by substantial evidence and there must also be a rational connection between those findings and its conclusions.

It is our function, therefore, to determine whether the Commission's findings are supported by substantial evidence, and, if so, whether its conclusions are rationally based and consistent with governing statutory norms. Here, appellant maintains that the Commission's evidence falls short of showing that the risk of anticompetitive effect posed by the merger satisfies the criteria for a § 7 violation.

HN2[] Section 7 of the Clayton Act was intended to arrest a trade restraint or a substantial lessening of competition in its incipiency; it is not concerned with **[**16]** "certainties." *Brown Shoe Co. v. United States, 370 U.S. 294, 317-18, 323, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*; *United States v. E. I. Du Pont de Nemours & Co., 353 U.S. 586, 589, 77 S. Ct. 872, 1 L. Ed. 2d 1057 (1957)*. Requiring a plaintiff to prove that substantial lessening of competition is inevitable would thwart the express intent of Congress to nip anticompetitive practices in the bud before they blossom into a Sherman Act restraint of trade, see *Brown Shoe, supra, 370 U.S. at 323, n.39, 82 S. Ct. 1502*, and would run counter to Congress' view that neither the Commission nor the courts should be charged with possession of powers of prevision that no one else has achieved. Yet there must be "the reasonable probability" of a substantial impairment of competition to render a merger illegal under § 7. A "mere possibility" will not suffice. *Brown Shoe, supra, 370 U.S. at 323, 82 S. Ct. 1502*; *BOC International Ltd. v. FTC, 557 F.2d 24, 28 (2d Cir. 1977)*; *Crown Zellerbach Corp. v. FTC, 296 F.2d 800, 824-25 (9th Cir. 1961)*, Cert. denied, *370 U.S. 937, 82 S. Ct. 1581, 8 L. Ed. 2d 807 (1962)*; *United States v. Atlantic Richfield Co., 297 F. Supp. 1061, 1066 (S.D.N.Y.1969)*, Aff'd **[**17]** sub nom. *Bartlett v. United States, 401 U.S. 986, 91 S. Ct. 1233, 28 L. Ed. 2d 527 (1971)*.

HN3[] A vertical merger, unlike a horizontal one, does not eliminate a competing buyer or seller from the market, 2 P. Areeda & D. Turner, ***Antitrust Law*** P 527a, p. 376 (1978). It does not, therefore, automatically have an anticompetitive effect, R. Posner, ***Antitrust Law***, An Economic Perspective 200 (1976), or reduce competition. Accordingly, a vertical merger, as distinguished from price-fixing boycotts, or similar arrangements between competitors, does not amount to a Per se substantial lessening of competition, *Ash Grove Cement Co., 85 F.T.C. 1123, 1165 (1975)*, affd., *577 F.2d 1368* ***[*352]*** *(9th Cir. 1978)*; *Marquette Cement Mfg. Co., 75 F.T.C. 32, 103-04 (1969)*. Indeed, it may even operate to increase competition, see Areeda, Antitrust Analysis P 619, pp. 536-37 (1967).

As the Supreme Court recognized in *Brown Shoe, supra*, ***HN4***[] the fountainhead of § 7 analysis of vertical mergers, the competitive significance of a vertical merger results primarily from the degree, if any, to which it may increase barriers to entry into the market or reduce competition by (1) foreclosing competitors of the purchasing **[**18]** firm in the merger from access to a potential source of supply, or from access on competitive terms, (2) by foreclosing competitors of the selling firm (in this case other HDW or ASBD manufacturers) from access to the market or a substantial portion of it, or (3) by forcing actual or potential competitors to enter or continue in the market only on a vertically integrated basis because of advantages unrelated to economies attributable solely to integration. See *370 U.S. at 328, 82 S. Ct. 1502*. The ultimate objective, however, is to determine whether and how the particular merger in issue may lessen competition, i. e., what its anticompetitive effect on the market, if any, is likely to be.

Although it has been suggested that a significant percentage of market foreclosure, standing alone, might constitute a sufficient "clog on competition" to amount to a violation of § 7 without more, *Standard Oil Co. of Calif. v. United States, 337 U.S. 293, 314, 69 S. Ct. 1051, 93 L. Ed. 1371 (1949)*, no such Per se rule has been adopted, except where the share of the market foreclosed reaches monopoly proportions. [9] **[**21]** See *Brown Shoe, supra, 370 U.S. at 328, 82 S. Ct. 1502*. The Supreme Court's insistence **[**19]** that each merger challenged under § 7 be "viewed . . . in the context of its particular industry," *Brown Shoe, supra, 370 U.S. at 321-22, 82 S. Ct. at 1522*; *United States v. General Dynamics Corp., 415 U.S. 486, 498, 94 S. Ct. 1186, 39 L. Ed. 2d 530 (1974)*, and that the Clayton Act protects "Competition, not Competitors," *370 U.S. at 320, 82 S. Ct. 1502* (emphasis in original), contravenes the notion that a significant level of foreclosure is itself the proscribed effect. See *FTC v.* ***[*353]*** *Procter & Gamble Co., 386 U.S. 568, 577, 87 S. Ct. 1224, 1229, 18 L. Ed. 2d 303 (1967)* ("Section 7 of the Clayton Act was intended to arrest the anticompetitive Effects of market power in their incipiency") (emphasis added). A showing of some probable anticompetitive impact is still essential (e. g., promotion of a trend toward integration; reduction in number of potential market competitors; entrenchment of a large supplier or purchaser; increase in barriers to entry). [10] Instead of a Per se approach, Brown Shoe mandates that ***HN5***[] when a merger is challenged under § 7 it "becomes necessary to undertake an examination of various economic and historical factors in order to determine whether the **[**20]** arrangement under review is the type Congress sought to proscribe." *370 U.S. at 329, 82 S. Ct. at 1526*.

In Brown Shoe the Court described some of the factors to be considered in "predicting the probable future conduct of the parties and thus the probable effects of the merger." ***HN6***[] Most important among the factors are the nature and economic purpose of the arrangement, the likelihood and size of any market foreclosure, the extent of concentration of sellers and buyers in the industry, the capital cost required to enter the market, the market share needed by a buyer or seller to achieve a profitable level of production (sometimes referred to as "scale economy"), the existence of a trend toward vertical concentration or oligopoly in the industry, and whether the merger will eliminate potential competition by one of the merging parties. To these factors may be added the degree of market power that would be possessed by the merged enterprise and the number and strength of competing suppliers and purchasers, which might indicate whether the merger would increase the risk that prices or terms would cease to be competitive. This list, with **[**22]** some variations, has been the standard framework for analysis of the legality of a vertical merger. See, e. g., *Mississippi River Corp. v. FTC, 454 F.2d 1083, 1091-93 (8th Cir. 1972)*; *ITT v. GTE, 449*

---

[9] In a literal sense, any vertical foreclosure represents a lessening of competition inasmuch as the foreclosed transactions are removed from the arena of competition. A "substantial" lessening of competition might then be a foreclosure of a numerically significant percentage of the market. At times Brown Shoe appears to encourage this simplified analysis. See 370 U.S. at 323-24, 82 S. Ct. 1523: "The primary vice of a vertical merger or other arrangement tying a customer to a supplier is that, by foreclosing the competitors of either party from a segment of the market otherwise open to them, the arrangement may act as a "clog on competition,' *Standard Oil Co. of California v. United States, 337 U.S. 293, 314, 69 S. Ct. 1051, 1062, 93 L. Ed. 1371 (1949)*, which "deprive(s) . . . rivals of a fair opportunity to compete.' H.R. Rep. No. 1191, 81st Cong., 1st Sess. 8" (footnote omitted). *Du Pont, supra*, also lends support to this view where both the market affected and the degree of foreclosure are substantial. *353 U.S. at 595, 77 S. Ct. 872*; see also *Id. at 607, 77 S. Ct. at 884* ("The statutory policy of fostering free competition is obviously furthered when no supplier has an advantage over his competitors from an acquisition of his customer's stock likely to have the effects condemned by the statute.") Of course, in Du Pont the size of the companies and of the percentage of foreclosure in the market as defined by the Court left no doubt that the vertical tie conferred market power upon Du Pont.

But we are unwilling to assume that any vertical foreclosure lessens competition. Absent very high market concentration or some other factor threatening a tangible anticompetitive effect, a vertical merger may simply realign sales patterns, for insofar as the merger forecloses some of the market from the merging firms' competitors, it may simply free up that much of the market, in which the merging firm's competitors and the merged firm formerly transacted, for new transactions between the merged firm's competitors and the merging firm's competitors. See 2 P. Areeda & D. Turner, ***Antitrust Law*** P 527a (1978).

A similar issue arises under § 3 of the Clayton Act, *15 U.S.C. § 14*, governing exclusive dealing contracts, including requirements contracts, which present much the same evil as a vertical merger foreclosing a portion of the supplying firm's market. See *Standard Oil, supra*, where the Court found that a requirements contract violated § 3 because of the percentage of the market foreclosed, *337 U.S. at 314, 69 S. Ct. 1051*. The Court observed that use of such exclusive dealing arrangements by Standard and its major competitors enabled them to maintain oligopolistic control of the market. *Id. at 295, 309, 69 S. Ct. 1051*.

[10] See text at notes 23 to 27, Infra, and cases cited therein.

F. Supp. 1158, 1177-78 (D.Hawaii 1978). Application of these factors may reveal that a vertical merger poses no threat to competition at all, resulting merely in a realignment of sales as a result of "in-house" transactions within the merged enterprise but leaving the number of competing sellers and their market shares unchanged, or that it poses a threatened lessening of competition that may be De minimis, may be of monopoly proportions, or may lie somewhere in between the two, 370 U.S. at 328-29, 82 S. Ct. 1502.

As the Supreme Court made clear in Brown Shoe, there are no precise formulas for determining whether a vertical merger may probably lessen competition. Rather, the objective of discerning what, if any, anticompetitive effects the merger may have can be achieved only by examining the foregoing market factors as they exist for the particular merger in issue. It is true that the Department of Justice has for many years issued "Merger Guidelines" for the purpose of indicating **[**23]** to the business community, legal profession and the public generally when the Department may question the legality of a merger. See U.S. Dept. of Justice Merger Guidelines, 1Trade Reg. Rep. (CCH) P 4510. [11] But just as these guidelines do not preclude governmental challenge to a merger which does not fall within all the terms of the guidelines, see Atlantic Richfield, supra, 297 F. Supp. at 1073, so the guidelines do not establish the illegality of a merger which does fit the criteria used by the Justice Department in deciding whether to challenge a merger. The guidelines, therefore, simply reflect the **[*354]** considered view of the Justice Department as to which mergers are most likely to create a reasonable probability of substantially lessening competition and which may therefore warrant the institution of legal action. See Guidelines P 1, Supra, at 6882. Accordingly, whether or not the degree of market concentration, the height of entry barriers, the size of the merging firms, and the extent of foreclosure match or exceed the benchmarks incorporated into the Justice Department's guidelines, ***HN7***[] the Commission still bears the burden of showing the likelihood that the future **[**24]** effect of "That merger (of Kelsey and Fruehauf) may be substantially to lessen competition." Brown Shoe, supra, 370 U.S. at 332, 82 S. Ct. at 1527-1528 (emphasis in original).

With these basic principles in mind we proceed to review the Commission's findings and conclusions with respect to the Fruehauf-Kelsey merger.

I. The Truck Trailer Market

The Commission concluded that the merger violated § 7 with respect to the truck trailer market solely on the theory that in the event of a shortage of HDWs Kelsey would give Fruehauf a substantial **[**25]** competitive advantage over other trailer manufacturers by diverting to Fruehauf wheels that would otherwise go to Kelsey's other customers, some of which are trailer manufacturers. [12] 91 F.T.C. at 235-36. This conclusion rests upon several assumptions, having no appreciable evidentiary support. One assumption is that Kelsey is a significant and substantial supplier of HDWs to Fruehauf's competitors. The record reveals that, on the contrary, trailer manufacturers have in the past purchased almost all of their HDWs from other suppliers, with Kelsey's sales of wheels to trailer manufacturers other than Fruehauf amounting to approximately.$ 1.4 million per year out of total average annual HDW market sales amounting to $ 200 million per year during the three-year period prior to the merger. In the years 1970-72, sales to trailer manufacturers, including Fruehauf, accounted for only about 7% Of Kelsey's HDW output. Thus Kelsey, while a large manufacturer of HDWs, has hardly been a substantial supplier of HDWs to trailer manufacturers.

[26]** The second unsupported assumption is that Kelsey would, in the event of an HDW shortage, divert to Fruehauf HDW sales that would otherwise be made to other customers. There is no evidence, and it is not alleged, that Fruehauf contemplated such a stratagem when it entered the merger with Kelsey. [13] **[**27]** More important,

---

[11] The Guidelines state that the Department may be expected to challenge "a merger or series of mergers between a supplying firm, accounting for approximately 10% Or more of the sales in its market, and one or more purchasing firms, accounting In toto for approximately 6% Or more of the total purchases in that market, unless it clearly appears that there are no significant barriers to entry into the business of the purchasing firm or firms." Guidelines P 12, Supra, p. 6886.

[12] Fruehauf would enjoy an unfair advantage over its competitors if Kelsey diverted sales to Fruehauf from customers who do not build trailers, but the relative advantage would not be as great. Moreover, Kelsey's non-trailer customers, including Ford and General Motors, exercise the greatest leverage over Kelsey with the threat of retaliatory withdrawal of patronage.

there is no credible evidence that another shortage is reasonably foreseeable. Even if it were, the evidence that Kelsey would give priority to Fruehauf's needs is insubstantial. As to the likelihood of a shortage, the record indicates that the combined capacity of wheel producers was considerably expanded after the 1973-74 shortage and that, even when conservatively estimated, this capacity exceeds a liberal estimate of anticipated demand during the next five or ten years. [14]

During past shortages Kelsey, like other wheel producers, has allocated its production Pro rata among its customers in accordance **[*355]** with their regular volume of purchases. Appellant insists that Kelsey will follow this precedent in the future, notwithstanding Fruehauf's ownership of the company. The Commission cites no evidence shedding doubt upon this representation. On the contrary a spokesman from Trailmobile Corp., Fruehauf's largest competitor, testified that his company believed that the merger would not affect Kelsey's policy in favor of Pro rata distribution in the event of a shortage.

One might reasonably question the weight to be given to appellant's self-serving assurances that Kelsey would allocate Pro rata if the need arose, as well as the significance of Kelsey's Pro rata distribution of wheels during the 1973-74 shortage, **[**28]** which took place after the merger but at a time when appellant could have anticipated a challenge to its legality. However Kelsey's policy in favor of Pro rata allocation need not rest upon some philosophical commitment to egalitarianism since it could also make sound business sense. If Kelsey deprived its regular customers of a proportionate share of HDWs in times of shortage it would risk their retaliating by shifting to competing suppliers not only their purchases of HDWs but of other products presently bought from Kelsey, which could cause it greater economic harm. In addition, by granting priority to Fruehauf over other trailer manufacturers who purchase wheels from Kelsey, Kelsey would invite antitrust damage actions against it by these trailer firms. Under the circumstances, it appears highly unlikely that Kelsey would take such risks.

Thus the Commission's finding that the merger violates § 7 with respect to the truck trailer market is based on speculation rather than fact. It assumes in the face of contrary evidence that a shortage will recur in the reasonably proximate future. Upon this unsupported basis it infers that in the event of a shortage Kelsey would give **[**29]** priority to Fruehauf to the detriment of its competitors. Although neither of these assumptions is by any means beyond the realm of the possible, here they run counter to the actual evidence in the record. We cannot therefore say that they add up to a reasonable probability that the merger will substantially lessen competition. Accordingly, the finding of a § 7 violation based upon the effect of the merger on the truck trailer market must be set aside as unsupported by substantial evidence.

II. The ASBD Market

We need not consider appellant's contention that the Commission's conclusions regarding the barriers to entry into the ASBD market are erroneous, or that the uncertain status of the market at the time when the Commission issued its decision precluded a finding that the merger would have a substantial anticompetitive effect on the ASBD market. [15] Intervening events, specifically the Ninth Circuit's decision in *Paccar, Inc., supra*, on April 17, 1978,

---

[13] Appellant contends that the merger came about through the initiative of Kelsey, which turned to Fruehauf in order to forestall a takeover by a less desired suitor. A witness for appellant who participated in the merger negotiations testified that the subject of vertical dealings was never broached in the meetings between Kelsey and Fruehauf. Whatever specific topics were discussed by the negotiators, we tend to doubt that the parties, in concluding that they would be compatible merger-partners, failed to take into account possible vertical transactions between them, even though nothing may have been said on the subject.

[14] The last shortage, in 1973-74, was not foreseen. A witness from Dayton-Walther suggested that this shortage was due in part to a heavier than expected stampede of truckers rushing to buy trucks and trailers before Standard 121 went into effect.

[15] The Commission issued the final order on February 22, 1978, and denied the petition to reopen the order on June 22, 1978. *Paccar, supra*, was decided on April 17, 1978, and certiorari was denied on October 2, 1978. The Commission denied Fruehauf's motion to reopen the order on the grounds that the possibility remained that NHTSA would reimpose the same or similar performance standards for air-braked vehicles, or that Fruehauf would remain a substantial purchaser of ASBD even if it had no legal obligation to instal the device, and that reversal of the finding of a violation with respect to the ASBD market would not in any event alter the scope of the divestiture order. *91 F.T.C. at 1153-55*.

invalidating Standard 121, the Supreme Court's denial of certiorari on October 2, 1978, and the NHTSA's decision on December 18, 1978, to modify the Standard, render unsupportable the Commission's earlier conclusions with respect **[**30]** to the ASBD market.

The record unmistakably reveals that truck operators will not equip their vehicles with antiskid devices in the absence of a legal obligation to do so. Since trailers are now officially excluded from the antiskid requirements, Fruehauf is unlikely to purchase a significant volume of antiskid devices **[**31]** and we see little logic in affirming an order holding that the merger creates a reasonable probability of a substantial lessening of competition in the market if not **[*356]** only Fruehauf's share but the market itself appears to have been stripped of any significance. The burden is now on the Commission to demonstrate that notwithstanding these basic decisions the merger may have a significant effect on the market. In the meantime the Commission's conclusions with respect to the ASBD market must be set aside, without prejudice to its right to renew its proceeding if future developments should prove that the predicted demise of the ASBD market is greatly exaggerated.

We are aware of the need for repose in administrative adjudications and, more to the point, of the Supreme Court's repeated declarations that ***HN8***[] the decision whether to reopen an administrative proceeding is within the complete discretion of the agency and will not be reversed except perhaps when an agency adheres to a decision in the face of an epochal change in conditions. [16] **[**33]** The necessarily protracted nature of most agency proceedings makes it inevitable that some of the evidence taken will be obsolete by the time **[**32]** a decision is rendered. Here, however, appellant is not merely claiming that the record is inadequate to support the agency's conclusions. Rather, it is claimed that the record affirmatively demonstrates that these conclusions are erroneous. [17]

Although the NHTSA has not yet definitely proposed to reimpose the ASBD requirement, see *44 Fed.Reg. 9783* (Feb. 15, 1979), the Commission maintains that there is a possibility of a substantial ASBD market in the future. But this possibility is not enough to sustain a conclusion that there is at present a reasonable probability that the merger will substantially restrain competition in this market. Accordingly, we need **[**34]** not determine whether the Commission abused its discretion in denying the petition to reopen the proceeding and, if so, whether it would be appropriate for this court to reverse that denial.

III. The HDW Market

In determining whether Fruehauf's acquisition of Kelsey may substantially lessen competition in the HDW market the Commission stated:

> "In sum, no matter what the extent of barriers to entry into a highly concentrated industry, a merger between a major customer and a major supplier may restrain competition in the market for the Supplier's product (in the

---

[16] See *Bowman Transportation Inc. v. Arkansas-Best Freight System, Inc., 419 U.S. 281, 294-96, 95 S. Ct. 438, 42 L. Ed. 2d 447 (1974)*; *ICC v. Jersey City, 322 U.S. 503, 514-15, 64 S. Ct. 1129, 88 L. Ed. 1420 (1944)*. In the one case in which the Supreme Court reversed an agency's refusal to reopen a hearing to consider changed economic circumstances, *Atchison, T. & S. F. Ry. Co. v. United States, 284 U.S. 248, 52 S. Ct. 146, 76 L. Ed. 273 (1932)*, the Court observed that a record closed in September, 1928, was not "representative" of conditions prevailing in 1931, when the Commission's order went into effect. *Id. at 260-61, 52 S. Ct. 146*. A recent decision of this court, ***Greene County Planning Bd. v. FPC, 559 F.2d 1227, 1233 (2d Cir. 1976)***, Cert. denied, ***434 U.S. 1086, 98 S. Ct. 1280, 55 L. Ed. 2d 791 (1978)***, follows the Jersey City standard although it phrases it differently.

[17] See *United States v. Aluminum Co. of America, 148 F.2d 416, 445-46 (2d Cir. 1945)* ("There is no reason why an appellate court . . . should not advise itself from outside the record of such facts as appear to admit of no genuine dispute," although evidence taken from outside the record cannot be regarded as conclusive). The instant case could be distinguished from those in which the rule of complete agency discretion is usually invoked inasmuch as this case does not involve a rate-making or permit-application procedure, where the agency is solely responsible for the substantive decision, but the application of a statute jointly administered by the Commission and the courts.

case before us ASBD and heavy-duty wheels) by foreclosing competitors of the supplier from the possible patronage of the customer. . . ." *91 F.T.C. at 221* (emphasis in original).

Appellant contends that this statement amounted to the adoption by the Commission of a Per se rule for economic analysis of a vertical merger in lieu of the more flexible standard adopted by the Supreme Court in Brown Shoe and that the Commission thereby ran afoul of the Supreme Court's disapproval of Per se rules with respect to the legality of mergers, see, e. g., *United States v. Marine Bancorporation,* ***[*357]*** *Inc., 418 U.S. 602 at* ***[**35]*** *623, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974)*. We disagree.

Although the Commission's quoted statement could conceivably be construed as automatically condemning a merger of the type described by it, we view it as merely expressing the Commission's view that the absence of a high entry barrier does not necessarily insulate a merger from challenge under § 7. High entry barriers may be a signal that a particular merger carries a potential for impairing competition but we agree with the Commission that barriers need not reach some predetermined level before an anticompetitive effect becomes possible. The issue, therefore, is whether the Commission's conclusions are consistent with a rational analysis and appraisal of the relevant market facts before it.

Appellant next contends that the Commission's conclusion that the merger will probably have an anticompetitive impact lacks economic or factual support, and is based on rank speculation. This again necessitates a study of whether the Commission's conclusions are consistent with a rational analysis and appraisal of the relevant facts before it, viewed in the light most favorable to the Commission.

We accept at the outset the Commission's **[**36]** findings that the HDW market is significantly concentrated, based on evidence that the top four producers account for 65-71% Of the market, the top eight for 93-95%, and Kelsey, the third largest producer, 15%. Moreover, the Commission's determination that barriers to entry into HDW production are substantial is supported by evidence that the initial capital outlay required to enter production at an efficient level is $ 10-$ 20 million. 91 F.T.C. at 233. Appellant insists that barriers are "low" to "moderate," according to Professor Bain's celebrated scale, and that firms in the market cannot therefore have appreciable market power. We agree with the Commission that the matter should not turn on labels given to capital outlay requirements. We also reject appellant's contention that in measuring the size of entry barriers the Commission ignored a class of industrial titans already possessing highly automated foundry equipment that would require relatively little additional capital investment to achieve production capability (e. g., General Motors, Ford, International Harvester, Rockwell and Chrysler). The record reveals that these organizations could not enter the market as easily **[**37]** as appellant argues and thus deter those in it from pursuing anticompetitive practice because they (General Motors, Ford, et al.) are equipped only to cast ductile iron, whereas all but a small proportion of cast spoke wheels sold in the market are composed of steel, which requires a different type of foundry facility than that possessed by them. [18] The Commission adopted the ALJ's finding that steel spokes are preferred to iron spokes, see *91 F.T.C. at 183, 233, n.26*. Although the record apparently does not contain direct evidence corroborating this finding, the existence of this preference is inferable from the facts that iron spokes now command only a minor share of the market and that a number of iron foundries producing HDW components cast in ductile iron (e.g., hubs and drums), including International Harvester, have not expanded into production of spokes.

The Commission further determined **[**38]** that an HDW manufacturer could not achieve full scale economy unless its production volume was no less than about 8.9% Of the total HDW market and assumed that a new entrant in this market could not pose effective competition unless it produced at this level and achieved scale efficiencies. We agree with Fruehauf's contention that the figure used and the assumption are at least partially in error. The Commission derived the 8.9% Figure from testimony of Fruehauf's engineering expert, Mr. Joseph Greenberg, whose calculations showed that per unit cost of production declined as annual production increased to about 300,000 **[*358]** units of center members and drums [19] (300,000 is about 8.9% Of the HDW market). In making

---

[18] One firm, Erie, produces cast iron spiders, but its sales account for less than 3% Of the market for cast wheels.

these calculations, however, Greenberg presupposed that the wheel components were the Only items produced on the hypothesized foundry and machining lines. Appellant points out that this engineering estimate did not provide a correct basis for determining scale economies, since a foundry and machine shop can with little difficulty shift production from one article to another, within certain weight and size limitations, so that the facilities could be operating at **[**39]** the most efficient level without necessarily producing a full complement of wheels.

Notwithstanding these errors in the Commission's analysis, evidence marshalled by the ALJ indicates that initial capital costs would exceed 10 million even for a production level substantially below 300,000 units. There is, therefore, substantial evidence, albeit not uncontroverted, supporting the Commission's conclusion that the capital cost barrier is substantial and significant, whatever the minimum level of efficient production might be. [20] **[**40]** For this reason we do not reject the Commission's decision on this issue. [21]

The Commission further concluded that the amount of market foreclosure likely to result from the merger would range from "a weak 3.9" (actually 3.3%) to a "strong 5.8" of the market production of HDWs, depending upon whether one limits the calculation of Fruehauf's purchases of cast spoke HDWs, which are made by Kelsey and accounted for 3.3% Of the market during the three-year premerger period, or also includes Fruehauf's purchases of heavy duty disc wheels, not presently manufactured by Kelsey, which accounted for 2.5% Of the total HDW market during the same period. Since Kelsey does make discs for light-weight trucks and could produce heavy duty discs, the Commission was entitled to infer that **[**41]** Fruehauf, with its tradition of in-house purchasing, could expand Kelsey's disc wheel facilities to furnish at least the major part of Fruehauf's disc needs except possibly for nonintegral hubs. [22] However, there is no evidence that competing purchasers of these products would be foreclosed from continuing to obtain **[*359]** all or part of their cast spoke needs from Kelsey or its competitors at competitive prices. Nor was there proof that removal from the market of up to 5.8% Of its HDW sales would preclude any existing competitor from continuing to operate economically or any potential competitor from entering the market.

[42]** The Commission further found that there had been periodic HDW shortages within the 12 years prior to the merger (i.e., in 1966, 1968-69, 1973-74) and that, although Fruehauf was not itself a potential competitor in the

---

[19] The ALJ did not establish a precise figure for the volume associated with maximum scale efficiencies, but suggested that the figure would be about 5-10% Of the market. *91 F.T.C. at 187*.

[20] Evidently, the ALJ did not consider the feasibility of entry into the HDW market with production only of center members, which could be sold as an individual component or as an assembled unit with components purchased from other manufacturers. Greenberg's study indicates that under the most likely circumstances of entry, a firm could launch into production of cast spokes at a volume of 200,000-300,000 at an initial cost of about $ 8-10 million.

[21] The evidence on the barriers to entry into the HDW market via production of steel discs is meager in comparison to that for cast spokes. See *91 F.T.C. at 185* (P 222). What evidence there is suggests that the cost is less for discs. On the other hand, appellant does not argue that because of the relative ease of entry via disc production the HDW producers are wide open to potential competition.

[22] The ALJ and the Commission found that Fruehauf traditionally purchases in-house whenever possible, even when the immediate commercial interest would seem to dictate obtaining supplies aliunde. *91 F.T.C. at 204, 235*. Prior to the merger Fruehauf's principal supplier of cast spoke wheels was the Dayton-Walther Co. Shortly after the merger took place Fruehauf granted Dayton a five-year, renewable contract for the purchase of wheels in response to Dayton's inquiries about the impact of the merger on its relationship with Fruehauf. A spokesman from Dayton testified that the contract gives it the option of continuing to supply Fruehauf as long as it offers wheels at a competitive price, although the witness was not unreservedly confident that the contract could be enforced. This witness also testified that loss of Fruehauf's business would not have a "drastic" effect on the company.

At least through the trial, Fruehauf continued to purchase wheels from Dayton but, subject to Dayton's rights under the contract, we agree with the Commission's observation that conduct while litigation is predictable or pending is no sure guide to a merging company's ultimate intentions. 91 F.T.C. at 236, n.29. Fruehauf does not contend that it does not expect to have Kelsey supply all the cast spoke wheels it needs.

production of HDWs prior to the merger, it had engaged in certain pro-competitive activities, consisting of experiments with new types of fabricated aluminum and steel wheels and encouragement of one foundry, McConway and Torley, to produce cast spoke wheels.

From the foregoing the Commission concluded that the merger

> "runs afoul of Section 7 by foreclosing Fruehauf as a source of patronage of heavy duty wheels in a market setting in which such foreclosure is likely to increase barriers to entry, make new entry more difficult and less likely, and thereby enhance the market power conferred by a highly concentrated market structure into which entry was previously difficult to begin with. Additionally we believe that the merger is likely to lessen competition substantially by foreclosing Kelsey-Hayes as a source of supply to truck trailer manufacturers should shortages of supply recur." 91 F.T.C. at 236.

With due respect for the Commission's expertise, we **[**43]** fail to find any logical basis in the evidence for this conclusion, even when the record is viewed most favorably to the Commission. Not only is the conclusion a Non sequitur but it flies in the face of undisputed contrary evidence.

There is no evidence in the record that existing barriers to entry into the HDW market or the existing concentration of producers in it, both admittedly substantial, have been or would be increased by the merger. There is no reason to believe that the merger will adversely affect scale economies for HDW production, thereby increasing the cost of entry. Nor does the Commission suggest that as a result of the merger a firm could successfully enter the HDW or the trailer market only by simultaneously entering at both levels. As to the effect of the merger on the concentration of the HDW industry, since Fruehauf's principal supplier of spoke wheels has been Dayton-Walther, the largest producers of spokes and second largest wheel producer, any shifting of patronage from Dayton to Kelsey will tend to even out the market shares of the three largest sellers of HDWs, but not increase their aggregate market share. The ALJ expressly refused to find that the **[**44]** merger would entrench Kelsey as a producer, stating "I cannot conclude that Kelsey-Hayes has been "entrenched' as that term has heretofore been used in Section 7 cases."

Moreover, there is no allegation that the merger of Fruehauf and Kelsey is part of an existing or prospective trend toward vertical integration, such as existed in *Brown Shoe, supra*, and in other cases. [23] There is no suggestion, much less evidence, that the merger was motivated by a desire to restrain competition. [24] On the contrary, the evidence is undisputed that Kelsey, whose stock was selling substantially below book value, sought out Fruehauf in order to avoid takeover efforts on the part of others. Nor is there any evidence that the merger might impair competition by conferring upon one of the merging partners a "deep pocket" or financial clout not enjoyed by its **[*360]** rivals. [25] It is true that some market foreclosure may ensue from the merger, but not one that deprives rivals from major channels of distribution, [26] much less one that excludes them from the market altogether. [27] Even if Fruehauf were to switch its purchase of its entire HDW wheel needs, amounting to 5.8% Of the market, from

others **[**45]** to Kelsey (which would require Kelsey to enter heavy duty disc production), there would merely be a realignment of existing market sales without any likelihood of a diminution in competition.

[46]** The only theory suggested by the Commission as to how the merger might impair competition in the HDW market is that, assuming Kelsey supplied all of Fruehauf's HDW needs, amounting to 5.8% Of the market or slightly less than the minimum Department of Justice Guideline figure, this foreclosure would be sufficient alone in such a setting to significantly lessen the likelihood that a new firm would enter this market or, what amounts to the same thing for our purposes, [28] to lessen the chance that an existing small competitor would substantially increase its capacity and compete on a wider scale. According to the Commission, although it found that Fruehauf itself was not a potential entrant into the HDW market, [29] **[**47]** Fruehauf had a pro-competitive effect on the market through its collaborative efforts to develop new types of heavy duty wheels and by virtue of its ability to draw new entrants into production of conventional wheels by offering to deliver its patronage. [30]

[48]** In light of the record evidence, this theory is too ephemeral to sustain the Commission's decision. [31] **[**49]** Although Fruehauf did **[*361]** experiment in the development of new kinds of wheels and assisted one foundry in temporary production of HDWs, both adventures proved to be complete failures and there is no evidence that, if the merger were disapproved, Fruehauf would engage in similar activities. Moreover, the Commission has presented no evidence suggesting that Fruehauf was unique in its ability to elicit new competition, and there is no reason to believe that other firms patronizing the HDW market, particularly the automotive and trucking giants, will not

---

[28] See *United States v. Falstaff Brewing Corp., 410 U.S. 526, 530, 93 S. Ct. 1096, 35 L. Ed. 2d 475 (1973)*.

[29] See *Ford, supra, 315 F. Supp. at 375*; *United States v. Standard Oil Co. (New Jersey), 253 F. Supp. 196, 227 (D.N.J.1966)*.

[30] In the late 1960's and early 1970's Fruehauf experimented with a fabricated aluminum wheel and a fabricated steel wheel for production in Fruehauf's own facilities. Fruehauf abandoned the steel wheel project in early 1970 in order to concentrate its efforts on the aluminum wheel, which seemed more promising. This project was abandoned in 1971 when Fruehauf determined that under existing market conditions production of fabricated aluminum wheels was not economically feasible. Following the termination of these efforts to develop a wheel for in-house production, Fruehauf explored with U.S. Steel the development of a fabricated steel wheel to be designed by an outside engineering firm and produced by U.S. Steel. The prototype turned out to be unacceptable for commercial use, and the project ended in September 1973.

In 1967-68, when a strike halted wheel production at Dayton-Walther, the leading producer of cast spoke wheels and Fruehauf's traditional principal supplier, Fruehauf favorably responded to an inquiry from McConway and Torley, a leading producer of cast steel components used by the railroad industry, about the possibility of it producing wheels for Fruehauf. Eager to cultivate an alternate source of supply, Fruehauf provided McConway with necessary drawings and helped finance the purchase of patterns and equipment. For a few years, McConway sold cast spokes to Fruehauf. Fruehauf stopped buying from McConway in late 1973, and shortly thereafter McConway, which had experienced greater than anticipated production problems, exited from the market. According to testimony of a spokesman from McConway, when the demand for the company's railroad products revived, and when Dayton resumed production of wheels, McConway figured that it had overestimated the need for a new wheel producer and so decided to concentrate on its traditional product lines.

In the late 1960's Fruehauf, at the initiative of Webb Wheel, held preliminary discussions about an arrangement whereby Webb would supply Fruehauf's cast spoke requirements. These discussions terminated at an early stage, however, because of a lack of interest on the part of Webb's senior executives.

[31] The Commission has recognized that the "test for finding injury due to elimination of a potential competitor is not simple." It cannot rest on concentration ratios alone. "Additional factors enter into any analysis of the loss of a potential competitor. Among these are: trends toward concentration in the market; extensive entry barriers; high probability that the lost potential competitor would have actually entered the market; whether the lost potential competitor was one of only a few such potential competitors and whether, if he had entered the market, his new competition would have had a significant impact on price and quality." *Beatrice Foods Co., 81 F.T.C. 481, 526-27 (1972)*.

encourage firms in the wings to enter that market, should they be dissatisfied with the quality of the existing competition. [32]

[50]** For the foregoing reasons enforcement of the Commission's order with respect to the truck trailer and HDW markets is denied. As for the alleged probability of a substantial lessening of competition in the ASBD market, we would ordinarily remand the proceeding to the Commission for reopening and reconsideration in light of the Ninth Circuit's decision in *Paccar, Inc., supra*, invalidating Standard 121, the Supreme Court's denial of certiorari in that case, and the NHTSA's later decision to modify the Standard. However, since the Commission, with these developments before it, on June 22, 1978, denied Fruehauf's petition to reopen the order, *91 F.T.C. at 1153-55*, we feel compelled also to deny enforcement with respect to the ASBD market, without prejudice to the Commission's right either to seek modification of our order to permit reopening or to institute a new proceeding upon a showing that ASBD market conditions have changed in a way that provide a basis for concluding that the merger would threaten a substantial lessening of competition in that market.

End of Document

[32] The Commission does not specify whether it proceeded under the theory that Fruehauf, at the time of the merger, exerted a present pro-competitive effect because HDW producers knew that Fruehauf was seeking to attract new sources of supply or would do so if prices rose to an unacceptable level, and conducted themselves accordingly, or under the theory that Fruehauf represented a potential pro-competitive effect through its ability to draw a new competitor into the market at some future time, and thereby strengthen competition at some future time.

The theory of perceived potential competition received the Supreme Court's imprimatur in *FTC v. Procter & Gamble Co., 386 U.S. 568, 581, 87 S. Ct. 1224, 18 L. Ed. 2d 303 (1967)*. The validity of the theory of actual potential competition is a question that has been reserved twice by the Supreme Court, *United States v. Marine Bancorporation, 418 U.S. 602, 639, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974)*; *United States v. Falstaff Brewing Corp., 410 U.S. 526, 537, 93 S. Ct. 1096, 35 L. Ed. 2d 475 (1973)*, once by this court, *BOC International Ltd. v. FTC, 557 F.2d 24, 25 (2d Cir. 1977)*, and by at least one other circuit court, *FTC v. Atlantic Richfield Co., 549 F.2d 289, 294 (4th Cir. 1977)*. Here the evidence is inadequate to sustain either of these theories. Ordinarily, these theories are applied when one of the merging firm is the potential entrant, but they conceivably could apply, assuming the necessary factual predicates, when the merging firms is not itself a potential competitor but a potential promotor of a third-party entrant.

To withstand a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss, a plaintiff who brings an action pursuant to § 4 of the Clayton Act must allege an injury to business or property by reason of an antitrust violation.

Antitrust & Trade Law > Clayton Act > General Overview

HN4[] **Antitrust & Trade Law, Clayton Act**

Each case in which a violation of the Clayton Act, *15 U.S.C.S. § 15* is alleged must be carefully analyzed in terms of the particular factual matrix presented. In making this factual determination courts must look to, among other factors, the nature of the industry in which the alleged antitrust violation exists, the relationship of the plaintiff to the alleged violator, and the alleged effect of the antitrust violation upon the plaintiff. Then, while recognizing that breaches of the antitrust laws have effects throughout society, a trial court must decide whether the plaintiff is one whose protection is the fundamental purpose of the antitrust laws.

Antitrust & Trade Law > Clayton Act > General Overview

HN5[] **Clayton Act, Claims**

Standing under § 4 of the Clayton Act, *15 U.S.C.S. § 15* analysis is essentially a balancing test comprised of many constant and variable factors and there is no talismanic test capable of resolving all § 4 standing problems. To determine whether a plaintiff has standing to bring an action under § 4 of the Act, trial courts should examine and weigh all of the plaintiff's allegations to determine whether the plaintiff has standing in accordance with § 4 of the Act which confers standing on any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws.

HN7[] **Clayton Act, Claims**

In the process of analyzing a case in which a violation of § 4 of the Clayton Act, *15 U.S.C.S. § 15*, is alleged, the trial court considers whether a plaintiff's alleged injuries to his business or property resulted by reason of anything forbidden in the antitrust laws. This requirement for standing under § 4 of the Act has been given a variety of labels by courts. Some courts have enunciated these limitations on § 4 standing under the rubric of "direct injury," others have used the expression "target area," and more recently one court has used the term "zone of interest." In the third circuit, this factor is referred to as the "directness of the injury" claimed to have resulted from the alleged antitrust violation.

Section 4 of the Clayton Act, *15 U.S.C.S. § 15*, which superseded section 7 of the Sherman Act, was intended to open the door of justice to every man, whenever he may be injured by those who violate the antitrust laws.

Labor & Employment Law > Employment Relationships > At Will Employment > Duration of Employment

Labor & Employment Law > Employment Relationships > At Will Employment > General Overview

Labor & Employment Law > Wrongful Termination > Breach of Contract > General Overview

HN9[] **At Will Employment, Duration of Employment**

Under Pennsylvania law, an employment contract which contains no specific provision respecting duration or termination is presumed to be terminable at will by either party for any or no reason, unless the party asserting a contrary construction can offer evidence to rebut the presumption. The plaintiff may overcome this presumption by showing the intent of the parties that the contract last for some definite period of time or for a reasonable time, or by showing that the plaintiff-employee gave the defendant-employer consideration in addition to the employee's normal services, such as sacrificing other employment opportunities.

Contracts Law > Defenses > Public Policy Violations

Opinion by: BRODERICK

Opinion

[*1113] MEMORANDUM

Plaintiff has alleged antitrust violations and breach of contract and defamation claims in connection with the termination of his employment by the defendant. Before the Court is defendant's motion to dismiss plaintiff's second amended complaint pursuant to *Fed.R.Civ.P. 12(b)(6)*. For the reasons hereinafter set forth, defendant's motion will be denied with respect to each of plaintiff's claims.

HN1[] For the purpose of a motion to dismiss, the material allegations of the complaint must be accepted as true and considered in a light most favorable to the plaintiff; a complaint should not be dismissed unless it appears to a certainty that the plaintiff is entitled to no relief. *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*; 2A Moore, Federal Practice P 12.08, at 2271-74.

Plaintiff's allegations in his second amended complaint may be summarized as follows: Plaintiff was **[**2]** employed by Borden Foods, a division of Borden, Inc., from November 1961 until his discharge, as a retail salesman for one year and then as a Unit Manager of a territory encompassing parts of Delaware, Pennsylvania and New Jersey. As Unit Manager, plaintiff supervised several retail salesmen and was responsible for all sales in his territory of grocery and perishable items, including cheese. In addition to receiving a salary, plaintiff also received additional compensation in the form of bonuses by meeting quotas and winning sales contests. In the course of administering and handling certain accounts, plaintiff became aware that Eugene Matthews, District Manager for Borden Foods, personally, **[*1114]** or through other Unit Managers, offered special pricing arrangements, which included the granting of free goods and certain price reductions to certain accounts, such as Food Fair, but not to others, such as Acme Markets. Plaintiff refused to take part in the granting of these special pricing arrangements and, as a result, came into severe conflict with Mr. Matthews, who compiled a file designed to justify the dismissal of the plaintiff. Part of this file included the accusation **[**3]** of Mr. Matthews that plaintiff's negligence was responsible for the spoilage of $ 80,000 worth of cheese ordered by Acme Markets and that the plaintiff filed false reports in connection with this incident. In addition, the plaintiff claims that Mr. Matthews knowingly and maliciously spread false stories concerning the plaintiff's job performance in an effort to have the plaintiff dismissed and to prevent discovery of the special pricing arrangements. At a September 20, 1976 meeting in a hotel with Matthews and Walter Dyer, the Regional Manager, Eastern Region for Borden Foods, plaintiff was dismissed without first being placed on probation for 30 days and notified that his job performance was not satisfactory. At this meeting, plaintiff refused to accept 8 weeks severance pay in return for his release of all claims against the defendant and his agreement not to disclose any information concerning the special pricing arrangements.

In addition, the complaint alleges that the defendant's report in connection with plaintiff's termination states that plaintiff was negligent in performing his duties, and that plaintiff claimed he checked the warehouse which contained the cheese when **[**4]** he had not actually been there for three months. This version of the plaintiff's termination was communicated by the defendant's representatives to the Pennsylvania Unemployment Compensation Board as well as to several employees at Food Fair and Acme Markets. In addition, it is claimed that the defendant furnished a report to prospective employers of the plaintiff stating that plaintiff was dismissed because his job performance did not meet the defendant's standards.

Plaintiff further claims that he received many offers of employment while he was employed by the defendant, but rejected them in reliance on assurances that he would continue to be employed by the defendant and would probably advance to the position of District Manager or even higher.

In Count I of his complaint, plaintiff alleges that the special pricing arrangements adversely affected competition in the market for certain goods in violation of the antitrust laws and that his discharge and the accompanying untrue statements constitute acts performed in furtherance of the antitrust violations. In particular, plaintiff alleges that his discharge and the statements were designed to prevent discovery and prosecution **[**5]** of the illegal pricing scheme and to destroy plaintiff's credibility concerning such matters.

Count II of the complaint alleges that plaintiff's termination constituted wrongful breach of a contractual relationship.

Count III alleges that the defendant intentionally and maliciously libeled and slandered plaintiff by disseminating untrue accusations concerning him.

Plaintiff bases Count I of his complaint on section 4 of the Clayton Act, *15 U.S.C. § 15*, and alleges that he was injured by reason of the defendant's violation of section 2 of the Clayton Act as amended by the Robinson-Patman Act, *15 U.S.C. § 13* (the Robinson-Patman Act). ***HN2***[] Section 4 of the Clayton Act provides:

> Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor . . . and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

Section 2 of the Robinson-Patman Act, which is the statute that plaintiff claims forbids the conduct of the defendant, provides in pertinent part:

> (a) It shall be unlawful for any person engaged in commerce, in the course of such commerce, either **[**6]** directly or indirectly, to discriminate in price between **[*1115]** different purchasers of commodities of like grade and quality . . . and where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them.

Plaintiff claims that the special pricing arrangements offered by Mr. Matthews to certain accounts discriminated between different purchasers and lessened competition, thereby violating section 2. Plaintiff further contends that he was injured in his business or property by reason of the special pricing arrangements and that therefore he is entitled to recover treble damages pursuant to section 4 of the Clayton Act.

In its motion to dismiss, the defendant contends that plaintiff lacks standing to raise the antitrust claims inasmuch as plaintiff has not been injured "in his business or property" nor did the alleged injury occur "by reason of" the alleged antitrust violations. We disagree with the contentions of the defendant for **[**7]** the reasons hereinafter set forth. Defendant's motion to dismiss Count I of the complaint will therefore be denied.

