TEXTRON FIN. CORP. v. NATIONAL UNION FIRE INS. CO.

Court of Appeal of California, Fourth Appellate District, Division Three

June 28, 2002, Filed

G020323

Reporter

2002 Cal. App. Unpub. LEXIS 6131 *; 2002 WL 1399105

TEXTRON FINANCIAL CORPORATION, Plaintiff and Appellant, v. NATIONAL UNION FIRE INSURANCE COMPANY OF PITTSBURGH, PENNSYLVANIA et al., Defendants and Appellants.

Notice: **[*1]** NOT TO BE PUBLISHED IN OFFICIAL REPORTS CALIFORNIA RULES OF COURT, RULE 977(a), PROHIBITS COURTS AND PARTIES FROM CITING OR RELYING ON OPINIONS NOT CERTIFIED FOR PUBLICATION OR ORDERED PUBLISHED, EXCEPT AS SPECIFIED BY RULE 977(B). THIS OPINION HAS NOT BEEN CERTIFIED FOR PUBLICATION OR ORDERED PUBLISHED FOR PURPOSES OF RULE 977.

Prior History: Appeals from a judgment and postjudgment orders of the Superior Court of Orange County, Super. Ct. No. 734096. Nancy Wieben Stock and Raymond J. Ikola, Judges.

Disposition: Judgment and postjudgment orders affirmed.

Core Terms

trial court, award of punitive damages, punitive damages, damages, insurer, cause of action, concealment, notice, offset, costs, reprehensibility, oppression, employees, malice, deleted, phase, compensatory damages, unfair competition, special verdict, new trial, endorsement, insurance company, managing agent, cancellation, remittitur, practices, contends, coverage, parties, unfair

Counsel: Albert, Weiland & Golden, Marcus M. Kaufman; Stephan, Oringher, Richman & Theodora and Robert M. Dato for Plaintiff and Appellant.

Horvitz & Levy, Michell C. Tilner, Peter Abrahams; Lewis D'Amato, Brisbois & Bisgaard, R. Gaylord Smith and Michael W. Connally for Defendants and Appellants.

Judges: RYLAARSDAM, J. WE CONCUR: SILLS, P. J., O' LEARY, J.

Opinion by: RYLAARSDAM

Opinion

Plaintiff Textron Financial Corporation sued defendant National Union Fire Insurance Company of Pittsburgh, Pennsylvania (National Union) and others over its refusal to honor a claim for insurance benefits concerning property damage to a commercial bus in which plaintiff held a security **[*2]** interest. Plaintiff settled with two parties and proceeded to trial against National Union and American International Adjustment Company, Inc. (AIAC), National Union's claims adjuster. After a trial divided into three phases, the trial court entered judgment on a jury's special verdict awarding plaintiff $ 165,414.40 in compensatory damages and $ 10 million in punitive damages against National Union. The court entered judgment, including costs, for AIAC against plaintiff.

Both plaintiff and National Union filed postjudgment motions. The trial court denied National Union's motion for judgment notwithstanding the verdict and plaintiff's motion for a new trial, but conditionally granted National Union a new trial unless plaintiff agreed to reduce the punitive damage award to $ 1.7 million. Plaintiff agreed to the remittitur. The court also struck plaintiff's request for expert witness fees.

Both plaintiff and National Union appealed from the judgment and postjudgment orders. Plaintiff challenged the trial court's striking of its cause of action for unfair business practices, the judgment in favor of AIAC, including costs, the remittitur of punitive damages, and the denial of its request **[*3]** for expert witness fees. National Union attacked the punitive damage award on several grounds, and the trial court's refusal to offset the amounts plaintiff received in the pre-trial settlements.

In an unpublished opinion filed January 29, 2001, we affirmed the judgment and postjudgment orders in their entirety. National Union filed a petition for writ of certiorari with the United States Supreme Court. On October 9, the Supreme Court issued an order granting the writ, vacated our judgment and remanded the matter to us for further consideration in light of *Cooper Industries, Inc. v. Leatherman Tool Group, Inc. (2001) 532 U.S. 424, 149 L. Ed. 2d 674, 121 S. Ct. 1678*. We granted the parties the opportunity to file supplemental briefs on the issue of whether the punitive damage award violates federal due process when reviewed under a de novo standard of review.

Having reviewed the matter in accordance with the United States Supreme Court's direction, we again affirm the trial court's judgment and postjudgment orders in their entirety.

FACTS

Il Sung Ko operated a tour bus company, Taeguk Tour and Sightseeing (Taeguk). Plaintiff loaned Ko funds to purchase a bus, **[*4]** receiving in return a security interest in the vehicle. The security agreement required Ko to insure the bus. Ko obtained a National Union liability insurance policy through D. W. Ferguson & Associates, Inc. (Ferguson), an independent insurance brokerage. The policy was issued through TRM International, Inc. (TRM), a company appointed by National Union to solicit, bind, write, and administer policies for its commercial bus program. The policy listed plaintiff as a loss payee and required National Union to mail plaintiff notice in advance if it cancelled the policy.

Taeguk suffered a downturn in business and Ko failed to timely pay his insurance premiums. In October 1992, TRM sent Ko notice it intended to cancel the policy. TRM did not send a copy of the cancellation notice to plaintiff. The policy terminated November 27.

Beginning in late October and throughout November, Ferguson and Taeguk discussed reducing the insurance premiums by deleting coverage for some of Ko's vehicles. Ferguson also corresponded with a TRM underwriter about the situation, proposing the issuance of a new policy covering only some of Ko's busses. The underwriter suggested an alternative whereby TRM would **[*5]** reinstate the original policy and give Ko a credit against his policy's premium if he agreed to certain conditions, which included delivering the license plates of two buses to Ferguson and temporarily suspending use of those vehicles. Plaintiff presented expert testimony that, unlike a transaction where a vehicle is deleted from a policy, the alternative approach implemented a procedure described as lay-up credit. Under a lay-up credit, the insured maintains coverage on a vehicle while it is not being operated.

Ko agreed to this proposal, and on December 1, TRM retroactively reinstated the policy effective November 27. The bus encumbered by plaintiff's security interest was one of the vehicles Ko intended not to use. Plaintiff did not receive notice of the policy reinstatement with the endorsement which reflected Ko's business received a premium credit due to the vehicle's non-use. National Union claimed it sent a copy of this endorsement to plaintiff, but plaintiff denied receiving it.

In January 1993, the bus encumbered by plaintiff's lien suffered extensive damage when it collided with another vehicle on a public highway. At Taeguk's request, Ferguson submitted a notice of **[*6]** claim to AIAC. On February 4, TRM sent AIAC a notice verifying coverage for the vehicle and confirming plaintiff as a loss payee. However, after further correspondence with Taeguk and TRM, AIAC denied the claim, asserting the bus had been deleted from the policy before the accident. TRM prepared an endorsement deleting the bus from the policy (Number 8) on February 16. This endorsement purported to be effective as of December 1, 1992.

In late 1993, Ko defaulted on plaintiff's loan. Plaintiff then learned about the accident and contacted Ferguson concerning insurance benefits to repair the vehicle. Ferguson informed plaintiff the bus had been removed from the policy before the accident. Plaintiff sued Ko, recovering a judgment against him and incurring $ 3,859.50 in legal fees in the process. However, Ko filed bankruptcy and discharged the debt.

Plaintiff submitted a claim to National Union for benefits under the insurance policy. At that time, it possessed only a certificate of insurance, not a copy of the policy.

AIAC also handled plaintiff's claim. TRM informed AIAC the encumbered bus had been deleted from the policy before the accident and sent it a copy of endorsement Number **[*7]** 8. A certificate of mailing on that copy covered the part of the endorsement reflecting the date TRM had prepared it. After an AIAC claims manager discussed the matter with John Lavin, a senior underwriter with the division handling National Union's bus program, and Tom Spangenberg, TRM's president, AIAC advised plaintiff the claim was being denied. The basis of the denial was that Ko deleted the bus from the policy before the accident, and TRM and AIAC concluded National Union's policy did not obligate it to give plaintiff advance notice of the deletion. National Union did not send plaintiff a copy of the policy until August 1994. Again, the mailing certificate covered the portion of endorsement Number 8 displaying the date on which it had been prepared.

PROCEDURAL BACKGROUND

The trial's first phase dealt with plaintiff's breach of contract claim against National Union. The court found, as a matter of law, the insurance contract's loss-payable clause constituted a separate agreement between plaintiff and National Union, obligating National Union to provide 30 days' notice of the policy's cancellation or the bus's deletion from it, and that National Union failed to comply with **[*8]** this requirement. The jury subsequently awarded plaintiff $ 61,513.80 under the policy.

The second phase involved plaintiff's causes of action for bad faith against National Union and fraud against both National Union and AIAC. The jury returned a special verdict finding National Union violated the policy's implied covenant of good faith and fair dealing and that it acted with oppression, malice, and fraud in doing so. The jury also returned a special verdict finding National Union liable for intentional misrepresentation and concealment and awarded plaintiff $ 3,859.80 in damages. Based on its interpretation of the jury's answers in the special verdict, the trial court entered judgment for AIAC on the fraud count.

During this phase, the trial court also ruled plaintiff could recover $ 30,268.16 in attorney fees as damages under *Brandt v. Superior Court* (1985)

37 Cal.3d 813. The parties stipulated plaintiff was entitled to $ 55,616.34 in costs pursuant to *Brandt*. Subsequently, the court denied National Union's request to offset the pretrial settlements plaintiff received from Ferguson ($ 26,500) and TRM ($ 62,500) against the compensatory award imposed **[*9]** on it.

The trial's third phase dealt with punitive damages. The jury awarded $ 10 million in punitive damages against National Union which the trial court subsequently reduced to $ 1.7 million. In addition, the judgment awarded plaintiff compensatory damages, consisting of the policy benefits plus interest, the legal expenses recoverable under *Brandt v. Superior Court, supra, 37 Cal.3d 813*, and the damages for fraud. Finally, the court awarded AIAC $ 10,277.52 in costs against plaintiff.

DISCUSSION

PLAINTIFF'S APPEAL

Demurrer to the Unfair Business Practices Cause of Action

The complaint's fourth count sought injunctive and restitutionary relief under Business and Professions Code section 17200 et seq. against National Union and AIAC for "engaging in unfair competition" in the "handling [of plaintiff's] claim, and the claims of other persons." Plaintiff alleged National Union, "aided and abetted" by AIAC, "used misleading documents to falsely suggest that it would provide insurance . . . where it had no intention to do so," "falsely suggested that it would . . . provide timely notice of [policy] cancellations," "misrepresented the terms and **[*10]** meaning of its policies . . . to provide a pretext for its refusal to provide timely notice," and "engaged in a pattern and practice of wrongful and false cancellations of insurance policies . . . ."

Relying on *Moradi-Shalal v. Fireman's Fund Ins. Companies* (1988)

46 Cal.3d 287, National Union and AIAC generally demurred to this count. The trial court sustained the demurrers without leave to amend. Citing State Farm Fire & Casualty Co. v. Superior Court (1996) 45 Cal.App.4th 1093, plaintiff contends the trial court's ruling was erroneous.

Moradi-Shalal held the Unfair Insurance Practices Act (Ins. Code, § 790 et seq.; UIPA) does not create a private cause of action against insurers who violate its provisions. (Moradi-Shalal v. Fireman's Fund Ins. Companies, supra, 46 Cal.3d at pp. 304-305.) This rule applies to both first party and third party claims. (Maler v. Superior Court (1990) 220 Cal. App. 3d 1592, 1597-1598, 270 Cal. Rptr. 222; Zephyr Park v. Superior Court (1989) 213 Cal. App. 3d 833, 836-838, 262 Cal. Rptr. 106.) While insurance companies are subject to California laws generally **[*11]** applicable to other businesses, including laws governing unfair business practices (Ins. Code, § 1861.03, subd. (a)), parties cannot plead around *Moradi-Shalal's* holding by merely relabeling their cause of action as one for unfair competition. (Manufacturers Life Ins. Co. v. Superior Court (1995) 10 Cal.4th 257, 283-284, 895 P.2d 56; Maler v. Superior Court, supra, 220 Cal. App. 3d at p. 1598; Safeco Ins. Co. v. Superior Court (1990) 216 Cal. App. 3d 1491, 1494, 265 Cal. Rptr. 585.)

The specific allegations of wrongful conduct contained in plaintiff's fourth cause of action, using misleading documents and misrepresenting both the terms of the insurance policies and its obligations under them for its own benefit, are the type of activities covered by the UIPA. (Ins. Code, § 790.03, subds. (a) & (h).) In Safeco Ins. Co. v. Superior Court, supra, 216 Cal. App. 3d 1491, the court ordered dismissal of an action which included a request for injunctive relief under Business and Professions Code section 17200 et seq. based on an insurer's allegedly unfair claims settlement practices. (Id. at pp. 1493-1494.) **[*12]** "Though the issue is one of first impression, we have no difficulty in deciding the Business and Professions Code provides no toehold for scaling the barrier of *Moradi-Shalal* . . . . To permit plaintiff to maintain this action would render *Moradi-Shalal* meaningless." (Id. at p. 1494.) Under the foregoing cases, merely alleging these purported acts constitute unfair business practices under the unfair competition law is insufficient to overcome *Moradi-Shalal*.

In a few cases, the Supreme Court has allowed an action against an insurance company under the unfair competition law where the alleged conduct constituted an unlawful restraint on trade under the Cartwright Act (Bus. & Prof. Code, § 16700 et seq.), even though it also violated the UIPA. (Quelimane Co. v. Stewart Title Guarantee Co. (1998) 19 Cal.4th 26, 43-44, 960 P.2d 513; Manufacturers Life Ins. Co. v. Superior Court, supra, 10 Cal.4th at pp. 283-284.) "This conclusion does not compromise the rule of *Moradi-Shalal* in any way. The court concluded there that the Legislature did not intend to create new causes of action when it described unlawful insurance business **[*13]** practices in section 790.03, and therefore that section did not create a private cause of action under the UIPA. The court did not hold that by identifying practices that are unlawful in the insurance industry, practices that violate the Cartwright Act, the Legislature intended to bar Cartwright Act causes of action based on those practices." (Manufacturers Life Ins. Co. v. Superior Court, supra, 10 Cal.4th at p. 284.)

The case on which plaintiff relies, State Farm Fire & Casualty Co. v. Superior Court, supra, 45 Cal.App.4th 1093, held the plaintiff-insureds had sufficiently alleged a cause of action against their insurer under the unfair competition law based on allegations of conduct constituting common law fraud and breach of the implied covenant of good faith and fair dealing, even though the same conduct violated the UIPA. "While *Moradi-Shalal* clearly held that the Legislature did not intend to create new causes of action when it enacted section 790.03, it is also clear that the Legislature did not intend in any way to circumscribe the previously existing common law right of an insured to seek redress for an insurer's fraudulent deception **[*14]** or breach of the covenant of good faith implied in the policy. . . . Thus, . . . common law claims remain as a firm legal basis on which an insured may rely to seek redress against an insurer." (*Id. at pp. 1107-1108*.)

The persuasiveness of *State Farm* has been undercut by the Supreme Court's subsequent disapproval of its definition of "unfair" business practices. Quoting from *People v. Casa Blanca Convalescent Homes, Inc. (1984) 159 Cal. App. 3d 509, 206 Cal. Rptr. 164*, *State Farm* declared: "The test of whether a business practice is unfair 'involves an examination of [that practice's] impact on its alleged victim, balanced against the reasons, justifications and motives of the alleged wrongdoer. In brief, the court must weigh the utility of the defendant's conduct against the gravity of the harm to the alleged victim . . . . [Citations.]' . . . . An 'unfair' business practice occurs when that practice 'offends an established public policy or when the practice is immoral, unethical, oppressive, unscrupulous or substantially injurious to consumers.' [Citation.]" (*State Farm Fire & Casualty Co. v. Superior Court, supra, 45 Cal.App.4th at pp. 1103-1104,* **[*15]** fn. omitted.)

In *Cel-Tech Communications, Inc. v. Los Angeles Cellular Telephone Co. (1999) 20 Cal.4th 163, 973 P.2d 527*, the Supreme Court found this definition is "too amorphous and provides too little guidance to courts and businesses." (*Id. at pp. 184-185*.) While *Cel-Tech Communications* limited its discussion to the context of an action between competitors, the court concluded, "any finding of unfairness to competitors under *section 17200* be tethered to some legislatively declared policy or proof of some actual or threatened impact on competition," and that under *Business and Professions Code section 17200*, "the word 'unfair' . . . means conduct that threatens an incipient violation of an ***antitrust law***, or violates the policy or spirit of one of those laws because its effects are comparable to or the same as a violation of the law . . . ." (*Id. at pp. 186-187*, fn. omitted; see also *Schnall v. Hertz Corp. (2000) 78 Cal.App.4th 1144, 1165-1167* [applying *Cel-Tech Communications, Inc.'s* standard in vehicle lessee's action against rental agency for allegedly concealing or obscuring the rental agreement's **[*16]** fuel service charge].)

Harmonizing *Moradi-Shalal's* holding with the foregoing decisions supports a conclusion the trial court properly sustained the demurrers to plaintiff's unfair competition claim. First, the holding in *Safeco Ins. Co. v. Superior Court, supra,*

216 Cal. App. 3d 1491 supports this result. Second, this case is distinguishable from *Quelimane* and *Manufacturers Life* in two respects. Neither decision involved an action by an insured or a third party based on the insurer's alleged failure to comply with a policy or to provide benefits. In *Quelimane*, parties who acquired real estate at tax sales sued title insurance companies for refusing to issue policies on their property. *Manufacturers Life* concerned an insurance agency's action against insurance companies for boycotting the agency. Also, in both cases the plaintiff alleged a Cartwright Act violation as the basis for its unfair competition cause of action. Finally, given the Supreme Court's disapproval of *State Farm's* "amorphous" definition of "unfair" practices and its focus on legislatively declared public policy, reliance on general common law principles **[*17]** to support a cause of action for unfair competition is unavailing.

Under these circumstances, the trial court properly found plaintiff failed to state a cause of action against National Union and AIAC for unfair business practices.

The Jury's Phase Two Findings

During the second phase, the jury returned a special verdict containing findings on the elements of two theories of deceit, intentional misrepresentation and concealment of a material fact. The jury's responses reflect it found both National Union and AIAC made representations of a material fact on which plaintiff justifiably relied to its injury and that both defendants made the representations "recklessly without knowing whether [they were] true or false." However, the jury concluded AIAC did not know the representations were false and did not make them with the intent to defraud plaintiff. On the concealment theory, the jury found both defendants concealed or suppressed a material fact which resulted in injury to plaintiff, but also found AIAC did not intentionally conceal or suppress a material fact with the intent to defraud plaintiff. In addition, the jury concluded both defendants were "guilty of fraud, **[*18]** malice, or oppression in the conduct upon which [it] based [its] finding of liability . . . ."

When the jury returned its special verdict, the court discussed the inconsistency in the findings with counsel and ultimately ruled AIAC "is not liable for fraud or concealment." Plaintiff argues the trial court erred by construing the jury's findings to exonerate AIAC.

The distinction between a general and special verdict is that under the former a jury "pronounces generally upon all or any of the issues," while the latter is one "by which the jury find the facts only, leaving the judgment to the court." (Code Civ. Proc., § 624.) In a case "where a special finding of facts is inconsistent with the general verdict, the former controls the latter, and the court must give judgment accordingly." (Code Civ. Proc., § 625; see also Tavaglione v. Billings (1993) 4 Cal.4th 1150, 1156-1157, 847 P.2d 574; Bond v. DeWitt (1954) 126 Cal. App. 2d 540, 544.)

The jury's findings that AIAC made representations recklessly but without knowing the statements were false are inherently inconsistent. A representation made recklessly without knowledge of its falsity **[*19]** is sufficient to establish scienter. (5 Witkin, Summary of Cal. Law (9th ed. 1988) Torts, § 705, p. 806.) However, on both fraud theories the jury found AIAC did not act with an intent to defraud plaintiff. An intent to induce reliance on a misrepresentation or nondisclosure by the plaintiff is essential to establish liability for either an intentional misrepresentation or concealment of a material fact. (Lovejoy v. AT&T Corp. (2001) 92 Cal.App.4th 85, 93; Conrad v. Bank of America (1996) 45 Cal.App.4th 133, 157; 5 Witkin, Summary of Cal. Law, *supra,* §§ 706, 710, pp. 807, 810.) The absence of this element defeats plaintiff's fraud claim against AIAC. Furthermore, the finding relevant to defendants' punitive damages liability was in the nature of a general verdict and is subordinate to the jury's specific finding of no intent to defraud. Thus, the trial court properly entered judgment for AIAC on the fraud claim.

Plaintiff contends AIAC could be found liable either as a co-conspirator of National Union or on a theory of negligent misrepresentation. These contentions are without merit.

First, since plaintiff did not assert the latter theory **[*20]** at trial, and the court did not instruct the jury on it, it is now too late to do so. (*Overgaard v. Johnson* (1977)

68 Cal. App. 3d 821, 826.) Second, while the court did instruct the jury on conspiracy as a basis for imposing liability, as plaintiff concedes the jury was not asked to return a special verdict on this allegation. Had the jury concluded AIAC was liable as a co-conspirator with National Union, it should have returned a finding of an intent to defraud.

A review of plaintiff's closing argument also reflects it relied on the representations and conduct of AIAC's employees, not conspiracy, to support its fraud claim. In fact, while discussing the question of whether National Union acted with malice, plaintiff's counsel suggested no conspiracy existed. "An insurance company whose job is to . . . investigate the situation thoroughly, concealing information which it knows is going to lead to a discovery that there's coverage - even concealing that information from its own claims people so that they won't have a guilty conscience about denying the claim - that's malice."

The trial court properly entered judgment for AIAC on the fraud claim.

The Brandt **[*21]** Damage Award

Plaintiff retained legal counsel under an agreement requiring it to pay counsel 40 percent of all amounts recovered in the case. After a lengthy discussion, the trial court limited the sum plaintiff could recover as damages under Brandt v. Superior Court, supra, 37 Cal.3d 813, to 40 percent of the amount recovered as policy benefits during the trial's first phase. Plaintiff attacks this ruling and claims it should have been allowed to recover the reasonable value of counsel's services which it calculates is nearly $ 300,000 greater than the amount awarded by trial court. This contention lacks merit.

Brandt held attorney fees reasonably incurred to compel payment of policy benefits tortiously withheld by an insurer are recoverable as an element of damages. (Brandt v. Superior Court, supra, 37 Cal.3d at pp. 815, 817.) "When an insurer's tortious conduct reasonably compels the insured to retain an attorney to obtain the benefits due under a policy, it follows that the insurer should be liable in a tort action for that expense. The attorney's fees are an economic loss - damages - proximately caused by the tort. [Citation.]" (**[*22]** *Id. at p. 817*.)

The retainer agreement required plaintiff to pay counsel 40 percent of all sums recovered in this action. It had no further legal obligation to pay counsel for the legal services rendered to it. *Brandt* expressly held the "fees recoverable . . . may not exceed the amount attributable to the attorney's efforts to obtain the rejected payment due on the insurance contract." (*Brandt v. Superior Court, supra, 37 Cal.3d at p. 819*.) Plaintiff cites no authority permitting a post-trial modification of the retainer agreement. Thus, the trial court did not err by limiting the damage award under *Brandt v. Superior Court, supra, 37 Cal.3d at p. 813* to the percentage specified in the parties' contingency agreement.

The Costs Award

Plaintiff attacks the trial court's postjudgment rulings concerning the award of costs on two grounds. Both arguments lack merit.

First, it disputes the court's finding AIAC was a prevailing party. Plaintiff argues that since National Union and AIAC filed a joint answer to the complaint and were represented by the same counsel during trial, they held a unity of interest which precludes AIAC **[*23]** from acquiring this status.

Code of Civil Procedure section 1032 defines prevailing party to include "a defendant in whose favor a dismissal is entered, a defendant where neither plaintiff nor defendant obtains any relief, and a defendant as against those plaintiffs who do not recover any relief against that defendant. . . . In situations other than as specified, the 'prevailing party' shall be as determined by the court, and under those circumstances, the court, in its discretion, may allow costs or not and, if allowed may apportion costs between the parties on the same or adverse sides . . . ." (*Code Civ. Proc., § 1032, subd. (a)(4)*.) In conformity with this statute, the case law holds that where only one of multiple, jointly-represented defendants presenting a unified defense prevails in an action, the trial court has discretion to award or deny costs to that party. (*Webber v. Inland Empire Investments, Inc. (1999) 74 Cal.App.4th 884, 920*; *Slavin v. Fink (1994) 25 Cal.App.4th 722, 725-726*; *Smith v. Circle P Ranch Co. (1978) 87 Cal. App. 3d 267, 272, 150 Cal. Rptr. 828*.)

Plaintiff asserts the trial court did not exercise its **[*24]** discretion in this case, citing a statement by the trial judge during the hearing on the motion to strike AIAC's cost bill. However, the court made that comment in response to plaintiff's contention "no evidence" exists "to support any particular allocation" between AIAC and National Union, and that the latter entity presumably "fronted" AIAC's trial expenses. The record as a whole does not support a conclusion the trial court failed to exercise its discretion concerning AIAC's status and its recovery of costs.

The related arguments also fail. Contrary to plaintiff's assertion this is not a case where it established wrongdoing against AIAC, but simply failed to recover a monetary award. The jury found AIAC did not commit fraud. Furthermore, since the injunctive relief claim had been previously dismissed, this was an action for damages. Thus, the evidence indicating AIAC subsequently modified its operating procedures concerning claims handling does not preclude it from being deemed a prevailing party.

Second, plaintiff contends the trial court erred by denying its recovery of expert witness fees under *Code of Civil Procedure section 998*. Nearly a year before trial, plaintiff served **[*25]** on National Union and AIAC an unsuccessful pretrial offer to compromise proposing "to allow judgment be taken . . . against defendants" for $ 626,489.26. In denying plaintiff's request for expert witness fees, the court cited *Taing v. Johnson Scaffolding Co. (1992) 9 Cal.App.4th 579*.

Code of Civil Procedure section 998, subdivision (d) authorizes the court to award a prevailing plaintiff its expert witness fees if the plaintiff made timely pretrial offer to compromise which the defendant does not accept, and "the defendant fails to obtain a more favorable judgment . . . ." In *Taing*, the court reversed an award of costs, declaring "if a plaintiff elects to submit a *section 998* offer in cases involving multiple defendants, the offer to any defendant against whom the plaintiff seeks to extract penalties for nonacceptance must be sufficiently specific to permit that individual defendant to determine the exact amount plaintiff is seeking from him or her." (*Taing v. Johnson Scaffolding Co., supra, 9 Cal.App.4th at p. 586*.) *Taing* explained its rule as follows: "An unapportioned offer by a single plaintiff to multiple defendants . . . requires any **[*26]** defendant who wants to accept to obtain the concurrence of his or her codefendants. This places a reasonable defendant at the mercy of codefendants whose refusal to settle may be unreasonable." (*Id. at p. 585*.)

National Union and AIAC were not jointly and severally liable to plaintiff. (Cf. *Steinfeld v. Foote-Goldman Proctologic Medical Group, Inc.* (1996)

50 Cal.App.4th 1542, 1547-1549.) The complaint sought recovery against National Union on theories of breach of contract, bad faith, and fraud. AIAC was alleged to be liable only on the latter theory. Furthermore, the evidence relating to each defendant's liability for fraud was separate. Thus, the trial court did not err by exercising its discretion to deny recovery of expert witness fees in this case.

NATIONAL UNION'S APPEAL

Denial of an Offset

National Union moved to have the settlement amounts plaintiff received from Ferguson and TRM offset against the damages plaintiff recovered from it. The trial court issued a lengthy written order denying the request as to both the contractual damages and the tort damages recovered by plaintiff. National Union contends the trial court **[*27]** erred by denying an offset in this case.

Consistent with the general rule imposing on a party the burden of proving the existence or nonexistence of each fact essential to a claim or defense (*Evid. Code, § 500*), "[a] defendant seeking an offset against a money judgment has the burden of proving the offset. [Citation.]" (*Conrad v. Ball Corp. (1994) 24 Cal.App.4th 439, 444*.)

With respect to plaintiff's contractual recovery, an insured is entitled to receive compensation in accordance with the policy terms, and an insurer cannot reduce the amount recoverable "merely because [the insured] has 'collateral contracts or relations with third persons which relieve him wholly or partly from the loss against which the insurance company agreed to indemnify him.' [Citations.]" (*Strickland v. Federal Ins. Co. (1988) 200 Cal. App. 3d 792, 801, 246 Cal. Rptr. 345*, quoting *Hughes v. Potomac Ins. Co. (1962) 199 Cal. App. 2d 239, 251, 18 Cal. Rptr. 650*, disapproved on another ground in *Sabella v. Wisler (1963) 59 Cal.2d 21, 34, 27 Cal. Rptr. 689, 377 P.2d 889*.) An insurer's right to recoup payment of policy benefits is covered **[*28]** by the principle of subrogation. To qualify for subrogation, the insurer must pay the insured's loss. (*Sapiano v. Williamsburg Nat. Ins. Co. (1994) 28 Cal.App.4th 533, 538*; *Chase v. National Indemnity Co. (1954) 129 Cal. App. 2d 853, 861-862, 278 P.2d 68*.)

National Union refused to pay any policy benefits to plaintiff. The cases on which it relies to establish an offset against the contract damages involve an insured's recovery of tort damages and whether the collateral source rule applied. Its contention the trial court "misread" *Kardly v. State Farm Mut. Auto. Ins. Co.* (1989)

207 Cal. App. 3d 479 is incorrect. Contrary to National Union's claim, *Kardly* did not hold the insurer waives the right of subrogation by breaching the insurance contract. The part of the *Kardly* opinion National Union quotes refers to the facts of another appellate decision. (*Id. at p. 489*.) Thus, the trial court properly refused to offset the Ferguson and TRM settlements against the contractual damage award.

As for plaintiff's recovery of tort damages, the trial court agreed the collateral source doctrine did not apply because **[*29]** Ferguson and TRM could not be deemed collateral sources under the facts of this case. However, the court detailed the potential liability facing Ferguson and TRM, and found their potential liability exceeded $ 261,000 which included nonduplicative exposure exceeding $ 96,000. Applying the tort of another doctrine, the court concluded the settlement sums paid by Ferguson and TRM should not be offset against plaintiff's recovery from National Union.

Generally, a party cannot obtain double recovery for the same wrong where joint or concurrent tortfeasors are jointly and severally liable for the same wrong.

(6 Witkin, Summary of Cal. Law*, supra,* Torts, § 1322, at p. 779.) "It has long been recognized that if one tortfeasor pays partial compensation to the plaintiff, the liability of other tortfeasors will be correspondingly reduced: ' . . . payments by one tortfeasor on account of a harm for which he and another are each liable, diminish the amount of the claim against the other whether or not it was so agreed at the time of payment and whether the payment was made before or after judgment. Since the plaintiff can have but one satisfaction, evidence of such payments is admissible **[*30]** for the purpose of reducing pro tanto the amount of the damages he may be entitled to recover.' [Citations.]" (*Krusi v. Bear, Stearns & Co. (1983) 144 Cal. App. 3d 664, 673, 192 Cal. Rptr. 793*.)

Where tortious acts by separate persons produce the same indivisible injury, each person is liable for the whole loss even if they did not act in concert. (*Sanchez v. Bay General Hospital (1981) 116 Cal. App. 3d 776, 796, 172 Cal. Rptr. 342*.) Thus, while plaintiff sued National Union for breach of contract, breach of the implied covenant of good faith and fair dealing, and fraud, but only sought damages against Ferguson and TRM for negligence, the injury it suffered was the same.

However, the court did find the tort of another doctrine applicable to this case. "A person who through the tort of another has been required to act in the protection of his interests by bringing or defending an action against a third person is entitled to recover compensation for the reasonably necessary loss of time, attorney's fees, and other expenditures thereby suffered or incurred. [Citations.]" (*Prentice v. North Amer. Title Guar. Corp. (1963) 59 Cal.2d 618, 620, 30 Cal. Rptr. 821, 381 P.2d 645*.) **[*31]**

Generally, a party seeking to recover litigation costs under this rule must plead and prove the claim. (*Hsu v. Abbara (1995) 9 Cal.4th 863, 869, fn. 4, 891 P.2d 804*.) While plaintiff did not do so here, the potential for its recovery of damages from Ferguson and TRM was made known to them during pretrial discovery. Furthermore, had it not settled with Ferguson and TRM, plaintiff could have amended the complaint to assert its right to recover the fees and expenses incurred in its action against National Union.

The record supports the trial court's denial of National Union's request for an offset.

PUNITIVE DAMAGES

Introduction

Both parties attack the punitive damage award. National Union challenges the sufficiency of the evidence supporting the recovery of exemplary damages, the court's refusal to instruct the jury National Union could only be subject to punitive damages based on its own employees' conduct, and the constitutionality of the award imposed on it. Plaintiff contends the trial court erred by reducing the punitive damage award to $ 1.7 million.

Sufficiency of the Evidence

National Union claims its own conduct was not oppressive, **[*32]** fraudulent, or malicious, TRM's activity cannot be attributed to it, and it did not ratify TRM's actions.

Civil Code section 3294 authorizes the award of punitive damages in any "action for the breach of an obligation not arising from contract, where it is proven by clear and convincing evidence that the defendant has been guilty of oppression, fraud, or malice . . . ." (*Civ. Code, § 3294, subd. (a)*.) In *Egan v. Mutual of Omaha Ins. Co. (1979) 24 Cal.3d 809, 169 Cal. Rptr. 691, 620 P.2d 141*, the Supreme Court upheld an award of punitive damages against an insurer based on evidence two employees, a claims manager and a claims adjuster, failed to adequately investigate the insured's claims under a disability insurance policy. "The determination whether employees act in a managerial capacity, however, does not necessarily hinge on their 'level' in the corporate hierarchy. Rather, the critical inquiry is the degree of discretion the employees possess in making decisions that will ultimately determine corporate policy.

When employees dispose of insureds' claims with little if any supervision, they possess sufficient discretion for the law to impute their actions concerning **[*33]** those claims to the corporation." (*Id. at pp. 822-823*.)

Subsequently, the Legislature amended *Civil Code section 3294* to provide, "an employer shall not be liable for [punitive] damages . . . based upon acts of an employee of the employer, unless the employer had advance knowledge of the unfitness of the employee and employed him or her with a conscious disregard of the rights or safety of others or authorized or ratified the wrongful conduct for which the damages are awarded or was personally guilty of oppression, fraud, or malice. With respect to a corporate employer, the advance knowledge and conscious disregard, authorization, ratification or act of oppression, fraud, or malice must be on the part of an officer, director, or managing agent of the corporation." (*Civ. Code, § 3294, subd. (b)*.)

In *White v. Ultramar, Inc. (1999) 21 Cal.4th 563, 981 P.2d 944*, the Supreme Court considered the effect of this amendment in an action for wrongful termination. A manager who was responsible for eight stores, covering sixty-five employees, had fired the plaintiff, a convenience store employee. The jury awarded plaintiff both compensatory and punitive **[*34]** damages.

In affirming, the Supreme Court concluded that "in amending *section 3294*, the Legislature intended (like *Egan, supra, 24 Cal.3d at p. 823*) to limit corporate punitive damage liability to those employees who exercise substantial independent authority and judgment over decisions that ultimately determine corporate policy." (*White v. Ultramar, Inc., supra, 21 Cal.4th at p. 573*.) The court noted "*section 3294, subdivision (b)*, placed ['managing agent'] next to the terms 'officer' and 'director,' intending that a managing agent be more than a mere supervisory employee. The managing agent must be someone who exercises substantial discretionary authority over decisions that ultimately determine corporate policy. Thus, by selecting the term 'managing agent,' and placing it in the same category as 'officer' and 'director,' the Legislature intended to limit the class of employees whose exercise of discretion could result in a corporate employer's liability for punitive damages." (*Ibid.*) The critical factor "'" . . . is the degree of discretion the employees possess in making decisions that will ultimately determine corporate policy." [Citation. **[*35]**]'" (*Id. at p. 573*.)

The agency agreement between National Union and TRM and the evidence in this case shows TRM had broad discretion over National Union's bus insurance program. TRM could "solicit, bind, write and administer insurance" policies, and "exercise [its] independent judgment as to the time, place and manner of soliciting insurance and servicing policyholders." There was evidence AIAC directed its employees to contact TRM when seeking coverage verification. In this case, TRM participated in issuing the policy to Ko, in subsequently canceling it, and then reinstating a modified version of it. Later, when Ko submitted a claim on the bus, TRM initially issued a coverage determination, but then prepared an endorsement deleting the vehicle from the policy, and advised AIAC to deny the claim. Furthermore, TRM's president was in contact with both AIAC and the senior management of the division handling National Union's bus program when plaintiff's claim was being considered, and participated in the ultimate decision to deny it. This evidence supports the jury's conclusion TRM was National Union's managing agent, thereby subjecting it to punitive damages under **[*36]** *Civil Code section 3294*. (*White v. Ultramar, Inc., supra, 21 Cal.4th at p. 577*; *Egan v. Mutual of Omaha Ins. Co., supra, 24 Cal.3d at p. 823*.)

In light of this conclusion it is unnecessary to consider National Union's additional claims concerning instructional error and alleged insufficiency of the evidence based on its own conduct.

Validity of the Trial Court's Remittitur

The trial court issued a post-judgment order conditionally granting National Union a new trial on the insurance bad faith and fraud counts and on plaintiff's right to receive punitive damages unless the latter agreed to reduce the punitive damage award to $ 1.7 million. Plaintiff timely consented to the remittitur. After National Union filed its appeal, plaintiff cross-appealed and now challenges the remittitur's validity.

A trial court has the discretion to conditionally grant a new trial unless the plaintiff consents to a reduction of a damages award where the court independently determines the jury's award is excessive. (*Code Civ. Proc., § 662.5,* subd. (b); Schelbauer v. Butler Manufacturing Co. (1984) 35 Cal.3d 442, 452-453, 198 Cal. Rptr. 155, 673 P.2d 743; **[*37]** West v. Johnson & Johnson Products, Inc. (1985) 174 Cal. App. 3d 831, 876, 220 Cal. Rptr. 437.) Reversal of the ruling is allowed only where there is no substantial basis in the record to support the reasons articulated by the trial court for its decision. (Code Civ. Proc., § 657; Jahn v. Brickey (1985) 168 Cal. App. 3d 399, 408, 214 Cal. Rptr. 119.)

The court noted the ratio of the original punitive damage award to compensatory damages (60 to 1) created a presumption the jury's verdict was the result of passion and prejudice. (Rosener v. Sears, Roebuck & Co. (1980) 110 Cal. App. 3d 740, 752, 168 Cal. Rptr. 237.) Plaintiff focuses much its argument on the reprehensible nature of National Union's conduct. While the court agreed the evidence supported the jury's conclusion National Union had acted reprehensibly, it concluded the jury had placed too much emphasis on National Union's financial wealth and failed to adequately consider the relationship between the injury suffered by plaintiff and the amount of the punitive damage award. The court noted this lawsuit involves an action by one corporate entity against another corporate entity **[*38]** to recover only for economic loss, the value of plaintiff's security interest in a damaged bus. Given these circumstances, the trial court noted upholding the original award raised serious constitutional concerns.

Plaintiff also challenges the portion of the remittitur order requiring it to choose between a reduction in punitive damages and a new trial on *both* liability and the amount of punitive damages. In so ruling, the trial court cited Medo v. Superior Court (1988) 205 Cal. App. 3d 64, 251 Cal. Rptr. 924. Plaintiff relies on Torres v. Automobile Club of So. California (1997) 15 Cal.4th 771, 937 P.2d 290 in challenging the trial court's ruling.

Torres held Civil Code section 3295, subdivision (d) did not require an *appellate* court which reverses an excessive punitive damage award to order a new trial on all issues, including liability and the amount of compensatory damages. (Id. at pp. 777-781.) In so ruling, *Torres* distinguished *Medo*. (Id. at p. 780.) In *Medo*, the *trial* court ordered a new trial on all issues when the jury was discharged after completion of the liability phase. **[*39]** While agreeing with the plaintiffs' assertion that the defendants had waived their right to have the same jury determine both liability and the right to punitive damages, the appellate court nonetheless noted, "punitive damages are not simply recoverable in the abstract. They must be tied to oppression, fraud or malice *in the conduct which gave rise to liability in the case*. Thus . . ., the instruction on punitive damages[] tells the jury that in arriving at an award of punitive damages, it is to consider the reprehensibility of the conduct of the defendant and that the punitive damages must bear a reasonable relation to the actual damages. In order for a jury to evaluate the oppression, fraud or malice in the conduct giving rise to liability in the case, it must consider the conduct giving rise to liability." (Medo v. Superior Court, supra,

205 Cal. App. 3d at p. 68.)

However, even assuming the trial court erred by relying on *Medo* to order a new trial on all issues if plaintiff refused to accept a reduction in the punitive damage award, the ruling does not require reversal. As the trial judge concluded, the jury's $ 10 million punitive **[*40]** damage award was clearly constitutionally suspect. Thus, ordering a remittitur in this case was appropriate under the circumstances.

Validity of the Award

Finally, National Union contends even the $ 1.7 million punitive damage award is unconstitutional and excessive. In our original opinion, we upheld the award under a deferential standard of review. The United States Supreme Court vacated the original judgment and directed us to review the punitive damage award's constitutional validity under the independent review standard enunciated in Cooper Industries, Inc. v. Leatherman Tool Group, Inc., supra, 532 U.S. 424.

The Supreme Court has declared, "the broad discretion" possessed by the states "with respect to the imposition of . . . punitive damages," is limited by the Constitution's Due Process Clause which "prohibits the States from imposing 'grossly excessive' punishments on tortfeasors . . . [citations]." (Cooper Industries, Inc. v. Leatherman Tool Group, Inc., supra, 532 U.S. at pp. 433-434.) In determining whether the punitive damage award in a particular case is "'grossly disproportional' to the gravity of [defendants'] **[*41]** offenses"' (Cooper Industries, Inc. v. Leatherman

Tool Group, Inc., supra, 532 U.S. at p. 434), a reviewing court must consider "three guideposts": "The degree of reprehensibility [of the wrongdoer's conduct]; the disparity between the harm or potential harm suffered . . . and [the] punitive damages award; and the difference between this remedy and the civil penalties authorized or imposed in comparable cases." (BMW of North America, Inc. v. Gore (1996) 517 U.S. 559, 574-575, 134 L. Ed. 2d 809, 116 S. Ct. 1589; see also Cooper Industries, Inc. v. Leatherman Tool Group, Inc., supra, 532 U.S. at p. 435.) On appeal, a reviewing court considering a constitutional challenge to a punitive damage award must conduct a "thorough, independent review" of the award. (Cooper Industries, Inc. v. Leatherman Tool Group, Inc., supra, 532 U.S. at p. 441.)

The bulk of National Union's argument focuses on the reprehensibility factor. The evidence clearly reflects reprehensible conduct occurred in this case. To the extent National Union suggests Textron was not subjected to any oppression, fraud, or malice, *Cooper Industries* **[*42]** recognizes that, in making an independent determination on the constitutionality of a punitive damage award, an appellate court "should defer to the [trial court's] findings of fact unless they are clearly erroneous. [Citation.]" (Cooper Industries, Inc. v. Leatherman Tool Group, Inc., supra, 532 U.S. at p. 440, fn. 14.) Here, the evidence supports the jury and trial court's finding of the predicate fact required for imposing exemplary damages.

National Union argues TRM, not it, committed the wrongdoing and its liability for TRM's actions is merely vicarious. But as discussed above, TRM "exercised substantial discretionary authority over decisions . . . ultimately determining corporate policy" for the bus insurance program (White v. Ultramar, Inc., supra, 21 Cal.4th at p. 573), and thus constituted National Union's managing agent. Simply describing National Union's liability as vicarious does not militate against imposing a proportionately appropriate punitive damage award against it based on TRM's wrongdoing.

National Union also claims that "at most [it] failed to properly investigate TRM's conduct, and was not itself involved in the scheme **[*43]** to manufacture documents to conceal the existence of coverage." We reject the proposition that, to limit or avoid liability for exemplary damages, a principal may rely on its own self-imposed ignorance of a managing agent's wrongdoing. National Union further contends the reprehensibility factor does not support the punitive damage award because the injury suffered was only economic in nature. But the Supreme Court has recognized "infliction of economic injury, especially when done intentionally through affirmative acts of misconduct, [citation] . . . can warrant a substantial penalty." (BMW of North America, Inc. v. Gore, supra, 517 U.S. at p. 576.)

The second "guidepost[]" relevant to the constitutional validity of the punitive damage award is "the disparity between the harm or potential harm suffered . . . and [the] punitive damages award . . . ." (BMW of North America, Inc. v. Gore, supra, 517 U.S. at p. 575.) Here, Textron recovered compensatory damages exceeding $ 165,000. Thus, the ratio between the actual harm caused by National Union and the trial court's reduced punitive damage award of $ 1.7 million is roughly 10 to 1.

National **[*44]** Union claims the ratio between compensatory damages and punitive damages should not exceed 4 to 1, and thus, the 10 to 1 ratio in this case is constitutionally impermissible. We disagree. BMW of North America, Inc. v. Gore, supra, 517 U.S. 559 declared, "we have consistently rejected the notion that the constitutional line is marked by a simple mathematical formula . . . ." (Id. at p. 582.) In a passage relevant to the present case, the Court emphasized this point by noting, "low awards of compensatory damages may properly support a higher ratio than high compensatory awards, if, for example, a particularly egregious act has resulted in only a small amount of economic damages." (*Ibid*.) While the compensatory award in this case was modest, in light of the reprehensible conduct attributable to National Union, the trial court properly imposed a punitive damage award sufficiently high to achieve the twin objectives of punishment and deterrence.

The third "guidepost[]"concerns a comparison of "the punitive damages award and the civil or criminal penalties that could be imposed for comparable misconduct . . . ." (BMW of North America, Inc. v. Gore, supra, 517 U.S. at p. 583.) **[*45]** National Union notes the Insurance Code only imposes fines of between $ 10,000 and $ 55,000 for misconduct by insurers. However, Textron notes Penal Code section 550, subdivision (b) makes it a felony subject to fine or imprisonment to "knowingly assist or conspire with any person to" either "present" or "prepare" a "written .

. . statement . . . in . . . opposition to [] a claim" for insurance benefits, or to "conceal, or . . . fail to disclose the occurrence of [] an event that affects any person's initial or continued right or entitlement to any insurance benefit or payment . . . ." (*Pen. Code, § 550, subd. (b)(1)*, *(2)* & *(3)*.) Furthermore, the focus of an analysis of a punitive damage award's constitutionality is to ensure the wrongdoer "receives fair notice not only of the conduct that will subject him to punishment, but also of the severity of the penalty that a State may impose." (*BMW of North America, Inc. v. Gore, supra, 517 U.S. at p. 574*, fn. omitted.) In reversing the award in *Gore*, the Supreme Court noted "there does not appear to have been any judicial decision in Alabama or elsewhere indicating [the defendant's wrongful activity] might give **[*46]** rise to such severe punishment." (*Id. at p. 584*.) Here, the same cannot be said to be true. It has long been common knowledge acts of bad faith by insurers could subject that party to significant punitive damage awards. (See *Neal v. Farmers Ins. Exchange (1978) 21 Cal.3d 910, 928-929, 148 Cal. Rptr. 389, 582 P.2d 980*.)

Thus, we conclude that, even under a de novo review, the $ 1.7 million punitive damage award in this case does not violate National Union's constitutional right to due process of law.

As for the excessiveness of the punitive damage award under state law, "the California Supreme Court has established three criteria for making that determination: (1) the reprehensibility of the defendant's misdeeds; (2) the amount of compensatory damages, though there is no fixed ratio for determining whether punitive damages are reasonable in relation to actual damages; and (3) the defendant's financial condition. [Citations.]" (*Stevens v. Owens-Corning Fiberglas Corp.* (1996)

49 Cal.App.4th 1645, 1658.) On appeal, the award is presumed to be correct and will be reversed only if the record, viewed most favorably to the judgment, **[*47]** reflects the award is the result of passion or prejudice. (*Ibid.*)

Our foregoing discussion of the reprehensibility and ratio criteria is equally applicable in this context and need not be repeated. As for the third factor, "the wealthier the wrongdoer, the larger the punitive damage award must be to meet the goals of punishment and deterrence. [Citations.]" (*Stevens v. Owens-Corning Fiberglas Corp., supra, 49 Cal.App.4th at p. 1658*.) Consequently, to enforce the purposes of punishing the wrongdoer and deterring similar future wrongful conduct (*Cooper Industries, Inc. v. Leatherman Tool Group, Inc., supra, 532 U.S. at p. 432*; *PPG Industries, Inc. v. Transamerica Ins. Co. (1999) 20 Cal.4th 310, 317, 975 P.2d 652*), the award necessarily had to be large enough to affect a corporate entity such as National Union. We conclude the punitive damage award is not excessive under California law.

Opinion

ORDER AND OPINION

On June 21, 2002, this court heard oral argument on Ron Nystrom's ("plaintiff") Motion for Sanctions Under *28 U.S.C. § 1927* against counsel for Trex Company, Inc. and Trex **[*2]** Company, LLC (collectively "defendants"). Based on the briefs submitted by the parties, the arguments made at the hearing, and for the reasons more fully articulated below, the plaintiff's Motion is denied.

I. Factual Background

In December of 2001, the plaintiff filed the instant lawsuit alleging patent infringement by the defendants of U.S. Patent No. 5,474,831 ("the '831 patent"). The '831 patent, which was issued to the plaintiff on December 12, 1995, discloses a uniquely shaped board for use in constructing exterior flooring surfaces (such as outdoor decks, porches, docks, etc.) that has a slightly rounded or curved top surface that enables the board to shed water, and bottom surface with a concave configuration which allows multiple boards to stack easily. The defendants' product is a composite board which is made from a mixture of cellulose fibers (usually sawdust) and plastic. These materials are mixed, heated, and extruded to produce a composite material board with a curved top and bottom. The parties have attempted to negotiate a licensing agreement in the past to no avail. The plaintiff subsequently filed this lawsuit.

In response to the plaintiff's complaint, **[*3]** the defendants first filed a counterclaim alleging attempted monopolization in violation of *section 2 of the Sherman Act* and conspiracy to restrain trade or commerce in violation of *section 1 of the Sherman Act*. See Defs.' First Countercl., Dkt. 4. The latter claim was filed against the plaintiff, his company, and the plaintiff's attorneys. After the plaintiff filed a motion to dismiss and a motion for preliminary injunction, the defendants voluntarily dismissed the counterclaims. Shortly thereafter, the defendants filed an amended counterclaim, where they allege attempted monopolization by obtaining a patent through fraud on the Patent and Trademark Office ("PTO") in violation of *section 2 of the Sherman Act* and attempted monopolization by instituting sham litigation in violation of *section 2 of the Sherman Act*. See Defs.'Am. Countercl., Dkt. 12. These counts were filed against the plaintiff only. After the plaintiff filed another motion to dismiss, a motion for preliminary injunction, and a *Rule 11* letter for sanctions, the defendants again voluntarily dismissed these counterclaims.