HN3[] To withstand a *Rule 12(b)(6)* motion to dismiss, a plaintiff who brings an action pursuant to section 4 of the Clayton Act must allege an injury to business or property by reason of an antitrust violation. The plaintiff's complaint, read in a light most favorable to him, alleges that the defendant violated the antitrust laws, in that the defendant engaged in offering special pricing arrangements which were discriminatory and lessened competition, and that plaintiff was discharged from his position of supervising retail salesmen to prevent discovery and prosecution of the antitrust violations and because plaintiff refused to participate in and objected to such antitrust violations, all of which resulted in the loss of bonus compensation as a result of diminished sales and in the loss of his job.

In analyzing whether plaintiff has standing to bring his antitrust action pursuant to section 4 of the Clayton Act, we are guided by recent decisions of our Third Circuit in cases such as *Bravman v. Bassett Furniture Industries, Inc., 552 F.2d 90 (3d Cir. 1977)*; *Cromar Co. v.* ***[**8]*** *Nuclear Materials & Equipment Corp., 543 F.2d 501 (3d Cir. 1976)*, and *Int'l Ass'n, etc. v. United Contractors Ass'n, Inc., 483 F.2d 384 (3d Cir. 1973)*, amended, *494 F.2d 1353 (1974)*. See also *Bogus v. American Speech & Hearing Ass'n, 582 F.2d 277 (3d Cir. 1978)*. In Bravman, Judge Gibbons reviewed the prior decisions in this circuit concerning section 4 standing; he specifically rejected a per se rule that would deny standing to an employee or that would limit standing to competitors, and adopted the following balancing test enunciated by Judge Garth in *Cromar, supra, 543 F.2d at 506*:

> *HN4*[] Each case, therefore, must be carefully analyzed in terms of the particular factual matrix presented. In making this factual determination courts must look to, among other factors, the nature of the industry in which the alleged antitrust violation exists, the relationship of the plaintiff to the alleged violator, and the alleged effect of the antitrust violation upon the plaintiff. Then, while recognizing that breaches of the antitrust laws have effects throughout society, a court must decide whether this plaintiff is one "whose protection is the fundamental purpose of the antitrust laws." *In re [**9] Multidistrict Vehicle Air Pollution, (481 F.2d 122*) at 125 ((9th Cir.), Cert. denied, *414 U.S. 1045, 94 S. Ct. 551, 38 L. Ed. 2d 336 (1973))*.

In adopting this test, Judge Gibbons in Bravman stated that *HN5*[] "§ 4 standing analysis is essentially a balancing test comprised of many constant and variable factors and . . . there is no talismanic test capable of resolving all § 4 standing problems." *552 F.2d at 99*. In Bravman, the Court found section 4 standing in an action brought by a manufacturer's sales representative against the manufacturer which he represented, where it was alleged that the manufacturer had committed antitrust **[*1116]** violations by restraining the plaintiff from dealing with other manufacturers and by limiting him to sales in a specified territory. On the basis of his examination of Bravman's relationship to the manufacturer, Bravman's position in the area affected by the alleged anticompetitive acts and the directness of the injury to plaintiff, as well as the Congressional policies underlying section 4, Judge Gibbons concluded that Bravman had section 4 standing.

To determine whether plaintiff has standing to bring this action, we shall, therefore, **[**10]** examine the plaintiff's allegations in accordance with the test enunciated by Judge Garth in Cromar and applied by Judge Gibbons in Bravman. We shall proceed, therefore, to examine and weigh all of the plaintiff's allegations to determine whether the plaintiff has standing in accordance with section 4 of the Clayton Act, which confers standing on "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws."

As a first step in our analysis, we have considered the recent decision of the United States Supreme Court in *Reiter v. Sonotone Corp., 442 U.S. 330, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)*. In Reiter, in discussing the meaning of the phrase "business or property" as used in section 4 of the Clayton Act, the Court reasoned that the word "or" in section 4 makes it clear that the word "business" was not intended to modify the word "property," nor was "property" intended to modify "business." In rejecting an interpretation of section 4 which would require an injury to "business activity or property related to one's business," Chief Justice Burger [1.] stated:

[11]**

> That strained construction would have us ignore the disjunctive "or" and rob the term "property" of its independent and ordinary significance; moreover, it would convert the noun "business" into an adjective. In construing a statute we are obliged to give effect, if possible, to every word Congress used. Canons of construction ordinarily suggest that terms connected by a disjunctive be given separate meanings, unless the context dictates otherwise; here it does not. Congress' use of the word "or" makes plain that "business" was not intended to modify "property," nor was "property" intended to modify "business." Id. at -- , *99 S. Ct. at 2331* (citations omitted).

In Reiter, the Court held that consumers who were forced to pay illegally fixed higher prices for hearing aids and related services which they purchased from retail dealers of the manufacturers of the hearing aids had standing under section 4 in that a consumer whose money has been diminished has been injured "in his property." Id. at -- , *99 S. Ct. 2326*. It should therefore follow that *HN6*[] an employee who suffers the loss of his job has been injured in his property. Furthermore, prior to Reiter, Judge Forman, **[**12]** in *Int'l Ass'n, Etc. v. United Contractors Ass'n, Inc., 483 F.2d 384 (3d Cir. 1973)*, amended, *494 F.2d 1353 (1974)*, had little difficulty in determining that the loss of employment is an injury to a person's "business or property," citing with approval *Nichols v. Spencer Int'l Press, Inc., 371 F.2d 332, 334 (7th Cir. 1967)*, wherein the Seventh Circuit stated that "the interest invaded by a wrongful act resulting in loss of employment is so closely akin to the interest invaded by impairment of one's business as to

---

1. All members of the Court joined in the opinion of Chief Justice Burger except Justice Brennan who took no part in the decision of the case. Justice Rehnquist filed a concurring opinion.

be indistinguishable in this context." That the loss of employment constitutes an injury to one's business or property is also supported by other cases within and without this circuit. See *Quinonez v. Nat'l Ass'n of Securities Dealers, Inc., 540 F.2d 824, 829-30 (5th Cir. 1976)*; *Tugboat, Inc. v. Mobile Towing Co., 534 F.2d 1172, 1176 (5th Cir. 1976)*; *Dailey v. Quality School Plan, Inc., 380 F.2d 484 (5th Cir. 1967)*; *Roseland v. Phister Manufacturing Co., 125 F.2d 417 (7th Cir. 1942)*; *DeGregorio v. Segal, 443 F. Supp. 1257, 1261 (E.D.Pa.1978)*; Broyer v. B. F. Goodrich Co., 1977-1 Trade Cases P 61,346 (E.D.Pa.1977); *Drysdale v. Florida **[*1117]** Team Tennis, Inc., 410 F. **[**13]** Supp. 843 (W.D.Pa.1976)*. In addition to alleging the loss of his employment, the plaintiff claims the loss of bonus compensation while employed as a result of diminished sales in his territory. The loss of such bonus compensation is an additional factor which the Court has considered in making a determination as to whether the plaintiff has section 4 standing. As stated by Judge Bell in *Dailey v. Quality School Plan, Inc., supra, 380 F.2d at 487*:

> (T)he loss of employment by a sales supervisor is injury to business or property within the meaning of § 4. (citations)
>
> These commission sales agent cases where a territory has been developed and where the courts treat the relationship as the business of the salesman or sales manager are to be distinguished from those cases where the business or property is that of the corporation and the claim asserted by stockholders or creditors or employees is derivative. (citations)

See also P. Areeda & D. Turner, ***Antitrust Law***, vol. 2, § 338, at 198 (1978).

HN7[] In the process of analyzing this case in terms of the factual matrix presented by the allegations of the complaint, we next consider whether the plaintiff's alleged injuries **[**14]** to his "business or property" resulted "by reason of anything forbidden in the antitrust laws." This requirement for section 4 standing has been given a variety of labels by the courts. As Judge Gibbons states in Bravman, "Some courts have enunciated these limitations on § 4 standing under the rubric of "direct injury,' others have used the expression "target area,' and more recently one court has used the term "zone of interest.' " *552 F.2d at 96-97* (footnotes omitted). In Bravman and Cromar this factor is referred to as the "directness of the injury" claimed to have resulted from the alleged antitrust violation. The plaintiff claims that as a direct result of the antitrust violation he was discharged from his position of supervising retail salesmen for the purpose of preventing discovery and prosecution of the antitrust violations and because he refused to participate in and objected to the antitrust violations. Plaintiff has also alleged that on the day his employment was terminated he was asked to sign papers which sought to prohibit him from disclosing the alleged antitrust violation. There is no question, therefore, that in our consideration of the "directness of the injury" **[**15]** factor the plaintiff has clearly alleged that the loss of his employment was a direct result of the antitrust violations. Additionally, we have taken into consideration the fact that the plaintiff claims that as a result of the alleged antitrust violations he also lost certain bonus compensation. See, e.g., *Dailey v. Quality School Plan, Inc., supra.*

Finally, in applying the Cromar-Bravman analysis, we must consider the Congressional policies underlying section 4 and determine whether the plaintiff is "one whose protection is the fundamental purpose of the antitrust laws." *Bravman, supra, 552 F.2d at 99*; *Cromar, supra, 543 F.2d at 506* (quoting *In re Multidistrict Vehicle Air Pollution, 481 F.2d 122, 125* (9th Cir.), Cert. denied, *414 U.S. 1045, 94 S. Ct. 551, 38 L. Ed. 2d 336 (1973))*. As heretofore pointed out, the plaintiff claims that the defendant violated the antitrust laws by offering discriminatory pricing arrangements and that the defendant fired him in order to prevent discovery and prosecution in connection with the alleged antitrust violations and because the plaintiff refused to participate in and objected to the illegal activity. We must determine whether Congress, in **[**16]** enacting section 4, intended to grant standing to a person such as the plaintiff. Although neither party to this action has called this Court's attention to anything in the legislative history of section 4 which is dispositive of whether Congress intended to confer standing on, and thereby protect, an employee who refused to participate in an illegal pricing arrangement or any other type of antitrust violation, it would be difficult for this Court to conclude that Congress intended to exclude from the remedies provided by section 4 an employee discharged by a defendant for the purpose of preventing discovery and prosecution of antitrust violations and because that employee refused to participate in the illegal activity. **[*1118]** Congress created the treble damage remedy of section 4 for the obvious purpose of encouraging individuals to challenge antitrust violations. The treble damage remedy, originally enacted in 1890 as section 7 of the Sherman Act, was intended by Congress as an antitrust weapon "available to the people." 21 Cong.Rec. 3146 (1890). ***HN8***[] Section 4 of the Clayton Act, which superseded section 7 of the Sherman Act, was intended to "open the door of justice to every **[**17]** man, whenever he may be injured by those who violate the antitrust laws." 51 Cong.Rec. 9073 (1914). The importance of the deterrence policy of section 4 has been stressed repeatedly by the courts. The Supreme Court in *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*, after examining the legislative history of section 4 of the Clayton Act, stated that it was "conceived primarily as open(ing) the door of justice to every man . . . and giving the injured party ample damages for the wrong suffered." *Id. at 486 n. 10, 97 S. Ct. at 696* (quoting 51 Cong.Rec. 9073 (1914)). In answer to the defendant's contention that a determination that the plaintiff has section 4 standing will significantly burden crowded court dockets, we again refer to the recent decision of the United States Supreme Court in *Reiter v. Sonotone Corp., 442 U.S. 330, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)*, where the Court responded to such a contention by stating:

> That may well be true but cannot be a controlling consideration here. We must take the statute as we find it. Congress created the treble-damages remedy of § 4 precisely for the purpose of encouraging **[**18]** Private challenges to antitrust violations. These private suits provide a significant supplement to the limited resources available to the Department of Justice for enforcing the antitrust laws and deterring violations. . . . To be sure, these private suits impose a heavy burden on the federal courts; it is the clear responsibility of Congress to provide the judicial resources necessary to execute its mandates. Id. at -- - --, *99 S. Ct. at 2333-34* (emphasis in original).

Further, one cannot ignore the broad scope of the "any person" wording of section 4, particularly in light of the absence of any language of limitation in that section. As the Supreme Court declared in *Radovich v. National Football League, 352 U.S. 445, 454, 77 S. Ct. 390, 395, 1 L. Ed. 2d 456 (1957)*, courts "should not add requirements to burden the private litigant beyond what is specifically set forth by Congress in those (antitrust) laws." We conclude, therefore, that the plaintiff's complaint sufficiently portrays "one whose protection is the fundamental purpose of the antitrust laws."

Having completed the analysis of plaintiff's allegations and having weighed the factors delineated in Cromar **[**19]** and Bravman, we conclude that the plaintiff has standing pursuant to section 4 of the Clayton Act.

In Count II of his complaint, plaintiff alleges that his discharge from employment with the defendant constituted a wrongful breach of a contractual relationship. Specifically, plaintiff alleges that his discharge "was effectuated in a manner in violation of the standard corporate policy and procedure on employee termination, without opportunity for the Plaintiff to offer any defense, without proper hearing, contrary to oral assurances made to him by Borden and relied upon by him. . . ." Complaint P 36.

HN9[] Under Pennsylvania law [2.] an employment contract which contains no specific provision respecting duration or termination is presumed to be terminable at will by either party for any or no reason, unless the party asserting a contrary construction can offer evidence to rebut the presumption. *Bravman v. Bassett Furniture Industries, Inc., supra, 552 F.2d at 92*; *Geary v. United States Steel Corp., 456 Pa. 171, 319 A.2d 174, 176 (1974)*; *Lubrecht v. Laurel Stripping Co., 387 Pa. 393, 396, 127 A.2d 687, 689 **[*1119]** (1956)*. The plaintiff may overcome this presumption by showing the **[**20]** intent of the parties that the contract last for some definite period of time or for a reasonable time, or by showing that the plaintiff-employee gave the defendant-employer consideration in addition to the employee's normal services, such as sacrificing other employment opportunities. See, e.g., *Marder v. Conwed Corp., 75 F.R.D. 48, 55-57 (E.D.Pa.1977)*. Plaintiff's complaint clearly alleges that plaintiff, during his period of employment with the defendant, rejected many other offers of employment, both within and outside the food industry, in reliance upon representations made to him by his superiors that he would eventually be promoted to at least the position of District Manager and possibly higher. Complaint P 32. If these allegations were established at trial, it would not be unreasonable for a trier of fact to conclude that the parties intended plaintiff's employment to extend for a reasonable time or that plaintiff's sacrifice of other employment opportunities constituted additional consideration rendered by the plaintiff, thereby extending the duration of the employment contract for a reasonable period of time. See *Bravman v. Bassett Furniture Industries, Inc., supra, **[**21]** 552 F.2d*

---

2. There is no dispute that Pennsylvania law applies to the wrongful breach of contractual relationship claim alleged in Count II of the complaint. The Court has diversity jurisdiction of this claim.

at 93; O'Neill v. ARA Services, Inc., 457 F. Supp. 182, 185 (E.D.Pa.1978). Thus, Count II of the complaint states a claim for wrongful breach of a contractual relationship upon which relief can be granted and should not be dismissed.

Even if the plaintiff has not sufficiently alleged either that the parties intended that the contract last for a reasonable period of time or that he gave additional consideration, thereby extending the contract, Count II should not be dismissed for another reason. Although the Pennsylvania Supreme Court in Geary v. United States Steel Corp., supra, held narrowly that **HN10**[] an employee at will generally has no right of action against his employer for wrongful discharge, it suggested that a discharge might plausibly give rise to a cause of action where the employer is motivated **[**22]** by a specific intent to cause harm to the employee or where a clear mandate of public policy is violated by the discharge. Id. 456 Pa. at 178, 319 A.2d 174; See O'Neill v. ARA Services, Inc., supra, 457 F. Supp. at 186; Reuther v. Fowler & Williams, Inc., 255 Pa.Super. 28, 386 A.2d 119, 120 (1978). Plaintiff in the instant case alleges that defendant discharged plaintiff because of his refusal to cooperate in the special pricing arrangements and in order to prevent discovery of and interference with the pricing scheme. This allegation, together with the allegation that defendant made false statements to others which were designed maliciously to injure plaintiff's ability to obtain new employment, if proved at trial, could support a conclusion by the trier of fact that defendant's discharge of plaintiff was motivated by a specific intent to cause harm to the plaintiff. Furthermore, plaintiff has alleged that a clear mandate of public policy has been violated by the discharge for two reasons. Plaintiff contends first that he was discharged because of his refusal to commit a crime, and, second, that his discharge was an act in furtherance of the allegedly illegal pricing scheme. [3] **[**23]** See Broyer v. B. F. Goodrich Co., C.A. No. 75-2288 (E.D.Pa. Jan. 11, 1978) (Bench Memorandum); Reuther v. Fowler & Williams, Inc., supra, 386 A.2d at 120 (employee discharged for serving jury duty); Petermann v. Int'l Brotherhood of Teamsters, 174 Cal.App.2d 184, 344 P.2d 25 (1959) (employee discharged for refusal to commit perjury); Frampton v. Central Indiana Gas Co., 260 Ind. 249, 297 N.E.2d 425 (1973) (employee discharged for filing claim against employer under workmen's compensation statute); Monge v. Beebe Rubber Co., 114 N.H. 130, 316 A.2d 549 (1974) (employee discharged for refusal to accept social invitations of foreman).

[*1120] Defendant's motion to dismiss Count II of the complaint for failure to **[**24]** state a claim upon which relief can be granted must, therefore, be denied.

In Count III of his complaint, plaintiff alleges that "by virtue of the knowing and malicious dissemination of untrue accusations concerning the Plaintiff . . . Defendant has intentionally and maliciously libeled and slandered Plaintiff. . . ." Complaint P 38. Plaintiff specifically alleges that Borden's version of plaintiff's discharge, which included representations that plaintiff was negligent in performing his duties and was responsible for, and made false statements in connection with, the spoiling of $ 80,000 worth of cheese, was communicated by Mr. Matthews and other Borden representatives to the Pennsylvania Unemployment Compensation Board, to prospective employers, and to identified employees of Food Fair and Acme Markets. Complaint PP 28-30. Plaintiff also alleges that these false statements were communicated maliciously and were intended to injure plaintiff's ability to obtain new employment, and that these statements have in fact injured his good name and business reputation and prevented him from obtaining employment.

HN11[] To state a cause of action for defamation, generally the plaintiff must **[**25]** allege the defamatory character of the communication, publication, that the communication refers to the plaintiff, the third-party's understanding of the communication's defamatory character and its reference to the plaintiff, and injury; malice is essential to an action for defamation in Pennsylvania. [4] Quinones v. United States, 492 F.2d 1269, 1274 (3d Cir. 1974); Keddie v. Pennsylvania State University, 412 F. Supp. 1264, 1276 (E.D.Pa.1976); Corabi v. Curtis Publishing Co., 441 Pa. 432, 273 A.2d 899 (Pa.1971); See 12 P.S. § 1584a. Plaintiff's allegations include each of

---

[3] The Court notes that failure to adhere to certain stated guidelines or policies by an employer in discharging an employee does not create a cause of action for breach of an employment contract. See Beidler v. W. R. Grace, Inc., 461 F. Supp. 1013, 1015 (E.D.Pa.1978) and cases cited therein.

[4] There is no dispute that Pennsylvania law applies to the defamation claim alleged in Count III of the complaint.

these elements which he will have the burden of proving at trial. Furthermore, the statements complained of are clearly capable of defamatory meaning. See *Fram v. Yellow Cab Co., 380 F. Supp. 1314, 1326-27 (W.D.Pa.1974)*; *Vitteck v. Washington Broadcasting Co., Inc., 256 Pa. Super. 427, 389 A.2d 1197, 1199 (1978)*. Therefore, defendant's motion to dismiss Count III of the complaint must be denied. [5.]

[26]** Accordingly, an order will be entered denying defendant, Borden, Inc.'s, motion to dismiss the complaint for failure to state a claim upon which relief can be granted.

End of Document

[5.] Despite defendant's contention that communications to the Unemployment Compensation Board and to prospective employers are privileged, See, e.g., *Underwood v. Maloney, 152 F. Supp. 648, 682 (E.D.Pa.1957)* (citing *Wagner v. Bell, 70 D&C 411 (C.P.Lehigh 1949))*, the motion to dismiss the defamation claim must nevertheless be denied because plaintiff has alleged communication of the alleged defamatory statements to employees of Food Fair and Acme Markets.

Although the Federal Energy Regulation Commission lacks authority to adjudicate violations of the antitrust laws, it must consider competitive factors when acting under the public interest mandate of the Federal Power Act (Act). FERC has responsibility to consider, in appropriate circumstances, the anticompetitive effects of regulated aspects of interstate utility operations pursuant to §§ 202 and 203 of the Act, *16 U.S.C.S. §§ 824a-824b*, and under like directives contained in §§ 205, 206, and 207 of the Act, *16 U.S.C.S. §§ 824d-824f*.

HN2[] **Pipelines & Transportation, Electricity Transmission**

Power pooling arrangements, rather than unrestrained competition between electric facilities, are in the public interest. For the purpose of assuring an abundant supply of electric energy throughout the United States with the greatest possible economy and with regard to the proper utilization and conservation of natural resources, the Federal Energy Regulation Commission (FERC) is empowered and directed to divide the country into regional districts for the voluntary interconnection and coordination of facilities for the generation, transmission, and sale of electric energy. It shall be the duty of FERC to promote and encourage such interconnection and coordination within each such district and between such districts.*16 U.S.C.S. § 824a(a)*.

HN3[] **Energy & Utilities, US Federal Energy Regulatory Commission**

When the Federal Energy Regulatory Commission (FERC) determines the lawfulness of a power pooling arrangement challenged on antitrust grounds, it is to be guided by the clear congressional policy of § 202(a) of the Federal Power Act, *16 U.S.C.S. §824a(a)*. Specifically, FERC must consider whether the arrangement imposes negative restrictions on competition, whether such restrictions are reasonably related to valid purposes of the power pool, and whether the arrangement is, on the whole, in the public interest.

Energy & Utilities Law > Pipelines & Transportation > Electricity Transmission

Energy & Utilities Law > Regulators > US Federal Energy Regulatory Commission > General Overview

Energy & Utilities Law > Electric Power Industry > Federal Power Act > General Overview

Energy & Utilities Law > Electric Power Industry > State Regulation > General Overview

HN4[] **Pipelines & Transportation, Electricity Transmission**

Under § 202(b) of the Federal Power Act, *16 U.S.C.S. § 824a(b)*, the Federal Energy Regulatory Commission (FERC), upon application of a state commission or a person engaged in the sale or transmission of electrical energy, may order a public utility to establish physical connection of its transmission facilities with another electric system and sell or exchange energy. FERC may not compel the enlargement of generating facilities for such purpose or impose undue burden upon such public utility.

Energy & Utilities Law > Pipelines & Transportation > Electricity Transmission

Opinion by: TAMM

Opinion

[*1160] This case involves challenges to provisions of the Mid-Continent Area Power Pool (MAPP) Agreement. The Federal Power Commission (Commission) found that the membership criteria of the Agreement were discriminatory and ordered modifications. [1] The Commission approved the Agreement in all other respects. For the reasons that follow, we affirm the Commission's decision.

BACKGROUND

In 1972, thirty-one electric power systems signed the MAPP Agreement. [2] The original parties to the Agreement were twelve investor-owned utilities, [3] **[**4]** eight cooperative corporations, [4] eight municipal systems, two **[**3]** state public power districts, and the Federal Bureau of Reclamation. [5] The Agreement covers the mid-continent area of Minnesota, Iowa, North and South Dakota, Nebraska, eastern Montana, western Illinois, and Wisconsin. [6]

The Agreement is designed to promote reliable and economical operation of the interconnected electric network in the mid-continent area, primarily through reserve sharing to back up large generating units. [7] **[**6]** **[*1161]**

---

* Sitting by designation pursuant to 28 U.S.C. § 292(a).

Opinion for the court filed by TAMM, Circuit Judge.

1 The Commission functions involved in this case were transferred to the Federal Energy Regulatory Commission (FERC) on October 1, 1977, pursuant to section 402 of the Department of Energy Organization Act, *42 U.S.C.A. § 7172(a) (1978)*. See Exec. Order No. 12,009, *42 Fed.Reg. 46267 (1977)*. FERC was substituted as respondent in this case in accordance with *42 U.S.C.A. § 7295(e) (1978)*.

2 Joint Appendix (J.A.) II at 345 (Initial Decision on a Power Pool Agreement). The Commission adopted the findings of the administrative law judge (ALJ) with respect to the procedural background of the case, the nature of the electric utility industry in the mid-continent area, the history of coordination leading to the Agreement, and the Agreement itself. Id. at 403.

3 The investor-owned utilities are "public utilities" within the meaning of section 201 of the Act, *16 U.S.C.A. § 824 (Supp.1979)*. Neither the Department of Energy Organization Act, Pub.L.No. 95-91, 91 Stat. 565 (1977), nor Title I of the Public Utility Regulatory Policies Act of 1978, Pub.L.No. 95-617, 92 Stat. 3117, applies to this proceeding. See *42 U.S.C.A. § 7295(c) (1978)*; *16 U.S.C.A. § 824* note (Supp. 1979). In citing to pertinent statutes, we therefore refer to those in force at the time of the Commission's decision.

4 The operations of the cooperative corporations are financed, in whole or in part, by the Rural Electrification Administration. See *7 U.S.C. § 904 (1976)*.

5 The MAPP Agreement is applicable to a specific electric system operated by the Bureau of Reclamation in the Eastern Division of the Pick-Sloan Missouri Basin Program. J.A. II at 255.

The power marketing functions of the Bureau of Reclamation have been transferred to the Secretary of the Department of Energy and are exercised by a separate administration within that department. *42 U.S.C.A. § 7152(a) (1978)*; See *43 U.S.C. § 485h(c) (1976)* (authority to sell electric power in connection with federal reclamation projects). In marketing electric power, the Bureau of Reclamation is required to give preferences to municipalities and other public corporations or agencies. Id.

6 J.A. II at 349.

7 Id. at 356. The ALJ described the Agreement as follows:

Although the Agreement **[**5]** does not establish a fully integrated electric system with central dispatch of generating units, it provides a mechanism for coordinated daily operation of generation facilities and seeks to promote the staggered construction of new generation units. [8] **[**7]** Each participant retains responsibility for serving its customers' demands. [9] Exchanges of power under the Agreement are on a short-term basis and may not be used to fulfill long-term needs. The Agreement does not preclude participants from entering into other joint arrangements for power pooling, nor does it compel or restrict installation of new facilities. [10]

The MAPP participants filed the Agreement with the Commission as required under section 205 of the Federal Power Act (Act), *16 U.S.C. § 824d (1976)*. After hearings, [11] an administrative law judge (ALJ) approved the Agreement in its entirety. Joint Appendix (J.A.) II at 345. On review of the ALJ's decision, the Commission held that, with the exception of the membership provisions, the Agreement was just, reasonable, and nondiscriminatory and did not violate ***antitrust law*** or policy. Id. at 403.

Three sets of petitioners seek review of the **[**8]** Commission's decision in this court. Petitioners Alexandria Board of Public Works, et al. (Alexandria) consist primarily of municipal electric utility systems, rural electric cooperatives, farm organizations, and state power-planning agencies in the mid-continent area. [12] **[**9]** Petitioner Public Utilities

---

The MAPP Agreement itself is 72 pages long. It covers objectives, conditions of membership, relationships to other agreements, committees, committee organization, obligations of the parties (such as maintenance of adequate capabilities and operating reserves, service obligations, and services to be rendered), and participation by the United States Bureau of Reclamation and by the Manitoba Hydro-Electric Board. In addition, the Agreement contains a number of service schedules dealing with wheeling services and interchange services for participation power, emergency and scheduled outages, operating reserves, economy energy, operational control energy, and peaking, short-term and firm power. Exhibit A to the Agreement contains a list of the points of interconnection through which power and energy may be interchanged between the Participants (Exh. No. 935).

Id. at 355.

8 Id. at 243, 358. In The 1970 National Power Survey, the Commission discussed the advantages of staggered construction:

Staggered construction is a technique which involves construction of excess capacity by one utility for the use of one or more other utilities with the supplier-buyer arrangement being reversed or modified with each succeeding unit. Several variations of this practice are widely used. Sometimes adjacent systems informally coordinate their capacity additions over a period of several years so that the total installed capacity reserve approximates the amount required by the entire geographic area. Each individual system's reserve in percent of peak-hour load may vary widely from year to year, but the total peak-hour reserves for the group are maintained at approximately a constant level.

A refinement of this coordinating technique includes short-term capacity transactions which permit a system to install a larger unit than its own immediate needs require and to sell firm capacity to neighboring systems for one or more years. Later this utility purchases firm capacity from neighboring systems for a period of time and then repeats the cycle by installing an even larger generating unit. This arrangement has found general acceptance by some power pools and other coordinating groups since each member can achieve benefits from economy of scale and maintain most economically the installed capacity reserves required by the coordinating group.

Another form of staggered construction which has gained widespread acceptance in recent years is the unit-sale concept. This entails arrangements whereby a system installs a larger unit than it otherwise normally would, and sells a specified amount of excess capacity from that unit to one or more neighboring systems. The purchaser's entitlement is limited to the availability of capacity from the specific unit. In the event of an outage of such unit, the buyer is not entitled to any portion of the supplier's other capacity resources. Rates for unit sale transactions usually reflect actual capacity and energy costs from the specific unit involved.

Federal Power Commission, The 1970 National Power Survey at I-17-23 (1971).

9 J.A. II at 238, 356.

10 Id. at 356.

11 The Commission conducted a hearing on the Agreement under, Inter alia, section 206 of the Act, *16 U.S.C. § 824e (1976)*. The burden of showing that an initial rate filing is unlawful under section 206 rests on those attacking the filing. See *Municipalities of Groton v. FERC, 190 U.S.App.D.C. 399, 403 n.3, 587 F.2d 1296, 1300 n.3 (1978)*.

[*1162] Commission of the State of South Dakota (South Dakota) is authorized under the laws of South Dakota to determine rates for private electric companies, define service territories for cooperative, municipal and private electric systems, rule on some securities matters and license certain plant facilities. [13] Petitioners Central Iowa Power Cooperative, et al. (Central Iowa) are the original full membership nonfederal participants in the Agreement. [14]

ANTITRUST CONTENTIONS

Alexandria attacks the Commission's approval of the MAPP Agreement primarily on antitrust grounds. ***HN1***[] Although the Commission lacks authority to adjudicate violations of the antitrust laws, it must consider competitive factors when acting under the public interest mandate of the Act. *Central Power & Light Co. v. FERC, 188 U.S.App.D.C. 56, 57, 575 F.2d 937, 938* (per curiam), Cert. denied, *439 U.S. 981, 99 S. Ct. 568, 58 L. Ed. 2d 652 (1978)*. **[**10]** In *Gulf States Utilities Co. v. FPC, 411 U.S. 747, 93 S. Ct. 1870, 36 L. Ed. 2d 635 (1973)*, the Supreme Court stated that the Commission has "responsibility to consider, in appropriate circumstances, the anticompetitive effects of regulated aspects of interstate utility operations pursuant to §§ 202 and 203, and under like directives contained in §§ 205, 206, and 207" of the Act. [15] *Id. at 758-59, 93 S. Ct. at 1878*; See *FPC v. Conway Corp., 426 U.S. 271, 278-79, 96 S. Ct. 1999, 48 L. Ed. 2d 626 (1976)*.

Congress has decided, as a matter of general policy, that ***HN2***[] power pooling arrangements, rather than unrestrained competition between electric facilities, are in the public interest. Section 202(a) of the Act, *16 U.S.C. § 824a(a) (1976)*, provides:

> For the purpose of assuring an abundant supply of electric energy **[**11]** throughout the United States with the greatest possible economy and with regard to the proper utilization and conservation of natural resources, the Commission is empowered and directed to divide the country into regional districts for the voluntary interconnection and coordination of facilities for the generation, transmission, and sale of electric energy . . . . It shall be the duty of the Commission to promote and encourage such interconnection and coordination within each such district and between such districts.

In enacting this section, Congress was "confident that enlightened self-interest will lead the utilities to cooperate . . . in bringing about the economies which can alone be secured through . . . planned coordination." S.Rep.No.621, 74th Cong., 1st Sess. 49 (1935). [16]

---

[12] Brief for Petitioners Alexandria Board of Public Works, et al. (Alexandria) at 11-12. Alexandria describes itself as

forty municipalities operating electric utility systems, forty rural electric cooperatives, four major farm organizations, two Kansas power-planning agencies, Kansas Municipal Utilities (a state-wide association of municipal electric systems), Montana Associated Utilities, Inc. (a state-wide association of rural cooperatives), the Burt County Public Power District (Nebraska), Mid-West Electric Consumers Association, Missouri Basin Municipal Power Agency, and the Mayor of Sioux Center, Iowa.

Mid-West Electric Consumers Association is a trade association of consumer-owned utilities scattered throughout Colorado, Kansas, Wyoming, Montana, Nebraska, North Dakota, South Dakota, Minnesota and Iowa. The Missouri Basin Municipal Power Agency ("MBMPA") is a nonprofit organization of 64 municipal electric utilities serving a population base of approximately 220,000 in the states of Iowa, Minnesota, and South Dakota.

Id.

[13] Brief of the Public Utilities Commission of the State of South Dakota (South Dakota) at 4-5. Four of the six private, investor-owned utilities that provide service in South Dakota are participants in the MAPP Agreement. Most of the rural electric cooperatives and municipal electric systems in the state depend on other suppliers for generation. Id. at 5.

[14] Brief for Petitioners Central Iowa Power Cooperative, et al. (Central Iowa) at 6. MAPP membership was of two types: full membership participants who enjoyed all the benefits of the Agreement and associate participants who had limited privileges. See text at 1170-1172 Infra.

[15] These sections of the Federal Power Act appear at *16 U.S.C. §§ 824a*, *824b*, *824d*, *824e*, and *824f (1976)* respectively. The Commission acted in this case under sections 202, 205, and 206 of the Act.

[12]** **[*1163]** Thus, ***HN3***[] when the Commission determines the lawfulness of a power pooling arrangement challenged on antitrust grounds, it is to be guided by the clear congressional policy of section 202(a). Specifically, the Commission must consider whether the arrangement imposes negative restrictions on competition, whether such restrictions are reasonably related to valid purposes of the power pool, and whether the arrangement is, on the whole, in the public interest. See generally *City of Huntingburg v. FPC, 162 U.S.App.D.C. 236, 238, 498 F.2d 778, 788 (1974)*. See also *Northern Natural Gas Co. v. FPC, 130 U.S.App.D.C. 220, 226-28, 399 F.2d 953, 959-61 (1968)*.

Alexandria presents several antitrust arguments. First, it alleges that the MAPP Agreement represents unlawful price-fixing under *section 1* of the Sherman Act, *15 U.S.C. § 1 (1976)*, and *section 10(h)* of the Federal Power Act, *16 U.S.C. § 803(h) (1976)*. The Agreement contains a series of service schedules [17] that set forth rates for the furnishing of power thereunder. Alexandria presented no evidence directly related to these schedules, but contended that the schedules represented per se violations of the antitrust laws. The **[**13]** ALJ ruled, and the Commission agreed, that the rate schedules did not constitute unlawful price-fixing. The ALJ explained:

> This is not a combination of sellers conspiring to fix a uniform price in which they will sell goods to outside parties. It is a group of participants who expect over the course of time to be buyers as often as they are sellers. This concept is basic to the equitable utilization of the MAPP service schedules. [18]

[14]**

We hold that establishing a price for the short-term power services available under the Agreement is reasonably necessary to the functioning of the cooperative arrangement undertaken pursuant to section 202. Although the pricing provisions restrict competition in transactions between pool members, they insure that costs and benefits of

---

[16] A noted commentator has explained the advantages of coordination:

There are two major benefits that can be achieved through pooling: (1) pools, properly planned and operated, can substantially improve the systems' reliability at considerably reduced cost; (2) pooling can result in large cost savings in the production and the transmission of power.

Pooling arrangements are basically of two types. The first is designed primarily to accomplish a high degree of operational reliability on a day-to-day basis, but it will usually also reduce the relative cost of providing reliability. . . . The second type is designed to achieve these goals, plus the economies of joint planning and construction of generation and transmission facilities.

Meeks, Concentration in the Electric Power Industry: The Impact of Antitrust Policy, 72 Colum.L.Rev. 64, 101 (1972); See note 8 Supra.

[17] The service schedules are:

Schedule A Participation Power Interchange Service

Schedule B Seasonal Participation Power Interchange Service

Schedule C Emergency and Scheduled Outage Energy Interchange Service

Schedule D Operating Reserve Interchange Service

Schedule E Economy Energy Interchange Service

Schedule F Wheeling Services and Losses

Schedule G Operational Control Energy Interchange Service

Schedule H Peaking Power Interchange Service

Schedule I Short Term Power Interchange Service

Schedule J Firm Power Interchange Service

J.A. II at 269-84.

[18] Id. at 380.

the power pool will be shared fairly and predictably. Moreover, some exchanges of power between the participants may take place so rapidly that price negotiations at the time of exchange would be difficult. [19] Since the schedules are reasonably necessary to the pooling arrangement, we affirm the Commission's judgment that the rate provisions of the various schedules do not render the Agreement inconsistent with the public interest. See *Broadcast Music, Inc. v. CBS, 441 U.S. 1, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*.

Alexandria criticizes the Commission's failure to discuss possible anticompetitive consequences of provisions for "allocation **[**15]** of sales and for boycott of outside systems until MAPP's surpluses are exhausted. **[*1164]** " Brief for Alexandria at 41. Apparently, Alexandria is referring to provisions of the Agreement that permit participants to purchase power from each other on a short-term basis to cover deficiencies in accredited generation capability. [20] Accredited generation capability is essentially the amount of generation capacity a participant must maintain to satisfy its own system demand and meet its reserve obligation to the pool. [21]

Under the Agreement, deficiencies in accredited generation capability may be covered by installation of new generation facilities or by the purchase of power from other suppliers. [22] Participants may purchase power from MAPP members as well as from nonmembers. If a participant elects to purchase outside the pool, the Pool **[**16]** Administrative Committee must determine that the source of supply is reliable. Transactions between pool members are governed by the terms of the Agreement's service schedules. See note 17 Supra.

If a participant fails to make voluntary arrangements for maintaining accredited generation capability, the Pool Administrative Committee will require the deficient member to purchase the necessary power within the pool. The Pool Administrative Committee selects the participant or participants who will supply that power. If surplus power is not available within the pool, the Committee may recommend purchase from nonparticipants.

Central Iowa asserts that Alexandria's claims of sales allocation and boycott are based on a "complete misunderstanding of the way the pool operates." Brief for Central Iowa at 25. It argues that pool members are free under the Agreement to decide whether they will fulfill their accredited generation capability requirement by purchase within or without the **[**17]** pool. *Id. at 25-26*. The ALJ agreed, concluding that the Agreement does not restrict purchases or sales of bulk power. J.A. II at 372.

We hold that the challenged provisions represent the essence of a voluntary agreement for the coordination of facilities to achieve increased reliability and economies in operation. See generally Federal Power Commission, The 1970 National Power Survey at I-17-1 (1971). [23] As we have explained, MAPP seeks to promote reliable operation of the interconnected regional network, primarily through reserve sharing to back up large generating units. To achieve this goal, MAPP members must be able to insure that each party maintains accredited generation capability that can be called upon for reserve energy. If a member decides to maintain accredited generation

---

[19] See Meeks, Supra note 16, at 111-12.

[20] Alexandria does not elaborate its argument in this court and was equally vague before the Commission. See, e. g., J.A. II at 448.

[21] See *id. at 238 (P 15.01)*.

[22] See *id. at 238-40 (Article XV)*.

[23] In The 1970 National Power Survey, Supra note 8, the Commission stated:

Financial benefits are often realized from staggered construction of large generating units, short-term capacity transactions, and interchanges of economy energy. Reduction of installed reserve capacity is made possible by mutual emergency assistance arrangements and associated coordinated transmission planning. Bulk power supply reliability is enhanced by interconnection agreements covering spinning reserves, reactive kilovol-tampere requirements, emergency service, coordination of day-to-day operations, and coordination of maintenance schedules. Also, operating costs may be reduced through coordinated operation of interconnected systems.

Id. at I-17-1.

capability by purchasing outside the pool, MAPP members must be assured that the outside source is reliable. Otherwise, there is no guarantee that reserve energy will actually be available when needed. If a member fails to make voluntary arrangements to cover deficiencies in accredited generation capability, the pool, if it is to maintain overall reserve assurance, must be able to require the deficient **[**18]** member to purchase power. The pool, which lacks authority to compel sales from outside sources, must depend on members with surplus energy to sell power to deficient members. Selection of the selling member or members in accordance with the valid interests **[*1165]** of the pool reasonably furthers the pool's objectives. The challenged provisions of the Agreement clearly do not represent an illegal group boycott or sales allocation scheme, and the Commission did not err in failing to discuss them as such.
[19]**

Alexandria further contends that the Agreement effectively destroys potential competition from nongenerating distribution systems by denying them services essential to their entry into the generating business. According to Alexandria, newcomers may be unable to obtain financing or may be unwilling to make the necessary investment to enter the generation business without commitments for the back-up of any proposed generation unit. Alexandria concludes that the Agreement is unlawful because it limits reserve sharing to participants who own and use generation.

Alexandria relies on *Associated Press v. United States, 326 U.S. 1, 13-14, 65 S. Ct. 1416, 89 L. Ed. 2013 (1945)*, to support its argument that the Agreement's failure to include nongenerating distribution systems is anticompetitive. In that case, the bylaws of a cooperative association engaged in gathering and distributing news prohibited members from selling to nonmembers. The bylaws were designed to destroy competition and effectively did so. In those circumstances, the Supreme Court held that the bylaws violated the antitrust laws.

Alexandria's argument misconceives the thrust of the MAPP Agreement. First, the Agreement does **[**20]** not prohibit or restrict participants from entering into reserve arrangements with nonmember distribution companies. Indeed, the Agreement explicitly recognizes the possibility of such arrangements. [24] Second, nongenerating distribution systems that desire to enter the generating business may submit construction plans to MAPP for consideration and may attend MAPP meetings at which long-range plans are discussed. [25] Under the modified membership provisions, See text at 1170-1172 Infra, any distribution company interconnected with a MAPP participant that wishes to construct generation facilities is assured of eligibility for pool membership, and the consequent benefits of reserve sharing, when the facilities are operational.

The pooling arrangement before us is thus fundamentally different from that presented in *Associated Press v. United States, 326 U.S. at 13-15, 65 S. Ct. 1416*. Cf. *City of Huntingburg v. FPC, 162 U.S.App.D.C. **[**21]** at 239-40, 498 F.2d at 781-82* (case remanded for consideration of anticompetitive effects of pool agreement limiting participant's wholesale power sales to nonmembers). Moreover, the Commission has stated that it will monitor access to the planning functions of MAPP and, if necessary, institute improvements. [26] We affirm the Commission's decision that the failure to include nongenerating distribution systems in MAPP is not anticompetitive and does not render the Agreement inconsistent with the public interest. [27] See *Municipalities of Groton v. FERC, 190 U.S.App.D.C. 399, 401-403, 587 F.2d 1296, 1298-1300 (1978)*. See also *Municipal Electric Association v. FPC, 134 U.S.App.D.C. 310, 313-14, 414 F.2d 1206, 1209-10 (1969)*.

Alexandria also asserts that past conduct by MAPP participants demonstrates the anticompetitive ends of the Agreement. It argues that the Agreement is designed to formalize and perpetuate a set of anticompetitive **[**22]**

---

[24] J.A. II at 243 (P 19.01); See id. at 374-75.

[25] *Id. at 231*; See id. at 377.

[26] *Id at 418*.

[27] See *id. at 410, 417*. See also *id. at 373-74, 385-88*.

practices developed by the participants over several years. The ALJ ruled, and the Commission agreed, that Alexandria failed to produce evidence to support its allegations. [28] **[**23]** We have reviewed **[*1166]** the record in this case and find that there is substantial evidence underlying the Commission's decision. See *Gainesville Utilities Department v. Florida Power Corp., 402 U.S. 515, 526-27, 91 S. Ct. 1592, 29 L. Ed. 2d 74 (1971)* (citing *16 U.S.C. § 825L (b)*). [29]

Alexandria finally interprets the Commission's decision as holding that the Agreement is acceptable as long as it is not more anticompetitive than prior pooling agreements. This is an inaccurate reading of the Commission's decision. In affirming the ALJ's conclusion that MAPP would improve power pooling in the mid-continent area, the Commission stated:

> We do, however, wish to clarify one point. While the Administrative Law Judge is correct that the pooling agreement under consideration need not necessarily advance pooling beyond prior agreements it supersedes, in the event that the new pooling agreement under review reduces competition in contrast to the prior agreements the Commission would have to find in the new pool public interest advancements outweighing the reduction in competition. Since, we find Infra, no reduction in competition resulting from MAPP when properly modified, such a balance is not required.

[24]**

J.A. II at 406 (footnote omitted). [30] The Commission then agreed with the ALJ that Alexandria "(had) not shown that the MAPP Agreement, with the exception of its membership provisions . . . is anticompetitive." *Id. at 408*. In so ruling, the Commission correctly described the role of anticompetitive considerations:

> "(B)ecause competitive considerations are important elements of the public interest, we believe that in a case such as this the Commission was obliged to make findings related to the pertinent antitrust policies, draw conclusions from the findings, and weigh these conclusions along with other important public interest considerations."

Id. at 409 (footnote omitted) (quoting *Northern Natural Gas v. FPC, 130 U.S.App.D.C. **[**25]** at 228, 399 F.2d at 961*). The Commission's analysis of Alexandria's allegations was not based on a comparison of the possible anticompetitive effects of the Agreement with the effects of prior power pools. The Commission considered Alexandria's various antitrust contentions without regard to prior pooling arrangements and held that the Agreement was in the public interest. We are satisfied that the Commission engaged in the appropriate legal analysis.

SCOPE OF MAPP SERVICES

South Dakota argues that the scope of MAPP services is too limited and that the Commission failed fully to consider expanding MAPP services. Specifically, South Dakota asks this court to remand the case to the Commission with

---

[28] *Id. at 382-83, 412-13*. Alexandria also suggests that particular pricing and power exchange procedures within the Agreement are "designed to protect inefficiency." Brief for Alexandria at 49. It refers to rate schedules not based exclusively on cost factors. Alexandria is not contesting the general reasonableness of price levels, See *id. at 449*, but contends that the rate-setting procedures are indicative of MAPP's anticompetitive nature. In upholding the schedules, the ALJ and the Commission relied on the need to stimulate short-term purchases of excess capacity in lieu of adding new capacity and to discourage reliance on emergency energy when units are less efficient. See *id. at 381-82, 411-12* & n.14. We conclude that the Commission's decision that such procedures were not anticompetitive is reasonable.

[29] Thus, we need not consider the Commission's alternate conclusion that even if such conduct has occurred, it is irrelevant to determining the lawfulness of the Agreement.

[30] The Commission apparently was clarifying statements by the ALJ that participation in MAPP did not hamper the competition that does exist, *Id. at 378*, and that the systems not eligible to participate in MAPP were not eligible to participate in prior power pools, *Id. at 387*.

directions to consider whether MAPP participants should be required to construct larger generation units [31] **[**26]** and engage in single system planning with central dispatch. South Dakota bases its arguments on several theories. [32] **[*1167]** Petitioner Alexandria makes substantially the same arguments in its brief.

In responding to the argument that the scope of the MAPP Agreement was too limited, the Commission stated:

> We reject the position of (Alexandria) and South Dakota that MAPP must be transformed from its **[**27]** present limited scope to one offering all conceivable pooling services. While Section 202(a) of the Federal Power Act speaks in terms of "voluntary interconnection and coordination" and to "promote and encourage" the same, the pooling agreement is an FPC tariff which must pass muster under Sections 205 and 206 of the Federal Power Act. For example, we have already found the membership provisions unacceptable. Nevertheless, the scope of a power pool is in the first instance a matter for the utilities involved. The mere fact that a particular pool does not offer the same range of services as another pool does not permit the Commission to direct expansion of the narrower pools' scope. Unless the limited scope of the MAPP Agreement is for some other reason unjust, unreasonable or unduly discriminatory, we are not authorized under Part II of the Federal Power Act to direct the pool to offer more services. While we can and do "encourage and promote" greater use of pooling, the peculiarities of each region necessitate that the member utilities determine the services to be offered. One cannot automatically apply the broader scope of NEPOOL, based upon very different geography, industry history **[**28]** and make-up in New England, to the mid-continent region with its tremendous area, sparse load and different industry make-up.

J.A. II at 420.

We are satisfied that the Commission reached an informed and reasoned decision consistent with congressional purposes. See *Municipalities of Groton v. FERC, 190 U.S.App.D.C. at 402, 587 F.2d at 1299*. [33] **[**30]** Congress has concluded that regional coordination of electric power systems by means of regional power pools is in the public interest. See text at 1162-1163 Supra. Section 202(a) recognizes that power pooling can yield benefits of efficiency and economy. [34] Notwithstanding the desirability of coordination of electric systems, however, Congress

---

[31] Under 202(b) of the Act, *16 U.S.C. § 824a(b) (1976)*, the Commission is expressly prohibited from compelling the enlargement of generation facilities in connection with an order issued under that section.

[32] South Dakota argues that the Commission should have held the Agreement unreasonable under section 206(a) of the Act, *16 U.S.C. § 824e(a) (1976)*, because pool services were limited; that the Commission did not engage in reasoned decisionmaking; that the Commission failed to fulfill its duty under section 202(a) of the Act, *16 U.S.C. § 824a(a) (1976)*, to promote and encourage interconnection and coordination of facilities; and that the Commission erred in holding it has no authority to order increased pool services.

South Dakota also suggests that the Commission failed to carry out its responsibilities under section 207 of the Act, *16 U.S.C. § 824f (1976)*. We do not consider this argument because South Dakota failed to comply with that section's procedural provisions, which require, Inter alia, filing a complaint with the Commission and sending notice to all affected state commissions.

[33] South Dakota suggests that the Commission gave inadequate attention to "national energy policy." Brief for South Dakota at 31-34. Specifically, South Dakota asserts that the Commission failed to act with the requisite urgency to conserve energy and failed to give due regard to coordination with the states. We disagree. The Commission had specific responsibility in this proceeding to decide whether a particular voluntary pool agreement was unjust, unreasonable, or unduly discriminatory. We have no reason to believe that its decision was inconsistent with "national energy policy." However, even if it could be so construed, we recall this court's recent decision in *Richmond Power & Light v. FERC, 187 U.S.App.D.C. 399, 405-06, 574 F.2d 610, 616-17 (1978)* (footnotes omitted):

While an administrative agency must remain faithful to public policies directly related to its regulatory authority, surely at any given moment of history it may rationally decline to affirmatively foster other policies in weighing the specific interests that it is required by statute to consider.

[34] See notes 8, 16, 23 Supra. See also *Municipalities of Groton v. FERC, 190 U.S.App.D.C. at 401, 587 F.2d at 1298*.

decided to make such coordination voluntary, with limited exceptions. [35] See **[*1168]** S.Rep.No.621, 74th Cong., 1st Sess. 19, 49 (1935); H.Rep.No.1318, 74th Cong., 1st Sess. 8, 27-28 (1935). Congress was convinced that "enlightened self-interest" would lead utilities to engage voluntarily in power planning arrangements, and it was not willing to mandate that they do so. S.Rep.No.621, 74th Cong., 1st Sess. 49; See *Otter Tail Power Co. v. United States, 410 U.S. 366, 374, 93 S. Ct. 1022,* ***[**29]*** *35 L. Ed. 2d 359 (1973)*. Given the expressly voluntary nature of coordination under section 202(a), the Commission could not have mandated adoption of the Agreement, and failure of the MAPP participants to establish a fully integrated electric system [36] could not justify rejection of the Agreement filed.

[31]**

The Commission had authority, however, under section 206 of the Act, *16 U.S.C. § 824e (1976)*, to order changes in the limited scope of the Agreement, including the addition of pool services, if, in the absence of such modifications, the Agreement presented "any rule, regulation, practice or contract (that was) unjust, unreasonable, unduly discriminatory or preferential." See *Municipalities of Groton v. FERC, 190 U.S.App.D.C. at 404-06, 587 F.2d at 1301-03*. We agree with South Dakota that the Commission should consider the policies of the Federal Power Act in making a determination under this section. This does not mean, however, that a pooling plan is unlawful under section 206 merely because a more comprehensive arrangement might better achieve the purposes of section 202(a). To so conclude would undermine Congress's determination that coordination under section 202(a) be voluntary. Moreover, we cannot agree with South Dakota that in approving the Agreement the Commission abdicated its duty under section 202(a) to promote and encourage regional interconnection and coordination of electric facilities.

South Dakota also argues that the Commission "erred as a matter of law" in concluding **[**32]** that it could not direct the pool to offer more services even if the pool arrangement were unreasonable. We find the assertion spurious. [37] The Commission **[*1169]** ruled only that Unless the MAPP Agreement was unjust, unreasonable or unduly discriminatory, it lacked statutory authority to compel additional services.

---

[35] ***HN4***[] Under section 202(b), *16 U.S.C. § 824a(b) (1976)*, the Commission, upon application of a state commission or a person engaged in the sale or transmission of electrical energy, may order a public utility to establish physical connection of its transmission facilities with another electric system and sell or exchange energy. The Commission may not compel the enlargement of generating facilities for such purpose or impose undue burden upon such public utility. See also § 202(c), *16 U.S.C. § 824a(c) (1976)* (emergency powers).

[36] The Commission explained the different degrees of power pooling in The 1970 National Power Survey, Supra note 8, at I-17-1 to I-17-2:

There are thousands of arrangements among systems from all segments of the industry providing for various degrees and methods of electrical coordination. These variations reflect differences in load density, characteristics of generating resources, geography, and climate. They are also a product of managerial views with respect to planning, marketing, competition, and retention of prerogatives. Because of these differences, no single definition of coordination has been established by the electric utility industry. As used in this chapter, Coordination is joint planning and operation of bulk power facilities by two or more electric systems for improved reliability and increased efficiency which would not be attainable if each system acted independently. Full coordination involves coordination of all systems within an area, to the extent technologically and economically feasible to permit the serving of their combined loads with a minimum of resources and to exploit opportunities for coordination with adjacent areas.

The highest degree of coordinated planning results when a group of utilities jointly plan, design, and construct their generation and transmission facilities as a single system. However, such coordinating groups must be large enough to take full advantage of the efficient generating units and EHV transmission made available by modern technology, yet be of manageable size with all members capable of sharing the responsibilities of the coordinated effort. Similarly, the highest degree of coordinated operation is achieved when a group of utilities operate all of their bulk power facilities as a single system.

[37] See Brief for South Dakota at 21. We also reject South Dakota's assertion that the Commission's decision should be reversed because the Commission did not reopen the evidentiary proceedings to receive a report prepared by South Dakota in 1977

[33]**

Finally, South Dakota contends that the Commission should have considered ordering MAPP participants to wheel [38] electric power to nongenerating electric systems. This court has previously rejected a similar argument. In *Richmond Power & Light v. FERC, 187 U.S.App.D.C. 399, 574 F.2d 610*, (1978), the court recounted the Supreme Court's decision in Otter Tail Power Co. v. United States:

> "As originally conceived, Part II (of the Federal Power Act) would have included a "common carrier' provision making it "the duty of every public utility to . . . transmit energy for any person upon reasonable request . . . .' In addition, it would have **[**34]** empowered the Federal Power Commission to order wheeling if it found such action to be "necessary or desirable in the public interest.' H.R.5423, 74th Cong., 1st Sess.; S.1725, 74th Cong., 1st Sess. These provisions were eliminated to preserve "the voluntary action of the utilities.' S.Rep.No.621, 74th Cong., 1st Sess. 19.
>
> It is clear, then that Congress rejected a pervasive regulatory scheme for controlling the interstate distribution of power in favor of voluntary commercial relationships."

187 U.S.App.D.C. at 408, 574 F.2d at 619 (quoting *Otter Tail Power Co. v. United States, 410 U.S. at 374, 93 S. Ct. at 1028*). This court concluded that arguments advocating mandatory wheeling in lieu of relying on voluntary wheeling should be addressed to Congress. Id. Although Congress has recently taken action permitting the Commission to order wheeling in certain circumstances, [39] **[**35]** this legislation is inapplicable to the case before us. [40] Given the voluntary nature of power pooling under section 202(a), and Congress's particular determinations with respect to wheeling, we uphold the Commission.

Alexandria argues that the Agreement should have been rejected because it did not offer services beyond those of pools which previously operated in the mid-continent area. The ALJ found, and the Commission agreed, that MAPP is an improvement over earlier pools. [41] In addition, the ALJ and the Commission held that a pool agreement that

---

entitled An Evaluation of Power Supply Planning by the Six-Investor Owned Electric Utilities in South Dakota. Basically, the report concludes that MAPP participants continue to plan and construct "sub-optional" facilities. Brief for South Dakota at 24. The report apparently underlies South Dakota's arguments that the Commission should have ordered pool operations to result in enlargement of generation facilities. See text at -- - U.S.App.D.C. -- , *606 F.2d 1166* Supra. South Dakota first referred to its ongoing "study of the power supply alternatives available to South Dakota" in its brief of exceptions to the ALJ's initial decision. J.A. II at 398. At that time, however, South Dakota specifically indicated that the present proceeding could be concluded without consideration of the report. South Dakota recommended reopening the record only "if the Commission believe(d) additional information would be useful." *Id. at 399*. In its petition for rehearing of the Commission's decision, South Dakota indicated it was prepared to present evidence that the Agreement "fails to establish reasonable mechanisms for more efficient regional planning and construction." *Id. at 439*. South Dakota then suggested that it join with the Commission in further investigation "if the . . . Commission finds the present record inadequate to evaluate the pool agreement and order necessary improvements." Id.

In view of the lack of a firm request for reopening of the record, and our decision with respect to the Commission's authority to mandate enlarged pool services, we cannot say that the Commission abused its discretion in failing to reopen the evidentiary record. See generally *Willis Shaw Frozen Express, Inc. v. ICC, 191 U.S.App.D.C. 1, 7, 587 F.2d 1333, 1339 (1978)*.

[38] ***HN5***[] "Wheeling is broadly defined as "the transfer by direct transmission or displacement (of) electric power from one utility to another over the facilities of an intermediate utility.' " *Richmond Power & Light v. FERC, 187 U.S.App.D.C. at 403 n. 9, 574 F.2d at 614 n. 9* (quoting *Otter Tail Power Co. v. United States, 410 U.S. 366, 368, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973))*.

[39] Under section 203 of the Public Utility Regulatory Policies Act of 1978, Pub.L.No.95-617, 92 Stat. 3136, *16 U.S.C.A. § 824j (Supp.1979)*, the Commission can order wheeling to an applicant electric utility or federal power marketing agency if certain criteria are met relating to conservation, efficiency, reliability, competitive impact, and burdens.

[40] See note 3 Supra.

supersedes a prior arrangement is not unlawful merely because **[*1170]** it does not offer new services. [42] We agree with the Commission on both counts.

The most obvious improvement of the Agreement is enhanced reserve assurance. By combining the pool operations of the Bureau of Reclamation with the various other power pools existing in the mid-continent region, MAPP has increased the number of generating units committed to back up other units in the pool. See generally *Gainesville Utilities Department v. Florida Power Corp.,* ***[**36]*** *402 U.S. at 518-20* & n. 3, *91 S. Ct. 1592*. However, even if a newly filed pool agreement merely streamlined or updated prior agreements without initiating substantive changes in pool services, nothing in sections 202(a), 205, or 206 of the Act suggests that this alone would be sufficient to hold it unlawful. Such a conclusion would be inconsistent with Congress's intent to promote planned coordination of electric systems.

MEMBERSHIP PROVISIONS

Article IV of the Agreement establishes pool membership requirements. Under the Agreement, any "entity engaged in the electric utility business which owns or leases, and controls the operation of, one or more generating units, and which entity is electrically interconnected with one or more Parties to this Agreement" [43] may become a MAPP party. Parties are divided into two classes: participants, who are entitled to representation on all pool committees and participation in the full range of pool services; and associate participants, who are entitled to representation on certain pool committees and participation in pool planning functions. To become a participant, a party is required to meet certain requirements. It must be a party:

[37]**

> a. Whose system is normally operated directly interconnected with two or more electric systems; and
>
> b. Which owns or controls transmission facilities operated at 115 kilovolts or higher forming an integral part of the regional transmission network; and
>
> c. Whose system contributes significantly as determined by the Management Committee to the reliability of the interconnected systems operation; and
>
> d. Which operates or participates in the operation of a 24-hour dispatch center with a terminal on the communication network connecting the Participants.

J.A. II at 221-22. Parties not meeting these criteria are associate participants.

The Commission staff contended before the ALJ that the Agreement created an unreasonable distinction between participants and associate participants. The ALJ nonetheless held the provisions were just, reasonable, and not unduly discriminatory or preferential. [44] On review of the ALJ's decision, the Commission agreed with the staff. It found the distinction between participants and associate participants discriminatory on its face under sections 205 and 206 of the Act. [45] It reversed the ALJ's decision with respect to **[**38]** membership criteria, and held that "as

[43] *Id. at 221*.

[44] *Id. at 384-85*.

[45] The MAPP Management Committee submitted a filing with the Commission on March 6, 1979, which contains new membership provisions. This filing is the subject of ongoing Commission proceedings and we express no view on its merits.

far as access to the operational functions of MAPP, Staff is correct that ownership and use of generation and at least one interconnection is the minimum criterion." *Id. at 417*. [46]

[39]**

[*1171] Both Alexandria and Central Iowa attack the Commission's decision. Alexandria argues that the Commission did not go far enough in ordering modification of the membership provisions and that it should have opened MAPP services to nongenerating distribution systems. Central Iowa argues that there was no evidence to support the Commission's conclusion that the membership provisions were discriminatory and that the Commission unlawfully changed the purposes of the MAPP Agreement.

We are satisfied that the Commission, in modifying the membership provisions, reached a reasoned decision based on substantial evidence. See *16 U.S.C. § 825L (b) (1976)*. See generally *Gainesville Utilities Department v. Florida Power Corp., 402 U.S. at 527, 91 S. Ct. 1592*; *Municipalities of Groton v. FERC, 190 U.S.App.D.C. at 402, 406, 587 F.2d at 1299, 1303*. Insofar as Alexandria attacks the revised membership provisions on specific antitrust grounds, we have previously discussed why that argument is without merit. See text at --, *606 F.2d 1165* Supra. Nongenerating distribution systems are not excluded from participation in MAPP planning functions; nor are MAPP participants prohibited from **[**40]** making reserve generation commitments to distribution systems that desire to enter the generation business. Id. Alexandria implies in its brief that the Agreement will result in the denial of wholesale power to small nongenerating distribution systems. We have no reason to believe, on the record before us, that such conduct will occur. The MAPP Agreement does not apply to long-term wholesale power arrangements and specifically recognizes that participants may freely enter into outside contracts for the sale of electric power. [47]

---

[46] In ordering the modification of the membership provisions, the Commission stated:

We agree with Staff that the membership criteria of Article IV of MAPP are not reasonably related to the MAPP objectives. Those objectives are the effectuation of reserve sharing so as to best develop through coordination reliable and economic generating capacity. As far as access to the operational functions of MAPP, Staff is correct that ownership and use of generation and at least one interconnection is the minimum criterion. The criteria now employed to differentiate Participants from Associate Participants all distill down to size of the system. While the smaller systems could conceivably benefit from MAPP membership, they do not have the transmission facilities to reciprocate in kind for the short-term transmission services included in the MAPP services schedules. Because of the significant advantages flowing from MAPP membership and the corresponding impact of denied access, we do not feel that this size criterion is reasonable. So long as the small utility can provide compensation for the true value of this transmission service, whether in kind or money, the pool should not be injured.

Although the complexities involved in establishing some standard for monetary compensation do not deter the ultimate result that Article IV must be modified, they do cause us to proceed cautiously. Accordingly, we shall hereby direct Commission Staff to initiate dialogue with the MAPP Management Committee to develop a fair and equitable measure of compensation to be paid by those Participants which do not have the transmission wherewithal to reciprocate in kind. This process of modifying the membership provisions should be open so that any electric system in the mid-continent area can observe. Access to the MAPP planning function should also be improved as a part of this modification process. . . .

In making this decision that the membership criteria must be modified, we do not deny the benefits which any utility, including those too small to presently become MAPP Participants, can glean from purely bilateral, non-pool reserve sharing arrangements; however, that fact does not mollify the discrimination inherent in Article IV which we must, under Sections 205 and 206 of the Federal Power Act, remedy. While there is no obligation for utilities in the first instance to have a pooling agreement, if one does exist it must be nondiscriminatory. Within the dynamics of the electric utility industry, the oftentimes subtle and yet significant long-term impact of power pooling demands our close scrutiny of provisions which deny access to the benefits of the pool. Thus the presence of such bilateral arrangements and the absence of denials of membership do not vindicate discrimination inherent in the membership provisions. In this regard, apart from the inherent discrimination Article 4.02(b) and (c) contain standards (forming an integral part of the regional transmission network and contributing significantly to the reliability of the interconnected systems operations) which are not sufficiently quantitative to assure objective and nondiscriminatory interpretation. This problem must be cured when the membership provisions are reformed.

Id. at 417-18.

[47] See, e. g., *id. at 243 (P 19.01), 245 (P 19.09)*.

Further, the current successor to the Bureau of Reclamation is statutorily required to prefer municipal systems and public cooperative corporations in the sale of electric power. [48] The Commission has warned that if **[*1172]** MAPP participants engage in anticompetitive conduct, the conduct will be subject to commission scrutiny. [49]

We also disagree with Central Iowa's contention **[**41]** that the Commission's finding that the membership provisions are unduly discriminatory is unsupported. The MAPP Agreement excludes generating electric systems with only one interconnection and with less than the specified level of transmission capability from participation in MAPP's service schedules, including the reserve energy schedule. These systems could clearly benefit through use of MAPP's services, particularly reserve sharing. [50] See generally *Gainesville Utilities Department v. Florida Power Corp., 402 U.S. at 518-20* & n.3, *91 S. Ct. 1592*. The Commission held that exclusion of the smaller generating systems was not reasonably related to MAPP's objectives and that the pool would not be injured by inclusion of such systems as long as they provide compensation for the true value of transmission services, whether in kind or in money. The Commission directed the MAPP participants and the Commission staff to develop a formula for fair compensation to be paid by those participants unable to reciprocate for transmission in kind. [51] This is a matter well within the Commission's expertise, and we are convinced that its decision is reasonable and supported by substantial evidence. **[**42]** [52] See *Municipalities of Groton v. FERC, 190 U.S.App.D.C. at 406, 587 F.2d at 1303*.

CONCLUSION

The petitioners in this case attack the Commission's decision both for going too far in modifying the MAPP Agreement, and for not going far enough. We have considered all of the arguments raised, and we conclude that the Commission has struck a proper balance in accepting, with modified membership provisions, the Agreement. Therefore, **[**43]** the Commission's decision is

Affirmed.

Opinion by: HILL

Opinion

[*962] This is primarily a price discrimination case brought under Section 2(a) of the Robinson-Patman Act. *15 U.S.C.A. § 13*. We hold that Plaintiffs have failed to allege or prove a discriminatory sale to a favored customer.

I.

The factual background and the course of proceedings relevant to our decision today may be briefly summarized.

In 1964, Plaintiffs, Security Tire & Rubber Company, a Texas Corporation (Security-Texas), **[*963]** and Security Tire & Rubber Company, a Virginia Corporation (Security-Virginia), embarked on a course of dealing with the Defendant, The Gates Rubber Company, a Colorado Corporation (Gates). This course of dealing eventually led to the present litigation.

Defendant Gates is in the rubber manufacturing business. Gates' product line included tires for motor vehicles until the Fall of 1973, when it sold its Nashville, Tennessee tire manufacturing **[**2]** facility to Armstrong Rubber Company. Gates completely ceased tire manufacturing by the Spring of 1974. Plaintiffs, Security-Texas and

Security-Virginia were "private brand" sellers of tires, although Security-Texas was not actively selling tires after early 1970. A "private brand" is a line of tires produced for a customer with a brand name, imprinted on the tires, which is owned by and identified with that customer. The Plaintiffs commenced in their venture in 1964, and from then until the Fall of 1973 they purchased most of their tires from Gates. The Plaintiffs marketed tires under the label of "Security" and did business predominantly in the Southeast United States.

At the outset, the parties operated under a verbal understanding. Subsequently, they reduced certain terms of their dealing to a written contract on July 17, 1969. The written contract did not set the prices of the tires to be manufactured by Gates and bought by Plaintiffs, nor did it require Plaintiffs to purchase any given number of tires. It merely provided that Plaintiffs were to purchase eighty percent of their requirements from Gates, if Gates produced the type of tire required by Plaintiffs. The written **[**3]** contract also provided for cancellation by any party upon one-hundred and eighty days notice.

During the period relevant to this lawsuit, 1969-73, there also existed a wholly-owned subsidiary of Gates, National Tires, Inc. (National). In effect, Gates marketed tires under the National label.

The somewhat complicated procedural history of this suit began on February 8, 1974, when Plaintiffs, Security-Texas and Security-Virginia, instituted a lawsuit in the Western District of Texas against Defendant Gates, filed as No. W-74-CA-9. The complaint alleged several different causes of action, including a treble damage action under the Robinson-Patman Act alleging a secondary line discrimination, a claim for a breach of warranty for an alleged failure to manufacture tires properly and a claim for a breach of contract for Gates' alleged failure to give timely notice of the cancellation of the July 17, 1969, contract. The complaint also alleged, and thus admitted, that Plaintiffs were indebted to Gates for tires and demanded that the debt be offset against their damages and that recovery be allowed for damages in excess of the debt. On February 22, 1974, Gates instituted a suit on an account **[**4]** against Security-Virginia in the Chancery Court of Davidson County, Tennessee which was removed to the federal court for the Middle District of Tennessee. By court order, Gates' action was transferred from the Middle District of Tennessee to the Western District of Texas on June 4, 1974, and it was assigned No. W-74-CA-41. The answer in No. W-74-CA-41 incorporated the complaint filed in No. W-74-CA-9 and demanded an offset of damages against the debt owed Gates. The Plaintiffs' cause, No. W-74-CA-9, and Gates' cause, No. W-74-CA-41, were consolidated for purposes of pretrial proceedings and trial.

By way of an Amended Complaint in No. W-74-CA-9, which was filed on January 18, 1977, the Plaintiffs abandoned all but three of their claims. The claims contained in the Amended Complaint and tried in the District Court were: (1) the Robinson-Patman treble damage claim; (2) the breach of contract claim for the alleged failure of Gates to manufacture tires in accordance with the warranty and standards of the Federal Department of Transportation; and (3) the breach of contract claim for the alleged failure of Gates to provide Plaintiffs with six months notice of cancellation of the July **[**5]** 17, 1969 contract. Gates' claim on the account against Security-Virginia was asserted in No. W-74-CA-41 and also **[*964]** as a counterclaim in No. W-74-CA-9, but was tried as a companion or consolidated case along with No. W-74-CA-9.

Both of the above cases were tried to a jury commencing on March 8, 1977. Gates' claim on the account against Security-Virginia, No. W-74-CA-41, was not submitted to the jury inasmuch as Security-Virginia admitted the account and stipulated that Gates had proven all the elements of its claim on the account. Upon Gates' motion, the District Court entered a judgment on the account. Plaintiffs' claims, No. W-74-CA-9, were submitted to the jury on a general charge, and the jury rendered a general verdict. The jury found for the Plaintiffs on the antitrust claim in the amount of $ 100,000 and for the Plaintiffs on the claim of breach of contract for failure to give timely notice on the cancellation of the contract in the amount of $ 3,667. The jury rendered a general verdict for Gates on the Plaintiffs' claim for breach of warranty.

On March 23, 1977, the District Court entered a single judgment under both cause numbers. The judgment awarded the **[**6]** Plaintiffs the sum of $ 303,667, representing the $ 100,000 on the antitrust claim trebled plus $ 3,667 on the breach of contract claim for failure to give notice of cancellation. The judgment also awarded Plaintiffs their costs and attorneys' fees, with the proviso that the amount of attorneys' fees would be determined at the conclusion of any appeal which might be taken from the judgment or at such time as the judgment became final.

The judgment further awarded Gates $ 458,235.69, together with interest at the legal rate until paid, on the account against Security-Virginia. The judgment failed to award Gates prejudgment interest, attorneys' fees or costs. An amended judgment was entered on April 20, 1977, which deleted Security-Texas as a prevailing party in No. W-74-CA-9, pursuant to a postjudgment motion made by Gates. However, the amended judgment failed to make any disposition of Security-Texas. To that end, a second amended judgment was entered on May 27, 1977, which provided that Security-Texas take nothing for its causes of action.

II.

HN1[] Section 2(a), in pertinent part, reads: "It shall be unlawful for any person . . . to discriminate in price between Different purchasers **[**7]** of commodities . . . where Such commodities are sold for use, consumption, or resale within the United States." *15 U.S.C.A. § 13(a)* (emphasis added). ***HN2***[] Courts have interpreted the Section 2(a) language to require that a plaintiff establish two separate and contemporaneous sales transactions made by the same seller to two distinct purchasers. "No single sale can violate the Robinson-Patman Act." *Bruce's Juices, Inc. v. American Can Co., 330 U.S. 743, 755, 67 S. Ct. 1015, 1021, 91 L. Ed. 1219 (1947)*. Besides being suggested by the very language of the statute, the requirement of two transactions is implicit in the purpose of the Robinson-Patman Act. Anticompetitive price discrimination among competing buyers is the evil the statute prohibits. For price discrimination to occur, it is axiomatic that one purchaser must pay more than another purchaser; there must be two or more transactions at different prices. See generally Areeda, Antitrust Analysis PP 701-740 (2d ed. 1974); Kitner, A Robinson Patman Primer 77-78 (1970); Rowe, Price Discrimination under the Robinson Patman Act (1964); Sullivan, Antitrust §§ 217-19, 222-25 (1977); Von Kalinowski, Antitrust Laws & Trade Regulations **[**8]** § 24.03 (1975). See also generally, e. g., *Hampton v. Graff Vending Co., 516 F.2d 100, 102 (5th Cir. 1975)*; *Cliff Food Stores, Inc. v. Kroger, Inc., 417 F.2d 203, 208 (5th Cir. 1969)*; *Hiram Walker, Inc. v. A & S Tropical, Inc., 407 F.2d 4, 7* (5th Cir.), Cert. denied, *396 U.S. 901, 90 S. Ct. 212, 24 L. Ed. 2d 177 (1969)*; *Hartley & Parker Inc. v. Florida Beverage Corp., 307 F.2d 916 (5th Cir. 1962)*.

The theory and proof of Plaintiffs' case assigned National the role of their competitor and the beneficiary of Gates' price discrimination **[*965]** the so-called "favored customer." Plaintiffs sought to assign themselves the roles of the victims of Gates' price discrimination the so-called "disfavored customers." It is important to note that National, the wholly-owned subsidiary of Gates, was the only customer of Gates alleged to have been favored; there was neither any further allegation nor proof of any other beneficiary of Gates' alleged price discrimination.

Assuming Arguendo that Plaintiffs established the other prerequisites for a recovery, their theory and proof would support the jury's verdict only if the transfers of tires from Gates to its wholly-owned subsidiary, National, **[**9]** were considered sales within the meaning of the Robinson-Patman Act. Today, we reject what little authority we have found supporting the theory that under some circumstances a parent corporation's transfers to its wholly-owned subsidiary may be considered separate sales to a favored customer in a Robinson-Patman Act price discrimination suit. Briefly, we shall explore the history of this theory and explain why we are not persuaded to follow in its future. Ours is a different course. We hold that ***HN3***[] transfers from a parent corporation to its wholly-owned subsidiary corporation can never be considered separate sales to a favored customer in a Robinson-Patman Act discrimination suit.

The origins of the theory we reject today lie in *Danko v. Shell Oil Co, 115 F. Supp. 886 (E.D.N.Y.1953)*. In Danko the operator of a gasoline retail station sued a gasoline distributor and alleged, "the defendant directly or indirectly owns, operates, maintains and controls a gas station within one mile of plaintiff's station and Grants itself preferential treatment and discriminates against the plaintiff." *Id. at 888* (emphasis added). Thus, the plaintiff in Danko alleged, Inter alia, that it was the disfavored **[**10]** customer and sought to compare its purchases from the defendant with sales from the defendant to the defendant's wholly-owned retail gasoline stations to establish a price discrimination. The District Court denied the defendant's motion to dismiss for failure to state a claim on which relief could be granted without providing any economic, antitrust analysis and without citing any significant controlling precedent:

> The fact that defendant itself may own and control such filling station would not destroy the relationship of vendor and purchaser. In any event, it is doubtful that such relationship, if discriminatory, would be permitted to

> accomplish such objective. See for analogy, *Timken Roller Bearing Co. v. United States, 341 U.S. 593, 598, 71 S. Ct. 971, 95 L. Ed. 1199*, and cases cited therein. That the Court actually looks behind form to see who the real competitors are, see *American Cooperative Serum Ass'n v. Anchor Serum Co., 7 Cir., 153 F.2d 907, 913, 914*. Surely, all of these unresolved factual questions, coupled with the statement in *Bruce's Juices v. American Can Co., 330 U.S. 743, 755, 67 S. Ct. 1015, 91 L. Ed. 1219*, with respect to what types of sales are actually **[**11]** discriminatory, constrain the Court to overrule the objection to the third cause of action.

Id. With the off-hand observation, "The fact that defendant itself may own and control such filling station would not destroy the relationship of vendor and purchaser," the District Court, seemingly unwittingly, created antitrust theory. At least, the District Court declined to dismiss the complaint which it understood to depend upon such a theory.

The apparent basis of this theory is found in the general postulate of ***antitrust law*** that substance and true competitive function control rather than corporate form. By analogy, the District Court relied on *Timken Roller Bearing Co. v. United States, 341 U.S. 593, 71 S. Ct. 971, 95 L. Ed. 1199 (1951)* which involved the rather remote question whether a partially-owned subsidiary corporation could conspire with its parent corporation in violation of the Sherman Act. See also *Perkins v. Standard Oil Co., 395 U.S. 642, 89 S. Ct. 1871, 23 L. Ed. 2d 599 (1969)*; *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 215, 71 S. Ct. 259, 95 L. Ed. 219 (1951)*. The validity of this antitrust postulate is beyond peradventure, and with **[**12]** it we have no quarrel. There usually is no substitute for a careful **[*966]** analysis of the economic realities presented by the facts of a given case in light of the underlying purpose of the relevant antitrust statute. We simply refuse to follow the Danko analogy here. At the same time, we do not seek to exalt form over substance. Instead, we are convinced that substance may be coincident with form and that this is such a situation. If there be a form versus substance issue here, we are quite convinced that our antitrust analysis more properly emphasizes substance over form than the theory we reject today.

Although several courts have noted the theory first suggested in Danko, we have found no reported decision in which a Robinson-Patman Act damage award was actually sustained on the basis of the theory. [1.] **[**13]** We decline to be the first, for we are left unpersuaded by the mere repetition of all this encysted Obiter dictum. [2.]

Here, we deem it sensible to treat parent corporation and wholly-owned subsidiary corporation as a single economic unit. See Areeda, Antitrust Analysis P 701 n.13 (2d ed. 1974). There are other situations in which the single economic unit approach is applied which we find much more relevant to the issue at hand than the Danko analogy. ***HN4***[] If there is an affirmative showing that the parent actively controls a wholly-owned sales subsidiary, then the subsidiary's sales are attributable to the parent. Thus, a plaintiff might establish a Robinson-Patman Act violation if the evidence shows a price discrimination between a customer of the parent corporation and a customer of the wholly-owned subsidiary. The subsidiary and parent are treated as the same seller. The identical analysis is applied to determine **[**14]** whether a remote purchaser-plaintiff is an indirect purchaser from a seller which is involved in its customer's dealings with the plaintiff. See generally *Hiram Walker, Inc. v. A & S Tropical, Inc., 407 F.2d 4* (5th Cir.), Cert. denied, *396 U.S. 901, 90 S. Ct. 212, 24 L. Ed. 2d 177 (1969)*; *Baim & Blank, Inc. v. Philco Corp., 148 F. Supp. 541 (E.D.N.Y.1966)*. See also generally Von Kalinowski, Antitrust Laws & Trade Regulations § 24.04(2), (3) (1975). These theories, which are neither invoked nor involved here, highlight the

Joseph E. Seagram & Sons, Inc., 272 F. Supp. 915, 919 (D.Haw.1967)*; *Reines Distributors, Inc. v. Admiral Corporation, 241 F. Supp. 814, 815, 256 F. Supp. 581, 585-86, 257 F. Supp. 619, 621 (S.D.N.Y.1965)*. The unofficially reported decision in Mississippi Petroleum Inc. v. Vermont Gas Systems, Inc., 1972 Trade Cases P 73, 843 (S.D.Miss.1972) is not to the contrary.

[2.] Long ago, Mr. Justice Holmes once lamented: "It is one of the misfortunes of the law that ideas become encysted in phrases and thereafter for a long time cease to provoke further analysis." *Hyde v. United States, 225 U.S. 347, 391, 32 S. Ct. 793, 811, 56 L. Ed. 1114 (1912)* (Holmes, J., dissenting).

theoretical flaw in the Danko approach. In the application of both the same seller doctrine and the independent purchaser doctrine, the parent and wholly-owned subsidiary are treated as a single economic unit. Thus, sales from the same economic unit to the favored customer and to the disfavored customer are compared to determine whether there has been a price discrimination. The requirement of two sales is satisfied. The Danko theory lacks this requirement. Under Danko, a sale from the parent corporation to the plaintiff is alleged as the disfavored sale. However, there is no sale to a favored customer for comparison and thus no price discrimination may be **[**15]** shown. Transfers from a parent corporation to its wholly-owned subsidiary corporation are transfers within the same economic unit. These transfers are the economic equivalent of intra-company transfers of goods. As such, these transfers cannot be considered sales for Robinson-Patman Act purposes. See generally authorities cited in note 1, Supra. See also generally Von Kalinowski, Antitrust Laws & Trade Regulation § 24.03(2) (1975).

[*967] The Robinson-Patman Act separates out and makes illegal competitively harmful discrimination. Intra-corporate transfers and transfers between parent and wholly-owned subsidiary are not the type of transactions the Robinson-Patman Act meant to regulate. The realistic effect on competition should control rather than esoteric and theoretical possibilities under the Danko theory couched in terms of "control" and "arm's length dealings." Realistically, the competition here was between Gates and National as a single economic unit, on the one hand, and Plaintiffs, on the other hand. Internal transfers between Gates and National were of no real competitive consequence. There is nothing in this record to suggest that disregarding the separate **[**16]** corporate entities will enable Gates and National to circumvent the Robinson-Patman Act. See generally *Brown v. Hansen Publications, 556 F.2d 969, 972 (9th Cir. 1977)*; *Brewer v. Uniroyal, Inc., 448 F.2d 972, 977 n.2 (6th Cir. 1974)*; *Mowery v. Standard Oil Co., 463 F. Supp. 762, 775-76 n.17 (N.D.Ohio 1976)*; *Diehl & Sons, Inc. v. International Harvester Co., 426 F. Supp. 110, 123 (E.D.N.Y.1976)*; *Snyder v. Howard Johnson's Motor Lodges, Inc., 412 F. Supp. 724, 731 (S.D.Ill.1976)*. In this manner underlying substance controls surface form in economic and antitrust importance. In form, Gates sought to raise a corporate veil between its manufacturing and sales efforts by conducting its own retail operations through a separate corporate entity. There being no other owner of National besides Gates, the substance of this marketing technique was simply that a single economic unit manufactured and marketed its product. Therefore, we hold that a parent corporation's transfers to its wholly-owned subsidiary may not be considered separate sales to a favored customer in a Robinson-Patman Act price discrimination suit. Since National was the only customer of Gates alleged to have been favored **[**17]** and since there was neither any further allegation nor proof of any other beneficiary of Gates' alleged discrimination, Plaintiffs have failed to establish the requisite favored sale for a Robinson-Patman Act suit. [3.]

[18]** III.

The remaining issues Gates raises need not long detain us. First, we are not persuaded by Gates' efforts to upset the breach of contract recovery. Second, we do not believe that the District Court abused its discretion in denying Gates prejudgment interest in No. W-74-CA-41. Third, given our reversal of the Robinson-Patman Act claim, we deem it appropriate to remand for a reassessment of the issue of costs before the District Court in No. W-74-CA-41; costs on this appeal are awarded to Gates as the prevailing party. Fourth, we find no error in the District Court's

---

3. Pragmatically our rejection or acceptance of the Danko theory would not change the fate of Plaintiffs' appeal. Even under the theory we reject, the separateness of parent and wholly-owned subsidiary must be established in order for a transfer between them to be considered a favored sale. There must be some showing of a lack of control by the parent and arm's length dealings between parent and subsidiary. See authorities cited note 1, Supra. The Plaintiffs here depend on little else but the appearances of independence incident to Gates' and National's separate corporate status. Gates exercised full dominion and control over National; there was no arm's length dealings between them. Thus, on this record we would reverse even under the Danko theory had we found the theory itself persuasive. See *Boeing v. Shipman, 411 F.2d 365 (5th Cir. 1969)* (appellate standard for review of jury verdict).

Those who suffer real antitrust damage are not necessarily left without any antitrust remedy either under our own analysis or under an unsuccessful attempt to recover on the Danko theory we reject. See, e. g., *Schaben v. Samuel Moore and Company, 462 F. Supp. 1321, 1332 (S.D.Iowa 1973)*; *Reines Distributors, Inc. v. Admiral Corp., 256 F. Supp. 581, 586 (S.D.N.Y.1966)*.

failure to award Gates attorneys' fees in No. W-74-CA-41. Finally, we reject Gates' claim that it was entitled, as a matter of right, to two separate judgments here.

IV.

In summary, in No. W-74-CA-9, the Robinson-Patman Act claim is reversed, the breach of contract claim is affirmed; in No. W-74-CA-41 we affirm except we remand **[*968]** for reassessment of the issue of costs before the District Court.

REVERSED in part; AFFIRMED in part; and REMANDED.

Opinion

OPINION OF THE COURT

[*1370] Larry V. Muko, Inc. (Muko), a Pennsylvania corporation engaged in the general contracting business, appeals from an order granting defendants' *Fed.R.Civ.P. 50(a)* motion **[**2]** for a directed verdict in an antitrust action seeking damages and injunctive relief under §§ 4, 16 of the Clayton Act, *15 U.S.C. §§ 15*, *26*. The defendants are Long John Silver's Inc. (Silver's), a fast-food seafood restaurant chain, and two labor organizations, the Southwestern Pennsylvania Building and Construction Trades Council (Southwestern Council) and the Building and Construction Trades Council of Pittsburgh, Pennsylvania and Vicinity (Pittsburgh Council). We reverse and remand for a new trial.

I.

Muko is a nonunion general contractor. Its complaint charges that Silver's entered into an agreement with the defendant labor organizations that it would not award building and construction contracts to any contractor that was not a party to a current collective bargaining agreement with member unions of either the Southwestern Council or the Pittsburgh Council. The defendants' motions for a directed verdict were granted at the end of the plaintiff's case. ***HN1***[] The grant of those motions was proper only if, without weighing the credibility of witnesses, as a matter of law, there could be only one reasonable conclusion as to a verdict. Thus we must determine what, from Muko's evidence, **[**3]** a jury might have found.

The jury could have found as follows: Silver's is a national chain of fast-food seafood **[*1371]** restaurants with its headquarters in Kentucky. In 1973, when it first decided to enter the fast-food seafood business in Western Pennsylvania, Silver's contracted with Muko, after competitive bidding, for the construction of a restaurant in Monroeville, a Pittsburgh suburb. Muko was an experienced builder of fast-food restaurants. In 1973 it was Silver's policy to solicit bids on a competitive basis without regard to whether the contractor used union labor. The Monroeville site was picketed during construction by Council pickets. After the restaurant opened, Council representatives leafleted its patrons, asking them to refrain from patronizing Silver's because it used contractors who were paying less than the established prevailing construction wages in the area. Muko was also awarded a contract for the construction of a Silver's restaurant in Lower Burrell, and commenced construction there about the time the Monroeville restaurant opened.

Faced with handbilling at the completed Monroeville restaurant, and fearful of new picketing at the Lower Burrell construction **[**4]** site, Silver's approached the Councils and arranged for a meeting. On November 1, 1973, a meeting took place between Silver's vice president for real estate, its local real estate agent, and three council representatives. Silver's vice president said that he wanted the leafleting to end as quickly as possible. One of the Council representatives stated that he wanted future restaurants built by union labor. Another union representative gave Silver's vice president a form of contract used between the Councils' local unions and union contractors in the area, and supplied Silver's with a list of contractors with whom the local unions had collective bargaining agreements. A Council representative stated there would be no picketing or leafleting at Lower Burrell, the second Silver's location, pending a decision on the use of union contractors at future construction sites.

Silver's representatives left the meeting with the form contract and the list of union contractors. Within a week Silver's vice president for development sent the Councils a letter. The letter began by emphasizing Silver's desire "to establish good working relationships" with unions in the Pittsburgh area. It noted that **[**5]** the form contract was specifically designed for use by area contractors and local trade unions. But, the writer continued:

> I believe that we can serve the same purpose with this letter to show intent that Long John Silver's, Inc., plans to use only union contractors certified by the affiliated Building and Construction Trades Councils of Pittsburgh and Allegheny Kiski Valley and vicinity. We will also request that all the investors (property owners) developing for us use union contractors. By operating in this manner, we will accomplish a good working relationship with you. We have visited several of the contractors, the names of which we mentioned to you. As soon as we have firm bids on several construction sites, we will contact you to insure that these contractors are in good standing with the union.
>
> In any relationship between two parties there must be mutual need and assistance. . . . It is . . . extremely important to both parties that our location at Monroeville, Pennsylvania and the one under construction in Lower Burrell Township, Pennsylvania not be subjected to any kind of informational picketing.

Silver's had been satisfied with Muko's work at Monroeville, **[**6]** and had therefore contracted with Muko for erection of the second restaurant at Lower Burrell. The president of Silver's had told Muko it could construct all the chain's restaurants in Western Pennsylvania if it continued to offer high-quality work at competitive prices. After the meeting of November 1, 1973, Silver's asked Muko if it would build as a union contractor. It refused to do so, and subsequently was not asked to bid on any further jobs for Silver's. By the trial date twelve other restaurants had been built, all by union contractors whose prices for those twelve restaurants aggregated over $ 250,000 more than Muko would have charged. Muko's bids and cost estimates **[*1372]** for these twelve restaurants projected a profit even at its lower bid prices.

Muko's operation involved only a handful of construction employees, who functioned primarily as supervisors. The bulk of the work on its jobs was performed by subcontractors. Neither the Pittsburgh Council nor the Southwestern Council had any interest in or made any attempt to organize Muko's employees. Neither council ever represented those employees. Muko made a tender of proof that it was paying prevailing wage rates to **[**7]** its supervisory employees. The district court rejected the tender on the ground that it was irrelevant in the plaintiff's case, but suggested that it might be offered later, depending on the defendants' evidence. On this record we must therefore assume that Muko was paying those employees prevailing rates. There is no evidence in the record regarding the wage rates paid by Muko's subcontractors.

The defendants stipulated that Muko could prove the requisite jurisdictional relationship to interstate commerce and that direct out-of-state purchases would, had Muko obtained the additional contracts, have exceeded $ 50,000.

In face of the foregoing evidence the district court granted defendants' *Rule 50(a)* motions. No opinion was written, but the transcript of proceedings discloses that the directed verdict was granted solely because the court believed the evidence could sustain no finding other than a unilateral decision on the part of Silver's to accept bids only from union contractors.

II.