Subsequently, the plaintiff filed the instant motion, seeking sanctions against the defendants **[*4]** under *28 U.S.C. § 1927* for the filing of these counterclaims. The plaintiff seeks attorney's fees based on the defendants' "vexatious filing and subsequent abandonment of two consecutive sets of frivolous antitrust counterclaims, and an intentional filing of a groundless opposition brief." Pl.'s Mot., Dkt. 23, p. 3. The defendants maintain that while the first set of counterclaims was filed in error, the second set of counterclaims are fully supported by the facts as are known at this time and were only dismissed based on the defendants' desire to focus on the patent issues in the case first. The defendants noted that they may re-file these claims based on the resolution of the patent issues.

II. Analysis

Section 1927 of Title 28 of the United States Code provides that

> ***HN1***[] Any attorney or other person admitted to conduct cases in any court of the United States or any Territory thereof who so multiplies the proceedings in any case unreasonably and vexatiously may be required by the court to satisfy personally the excess costs, expenses, and attorney's fees reasonably incurred because of such conduct.

28 U.S.C. § 1927 **[*5]** (West. 1994). **HN2**[] The award of sanctions under section 1927 is in the discretion of the district court. See Chaudhry v. Gallerizzo, 174 F.3d 394, 410 (4th Cir. 1999). Section 1927 was enacted to sanction attorneys who "unreasonably extend court proceedings." Roadway Express, Inc. v. Piper, 447 U.S. 752, 757, 100 S. Ct. 2455, 65 L. Ed. 2d 488 (1980); see also DeBauche v. Trani, 191 F.3d 499, 511 ("The unambiguous text of § 1927 aims only at attorneys who *multiply* proceedings.") (emphasis in original); Knorr Brake Corp. v. Harbil, Inc., 738 F.2d 223, 226 (6th Cir. 1984) ("A court may impose section 1927 fees only to sanction needless delay by counsel."). Further, a court must find that the attorney acted in bad faith as a prerequisite to awarding fees under section 1927. See Chaudhry, 174 F.3d at 411 n. 14 (quoting Brubaker v. City of Richmond, 943 F.2d 1363, 1382 n. 25 (4th Cir. 1991)); see also Knorr, 738 F.2d at 227.

In this case, the plaintiff contends that the filing of the antitrust counterclaims by the defendants was done in bad faith in order to delay and multiply **[*6]** the proceedings. The plaintiff cites a number of reasons for this allegation. First, the plaintiff notes that the defendants voluntarily dismissed the counterclaims after being notified that they were baseless based on current ***antitrust law***. Second, the plaintiff argues that the defendants' counsel hold themselves out as experts in ***antitrust law***; and as experts, they cannot maintain that they were unaware of the law surrounding these counterclaims. Third, the plaintiff points to the fact that Mr. Coyne, one of the defendants' attorneys, argued a case regarding sham litigation before the Supreme Court, and thus, he knew the counterclaim based solely on sham litigation was improper. See Professional Real Estate Investors, Inc. v. Columbia Pictures Indus., Inc., 508 U.S. 49, 61, 113 S. Ct. 1920, 123 L. Ed. 2d 611 (1993) (holding that even if a party can prove sham litigation, the party must still prove the elements of a substantive antitrust violation). Fourth, the plaintiff cites an article written by Mr. Coyne in the National Law Journal regarding whether a patentee can be guilty of antitrust violations for enforcement of his patent. Based on this article, written within **[*7]** days of the filing of these counterclaims, the plaintiff argues that the defendants knew that the counterclaim was without merit. Finally, the plaintiff alleges that Mr. Coyne committed perjury in his declaration when he stated that he had never met the plaintiff. Based on these allegations, the plaintiff argues that the defendants' counsel has acted in bad faith and intentionally and vexatiously multiplied the proceedings in order to harass the plaintiff and delay the litigation. [1]

[*8] The defendants argue that the antitrust counterclaims are legitimate, despite the voluntarily dismissal of these claims, and therefore, they are not guilty of unreasonably or vexatiously multiplying the proceedings. The defendants maintain their position that the plaintiff's lawsuit is a sham, based on the fact that the plaintiff knows the patent underlying their infringement action is invalid. Furthermore, the defendants allege that the plaintiff committed fraud on the PTO by misrepresenting the Zagelmayer patent to the examiner during the prosecution of the '831 patent. These factors, the defendants allege, strip the plaintiff, as patent holder, of his immunity from antitrust liability. See Professional Real Estate Investors, 508 U.S. at 60-61 (holding that "proof of a sham … deprives the defendant of immunity" from antitrust liability); see also Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 455-56, 113 S. Ct. 884, 122 L. Ed. 2d 247 (1993) (citing Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 174, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)) (holding that "the enforcement of a fraudulently obtained **[*9]** patent could violate the Sherman Act.").

In analyzing these issues, the court has found that the defendants' initial counterclaim was improper in many respects. For example, the defendants improperly sued the plaintiff's attorneys and failed to plead the required elements of an antitrust violation. However, the Fourth Circuit held "as a matter of law that **HN3**[] the filing of a single complaint cannot be held to have multiplied the proceedings unreasonably or vexatiously and therefore, … § 1927 cannot be employed to impose sanctions." DeBauche, 191 F.3d at 511-12. Thus, the court must decide whether the filing of an additional amended counterclaim can be the basis of sanctions in this case.

[1] In a Supplemental Memorandum filed with the court on June 28, 2002, the plaintiff argues that the opinion of counsel letters produced by the defendants state that the Trex products may infringe upon the plaintiff's patent and therefore, the defendants' contention that the underlying patent infringement case is baseless is unreasonable. See Dkt. 44. However, the court does not agree. The opinion of counsel letter also states that certain claims of the '831 patent may be invalid based on prior public use and the Zagelmayer patent. This portion of the letter gives the defendants a reasonable basis to argue that the plaintiff's patent is invalid and that the infringement suit is groundless.

It appears that the amended counterclaim was not as deficient as the initial counterclaim for several reasons. First, the amended counterclaim alleges violations of ***antitrust law*** against the plaintiff only and not the plaintiff's attorneys. While this court is not going to judge the success of such a counterclaim, particularly since it has been voluntarily dismissed by the defendants, the court notes that such antitrust counterclaims to patent infringement lawsuits are not uncommon. **[*10]** Courts have held that ***HN4***[] the enforcement of fraudulently obtained patents to exclude others from the market can violate the *Sherman Act*. See, e.g., *Spectrum Sports, 506 U.S. at 455*. Further, the defendants have alleged specific instances where they believe the plaintiff committed fraud on the PTO, which can also be the basis for antitrust violations. See Defs.' Am. Countercl., Dkt. 12, PP 20-30; see also *Walker Process, 382 U.S. at 174*.

Second, the defendants have plead ***HN5***[] the elements of an antitrust violation, including (i) a specific intent to monopolize the market, (ii) anticompetitive or predatory conduct designed to further that intent, and (iii) a dangerous probability of success. See *Abcor Corp. v. AM Int'l, Inc., 916 F.2d 924, 926 (4th Cir. 1990)*. Specifically, the defendants allege the following:

> P 47 - Nystrom has demonstrated the specific intent to monopolize by instituting one or more patent infringement suits with the knowledge that the patent was not valid.
>
> P 48 - In furtherance of his attempt to monopolize, Nystrom engaged in and continues to engage in the following activities, among others: the filing and **[*11]** prosecution of this patent infringement suit against Trex, which is a sham and false and known by Nystrom to be so; bad faith prosecution of suit; and upon information and belief, the assertion of the '831 patent against Universal Forest Products, and possibly others, which was a sham and false and known by Nystrom to be so.
>
> P 49 - By erecting a substantial barrier to entry through unlawful assertion and/or enforcement of the '831 patent, which Nystrom knows or should know is invalid, Nystrom has a dangerous probability of succeeding in his attempt to monopolize.

Defs.' Am. Counterclaim, Dkt. 12. Again, the court does not judge the truth in these allegations, but notes that the proper elements are plead for an antitrust cause of action.

The plaintiff spends considerable time arguing the fact that the defendants initially did not state the relevant market, and then once they did plead the relevant market, it was not the market the plaintiff is in. Specifically, the defendants allege that the plaintiff has attempted to monopolize the market for composite decking material with a curved top that sheds water. See Defs.' Am. Countercl., Dkt. 12, PP 32, 44. The plaintiff **[*12]** states that he operates solely in the market for milling decking material and therefore, cannot monopolize a market he is not in. Based on this, the plaintiff argues that the defendants have misrepresented the plaintiff's actions and the relevant market to the court. The defendants state that they rely on a number of statements made by the plaintiff during the prosecution of his patent which lead them to believe that he intends to monopolize both the milled decking material and composite decking material markets. See, e.g., Defs.' Am. Countercl., Dkt. 12, P 18 ("the invention is replacing analogous products that have heretofore enjoyed widespread usage."). At this stage of the proceedings, the court does not have sufficient evidence to limit the interpretation of this statement to analogous products in only the milled decking material market. Therefore, the court does not find that the defendants acted in bad faith for making this assertion.

Similarly, the court does not find that misstatement in Mr. Coyne's declaration rises to the level of perjury. In his first declaration, Mr. Coyne states that "I have never met personally with Mr. Nystrom." See Defs.' Resp., Dkt. 25, Ex. **[*13]** N, P 8. After being confronted by declarations from the plaintiff and the plaintiff's attorneys stating that Mr. Coyne was in a meeting with Mr. Nystrom in the spring of 1999, Mr. Coyne recanted his earlier declaration and stated that he "has no recollection of ever having met Mr. Nystrom." See Supplemental Decl. of Patrick J. Coyne, Dkt. 42, P 6. The court finds insufficient evidence to sanction the defendants for counsel's lapse of memory; however, the court cautions Mr. Coyne about making definitive statements on issues where he is unsure of, or does not recall, the actual facts.

Finally, the plaintiff argues that the fact that the defendants voluntarily withdrew these counterclaims prior to a hearing before the court, that they have somehow conceded that these counterclaims are baseless. However, the court disagrees with this assertion. The Supreme Court has stated that if a plaintiff succeeds in his other underlying lawsuit, that any antitrust counterclaims cannot succeed as there is no sham litigation. See *Professional Real Estate Investors, 508 U.S. at 61 n. 5*. Therefore, it is not unreasonable for the defendants to decide to voluntarily dismiss their antitrust **[*14]** counterclaims pending resolution of the underlying patent infringement case. If the plaintiff is successful in his lawsuit, the defendants will have saved time and money by not maintaining the antitrust counterclaims. However, if the plaintiff loses his case, the defendants may re-file their counterclaims. The Supreme Court notes that in such a case, a district court must "'resist the understandable temptation to engage in post hoc reasoning by concluding' that an ultimately unsuccessful 'action must have been unreasonable or without foundation.'" Id. (quoting *Christiansburg Garment Co. v. EEOC, 434 U.S. 412, 421-22, 98 S. Ct. 694, 54 L. Ed. 2d 648 (1978))*.

In conclusion, this court does not condone the actions of the defendants in this case, particularly in filing an initial counterclaim without first researching the merits of the claims. However, the court does not believe that the defendants' actions were made in bad faith to vexatiously multiply and delay the proceedings. Therefore, the plaintiff's Motion for Sanctions is denied.

III. Conclusion

For the reasons stated above, the plaintiff's Motion for Sanctions Under *28 U.S.C. § 1927* **[*15]** is **DENIED.**

The Clerk is **REQUESTED** to send a copy of this Order and Opinion to counsel of record.

It is so **ORDERED.**

HN2[] **Class Actions, Compromise & Settlement**

Approval of a class action settlement involves a two-step process. First, the court makes a preliminary fairness evaluation of the proposed terms of settlement submitted by counsel. Second, if the court determines that the settlement is fair, the court directs that notice pursuant to *Fed. R. Civ. P. 23(e)* be given to the class members of a formal fairness hearing, at which arguments and evidence may be presented in support of and in opposition to the settlement.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

HN3[] **Class Actions, Certification of Classes**

Approval of a settlement in a class action necessarily requires the court to determine if the proposed class is a proper class for settlement purposes.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN4[] **Class Actions, Certification of Classes**

With the exception of the manageability requirement, a settlement class must meet the requirements of *Fed. R. Civ. P. 23* just as if the case were to be litigated. Confronted with a request for settlement-only class certification, a district court need not inquire whether the case, if tried, would present intractable management problems, *Fed. R. Civ. P. 23(b)(3)(D)*. But other specifications of *Rule 23* - those designed to protect absentees by blocking unwarranted or over broad class definitions - demand undiluted, even heightened, attention in the settlement context.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN5[] **Class Actions, Certification of Classes**

A district court may certify a class only if the plaintiff meets his burden to show that proposed class and the proposed class representatives meet the four prerequisites in *Fed. R. Civ. P. 23(a)* and one of three additional requirements in *Fed. R. Civ. P. 23(b)*. *Fed. R. Civ. P. 23*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

HN6[] **Class Actions, Certification of Classes**

A district court has "great discretion" in determining whether to certify a class, but the district court must make a reasoned and thorough analysis under *Fed. R. Civ. P. 23*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN7[] **Class Actions, Certification of Classes**

The four *Fed. R. Civ. P. 23(a)* prerequisites include: (1) numerosity; (2) commonality; (3) typicality; and (4) adequacy of representation. All four must be satisfied in order for the court to certify the class. Once the plaintiff satisfies these prerequisites, he must then satisfy the requirements of one of the three subdivisions of *Fed. R. Civ. P. 23(b)*. The requirements of these subdivisions include: (1) inconsistent adjudications would result in incompatible standards of conduct or any adjudication would bear heavily on the interests of non-parties; (2) the party opposing the class has acted or refused to act on grounds generally applicable to the class; and (3) issues of law and fact predominate issues unique to individual class members, and maintaining the class action is the superior procedural vehicle. *Fed. R. Civ. P. 23(b)(1)-(3)*.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN8[] **Class Actions, Certification of Classes**

In the context of *Fed. R. Civ. P. 23(b)(3)*, the predominance requirement is readily met in certain cases alleging consumer or securities fraud or violations of ***antitrust law***.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > Parties > Joinder of Parties > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN9[] Class Actions, Compromise & Settlement

In the context of *Fed. R. Civ. P. 23(b)(3)*, the court need not consider manageability of the class where the proposed class is a limited purpose, settlement only class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Special Proceedings > Class Actions > Notice of Class Action

HN10[] Class Actions, Prerequisites for Class Action

Fed. R. Civ. P. 23(c)(2) provides that in a class action maintained under *Fed. R. Civ. P. 23(b)(3)*, the court shall direct to the members of the class the best notice practicable under the circumstances. The notice shall advise each member that the court will exclude the member from the class if the member so requests by a specified date. This request for exclusion is popularly known as "opting out" of the class.

Civil Procedure > ... > Class Actions > Class Attorneys > Fees

Civil Procedure > ... > Class Actions > Class Attorneys > General Overview

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Attorneys > General Overview

HN11[] Class Attorneys, Fees

If the preliminary evaluation of the proposed settlement does not disclose grounds to doubt its fairness or other obvious deficiencies, such as unduly preferential treatment of a class representative or of segments of the class, or of excessive compensation for attorneys, and appears to fall within the rage of possible approval, the court should direct that notice under *Fed. R. Civ. P. 23(e)* be given to the class members of a formal fairness hearing, at which arguments and evidence may be presented in support of and in opposition to the settlement.

HN12[] **Class Actions, Compromise & Settlement**

The PSLRA expressly provides that the total attorneys' fees and expenses awarded by the court to counsel for the plaintiff class shall not exceed a reasonable percentage of the amount of any damages and prejudgment interest actually paid to the class. *15 U.S.C.S. § 78u-4(a)(6)*. Courts assess the reasonableness of attorneys' fees to protect class members from unfair settlements, to minimize conflicts of interest between class members and their representatives, and to prevent perpetuating a public perception that attorneys exploit class members for hefty fees. The court must make an independent review of the reasonableness of fees sought in a class settlement.

HN13[] **Costs & Attorney Fees, Clayton Act**

Purported members of a class must receive the best notice practicable under the circumstances. *Fed. R. Civ. P. 23(c)(2)*. The notice must contain an adequate description of the proceedings written in objective, neutral terms that, insofar as possible, may be understood by the average absentee class member. The notice must contain information that a reasonable person would consider to be material in making an informed, intelligent decision of whether to opt out or remain a member of the class and be bound by the final judgment. Under the PSLRA, notice must conform to certain additional articulated standards. The notice must include a statement of plaintiff recovery, determined in an aggregate and on an average per share basis. *15 U.S.C.S. § 78u-4(a)(7)(A)*. The notice must provide a statement of potential outcome of the case. *15 U.S.C.S. § 78u-4(a)(7)(B)*. The notice must supply a statement of attorneys' fees or costs sought. *15 U.S.C.S. § 78u-4(a)(7)(C)*.

Opinion

[*425] MEMORANDUM OPINION AND ORDER

Before the Court is Plaintiffs' and Defendant Bresea Resources's (Bresea) Revised Joint Motion for Preliminary Approval of Proposed Settlement Between Plaintiffs and Bresea (Doc. No. 787). The motion requests that the Court issue an order (1) granting preliminary approval of the settlement, (2) conditionally certifying a plaintiff class for purposes of settlement only, (3) approving forms of notice to class members, and (4) setting terms and schedule for the settlement approval process. Having considered the arguments and briefs, the Court finds that the motion is well taken and should be **GRANTED.**

I. BACKGROUND

For purposes of this Order, the Court will not recite the complete factual background of the case but will instead only detail the relevant points. For a complete description of the factual nature of this case, see this Court's opinion reported as *McNamara v. Bre-X Mineral, Ltd., 57 F. Supp. 2d 396 (E.D. Tex. 1999)*.

On November 2, 2001, Plaintiffs and Bresea filed a motion seeking approval of a proposed settlement. This Court received **[*426]** extensive briefing on the subject **[**5]** and held a hearing on the matter on November 20, 2002. On January 15, 2002, the Court issued a ruling (the January 2002 order) denying the initial motion for approval of settlement. The original settlement sought to include in the class, "all persons who purchased or otherwise acquired Bre-X Minerals Ltd. common shares and/or Bresea Resources Ltd. common shares between May 6, 1993 and May 2, 1997 and who suffered a loss as a consequence of dealing in shares of Bre-X and/or Bresea." As grounds for denial of this motion, the Court held that the proposed class did not meet the predominance requirement of *Rule 23* as it included plaintiffs who were not covered in the complaint and because it included plaintiffs whose claims arose after Freeport MacMoran announced that there were insignificant amounts of gold at Busang and who would therefore be required to prove individual reliance.

Plaintiffs and Bresea have reached a new settlement (the 2002 Settlement) which excludes those plaintiffs. Additionally, Plaintiffs claim that the 2002 Settlement is materially different from the original settlement in the following ways:

> $ 4.48 million (minus attorney fees and "certain other deductions") **[**6]** of the $ 5.76 million payment by Bresea will be distributed to the eligible class members and will not be distributed to the Bre-X Trustee (the remaining $ 1.28 will be given to the Bre-X Trustee.)
> Attorneys' Fees have been reduced by over $ 100,000.
> The Bre-X trustee has agreed to seek a declaration that injured Bre-X purchasers are creditors of Bre-X, but this is not a condition precedent to the rights and obligations of the parties under the settlement.
> Recoveries from Bre-X/Bresea insiders Francisco, Lyons, Thorpe, Coates, and Kavanagh will no longer be pooled among this action, the Ontario action, and the Bre-X trustee.
> Recoveries from Felderhof, the Walshes, and McAnulty will be pooled among this action, the Ontario action, and the Bre-X trustee only if Bre-X Trustee obtains and order declaring Bre-X share purchasers to be creditors of Bre-X. [1]

---

[1] **Terms of the ORIGINAL SETTLEMENT AGREEMENT** were as follows:

> 1. Bresea agreed to pay $ 9 Million CDN to Deloitte, in its capacity as Trustee of the Estate of Bre-X Minerals, Ltd., that after the payment of certain expenses, including attorneys' fees, would be available for distribution to Bre-X shareholders in the U.S. and Canada.

[7]** The 2002 Settlement Agreement has been approved by Lead Plaintiffs and the Proposed Class Representatives from this action. The 2002 Settlement's completion is conditional on the approval of the Settlement Agreement by the three Courts with jurisdiction over the claims of Bre-X and Bresea share purchasers: this Court, the Alberta Court, and the Ontario Court. The Alberta Court approved the 2002 Settlement on June 25, 2002, and the Ontario Court approved the settlement on June 20, 2002.

IV. STANDARD FOR REVIEWING A PROPOSED SETTLEMENT

Federal Rule of Civil Proceure23(e) provides that, ***HN1***[] "A class action shall not be dismissed or compromised without the approval of the court, and notice shall be given to all members of the class in such a manner as the court directs." ***HN2***[] Approval of a class action settlement involves a two-step process. First, the Court makes a preliminary fairness evaluation of the proposed terms of settlement submitted by counsel. Second, if the Court determines that the settlement is fair, the Court directs that notice pursuant to *Rule 23(e)* be given to the class members of a formal fairness hearing, at which arguments and evidence may be presented in support of **[**8]** and in opposition to the settlement.

A. Settlement Class

HN3[] Approval of a settlement in a class action necessarily requires the Court to determine **[*427]** if the proposed class is a proper class for settlement purposes. The law regarding approval of a settlement in a class action where the class has not yet been certified has undergone significant examination in the past five years. In 1997, the United States Supreme Court clearly held that ***HN4***[] with the exception of the manageability requirement, a settlement class must meet the requirements of *Federal Rule of Civil Procedure 23* just as if the case were to be litigated. "Confronted with a request for settlement-only class certification, a district court need not inquire whether the case, if tried, would present intractable management problems, see *Fed. Rule Civ. Proc. 23(b)(3)(D)*, for the proposal is that there be no trial. But other specifications of the Rule - those designed to protect absentees by blocking unwarranted or over broad class definitions - demand undiluted, even heightened, attention in the settlement context." *Amchem v. Windsor, 521 U.S. 591, 620, 138 L. Ed. 2d 689, 117 S. Ct. 2231 (1997)*. What was not articulated **[**9]** by the *Amchem* Court was at what point in the approval process courts are required to make an in depth analysis of the *Rule 23* requirements.

In 1999, the Supreme Court once again addressed the *Rule 23* requirements in a settlement class, this time in the context of a mandatory class. The Court held that the moment of certification required heightened attention because certification of a settlement class, "however provisional technically, effectively concludes the proceedings save for the final fairness hearing. And ... a fairness hearing under *Rule 23(e)* is no substitute for rigorous adherence to those provisions of the Rule 'designed to protect absentees'" *Ortiz v. Fibreboard Corp., 527 U.S. 815, 849, 144 L. Ed. 2d 715, 119 S. Ct. 2295 (1999)* quoting *Amchem, 521 U.S. at 620*. The language of *Ortiz* suggests that a court must make a detailed *Rule 23* analysis and a final certification decision before the fairness hearing; however, *Ortiz* is distinguishable from the case at bar because in *Ortiz,* the court was considering certification of a mandatory class, and the court's only opportunity to address the propriety of the class was at **[**10]** the preliminary approval stage.

The present case, however, contains significant differences which make in-depth consideration of settlement class certification at the preliminary approval stage burdensome and unworkable. This is a complex securities litigation case that has been pending before this Court for over five years and consists of over eight-hundred docket entries. Plaintiffs have sought certification of several non-settling classes, and two of those classes taken together form the

---

2. Bresea would create a pool consisting of shares equal to ten percent of the common equity of reorganized Bresea for the benefit of Bresea shareholders in the U.S. and Canada.

3. Bresea would pool any recoveries obtained from certain insider defendants in this action, the Ontario Class Actions, and the Trustee's Actions, and Deloitte would distribute those recoveries to Bre-X shareholders.

proposed settlement class. First, Plaintiffs seek certification of a "NASDAQ Class" that would include, "all persons who purchased or otherwise acquired shares of the common stock of Bre-X Minerals Ltd. on the NASDAQ exchange from August 19, 1996 up to March 26, 1997." The Court has received extensive briefing on and has conducted an evidentiary hearing regarding certification of the NASDAQ class. The Court has taken the issue under advisement, and the Court will issue an order regarding the propriety of certifying a NASDAQ Class before the Court makes a final determination of the settlement class following the fairness hearing.

Second, Plaintiffs have requested that the Court certify a class **[**11]** of U.S. citizens who purchased Bre-X and Bresea stock on Canadian exchanges from January 17, 1994 until March 26, 1997 (the Canadian Exchange Class). The Court intends to schedule a hearing on the Canadian Exchange Class for the same day it schedules a fairness hearing on the settlement class. The complex nature of the settlement class and the numerous issues raised by the briefing on the Canadian Class lead the Court to believe that a more accurate examination of the settlement class can be made after benefit of full-briefing and a hearing of the issues relevant to the Canadian Exchange Class. After benefit of that hearing, after consideration of the NASDAQ class, and after the fairness hearing, the Court will be in a better position to make a final determination on settlement-class certification. [2]

[12] [*428]** Noting that the Court will have ample opportunity to examine in detail the qualifications of the potential class in its examination of the NASDAQ class materials and the Canadian Exchange class materials, and furthernoting that the Court will take under consideration all objections to the settlement class certification at the fairness hearing, the Court will proceed to make a preliminary, conditional examination of the proposed settlement class's certification capability. Plaintiffs and Bresea request preliminary, conditional class certification for the limited purpose of settlement, and the Court will review the class qualifications with the caveat that detailed orders on certification of the NASDAQ Class and the Canadian Exchange Class will follow this ruling and may impact the validity of the settlement class. As previously stated, because the Court must necessarily conduct a hearing on the Canadian Exchange Class certification issue, final approval or disapproval of the 2002 Settlement will be delayed. The following review serves to demonstrate to the Court that no glaring deficiencies exist that would make final certification untenable. [3]

[**13] B. Standard

HN5[] A district court may certify a class only if the plaintiff meets his burden to show that proposed class and the proposed class representatives meet the four prerequisites in *Rule 23(a)* and one of three additional requirements in *Rule 23(b)*. *See* *FED. R. CIV. P. 23*; *see also* *Mullen v. Treasure Chest Casino, LLC, 186 F.3d 620, 623 (5th Cir. 1999)*; *Castano v. American Tobacco Co., 84 F.3d 734, 740 (5th Cir. 1996)*. ***HN6***[] A district court has "great discretion" in determining whether to certify a class, but the district court must make a reasoned and thorough analysis under *Rule 23*. *Mullen, 186 F.3d at 624*.

---

[2] Though not specifically deciding the point at which the certification determination is made, it is clear that other courts have taken a similar approach to certification. See *Shaw v. Toshiba Am. Info. Sys., 91 F. Supp. 2d 942 (E.D. Tex., 2000)* (court engaged in extensive *Rule 23* analysis *after* preliminary certification and fairness hearing.) See also *In re Engineering Animation Securities Litigation, 203 F.R.D. 417 (S.D. Iowa, 2001)* (court in shareholder class action addressed in detail the requirements of *Rule 23* in an order issued *after* the fairness hearing was held.) Additionally, the purpose of the preliminary approval is to detect any *obvious* defects that will preclude final approval of the settlement, and the purpose of initial certification is so that *notice* may be sent to the proposed class. See *Manual for Complex Litigation, Third,* pg. 236-237.

[3] The Court undertook a similar analysis in its January 2002 order as the Court determined that the over-broad nature of the proposed settlement class was fatal to any possibility that a settlement class could be finally approved. The Court was required to consider the appropriateness of the pre-complaint class members and the post- Freeport MacMoran announcement members at the preliminary approval stage because, as was the case in *Ortiz,* the Court had no other opportunity to address those specific issues.

HN7[] The four *Rule 23(a)* prerequisites include: (1) numerosity; (2) commonality; (3) typicality; and (4) adequacy of representation. *Amchem Products, Inc. v. Windsor, 521 U.S. 591, 613, 138 L. Ed. 2d 689, 117 S. Ct. 2231 (1997)*. All four must be satisfied in order for the Court to certify the class. Once the plaintiff satisfies these prerequisites, he must then satisfy the requirements of one of the three subdivisions of *Rule 23(b)*. *See* Amchem, *521 U.S. at 614*. The requirements of these **[**14]** subdivisions include: (1) inconsistent adjudications would result in incompatible standards of conduct or any adjudication would bear heavily on the interests of non-parties; (2) the party opposing the class has acted or refused to act on grounds generally applicable to the class; and (3) issues of law and fact predominate issues unique to individual class members, and maintaining the class action is the superior procedural vehicle. *FED. R. CIV. P. 23(b)(1)*-(3).

2. Analysis

Rule 23(a)

Plaintiffs and Bresea state that there is no issue of *numerosity,* that *common questions of law and fact predominate* because all plaintiffs allege that they purchased Bresea and Bre-X shares at artificially inflated prices, that there is *typicality* because all plaintiffs stand in the same position as other class members with respect to Bresea because they all purchased inflated stock caused by the Bre-X fraud, and that there is *adequacy of representation* because there is no conflict between named plaintiffs and the class members - they all seek maximum recovery - and because counsel is skilled and experienced. As a preliminary matter, the **[*429]** Court agrees that the requirements of *Rule **[**15]** 23(a)* are met.

Rule 23(b)(3)

Plaintiffs and Bresea seek to certify the class as a*23(b)(3)* class where common questions predominate over individual questions and a class action is superior to individual adjudication of claims. ***HN8***[] The *predominance* requirement, "is readily met in certain cases alleging consumer or securities fraud or violations of ***antitrust law***." *Amchem, 521 U.S. at 625*. The Court denied the earlier motion for settlement certification because common questions of law and fact did not predominate among the proposed class members. Plaintiffs and Bresea contend that concerns raised by the Court in that denial have been corrected by narrowing the settlement-class definition in accordance with the Court's order. The Court finds in its preliminary examination of the settlement class that Plaintiffs and Bresea have corrected the over-broad nature of the first settlement class. Next, Plaintiffs argue that the class is a *superior* method for resolving claims because the alternative is thousands of virtually identical individual claims. The Court finds that a class action is the superior method for resolving the dispute at issue because joinder of individual **[**16]** parties would be impossible. Finally, ***HN9***[] the court need not consider manageability of the class since the proposed class is a limited purpose, settlement only class. *See* *Amchem, 521 U.S. at 620*.

HN10[] *Federal Rule of Civil Procedure 23(c)(2)* provides that in a "class action maintained under subdivision *(b)(3)*, the court shall direct to the members of the class the best notice practicable under the circumstances …. The notice shall advise each member that (A) the court will exclude the member from the class if the member so requests by a specified date …" This request for exclusion is popularly known as "opting out" of the class.

Defendants argue that the "opt-out" provided for in the settlement notice is really no "opt-out" at all but is simply a way of re-directing those plaintiffs who do not wish to take part in the settlement before this Court to another remedy that does not include litigation, thus creating a class where opt-out is not a real choice. Defendants argue that this effectively creates a mandatory class, and mandatory classes are disfavored for settlement classes. While still recognizing that non-settling defendants have no standing to oppose the settlement, **[**17]** the Court will address the opt-out concerns raised by Defendants as those concerns might suggest a legitimate problem with the settlement class.

Defendants contend that the Settlement allows no opt-out because in the Plaintiffs' and Bresea's motion to approve settlement the parties state, "[a] true 'opt-out' by a Bresea settlement class member would be futile since there is no alternative basis for that class member to assert a claim against Bresea, due to the fact that all claims will be settled by the Arrangement upon its becoming effective." (Mot. at 15). Plaintiffs and Bresea go on to state that the Arrangement's becoming effective is conditioned on this Court's approval of the 2002 Settlement. Apparently, the Arrangement's enactment is, at least in part, conditioned on this Court's approval of the settlement agreement. The fact that the Arrangement may be in force in the future, or the fact that another court may consider this Court's approval of the 2002 settlement in deciding to enact or honor the Arrangement does not require this Court to view the settlement as one that does not allow class members to opt out. So long as the settlement agreement itself does not limit or **[**18]** expand the rights of parties who choose to opt out of the class, the right to opt out is not threatened. Although remaining in the settlement class may be a more desirable option, that is not a question for this Court to explore, and it is not for this Court to decide the wisdom of opting out. "If certain plaintiffs wish to opt-out and take their chances at suing a foreign corporation, due process would seem to require that they be allowed to do so absent strong considerations to the contrary not present here." *Jefferson v. Ingersoll Int'l Inc., 195 F.3d 894, 897 (7th Cir. 1999)*. The decision to opt-out is left to the individual with a possible claim against Bresea.

As far as the precise, binding language of the settlement agreement itself, Paragraph six of the 2002 Settlement states that, "a pool consisting of shares equal to ten percent of **[*430]** the common equity of Bresea (the "Pool") will be established for the benefit of members of the U.S. Class who purchased Bresea common stock and suffered a loss … and also for … any person who opts out of this Action." At the hearing on the settlement class, Plaintiffs' counsel explained that this pool is a part of the Arrangement **[**19]** that will be used to compensate persons not covered by the class settlement. The implication of the language of the settlement agreement is that Bresea is setting aside a pool of ten percent of its common equity that may be used to compensate individuals who opt out of the settlement class. The settlement agreement in no way guarantees those who opt out a portion of the pool, and the settlement agreement in no way attempts to limit those who choose to opt out to recovering only the stock in the pool. Any windfall given to or limitation placed on those who opt out is the result of the Arrangement, *not the settlement agreement.* Basically, the information regarding the pool is articulated in the settlement agreement in order to inform those who remain in the class of the contingent nature of one aspect of the settlement. In accordance with the settlement agreement, settlement class members, in addition to the other concrete benefits of the settlement agreement, are entitled to recover portions of the pool not consumed by litigation with those who have opted out. The Court finds that this portion of the settlement agreement does not hinder the opt-out requirement of the *Rule 23(b)(3)* **[**20]** class as it does not enhance or restrict the rights of those who wish to opt-out of the settlement class.

Having reached the above conclusions, the Court finds that as a threshold matter, the proposed settlement class preliminarily meets the requirements of *Rule 23*. The Court will address in detail the propriety of settlement class certification after it issues orders on the NASDAQ Class and the Canadian Class and has a final opportunity to review the *Rule 23* qualifications of the proposed settlement class after the fairness hearing. At the present time, in order to move this case along and in order to allow the parties to more fully inform the Court on the issues regarding the Canadian Class, the Court finds as a threshold matter that the proposed settlement class is sufficiently adequate under *Rule 23* so that preliminary approval may be granted and the proposed class may be sent notice of the fairness hearing. As stated before, the Court reserves the right to deny certification after it has more fully examined the complex and novel issues in this case.

B. Fairness Determination - Preliminary Approval of the Settlement

1. Rule

Having determined that for purposes of issuance **[**21]** of notice the settlement class is preliminarily certifiable, the Court next determines whether the settlement meets preliminary fairness requirements.

> HN11[] If the preliminary evaluation of the proposed settlement does not disclose grounds to doubt its fairness or other obvious deficiencies, such as unduly preferential treatment of a class representative or of segments of the class, or of excessive compensation for attorneys, and appears to fall withing the rage of possible approval, the court should direct that notice under Rule 23(e) be given to the class members of a formal fairness hearing, at which arguments and evidence may be presented in support of and in opposition to the settlement.

Manual for Complex Litigation, Third, at 237.

2. Analysis

Plaintiffs Bresea assert that the 2002 Settlement is the result of arm's length negotiations between plaintiffs' co-lead counsel, counsel for Bresea, and the Bre-X Trustee. As support for this assertion, Plaintiffs and Bresea submitted the Second Affidavit of Autry R. Ross, co-lead counsel for Plaintiffs. Additionally Plaintiffs and Bresea assert that counsel for all sides are experienced and familiar with the factual **[**22]** and legal issues presented by the litigations and the settlement. The Court is in agreement that the settlement reached was one resulting from strenuous long-term negotiations between Plaintiffs and Bresea. As is articulated above, this case has been on file for over five years, and each party has pursued its case with vigor and determination. Counsel on all sides have proved to the Court their knowledge **[*431]** of the facts and law relevant to this case. Settlement was reached by knowledgeable counsel, and it was arrived at after much negotiation as is evidenced by the time it took the parties to reach an agreement.

Plaintiffs contend that the economic terms of the settlement are fair because the settlement brings Plaintiffs value from a source (Bresea) that has limited ability to pay anything at all. Plaintiffs cite the differences between the original settlement and the 2002 Settlement in support of their fairness claims. The $ 4.48 million of actual settlement dollars will be distributed directly to shareholders, unlike in the original settlement where the settlement money would have been distributed to the Bre-X trustee who could have used that money at his discretion before any money **[**23]** went to the class member. Plaintiffs estimate that class members will receive approximately 4 cents per share. Considering Bresea's strained financial conditions, the Court finds that this settlement amount is fair and that although it is possible that a larger verdict might be awarded at trial, Plaintiffs run a substantial risk of being unable to collect a verdict.

Additionally, Plaintiffs' attorneys have reduced fees and expenses from $ 480,000 in the original proposed settlement to $ 373,333 in the 2002 settlement. Class counsel in the Ontario Class Action will receive $ 746,666 under the 2002 settlement (down from $ 960,00 in the original settlement), and Ontario Bresea action attorneys will receive $ 128,000. HN12[] The PSLRA expressly provides that the, "total attorneys' fees and expenses awarded by the court to counsel for the plaintiff class shall not exceed a reasonable percentage of the amount of any damages and prejudgment interest actually paid to the class." *15 U.S.C. § 78u-4(a)(6)*. Courts assess the reasonableness of attorneys' fees to protect class members from unfair settlements, to minimize conflicts of interest between class members and their representatives, **[**24]** and to prevent perpetuating a public perception that attorneys exploit class members for hefty fees. *See Strong v. Bellsouth Telecomm. Inc., 137 F.3d 844, 849-50 (5th Cir. 1998)*. The Court must make an independent review of the reasonableness of fees sought in a class settlement. *Id.* The Court finds that the attorneys' fees assessed in the current settlement (totaling roughly 25% of the settlement amount) do not exceed a reasonable proportion of the total settlement.

Next, Defendants attempt to establish several conflicts of interest and first take issue with the fact that one Plaintiffs' attorney was appointed as a trustee of Bre-X. Defendants claim that this trustee position created a conflict of interest for Plaintiffs' attorney; however, the attorney's appointment as a trustee was in the capacity of representative of U.S. share purchaser claimants. Such an appointment is for the benefit of potential claim holders, not for the betterment of Bre-X. Furthermore, the trustee "never consulted with the inspectors" regarding settlement. (Robinson Aff. at P 3). Second, Defendants allege that different recovery for Bre-X and Bresea stockholders creates conflict; however, **[**25]** the Court finds no harm in allowing different recovery for persons who held different stock so long as the settlement is fair. At the formal fairness hearing, any class member who desires may object to the settlement. Third, Defendants claim that because the class representatives for settlement purposes are the same as the proposed NASDAQ class representatives, their duties to the settlement class and the NASDAQ class conflict. The Court does not agree that a conflict exists as the class representatives have incentive to make the maximum recovery, and in deciding if a settlement was fair would have to take into account the effect that the Bresea settlement would have on the NASDAQ litigation. Additionally, any challenge to the fairness that resulted from the class representatives actions can be addressed by class members at the fairness hearing.

Having reached the above conclusions, the Court finds that the settlement class meets the requirements for preliminary approval and that notice should therefore be issued to potential class members.

C. Notice to Class Members

1. Rule

Having found that issuance of notice is appropriate, the Court must now examine the actual notice. **[**26]** ***HN13***[] Purported members of a class must receive, "the best notice practicable under the circumstances." *Fed. Rule Civ. Proc. 23(c)(2)*. **[*432]** The notice must, "contain an adequate description of the proceedings written in objective, neutral terms that, insofar as possible, may be understood by the average absentee class member." *In re Nissan Motor Corp. Antitrust Litig., 552 F.2d 1088, 1103 (5th Cir. 1977)*. The notice must "contain information that a reasonable person would consider to be material in making an informed, intelligent decision of whether to opt out or remain a member of the class and be bound by the final judgment." *Id. at 1105*. Under the PSLRA, notice must conform to certain additional articulated standards. The notice must include a statement of Plaintiff recovery, "determined in an aggregate and on an average per share basis." *15 U.S.C. § 78u-4(a)(7)(A)*. The notice must provide a statement of potential outcome of the case. *15 U.S.C. § 78u-4(a)(7)(B)*. The notice must supply a statement of attorneys' fees or costs sought. *15 U.S.C. § 78u-4(a)(7)(C)*.

2. Analysis

Plaintiffs **[**27]** and Bresea claim they have submitted to the Court the best notice practicable. The Plaintiffs also state that the notice will inform class members whose claims arose after March 26, 1997 of the Court's order regarding them. The notice provided to the Court appears to meet the requirements of the PSLRA. Defendants presented no arguments opposing the notice in their responsive briefing, but at the settlement hearing, Defendants claimed that the notice was deficient on several grounds: the notice states that a 4 cent per share recovery is inaccurate; the cover page is actually two pages instead of one; the notice fails to disclose conflicts of U.S. Counsel; and the notice doesn't state what the United States class members will receive from the settlement.

Considering these objects in light of the notice submitted, the Court finds that the objections are without merit as the notice provided by Plaintiffs and Bresea is the best notice possible under the circumstances of the case. As stated earlier, this case is an incredibly complex securities fraud case with hundreds of class plaintiffs, many defendants, and even more attorneys. The briefing in the case has been monstrous, and the issues **[**28]** are hotly contested. Plaintiffs and Bresea have condensed the case to its essence and have memorialized that in the settlement notice. The fact that the cover sheet is actually two sheets is not remarkable. The Court found above that attorney conflict is not an issue in this settlement, and the other complaints by Defendants request that Plaintiffs and Bresea include items not required by the PSLRA or the Federal Rules. Defendants only seek to make an already complex notice more cumbersome. Having thoroughly reviewed the proposed notice, the Court finds that it is adequate and will provide potential class members with the information necessary to make an informed decision on whether to opt out of the class.

V. CONCLUSION

Having concluded that the settlement class meets the *Rule 23* requirements as a preliminary matter, having concluded that the settlement meets the preliminary fairness requirements, and having concluded that the notice is the best practicable under the circumstances, the Court hereby

ORDERS that Plaintiffs' and Bresea's Motion for Preliminary Approval of Settlement is **GRANTED.** The Court will issue a schedule regarding settlement notice and a fairness **[**29]** hearing by separate order.

Signed this 3rd day of July, 2002.

DAVID FOLSOM

UNITED STATES DISTRICT JUDGE

Tassy v. Brunswick Hosp. Ctr.

United States Court of Appeals for the Second Circuit

February 12, 2002, Argued ; July 8, 2002, Decided

Docket No. 01-7675

Reporter
2002 U.S. App. LEXIS 22600 *

EUGENIO TASSY, Doctor, Plaintiff-Counter-Defendant-Appellant, -v.- BRUNSWICK HOSPITAL CENTER, INC., MORTON GOLDFARB, Medical Director, Defendants-Counter-Claimants-Appellees.

Subsequent History: **[*1]** As Amended July 12, 2002.

Prior History: Plaintiff Dr. Eugenio Tassy appeals from a judgment of the United States District Court for the Eastern District of New York (Denis R. Hurley, Judge), dismissing his complaint pursuant to the doctrine of primary jurisdiction.

Original Opinion Previously Reported at: *296 F.3d 65, 296 F.3d 65, 2002 U.S. App. LEXIS 13850*.

Disposition: Vacated and remanded.

HN2[] **Motions to Dismiss, Failure to State Claim**

On a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss, a court must construe the complaint in the light most favorable to the plaintiff, accepting all the allegations in the complaint as true.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

HN3[] **Reviewability, Jurisdiction & Venue**

Primary jurisdiction is a judge-made doctrine.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Antitrust & Trade Law > Procedural Matters > Jurisdiction > Primary Jurisdiction

Administrative Law > Separation of Powers > Primary Jurisdiction

HN4[] **Reviewability, Jurisdiction & Venue**

The United States Supreme Court has defined the primary jurisdiction doctrine as: a principle, now firmly established, that in cases raising issues of fact not within the conventional expertise of judges or cases requiring the exercise of administrative discretion, agencies created by Congress for regulating the subject matter should not be passed over. This is so even though the facts after they have been appraised by specialized competence serve as a premise for legal consequences to be judicially defined. Uniformity and consistency in the regulation of business entrusted to a particular agency are secured, and the limited functions of review by the judiciary are more rationally exercised, by preliminary resort for ascertaining and interpreting the circumstances underlying legal issues to agencies that are better equipped than courts by specialization, by insight gained through experience, and by more flexible procedure.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Primary Jurisdiction

HN5[] **Reviewability, Jurisdiction & Venue**

With regard to the primary jurisdiction doctrine, it is recognized that the courts, while retaining the final authority to expound the statute, should avail themselves of the aid implicit in the agency's superiority in gathering the relevant facts and in marshaling them into a meaningful pattern.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

HN6[] **Reviewability, Jurisdiction & Venue**

Since the inception of the primary jurisdiction doctrine, courts have resisted creating any fixed rules or formulas for its application. Rather, in every case the question is whether the reasons for the existence of the doctrine are present and whether the purposes it serves will be aided by its application in the particular litigation.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Primary Jurisdiction

HN7[] **Reviewability, Jurisdiction & Venue**

As the origin and evolution of the primary jurisdiction doctrine demonstrate, the reasons for its existence and the purposes it serves are twofold: the desire for uniformity and the reliance on administrative expertise.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Antitrust & Trade Law > Procedural Matters > Jurisdiction > Primary Jurisdiction

HN8[] **Reviewability, Jurisdiction & Venue**

With regard to the primary jurisdiction doctrine, the concern for consistency and uniformity is more prevalent in cases involving issues of broad applicability such as the reasonableness of rates or tariffs.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Primary Jurisdiction

HN9[] **Reviewability, Jurisdiction & Venue**

If a case presents a unique and narrow factual dispute that poses no risk of inconsistent interpretations of any broadly applicable rule or policy, the desire for uniformity does not support the application of the primary jurisdiction doctrine.

Healthcare Law > Business Administration & Organization > Facility & Personnel Licensing > General Overview

Labor & Employment Law > ... > Sexual Harassment > Employment Practices > Discharges & Failures to Hire

HN10[] **Business Administration & Organization, Facility & Personnel Licensing**

In New York, the New York Public Health Council (PHC) is a 15-member body within the New York State Department of Health, *N.Y. Pub. Health Law § 220* (McKinney 2001), whose duty is to consider any matter relating to the preservation and improvement of public health. *N.Y. Pub. Health Law § 225(1)* (McKinney 2001). A primary function of the PHC is to determine whether there is a medical justification for the withdrawal of a doctor's privileges.

Healthcare Law > Business Administration & Organization > Hospital Privileges > General Overview

Torts > ... > Standards of Care > Special Care > Highly Skilled Professionals

HN11[] **Business Administration & Organization, Hospital Privileges**

In New York, *N.Y. Pub. Health Law § 2801-b(1)* states that a hospital may suspend a physician's privileges only because of standards of patient care, patient welfare, the objectives of the institution or the character or competency of the applicant, and *§ 2801-b(2)*, which states that any person claiming to be aggrieved by a violation of § 2801 b(1) may file a complaint with the New York Public Health Council.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Primary Jurisdiction

HN12[] **Reviewability, Jurisdiction & Venue**

Primary jurisdiction applies where an agency's expertise may prove helpful to the court in resolving difficult factual issues.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

HN13[] **Reviewability, Jurisdiction & Venue**

The primary jurisdiction is a discretionary doctrine whose applicability in any given case depends on whether the reasons for the existence of the doctrine are present and whether the purposes it serves will be aided by its application in the particular litigation. The doctrine cannot be applied mechanically.

Administrative Law > Judicial Review > Reviewability > Exhaustion of Remedies

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Primary Jurisdiction

HN14[] **Reviewability, Exhaustion of Remedies**

"Exhaustion" applies where a claim is cognizable in the first instance by an administrative agency alone; judicial interference is withheld until the administrative process has run its course. "Primary jurisdiction," on the other hand, applies where a claim is originally cognizable in the courts, and comes into play whenever enforcement of the claim requires the resolution of issues which, under a regulatory scheme, have been placed within the special competence of an administrative body; in such a case the judicial process is suspended pending referral of such issues to the administrative body for its views.

Administrative Law > Agency Adjudication > Alternative Dispute Resolution

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Primary Jurisdiction

HN15[] **Agency Adjudication, Alternative Dispute Resolution**

The United States Court of Appeals for the Second Circuit holds that where a party prefers not to litigate before an administrative agency in the first instance, he cannot be forced to do so pursuant to the primary jurisdiction doctrine unless the purposes behind the existence of the doctrine are present.

Administrative Law > Separation of Powers > Jurisdiction

Governments > Native Americans > Authority & Jurisdiction

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Primary Jurisdiction

HN16[] **Separation of Powers, Jurisdiction**

In the primary jurisdiction context, whether an agency is statutorily authorized to resolve a particular issue is not itself determinative of whether to apply the doctrine. Rather, the pertinent questions are whether referral to the agency is necessary to promote uniformity and whether the agency's expertise would assist the court in resolving difficult factual issues. Rather than simply asking whether an administrative agency is statutorily authorized to hear a particular dispute, the primary jurisdiction doctrine asks whether an agency's review of the facts "will be a material aid" to the court ultimately charged with applying those facts to the law.

Opinion by: B.D. PARKER, JR.

Opinion

Plaintiff Dr. Eugenio Tassy, a psychiatrist, brought this action for damages and for reinstatement of his medical privileges at defendant Brunswick Hospital Center, Inc. ("Brunswick"). According to Tassy's complaint, Brunswick revoked his privileges following allegations of sexual harassment. Tassy, a black Haitian-American, denies the sexual harassment allegations and **[*2]** asserts that Brunswick discriminated against him on the basis of his race and national origin. Defendants moved to dismiss the complaint pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, arguing that the doctrine of primary jurisdiction requires Tassy to pursue his claims with the New York Public Health Council (the "PHC") before suing in federal court. The District Court (Denis R. Hurley, *Judge)* granted the motion, dismissing Tassy's complaint without prejudice to refiling after review by the PHC (Hearing Transcript, May 4, 2001 ("Tr."), at 12), and Tassy appealed. Because we find the primary jurisdiction doctrine inapplicable, we vacate and remand.