Clearly the directed verdict cannot be affirmed on the ground upon which the district court acted. Looking at the evidence, and particularly the letter of November 7, 1973, in the light most favorable **[**8]** to Muko, reasonable jurors could find that Silver's and the Councils agreed that, in consideration of the Councils refraining from informational picketing and leafleting directed at the Monroeville and Lower Burrell restaurants, Silver's would use, for the restaurants yet to be constructed, contractors with whom Council local unions had collective bargaining agreements. Since the jury could have found such an agreement, we cannot sustain the grant of a directed verdict on the theory that the only activity which Muko proved was a unilateral appeal to an employer for the exercise of managerial discretion. See *NLRB v. Servette, Inc., 377 U.S. 46, 54, 84 S. Ct. 1098, 12 L. Ed. 2d 121 (1964)*. Moreover, although the Councils argue on appeal that Muko failed to prove an injury to its business or property within the meaning of § 4 of the Clayton Act, that argument cannot prevail on the record before us. The jury could have found that but for the agreement to exclude nonunion contractors Muko would have been the low bidder on twelve restaurant jobs and would have made a profit on each. Finally, because of the parties' stipulation, we must assume that the twelve construction projects involved **[**9]** a substantial amount of interstate commerce. Since Muko established injury to its business or property and the contract which the jury could have found affected a significant amount of interstate commerce, the directed verdict can only be sustained if as a matter of law the agreement reached (1) was exempt from antitrust scrutiny, or (2) was lawful under the antitrust laws. We emphasize that in the procedural posture of this case we deal only with the narrow question whether any agreement which the jury might have found must be found to be exempt or legal for antitrust purposes.

III.

Because the jury could have found concert of action between Silver's and the Councils, neither the Clayton Act, §§ 6 and 20, *15 U.S.C. § 17*, *29 U.S.C. § 52*, nor the Norris-LaGuardia Act, §§ 4, 5, and 13, *29 U.S.C. §§ 104*, *105*, *113*, provide any statutory exemption from antitrust liability. See *United Mine Workers v. Pennington, 381 U.S. 657, 662, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; *Allen Bradley Co. v. Local 3, IBEW, 325 U.S. 797, 65 S. Ct. 1533, 89 L. Ed. 1939 (1945)*. Thus any immunity from antitrust coverage must be found in the nonstatutory **[*1373]** exemption. Moreover, the agreement which **[**10]** could have been found was outside the context of a collective bargaining relationship. Thus the significant labor law factors arising from that relationship to which we gave special deference in *Consolidated Express, Inc. v. New York Shipping Association, Inc., 602 F.2d 494 (3d Cir. 1979)*, are not present here. Accord, *Connell Construction Co. v. Plumbers & Steamfitters Local 100, 421 U.S. 616, 625-26, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)*. We must turn for guidance, therefore, to Connell, the one case in which the Supreme Court has dealt with an agreement, not in the collective bargaining context, between a labor union and a business organization. Connell recognized the possibility that agreements between labor unions and business organizations outside the collective bargaining context might be exempt, but held that the exemption was unavailable on the facts of that case. Unlike this case, Connell was before the Supreme Court after a full trial. Thus the Court was in a position to hold that nonstatutory labor exemption was unavailable as a matter of law. In the posture of this case, we need not reach so broadly. But if the jury could from the plaintiff's evidence have found facts **[**11]** falling within the principles established in Connell, we must remand for a new trial.

In Connell a labor union for one of the construction industry sub-trades had successfully used informational picketing to force a number of general contractors, with which it had no collective bargaining relationship, to agree to subcontract in that sub-trade only to subcontractors with whom the union had a current collective bargaining agreement. Connell, a general contractor who had been soliciting subcontract bids on a competitive basis without regard to union status, signed the tendered agreement under duress, and then sued for declaratory and injunctive relief, claiming that the agreement violated section 1 of the Sherman Act. The union argued that the agreement was exempt for two reasons: (1) it was directly related to the valid union goal of organizing as many subcontractors as possible; and (2) it was expressly authorized by the construction industry proviso to § 8(e) of the National Labor Relations Act, *29 U.S.C. § 158(e) (1976)*. The Court rejected both arguments.

Local 100 first contended that the agreement was protected by the nonstatutory exemption from the antitrust laws because, **[**12]** although entered into outside the collective bargaining context, it advanced the union's valid organizational objective. Rejecting that contention Justice Powell wrote:

> This record contains no evidence that the union's goal was anything other than organizing as many subcontractors as possible. This goal was legal, even though a successful organizing campaign ultimately would reduce the competition that unionized employers face from nonunion firms. But the methods the union chose are not immune from antitrust sanctions simply because the goal is legal. Here Local 100, by agreement with several contractors, made nonunion subcontractors ineligible to compete for a portion of the available work. This kind of direct restraint on the business market has substantial anticompetitive effects, both actual and potential, that would not follow naturally from the elimination of competition over wages and working conditions. It contravenes antitrust policies to a degree not justified by congressional labor policy, and therefore cannot claim a nonstatutory exemption from the antitrust laws.

421 U.S. at 625, 95 S. Ct. at 1836 (footnote omitted).

We understand Connell to hold, then, that **[**13]** ***HN2***[] an agreement between a union and a business organization, outside a collective bargaining relationship, which imposes a direct restraint upon a business market, and which is not justified by congressional labor policy because it has actual or potential anticompetitive effects that would not flow naturally from the elimination of competition over wages and working conditions, is not exempt from antitrust scrutiny.

[*1374] On the record before us a jury could have found such an agreement. Like Connell Construction, Silver's purchases the services of building contractors. Like Connell, it has no collective bargaining relationship, actual or potential, with the Councils or their member locals. As in Connell, the jury could have found that the defendants entered into an agreement not to deal with nonunion contractors, which operated as a direct restraint on the business market by making those contractors "ineligible to compete for a portion of the available work." *421 U.S. at 625, 95 S. Ct. at 1836*. The plaintiff introduced evidence that this agreement had "substantial (actual) anticompetitive effects" an increase of more than $ 250,000 in the total price paid for the twelve restaurants **[**14]** built by union contractors. Finally, the jury could have found that the agreement between Silver's and the Councils had "a potential for restraining competition in the business market in ways that would not follow naturally from elimination of competition over wages and working conditions." *421 U.S. at 635, 95 S. Ct. at 1841*. For, on plaintiff's evidence, that agreement "indiscriminately excluded nonunion (contractors) from a portion of the market, even if their competitive advantages were not derived from substandard wages and working conditions but rather from more efficient operating methods." *421 U.S. at 623, 95 S. Ct. at 1835*. We therefore conclude that the grant of a directed verdict cannot be affirmed on the theory that any agreement which might be found is as a matter of law within the nonstatutory labor exemption.

The Connell defendants also argued that the agreement challenged there was expressly authorized by the construction industry proviso to § 8(e) of the Labor Act, and therefore exempt from antitrust scrutiny. In answer to this argument the Court held that ***HN3***[] the construction industry proviso was not intended to authorize subcontracting agreements that are neither within **[**15]** the context of a collective bargaining relationship nor limited to a particular job site. To appreciate that holding one must start with the 1959 amendment to the Labor-Management Relations Act, which provides:

> ***HN4***[] (e) It shall be an unfair labor practice for any labor organization and any employer to enter into any Contract or agreement, express or implied, whereby such employer ceases or refrains or agrees to cease or refrain from handling, using, selling, transporting or otherwise dealing in any of the products of any other employer, or to cease doing business with any other person, and any contract or agreement entered into heretofore or hereafter containing such an agreement shall be to such extent unenforcible and void . . . .

29 U.S.C. § 158(e) (emphasis added). At the same time, recognizing the special historical situation in the construction and apparel industries, Congress added provisos to the general prohibition in section 8(e) creating limited exceptions for those two industries. The construction industry proviso reads:

> (N)othing in this subsection shall apply to an agreement between a labor organization and an employer in the construction industry relating **[**16]** to the contracting or subcontracting of work to be done at the site of the construction, alteration, painting, or repair of a building, structure, or other work.

29 U.S.C. § 158(e). In rejecting the proviso's application to the Local 100-Connell agreement Justice Powell wrote:

> (The) careful limits (in § 8(b)(4) and § 8(e)) on the economic pressure unions may use in aid of their organizational campaigns would be undermined seriously if the proviso to § 8(e) were construed to allow unions to seek subcontracting agreements, at large, from any general contractor vulnerable to picketing. Absent a clear indication that Congress intended to leave such a glaring loophole in its restrictions on "top-down" organizing, we are unwilling to read the construction-industry proviso as broadly as Local 100 suggests. Instead, we think its authorization extends only to agreements in the context of collective-bargaining relationships and, in light of congressional references to the Denver Building Trades **[*1375]** problem, possibly to common-situs relationships on particular jobsites as well.

421 U.S. at 633, 95 S. Ct. at 1840 (footnotes omitted).

Absent the construction industry **[**17]** proviso, the "express or implied" agreement which the jury could have found between Silver's and the Councils would clearly fall within the prohibitions of § 8(e), since it required Silver's "to cease doing business" with Muko and all other nonunion contractors. And Connell is controlling on the question whether that agreement was protected by the construction industry proviso, for here there is neither a collective bargaining relationship with Silver's nor any evidence of a common-situs problem. Thus the grant of a directed verdict cannot be affirmed on the theory that any agreement which might be found is protected by the construction industry proviso to § 8(e). [1] This conclusion renders legally irrelevant the fact, relied upon by the dissent, that the agreement here was entered into as a result of handbilling protected by the first amendment and the publicity proviso to § 8(b)(4) of the Labor Act. The protections of the publicity proviso evidently extend only to handbilling conducted in conformity therewith. Nothing in § 8(b)(4) can reasonably be construed to authorize an agreement between a union and an employer that falls within the wholly independent prohibition of § 8(e) **[**18]** of the Act. ***HN5***[] Nor has the first amendment been viewed as compelling protection for an agreement illegal under § 8(e) or the Sherman Act solely because that agreement was entered into as a result of protected speech.

[19]** While Connell was decided on the basis of a full trial record, we have not yet heard the defendants' evidence in this case. Our holding that the grant of a directed verdict cannot be sustained on the basis of the nonstatutory exemption therefore should not be misconstrued as a holding that the defendants cannot establish in the court below that they are entitled to that defense. We hold only that Muko has introduced evidence sufficient to entitle it to have a jury determine that issue. Nor do we decide the question whether a finding that an agreement made outside the collective bargaining context violates § 8(e) by itself removes labor's nonstatutory antitrust exemption. Cf. Consolidated Express v. New York Shipping Ass'n, Inc., supra. The fact that in Connell Justice Powell considered the actual and potential anticompetitive effects of the agreement independently of the § 8(e) issue suggests that the presence of a § 8(e) violation may not itself decide the exemption issue. In this case, however, as in Connell, there is evidence tending to show both a market restraint unjustified by the congressional interest in the elimination of competition over wages and working conditions and **[**20]** a violation of § 8(e). We therefore need not and do not rule on the effect of a § 8(e) violation standing alone.

IV.

---

[1] Chief Judge Seitz is of the view that the question whether the defendants' agreement is violative of § 8(e) of the NLRA is not presented as a "collateral issue" in this antitrust action, and need not be decided. See Connell Construction Co. v. Plumbers & Steamfitters Local 100, 421 U.S. 616, 626, 95 S. Ct. 1830, 1837, 44 L. Ed. 2d 418 (1975). He notes that the defendants here have not argued, as did the defendants in Connell, that their agreement was "explicitly allowed by the construction-industry proviso to § 8(e) and that antitrust policy therefore must defer to the NLRA." Id. Moreover, he believes that we should not convey the impression to the district courts that an appropriate short-hand method of deciding the applicability of the non-statutory exemption in cases such as this is to determine whether the challenged agreement constitutes an unfair labor practice; such a method would lead to the needless resolution by the federal courts of significant labor law questions that ought to be decided in the first instance by the NLRB. Cf. Consolidated Express, Inc. v. New York Shipping Ass'n, Inc., 602 F.2d 494 (3d Cir., 1979) (effect of prior NLRB determination that an agreement is violative of § 8(e)).

Silver's and the Councils urge that even if the labor exemption is inapplicable they were nevertheless entitled to a directed verdict on antitrust grounds. Their principal argument is that there was only a unilateral management decision resulting from unilateral union activity. We **[*1376]** have rejected that argument in Part II above. A factfinder could have found an agreement to exclude nonunion contractors from the Silver's construction market, a significant interstate market consisting of twelve construction projects. The premise of both the majority and minority opinions in Connell is that absent an exemption such an agreement may be the basis of a federal antitrust claim. The jury might have found a concerted refusal to deal with a class of contractors of which Muko is a member. But whether the evidence here is viewed as capable of sustaining a finding of a group boycott, to which a Per se rule would apply, or some lesser restraint to which a rule of reason analysis might apply, it was sufficient to take Muko's case to the jury. We have no occasion on this **[**21]** record to rule on whether, after hearing the defendants' evidence as well, the court should instruct the jury that it should measure the agreement by rule of reason or Per se standards. [2]

The Councils also urge, though not enthusiastically, that Muko made an insufficient showing of injury to business or property within the meaning of § 4 of the Clayton Act. Insofar as that contention rests upon the lack of evidence from which the jury could have found lost business and lost profits we reject it on the basis of the record evidence referred to in Part I above. Insofar as it rests upon the suggestion that the stockholders of Muko (Muko's beneficial ownership **[**22]** is not a matter of record) could have gone "double breasted" by forming a separate corporation and signing union contracts with Council members we reject it for two reasons. First, the plaintiff is a business corporation, and it, not its stockholders, suffered the injury to business and property to which § 4 refers. Second, ***HN6***[🡅] neither Muko nor any other employer may lawfully coerce its employees into a collective bargaining relationship, even for the purpose of avoiding economic injury. *29 U.S.C. § 158(a)(1)*.

V.

The order granting a directed verdict will be reversed and the case remanded for a new trial.

Concur by: ADAMS

Concur

ADAMS, Circuit Judge, concurring.

Were we in a position to decide this case on a clean slate, I would probably be inclined to hold that the union activity complained of here is not within the purview of the antitrust statutes but is instead solely a matter for scrutiny under labor law. I would subscribe to the view that unions ought to be subject to antitrust liability only when they combine with non-labor forces for the purpose of assisting those forces in suppressing commercial competition and in monopolizing the marketing of goods and services. When, however, **[**23]** unions are essentially pursuing traditional labor objectives, such as organizing employees or seeking to obtain higher wages and better working conditions for their members, it would appear logical to me that resort should be had primarily to labor law concepts to circumscribe the permissible scope of their conduct and to penalize them for their excesses.

Such an approach, it may be argued with a measure of assurance, would not appear to conflict with congressional intent inasmuch as Congress has on a number of occasions enacted legislation in order to remove certain labor activity from the ambit of the antitrust laws. [1] **[**24]** And, at one time it could plausibly have been submitted that the

---

[2] Because of the dispute's labor context, Judge Weis is of the view that the activity here should not be construed as a conventional group boycott to which the Per se rule would apply. He would use the rule of reason standard. See *Consolidated Express, Inc. v. New York Shipping Ass'n, Inc., 494 F.2d 602 (3d Cir. 1979)* (Weis, J., Concurring and dissenting).

[1] Thus, for example, as the dissent in greater detail, portions of the Clayton Act were enacted in 1914 for the purpose of inhibiting federal courts from using the Sherman Act in order to curtail labor activity. In § 6 of the Clayton Act, *15 U.S.C. § 17*,

extent **[*1377]** of the incursion by the antitrust laws into the labor law domain was indeed to be found somewhere along the foregoing line of demarcation. [2]

But whatever the merits of such an approach, the Supreme Court has rather clearly chosen to allow greater sway to the antitrust laws in the labor field. As the majority opinion points out, under the most recent Supreme Court pronouncement in *Connell Construction Co. v. Plumbers and Steamfitters Local Union No. 100, 421 U.S. 616, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)*, it is immaterial for purposes of determining whether labor-related activity is exempt from possible antitrust scrutiny that the union has as its goal legitimate and legal objectives: "(T)he methods the union chose are not immune from antitrust sanctions simply because the goal is legal." [3] So long as there is a "direct restraint on the business market" having "substantial anticompetitive effects, both actual and potential, that would not flow naturally from the elimination of competition over wages and working **[**25]** conditions," Connell teaches, the union's activity "contravenes antitrust policies to a degree not justified by congressional labor policy, and therefore cannot claim a nonstatutory exemption from the antitrust laws." [4] Given this explicit ruling by the Supreme Court, which I believe the majority has demonstrated is controlling as applied to the evidence introduced by the plaintiff in this case, [5] I am constrained to join in the majority's opinion.

Dissent by: ALDISERT

Dissent

ALDISERT, Circuit Judge, dissenting.

Our late colleague Abraham Freedman **[**26]** was fond of saying at decision conferences, "The way you come out in this case depends on how you go in." Judge Freedman was expressing in a few words one of the most important aspects of the judicial process that in judicial decision making, value judgments inhere in the choosing of the controlling legal precept.

The majority has made a value judgment. They have decided that when a labor union is involved in litigation with a business firm other than one with which it has a collective bargaining agreement, the court is required to take as a starting point the body of antitrust laws. They ask whether the alleged agreement here was exempt from antitrust scrutiny or lawful under ***antitrust law***, but do not ask what I perceive to be the real issue does ***antitrust law*** apply to these facts at all, and if so, why. From the majority's initial premise, it follows that organized labor's activity is generally proscribed by antitrust laws unless labor can convince the court that its activity falls within some narrow exception to those laws. All labor exemptions rest on the meaning and interaction of the antitrust and the labor statutes. But these exceptions, which have been given the patronizing **[**27]** labels, "statutory" and "non-statutory" exemptions, have been carved out, not by Congress, but by the federal courts.

---

unions were declared not to be illegal combinations, and labor was pronounced not to be a commodity or article of commerce. Also, § 20 of the Act, *29 U.S.C. § 52*, proscribed the issuance of injunctions against specifically enumerated practices of labor unions and removed any taint of illegality from those practices. And the Norris-LaGuardia Act, *29 U.S.C. §§ 101-115*, promulgated in 1932, further narrowed the circumstances under which the antitrust laws may be brought to bear against labor unions. See generally *United States v. Hutcheson, 312 U.S. 219, 229-31, 61 S. Ct. 463, 85 L. Ed. 788 (1941)*.

2 See *Allen Bradley Co. v. Local Union No. 3, IBEW, 325 U.S. 797, 65 S. Ct. 1533, 89 L. Ed. 1939 (1945)*; *United States v. Hutcheson, supra*; *Apex Hosiery Co. v. Leader, 310 U.S. 469, 60 S. Ct. 982, 84 L. Ed. 1311 (1940)*.

3 *Connell, supra, 421 U.S. at 625, 95 S. Ct. at 1836*.

4 Id.

5 Because the plaintiff appeals from the grant of defendants' motions for a directed verdict, entered at the end of plaintiff's case, it is entitled to a reversal if sufficient evidence exists to support a jury finding in its favor. See, e. g., Fireman 's *Fund Ins. Co. v. Videfreeze Corp., 540 F.2d 1171, 1177* (3 Cir. 1976), Cert. denied, ***429 U.S. 1053, 97 S. Ct. 767, 50 L. Ed. 2d 770 (1977)***.

One who agrees with the majority's value judgment, and the political, sociological, and economic philosophies which influence it, will not fault the result it commands. But I disagree with their fundamental legal and philosophical premises. While I admit that their view is supported by a respectable **[*1378]** body of federal decisions, I argue for a different set of fundamental values, values less antagonistic to the rights of organized labor and more reflective of the national labor policy judgments made by Congress.

I have a second disagreement with the majority which is more prosaic I do not share their unabashed infatuation with the decision in *Connell Construction Co. v. Plumbers & Steamfitters Local No. 100, 421 U.S. 616, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)*. As a member of an inferior court in the federal judicial hierarchy, I must respect the precedential value of Connell. But I detect from it no inspirational philosophy or policy statements which persuade me to extend its holding, certainly not to the dissimilar, material facts of this case.

I.

My **[**28]** starting point is a recognition that both the labor and the antitrust laws embody equally important congressional declarations of public policy. Unlike the majority, I do not think that either policy has a preferred status over the other. They must be viewed, in Justice Frankfurter's felicitous expression, "as a harmonizing text." [1] "On the one hand, the national labor policy favors collective bargaining as a means for promoting labor relation peace through equalization of the bargaining power in the labor market. On the other hand, the national antitrust policy favors competition in the market place as a means of protecting consumers from the evils of monopoly power and restraints of trade. The conflict created by these policies is apparent. To achieve their fundamental goals, unions, by their very nature as combinations of employees, must eliminate competition in the labor market by monopolizing the supply of labor. Powerful unions also have the potential for imposing restraints on competition in the market place, for example, by affecting the cost of labor and by limiting the use of new and more efficient methods of production." [2] In order to harmonize these apparently divergent **[**29]** policies, and because of the legislatively enacted national labor policy, I think it proper to presume that labor activity does not come within the purview of the antitrust laws unless it is Clearly not conduct for which the labor laws provide penalties and sanctions.

Milton Handler has observed in a discussion of *Connell, United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*, and *Amalgamated Meat Cutters v. Jewel Tea Co., 381 U.S. 676, 85 S. Ct. 1596, 14 L. Ed. 2d 640 (1965)*, that these cases present a paradox:

> How can we justify requiring certain conduct under the labor laws and at the same time subject that conduct to the panoply of sanctions imposed by the antitrust laws? And if union activities are forbidden as unfair labor practices under the labor laws, punishable by the recovery of **[**30]** single damages, why add criminal and treble damage exposure under the antitrust laws? Doesn't antitrust have enough to do without this unwelcome intrusion into the area of mandatory bargaining and unfair labor practices? [3]

I share Handler's concern; I have a fear that federal judges who do not share the political, sociological, and economic viewpoints that underlie the national labor policy are inclined to have that separately enacted congressional policy swallowed by our antitrust laws. Although invested with much power, federal judges must guard against using it improperly to impose their personal views when those views vary directly with policy pronouncements of the legislative branch. John Chipman Gray set forth the proper hierarchy when he wrote:

---

[1] *United States v. Hutcheson, 312 U.S. 219, 231, 61 S. Ct. 463, 85 L. Ed. 788 (1941)*.

[2] F. Bartosic & R. Hartley, Labor Relations Law in the Private Sector 183 (ALI-ABA 1977).

[3] Handler, Changing Trends in Antitrust Doctrines: An Unprecedented Supreme Court Term 1977, 77 Colum.L.Rev. 979, 1022 (1977).

> The State requires that the acts of the legislative organ shall bind the courts, and so far as they go, shall be paramount to all other sources. This may be said to **[*1379]** be a necessary consequence from the **[**31]** very conception of an organized community. [4]

Many courts are ignoring the lessons of history. In the past, Congress has twice resorted to specific legislation to counteract federal court decisions holding labor activity within the prohibitions of the antitrust laws. First the Clayton Act of 1914 was passed in response to criticism of judicial decisions applying Sherman Act sanctions to trade union activities. [5] As explained in *United States v. Hutcheson, 312 U.S. 219, at 229-30, 61 S. Ct. 463, at 465, 85 L. Ed. 788 (1941)*, § 20 of the Clayton Act "withdrew from the general interdict of the Sherman Law specifically enumerated practices of labor unions by prohibiting injunctions against them since the use of the injunction had been the major source of dissatisfaction and also relieved such practices of all illegal taint by the catch-all provision, "nor shall any of the acts specified in this paragraph be considered or held to be violations of any law of the United States.' " In addition, § 6 of the Act provides: **[**32]**

> The labor of a human being is not a commodity or article of commerce. Nothing contained in the antitrust laws shall be construed to forbid the existence and operation of labor, agricultural, or horticultural organizations, instituted for the purposes of mutual help, and not having capital stock or conducted for profit, or to forbid or restrain individual members of such organizations from lawfully carrying out the legitimate objects thereof; Nor shall such organizations, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade, under the antitrust laws.

15 U.S.C. § 17 (my emphasis).

The Clayton Act itself, however, engendered further controversy and legislation. As stated by the Hutcheson Court:

> It was widely believed that into the Clayton Act courts read the very beliefs which that Act was designed to remove. Specifically, the courts restricted the scope of § 20 to trade union activities directed against an employer by his own employees. *Duplex Co. v. Deering, (254 U.S. 443, 41 S. Ct. 172, 65 L. Ed. 349 (1921))*. Such a view it was urged, both by powerful judicial dissents and informed lay opinion, misconceived **[**33]** the area of economic conflict that had best be left to economic forces and the pressure of public opinion and not subjected to the judgment of courts. Ibid., pp. 485-486. Agitation again led to legislation and in 1932 Congress wrote the Norris-LaGuardia Act. Act of March 23, 1932, 47 Stat. 70, *29 U.S.C. §§ 101-115*.
>
> The Norris-LaGuardia Act removed the fetters upon trade union activities, which according to judicial construction § 20 of the Clayton Act had left untouched, by still further narrowing the circumstances under which the federal courts could grant injunctions in labor disputes. More especially, the Act explicitly formulated the "public policy of the United States" in regard to the industrial conflict, and by its light established that the allowable area of union activity was not to be restricted, as it had been in the Duplex case, to an immediate employer-employee relation.

312 U.S. at 230-31, 61 S. Ct. at 465-66.

The lesson of this history is that the courts should stop presuming that labor's activities come within the framework of the antitrust laws. The proper approach, as I see it, is to accommodate a number of statutes: the Sherman Act, the Clayton **[**34]** Act, the Norris-LaGuardia Act, and also the public policy pronouncements of the National Labor Relations Act.

[*1380] II.

---

[4] J. C. Gray, The Nature and Sources of the Law 124-25 (1921).

[5] "This statute (the Clayton Act) was the fruit of unceasing agitation, which extended over more than twenty years and was designed to equalize before the law the position of workingmen and employer as industrial combatants." *Duplex Printing Press Co. v. Deering, 254 U.S. 443, 484, 41 S. Ct. 172, 182-83, 65 L. Ed. 349 (1921)* (Brandeis, J., dissenting).

The orthodox accommodation of the national labor policy with ***antitrust law*** was first recognized in *Apex Hosiery Co. v. Leader, 310 U.S. 469, 60 S. Ct. 982, 84 L. Ed. 1311 (1940)*, where the Supreme Court held that labor could claim no immunity from antitrust laws if it collaborated with management to suppress commercial competition in the industrial market. This was eminently sensible and was recently reaffirmed by this court to prohibit labor unions from joining businessmen in a blatant restraint of trade when the prime objective of the trade restraint was not the legitimate subject of union organizational activity. *United States Steel Co. v. Fraternal Association of Steelhaulers, 601 F.2d 1269 (3d Cir. 1979)*.

Justice Stone, writing for the Court in Apex Hosiery, emphasized that the Sherman Act was not intended to cover any activity by a labor organization, or anyone else, unless that activity had, or was intended to have, a substantial effect upon commercial competition. This he termed the Sine qua non of antitrust liability. Justice Stone then specifically **[**35]** determined that the antitrust laws would be inapplicable, even were commercial competition adversely affected, if the challenged restraint resulted from the elimination of differences in labor standards or were a by-product of union activity regarding wages, hours and conditions of employment. He said:

> A combination of employees necessarily restrains competition among themselves in the sale of their services to the employer; yet such a combination was not considered an illegal restraint of trade at common law when the Sherman Act was adopted, either because it was not thought to be unreasonable or because it was not deemed a "restraint of trade." Since the enactment of the declaration in § 6 of the Clayton Act . . . it would seem plain that restraints on the sale of the employee's services to the employer, however much they curtail the competition among employees, are not in themselves combinations or conspiracies in restraint of trade or commerce under the Sherman Act.
>
> . . . (Successful) union activity, as for example consummation of a wage agreement with employers, may have some influence on price competition by eliminating that part of such competition which is based **[**36]** on differences in labor standards. Since, in order to render a labor combination effective it must eliminate the competition from non-union made goods, . . . an elimination of price competition based on differences in labor standards is the objective of any national labor organization. But this effect on competition has not been considered to be the kind of curtailment of price competition prohibited by the Sherman Act.

310 U.S. at 502-04, 60 S. Ct. at 997 (footnotes omitted).

Justice Stone's analysis is generally considered the centerpiece of what has developed into the non-statutory exemption carved out by the courts to uphold joint activity of labor and nonlabor parties when considerations of labor policy outweigh those of the antitrust policy. In *Hutcheson, supra*, and in *Allen Bradley Co. v. Local 3, IBEW, 325 U.S. 797, 65 S. Ct. 1533, 89 L. Ed. 1939 (1945)*, this notion was refined to provide that labor organizations would lose their immunity when the union activity was designed to "aid nonlabor groups to create business monopolies and to control the marketing of goods and services." *Allen Bradley, supra, 325 U.S. at 808, 65 S. Ct. at 1539*.

Further development occurred **[**37]** in *Amalgamated Meat Cutters v. Jewel Tea Co., 381 U.S. 676, 85 S. Ct. 1596, 14 L. Ed. 2d 640 (1965)*, where, although no single opinion of the court emerged, at least six justices would have tested the legality of the activity in terms of the union's objective. When the union sought better wages, hours or working conditions, I. e., legitimate subjects of collective bargaining, its actions were protected by antitrust immunity. When what was sought by the union would constitute a forbidden restraint on the product market, however, there could be no immunity. **[*1381]** In a critical passage of Jewel Tea, Justice White, writing for himself, Chief Justice Warren and Justice Brennan, stated that exemption from Sherman Act coverage depends in large measure on the extent to which the activity or agreement is "intimately related to wages, hours and working conditions" and obtained "through bona fide, arm's-length bargaining in pursuit of (the union's) own labor . . . policies, and not at the behest of or in combination with nonlabor groups . . . ." *381 U.S. at 689-90, 85 S. Ct. at 1602* (opinion of White, J., announcing the judgment of the Court). Three justices who did not join in Justice **[**38]** White's plurality opinion, but concurred in the result, would have gone further. Justices Goldberg, Harlan, and Stewart believed that agreements dealing with mandatory subjects of bargaining are wholly outside the antitrust laws. *Id. at 697-735, 85 S. Ct. 1596*.

Justice White's Jewel Tea formulation is extremely important because, in 1975, he was to join in the opinion of the Court in Connell. Summarizing the aforementioned precepts and agreeing with their application to the facts in that case, the Connell majority stated:

> The nonstatutory exemption has its source in the strong labor policy favoring the association of employees to eliminate competition over wages and working conditions. Union success in organizing workers and standardizing wages ultimately will affect price competition among employers, but the goals of federal labor law never could be achieved if this effect on business competition were held a violation of the antitrust laws. The Court therefore has acknowledged that labor policy requires tolerance for the lessening of business competition based on differences in wages and working conditions. See Mine Workers v. Pennington, supra, 381 U.S. at 666, 85 S. Ct. 1591; **[**39]** Jewel Tea, supra, 381 U.S. at 692-693, 85 S. Ct. 1603-04 (opinion of White, J.). Labor policy clearly does not require, however, that a union have freedom to impose direct restraints on competition among those who employ its members. Thus, while the statutory exemption allows unions to accomplish some restraints by acting unilaterally, E. g., *Federation of Musicians v. Carroll, 391 U.S. 99, 88 S. Ct. 1562, 20 L. Ed. 2d 460 (1968)*, the nonstatutory exemption offers no similar protection when a union and a nonlabor party agree to restrain competition in a business market.

421 U.S. at 622-23, 95 S. Ct. at 1835.

III.

The critical factors which emerge from this analysis are the characterization and evidence of the challenged restraint. It becomes apparent that in accommodating the tension between the nation's antitrust and labor policies, the line must be drawn by identifying labor's specific objective and methods. If union efforts and methods are directed solely at raising labor standards by increasing wages, regulating hours and improving working conditions, the union's activities, although conducive to lessening competition, are nonetheless exempt from the proscriptions of **[**40]** the antitrust laws. When the activity goes beyond this purpose, it risks losing the protection afforded by the federal labor policy. A "direct restraint on the business market," one whose "substantial anticompetitive effects, both actual and potential . . . would not follow naturally from the elimination of competition over wages and working conditions," will not be protected by the exemption. *Connell, supra, 421 U.S. at 625, 95 S. Ct. at 1836*.

But having indicated how the line is to be drawn is not to say that judicial precedents fashion an easy test to determine exactly where the axe must fall. [6] Any test used to make that decision must include a presumption **[*1382]** that ***antitrust law*** will not normally apply to union activity and that the union is not to be saddled with the burden of proving its activity is exempt. Rather, the burden of proving Non-applicability of the exemption should fall on the party alleging restraint.

[41]**

By virtue of the sophistication of our national labor policy, See, e. g., *Republic Steel Corp. v. UMW, 570 F.2d 467 (3d Cir. 1978)*; *United Steelworkers v. NLRB, 530 F.2d 266 (3d Cir. 1976)*, labor enjoys a wide body of statutory protection. To say that its activities are not protected one should have to prove that labor has forfeited the rights guaranteed it and that it is somehow no longer entitled to rely on the crisp and clear edict of the Clayton Act, I. e., "nor shall (labor) organizations, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade, under the anti-trust laws." *15 U.S.C. § 17*. It is meaningless, therefore, to demonstrate only that union activity inhibits competition in the antitrust sense because, as stated by Dean St. Antoine, "the difficulty in applying the antitrust concept to organized labor has been that the two are intrinsically

---

[6] Substantial uncertainty surrounds the boundary between the labor and the products markets as well as the appropriate method for accommodating the enforcement of the Sherman Act with the National Labor Relations Board's jurisdiction over the subject matter of collective bargaining. Meltzer, Labor Unions, Collective Bargaining, and the Antitrust Laws, 32 U.Chi.L.Rev. 659, 704 (1965).

incompatable. The antitrust laws are designed to promote competition, and unions, avowedly and unabashedly, are designed to limit it." [7] In this regard, Professor Archibald Cox has written:

[42]**

> The purpose and effect of every labor organization is to eliminate competition in the labor market, Chief Justice Taft's classic statement observed:
>
> "(Labor unions) were organized out of the necessity of the situation. A single employee was helpless in dealing with an employer. He was dependent ordinarily on his daily wage for the maintenance of himself and family. If the employer refused to pay him the wages that he thought fair, he was nevertheless unable to leave the employ and to resist arbitrary and unfair treatment. Union was essential to give laborers an opportunity to deal in equality with their employer."
>
> Each bricklayer's local seeks to control the supply of bricklayers' services available to contractors within its geographical jurisdiction. United Steelworkers of America controls the supply of labor available to United States Steel Corporation. In this sense every union is an avowed monopolist.

Cox, Labor and the Antitrust Laws A Preliminary Analysis, 104 U.Pa.L.Rev. 252, 254 (1955) (footnote omitted).

The doctrine of Stare decisis requires inferior courts in the judicial hierarchy to be bound by the determinations of superior courts. Were **[**43]** I writing a majority opinion I would probably be restrained from voicing these independent observations. But a separate opinion is a legitimate medium through which opposing views may be advanced to encourage open and robust debate. If our tradition did not provide for the vehicle of the separate opinion but permitted only rote obeisance to decided cases, the law would be embalmed, unreceptive to reexamination, incapable of adjustment to experience or change. Were I permitted to escape from the judicial hierarchy, intellectual integrity would compel my criticism of past judicial usurpation of the congressional mandate in cases similar to this one. I would observe that "(t)he historian must take the long view of the matter" and note that by action of the federal courts "an anti-trust act was converted into an anti-union act," [8] **[**44]** that "(laws) . . . on unionization and other reform legislation of a kind that had been enacted in European countries a generation before were delayed ten to twenty-five years by the High Court." [9]

[*1383] IV.

While being critical of the judicial abrogation of the national labor policy, I think that, consistent with the doctrine of Stare decisis, one can concede a precedential or institutional value of Connell and still legitimately argue that the rule announced there does not command a similar result in this case. In the view I take, Connell is not an example of a principled decision suggesting a desirable development of the law. It is not a case which should be used to spawn a large progeny. Rather, it states a rule which should be limited to its facts.

A.

A recent publication by the American Law Institute-American Bar Association Committee on Continuing Professional Education expresses a similar view.

> In evaluating Connell's new consensus, the result reached by the majority can be viewed as another Sui generis response to a particular problem in a specific industry rather than the exposition of a governing principle that might guide lower courts and litigants in future cases.

F. Bartosic & R. Hartley, Labor Relations **[**45]** Law in the Private Sector 190 (1977).

Likewise, Connell has met with strong criticism from other commentators. Consider Dean St. Antoine's pointed remarks:

---

7 St. Antoine, Connell: ***Antitrust Law*** at the Expense of Labor Law, 62 Va.L.Rev. 603, 604 (1976).

8 Levy, Judicial Review, History, and Democracy: An Introduction, in Judicial Review and the Supreme Court 36 (1967).

9 M. Parenti, Democracy for the Few 311 (1977).

> The Connell majority erred in failing to realize that under established precedents, the antitrust laws exempt agreements, whether primary or secondary, that are aimed at promoting union organization, as well as agreements that are aimed at eliminating competition over labor standards. The principal qualification, as Allen Bradley suggests, is that the restriction must not be broader than the objective requires. Perhaps Justice Powell had something like this in mind when he commented in Connell that the challenged agreements "did not simply prohibit subcontracting to any nonunion firm; they prohibited subcontracting to any firm that did not have a contract with Local 100." But in the parlance of the building trades, a "nonunion" firm in the jurisdiction of Local 100 would have meant any employer not having a contract with Local 100. Certainly there is nothing in the record to indicate that Local 100 was seeking to use the subcontracting clause to establish the sort of "geographical enclave" involved in Allen Bradley. Thus, without **[**46]** ever undertaking the critical inquiry into the extent to which the subcontracting agreement was related to union organizational objectives, the Connell majority arrived at the conclusion that the union had lost its antitrust immunity.
>
> The most egregious failure of the Connell majority to take proper account of the policies of the labor laws in working out an accommodation with the antitrust laws came last, and Justice Stewart made it the principal focus of his dissent. As he pointed out, Local 100's secondary activity at the Connell site was subject to comprehensive regulation under Sections 8(b)(4) and 8(e) of the NLRA and Section 303 of the Labor Management Relations Act (LMRA). Congress, in his view, meant to impose carefully defined sanctions for union secondary violations, and in so doing, meant to exclude private antitrust suits as a remedy.

St. Antoine, Supra note 7, at 622, 626 (footnotes omitted).

In his annual survey of antitrust cases Milton Handler suggests that Connell (along with the Pennington and Jewel Tea decisions) amounts to an improper application of ***antitrust law***:

> (W)e now have the uncertainties of what conduct is intimately related to wages, **[**47]** hours and conditions of employment, which mandatory subjects are and which are not exempt, and finally which unfair labor practices are within antitrust's coverage and which are not. Frankly, whatever may have been the deficiencies of the pre-Pennington labor-antitrust tenets, I cannot perceive how these post-Pennington changes provide any improvement. I do perceive how they compound the confusions and uncertainties with **[*1384]** which this murky field abounds, I thus adhere to my frequently expressed view that antitrust is a singularly inappropriate weapon to curb labor union abuses and that such abuses should be prohibited by specific labor legislation with specific and exclusive remedies.

Handler, Supra note 3, at 1025 (footnotes omitted).

Professor Monaghan is also of the view that Connell was incorrectly decided and that the Court's interpretation limiting the § 8(e) proviso to agreements within a collective bargaining context was unresponsive to the congressional purpose behind the proviso.

> (T)he Court's results, both on the antitrust and section 8(e) issues, appear incorrect. Unlike the restrictions found to violate the Sherman Act in Allen Bradley, Local 100's **[**48]** agreement seems fully related to the union's organizing campaign. Obviously, the exclusion of nonunion subcontractors from the Dallas area was crucial to the Local's success. As the Court suggested, however, the subcontracting agreement might also prevent subcontractors outside the union's geographical jurisdiction from working in the Dallas area. But the union could not succeed in organizing plumbers in Dallas if general contractors remained free to import nonunion subcontractors. Similarly, once an outside subcontractor performs work within the union's jurisdiction, the Local may have a labor dispute with it over union recognition. Since general contractors dealing with such subcontractors would be allies of an employer with whom the union has a dispute, an agreement preventing such subcontracting should be within the construction industry proviso of section 8(e).

Monaghan, The Supreme Court, 1974 Term, 89 Harv.L.Rev. 1, 244-45 (1975) (footnotes omitted).

Professors Areeda and Turner in their treatise on antitrust also question the desirability of the Connell rule. See 1 P. Areeda & D. Turner, ***Antitrust Law*** 218-22 (1978). See also Christensen, The Supreme Court's Labor Law **[**49]**

Decisions, October 1974 Term Past, Prologue, and the Potomac Parallax, in Labor Law Developments 1976, 33 (1976).

B.

Assuming as we must, however, the viability of Connell as the Supreme Court's most recent pronouncement in this area, a comparison of its facts is particularly useful in weighing the competing labor and antitrust considerations presented in this appeal. A five-four decision, Connell involved a factual complex held not to fit within the labor exemption to the antitrust laws.

Local 100, a bargaining representative for workers in the plumbing and mechanical trades, approached Connell, a general contracting firm, and demanded that it sign an agreement to award subcontracts only to firms that had "an executed, current collective bargaining agreement with Local 100 . . . ." *421 U.S. at 619-20, 95 S. Ct. at 1834*. This was part of a larger union campaign to obtain identical agreements with general contractors throughout Dallas. [10] When Connell refused to sign an agreement, the union posted a picket at one of its major construction sites, and 150 workers walked off the job, bringing construction to a halt. Connell subsequently signed the agreement under protest and sued, **[**50]** claiming the agreement violated the Sherman Act and was therefore invalid.

The Supreme Court did not find the agreement to be violative of the Sherman Act but remanded the proceedings for a new trial on the issue, after determining that the circumstances evidenced the kind of "direct restraint on the business market" which could not claim exemption from the antitrust laws, *421 U.S. at 625, 95 S. Ct. at 1836*. This conclusion was compelled by the presence of three factors. First, the agreement indiscriminately forbade the hiring of nonunion subcontracting firms, even if a **[*1385]** firm's competitive advantage resulted from efficiency and not from substandard wages or working conditions. Second, only those subcontractors who were parties to current contracts with Local 100 could **[**51]** be hired, an arrangement allowing the union to manipulate the subcontractor market by agreeing or refusing to contract with any firm it might choose. Third, the union was party to a multiemployer bargaining agreement that contained a most-favored nation clause which in effect sheltered association subcontractors against competition from outside subcontractors in that part of the market covered by subcontract agreements between general contractors and Local 100.

C.

The facts of the present appeal differ materially from those in Connell. Arguably, Connell's first element is present an "agreement" that commits Long John Silver's to hiring union craftsmen, and not hiring even an efficient nonunion contractor. Yet I am not persuaded that appellant introduced enough evidence to prove the second element. Long John Silver's letter to the unions indicates an intent to use only contractors "certified" by the unions; Muko introduced no evidence to explain the significance of certification, or to show that the unions exercised the degree of market control that Local 100 sought in Connell. Moreover, the agreements in Connell "did not simply prohibit subcontracting to any nonunion firm; They prohibited **[**52]** subcontracting to any firm that did not have a contract with Local 100." *421 U.S. at 624, 95 S. Ct. at 1836* (my emphasis). No such comprehensive restraint was present here, nor could it be properly inferred. As for the third element, there is neither allegation nor evidence of a multiemployer agreement with a most-favored nation clause.

More important than point-by-point distinctions, however, is the fundamental difference between the methods employed to press the cause of labor by the appellees here and those employed by Local 100 in Connell. In Connell, Local 100 had launched an all-out campaign to obtain identical agreements with general contractors throughout Dallas. Contractors like Connell who refused to sign would be, and were, picketed until they did. The picketing at Connell's site closed it down. [11] In contrast, the record here discloses no such widespread, dominating

---

[10] By the time the case went to trial, Connell and five other general contractors had been induced to sign agreements, and the union was waging a selective picketing campaign against those who resisted. *421 U.S. at 621, 95 S. Ct. 1830*.

union action. Picketing occurred at only one site, without causing a shutdown, and the handbilling which took place at the completed location lasted for only a week. The meeting between the unions and Long John Silver's occurred two months later. For all that appeared in appellant's case, the unions were concerned **[**53]** solely with persuading one firm in the entire Pittsburgh area to hire union craftsmen to build its restaurants. There is no evidence that the unions distributed handbills at any other establishment constructed by Muko, or at the premises of another company. [12] Nor is there evidence that Muko was picketed while it worked jobs for other employers. Thus this case presents a picture entirely different from Connell. This was an instance of union activity which was low-key and narrow in scope; an activity "intimately related to wages, hours and working conditions," normal aspirations of a union with a one-employer target; an activity unaccompanied by any effort to subject an entire industry to its demands and substantially restrain the products market.

[54]**

Finally, I consider it especially significant that the alleged agreement in the present case, Long John Silver's letter to the unions, was a direct result of legitimate handbilling on the part of the unions. The peaceful distribution of handbills, within the permissible limits of § 7 of the National **[*1386]** Labor Relations Act, *29 U.S.C. § 157*, carries the protection of the *first amendment*. [13] Subject to certain reasonable restrictions not involved in these proceedings, See, e. g., *Hudgens v. NLRB, 424 U.S. 507, 96 S. Ct. 1029, 47 L. Ed. 2d 196 (1976)*, and subject also to unfair labor practice considerations set forth in *29 U.S.C. § 158(b)(1)*, union handbilling is a protected activity. E. g., *Republic Aviation Corp. v. NLRB, 324 U.S. 793, 65 S. Ct. 982, 89 L. Ed. 1372 (1945)*; *Texaco, Inc. v. NLRB, 462 F.2d 812* (3d Cir.), Cert. denied, *409 U.S. 1008, 93 S. Ct. 442, 34 L. Ed. 2d 302 (1972)*. Handbilling is also protected by the statutory publicity proviso of § 8(b)(4) of the National Labor Relations Act, *29 U.S.C. § 158(b)(4)*. E. g., *Local No. 54, Sheet Metal Workers, AFL-CIO, 179 N.L.R.B. 362 (1979)*; Plumbers and Pipefitters *Local No. 142, AFL-CIO, 133 N.L.R.B. 307 (1961)*. **[**55]** Paragraph (4) of § 8(b) prohibits certain forms of secondary boycotts, but the publicity proviso reads as follows:

> Provided further, That for the purposes of this paragraph (4) only, nothing contained in such paragraph shall be construed to prohibit publicity, other than picketing, for the purpose of truthfully advising the public, including consumers and members of a labor organization, that a product or products **[**56]** are produced by an employer with whom the labor organization has a primary dispute and are distributed by another employer, as long as such publicity does not have an effect of inducing any individual employed by any person other than the primary employer in the course of his employment to refuse to pick up, deliver, or transport any goods, or not to perform any services, at the establishment of the employer engaged in such distribution.

The handbilling in this case was a form of publicity, carried on to inform the public of the labor dispute between the unions and Muko. Neither Muko nor Long John Silver's contends that the handbills were untruthful, or that the handbilling induced Long John Silver's employees not to perform their jobs.

V.

---

[11] The majority in Connell declined to consider whether this picketing was lawful. *421 U.S. 637-38, n. 19, 95 S. Ct. 1830*. But Justice Stewart's dissent argued convincingly that it could not be lawful under the majority's position. *421 U.S. at 648, 95 S. Ct. 1830*.

[12] Although Muko's complaint alleges that appellee unions engaged in similar activities with respect to construction of other fast food restaurants, Amended Complaint at Par. 20, the contention has not been urged on appeal.

[13] Section 7, *29 U.S.C. § 157*, provides:

Employees shall have the right to self-organization, to form, join, or assist labor organizations, to bargain collectively through representatives of their own choosing, and to engage in other concerted activities for the purpose of collective bargaining or other mutual aid or protection, and shall also have the right to refrain from any or all of such activities except to the extent that such right may be affected by an agreement requiring membership in a labor organization as a condition of employment as authorized in *section 158(a)(3)* of this title.

Connell is but one Supreme Court decision, albeit the most recent, in this difficult area of the law. I make use of it in conjunction with previous applicable cases, while the majority gives it a far broader, in my view an extravagant, interpretation that fails to account for other equally important Supreme Court pronouncements on this subject.

Federal courts make individual decisions when deciding the case or controversy before them. **[**57]** Individual decisions give way to "rules" which, in Roscoe Pound's formulation, are "precepts attaching a definite detailed legal consequence to a definite, detailed set of facts." Pound, Hierarchy of Sources and Forms in Different Systems of Law, 7 Tul.L.Rev. 475, 482 (1933). The essence of law as an ongoing process requires that we look not to One "rule" alone and "colormatch" it with the case at hand, but that we see the rule of a case as a single fiber in the pattern of rules created by previous holdings. The fabric of the law cannot depend for its strength on any one thread but must be woven with the woof and warp of many cases. Therefore, I refuse to make of Connell a whole cloth, let alone the coat of many colors envisioned by my brothers. I view Connell with other Supreme Court cases as, for example, *Jewel Tea, supra*, noting the precise extent of Justice White's participation in both. I simply cannot agree with the majority's characterization of Connell as a piece of judicial legislation which virtually destroys labor's exemption from the antitrust laws "outside a collective bargaining relationship." Maj. op. at 1373.

[*1387] VI.

Giving full consideration to both the **[**58]** antitrust and the national labor policies, I would hold, as a matter of law, that appellant did not make out a prima facie case that would bring the alleged restraint within the bar of the antitrust laws. I would affirm the judgment of the district court.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN4[] **Conspiracy, Elements**

While the practicalities of a conspiracy trial may require that hearsay be admitted "subject to connection," the judge must determine, when all the evidence is in, whether in his view the prosecution has proved participation in the conspiracy, by the defendant against whom the hearsay is offered, by a fair preponderance of the evidence independent of the hearsay utterances.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

Evidence > ... > Exemptions > Statements by Coconspirators > General Overview

HN5[] **Inchoate Crimes, Conspiracy**

Whenever reasonably practicable or whenever possible, the trial court should require the government to prove the existence of the conspiracy and each defendant's connection with it by independent evidence before admitting hearsay declarations of an alleged coconspirator.

Criminal Law & Procedure > Appeals > Standards of Review > General Overview

Evidence > ... > Exemptions > Statements by Coconspirators > General Overview

Criminal Law & Procedure > Trials > Motions for Acquittal

HN6[] **Appeals, Standards of Review**

If the judge does allow the jury to consider the out-of-court statements, the court must assume that he made the necessary finding and its only task is to decide if he had reasonable grounds for doing so.

Criminal Law & Procedure > Appeals > Reversible Error > General Overview

Evidence > ... > Exemptions > Statements by Coconspirators > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN7[] **Appeals, Reversible Error**

No court has held, however, that an instruction that gives the jury an opportunity to second-guess the court's decision to admit coconspirator declarations, otherwise inadmissible as hearsay, is reversible error prejudicing the defendant. To the contrary, it has been generally held that, so long as the court fulfills its responsibility to make the initial determination, such a charge only provides a windfall to the defendant.

Opinion by: SEITZ

Opinion

[*447] OPINION OF THE COURT

On October 29, 1976, a grand **[**2]** jury in the Eastern District of Pennsylvania returned a one-count indictment charging five corporations and seven individuals with conspiring "to raise, fix, maintain and stabilize the prices and terms and conditions of sale of consumer bags" in violation of *section 1* of the Sherman Act, *15 U.S.C. § 1*. The indicted corporations were Continental Group, Inc. (Continental), American Bag & Paper Corporation (American), Chase Bag Company (Chase Bag), Harley Corporation (Harley Corp.), and St. Regis Paper Company (St. Regis). The individual defendants were James K. Cooper (vice president and general manager of Continental's Flexible

Packaging Division), Peter J. Weggeman (general sales manager of Continental's Flexible Packaging Division), David Mawicke (manager of paper product sales for Continental's Flexible Packing Division), Stanley A. Schottland (president of American), Harrison B. Rue (vice president of Chase Bag's Converting Division), William H. Versfelt (vice president and general divisional manager of St. Regis's Bag Packaging Division), and Edward W. Weikum (manager of converter sales and license relations in St. Regis's Bag Packaging Division).

As defined in the indictment, **[**3]** "consumer bags" are small, pre-formed paper containers used to package such products as pet foods, cookies, tea, coffee, kitty litter, chemicals, and agricultural products. The bags usually have printed exteriors designed as specified by the customer. They are often lined or coated. In addition to packages designed for consumer items, the term "consumer bags" also includes such coated paper containers as air sickness bags.

Prior to trial Harley Corp., American, and Schottland (American's president) pled nolo contendere. Beginning on September 30, 1977, the three remaining corporate defendants (Continental, Chase Bag, and St. Regis) and the six remaining individual defendants (Cooper, Weggeman, Mawicke, Rue, Versfelt, and Weikum) went to trial before a jury. At the close of the government's evidence, the district court granted motions for judgment of acquittal on behalf of Mawicke and Versfelt. After the close of all evidence the jury returned a verdict acquitting St. Regis, Weggeman, and Weikum and convicting Continental, Chase Bag, Cooper, and Rue.

After denying post-trial motions, the district court fined Continental $ 750,000 and fined Chase Bag $ 600,000. It sentenced **[**4]** both Cooper and Rue to four months imprisonment to be followed by thirty-two months probation. In addition, it fined Cooper $ 40,000 and fined Rue $ 30,000. These convictions and sentences form the basis of the present appeal.

I

In its opinion on appellants' post-trial motions, the district court summarized the evidence presented at the 43-day trial. See *United States v. Continental Group, Inc., 456 F. Supp. 704, 708-14 (E.D.Pa.1978)*. Although we will examine portions of this evidence in some detail in considering each appellant's claim that the evidence was insufficient to support conviction, See Part II, Infra, a brief overview of the alleged conspiracy will aid our analysis.

The government charged that various manufacturers of consumer bags had begun to conspire to fix prices as early as 1950. This conspiracy allegedly continued, despite changes in participants, until the indictment was returned in 1976. Significantly, the grand jury charged that the conspiracy extended beyond December 21, 1974, the effective date of an amendment making violation of *section 1* of the Sherman Act a felony rather than a misdemeanor. Pub.L. 93-528, § 3, 88 Stat. 1708 (1974).

Of the indicted **[**5]** defendants, only American was alleged to have participated in 1950. Other companies alleged to have participated **[*448]** in the 1950's, however, included Benjamin C. Betner Company (Betner) and Arkell & Smith Company (Arkell & Smith). Continental acquired Betner in 1953; Chase Bag acquired Arkell & Smith in 1967. Although testimony concerning the meetings held in the 1950's was sketchy, the record indicates that some discussion of prices did occur.

In 1960 or 1961 representatives of Continental, Bemis Bag Company (Bemis Bag), and Arkell & Smith allegedly met in New York to put together a price list to be used in pricing consumer bags. The list consisted of a loose-leaf binder breaking down the various components or "factors" of a job and assigning a price to each. Factors included such specifications as the amount and type of paper, the type of coating, and the amount of printing. When a potential customer asked one of the manufacturers to quote a price on a particular job, that manufacturer would bid by adding up the necessary factors from the list. Continental, American, Bemis Bag, and Arkell & Smith allegedly adopted this pricing format. Later entrants into the industry **[**6]** allegedly were encouraged to price from the list.

During the 1960's Continental, the largest manufacturer of consumer bags, assumed the role of "price leader." Semi-annual revisions in the price list, either single-factor or across-the-board, would be initiated by Continental, published in the Wall Street Journal, and mailed to competitors. These increases and their effective dates allegedly were cleared in advance at meetings attended by representatives of Continental, Arkell & Smith (Chase Bag after 1967), American, Harley Corp., and St. Regis. In 1971 these manufacturers all joined the Paper Sack Shipping Manufacturers' Association (PSSMA). That organization held semi-annual or quarterly meetings at resorts around the country. According to the government, the defendant corporations would gather during these conventions at informal meetings to discuss and set prices. The corporations and corporate personnel attending these meetings varied from meeting to meeting, as did the exact topics of conversation. These informal gatherings continued into 1976.

In support of its allegations that the defendants conspired to fix prices, the government introduced three types of evidence. **[**7]** First, it presented testimony by participants in the various meetings. Because of the long time frame and the large number of meetings, the government's witnesses often were unsure about who attended particular meetings or about what was discussed. Second, the government presented evidence of inter-defendant phone calls to compare prices on particular bids. The government contended that these calls were made to ensure that the conspirators were abiding by the price list. Defendants argued that the phone calls that did occur were made in order to support a "meeting competition" defense under the Robinson-Patman Act, *15 U.S.C. § 13(b)*. Finally, the government introduced economic testimony aimed at demonstrating that the defendants made parallel and nearly simultaneous changes in their price lists between 1970 and 1976. Defendants contended that these data were misleading, that all price changes were cost-justified for each manufacturer individually, and that any parallelism was the result of legitimate price leadership/followership.

Additionally, the defendants presented evidence allegedly demonstrating that the consumer bag industry was very competitive. An economist testified **[**8]** that the industry's low profit margin and other economic indicators belied any concerted effort to maintain prices at an artificially high level. Moreover, defendants and some of their customers testified that discounts from list prices were very common and very competitive.

II

All the appellants argue that the government produced insufficient evidence to support their convictions. To the extent that they argue that *United States v. United States Gypsum Co., 438 U.S. 422, 98 S. Ct. 2864, 57 L. Ed. 2d 854 (1978)*, requires proof of a conspiracy's anticompetitive effect and that the government failed to provide such **[*449]** proof, we will treat that question in our consideration of Gypsum's applicability to this case. See Part IV, Infra. ***HN1***[] To the extent that each appellant asserts a general insufficiency of the evidence to prove the crime charged, we note that we must sustain the jury's verdict "if there is substantial evidence, viewed in the light most favorable to the Government, to uphold the jury's decision." *Burks v. United States, 437 U.S. 1, 17, 98 S. Ct. 2141, 2150, 57 L. Ed. 2d 1 (1978)*.

A

Continental contends that the evidence was insufficient for the jury to conclude **[**9]** that Continental had participated in the ongoing, twenty-six year conspiracy charged in the indictment.

Viewed in the light most favorable to the government, the evidence demonstrates that various manufacturers of consumer bags began to meet to discuss prices as early as 1951. These meetings took place several times a year up until 1971, the year that the manufacturers joined PSSMA. Early participants included representatives of Betner (Continental after 1953), American, Oneida Packaging Products (Oneida), Thomas M. Royal Co. (Royal), and Union Bag & Paper Co. (Union). Although the existence and extent of any agreement to fix prices during that early period is perhaps uncertain, Stanley Schottland testified that since 1950 American had followed price increases discussed at those meetings.

Continental's participation in the alleged conspiracy entered a new phase in 1961. According to Rose Loughrey, a price analyst for Continental, she received orders from George Buchanan, her supervisor, to attend a meeting with representatives of Bemis Bag and Arkell & Smith to develop a new price list for consumer bags. Buchanan told her that this list was to be used by Continental, American, **[**10]** Arkell & Smith, Bemis Bag, and Oneida. When Loughrey complained that such a meeting was illegal, Buchanan threatened her with dismissal. Loughrey attended the meeting and helped to develop the price list format. Some time after she reported back to Buchanan, he told her that the list had been accepted without protest. On further orders, Loughrey published the list. About twice each year she would revise the list and arrange for its distribution.

Robert Harley testified that soon after Harley Corp. entered the consumer bag industry sometime in 1960 or 1961, he received an invitation from Fred Hinkle of Continental to attend a meeting in New York City. Harley believed that he received the invitation because he had refused to tell Rose Loughrey over the phone what price he was charging Perk Foods for consumer bags. At the meeting, attended by Hinkle and Buchanan of Continental, Pavitt of American, and two representatives of Arkell & Smith, Hinkle told Harley that Harley Corp. didn't have to sell its bags "at what we consider under a market price." Harley told the participants that he had "no intention of doing anything to destroy the pricing structure in the market place." Hinkle **[**11]** then provided Harley with Continental's list, which Harley Corp. used thereafter.

In 1962, Loughrey and Hinkle of Continental, Eugene Pavitt of American, and representatives of Arkell & Smith met at Pavitt's home. According to Loughrey, she, Hinkle, and the Arkell & Smith people sought Pavitt's approval for an increase in the prices of heat-sealed bags. Pavitt reluctantly agreed to such an increase, saying "if you do (raise the price) we will follow." Loughrey issued new lists reflecting the changes.

Although representatives of the various competitors continued to meet through the 1960's, the record contains little evidence of who participated or what was discussed at any particular meeting. The record does indicate, however, that during this period various representatives of the defendant companies frequently exchanged phone calls to compare prices. Continental claims that these calls were made only to verify a customer's report of a lower price quoted by a competitor. According to Loughrey, however, when a prospective customer asked **[*450]** Continental for a bid, either she or Buchanan routinely would call competitors, ask if they had received a similar inquiry, and compare **[**12]** prices. Prior to 1961, Buchanan made the calls for large orders while Loughrey called for small orders. After 1961, Loughrey made almost all the calls herself. If the competitor's price was the same as that calculated by Loughrey, she would quote it to the customer. If they differed, she would consult her superiors before quoting a price.

In 1969, Pavitt of American hosted a meeting at the Philmont Country Club attended by George Landon and Fred Hinkle of Continental as well as representatives of Chase Bag and Harley Corp. Pavitt testified that Landon announced a three per cent price increase that Continental had made public a short while earlier. The advisability of such an increase was discussed by the participants, some of whom expressed surprise that Continental would commit itself to such an increase before the meeting. By the end of the meeting no one had expressed disagreement with a three per cent increase, and Pavitt left with the impression that all the participants had committed themselves to follow Continental's lead.

Similarly, Robert Harley described a meeting he hosted at Hilton Head Island, South Carolina, in January 1970. Landon of Continental stated that **[**13]** costs were increasing and that Continental was going to raise its prices. Harley responded that he was experiencing similar problems with costs and left with the impression that he had committed his company to mirror Continental's increase.

Prior to joining the PSSMA in 1971, Continental was represented at at least three other meetings where the participants discussed prices and industry conditions. During a golf outing at Tamarach Country Club in September 1970, Landon announced that Continental planned another three per cent increase effective January 1, 1971. Chase Bag and Harley Corp., whose representatives were present at Tamarach, thereafter implemented similar increases. In Spartansburg, South Carolina, in March 1971, the participants spoke generally about industry conditions and compared prices on certain types of bags. Finally, at Darien Country Club in May 1971, Continental and the other defendants agreed to join PSSMA.

Continental's representatives continued to meet with its competitors' representatives at informal "rump sessions" held at each PSSMA convention. Such sessions were held at Scottsdale, Arizona, in 1971, and at Boca Raton, Florida, and Chicago in 1972. **[**14]** The subjects discussed at these meetings, however, are unknown.

The first PSSMA-related meeting at which prices definitely were discussed was held at Tuckerstown, Bermuda, in October 1972. Landon and James Cooper (appellant in No. 78-2331) of Continental and Robert Harley of Harley Corp. hosted a breakfast meeting attended by representatives of St. Regis, American, and Union Camp. According to Harley, he and Landon accused Union Camp's Jack Bauman of undercutting certain prices quoted by Harley. Landon told Bauman that the other manufacturers would like to see "you people" use Continental's price list. Bauman responded that he would "take the matter under consideration."

In April 1973, at the PSSMA meeting in Atlanta, Landon of Continental told a group consisting of representatives of Harley Corp., Chase Bag, American, and St. Regis that Rose Loughrey had filed a discrimination suit against Continental and "had disclosed that this group of ours had been meeting, (and) named a lot of people and places." Harley then informed the group that his counsel had advised him to stop attending the rump sessions and to stop exchanging price information over the phone because such activities **[**15]** were illegal. Versfelt of St. Regis and Landon of Continental said that their attorneys had told them that the meetings were legal. Despite this discussion, the meetings continued and Harley continued to attend.

Later in 1973, at PSSMA's Pebble Beach convention, representatives of the defendant **[*451]** corporations met in Landon's hotel room. In the course of discussing revisions in the price list, Landon indicated "that he wanted it known" that Continental was the price leader of the industry.

A particularly significant meeting was held at the Chicago PSSMA convention in June 1974. Cooper and Weggeman represented Continental, Harrison Rue (appellant in No. 78-2332) represented Chase Bag. Others present included Harley of Harley Corp., Schottland of American, and Versfelt and Weikum of St. Regis. According to Harley, at an earlier meeting in New Orleans Weikum had expressed St. Regis's dissatisfaction with the price list for pet food bags. At that time Cooper had responded that Continental "liked the price book the way it was." Nevertheless, in Chicago, Versfelt and Weikum again suggested that St. Regis wanted to develop its own list for pet food bags. Schottland of American **[**16]** heard Cooper respond, "this will be fine, be my guest" or "go ahead, do it, that sounds great." Harley told the St. Regis people that if they revised the price list "we would follow their list."

St. Regis issued a revised list to be effective December 30, 1974. Chase Bag and Harley Corp. issued pet food lists identical to St. Regis's effective in January 1975. While Continental and American did not publish new lists until February 1975, both companies used the St. Regis list to price pet food bags in the interim.

In September 1975 the PSSMA held a convention in Bermuda. While there Cooper of Continental invited Harley of Harley Corp. and Schottland, Abe Mendenhall, and Theodore Hughes of American to a breakfast meeting. Harley testified that Cooper had told him that the purpose of the meeting was to get Schottland to stop delaying a price increase. Because a grand jury had begun an investigation into the industry, Schottland told Mendenhall and Hughes before the meeting that "I'm sure that nobody would be that dumb to bring up anything about prices, but if anybody does, for God's sake, don't open your mouth." According to Schottland, however, "(t)here was somebody that dumb."

[17]** Harley, Schottland, Mendenhall, and Hughes all testified as to what took place at the meeting. Cooper began by briefing them on the status of Rose Loughrey's lawsuit. He then announced that Continental intended to raise its prices by three per cent [1.] effective January 1, 1976. He specifically stated that he had the support of "the others" for such an increase. Cooper asked both Harley and Schottland if their companies would support such an increase; both indicated that they would. Although each of the defendant companies seemed to pursue an independent course during the next few months, all eventually announced a three per cent increase effective January 1, 1976.

After the announcement of this increase, the defendant companies met resistance from Ralston Purina, a major purchaser of consumer bags. In **[**18]** January 1976, at a PSSMA convention in Palm Beach, Florida, Harley discussed Harley Corp.'s pricing policy for Ralston with Cooper of Continental, Rue of Chase Bag, Weikum of St.

[1.] Schottland and Harley testified that Cooper announced a three per cent increase. Mendenhall and Hughes testified that Cooper mentioned a specific percentage, but they could not remember what it was.

Regis, and Schottland of American. In particular, he told Cooper that Harley Corp. was going to delay increasing its prices to Ralston until February 15. Cooper told Harley that Continental was going to do the same. Harley then gave Cooper, Rue, and Schottland a piece of paper with the prices Ralston had resisted, "(t)o let them know that the prices on that sheet were the prices that were being developed from our price book."

In addition to the evidence of meetings and telephone calls, the record contains economic testimony demonstrating a high degree of parallelism in the timing and amount of price changes by the defendant companies between 1970 and 1975. The district court has tabulated some of this evidence in its opinion. See *456 F. Supp. at 724-25*.

[*452] After reviewing the evidence concerning Continental's participation in the alleged conspiracy, we agree with the district court that there was substantial, even overwhelming, evidence of Continental's guilt. We recognize that the government **[**19]** shouldered a heavy burden when it charged a continuing 26-year conspiracy, but we believe that the government produced sufficient evidence to go to the jury on this allegation. Moreover, we note that the breakfast meeting in Bermuda took place in September 1975, well after the effective date of the amendment making a violation of the Sherman Act a felony. This meeting provides sufficient evidence for a jury to conclude that Continental's participation in the conspiracy extended into the "felony period." [2.]

B

Appellant James K. Cooper also argues that the government produced insufficient evidence to convict him of participation in the conspiracy charged. Cooper was general sales manager of Continental's Flexible **[**20]** Packaging Division from February 1970 to January 1974, and general manager of that division from January 1974 through 1976. In considering this contention we again stress that we must view the evidence in the light most favorable to the government. Moreover, we note that the government did not have to prove that Cooper participated in the conspiracy from its inception, but only that he knowingly became a member of the ongoing conspiracy. See *United States v. American Radiator & Standard Sanitary Corp., 433 F.2d 174, 182 (3d Cir. 1970)*, Cert. denied, *401 U.S. 948, 91 S. Ct. 928, 28 L. Ed. 2d 231 (1971)*.

During Cooper's tenure as general sales manager he served under George Landon and had no official authority to set the prices of consumer bags. Nevertheless, one facet of his job was supplying price information to Landon, who did have authority to set prices.

Testimony demonstrates that, prior to his promotion in 1974, Cooper accompanied Landon to various meetings identified as "conspiratorial" by the government. These meetings included the golf outing at Tamarach Country Club in September 1970 where Landon announced Continental's intention to increase its prices by three per **[**21]** cent. The evidence does not indicate, however, whether Cooper took any part in the ensuing discussion of prices.

Similarly, Cooper apparently accompanied Landon to meetings in Spartansburg, South Carolina (March 1971), Darien, Connecticut (May 1971), Tuckerstown, Bermuda (October 1972), Atlanta, Georgia (April 1973), and Pebble Beach, Florida (September 1973). As noted earlier, Landon spoke on behalf of Continental at each of these meetings while Cooper apparently took no active role.

At a meeting in New Orleans soon after his promotion to general manager, Cooper told representatives of St. Regis who were dissatisfied with the pet food price list that Continental liked the list the way it was. In June 1974 at a meeting in Chicago, the St. Regis representatives again voiced dissatisfaction with the list and announced that they were going to revise it. Cooper responded that "this will be fine, be my guest" or "go ahead, do it, that sounds great." Thereafter, Continental adopted the new list issued by St. Regis.

Cooper also presided at the breakfast meeting in Bermuda in September 1975. All four of the other men present, Schottland, Mendenhall, Hughes, and Harley, testified that **[**22]** Cooper sought Schottland's agreement to a three

[2.] Appellants contend that the government was obligated to prove an overt act by each defendant in furtherance of the conspiracy during the felony period. We need not decide here whether this contention is correct. But see *United States v. United States Gypsum Co., 600 F.2d 414, 417-20 (3d Cir. 1979)*.

per cent increase, See note 1, Supra, and that Cooper stated that he had the support of "the others" for this increase. Continental did, in fact, increase its prices by three per cent, as did each of the other defendant companies.

[*453] Between 1974 and 1976, Cooper also participated in the exchange of price information with Continental's competitors. Thus, in 1974 or 1975 he assisted Harley in obtaining the price that Continental was charging Keebler Cookies. During that same period Cooper called Hughes to find out whether American was going to sell "on list" in upcoming bids to Ralston Purina, Carnation, and American Airlines. Finally, in January 1976, he discussed with Harley, Rue, Weikum, and Schottland the prices that Harley Corp. was going to charge Ralston Purina after the most recent revision of the list.

Cooper argues that he introduced overwhelming evidence that any price increases made by Continental during his tenure as general manager were carefully planned responses to Continental's own corporate needs. Such internal planning, he argues, belies any conspiracy among competitors. We believe, however, that this **[**23]** question was for the jury to decide. Cooper forcefully argued this theory before them. Moreover, even if the evidence cited by Cooper did, in fact, prove overwhelmingly that Continental's pricing decisions were the product of internal corporate forces, such evidence would not rule out the conspiracy alleged by the government. We need only note that Continental was the self-professed "price leader," and that this role might well have permitted Continental to propose price increases that were best suited to its own corporate needs.

We conclude that there was substantial evidence to support the jury's conclusion that Cooper knowingly joined the ongoing conspiracy.

C

Appellant Chase Bag did not enter the consumer-bag industry until August 18, 1967, when it acquired Arkell & Smith, one of the originators of the price-list format. According to Rose Loughrey of Continental, Hinkle told her at that time that the new owners of Arkell & Smith did not want to exchange price information with Continental. As a result, Loughrey, refrained for a while from calling her contacts at Arkell/Chase. Within six to eight months, however, Chase Bag employees began to call her for prices and she resumed **[**24]** her normal exchange of information.

No Chase Bag representative attended any meeting of consumer-bag manufacturers until the summer of 1969, when a number of the alleged conspirators gathered at Seaview Country Club to meet Stanley Schottland, Eugene Pavitt's successor as president of American. Chase Bag was represented by Eugene Alexander, Chase Bag's product manager, and Frederick Kiendl, a former employee of Arkell & Smith who had been put in charge of Chase Bag's sales of "coated paper." Although prior to the takeover in 1967 Kiendl had controlled the pricing of consumer bags for Arkell & Smith, neither Kiendl nor Alexander had authority to price bags for Chase Bag. Both did, however, have "input" into the pricing decision. Apparently no price discussions occurred at the Seaview meeting.

Alexander hosted the golf outing at Tamarach Country Club in September 1970, in which Kiendl also participated. At that outing Landon of Continental announced that his company planned a three per cent increase effective January 1, 1971. Chase Bag subsequently enacted a similar increase.

In May 1971, Alexander and Kiendl attended the meeting at Darien Country Club along with James Wells, **[**25]** then vice president of Chase Bag, who did have authority to set prices. Although the participants at Darien apparently discussed the legality of their meetings and decided to join PSSMA, of which Chase Bag was already a member, no other price discussions occurred.

In April 1973, at the PSSMA meeting in Atlanta, Kiendl and Harrison Rue, who by that time had pricing authority, heard Landon of Continental report on Rose Loughrey's discrimination suit. Robert Harley again raised the question of the legality of the meetings.

[*454] The first active participation in such meetings by a Chase Bag employee apparently occurred at the Kansas City meeting in June 1973. Rue and Kiendl of Chase Bag, Cooper of Continental, Pavitt and Schottland of

American and representatives of Harley Corp. and St. Regis met in Schottland's suite for dinner. Pavitt was upset because a competitor had cut ten per cent off the list price American had quoted to Safeway Stores. Rue conceded that Chase Bag had given the discount, and an argument erupted between Rue and Pavitt.

Chase representatives also attended rump sessions in September 1973 at Pebble Beach (Rue), in January 1974 at Palm Beach (Alexander), **[**26]** and in April 1974 in New Orleans (Rue and Kiendl). Although prices were discussed at each of these meetings, the record does not indicate the extent to which Chase Bag's representatives participated in these discussions.

Rue and Kiendl were present at the Chicago meeting in June 1974 when St. Regis's representatives announced their intention to formulate a new price list for pet food bags. Harley testified that prior to the meeting he had called Schottland of American to find out why Schottland had not raised American's prices to Ralston Purina. According to Harley, "Stanley liked to say he was going to move his prices up with the rest of us, but he would always play some delayed action at some of his pet accounts." At the meeting Rue made derogatory remarks about Schottland's pricing policies and Schottland stormed out of the room.

At the same meeting Harley told the St. Regis people that if they revised the pet-food list Harley Corp. would follow it. Moreover, he testified that after the meeting he discussed St. Regis's proposal with Rue and that Rue stated that Chase Bag "was going to follow it too . . . ." As noted earlier, St. Regis issued its new list on December 30, 1974. **[**27]** The files of Chase Bag contained an identical list with Chase Bag's named on it with a date of January 2, 1975. And by January 24, 1975, Chase Bag's relevant prices were the same as those on the St. Regis list.

Kiendl of Chase Bag attended a dinner meeting in January 1975 on Marco Island, Florida. At the meeting he continued the feud between Chase Bag and American when he got into a heated argument with Schottland. According to Schottland, Kiendl felt "that American was not putting its prices up with the important customers on what (Kiendl) considered to be the proper time, in terms of material increases."

No representative of Chase Bag attended the September 1975 breakfast meeting in Bermuda where Cooper of Continental solicited and received Harley's and Schottland's agreement to a three per cent increase effective January 1, 1976. Nevertheless, Cooper did say that he had the approval of "the others" for the increase. In fact, Chase Bag thereafter enacted such an increase in January 1976.

Finally, Rue of Chase Bag called Harley in December 1975 to ask him what prices Harley Corp. was going to charge Ralston Purina after the January price increase became effective. Later, **[**28]** at the January 1976 meeting in Palm Beach, Harley gave Rue, Cooper, and Schottland a piece of paper bearing the prices he had quoted to Ralston.

Chase Bag argues strenuously that this evidence was insufficient to convict it of the crime charged. It contends that the timing of all its price increases was completely consistent with its role as a price follower. Moreover, Chase Bag argues that the behavior of its representatives at the various meetings and rump sessions was perfectly consistent with innocence.

Were it not for the incident involving the St. Regis price list, we might be inclined to agree that the government failed to carry its burden of proof. That incident, however, convinces us that the district court did not err in allowing the charge against Chase Bag to go to the jury. As noted earlier, Harley testified that in June 1974 Rue committed Chase Bag to the then-unpublished St. Regis list for pet-food bags. Chase Bag did, in fact, adopt an identical list in January 1975. Significantly, this adoption took place after December 21, 1974, and thus within the felony period. But see Note 2, Supra.

[*455] Recognizing the importance of the St. Regis incident, Chase **[**29]** Bag suggests several reasons why we should discount that evidence. First, it argues that Harley's testimony is completely implausible because Rue would never have committed Chase Bag to a price list he had not seen. We note, however, that such a commitment is not implausible if Rue had reason to believe that the other manufacturers also would adopt the St. Regis list. Harley's testimony is thus quite consistent with the conspiracy charged by the government.

Second, Chase Bag argues that St. Regis did not issue its list until December 30, 1974, that the list in Chase Bag's file had a date of January 2, 1975, and that this time span is so short as to belie any inference of reliance on the St. Regis list. We believe, however, that the jury was entitled to draw the opposite conclusion: that the short time span implies a prior commitment to adopt the list.

Third, Chase Bag argues that the jury's acquittal of Weikum and St. Regis demonstrates that they did not believe Harley's account of the incident. Jury verdicts, of course, need not be internally consistent. See, e. g., *Dunn v. United States, 284 U.S. 390, 393, 52 S. Ct. 189, 76 L. Ed. 356 (1932)*. Moreover, it was Rue of Chase **[**30]** Bag, and not Weikum or any other representative of St. Regis, who expressed a commitment to Harley to follow the St. Regis list. Thus the acquittal of Weikum and St. Regis does not necessarily indicate that the jury rejected Harley's testimony about the incident.

Finally, and quite correctly, Chase Bag argues that it was not charged with conspiring with Harley Corp. in 1974 to fix the price of pet food bags, but rather with joining an ongoing, 26-year conspiracy to fix the prices of consumer bags. Had the St. Regis incident been the only evidence against Chase Bag, we might agree that the government's proof varied substantially from the indictment. We note, however, that Chase Bag's participation in various meetings where prices were discussed, its exchange of price information with competitors, and its parallel pricing policies, although perhaps innocent by themselves, are cast in a different light by Rue's apparent agreement with Harley to fix prices.

Confronted with this evidence of express agreement, we believe that the jury was entitled to infer that Chase Bag's participation in other "conspiratorial" activities was not wholly innocent and that it knowingly joined the ongoing **[**31]** conspiracy.

D

On February 12, 1972, appellant Harrison B. Rue became vice president of sales for Chase Bag, a position which he retained through 1976. Like the other appellants, Rue asserts that the government failed to produce sufficient evidence to support his conviction.

Given the foregoing discussion, the evidence against Rue can be summarized rather briefly. He represented Chase Bag at the meetings held in April 1973 in Atlanta, in June 1973 in Kansas City, in September 1973 in Pebble Beach, in April 1974 in New Orleans, in June 1974 in Chicago, and in January 1976 in Palm Beach. At two of those meetings (Kansas City and Chicago), he argued about pricing policy with representatives of American. He controlled Chase Bag's price list for consumer bags from 1972 through 1976, a period during which Chase Bag's price movements were demonstrably parallel to the movements of the other alleged conspirators. Moreover, according to Harley's testimony, Rue expressly agreed in June 1974 that Chase Bag would adopt the St. Regis price list for pet food bags when it was published. Chase Bag did, in fact, adopt a list identical to the St. Regis list.

Like Chase Bag, Rue argues that the **[**32]** St. Regis incident is not probative of his guilt. We conclude, however, that this agreement, when combined with the other evidence of arguably conspiratorial activities, constitutes substantial evidence supporting the jury's verdict as to Rue.

[*456] III

The appellants contend that their convictions must be reversed and a new trial granted because the district court erred in permitting the jury to consider hearsay declarations and actions of alleged coconspirators against all the defendants without first making a finding that the government had established the existence of the alleged conspiracy and the participation therein of each defendant and alleged coconspirator by a preponderance of independent evidence. ***HN2***[] See *Fed.R.Evid. rule 801(d)(2)(E)* ("A statement is not hearsay if . . . (t)he statement is offered against a party and is . . . a statement by a coconspirator of a party during the course and in furtherance of the conspiracy."). They also contend that the district court abused its discretion in refusing to require the government to establish the existence of the conspiracy charged and the participation therein of each defendant by a preponderance of independent **[**33]** evidence before introducing any hearsay attributed to other members of the alleged conspiracy.

We will deal with the latter contention first. Appellants concede, as they must, that ***HN3***[] the control of the order of proof at trial is a matter committed to the discretion of the trial judge. See *Geders v. United States, 425 U.S. 80, 86, 96 S. Ct. 1330, 47 L. Ed. 2d 592 (1976)*; *United States v. American Radiator & Standard Sanitary Corp., supra, 433 F.2d at 195*. In American Radiator, this court recognized that the order-of-proof problem confronting the trial judge is a particularly difficult one where the government is attempting to prove the participation of multiple defendants in a continuing conspiracy. Id.

In this case, the district court initially determined that it would permit the government to introduce into evidence otherwise inadmissible declarations of alleged coconspirators "subject to the obligation of the Government, before the case is completed, to establish the existence of the conspiracy and prove aliunde as to every separate defendant." This court approved the procedure outlined by the district court in this case in *United States v. Bey, 437 F.2d 188, 191 (3d Cir. 1971)*, **[**34]** in which the following passage from an opinion of the Second Circuit Court of Appeals was quoted with approval:

> ***HN4***[] While the practicalities of a conspiracy trial may require that hearsay be admitted "subject to connection," the judge must determine, when all the evidence is in, whether in his view the prosecution has proved participation in the conspiracy, by the defendant against whom the hearsay is offered, by a fair preponderance of the evidence independent of the hearsay utterances.

United States v. Geaney, 417 F.2d 1116, 1120 (2d Cir. 1969), Cert. denied, *397 U.S. 1028, 90 S. Ct. 1276, 25 L. Ed. 2d 539 (1970)*.

This court has recognized that there is a real danger in a conspiracy trial involving numerous defendants that the jury may find a particular defendant guilty merely because of his association with the other defendants. See *United States v. American Radiator & Standard Sanitary Corp., supra at 195*. One aspect of this danger is that the trial judge, after admitting hearsay declarations of alleged coconspirators subject to later connection, may find at the close of all the evidence that the government has not borne its burden of proving by independent evidence that **[**35]** those declarations were made during the course and in furtherance of a conspiracy joined in by both the defendant and the declarant. Cautionary instructions to the jury might not suffice to cure the resulting prejudice to the defendant. See *Krulewitch v. United States, 336 U.S. 440, 453, 69 S. Ct. 716, 93 L. Ed. 790 (1949)* (Jackson, J., concurring). In such instances it may be necessary for the trial judge to grant a defendant's request for a mistrial. See *United States v. Bey, supra at 191*, Quoting *United States v. Geaney, supra at 1120*.

Recognizing these problems, some appellate courts have indicated their preference that, "***HN5***[] whenever reasonably practicable" or "whenever possible," the trial court should require the government to prove the existence of the conspiracy and each defendant's **[*457]** connection with it by independent evidence before admitting hearsay declarations of an alleged coconspirator. See *United States v. James, 590 F.2d 575, 582* (5th Cir.) (en banc), Cert. denied, *442 U.S. 917, 99 S. Ct. 2836, 61 L. Ed. 2d 283 (1979)*; *United States v. Macklin, 573 F.2d 1046, 1049 n.3* (8th Cir.), Cert. denied, *439 U.S. 852, 99 S. Ct. 160, 58 L. Ed. 2d 157 (1978)*. We agree **[**36]** that the danger of prejudice to the defendant inherent in the practice of admitting coconspirator declarations, otherwise hearsay, subject to later proof of the requisite conspiracy, dictates that the practice be carefully considered and sparingly utilized by the district courts. Nonetheless, given the large amount of interrelated testimony to be considered in this case, we believe that alternative approaches may have been unduly complex and confusing to the jury or to the court. We therefore conclude that the district court's decision to admit such declarations "subject to later connection" was not inconsistent with the sound exercise of its discretion.

The appellants have placed greater reliance on what they characterize as the district court's failure to make a finding, before submitting this case to the jury, that the government had, in fact, established the existence of the alleged conspiracy and the connection of each defendant with it by a clear preponderance of evidence independent of the hearsay declarations. Absent such a finding it would have been error for the court to have submitted the case to the jury without cautionary instructions limiting the use of hearsay statements **[**37]** as to particular defendants. See *United States v. Trowery, 542 F.2d 623 (3d Cir. 1976)* (per curiam), Cert. denied, *429 U.S. 1104, 97 S. Ct. 1132, 51 L. Ed. 2d 555 (1977)*; *United States v. Bey, supra.*

Appellants' position is that the trial judge in this case abdicated his responsibility under Trowery and Bey and allowed the jury to make the determination as to whether the government had established sufficient independent evidence of the conspiracy. We disagree with the appellants' characterization of the district court's actions.

Following the close of the prosecution's case, appellants Continental, Chase Bag, and Rue filed motions to strike the hearsay testimony of government witnesses against each of them for failure of the government to prove the existence of the conspiracy and their connection with it by a preponderance of independent evidence. The appellants' motions and Chase Bag's memorandum of law in support of its motion explicitly brought the decision in Trowery on the government's burden of proof to the district court's attention. It appears obvious to us that when those motions were denied, in an order entered on November 3, 1977, the district court implicitly found **[**38]** that the government had met its burden under Trowery and Bey. There is no requirement in either of those opinions that the trial judge enter specific findings of fact supporting his conclusion that a clear preponderance of independent evidence has been presented establishing a conspiratorial relationship between the hearsay declarant and each of the defendants.

A long line of authority in the Second Circuit supports our conclusion that the denial of the appellants' motion to strike constituted a finding by the court that the government had met its burden under Trowery. See, e. g., *United States v. Green, 523 F.2d 229, 233 n.4 (2d Cir. 1975)*, Cert. denied, *423 U.S. 1074, 96 S. Ct. 858, 47 L. Ed. 2d 84 (1976)* ***HN6***[] ("If the judge does allow the jury to consider the out-of-court statements, we must assume that he made the necessary finding and our only task is to decide if he had reasonable grounds for doing so."); *United States v. Baker, 419 F.2d 83, 88-89 (2d Cir. 1969)*, Cert. denied, *397 U.S. 976, 90 S. Ct. 1086, 25 L. Ed. 2d 265 (1970)* (denial of a motion for acquittal on conspiracy charge constitutes a determination that there was sufficient independent evidence to justify admission **[**39]** of hearsay declarations of coconspirators); *United States v. Geaney, supra at 1120* ("we must assume on appeal that the trial judge was satisfied of the existence of a conspiracy on the basis of non-hearsay evidence.").

[*458] Appellants suggest that the foregoing authority has been undermined by the more recent opinion of the Second Circuit Court of Appeals in *United States v. Ziegler, 583 F.2d 77 (2d Cir. 1978)*. In Ziegler the trial judge had "admitted all proffered declarations of co-conspirators subject to connection, without at any time making any preliminary finding based on non-hearsay evidence, that the conspiratorial relationship between the witness (Sic) and the appellant had been sufficiently established by independent evidence Aliunde to warrant admission of such declarations." *Id. at 80-81* (footnotes omitted). That omission was found to constitute harmful error. Ziegler was a case, however, in which the trial judge explicitly refused to comply with applicable Second Circuit precedent because he disagreed with it. Thus, the Ziegler court distinguished the cases relied upon here that hold that the requisite finding can be inferred from the court's submission of **[**40]** the evidence to the jury: "Where, as here, the district judge declines to make the determination when asked to do so and expresses his disagreement with controlling Second Circuit precedent, we must resolve any remaining ambiguity in favor of the accused." *Id. at 80 n.5*. In this case the district court made the requisite determination when asked to do so by denying the appellants' motions to strike the hearsay testimony.

The appellants assert that the district court's denial of their motions to strike did not constitute the findings required by Trowery and Bey, that the court impermissibly left that finding for the jury's consideration, and that the truth of their assertions is demonstrated by the court's charge to the jury and by the court's opinion accompanying the order denying their post-trial motions for judgment of acquittal and a new trial.

In charging the jury, the district court employed one of the government's requested instructions:

> Now whether or not therefore any particular defendant was a member of or participated in a common plan in determining as to that defendant that involvement can only be established beyond a reasonable doubt by evidence as to that defendant's **[**41]** own conduct; that is, what that defendant himself said or did. If it appears beyond a reasonable doubt from the evidence that a common plan did exist and that a defendant was one of its members, then the act knowingly done and the statements knowingly made by any other person likewise found to be a conspirator may be considered by you as evidence in the case to each defendant found to be a member, even though the act done and the statements made occurred in the absence and without the

> knowledge of an absent defendant, provided that the acts done or the statements made were during the existence of a common plan and in furtherance of the purpose and objectives of the plan.
>
> To summarize, you may not use a statement made by any of the alleged conspirators against the particular defendant to prove that that defendant was a member of the plan or conspiracy. Membership by an individual defendant or a corporate defendant must be proved by the acts or statements of that defendant himself or itself but if membership has been so proved thereafter you may consider the acts and statements of any other member of the conspiracy against a particular defendant so found to be a member and **[**42]** so long as he remains in the conspiracy, provided the acts and the statements were during the continuance of the plan and conspiracy in furtherance of it.

Appendix at 400-01.

It is true, of course, that the instruction given the jury on the sufficiency of independent evidence was superfluous. In Trowery this Court held:

> If the evidence is admitted, it then goes to the jury without special instruction. The issue of concert of action, as it applies to the question of admissibility of evidence, is determined by the trial judge as a matter of law, rather than being submitted to the jury.

542 F.2d at 627. In this regard, Trowery reiterated the earlier holding in Bey :

> **[*459]** Nor was it necessary for the trial court to instruct the jury to consider the (hearsay) statement only if it found independent evidence of the conspiracy. Once the judge has made the initial determination of admissibility, the jury should not be given an opportunity to second-guess his decision.

437 F.2d at 191-92.

HN7[] No court has held, however, that an instruction that gives the jury an opportunity to second-guess the court's decision to admit coconspirator declarations, otherwise **[**43]** inadmissible as hearsay, is reversible error prejudicing the defendant. To the contrary, it has been generally held that, so long as the court fulfills its responsibility to make the initial determination, such a charge only provides a windfall to the defendant. See, e. g., *United States v. Enright, 579 F.2d 980, 987 (6th Cir. 1978)*; *United States v. Smith, 578 F.2d 1227, 1233 (8th Cir. 1978)*; *United States v. Petrozziello, 548 F.2d 20, 23 (1st Cir. 1977)*.

Despite their present reliance on the court's charge as evidence of the trial judge's abdication of his responsibility under Trowery and Bey, the defendants did not object to that charge after it was given. Moreover, an additional factor buttressing our conclusion that the charge lends no support to the appellants' claim of reversible error is that Chase Bag itself asked that such a charge be given. In its requested points for charge, modifying those submitted by the defendants jointly, Chase Bag requested that the jury be instructed:

> Chase cannot be convicted of being a member of the conspiracy unless you are satisfied that the government proved beyond a reasonable doubt by independent first-hand testimony that Chase joined **[**44]** the conspiracy. Mere out-of-court statements by others who did not testify is not sufficient to prove that Chase joined the conspiracy.