BACKGROUND

According to the allegations of the complaint, which we accept as true for purposes of this appeal, Tassy received privileges to practice medicine at Brunswick in 1994. In April 1998, Jovita Crasta, a psychiatrist at Brunswick, alleged that Tassy had sexually harassed her. In July 1998, a Brunswick employee alleged that Tassy had verbally abused her. In October 1998, another Brunswick doctor complained of improper behavior on the part of Tassy. [1] As a result of these allegations, Brunswick suspended Tassy's **[*3]** privileges. In November 1998, Brunswick reinstated Tassy's privileges in exchange for his agreement to submit to and pay for a psychiatric evaluation by the Medical Society of the State of New York's Committee for Physicians' Health. In March 1999, Crasta again accused Tassy of inappropriate behavior. Shortly after Crasta's second allegation, Brunswick suspended Tassy's privileges a second time. Tassy then requested a hearing. The parties scheduled and adjourned the hearing several times, but the hearing was never convened. In March 2000, Tassy requested that his privileges be reinstated. Brunswick

[1] The complaint does not specify the nature of this allegation.

never responded to this request, and Tassy remains suspended from practicing medicine at Brunswick. Tassy alleges that Brunswick and its medical director, defendant Dr. Morton Goldfarb, discriminated against him on account of his race and his national origin. In particular, Tassy alleges that Brunswick and Goldfarb have taken less draconian measures against white doctors accused of more serious misconduct.

[*4] Tassy filed his complaint in the Eastern District of New York on June 15, 2000, asserting claims for discrimination on the basis of race and national origin under *42 U.S.C. § 1981* and common law breach of contract. He seeks damages, reinstatement of his privileges, and other equitable remedies. Goldfarb answered and counterclaimed for breach of contract, alleging that Tassy had not paid the rent due on his office space. Tassy denied the allegations of the counterclaim. Brunswick then moved to dismiss under *Federal Rule of Civil Procedure 12(b)(6)* on the ground that Tassy was required to file a claim with the PHC before suing in federal court. The District Court, relying on the doctrine of primary jurisdiction and our decision in *Johnson v. Nyack Hospital, 964 F.2d 116 (2d Cir. 1992)*, dismissed the complaint without prejudice to its reinstatement after review by the PHG. (Tr. at 9, 12.) Tassy appealed.

DISCUSSION

HN1[] We review de novo a district court's dismissal pursuant to *Rule 12(b)(6)*. *Bernheim v. Litt, 79 F.3d 318, 321 (2d Cir. 1996)*. ***HN2***[] On a *Rule 12(b)(6)* motion to dismiss, we must construe the complaint in **[*5]** the light most favorable to the plaintiff, accepting all the allegations in the complaint as true. *Chambers v. Time Warner. Inc., 282 F.3d 147, 152 (2d Cir. 2002)*; *Connolly v. McCall, 254 F.3d 36, 40 (2d Cir. 2001)*.

The sole issue on appeal is whether the doctrine of primary jurisdiction requires Tassy to file a complaint with the PHC before suing in federal court. To determine whether the doctrine applies, we first examine its origin and evolution.

HN3[] Primary jurisdiction is a judge-made doctrine, created by Justice Edward White's opinion for a unanimous Supreme Court in *Texas & Pacific Railway Co. v. Abilene Cotton Oil Co., 204 U.S. 426, 51 L. Ed. 553, 27 S. Ct. 350 (1907)* See *United States v. Radio Corp. of Am., 358 U.S. 334, 346, 3 L. Ed. 2d 354, 79 S. Ct. 457 (1959)*; Louis L. Jaffe, Primary Jurisdiction, 77 Harv. L. Rev. 1037, 1042 (1964). In Abilene, the plaintiff oil company sued the defendant railroad in state court, alleging that it had charged unreasonable and discriminatory rates for interstate shipments of cotton seed. *204 U.S. at 430*. The Supreme Court held that the plaintiff was required to pursue its **[*6]** claims with the Interstate Commerce Commission (the "ICC") in the first instance *id at 448*, and the doctrine of primary jurisdiction was born. The Supreme Court's decision in Abilene was motivated by the uniformity that would obtain if the ICC were permitted to resolve questions about the reasonableness of the rates that it had the responsibility to set and enforce:

> For if, without previous action by the [ICC], power might be exerted by courts and juries generally to determine the reasonableness of an established rate, it would follow that unless all courts reached an identical conclusion a uniform standard of rates in the future would be impossible, as the standard would fluctuate and vary, dependent upon the divergent conclusions reached as to reasonableness by the various courts called upon to consider the subject as an original question.

Id. at 440. Following Abilene, early primary jurisdiction cases involved technical questions relating to regulated industries such as railroads, water and air transportation, electricity, and communications. See Robert B. von Mehren, The Antitrust Laws and Regulated Industries: The **[*7]** Doctrine of Primary Jurisdiction, 67 Harv. L. Rev. 929, 935-36 (1954).

Justice Brandeis identified a second rationale for the doctrine in *Great Northern Railway Co. v. Merchants Elevator Co., 259 U.S. 285, 66 L. Ed. 943, 42 S. Ct. 477 (1922)*, which involved a dispute over the tariff charged on interstate corn shipments. For the first time the Supreme Court cited administrative expertise, as well as uniformity, as a potential basis for invoking the doctrine:

> [Resort to the ICC] is required because the enquiry is essentially one of fact and of discretion in technical matters; and uniformity can be secured only if its determination is left to the [ICC]. Moreover, that determination

> is reached ordinarily upon voluminous and conflicting evidence, for the adequate appreciation of which acquaintance with many intricate facts of transportation is indispensable, and such acquaintance is commonly to be found only in a body of experts.

Id. at 291. Although the Court declined to apply the primary jurisdiction doctrine in Great Northern Railway, the case signaled a shift in the predominant rationale that would support the **[*8]** doctrine's application in future cases. Several decades later the Supreme Court stated that, while "earlier cases" relied on "the desirable uniformity which would obtain if initially a specialized agency passed on certain types of administrative questions,... more recently the expert and specialized knowledge of the agencies involved has been particularly stressed." United States v. W. Pac. R.R. Co., 352 U.S. 59, 64, 1 L. Ed. 2d 126, 77 S. Ct. 161, 135 Ct. Cl. 997 (1956) (citations omitted).

While the doctrine has often been applied in cases involving difficult legal questions that must ultimately be resolved by the courts, the presence of such legal issues has not prevented the Supreme Court from concluding that primary jurisdiction lay in an administrative agency. In these cases, the Court has highlighted the separate roles of court and agency, as well as the importance of the primary jurisdiction doctrine in maintaining a proper balance between the two. In Far East Conference v. United States, 342 U.S. 570, 96 L. Ed. 576, 72 S. Ct. 492 (1952), for example, the Court held that primary jurisdiction lay in the United States Shipping Board, rather than in the federal courts, despite the questions **[*9]** of ***antitrust law*** involved in the case. The Far East Court ***HN4***[] defined the primary jurisdiction doctrine as:

> a principle, now firmly established, that in cases raising issues of fact not within the conventional expertise of judges or cases requiring the exercise of administrative discretion, agencies created by Congress for regulating the subject matter should not be passed over. This is so even though the facts after they have been appraised by specialized competence serve as a premise for legal consequences to be judicially defined. Uniformity and consistency in the regulation of business entrusted to a particular agency are secured, and the limited functions of review by the judiciary are more rationally exercised, by preliminary resort for ascertaining and interpreting the circumstances underlying legal issues to agencies that are better equipped than courts by specialization, by insight gained through experience, and by more flexible procedure.

Id. at 574-75. The Supreme Court later reiterated this principle in discussing the role of the Federal Maritime Board in another antitrust case: "***HN5***[] It is recognized that the courts, while retaining the final **[*10]** authority to expound the statute, should avail themselves of the aid implicit in the agency's superiority in gathering the relevant facts and in marshaling them into a meaningful pattern." Fed. Mar. Bd. v. Isbrandtsen Co., 356 U.S. 481, 498, 2 L. Ed. 2d 926, 78 S. Ct. 851 (1958).

HN6[] Since the inception of the doctrine, courts have resisted creating any fixed rules or formulas for its application. See W. Pac. R.R. Co., 352 U.S. at 64. Rather, "in every case the question is whether the reasons for the existence of the doctrine are present and whether the purposes it serves will be aided by its application in the particular litigation." Id. ***HN7***[] As the origin and evolution of the primary jurisdiction doctrine demonstrate, the reasons for its existence and the purposes it serves are twofold: the desire for uniformity and the reliance on administrative expertise. See id. Thus, in determining whether to apply the primary jurisdiction doctrine, we must examine whether doing so would serve either of these purposes. [2]

---

[2] The dissent argues that we should also consider a third purpose, judicial economy. Dissenting Opinion, infra, at [3]. However, the Supreme Court has consistently held that there are only two purposes to consider in determining whether to apply the primary jurisdiction doctrine - uniformity and expertise. See W. Pac. R.R. Co., 352 U.S. at 64. Despite ample opportunity during the ninety-five years since it created the doctrine, see supra at [4-7], the Supreme Court has never identified judicial economy as a relevant factor. No doubt the reason is that considerations of judicial economy cannot assist a primary jurisdiction analysis, as it will always be more economical, from a judge's point of view, to dismiss a case or quickly refer it to an administrative agency, instead of adjudicating it himself. We are enjoined to resist this temptation because of "the virtually unflagging obligation of the federal courts to exercise the jurisdiction given them." Cob. River Water Conservation Dist. v. United States, 424 U.S. 800, 817, 47 L. Ed. 2d 483, 96 S. Ct. 1236 (1976) (citations omitted).

[*11] With respect to the first purpose, Brunswick does not argue that applying the doctrine here would promote consistency and uniformity, and we do not see how it could. ***HN8***[] The concern for consistency and uniformity is more prevalent in cases involving issues of broad applicability such as the reasonableness of rates or tariffs. See *Nat'l Communications Ass'n. Inc. v. Am. Tel. & Tel. Co., 46 F.3d 220, 224-25 (2d Cir. 1995)*. *United States v. Radio Corp. of America, 358 U.S. 334, 3 L. Ed. 2d 354, 79 S. Ct. 457 (1959)*, for example, was an antitrust action arising out of an attempt by NBC, a subsidiary of Radio Corp. of America, to exchange the television station that it owned in Cleveland for one in Philadelphia. *Id. at 335-36*. In discussing the history of the primary jurisdiction doctrine, the Court noted that

> this Court consistently held that when rates and practices relating thereto were challenged under the antitrust laws, the agencies had primary jurisdiction to consider the reasonableness of such rates and practices in the light of the many relevant factors including alleged antitrust violations, for otherwise sporadic action by federal courts would disrupt **[*12]** an agency's delicate regulatory scheme, and would throw existing rate structures out of balance.

Id. at 348. Because application of the primary jurisdiction doctrine would not promote uniformity, the Court declined to apply it: "Thus, there being no pervasive regulatory scheme, and no rate structures to throw out of balance, sporadic action by federal courts can work no mischief. The justification for primary jurisdiction accordingly disappears." *Id. at 350*.

Like Radio Corp., this case involves neither a regulatory scheme nor a rate structure. Because this ***HN9***[] case "presents a unique and narrow factual dispute that poses no risk of inconsistent interpretations" of any broadly applicable rule or policy, *Am. Tel. & Tel., 46 F.3d at 225*, the desire for uniformity does not support the application of the primary jurisdiction doctrine.

The more significant question is whether deferring to the PHC would promote "the resolution of technical questions of facts through the agency's specialized expertise." *Golden Hill Paugussett Tribe of Indians v. Weicker, 39 F.3d 51, 59 (2d Cir. 1994)*. ***HN10***[] The PHC is a fifteen-member **[*13]** body within the New York State Department of Health, see *N.Y. Pub. Health Law § 220* (McKinney 2001), whose duty is to "consider any matter relating to the preservation and improvement of public health." *N.Y. Pub. Health Law § 225(1)* (McKinney 2001). "A primary function of the PHC is to determine whether there is a medical justification for the withdrawal of [a] doctor's privileges." *Johnson, 964 F.2d at 121*.

Tassy argues that there are no technical questions for the PHC to review, as Brunswick suspended his privileges because of his alleged sexual harassment, his race, and his national origin, all of which are non-medical issues that are unrelated to the PHC's expertise. In response, Brunswick relies on ***HN11***[] *New York Public Health Law section 2801-b(1)*, which states that a hospital may suspend a physician's privileges only because of "standards of patient care, patient welfare, the objectives of the institution or the character or competency of the applicant[,]" and *section 2801-b(2)*, which states that any person claiming to be aggrieved by a violation of section 2801 b(1) may file a complaint with the PHC. The gravamen of Brunswick's argument is that it suspended **[*14]** Tassy's privileges on the basis of his character and, because *section 2801-b(1)* lists character as a permissible basis for suspension and *section 2801-b(2)* authorizes the PHC to redress violations of *section 2801-b(1)*, the PHC has the expertise to determine whether Tassy's character rendered him unfit to practice medicine.

In support of its argument that we should apply the primary jurisdiction doctrine, Brunswick places substantial reliance on Johnson, in which we held that the doctrine required the plaintiff physician to pursue his claims arising out of the termination of his hospital privileges before the PHC. As a brief discussion of Johnson demonstrates, however, that case is distinguishable. The plaintiff in Johnson was a thoracic and vascular surgeon whose hospital privileges had been revoked after the hospital determined that "Johnson's surgical performance posed a peril to Nyack's patients." *Id. at 118*. A hospital investigation concluded that he had employed unsatisfactory surgical procedures and had insufficiently documented his work. Id. Placing particular emphasis on the relevant expertise of the PHC, we concluded:

> Primary jurisdiction **[*15]** demands that Johnson resort to the PHC before seeking redress in federal court. The question whether defendants had a proper medical reason to terminate Johnson's privileges requires a skilled evaluation of whether Johnson provided inadequate treatment to Nyack's patients. This decision necessitates examination of various medical data concerning Johnson's cases. The medical expertise of the PHC will prove extremely helpful in sorting through these complex records, and resolving the factual questions at stake.

Id. at 122.

In stark contrast to Johnson, this case does not involve allegations of technical incompetence or inadequate patient care, does not implicate any medical data or complex records, and would not benefit from the medical expertise of the PHC. The primary factual issue is whether Tassy committed the alleged sexual harassment, the resolution of which does not require the PHC's expertise. See *964 F.2d at 122* (noting that ***HN12***[] primary jurisdiction applies where an "agency's expertise may… prove helpful to the court in resolving difficult factual issues") (emphasis in original). The PHC has no expertise in determining whether a doctor committed sexual **[*16]** harassment or other acts of non-medical misconduct. Nor is medical expertise necessary to determine that one who sexually harasses his colleagues is lacking in character. We deem it significant that, according to Tassy's allegations, Brunswick has not made any charges regarding Tassy's treatment of his patients or his competence as a physician, and Brunswick did not review any patient charts or medical data in deciding to suspend Tassy's privileges. In short, Brunswick's decision to suspend Tassy's privileges does not invoke the particular expertise of the PHC. While there may well be cases in which issues surrounding a physician's character fall within the PHC's expertise, this is not such a case. Because the issues involved here "are neither beyond the conventional expertise of judges nor within the special competence of" the PHC, the primary jurisdiction doctrine does not apply. See *Fulton Cogeneration Assocs. v. Niagara Mohawk Power Corp., 84 F.3d 91, 97 (2d Cir. 1996)*. [3]

[*17] Brunswick argues that Johnson stands for the proposition that any physician challenging the termination of privileges on any basis must file a complaint with the PHC before suing in federal court. Johnson did not establish such a broad rule; rather, the Court merely found that the PHC's medical expertise would be of assistance: "Because the PHC has the peculiar expertise to assess whether a hospital had a sound medical reason for terminating a physician's privileges, we conclude that a physician who asserts a damages claim that turns on whether the hospital legitimately terminated his privileges must first file a complaint with the PHC." *Johnson, 964 F.2d at 121* (internal citation omitted). Unlike the defendant in Johnson, Brunswick does not assert that it had a medical reason for suspending Tassy's privileges, and the PHC does not have the "peculiar expertise" to assess whether Tassy committed sexual harassment.

The Supreme Court's decision in *Nader v. Allegheny Airlines, Inc., 426 U.S. 290, 48 L. Ed. 2d 643, 96 S. Ct. 1978 (1976)*, is particularly apt. The plaintiff in Nader had brought a common law fraudulent misrepresentation **[*18]**

---

[3] The dissent argues that reliance on agency expertise favors dismissal. Dissenting Opinion, infra, at [1-3]. The dissent relies on the fact that, because Tassy has brought a discrimination claim, the District Court will have to compare Brunswick's treatment of him to its treatment of similarly situated physicians of other races and national origins, a comparison that would be better made by the PHC. This argument, we suggest, suffers from two flaws. First, there is no reason to believe that the PHC would even be able to conduct the comparative analysis to which the dissent alludes. While *New York Public Health Law § 2801-b(2)* authorizes the PHC to determine whether Brunswick properly suspended Tassy's privileges under *New York Public Health Law § 2801-b(1)* (i.e., whether Brunswick suspended Tassy's privileges on the basis of his character), we are not aware of any statute or regulation that authorizes the PHC to determine whether Brunswick properly suspended Tassy's privileges under *42 U.S.C. § 1981* (i.e., whether Brunswick denied Tassy "the same right. . . to make and enforce contracts. . . as is enjoyed by white citizens"). Second, even if the PHC were able - and willing - to conduct this analysis, it still would not implicate the PHC's medical expertise. As the dissent points out, Tassy's *§ 1981* claim is based on his allegation that Brunswick has taken measures against him "which have not been taken against white doctors accused of much more serious indiscretions and much more significant misconduct." Dissenting Opinion, infra, at [1-2]. For the reasons discussed in the text supra, an examination of "indiscretions" and "misconduct" directed at a co-worker does not implicate the PHC's medical expertise, regardless of who is alleged to have committed the indiscretions and misconduct.

claim based on the defendant airline's policy of overbooking its flights. Declining to apply the primary jurisdiction doctrine, the Court held:

> Referral of the misrepresentation issue to the [Civil Aeronautics] Board cannot be justified by the interest in informing the court's-ultimate decision with "the expert and specialized knowledge" of the Board. The action brought by petitioner does not turn on a determination of the reasonableness of a challenged practice[,] a determination that could be facilitated by an informed evaluation of the economics or technology of the regulated industry. The standards to be applied in an action for fraudulent misrepresentation are within the conventional competence of the courts, and the judgment of a technically expert body is not likely to be helpful in the application of these standards to the facts of this case.

Id. at 305-06 (internal citation and footnote omitted). The same is true here. We fail to see how the PHC's medical expertise would aid the determination of whether Tassy committed the sexual harassment that has been alleged.

Nor are we convinced that the inclusion of "character" in *section 2801-b(1)* **[*19]** as a permissible basis for suspending privileges requires that we defer to the PHC on all issues relating to character. In applying the primary jurisdiction doctrine, the District Court seems to have found dispositive the fact that character is a permissible basis for suspension under *section 2801-b(1)*:

> It may be that in enacting 2801-b and not limiting the Public Health Council's review powers to purely instances of medical incompetence, the [New York] legislature felt that character flaws may have to be factored into the determination by a hospital as to whether the individual involved should continue to dispense medical services at the facility. That may be debatable, but the legislation is clear. Why they did it may be debatable.

(Tr. at 10.) The fact that the New York legislature permits hospitals to revoke privileges based on character flaws, however, does not mean that the PHC has expertise in determining whether a particular physician's character is flawed. Indeed, the District Court did not find that the PHC's expertise would be useful in resolving any factual dispute. To the contrary, the District Court found, "I think it is probably true that whether sexual **[*20]** harassment occurred certainly could be decided as well by this Court as [by] the Public Health Council." (Tr. at 10.)

We emphasize that ***HN13***[] primary jurisdiction is a discretionary doctrine whose applicability in any given case depends on "whether the reasons for the existence of the doctrine are present and whether the purposes it serves will be aided by its application in the particular litigation." *W. Pac. R.R. Co., 352 U.S. at 64*. [4] The doctrine cannot be applied mechanically. In finding that the inclusion of "character" in *section 2801-b(1)* required Tassy to proceed before the PHC in the first instance, the District Court seems to have incorrectly equated primary jurisdiction with the related - but distinct - doctrine of exhaustion of administrative remedies. The Supreme Court has explained the difference between these two doctrines:

> ***HN14***[] "Exhaustion" applies where a claim is cognizable in the first instance by an administrative agency alone; judicial interference is withheld until the administrative process has run its course. "Primary jurisdiction," on the other hand, applies where a claim is originally cognizable in the courts, and comes into play whenever **[*21]** enforcement of the claim requires the resolution of issues which, under a regulatory scheme,

[4] The dissent's suggestion that the courts should "welcome the opportunity for… pre-litigation dispute resolution in a case such as this," Dissenting Opinion, infra, at [4], we believe, misconceives the nature of the primary jurisdiction doctrine. While courts may often prefer that the parties engage in pre-litigation dispute resolution, we cannot require them to do so absent a sound legal basis. However "distasteful" or "counter-productive" a lawsuit may be, id., we cannot dismiss it pursuant to the doctrine of primary jurisdiction, and require the parties to litigate before an administrative agency, unless doing so would promote consistency and uniformity or unless the agency has some relevant expertise. As for the dissent's statement that parties often prefer an opportunity for pre-litigation dispute resolution before an administrative agency, id., nothing in our opinion precludes parties who choose to take advantage of such administrative procedures from doing so. Rather, we simply hold that, ***HN15***[] where a party prefers not to litigate before an administrative agency in the first instance, he cannot be forced to do so pursuant to the primary jurisdiction doctrine unless the purposes behind the existence of the doctrine are present.

> have been placed within the special competence of an administrative body; in such a case the judicial process is suspended pending referral of such issues to the administrative body for its views.

Id. at 63-64.

[*22] ***HN16***[] In the primary jurisdiction context, whether an agency is statutorily authorized to resolve a particular issue is not itself determinative of whether to apply the doctrine. Rather, the pertinent questions are whether referral to the agency is necessary to promote uniformity and whether the agency's expertise would assist the court in resolving difficult factual issues. See *Gen. Elec. Co. v. MV Nedlloyd, 817 F.2d 1022, 1027 (2d Cir. 1987)* (refusing to apply doctrine of primary jurisdiction because agency "experience is not needed to determine" the relevant issue); cf. *Golden Hill Paugussett Tribe of Indians v. Weicker, 39 F.3d 51, 60 (2d Cir. 1994)* (applying primary jurisdiction doctrine because "the [Bureau of Indian Affairs'] resolution of… factual issues regarding tribal status will be of considerable assistance to the district court in ultimately deciding Golden Hill's Nonintercourse Act claims"); *Danna v. Air France, 463 F.2d 407, 412 (2d Cir. 1972)* (applying primary jurisdiction doctrine to case involving reasonableness of airline fares because "the examination of these fare systems requires the exercise of an expertise **[*23]** more heavily concentrated in the Administrative and Executive branches than in the federal judiciary"). Rather than simply asking whether an administrative agency is statutorily authorized to hear a particular dispute, the primary jurisdiction doctrine asks whether an agency's review of the facts "will be a material aid" to the court ultimately charged with applying those facts to the law. *Ricci v. Chi. Mercantile Exch., 409 U.S. 289, 305, 34 L. Ed. 2d 525, 93 S. Ct. 573 (1973)*. Here, as the District Court itself noted, the PHC's review of the facts would not be a material aid to the court.

CONCLUSION

Neither of the purposes of the primary jurisdiction doctrine would be served by applying the doctrine in this case: deferring to the PHC would not promote consistency or uniformity, and there are no questions of fact whose resolution would be aided by the PHC's expertise. Rather, the issues involved in this case are squarely "within the traditional realm of judicial competence." *Goya Foods, Inc. v. Tropicana Prods., Inc., 846 F.2d 848, 851 (2d Cir. 1988)* (noting the "relatively narrow scope of the doctrine of primary jurisdiction"). Given "the **[*24]** virtually unflagging obligation of the federal courts to exercise the jurisdiction given them," *Colo. River Water Conservation Dist. v. United States, 424 U.S. 800, 817, 47 L. Ed. 2d 483, 96 S. Ct. 1236 (1976)* (citations omitted), we decline to apply the primary jurisdiction doctrine. Accordingly, Tassy need not file a complaint with the PHC, and his claims may proceed in the District Court. For these reasons, we vacate the judgment of the District Court and remand for proceedings consistent with this opinion.

Dissent by: JOHN M. WALKER, JR.

Dissent

JOHN M. WALKER, JR., Chief Judge, dissenting:

Because I would affirm the district court's dismissal based on the doctrine of primary jurisdiction, I respectfully dissent.

The majority, faulting the district court for dismissing the complaint on the basis that the PHC has primary jurisdiction, cites two rationales for primary jurisdiction--consistency of rulings and agency expertise--and concludes that neither applies here. I agree that the first rationale does not apply, but believe that the second does. Moreover, a third reason not discussed by the majority, judicial economy, supports invocation of the doctrine.

At **[*25]** its core, Tassy's complaint is that the hospital has wrongly suspended his privileges and, accordingly, he seeks the reinstatement of his privileges as well as monetary damages. The hospital's authority to suspend Tassy's privileges is governed by *N.Y. Pub. Health Law § 2801-b(1)*. *Section 2801-b(2)* provides that a person claiming that a suspension of his privileges was in violation of subsection (b)(1) may file a complaint with the PHC. Were Tassy to do so, as I think should be required, the PHC would have to decide whether "standards of patient care, patient welfare, the objectives of the institution or [Tassy's] character or competency" warranted suspension or reinstatement. See *N.Y. Pub. Health Law § 2801-b(1)*. Tassy would argue, presumably, that they did not warrant suspension; that, because of discrimination, others similarly situated were not so disciplined; and that, given his medical expertise and record of performance relative to I others, he should be reinstated. The hospital would have to defend these charges. All of this is squarely within the PHC's jurisdiction.

There are three likely outcomes of the proceedings before the PHC: (1) a determination in Tassy's **[*26]** favor; (2) a determination in the hospital's favor; and (3) a mediated settlement. Only in the event of outcome (2) would it be necessary for Tassy to proceed with his federal action. And, if that were to occur, the federal court would have the benefit of the answers to fact questions from the agency charged with disputes of this sort among professionals. Such answers would be of great assistance in resolving the federal claims that Tassy has presented in his complaint and in determining whether his privileges should be restored.

The majority disputes this point. It reasons that the PHC's medical expertise would not avail the court in this case because I the "primary factual issue is whether Tassy committed the sexual harassment of which he was accused." Maj. Op., supra, at [10]. I do not think the factual inquiry invoked by Tassy's discrimination claims will be so limited.

Tassy claims that the harassment charges, even if true, were a pretext for the hospital's suspension of his privileges, which was in fact motivated by discriminatory animus. Central to this question, of course, is how the hospital disciplined other similarly situated doctors. In his complaint, Tassy alleges **[*27]** that appellees violated *§ 1981* and discriminated against him on the basis of his race and national origin by "act[ing] in a malicious manner, fostering baseless charges and taking draconian measures against plaintiff, a black Haitian, which have not been taken against white doctors accused of much more serious indiscretions and much more significant misconduct." (Emphasis added) Similarly, in his reply brief, Tassy states that his claim of racial discrimination is shown in part by the "frivolous nature of the charges against Dr. Tassy, his excellent job performance and the studied neglect of medical incompetence of Caucasians." (Emphasis added).

Thus, as is apparent from Tassy's own allegations of pretext, the factual issues in this case will go beyond whether Tassy harassed his co-workers. The factual issues will embrace the question whether, even if the hospital had a legitimate reason to suspend Tassy's privileges, the hospital has treated similarly situated physicians in the same way and whether the medical incompetence of other doctors was overlooked. More precisely, adjudication of Tassy's claims by this court will entail at least two inquiries that, given **[*28]** their fact-intensive character in the peculiar context of the practice of medicine, could be aided by the expertise of the state agency: (1) whether Tassy, a psychiatrist accused of abusive and harassing conduct, is similarly situated with other physicians who have different specialties, committed different acts of misconduct, or have different employment histories and characters; and (2) whether, in its employment decisions, the hospital has consistently applied the statutorily defined reasons for the suspension of privileges, which are "based on specialized medical considerations." See *Gelbard v. Genesee Hosp., 87 N.Y.2d 691, 696, 664 N.E.2d 1240, 1241, 642 N.Y.S.2d 178 (1996)* [1] For example, in determining whether Tassy's privileges were wrongfully suspended, the PHC would likely shed light on questions such as, for example, whether the hospital might have had a legitimate non discriminatory reason to act more

---

[1] In making this point, I do not mean to suggest, as the majority states, Maj. Op., supra, at [11 n.3], that the PHC will analyze Tassy's *§ 1981* claim. Rather, my point is that the agency's investigation of whether Tassy' s privileges were wrongfully suspended, which the PHC is authorized under New York law to perform, would produce factual determinations that would aid this court's analysis of Tassy's *§ 1981* claim in the ways described above. Given the inevitable overlap of Tassy's wrongful suspension and *§ 1981* claims, the PHC would consider many of the same factual, if not legal, issues as this court would. Nor is there any requirement that the same claims must be brought before both this court and the PHC. See *Johnson v. Nyack Hosp., 964 F.2d 116 (2d Cir. 1992)*(affirming dismissal of plaintiff-physician's antitrust claims for plaintiff-physician's failure to file a complaint with the PHC first).

vigorously against accusations of abusive conduct by a psychiatrist, who counsels vulnerable individuals, than against a surgeon or pathologist.

[*29] Finally, the majority does not address judicial economy, a third factor that, in addition to consistency in rulings and technical expertise, supports invocation of the doctrine of primary jurisdiction. Although the Supreme Court has yet to rely on this factor, we have done so and, in this case, judicial economy militates in favor of invoking the doctrine. As we noted in a case involving the same state agency, "we also believe that judicial economy will be best served by requiring [plaintiff] to file a complaint with the PHC before seeking judicial relief." *Johnson v. Nyack Hosp., 964 F.2d 116, 123 (2d Cir. 1992)*. Moreover, considerations of judicial economy overlap to a certain extent with those of agency expertise: the expertise of the PHC, particularly in the area of mediating disputes between health-care professionals, could prove helpful to the court in addition to promoting judicial economy. As we stated in Johnson, the "PHC may yet propose a solution that will end the current hostilities between [the parties] without judicial intervention. At the very least, the PHC should be given a chance to try." *964 F.2d at 123*. The New York Court of **[*30]** Appeals has similarly "recognized the vital mediation role served by the PHC in providing a professionally competent forum in which to resolve disputes at any early state." *Gelbard, 87 N.Y.2d at 697, 664 N.E.2d at 1242* (citation and internal quotation marks omitted). One might think that the courts would welcome the opportunity for such pre-litigation dispute resolution in a case such as this.

I also think that in many cases the parties would as well. To be sure, it is essential that the courts should be available to hear serious and important claims, such as those raised by Tassy. However, it is also important to remember that a lawsuit frequently is a distasteful and needlessly counter-productive way to resolve a dispute. This is particularly so when the dispute is between professionals and involves questions of professional reputation, a professional's lifeblood. Under such circumstances, the proceeding before the PHC may "often avoid[] the unpleasant task of besmirching a physician's reputation by[] 'using its professional expertise to identify and discourage groundless claims, [and] to mediate and to conciliate disputes between health-care professionals. **[*31]** '" *Johnson, 964 F.2d at 123* (quoting *Cohoes Mem'l Hosp. v. Dep't of Health, 48 N.Y.2d 583, 589, 399 N.E.2d 1132, 1135, 424 N.Y.S.2d 110 (N.Y. 1979))*.

With respect, I dissent.

HN2[] **Motions to Dismiss, Failure to State Claim**

On a *Fed. R. Civ. P. 12(b)(6)* motion to dismiss, a court must construe the complaint in the light most favorable to the plaintiff, accepting all the allegations in the complaint as true.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Antitrust & Trade Law > Procedural Matters > Jurisdiction > Primary Jurisdiction

Administrative Law > Separation of Powers > Primary Jurisdiction

HN3[] Reviewability, Jurisdiction & Venue

The primary jurisdiction doctrine is defined as a principle that in cases raising issues of fact not within the conventional expertise of judges or cases requiring the exercise of administrative discretion, agencies created by Congress for regulating the subject matter should not be passed over. This is so even though the facts after they have been appraised by specialized competence serve as a premise for legal consequences to be judicially defined.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

HN4[] Reviewability, Jurisdiction & Venue

The courts, while retaining the final authority to expound a statute, should avail themselves of the aid implicit in an administrative agency's superiority in gathering the relevant facts and in marshaling them into a meaningful pattern.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

HN5[] Reviewability, Jurisdiction & Venue

Courts have resisted creating any fixed rules or formulas for the application of the primary jurisdiction doctrine. Rather, in every case the question is whether the reasons for the existence of the doctrine are present and whether the purposes it serves will be aided by its application in the particular litigation.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Primary Jurisdiction

HN6[] Reviewability, Jurisdiction & Venue

The reasons for the existence of the primary jurisdiction doctrine and the purposes it serves are twofold: the desire for uniformity and the reliance on administrative expertise. Thus, in determining whether to apply the primary jurisdiction doctrine, a court must examine whether doing so would serve either of these purposes.

Administrative Law > Separation of Powers > Primary Jurisdiction

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > Abstention

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

HN7[] Separation of Powers, Primary Jurisdiction

The federal courts have a virtually unflagging obligation to exercise the jurisdiction given them.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Primary Jurisdiction

HN8[] **Reviewability, Jurisdiction & Venue**

Where a case presents a unique and narrow factual dispute that poses no risk of inconsistent interpretations of any broadly applicable rule or policy, the desire for uniformity does not support the application of the primary jurisdiction doctrine.

Healthcare Law > Business Administration & Organization > Hospital Privileges > General Overview

HN9[] **Business Administration & Organization, Hospital Privileges**

The New York Public Health Council (PHC) is a 15-member body within the New York State Department of Health, *N.Y. Pub. Health Law § 220* (McKinney 2001), whose duty is to consider any matter relating to the preservation and improvement of public health. *N.Y. Pub. Health Law § 225(1)* (McKinney 2001). A primary function of the PHC is to determine whether there is a medical justification for the withdrawal of a doctor's privileges.

Healthcare Law > Business Administration & Organization > Hospital Privileges > General Overview

Labor & Employment Law > ... > Sexual Harassment > Employment Practices > Discharges & Failures to Hire

Torts > ... > Standards of Care > Special Care > Highly Skilled Professionals

HN10[] **Business Administration & Organization, Hospital Privileges**

N.Y. Pub. Health Law § 2801-b(1) states that a hospital may suspend a physician's privileges only because of standards of patient care, patient welfare, the objectives of the institution or the character or competency of the applicant, and *§ 2801-b(2)* states that any person claiming to be aggrieved by a violation of *§ 2801-b(1)* may file a complaint with the New York Public Health Council.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Primary Jurisdiction

HN11[] **Reviewability, Jurisdiction & Venue**

Primary jurisdiction applies where an agency's expertise may prove helpful to a court in resolving difficult factual issues.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Primary Jurisdiction

HN12[] **Reviewability, Jurisdiction & Venue**

Where the issues involved are neither beyond the conventional expertise of judges nor within the special competence of an administrative agency, the primary jurisdiction doctrine does not apply.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Healthcare Law > Business Administration & Organization > General Overview

Labor & Employment Law > ... > Sexual Harassment > Employment Practices > Discharges & Failures to Hire

Healthcare Law > Business Administration & Organization > Hospital Privileges > General Overview

HN13[] **Reviewability, Jurisdiction & Venue**

Because the New York Public Health Council (PHC) has the peculiar expertise to assess whether a hospital had a sound medical reason for terminating a physician's privileges, a physician who asserts a damages claim that turns on whether the hospital legitimately terminated his privileges must first file a complaint with the PHC.

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

HN14[] **Reviewability, Jurisdiction & Venue**

Primary jurisdiction is a discretionary doctrine whose applicability in any given case depends on whether the reasons for the existence of the doctrine are present and whether the purposes it serves will be aided by its application in the particular litigation. The doctrine cannot be applied mechanically.

Administrative Law > Judicial Review > Reviewability > Exhaustion of Remedies

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Primary Jurisdiction

HN15[] **Reviewability, Exhaustion of Remedies**

"Exhaustion" applies where a claim is cognizable in the first instance by an administrative agency alone; judicial interference is withheld until the administrative process has run its course. "Primary jurisdiction," on the other hand, applies where a claim is originally cognizable in the courts, and comes into play whenever enforcement of the claim requires the resolution of issues which, under a regulatory scheme, have been placed within the special competence of an administrative body; in such a case the judicial process is suspended pending referral of such issues to the administrative body for its views.

Administrative Law > Agency Adjudication > Alternative Dispute Resolution

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Jurisdiction

Administrative Law > Separation of Powers > Primary Jurisdiction

HN16[] Agency Adjudication, Alternative Dispute Resolution

While courts may often prefer that parties engage in pre-litigation dispute resolution, courts cannot require them to do so absent a sound legal basis. However "distasteful" or "counter-productive" a lawsuit may be, a court cannot dismiss it pursuant to the doctrine of primary jurisdiction, and require the parties to litigate before an administrative agency, unless doing so would promote consistency and uniformity or unless the agency has some relevant expertise. Where a party prefers not to litigate before an administrative agency in the first instance, he cannot be forced to do so pursuant to the primary jurisdiction doctrine unless the purposes behind the existence of the doctrine are present.

Administrative Law > Separation of Powers > Jurisdiction

Governments > Native Americans > Authority & Jurisdiction

Administrative Law > Judicial Review > Reviewability > Jurisdiction & Venue

Administrative Law > Separation of Powers > Primary Jurisdiction

HN17[] Separation of Powers, Jurisdiction

In the primary jurisdiction context, whether an agency is statutorily authorized to resolve a particular issue is not itself determinative of whether to apply the doctrine. Rather, the pertinent questions are whether referral to the agency is necessary to promote uniformity and whether the agency's expertise would assist the court in resolving difficult factual issues. Rather than simply asking whether an administrative agency is statutorily authorized to hear a particular dispute, the primary jurisdiction doctrine asks whether an agency's review of the facts "will be a material aid" to the court ultimately charged with applying those facts to the law.

Judges: Before: WALKER, Chief Judge, SACK, and B. D. PARKER, JR., Circuit Judges. Chief Judge Walker dissents in a separate opinion.

Opinion by: Barrington D. Parker

Opinion

[*65] B. D. PARKER, JR., *Circuit Judge*:

Plaintiff Dr. Eugenio Tassy, a psychiatrist, brought this action for damages and **[*66]** for reinstatement of his medical privileges at defendant Brunswick Hospital Center, Inc. ("Brunswick"). According to Tassy's complaint, Brunswick revoked his privileges following allegations of sexual harassment. Tassy, a black Haitian-American, denies the sexual harassment allegations and asserts that Brunswick discriminated against him on the basis of his race and national origin. Defendants moved **[**2]** to dismiss the complaint pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, arguing that the doctrine of primary jurisdiction requires Tassy to pursue his claims with the New York Public Health Council (the "PHC") before suing in federal court. The District Court (Denis R. Hurley, *Judge*) granted the motion, dismissing Tassy's complaint without prejudice to refiling after review by the PHC

(Hearing Transcript, May 4, 2001 ("Tr."), at 12), and Tassy appealed. Because we find the primary jurisdiction doctrine inapplicable, we vacate and remand.

BACKGROUND

According to the allegations of the complaint, which we accept as true for purposes of this appeal, Tassy received privileges to practice medicine at Brunswick in 1994. In April 1998, Jovita Crasta, a psychiatrist at Brunswick, alleged that Tassy had sexually harassed her. In July 1998, a Brunswick employee alleged that Tassy had verbally abused her. In October 1998, another Brunswick doctor complained of improper behavior on the part of Tassy. [1] As a result of these allegations, Brunswick suspended Tassy's privileges. In November 1998, Brunswick reinstated Tassy's privileges in exchange for his agreement to submit to **[**3]** and pay for a psychiatric evaluation by the Medical Society of the State of New York's Committee for Physicians' Health. In March 1999, Crasta again accused Tassy of inappropriate behavior. Shortly after Crasta's second allegation, Brunswick suspended Tassy's privileges a second time. Tassy then requested a hearing. The parties scheduled and adjourned the hearing several times, but the hearing was never convened. In March 2000, Tassy requested that his privileges be reinstated. Brunswick never responded to this request, and Tassy remains suspended from practicing medicine at Brunswick. Tassy alleges that Brunswick and its medical director, defendant Dr. Morton Goldfarb, discriminated against him on account of his race and his national origin. In particular, Tassy alleges that Brunswick and Goldfarb have taken less draconian measures against white doctors accused of more serious misconduct.

Tassy filed his complaint in the Eastern District of New **[**4]** York on June 15, 2000, asserting claims for discrimination on the basis of race and national origin under *42 U.S.C. § 1981* and common law breach of contract. He seeks damages, reinstatement of his privileges, and other equitable remedies. Goldfarb answered and counterclaimed for breach of contract, alleging that Tassy had not paid the rent due on his office space. Tassy denied the allegations of the counterclaim. Brunswick then moved to dismiss under *Federal Rule of Civil Procedure 12(b)(6)* on the ground that Tassy was required to file a claim with the PHC before suing in federal court. The District Court, relying on the doctrine of primary jurisdiction and our decision in *Johnson v. Nyack Hospital, 964 F.2d 116 (2d Cir. 1992)*, dismissed the complaint without prejudice to its reinstatement after review by the PHC. (Tr. at 9, 12.) Tassy appealed.

DISCUSSION

HN1[] We review de novo a district court's dismissal pursuant to *Rule 12(b)(6)*. *Bernheim* ***[*67]*** *v. Litt, 79 F.3d 318, 321 (2d Cir. 1996)*. ***HN2***[] On a *Rule 12(b)(6)* motion to dismiss, we must construe the complaint in the light most favorable to the plaintiff, accepting all the allegations **[**5]** in the complaint as true. *Chambers v. Time Warner, Inc., 282 F.3d 147, 152 (2d Cir. 2002)*; *Connolly v. McCall, 254 F.3d 36, 40 (2d Cir. 2001)*.

The sole issue on appeal is whether the doctrine of primary jurisdiction requires Tassy to file a complaint with the PHC before suing in federal court. To determine whether the doctrine applies, we first examine its origin and evolution.

Primary jurisdiction is a judge-made doctrine, created by Justice Edward White's opinion for a unanimous Supreme Court in *Texas & Pacific Railway Co. v. Abilene Cotton Oil Co., 204 U.S. 426, 51 L. Ed. 553, 27 S. Ct. 350 (1907)*. See *United States v. Radio Corp. of Am., 358 U.S. 334, 346, 3 L. Ed. 2d 354, 79 S. Ct. 457 (1959)*; Louis L. Jaffe, Primary Jurisdiction, 77 Harv. L. Rev. 1037, 1042 (1964). In Abilene, the plaintiff oil company sued the defendant railroad in state court, alleging that it had charged unreasonable and discriminatory rates for interstate shipments of cotton seed. *204 U.S. at 430*. The Supreme Court held that the plaintiff was required to pursue its claims with the Interstate Commerce Commission (the "ICC") in the first **[**6]** instance, *id. at 448*, and the doctrine of primary jurisdiction was born. The Supreme Court's decision in Abilene was motivated by the uniformity that would obtain if

[1] The complaint does not specify the nature of this allegation.

the ICC were permitted to resolve questions about the reasonableness of the rates that it had the responsibility to set and enforce:

> For if, without previous action by the [ICC], power might be exerted by courts and juries generally to determine the reasonableness of an established rate, it would follow that unless all courts reached an identical conclusion a uniform standard of rates in the future would be impossible, as the standard would fluctuate and vary, dependent upon the divergent conclusions reached as to reasonableness by the various courts called upon to consider the subject as an original question.

Id. at 440. Following Abilene, early primary jurisdiction cases involved technical questions relating to regulated industries such as railroads, water and air transportation, electricity, and communications. See Robert B. von Mehren, The Antitrust Laws and Regulated Industries: The Doctrine of Primary Jurisdiction, 67 Harv. L. Rev. 929, 935-36 (1954). **[**7]**

Justice Brandeis identified a second rationale for the doctrine in *Great Northern Railway Co. v. Merchants Elevator Co., 259 U.S. 285, 66 L. Ed. 943, 42 S. Ct. 477 (1922)*, which involved a dispute over the tariff charged on interstate corn shipments. For the first time the Supreme Court cited administrative expertise, as well as uniformity, as a potential basis for invoking the doctrine:

> [Resort to the ICC] is required because the enquiry is essentially one of fact and of discretion in technical matters; and uniformity can be secured only if its determination is left to the [ICC]. Moreover, that determination is reached ordinarily upon voluminous and conflicting evidence, for the adequate appreciation of which acquaintance with many intricate facts of transportation is indispensable, and such acquaintance is commonly to be found only in a body of experts.

Id. at 291. Although the Court declined to apply the primary jurisdiction doctrine in Great Northern Railway, the case signaled a shift in the predominant rationale that would support the doctrine's application in future cases. Several **[*68]** decades later the Supreme Court stated **[**8]** that, while "earlier cases" relied on "the desirable uniformity which would obtain if initially a specialized agency passed on certain types of administrative questions[, . . .]More recently the expert and specialized knowledge of the agencies involved has been particularly stressed." *United States v. W. Pac. R.R. Co., 352 U.S. 59, 64, 1 L. Ed. 2d 126, 77 S. Ct. 161, 135 Ct. Cl. 997 (1956)* (citations omitted).

While the doctrine has often been applied in cases involving difficult legal questions that must ultimately be resolved by the courts, the presence of such legal issues has not prevented the Supreme Court from concluding that primary jurisdiction lay in an administrative agency. In these cases, the Court has highlighted the separate roles of court and agency, as well as the importance of the primary jurisdiction doctrine in maintaining a proper balance between the two. In *Far East Conference v. United States, 342 U.S. 570, 96 L. Ed. 576, 72 S. Ct. 492 (1952)*, for example, the Court held that primary jurisdiction lay in the United States Shipping Board, rather than in the federal courts, despite the questions of ***antitrust law*** involved in the case. ***HN3***[] The Far East Court defined the primary **[**9]** jurisdiction doctrine as:

> a principle, now firmly established, that in cases raising issues of fact not within the conventional expertise of judges or cases requiring the exercise of administrative discretion, agencies created by Congress for regulating the subject matter should not be passed over. This is so even though the facts after they have been appraised by specialized competence serve as a premise for legal consequences to be judicially defined. Uniformity and consistency in the regulation of business entrusted to a particular agency are secured, and the limited functions of review by the judiciary are more rationally exercised, by preliminary resort for ascertaining and interpreting the circumstances underlying legal issues to agencies that are better equipped than courts by specialization, by insight gained through experience, and by more flexible procedure.

Id. at 574-75. The Supreme Court later reiterated this principle in discussing the role of the Federal Maritime Board in another antitrust case: ***HN4***[] "It is recognized that the courts, while retaining the final authority to expound the statute, should avail themselves of the aid implicit in **[**10]** the agency's superiority in gathering the relevant facts and in marshaling them into a meaningful pattern." *Fed. Mar. Bd. v. Isbrandtsen Co., 356 U.S. 481, 498, 2 L. Ed. 2d 926, 78 S. Ct. 851 (1958)*.

Since the inception of the doctrine, ***HN5***[] courts have resisted creating any fixed rules or formulas for its application. See *W. Pac. R.R. Co., 352 U.S. at 64*. Rather, "in every case the question is whether the reasons for the existence of the doctrine are present and whether the purposes it serves will be aided by its application in the particular litigation." Id. As the origin and evolution of the primary jurisdiction doctrine demonstrate, ***HN6***[] the reasons for its existence and the purposes it serves are twofold: the desire for uniformity and the reliance on administrative expertise. See id. Thus, in determining whether to apply the primary jurisdiction doctrine, we must examine whether doing so would serve either of these purposes. [2]

[11] [*69]** With respect to the first purpose, Brunswick does not argue that applying the doctrine here would promote consistency and uniformity, and we do not see how it could. The concern for consistency and uniformity is more prevalent in cases involving issues of broad applicability such as the reasonableness of rates or tariffs. See *Nat'l Communications Ass'n, Inc. v. Am. Tel. & Tel. Co., 46 F.3d 220, 224-25 (2d Cir. 1995)*. *United States v. Radio Corp. of America, 358 U.S. 334, 3 L. Ed. 2d 354, 79 S. Ct. 457 (1959)*, for example, was an antitrust action arising out of an attempt by NBC, a subsidiary of Radio Corp. of America, to exchange the television station that it owned in Cleveland for one in Philadelphia. *Id. at 335-36*. In discussing the history of the primary jurisdiction doctrine, the Court noted that

> this Court consistently held that when rates and practices relating thereto were challenged under the antitrust laws, the agencies had primary jurisdiction to consider the reasonableness of such rates and practices in the light of the many relevant factors including alleged antitrust violations, for otherwise sporadic action by federal courts would disrupt **[**12]** an agency's delicate regulatory scheme, and would throw existing rate structures out of balance.

Id. at 348. Because application of the primary jurisdiction doctrine would not promote uniformity, the Court declined to apply it: "Thus, there being no pervasive regulatory scheme, and no rate structures to throw out of balance, sporadic action by federal courts can work no mischief. The justification for primary jurisdiction accordingly disappears." *Id. at 350*.

Like Radio Corp., this case involves neither a regulatory scheme nor a rate structure. ***HN8***[] Because this case "presents a unique and narrow factual dispute that poses no risk of inconsistent interpretations" of any broadly applicable rule or policy, *Am. Tel. & Tel., 46 F.3d at 225*, the desire for uniformity does not support the application of the primary jurisdiction doctrine.

The more significant question is whether deferring to the PHC would promote "the resolution of technical questions of facts through the agency's specialized expertise." *Golden Hill Paugussett Tribe of Indians v. Weicker, 39 F.3d 51, 59 (2d Cir. 1994)*. ***HN9***[] The PHC is a fifteen-member **[**13]** body within the New York State Department of Health, see *N.Y. Pub. Health Law § 220* (McKinney 2001), whose duty is to "consider any matter relating to the preservation and improvement of public health." *N.Y. Pub. Health Law § 225(1)* (McKinney 2001). "A primary function of the PHC is to determine whether there is a medical justification for the withdrawal of [a] doctor's privileges." *Johnson, 964 F.2d at 121*.

Tassy argues that there are no technical questions for the PHC to review, as Brunswick suspended his privileges because of his alleged sexual harassment, his race, and his national origin, all of which are non-medical issues that

---

[2] The dissent argues that we should also consider a third purpose, judicial economy. Dissenting Opinion, infra, at [3]. However, the Supreme Court has consistently held that there are only two purposes to consider in determining whether to apply the primary jurisdiction doctrine - uniformity and expertise. See *W. Pac. R.R. Co., 352 U.S. at 64*. Despite ample opportunity during the ninety-five years since it created the doctrine, see supra at [4-7], the Supreme Court has never identified judicial economy as a relevant factor. No doubt the reason is that considerations of judicial economy cannot assist a primary jurisdiction analysis, as it will always be more economical, from a judge's point of view, to dismiss a case or quickly refer it to an administrative agency, instead of adjudicating it himself. We are enjoined to resist this temptation because of ***HN7***[] "the virtually unflagging obligation of the federal courts to exercise the jurisdiction given them." *Colo. River Water Conservation Dist. v. United States, 424 U.S. 800, 817, 47 L. Ed. 2d 483, 96 S. Ct. 1236 (1976)* (citations omitted).

are unrelated **[*70]** to the PHC's expertise. In response, Brunswick relies on ***HN10***[] *New York Public Health Law section 2801-b(1)*, which states that a hospital may suspend a physician's privileges only because of "standards of patient care, patient welfare, the objectives of the institution or the character or competency of the applicant[,]" and *section 2801-b(2)*, which states that any person claiming to be aggrieved by a violation of *section 2801-b(1)* may file a complaint with the PHC. The gravamen of Brunswick's argument is that it suspended **[**14]** Tassy's privileges on the basis of his character and, because *section 2801-b(1)* lists character as a permissible basis for suspension and *section 2801-b(2)* authorizes the PHC to redress violations of *section 2801-b(1)*, the PHC has the expertise to determine whether Tassy's character rendered him unfit to practice medicine.

In support of its argument that we should apply the primary jurisdiction doctrine, Brunswick places substantial reliance on Johnson, in which we held that the doctrine required the plaintiff physician to pursue his claims arising out of the termination of his hospital privileges before the PHC. As a brief discussion of Johnson demonstrates, however, that case is distinguishable. The plaintiff in Johnson was a thoracic and vascular surgeon whose hospital privileges had been revoked after the hospital determined that "Johnson's surgical performance posed a peril to Nyack's patients." *Id. at 118*. A hospital investigation concluded that he had employed unsatisfactory surgical procedures and had insufficiently documented his work. Id. Placing particular emphasis on the relevant expertise of the PHC, we concluded:

> Primary jurisdiction **[**15]** demands that Johnson resort to the PHC before seeking redress in federal court. The question whether defendants had a proper medical reason to terminate Johnson's privileges requires a skilled evaluation of whether Johnson provided inadequate treatment to Nyack's patients. This decision necessitates examination of various medical data concerning Johnson's cases. The medical expertise of the PHC will prove extremely helpful in sorting through these complex records, and resolving the factual questions at stake.

Id. at 122.

In stark contrast to Johnson, this case does not involve allegations of technical incompetence or inadequate patient care, does not implicate any medical data or complex records, and would not benefit from the medical expertise of the PHC. The primary factual issue is whether Tassy committed the alleged sexual harassment, the resolution of which does not require the PHC's expertise. See *id. at 122* (noting that ***HN11***[] primary jurisdiction applies where an "agency's expertise may . . . prove helpful to the court in resolving difficult *factual* issues") (emphasis in original). The PHC has no expertise in determining whether a **[**16]** doctor committed sexual harassment or other acts of non-medical misconduct. Nor is medical expertise necessary to determine that one who sexually harasses his colleagues is lacking in character. We deem it significant that, according to Tassy's allegations, Brunswick has not made any charges regarding Tassy's treatment of his patients or his competence as a physician, and Brunswick did not review any patient charts or medical data in deciding to suspend Tassy's privileges. In short, Brunswick's decision to suspend Tassy's privileges does not invoke the particular expertise of the PHC. While there may well be cases in which issues surrounding a physician's character fall within the PHC's expertise, this is not such a case. ***HN12***[] Because the issues involved here "are neither beyond the conventional expertise of judges nor within the special **[*71]** competence of" the PHC, the primary jurisdiction doctrine does not apply. See *Fulton Cogeneration Assocs. v. Niagara Mohawk Power Corp., 84 F.3d 91, 97 (2d Cir. 1996)*. [3]

---

[3] The dissent argues that reliance on agency expertise favors dismissal. Dissenting Opinion, infra, at [1-3]. The dissent relies on the fact that, because Tassy has brought a discrimination claim, the District Court will have to compare Brunswick's treatment of him to its treatment of similarly situated physicians of other races and national origins, a comparison that would be better made by the PHC. This argument, we suggest, suffers from two flaws. First, there is no reason to believe that the PHC would even be able to conduct the comparative analysis to which the dissent alludes. While *New York Public Health Law § 2801-b(2)* authorizes the PHC to determine whether Brunswick properly suspended Tassy's privileges under *New York Public Health Law § 2801-b(1)* (i.e., whether Brunswick suspended Tassy's privileges on the basis of his character), we are not aware of any statute or regulation that authorizes the PHC to determine whether Brunswick properly suspended Tassy's privileges under *42 U.S.C. § 1981* (i.e., whether Brunswick denied Tassy "the same right . . . to make and enforce contracts . . . as is enjoyed by white citizens"). Second, even if the PHC were able - and willing - to conduct this analysis, it still would not implicate the PHC's

[17]** Brunswick argues that Johnson stands for the proposition that any physician challenging the termination of privileges on any basis must file a complaint with the PHC before suing in federal court. Johnson did not establish such a broad rule; rather, the Court merely found that the PHC's medical expertise would be of assistance: ***HN13***[] "Because the PHC has the peculiar expertise to assess whether a hospital had a sound medical reason for terminating a physician's privileges, we conclude that a physician who asserts a damages claim that turns on whether the hospital legitimately terminated his privileges must first file a complaint with the PHC." *Johnson, 964 F.2d at 121* (internal citation omitted). Unlike the defendant in Johnson, Brunswick does not assert that it had a medical reason for suspending Tassy's privileges, and the PHC does not have the "peculiar expertise" to assess whether Tassy committed sexual harassment.

The Supreme Court's decision in *Nader v. Allegheny Airlines, Inc., 426 U.S. 290, 48 L. Ed. 2d 643, 96 S. Ct. 1978 (1976)*, is particularly apt. The plaintiff in Nader had brought a common law fraudulent misrepresentation **[**18]** claim based on the defendant airline's policy of overbooking its flights. Declining to apply the primary jurisdiction doctrine, the Court held:

> Referral of the misrepresentation issue to the [Civil Aeronautics] Board cannot be justified by the interest in informing the court's ultimate decision with "the expert and specialized knowledge" of the Board. The action brought by petitioner does not turn on a determination of the reasonableness of a challenged practice[,] a determination that could be facilitated by an informed evaluation of the economics or technology of the regulated industry. The standards to be applied in an action for fraudulent misrepresentation are within the conventional competence of the courts, and the judgment of a technically expert body is not likely to be helpful in the application of these standards to the facts of this case.

[*72] *Id. at 305-06* (internal citation and footnote omitted). The same is true here. We fail to see how the PHC's medical expertise would aid the determination of whether Tassy committed the sexual harassment that has been alleged.

Nor are we convinced that the inclusion of "character" in *section 2801-b(1)* **[**19]** as a permissible basis for suspending privileges requires that we defer to the PHC on all issues relating to character. In applying the primary jurisdiction doctrine, the District Court seems to have found dispositive the fact that character is a permissible basis for suspension under *section 2801-b(1)*:

> It may be that in enacting 2801-b and not limiting the Public Health Council's review powers to purely instances of medical incompetence, the [New York] legislature felt that character flaws may have to be factored into the determination by a hospital as to whether the individual involved should continue to dispense medical services at the facility. That may be debatable, but the legislation is clear. Why they did it may be debatable.

(Tr. at 10.) The fact that the New York legislature permits hospitals to revoke privileges based on character flaws, however, does not mean that the PHC has expertise in determining whether a particular physician's character is flawed. Indeed, the District Court did not find that the PHC's expertise would be useful in resolving any factual dispute. To the contrary, the District Court found, "I think it is probably true that whether sexual **[**20]** harassment occurred certainly could be decided as well by this Court as [by] the Public Health Council." (Tr. at 10.)

We emphasize that ***HN14***[] primary jurisdiction is a discretionary doctrine whose applicability in any given case depends on "whether the reasons for the existence of the doctrine are present and whether the purposes it serves will be aided by its application in the particular litigation." *W. Pac. R.R. Co., 352 U.S. at 64*. [4] The doctrine cannot

---

medical expertise. As the dissent points out, Tassy's *§ 1981* claim is based on his allegation that Brunswick has taken measures against him "which have not been taken against white doctors accused of much more serious indiscretions and much more significant misconduct." Dissenting Opinion, infra, at [1-2]. For the reasons discussed in the text supra, an examination of "indiscretions" and "misconduct" directed at a co-worker does not implicate the PHC's medical expertise, regardless of who is alleged to have committed the indiscretions and misconduct.

be applied mechanically. In finding that the inclusion of "character" in *section 2801-b(1)* required Tassy to proceed before the PHC in the first instance, the District Court seems to have incorrectly equated primary jurisdiction with the related - but distinct - doctrine of exhaustion of administrative remedies. The Supreme Court has explained the difference between these two doctrines:

> ***HN15***[] "Exhaustion" applies where a claim is cognizable in the first instance by an administrative agency alone; judicial interference is withheld until the administrative process has run its course. "Primary **[*73]** jurisdiction," on the other hand, applies where a claim is originally cognizable in the courts, and comes into play whenever **[**21]** enforcement of the claim requires the resolution of issues which, under a regulatory scheme, have been placed within the special competence of an administrative body; in such a case the judicial process is suspended pending referral of such issues to the administrative body for its views.

Id. at 63-64.

[22]** ***HN17***[] In the primary jurisdiction context, whether an agency is statutorily authorized to resolve a particular issue is not itself determinative of whether to apply the doctrine. Rather, the pertinent questions are whether referral to the agency is necessary to promote uniformity and whether the agency's expertise would assist the court in resolving difficult factual issues. See *Gen. Elec. Co. v. MV Nedlloyd, 817 F.2d 1022, 1027 (2d Cir. 1987)* (refusing to apply doctrine of primary jurisdiction because agency "experience is not needed to determine" the relevant issue); cf. *Golden Hill Paugussett Tribe of Indians v. Weicker, 39 F.3d 51, 60 (2d Cir. 1994)* (applying primary jurisdiction doctrine because "the [Bureau of Indian Affairs'] resolution of . . . factual issues regarding tribal status will be of considerable assistance to the district court in ultimately deciding Golden Hill's Nonintercourse Act claims"); *Danna v. Air France, 463 F.2d 407, 412 (2d Cir. 1972)* (applying primary jurisdiction doctrine to case involving reasonableness of airline fares because "the examination of these fare systems requires the exercise of an expertise **[**23]** more heavily concentrated in the Administrative and Executive branches than in the federal judiciary"). Rather than simply asking whether an administrative agency is statutorily authorized to hear a particular dispute, the primary jurisdiction doctrine asks whether an agency's review of the facts "will be a material aid" to the court ultimately charged with applying those facts to the law. *Ricci v. Chi. Mercantile Exch., 409 U.S. 289, 305, 34 L. Ed. 2d 525, 93 S. Ct. 573 (1973)*. Here, as the District Court itself noted, the PHC's review of the facts would not be a material aid to the court.

CONCLUSION

Neither of the purposes of the primary jurisdiction doctrine would be served by applying the doctrine in this case: deferring to the PHC would not promote consistency or uniformity, and there are no questions of fact whose resolution would be aided by the PHC's expertise. Rather, the issues involved in this case are squarely "within the traditional realm of judicial competence." *Goya Foods, Inc. v. Tropicana Prods., Inc., 846 F.2d 848, 851 (2d Cir. 1988)* (noting the "relatively narrow scope of the doctrine of primary jurisdiction"). Given "the **[**24]** virtually unflagging obligation of the federal courts to exercise the jurisdiction given them," *Colo. River Water Conservation Dist. v. United States, 424 U.S. 800, 817, 47 L. Ed. 2d 483, 96 S. Ct. 1236 (1976)* (citations omitted), we decline to apply the primary jurisdiction doctrine. Accordingly, Tassy need not file a complaint with the PHC, and his claims

---

[4] The dissent's suggestion that the courts should "welcome the opportunity for . . . pre-litigation dispute resolution in a case such as this," Dissenting Opinion, infra, at [4], we believe, misconceives the nature of the primary jurisdiction doctrine. ***HN16***[] While courts may often prefer that the parties engage in pre-litigation dispute resolution, we cannot require them to do so absent a sound legal basis. However "distasteful" or "counter-productive" a lawsuit may be, id., we cannot dismiss it pursuant to the doctrine of primary jurisdiction, and require the parties to litigate before an administrative agency, unless doing so would promote consistency and uniformity or unless the agency has some relevant expertise. As for the dissent's statement that parties often prefer an opportunity for pre-litigation dispute resolution before an administrative agency, id., nothing in our opinion precludes parties who choose to take advantage of such administrative procedures from doing so. Rather, we simply hold that, where a party prefers not to litigate before an administrative agency in the first instance, he cannot be forced to do so pursuant to the primary jurisdiction doctrine unless the purposes behind the existence of the doctrine are present.

may proceed in the District Court. For these reasons, we vacate the judgment of the District Court and remand for proceedings consistent with this opinion.

Dissent by: JOHN M. WALKER, JR.

Dissent

JOHN M. WALKER, JR., Chief Judge, dissenting:

Because I would affirm the district court's dismissal based on the doctrine of primary jurisdiction, I respectfully dissent.

The majority, faulting the district court for dismissing the complaint on the basis that the PHC has primary jurisdiction, **[*74]** cites two rationales for primary jurisdiction--consistency of rulings and agency expertise--and concludes that neither applies here. I agree that the first rationale does not apply, but believe that the second does. Moreover, a third reason not discussed by the majority, judicial economy, supports invocation of the doctrine.

[25]** At its core, Tassy's complaint is that the hospital has wrongly suspended his privileges and, accordingly, he seeks the reinstatement of his privileges as well as monetary damages. The hospital's authority to suspend Tassy's privileges is governed by *N.Y. Pub. Health Law § 2801-b(1)*. *Section 2801-b(2)* provides that a person claiming that a suspension of his privileges was in violation of subsection (b)(1) may file a complaint with the PHC. Were Tassy to do so, as I think should be required, the PHC would have to decide whether "standards of patient care, patient welfare, the objectives of the institution or [Tassy's] character or competency" warranted suspension or reinstatement. See *N.Y. Pub. Health Law § 2801-b(1)*. Tassy would argue, presumably, that they did not warrant suspension; that, because of discrimination, others similarly situated were not so disciplined; and that, given his medical expertise and record of performance relative to others, he should be reinstated. The hospital would have to defend these charges. All of this is squarely within the PHC's jurisdiction.

There are three likely outcomes of the proceedings before the PHC: (1) a determination in Tassy's **[**26]** favor; (2) a determination in the hospital's favor; and (3) a mediated settlement. Only in the event of outcome (2) would it be necessary for Tassy to proceed with his federal action. And, if that were to occur, the federal court would have the benefit of the answers to fact questions from the agency charged with disputes of this sort among professionals. Such answers would be of great assistance in resolving the federal claims that Tassy has presented in his complaint and in determining whether his privileges should be restored.

The majority disputes this point. It reasons that the PHC's medical expertise would not avail the court in this case because the "primary factual issue is whether Tassy committed the alleged sexual harassment, the resolution of which does not require the PHC's expertise." Maj. Op., supra, at **[10].** I do not think the factual inquiry invoked by Tassy's discrimination claims will be so limited.

Tassy claims that the harassment charges, even if true, were a pretext for the hospital's suspension of his privileges, which was in fact motivated by discriminatory animus. Central to this question, of course, is how the hospital disciplined other similarly situated doctors. In his complaint, Tassy **[**27]** alleges that appellees violated *§ 1981* and discriminated against him on the basis of his race and national origin by "acting in a malicious manner, fostering baseless charges and taking draconian measures against plaintiff, a black Haitian, which have not been taken against white doctors accused of much more serious indiscretions and much more significant misconduct." (Emphasis added). Similarly, in his reply brief, Tassy states that his claim of racial discrimination is shown in part by the "frivolous nature of the charges against Dr. Tassy, his excellent job performance and the studied neglect of medical incompetence of Caucasians." (Emphasis added).

Thus, as is apparent from Tassy's own allegations of pretext, the factual issues in this case will go beyond whether Tassy harassed his co-workers. The factual issues will embrace the question whether, even if the hospital had a legitimate reason to suspend Tassy's privileges, the hospital **[*75]** has treated similarly situated physicians in the same way and whether the medical incompetence of other doctors was overlooked. More precisely, adjudication of Tassy's claims by this court will entail at least two inquiries that, **[**28]** given their fact-intensive character in the peculiar context of the practice of medicine, could be aided by the expertise of the state agency: (1) whether Tassy, a psychiatrist accused of abusive and harassing conduct, is similarly situated with other physicians who have different specialties, committed different acts of misconduct, or have different employment histories and characters; and (2) whether, in its employment decisions, the hospital has consistently applied the statutorily defined reasons for the suspension of privileges, which are "based on specialized medical considerations." See *Gelbard v. Genesee Hosp., 87 N.Y.2d 691, 696, 664 N.E.2d 1240, 1241, 642 N.Y.S.2d 178 (1996)*. [1] For example, in determining whether Tassy's privileges were wrongfully suspended, the PHC would likely shed light on questions such as, for example, whether the hospital might have had a legitimate non-discriminatory reason to act more vigorously against accusations of abusive conduct by a psychiatrist, who counsels vulnerable individuals, than against a surgeon or pathologist.

[29]** Finally, the majority does not address judicial economy, a third factor that, in addition to consistency in rulings and technical expertise, supports invocation of the doctrine of primary jurisdiction. Although the Supreme Court has yet to rely on this factor, we have done so and, in this case, judicial economy militates in favor of invoking the doctrine. As we noted in a case involving the same state agency, "we also believe that judicial economy will be best served by requiring [plaintiff] to file a complaint with the PHC before seeking judicial relief." *Johnson v. Nyack Hosp., 964 F.2d 116, 123 (2d Cir. 1992)*. Moreover, considerations of judicial economy overlap to a certain extent with those of agency expertise: the expertise of the PHC, particularly in the area of mediating disputes between health-care professionals, could prove helpful to the court in addition to promoting judicial economy. As we stated in Johnson, the "PHC may yet propose a solution that will end the current hostilities between [the parties] without judicial intervention. At the very least, the PHC should be given a chance to try." *964 F.2d at 123*. The New York Court of **[**30]** Appeals has similarly "recognized the vital mediation role served by the PHC in providing a professionally competent forum in which to resolve disputes at any early state." *Gelbard, 87 N.Y.2d at 697, 664 N.E.2d at 1242* (citation and internal quotation marks omitted). One might think that the courts would welcome the opportunity for such pre-litigation dispute resolution in a case such as this.

I also think that in many cases the parties would as well. To be sure, it is **[*76]** essential that the courts should be available to hear serious and important claims, such as those raised by Tassy. However, it is also important to remember that a lawsuit frequently is a distasteful and needlessly counter-productive way to resolve a dispute. This is particularly so when the dispute is between professionals and involves questions of professional reputation, a professional's lifeblood. Under such circumstances, the proceeding before the PHC may "often avoid[] the unpleasant task of besmirching a physician's reputation by[] 'using its professional expertise to identify and discourage groundless claims, [and] to mediate and to conciliate disputes between health-care professionals. **[**31]** '" *Johnson, 964 F.2d at 123* (quoting *Cohoes Mem'l Hosp. v. Dep't of Health, 48 N.Y.2d 583, 589, 399 N.E.2d 1132, 1135, 424 N.Y.S.2d 110 (N.Y. 1979))*.

With respect, I dissent.

End of Document

---

[1] In making this point, I do not mean to suggest, as the majority states, Maj. Op., supra, at **[11 n.3]**, that the PHC will analyze Tassy's *§ 1981* claim. Rather, my point is that the agency's investigation of whether Tassy's privileges were wrongfully suspended, which the PHC is authorized under New York law to perform, would produce factual determinations that would aid this court's analysis of Tassy's *§ 1981* claim in the ways described above. Given the inevitable overlap of Tassy's wrongful suspension and *§ 1981* claims, the PHC would consider many of the same factual, if not legal, issues as this court would. Nor is there any requirement that the same claims must be brought before both this court and the PHC. See *Johnson v. Nyack Hosp., 964 F.2d 116 (2d Cir. 1992)* (affirming dismissal of plaintiff-physician's antitrust claims for plaintiff-physician's failure to file a complaint with the PHC first).

ACT, Inc. v. Sylvan Learning Sys.

United States Court of Appeals for the Eighth Circuit

HN1[] **Standards of Review, De Novo Review**

Summary judgment shall be granted on motion of a party if the record shows there is no genuine issue as to any material fact and the moving party is entitled to a judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. An appellate court reviews de novo, applying that same standard. The appellate court considers the record in the light most favorable to the non-moving party and gives the non-moving party the benefit of all reasonable inferences that may be drawn from the evidence.

HN2[] Self-Regulating Entities, National Association of Securities Dealers

To be successful under Iowa law on its claim for tortious interference with contractual relations, a plaintiff must be able to prove five elements: (1) that the plaintiff had a contract with a third party; (2) that the defendant knew of the contract; (3) that the defendant intentionally and improperly interfered with the contract; (4) that the interference caused the third party not to perform, or made performance more burdensome or expensive; and (5) that the plaintiff was damaged as a result.

Securities Law > Regulators > Self-Regulating Entities > National Association of Securities Dealers

Torts > ... > Commercial Interference > Contracts > General Overview

HN3[] Jury Trials, Jury Instructions

It is not necessary under Iowa law that a defendant knew of the existence of specific agreements in order for liability for tortious interference with contractual relations to attach. All that is required is proof of knowledge of facts which, if followed by reasonable inquiry, would have led to the disclosure of the contractual relationship between the plaintiff and a third party.

Judges: Before BOWMAN, RICHARD S. ARNOLD, and WOLLMAN, Circuit Judges. RICHARD S. ARNOLD, Circuit Judge, concurring in part and dissenting in part.

Opinion by: BOWMAN

Opinion

[*660] BOWMAN, Circuit Judge.

This case arises from agreements entered into by Sylvan Learning Systems, Inc., and the National Association of Securities Dealers, Inc. (NASD), concerning the operation and transfer of computer-based testing (CBT) centers owned by NASD. ACT, Inc., contends that its own dealings with NASD before Sylvan came on the scene and Sylvan's behavior in doing business with NASD provide the basis for its claims under Iowa state law for tortious interference with contractual and prospective business relations and for its federal antitrust **[**2]** claim. ACT appeals from the final judgment of the District Court [1] in favor of Sylvan on all of ACT's claims and from a later order awarding costs to Sylvan. We affirm.

I.

At the time of the events leading up to this lawsuit, ACT was a non-profit corporation providing clients with, among other things, standardized testing for academic and professional purposes. Sylvan was furnishing high-security computer-based testing and other educational services to its customers. In 1993, NASD owned and operated a network of CBT centers providing certification testing to stock brokers. In the early 1990's, ACT became interested in the CBT market and to that end entered into two agreements with NASD.

The first agreement was a Memorandum of Understanding (MOU) executed by both parties in August 1993 **[**3]** stating that ACT and NASD were entering into "a non-exclusive relationship that facilitates mutual development of business opportunities involving computer testing services." 1993 Memorandum of Understanding between American College Testing and National Association of Securities Dealers (hereinafter MOU) at 1, P A.1. The agreement recognizes that ACT wished to provide CBT services to some of its clients and that NASD already was providing such services through the nationwide testing centers it operated. The agreement says nothing about ACT acquiring NASD's testing centers, indicating only that "ACT's corporate plan calls for it to eventually administer computerized testing through its own network **[*661]** of centers," without suggesting how ACT would establish those centers. Id. at 2, P A.4.

In May 1995, NASD and ACT jointly executed an interim letter agreement (Interim Agreement). The letter's purpose was to "supplement the parties' MOU and govern their relationship" until negotiations "for the joint delivery of computer-based assessment services" resulted in the execution of a "final" agreement. Letter of May 3, 1995, from Gerard F. Foley, NASD senior vice-president, to RickiAnn Saylor, **[**4]** ACT vice-president, Re: Interim Test Assessment Services Agreement (hereinafter Interim Agreement) at 1. The Interim Agreement was to terminate August 1, 1995, unless "ACT continue[d] to provide assessment services to NASD after August 1, 1995, without the parties' having executed the" final agreement. Id. at 3, P 9. In that event, the parties were to continue to be bound by the terms of the Interim Agreement until terminated by written agreement of ACT and NASD. As with the MOU,

---

[1] The Honorable Michael J. Melloy, United States District Judge for the Northern District of Iowa. Judge Melloy has since been appointed United States Circuit Judge for the Eighth Circuit and currently serves in that capacity.

the agreement was not exclusive, clearly was expected to be short term, and did not involve the transfer of NASD's CBT centers to ACT.

A third proposed agreement between ACT and NASD, which never was executed by NASD, was in the form of a letter dated December 4, 1995, from ACT to NASD. Under the terms of this Proposed Letter Agreement, ACT was to provide "technology-based assessment services" to NASD from January 1996 through December 2003. Letter of Dec. 4, 1995, from Richard L. Ferguson, ACT president, to James P. O'Donnell, NASD executive vice-president, Re: Letter Agreement (hereinafter Proposed Letter Agreement) at 1. Subject to certain conditions, NASD was to "assign all of its testing **[**5]** centers to ACT on January 1, 1998." Id. at 2, P 5. But instead of entering into this agreement with ACT, NASD decided to accept a last-minute offer made by Sylvan. Under the terms of that offer, Sylvan initially would manage NASD's CBT centers and eventually NASD would transfer the centers to Sylvan. The Sylvan-NASD agreements were executed in March 1996.

After closing the deal with Sylvan, NASD reached a settlement with ACT on the termination of the MOU and the Interim Agreement. ACT then sued Sylvan in November 1996. The complaint included allegations in five counts: Count I, Sylvan tortiously interfered with ACT's contractual relations with NASD; Count II, Sylvan tortiously interfered with ACT's prospective business advantage with NASD; Count III, Sylvan tortiously interfered with ACT's current and prospective contractual relations with Regents College; Count IV, Sylvan monopolized the relevant market in violation of *§ 2* of the Sherman Act, *15 U.S.C. § 2*; and Count V, Sylvan attempted to monopolize the relevant market. Sylvan sought summary judgment on all counts; the District Court granted Sylvan's motion on Counts I, II, and III and initially denied **[**6]** judgment on Counts IV and V. After granting Sylvan's motion in limine on the issue of antitrust damages, the court granted Sylvan's renewed motion for summary judgment on Counts IV and V. [2]

II.

HN1[] Summary judgment shall be granted on motion of a party if the record shows "there is no genuine issue as to any material fact and . . . the moving party is entitled **[*662]** to a judgment as a matter of law." *Fed. R. Civ. P. 56(c)*. We review de novo, applying that same standard. We consider the record in the light most favorable to ACT and give ACT the benefit of all reasonable inferences that may be drawn from the evidence. See *Netland v. Hess & Clark, Inc., 284 F.3d 895, 898 (8th Cir. 2002)* (standard of review).

HN2[] To be successful under Iowa law on its claim for tortious interference with contractual relations, ACT must be able to prove five elements: (1) that it had a contract with NASD; (2) **[**7]** that Sylvan knew of the contract; (3) that Sylvan "intentionally and improperly interfered with the contract"; (4) that the interference caused NASD "not to perform, or made performance more burdensome or expensive"; and (5) that ACT was damaged as a result. *Gibson v. ITT Hartford Ins. Co., 621 N.W.2d 388, 399 (Iowa 2001)* (citations to quoted cases omitted). The District Court held that ACT could not prove that Sylvan knew about the MOU and the Interim Agreement. Viewing the evidence in the light most favorable to ACT, the court further determined that the Proposed Letter Agreement did not amount to a contract. On appeal, ACT contends that summary judgment was improper because genuine issues of material fact remain on these issues.

A.

We consider first Sylvan's knowledge of the MOU and the Interim Agreement. As ACT points out, ***HN3***[] it is not necessary under Iowa law that Sylvan knew of the existence of the specific agreements in order for liability to attach. All that is required is proof of "knowledge of facts which, if followed by reasonable inquiry, would have led to the disclosure of the contractual relationship between" ACT and NASD. *Revere Transducers, Inc. v. Deere & Co., 595 N.W.2d 751, 764 (Iowa 1999)* **[**8]** (quoting as a correct statement of the law a jury instruction from the case on appeal). But even though only inquiry notice is required, we conclude that ACT cannot prove the necessary knowledge on the part of Sylvan.

---

[2] ACT did not oppose Sylvan's motion for summary judgment on Count III, and that judgment is not before us on appeal.

ACT directs our attention to several parts of the record to support its position that the question of Sylvan's knowledge of the MOU and the Interim Agreement should be decided by a jury. [3] **[**10]** First, ACT points out that Sylvan's chief financial officer testified that he knew that ACT and NASD had a business relationship. The witness's undisputed testimony, however, was that he was unaware that ACT was making a competing bid for a long-term contract with NASD and that he did not know of any relationship between NASD and ACT until NASD had told Sylvan that it could submit a bid for the CBT business. As ACT notes, Sylvan's co-CEO also was asked at his deposition if he knew "that NASD had some sort of a business relation with ACT." Deposition of R. Christopher Hoehn-Saric at 332 (May 13, 1999). He **[*663]** answered that he was aware NASD and ACT had done some co-marketing and in a later deposition said that he had seen them sharing space at trade shows, but he said he was not familiar **[**9]** with the specifics of the relationship. There also is some evidence that Sylvan employees who were involved in the NASD bid became aware that ACT and NASD were sharing some CBT centers. But they were told about that only after Sylvan and NASD were well into discussions on a long-term agreement between them and only because some parts of the short-term agreements with ACT might have needed to be accommodated in any Sylvan-NASD agreement. This evidence is insufficient to prove that Sylvan was on notice that it should have investigated further to see if the long-term operating and transfer agreements it was proposing to NASD would interfere with standing short-term co-marketing agreements NASD already had with ACT. [4]

[11]** ACT further points out that Sylvan became aware that ACT was making a competing bid for the operation and eventual acquisition of NASD's CBT centers at the same time Sylvan itself was preparing a bid. ACT's evidence does show that Sylvan knew, as it was preparing its proposal, that NASD was in discussions with ACT to reach a similar agreement and that NASD staff were making recommendations in support of ACT's proposal. Evidence that Sylvan knew ACT was in discussions with NASD on a long-term contract is not equivalent, however, to evidence that would have put Sylvan on notice that ACT already had interim agreements with NASD.

We conclude that the evidence in the summary judgment record of Sylvan's knowledge of the MOU and the Interim Agreement, even viewed in the light most favorable to ACT's position, is insufficient as a matter of law to create a jury question on an essential element of ACT's claim: was Sylvan on notice that it should investigate whether ACT already had contracts that would be breached if Sylvan successfully closed a deal with NASD to operate and eventually acquire NASD's CBT centers? Summary judgment on ACT's claim for tortious interference with the MOU and the **[**12]** Interim Agreement is affirmed.

B.

---

[3] ACT also contends that Sylvan did not move for summary judgment on the basis of Sylvan's lack of knowledge of the MOU and the Interim Agreement. But Sylvan did note the existence of the MOU and the Interim Agreement in its memorandum in support of its motion for summary judgment. It is true that Sylvan focused primarily on the Proposed Letter Agreement, but then so did ACT's complaint. We conclude that ACT was sufficiently on notice that it should defend the summary judgment motion on all five elements of tortious interference with contract and address the knowledge question as to all the purported agreements on which it was basing its claim. In any event, this Court has indicated that ***HN4***[] we may affirm a summary judgment on any ground supported by the record. Ozark Heartland *Elecs., Inc. v. Radio Shack, 278 F.3d 759, 763 (8th Cir. 2002)*.

[4] It is arguable that ACT brought the wrong cause of action on the MOU and the Interim Agreement. Both of these agreements were non-exclusive, short-term agreements, intended to be temporary. Neither involved the transfer of the CBT centers from NASD to ACT -- unlike Sylvan's ultimate agreements with NASD, the transactions which allegedly interfered with ACT's purported contracts with NASD. It is true that NASD, after failing to reach a long-term agreement with ACT, compensated ACT and agreed to other terms and conditions to resolve differences that arose upon termination of the MOU and the Interim Agreement. But it appears that ACT's recovery of expenses was contemplated by the terms of the agreements because the agreements were terminable at will. Under Iowa law, "contracts terminable at will are more properly protected as a prospective business advantage rather than as a contract. Consequently the higher standard of proof requiring substantial evidence that the defendant's predominant or sole motive was to damage the plaintiff was required." *Compiano v. Hawkeye Bank & Trust of Des Moines, 588 N.W.2d 462, 464 (Iowa 1999)* (citation omitted); see also infra pt. III (discussing Iowa cause of action for tortious interference with prospective business advantage). We also note, as to the damages element of ACT's cause of action, that the record does not reflect that ACT sought to prove and recover damages based on the termination of these short-term agreements. With the decision we reach today, however, it is unnecessary for us to address either of these issues.

As for the Proposed Letter Agreement, Sylvan's knowledge of it is **[*664]** immaterial because ACT's evidence is insufficient as a matter of law to prove that the letter was indeed a contract. ***HN5***[] "If there is no contract, there can be no interference." *Tredrea v. Anesthesia & Analgesia, P.C., 584 N.W.2d 276, 287 (Iowa 1998)*.

The purported agreement opened with these sentences:

> Pursuant to our recent meetings and conversations, this letter sets forth terms to which [ACT] is prepared to agree with respect to ACT's providing technology-based assessment services to [NASD]. *If the NASD agrees to these terms*, please sign one of the copies of this letter and return it to me for ACT's files.

Proposed Letter Agreement at 1 (emphasis added). Included in the TERMS section of the letter was this recitation:

> 1. *Subject to approval* of the terms reflected in this letter by NASD's Board of Directors at its January 1996 meeting, the parties will enter into an agreement . . . in January 1996 that implements this letter agreement and supplements the basic terms provided for herein.

Id. (emphasis added).

[13]** No NASD representative signed the agreement on behalf of the organization, and the NASD board never approved it. Notwithstanding this undisputed evidence, ACT argues there is a genuine issue of material fact on whether there was a contract. According to ACT, there was a meeting of the minds between NASD and ACT as a result of discussions that preceded the drafting of the proposed letter agreement, with ACT believing it was the only entity contending for the sort of long-term operation and asset-transfer agreement that its proposal contemplated. Nevertheless, when NASD did tell ACT that it would be considering a proposal from Sylvan, ACT's president did not cry "breach" but instead went to work on a counterproposal, stating in a memorandum to two of his employees, "Jim [O'Donnell, NASD executive vice-president] indicated that he continues to favor ACT but that he must entertain the Sylvan proposal. Even so, I don't believe that we can or should underestimate the potential of a reversal in NASD's position." Memo. from Dick Ferguson to Joe Pugh and Ricki Saylor (Dec. 22, 1995) at 1, P 7. Ferguson also wrote, "I believe that ACT is still the 'favored' partner for NASD, but, *until* **[**14]** *we have a written commitment*, we can't be certain that the relationship as laid out in recent weeks will proceed." Id. at 2 (emphasis added). These are not the words of someone who believes he has cinched a deal. Notwithstanding his deposition testimony that he thought an "agreement" had been reached, his contemporaneous writing clearly demonstrates that ACT's president did not believe the parties had a legally binding contract. In any event, on its face the letter acknowledges that the terms therein are those to which ACT -- not NASD -- was prepared to agree. The use of the conjunction "if" in the opening paragraph of the letter demonstrates that NASD's agreement with those terms was not a foregone conclusion, at least not in the mind of ACT's president, who sent NASD the Proposed Letter Agreement on behalf of ACT. And, as we have said, no NASD representative ever manifested agreement with the terms that ACT was proposing because no NASD representative ever signed a copy of the letter. See *Magnusson Agency v. Pub. Entity Nat'l Co.- Midwest, 560 N.W.2d 20, 26 (Iowa 1997)* ***HN6***[] ("All contracts must contain mutual assent.").

ACT contends that proof of the existence **[**15]** of a contract can be found in the "extensive evidence demonstrating that **[*665]** ACT and NASD . . . had begun implementing" the purported agreement. Br. of Appellant at 26. While we think ACT's characterization of the evidence is hyperbolic, there is evidence in the record that both ACT and NASD had made staff assignments to effectuate the transfer; that NASD employees were told they would soon be working for ACT; and that employees from NASD had meetings and video conferences to discuss the transfer. This is not, however, as ACT suggests, evidence of performance that would prove the formation of the contract. Instead, it is evidence that employees were taking preliminary steps to plan for the logistics of the transfer if and when the agreement actually was finalized. As the president of ACT wrote in the December 22 internal memorandum, it had been his position "all along" that "no hiring should occur until we have a written agreement in hand" and no third-party contracts involving implementation of the agreement as negotiated to date should be entered into "until we have a signed agreement in hand." Memo. from Dick Ferguson to Joe Pugh and Ricki Saylor (Dec. 22, 1995) at 2. By his own **[**16]** words, ACT's president admitted his belief that the unsigned letter agreement was not an enforceable contract.

Further, it is undisputed that the NASD board of directors never approved the terms of the letter as required by the language of the letter itself, and so the follow-up January 1996 agreement that ACT proposed would implement and supplement the Proposed Letter Agreement never happened. Notwithstanding the clear language in the letter, ACT questions whether board approval was really necessary. By ACT's reckoning, its president's December 22 memorandum supports its statement that "NASD informed ACT that it was not certain that board approval was even required." Br. of Appellant at 27. Whatever NASD's vice-president may have said on the matter in a telephone conversation with ACT's president is irrelevant here because the Proposed Letter Agreement -- by its own terms -- indicated that the final implementing and supplementing agreement would be negotiated only after the NASD board approved the Proposed Letter Agreement. ACT also suggests that its "personnel understood that the board's approval was essentially a 'formality.'" Br. of Appellant at 27. Be that as it may, the Proposed **[**17]** Letter Agreement -- drafted by ACT -- required such approval, however much a foregone conclusion the ACT employees may have thought it was. The testimony of everyone involved in the negotiations was to the same effect: NASD board approval, however nominal, was required, and it was not forthcoming.

Citing a case from a California state court, ACT argues that NASD board approval was a condition precedent to performance of the contract but not to contract formation. ***HN7***[] Under Iowa law, "conditions precedent are those facts and events, occurring subsequent to the making of a *valid contract*, that must exist or occur before there is a right to immediate performance, before there is a breach of contract duty, and before the usual judicial remedies are available." Employee Benefits Plus, *Inc. v. Des Moines Gen. Hosp., 535 N.W.2d 149, 154 (Iowa Ct. App. 1995)* (emphasis added). Here, of course, NASD did not execute the agreement, so there was no "valid contract." In any event, the plain language of the agreement belies ACT's claim that NASD board approval was a condition precedent: it is the final agreement, that is, the future formation of a contract to implement the **[**18]** Proposed Letter Agreement, that hinged upon NASD board approval of the Proposed Letter Agreement. As ACT itself notes, the letter "provided that the parties would enter **[*666]** into a **further** agreement that **implemented** the parties' agreement if the NASD board approved the terms" of the Proposed Letter Agreement. Br. of Appellant at 29. There was no board approval and consequently there was never either an "agreement" or a "further agreement." In short, there was no contract to perform, with or without conditions.

We hold that ACT cannot prove, on this record, that the Proposed Letter Agreement was a contract. That writing therefore cannot be the basis of ACT's cause of action against Sylvan for tortious interference with contract. The District Court properly granted summary judgment to Sylvan on ACT's claim under Iowa law for tortious interference with the Proposed Letter Agreement.

III.

ACT contends that the District Court erred in granting summary judgment to Sylvan on ACT's claim that Sylvan tortiously interfered with ACT's prospective business relationship with NASD. The District Court held that ACT was unable to demonstrate any genuine issue of material fact on whether **[**19]** Sylvan, in submitting its bid to NASD, intentionally and improperly interfered with ACT's relationship with NASD. See *Tredrea, 584 N.W.2d at 283-84* (listing and explaining the elements of a claim of tortious interference with a prospective business contract). That is, the court concluded that ACT cannot prove, on this record, that Sylvan acted with the "sole or predominant purpose . . . to financially injure or destroy" ACT, ***HN8***[] substantial proof of which was required for ACT to sustain its claim. *Id. at 283* (citations to quoted cases omitted). "In a competitive business setting, this rule of strict proof operates 'to avoid opening the door to virtually limitless suits of a highly speculative and remote nature.'" *Id. at 287* (citations to quoted cases omitted).

HN9[] Because we are reviewing a decision granting summary judgment to Sylvan, ACT is entitled to the benefit of all reasonable inferences that may be drawn from the evidence. It is not entitled, however, to the benefit of unreasonable inferences, those that amount to nothing more than mere conjecture. See *Mathes v. Furniture Brands Int'l, Inc., 266 F.3d 884, 885-86 (8th Cir. 2001)*. **[**20]** After de novo review of the summary judgment record, we conclude that ACT does not have substantial proof that Sylvan's proposal to NASD was made solely or predominantly to financially injure or destroy ACT.

In support of its argument that factual issues remain that should be decided by a jury, ACT relies primarily on a document to which the District Court gave short shrift in reaching its decision. ACT quotes for us "explicit admissions" from what it calls "Sylvan's own documents":

> Sylvan was compelled to intervene [in the NASD/ACT contract] for two reasons. For one, Sylvan naturally loathes the prospect of competition in CBT delivery from any corner. Second [the Educational Testing Service ("ETS")] loathes the prospect of its arch-rival ACT in control of a testing network. ETS is Sylvan's most influential customer in the academic market and numbers among its top three customers across all markets. When ETS is unhappy, Sylvan too is unhappy.

***

> . . . Sylvan was willing to accept [the] unfavorable terms [of the NASD deal] to keep out the competition and appease ETS.

And:

> Sylvan gave NASD a sweetheart deal to gain control of its sites, just **[**21]** to keep ACT out of the CBT market.

[*667] Br. of Appellant at 34, 35 (quoting M. Ford, Sylvan Prometric: An Account of its Business Lines, vol. I (Aug. 1997) (draft) at 27-28; M. Ford, Sylvan Prometric: An Analysis of its Competitive Position, vol. II (Aug. 1997) (draft) at 37 (alterations by ACT)). In its main brief, ACT neglects to explain the genesis of these statements. In fact, the quoted language is from drafts of documents prepared by Michelle Ford, a graduate student in business whom Sylvan hired as a summer intern in 1997 for the purpose of preparing background reports on computer-based testing. Ford had no experience in computer-based testing and little knowledge of the business when she went to work for Sylvan. It is undisputed that neither Ford nor Nicholas Kouwenhoven, the Sylvan employee who was Ford's supervisor for the summer, had personal knowledge of Sylvan's decision to bid for the NASD business or the mechanics of preparing that bid. The same is true of every Sylvan employee Ford interviewed in preparing the reports. Indeed, Ford agreed that the language in the reports suggesting that Sylvan did not like competition in the CBT market was her own **[**22]** and that she did not discuss her speculation with any other Sylvan employee. Deposition of Michelle Ford at 228 (Jan. 14, 1999).

After considering the background of these documents (but without going so far as to declare them inadmissible), the District Court in reaching its decision gave "little, if any weight" to the statements cited by ACT. Order of Dec. 30, 1999, at 19. ACT charges that this demonstrates that the court improperly weighed the evidence and made credibility determinations. We disagree. Putting aside the questionable admissibility of these documents, we conclude that the statements taken from the reports are not evidence, much less substantial evidence, that Sylvan acted with the predominant purpose to financially injure or destroy ACT. They are not admissions of a Sylvan agent but merely the conjecture of a summer intern who lacked any personal knowledge of Sylvan's motivations in submitting its proposal to NASD a year and a half before and who did not even interview any Sylvan employees who might have had such knowledge. This speculation by a temporary employee is not, as a matter of law, substantial proof that Sylvan's primary purpose in pitching a deal to NASD **[**23]** was to financially injure or destroy ACT.

Even so, according to ACT, it came forward with sufficient evidence to create a genuine issue on whether Sylvan's business justifications for wanting to do a deal with NASD were pretextual, so summary judgment was improper. Sylvan's co-CEO testified that the company had four reasons for submitting its proposal, as written, to NASD: NASD's test volume would help fill Sylvan's excess testing capacity; NASD was a prestigious and desirable business partner; NASD made it clear it was seeking to get its CBT centers off its books, and that is why the asset transfer was included in Sylvan's proposal even though Sylvan did not have need for some of the testing centers; and NASD had CBT centers in areas where Sylvan could use additional testing capacity. ACT attempts to construe the record so as to show a genuine issue on whether the claimed business purposes are legitimate. But the supposed evidence to which ACT points requires us to draw inference upon inference in order to conclude there might be a material fact issue lurking somewhere. We decline to do so, as did the District Court.

ACT argues that the necessary evidence of pretext is found in **[**24]** Sylvan's admitted goal of underbidding ACT on the NASD contract in order "to blow the doors off" **[*668]** ACT's pending proposal, and doing so at financial risk to itself. Deposition of Derek W. Linden at 43 ("The one line I recall from the meeting is Doug Becker [Sylvan's co-CEO] saying that they would submit a proposal to us that would blow the doors off any other proposal we may have received."). Again, we seriously question the soundness of the inferences that we must draw from the evidence in order to agree with ACT's assessment. See *Nat'l Parcel Servs., Inc. v. J.B. Hunt Logistics, Inc., 150 F.3d 970, 971 (8th Cir. 1998)* ("The passing remark by [defendant] that it could 'take you out' is not the kind of competitive threat that will support a prima facie case of tortious interference.") (applying Iowa law in case where defendant cut prices so low it lost money). Making a bid below cost is not, on its face, a bad business move, particularly when Sylvan had numerous other customers who were paying cost-plus. Cf. *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 594, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)* ("Cutting prices in order **[**25]** to increase business often is the very essence of competition. Thus, mistaken inferences in cases such as this one are especially costly, because they chill the very conduct the antitrust laws are designed to protect.") (predatory pricing case under federal ***antitrust law***). Likewise, as Sylvan acknowledged to NASD from the beginning, some of the test centers were expected to be (and in fact were) closed after Sylvan acquired them. As Sylvan explained, however, with no contrary evidence from ACT, NASD had made it clear that it wanted the CBT centers off its books and that an offer for the centers was a necessary part of doing a deal. Duplicative centers indeed were closed, but it is undisputed that NASD centers remained open in those locations where the extra capacity was needed.

It may well be, as ACT argues, that "Sylvan did not want ACT to acquire the NASD test business and test centers and thereby become a competitor." Reply Br. of Appellant at 17; see also Br. of Appellant at 34 ("Substantial evidence demonstrates that Sylvan was motivated by a desire to ensure that ACT did not acquire the NASD centers and thereby became [sic] a competitor."). If ACT had won NASD's business, **[**26]** Sylvan could not. Keeping one step ahead of the competition -- whoever it might be -- was in Sylvan's self-interest as a for-profit business and does not automatically translate into a motive to injure or destroy the competitor. See *Fin. Mktg. Servs., Inc. v. Hawkeye Bank & Trust of Des Moines, 588 N.W.2d 450, 459 (Iowa 1999)* (noting "nothing improper" where a bank was acting to improve its own financial position). ACT cannot show there is a genuine issue of material fact on the intent element of its claim simply by presenting evidence that Sylvan preferred to avoid competing with ACT in offering CBT services. Legitimate business practice should not be converted by the courts into an intentional tort. Moreover, we see no evidence to support ACT's intentional tort claim in this record, where evidence of a motivation to acquire the NASD CBT centers before ACT acquired them is the evidence ACT claims to be substantial proof that Sylvan's declared business reasons for doing the deal were pretext for its true goal -- to financially destroy or injure ACT. Even giving ACT the benefit of all the reasonable inferences that may be drawn from the evidence, those inferences **[**27]** do not, even in the aggregate and without considering Sylvan's evidence to the contrary, amount to substantial proof that Sylvan was motivated to do anything other than to win the contract for NASD's business and CBT network, which would result in ACT losing the deal. "Any harm to [ACT] was merely incidental to **[*669]** the accomplishment of [Sylvan's] primary goal": to close the deal with NASD. *Id. at 460*. As a matter of law, ACT cannot show, on the record before the Court, that Sylvan's purpose in making its proposal to NASD was to financially injure or destroy ACT -- much less that such was Sylvan's primary purpose. ACT therefore cannot prove an essential element of its claim.

Viewing the undisputed facts in this record in the light most favorable to ACT, we hold that summary judgment on ACT's claim against Sylvan for tortious interference with prospective contractual relations was properly granted to Sylvan.

IV.

ACT also appeals the decision of the District Court granting the part of Sylvan's motion in limine that challenged the admissibility of evidence of ACT's claimed antitrust damages. The court concluded that ACT could not prove its alleged damages flowed from **[**28]** monopolistic actions illegal under *§ 2* of the Sherman Act, and so ACT would not be permitted to present evidence of such damages.

HN10[] Ordinarily, we review a district court's ruling on a motion in limine for abuse of that court's discretion. See, e.g., *Glastetter v. Novartis Pharms. Corp., 252 F.3d 986, 989 (8th Cir. 2001)* (reviewing decision to exclude expert testimony for abuse of discretion, notwithstanding that the decision resulted in summary judgment for the defendant); *Jauregui v. Carter Mfg. Co., 173 F.3d 1076, 1081 (8th Cir. 1999)* (same). Not until its reply brief did ACT suggest that the standard should be otherwise, contending that the court's "exclusion order was based on a pure error of law" and we should therefore review it de novo. Reply Brief at 19 (citing *United States v. Johansen, 93 F.3d 459, 468 (8th Cir. 1996))*. It is unnecessary for us to decide if ACT properly raised the issue or to determine the appropriate standard, however, because we already have conducted a de novo review of the underlying question: is Sylvan entitled to judgment as a matter of law on the question of whether Sylvan's business justifications **[**29]** for doing the deal with NASD, the conduct claimed by ACT to be in violation of antitrust laws, were pretextual? We have concluded that the answer to that question is "yes." See supra pt. III.

ACT has referred in its brief to Sylvan's large market share in computer-based testing and to Sylvan's acquisition of its potential competitors but has claimed antitrust damages, in the form of lost profits, only from the transaction between Sylvan and NASD. "Liability turns, then, on whether 'valid business reasons' can explain [Sylvan's] actions" in its business dealings with NASD. *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 483, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*.