In a footnote to that request Chase Bag stated:

> This requested point appears to be in conflict with the Third Circuit's decisions in *United States v. Trowery, 542 F.2d 623 (3d Cir. 1976)*. Chase, however, asserts that without this point it is being subjected to trial with a standard of proof less than "beyond a reasonable doubt." Chase, therefore, reserves its rights in this regard.

Appendix at 310. Our examination of the record convinces us that the appellants suffered no prejudice from the court's instruction to the jury concerning independent evidence of the conspiracy.

Appellants also rely on the district court's post-trial opinion as evidence that the court abdicated its responsibility under Trowery. In the appellants' joint motion for a new trial they asserted that the district court had erred in denying their pre-trial motion to regulate the order of proof, in admitting testimony at trial containing hearsay, and in denying their motions to strike that testimony. In its opinion denying their motion, the court stated: **[**45]**

> In the instant case, the Court did not abuse its discretion to permit the Government to introduce hearsay statements of alleged coconspirators subject to their later connection with the conspiracy by clear, independent evidence, because the evidence in this case clearly was sufficient for the jury to find beyond a reasonable doubt that a conspiracy existed and that each of the defendants knowingly joined and participated in that conspiracy during the felony period.

456 F. Supp. at 720. We believe that this statement must be read in the total context of the district court's opinion. In an earlier passage, the district court accurately summarized this court's holding in Trowery, stating that the case

> enunciated the well-settled rule . . . that to determine whether statements of an alleged coconspirator are competent against the non-declarant, the trial judge must determine whether it has been proved, by a clear preponderance of the evidence independent of the hearsay statement, that a joint undertaking existed at the time of the statement or action and that the declarant was a participant.

[*460] Id. Thus, contrary to the appellants' assertions, the district **[**46]** court's opinion does not demonstrate confusion on the part of the trial judge about Trowery 's requirements as to the role of the court and the jury on this issue. Rather, the court's opinion, viewed in its entirety, must be read as holding that, not only was there a clear preponderance of independent evidence from which the judge had found the requisite conspiratorial relationship, but also that there was sufficient evidence for the jury to have found beyond a reasonable doubt that such a relationship existed.

Although the better practice is for the district court to place in the record an explicit Trowery ruling accompanied by such exposition as seems appropriate under the circumstances, we believe that the district court in this case was aware of its responsibilities under Trowery and Bey. Furthermore, we believe that the district court made an explicit finding when it denied the appellants' motions to strike hearsay testimony, that there was a clear preponderance of non-hearsay evidence establishing the existence of a conspiracy and the participation of each of the defendants and declarants therein. Under such circumstances, the court's later instruction to the jury directing **[**47]** them not to consider hearsay declarations against any defendant unless they were first satisfied, beyond a reasonable doubt and based on independent evidence, of that defendant's participation in a joint venture with the declarant, was, at worst, harmless error.

It only remains for this court to consider whether the district court "had reasonable grounds" to make such a finding. *United States v. Bey, supra, at 191*. In making this determination, we note that, with a few minor exceptions, [3] the facts considered in the discussion of each appellant's challenge to the sufficiency of the evidence are supported by evidence independent as to that appellant. ***HN8***[] Testimony relating statements made by a particular defendant or, in the case of corporate defendants, by their agents are admissible against that defendant without resort to the coconspirator exception. See *Fed.R.Evid. 801(d)(2)(A)* & *(D)*. Moreover, a number of the statements attributed to persons other than the defendants were not admitted for the truth of the declaration, and therefore do not constitute hearsay at all. See *Fed.R.Evid. 801(c)*. Given the testimony of prosecution witnesses that they participated in the alleged conspiracy, **[**48]** and given the non-hearsay evidence linking each appellant with that conspiracy, we conclude that the district court did not err in admitting all coconspirators' statements against all the appellants.

IV

Appellants challenge various aspects of the instructions delivered to the jury by the district court. Most significant, they have challenged the instructions on intent and on withdrawal from the conspiracy.

A

---

[3] The most notable exception is Cooper's alleged statement at the breakfast in Bermuda that he had the support of "the others" for a three per cent increase. Although this statement appears to be hearsay as to Chase Bag and Rue, we believe that the remaining, independent evidence against those defendants is sufficient to support the district court's decision under Trowery.

Appellants advance three arguments in support of their contention that the district court erroneously instructed the jury on the issue of intent. First, they argue that because violations of the Sherman Act are now felonies, See **[**49]** Pub.L. 93-528, § 3, 88 Stat. 1708 (1974), the district court erred in refusing to require a finding of specific intent to bring about anticompetitive effects. Second, they argue that *United States v. United States Gypsum Co., 438 U.S. 422, 98 S. Ct. 2864, 57 L. Ed. 2d 854 (1978)*, controls this case and renders the district court's instructions on intent erroneous. Third, they argue that one portion of the district court's charge allowed the jury to return a verdict of guilty without any finding of intent whatsoever.

[*461] 1

HN9[] The Supreme Court has rejected the claim that conviction of a misdemeanor violation of the Sherman Act requires a finding of specific intent or purpose to produce anticompetitive effects. See *United States v. United States Gypsum Co., supra, at 444* & n.21, *98 S. Ct. 2864*. Nevertheless, appellants contend that the government must be held to this higher standard now that the crime charged is a felony.

Certainly nothing in the legislative history of the 1974 amendment to the Sherman Act indicates any Congressional intention to alter the mens rea necessary for conviction. In fact, all indications are that, despite the increase in penalties, Congress intended **[**50]** that "(n)o change would be made in the substantive ***antitrust law*** itself." 120 Cong. Rec. 36340 (Nov. 19, 1974) (statement of Congressman Hutchinson). Nor are we persuaded that the absence of a showing of specific intent denies the appellants due process of law. See *United States v. Foley, 598 F.2d 1323, 1335-36 (4th Cir. 1979)*. We conclude, therefore, that conviction of a felony for violating the Sherman Act does not require a showing of specific intent to produce anticompetitive effects. Accord *United States v. Foley, supra* ; United States v. Noll Manufacturing Co., 1977-2 Trade Cas. P 61,712 (N.D.Cal.1977).

2

Alternatively, appellants argue that the Supreme Court's decision in *United States v. United States Gypsum Co., 438 U.S. 422, 98 S. Ct. 2864, 57 L. Ed. 2d 854 (1978)*, necessitates reversal of their convictions. In Gypsum, handed down seven months after the jury returned its verdict in this case, the Court rejected an instruction that allowed the jury to convict defendants of violating the Sherman Act if the jury concluded that the exchange of prices among the defendants had an unreasonable anticompetitive effect, regardless of the defendants' knowledge of or desire for **[**51]** that effect. The district court had instructed:

> The law presumes that a person intends the necessary and natural consequences of his acts. Therefore, if the effect of the exchanges of pricing information was to raise, fix, maintain, and stabilize prices, then the parties to them are presumed, as a matter of law, to have intended that result.

Id. at 430, 98 S. Ct. at 2869. ***HN10***[] The Supreme Court held that the Sherman Act did not create a strict-liability crime, and that the prosecution was required to prove either (1) that defendants knew of the probable anticompetitive effects of their actions, which effects actually occurred, or (2) that defendants acted with the conscious purpose of producing anticompetitive effects, whether or not those effects actually occurred. *Id. at 444* & n.21, *98 S. Ct. 2864*.

Appellants allege that Gypsum 's standards apply to this case and that the district court erred in failing to instruct the jury in those terms. Moreover, appellants contend that the government's alleged failure to introduce any evidence of actual anticompetitive effects entitles them to judgments of acquittal under Gypsum 's standards. In considering these claims we first **[**52]** must determine what level of intent must be proven where the defendants are charged with price fixing; we then must evaluate the district court's instructions and the government's evidence against that standard.

In *United States v. Gillen, 599 F.2d 541 (3d Cir. 1979)*, this court held that Gypsum did not alter the "long-established rule of law on price-fixing cases" that proof of the requisite mens rea is satisfied by proof that the defendant formed or joined a conspiracy to fix prices. *Id., at 545*. We noted that in Gypsum the conduct described in the challenged instruction, exchanging prices, was not a per se violation of the Sherman Act. Instead, it might have fallen within "the gray zone of socially acceptable and economically justifiable business conduct." *438 U.S. at 441,* 98 S. Ct. at 2875. Gillen, on the other hand, stood accused of price fixing, "an area of the law in which people either can or ought to be able to predict the legal consequences of their actions." United States v. Gillen, supra, at 544.

[*462] It is important to note, as did the Supreme Court in Gypsum, that conspiracy cases actually involve two types of intent, the intent to agree and the intent to **[**53]** effectuate the object of the agreement. See 438 U.S. at 443 n.20, 98 S. Ct. 2864. Clearly, it is not sufficient for the government to prove that the defendants agreed to do something; agreement itself is not illegal. Instead, the government must prove that the defendants agreed to effectuate an illegal purpose, E. g., to fix prices. This illustrates the crucial distinction between Gypsum And Gillen. An agreement to exchange prices, by itself, is not illegal; an agreement to fix prices is. [4]

[54]** This case, like Gillen, involves a conspiracy to fix prices. Nevertheless, appellants suggest two reasons why Gillen might be distinguishable. First, they argue that in Gillen the evidence of a conspiracy was overwhelming and that the only real issue was whether the defendant had joined that conspiracy. See United States v. Gillen, supra, at 546. In this case, they argue, the existence of a price-fixing conspiracy was fiercely contested below. But we fail to see what effect the amount of proof can have upon the standard of proof. Although the existence of a price-fixing conspiracy may have been indisputable in Gillen, the government was still required to meet its burden of proving that Gillen had knowingly agreed to fix prices. See id. at 545-46.

Alternatively, appellants note that Gillen was a nonjury trial and that the issue presented to this court was the sufficiency of the district court's findings of fact rather than the sufficiency of jury instructions. Again, we fail to see what effect this fact should have upon the rule announced in Gillen. Whether the ultimate fact-finder is a judge or a jury, the legal standards remain the same.

Because we believe that Gillen controls **[**55]** this case, the inquiry becomes whether the district court adequately instructed the jury that the government had to prove that defendants knowingly joined or formed a conspiracy to raise, fix, stabilize, or maintain prices. Accord, United States v. Brighton Building & Maintenance Co., 598 F.2d 1101, 1106 (7th Cir. 1979). Our examination of the district court's instructions convinces us that they do satisfy this requirement. A few examples from the charge will illustrate this conformity:

> (T)his indictment charges that . . . the defendants and other co-conspirators engaged in a single combination and conspiracy in unreasonable restraint of trade and commerce . . . and that this combination and conspiracy consisted of a continuing agreement, understanding and concert of action among the defendants . . . the substantial terms of which are to raise, to fix, maintain and stabilize prices and terms, conditions of sale of consumer bags.
>
> To create (a conspiracy) two or more persons must enter into a mutual agreement or understanding that they will act together for an unlawful purpose or to accomplish a lawful purpose by an illegal means. In the absence of an agreement or **[**56]** mutual understanding or meeting of the minds there can be no conspiracy.
> What must be proved beyond a reasonable doubt is that the alleged conspiracy was knowingly formed and that two or more persons including one or more of the defendants on trial now knowingly became members of the conspiracy charged in the indictment.
>
> **[*463]** (Before) you may find that the defendants became a member of the conspiracy charged the evidence must show beyond a reasonable doubt, first, that the conspiracy was knowingly formed; secondly, that the defendants knowingly participated in a conspiracy with the intent to further or advance some objective or purpose of the conspiracy. This latter requirement is satisfied if the evidence consisting of that defendant's own statements and conduct shows beyond a reasonable doubt a knowing assistance of any kind in effectuating the objective of the conspiracy.

---

4. Appellants argue that the distinction drawn in Gillen is erroneous because the defendants in Gypsum also were accused of conspiring to fix prices. See 438 U.S. at 427, 98 S. Ct. 2864. This argument fails to recognize the narrow focus of the Supreme Court's opinion in Gypsum. The district court's instructions in that case allowed the jury to convict the defendants if the jury concluded that there was an agreement to exchange price information and that such exchanges had the effect of stabilizing prices. This instruction rendered the indictment and the government's theory of the case irrelevant.

> It is not necessary for the prosecution to prove knowledge by a defendant that a particular statute or act or provision of law was an object of this conspiracy. If you find as jurors in this case beyond a reasonable doubt that the conspiracy charged was formed in the manner **[**57]** that I have mentioned on the basis of the evidence, if you find it was knowingly formed for the purposes outlined in the indictment, and that a defendant or any defendant thereafter knowingly by his own statements or conduct became a member of the conspiracy, then it would be as I have outlined in summary up to this point your duty to consider that defendant guilty of the crime charged.
>
> On the other hand, if you find either that the conspiracy was not knowingly formed or even though formed that a defendant by his own or its own statements or conduct became a member, if you should fail to find either of those, then you should return a verdict of not guilty.

Reading the charge as a whole, we believe that the district court adequately instructed the jury that it had to acquit a particular defendant unless it found that he knowingly formed or joined a conspiracy to raise, fix, maintain, or stabilize the prices of consumer bags.

3

Despite the general import of the charge, appellants argue that one instruction in particular allowed the jury to convict them without any finding of intent whatsoever. At one point the district court charged:

> Now in order to establish **[**58]** the offense charged in this indictment the proof need not show that the accused acted willfully or with specific intent or bad purpose either to disobey or disregard the law. The element of intent (in) the offense charged (is) established if the evidence in the case shows beyond a reasonable doubt that the act or acts of the accused were voluntarily and intentionally; that is, that they were knowingly done.
>
> The purpose of that word "knowingly" is to insure that no one will be convicted for an act done because of mistake or inadvertence or accident or other innocent reason.
>
> If these acts knowingly done resulted in an agreement of the type forbidden by the Sherman Act, the law presumes that the person so acting intended that result as being the necessary and natural consequence of those acts.

Appellants focus on the highlighted language, comparing it to the presumptions of intent condemned in Gypsum and in *Sandstrom v. State of Montana, 442 U.S. 510, 99 S. Ct. 2450, 61 L. Ed. 2d 39 (1979)*.

As noted earlier, in Gypsum the district court instructed the jury to presume, as a matter of law, that the defendants intended to act anticompetitively if that result was **[**59]** the "necessary and natural" consequence of exchanging prices. In Sandstrom, the defendant was convicted of "deliberate homicide," defined in the relevant statute as homicide committed "purposely or knowingly." The defendant had admitted to killing the victim, but contended that a personality disorder prevented him from killing her purposely or knowingly. The Supreme Court rejected, as a violation of the defendant's right to have all elements of the charge against him proven beyond a reasonable doubt, a charge that "(t)he law presumes that a person intends the ordinary consequences of his voluntary acts." *Sandstrom v. State of Montana, supra, 99* ***[*464]*** *S. Ct. at 2453*. See also *United States v. Garrett, 574 F.2d 778 (3d Cir. 1978)*.

In examining the instruction challenged in this case, we again note that we are dealing with charges of a conspiracy to fix prices, a per se violation of the Sherman Act. Had the highlighted portion of the instruction been delivered in another context, it might have run afoul of Gypsum or Sandstrom. The problem would stem from the meaning of the term "these acts knowingly done." If that term referred, for example, to an agreement to exchange prices, **[**60]** then the district court would have erred in charging the jury that it could presume criminal intent if a violation of the Sherman Act was the "necessary and natural consequence" of that agreement.

Here, however, "these acts knowingly done" refers to an agreement to fix prices. As the district court instructed almost immediately after the challenged instruction,

> (a) conspiracy to fix prices, maintain prices, is unlawful even though the conspiracy may be formed or engaged in for what appeared to be the conspirators' worthy motives and agreement among the competitors, the purpose of effecting price is illegal no matter what the motive of the conspirators were (sic). It does not matter whether their motives were good or bad or whether there were a mixture of good and bad. Therefore, you should consider only whether or not the defendants conspired or agreed to fix prices. You must disregard any questions on the reasonableness of their actions, their economic impact or good motives, as these are entirely irrelevant and immaterial to that issue.

In order to trigger the "presumption" challenged by appellants, the government had to prove that any particular defendant knowingly **[**61]** conspired to fix prices. Read in this context, the challenged instruction means nothing more than that a defendant is presumed to have intended to violate the Sherman Act if he joins in such a conspiracy. Perhaps a more artful, and more traditional, statement of this proposition would have been "ignorance of the law is no defense." But, unlike the charge condemned in Sandstrom, the challenged instruction does not relieve the government of the burden of proving any element of the crime charged. Thus, we do not believe that the district court erred in delivering such a charge in this context.

Appellants suggest that the highlighted portion of the challenged charge is susceptible of another interpretation, an interpretation that moves our inquiry outside the realm of Gypsum. Appellants' argument appears to be that the words "that result" refer only to "agreement," and that the highlighted instruction allows the jury to conclude that a defendant agreed to fix prices merely because his actions, viewed objectively, were consistent with the existence of such an agreement. There is a "significant difference," according to appellants, between " "knowingly (becoming) a member of a price **[**62]** fixing conspiracy' and "knowingly (doing acts which are held or construed to have) Resulted in an agreement.' " Appellants' Joint Reply Brief at 7 (emphasis and brackets in original).

An example may clarify their apparent argument: several persons are involved in a price-fixing conspiracy whereby they meet regularly and discuss prices; if one member proposes a price increase and the others do not speak against it, they are understood by the others to have agreed to go along; a new entrant into the industry attends a meeting and innocently says nothing when a price increase is proposed; later, the new entrant adopts the price increase put into effect by the conspirators. According to the appellants' reading of the instruction, the innocent entrant could be convicted of conspiring to fix prices merely because he "knowingly" performed acts which are "construed to have resulted in an agreement."

In support of this rather strained reading, appellants cite two other portions of the charge. First, they note that the district court, at one point, defined "conspiracy" as "a setting whereby two or more persons act **[*465]** or behave in a way That causes them to be said to have agreed **[**63]** that something should occur." (emphasis added). Second, they assert that the district court erroneously defined "knowing" action as action taken "voluntarily and intentionally" and not taken "because of mistake or inadvertence or accident." This definition, they assert, failed to require any criminal intent whatsoever.

In confronting these arguments, we note initially that appellants raise an issue quite different from that treated in Gypsum. Although both the instruction challenged in Gypsum and the instruction challenged here use the formula ("the law presumes that (a person intends) the necessary and natural consequences of (his) acts," under appellants' reading the challenged instruction focuses on an aspect of mens rea not considered in Gypsum. As already noted, Gypsum dealt only with the question of intent to produce anticompetitive effects, and not the more basic intent to agree. See *438 U.S. at 444 n.21, 98 S. Ct. 2864*. Appellants' reading of the district court's instruction goes to this more basic issue: whether a particular defendant ever entered into any agreement at all.

We do not believe that "a reasonable juror could have interpreted the instruction" as appellants **[**64]** suggest. See *Sandstrom v. State of Montana, supra, 99 S. Ct. 2450*. First, we note that the district court's definition of the term "knowingly" was quite proper. See 1 E. Devitt & C. Blackmar, Federal Jury Practice and Instructions § 14.04 (1977) and cases cited therein. Appellants would have preferred a definition of "knowingly" that included a requirement of criminal purpose, but we already have rejected the notion that conviction for conspiring to fix prices requires a showing of "specific intent."

Moreover, the charge, read as a whole, precludes the possibility that any defendant could have been convicted absent a finding that he actually entered into an illegal agreement. The district court instructed, for example:

> The type (of) relationship contemplated by law as a conspiracy is an offense . . . in which each member becomes the agent of every other member. To create such a relationship two or more persons must enter into a mutual agreement or understanding that they will act together for an unlawful purpose or to accomplish a lawful purpose by an illegal means. In the absence of an agreement or mutual understanding or meeting of the minds there can be no conspiracy. **[**65]** It is the agreement to act together for an unlawful objective that constitutes the gist of this crime.
> Participation in the illegal scheme is as (much) a violation of the Sherman Act as a creation and promotion of one. However, it is the Government's burden to show such participation is a matter of choice beyond a reasonable doubt. It is not enough to show only that the parties acted uniformly or similarly or in ways that may seem to be mutually beneficial. If such actions were taken independently, solely as a matter of individual business judgment without any agreement or arrangement or understanding among the parties, then there would be no conspiracy, even though the separate (and) independent actions are substantially concurrent and intended towards the accomplishment of similar objectives separately pursued by them.
>
> Now mere presence at meetings, mere presence of defendants with other defendants in and of itself is not evidence of a conspiracy. As I mentioned before, a person, in order to be named to be a member of a conspiracy, must be a knowing participant and presence without more is not sufficient participation for a person to be said to be a knowing **[**66]** participating conspirator.
>
> Now, silence is not agreement without a specific understanding among the alleged co-conspirators that silence will **[*466]** constitute agreement or by clear evidence that the party whose silence is being considered has intended that his silence be deemed as agreement or acquiescence by him. Even if one of the co-conspirators believed at any time that he was agreeing by remaining silent, that person's understanding is not binding on anyone else. He can remain silent.
> The mere presence of a defendant on an occasion when a price-fixing agreement was reached by others is not sufficient to prove that such defendant joined in the conspiracy because he may have been silent.
> . . . (T)he point is silence under some narrow circumstances can be deemed to be agreement. But silence in itself can never be agreement. So before a party can be said to have agreed to something because he was silent, you must find other evidence that that party intended that his silence would be the equivalent of agreement.
>
> You may look to events that happened after the episode to determine whether or not during that particular episode he intended **[**67]** his silence to be agreement. But silence should not be lightly considered as agreement. But under the proper evidentiary support it can be.

In sum, we believe that the district court's instructions on the issue of intent were free of reversible error. Furthermore, because we have concluded that the government was not required to prove the existence of any anticompetitive effect beyond the existence of the price-fixing conspiracy itself, See *United States v. Gillen, supra*, we reject the appellants' contention that they are entitled to judgments of acquittal.

B

Appellants also allege that the district court's charge on the issue of withdrawal was inadequate. The district court instructed the jury:

> Regarding possible withdrawal of a defendant from the conspiracy you are instructed that once it is shown to your satisfaction that a defendant knowingly joined a conspiracy he or it is presumed in law to remain a member of the conspiracy until it affirmatively appears from the evidence that the defendant in good faith

> disavowed and completely withdrew from any participation in the conspiracy. If you are convinced that a price fixing conspiracy as alleged by the Government did **[**68]** exist and that a particular defendant was a party to such conspiracy, that defendant cannot be found guilty of the offense charged if he or it effectively withdrew from the conspiracy before December 21, 1974. You may find that one or more defendants withdrew from the alleged price fixing conspiracy. The law provides that one who may have in passing been a member, been a party to a conspiracy, is not guilty if he has withdrawn from it prior to the time period covered by the charges against him.
>
> An individual or corporation may withdraw or abandon a conspiracy by renunciation or by engaging in conduct which is inconsistent with the idea of continued participation in the alleged scheme. Mere cessation of activity in furtherance of the conspiracy is not sufficient to establish withdrawal. For a defendant to be deemed to have withdrawn there must be evidence showing withdrawal by some affirmative action. Such action must consist of a definite and decisive step of some kind which shows complete disassociation. For example, to disavow or defeat the purpose of a conspiracy or some other conduct wholly inconsistent with continued adherence to the conspiratorial objects would **[**69]** be the type of decisive act that a party could look to as being the basis for withdrawal.
>
> A defendant may also withdraw from a price fixing conspiracy by notifying his alleged co-conspirators of his intent to withdraw. Such notification can consist of any communication or conduct reasonably calculated to reach the other alleged co-conspirators and proof of such communication does not require evidence that the defendant directly informed each alleged **[*467]** co-conspirator of his or its intention to withdraw.

Appellants do not contend that this charge misstates the applicable law in any way. Instead, they assert that it was deficient in failing to put before the jury appellants' contention that resumption of competitive activity before December 21, 1974, would constitute withdrawal from the alleged conspiracy. In particular, appellants asked the district court to add to its instruction on withdrawal the following specification:

> In this case, for instance, competitive activity is inconsistent with the idea of cooperation in the fixing of prices. If a defendant, who at first apparently cooperated with his or its competitors in the fixing of prices, resumed competitive **[**70]** activity by December 21, 1974, then he or it has effectively withdrawn from the conspiracy charged.

As the government points out, however, the appellants' proffered charge is misleading. ***HN11***[] The existence of some competitive activity among alleged coconspirators is not sufficient to negate the existence of an illegal conspiracy. See, e. g., *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 225 n.59, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*; *In re Yarn Processing Patent Validity Litigation, 541 F.2d 1127, 1136-37 (5th Cir. 1976)*; *Plymouth Dealers' Association v. United States, 279 F.2d 128, 132 (9th Cir. 1960)*. By contrast, in *United States v. United States Gypsum Co., 550 F.2d 115, 130 n.15 (3d Cir. 1977)*, *Aff'd, 434 U.S. 422, 98 S. Ct. 52, 54 L. Ed. 2d 71 (1978)*, the defendants requested an instruction that resumption of competitive behavior "could" constitute an effective withdrawal. Because the instruction requested in this case was imprecise, the district court was entitled to reject it. See, e. g., *United States v. American Radiator & Standard Sanitary Corp., supra, at 199*.

Nevertheless, appellants argue that the district court's instruction that "(mere) cessation of **[**71]** activity in furtherance of the conspiracy is not sufficient to establish withdrawal" prevented the jury from considering resumption of competitive activity at all. We do not agree. The district court's statement of the law in this regard is quite correct. See *United States v. Heckman, 479 F.2d 726, 729 (3d Cir. 1973)* (quoting *United States v. Borelli, 336 F.2d 376, 388 (2d Cir. 1964)*, Cert. denied, *379 U.S. 960, 85 S. Ct. 647, 13 L. Ed. 2d 555 (1965))*. Moreover, we believe that withdrawal through resumption of competitive activity constitutes something more than "mere cessation of activity in furtherance of the conspiracy."

Finally, appellants contend that the district court erroneously refused to instruct the jury that withdrawal could be demonstrated by circumstantial evidence. They argue that because the district court specifically charged the jury that a conspiracy could be inferred from circumstantial evidence, they were entitled to "the other side of the coin," that withdrawal also could be so inferred. We note, however, that the district court gave a lengthy instruction on the use of direct and circumstantial evidence in general, and explained that the two types of evidence **[**72]** "have equal rank." Furthermore, the jury was instructed to "consider the circumstantial evidence and the direct evidence and the evidence that may be mixed." Given this umbrella charge, we do not believe that the district court erred in declining to specify that withdrawal could be proven by circumstantial evidence.

To the extent that the district court declined to elaborate on appellants' contention that resumption of competitive activity constituted an effective renunciation of the alleged conspiracy, we note that ***HN12***[] "(o)nce the judge has made an accurate and correct charge, the extent of its amplification must rest largely in his discretion." *United States v. Bayer, 331 U.S. 532, 536, 67 S. Ct. 1394, 1396, 91 L. Ed. 1654 (1947)*. Under the circumstances of this case, we conclude that the district court neither misstated the applicable law nor abused its discretion.

[*468] V

We have examined the appellants' other contentions [5.] and find them to be without merit. The judgments of the district court as to all defendants therefore will be affirmed.

[73]**

Concur by: HUNTER, III

Concur

JAMES HUNTER, III, Circuit Judge, concurring:

I agree with the result reached by the majority in parts I, II, III, and IV(B)-V. Moreover, since this panel is bound by the decision of a prior panel in *United States v. Gillen, 599 F.2d 541 (3d Cir. 1979)*, I concur in part IV(A) of the majority's opinion. I feel compelled, however, to note my belief that the rule of law announced in Gillen, and followed by the majority here, is inconsistent with the Supreme Court's holding in *United States v. United States Gypsum Co., 438 U.S. 422, 98 S. Ct. 2864, 57 L. Ed. 2d 854 (1978)*. Were it not for Gillen, I would vote to reverse the judgments of conviction entered against each defendant, and remand for a new trial.

---

5. These include (A) appellants' joint contention that the district court erred in refusing to direct the government to immunize *William S. Doolan, United States v. Herman, 589 F.2d 1191 (3d Cir. 1978)*; (B) Continental's contentions that the district court abused its discretion in denying Continental's motion for a new trial under *Fed.R.Crim.P. 33*, that the district court erred in charging the jury on the government's burden of proving Continental's participation in the conspiracy during the felony period, that the district court erroneously admitted evidence of activities antedating the crime charged, that the district court erred in admitting the testimony and exhibits of Julius Tolton, that the district court erred in refusing to admit defense exhibit AE-204, that the district court erroneously admitted vague and imprecise accusatory testimony by government witnesses; (C) Chase Bag's contentions that the district court erred in refusing to explain Chase Bag's defense contentions to the jury, that the district court erroneously charged the jury with a sterile recitation of black letter law, that the district court erred in its charge on corporate culpability, that the district court erred in its charge on apparent authority for a corporate agent, that the district court failed to give a proper instruction on price leadership/followership, that the district court erred in denying Chase Bag's motions for severance and for a bill of particulars, that the district court erroneously limited cross-examination by Chase Bag's counsel, that the district court erred in admitting Stanley Schottland's testimony concerning his understanding of the meaning of silence at allegedly conspiratorial meetings, that the district court erred in refusing to allow Chase Bag's counsel to give the jury selected exhibits collected in "jury books," that the district court improperly restricted counsel's time for closing argument, that the district court erred in its procedure for selecting the jury; (D) Cooper's contentions that the prosecutor engaged in improper summation and rebuttal, that the district court erred in admitting the testimony of Robert Pentz, that the district court erred in denying Cooper's motion for severance, that the trial court's general management of the proceedings deprived Cooper of a fair trial; (E) Rue's contentions that the district court erred in refusing to charge the jury in a way that ensured separate consideration of the charges against Rue, and that the district court erred in refusing to take corrective action as to alleged misstatements of fact made by the prosecution.

In view of Judge Adams' well reasoned concurring opinion in Gillen, a detailed critique of that case is unnecessary. Suffice it to say that Gypsum, as I read it, created the rule that "intent is a necessary element of a Criminal antitrust violation," *438 U.S. at 443, 98 S. Ct. at 2876*, and held that the intent element can be satisfied only by proof that a defendant specifically intended to produce anticompetitive effects, or by proof that he knew anticompetitive **[**74]** effects would probably result from his conduct, coupled with evidence that such effects actually took place. Regrettably, the majority in Gillen chose to disregard the mandate of Gypsum, holding that intent as defined by Gypsum is not an element of all criminal antitrust violations, but rather only of those violations governed by the rule of reason. With regard to per se offenses, the majority held that "no inquiry has to be made on the issue of intent beyond proof that one joined or formed the conspiracy." *599 F.2d at 545*.

Because this panel is governed by the holding in Gillen, I reluctantly agree with Judge Seitz and Judge Garth that the district court's charge which instructed the jury that to find the defendants guilty of conspiracy, it must conclude that the conspiracy "was knowingly formed" and "knowingly participated in" was not reversible error. Were this panel free, however, **[*469]** to judge the adequacy of the jury instructions under Gypsum rather than Gillen, a reversal would, in my judgment, be required. Since there was insufficient evidence introduced to enable the jury to find that the alleged conspiracy actually had anti-competitive effects, the government **[**75]** was obligated, under Gypsum, to prove that defendants possessed a specific intent to produce such an effect. The court's charge, however, plainly failed to bring this element of the offense to the jury's attention.

Sherman v. British Leyland Motors, Ltd.

United States Court of Appeals for the Ninth Circuit

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > Nonmovant Persuasion & Proof

HN1[] **Entitlement as Matter of Law, Genuine Disputes**

When all of the plaintiffs' claims are resolved against them by summary judgment, the burden is upon the defendants to show the absence of any genuine issue of material fact which would preclude a finding by reasonable jurors for the nonmoving party; and, in determining whether the burden of proof was met in a motion for summary judgment, the court must draw all reasonable inferences of fact in favor of the nonmoving party.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Genuine Disputes

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Materiality of Facts

HN2[] **Summary Judgment, Opposing Materials**

If the nonmoving party has raised a genuine issue of material fact, and the evidentiary matter in support of the motion does not establish the absence of such issue, summary judgment must be denied even though no opposing evidentiary matter is presented. Substantial evidence to raise a triable issue is more than a mere scintilla, but the moving party has the burden of clearly demonstrating the absence of any genuine issue as to the existence of each material fact which under applicable principles of substantive law would be required to support a judgment in its favor.

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > Franchise Agreements

Business & Corporate Law > ... > Causes of Action > Fiduciary Duties > Good Faith & Fair Dealing

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

HN3[] **Franchise Relationships, Franchise Agreements**

The requisites of a sufficient claim under the Automobile Dealers' Day in Court Act, *15 U.S.C.S. § 1222* are: (1) the plaintiff must be an "automobile dealer;" (2) defendant must be an "automobile manufacturer" engaged in commerce; (3) there must have existed a manufacturer-dealer relationship created by written franchise agreement; and (4) plaintiff must have been injured by the defendant's failure to act in good faith in performing or complying with any of the terms or provisions of the franchise, or in terminating, canceling, or not renewing the franchise with said dealer.

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > Elements

Business & Corporate Law > ... > Causes of Action > Fiduciary Duties > Good Faith & Fair Dealing

HN4[] **Franchise Relationships, Elements**

Under the Automobile Dealers' Day in Court Act, *15 U.S.C.S. §§ 1221-1225*, a manufacturer may be liable notwithstanding it is not a party to the franchise if the party contracting with the dealer is the manufacturer's agent or merely a "straw man" erected to insulate it from statutory liability.

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > Elements

Business & Corporate Law > Distributorships & Franchises > General Overview

Business & Corporate Law > Distributorships & Franchises > Franchise Relationships > General Overview

HN5[] **Franchise Relationships, Elements**

The term "franchise" is defined in *15 U.S.C.S. § 1221(b)* as the written agreement or contract between any automobile manufacturer engaged in commerce and any automobile dealer which purports to fix the legal rights and liabilities of the parties to such agreement or contract. It is clear that without a written franchise there can be no claim or cause of action under the Automobile Dealers' Day in Court Act.

Business & Corporate Law > ... > Causes of Action > Fiduciary Duties > Good Faith & Fair Dealing

HN6[] **Fiduciary Duties, Good Faith & Fair Dealing**

The failure to exercise good faith within the meaning of *15 U.S.C.S. § 1221(e)* has a limited and restricted meaning. It is not to be construed liberally. It does not mean "good faith" in a hazy or general way, nor does it mean unfairness. The existence or non-existence of "good faith" must be determined in the context of actual or threatened coercion or intimidation. In order to lack good faith the manufacturer's actions must be unfair and inequitable in addition to being for the purpose of coercion and intimidation.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN7[] **Antitrust & Trade Law, Sherman Act**

In determining whether a restraint is unreasonable under the Sherman Act, *15 U.S.C.S. § 1*, the primary considerations are whether the intent of the restraint is anticompetitive and whether the restraint itself has significant anticompetitive effects. Under this rule, the factfinder weighs all of the circumstances of the case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN8[] **Price Fixing & Restraints of Trade, Vertical Restraints**

In cases involving the defense of primary responsibility clauses in vertical situations, even if genuine agreements calling for areas of primary responsibility may be valid, where a primary area of responsibility is used to mask the application of an illegal territorial restriction, illegality will nevertheless be found.

Antitrust & Trade Law > Clayton Act > General Overview

HN9[] **Antitrust & Trade Law, Clayton Act**

See *15 U.S.C.S. § 14*.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN10[] **Monopolies & Monopolization, Actual Monopolization**

Under *15 U.S.C.S. § 2*, it is required that the monopolist must have engaged in "willful" acts directed at establishing or retaining its monopoly as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. But plaintiff need not show that such acts were of a kind that would be unlawful for an ordinary enterprise.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Evidence > Inferences & Presumptions > Inferences

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] **Monopolies & Monopolization, Actual Monopolization**

For purposes of *15 U.S.C.S. § 2*, direct evidence of specific intent to control prices or destroy competition is not indispensable when the claim is founded upon a substantial claim of restraint of trade i. e., a *15 U.S.C.S. § 1* violation. In these circumstances the requisite specific intent may be inferred. Market power is relevant to determining whether such an inference is proper; but where a *§ 1* violation "clearly exists," proof of market power is unnecessary to support an inference of specific intent.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN12[] **Monopolies & Monopolization, Attempts to Monopolize**

In attempted monopolization, as with monopolization itself, individual conduct may be measured against the same "reasonableness" standard governing concerted and contractual activity under *15 U.S.C.S. § 1*. The requirement that there be a demonstration that a defendant's specific intent to control prices or destroy competition has a dangerous probability of success may be satisfied either by direct proof of market power, or by inference from proven specific intent.

Opinion by: CHRISTENSEN

Opinion

[*433] This is an action for alleged violations of the federal Automobile Dealers' Day in **[*434]** Court Act, [1] and the antitrust laws, [2] and on pendent state claims. [3] The district court granted summary judgment in favor of the

[*] The Honorable A. Sherman Christensen, Senior United States District Judge for the District of Utah, sitting by designation.

[1] Also known as the Automobile Franchise Act, *15 U.S.C. §§ 1221-1225 (1976)*. For convenience this Act usually will be referred to hereinafter as the "Dealers' Act".

[2] *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2 (1976)*; § 3 of the Clayton Act, *15 U.S.C. § 14 (1976)*.

defendants on all claims. Presented by plaintiffs' appeal is the broad issue typical for such rulings of whether the pleadings, affidavits and depositions before the district court established as a matter of law that plaintiffs' claims did not justify trial on the merits. [4] The answer, of course, depends upon resolution of ancillary issues. Defendants' cross-appeal **[**2]** involves deposition costs which were disallowed by the trial court.

An alphabetized list and description of the parties in the margin [5] may prove useful, since relationships and distinctions among them will be important from the outset.

[3]** FACTS OF RECORD

Among facts which affidavits, depositions and admissions before the district court tended to establish were:

[*435] In 1968 British Leyland took over through merger the business of the principal British automobile makers (excluding General Motors, Ford and Chrysler): British Motor Corporation, manufacturer of Austin, MG and Jaguar automobiles, and Leyland Motor Corporation, maker of Triumph, Rover and Land Rover. British Leyland thereupon became the parent of three separate United States marketing organizations: British Motor Holdings (U.S.A.), Inc., which marketed MG; Leyland Motor Corporation of North America, the importer of Triumph (and at that time Rover);

---

[3] Pendent state claims for breach of contract, interference with prospective business advantage and fraud.

[4] *Fed.R.Civ.P. 56*.

[5] BRITISH LEYLAND MOTOR CORPORATION, LTD. (hereinafter referred to as British Leyland) a defendant-appellee, in 1968 became the top company of the British Leyland group as the result of the merger of British Motor Corporation, manufacturer of Austin, MG and Jaguar, and Leyland Motor Corporation, manufacturer of Triumph, Rover and Land Rover. As a result of this merger, British Leyland became the parent of three separate U.S. marketing organizations: British Motor Holdings (U.S.A.), Inc., which marketed MG; Leyland Motor Corporation of North America, the importer of Triumph (and Rover at that time), and Jaguar Cars, Inc., importer of Jaguar. These three U.S. companies were consolidated into British Leyland Motors, Inc. (BLM), on October 1, 1968, which continued to operate through three divisions up to 1972: Jaguar, Triumph-Rover and Austin-MG.

BRITISH LEYLAND MOTORS, INC. (BLM), a Delaware corporation, a defendant-appellee, is the wholly-owned subsidiary of British Leyland, being the October 1, 1968, consolidation of the three U.S. companies as mentioned above. BLM as the United States importer resells British Leyland products to its wholly-owned subsidiary, Leyland Motor Sales, Inc. (LMS), or to independent distributors such as British Motor Car Distributors, Ltd. (BMCD).

BRITISH MOTOR CAR DISTRIBUTORS, LTD. (BMCD), another defendant-appellee, is a wholly-owned subsidiary of Jensen International Motors Corp. and its ownership is independent of the other defendants-appellees. BMCD is a distributor of passenger cars, parts and accessories manufactured by British Leyland and imported by BLM.

LEYLAND MOTOR SALES, INC. (LMS), another defendant-appellee, is a wholly-owned subsidiary of defendant-appellee BLM. LMS is a distributor of passenger cars, parts and accessories manufactured by British Leyland and imported by BLM. Plaintiff-appellant Vincent's franchise agreement involved here was signed with LMS for an additional one-year period expiring December 2, 1973.

Peter SATORI Company, Inc. (Satori), a defendant-appellee, was a long-established retailer of imported cars in Pasadena, California, where Vincent did business. Satori bought Jaguars from one independent distributor in Los Angeles, and MG and Austins from another distributor in Compton, California. It was appointed a full-line British Leyland dealer in Pasadena when Vincent lost its Triumph franchise in the same city in 1972 in connection with BLM's consolidation of its wholesale distribution system pursuant to a "Rationalization Program".

Gary H. SHERMAN, plaintiff-appellant, was the president and sole shareholder of the other plaintiff-appellant, Vincent Imports, Inc., dba European Motors, which conducted business as a retail automobile dealership in Pasadena, California, from December 1, 1971, until March 15, 1974.

VINCENT IMPORTS, INC. (Vincent), dba European Motors, one of the plaintiffs-appellants, conducted business as a retail automobile dealer in Pasadena, California, from December 1, 1971, until March 15, 1974. Sherman became the president and sole shareholder of Vincent on December 1, 1971, and continued as such during all relevant times. Vincent previously had been a Triumph dealer, and under Sherman was given a one-year Triumph franchise by LMS. The franchise was renewed by LMS on December 2, 1972, for an additional one-year period.

and Jaguar Cars, Inc., importer of Jaguar. These three United States companies were consolidated into British Leyland Motors, Inc. (BLM), on October 1, 1968. BLM continued to operate through three separate divisions handling Jaguar and Triumph, Rover and Austin, and MG, respectively, until 1972, when BLM began actively to implement a program of consolidation of its wholesale distribution system by means of a "Rationalization Program". [6] Under that plan the wholesale distribution of all British Leyland **[**4]** automobiles in the United States was to be handled by a single organization for each territory either Leyland Motor Sales, Inc. (LMS), or some independent distributor.

Prior to the consummation of the program LMS, as the wholly-owned subsidiary of BLM, distributed Triumph automobiles, parts and accessories throughout California. Effective October 1, 1973, LMS' distribution rights for Triumph, together with Rover and Land Rover automobiles, were terminated and it no longer did business in southern California. British Motor Car Distributors, Ltd. (BMCD), another defendant-appellee, became the sole distributor of Triumph, along with MG and Jaguar, in a territory centered in southern California. LMS in exchange for its Triumph, Rover and Land Rover distribution rights in southern **[**5]** California became the exclusive distributor for all Leyland automobiles in northern California. This, of course, resulted in BMCD's becoming the Triumph distributor in the Pasadena area where Vincent's business was situated.

Vincent had been first franchised to sell the Triumph line on March 15, 1971, at a time when the plaintiff corporation was owned by one Vincent Santangelo. All corporate stock was transferred to Sherman on December 1, 1971. The latter applied to LMS for appointment as a Triumph dealer and received a one-year franchise which expired December 1, 1972. That franchise was renewed by LMS for a second year to expire on December 1, 1973. The franchise was in the form of a "Distributor-Dealer Agreement" which appointed Vincent "as an authorized dealer for new Triumph vehicles, replacement parts, equipment and accessories as offered for sale by the distributor." The agreement read in part:

> 16. Termination. (a) This Agreement shall be deemed canceled, without further action by the Distributor, in the event of the termination or cancellation of the Distributor's Distribution Agreement with British Leyland Motors Inc. or upon the withdrawal for any reason of the right **[**6]** of the Distributor to purchase the Vehicles and to resell the same within the area in which the Dealer is located. The Dealer acknowledges that all of his rights under this Agreement are subordinated to, and conditional upon the continuance of, the ability of the Distributor to supply the Dealer with the Products.
> (b) Either party may in its full discretion and with or without any cause cancel this Agreement upon not less than 30 days' written notice to the other.
> (c) The Distributor may at its option terminate this agreement for cause forthwith by giving the Dealer written notice of such termination. It is agreed that any of the following will give the Distributor cause to terminate this Agreement:
>
> **[*436]** (1) The death, incapacity, removal, resignation or withdrawal from active participation with the Dealer for any reason of any of the persons listed in the Schedule as principals of dealership (Sherman was listed in that schedule as president and his wife Helga Sherman as vice-president of Vincent).
>
> (2) Any sale, transfer, or change by operation of law or otherwise of any substantial interest in the direct or indirect management or ownership **[**7]** of the Dealer, except in the case where the persons referred to in (1) above remain in the active management and substantial ownership of the Dealer. . . .
> 24. Manufacturer and/or Importer Not a Party. Neither British Motor Corporation, Ltd., . . . nor affiliated companies of British Leyland Motor Corporation, Ltd., is a party to this Agreement, and none of them shall be deemed to have assumed any liability or obligation to the Dealer hereunder.

A "Distribution Agreement" dated October 1, 1973, between BLM and BMCD in implementation of the Rationalization Program provided in part that BMCD would become the sole distributor in southern California of not

---

[6] Gary W. Whitehead, president of both BLM and LMS, conceived the Rationalization Program, perhaps as early as 1968. He, together with Michael H. Dale, a vice-president of BLM and also LMS, participated in the implementation of the program.

only the Austin and MG, but also of the Triumph, Rover, Land Rover and Jaguar lines, and that LMS would become the sole distributor of all of those automobiles in northern California. Paragraph 7 of that agreement read in part:

> Dealer Organization. (a) It is acknowledged that neither party is the successor-in-interest of the other in the territory to be taken over. Neither party shall be deemed to assume any liability under any dealer agreement of the other, or upon any representation made by the outgoing distributor **[**8]** to any of its dealers which exceeds in scope or otherwise differs from the written dealership agreement. . . .
> (b) Without the prior consent of the other party, neither BLM (nor LMS) nor the Distributor (BMCD) will renew or extend any dealer agreement now in force, nor will it appoint any new dealer or make any representations to any dealer as to its future status after transfer of distribution has been effected.

In an addendum "United States Distributor's Agreement" contemporaneously executed [7] it was stipulated that the distributor would have the sole right to appoint dealers authorized to sell the vehicles at retail ("Authorized Dealers") from places of business located within its area. There was another provision stating: "Nothing contained in this agreement shall limit or restrict the geographic territory within which, or the persons from whom, the Distributor or its Authorized Dealers may sell the Vehicles, parts and accessories."