As we have explained, ACT cannot prove on this record that Sylvan's four business justifications for structuring the transaction with NASD as it did were not legitimate. See supra 14-16. First, it is undisputed that Sylvan's testing capacity was significantly underutilized in some areas and that NASD clients would fill some of the excess capacity. Second, the desirability of partnering with an organization of NASD's prestige is unquestioned. Third, it is also without dispute **[**30]** that Sylvan knew it would have to acquire NASD's CBT network, including some centers that would be redundant to Sylvan's own centers, because NASD made it clear that it wanted those facilities off its books. And finally, it is uncontroverted that some of the gaps in Sylvan's own testing network were closed by the acquisition of NASD's centers. Sylvan's pursuit of an agreement **[*670]** with NASD cannot be characterized as "conduct [that] makes sense only because it eliminates competition." *Trace X Chem., Inc. v. Canadian Indus., Ltd., 738 F.2d 261, 266 (8th Cir. 1984)*, cert. denied, *469 U.S. 1160, 83 L. Ed. 2d 925, 105 S. Ct. 911 (1985)*. ACT's evidence does not create a triable jury question on whether Sylvan's proffered business reasons for doing the deal were legitimate, and ***HN11***[] "when a valid business reason exists for the conduct alleged to be predatory or anti-competitive, that conduct cannot support the inference of a *section 2* violation." *Midwest Radio Co. v. Forum Publ'g Co., 942 F.2d 1294, 1297-98 (8th Cir. 1991)* (citing Aspen Skiing *Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 605, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985))*. **[**31]** In these circumstances, it was correct for the District Court to grant Sylvan's motion in limine, as the damages ACT claims from its failure to close a deal with NASD did not flow from conduct by Sylvan that violated *§ 2*. See *Amerinet Inc. v. Xerox Corp., 972 F.2d 1483, 1494 (8th Cir. 1992)* ***HN12***[] ("If a plaintiff has suffered financial loss from the *lawful* activities of a competitor, then no damages may be recovered under the antitrust laws.") (citation to quoted case omitted)), cert. denied, *506 U.S. 1080, 122 L. Ed. 2d 356, 113 S. Ct. 1048 (1993)*.

V.

Relying on the District Court's decision granting the motion in limine, Sylvan renewed its motion for summary judgment on ACT's claims that Sylvan was liable under *§ 2* of the Sherman Act. The court granted the motion and ACT appeals. [5]

[32]** ***HN13***[] "Antitrust injury, causation, and damages all are necessary parts of the proof" of liability under *§ 2* of the Sherman Act. *Concord Boat Corp. v. Brunswick Corp., 207 F.3d 1039, 1055* (8th Cir.), cert. denied, *531 U.S. 979, 148 L. Ed. 2d 436, 121 S. Ct. 428 (2000)*. As we have explained, any evidence ACT may have of damages it incurred as a result of Sylvan's deal with NASD was properly excluded from the summary judgment record because the alleged damages were not caused by unlawful acts of Sylvan. ACT therefore is unable to prove either causation

[5] The court initially denied Sylvan's renewed motion for summary judgment, noting that ACT had sought not only damages but also injunctive relief and that ACT might be entitled to the equitable relief. The court certified its order granting Sylvan's motion in limine for interlocutory appeal; this Court denied leave to file such an appeal. ACT then dismissed its claim for injunctive relief so that the court would resolve the summary judgment question.

or antitrust injury. It follows that summary judgment was properly granted to Sylvan on ACT's claim of a *§ 2* violation.

VI.

In case number 01-3583, ACT appeals from the order of the District Court denying ACT's motion for review of taxation of costs. ACT moved to dispense with briefing on the issue, so we do not know if ACT has a quarrel with the amount of costs awarded or is challenging the court's authority to award costs as it did. As to the amount of costs, ***HN14***[] "[a] court of appeals lacks jurisdiction to hear an appeal where the sole issue is that the district court abused its discretion as to the amount **[**33]** of costs awarded." *Poe v. John Deere Co., 695 F.2d 1103, 1109 (1982)*. And to the extent ACT is challenging whether the award was necessary and otherwise proper, we see no abuse of discretion. *Bathke v. Casey's Gen. Stores, Inc., 64 F.3d 340, 347 (8th Cir. 1995)* (standard of review).

[*671] VII.

The judgments of the District Court are affirmed in all respects.

Concur by: RICHARD S. ARNOLD (In Part)

Dissent by: RICHARD S. ARNOLD (In Part)

Dissent

RICHARD S. ARNOLD, Circuit Judge, concurring in part and dissenting in part.

I agree that summary judgment was properly entered for defendant on the claim for tortious interference with contract, and I therefore join parts I and II of the Court's opinion.

I also join part VI of the Court's opinion, having to do with taxation of costs.

As to the claim for tortious interference with a prospective business relationship, however, I respectfully dissent. In my view, when this record is considered in the light most favorable to ACT, as it must be on this appeal, there is a genuine issue of material fact as to Sylvan's motivation. Questions of motive are particularly delicate, and summary judgment should be used more sparingly **[**34]** on such questions than on most others. The memorandum prepared by Michelle Ford, which the Court does not hold inadmissible, is sufficient evidence to support ACT's position at this preliminary stage of the case. Ms. Ford was instructed to prepare a document describing the history of Sylvan's dealings with NASD. She did what she was told to do. That she was a summer intern, had little knowledge of the business, and had no experience in computer-based testing, ante at 13, are considerations going to the weight of her evidence, not its admissibility. Certainly there is evidence to the contrary, and a jury could have chosen to disregard Ms. Ford's conclusions. Indeed, one may go so far as to say, if one wishes, that ACT would probably lose this case, were it tried to a jury. But that is not the standard we are to apply at this juncture. I cannot say it would have been irrational, when all of this record, including Ms. Ford's memorandum, is considered, for a jury to find that Sylvan was predominantly motivated by a desire to injure ACT. Among other things, the deal made with NASD was below Sylvan's cost, certainly a potent fact. The directed-verdict standard, or, as we have learned **[**35]** to say, the standard on motions for judgment as a matter of law, is the same as the standard to be applied on motions for summary judgment. This case should have gone to trial on the issue of motivation.

For many of the same reasons, I also dissent from the Court's affirmance of summary judgment for the defendant on the claim under *§ 2* of the Sherman Act. Again, Sylvan puts forward plausible business justifications, but there is evidence to the contrary, and a jury could rationally decide in favor of ACT on this issue.

Holiday Wholesale, et al v. Philip Morris, et al.

United States District Court for the Northern District of Georgia, Atlanta Division

July 11, 2002, Decided ; July 11, 2002, Opinion Filed

Antitrust & Trade Law > Sherman Act > Scope > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN1[] **Sherman Act, Scope**

Contracts or conspiracies to fix prices are illegal per se under *§ 1* of the Sherman Act. *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN2[] **Actual Monopolization, Anticompetitive & Predatory Practices**

There is no dispute that the cigarette industry in the United States is an oligopoly.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Civil Procedure > ... > Summary Judgment > Opposing Materials > General Overview

HN3[] **Antitrust & Trade Law, Sherman Act**

On summary judgment the inferences to be drawn from the underlying facts must be viewed in the light most favorable to the party opposing the motion. But ***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a *15 U.S.C.S. § 1* case. Thus, conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. To survive a motion for summary judgment, a plaintiff seeking damages for a violation of *§ 1* must present evidence that tends to exclude the possibility that the alleged conspirators acted independently.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

Evidence > Inferences & Presumptions > Inferences

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Summary Judgment, Entitlement as Matter of Law**

On a motion for summary judgment, courts should not permit factfinders to infer conspiracies when such inferences are implausible, because the effect of such practices is often to deter procompetitive conduct. Thus, if the factual context renders a nonmovants' claim implausible -- if the claim is one that simply makes no economic sense -- respondents must come forward with more persuasive evidence to support their claim than would otherwise be necessary. Lack of motive bears on the range of permissible conclusions that might be drawn from ambiguous evidence: if defendants had no rational economic motive to conspire, and if their conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy. Conduct that is as consistent with permissible competition as with illegal conspiracy does not, without more, support even an inference of conspiracy.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN5[] **Antitrust & Trade Law, Sherman Act**

It is settled law that a threshold requirement of every antitrust conspiracy claim, whether brought under § 1 or § 2 of the Sherman Act, is an agreement to restrain trade. To prove that such an agreement exists between two or more persons, a plaintiff must demonstrate a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement. It is only in rare cases that a plaintiff can establish the existence of a conspiracy by showing an explicit agreement; most conspiracies are inferred from the behavior of the alleged conspirators and from other circumstantial evidence (economic and otherwise), such as barriers to entry and other market conditions.

Antitrust & Trade Law > Sherman Act > General Overview

HN6[] Antitrust & Trade Law, Sherman Act

Conduct which is as equally consistent with permissible competition as it is with an illegal conspiracy does not, without more, support even an inference of conspiracy.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN7[] Actual Monopolization, Anticompetitive & Predatory Practices

An oligopolistic market is a market in which the dominant participants engage in interdependent or parallel behavior and have the capacity effectively to determine price and total output of goods or services. Conscious parallelism is a process, not in itself unlawful, by which firms in a concentrated market might in effect share monopoly power, setting their prices at a profit-maximizing, supracompetitive level by recognizing their shared economic interests and their interdependence with respect to price and output decisions.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] Actual Monopolization, Anticompetitive & Predatory Practices

It is well settled in the Eleventh Circuit that evidence of conscious parallelism alone does not permit an inference of conspiracy unless the plaintiff either establishes that, assuming there is no conspiracy, each defendant engaging in the parallel action acted contrary to its economic self-interest or offers other plus factors tending to establish that the defendants were not engaging merely in oligopolistic price maintenance or price leadership but rather in a collusive agreement to fix prices or otherwise restrain trade.

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] Antitrust & Trade Law, Sherman Act

The Eleventh Circuit has determined that even when a plaintiff proffers evidence of plus factors, these only create a rebuttable presumption of a conspiracy which the defendant may defeat with his own evidence; this further ensures that unilateral or procompetitive conduct is not punished or deterred. A court must also consider the evidence presented by plaintiffs as a whole and that plaintiffs should be given the full benefit of their proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each.

Civil Procedure > Remedies > Damages > Monetary Damages

Evidence > Inferences & Presumptions > General Overview

HN10[] **Damages, Monetary Damages**

In a typical civil suit for money damages, plaintiffs must prove their case by a preponderance of the evidence.

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

Conduct which is as equally consistent with permissible competition as it is with an illegal conspiracy does not, without more, support even an inference of conspiracy.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN12[] **Antitrust & Trade Law, Sherman Act**

To survive a motion for summary judgment, a plaintiff seeking damages for a violation of *15 U.S.C.S. § 1* must present evidence that tends to exclude the possibility that the alleged conspirators acted independently.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Business & Corporate Compliance > ... > Contract Formation > Acceptance > Meeting of Minds

HN13[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The law specifically recognizes that interdependent oligopolistic behavior is not prohibited by antitrust laws. In fact, the law is careful in the proof it requires in a circumstantial case precisely because it wants to ensure that unilateral or procompetitive conduct is not punished or deterred.

HN14[] **Antitrust & Trade Law, Sherman Act**

The inferences that can be drawn on summary judgment are limited in the antitrust context.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN15[] Summary Judgment, Entitlement as Matter of Law

A court has an obligation to consider summary judgment as it relates to a case in light of the traditional summary judgment standards.

Antitrust & Trade Law > Sherman Act > General Overview

Evidence > Inferences & Presumptions > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN16[] Antitrust & Trade Law, Sherman Act

More is required of inferences in antitrust cases than in run-of-the-mill cases.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN17[] Entitlement as Matter of Law, Appropriateness

If a plaintiff's theory is economically senseless, no reasonable jury can find in its favor, and summary judgment should be granted.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

Evidence > Inferences & Presumptions > General Overview

HN18[] Summary Judgment, Entitlement as Matter of Law

On a motion for summary judgment, to create an issue of fact the inference must be allowable or reasonable.

Evidence > Inferences & Presumptions > General Overview

Evidence > Relevance > Relevant Evidence

HN19[] Evidence, Inferences & Presumptions

To assure itself and the parties that the court's judgment on whether a piece of evidence can be admitted as relevant because it creates a reasonable inference, the import of the piece of circumstantial evidence must actually be of the import that is ascribed to it by plaintiffs. If, when considered in its entirety, it is totally ambiguous or to the opposite effect, it is not relevant and may not be relied upon by the jury.

Evidence > Inferences & Presumptions > General Overview

Evidence > Relevance > Relevant Evidence

HN20[] Evidence, Inferences & Presumptions

In dealing with allowable inferences, a court to a large degree is concerned with relevancy -- that is, whether it makes a fact of consequence more or less likely. *Fed. R. Evid. 401*.

Evidence > Admissibility > Circumstantial & Direct Evidence

Evidence > Types of Evidence > Circumstantial Evidence

Evidence > Relevance > Relevant Evidence

HN21[] Admissibility, Circumstantial & Direct Evidence

Circumstantial evidence does not become relevant simply because it can be used by a skilled advocate to persuade a jury that there was an agreement.

Evidence > ... > Preliminary Questions > Admissibility of Evidence > General Overview

Evidence > Inferences & Presumptions > General Overview

Evidence > Inferences & Presumptions > Inferences

Evidence > ... > Procedural Matters > Preliminary Questions > General Overview

Evidence > Relevance > Relevant Evidence

HN22[] Preliminary Questions, Admissibility of Evidence

It is a court's responsibility to determine the admissibility of evidence. *Fed. R. Evid. 104(a)*. In making this determination, the existence of certain conditions must be found by the judge. *Fed. R. Evid. 104(a)* advisory committee's note. Whether an inference is allowable is really a question of whether it is admissible under *Rule 401*. To determine its admissibility, the court may have to act as a fact finder. *Fed. R. Evid. 104(a)* advisory committee's note. As a fact finder, the court must determine, for example, whether an inference is a product of legitimate methodology or whether the evidence tends to make the existence of a fact that is of consequence more or less probable. *Fed. R. Evid. 401*.

Evidence > Inferences & Presumptions > General Overview

HN23[] Evidence, Inferences & Presumptions

It is said that an inference is unreasonable if a jury must engage in speculation and conjecture to such a degree as to render its finding a guess or mere possibility. The inference must directly and necessarily follow in the context of the case.

Evidence > Inferences & Presumptions > General Overview

HN24[] Evidence, Inferences & Presumptions

An inference will be unreasonable if it is reached through fallacious reasoning.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN25[] Actual Monopolization, Anticompetitive & Predatory Practices

Conscious parallelism and plus factors can be a formulistic expression which does not capture the reality of a case. A plus factor, therefore, needs to have some substance in order to tilt the balance. Merely labeling something a plus factor does not make it so, and a weak plus factor is not sufficient to withstand a motion for summary judgment because the plus factor analysis is really a surrogate for looking at a case in its entirety.

Evidence > Admissibility > Circumstantial & Direct Evidence

HN26[] Admissibility, Circumstantial & Direct Evidence

Direct evidence must be explicit and requires no inferences to establish the proposition or conclusion being asserted.

Antitrust & Trade Law > Sherman Act > General Overview

Civil Procedure > Judgments > Summary Judgment > Evidentiary Considerations

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN27[] Antitrust & Trade Law, Sherman Act

In order to survive a motion for summary judgment, plaintiffs must first produce evidence that defendants engaged in consciously parallel behavior. Then, plaintiffs must show plus factors that tend to exclude the possibility that the defendants merely were engaged in lawful conscious parallelism.

Antitrust & Trade Law > Sherman Act > General Overview

HN28[] Antitrust & Trade Law, Sherman Act

In the context of *15 U.S.C.S. § 1*, facilitating devices are not necessarily sufficient under the law to constitute a plus factor.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN29[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Facilitating practices are not customarily listed in the cases as a plus factor, but they bear on the economic consequences of oligopoly.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN30[] **Actual Monopolization, Anticompetitive & Predatory Practices**

In order to constitute a plus factor, an activity must tend to exclude the possibility that the defendants merely were engaged in lawful conscious parallelism.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Antitrust & Trade Law > Sherman Act > General Overview

HN31[] **Per Se Rule & Rule of Reason, Per Se Violations**

Because in competitive markets, particularly oligopolies, companies will monitor each other's communications with the market in order to make their own strategic decisions, ***antitrust law*** permits such discussions even when they relate to pricing because the dissemination of price information is not itself a per se violation of the Sherman Act.

Antitrust & Trade Law > Sherman Act > General Overview

HN32[] **Antitrust & Trade Law, Sherman Act**

Numerous courts have recognized the difficulty involved in using signaling to form an agreement to fix prices where list prices are not the prices paid by individual customers.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN33[] **Antitrust & Trade Law, Sherman Act**

Courts generally reject conspiracy claims that seek to infer an agreement from communications despite a lack of independent evidence tending to show an agreement.

Antitrust & Trade Law > Sherman Act > General Overview

HN34[] **Antitrust & Trade Law, Sherman Act**

A hope by one company that it can create a disincentive for its competitors to engage in price competition to the detriment of profitability is not evidence of a collusive agreement to fix prices.

Antitrust & Trade Law > Sherman Act > General Overview

HN35[] **Antitrust & Trade Law, Sherman Act**

Where there is an independent business justification for defendant's behavior, an inference of conspiracy is not easily drawn.

Antitrust & Trade Law > Sherman Act > General Overview

HN36[] **Antitrust & Trade Law, Sherman Act**

The logic of any conspiracy argument is that an apparently unprofitable act must reflect some additional cause, such as conspiracy. But the additional cause is needed to explain the challenged behavior only if the defendant believes that his act would be unprofitable. To satisfy this standard, the judge must conclude not only that the defendants were wrong but so very wrong that their explanations should be disbelieved, or that it would be incredible that all the alleged conspirators could be similarly mistaken as to their true interests. The point is that the court's business judgment should not control.

Antitrust & Trade Law > Sherman Act > General Overview

HN37[] **Antitrust & Trade Law, Sherman Act**

It is clearly established that actions taken against economic interest may be a plus factor. However, in analyzing such allegations, the court must be mindful not to engage in second-guessing of companies' business decisions. In the Eleventh Circuit, to show that an act is against economic self-interest the plaintiff must establish that each defendant would have acted unreasonably in a business sense if it had engaged in the challenged conduct unless that defendant had received assurances from the other defendants that they would take the same action.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN38[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The fact that price changes by one producer are quickly met by others establishes only that the producers consciously paralleled each other's prices.

Evidence > ... > Procedural Matters > Preliminary Questions > General Overview

Evidence > Relevance > Relevant Evidence

HN39[] **Procedural Matters, Preliminary Questions**

The law generally disfavors the use of "historical" evidence.

Antitrust & Trade Law > Sherman Act > General Overview

HN40[] **Antitrust & Trade Law, Sherman Act**

Conspiratorial motivation in the sense of a reasonable prospect of increasing profits through collective action is a logical corollary of interdependence. Motivation is thus synonymous with interdependence and therefore adds nothing to it.

Antitrust & Trade Law > Sherman Act > General Overview

HN41[] **Antitrust & Trade Law, Sherman Act**

The presence or absence of a strong motive to enter into an alleged conspiracy could be a plus factor under certain circumstances.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > Price Fixing

HN42[] **Antitrust & Trade Law, Sherman Act**

The mere opportunity to conspire among antitrust defendants does not, standing alone, permit the inference of conspiracy.

Antitrust & Trade Law > Sherman Act > General Overview

Evidence > Inferences & Presumptions > General Overview

HN43[] **Antitrust & Trade Law, Sherman Act**

When considering opportunities to conspire it remains the plaintiff's burden to prove that the defendant succumbed to temptation and conspired. It is not enough to point out the temptation and ask that the defendants bear the onerous, if not impossible, burden of proving the negative that no conspiracy occurred.

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN44[] **Testimony, Expert Witnesses**

Under *Fed. R. Evid. 703*, there must be sufficient facts already in evidence or disclosed by the witness as a result of his or her investigation to take such expert testimony out of the realm of guesswork and speculation.

Civil Procedure > ... > Discovery > Methods of Discovery > Foreign Discovery

Evidence > Admissibility > Conduct Evidence > Prior Acts, Crimes & Wrongs

HN45[] Methods of Discovery, Foreign Discovery

Fed. R. Evid. 404(b) allows jury inferences only where the compared conduct is closely analogous to the conduct at issue in the instant suit.

Antitrust & Trade Law > Sherman Act > General Overview

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN46[] Antitrust & Trade Law, Sherman Act

In the context of the Sherman Act, the "slight evidence" rule is not favored in the Eleventh Circuit.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN47[] Actual Monopolization, Anticompetitive & Predatory Practices

Rising prices do not themselves permit an inference of a collusive market dynamic. Even in a concentrated market, the occurrence of a price increase does not in itself permit a rational inference of conscious parallelism or supracompetitive pricing.

Antitrust & Trade Law > Sherman Act > General Overview

HN48[] Antitrust & Trade Law, Sherman Act

All plus factors are not created equal. A plus factor must tend to exclude the possibility that the defendants merely were engaged in lawful conscious parallelism.

Antitrust & Trade Law > Sherman Act > General Overview

Evidence > Inferences & Presumptions > Presumptions > Rebuttal of Presumptions

Evidence > Inferences & Presumptions > General Overview

HN49[] Antitrust & Trade Law, Sherman Act

Even if a plaintiff can demonstrate a plus factor, that only creates a rebuttable presumption of a conspiracy that a defendant could defeat with his own evidence.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN50[] Actual Monopolization, Anticompetitive & Predatory Practices

Parallel pricing is not sufficient to establish a price-fixing scheme in an oligopoly.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN51[] Actual Monopolization, Anticompetitive & Predatory Practices

An oligopolist raising his price with knowledge that he will have to retract it if significant rivals do not follow is, in a sense, inviting his rivals to follow. Following the leader is a conscious acceptance of that invitation to the end that market prices will be higher than before. Nevertheless, tacit price coordination through recognized interdependence is not deemed to be an agreement under *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN52[] Actual Monopolization, Anticompetitive & Predatory Practices

Antitrust law should not punish competitive acts of reducing prices. Even in an oligopolistic market, when a firm drops its prices to a competitive level to demonstrate to a maverick the unprofitability of straying from the group, it would be illogical to condemn the price cut. The antitrust laws then would be an obstacle to the chain of events most conducive to a breakdown of oligopoly pricing and the onset of competition. Even if the ultimate effect of the cut is to induce or reestablish supracompetitive pricing, discouraging a price cut and forcing firms to maintain supracompetitive prices, thus depriving consumers of the benefits of lower prices in the interim, does not constitute sound antitrust policy.

Opinion

[*1262] **ORDER**

This matter is before the court on Defendant R.J. Reynolds' motion for summary judgment [170-1]; Defendant Brown & Williamson's motion for summary judgment [171-1]; Defendant Lorillard Tobacco Company's motion for summary judgment [173-1]; and Defendant Philip Morris' motion for summary judgment [174-1].

I. BACKGROUND

A. Plaintiffs' Complaint

Plaintiffs are wholesalers **[**3]** and/or distributors that purchase cigarettes directly from Defendants Philip Morris, Inc. ("Philip Morris"), R.J. Reynolds Tobacco Co. ("RJR"), Brown & Williamson Tobacco Corp. ("B&W"), and Lorillard Tobacco Co. ("Lorillard"). In 1994, B&W acquired most of the brands of American Tobacco Co. For the purposes of this litigation, the court refers to both as "B&W." Although not named as a Defendant in this litigation, Plaintiffs allege that Liggett Group, Inc., also participated with Defendants in the alleged conspiracy. *See* Second Amended Complaint, P 27. Named Plaintiffs are Buffalo Tobacco Products, Inc.; F&F Vending Service, Inc.; Holiday Wholesale Grocery Co.; Amsterdam Tobacco Corp.; Boro Park Tobacco; Sunrise Candy & Tobacco Corp.; I. Goldshlack Company; Suwanee Swifty Stores, Inc. D.I.P.; Marcus Distributors, Inc.; Hartz Foods; and Wichita Tobacco and Candy Co. [1] Plaintiffs' complaint alleges **[*1263]** that from a period beginning as early as November 1, 1993, Defendants engaged in a conspiracy to raise, fix, stabilize, and maintain the price of cigarettes in the United States at artificially high and non-competitive levels.

[1] Named Plaintiff ROG-GLO, Ltd. was voluntarily dismissed without prejudice because it no longer met the criteria to be a class representative. *See* Order, June 20, 2001.

[4] B. Procedural History**

On February 18, 2000, a lawsuit was filed in this court alleging antitrust violations against several tobacco companies. After several additional suits were filed, the Judicial Panel on Multidistrict Litigation transferred four additional similar actions to this court. Plaintiffs filed an amended consolidated class action complaint on June 28, 2000 ("First Amended Complaint"). In sum, the First Amended Complaint alleged that Defendants conspired illegally to fix the wholesale prices of cigarettes in the United States during the period from November 1, 1993, to the present. Plaintiffs based the First Amended Complaint on section 4 and section 16 of the Clayton Act, and the alleged conspiracy was said to violate *section 1* of the Sherman Act. The First Amended Complaint also asserted that Defendants fraudulently concealed their price-fixing conspiracy, thereby tolling the four-year statute of limitations generally applicable to federal antitrust actions.

Thereafter, Defendants moved to dismiss Plaintiffs' allegations of fraudulent concealment. In an order dated November 29, 2000, the court dismissed without prejudice Plaintiffs' allegations of fraudulent **[**5]** concealment for failure to satisfy the pleading requirements. The court also struck from the complaint as "evidence pleading" Plaintiffs' foreign market allegations pursuant to *Federal Rule of Civil Procedure 12(f)*. Finally, the court dismissed Plaintiffs' allegations of non-price collusion to the extent they occurred prior to the initiation of the instant conspiracy.

On January 23, 2001, the court granted Plaintiffs' motion for class certification for the following class:

> All persons in the United States (excluding federal, state and local government entities and political subdivisions, and Defendants and their co-conspirators and their respective parents, subsidiaries and affiliates) that purchased cigarettes directly from one or more of the Defendants, or any parent, subsidiary or affiliate thereof, at any time from February 8, 1996 to February 8, 2000.

Order, January 23, 2001, at 13.

On February 22, 2001, the court granted Plaintiffs' motion for leave to file an amended complaint, the "Second Amended Complaint." Defendants again moved to dismiss Plaintiffs' allegations of fraudulent concealment and any claims for relief outside the four-year limitations period. **[**6]** The court dismissed those of Plaintiffs' claims in the Second Amended Complaint barred by the four-year limitations period. *See* Order, June 20, 2001. On February 8, 2002, all Defendants filed motions for summary judgment. The court heard oral arguments on Defendants' motions for summary judgment on April 23, 2002, and permitted the parties additional, limited briefing after oral argument.

C. Facts Relevant to Motions for Summary Judgment

2

Defendants sell cigarettes to direct customers, most often wholesalers, who then sell them to retail outlets. Facts, P 7. Defendants' wholesale price lists are published to direct customers and are quickly a matter of public knowledge. *Id.*, P 8. Wholesalers set the prices for their sales **[*1264]** of cigarettes to retailers, and retailers set the prices for their sales of cigarettes to consumers. *Id.*, **[**7]** P 9 and Resp., P 9.

Generally, there are several "tiers" of cigarettes sold in the United States, including premium and discount cigarettes. *See* Expert Report (Defendants') of Dr. Kenneth G. Elzinga ("Elzinga Report"), at 30. [3] Discount cigarettes are priced below premium brands. *Id.* Cigarette companies also manufacture "deep discount" cigarettes, including private label or generic cigarettes, which are priced lower than discount cigarettes. *Id.* Prior to the

[2] Unless otherwise noted, the facts are taken from those presented in Defendants' Joint Statement of Undisputed Material Facts ("Facts") and admitted by Plaintiffs.

[3] Premium brand cigarettes are sometimes called "full revenue" or "FR" brands, while discount cigarettes are referred to as "value for money" or "VFM" brands.

beginning of 1993, the market share of discount and deep discount cigarettes increased from less than 1% of all cigarettes sold in the United States in 1980 to 33.0% in late 1992 and early 1993. Facts, P 10. In particular, the market share of Marlboro, Philip Morris' premium brand, dropped from 27% in the middle of 1992 to 24% at the end of the same year. Marlboro's share further declined to 21% at the beginning of 1993. *Id.*, P 11. On April 2, 1993, Philip Morris announced a nationwide promotion on Marlboro cigarettes that reduced prices at retail by approximately 40 [cent] per pack. *Id.*, P 13. This announcement became known in the industry as "Marlboro Friday." *Id.* RJR, B&W, and Lorillard responded **[**8]** by initiating similar promotions. *Id.*, P 14. Philip Morris announced further decreases in price to take effect on August 9, 1993. *Id.*, P 15 and Resp., P 15. As a result of Philip Morris' price decreases, the "price gap" between its premium and discount brands was reduced. *Id.*, P 17. RJR matched Philip Morris' August 1993 price reductions and eliminated the price differential between its 85 millimeter and 100 millimeter cigarettes. *Id.*, P 16 and Resp., P 16. B&W and Lorillard instituted similar list price decreases. *Id.*, P 18.

Thereafter, during the time of alleged conspiracy, the following price increases took place:

Date of First Announcement	Amount of Increase
November 8, 1993	$ 2.00 per thousand (4 [cents] per pack)
May 4, 1995	$ 1.50 per thousand (3 [cents] per pack)
April 8, 1996	$ 2.00 per thousand (4 [cents] per pack)
March 6-20, 1997 [4]	$ 2.50 per thousand (5 [cents] per pack)
August 29, 1997	$ 3.50 per thousand (7 [cents] per pack)
January 23, 1998	$ 1.25 per thousand (2.5 [cents] per pack)
April 3, 1998	$ 2.50 per thousand (5 [cents] per pack)
May 8, 1998	$ 2.50 per thousand (5 [cents] per pack)
July 31, 1998	$ 3.00 per thousand (6 [cents] per pack)
November 23, 1998	$ 22.50 per thousand (45 [cents] per pack)
August 27, 1999	$ 9.00 per thousand (18 [cents] per pack)
January 14, 2000	$ 6.50 per thousand (13 [cents] per pack)

[9]** *Id.*, P 26.

D. Plaintiffs' Theory of Conspiracy

Plaintiffs assert that the "economic market **[*1265]** structure of the cigarette industry is highly conducive to collusion" because four companies control 95% of the market and cigarettes are fungible and highly inelastic. Plaintiffs also contend that the industry has faced the "increasingly-desperate" times in the past several decades. Plaintiffs' Response to Defendants' Motions for Summary Judgment ("Pls.' Resp.") at 67. With this context in mind, Plaintiffs note that the popularity of discount cigarettes rose in the early 1990s, resulting in RJR and B&W gaining market share by focusing on the discount **[**10]** market.

In response, Philip Morris drastically reduced the prices of its cigarettes on Marlboro Friday in April 1993. Plaintiffs contend this reduction was taken in order to "restructure the market to make it more conducive to a collusive arrangement." *Id.* Plaintiffs assert that the remaining Defendants ultimately decided to end the price war and agree to increase all prices. Plaintiffs argue that the most significant anti-competitive acts occurred during the formation of the cartel in 1993 and 1994.

Plaintiffs contend Defendants formed the cartel by "signaling" their willingness to accept an offer made by Philip Morris. Through Gary Black, an industry analyst, Defendants communicated the specific conditions necessary for a price increase, who would be the price leader, and Philip Morris' final signal that its conditions for the cartel had

---

[4] On March 6, 1997, RJR announced a list price increase of $ 2.00 per thousand (4 [cents] per pack). Shortly thereafter, Lorillard, Liggett, and B&W matched that increase. On March 20, 1997, Philip Morris announced a price increase of $ 2.50 per thousand (5 [cents] per pack). The other manufacturers then met Philip Morris' higher increase. *Id.*, P 26 n.4.

been met. Plaintiffs further assert that Defendants consolidated the price tiers between premium and discount cigarettes in order to make the conspiracy easier to form and monitor. Plaintiffs argue that Defendants had numerous opportunities to conspire through Committee of Counsel meetings at the Tobacco Institute and negotiations in 1997 and **[**11]** 1998 leading to settlements of the individual state healthcare lawsuits against the cigarette manufacturers and the Master Settlement Agreement ("MSA") covering multistate lawsuits. Plaintiffs also contend that the restriction of pricing authority to the highest ranking officers of the companies facilitated Defendants' conspiracy. Plaintiffs argue that these officials were able to discuss the future pricing of cigarettes during settlement negotiations. [5]

[12]** Plaintiffs also argue that in the fall of 1993, three of the four Defendants implemented a "permanent allocation" system **[*1266]** that was intended to stabilize cigarette prices by limiting supply. Plaintiffs contend that Defendants agreed to exchange information about the quantity of cigarettes sold by brand, size, type, discount, and geographic information in order to monitor that all Defendants were complying with the agreement to fix prices. Plaintiffs aver that the collecting and sharing of such information are against the economic self-interest of each company. As part of the cartel agreement, Plaintiffs contend that RJR and B&W abandoned their strategy of focusing on the discount market, acts also inconsistent with their economic self-interest.

Plaintiffs point to other actions taken by Defendants that were against their economic self-interest. For example, Plaintiffs note there was little internal analysis done by each company about whether to follow a competitor's price increase. Similarly, Plaintiffs contend that Defendants employed "credit memos" when making price increase announcements which Plaintiffs aver delayed the impact of the price increase, so that all other Defendants **[**13]** could "accept" the price increase "offered" by the price leader. Plaintiffs argue that Philip Morris and RJR raised prices in May 1995 after internal recommendations by both companies indicated that they should not raise prices. Finally, Plaintiffs argue that Philip Morris took actions against its economic self-interest by agreeing to pay settlement costs in the MSA based on market capitalization rather than market share.

II. STANDARDS FOR SUMMARY JUDGMENT [6]

HN1[] Contracts or conspiracies to fix prices are illegal *per se* under *section 1* of the Sherman Act. *See* *15 U.S.C. § 1*; **[**14]** *United States v. Socony Vacuum Oil Co., 310 U.S. 150, 223, 84 L. Ed. 1129, 60 S. Ct. 811 (1940)*. Although Plaintiffs and Defendants dispute the subtleties of the standards for summary judgment in an antitrust case involving an oligopoly, [7] **[**15]** the court finds that *Matsushita Electric Industrial Co. v. Zenith Radio Corp.,*

[5] In their Second Amended Complaint, Plaintiffs asserted that the testimony of Lawrence Meyer, an outside counsel for Liggett, in litigation in the state of Washington would show that Defendants implemented the conspiracy through the Committee of Counsel. *See* Second Amended Complaint, P 78c, at 34-35. Plaintiffs also contended that Mr. Meyer testified that the timing and level of price increases was discussed at Committee of Counsel meetings. *Id.*, P 79, at 41.

Plaintiffs do not discuss Mr. Meyer's Washington state deposition testimony in their response to Defendants' motions for summary judgment, and, thus, its present relevance to this litigation is unclear. Plaintiffs, however, do cite this testimony in response to one of Defendants' Statement of Undisputed Material Facts. *Id.*, P 37 and Resp., P 37. There, Plaintiffs argue that Mr. Meyer testified he attended a Committee of Counsel meeting where there was a discussion of whether there had been a price increase and of how to respond to wholesalers who engaged in "trade loading." Regardless of what Mr. Meyer testified to in the Washington state litigation, such testimony could not support Plaintiffs' claims here because Mr. Meyer testified in this litigation that he stopped attending Committee of Counsel meetings in 1983, prior to the alleged initiation of the conspiracy at issue in this litigation. *See* Meyer Depo., at 79. The discussions about allocations Mr. Meyer recalled in his Washington state deposition occurred in the late 1970s. *Id.* at 112. Mr. Meyer also testified that there were never any discussions of setting prices at the Committee of Counsel meetings. *Id.* at 68-70. Nor was there a discussion among representatives of the cigarette companies to agree to impose allocations on wholesalers. *Id.* at 82.

[6] The court is very mindful that this case is before it on motions for summary judgment and that it may not supplant a jury's function if it finds a dispute of material fact in the admissible evidence. Although there is much discussion herein of the evidence, the court has been careful to limit its evaluation of the evidence to whether allowable inferences are or are not created under the various standards.

475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986), and City of Tuscaloosa v. Harcros Chemicals, Inc., 158 F.3d 548 (11th Cir. 1998), clearly establish the standards in this circuit. Plaintiffs assert that "the understanding [among the conspirators] may consist of little more than shared expectations of conduct by persons with common objectives." Pls.' Resp., at 17. The court finds this speaks far too broadly for the law and focuses instead on the analysis in *Matsushita* and *Harcros*. [8]

[*1267] A. *Matsushita*

In Matsushita Electric Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986), the Supreme Court addressed the standards governing motions for summary judgment in the antitrust context. There, the Supreme Court instructed:

> ***HN3***[] On summary judgment the inferences to be drawn from the underlying facts . . . must be viewed in the light most favorable to the party opposing the motion. **[**16]** But ***antitrust law*** limits the range of permissible inferences from ambiguous evidence in a § 1 case. Thus, in Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984), we held that conduct as consistent with permissible competition as with illegal conspiracy does not, standing alone, support an inference of antitrust conspiracy. To survive a motion for summary judgment . . ., a plaintiff seeking damages for a violation of § 1 must present evidence that tends to exclude the possibility that the alleged conspirators acted independently.

475 U.S. at 587-88 (internal quotations and citations omitted).

The Court further stated that ***HN4***[] "courts should not permit factfinders to infer conspiracies when such inferences are implausible, because the effect of such practices is often to deter procompetitive conduct." 475 U.S. at 593. Thus, "if the factual context renders [the nonmovants'] claim implausible -- if the claim is one that simply makes no economic sense -- respondents must come forward with more persuasive evidence to support their claim than would otherwise be necessary." 475 U.S. at 587. The Court recognized that "lack **[**17]** of motive bears on the range of permissible conclusions that might be drawn from ambiguous evidence: if [defendants] had no rational economic motive to conspire, and if their conduct is consistent with other, equally plausible explanations, the conduct does not give rise to an inference of conspiracy." 475 U.S. at 596-97. The Court went on to state that "we do not imply that, if petitioners had had a plausible reason to conspire, ambiguous conduct could suffice to create a triable issue of conspiracy. Our decision in Monsanto Co. v. Spray-Rite Service Corp., 465 U.S. 752, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984), establishes that conduct that is as consistent with permissible competition as with illegal conspiracy does not, without more, support even an inference of conspiracy." 475 U.S. at 597 n.21.

B. *Harcros*

In City of Tuscaloosa v. Harcros Chemicals, Inc., 158 F.3d 548 (11th Cir. 1998), the Eleventh Circuit extensively discussed the application of *Matsushita* to alleged conspiracies in an oligopolistic context. First, the court described the nature of evidence at the summary judgment stage:

> ***HN5***[] It is settled law that a threshold **[**18]** requirement of every antitrust conspiracy claim, whether brought under section 1 or section 2 of the Sherman Act, is "an agreement to restrain trade. To prove that such

---

[7] ***HN2***[] There is no dispute that the cigarette industry in the United States is an oligopoly. *See* Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227-30, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993); Expert Report (Plaintiffs') of Dr. Franklin Fisher ("Fisher Report"), P 137.

[8] Plaintiffs' proposition of the law would encompass the activities of even lawfully operating oligopolies. Plaintiffs cite American Tobacco Co. v. United States, 328 U.S. 781, 809-10, 90 L. Ed. 1575, 66 S. Ct. 1125 (1946), to support this proposition, but *American Tobacco* speaks far more narrowly. There, the Court held that "no formal agreement is necessary" because a conspiracy could be shown by demonstrating "a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement." *Id.* Even under this statement of the law, Plaintiffs still must show some kind of agreement.

> an agreement exists between two or more persons, a plaintiff must demonstrate 'a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement.'" . . . "We recognize that it is only in rare cases that a plaintiff can establish the existence of a conspiracy by showing an explicit agreement; most conspiracies are inferred from the behavior of the alleged conspirators . . . and from other circumstantial evidence (economic and otherwise), such as barriers to entry and other market conditions."

[*1268] *Id. at 569* (quoting *Seagood Trading Corp. v. Jerrico, Inc., 924 F.2d 1555, 1573 (11th Cir. 1991))*. The court then reiterated the instructions of *Matsushita* described above. While rejecting a reading of *Helicopter Support Systems, Inc. v. Hughes Helicopter, Inc., 818 F.2d 1530, 1534 n.4 (11th Cir. 1987)*, that would require a plaintiff to "exclude the possibility of independent action on the part of the defendants," the court reaffirmed **[**19]** *Matsushita*'s requirement that the plaintiff must show "that an inference of conspiracy is reasonable." *158 F.3d at 571 n.35* (citations omitted). *See also In re Baby Food Antitrust Litig., 166 F.3d 112, 124 (3d Cir. 1999)* ("in drawing favorable inferences from underlying facts, a court must remember that often a fine line separates unlawful concerted action from legitimate business practices") (citation omitted). Thus, ***HN6***[] "conduct which is as equally consistent with permissible competition as it is with an illegal conspiracy does not, without more, support even an inference of conspiracy." *Harcros, 158 F.3d at 571 n.35* (citation omitted).

Applying these standards to the economic circumstances presented in *Harcros*, the court defined ***HN7***[] an oligopolistic market as "a market in which the dominant participants . . . engage in interdependent or parallel behavior and [have] the capacity effectively to determine price and total output of goods or services." *Id. at 570 n.32* (citation omitted). "Conscious parallelism" is a "process, not in itself unlawful, by which firms in a concentrated market might in effect share monopoly power, setting **[**20]** their prices at a profit-maximizing, supracompetitive level by recognizing their shared economic interests and their interdependence with respect to price and output decisions." *Id. at 570* (quoting *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 227, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993))*.

Then the court noted:

> ***HN8***[] It is well settled in this circuit that evidence of conscious parallelism [alone] does not permit an inference of conspiracy unless the plaintiff [either] establishes that, assuming there is no conspiracy, each defendant engaging in the parallel action acted contrary to its economic self-interest . . . or offers other "plus factors" tending to establish that the defendants were not engaging merely in oligopolistic price maintenance or price leadership but rather in a collusive agreement to fix prices or otherwise restrain trade.

158 F.3d at 570-71. In sum, the court found that "the plaintiffs first must produce evidence showing that the defendants engaged in consciously parallel action. Second, the plaintiffs must show 'plus factors' that tend to exclude the possibility that the defendants merely **[**21]** were engaged in lawful conscious parallelism." *158 F.3d at 572*.

Additionally, ***HN9***[] the Eleventh Circuit has determined that even when a plaintiff proffers evidence of "plus factors," these "only create a rebuttable presumption of a conspiracy which the defendant may defeat with his own evidence; this further ensures that unilateral or procompetitive conduct is not punished or deterred." *Todorov v. DCH Healthcare Auth., 921 F.2d 1438, 1456 n.30 (11th Cir. 1991)*. The court is also mindful that it must consider the evidence presented by Plaintiffs as a whole and that "plaintiffs should be given the full benefit of their proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each." *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962)*.

Plaintiffs misapprehend the standards for summary judgment in the antitrust context on several occasions. Plaintiffs contend that "Defendants bear the burden **[*1269]** of proving that there is no set of facts from which a reasonable juror could find that defendants engaged in a conspiracy to raise, maintain and/or stabilize **[**22]** prices in the cigarette industry." *See* Plaintiffs' Reply to Defendants' Joint Post-Argument Memorandum ("Pls.' Post-Argument Reply"), at 11. It is unsurprising that Plaintiffs offer no citation for this "standard." As an initial matter, Defendants generally do not bear the burden of proof in a civil suit. *See Herman & MacLean v. Huddleston, 459 U.S. 375, 387, 74 L. Ed. 2d 548, 103 S. Ct. 683 (1983)* ***HN10***[] ("In a typical civil suit for money damages, plaintiffs must prove their case by a preponderance of the evidence."). Furthermore, even if Plaintiffs are referring to the proof that must be presented at the summary judgment stage, their assertion still misses the mark. *Harcros* specifically holds that ***HN11***[] "conduct which is as equally consistent with permissible competition as it is with an illegal conspiracy does not, without more, support even an inference of conspiracy." *158 F.3d at 571 n.35* (citation omitted). This is directly contrary to Plaintiffs' statement of the law. *See also Matsushita, 475 U.S. at 588* ***HN12***[] ("To survive a motion for summary judgment . . ., a plaintiff seeking damages for a violation of *§ 1* must present evidence that tends **[**23]** to exclude the possibility that the alleged conspirators acted independently.") (internal citation omitted).

Plaintiffs also contend that "contrary to Defendants' implications, interdependent oligopolistic behavior is not what the antitrust laws were designed to protect . . . ." *See* Plaintiffs' Post-Argument Reply, at 2 n.2 (noting that antitrust laws were written to protect competition which benefits consumers). The court finds this to be an incorrect statement of the law. ***HN13***[] The law specifically recognizes that interdependent oligopolistic behavior is *not* prohibited by antitrust laws. *See Harcros, 158 F.3d at 571* ("The requirement of 'plus factors' is necessary because evidence of consciously parallel behavior alone leaves the circumstantial evidence of collusion in equipoise; consciously parallel behavior by oligopolists does not in itself support an inference of agreement, of 'a meeting of the minds,' any more strongly than it supports an inference of legal price maintenance or leadership."). In fact, the law is careful in the proof it requires in a circumstantial case precisely because it wants to "ensure[] that unilateral or procompetitive conduct is **[**24]** not punished or deterred." *Todorov, 921 F.2d at 1456 n.30*; *see also Matsushita, 475 U.S. at 594* ("mistaken inferences in cases such as this one are especially costly, because they chill the very conduct the antitrust laws are designed to protect").

Finally, at oral argument and in subsequent briefing, Plaintiffs argued that summary judgment in this case is governed by "boiler plate" provisions used by courts in all summary judgment contexts. *See* Transcript of Oral Argument, April 23, 2002 ("Oral Argument"), at 41-42. *Matsushita* and *Harcros*, however, demonstrate conclusively that ***HN14***[] the inferences that can be drawn on summary judgment are limited in the antitrust context. *See Matsushita, 475 U.S. at 588*; *Harcros, 158 F.3d at 570-71*. For the same reason, Plaintiffs' citation to *WSB-TV v. Lee, 842 F.2d 1266, 1270 (11th Cir. 1988)*, and *Augusta Iron & Steel Works v. Employers Insurance of Wausau, 835 F.2d 855, 856 (11th Cir. 1988)* (per curiam), are inapposite. *See* Plaintiffs' Post-Argument Reply, at 4 & n.3. Although Plaintiffs rely on *In re Coordinated Pretrial Proceedings* **[**25]** *in Petroleum Products Antitrust Litigation, 906 F.2d 432, 438-39 (9th Cir. 1990)*, to support their contention that summary judgment is inappropriate, the Ninth Circuit has held that particular analysis in *Petroleum Products* to be dicta. *See In re Citric Acid Litigation, 191 F.3d 1090, 1096 (9th Cir. 1999)* ("[Plaintiff] cites only a single **[*1270]** case, *In re Coordinated Pretrial Proceedings in Petroleum Products Antitrust Litigation, 906 F.2d 432 (9th Cir. 1990)*, in support of its proposed legal standard. The plaintiffs in that case, however, presented *direct* evidence of conspiracy, *see id. at 456-57, 459-60* & n.22, thus making dicta any discussion therein of the standard applicable when plaintiffs rely exclusively on circumstantial evidence.") (emphasis in original).

HN15[] The court, however, has an obligation to consider summary judgment as it relates to this case in light of the more traditional summary judgment standards. The court applied the following thoughts when considering Plaintiffs' presentation and analyzing the circumstantial evidence and plus factors" put forward by Plaintiffs. It seems to the court that **[**26]** the law has developed so as to provide very little guidance to determine when an inference is reasonable. As this circuit has said, the line is ephemeral. *See Daniels v. Twin Oaks Nursing Home, 692 F.2d 1321, 1325-26 (11th Cir. 1982)*. It has backed away from a rule that circumstantial evidence must exclude other hypotheses. Given the tension between a straightforward reading of *Matsushita*, which announces that ***HN16***[] more is required of inferences in antitrust cases than in run-of-the-mill cases [9] and the more standard summary

[9] *Cf. Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*:

judgment analysis, the court believes it proper to consider what are allowable inferences of an "expressed, manifested agreement," *In re High Fructose Corn Syrup, 295 F.3d 651, 2002 WL 1315285*, at *1 (7th Cir., 2002) (Posner, J.), that Plaintiffs may rely upon to defeat summary judgment.

[27]** To begin with, it is clear that ***HN18***[] to create an issue of fact the inference must be "allowable" or "reasonable." *See Mize v. Jefferson City Bd. of Educ., 93 F.3d 739, 743 (11th Cir. 1996)* ("a court may grant summary judgment when it concludes that no reasonable jury may infer from the assumed facts the conclusion upon which the non-movant's claim rests"). ***HN19***[] To assure itself and the parties that the court's judgment on whether a piece of evidence can be admitted as relevant because it creates a reasonable inference, the court here sets out the principles to which it has resorted. First, the import of the piece of circumstantial evidence must actually be of the import that is ascribed to it by Plaintiffs. If, when considered in its entirety, it is totally ambiguous or to the opposite effect, it is not relevant and may not be relied upon by the jury.

HN20[] In dealing with allowable inferences, the court to a large degree is concerned with relevancy -- that is, whether it makes a fact of consequence more or less likely. *See Fed. R. Evid. 401*. [10] In this **[*1271]** case, this means that evidence is relevant to Plaintiffs' position if it makes it more likely that Defendants had an express **[**28]** agreement to fix prices. ***HN21***[] Circumstantial evidence does not become relevant simply because it can be used by a skilled advocate to persuade a jury that there was an agreement. Persuasion can sometimes be achieved by appeals to prejudice, but that utility does not make the race, ethnicity, or gender of a defendant's employees relevant in a contract dispute, for example, and any inference drawn therefrom would not be allowable.

[29]** ***HN23***[] It is said that an inference is unreasonable if a jury must engage in speculation and conjecture to such a degree as to render its finding "a guess or mere possibility." *Daniels, 692 F.2d at 1325-28*. From this statement, the court extracts the idea that the inference must directly and necessarily follow in the context of the case. Judge Posner had a variety of statements from competitors in *In re High Fructose Corn Syrup*. One was: "What are you going to tell [the president of Coca-Cola], that we gotta [i.e., have a] deal with . . . our two biggest competitors . . . ?" *See 295 F.3d 651, 2002 WL 1315285*, at *9. Among possible inferences, this statement points directly at the one of consequence, and a jury may reasonably find that is so without a high degree of conjecture. On the contrary, a statement by a Philip Morris employee that if Philip Morris raises prices, the other companies will follow does not directly and necessarily point to the existence of an express agreement. First, the statement does not itself connect the prediction to an agreement. Second, given what is known of oligopolies and conscious parallelism, the fact that the statement was made **[**30]** does not evidence a likelihood that an express agreement existed, and to reason from this statement to that point requires a guess based on mere possibility. Such an inference would be unreasonable.

> The Court's requirement in *Matsushita* that the plaintiffs' claims make economic sense did not introduce a special burden on plaintiffs facing summary judgment in antitrust cases. The Court did not hold that if the moving party enunciates *any* economic theory supporting its behavior, regardless of its accuracy in reflecting the actual market, it is entitled to summary judgment. *Matsushita* demands only that the nonmoving party's inferences be reasonable in order to reach the jury, a requirement that was not invented, but merely articulated, in that decision. ***HN17***[] If the plaintiff's theory is economically senseless, no reasonable jury could find in its favor, and summary judgment should be granted.

Id. at 468-69 (footnote omitted).

[10] ***HN22***[] It is, of course, the court's responsibility to determine the admissibility of evidence. *See Fed. R. Evid. 104(a)* ("Preliminary questions concerning . . . the admissibility of evidence shall be determined by the court . . . .). In making this determination, the existence of certain conditions must be found by the judge. *See id.*, advisory committee's note. Whether an inference is allowable is really a question of whether it is admissible under *Rule 401*. To determine its admissibility, the court may have to act as a fact finder. *See Fed. R. Evid. 104(a)* advisory committee's note ("To the extent that these inquiries [about the existence of conditions] are factual, the judge acts as a trier of fact. Often, however, rulings on evidence call for an evaluation in terms of a legally set standard. . . . These decisions, too, are made by the judge."). As a fact finder, the court must determine, for example, whether an inference is a product of legitimate methodology or whether the evidence tends to make the existence of a fact that is of consequence more or less probable. *See Fed. R. Evid. 401*.

Finally, ***HN24***[] an inference would be unreasonable if it is reached through fallacious reasoning. For more than 2500 years, logicians have concerned themselves with sound and unsound means of reaching a truth. Over time, a number of fallacious arguments have been identified as not productive to learning the truth. One fallacy is called *ad hoc ergo propter hoc* (with this, therefore because of this); another is called hidden complexity. The inference urged from the prediction about competitors' price actions relies on the first of these fallacies and suffers from the second. From the fact that the statement was made, it might be claimed that the cause must be that there is an express agreement, of which the speaker has knowledge, to fix prices. We also know that in the context of this case, however, there are a number of other factors which might have caused the statement to have been made; yet, they are not accounted or controlled for. In *Daubert*, the Supreme Court approved a gatekeeping **[**31]** function for the court in making admissibility determinations based *inter alia* on sound methodologies. So long as the testimony was deemed admissible, the court did not draw its own conclusions about the testimony. In this context, it likewise seems appropriate **[*1272]** for the court to consider whether or not arguments are fallacious to determine whether inferences therefrom are allowable because fallacious reasoning is akin to unsound methodology. Keeping inferences reached only by logical fallacy from the jury is consistent with this understanding of the gatekeeper role of the court.

Plaintiffs have resisted Defendants' motions for summary judgment on the basis of parallel pricing and "plus factors." ***HN25***[] Conscious parallelism and "plus factors" can be a formulistic expression which does not capture the reality of the case. A "plus factor," therefore, needs to have some substance in order to tilt the balance. Merely labeling something a "plus factor" does not make it so, and a weak "plus factor" is not sufficient to withstand a motion for summary judgment because the "plus factor" analysis is really a surrogate for looking at a case in its entirety. It is well to say here that the distinct **[**32]** flavor of evidence before the court points to the absence of an agreement among Defendants and the presence of a great deal of uncertainty and anxiety about the future state of the market. *See infra.* The court also cautions that observers of this case need to know that unlike the usual case, one cannot place a great deal of faith in the fact that the *probata* will support the *allegata*.

III. DISCUSSION

A. Direct Evidence

Before reviewing the circumstantial evidence presented by Plaintiffs, the court considers Plaintiffs' allegation that they can show direct evidence that Defendants have engaged in illegal price fixing. Plaintiffs assert that in the 1990s, in response to health care lawsuits brought by various state attorneys general, Defendants conducted a joint defense and attempted to settle the cases. Plaintiffs describe a proposed settlement that would have required Congressional approval and had a provision that settlement costs be passed through to consumers as price increases. Plaintiffs further proffer that the settlement failed when Congressional approval was not received.

Plaintiffs assert the mere fact that Defendants "discussed specific price **[**33]** increases in connection with the proposed Congressional Resolution," Pls.' Resp., at 28, is direct evidence of collusive behavior. The court disagrees. As an initial matter, it is likely that Defendants' negotiations would be protected under the *Noerr-Pennington* doctrine. *See* A.D. Bedell Wholesale Co. v. Philip Morris, Inc., 263 F.3d 239 (3d Cir. 2001) (holding that cigarette manufacturers were entitled to immunity under *Noerr-Pennington* for agreement settling tobacco tort litigation with numerous states). Furthermore, Plaintiffs' own presentation of evidence belies any notion of collusion. Plaintiffs cite deposition testimony from Geoffrey Bible, Chairman and CEO of Philip Morris Companies. In a document sent to executives of other cigarette companies describing the type of final settlement agreement sought by the industry, Mr. Bible indicated that an agreement in principle had been reached to allocate payments according to market capitalization. Mr. Bible then breaks down the annual payment of $ 15 billion into a price per pack charge of $ 0.60 for each of the companies. *See* Bible Depo., at 92, Ex. 2123. Such a payment methodology is akin to an excise **[**34]** tax, which is generally passed through to the customer, because it is based on the output level. *See* Elzinga Report, at 12. The document itself, however, reflects no price-fixing conspiracy, and Plaintiffs fail to associate it with any. As a whole, the statement merely provides a contextual understanding of the cost of the settlement on a per-pack basis.

[*1273] In fact, Mr. Bible testified that he recalled the negotiating position of the state attorneys general to be that "any payments that were made to resolve the issues would be passed on in pricing because they [state attorneys general] wanted to see cigarettes priced higher to dissuade underage youth from buying cigarettes." Bible Depo., at 87-88. Mr. Bible understood that in order to accommodate this negotiation demand, some kind of legislation would be required in order to provide antitrust immunity. *Id.* at 88. The calculation of the cents per pack increase, therefore, was in the context of those government-sanctioned settlement discussions, which ultimately failed. *Id.* at 92-93. Because these initial settlement provisions were never implemented, they cannot form the basis for direct evidence of a price-fixing conspiracy.

[35]** Furthermore, Mr. Bible testified that once the subsequent MSA was reached without a provision for antitrust immunity, the companies ceased discussing prices in relation to the MSA. *See id.* at 93-94. Plaintiffs do not dispute Mr. Bible's testimony, but rather assert that the "fix" was already in because of Mr. Bible's previous comments concerning the costs of the settlement. As the court found above, however, this statement is not direct evidence of a price fixing agreement, particularly where it was made in the context of negotiating a global settlement that considered an option of antitrust immunity. Furthermore, the court finds it illogical that a statement made in 1997, four years after the initiation of the alleged conspiracy and related to a circumstance that could not have been anticipated in 1993, would be direct evidence of an alleged conspiracy engaged in by the companies since 1993.

Moreover, even if the court were to determine that Mr. Bible's statements could support an inference of conspiracy, ***HN26***[] direct evidence must be "explicit and requires no inferences to establish the proposition or conclusion being asserted." *In re Baby Food, 166 F.3d at 118*. **[**36]** An analysis of Mr. Bible's statements would require inferences to establish the proposition Plaintiffs assert.

Plaintiffs contend that they "were denied other discovery that may have provided additional direct evidence, such as Committee of Counsel notes, both because of the Court's discovery rulings and Defendants' refusal to produce such documents." Pls.' Resp., at 27 n.11. Plaintiffs do not point the court to any particular rulings which have allegedly prejudiced them. In fact, the court notes that at a discovery hearing on November 20, 2000, Defendants agreed to produce the information requested in Plaintiffs' Interrogatory No. 18 concerning the identity of persons who attended Committee of Counsel meetings. Plaintiffs accepted that resolution of the discovery dispute. *See* Transcript of Hearing, November 20, 2000, at 65-66. Plaintiffs also agreed that certain document production would pertain only to those employees with authority to set price. Defendants averred that no one associated with the Committee of Counsel had authority to set price. Plaintiffs accepted that proffer. *Id.* at 86-88. Defendants further agreed to respond to Plaintiffs' Second Document Request Nos. **[**37]** 1 and 2, requesting any documents related to pricing discussions at the Committee of Counsel meetings. The court has located no motions to compel filed by Plaintiffs arguing that Defendants refused to produce this discovery. Accordingly, the court concludes that Plaintiffs were not hampered in their search for direct evidence by the discovery rulings of the court.

B. "Plus Factors"

Because Plaintiffs have proffered no direct evidence of price-fixing, the court **[*1274]** proceeds to an analysis of the circumstantial evidence. As described in *Harcros*, ***HN27***[] in order to survive a motion for summary judgment, Plaintiffs must first produce evidence that Defendants engaged in consciously parallel behavior. Then, Plaintiffs must show "plus factors" that "tend to exclude the possibility that the defendants merely were engaged in lawful conscious parallelism." *158 F.3d at 572*. Here, no party disputes that price increases between November 1993 and January 2000 reflect conscious parallelism. [11]

---

[11] Plaintiffs assert that in addition to the actual prices operating in parallel, Defendants also acted in parallel with respect to other terms of sale. Specifically, Plaintiffs argue that "credit memos" issued by Defendants at the same time as price increases were announced delayed the price increase "by allowing purchasers to continue to buy product at the old price for a period of weeks

[38] 1. Defining "Plus Factors"**

Plaintiffs assert eleven "plus factors" to support their claim that Defendants conspired to fix prices: (1) signaling of intentions; (2) permanent allocations programs; (3) monitoring of sales; (4) actions taken contrary to economic self-interest, including (a) little analysis of whether to follow price increases, (b) B&W and RJR pulling away from the discount cigarette market, (c) the May 1995 price increase lead by RJR and followed by Philip Morris, (d) Philip Morris' agreement to base the initial MSA payments on market capitalization rather than market share, and (e) "excessive" price increases after the MSA; (5) nature of the market; (6) strong motivation; (7) reduction in the number of price tiers; (8) opportunities to conspire; (9) pricing decisions made at high levels; (10) the smoking and health conspiracy; and (11) foreign conspiracies. Although the court addresses each in turn, only the first four "plus factors" merit serious consideration.

Before analyzing the "plus factors" presented by Plaintiffs, the court notes that at turns, Plaintiffs use the terms "plus factors" and "facilitating devices" interchangeably. This practice confuses **[**39]** the proper analysis because ***HN28***[] "facilitating devices" are not necessarily sufficient **[*1275]** under the law to constitute a "plus factor." Plaintiffs allege that industry use of "facilitating practices" can increase the "likelihood of anticompetitive tacit coordination." Pls.' Resp., at 19. The court has found no case law, and Plaintiffs cite to none, which analyze the significance of "facilitating practices" as circumstantial evidence of price fixing in an oligopolistic market. In his antitrust treatise, late Professor Phillip E. Areeda states that a facilitating practice is "an activity that makes it easier for parties to coordinate price or other behavior in an anticompetitive way. It increases the likelihood of a consequence offensive to antitrust policy." Phillip E. Areeda, ***Antitrust Law***, P 1407, at 29 (1st ed. 1986) (hereinafter "Areeda"). He further notes, however, that "it will often be difficult to establish causation in fact from a facilitating practice." *Id.*, at 32. ***HN29***[] "Facilitating practices" are "not customarily listed in the cases as a 'plus factor,' [but they] bear on the economic consequences of oligopoly . . . ." *Id.*, P 1434e, at 221. Significantly, Professor Areeda does **[**40]** not believe that facilitating practices should transform an otherwise immune oligopoly into a conspiracy. *See id.*, P 1436, at 248.

As discussed below, the court finds this interchange particularly significant when considering the testimony of Plaintiffs' main expert, Dr. Fisher, and whether he offered testimony that distinguished conscious parallelism from

---

after the announcement." Pls.' Resp., at 26. Plaintiffs contend that the credit memos allowed each company to "offer" a price increase to the industry which rivals could accept or reject within the time allowed by the credit memo.

The only testimony Plaintiffs cite for their contention that credit memos delayed price increases fails to support this assertion. Plaintiffs assert that Carl Schoenbachler, former Chief Financial Officer of B&W, testified that the credit memos delayed the impact of the price increase for a week or more. *See* Pls.' Resp., at 26. As B&W responds, however, *see* B&W Reply, at 7 n.8, a more complete reading of Mr. Schoenbachler's testimony shows that Plaintiffs' meaning cannot be attributed to his testimony.

> Q: So, would I be correct, then, that one of the reasons for sending out the Telex price increase sooner rather than later is to let the trade know that there is some period of time until the effective date, and during that -- during which they have the opportunity to purchase at the old price?
>
> . . .
>
> A: No, that's not what I said. The practice -- more recent practice has been, when a Telex is sent out, the Telex states that the price increase is effective immediately. All goods ordered on Monday morning will carry the new price; you will be given a credit on a notional quantity that you purchased over the past six months on average, the average week's shipments over the past six months. So, there's no opportunity for the trade to order at the old price over some period of time.

Schoenbachler Depo., at 146. Furthermore, Defendants' price announcements took effect immediately, within one to two days of the announcement date. *See* PM Price Announcements, PM Reply Brief, Ex. 9; RJR Price Announcements; RJR Reply Brief, Ex. 36, at 58001 2713; Lorillard Price Announcements, Lorillard Reply Brief, Ex. 3.

illegal cartel behavior. ***HN30***[] In order to constitute a "plus factor," an activity must "tend to exclude the possibility that the defendants merely were engaged in lawful conscious parallelism." *Harcros, 158 F.3d at 572*. [12]

[41] 2. Signaling**

Plaintiffs argue that (1) Defendants use signals to communicate with their competitors, (2) each Defendant knows its competitors monitor its signals, and (3) the signaling related to specific price increases. Specifically, Plaintiffs assert that each company would send a representative to its competitors' analyst presentations so that each Defendant knew such "signals" would be received. Plaintiffs further argue that Defendants used Gary Black, a tobacco industry analyst, as the conduit for these signals because Mr. Black would report on these meetings and other events in the tobacco industry. In sum, the court finds Plaintiffs' theory of signaling among the companies to be based on a combination of statements taken out of context, as well as ominous readings of typical industry reporting on strategy. To reach the inferences suggested would require the jury to engage in speculation and does not tend to exclude the possibility that Defendants acted independently.

"Signaling" is a pejorative term as used in this context. Its import is either that a competitor is inviting all to make a traditional price-fixing agreement, or that there already exists such an agreement **[**42]** and it is being carried out through indirect communications. Despite Plaintiffs' use of the word and the infusion of their brief with colorful terms of "nods" and "olive branches," Plaintiffs have done nothing more than show that in an oligopoly, each company is aware of the others' actions. This is the nature of the economic interdependence of the companies in an oligopoly. As Professor Areeda explained, in an oligopoly, **[*1276]** "competing firms may be able to achieve cartel-like results for themselves simply by observing each other's behavior":

> Each firm's pricing decision is *interdependent* with that of its rivals: each knows that his choice will affect the others, who are likely to respond, and that their responses will affect the profitability of his initial choice. Each knows that expanding his sales or lowering his price will reduce the sales of rivals, who will notice that fact, identify the cause, and probably respond with a matching price reduction. Unless he can somehow conceal his price reduction, or unless his own position is improved by a lower market price, he will hesitate to reduce prices at all.

Areeda, P 1410b, at 65 (emphasis in original) (footnote omitted); **[**43]** *see also* William A. McEachern, Economics: A Contemporary Introduction, at 523 (5th ed. 2000) (in an oligopoly "each firm knows that any changes in its product quality, price, output, or advertising policy may prompt a reaction from its rivals. And each firm may react if another firm alters any of these features."); *In re Baby Food, 166 F.3d at 128* ("In an oligopoly consisting of no more than three companies at one time and collectively controlling almost the entire market, there is pricing structure in which each company is likely aware of the pricing of its competitors.").

HN31[] Because in competitive markets, particularly oligopolies, companies will monitor each other's communications with the market in order to make their own strategic decisions, ***antitrust law*** permits such discussions even when they relate to pricing because the "dissemination of price information is not itself a per se violation of the Sherman Act." *United States v. Citizens & S. Nat'l Bank, 422 U.S. 86, 113, 45 L. Ed. 2d 41, 95 S. Ct. 2099 (1975)*. In *In re Baby Food*, the court granted summary judgment for the defendants despite the plaintiffs' argument that the defendants had **[**44]** communicated about pricing information. There, the court determined that sales employees of one defendant were required to report to their superiors any competitive information they learned from other sales representatives in the industry. *Id. at 118-19*. Sales representatives often learned of their own company's intention to increase prices before announcements were made. Thus, the court found, price

[12] In their Post-Hearing Submission in Opposition to Defendants' Motions for Summary Judgment, Plaintiffs dramatically point to a "recently" produced document to show Defendants "clearly understood the antitrust concerns raised by many of the practices that plaintiffs have identified as 'plus factors.'" *Id.* at 12. A review of the document shows it to be a summary of ***antitrust law*** and the application of that law to the Tobacco Industry Testing Laboratory. The court finds this document has no relevance to the present litigation.

information was systematically obtained and given to high level executives of each of the defendants, often before the pricing took effect. Nonetheless, the court granted summary judgment to the defendants because there was no evidence that these information exchanges had any effect on pricing decisions. *Id. at 125*. *See also* *Blomkest Fertilizer, Inc. v. Potash Corp., 203 F.3d 1028, 1036 (8th Cir. 2000)* ("evidence that the alleged conspirators were aware of each other's prices, before announcing their own prices, is nothing more than a restatement of conscious parallelism, which is not enough to show an antitrust conspiracy"); *United States v. General Motors*, 1974 Trade Cas. P 75253 (E.D. Mich. 1974) ("The public announcement **[**45]** of a pricing decision cannot be twisted into an invitation or signal to conspire; it is instead an economic reality to which all other competitors must react.") (cited in Areeda, P 1435, at 228).

In contrast, the cases which have found that an inference of traditional agreement from indirect communications took place show far more detailed communications with no public purpose. *See* *In re Medical X-Ray Film Antitrust Litigation, 946 F. Supp. 209, 213 (E.D.N.Y. 1996)* (noting companies exchanged internal competitive memos and citing specific testimony that representatives of Fuji and Agfa privately met to exchange pricing information); *Petroleum Proceedings*, 906 F.2d at 460-61 **[*1277]** (noting that defendants exchanged supply and demand forecasts and internal analyses documents were found in the files of competitors). Here, Plaintiffs have documented nothing reaching the level of prohibited exchanges, but rather have described the type of information companies legitimately convey to their shareholders. Furthermore, ***HN32***[] numerous courts have recognized the difficulty involved in using "signaling" to form an agreement to fix prices where list prices are not the prices **[**46]** paid by individual customers. *See* *Brooke Group, 509 U.S. at 217-18, 236*; *Reserve Supply Corp. v. Owens-Corning Fiberglas Corp., 971 F.2d 37, 53-54 (7th Cir. 1992)* (signals "would be, to put it mildly, an awkward facilitator of price collusion because the industry practice of providing discounts to individual customers ensured that list price did not reflect the actual transaction price" and rejecting plaintiff's claim that announcements of price increases thirty to sixty days in advance was evidence of collusion). Thus, Plaintiffs' description of "signaling" does not make it any more likely that Defendants had an agreement to fix prices and it is not relevant.

Plaintiffs first theorize that after issuing the "demand" of Marlboro Friday, Philip Morris waited to receive signals from the other Defendants that they would join the conspiracy. Plaintiffs contend that Philip Morris understood signaling because of their response to the introduction of the 99-cent cigarette category in 1992. [13] Plaintiffs cite a 1992 document to show that Philip Morris "was well aware of the use that might be made of securities analysts to signal their competitors." Pls. **[**47]** ' Resp., at 37. A full reading of this memo, however, shows that Philip Morris was looking to correct false reporting of a competitive strategy of retail rebates by sales people. [14] Accordingly, Plaintiffs' contention is without support in the record.

[48]** In any event, setting aside whether the companies understood how to "signal" one another, the court notes that it is difficult for such allegations to support an inference of conspiracy. *See* *Blomkest, 203 F.3d at 1037* (where the plaintiffs contended that defendants signaled pricing intentions by circulating advance price announcements, court concluded that such evidence did not support an inference of price fixing because the plaintiff "may not proceed by first assuming a conspiracy and then setting out to prove it" . . . only " if the [plaintiff] were to present independent evidence tending to exclude an inference that the [defendants] acted independently," could the plaintiff use the signaling evidence for additional evidence of a conspiracy); *In re Baby Food, 166 F.3d at 133* ("***HN33***[]

---

[13] *See* PMAT 000072883-2888, Board Notes, Wednesday, October 28, 1992. This document however, explains a decision by Philip Morris not to enter the 99 cent category of cigarettes because "we felt this would have sent a conflicting message to our competition and damaged our chances of narrowing the price gap." *Id.* at 2884.

[14] *See* PMAT 000205367 ("False reporting of a competitive strategy of retail rebates by sales people: This could very well be the case. This happens in other industries such as the pharmaceutical industry. One president and CEO stated, 'When the sales department controls everything, the danger is that you become price driven because sales organizations look to sell things. A marketing office balances that tendency since he's responsible for profitability.' One way to resolve this problem is have sales report to an EVP of Marketing and Sales. Another suggestion is for Larry Wexler and/or Bill Campbell to increase the number and frequency of interviews with the trade press, local press (RH, Cabarrus), and security analysts, in order to send clear signals throughout the industry.").

courts generally reject conspiracy claims that 'seek to infer an agreement from . . . communications despite a lack of independent **[*1278]** evidence tending to show an agreement'").

Nevertheless, Plaintiffs assert Philip Morris "looked to the others to signal that they would play by the new rules." Pls.' Resp., at 39. Plaintiffs contend the "signals were not long in coming." **[**49]** *Id.* As discussed below, however, the allegation of Marlboro Friday as "invitation to collude," is not supported by the materials cited by Plaintiffs. Indeed, most of the incidents to which Plaintiffs refer occurred prior to the time Plaintiffs allege the conspiracy began -- November 1993.

Plaintiffs point to a statement made by BAT's CEO and Deputy Chairman, Martin Broughton, to the *Financial Times* on April 13, 1993, and argue that this is a signal that B&W would accept Philip Morris' "offer." Mr. Broughton stated, "BAT may be one of those who started the price war in the U.S., but we have no wish to escalate it." PMAT0300005506-5515, at 5510. As B&W points out, however, this excerpt is not the totality of Mr. Broughton's comments. Mr. Broughton's full comment was: "We may be one of those who started the price war, but we have no wish to escalate it. But we shall be ready to respond tactically where necessary." B&W Mot. S.J., at 21; Ex. D-3. The rest of the interview also notes that Mr. Broughton was "perplexed" by Philip Morris' tactics and that BAT "will wait to see what happens in the market before playing its own cards." *Id.* No reasonable jury could infer that B&W **[**50]** agreed to any particular future course of conduct from the entirety of this statement. [15]

[51]** Incongruously, Plaintiffs argue that "industry understanding began to coalesce" after Philip Morris *again* cut its prices on July 20, 1993. Pls.' Resp, at 40. Plaintiffs do not explain how an additional price cut by Philip Morris shows any previously existing industry-wide agreement to form a cartel to fix and raise prices. Yet some of the "signaling" contentions discussed by Plaintiffs are irrelevant unless such an agreement exists.

Similarly, Mr. Black's reporting of B&W CEO Thomas Sandefur's comments at a September 1993 BAT analyst meeting, does not support Plaintiffs' theory that Mr. Sandefur was signaling to Philip Morris **[*1279]** that B&W would agree to Philip Morris' "demand" and no longer compete on price terms. Mr. Sandefur stated:

> We believe that price cutting or discounting -- while still a factor -- will be less important than in the past. That's because gaps in the list price have narrowed between premium and V-F-M [value for money] brands. Premium brands, therefore, should regain some strength. Over time, smaller price increases coupled with state and federal tax increases, will bring premium prices up once again. This will make V-F-M brands more appealing. But **[**52]** in the near term, value-for-money brands will need to compete on some basis other than price. <u>And our company fully intends to pursue options other than price for our V-F-M brands</u>.

588113496-573, at 511 (emphasis in original). This statement does not indicate that B&W will not compete on price. It explains that with Philip Morris narrowing the price gap and forcing a return to strength for premium brands, "in

---

[15] Plaintiffs' own expert seems to recognize the purpose of this kind of statement. Dr. Fisher testified that he believed there are "perfectly good reasons why [companies] would want to tell analysts, we are going to be profitable from now on." Fisher Depo., at 179. Dr. Fisher opines, however, Mr. Broughton's statements "seem to have gone somewhat beyond that." *Id.* He later testifies, however, that it would be preferable, meaning more "legitimate," for BAT to say something more akin to "we are sorry there's a price war" because "nobody likes price wars." *Id. at 180*. The court finds it is splitting hairs to conclude that Mr. Broughton's comments, read in their entirety evidence an agreement when Dr. Fisher agreed it was not surprising that Mr. Broughton would express displeasure at being caught in a price war.

Plaintiffs describe B&W's response to Marlboro Friday as an "olive branch." Pls.' Resp., at 40. Plaintiffs point to a document written on May 25, 1993, by an unnamed BAT employee asking, "Should we signal to PM that we are prepared to go up?" BAT303501037-042, at 039. It is claimed that this document refers to Philip Morris' new pricing strategy. A review of that document and Plaintiffs' brief, however, provides no context for that statement. The document is handwritten with no indication who authored it. As such, the document does not constitute admissible evidence. Furthermore, on the same page as the quote cited by Plaintiffs are possible actions BAT considers taking in France and Germany. Thus, it is likely the document does not even discuss pricing in the United States. Moreover, there is no indication that any public statement was made related to this internal memo. For all of these reasons, the document does not reflect the import ascribed to it by Plaintiffs in their "olive branch" theory.

the near term," discount brands would have to come up with another way to compete. This statement is anything but a commitment to abandon price competition, as Plaintiffs allege. It is, in fact, a declaration of an intent to do so if and when the prices of premium brands are increased.

In their briefing and at oral argument, *see* Oral Argument, at 71, Plaintiffs then contend that Philip Morris looked to signal other companies. Plaintiffs' citation for this proposition, however, is an October 25, 1993 internal Philip Morris document from Geoffrey Bible to W.I. Campbell. *See* PMAT000144681-684, at 683 ("All of the foregoing suggests a strategy of market share as opposed to profitability when in fact our current instincts are toward the latter, so why have I focused **[**53]** on share? Because I'm looking at fairly flat to modest share growth with the view towards caressing the competition into a 'profitability' mode."). As described by the court above in discussing summary judgment standards, ***HN34***[] a hope by one company that it can create a disincentive for its competitors to engage in price competition to the detriment of profitability is not evidence of a collusive agreement to fix prices. [16] Marlboro Friday taught a marketplace lesson that market share gains bought by discounting are not sustainable and that in the end, market share will be lost and profits severely shrunk if a strong competitor also engages in price cutting.

[54]** Plaintiffs point to few events of "signaling" that occurred during the alleged conspiracy period. Plaintiffs proffer that RJR signaled it would accept Philip Morris' "conditions for a price hike" on November 2, 1993, when RJR's CEO and CFO met with industry analysts. Pls.' Resp., at 44. However, Plaintiffs' assertion that RJR's CEO Charles M. Harper "was signaling that RJR would meet PM's conditions for a price hike," *id.*, is without support. On November 2, 1993 Harper stated that RJR was going to focus on earnings growth and was "willing to accept modest market share losses as the cost of improving earnings." PMAT3000005464-473, at 465. The whole objective of free enterprise is to earn a profit. This may be achieved by selling more units at a smaller profit or vice versa. Because of Philip Morris' actions, RJR lost market share **[*1280]** and, therefore, was left with but one realistic avenue to grow its profit: to raise prices. There is nothing ominous or collusive about this statement. It is typical of the statements made every day by corporate executives to industry analysts as a means of providing investors information on a company's future strategic marketings plans.

The court notes, **[**55]** furthermore, that Plaintiffs premise their theory of "conditions for a price hike" on statements made by Mr. Black, not industry executives. [17] As described below, however, Mr. Black could not have acted as a conduit for Defendants. [18]

---

[16] Furthermore, the *Brooke Group* Court indicated that measures such as what Philip Morris did on Marlboro Friday should not be punished under ***antitrust law*** even if "the ultimate effect of the cut is *to induce or reestablish supracompetitive pricing." Brooke Group, 509 U.S. at 223-24* (emphasis added). The court also observes that the strategy of mutually assured destruction was directed at "caressing" the former Soviet Union into a peaceful posture but by no means would one infer that it and the United States were conspiring together.

[17] With regard to the "two conditions," Mr. Black testified that,

> This is my opinion -- this is my opinion that, as an analyst, if a price increase were going to stick, this is how it would have to be structured. This is my opinion, you know, looking at industry pricing structure in the past in other price wars, that these are the conditions that, in my opinion, as an analyst, would have to be in order to become bullish on the group.
>
> If I saw a different type of price increase, I wouldn't become bullish because I would conclude that it wasn't going to stick. *This is not something that would have come from the industry. This is my own opinion*.

Black Depo., at 140-41 (emphasis added).

[18] Plaintiffs cite document PM2023769230-232 for the proposition that "PM, too, appreciated from the clear implication of Harper's statements that RJR was willing to accept PM's conditions for a price hike." Pls.' Resp., at 44. A review of that document, however, shows it is a copy of a Gary Black industry report with some portions of the report underlined. It does not identify the "PM executive" Plaintiffs allege read these "signals" into RJR's statement, and thus, Plaintiffs' assumptions are based on mere speculation.

[56]** Plaintiffs contend that Philip Morris' "final signal" was an announcement on November 4, 1993, of allocation limits for wholesalers. Plaintiffs argue that this was an indication that Philip Morris intended to raise prices and was a "nod" to RJR that Philip Morris would agree to a price increase. Pls.' Resp., at 46. A Philip Morris internal memo dated November 3, 1993, indicates a recommendation for a price increase as of December 15, 1993 and a product allocation program effective November 5, 1993. The memo explains that "announcing the allocation program in November should curtail speculative buying and allow PM-USA to exercise some control in setting year end inventories." PM20451211128. There is nothing to suggest that Philip Morris is responding to RJR's willingness to move to a profitability mode except the temporal proximity of the two announcements. A complete review of the memo makes two things certain. First, Philip Morris had no idea that its competitors would react to a price increase and, to that end, had a competitive contingency plan. [19] Second, retail price actions were viewed by the manufacturers as a key part in competitive strategy. These varied concerns belie Plaintiffs' **[**57]** theory of an agreed-upon conspiracy. [20]

[58]** **[*1281]** Furthermore, at the time, industry analysts did not assume Philip Morris' allocation program was an indicator of a price increase. *See* Dean Witter Report, November 8, 1993, PM2023769202 (specifically rejecting notion that allocation was a "near-term indication of a pending price increase" and noting "it is our belief that [the allocation program] was driven by the behavior of wholesalers who were attempting to replenish inventories in order to maximize cash flow and minimize taxes prior to the close of their fiscal year-end (most wholesalers' fiscal year ends on November 30 or December 31")); Prudential Securities Report, November 8, 1993, PM2023769205 (rejecting assumption of price increase and noting "we believe that this mailgram was sent to appease troubled wholesalers who have been financially hurt by the price war's price cuts that lowered the value of their inventories."); Smith Barney Shearson Report, November 8, 1993, PM2023769208 ("While this move by [Philip Morris] may indeed be the prelude to a general price hike it could also be just a method of reducing some excess inventory at the wholesale level").

Plaintiffs point to other documents to show that Philip Morris **[**59]** and RJR knew how to "signal" competitors. Geoffrey Bible's notes for a meeting with Gary Black indicate, in response to a potential question about share gains by other companies, that "we consider it healthy competition when Lorillard grows Newport, or B&W grows Kool or GPC through normal promotional activities. However, we consider it provocative if share gains are sought through continuous price promotion." PMAT 000200976, Ex. 2119 to Bible Depo. As Mr. Bible testified, however, "to every action there's a market or competitive reaction. And so you always try to weigh your actions to minimize competitive reaction." Bible Depo., at 71. Mr. Bible's statement is nothing more than a recognition that Philip Morris intended to protect its market share, an intention already made clear by its actions on Marlboro Friday.

Remarkably, Plaintiffs assert that RJR learned the benefits of such market communication during a "war game" strategy session held in 1994 in response to Marlboro Friday. Such an event, however, belies Plaintiffs' illegal collusion theory. If RJR understood that Philip Morris was making an offer, as Plaintiffs contend, RJR would not need to conduct strategy games to determine **[**60]** how to respond to Philip Morris' overtures. *See* RJR 51962 5141-59, at 55-57. Thus, RJR's response does not reflect that RJR understood Marlboro Friday to be an "invitation to collude," as Plaintiffs allege. *See* Pls.' Resp., at 39-40. Plaintiffs portray the competitive event of Marlboro Friday as Philip Morris' opening "gambit" in demanding that other companies "play by the new rules." Pls.' Resp., at 39. But Plaintiffs fail to recognize that Marlboro Friday created a new competitive framework in the industry.

---

[19] Significantly, far from being the final link in the conspiracy, the internal memo reflects Philip Morris' uncertainty about the market's reaction. Philip Morris determined several possible risks from its strategy: (1) a competitor would exceed Philip Morris' increase by $ 0.50 to $ 1.00, (2) a competitor would announce a price increase in advance of Philip Morris', (3) competitors could fail to raise prices in the low end of the market, and (4) in the long term, competitors could initiate a mid-year price increase. *Id.* at 2045121129.

[20] Plaintiffs contend that the amount of RJR's announced price increase in November 1993 must have been agreed upon in advance because RJR's $ 2.00 increase matched the $ 2.00 suggested in Philip Morris' internal recommendation of November 3, 1993. As RJR notes, however, $ 2.00 price increases were common in the industry. *See* RJR Reply Brief, Ex. 38, Black Memo, October 21, 1993, at 4 ("most price increases have been . . . $ 2.00-$ 2.50 per thousand").

As the last feature of their signaling theory, Plaintiffs contend that Defendants used Black to "signal" on the following occasions: (1) in early October 1993, Black reported that Philip Morris and RJR removed coupons from their deep discount products and appeared willing to cede share to the "small players" at the low end; (2) Black predicted that for RJR to lead a price increase that Philip Morris would follow, the price increase would have to be for list prices of premium and discount by the same amount and the smaller companies would follow the increase on the deep discount brands; (3) Black reported that B&W would end most forms of discounting on its low price brands; **[**61]** (4) Black reported a statement by B&W CEO, Thomas Sandefur, Jr., on September **[*1282]** 30, 1993, that the company intended to "pursue options other than price"; (5) Black reported that RJR would focus on profits rather than share; and (6) that Philip Morris was switching to a "market share strategy."

Plaintiffs place great weight on the reporting of Mr. Black in developing their "signaling" theory. For Plaintiffs to survive summary judgment on this as a "plus factor," there must be some evidence that one of the Defendants fed Mr. Black information that prices were about to rise, and it ought to appear that what he published could be relied on as a statement of intention from a conspirator.

Throughout his deposition, however, Mr. Black repeatedly denied getting any "inside" information from the cigarette companies; rather, Mr. Black used primarily his sources in the wholesale and retail market, as well as publicly-available information to make his market predictions. *See* Black Depo., at 20 ("Most of my contact with the tobacco companies was with the investor relations folks, whose job it is to talk to the analysts, talk to the investors, you know, about the stock price, about corporate **[**62]** profits, about strategies . . ."); at 40 ("I never viewed myself as being privy to anything that I was the only person seeing from the tobacco industry."); [21] **[**64]** at 40-41 ("Q: Weren't there times when you received from tobacco companies information that at least to your knowledge was being sent to you and not to others? A: No. Q: Never? A: I don't think so. That's not the way they were allowed to do business."); at 131-32 ("it was very taboo for the industry to talk about pricing, and they made that clear. Any analyst conference, anything, they would say it's taboo, we can't talk about pricing, so most of my sources were either from retail or from wholesale."); at 134-36 ("pricing was a taboo topic [with the companies]" . . . "when I got information about pricing, whether it be from a wholesaler, a retailer, I would, of course, publish it . . . [pricing information] was very much coming from the field, not the manufacturers"); [22] at 148 (testifying that his sources

---

[21] Mr. Black repeatedly rejected Plaintiffs' "signaling" theory:

> Q: There is no dispute that from time to time [the companies] did talk about pricing and they did it quite openly, didn't they?
>
> MR. O'REILLY: Objection to the form. Vague.
>
> A: They would talk about pricing in the context of their cost structure, so that if costs were going up, whether it be promotional costs, litigation costs, there was obviously discussion about their economics.
>
> Q: And everybody understood what that meant, right, sir?
>
> MR. O'REILLY: Object to the form.
>
> A: I don't know what you mean.
>
> Q: Well, you understood it, didn't you? You understood, when their costs were going up and they were signaling their costs were going up, that meant they were talking about a price increase, right?
>
> A: No.

Black Depo., at 132.

[22] Mr. Black repeatedly rejected Plaintiffs' counsel's insinuation that he was privy to inside information:

> Q: My question to you, sir, is what was the source of your information that RJR would likely lead the price increase and Philip Morris would follow?
>
> . . .
>
> A: The source was my understanding of how industries work, that when you have a player like RJR that you could argue caused the price war because it was gaining so much share in discount, Philip Morris cut price, RJR was now hurting because it had debt commitments that it had to make. I felt that RJR was desperate to try to pull the industry out of the price

[*1283] were retail); at 150 ("I spent my time talking to retailers, wholesalers, that's where I got most of my information."); at 167 ("there was no little bird telling me that [BAT was going to raise prices], but the theory **[**63]** would suggest that they would follow"); at 171 (denying that RJR was signaling to him that they wanted the price war to end and testifying that it was simply his opinion as a "financial analyst, I could look at the balance sheet and see that they were in trouble"); at 219-20 (testifying that he estimated a 5 to 6% price increase not based on information he received from the industry, but from his analysis of the level of pricing necessary to hit the profit targets investors expected from Philip Morris); at 243 (testifying he did not receive price announcements from the tobacco companies). There is no other evidence that he was being fed by Defendants.

[65]** Furthermore, even though Mr. Black made a few correct calls, he was a very unreliable messenger of industry "signals." *See* Affidavit of Dr. Darrell L. Williams, Philip Morris Reply Brief. Of the 257 analyst reports authored by Mr. Black for Sanford C. Bernstein & Co., Inc., from April 1993 through May 1999, there were 43 total price projections. *See* Williams Aff., PP2-3. Only 31 of those 43 projections specified an amount and date for the price change. *Id.*, P 4. Of those 31 predictions, Mr. Black was correct on both amount and timing only 3% percent of the time; that is, only one of his 31 predictions was correct on both factors. *Id.*, P 5. Specifically, between November 1993 and November 1994, the one-year period during which Plaintiffs allege that Defendants established the conspiracy through the use of Mr. Black as a signaling medium, Mr. Black incorrectly predicted a price increase *seven* times. *See* Williams Aff., Ex. 2; RJR Reply Brief, at 13 & n.8. Prices did not increase until the following year in May 1995. *See id.* (noting additionally that even though Mr. Black predicted a May 1995 increase in March 1995, he then retracted that prediction on April **[**66]** 27 only days before the actual increase). Furthermore, even though Mr. Black retracted his March 1995 price prediction, Plaintiffs still assert that Mr. Black "read the signals" and predicted a 5% to 6% price increase in March 1995. In any event, Mr. Black's testimony makes it clear that the information he based this prediction on did not come from the industry. [23] He talked to people in "the trade," by which Mr. Black meant wholesalers and retailers, and **[*1284]** looked at the calendar while considering the history of price increases in the industry. Black Depo., at 218-19.

[67]** Because Mr. Black was so often incorrect in his predictions, Plaintiffs could not possibly show that his signals had an impact on pricing decisions, as is required to assert that "signaling" is a "plus factor." *See* Blomkest, 203 F.3d at 1034; In re Baby Food, 166 F.3d at 125. Accordingly, the court finds that the statements of Mr. Black

---

> war. That's why I thought RJR would be the one that would lead it, but that was based on my own analysis as an outsider looking at the industry.
>
> Q: Isn't it true that you had additional information beyond just your own analysis, that being RJR had announced publicly its interest in raising its profits?
>
> . . .
>
> A: No. That's not correct.
>
> Q: You are sure?
>
> A: I think I'm sure. RJR, during analyst meetings, would say, We would love to get our earnings up because we can't -- we are going to have a hard time making our debt payments if this price war gets any worse. So, yes, RJR did say things like that, and RJR clearly wanted to get its earnings up, but RJR never said, Well, we are going to raise prices and Philip Morris is going to follow; that never happened.

Black Depo., at 138-39.

[23] In response to Plaintiffs' counsel's question as to whether he received information from the industry, Mr. Black testified: "Not from the industry. It would come from the trade, from backing into what number -- what level of pricing do you need to hit the profit targets that investors expected from Philip Morris." Black Depo., at 219-20. Despite Plaintiffs' counsel's exhortations, Mr. Black continued to testify that he did not receive price increase information from the industry.

> Q: Well, nobody could tell you what the price hike would be other than the industry, correct?
>
> A: That's incorrect. I could back into it myself what they needed to hit their profit targets.

Id. at 220.

cannot constitute a "plus factor" because they will not support a reasonable inference of co-conspirator "signaling." Mr. Black's reporting was typical of reporting which thousands of analysts perform on countless industries every day. In sum, the court finds that Plaintiffs' theories of "signaling" do not tend to exclude the possibility that Defendants were engaged in competitive conduct and, thus, cannot be "plus factors."

3. Imposition of Permanent Allocation Programs

Plaintiffs argue that Defendants implemented permanent allocation programs in the fall of 1993 to facilitate their conspiracy. Plaintiffs contend that such allocations programs limit product supply, an inherently anti-competitive act, and restrict output. Plaintiffs also argue that permanent allocation programs are against the independent economic **[**68]** self-interest of non-coordinating firms. Finally, Plaintiffs contend that Defendants' justifications for permanent allocation are "false."

These contentions are devoid of factual support. The conspiracy is said to have begun in November 1993. Only Philip Morris put a permanent allocation program in effect in that month. Lorillard had one in March 1990 and RJR and B&W put theirs in effect in September and October 1993. They all would have had to have been clairvoyant to foresee Philip Morris' November "signal." Further, the programs did not effectively limit the wholesale market's ability to meet demand. Finally, the admissible evidence shows that the allocation programs were in the economic self-interest of Defendants.

Defendants effectively show that permanent allocation is economically rational because the prior system of no allocation or temporary allocation made it difficult for Defendants to determine true consumer demand, made inventories difficult to manage and unpredictable, and caused high levels of product returns due to staleness. Defendants further demonstrate that permanent allocation does not prevent increased allocation due to increased supply, but rather prevents **[**69]** wholesalers from speculating on inventory profits. Accordingly, there is no reasonable inference of an express and unlawful agreement from the implementation of an allocation program.

In the late 1980s and early 1990s, Defendants' direct customers engaged in "trade loading," a practice whereby the direct customers would purchase an amount of cigarettes in excess of what they could sell either (1) in anticipation of expected list price increases or (2) in response to end-of-quarter or end-of-year manufacturer discounts and incentives. Facts, PP 52-53. Plaintiffs admit that Defendants experienced increased costs due to trade loading because that practice would distort sales results and cause excess product returns, disruptions in shipping patterns, and stale product. *Id., P 54*.

Defendants have presented testimony and contemporaneous documentation to show that permanent allocation programs were initiated in response to trade loading concerns. B&W started a permanent system of purchase allocation restrictions in October 1993 called Expected Order Quantity ("EOQ"). B&W recognized the problems of trade loading as early as 1991. *See* B&W 1991-1995 Corporate Plan, **[*1285]** dated January 1991, 682502485-627, **[**70]** at 491 (listing as a financial performance objective to "reduce anticipatory buying of B&W products" in order to "minimize the practice of trade anticipatory buying to maintain shipment quantities and wholesale/retail inventories in line with consumer purchases"); B&W 1992-1196 Corporate Plan, dated January 1992, 682502375-483, at 382 (listing as a financial plan objective to "continue to reduce the level of anticipatory buying of B&W products" and calling for "further reduction in anticipatory trade buying by one billion units in both 1992 and 1993"). Prior to the imposition of a permanent allocation system, B&W used a system that would "flag" wholesale purchases that exceeded normal amounts. *See* Baker Aff., P 11. B&W testified that it recognized the "flagging" system was not doing enough to eliminate trade loading. *Id.* Because of the financial burdens already incurred due to Marlboro Friday, B&W was not going to meet its 1993 income projections and therefore determined also to incur the financial losses associated with terminating trade loading in 1993 as well. *See id.*, P 12. As a result, B&W introduced its new allocation system in October 1993. [24]

---

[24] EOQ allows wholesalers to purchase between 110% and 130% of its previous four week order average. *See* Baker Aff., P 14. Under EOQ, the field sales staff determined whether larger orders would be permitted. *See* Inventory Management Program,

[71]** In May 1993, B&W estimated that the costs of trade loading reached $ 32.9 million per year. *See* 670808014-17, at 015, Year-End Trade Loading History, dated May 26, 1993. In 1994, through its permanent allocation program, B&W reduced its product returns and the cost of those returns by $ 33.7 million between 1993 to 1994. *See* 483100328-370, at 340, 1995-1999 Company Plan, dated October 1994; 482320481-546, at 488, 1996 Financial Data Volume, dated August 29, 1996.

Plaintiffs describe B&W's allocation program as "when customers' orders . . . exceed the 4-Week Limit for a brand style . . . the order will be cut . . . ." B&W634260060-069, at 064. Plaintiffs, however, only selectively cite from documents in an attempt to support this contention. A full reading of the program shows otherwise. The same document cited by Plaintiff describes the Inventory Management Program as follows: "Maximum order quantities are designed to be liberal enough to permit full service levels for all customers. *If needed, they may be overridden or adjusted at your request to meet legitimate service needs*." B&W 634260063 (emphasis added).

Plaintiffs allege that the testimony of numerous witnesses **[**72]** supports their contention that the permanent allocation system restricted supply and that requests for exceptions to allocations were refused. Plaintiffs cite the deposition testimony of several wholesalers who testified they had to go through a chain of command to get additional product. *See* Wertheim Depo., at 34 ("to get one case of cigarettes extra, I've got to go through a chain of command which is totally ridiculous."). The court notes, however, that upon further questioning, Mr. Wertheim admitted that on the three or four occasions that he had to call Richmond, Virginia to "beg" for cases of Marlboro, he did receive the requested amount of product. *See* *id. at 37-38*. Only one wholesaler testified that he was not able to get the product he was interested **[*1286]** in selling due to allocations. *See* G. Stevens Depo., at 104-13.

The deposition testimony of Anthony Karakas; also cited by Plaintiffs, is ambiguous on this point. Mr. Karakas testified that the allocation limits could change with "the amount of business that you were doing or you were going to do." Karakas Depo., at 79-80. Mr. Karakas then testified that on several occasions, he hit his allocation limit and he requested **[**73]** additional product from Philip Morris. He would make calls to try to get it increased and "sometimes they would modestly and sometimes they wouldn't." *Id. at 80-81*. He then stated:

> Q: And what types of reasons would you give for needing an in -- to go over your limit?
> A: Extra business, getting a new account.
> Q: Did you ever ask to actually change your allocation because you had a new account?
> A: Yeah. Yes, we did.
> Q: And were any of the manufacturers ever receptive to your changing the amount?
> A: If they thought you had a bona fide reason, they would.
> Q: But sometimes you would ask to change and they would simply permit you to buy over your allocation limit for that one time but keep your limit actually the same?
> A: That's correct.

Id. at 81. It is unclear whether Mr. Karakas is testifying that he could get additional product on a one time basis but could not get his allocation number permanently increased, or whether he is testifying that he could not get additional product at all.

Plaintiffs also point to the testimony of Messrs. Whitehair, Polino and Gutlove to show the permanent allocation system restricted supply. *See* Facts, Resp., P 56, at **[**74]** 26-27. The cited testimony, however, supports precisely the opposite conclusion. Mr. Whitehair, a former B&W senior vice president for sales and marketing, testified that if a wholesaler exceeded allocation, the request was flagged. Whitehair Depo., at 57. If the customer had acquired a "new chain of supermarkets" or "absorbed a smaller customer," the manager had authority to approve the additional request. "If we thought they were trade loading, we would just cap his order." *Id.*

Mr. Polino, a wholesaler, testified that since 1993, he could only remember hitting the allocation limit perhaps five or six times. He recalled that his sales for Marlboro Light increased, and Philip Morris "did make an adjustment and

---

October 14, 1993, 6334260060 (instructing field representatives to call on account and do inventory check to see if account needs additional product or to determine if account has gained business or needs product due to special promotions); *id. at 69* (during times of national promotion, quantities were automatically increased in the system).

increased our allocation for Marlboro Light box." Polino Depo., at 96. Mr. Polino also recalled that he hit allocation on Newports and called the Lorillard sales manager who increased the allocation with "no problem" at all. *Id. at 98*.

Mr. Gutlove, a wholesaler, testified that between 1993 and 1999, he "very seldom" went over allocation. Gutlove Depo., at 118. In fact, Mr. Gutlove only ran into problems with his allocation when he was trying to make additional purchases **[**75]** in anticipation of a price increase, the precise circumstance Defendants wanted to eliminate through their allocation program, and which Plaintiffs admit increased costs to Defendants. Facts, PP 52-53. Mr. Gutlove testified:

> Q: So how many times over, say, the period from when you became president in 1993 until about two years ago [1999] did you get an allocation that prevented you from making an order?
> A: Only when I expected a price increase towards the end of the year. . . .
>
> **[*1287]** Q: Did some of those involve the fact that you had a new customer and expected --
> A: No, no. Very seldom I took such a big customer that it would change my allocations.
> . . .
> Q: Had there been any occasions on which you asked for relief from an allocation for which the relief has been denied?
> A: All the time.
> Q: How many times has that happened?
> A: Two or three times a year, whenever there was a price increase.
> Q: When you say whenever there was a price increase, you mean when you anticipated that there would be a price increase?
> A: Correct, when I anticipated, towards the end of -- towards the end of December.
>
> Q: So it was before there was a price increase and you were ordering more product **[**76]** than you normally did in that period?
> A: Yes.
> Q: What was the reason you were ordering more product than you normally did?
> A: I believed that the manufacturers would raise their prices.
> Q: And so if you ordered more product at the old prices, you would make a bigger profit; is that correct?
> A: Correct.

Gutlove Depo., at 119-21. *See also id. at 123* (describing not being able to "load" stock before a New York State tax increase). Thus, while it is clear the wholesalers did not like the allocation system, the testimony presented by Plaintiffs is either ambiguous or shows the opposite of what Plaintiffs contend. As such, no reasonable inference could be drawn from Plaintiffs' evidence that Defendants used the allocation system to restrict output.

Furthermore, the testimony of other wholesalers was that they never "bumped" up on the allocation limits. For example, Paul Nelson, President of Hartz Foods, testified that after discussion, he received permission from Philip Morris to lift the allocation limit. Nelson Depo., at 129-30. Mr. Nelson further testified:

> Q: . . . Do you recall any instances beyond that time when Walt Leach called Philip Morris to get an allocation **[**77]** limit raised that Hartz Foods ordered some cigarette product from a manufacturer and was told that it could not purchase it because its limits had been reached?
> A: No, I don't know that we were ever told that our limit had been reached, but we were not allowed -- we were not open to buy. So we couldn't just purchase whatever we wanted. We called when we needed to call however many instances that was.
> Q: When you say we were not open to buy, what do you mean?
> A: I mean, we were free to buy as many as we wanted. If I want to buy ten thousand cartons of Marlboro I could not do it.