[9]** By October 30, 1973, BMCD had taken over LMS' position as distributor of Triumph in the southern California area pursuant to these distribution agreements. On that date, BMCD sent a letter to Vincent and other Triumph dealers informing them that BMCD had been reviewing dealer candidates with the view to establishing a strong dealer network "for the sale of all Triumph's (sic) as well as the other British Leyland lines of cars in the Southern California territory." The recipients were advised that "we have not yet completed the screening process, and will not be able in all cases to announce final dealer appointments for several more weeks." The letter added:

> In the interim, as an accommodation in these circumstances, we would be happy to process all orders for vehicles and for parts and accessories, to the extent of the available supply, on the same basis as we intend to follow once the dealership appointments have been made. The terms which we will honor are set out in the **[*437]** form of dealership agreement which is enclosed along with this letter, for your review. Unless informed by you that these terms are not acceptable, we shall accept your orders during the interim **[**10]** period on this basis.
> Please understand that the enclosed form of agreement is not intended to establish a new dealer arrangement with you, or to renew any agreement that has previously been outstanding. This accommodation is intended to apply only as transitional measure, effective for forty-five days from the date of this letter.
> We are proceeding as quickly as possible to review the candidacy of each potential dealer for the vehicles which we will be distributing and hope to be in a position to announce our appointments in the near future. Thank you for your continuing cooperation, and we look forward to being in touch with you shortly.

The recipient was asked to sign an acceptance on the bottom of the letter and return it to BMCD.

Sherman, believing that Vincent's relationship with BMCD as a successor to LMS would be governed by the still subsisting franchise agreement with LMS and that the requested acceptance might waive Vincent's rights thereunder, did not sign or return the letter. Vincent continued to receive from BMCD some Triumph automobiles. While it asserts that these did not represent a fair allocation, this contention is not affirmatively supported **[**11]** by the record. In any event, Sherman had the justified impression that Vincent would not be appointed dealer for Triumph automobiles unless it was willing to accept the full Leyland line. He was unwilling to agree to Vincent's full-line representation to the extent that this would involve models which in his judgment were not likely to be profitable and competitive.

Defendant-appellee Satori, on the other hand, was willing to accept, and was granted by franchise from BMCD, the full Leyland line, including Triumph, and Vincent's franchise was not renewed by BMCD.

---

[7] The text of this agreement apparently was not made part of the record on appeal but appears in the brief of appellees at 90-97. It, however, is referred to on the record in the "Distribution Agreement" as "Exhibit A".

Vincent's performance as Triumph dealer under its franchise was appropriate and satisfactory. Had it not been for the Rationalization Program its Triumph franchise again would have been renewed. [8] The nonrenewal of that franchise resulted in the destruction of Vincent's business, which was closed March 15, 1974.

[12]** PROCEEDINGS IN DISTRICT COURT

Vincent and Sherman filed this action in the district court on May 5, 1976. The complaint stated, among other things, that commencing at a time unknown to plaintiffs and continuing to the termination of plaintiffs' franchise on or about December 10, 1973, the named defendants, and other persons unknown, engaged in a continuous covert agreement, combination and conspiracy in unreasonable restraint of interstate commerce and trade in the sale of Triumph automobiles, parts and accessories, in violation of *section 1* of the Sherman Act; and that they conspired to monopolize and engaged in monopolization of such trade and commerce in violation of *section 2* of the Sherman Act. It was further alleged that pursuant to such conspiracy, through termination of plaintiffs' franchise, defendants accomplished the elimination of Vincent as a franchised Triumph dealer and as a viable automobile business.

With particular reference to its Dealers' Act claim, it was alleged that the defendants coerced plaintiffs by threats of termination or nonrenewal of plaintiffs' Triumph franchise unless plaintiffs agreed to assign the franchise without consideration to the defendant **[**13]** Satori; and that defendants interfered with plaintiffs' business by arbitrarily and unfairly limiting the number of Triumph automobiles, parts and accessories allocated to them, resulting in loss of good **[*438]** will and profits. Other allegations were that the defendants violated the terms of the Dealers' Act and plaintiffs' franchise by conspiring with each other to eliminate plaintiffs as a franchise dealer for Triumph automobiles unless plaintiffs accepted another automobile line; that plaintiffs were unable to accept such unlawful demands and that as a consequence on or about December 10, 1973, defendants refused to renew the franchise.

As to the pendent state claims, there were allegations that among the implied terms and warranties of the franchise was the undertaking of the parties to act in good faith in the performance and renewal of the franchise and that the franchise would be renewed unless good cause existed for nonrenewal. On or about December 10, 1973, as a result of the conspiracy alleged elsewhere in the complaint, defendants, according to the complaint, breached the franchise by unilaterally, without cause, and in bad faith refusing to renew the franchise and **[**14]** refusing to sell to plaintiffs any new Triumph automobiles, parts and accessories. It was asserted also that defendants had represented that Vincent would remain a Triumph dealer as long as it performed its obligations under the franchise, and that such representations were fraudulently made with intent to induce plaintiff to execute and continue the franchise. Compensatory, trebled, and punitive damages, declaratory relief, attorneys' fees and costs were prayed for by plaintiffs on the various claims.

Following an extended period of discovery, all of the defendants moved for summary judgment on all claims. On April 12, 1976, the district court, without opinion, granted defendants' motion to dismiss Sherman on the antitrust and state claims for lack of standing to sue. Orders granting summary judgments in favor of the other defendants on the state claims and later on the federal claims followed, again without opinion. Summary judgment dismissing plaintiffs' action as to all claims and in favor of all defendants was formally entered by the clerk on July 21, 1976, in accordance with the district court's rulings. Plaintiffs were taxed costs of $ 1,792.06, but the court refused to assess **[**15]** against them defendants' costs for deposition copies and the travel and sustenance expense of their counsel in attending depositions outside the forum district. Plaintiffs timely appealed and defendants cross-appealed.

ISSUES

Presented on appeal are the following subsidiary issues on the basis of which we must determine whether the granting of summary judgment against the plaintiffs was justified:

> I. Did Sherman individually have standing to sue and could Satori or British Leyland be held liable in any event?

---

[8] "It is perfectly true, as plaintiff says, that the Rationalization Program ultimately caused plaintiff to lose its Triumph franchise when it expired in December 1973." Leyland appellees' answering brief at 7.

II. Did genuine issues of material fact exist to preclude summary judgment on:
A. Plaintiff's Dealers' Act claim?

B. Plaintiff's claims under *section 1* of the Sherman Act or related claims regarding an illegal tying arrangement in violation of section 3 of the Clayton Act?

C. Plaintiff's claims under *section 2* of the Sherman Act?
D. Any of the pendent claims?
III. On defendant's cross-appeal, did the district court abuse its discretion in denying defendants the cost of transcript copies and the travel expense in question?

STANDARD FOR REVIEW

HN1[] Since all of the plaintiffs' claims were resolved against them by summary **[**16]** judgment, the burden was upon the defendants to show the absence of any genuine issue of material fact which would preclude a finding by reasonable jurors for the nonmoving party; and, in determining whether the burden was met, we must draw all reasonable inferences of fact in favor of the plaintiffs. *Marquis v. Chrysler Corp., 577 F.2d 624, 631 (9th Cir. 1978)*; *Calnetics **[*439]** Corp. v. Volkswagen of America, Inc., 532 F.2d 674, 683* (9th Cir.), Cert. denied, *429 U.S. 940, 97 S. Ct. 355, 50 L. Ed. 2d 309 (1976)*; See also *Stansifer v. Chrysler Motors Corp., 487 F.2d 59, 63 (9th Cir. 1973)*.

Among recognized corollary rules is that ***HN2***[] if the nonmoving party has raised a genuine issue of material fact, and the evidentiary matter in support of the motion does not establish the absence of such issue, summary judgment must be denied even though no opposing evidentiary matter is presented. See *Adickes v. S. H. Kress & Co., 398 U.S. 144, 159-60, 90 S. Ct. 1598, 26 L. Ed. 2d 142 (1970)*; *Dalke v. Upjohn Co., 555 F.2d 245, 248 (9th Cir. 1977)*. Substantial evidence to raise a triable issue is more than a mere scintilla, *Marquis v. Chrysler Corp., 577 F.2d at 631*, but the moving party has the **[**17]** burden of clearly demonstrating the absence of any genuine issue as to the existence of each material fact which under applicable principles of substantive law would be required to support a judgment in its favor. *United States v. Dibble, 429 F.2d 598, 601 (9th Cir. 1970)*.

While the basic structure for claims and defenses is quite clearly defined by the contract documents, the questions of motive, purpose and economic effects beyond matters of admission and uncontroverted contentions do not readily lend themselves to summary resolution. See Calnetics Corp. At 684. See also *United States v. Yellow Cab Co., 338 U.S. 338, 341, 70 S. Ct. 177, 94 L. Ed. 150 (1949)*.

I. SHERMAN'S LACK OF STANDING; DISTAL DEFENDANTS

There are, at best, enough complexities in this case to commend the elimination as early as possible of any parties and related issues patently without significance or substance. The plaintiff Sherman is one such party because of his lack of standing. The defendant Satori is another because of the rather obvious absence of merit in the claims against him, and the issues with reference to British Leyland also appear insubstantial.

No claim or showing has been made that Vincent **[**18]** during material times did not maintain its corporate existence separate and apart from Sherman, notwithstanding that the latter was president and sole stockholder of the corporation. The franchise in question was signed by Sherman for and on behalf of the corporation. No rights or responsibilities were reserved expressly in any of the written documents in favor of, or against, Sherman. It is true that the franchiser recognized the importance of Sherman's services and those of his wife to the corporation, [9] and it is also true that by reason of Sherman's guarantee of certain obligations of the corporation to third parties the corporation became indebted to him. [10] **[**20]** But we have concluded that these circumstances do not warrant

---

[9] Paragraph 16(c)(1) of the franchise agreement provided, among other things, that the "death, incapacity, removal, resignation, or withdrawal from active participation with the dealer for any reason of any of the persons listed on the Schedule as principals of the Dealership" would give the distributor cause to terminate the agreement. The schedule listed "Gary Harold Sherman President" and "Helga Sherman Vice President". But the franchise in paragraph 16(g) provided also "that either party may in its full discretion and with or without any cause cancel this Agreement upon not less than thirty days notice to the other."

departure from the general rule of separation of identities, nor afford Sherman standing to bring suit in his individual capacity as a shareholder or creditor on any of the claims asserted in this action, whether under the **[*440]** Dealers' Act, [11] **[**21]** the antitrust laws [12] **[**22]** or the pendent state claims. [13] The basis for the summary judgment against Sherman with reference to his Dealers' Act and fraud claims does not clearly appear from the record, but since related **[**19]** questions are akin to that of jurisdiction, [14] we notice them at the threshold.

[23]** Absence of liability on the part of Satori also clearly appears notwithstanding any view that may be taken as to liability of the other parties. As mentioned before, Satori was the Pasadena dealer who received a franchise for

---

[10] Sherman alleged by affidavit:

My salary income and fringe benefits of approximately $ 36,000 per year ended with the loss of the Triumph franchise and in addition I was required to repay loans on behalf of the corporation by reason of my personal guarantee. In early 1974, I repaid $ 70,000 to banks as such guarantees. Of this amount, some $ 11,000 has been repaid to me by the corporation, leaving a balance owing to me, by the corporation, of approximately $ 59,000 which the corporation is wholly unable to pay.

[11] *Vincel v. White Motor Corp., 521 F.2d 1113 (2d Cir. 1975)*; *Lewis v. Chrysler Motors Corp., 456 F.2d 605 (8th Cir. 1972)*; *Milburn v. Ford Motor Co., 437 F. Supp. 7 (E.D.Okl.1977)*; *Rodrigue v. Chrysler Corp., 421 F. Supp. 903 (E.D.La.1976)*; Cf. *Kavanaugh v. Ford Motor Co., 353 F.2d 710 (7th Cir. 1965)*; *Judice's Sunshine Pontiac, Inc. v. Gen. Motors Corp., 418 F. Supp. 1212 (D.N.J.1976)*; *Rea v. Ford Motor Co., 355 F. Supp. 842 (W.D.Pa.1972)*, Vacated on other grounds, *497 F.2d 577* (3d Cir.), Cert. denied, *419 U.S. 868, 95 S. Ct. 126, 42 L. Ed. 2d 106 (1974)*, On remand, *406 F. Supp. 271 (W.D.Pa.1975)*; and *Klebanow v. N. Y. Produce Exch., 344 F.2d 294 (2d Cir. 1965)*; (where seemingly contrary results were reached, but on distinguishable facts, involving corporate or partnership disinterest or inability in prosecuting claims to the detriment of beneficial owners or ambiguous records). *York Chrysler-Plymouth, Inc. v. Chrysler Credit Corp., 447 F.2d 786 (5th Cir. 1971)*, is more nearly in point with reference to the Dealers' Act claims, but we are not persuaded to follow it. The provision involved in that case, and this, that if certain stockholders did not continue as principals in the business the dealership could be terminated by the franchiser, was for the benefit of the latter only and did not expand the parties to the agreement, as we view it.

[12] *15 U.S.C. § 15 (1976)*. *Walker Distrib. Co. v. Lucky Lager Brewing Co., 323 F.2d 1 (9th Cir. 1963)*, Cert. denied, *385 U.S. 976, 87 S. Ct. 507, 17 L. Ed. 2d 438 (1966)*; See generally the leading case of *Karseal Corp. v. Richfield Oil Corp., 221 F.2d 358 (9th Cir. 1955)*. Cf. *Perkins v. Standard Oil Co., 395 U.S. 642, 649, 89 S. Ct. 1871, 23 L. Ed. 2d 599 (1969)*; *Dailey v. Quality School Plan, Inc., 380 F.2d 484 (5th Cir. 1967)*; *Hoopes v. Union Oil Co., 374 F.2d 480 (9th Cir. 1967)*; *Nichols v. Spencer Int'l Press, Inc., 371 F.2d 332 (7th Cir. 1967)* (distinguishable from the present case where the business and property were that of the corporation and the claims asserted were derivative). As stated in *Bravman v. Bassett Furn. Indus., Inc., 552 F.2d 90, 97* (3d Cir.), Cert. denied, *434 U.S. 823, 98 S. Ct. 69, 54 L. Ed. 2d 80 (1977)*: "These stockholders and creditor cases do not bear on Bravman's case (involving direct restraints upon his independent sales activities) for in all of them the alleged impact of a restraint of trade was felt in the business or property of a corporation, and the injury, if any, to the plaintiffs consisted only in the diminution of the value of the injured corporation." But see *Data Digests, Inc. v. Standard & Poor's Corp., 43 F.R.D. 386 (S.D.N.Y.1967)* (where unlike the present case the plaintiff officer of the corporation who was left in the case beyond a motion to dismiss on the pleadings had not had an opportunity to develop any record of his interest). We do not believe that *Reiter v. Sonotone Corp., 442 U.S. 330, 99 S. Ct. 2326, 60 L. Ed. 2d 931 (1979)*, raises any question concerning our conclusion, dealing as that case does with direct damage to consumers rather than indirect losses suffered by corporate stockholders or creditors from the impact of ***antitrust law*** violations upon the corporation.

[13] Sherman lacks standing in his individual capacity to bring any of the pendent claims. Where there is an injury to the corporation, the cause of action should be brought by the corporation, or by the shareholders derivatively if the corporation fails to act; only for separate individual damage does an individual cause of action lie. *Jones v. H. F. Ahmanson & Co., 1 Cal.3d 93, 81 Cal.Rptr. 592, 460 P.2d 464 (1969)*; *Sutter v. General Petroleum Corp., 28 Cal.2d 525, 530, 170 P.2d 898, 901 (1946)*. Sherman lacked standing as a third party beneficiary, since his status was that of an incidental beneficiary. Where there was no direct undertaking or intention to benefit him, he had no rights under such a contract. ***Restatement of Contracts §§ 133***, 147; *Martinez v. Socoma Cos., 11 Cal.3d 394, 113 Cal.Rptr. 585, 521 P.2d 841 (1974)*.

[14] See Wright, Miller & Cooper, Federal Practice and Procedure § 3531 (1975). The trial court, although dismissing his antitrust and pendent claims for lack of standing, did not expressly deny Sherman's standing to individually maintain the Dealers' Act and pendent fraud claims. Without including the point in their cross-appeal, defendants argue that Sherman had no standing with respect to the latter claims also. Finally, the district court's dismissal of all claims as to all parties contained no explanation of reasons.

the full Leyland line upon the expiration of the Vincent franchise. There is no indication in the record that Satori was a manufacturer or agent of a manufacturer, or a party to the franchise in question, or that he conspired or combined with the other defendants in restraint **[*441]** of trade, in derogation of any contract rights of Vincent, or by fraud. Summary judgment of "no cause of action" as to Satori was clearly proper and is affirmed.

Nor was the dismissal of the action as to British Leyland error in any reasonable view of the record. [15] While this company actually was a manufacturer, it did not sign the franchise, nor insofar as the record discloses did it have anything to do with the franchise or any of the other contract documents, or with any alleged conspiracy in restraint of trade or any monopoly or attempt to monopolize. Any relationship of parent and subsidiary between it and others that may have done so is not enough. *Marquis v. Chrysler **[**24]** Corp., 577 F.2d 624 (9th Cir. 1978)*, Supra.

To simplify the discussion that follows and for differentiating reasons which will become more apparent in its course, we proceed to consider liability on the part of BLM, LMS and BMCD, the remaining defendants, to whom we will intend to refer unless the context otherwise indicates when "appellees" or "defendants" are mentioned. In a similar effort we will designate the surviving plaintiff-appellant as "Vincent" or "plaintiff".

II. ISSUES OF MATERIAL FACT

A. DEALERS' ACT

HN3[] The requisites of a sufficient claim under the Automobile Dealers' Day in Court Act are: (1) The plaintiff must be an "automobile dealer"; (2) defendant must be an "automobile **[**25]** manufacturer" engaged in commerce; (3) there must have existed a manufacturer-dealer relationship created by written franchise agreement, and (4) plaintiff must have been injured by the defendant's failure "to act in good faith in performing or complying with any of the terms or provisions of the franchise, or in terminating, canceling, or not renewing the franchise with said dealer." *15 U.S.C. § 1222 (1976)*. See also *Stansifer v. Chrysler Motors Corp., 487 F.2d 59, 63 (9th Cir. 1973)*. [16]

While, as we have seen, Sherman individually was not an "automobile dealer" protected by the Act, Vincent clearly was such a dealer. Id. *§ 1221(c)*. It is unquestioned that BLM as **[**26]** well as LMS, its wholly-owned subsidiary, for purposes of this case should be deemed "automobile manufacturers" within the description of the Act. Id. *§ 1221(a)*. [17]

The situation of BMCD is different in several respects. It was not a subsidiary of any British Leyland company. It had no contractual relationship with British Leyland, nor did it ever assume to act for that manufacturer. Yet it did contract with one of the latter's "manufacturer" subsidiaries and acted in concert with, and in a sense for, both **[**27]** of them in carrying out the Rationalization Program. Whether BMCD thereby projected itself within the range of the term "manufacturer" and as such exposed itself to possible liability under the Dealers' Act, must be considered. We are confronted also with the related question of whether BMCD and BLM could be liable for violation of the Dealers' Act even though they were not signatories of the Vincent franchise.

---

[15] While the answer of British Leyland was not made part of the record on appeal, memoranda before the district court indicate that its answer raised an issue of the In personam jurisdiction of the district court over it. Such issue remained unresolved when summary judgment was granted in its favor apparently on other grounds.

[16] Reference to the franchise agreement in this formulation departs from the not infrequent statements that there must be a written franchise agreement between the plaintiff and the defendant or between the manufacturer and the dealer. The latter statements would be unduly restrictive in view of the agency-conspiracy concept hereafter discussed.

[17] British Leyland Motor Corporation Limited, the English company . . . was, concededly, "the manufacturer" of Triumph cars in the 1971-1973 period. Its subsidiary, BLM, and the latter's subsidiary, LMS, are conceded to be each a "manufacturer" under the Dealer Act, although the Act also requires that there be a written contract between the manufacturer and the dealer, and there was no such contract between BLM and plaintiff.

Supplemental trial memorandum of the British Leyland defendants at R. 00534.

[*442] In *Stansifer v. Chrysler Motors Corp., 487 F.2d 59 (9th Cir. 1973)*, Supra, it was held that where there was no showing that a distributor had been the agent of the manufacturer in entering into contracts with the dealer or a "straw man" erected as an insulation against liability, the dealer had no cause of action against the manufacturer. [18] **[**28]** *Marquis v. Chrysler Corp., 577 F.2d 624 (9th Cir. 1978)*, determined that while a subsidiary of a manufacturer was liable under the Dealers' Act, as a "statutory" manufacturer, the manufacturer, Chrysler Corporation, itself was not liable because it was not a party to the franchise agreement illegally terminated by the subsidiary. [19]

Both BMCD and BLM maintain that these decisions insulate them from liability on Vincent's Dealers' Act claim, notwithstanding any improper failure of LMS to renew the dealer's franchise, also denied. LMS furthermore seeks protection from liability in Stansifer because any refusal to renew its agreement with Vincent was by BMCD after LMS had ceased to be the distributor for southern California and because there was allegedly no showing of an agreement or agency between BMCD and LMS. [20] Vincent attempts to counter this argument with the contention that BMCD "signed" its own franchise agreement with Vincent **[**29]** by its letter of October 30, 1973. [21] **[**30]** This contention borders on the frivolous since Vincent refused to acknowledge the terms of the letter, claims that it was not bound by it and relied upon the franchise granted by LMS for the remainder of its term. Vincent's argument that BMCD was the "successor in interest" to LMS wholly by reason of considerations discussed in *DeCantis v. Mid-Atlantic Toyota Distributors, 371 F. Supp. 1238 (E.D.Va.1974)*, in and of itself might be questioned in view of the rejection by that court of the application of the rule established by Stansifer. [22]

BMCD further argues that, despite the provisions of the contract between BLM and BMCD, neither BLM, LMS nor BMCD would renew or extend any dealer agreement then in force without the consent of the others, the evidence shows that BMCD ignored this provision and, in particular, that it acted unilaterally in its decision not to appoint Vincent for an additional term. There was at least conflicting evidence on this point aside from the inherent effect of **[*443]** the Rationalization Program. But in view of that effect it is plain that each entity, to the extent that it may have willfully combined with the others to carry out the **[**31]** terms of the program, acted for the others as well as itself in bringing about consequences which such program rendered inevitable. BLM without considering its

---

[18] *Stansifer at 66*. Referring to provisions of the distributorship agreement some of which were similar to those with which we are concerned, including the provisions for a veto of the distributor's appointment of dealers, the court had observed: "Contractual provisions of the type here involved are not uncommon. In construing similar contracts the courts have held consistently that controls of the kind reserved by Chrysler do not create a relationship of agency, but rather one of buyer and seller." *Id. at 65*.

[19] Typical of supporting cases cited in *Marquis is York Chrysler-Plymouth v. Chrysler Credit Corp., 447 F.2d 786 (5th Cir. 1971)*, in which the court stated: "(T)here being no showing that would make either responsible for the acts of the other on an agency theory, and the facts indicating that they are separate legal entities each operating in its own sphere, only the one who has entered into a franchise agreement could be held accountable for performing or complying with it." *447 F.2d at 791*.

[20] See *Stansifer, 487 F.2d at 66*, Supra. However, for reasons hereafter discussed the problem in this case is essentially different than that in Stansifer.

[21] BMCD's letter . . . constitutes BMCD's version of its contractual relationship with plaintiffs between October 1 and December 15, 1973. The letter refers to an enclosed Dealer Agreement and says that BMCD will assume its terms are acceptable unless the dealer otherwise indicates. The letter and enclosure constitute a "franchise" within the meaning of the statute, and one which could not be terminated or nonrenewed by means of coercion or intimidation (the enclosure to the letter does not appear as part of the record before us).

Vincent brief at 40.

[22] The approach taken in *Stansifer v. Chrysler Motors Corp., supra*, in this court's view, misconceive(d) the nature of the remedy provided under the Automobile Dealers' Act, and, if followed, would effectively remove from the Act's protection all situations involving midstream changes in channels of wholesale distribution. This is a result which this court does not conceive as having been intended.

DeCantis v. Mid-Atlantic Toyota Distributors, 371 F. Supp. at 1243.

involvement through the Rationalization Program, directs attention to the provision of the Dealer's Agreement executed by LMS and Vincent that it would not be considered a party.

It is contended by plaintiff that all of the appellees were committed to the effectuation of the Rationalization Program in violation both of the Dealers' Act and the antitrust laws and that they conspired to implement that plan by the elimination of Vincent as a dealer, particularly if he did not agree to the "tying arrangement" of a full-line dealership. That the existence of such a unified program with its alleged consequences could not have been properly ruled out by summary judgment has been indicated to us by an independent and thorough review of the record which was before the district court and by the expressed position of the appellants as reflected in their briefs on this appeal.

For example, the British Leyland appellees state that by the spring of 1972, BLM "was ready to tackle the consolidation of wholesale distribution through a single **[**32]** organization in each territory, either LMS or an independent distributor. . . . The overlap and duplication of distribution functions were eliminated by the appointment of a single distributor which would have responsibility for the wholesaling to retail dealers of all British Leyland vehicle lines in that territory." British Leyland's answering brief at 6. BMCD states: "Recognizing the economics involved, BMCD set about appointing only full-line retail dealers of British Leyland Products." BMCD's brief at 6. The British Leyland appellees, "(a)part from matters of emphasis and a (claimed) serious flaw in the discussion of the relevant product market, do not challenge appellants' Statement of Facts." On the contrary, on the point of the effect of the Rationalization Program upon Vincent, they state: "It is perfectly true, as plaintiff says, that the Rationalization Program ultimately caused plaintiff to lose its Triumph franchise when it expired in December, 1973." British Leyland appellees' answering brief at 4, 7.

When such additional circumstances are superimposed upon the reservation in the written franchise of the right on the part of the other appellees to veto BMCD's action **[**33]** in appointing dealers, the transfer to that distributor of LMS' distributor rights under the franchise prior to the expiration of Vincent's dealership, and the other indicia of control which were indicated in Stansifer and Marquis to be insufficient separately to establish agency, it is apparent that there exists a situation quite different in this case with respect to the problem of agency.

Recognition of the differentiating circumstances of the present case involves no departure from the principles of Stansifer and Marquis. [23]

[34]** Reasonableness of the Rationalization Program is a different question. Appellees contend that this program is entirely reasonable and legal both under the Dealers' **[*444]** Act and the antitrust laws. If this should be the ultimate determination, Vincent would have no valid claim against any of the appellees, with the possible exception of LMS under the Dealers' Act, and no claim whatsoever under the antitrust laws, since such claims are inextricably intertwined with the consequences of the Rationalization Program.

We have concluded, however, that there was a showing by plaintiff before the district court sufficient to withstand a summary determination that such Rationalization Program as applied to it did not constitute a violation of the antitrust laws. Particularly, we have found that there was a Prima facie showing before the district court of a *section 1* conspiracy. For similar foundational reasons we believe that as to BLM and BMCD, as well as LMS, there was

---

[23] ***HN4***[] "A manufacturer may be liable notwithstanding it is not a party to the franchise if the party contracting with the dealer is the manufacturer's agent or merely a "straw man' erected to insulate it from statutory liability." *Marquis at 630*.

HN5[] The term "franchise" is defined in *15 U.S.C. § 1221(b)* as "the written agreement or contract between any automobile manufacturer engaged in commerce and any automobile dealer which purports to fix the legal rights and liabilities of the parties to such agreement or contract." It is clear that without a written franchise there can be no claim or cause of action under the Act.

There was no written agreement between Chrysler and Stansifer. The written agreements were between Chrysler as manufacturer and Fisher as distributor and between Fisher as distributor and Stansifer as dealer. Nor is there any evidence that Chrysler had any direct dealings with Stansifer prior to the termination of the dealer agreement between Fisher and Stansifer.

Stansifer at 63-64.

sufficient evidential indication to preclude summary judgment on the issue of whether such appellees were manufacturers who at this stage should be deemed parties to the franchise because the putative conspiracy supplied **[**35]** the element of agency. We are mindful that Stansifer rejected a claim of conspiracy in similar context, but this was upon the basis of insufficiency of the evidence to sustain that theory. [24]

The franchise with which we are concerned was the agreement signed by Vincent and LMS. It cannot be disputed that at the time of the takeover of the Triumph distributorship by BMCD, Vincent had a subsisting Triumph franchise from LMS. It is the failure to renew that franchise upon which liability to Vincent under the Act depends, whether that failure is ascribable to BLM, **[**36]** LMS, BMCD or all three.

Whether BMCD was the successor in interest to LMS as franchiser or BMCD was an entity otherwise subject anew to the obligation of good faith consideration of the renewal of the franchise, may be a matter of mere semantics. Such distinction in any event was rendered unimportant by the concerted action of BLM, LMS, and BMCD in applying to Vincent and its franchise the consequences of the Rationalization Program pursuant to the agreement among them. This coalescence of forces resulted in the nonrenewal of Vincent's Triumph franchise. Accordingly, and in view of the intendments favorable to the nonmovant at this stage, we reject as too much of a "heads we win, tails you lose" proposition, LMS' argument that there was no duty on its part to grant a renewal of Vincent's franchise because its distributorship had been terminated before the expiration of the franchise, and the argument of BMCD that it had no duty under the franchise because it had not signed any agreement.

It is unnecessary for us to determine in the abstract whether an independent distributor who takes over an existing franchise granted by another distributor as a matter of law is under all of the **[**37]** duties of the original franchiser with respect to any obligation of renewal by reason of presumed common "control" by the manufacturer, [25] or whether this would be consistent with Stansifer and Marquis. Here, where there is indication that any assumption by BMCD of obligations and rights under the unexpired franchise, and the refusal to renew the dealership, were the result of agreement among the importer, the old distributor and the new distributor, each for the purposes of the summary judgment should have been deemed a representative of the others with respect to such franchise and its nonrenewal.

[*445] Whether there was evidence as to any appellee that it failed to act in good faith [26] in complying with the franchise or in its nonrenewal, and **[**38]** whether there was coercive conduct against Vincent must next be considered.

---

[24] From an examination of the entire record we find no evidence to support appellant's contention that Chrysler was acting as Fisher's agent (with respect to alleged coercion by employees of Chrysler after termination of the franchise in question by Fisher).

Appellant also alleged in his complaint that appellees "conspired to wrongfully terminate plaintiff's non-exclusive dealership." No proof was offered to support this claim. . . .

487 F.2d at 66.

[25] See *DeCantis v. Mid-Atlantic Toyota Distributors, 371 F. Supp. 1238, 1242 (E.D.Va.1974)*. See also *Volkswagen Interamericana, S. A. v. Rohlsen, 360 F.2d 437, 441 (1st Cir. 1966)*; *Barney Motor Sales v. Cal Sales, Inc., 178 F. Supp. 172, 175 (S.D.Cal.1959)*.

[26] In view of the restrictive definition of "good faith" contained in *§ 1221(e)* of the Act, this court has said:

There is no question that ***HN6***[] the failure to exercise good faith within the meaning of the Act has a limited and restricted meaning. It is not to be construed liberally. . . . It does not mean "good faith" in a hazy or general way, nor does it mean unfairness. The existence or non-existence of "good faith" must be determined in the context of actual or threatened coercion or intimidation (citations omitted).

In order to lack good faith the manufacturer's actions must be unfair and inequitable in addition to being for the purpose of coercion and intimidation (citations omitted).

A showing of coercion and intimidation which produces unfair or inequitable results is essential to a valid **[**39]** claim of lack of good faith under the Dealers' Act. Thus it is necessary to consider not only whether a manufacturer has brought pressure to bear on the dealer, but its reason for doing so, since what constitutes coercion and intimidation will depend upon the circumstances arising from each particular case. *Autohaus Brugger at 911*.

Vincent asserts that the defendants breached the duty of good faith in violation of the Dealers' Act in several ways: by making it clear to plaintiffs that, unless dealers "got together" by way of merger or buy out, BMCD would terminate many of the franchises; the pointing out by an employee of BLM and LMS to dealers that a buy out was one method of handling the problems occasioned by the Rationalization Program; threats of BLM, LMS and BMCD that the Triumph dealership would be terminated unless Vincent agreed to buy and sell the entire Leyland line; the drastic reduction of its allocation of cars after August, 1972; demands that the dealer claim no rights and view BMCD as having no obligations after BMCD took over Triumph distributorship in Pasadena with the threat of nonrenewal so conditioned; attempts of BMCD to coerce Vincent into acknowledging the **[**40]** absence of a written franchise with BMCD, and the attempted intimidation of plaintiffs into surrendering the Triumph franchise in exchange for an unprofitable "Jensen" franchise.

We have reviewed the record bearing upon these claims and have concluded that there is no supporting indication of bad faith, intimidation or coercion except possibly from their relationship to the Rationalization Program for full-line dealerships, which we now discuss.

The suggestion to Sherman that a merger or buy out of another dealer was one way to be able to handle the full line was neither coercive nor intimidating in and of itself. [27] **[**41]** Any misallocation of automobiles apparently did not involve any threat or coercion, express or implied, and Vincent's suggestion of a disproportionate allocation at all is not supported by the record. [28]

BMCD's letter of October 30, 1973, presented a proposed interim arrangement which on its face appears reasonable in the course of BMCD's undertaking to review all **[*446]** candidates for appointments as dealers in the southern California area. Vincent's interpretation of the letter as a demand that the dealer not claim any rights and not view BMCD as having any obligation to the dealer in and of itself seems insignificant, if not unwarranted.

But conversations of Sherman with officers of BMCD are interpretable as impliedly threatening Vincent with the loss of the dealership unless he consented to full-line representation. Implicit in the entire relationship of the parties after the intervention **[**42]** of BMCD was that if Vincent would not undertake a full-line dealership, which he ultimately declined to do, his distributorship would not be renewed. A wrongful demand can be implicit, inferable from facts and circumstances without any showing of a formal one. *Marquis at 634*.

Autohaus Brugger, Inc. v. Saab Motors, Inc., 567 F.2d 901, 911 (9th Cir.), Cert. denied, ***436 U.S. 946, 98 S. Ct. 2848, 56 L. Ed. 2d 787 (1978)***.

[27] Vincent claims coercion because of the suggestion of the president of BMCD and the vice-president of BLM and LMS that a merger or buy out of another dealer would be one way for the dealer to handle the full line. Sherman testified that he approached Satori about merger and was rejected, and that the matter ended there. It is straining to contend that Sherman's subjective feeling of coercion from the suggestion mentioned satisfied this element of a claim under the statute. Not the suggestion of merger but the unsatisfied insistence upon full-line representation was the cause of Vincent's rejection as a dealer.

[28] Misallocation of cars by itself without any threat of sanctions is not actionable under the Dealers' Act. See *Cecil Corley Motor Co. v. Gen. Motors Corp., 380 F. Supp. 819 (M.D.Tenn.1974)*. There was an uncontroverted showing that a fair share of available automobiles was furnished to Vincent, and there was an absence of any causal connection between the number of cars allocated and the nonrenewal.

Under various circumstances a manufacturer's insistence that a dealer carry a full line of products may be proper. [29] **[**43]** On the other hand, there is authority that this type of insistence may constitute a wrongful and coercive demand. [30] A differentiation or reconciliation of these cases is unnecessary here, since we are convinced in view of the basic principles espoused by both lines that this was not a case properly subject to resolution on summary judgment.

There is indication on the record that the pervasive policy and program of BLM, LMS and BMCD was to divide geographical markets between the latter two distributors and to eliminate such dealers as Vincent in all markets, notwithstanding the latter's previously successful operation of the existing franchise, unless it consented to full-line representation of British Leyland products. There was also a clear showing that following at least implied threats to this **[**44]** effect, Vincent's franchise was not renewed as the proximate result of its refusal to accept such full-line representation. Whether any related intimidations, pressures, threats and resistance which resulted in he nonrenewal of Vincent's franchise constituted a reasonable response to economic problems confronting the manufacturer, as appellees contend, or were unreasonable, unfair and unlawful conduct on their part, as Vincent asserts, should not have been resolved on summary judgment.

The presence or absence of business justification or necessity for the Rationalization Program, of course, is pertinent to this view but can better be explored with reference to plaintiff's antitrust claims. If, as we have concluded, there are issues precluding summary judgment that the application of that program to Vincent was lawful under the Antitrust Act, it seems clear that there would be a corresponding issue on this record under the Dealers' Act. [31] We cannot **[*447]** conceive that any unreasonable restraint of trade in violation of the antitrust laws could be upheld on the present record as a reasonable, fair or equitable basis for the nonrenewal of Vincent's franchise within the provisions **[**45]** of the Dealers' Act. We turn, then, to the antitrust issues.

[46]** B. *SECTION 1* OF THE SHERMAN ACT AND SECTION 3 OF THE CLAYTON ACT

---

[29] *Colorado Pump and Supply Co. v. Febco, Inc., 472 F.2d 637, 641* (10th Cir.), Cert. denied, ***411 U.S. 987, 93 S. Ct. 2274, 36 L. Ed. 2d 965 (1973)***; *Volkswagen Interamericana, S. A. v. Rohlsen, 360 F.2d 437 (1st Cir. 1966)*; Ship and Shore Motors, Inc. v. British Leyland Motors, Inc., 1974-1 Trade Cas. P 75,102 (D.N.J.1974); *United States v. J. I. Case Co., 101 F. Supp. 856 (D.Minn.1951)*.

[30] *Am. Motors Sales Corp. v. Semke, 384 F.2d 192 (10th Cir. 1967)* (order certain unwanted models or risk being refused other models); Don Richard's Lincoln Mercury Jeep, Inc. v. Am. Motors Corp., 1976-1 Trade Cas. P 60,796 (D.Utah 1976) (relocate and carry full line or be terminated). Cf. *David R. McGeorge Car Co. v. Leyland Motor Sales, Inc., 504 F.2d 52 (4th Cir. 1974)*, Cert. denied, ***420 U.S. 992, 95 S. Ct. 1430, 43 L. Ed. 2d 674 (1975)*** (where discrimination against a dealer who refused to handle a second line of automobiles was held to violate the Dealers' Act but to have had no causal connection with nonrenewal of the franchise).

[31] "No provision of (the Dealers' Act) shall repeal, modify, or supersede, directly or indirectly, any provision(s) of the antitrust laws of the United States" *15 U.S.C. § 1224*. We assume a reciprocal preservation of the reach of the Dealers' Act by the antitrust laws so that both types of statutes are to be afforded their full effect in view of each other.

The Franchise Act reaches those activities of an automobile manufacturer which would constitute an unreasonable restraint of trade under the Sherman Act or another invalid trade practice. In the lack of good faith evaluation the presence or absence of such invalid trade practices is, of course, a foremost consideration.

Randy's Studebaker Sales, Inc. v. Nissan Motor Corp., 533 F.2d 510, 516 (10th Cir. 1976).

We are mindful of the comment in *Marquis at 641*, in connection with its rejection of antitrust claims made there, that the Dealers' Act was intended to supplement the antitrust laws and that "every Dealers' Act violation will not necessarily amount to an actionable antitrust violation." The converse, no doubt, is also true, but far from precludes recognition of an inescapable relationship under the circumstances here.

In reviewing dismissal of the antitrust claims, we must be mindful of the especially strict requirements of *Rule 56* in this field, [32] while recognizing that there are circumstances which authorize, indeed require, summary disposition. [33]

Vincent's position with respect to its *section 1* claims is that the established **[**47]** purpose and effect of the Rationalization Program was to reduce competition among distributors as well as dealers; that pursuant to such program, and as a result of a conspiracy for its establishment and effectuation among appellees, BLM (as importer) and LMS and BMCD (as distributors) formed a combination to divide geographically the market for British Leyland cars between formerly competing distributors and that BMCD, accordingly, became the only Leyland distributor in the area in which Vincent operated a dealership, the number of British Leyland dealers was reduced, Vincent's Triumph dealership was terminated and it was driven out of business. These results, says Vincent, were achieved among other means by both a horizontal and vertical division of markets geographically, a group boycott or concerted refusal to deal, and by a tying violation of both *section 1* of the Sherman Act and section 3 of the Clayton Act.

Appellees argue that their actions did not violate the antitrust laws because the Rationalization Program was a reasonable, if not the only possible, response to an economic plight in which the British Leyland companies found themselves in the early 1970's, and the BLM-BMCD **[**48]** agreement did not provide for exclusive geographic territories. Rather it gave BMCD a new development area which appellees characterize as akin to that of "primary responsibility", discussed in *GTE Sylvania, Inc. v. Continental T.V., Inc., 537 F.2d 980, 995, n.25 (9th Cir. 1976)*, *Aff'd, 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*.

The British Leyland appellees refer to the LMS-BMCD exchange as "a vertically integrated manufacturer appoint(ing) one distributor (its own subsidiary) to sell its products in one area at the same time it appoints an independent company to sell the same lines in some other area." It is urged that such action is not unlawful in view of principles discussed in such cases as *Knutson v. Daily Review, Inc., 548 F.2d 795 (9th Cir. 1976)*; *Dental Supply Co. v. Cavitron Corp., 461 F.2d 1093 (3d Cir. 1972)*; *Mutual Fund Investors, Inc. v. Putnam Management Co., 553 F.2d 620 (9th Cir. 1977)*. Appellees say that there was no horizontal division of markets. They admit, but overlook the significance of the fact, that before the agreement for division of the northern and southern California markets BMCD and LMS regarded themselves as competitors selling different **[**49]** but competing automobiles. [34] The appellees further argue that **[*448]** there is no support in the record for the claim that the exchange of distribution rights between BMCD and LMS affected competition in southern California to appellants' detriment.

Whether there was evidence tending to show a horizontal division of markets among competitors depends primarily upon the agreement between BLM and BMCD [35] which provides in part:

---

[32] The already discussed general standards for the review of summary judgment are applied even more strictly in antitrust context. *Poller v. Columbia Broadcasting Sys., Inc., 368 U.S. 464, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*. See also *Calnetics Corp. v. Volkswagen of America, Inc., 532 F.2d 674, 683-84* (9th Cir.), Cert. denied, ***429 U.S. 940, 97 S. Ct. 355, 50 L. Ed. 2d 309 (1976)***, Supra.

[33] E. g., *First Nat'l Bank v. Cities Service Co., 391 U.S. 253, 88 S. Ct. 1575, 20 L. Ed. 2d 569 (1968)*; *Mut. Fund Investors v. Putnam Management Co., 553 F.2d 620, 624 (9th Cir. 1977)*; *Bushie v. Stenocord Corp., 460 F.2d 116 (9th Cir. 1972)*.

[34] Although the two distributing organizations regarded each other as competitors, since each up to that time had been selling either Triumph (LMS) or MG (BMCD) but not the other, this does not make the British Leyland Agreement appointing each to the full line in different sections of California a horizontal conspiracy to divide geographic markets, at least not less (sic) one disregards the fact that LMS is a wholly-owned subsidiary of British Leyland (emphasis added).

British Leyland answering brief at 14-15.

[35] Although this agreement was signed only by BLM and BMCD, Vincent contends that it is implicit in the writing and in the surrounding circumstances that LMS was deemed a part and parcel of the agreement. Those portions of the agreement relied upon by Vincent are these:

[50]**

> B. BLM is desirous of consolidating the distribution of its various lines through a single distribution channel, and has arranged to terminate the distribution of Jaguar in an area generally corresponding to (BMCD's current southern California area). BLM is prepared to add Jaguar, Triumph and Land Rover to (BCMD's Austin/MG distribution . . . within (BMCD's southern California area).
>
> C. In exchange therefor . . . (BMCD) is willing to surrender its distribution rights under the Northern Agreement, together with any claim it may have for the renewal of such agreement, to BLM in order that BLM may through its subsidiary . . . (LMS), add distribution of Austin, MG and Jaguar to its existing Triumph and Land Rover distribution.

LMS thereby became the franchise distributor of all British Leyland automobiles in northern California, giving up its Triumph, Rover and Land Rover distribution rights in southern California. BMCD became the southern California distributor of all Leyland cars in exchange for its rights to distribute Austin and MG in northern California. This in effect suggested an agreement between BMCD, as a competitor of LMS, and LMS to eliminate competition between **[**51]** them on the wholesale distribution level. There was proof before the court tending to show that MG and Triumph automobiles were in direct competition. More was involved than unilateral designation by a manufacturer of "areas of primary responsibility" in which a distributor was to operate. A jury could infer from the evidence **[*449]** that, despite the "area of primary responsibility" label, the defendants agreed to divide markets geographically. All of the other elements of resulting *section 1* violations appeared sufficiently to withstand summary judgment. *United States v. Topco Associates, Inc., 405 U.S. 596, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*; *White Motor Co. v. United States, 372 U.S. 253, 83 S. Ct. 696, 9 L. Ed. 2d 738 (1963)*.

If there were only a vertical geographic division of markets not a Per se rule, but "the rule of reason" would generally apply. [36] We address this and other alternative theories since we have not been asked, nor are we

---

"C. In exchange therefor, the Distributor (I. e., BMCD) is willing to surrender its distribution rights under the Northern Agreement, together with any claim that it may have for the renewal of such agreement, to BLM In order that BLM may through its subsidiary, Leyland Motor Sales, Inc. ("LMS'), add distribution of Austin, MG and Jaguar to its existing Triumph and Land Rover distribution." (CT 363; emphasis added.)

"As of November 1, 1973, BLM shall have the right to transfer distribution rights to another distributor (Including LMS) through all or any part of the Development Area described in the Northern Agreement." (CT 364; emphasis added.)

"3. Transfer of Distribution. The Distributor and BLM (For itself and its subsidiary, LMS) pledge themselves to effect transfer of distribution rights in an orderly manner and with minimum disruption of the supply of cars and spare parts to dealers. Neither the Distributor, BLM, Nor LMS will enter into any extraordinary contracts or commitments in connection with distribution operations to be transferred, . . ." etc. (CT 364; emphasis added.)