Nelson Depo., at 130. Mr. Nelson testified that B&W, RJR, and Lorillard never told Hartz Foods that they could not buy cigarettes because they reached their allocation limit. *Id. at 132*. *See also* Goldschlack Depo., at 80-81 ("We were under allocation, but we never had a problem of needing more allocation. We were always able to get what we wanted if we needed it. . . . If I had hit the limit, depending on how severely I needed the product, I could have called the district manager, requested it and got it. I never ran into a problem.") **[*1288]** and *id. at 81* (testifying that he always got the additional **[**78]** product he needed when he called the district manager).

Despite the import of this testimony, Plaintiffs also contended at oral argument that permanent allocation was an output restriction because it was a "zero sum gain." Oral Argument, at 75 ("if you went up 125%, somebody else had to go down that 25%"). There is no evidence in the record, however, to support this contention. In their Post-Hearing Submission in Opposition to Defendants' Motions for Summary Judgment, Plaintiffs point to Dr. Fisher's Report, P 95, to support the contention that permanent allocation was a "zero sum" proposition. *See id.* at 7-8 citing PMAT000166499 ("if one account allocation is increased, the other account should be decreased."). As the court described above, this provision is only relevant, however, when a retail account has moved from one wholesaler to another, not when a wholesaler acquired a completely new customer. As a result, no reasonable inference can be drawn that Defendants used permanent allocation programs as output restrictions.

Dr. Fisher, however, also contends that the permanent allocation system was used by Defendants to assure everyone involved in the conspiracy that there would **[**79]** not be "big share battles." Fisher Depo., at 142. *See also* Fisher Report, at P 98 (using permanent allocation prevents a manufacturer "itself from rapidly increasing its market share, and thereby putting a system of coordinated pricing at risk. The system instead forces any manufacturer that wishes to grow to do so only slowly, giving other firms time to detect and respond to any overly ambitious strategy of increasing share beyond the limits that they find tolerable."). As the court notes below, however, there were significant share swings among Defendants after the initiation of the permanent allocation system.

It also appears that Dr. Fisher premised his opinions concerning permanent allocations on a belief that all of the Defendants initiated their permanent allocation programs at the inception of the conspiratorial agreement. But there is no dispute that Lorillard established its permanent allocation program in 1990. *See* Fisher Depo., at 461-64, 467-70 (testifying that he had been "mistaken" about Lorillard because he did not have a basis for stating that Lorillard put its distributors on permanent allocation in 1993). As Dr. Fisher's testimony is to a major degree premised **[**80]** on an erroneous understanding of the evidence, it is not and would not be admissible and may not be relied upon to defeat a summary judgment motion.

The parties dispute when RJR undertook its system of permanent allocation. It is clear, however, that RJR had some kind of allocation system in place in August 1992. *See* Memo to All Division Managers re: Direct Account Exception Order Guidelines, dated August 20, 1992, 519947427 (noting the manner in which customers can get either "one time" or "permanent" allocation adjustment). As discussed above, B&W began setting a permanent allocation program in motion as early as 1991. Thus, Plaintiffs are unable to support their contention that permanent allocation programs were implemented to facilitate a conspiracy initiated in November 1993.

Plaintiffs also contend that the permanent allocation programs facilitated the alleged conspiracy because Defendants "closely monitor each others' allocation programs." Pls.' Resp., at 53. Plaintiffs' documentary evidence, however, does not support such a contention. In one document cited by Plaintiffs, "Competitive Review -- October 1993," Philip Morris employees engage in a ten-page detailed review **[**81]** of actions taken by each of its **[*1289]** competitors in the third quarter of 1993. In the section summarizing B&W's activities, the authors simply note that the company initiated an allocation program. *See* PMAT300005470. The other document cited by Plaintiffs is a summary prepared by Philip Morris of allocation systems in 1989 and 1990. Not only is this summary outside the alleged conspiracy period, it is also scarcely surprising that a company considering implementation of an allocation program would be interested in how its competitors handled the issues. *See* PM2048498527. [25]

In his rebuttal report, Dr. Fisher refers to a 1994 letter from McLane to Michael Szymanczyk at Philip Morris concerning McLane's LIFO transaction with RJR. *See* Fisher Rebuttal, P 100-101 (citing PMAT000166524). **[**82]** The court was unable to locate the letter to which Dr. Fisher refers in the materials presented by Plaintiffs and, thus,

---

[25] The court further notes that this document is labeled as "Exhibit A," but it stands alone in Plaintiffs' compilation of exhibits. Thus, Plaintiffs have provided no context or purpose for the generation of this document.

is unable to construe the circumstances or context of the letter. In any event, the letter indicates only that McLane's end of the year LIFO purchase exceeded its weekly RJR usage. It does not support a claim that Defendants "closely monitored" each others' allocation program. This slim documentary trail hardly constitutes "close" monitoring of each others' allocation programs. Plaintiffs cannot string together three highly individualized documents and spin a conspiracy of "close monitoring" out of such a diaphanous web. No reasonable inference could be drawn from these documents that Defendants monitored each others' allocation programs.

As noted, Plaintiffs also contend that there was no economic reason for Defendants to have such programs. Although Plaintiffs characterize Defendants' justification for their permanent allocation programs as "false," Plaintiffs rely to a great degree on Dr. Fisher, who testified that he found "it hard to credit" Defendants' justifications for allocation for reasons relating to inventory control and freshness of product. Fisher **[**83]** Depo., at 144. The court has already found that an opinion by Dr. Fisher on the reason for the commencement of permanent allocation programs is inadmissible opinion evidence. Expert opinion evidence also would not be admissible on whether a statement is true or false. Making that determination is a question for the triers of fact done with the application of familiar principles, and the opinion of an expert would not help them in this task. (To be sure, an expert may be helpful in understanding the economic effect of a business decision.) Dr. Fisher's opinion that Defendants' justification is pretextual is the only basis Plaintiffs have for challenging Defendants' programs. As the court has found such an opinion inadmissible, Plaintiffs have not gone beyond the allegations in the Complaint and Defendants' explanation stands unchallenged. The court, therefore, finds that Defendants have established a bona fide reason for the allocation program. A different result is not obtained even with Dr. Fisher's testimony.

Although Dr. Fisher said wholesalers testified that freshness was not an issue with other products, such as candy, and the cigarette industry was the only industry that placed **[**84]** such emphasis on freshness, he did acknowledge that the cigarette industry did accept returns. Fisher Depo., at 145. Thus, Dr. Fisher agreed that "it would be the cigarette companies that were stuck with stale cigarettes, if that were to happen." *Id. at 145-46*. Furthermore, Dr. Fisher allowed for the **[*1290]** possibility that his skepticism of Defendants' rationale for permanent allocation would be diminished by the knowledge that Lorillard began its program in 1990. Dr. Fisher testified:

> Q: . . . Yesterday, in response to some questions of Mr. Boies, I think you indicated that you did not credit the suggestion . . . that the system of permanent allocation related in part to reasons of inventory control and concerns over freshness.
> Do you recall giving that testimony?
> A: Yes.
> Q: Does the fact that Lorillard began its permanent allocation program in a period of at least relative competitive conditions in the industry in any way cause you to reassess your rejection of the credence of that explanation?
> MR. REINHARDT: Objection as to form.
> MR. ISAKOFF: Let me rephrase the question.
>
> Q: Lorillard -- is it fair to say that Lorillard, by starting a permanent allocation program during **[**85]** a period in which competitive conditions were, I think, in your view, more unstable than they were after Marlboro Friday suggest to you that you should reconsider your rejection of the credence of the explanation that permanent allocation is related to inventory control and freshness?
> A: You mean credibility, not credence?
> Q: Credibility, fine.
> A: Well, it's -- I don't have a closed mind, so, yes, I am prepared to reconsider it, and this, it seems to me, is a reason to do that.
> It doesn't seem, to me, to be totally compelling, no.

Fisher Depo., at 467-70.

Dr. Fisher then opined that "there are much simpler ways of dealing with that than permanent allocation, and indeed, if that were the principal reason, you would have thought the permanent allocation would have occurred many years before, since the freshness problem didn't suddenly arise after Marlboro Friday." *Id. at 146*. It is not the court's role, however, to second-guess the business judgment of the cigarette companies and find that Defendants "should have" instituted the programs earlier. *Todorov* instructs that ***HN35***[] where there is an independent business justification for defendant's behavior, an inference of **[**86]** conspiracy is not easily drawn. *921 F.2d at 1456* ("When the defendant puts forth a plausible, procompetitive explanation for his actions, we will not be quick to infer, from circumstantial evidence, that a violation of the antitrust laws has occurred; the plaintiff must produce more probative evidence that the law has been violated."). *See also In re Citric Acid, 191 F.3d at 1101* ("Courts have recognized that firms must have broad discretion to make decisions based on their judgments of what is best for them and that business judgments should not be second-guessed even where the evidence concerning the rationality of the challenged activities might be subject to reasonable dispute."); *Reserve Supply, 971 F.2d at 49-53* (same); Areeda, P 1415d, at 90-91 ("***HN36***[] The logic of any conspiracy argument here is that an apparently unprofitable act must reflect some additional cause, such as conspiracy. But the additional cause is needed to explain the challenged behavior *only if the defendant believes that his act would be unprofitable*. . . . To satisfy this standard, the judge must conclude not only that the defendants were wrong but so **[*1291]** very wrong **[**87]** that their explanations should be disbelieved, or that it would be incredible that all the alleged conspirators could be similarly mistaken as to their true interests. The point is that the court's business judgment should not control.") (emphasis added). Plaintiffs have presented no evidence that Defendants themselves believed their economic justifications for permanent allocation were not true.

Furthermore, it is not altogether clear that Dr. Fisher disputes the economic justifications for permanent allocation programs. It appears that Dr. Fisher does not take issue with the use of the temporary allocation system used by cigarette companies prior to Marlboro Friday. Dr. Fisher recognizes that the temporary allocation systems were put into place prior to a price increase and prevented wholesalers from "trade loading" before such an increase. Fisher Report, at PP 87-89; Fisher Depo., at 141-43. Dr. Fisher contends, however, that the "permanent allocation system is not supported by any persuasive efficiency justification." Fisher Report, at P 101. Dr. Fisher, however, does not explain the significance of a permanent, as opposed to temporary, allocation that would lead the permanent **[**88]** allocation system not to be "efficient." Dr. Fisher testified that "I don't know of any really good reason to put wholesalers on permanent allocations, as opposed to temporary allocations, except as a way of ensuring the other companies in the business that you are going to restrict the extent to which you can gain share." Fisher Depo., at 141-42. Defendants respond that they moved to permanent allocation because the temporary allocation system had alerted customers to potential increases in price, a fact the companies did not want to reveal until the actual price increase went into effect. Permanent allocations, thus, were a way to prevent public knowledge of price increases by a temporary allocation announcement. Dr. Fisher himself testified that he could "think of a reason why Philip Morris or any company might from time to time not want to let people know that the price increase was coming until they actually announced it." Fisher Depo., at 144. In sum, the evidence presented by Plaintiffs does not create a reasonable inference that permanent allocation programs increased the likelihood that there was a conspiracy. Given the clear evidence that the programs were perceived as being **[**89]** in the economic self-interests of Defendants and the fact that the system was in use by some before the alleged commencement of the conspiracy, a negative inference would be contrary to all reason.

4. Monitoring

Plaintiffs contend that Defendants "monitored" their conspiracy by sending detailed information, including pricing, to Management Sciences Associates, Inc. ("MSA/Pittsburgh"), regarding the volume of cigarettes sold by each manufacturer. [26] MSA/Pittsburgh is the self-proclaimed "world's largest processor of marketing, sales and financial data." *See http://www.msa.com*. In the consumer packaged goods category, MSA/Pittsburgh lists the following companies as clients: Adams Confections, Bongrain Cheese USA, Brown & Williamson Tobacco, Budweiser, Clairol, Coca-Cola, Fort James Corporation, Georgia-Pacific Corp., Heinz, USA, Kellogg Company, Kraft General Foods, Liggett Group Tobacco, Lorillard Tobacco Company, McLane Company Inc., Michelin Tires, Pepsi Cola Company, Philip Morris, Pinkerton Tobacco, Retail Services Inc., RJ Reynolds Tobacco, Scott Paper Company, SmithKline Beecham, Thomas J. Lipton, United States Tobacco Company, Warner Lambert, Welch Foods Inc.

[26] As with several other contentions, this one is without appreciable evidentiary support.

[*1292] Defendants **[**90]** began obtaining shipment-to-wholesale volume data from MSA/Pittsburgh beginning in the early 1970s. Facts, P 147.

Philip Morris began its Wholesaler Masters Program in 1993. This program provided incentives to wholesalers to provide MSA with wholesaler-to-retailer data in addition to shipment-to-wholesale data. RJR began attempting to collect wholesaler-to-retailers shipment data in 1992, with its own pilot program beginning in July 1993. *See* Position Paper on Developing a Retail Information System, dated November 15, 1995, 51959 4305-4309. Lorillard also started receiving information on shipments of wholesalers to retailers in 1996. *See* Affidavit of Randy Spell, P 8. B&W did not begin to receive wholesaler shipment to retailer data from MSA until November 1996. *See* Affidavit of Rick S. Baker, Division Vice President for the Trade Marketing Development, B&W, P 26. As with the permanent allocation programs, **[**91]** the varied dates upon which Defendants started to gather wholesaler-to-retailer data belies Plaintiffs' notion of a conspiracy.

In their complaint, Plaintiffs allege that pricing information was sent to MSA/Pittsburgh in furtherance of the conspiracy. *See* Second Amended Complaint, P 76. Discovery, however, revealed that no pricing information was collected and distributed. Despite the clear nature of this evidence, Plaintiffs resist Defendants' assertion that pricing information was not exchanged through the MSA/Pittsburgh arrangements. For example, in response to Defendants' Statement of Material Undisputed Fact P 48, asserting that no data provided to MSA/Pittsburgh contained pricing information, Plaintiffs state: "MSA may or may not collect price data directly." The import of this statement is unclear. Plaintiffs plainly do not deny Defendants' asserted fact. In fact, it might be difficult to do so when Plaintiffs themselves in their discovery responses admit that no pricing information was sent to MSA/Pittsburgh. *See* Supplement No. 4 to Plaintiffs' Responses and Objections to Defendants' Interrogatories, Interrogatory No. 8, at 26-28 (in response to interrogatory requesting **[**92]** Plaintiffs to "identify each type, category or field of information that you provided to or received from any 'electronic database clearinghouse' including but not limited to MSA," no Plaintiff responded that pricing information was sent to MSA/Pittsburgh). *See, e.g.*, Gutlove Depo., at 89 (testifying he sends information on number of cartons sold by UPC code, retailer's name and address, including zip code and the date of purchase, but no pricing information); Polino Depo., at 47-48 (same); Wertheim Depo., at 177-79 (same). Thus, Plaintiffs' own testimony establishes that no pricing information was directly sent to MSA/Pittsburgh by the wholesalers. [27]

[93]** Even if pricing data were not directly submitted to MSA/Pittsburgh, Plaintiffs contend that it could be derived from the detailed volume data reported. *See* Pls.' Resp., at 53-54 n.26 (citing Fisher Report, P 110). A review of that paragraph of Dr. Fisher's report does not reveal any opinion **[*1293]** by Dr. Fisher that pricing information could be gleaned from the supply data sent to MSA/Pittsburgh. In fact, Dr. Fisher's testimony seems to contradict Plaintiffs' point:

> Q: For example, as you understand it, Philip Morris would know how much each individual wholesaler sold of RJR cigarettes to each individual retailer?
> A: I believe they would know it in finer detail than that. They would know it by brand.
> Q: Do you believe they also know the prices at which their cigarettes were sold?
> A: Not from that.
> Q: From what do they know the prices, if anything?
> A: I don't know that they do know the prices.
> . . .
> Q: The MSA data does not include data with respect to prices; is that right?
> A: That's right.

---

[27] Plaintiffs' citation to Liggett's description of Philip Morris' Wholesale Master's Program is not contradictory. Liggett indicates that the electronic reports include "detailed retail store information for all manufacturers' products including SKU level detail, on-hand warehouse inventories and all promotional deals." LIGG009154. It says nothing about price. Furthermore, this document, far from showing a conspiratorial purpose behind the reporting requirements, indicates Liggett's belief that Philip Morris was using its market share and the incentives provided to participants in the Wholesale Master's Program to force wholesalers to stock more Philip Morris inventory than that of competitors. *See id.*

> Q: So that the only way that you could infer that there is a price cut is if you saw a volume increase; is that correct?
> A: That's right.

Fisher Depo., at 157, 162. [28]

[94]** Defendants argue that this type of "facilitating practice" is not sufficient to constitute a "plus factor" because collection of information about volume distributed by each Defendant does not exclude the possibility that Defendants were acting lawfully. Defendants' expert contends that there are legitimate usages for the sales volume data that MSA/Pittsburgh collects. "Just as in many other markets, cigarette manufacturers use sales volume data to learn how their brands are selling relative to rivals' brands. Information like this can foster competition because it enables firms like Philip Morris to target its potential customers, adjust its prices by brand and tier to reflect changing market conditions, and evaluate the impact of retail promotions." Elzinga Report, at 17.

Dr. Elzinga concedes that a "cartel seeking to allocate and stabilize market shares might utilize share-of-market and volume information to monitor cartel compliance," but he also notes that "firms *competing* against one another also gather and analyze market share and volume information" to determine where promotions are needed. *Id.* at 17 (emphasis in original). Dr. Elzinga contends that Defendants could **[**95]** not monitor competitors' prices at retail from the data provided by MSA/Pittsburgh. To get this information, companies pay for research data from A.C. Nielson or IRI/Capstone. *Id.* at 18.

The court notes that Plaintiffs' expert seems as ambivalent about this information as Defendants'. Dr. Fisher opines that a

> cigarette company may need to know the sales of its own brands (perhaps as a share of total industry sales) to determine whether wholesalers and retailers have met its incentive program targets. A company may also find it useful to collect information about its competitors' shipments for reasons other than facilitating coordination. For example, if the data reveal that a competitor's 100 millimeter menthol lights have suddenly become extraordinarily popular in rural **[*1294]** Kentucky, a firm may wish to make sure that its own brand of this style of cigarette is readily available and even promoted in those areas. However, while there may be legitimate competitive reasons to want to know how other firms' products are selling, it is often the case that a company is much less willing to allow its own data to be provided to its rivals.

Fisher Report, P 109. *See also* **[**96]** Fisher Depo., at 459 (testifying that he understood that such data could be useful to Lorillard "in competing and brand building at retail"). This assessment does not preclude the possibility of competitive conduct. Dr. Fisher, himself, seems to recognize that such information could be used competitively by beginning the next paragraph in his report with the phrase "whatever other role it might play, . . ." such monitoring is a useful facilitating device. Fisher Report, P 110. Dr. Fisher testified:

> Q: As you understand it, are there legitimate business reasons for the companies to exchange volume data?
> A: There are legitimate reasons why each company would like to know the other's volume.
> Q: Why is that?
> A: That depends on how detailed one gets that. The example that is used in the report is, gee, if somebody is having a surge in a particular kind of cigarettes in a particular part of the country and we want to get ahead of this, because there is a change in demand, we would like to know if that's happening.
> Q: Would knowing that that is happening improve the level of competition?
> A: Yes.

Fisher Depo., at 159-60.

In addition to being ambivalent, Dr. Fisher's discussion **[**97]** of the MSA/Pittsburgh data consistently focuses primarily on its use as a "facilitating device."

---

[28] Moreover, pricing information seems irrelevant to Plaintiffs' more fully articulated theory that Defendants did not use MSA/Pittsburgh to obtain pricing, but rather to monitor the conspiracy and to detect "cheaters." *See* Fisher Report, P 110; Fisher Depo., at 160 ("continual monitoring of market share data is one way to ensure that cheaters will be detected").

> Q: With respect to the exchange of market share data, in your view, can that exchange of data facilitate price coordination?
> A: Yes.
> Q: How?
> A: One of the things . . . that's required or that helps price coordination is the assurance that others are not cheating, that they are not offering secret price cuts and trying to gain share by cheating on the arrangement. A continual monitoring of market share data is one way to ensure that cheaters will be detected.

Id. at 160. Even Dr. Fisher's testimony, however, shows that volume monitoring is not a very efficient method of detecting cheaters:

> Q: Would you agree that if there are significant increases in volume that [they] are not related to price cuts because it is your testimony that there have not been price cuts, correct?
> A: Yes.
> Q: Would you agree that if there were then significant increases in volume, this would not be a good way of monitoring whether or not there were price cuts?
> A: No I wouldn't.
>
> Hold on. In the first place, there are price promotions at retail, and some increases in volume occur **[**98]** for that reason. Secondly, monitoring volume, even if there are fluctuations in volume, is a way of being sure that there isn't a -- or that people can't get **[*1295]** away with systemic large scale cheating on the agreement.
> Q: How does somebody determine whether somebody is gaining or losing market share because of systematic cheating or simply because they are doing better?
> A: Well, A, it's a lot easier to do that if you have the data than if you don't. B, you can ask the question, okay, somebody is gaining at certain wholesalers. Is there something going on that explains it? Is there a couponing promotion in place, is there a buy-some-get-some-free in place, you know, do we know what's going on here. If not, is there something we need to explain. If the thing we need to explain is large, and then the question becomes why, and as I say, it is a lot simpler -- it may not be perfect, but it is a lot simpler to sort out cheating from sort of natural fluctuations and natural from somebody just doing better if you have the data than if you don't.

Id. at 163-64. Moreover, the fact that a "facilitating device" *could* be used in furtherance of a conspiracy is not sufficient to constitute **[**99]** such a practice a "plus factor." To be a "plus factor," a practice must tend to exclude the possibility that Defendants are engaged in lawful conduct.

The documents cited by Plaintiffs also are equally subject to multiple interpretations. A PM-USA Five Year Plan Summary document illustrates that Philip Morris wanted to continue to improve its ability to monitor consumer and market trends to "flag shifts in market trends and provide information on possible causal factors. These reports will provide significant insights into competitive strategy and provide PM-USA the ability to recognize and respond to shifts in the market before they become widespread." PMAT 500103299-3300. An untitled Philip Morris document states:

> In 1993, we launched a new Wholesale Masters Program which linked trade payments to wholesaler performance against specific PM share targets and business objectives. In March 1994, we expanded the program to require that distributors require weekly shipment data by retailer and sku. We now receive weekly cigarette shipments from our wholesalers to over 300,000 retail outlets. *This information gives us competitive advantage over all manufacturers in planning our* **[**100]** *marketing expenditures*. At present, accounts representing 78% of our volume have signed up and accounts representing 71.7% of our volume are submitting data. The database gives us better inventory control and an early warning system for competitive initiatives.

PMAT000026525 (emphasis added). In their response to Defendants' Statement of Material Undisputed Facts, at 23, Plaintiffs interestingly omit the portion of this document highlighted by the court and focus rather on the last sentence only. Seen in context with the entire discussion, however, is at least equally, and most likely more, susceptible to interpretation as a competitive, rather than collusive discussion. It is a significant element of competition to try to prevent your competitors from gaining share inroads into your product sales. [29] Accordingly, the court finds **[*1296]** that the testimony of Plaintiffs' expert is ambiguous as to whether the information sent to MSA/Pittsburgh was used to monitor the conspiracy. As the court described above, because Dr. Fisher's testimony does not make it more likely that Defendants had an agreement to fix prices, it is of no relevance. *See* Fed. R. Evid. 401. As Plaintiffs' contentions **[**101]** about Defendants' monitoring of the conspiracy do not tend to exclude the possibility of competitive conduct, the sending of information to MSA/Pittsburgh cannot be a "plus factor."

5. Actions Contrary To Economic Interests

Plaintiffs contend that on numerous occasions, Defendants took the following actions against their economic **[**102]** interests: (1) non-initiating Defendants always followed price increases; (2) after Marlboro Friday, B&W and RJR turned away from discount cigarettes; (3) RJR led, and Philip Morris followed, a price increase despite planning documents which reflected they would not take increases; (4) each Defendant exchanged information through MSA/Pittsburgh; (5) each Defendant had permanent allocation programs; (6) Philip Morris based settlement payments on market capitalization and not market share; and (7) Defendants agreed to pay "excessive" settlement price increases. [30]

HN37[] It is clearly established that actions taken against economic interest may be a "plus factor." *See* Harcros, 158 F.3d at 572. However, as described above, in analyzing such allegations, the court must be mindful not to engage in second-guessing of companies' business decisions. *See* Todorov, 921 F.2d at 1456-57; **[**103]** In re Citric Acid, 191 F.3d at 1101; Reserve Supply, 971 F.2d at 49-53; Areeda, P 1415d, at 90-91. Similarly, the court in *In re Baby Food* cautioned that "actions against economic interest" was an "ambiguous" term that simply could be interpreted as a restatement of the definition of "interdependence." *See* 166 F.3d at 122 (stating, for example, that "refusing to raise or lower prices unless rivals do the same could be against a firm's self-interest but nevertheless could spring from independent behavior"). In the Eleventh Circuit, to show that an act is against "economic self-interest" the "plaintiff must establish that each defendant would have acted unreasonably in a business sense if it had engaged in the challenged conduct unless that defendant had received assurances from the other defendants that they would take the same action." Harcros, 158 F.3d at 570 n.33 (quoting Bolt v. Halifax Hosp. Med. Ctr., 891 F.2d 810, 826-27 (11th Cir. 1990)).

a. Little Analysis of Whether to Follow Price Increases

Plaintiffs contend that either Philip Morris or RJR initiated every price increase from **[**104]** November 1993 through February 2000. It is contended the price increases could have an effect on a follower's financial situation and place in the market, and yet Defendants followed price increases with little or no analysis. It is true that while little appears to have been done to evaluate alternatives, Plaintiffs point to no evidence to support the contention that following the price increase was against Defendants' economic interests. *See* Pls.' Resp., at 59-60. It is important to note that Plaintiffs do not argue that the quick decisions support the notion that **[*1297]** there was an agreement to do so. Further, such an argument would not be helpful. *See* Blomkest, 203 F.3d at 1032-33 (***HN38***[] fact that "price changes by one producer were quickly met by others . . . establishes only that the producers consciously paralleled each other's prices"). This court finds that no inference here may be drawn from the speed with which competitors followed price increases. Conscious parallelism is not unlawful, and, as said, there is no evidence that the followers had more favorable alternatives.

---

[29] The court also notes that Plaintiffs offer no support for their contention that each modification to the service provided by MSA/Pittsburgh was made with the "joint agreement of all Defendants." Pls.' Resp., at 54. Rather, the documents cited by Plaintiffs show that MSA/Pittsburgh discussed various proposals with each company individually and made modifications to their services based on their, MSA/Pittsburgh's, views about what would be the most acceptable to their customers. There is no evidence in the documents cited by Plaintiffs that any of the Defendants negotiated together or reached any agreement together about what services they would request from MSA/Pittsburgh.

[30] The court has addressed above Plaintiffs' arguments concerning the permanent allocation program and the sending of data to MSA/Pittsburgh.

Testimony and contemporaneous documents show that RJR, B&W, and Lorillard found their options **[**105]** extremely limited after Philip Morris' Marlboro Friday announcement. Under those circumstances, Defendants contend, it did not take much analysis to decide whether to follow the price increases of RJR and Philip Morris. As Plaintiffs' expert testified, Marlboro Friday "made it clear to the other companies that Philip Morris was prepared to take quite drastic action to get what it wanted in the way of pricing." Fisher Depo., at 32-33. RJR also recognized that with Marlboro Friday, Philip Morris was announcing that it would maintain Marlboro's market share growth at the "expense of profits." *See* Perspective on Marlboro Friday, dated April 26, 1994, 51696 9589. *See also* Keith Depo., at 87 (testifying that trying to gain a "competitive advantage via pricing actions" would not be successful against Philip Morris because RJR is not "as strong a financial company"); Beasley Depo., at 131 ("They [Philip Morris] have a lot more money than we do, and they're not going to let us take share from them because we're at a lower price. It's just not going to happen over a sustained period of time."); Johnston Aff., P 13 (the drop in earnings experienced by RJR after Marlboro Friday was serious **[**106]** problem for the company because RJR/Nabisco, RJR's parent company, carried a great deal of debt following a leveraged buy-out by Kohlberg Kravis Roberts in 1988). In considering its responses to Marlboro Friday, RJR rejected maintaining higher prices. *See* RJRT Update, April 28, 1993, at 51649 0214 ("Past lessons learned in Savings show that if we don't respond, we are badly and quickly hurt . . . RJRT share would decline substantially."). RJR could not afford to lower its prices further than Philip Morris did. *See* Responding to PM's Share Initiative, April 7, 1993, at 51643 6584 ("An across-the-board price war would be worse than the scenarios outlined."). Thus, RJR decided to match Philip Morris' price reductions. [31]

RJR then undertook a series of "war games" to determine its **[**107]** strategy in response to Marlboro Friday. RJR reviewed the results of the "war games" and determined that "pricing is too easily matched, and therefore an ineffective way for gaining advantage." Strategies, 51602 8811. *See also* RJR 1994-1998 Strategic Plan, June 1993, at 51953 4165 ("our objectives address how to compete in an evolving price war environment, while reducing its erosion of margins and earnings . . . price is not a competitive advantage -- escalating discounts does not pay"); Memo of James Schroer, Vice President of Sales & Marketing, November 4, 1993, at 51961 6249 ("I learned in 1993 that Nuclear War over market share between RJR and PM is a disaster we cannot afford, and we are all better off engaging in a 'Cold War.'"). Considering all of this information, RJR developed a "defensive price strategy." *See* 1994-1998 Strategic Plan, June 1993, at 51953 4166 ("Avoid escalating the price **[*1298]** war: match competitive discounting, but do *not* use price to grow share.") (emphasis in original). Once RJR determined what its strategic response would be to Marlboro Friday, there was no need to re-complete that evaluation each time RJR needed to decide whether to respond to **[**108]** a price increase. Plaintiffs presented no evidence to challenge RJR's conclusion that it was in its economic interest to follow price increases.

Furthermore, these and other contemporaneous documents reflect RJR's uncertainty about what trends would occur in pricing -- an uncertainty that belies Plaintiffs' allegations of conspiracy. *See* Agenda 1995 Outlook, dated September 12, 1994, 51961 1618-1626, at 1620 (predicting, incorrectly, that Philip Morris would lower premium prices in November 1994); Price Rollback Contingency Plan, dated September 16, 1994, 51694 6787-6822, at 6788-89 (assuming Philip Morris would lower prices by $ 1.50 /carton, but recommending that RJR only drop $ 1.25/carton); Intercompany Memorandum, May 25, 1995, 51393 1583 (noting possibility of another Philip Morris rollback); 1996-1998 Strategic Assessment, dated June 1995, 51952 6068-6085, at 6077 ("market disruption due to pricing actions remains huge concern") at 6080 ("'Price Wars' continue to be a looming threat as players guard and/or develop market positions").

Similarly, B&W contends that as a small player in the cigarette industry, it really had no choice but to follow the price leadership of Philip **[**109]** Morris and RJR, who made up nearly 75% of the cigarette industry. Facts, PP 58-59. Mr. Carpenter, brand manager for B&W's GPC brand, testified that it did not take much analysis for B&W to follow RJR's November 1993 price increase.

> There is such a thing within the company as institutional knowledge. I mean, we have had price increases over the years, so it is not like each individual price increase requires a huge amount of analysis to determine whether it is a good thing or not. In the case of the Reynolds price increase in November, as I recall it, given

[31] Dr. Fisher did not disagree with this strategic decision. *See* Fisher Depo., at 68 (testifying that he thought there were "legitimate business reasons" for matching price decreases immediately following Marlboro Friday).

> the financial pain that we had suffered as a result of Marlboro's actions, it probably took us less than a second to make that decision that of course we wanted more money, and more profitability, so that analysis would have been quite simple.

Carpenter Depo., at 69. *See also* Brookes Depo., at 102-03 (B&W followed RJR's price increase in May 1995 because there had not been a price increase for some time and volumes were declining, so a price increase gave an opportunity to reverse profits that had been "flat to declining"). Lorillard had similar concerns. Because of its market size, Lorillard viewed itself as **[**110]** a "price taker" rather than a "price leader." *See* Spell Depo., at 43 (Lorillard could not lead price increase because volume and share would suffer). *See* *id. at 44-45* (Lorillard could not lead price decrease because they could not get separate price points from various points in the distribution chain). Again, Plaintiffs offered no evidence to challenge the economic decisions of B&W and Lorillard.

Plaintiffs contend in this connection that there was little analysis of whether to follow price increases because Defendants had advance notice of competitors' price announcements, *see* Pls.' Resp., at 24-25, and they paint these as evidence of an agreement. Plaintiffs argue that this "advance notice" was given through Gary Black's reports in 1995 through 1997. As the court has explained above, however, Mr. Black received his information from "the trade," most often wholesalers, and not from the cigarette manufacturers. Thus, his reports provided nothing more than his own personal analysis of publicly available information. Moreover, as Defendants **[*1299]** have demonstrated, Mr. Black was far more often inaccurate in his pricing predictions, than accurate. No reasonable inference could **[**111]** be drawn, therefore, that his reports constituted some kind of "advance announcement" of a pricing decision.

Plaintiffs also assert that RJR and B&W had Philip Morris' Labor Day 1997 price increase announcement before Philip Morris released it to the trade and that Lorillard had advance notice of price increases on November 23, 1998; August 24, 1999; and a federal government price increase announcement of August 12, 1998. Philip Morris announced on August 29, 1997, that it would increase its prices effective September 2, 1997. *See* RJR 58003 9738. The documents cited by Plaintiffs give no indication that RJR had prior knowledge of that announcement. In fact, they indicate the precise opposite. RJR distributed through its organizations copies of competitors' price increase announcements *after* they had been made. *See* RJR 58003 9743 (announcement of August 30, 1997 B&W price increase faxed on September 2, 4997); RJR 58002 9472-73 (copy of August 29 memo distributed through RJR attaching August 29 price increase announcement by Philip Morris); RJR 53002 7868-69 (copy of September 2 memo distributed through RJR attaching August 30 price increase announcement by B&W); WU001273-75 (August **[**112]** 29 instructions from RJR to Western Union for price increase announcement). *See also* Supplemental Affidavit of Clay Lentz, PP 3-6.

Plaintiffs contend that B&W had advance notice of the Labor Day 1997 price increase and the January 23, 1998 increase. Again, Plaintiffs' citations to the record fail to support this contention. Plaintiffs cite a document entitled "Market Information TMB Report, August 1997." Although Plaintiffs give no indication who produced this report, it is clear from the document itself that it contains only public speculation about price announcements. *See* 462116427 ("Effective October 1st, cigarette prices in the U.S. will increase $ 3.50 per thousand, or $ .70 per carton. *Press reports suggest* this increase will be put into place to cover settlement costs resulting from the Mississippi and Florida class action lawsuits.") (emphasis added). The other document cited by Plaintiffs, "Industry Assumptions," is clearly a document speculating on the effects of the costs of settlement of suits in the tobacco industry. *See* 544109245-46 ("Our *assumption* is that [settlement costs and elasticity] will force Philip Morris to redeploy funds into discounting **[**113]** . . . . It is *assumed* that other major trademarks, Camel, Newport, Basic and Doral, maintain their current relative pricing strategies . . . . The industry will take a price increase of $ 2.50/M in 1/1/98.") (emphasis added). The "Industry Assumptions" document reflects a competitive environment where each company tried to plan its responses to guessed plans of fellow competitors rather than a cartel. In fact, both of the predictions made in these documents did not prove out.

Although Plaintiffs contend that "Lorillard had advance notice of imminent price increase announcements taken on November 23, 1998, and August 24, 1999," Pls.' Resp., at 25, Plaintiffs' citations again fail to support this allegation. Plaintiffs cite two "Contact Report" records kept by the company hired by Lorillard to send out price announcements. One report stated: "Sam [Zolot, Lorillard, General Manager of Sales Planning and Operations] called to give heads up that a price increase might be going out within the next two weeks." The other noted: "Called Kathy [Sparrow, Lorillard Vice President of Sales] to see if she was going to send out price increase tonight. She was in a meeting and will call back." **[**114]** *See* Lorillard Reply Brief, Ex. **[*1300]** 2. Neither of these statements reflects the import ascribed to them by Plaintiffs that Lorillard had advance notice of price increases.

Plaintiffs contend that Lorillard received a Philip Morris Federal Government price change announcement on July 25, 1998, before its issue date of August 12, 1998. Lorillard demonstrated conclusively that it did not receive the announcement on July 25, 1998, but rather received it on *August* 25, 1998. *See* Lorillard Reply Brief, Ex. 1 (comparing Lorillard 90260724 with Lorillard 05005150, and August 25, 1998, time stamp); Oral Argument, at 31-32. Thus, the evidence pointed to by Plaintiffs would require a jury to engage in speculation and conjecture to such a degree as to render its finding a "guess or mere possibility" that Defendants received advance price announcements from competitors. [32]

[115] b. B&W/RJR Going Away from Discount Cigarettes**

Plaintiffs argue that it was against the economic self-interest of B&W and RJR to turn away from the discount cigarette market. Plaintiffs note that in 1992 and 1993, RJR and B&W were "making significant inroads" into Philip Morris' market share by emphasizing non-premium categories. Plaintiffs further state that "analysts expected" that B&W and RJR would continue to pursue the discount market even after Philip Morris' Marlboro Friday announcement. Finally, Plaintiffs contend that it "was well recognized that it was not in either B&W's or RJR's economic interest to cease the discounting and promotions that had garnered them increased profits and market share at PM's expense." Pls.' Resp., at 60-61.

Significantly, the court notes that the *only* support Plaintiffs offer for their contention that "analysts expected" and it was "well recognized" that RJR and B&W should continue to pursue the discount market is the testimony of Gary Black. Plaintiffs point to the "estimation" of Mr. Black that had RJR "continued its market share drive in the discount segment, it could have been the new overall market leader by 1997." Pls.' Resp., **[**116]** at 36. Plaintiffs' gloss on Mr. Black's statement is misleading in several ways. Mr. Black's statement is taken from a document entitled "Cigarette Price Wars: Philip Morris' Strategy and Likely Outcomes," dated May 10, 1993. In that document, Mr. Black reviews the "origins" of the "price wars" and presumably, Marlboro Friday. He states as one of the origins that "RJR Was Winning Too Much Share: New Market Leader by 1997?" LOR05013199-217, at 200. Thus, Mr. Black's statement was not a prediction of what he would have expected RJR to accomplish *after* Marlboro Friday, but rather was an explanation for why Philip Morris felt it needed to take action in the form of the Marlboro Friday **[*1301]** pricing changes. Furthermore, Mr. Black's statement is far from definitive; he himself uses a "question mark" when considering whether RJR would have been the new market leader by 1997. In fact, Mr. Black himself indicated in October 1993 that he expected the cigarette manufacturers to focus on profits rather than market share. *See* RJR Reply Brief, Ex. 35, October 29, 1993 Analyst Report, at 10 ("Our view is that Philip Morris' competitors will realize that the optimal solution is to focus on profits **[**117]** -- even though on its own, a market share strategy seems to make more sense if Philip Morris continues to do so."); Black Depo., at 163 ("It could have [been the 'perfect opportunity' for B&W to expand market share by discounting], except that Brown & Williamson was hurt by the price war as well. Their profits had gotten pummeled, their stock price was down sharply, and our thought was why would you want your stock price to remain low as an investor."). Thus, Mr. Black's testimony does not show that "analysts expected" RJR and B&W to continue discount marketing after Marlboro Friday.

---

[32] The parties also dispute the manner in which wholesalers price cigarettes. Defendants contend that wholesalers raise prices on all manufacturers' brands as soon as one manufacturer raises its prices. As such, Defendants argue, they must follow price increases because to do otherwise would "leave money on the table" for wholesalers. Plaintiffs contend that wholesalers are able to price separately all brands of cigarettes, so Defendants would be able to distinguish their prices from competitors.

The court need not decide this issue because Plaintiffs have presented no evidence from which a jury could reasonably infer that "follow the leader" pricing was against the economic interest of Defendants or reflective of an agreement to fix prices. The court notes, however, that while there is some limited evidence to the contrary, it appears the vast majority of wholesalers act as Defendants contend. *See, e.g.,* Supplement No. 4 to Plaintiffs' Response and Objections to Defendants' Interrogatories; Gutlove Depo., at 224-25; Nelson Depo., at 79-80; and Wertheim Depo., at 93, 152.

Similarly, Plaintiffs offer no support for their contention that after Marlboro Friday it was "directly contrary to the self-interests of B&W and RJR" to raise the prices of discounted cigarettes. *See* Pls.' Resp., at 61. The document cited by Plaintiffs is an analysis of competitors conducted by Philip Morris in November 1993. It does not indicate at all that it was contrary to the interests of B&W or RJR to raise the price of discounted cigarettes. *See* PMAT000216641-653. In fact, the document reports that RJR's price increase was met with great favor by investors and stock analysts. *See id.* **[**118]** *at 646.*

Plaintiffs also contend that it was against the economic self-interest of RJR and B&W to "maintain a price gap" between premium and discount brands because those two companies were more heavily invested in discount brands. See Pls.' Resp., at 61-62. RJR, however, contends that it was in its economic self-interest to protect its premium brands, Camel and Winston, because those brands generated higher margins than its discount brands. RJR, then, also wanted to maintain an "appropriate gap" between the two tiers so that sales of its premium brands would not decline too much. *See* RJR Reply, at 15. RJR has proffered contemporaneous documents that support its strategic decisions to maintain a price gap. *See* RJR Confidential 1996 Pricing Strategy Overall Guidelines, 51693 6267 ("The importance of managing the price relationship (gap) between RJR Full Price Non Menthol (Camel, Winston, Vantage) and competitive brands at retail cannot be underestimated. These relationships are based on sophisticated statistical models, and when executed properly, have proven to hold our business."); Strategies, 51602 8811 ("profitability in Full-Price is still several times that of Savings"). **[**119]** RJR also responds that it could not have continued to pursue the same discount strategy that it used prior to Marlboro Friday because of the significance of Marlboro Friday. RJR learned that if it continued to pursue discount prices downward, Philip Morris could respond in the same manner it did on Marlboro Friday. [33] B&W apparently reached the same conclusion. *See* BAT000001172 (Marlboro Friday "forced all companies in the industry to reevaluate their brands since they can no longer **[*1302]** count on increase volumes in the VFM sector").

B&W contends that it did not move away from the discount market, but that it moved its spending to the retail level where the company believed its spending would be more effective. *See* Schoenbachler Aff., **[**120]** P 26 ("We believed that we could use the increased revenue from higher list prices strategically to discount GPC's retail prices . . . and thereby increase the retail price gap where we could gain the greatest advantage."). Documents cited by Plaintiffs also confirm this strategy. *See* BAT0000011168 (B&W has been "implementing sales incentive programs that further emphasize a partnering between B&W and retailers and wholesalers"); BAT0000011649 ("PM has already demonstrated its willingness to invest in achieving a FR/VFM price differential that is beneficial to its portfolio mix. . . . Their strategy is detrimental to B&W, as our portfolio mix is 60% VFM products. *B&W's philosophy is to provide competitive discounting support which ensures that the consumer experiences, at retail, at least the current price advantage in VFM products from FR*.") (emphasis added).

Defendants offered additional contemporaneous documents reflecting the same. *See* B&W Analysis of Industry Pricing Dynamics and Recommended Strategies, Oct. 29, 1992, 690802309-331, at 316 ("To execute its pricing strategy, B&W recommends that the company generally follow the industry's pricing actions given the **[**121]** difficulty of operating outside established industry boundaries. . . . Some portion of the [list] price increases will be discounted back to consumers to maintain the targeted [retail price] spreads."); B&W 1993-1997 Corporate Plan, Jan. 1993, 526030282-392, at 303 ("GPC has proven that an aggressively-supported program, with promotion spend directed at the consumer, remains the most effective and efficient method of competing."); B&W 1994-1998 Five Year Plan, Dec. 1993, 526300784-864, at 802 ("Given GPC's objective of growing share, volume and brand contribution throughout the Plan period, the key brand strategy is to maintain the brand's price competitiveness by providing sufficient discounting support to compete at/near the market bottom."). Thus, B&W chose to battle not on the wholesale list prices, but rather on providing discounting at retail. Plaintiffs have proffered no evidence that this strategic decision was against the economic interests of B&W. [34]

---

[33] Plaintiffs have provided no expert testimony, for example, showing that increased discount sales would have offset the lower profit margins, to support their contention that RJR would have been economically better off after Marlboro Friday by pursuing the discount market.

[34] The court understands that where price fixing is alleged, an injury to competition is presumed. It would seem, however, that the presumption is somewhat suspect in this case. The demand for cigarettes is fairly inelastic. Further, there is sufficient

[122]** Plaintiffs offer nothing more than the musings of Mr. Black to support their contention that RJR and B&W "should have" maintained emphasis on the discount market. Plaintiffs have not disputed the contemporaneous documentation provided by Defendants to support their strategic decisions. Further, there is no evidence that B&W de-emphasized discount brands. As such, Plaintiffs have presented no evidence from which an inference could be drawn that RJR's and B&W's actions were against their economic self-interest.

[*1303] c. The May 1995 Price Increase

Plaintiffs contend that it was against the economic interest of RJR and Philip Morris to increase prices by $ 1.50 per pack in May 1995 because the companies had previously stated they would not take a price increase in 1995. Plaintiffs cite a January 18, 1995 speech made by Philip Morris' CEO to the Board of Directors which indicated that Philip Morris planned no price increase in 1995. *See* PMAT100009165. Plaintiffs also point to an internal RJR recommendation against raising prices in 1995. [35]

[123]** RJR responds that while it is true that internal RJR staff recommended against raising prices, that recommendation was made because it was "doubtful" whether the other companies would follow RJR's price increase, a concern that belies Plaintiffs' allegation of price fixing. Nonetheless, RJR's CEO Jim Johnston decided in the spring of 1995 to increase prices in order to determine whether its competitors would do the same. *See* 51694 6707 ("Push price until see a problem created, then bring price back down."). Mr. Johnston testified that RJR "continued to face earnings pressure and to look for ways to improve its performance." Johnston Aff., P 17. Thus, RJR decided to take the risk of increasing prices. Plaintiffs' expert also agreed that "RJR was under considerable pressure in 1995 to improve its profits." Fisher Depo., at 122. Furthermore, Plaintiffs' expert testified that it would not have been "irrational" for Mr. Johnston to decide the risks mentioned in the recommendation were worth taking. *Id. at 482*.

Philip Morris followed RJR's price increase. While it is true that Philip Morris' CEO told the Board of Directors in January 1995 that the company planned no price increases **[**124]** in 1995, Plaintiffs, again, did not cite fully the CEO's comments.

> We also plan NO PRICE INCREASE in 1995. The benefit of this strategy will be higher Premium volume and a strong competitive advantage. PM USA has not raised prices since November 1993, and we firmly believe that we can significantly increase our IFO without resorting to either a price hike or a decrease in marketing/sales impact. *If the competitive environment changes significantly, however, we will respond immediately and appropriately*.

PMAT100009165 (italic emphasis added). Thus, Philip Morris did not say under any circumstances would it not raise prices in 1995; it left open the need to respond to competitors' actions.

Plaintiffs contend that Philip Morris had some remorse about its decision to follow RJR's price increase. *See* Pls.' Resp., at 63 (Philip Morris "subsequently conceded this was not in its self-interest"). The document cited for this proposition, however, provides no such support. *See* PMAT000003105-115, at 106, September 25, 1995 Memo from Jim Morgan to Geoff Bible ("However, our year was not without challenges and one major setback -- the

---

product differentiation so that wholesalers do not have an opportunity to substitute Winstons for Marlboro if Winstons are cheaper than Marlboro, so it is difficult to see what the injury to competition is at the wholesale level. There is cross-elasticity of demand between brands at the retail level. As such, B&W's decision to discount its VFM brands at the retail level is pro-competitive and it evidences an intent to maintain its commitment to discount brands. It is by no means an "unreasonable" business decision, and it is inconsistent with an agreement to fix prices to please Philip Morris.

[35] Plaintiffs' expert contends that the "pricing event is difficult to understand outside the context of explicit coordination through direct communications between companies." Fisher Report, at P 78. *See also id., at P 82* ("it is difficult to understand R. J. Reynolds' decision to lead a price increase unless some explicit communication took place, giving R. J. Reynolds the assurance that Philip Morris would follow its price increase."). As demonstrated below, a full reading of the contemporaneous documents shows that, indeed, RJR was concerned about whether other companies would follow its increase, thus, contradicting Dr. Fisher's theory. These statements, furthermore, offer no support for a contention that the May 1995 price increases were against the economic self-interest of Philip Morris or RJR.

product recall which slowed our **[**125]** momentum and gave our competitors an opportunity **[*1304]** to attack our premium brand strength. Their increased spending behind premium brands, fueled by the May price increase, has expanded the premium segment and lowered our share of this category."). This statement does not indicate that Philip Morris believed following RJR's May 1995 price increase was against the company's economic interest. Accordingly, Plaintiffs have proffered no evidence from which a reasonable inference could be drawn that the May 1995 price increase was against the economic self-interest of RJR or Philip Morris.

d. PM's Market Capitalization Agreement

Major tort cases against Defendants were settled in 1997. The shares of the initial payment (equal to about 1% of the total settlement) were computed on the companies' share of total market capitalization. Subsequent annual payments were allocated based on market share. Plaintiffs argue that it was against the economic self-interest of Philip Morris to agree that the up-front payments be based on market capitalization rather than market share. *See* Pls.' Resp., at 64.

Michael Syzmanczyk, CEO of Philip Morris, however, testified that Philip Morris' "up-front" **[**126]** payment under the market capitalization agreement was more than it would have been under a market share agreement, but that the company wanted to get the agreement made and negotiated the best terms it believed it could get. *See* Syzmanczyk Depo., at 196-97. There is no evidence that Philip Morris could have settled on a more favorable basis at that time, and Plaintiffs have proffered no evidence to dispute Mr. Syzmancyzk's testimony. Further, there is no evidence that the relatively small premium paid by Philip Morris in the initial installment was an unreasonable price for litigation peace. Plaintiffs' theory seems to be that Philip Morris was rewarding its co-conspirators for their participation. Plaintiffs, however, fail to note that B&W paid nearly 18% of the initial payment although its market share was only about 13%. As their thesis does not take into account all the known facts, it fails to create an inference of any sort.

e. "Excessive" Price Increases After Settlement Agreement

Plaintiffs allege that after state settlements, Defendants raised prices identically which benefitted the other Defendants more than Philip Morris. Defendants contend that Philip Morris **[**127]** should have used its stronger cash position to keep prices low and increase market share. Plaintiffs, however, provide no evidence for this position other than their own speculation. *See* Pls.' Resp., at 65 ("at the time of the Master Settlement Agreement, industry analysts questioned whether PM would immediately raise prices to pay for the settlement, or take advantage of its superior cash flow position to gain market share.").