". . . if the amount determined under (2) is larger than (1), BLM Or LMS will pay the Distributor the net balance." (CJ 366; emphasis added.)

"(e) The Distributor and BLM Or LMS will maintain records showing all sales under the foregoing provisions, and Each will supply to the other a statement signed by an officer and certifying as to the number of such sales." (CJ 367; emphasis added.)

"(b) Without the prior consent of the other party, neither BLM (Nor LMS) nor the Distributor will renew or extend any dealer agreement now in force, nor will it appoint any new dealer or make any representations to any dealer as to his future status after transfer of distribution has been effected."

"8. Warranties. BLM, For itself and for LMS, and Distributor each warrant and represent to the other as follows: . . ." etc. (CT 368, emphasis added.)

Appellants' opening brief at 26, 27.

[36] In so holding we do not foreclose the possibility that particular application of vertical restrictions might justify per se prohibition under Northern Pac. R. Co. But we do make clear that departure from the rule of reason standard must be based upon demonstrable economic effect rather than as in Schwinn (*U. S. v. Arnold Schwinn & Co., 388 U.S. 365, 87 S. Ct. 1856, 18 L. Ed. 2d 1249*) upon formalistic line drawing.

Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. at 58-59, 97 S. Ct. at 2562.

prepared, to rule as a matter of law in support of plaintiff's horizontal conspiracy theory. Only upon fully-developed facts will this case lend itself to nicely definitive treatment.

[52]** ***HN7***[] In determining whether a restraint is unreasonable, the primary considerations are whether the intent of the restraint is anticompetitive and whether the restraint itself has significant anticompetitive effects. "Under this rule, the factfinder weighs all of the circumstances of the case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition." Continental T.V., 433 U.S. at 49, 97 S. Ct. at 2557.

Appellees answer the charge of a vertical conspiracy in restraint of trade as they did the horizontal conspiracy claim and especially emphasize that the BMCD-BLM agreement provided merely for "areas of primary responsibility" rather than any exclusive dealerships. In this view they contend that any restraint was reasonable and that no legal injury was caused either to Vincent or competition within any relevant market. Reasons for rejecting the arguments as to a horizontal conspiracy apply generally to the claim of vertical conspiracy, [37] but the element of reasonableness warrants further comment.

[53]** It has been held ***HN8***[] in cases involving the defense of primary responsibility clauses in vertical situations that even if genuine agreements calling for areas of primary responsibility may be valid, where a primary area of responsibility is used to mask the application of an illegal territorial restriction, illegality will nevertheless be found. *Reed Bros., Inc. v. Monsanto Co., 525 F.2d 486 (8th Cir. 1975)*, Cert. denied, *423 U.S. 1055, 96 S. Ct. 787, 46 L. Ed. 2d 645 (1976)*; *Hobart Bros. Co. v. Gilliland, Inc., 471 F.2d 894* (5th Cir.), Cert. denied, *412 U.S. 923, 93 S. Ct. 2736, 37 L. Ed. 2d 150 (1973)*. The primary responsibility label did not immunize the arrangements among the appellees here from fact finding examination under the rule of reason.

[*450] Plaintiff had to demonstrate genuine issues of material fact not only with respect to the causal connection between its injury and defendants' actions, rather clearly appearing here, but also that its injury was of the type the antitrust laws were intended to prevent, that is, that defendants' conduct did have some anticompetitive effect beyond plaintiff's own loss of business or the market's loss of a competitor. *Knutson v.* ***[**54]*** *Daily Review, Inc., 548 F.2d 795, 803 (9th Cir. 1976)*, Cert. denied, *433 U.S. 910, 97 S. Ct. 2977, 53 L. Ed. 2d 1094 (1977)*. [38]

We have concluded that the record sufficiently tended to support these essential elements also with reference to a relevant product and geographic market of imported sports cars with retail value of between $ 3,000 and $ 5,500 in the San Gabriel Valley. [39]

In *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126* (2d Cir.) (En banc), Cert. denied, ***439 U.S. 946, 99 S. Ct. 340, 58 L. Ed. 2d 338 (1978)***, the majority held because of the vertical nature of the restraint that the rule of reason applied, while Judge Mansfield, dissenting, considered the Per se rule to have been invoked because of involvements of a horizontal nature. See also Note, Vertical Agreements to Terminate Competing Distributors, 92 Harv.L.Rev. 1160 (1979). Despite some ambivalence that may be encountered in this troublesome area, the facts of the present case render it more likely that a horizontal rather than a vertical agreement was operative.

[37] The question of whether a horizontal or vertical division was involved does not alter the effect of the proof tending to show that in either event there was a geographic division of the market. The fact that there was common ownership or control of contracting corporations did not liberate them from the impact of the antitrust laws, and in any event each Leyland appellee could be deemed as having conspired with the independent company, BMCD. See *Perma Life Mufflers, Inc. v. Int'l Parts Corp., 392 U.S. 134, 141-42, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968)*. Cf. *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F.2d 71, 82 (9th Cir. 1969)*, Cert. denied, ***396 U.S. 1062, 90 S. Ct. 752, 24 L. Ed. 2d 755 (1970)*** (recognizing this general rule but holding that purely intra-corporate conspiracy is not enough to invoke it).

[38] In *Gough v. Rossmoor Corp., 585 F.2d 381, 385* (9th Cir.), Cert. denied, ***440 U.S. 936, 99 S. Ct. 1280, 59 L. Ed. 2d 494 (1979)***, this court said that "unless the alleged anticompetitive conduct is per se unreasonable, the fact that the conduct restrained trade in a relevant market is an essential part of plaintiff's case . . . and the burden of establishing it lies on him."

[55]** Defendants regarded as being included in plaintiff's burden the production of "data and other material necessary to measure the degree of "functional interchangeability' between the products involved as to price, use, quality and characteristics." *Moore v. Jas. H. Matthews & Co., 550 F.2d 1207, 1218 (9th Cir. 1977)*. Plaintiff denies that it had fair opportunity to develop the record in this respect, but we believe it is sufficient for present purposes. [40] Professor Aaker's statement inferentially took into consideration the problem of interchangeability in supporting plaintiff's definition of the relevant market and evaluating anticompetitive effects of the Rationalization Program. Plaintiff's showing as to impact on competition was far from complete or even satisfactory. Yet counterpoints sought to be made by appellees were directed primarily to a geographic and product market differently defined.

[56]** Without unduly fragmenting our consideration, and viewing the present record as a **[*451]** whole, [41] we do not rule out the existence of genuine issues of material fact with respect to a possible vertical conspiracy in restraint of trade and its anticompetitive effect upon the relevant market. [42] A paraphrasing of a portion of the opinion in *Ohio-Sealy Mattress Mfg. Co. v. Sealy, Inc., 585 F.2d 821, 831 (7th Cir. 1978)*, Cert. denied, *440 U.S. 930, 99 S. Ct. 1267, 59 L. Ed. 2d 486 (1979)*, provides a summarization of our conclusions on the foregoing phrase of the *section 1* claim:

[57]**

---

[39] Sherman's own experience supported such a market definition. Vincent points to statements by defendants' employees to the effect that Triumph and MG competed and that both competed with "sporty" cars imported from Japan, Italy and Germany in the same price range. A damage study undertaken by Professor David A. Aaker, submitted to the district court by plaintiff as an addendum to an interrogatory reply, not only supported plaintiff's definition of the relevant market but described the reduction of competition resulting from the Rationalization Program in that market as "significant" both on the retail and wholesale levels. Vincent claimed that dealers in the Triumph and MG automobiles had been reduced from five to one in the market while the combining of the MG and Triumph shares of the market under a single distributor in the San Gabriel Valley established approximately 59% Total share as a consequence of the Rationalization Program. The defendants presented little direct rebuttal of these claims, their primary effort being to question plaintiff's definition as to both the product and geographical markets. Their data as to lack of economic impact related primarily to their own definition of the relevant market rather than to that of the plaintiff.

Appellees suggested that the relevant market would be southern California rather than merely the San Gabriel Valley. Such does not appear from the record as a matter of law. Much less is there legal support for the contention made by BMCD in its reply to an interrogatory that "plaintiffs' competitors in the sale of Triumph automobiles, parts and accessories included all retail dealers of foreign and domestic automobiles in the general price range of Triumphs (from $ 2,995) in California and adjacent areas (such as Las Vegas)." BLM, LMS and BMCD in their replies to plaintiffs' interrogatories at another point said: "During the one year that Gary Sherman was a Triumph dealer under the name of European Imports, it is assumed that his competitors were all the retail dealers of automobiles selling in the general price range of Triumphs (from $ 2,995 to.$ 4,095) in the City of Pasadena and in a broader area of Los Angeles County." (Record p. 00210.)

[40] Plaintiffs point out that when the motion for summary judgment was submitted below and when they filed their principal brief in this case, they had assumed in line with the district court's decision in GTE Sylvania that the rule was different than as finally approved by this court and the Supreme Court, and that without further discovery they have been handicapped in addressing the question of whether defendants' conduct was unlawful under the rule of reason. Since, however, their *§ 2* claims necessarily involved similar elements from the beginning, we shall evaluate the record in its present state.

[41] "Plaintiffs should be given the full benefit of their proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each." *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 82 S. Ct. 1404, 1410, 8 L. Ed. 2d 777 (1962)*.

[42] It is true that the question of interchangeability within the claimed area has not yet been fully explored. But the entire question of relevant market where there are persuasive considerations advanced with respect to it, as here, is one of fact which we believe on the record before us it was inappropriate to resolve on summary judgment. Decisions holding that a single manufacturer's products cannot normally constitute the relevant market do not foreclose the plaintiff's claims as a matter of law, since plaintiff's position is that British Leyland products are only part of the relevant market. Nor does it appear as a matter of law that the Rationalization Program necessarily was lawful by reason of its procompetitive aspects.

> A horizontal agreement among potential competitors . . . not to compete with each other . . . is, we think, considerably more suspect than limitations imposed by a single independent manufacturer on its distributors as a condition of their distributorship, but even if we were inclined to agree with (the) . . . argument to the contrary and . . . that the Rule of Reason could be applied, we would be unable to agree that (Vincent) failed to (establish genuine issues of material fact) under that rule.

This case does not readily lend itself to a group boycott analysis with Per se consequences. As we have seen, the indication of any failure to fairly allocate automobiles to Vincent was insufficient to comprise a basis for the Dealers' Act claim, much less for any boycott claim. Yet with respect to the application of the Rationalization Program to preclude Vincent's access to the Triumph market as a part of a horizontal combination or conspiracy, further proceedings on that theory should not be ruled out. [43]

[58]** Vincent's present reliance upon section 3 of the Clayton Act [44] derives not from circumstances the Clayton Act directly applies to, but the tying consequences of the alleged conspiracy. Thus, in answer to an interrogatory propounded to it by the British Leyland defendants, plaintiff in the district court asserted that "there was an implied understanding that defendants refused to sell Triumph products to plaintiff **[*452]** except on the condition that plaintiffs would not purchase the products of defendants' competitors (and) this understanding was implied in all the circumstances surrounding the franchise. . . ." Other than for corresponding allegations in the complaint and this assertion, there can be found nothing in the record to justify such an invocation of the Clayton Act. This does not, however, preclude the possibility of a tying claim within the expanded meaning of Clayton Act § 3 in the light of *section 1* of the Sherman Act.

[59]** The principles applicable to such a claim have so recently been discussed in detail as to make unnecessary any exposition of the law of tie-ins here. *Moore v. Jas. H. Matthews & Co., 550 F.2d 1207, 1211-18 (9th Cir. 1977)*. See also *Bogosian v. Gulf Oil Corp., 561 F.2d 434 (3rd Cir. 1977)*, Cert. denied, *434 U.S. 1086, 98 S. Ct. 1280, 55 L. Ed. 2d 791 (1978)*. Despite a contrary holding with regard to the same "rationalization program" in *David R. McGeorge Car Co. v. Leyland Motor Sales, Inc., 504 F.2d 52 (4th Cir. 1974)*, Cert. denied, *420 U.S. 992, 95 S. Ct. 1430, 43 L. Ed. 2d 674 (1975)*, [45] we are inclined to the opinion that enough has been shown of record here to have justified further proceedings beyond summary judgment on a tying theory.

---

[43] See *Evanston Motor Co. v. Mid-Southern Toyota Distrib., Inc., 436 F. Supp. 1370 (N.D.Ill.1977)*; *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 212, 79 S. Ct. 705, 709-10, 3 L. Ed. 2d 741 (1959)*: "Plainly the allegations of this complaint disclose such a boycott. This is not a case of a single trader refusing to deal with another, nor even of a manufacturer and a dealer agreeing to an exclusive distributorship." Cf. *St. Paul Fire & Marine Ins. Co. v. Barry, 438 U.S. 531, 98 S. Ct. 2923, 57 L. Ed. 2d 932 (1978)* (where the court broadly interpreted the concept of "boycott" in a McCarran-Ferguson Act context). Cf. *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Inc., 416 F.2d 71, 76-78 (9th Cir. 1969)*, Cert. denied, ***396 U.S. 1062, 90 S. Ct. 752, 24 L. Ed. 2d 755 (1970)*** (holding that the replacement of one exclusive distributor for another fell under a rule of reason rather than a Per se rule). See also *Oreck Corp. v. Whirlpool Corp., 579 F.2d 126* (2d Cir.) (En banc), Cert. denied, ***439 U.S. 946, 99 S. Ct. 340, 58 L. Ed. 2d 338 (1978)***.

[44] ***HN9***[] This act provides in the only part that could be relevant here:

It shall be unlawful for any person engaged in commerce, in the course of such commerce . . . to . . . make a sale or contract for sale of goods . . . machinery . . . or other commodities . . . for use . . . or resale within the United States . . . on the condition, agreement, or understanding that the lessee or purchaser thereof shall not use or deal in the goods . . . machinery . . . or other commodities of a competitor or competitors of the . . . seller, where the effect of such . . . sale, or contract for sale or such condition, agreement, or understanding may be to substantially lessen competition or tend to create a monopoly in any line of commerce.

[45] In McGeorge there had been no proof that the tie-in between Triumph and Rover reduced competition. Nor did the case deal with any conspiracy aspects of the Rationalization Program. The decision was upon trial and in view of the factual finding that Leyland's conduct toward McGeorge did not impede competition. "(I)t is this fact which clearly distinguishes the case before us from the tie-ins which were condemned by the Court in *Fortner Enterprises v. U. S. Steel, 394 U.S. 495, 89 S. Ct. 1252, 22 L. Ed. 2d 495* . . . ." *McGeorge at 58*. Cf. *Golden Gate Accept. Corp. v. General Motors, 597 F.2d 676 (9th Cir. 1979)* (where this

[60]** When a franchiser conditions the sale of a franchise on the buyer's agreement to buy additional products from the franchiser, the law of tying may come into play with its Per se consequences upon a demonstration by the claimant of requisite economic power and not an insubstantial effect upon commerce. *Kentucky Fried Chicken Corp. v. Diversified Packaging Corp., 549 F.2d 368 (5th Cir. 1977)*. As we have seen, there is some indication in the record of a substantial effect upon commerce in a relevant market of the application of the Rationalization Program to Vincent because he would not accept the full British Leyland line. The economic power over Triumph automobiles, parts and accessories, the tying products, in the relevant market, and the combined market share of appellees with the consolidation in the market of MG's and Triumphs, estimated by Professor Aaker at 59%, as a result of the Rationalization Program are not adequately countered by appellees to foreclose this element on the present record.

C. *SECTION 2* OF THE SHERMAN ACT

Support in the record for a *section 1* claim does not, of course, necessarily indicate existence of a *section 2* claim, *United States v. Griffith, 334 U.S.* ***[**61]*** *100, 106, 68 S. Ct. 941, 92 L. Ed. 1236 (1948)*; *Moore v. Jas. H. Matthews & Co., 473 F.2d 328, 332 (9th Cir. 1973)*. But the record as to each claim has much in common here. Vincent's *section 2* contentions are in substance that appellees monopolized [46] **[**62]** the relevant market **[*453]** and attempted [47] **[**63]** and conspired [48] to monopolize this market, and that the district court erred in granting

---

court rejected an antitrust claim because there was no allegation or evidence as to an adverse effect upon competition other than the fact that one distributor would be replaced by another. A related Dealers' Act claim also was rejected. That the circumstances were inapposite to those of the present case is demonstrated by the court's conclusion there: "GM did not act in bad faith by initially requiring that the Dealership be located at a specified (and previously agreed to) site. Thereafter, Kohlenberg prompted GM's actions by unilaterally breaching the location provision of the Agreement.").

[46] As recently again recognized in *Greyhound Computer Corp. v. IBM, 559 F.2d 488, 496 (9th Cir. 1977)*, Cert. denied, *434 U.S. 1040, 98 S. Ct. 782, 54 L. Ed. 2d 790 (1978)*, "monopoly power is the power to control prices or exclude competition." See *United States v. Grinnell Corp., 384 U.S. 563, 571, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*; *American Tobacco Co. v. United States, 328 U.S. 781, 797, 66 S. Ct. 1125, 90 L. Ed. 1575 (1946)*; *Pacific Coast Agricultural Export Ass'n v. Sunkist Growers, Inc., 526 F.2d 1196, 1204 (9th Cir. 1975)*, Cert. denied, *425 U.S. 959, 96 S. Ct. 1741, 48 L. Ed. 2d 204 (1976)*; *Twin City Sportservice, Inc. v. Charles O. Finley & Co., 512 F.2d 1264, 1274 (9th Cir. 1975)*.

HN10[] It is required that the monopolist must have engaged in "willful" acts directed at establishing or retaining its monopoly "as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. at 571, 86 S. Ct. at 1704*. But plaintiff need not show that such acts were of a kind that would be unlawful for an ordinary enterprise. *Greyhound Computer Corp. at 498*. In the last analysis a defendant's acts, otherwise lawful, must not be unreasonably restrictive of competition. See *Gough v. Rossmoor Corp., 487 F.2d 373, 376 (9th Cir. 1973)*, Cert. denied, ***429 U.S. 857, 97 S. Ct. 155, 50 L. Ed. 2d 134 (1976)***.

[47] ***HN11***[] Direct evidence of specific intent to control prices or destroy competition is not indispensable when the claim is "founded upon a substantial claim of restraint of trade" I. e., a *§ 1* violation. In these circumstances the requisite specific intent may be inferred. *Trixler Brokerage Co. v. Ralston Purina Co., 505 F.2d 1045, 1051-52 (9th Cir. 1974)*; See *Gough v. Rossmoor Corp., 585 F.2d 381 (9th Cir. 1978)*, Cert. denied, ***440 U.S. 936, 99 S. Ct. 1280, 59 L. Ed. 2d 494 (1979)***. Market power is relevant to determining whether such an inference is proper; but where a *§ 1* violation "clearly exists", proof of market power is unnecessary to support an inference of specific intent. *Hallmark Industry v. Reynolds Metals Co., 489 F.2d 8, 12-13 (9th Cir. 1973)*, Cert. denied, ***417 U.S. 932, 94 S. Ct. 2643, 41 L. Ed. 2d 235 (1974)***. Even though the restraint effected may be reasonable under *§ 1*, it may constitute an attempt to monopolize forbidden by *§ 2* if a specific intent to monopolize is shown. *United States v. Columbia Steel Co., 334 U.S. 495, 68 S. Ct. 1107, 92 L. Ed. 1533 (1948)*. ***HN12***[] In attempted monopolization, as with monopolization itself, individual conduct may be measured against the same "reasonableness" standard governing concerted and contractual activity under *§ 1*. See *Appalachian Coals, Inc. v. United States, 288 U.S. 344, 360, 53 S. Ct. 471, 77 L. Ed. 825 (1933)*; Greyhound Computer Corp. At 505, n. 37. The requirement that there be a demonstration that a defendant's specific intent to control prices or destroy competition has a "dangerous probability of success" may be satisfied either by direct proof of market power, *Janich Bros., Inc. v. American Distilling Co., 570 F.2d 848, 853 (9th Cir. 1977)*, Cert. denied, *439 U.S. 829, 99 S. Ct. 103, 58 L. Ed. 2d 122 (1978)*, or by inference from proven specific intent, *Greyhound Computer Corp. at 504*. Within the principles so explicated, we have concluded that the record is such as to have legally precluded the

summary judgment when there remained genuine issues of material fact which if resolved in Vincent's favor would have supported findings of a *section 2* violation. We believe that identification of the relevant market, market shares and monopoly power, specific intent, predatory conduct, dangerous probability of success, and antitrust injury are sufficiently suggested in the record to warrant their further exploration and analysis under *section 2* in the light of consideration relating more particularly to *section 1*. [49]

[64] [*454]** Except for the suggestions in the margin of relationships between the various *section 2* claims and the indication of a *section 1* conspiracy between competitors which we have already pointed out in some detail, we believe it to be both unnecessary and inappropriate for us now to launch into a full-scale review of the cases from this circuit expounding the law of monopoly and its application to various related states of facts, none of which seems sufficiently close in point to be controlling. The guiding principles have been well defined by a considerable body of law in this circuit, yet the leading cases of Greyhound Computer Corp., Moore and Continental T.V. demonstrate how difficult it is with situations of novelty and conflicting bases of economic justification to select from variant legal principles those that should control in a given case and determine in view of that selection at which point the permissible blurs into the forbidden zone. Here, the facts bearing upon the monopoly claims have been only vaguely and quite imperfectly developed. Indeed, if those claims stood alone it would be doubtful that enough has been shown to indicate error in the summary termination **[**65]** of them. Perhaps that very doubt should be enough to preclude summary judgment, in view of notable lack of countervailing economic data from the appellees, who after all have the ultimate burden of justifying summary judgment. It is no answer to say that appellees' practices are honestly commercial rather than predatory for if a jury could properly conclude that they possessed monopoly power in the relevant market they would be precluded from employing otherwise lawful practices that unnecessarily excluded competition in the market. If there is yet to be presented by plaintiff in this case a sufficient showing to demonstrate the possession of monopoly power in the market, neither has there been a showing by appellees to the contrary.

While the admonition of the Supreme Court against the compartmentalization of proof found in *Continental Ore, supra* note 41, at 31, was in the context of a single theory, that of conspiracy, the principle applies also to *section 2* claims as they may relate to, and in significant measure may depend upon, a possible conspiratorial framework involving competitors.

Without further analyzing the fragmentary and unsatisfactory economic data thus far presented **[**66]** or risking a crystallization of legal applications with respect thereto with the possibility of limiting the trial court's explorations, the case should be remanded as to all Sherman Act, as well as to the Dealers' Act, claims.

---

summary rejections of plaintiff's attempted monopoly claim. *Pacific Coast Agricultural Export Ass'n v. Sunkist Growers, Inc., 526 F.2d 1196, 1205 (1975)*, Cert. denied, *425 U.S. 959, 96 S. Ct. 1741, 48 L. Ed. 2d 204 (1976)*.

[48] The evidence tending to establish an unlawful conspiracy coupled with that relating particularly to the attempted monopolization claim is sufficiently supportive of the conspiracy to monopolize formulation as to sustain against the motion for summary judgment the survival of plaintiff's claim on the latter theory also. In harmony with *Pacific Coast Agricultural Export Ass'n at 1205, n. 13*, we observe that possible jury consideration of the evidence concerning a conspiracy constituting an unreasonable restraint of trade must be kept in mind in determining the sufficiency of evidence to support both the attempted monopolization and conspiracy to monopolize charges without tight compartmentalization.

[49] In *Marquis, at 640*, this court in concluding that violation of the antitrust laws had not been made out, stated: "A manufacturer's refusal to deal with a distributor or a dealer does not violate the antitrust laws merely because it adversely affects the entity refused. In fact, such effects are immaterial when the refusal is "for business reasons which are sufficient to the manufacturer . . . in the absence of any arrangement restraining trade.' *Bushie v. Stenocord Corp., 460 F.2d 116, 119 (9th Cir. 1972)* (quoting Ricchetti (v. Meister Brau, Inc.), 431 F.2d (1211) at 1214 (9th Cir.)) (footnote omitted)." Although the evidence there had already been developed for trial purposes, there was no showing of market effects, nor was there any indication of a conspiracy between competitors as here. Cf. *Moore I, 473 F.2d 328 (9th Cir. 1973)* (where the court on surely more satisfactory but still fragmentary economic data bearing particularly on monopoly issues, required the case to go to trial on the latter issues as well as on the primary issue of tying, and thus made possible later definitive and differentiating ruling in another leading case, Moore II, Supra, on the basis of a fully-developed record).

D. PLAINTIFF'S PENDENT CLAIMS

Since Vincent's federal claims continue viable, we are not called upon to determine whether there would have been justification for the trial court's entertaining the state claims on their merits notwithstanding dismissal of the federal claims. See *United Mine Workers v. Gibbs, 383 U.S. 715, 725, 86 S. Ct. 1130, 16 L. Ed. 2d 218 (1966)*.

Plaintiffs assert that two contracts were breached: the written franchise with LMS, of which BMCD was a "successor-in-interest" as argued by Vincent, and an oral agreement between Vincent, BLM, LMS and BMCD "which was reduced to writing". The oral promise "reduced to writing" upon which plaintiffs rely, is the statement made by M. H. Dale, Vice-President of BLM at the Triumph National Dealer Council Meeting June 6, 1972, as later reflected in the written minutes of the council, that "we see no reason why a good dealer's franchise should not continue whoever the distributor might be."

Regarding **[**67]** the written contract, plaintiff contends that language in the franchise with respect to automatic termination did not foreclose recovery for breach of contract. [50] We have held, indeed, that the **[*455]** Dealers' Act claim was not thereby defeated. And we are prepared to accept the contention that the provisions quoted in the margin would not relieve the franchiser and those acting under it from the consequences of any antecedent breach of the contract under state law. No breach as such, however, is indicated by the record except to the extent that a violation of the Dealers' Act Per se would accomplish it.

[68]** Plaintiff argues that at least LMS' contract with Vincent was breached at the time of the LMS-BMCD exchange. On the contrary, the exchange as such does not appear to have affected that contract, being in recognition of it as we have already observed. The claim of interference with prospective business advantage also must fail, unless violation by any of the appellees of either the Dealers' Act or the antitrust laws established such a claim Ipso facto, given a contract presupposing good faith compliance.

Nor can we agree that the statements of Dale, an employee of BLM and LMS, concerning the renewal of a "good dealer's" franchise was a misrepresentation meeting the classic tests of a fraud claim. [51] **[**69]** If we assume that there is indication on the record that the representation was one of present intention that might furnish the foundation, if false, of a claim for fraud, [52] there yet is no indication that, considered in context, it was false or incompatible with good faith belief when made. [53]

---

[50] This agreement shall be deemed canceled, without further action by the Distributor (LMS) in the event of termination or cancellation of the Distributor's Distribution Agreement with (BLM) or upon the withdrawal for any reason of the right of the Distributor to purchase (Triumphs) and resell the same within the area within which the Dealer is located. The Dealer acknowledges that all of his rights under this Agreement are subordinated to, and conditioned upon the continuance of, the ability of the Distributor to supply the Dealer with the Products.

[51] Q. If any of the above events occur would the present dealer organization retain their franchise or would it revert to the privately owned distributor?

A. We see no reason why a good dealer's franchise should not continue whoever the distributor may be.

The council requested that in order to retain the Triumph dealer body's confidence a moratorium was (sic) declared on the appointment of new Triumph dealers. The Council also requested that in the event that any Triumph dealer now operating under a Zone should find himself operating under a private distributor after the rationalization was complete that British Leyland would retain control of Triumph dealer appointments and cancellations for a period of two years after the date of such distribution change.

British Leyland agreed that the matter would be given consideration. (Record pp. 00380-81.)

[52] *Kuffel v. Seaside Oil Co., 11 Cal.App.3d 354, 90 Cal.Rptr. 209 (1970)*; *Restatement (Second) Torts 530* (1977); 4 Witkin, Summary of California Law: Torts (8th Edition 1975) at p. 2717.

[53] The colloquy at the Triumph National Dealer Council Meeting of June 6, 1972 (prior to the last renewal of Vincent's franchise by LMS), from which plaintiff has abstracted the phrase on which it relies, also reveals in context that a change in distributorships would be possible, and that the statement was a general one with reference to the national situation.

Plaintiff's primary state law contention, as we understand it, is that the contract between Vincent and LMS had as an implied condition the undertaking of good faith and fair dealing on the part of the franchiser. There is an implied covenant, it is argued, that neither party would do anything to deprive the other of the benefits of the contract, and to do everything that the contract presupposed would be done to accomplish its purposes and benefits. The same implied condition, says Vincent, would require good faith in the renewal of the franchise. **[**70]** Clearly nonrenewal in bad faith and in violation of the Sherman Act and the Dealers' Act, Vincent argues, breached the implied covenant of good faith.

It is manifest that aside from the Dealers' Act and federal antitrust laws no breach of contract or deprivation of contract rights under state law has been shown. We have difficulty in perceiving how the Automobile Dealers' Act and the federal antitrust laws could be deemed so assimilated by state law as to become independent bases for state contract claims with seeming vesting in state courts of the jurisdiction which the federal statutes grant exclusively to the federal courts.

This is not to say, however, that some circumstances constituting violation **[*456]** of the Dealers' Act or federal antitrust laws may not also support pendent contract claims, depending upon state law applications. But we have been left largely in the dark concerning the California authorities bearing upon breaches of implied covenants of good faith and fair dealing. The district court gave no reason for dismissing the pendent claims, and the parties' briefs make little or no argument on the subject other than to cite to their memoranda below which in **[**71]** appellees' case are not even a part of the designated record. And we have no argument at all before us on how state law meshes with federal law in this area. This record, to say the least, is not satisfactory for definitive treatment here.

Since the federal claims must be tried, and the state claim for alleged breach of the implied covenant relied upon by plaintiff in any event will involve little, if any, additional evidence, we remand that claim also for an explicit determination by the district court of its validity and merit in the light of California law.

III. DISCOVERY COSTS

As to the cross-appeal, we find no abuse of discretion on the part of the district court in refusing to tax against plaintiffs the costs that cross-appellants incurred in making copies of depositions and defense counsel's travel and sustenance expense in connection with depositions. The statute does not specifically address this problem, but defendants construe together the two sections touching upon it [54] as authorizing the award of the additional costs claimed. If this were to be assumed, the requested award still would be discretionary. In view of the determined invalidity of summary judgment on the **[**72]** principal issues of the case, however, the particular point has become moot for the present. Further consideration no doubt will be given by the district court to this and related questions in the new context in which they finally will be presented.

We have intended to express no view of the merits upon trial.

AFFIRMED as to the dismissal of all claims against Sherman and Satori and the pendent state claims against all defendants except for alleged breach of an implied covenant of good faith and fair dealing; otherwise REVERSED and REMANDED for further proceedings not inconsistent with this opinion.

Civil Procedure > Pleading & Practice > Motion Practice > Time Limitations

Civil Procedure > Judgments > Relief From Judgments > General Overview

HN2[] **Relief From Judgments, Motions for New Trials**

A timely motion for a new trial is addressed to the sound discretion of the trial court.

Civil Procedure > Judgments > Relief From Judgments > Motions for New Trials

HN3[] Relief From Judgments, Motions for New Trials

Fed. R. Civ. P. 61provides that: No error in either the admission or the exclusion of evidence and no error or defect in any ruling or order or in anything done or omitted by the court or by any of the parties is grounds for granting a new trial unless refusal to take such action appears to the court inconsistent with substantial justice. The question of whether error is "harmless" is to be resolved in the context of the individual case. Where it appears that error in no way influenced jurors or had but a slight effect upon them, the verdict and judgment are to be affirmed. Under *rule 61*, a new trial should not be granted unless the court finds that refusal to take such action is inconsistent with substantial justice.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] Sherman Act, Claims

In order to recover under the antitrust laws, a plaintiff must show "antitrust injury," that is, "injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful." Merely showing that one was a competitor of the defendants and was injured is not sufficient to show an antitrust violation under the Sherman Act. Plaintiffs must also establish an injury to competition. Evidence showing that "the effect upon competition in the market-place was substantially adverse" is also required.

Civil Procedure > ... > Jury Trials > Jury Instructions > General Overview

Civil Procedure > Judgments > Relief From Judgments > Motions for New Trials

HN5[] Jury Trials, Jury Instructions

It is fundamental error to give instructions which are hopelessly confusing and which fail "to provide even the barest legal guideposts to aid the jury in rationally reaching a decision."

Opinion by: WARREN

Opinion

[*454] MEMORANDUM AND ORDER

The plaintiffs commenced this action for treble damages under Section 4 of the Clayton Act, *15 U.S.C. § 15*, alleging that the defendants violated *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2* and *Section 7* of the Clayton Act, *15 U.S.C. § 18*.

Subsequently, summary judgment was granted in favor of the defendants on the claim arising under *Section 7* of the Clayton Act. The first jury trial in this case commenced on May 3, 1976. At the conclusion of plaintiffs' case, the Court granted defendants' motions for directed verdicts on the monopoly claims asserted under *Section 2* of the Sherman Act. The Court also granted the motion for directed verdict filed on behalf of the Aetna Casualty & Surety Company.

The remaining claims the restraint of trade violations asserted under *Section 1* of the Sherman **[**2]** Act were submitted to the **[*455]** jury at the close of the evidence. [1] The jury returned its verdict in favor of the plaintiffs on October 1, 1976. The jury found that the First Wisconsin defendants [2] and Marshall-Michigan Company, Inc. conspired to unreasonably restrain trade in the leasing, development, construction and operation of office rental space, and in the financing for the development of office buildings. The Aetna Life Insurance Company was the only defendant not found to be a member of the conspiracy. Judgment was duly entered on October 26, 1976.

[3]** Following the entry of judgment, various post-trial motions were filed with the Court. On July 29, 1977, after extensive examination and analysis of the facts and evidence presented, the Court granted the motion of the First Wisconsin defendants and defendant Marshall-Michigan Company, Inc. for a new trial in the interests of justice. The Court denied plaintiffs' motion for a new trial as to *Aetna Life Insurance Company. Juneau Square v. First Wisconsin National Bank of Milwaukee, 435 F. Supp. 1307 (E.D.Wis.1977)*.

On March 20, 1978, a second jury trial commenced which lasted until June 15, 1978. On June 19, 1978, the jury returned a verdict in favor of the defendants. The jury found that the defendants did not enter into a contract, combination, or conspiracy with any other person which unreasonably restrained trade or commerce in the leasing of office rental space in the central business district of Milwaukee. On November 3, 1978, the Court entered judgment in this action.

On November 13, 1978, plaintiffs filed a motion for a new trial on all issues pursuant to *Rule 59 of the Federal Rules of Civil Procedure*. In support of their motion for a new trial, plaintiffs allege that the **[**4]** Court committed numerous prejudicial errors with respect to jury instructions, evidentiary rulings and other trial management decisions.

In order to facilitate an orderly discussion of plaintiffs' grounds for a new trial, the Court will address these grounds, under the following groupings, as utilized by the plaintiffs:

(1) Alleged instructional errors.
(2) Alleged errors in rulings on evidence.
(3) Alleged errors in trial management.

HN2[] A timely motion for a new trial is addressed to the sound discretion of the trial court. *Montgomery Ward & Co. v. Duncan, 311 U.S. 243, 61 S. Ct. 189, 85 L. Ed. 147 (1940)*; *Schybinger v. Interlake S.S. Co., 273 F.2d 307 (7th Cir. 1959)*.

HN3[] *Rule 61 of the Federal Rules of Civil Procedure* provides that:

> No error in either the admission or the exclusion of evidence and no error or defect in any ruling or order or in anything done or omitted by the court or by any of the parties is grounds for granting a new trial . . . unless refusal to take such action appears to the court inconsistent with substantial justice.

---

[1] ***HN1***[] *Section 1* of the Sherman Act, *15 U.S.C. § 1* provides in relevant part:

Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal.

[2] The First Wisconsin defendants consist of the First Wisconsin Corporation and its wholly-owned subsidiaries the First Wisconsin National Bank of Milwaukee, the First Wisconsin Development Corporation, and the Marshall-Wisconsin Company, Inc.

The question of whether error is "harmless" is to be resolved in the context of the individual case. Where it appears **[**5]** that error in no way influenced jurors or had but a slight effect upon them, the verdict and judgment are to be affirmed. *International Merger & Acquisition Consultants, Inc. v. Armac Enterprises, Inc., 531 F.2d 821 (7th Cir. 1976)*. See, also *Kotteakos v. United States, 328 U.S. 750, 66 S. Ct. 1239, 90 L. Ed. 1557 (1946)*.

Thus, under *rule 61*, a new trial should not be granted unless the court finds that refusal to take such action is inconsistent with substantial justice. *International Merger & Acquisition Consultants, Inc. v. Armac Enterprises Inc., supra* ; *Everett v.* ***[*456]*** *Southern Pacific Co., 181 F.2d 58 (9th Cir. 1950)*.

ALLEGED INSTRUCTIONAL ERRORS

Plaintiffs argue that the Court erred in instructing the jury that the antitrust laws were enacted "for the protection of competition, not competitors" and that the plaintiffs were required to show actual injury to competition.

The following instruction on restraint of trade was given by the Court:

> The anti-trust laws were enacted for the protection of competition, not competitors. The plaintiffs must, therefore, establish that the defendants' acts injured not only the plaintiffs themselves, but competition in the leasing **[**6]** of office rental in the central business district of the City of Milwaukee. (Tr. 10,578) [3]

The first sentence of this instruction is a direct quote from *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 488, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*, which adopted the phrase, "competition, not competitors" from *Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*. The Court's instruction was not a misstatement of the law.

HN4[] In order to recover under the antitrust laws, a plaintiff must show "antitrust injury," that is, "injury of the type the antitrust laws were intended to prevent and that flows from that which makes the defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., supra at 499, 97 S. Ct. at 697*.

Merely showing that one was a competitor of the defendants and was injured is not sufficient to show an antitrust violation under the Sherman Act. Plaintiffs must also establish an injury to competition. **[**7]** *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., supra*; *Magnus Petroleum Co., Inc. v. Skelly Oil Co., 599 F.2d 196 (7th Cir. 1979)*; *John Lenore & Co. v. Olympia Brewing Co., 550 F.2d 495 (9th Cir. 1977)*; *Redwing Carriers, Inc. v. McKenzie Tank Lines, Inc., 443 F. Supp. 639 (N.D.Fla.1977)*, *Aff'd, 594 F.2d 114 (5th Cir. 1979)*. As the court stated in *Magnus Petroleum Co., Inc. v. Skelly Oil Co., supra at 204*, evidence showing that "the effect upon competition in the market-place was substantially adverse" is also required.

Contrary to plaintiffs' assertions, this instruction did not add another element to be proved by plaintiffs. A reading of the instructions as a whole shows that the Court specifically set forth the three elements that plaintiffs were required to prove by a preponderance of the credible evidence. These elements were:

(1) that the defendants contracted, conspired or combined to restrain commerce;
(2) that such restraint was unreasonable;
(3) that as a direct and proximate result of such a conspiracy to restrain trade, the plaintiffs suffered an injury to their business or property. (Tr. 10,571-10,572)

The Court also instructed the jury as to the **[**8]** question of proof of harm to the general public immediately after the challenged instruction on competition. The Court stated that: "A restraint (of trade) is unreasonable if it tends or is reasonably calculated to prejudice the public interest." (Tr. 10,578)

Plaintiff also argues that they were deprived of any opportunity to argue to the jury with respect to the challenged instruction because the Court decided to insert this "competition, not competitor's" language from defendants' proposed instruction 19A after the close of final arguments.

---

[3] Transcript citations, unless otherwise indicated, are to the transcript of the second trial which commenced on March 20, 1978.

At the beginning of the final day of argument, the Court informed the parties that it was withholding its decision of defendants' proposed instruction 19A and taking it under advisement. The Court gave serious consideration to the position of both parties and ultimately concluded that language **[*457]** from this instruction should be included in the final instructions given to the jury. Plaintiffs did not request that the Court rule on this proposed instruction prior to completion of their closing argument, although they did object to the instruction when the Court announced its decision.

The case cited by plaintiffs to support its position **[**9]** on this question, *Frederic P. Wiedersum Associates v. National Homes Construction Corp., 540 F.2d 62 (2d Cir. 1976)*, is clearly distinguishable from the facts of this action. In Wiedersum, the court refused to inform the parties of any of the instructions it intended to give the jury, even though defense counsel requested the court to do so. Certain defense contentions about issues in the case were rejected by the court during the trial, but the court then instructed the jury on these contentions. Furthermore, the court gave totally inconsistent and conflicting instructions and failed to winnow out the requested instructions which it intended to adopt from those which it intended to reject.

Under these circumstances, the Second Circuit Court of Appeals granted a new trial, noting that ***HN5***[] it is fundamental error to give instructions which are hopelessly confusing and which fail "to provide even the barest legal guideposts to aid the jury in rationally reaching a decision." *Id. at 66*, quoting *McNello v. John B. Kelly, Inc., 283 F.2d 96, 102 (2d Cir. 1960)*.

In the present case, the Court finds that its augmenting of the restraint of trade instruction after the close of final arguments **[**10]** did not fundamentally change the instruction or constitute prejudicial error requiring a new trial. See, *Garland v. Material Service Corp., 291 F.2d 861, 863 (7th Cir. 1961)*.

After careful consideration, the Court concludes that its restraint of trade instruction, taken in context, was not erroneous but a correct statement of the law. The addition of the "competition, not competitors" language after the close of final arguments did not constitute prejudicial error.

Plaintiffs contend that the Court erred in instructing the jury that it was irrelevant whether various acts of the defendants violated laws other than the antitrust laws. Plaintiffs argue that the wrongfulness of specific acts done to accomplish a trade restraint is relevant in evaluating the defendants' conduct to ascertain whether a conspiracy exists and to determine whether the restraint of trade is reasonable.

In its instructions, the Court advised the jurors:

> During the course of the trial reference has been made to acts on the part of the various defendants and other persons that the plaintiffs claim were done as a part of a conspiracy to restrain trade, so as to injure plaintiffs in their business or property. **[**11]** You are to consider these acts, if you find they were indeed done by the defendants only if you also find that they were done in the course of and in furtherance of a conspiracy to violate the anti-trust laws by unreasonably restraining trade. Whether or not these acts were violative of laws other than the anti-trust laws is irrelevant. If any of the defendants have committed any other wrongs and I do not suggest whether they have or have not, you should not consider the character of these acts under laws other than the anti-trust laws as I have defined and explained them in these instructions. (Tr. 10,586-10,587)

In this instruction, the Court explained to the jury that only those allegedly illegal acts done by the defendants in the course of and in furtherance of a conspiracy to violate the antitrust laws could be considered. Whether any of these acts also violated principles of tort law was not, in and of itself, determinative of an antitrust violation. Merely because a defendant's acts may have constituted a tort does not automatically make that defendant's acts violative of the Sherman Act.

This is what the Court instructed the jury. Such instruction was not erroneous.

[12]** Plaintiffs also argue that they were entitled to have this instruction on the illegality **[*458]** of defendants acts as part of their theory of the case. It is clear that plaintiffs are entitled to have their theory of the case presented to the jury. *Florists Nationwide Telephone Delivery Network v. Florists Telegraph Delivery Assn., 371 F.2d 263 (7th Cir. 1967)*.

However, the Court gave the substance of the parties theories when it outlined the contentions of each of the parties at the outset of the jury instructions. (Tr. 10,556) Plaintiffs also argued their theories to the jury regarding the defendants' allegedly illegal conduct during closing argument.

The Court's instructions were geared to guiding and aiding the jury in its evaluation of the vast amount of evidence presented. Plaintiffs' and defendants' theories of the case were set forth by the Court. Accordingly, the Court finds that it did not err in its instruction concerning the alleged illegal or unreasonable acts of the defendants.

Plaintiffs assert that the Court erred in failing to give plaintiffs' requested instruction 16 regarding unfair competition as a per se violation of the Sherman Act. Plaintiffs state that **[**13]** the per se illegality of using unfair and illegal methods to destroy a competitor is well-established in case law, citing *Albert Pick-Barth Co. v. Mitchell Woodbury Corp., 57 F.2d 96 (1st Cir. 1932)*; Cert. denied, *286 U.S. 552, 52 S. Ct. 503, 76 L. Ed. 1288 (1932)* and related cases.

One problem with plaintiffs' position is that the Court considered and rejected plaintiffs' per se theories in the first trial and no new judicial authority has been presented to change the Court's earlier decision. In its prior decision, the Court explained that the per se theory announced in Pick-Barth has never been approved by the Supreme Court nor has it gained acceptance in most circuits. The Court also pointed out that, in light of *George R. Whitten, Jr., Inc. v. Paddock Pool Builders, Inc., 508 F.2d 547 (1st Cir. 1974)*, there is some doubt as to whether the Pick-Barth rule is still good law. See, *Juneau Square v. First Wisconsin National Bank of Milwaukee, supra at 1319*.

Recent case law has also criticized the per se rule set forth in Pick-Barth. See, *Stifel, Nicolaus & Co. v. Dain, Kalman & Quail, Inc., 578 F.2d 1256 (8th Cir. 1978)*; *Northwest Power Products, Inc. v. Omark Industries, Inc., 576 **[**14]** F.2d 83 (5th Cir. 1978)*; *Redwing Carriers, Inc. v. McKenzie Tank Lines, Inc., supra.*

Moreover, the Supreme Court, in its recent decision in *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568*, expressed reluctance to extend per se rules under *Section 1* of the Sherman Act. In light of the foregoing, the Court finds that it did not err in refusing to instruct the jury about unfair competition as a per se violation of the Sherman Act.

Plaintiffs argue that Aetna should have been included in the new trial and that the Court should not have instructed the jury that "you may not find that Aetna Life Insurance Company was a member of the alleged conspiracy." (Tr. 10,575) Plaintiffs state they should have been permitted to prove and argue that Aetna had been used and manipulated by the other defendants. The Court precluded this evidence by written order of March 22, 1978 on the ground that such an assertion would require an amendment of the pleadings.

Plaintiffs contend that their third amended complaint was improperly construed by the Court, "a fair reading of which leaves ample room for proof of control or manipulation of Aetna by the defendants." **[**15]** (Plaintiffs' brief in support of motion for a new trial. p. 8).