Plaintiffs have offered no testimony, expert or otherwise, that Philip Morris would have been in a better economic position had it strived for market share. The undocumented speculation of industry analysts is insufficient to show that Philip Morris acted against its own economic self-interest in raising prices after the settlement agreement. [36] Strangely, Plaintiffs cite an internal review by B&W for the proposition that a price war breaking out after the Master Settlement Agreement was the "most rational and economically sound scenario." *See* Pls.' Resp., at 66. In fact, the document states the complete **[*1305]** opposite. *See* BW461105009-10 (noting that after the Master Settlement Agreement, industry pricing had two different options: "One view is that **[**128]** the higher base price level mandated by the settlement or [Federal Excise Tax] will provide an umbrella for higher manufacturer's price increases. The other is that lower industry volume, excess capacity, and the intensely competitive nature of the manufacturers will result in a 'price war' that will last until fewer companies are left standing than exist today. The latter view has the benefit of representing a more classical economics viewpoint *but appears irrational*. The former view, on the other hand, appears a bit starry-eyed.") (emphasis added). Accordingly, Plaintiffs presented no evidence from which an inference could be drawn that price increases after the settlement agreements were against the economic interest of Philip Morris.

---

[36] The internal review conducted by Philip Morris, and cited by Plaintiffs, is not to the contrary. In that report, Philip Morris speculates that RJR might benefit more from the settlement agreements in 1997, but that Philip Morris would have the advantage over its competitors in 1998. *See* PMAT000211925.

[129] 6. Nature of Market**

Plaintiffs argue that the "economics of the marketplace" is a plus factor because the "cigarette industry's structure is particularly conducive to cartel activity." Pls.' Reps., at 29. Plaintiffs point to the following aspects of the cigarette industry to support their claim: (1) highly concentrated market, (2) fungibility of cigarettes, (3) high barriers to entry, (4) absence of close substitutes, (5) industry's history of collusion, and (6) conspiratorial meetings in other markets.

Plaintiffs' first four factors, however, are simply statements of the characteristics of an oligopolistic market and, thus, are not plus factors that tend to exclude the likelihood that Defendants were engaged in competitive conduct. Plaintiffs next argue that the court should consider the tobacco industry's history of collusion. *See id.* at 31. In support of this contention, Plaintiffs cite *United States v. The American Tobacco Co., 221 U.S. 106, 55 L. Ed. 663, 31 S. Ct. 632 (1911)*, and *American Tobacco Company v. United States, 328 U.S. 781, 90 L. Ed. 1575, 66 S. Ct. 1125 (1946)*. ***HN39***[] The law generally disfavors use of such "historical" evidence. **[**130]** *See* Areeda, P 1421a, at 125 ("Illegal behavior elsewhere in time or place does not generally allow the inference of an immediate conspiracy."); *see also* *Fed. R. Evid. 404(b)*. Furthermore, Plaintiffs are not alleging that the prior conspiracy in the 1940s is continuing today. *See* Second Amended Complaint, PP 38-46 (where Plaintiffs describe competition in the industry from 1980-1993 and allege that the early 1990s were marked by competitive activity due to the introduction of discount cigarettes). Plaintiffs have cited no case law, and the court has found none, where "history of collusion" is used as a plus factor courts consider in cases alleging illegal collusion in an oligopolistic market. The court finds that the "history of collusion" in the industry does not tend to exclude the possibility that Defendants were engaged in lawful conduct during 1993 through 2000. Thus, the "nature of the market" is not a "plus factor."

Finally, Plaintiffs appear to allege that the multinational nature of Defendants' businesses should be a "plus factor." Plaintiffs first cite to Dr. Fisher's expert report noting that "it is a well known proposition in economics that multi-market conduct **[**131]** can improve firms' abilities to sustain agreements and coordinate by raising the cost of cheating." Pls.' Resp., at 32 (quoting Fisher Report, P 116). The court finds this statement irrelevant for the proof of a likely conspiracy during the time period in question. Taken to its logical conclusion, Plaintiffs appear to ask the court to find the existence of multinational corporations to be a "plus factor." Given the global nature of the economy, such a finding would substantially alter the legal landscape of antitrust analysis in an oligopolistic market. Plaintiffs then seem to **[*1306]** narrow the focus of their argument and contend that "all Defendants other than Lorillard held meetings and had other contacts in various locations through the world, at which they agreed to fix prices, allocate territories and/or fix terms and conditions of sale." *Id.* (citing evidence collected at Appendix B). The court will address below the lack of evidentiary and legal support for Plaintiffs' allegations regarding Defendants' conspiratorial meetings in other markets. *See infra.*

7. Strong Motivation

Plaintiffs argue that Defendants had a motive to conspire because of (1) declining demand and **[**132]** excess production capacity, (2) increased litigation and regulatory pressure, and (3) the destabilization of the market by introduction of discount cigarettes, so-called "commoditization." Specifically, Plaintiffs contend that Philip Morris believed that discount cigarettes would destroy its Marlboro brand and cause Philip Morris to lose its industry leadership position. Lorillard, though smaller, was in a similar market position because its premium cigarette, Newport, was its only significant brand.

As an initial matter, the courts notes that the characterization of motive as a "plus factor" is questionable. Professor Areeda noted that ***HN40***[] "conspiratorial motivation in the sense of a reasonable prospect of increasing profits through collective action is a logical corollary of interdependence. . . . Motivation is thus synonymous with interdependence and therefore adds nothing to it." *Id.*, P 1434cl, at 215; *see also* *In re Baby Food, 166 F.3d at 122* (noting that the concept of "conspiratorial motivation" is ambiguous because it merely restates the interdependence that characterizes an oligopolistic market). [37]

[133]** Moreover, there are numerous logical inconsistencies with Plaintiffs' position. Plaintiffs contend that Philip Morris and Lorillard, on the one hand, and RJR and B&W, on the other, had differing reasons for being "desperate" in the early 1990s. The fact that these companies had different market position and motivations undercuts Plaintiffs' theory that there was a common industry-wide motive to form a conspiracy. Furthermore, Plaintiffs' allegation that due to discount cigarettes, Philip Morris "desperately needed to take action to protect its leadership of the cigarette industry," Pls.' Resp., at 34-35, explains *Philip Morris*' motivation for Marlboro Friday, an act Plaintiffs agree was pro-competitive, but certainly does not give an industry-wide motivation. Thus, the "commoditization" Plaintiffs allege was not an external force that befell the cigarette industry; rather it was RJR and B&W that began to stake out space in the discount market. To these companies, the "commoditization" of the cigarette industry was not indicative of "desperate times," but rather was a purposeful market strategy. [38] It makes no sense, therefore, that the "solution" to such a "problem" would be **[**134]** an industry-wide conspiracy. [39]

Furthermore, Plaintiffs themselves contend that both declining demand, excess **[*1307]** capacity, and destabilization by discount cigarettes had been features of the cigarette industry since 1980. *See* 1994 Annual Meeting Q & A Book, PMAT300006144 ("The industry has been declining since 1981. We estimate the industry will continue declining at an annual rate between 2% and 2.5%."); Elzinga Depo., at 104 (testifying that since 1980 cigarette industry had excess capacity). Plaintiffs offer no explanation as to why the situation in 1993 had changed so dramatically as to require conspiratorial action that was not deemed necessary in the "competitive" years of 1980-1993. *See* Second Amended Complaint, **[**135]** PP 38-46. Accordingly, the court finds that Plaintiffs have not presented evidence from which a reasonable inference could be drawn that Defendants' "strong motivation" proves the existence of an express agreement to fix prices, nor does it tend to exclude the possibility of Competitive conduct. Plaintiffs' argument essentially contends that a murder may be assumed from the fact that a destitute heir would benefit from the death of a relative. The reasoning, of course, is fallacious and results from assuming talismanic significance of anything that may ever have been referred to as a "plus factor." The court understands that "plus factors" may but do not always create reasonable inferences.

8. Reduction in Price Tiers

Plaintiffs argue that Defendants reduced the number of price tiers for cigarettes to facilitate coordination of the price-fixing conspiracy. Specifically, Plaintiffs note that prior to Marlboro Friday, there were "at least 10 different price points within three or four tiers for cigarettes at the wholesale level." Pls.' Resp., at 47. By August 1993, Plaintiffs contend, there were only two main price tiers at wholesale, and nonpremium categories were consolidated **[**136]** into one price point. *Id.*

Plaintiffs provide no support for their contention that a consolidation of price tiers under the circumstances presented here constitutes a "plus factor." Although Dr. Fisher opined that reduction in the number of price tiers makes coordination of price increases easier, *see* Fisher Rebuttal, P 64, he also testified that Philip Morris' purpose in its Marlboro Friday strategy was "to reduce the price gap between premiums and discount cigarettes to avoid an erosion of share as people switched from premiums to discounts because of price." Fisher Depo., at 31. Dr. Fisher agreed that Philip Morris had "legitimate business justifications for its Marlboro Friday announcement." *Id. at 39*; at 46 (Philip Morris had legitimate business reason for narrowing the price gap to benefit its premium brands).

---

[37] *In re Medical X-Ray Film, 946 F. Supp. 209*, cited by Plaintiffs, is not to the contrary. There, the court found ***HN41***[] that "the presence or absence of a strong motive to enter into the alleged conspiracy" could be a "plus factor" under the circumstances. *Id. at 218*.

[38] As discussed, Marlboro Friday forced these companies to reexamine the wisdom of that strategy.

[39] The court addressed above Plaintiffs' allegation that if RJR had continued to push for a market share in the discount segment, it could have been the overall new market leader by 1997.

Plaintiffs have not presented evidence from which a reasonable inference could be drawn that Defendants reduced the number of price tiers to facilitate their conspiracy, particularly in light of Dr. Fisher's ambiguous testimony on this issue. The fact that the reduction of price tiers *could* facilitate a conspiracy does not tend to exclude the possibility **[**137]** that Defendants were engaged in competitive conduct and the court finds it is not a "plus factor." [40]

[138] [*1308] 9. Opportunities to Conspire**

Plaintiffs argue Defendants had numerous opportunities to conspire through the Tobacco Institute, which hosted regular meetings of the top leadership of tobacco companies, and the Institute's Committee of Counsel, consisting of the General Counsels of all of the major cigarette companies. Plaintiffs also contend that Defendants had opportunities to conspire during the attempted settlement negotiations of the state healthcare lawsuits. Finally, Plaintiffs assert that there were social contacts between the tobacco company executives such as golf, dinner, lunches, trade association conferences, and teleconferences.

Plaintiffs cite *In re Medical X-Ray Film, 946 F. Supp. at 218*, for the proposition that "opportunities to conspire" is a plus factor. In *In re Medical X-Ray Film*, however, the court was faced with numerous meetings during which the plaintiffs could demonstrate that pricing information was exchanged. As such, *In re Medical X-Ray* is distinguishable. [41] Furthermore, the Eleventh Circuit has held ***HN42***[] that "the mere opportunity to conspire among antitrust defendants does not, standing alone, permit the inference of conspiracy. **[**139]** " *Todorov, 921 F.2d at 1456*; *see also* *Blomkest, 203 F.3d at 1036* (opportunity to conspire "not necessarily probative evidence of price-fixing conspiracy"); *In re Citric Acid, 191 F.3d at 1103* (opportunities to conspire are insufficient to support an inference of conspiracy because they "do not tend to exclude the possibility of legitimate activity"); *In re Baby Food, 166 F.3d at 126* (finding that "communications between competitors do not permit an inference of an agreement to fix prices unless 'those communications rise to the level of an agreement, tacit or otherwise'"); Areeda, P 1417b, at 97 (***HN43***[] when considering opportunities to conspire "it remains the plaintiff's burden to prove that the defendant succumbed to temptation and conspired. It is not enough to point out the temptation and ask that the defendants bear the onerous, if not impossible, burden of proving the negative that no conspiracy occurred.").

[140]** Here, Plaintiffs have proffered no evidence that pricing discussions took place at any of the meetings of the Tobacco Institute or its Committee of Counsel. In fact, Mr. Meyer testified specifically they did not. *See* Meyer Depo., at 68-70. Nor have Plaintiffs shown that Defendants discussed pricing during the meetings to settle the state healthcare lawsuits. [42] Finally, **[*1309]** Plaintiffs have not demonstrated that at any pricing issues were discussed

---

[40] As they do on numerous occasions, Plaintiffs attempt to divide the competitive act of Marlboro Friday from its logical consequences. Plaintiffs argue that "part of PM's strategy *after* Marlboro Friday was to reduce the number of price points and to reduce the price gap." Pls.' Resp., at 47 (emphasis added). The reduction of price points and the price gap was not a policy that arose independently *after* Marlboro Friday; it was one of the goals of Marlboro Friday. *See* Fisher Depo., at 31. Plaintiffs again contend that "after Marlboro Friday, PM was intent on destroying the deep discount segment, to the detriment of its competitors and consumers generally." Pls.' Resp., at 47. This contention, however, does not support Plaintiffs' theory of a conspiracy. If the destruction of the deep discount segment was harmful to Philip Morris' competitors, it could hardly be one of the practices which facilitated the operation of the alleged cartel.

[41] For the same reasons, the court finds inapposite *In re Plywood Antitrust Litigation, 655 F.2d 627 (5th Cir. Unit A 1981)*. There, the plaintiffs offered evidence of a series of meetings between plywood producers that the producers themselves described as "an opportunity to secure specific competitive information." *Id. at 633*. Specific pricing information was exchanged. *Id. at 633-43*. The court held that the parallel pricing conduct plus "the numerous items of direct evidence of communication between high-level personnel *on pricing policy* adequately supported the jury's verdict." *Id. at 634* (emphasis added). Here, Plaintiffs have not shown that pricing policies were the subjects of any of the meetings among Defendants.

[42] Although Plaintiffs contend that statements of Mr. Geoffrey Bible, CEO of Philip Morris, illustrate the companies' desire to "pass through" settlements costs in the form of pricing, the specific comments Plaintiffs point to were made during failed settlement negotiations in 1997 which anticipated government involvement and an antitrust immunity provision for Defendants. Furthermore, as the court described above, Mr. Bible's comments were not related to price, but were made in the context of discussing the costs of the settlement agreement allocated based on market share, not pricing.

at the social engagements among the tobacco company executives. The sum total of Plaintiffs' contentions about whether these meetings involved discussions of pricing is the following:

> The Committee of Counsel met frequently, as did the numerous other committees that were part of the Tobacco Institute. It was through these committees that the most sensitive topics -- legal, health-related, etc. -- were discussed within the industry. It is not unreasonable *to assume* that the future price of cigarettes was among the topics discussed during some of these meetings.

Pls.' Resp., at 55-56 (emphasis added). [43] **[**142]** The court, however, cannot credit assumptions. [44] Accordingly, the court finds that Plaintiffs have not presented **[**141]** evidence from which a reasonable inference could be drawn that "opportunities to conspire" tend to exclude the possibility that Defendants were acting lawfully. As such, "opportunities to conspire" is not a "plus factor" under the circumstances presented here.

10. Pricing Decisions at High Levels

Plaintiffs argue that restricting pricing decisions to high level officials only is a "key requirement in any agreement to restrain trade," Pls.' Resp., at 57, and thus argue that the "restriction of decisions on pricing levels and timing is a further factor supporting an inference of conspiracy." *Id.* Specifically, Plaintiffs contend that at Philip Morris only the CEO had authority to authorize and determine the timing of price increases. Similarly, at B&W, only the CEO, marketing director, and CFO would discuss potential price increases.

Plaintiffs, however, provide no authority for their contention that limiting pricing decisions to high levels is a "plus factor," let alone whether it facilitates a conspiracy. In fact, in *Harcros*, the Eleventh Circuit deemed such evidence to be equivocal and, therefore, **[**143]** not a "plus factor" in a conspiracy analysis. There, the plaintiffs proffered a memo which showed that Joe Ragusa, a regional vice president for one of the defendants, "exercised strict control over chlorine pricing." *158 F.3d at 569*. The court found that such a memo could support an inference that Ragusa could not get his subordinates to follow instructions as easily as it could show that pricing was centralized with Ragusa in order to conceal a conspiracy. As such, the court found this evidence in "equipoise" and not sufficient to withstand defendants' motion for summary judgment. *Id.* Furthermore, Plaintiffs provide no evidence that the pricing at either RJR or Lorillard was similarly limited to high level employees. Plaintiffs' argument that to "effectuate such a conspiracy, pricing authority must be limited to a few select, high-ranking officials in *each* conspiring company," *see* **[*1310]** Pls.' Resp., at 57 (emphasis added), loses force when Plaintiffs do not demonstrate that the policy was limited in this manner in each company. Thus, the court finds here that Plaintiffs have not presented evidence from which a reasonable inference could be drawn to show that the restriction **[**144]** of pricing discussion to high level employees is a "plus factor."

11. Smoking and Health Conspiracy

Plaintiffs contend that Defendants have engaged in a "smoking and health conspiracy" whereby Defendants have agreed to limit health-based marketing of cigarettes. Plaintiffs assert that the smoking and health conspiracy is a "plus factor" because Defendants are able to facilitate coordination in their price-fixing conspiracy by suppressing product differentiation. *See* Pls.' Resp., at 58-59.

---

[43] The slim reed upon which Plaintiffs base this assumption is the deposition testimony of William Campbell, former President and CEO of Philip Morris, whom Plaintiffs quote as saying the Tobacco Institute "needed to increase even more the continuing cooperation by the members." Campbell Depo., at 287-88. As Defendants demonstrate, however, a full reading of Mr. Campbell's testimony indicates he was not referring to cooperation on issues of price. Rather Mr. Campbell testified that "most of these discussions were the type that, you know, how the organization could be strengthened in its industry efforts against things like the Federal Excise Tax and indoor air and so on." *Id. at 288*. In fact, Mr. Campbell testified that prices were never discussed at Tobacco Institute meetings. *Id. at 296-97*.

[44] As described above, although Plaintiffs claim they "were never given complete access to Committee of Counsel records to determine the existence of additional direct evidence of collusion," Pls.' Resp., at 56 n.30, the court finds otherwise.

Specifically, Plaintiffs allege that in the 1950s the cigarette companies decided to deal cooperatively with the "health crisis," the decline in cigarette consumption purportedly related to the first medical studies linking smoking with disease. *See* Pls.' Resp., at App. C. Plaintiffs contend that the CEOs of American Tobacco, RJR, Philip Morris, Benson & Hedges, and B&W met in New York to discuss the problem. They received advice from a public relations firm that the companies should reach an understanding that no one would seek a competitive advantage on the basis of health issues. Plaintiffs further note that in 1957 when US Tobacco advertised its "King Sano" brand as being "low-tar, **[**145]** " the Chairman of Philip Morris said that such advertising was not consistent with what the industry had been doing. *Id.*

Plaintiffs also cite a 1983 cigarette advertisement run by RJR and Philip Morris in the Netherlands which raised doubts about the tar and nicotine levels represented by B&W for its "Barclay" brand of cigarettes. B&W informed its companies that this was the first time another company had attempted to use health to gain a competitive advantage. Plaintiffs assert that B&W's parent company, the British American Tobacco Company, eventually reached an agreement with Philip Morris not to undertake this kind of advertising in the future. Plaintiffs further contend that the cigarette companies agreed to share the results of biological research and not independently attempt to produce a "safer" cigarette.

These allegations, however, all occur outside the time frame of the conspiracy alleged by Plaintiffs and thus are not probative as to the claims made in Plaintiffs' complaint. To bolster their claims, though, Plaintiffs' expert contends that even if these alleged non-price agreements were no longer in place during the time period relevant in the instant lawsuit, the **[**146]** historic "smoking and health" agreements facilitated price coordination in the relevant period. *See* Fisher Report, PP 130-33. A review of the evidence examined by Dr. Fisher, however, shows that Dr. Fisher either assumed the current existence of such a conspiracy or merely speculated as to the current effects of a past conspiracy. Dr. Fisher first opines that "actions taken to reduce the real or perceived health-based differences between products are important for facilitating coordination on price." *Id., P 133*. But in rendering this opinion, Dr. Fisher assumes such a conspiracy exists and does not relate his opinions to any evidence of a current "smoking and health conspiracy." Furthermore, as the court described above, it is not clear that the possibility that an activity that "facilitates coordination" is sufficient to constitute a "plus factor." Production of evidence to show that something could happen creates no inference that it did happen.

Dr. Fisher then reviews historic allegations of the cigarette industry limiting **[*1311]** health-based marketing, *see id., PP 134-35*, and draws the following conclusions:

> It is entirely ***possible*** that firms' decisions **[**147]** to limit health-based marketing in the past continued to be felt between 1993 and 2000. Such decisions ***may*** have checked companies' incentives to vigorously pursue health-related research. To the extent that health-related innovations were retarded as a result, cigarettes ***would have*** exhibited a higher degree of homogeneity between 1993 and 2000 than they would have otherwise. Similarly, firms limited their health-based advertising in the early to mid 1990s, which ***may have*** served to maintain perceived homogeneity. As explained above, greater homogeneity facilitates coordination on price. Thus ***to the extent*** that firms' decisions resulted in greater homogeneity between 1993 and 2000, it ***would have*** facilitated coordination on price in those years.

Id., P 136 (footnotes omitted and emphasis added). This paragraph addresses only possibilities and certainly does not tend to exclude the possibility that Defendants were engaged in lawful conduct. In order to draw an inference of conspiracy in this testimony, a jury would have to engage in such speculation that its finding would be a "guess or mere possibility." Accordingly, the court **[**148]** finds that Plaintiffs' allegations of a smoking and health conspiracy are insufficient to constitute a "plus factor."

At the conclusion of their smoking and health conspiracy discussion, Plaintiffs remark that they "have had no discovery of Defendants' activities between 1983 and the present, and no discovery of any information relating to 'smoking and health.'" App. C, at 7. The court, however, did permit Plaintiffs to seek discovery on these matters in the relevant time frame. After a hearing, the court addressed the dispute between the parties regarding "non-price" discovery and ordered that Plaintiffs could take discovery on:

> alleged anticompetitive agreements among Defendants during the time period of May 1, 1992 through February 8, 2000 to (1) refrain from competing with regard to the health and safety aspects of their products, (2) refrain from advertising on the basis of health and safety, or (3) restrict research and development activities that might lead to the production of a safer cigarette.

Order, August 22, 2001, at 2. The court also permitted Plaintiffs to serve requests for production and interrogatories and to take nine depositions on "non-price" issues. **[**149]** *Id.* at 2-3. Additionally, the court extended the existing discovery deadlines by sixty (60) days to accommodate Plaintiffs' "non-price" discovery. *Id.* at 3-4. [45]

12. Foreign Conspiracies

Plaintiffs contend that they have "discovered extensive evidence of anticompetitive activity in countries outside the United States, including explicit price-fixing agreements in many countries involving British American Tobacco Co., an affiliate of B&W, and Philip Morris International, an affiliate of Philip Morris U.S.A." Pls.' Resp., at 58. Plaintiffs then allege that "some examples of anticompetitive agreements are identified in Appendix B." *Id.* At Appendix B, Plaintiffs list **[**150]** documents relating to the following countries: (1) Argentina, (2) Canada, (3) Costa Rica, (4) El Salvador, (5) France, (6) Guatemala, (7) Saudi Arabia, Gulf States; (8) Hungary, (9) Panama, and (10) Venezuela. Finally, Plaintiffs avow that the "listing is not intended to be exhaustive, **[*1312]** either in terms of countries involved or of evidence available. Rather, it is intended to demonstrate a pervasive pattern of anticompetitive behavior engaged in by the Defendants or their affiliated companies." App. B., at 1.

Earlier in this litigation, Plaintiffs sought leave from the court to conduct discovery about Defendants' activities in foreign markets. After several hearings, the court instructed that

> Plaintiffs shall be permitted to serve new discovery requests relating to price-fixing episodes in foreign countries, provided that plaintiffs first make the following showing to the Court with respect to each country: (1) plaintiffs must show that under clearly-established statutes of the foreign jurisdiction, or, if the country is a common law jurisdiction, under the common law of the jurisdiction, an agreement between or among competitors to fix prices violated the law of the country **[**151]** where the agreement was made at the time of the alleged unlawful activity in that country; and (2) plaintiffs must identify by direct evidence one or more price fixing episodes in that country during the operative discovery period (May 1992 - January 2000) or that continued into the operative discovery period.

Order, Feb. 13, 2001, at 5-6. Subsequently, Plaintiffs filed a motion seeking discovery of Defendants' activities in Hungary, France, Argentina, Venezuela, and Panama. After full briefing on Plaintiffs' motion seeking discovery and a lengthy analysis of materials, the court concluded that

> price-fixing agreements were not at all times unlawful under the laws of the countries referenced by Plaintiffs. In fact, as the relevant laws are understood by this court, the jurisdictions in question generally analyzed price-fixing agreements under a "rule of reason" approach that considered various factors in determining whether such agreements were illegal. For the finder of fact to draw the inferences permissible under *Rule 404(b)* with regard to these jurisdictions, the court would need to conduct mini-trials on Defendants' conduct in each of the countries at issue. Such **[**152]** a course of action would violate Rule 403 by causing unfair prejudice to Defendants, confusing the issues, and resulting in undue delay of this litigation.

Order, June 15, 2001, at 8. Accordingly, the court denied Plaintiffs' motion to conduct foreign discovery.

Now, at the summary judgment stage, Plaintiffs reassert that they have "extensive evidence of anticompetitive activity" by Defendants in Hungary, France, Argentina, Venezuela, and Panama. *See also* Plaintiffs' Post-Hearing Submission in Opposition to Defendants' Motions for Summary Judgment, at 12 n.22. Plaintiffs fail, however, to address the court's previous ruling that "price-fixing agreements were not at all times unlawful under the laws" of these countries. Furthermore, Plaintiffs baldly contend that Defendants, or their affiliates, undertook anticompetitive

---

[45] In fact, Defendants did respond to discovery requests made by Plaintiffs on the smoking and health issues. Plaintiffs deposed two witnesses from RJR. Although the depositions of witnesses from Philip Morris and B&W were noticed by Plaintiffs, Plaintiffs cancelled those depositions. *See* Philip Morris Reply Brief, at 26 n.25.

price fixing agreements in Canada, Costa Rica, El Salvador, Guatemala, and Saudi Arabia (Gulf States). Nowhere do Plaintiffs describe the legal landscape in these countries that would make any such activities unlawful, nor do Plaintiffs do any more than cite to documents in describing the nature of these alleged anticompetitive activities. This is simply **[**153]** too thin a reed upon which to allege that Defendants' "foreign conspiracies" are a "plus factor" in the instant litigation. [46]

[154]** Perhaps recognizing the court's previous holding that Plaintiffs had **[*1313]** not presented evidence sufficient to warrant further discovery, Plaintiffs also assert that this evidence is probative of motive, opportunity, or intent under *Federal Rule of Evidence 404(b)*. However, as the court previously explained in its order on Plaintiffs' motion for leave to conduct foreign discovery, ***HN45***[] *Rule 404(b)* allows jury inferences only where the compared conduct is closely analogous to the conduct at issue in the instant suit. *See, e.g., United States v. Crockett, 514 F.2d 64, 72 (5th Cir. 1975)* ("important consideration" in balancing probative value of extrinsic evidence against prejudicial effects is "whether the other acts are closely connected in time and nature to the offense charged"). Here, Plaintiffs' very brief comments on the alleged anticompetitive acts in foreign markets fall far short of such a showing. Accordingly, the court finds that Plaintiffs have presented no admissible evidence from which a jury could infer that Defendants operated unlawful conspiracies in foreign markets. Thus, Plaintiffs cannot show that "conspiracies in foreign markets" is a "plus factor."

[**155] C. Summary of Plaintiffs' Evidence

1. Nature of Agreement

Plaintiffs have proffered little on their theory of the nature of Defendants' agreement in violation of *Section 1* of the Sherman Act. Plaintiffs allege a rather complex conspiracy, contending that Defendants agreed on "(1) reduction of price tiers to only two: premium and discount; (2) maintenance of the 'price gap' at an absolute constant, which would result in a diminishing percentage gap between premium and discount as prices were raised; (3) limitation of discounting and promotions on non-premium cigarettes; (4) moderate increases of all prices; (5) recognition of PM's price leadership; (6) participation in programs to share and monitor volume, price, and discount information; (7) output restrictions; and (8) ceding some market share to PM." Pls.' Resp., at 13. [47] **[**156]** Yet, Plaintiffs offer little as to their thoughts of how the conspiracy operated. [48]

---

[46] Plaintiffs also contend that Dr. Fisher addresses the significance of these activities in his reports, finding that "multi-market contact facilitates a conspiracy in the United States because it decreases the likelihood that competitors will, for example, violate the agreement in the United States for fear of endangering anticompetitive agreements in other countries." Pls.' Resp., at 58. The court, however, has determined that Plaintiffs' allegations of foreign market conspiracies are not probative of collusion as a matter of law. The testimony of Plaintiffs' expert does not alter that conclusion. *See Blomkest, 203 F.3d at 1038* (finding expert's opinion was "not probative of collusion" and holding that ***HN44***[] under *Federal Rule of Evidence 703*, there must be "sufficient facts already in evidence or disclosed by the witness as a result of his or her investigation to take such expert testimony out of the realm of guesswork and speculation").

[47] Plaintiffs cite two B&W documents to support their description of an eight-part conspiracy. Neither document describes any such agreement. *See* B&W462219869-999 (B&W Five Year Plan 1992-1997); B&W970394991-4996 (unidentified handwritten notes).

[48] For the first time, in their Post-Hearing Submission in Opposition to Defendants' Motions for Summary Judgment, Plaintiffs give the court some indication of their speculation as to how such an agreement might have operated. Plaintiffs assert "although presumably there was no agreement at the outset that specific companies (like B&W) would reduce their shares of the market in specific amounts, the necessary consequence of the agreement was that some would lose and others would gain share." *Id.* at 10. "B&W did not necessarily agree in advance to the reduction [in market share] it experienced; however when faced with its pre-conspiracy losses, it acquiesced to a loss (one that would not be inconsistent with its prior loss trend) in exchange for larger per-pack profits resulting from the conspiracy." *Id.* at 10 n.20. This new theory, however, is clearly inconsistent with Plaintiffs' speculation at oral argument where they alleged that B&W agreed to the conspiracy so that it would not be driven out of the

[157] [*1314]** Dr. Fisher offers no theories as to the manner in which this particular alleged agreement could have been implemented over the course of seven years but rather focuses on the "plus factors." The gravamen of Dr. Fisher's opinion relates to how certain practices in the cigarette industry would have facilitated an agreement. Dr. Fisher's opinion does not tend to exclude the possibility that Defendants were engaged in lawful competitive conduct.

Plaintiffs' overarching theory that Philip Morris designed and encouraged the conspiracy cannot stand up to scrutiny. Plaintiffs contend "Marlboro Friday raised the threat of a potentially ruinous price war that could have driven *some* defendants from the market. PM extended an alternative: cooperate through a new joint pricing regime in order to collectively recover from the desperate situation created through a decade of price competition." Post-Hearing Submission in Opposition to Defendants' Motions for Summary Judgment, at 10-11 (emphasis added). After Marlboro Friday, however, there was no incentive for Philip Morris to organize a cartel. Philip Morris achieved what it wanted in Marlboro Friday -- reducing the price gap between premium **[**158]** and discount cigarettes and protecting the Marlboro brand. *See* Corporate Affairs Speech by Larry Wexler, PMAT000066439-63 (discussing that the primary lesson of Marlboro Friday was managing the price gap). Philip Morris was not one of the defendants who could be driven from the marketplace by a "potentially ruinous price war." Philip Morris reacted to the allegedly "desperate" situation of price competition with its Marlboro Friday strategy. There was no reason for it to "extend an alternative" to the other companies after Marlboro Friday, particularly if, as Plaintiffs allege, B&W and RJR were facing elimination from the cigarette industry.

Plaintiffs repeatedly contend that Philip Morris described the industry as being in a "cycle of despair." Pls.' Resp., at 9; Oral Argument, at 64-65, citing PMAT000066439-63, at 444-46, Corporate Affairs Speech given by Larry Wexler, November 7, 1995. A review of this document, however, clearly shows that this "cycle of despair" was Philip Morris' opinion of the growth of the discounting segment. Philip Morris believed that discounting was not economically viable because it was paid for by increasing costs of premium cigarettes. B&W and RJR, **[**159]** who had been gaining share through discount cigarettes, did not share Philip Morris' opinion on these matters. As such, there was no industry-wide "cycle of despair" behind which Philip Morris could "rally the troops" to form a cartel. Philip Morris unilaterally dealt with this "cycle of despair" through its actions on Marlboro Friday. *See* PMAT000066444 ("We concluded that Philip Morris U.S.A. had to act decisively in response to the Discount challenge and break the 'Cycle of Despair.'"). Philip Morris' actions on Marlboro Friday, as Plaintiffs concede, were entirely procompetitive. Plaintiffs' repeated citation to a "cycle of despair" does not change that undisputed fact.

What Plaintiffs fail to recognize, again, is that Marlboro Friday changed what could be "expected" in the cigarette industry. Philip Morris showed that it was willing to sustain substantial losses in order **[*1315]** to protect its premium brand, Marlboro, and stem the flow of market share to the generic brands. It was Philip Morris' act which brought the market back into the "stability" Plaintiffs allege was a result of collusion. This act, however, as Plaintiffs admit, was highly competitive. Thus, it is difficult to **[**160]** fashion an explanation for how a competitive act shows evidence of a conspiracy.

The utter lack of any evidence, circumstantial or otherwise, that Lorillard joined in the alleged conspiracy also casts doubt upon Plaintiffs' theory. In fact, Plaintiffs' expert recognized that not enough attention had been paid to Lorillard:

> Q: Since Lorillard made no public announcements that you are aware of, was engaged in no actual collusive discussions of which you are aware, had legitimate reasons for gathering the monitoring information that it did, was not engaged in the foreign markets, and had initiated its own permanent allocation program during a period of more intense price competition in March 1990, what evidence, sir, do you have that Lorillard engaged in conduct that had the effect of suppressing prices at wholesale from 1993 to 2000?
> MR. REINHARDT: Objection as to form.
> A: It's a fair question, and I certainly perceive that I haven't concentrated sufficiently on Lorillard.

---

marketplace by Philip Morris' actions on Marlboro Friday. *See* Oral Argument, at 88. Moreover, this argument is inconsistent with the facts. B&W's market share was not trending down in the years leading up to the conspiracy and thus B&W had no "pre-conspiracy losses" to contend with or give it reason to join a conspiracy. *See* Annual Shares of U.S. Tobacco Shipments by Manufacturer, 1980-2000, Plaintiffs' Exhibits Presented at Oral Argument, at 15.

> It went along with price increases, but I understand the proposition that says that that may be just oligopolistic rationality, even if the others, by the way, even if the others have fixed it to make that **[**161]** coordination more easy. I am going to have to think about that.

Fisher Depo., at 471-72.

At oral argument, Plaintiffs contended that Lorillard's participation in the monitoring programs of MSA/Pittsburgh is sufficient to connect it with the alleged conspiracy. *See* Oral Argument, at 96-97. The parties dispute the level of evidence necessary to connect Lorillard with the conspiracy with Plaintiffs contending that they need only "slight evidence." *See* Pls.' Resp., at 76-77 n.36 (citing *United States v. Wilkinson, 754 F.2d 1427, 1436 (2d Cir. 1974)*. [49] Regardless of the specific amount of evidence Plaintiffs would need to adduce to sufficiently connect Lorillard, individually, to the conspiracy, the fact that Plaintiffs contend the four Defendants gathered together to form an agreement to fix prices and yet have proffered relatively no evidence about Lorillard's participation in the conspiracy diminishes the force of Plaintiffs' argument with respect to all four Defendants.

[162]** At oral argument, Plaintiffs put a new spin on their theories, using the Supreme Court's opinion in *Brooke Group* to assert what they contend is how the cigarette industry "should have" looked from 1993 to 2000, if it were competitive. A complete reading of Plaintiffs' argument, however, essentially boils down to an assertion that there must have been collusion in the cigarette industry because the price war that existed in the early 1990s ended sometime in 1994. *See* Oral Argument, at 59-69. In fact, Plaintiffs' counsel argued **[*1316]** that their basis for collusion was that after Marlboro Friday, the cigarette industry returned from a "competitive industry" to "a market that behaved like a traditional normal oligopoly." *See* *id. at 69*. Plaintiffs' counsel also argued:

> What we have here is a change in a course of dealing over a decade where you went from a market which was characterized by relative price competition and a widening gap between premium brands and discount brands to a period marked again in the words of their expert by the dropping of a sledgehammer, which produced stability in prices and price coordination.

Id. at 59. *See also* *id. at 73-74* ("It's **[**163]** that course of conduct and dealing where we change a nonparallel pricing oligopoly into a parallel pricing oligopoly . . . ."). There is, however, nothing illegal about a "traditional normal oligopoly."

All of the acts of which Plaintiffs complain can be equally explained by Philip Morris exercising its market power as by a collusive agreement among Defendants. The fact that Philip Morris exercised its market power by using its nearly 50% share of the market is not enough to infer that Philip Morris and the remaining Defendants entered into an agreement to fix prices. Moreover, the nature of an oligopoly teaches that when there is a strong market leader, that leader will be the price leader and other market players will often raise prices along with the market leader in order to increase their profit. *See supra*. Again, this is simply an economic description of the interdependent activities in an oligopolistic market and not illustrative of an agreement among competitors. Furthermore, a desire to end a price war is not evidence of collusion. *See* *In re Citric Acid, 191 F.3d at 1101* (accepting as explanation for defendant's decision not to expand capacity that "it **[**164]** was concerned that an excessively rapid expansion in citric acid supply would undermine prices and wanted to avoid precipitating a costly price war as it had done when it first entered the citric acid market (incurring substantial losses as a result)"). Defendants knew the cost of the price war that culminated in Marlboro Friday. No agreement was necessary for all firms to understand that the losses incurred in a price war were not a desirable result for any of the companies.

Plaintiffs then seem to contend that the raising of prices itself is indicative of collusion. *See* Oral Argument, at 67-68 ("And the question then becomes at the level of Marlboro Friday where all of the companies were at that time, were they able to increase prices in parallel fashion over that period of time?"). Plaintiffs contend that in a period of

---

[49] ***HN46***[] The "slight evidence" rule, however, is not favored in the Eleventh Circuit. *See* *United States v. Toler, 144 F.3d 1423, 1427 (11th Cir. 1998)* (explaining that "slight evidence" rule was "banished" from circuit jurisprudence). Furthermore, it is not clear that the "slight evidence" rule would apply in a civil conspiracy case on summary judgment. *See* *In re Citric Acid, 996 F. Supp. 951, 955 (N.D. Cal. 1998)* (holding "slight evidence" rule may apply in criminal matters but cannot in civil cases because its standard would conflict with standard for summary judgment), *aff'd,* *In re Citric Acid, 191 F.3d 1090 (9th Cir. 1999)*.

excess capacity and declining demand, Defendants should not have been able to raise prices. As noted in *Brooke Group*, however, prices rose during the competitive period of 1980 through 1993 which was also a period marked by excess capacity and declining demand. *See* Brooke Group, 509 U.S. at 213-15, 238. Furthermore, as discussed below, the **[**165]** evidence shows that from 1993 to 2000 Defendants raised prices at a lower rate of increase than from 1980 to 1993. *See also* id. at 237 ***HN47***[] ("rising prices do not themselves permit an inference of a collusive market dynamic. Even in a concentrated market, the occurrence of a price increase does not in itself permit a rational inference of conscious parallelism or supracompetitive pricing."); Harcros, 158 F.3d at 572-73 ("Oligopolists behaving in a legal, consciously parallel fashion could achieve high and rising prices, even as costs remained stable, by engaging in price leadership.") (citing Areeda, P 1429, at 176).

Finally, Plaintiffs also attempt to show that the cigarette industry between 1993 **[*1317]** and 2000 was the "anti-*Brooke Group*" and therefore must have been the result of collusion. In *Brooke Group*, Liggett alleged that B&W provided volume rebates to wholesalers that amounted to price discrimination as part of a predatory pricing scheme. In the course of its analysis, the Court considered whether pricing increases took place in light of declining demand and excess capacity, the level of retail competition and the number of price tiers in the **[**166]** market, as well as whether "signaling" was used. The Court held that no reasonable jury could conclude that violations had occurred. Plaintiffs contend that because the factors that the court did *not* find in *Brooke Group* were present in the industry from 1993 to 2000, there must have been a conspiracy.

Contrary to Plaintiffs' assertions, the *Brooke Group* world does not look so different from the 1993 to 2000 cigarette market. There was "lockstep" increase in pricing in the "competitive" *Brooke Group* market. *See* Brooke Group, 509 U.S. at 218 ("after Liggett's June 1985 increase, list prices on generics did not change again until the summer of 1986, when a pattern of twice yearly increases in tandem with the full-priced branded cigarettes was established."); at 235 ("list prices on both generic and branded cigarettes increased twice a year by similar amounts"). The cigarette market during both periods faced declining demand and excess capacity. *See* id., at 238. Similarly, in describing the number of tiers in the cigarette market, the Court discussed the difficulty of coordination of a conspiracy where the "net price in the market was **[**167]** determined not only by list prices, but also by a wide variety of discounts and promotions to consumers and by rebates to wholesalers." Id. at 239. This intense retail competition exists in the cigarette market today, just as it did in *Brooke Group*. The *Brooke Group* Court also rejected the plaintiffs' allegations of signaling. *See* id., at 240-41.

2. Plus Factors and Facilitating Practices

HN48[] All plus factors" are not created equal. A "plus factor" must "tend to exclude the possibility that the defendants merely were engaged in lawful conscious parallelism." Harcros, 158 F.3d at 572. As the court demonstrated above, the "plus factors" asserted by Plaintiffs do not meet this test. Only four of the "plus factors" proffered by Plaintiffs warranted any particular analysis by the court. Even after such analysis, the court remains unconvinced that Plaintiffs have proffered admissible evidence or evidence from which a jury could make a reasonable inference that tends to exclude the possibility that Defendants were engaged in lawful conscious parallelism. Plaintiffs' bold assertions were often unsupported in the record or belied **[**168]** by their own cited evidence. Defendants proffered much contemporaneous documentation to support their contention that strategic decisions were taken for independent reasons.

The court, of course, is mindful that it cannot view each of Plaintiffs' proffered "plus factors" in isolation, but rather must view the evidence in its entirety. Even applying that standard, however, the court remains unconvinced that Plaintiffs have offered "plus factors" sufficient to exclude the possibility that Defendants were engaged in lawful conscious parallelism. In *Todorov*, the Eleventh Circuit determined that ***HN49***[] even if a plaintiff could demonstrate a "plus factor," that only creates a rebuttable presumption of a conspiracy that a defendant could defeat with his own evidence. 921 F.2d at 1456 n.30. *See also* In re Baby Food, 166 F.3d at 122. Assuming, then, that Plaintiffs could establish at least one "plus factor," the court turns to Defendants' **[*1318]** evidence to consider whether a presumption of conspiracy could be rebutted.

IV. REBUTTAL

A. Uncertainty in the Market

Rather than supporting an inference of conspiracy, documents cited by both Plaintiffs and **[**169]** Defendants demonstrate that each of the Defendants was uncertain as to what would happen in the cigarette industry during the time of the alleged conspiracy. In an October 1993 memo from Geoffrey Bible to William Campbell, Mr. Bible discusses different marketing strategies for Philip Morris' brands. After reviewing the possibilities, Mr. Bible notes that "these are simply guesses, but I'm using them as a starting point." PMAT000144683. "My guess is that the industry is already running below our expectations and that a price increase plus excise tax will accelerate that decline. Can we handle a sales force of the size we have today, can we fund three plants, ought we move more production offshore where we already have fixed investments and overhead would not increase so much?" *Id.* "Normally, I would think Marlboro would recover 6 to 12 months after the excise tax increase as it has elsewhere in the world. But, I fear that smokers here have become accustomed to cheaper brands (a 40% segment) . . . ." *Id.* These are not the statements of corporate executives engaged in a price-fixing scheme.

Similarly, a November 3, 1993 pricing recommendation memo prepared for William Campbell **[**170]** reflects substantial uncertainty in the market. *See* 2045121128-29. In recommending a price increase, the memo analyzed the risks of a price increase. *See id.* (noting possibility that a competitor could exceed Philip Morris' price increase; could announce a price increase in advance of Philip Morris'; could fail to raise prices at the low end of the market; or could initiate a mid-year price increase).

Philip Morris' Five Year plan (1996-2000) also focused on market instability. In describing the "assumptions" upon which the plan was designed, the company notes that "two risks to the Plan are excise tax increases and general market unpredictability -- primarily due to the competitive positions of B&W and RJR, and their role within their respective corporations." PMAT500103293. "With regard to unpredictability, a number of situations could cause the marketplace to become more challenging. Competitors could react to share losses with large Discount initiatives, or manufacturers could raise prices beyond the pace at which consumers have the willingness to pay." *Id.*

RJR's 1994-1998 Strategic Plan reflects similar anxiety. *See* 51953 4163 ("Given the high degree of pricing **[**171]** uncertainty due to the potential impact of PM's initiatives on manufacturers' net prices . . ."). The document also noted a "high degree of price, volume and mix uncertainty." *Id.* at 4164. This uncertainty remained through the time of the alleged conspiracy. *See* 1996-1998 Strategic Assessment, dated June 1995, 51952 6068-6085, at 6077 ("market disruption due to pricing actions remains huge concern"); at 6080 ("'Price Wars' continue to be looming threat as players guard and/or develop market positions").

Negotiations leading to the Master Settlement Agreement injected even more uncertainty into the market. B&W noted that it could not determine whether industry volume would decline slowly or drop sharply. *See* Plan Discussion Points, BW461105009. The company also stated:

> Whatever our view of industry and B&W volume, our profit outlook will be determined largely by industry pricing. **[*1319]** This can manifest itself in two ways, and both are important. The first is the level of manufacturer's list price increases we obtain. As you might expect, there are (at least) two different views on this issue and most people subscribe strongly to both of them, depending upon the day or **[**172]** hour. One view is that the higher base price level mandated by the settlement or [Federal Excise Tax] will provide an umbrella for higher manufacturer's price increases. The other is that lower industry volume, excess capacity, and the intensely competitive nature of the manufacturers will result in a "price war" that will last until fewer companies are left standing than exist today. The latter view has the benefit of representing a more classical economics viewpoint but appears irrational. The former view, on the other hand, appears a bit starry-eyed. Along with industry volume, it is this issue on which the future rests.

Id. at 5009-5010 (noting also "the interesting possibility of big VFM brands that one day in the future will stop growing due to their inability to attract price switchers as there will be relatively few consumers who find the level of savings to be meaningful. While there is some intuitive appeal to this viewpoint, no one can predict where or when such a turning point may occur"). If B&W were a party to a price-fixing scheme, there would be no need to speculate about various theories in the nature of future pricing in the industry. Thus, viewing the **[**173]** totality of evidence before the court, these documents are inconsistent with even the existence of a tacit agreement among Defendants.

B. Conscious Parallelism v. Cartel Behavior

Significantly, in their presentation of evidence, Plaintiffs have not distinguished conscious parallelism from cartel behavior. Their most significant allegation is of parallel pricing, a factor that alone is insufficient to raise an inference of conspiracy. Plaintiffs argue that "the importance of the pricing itself cannot be overstated" because "Defendants took *identical* price increases at *all price levels* within days or hours." Pls.' Resp., at 76 (emphasis in original). Plaintiffs contend that the "similarity and timing of the price increases themselves" allow Plaintiffs to raise a legitimate inference that there was an agreement among Defendants. *Id.* The law is clear, however, that ***HN50***[] parallel pricing is not sufficient to establish a price-fixing scheme in an oligopoly. [50]

[174]** This requirement is based on economic truths. "Competing firms may be able to achieve cartel-like results for themselves merely by observing each other's behavior in the market place." Areeda, P 1410b, at 65. In an oligopoly, each "firm's pricing decision is *interdependent* with that of its rivals: each knows that his choice will affect the others, who are likely to respond, and that their responses will affect the profitability of his initial choice." *Id.* (emphasis in original); *see also id.*, P 1429a, at 175. "Interdependent decision-making can produce the same unhappy results as a cartel." *Id.*, P 1429b, at 175. "Oligopolists seem readier to 'compete' in sales promotion or product variation than in price." *Id.*, P 1429c, at 177.

"Oligopolists have no choice but to set a price somehow, and it is hard to see how they can be mandated to ignore their rivals' **[*1320]** prices." *Id.*, P 1420, at 123. "Those buying and selling in a concentrated market are forced by circumstance to observe the pricing practices of their competitors. Each wishes to maximize its profits and does so by anticipating the reactions of competitors to its own decisions. The courts cannot create and administer **[**175]** relief that compels the defendants to ignore the actual and prospective market behavior of their rivals." *Id.*, P 1426d, at 280 (Supp. 2001). ***HN51***[] "An oligopolist raising his price with knowledge that he will have to retract it if significant rivals do not follow is, in a sense, inviting his rivals to follow. Following the leader is a conscious acceptance of that 'invitation' to the end that market prices will be higher than before. . . . Nevertheless, tacit price coordination through recognized interdependence was not deemed to be an agreement under *§ 1*." *Id.*, P 1436, at 241.

The case law similarly recognizes that "conscious parallelism" alone cannot support an inference of agreement. Conscious parallelism is

> the practice of interdependent pricing in an oligopolistic market by competitor firms that realize that attempts to cut prices usually reduce revenue without increasing any firm's market share, but that simple price leadership in such a market can readily increase all competitors' revenues.

Harcros, 158 F.3d at 570. The court further noted that "consciously parallel behavior by oligopolists does not in itself support an inference of agreement, **[**176]** of 'a meeting of the minds,' any more strongly than it supports an inference of legal price maintenance or leadership." *Id. at 571*. *See also* *Brooke Group, 509 U.S. at 227* (conscious parallelism is "the process, not in itself unlawful, by which firms in a concentrated market might in effect share monopoly power, setting their prices at a profit-maximizing, supracompetitive level by recognizing their shared

[50] Plaintiffs cite *American Tobacco Co. v. United States, 147 F.2d 93, 114 (6th Cir. 1944)*, for this proposition, but the procedural posture of that case was reviewing the guilty verdict rendered by the jury, and thus, the court viewed all possible inferences in favor of the jury's verdict. *Id. at 101*.

economic interests and their interdependence with respect to price and output decisions."); *Clamp-All Corp. v. Cast Iron Soil Pipe Inst., 851 F.2d 478, 484 (1st Cir. 1988)* ("A firm in a concentrated industry typically has reason to decide (individually) to copy an industry leader. After all, a higher-than-leader's price might lead a customer to buy elsewhere, while a lower-then-leader's price might simply lead competitors to match the lower price, reducing profits for all. One does not need an agreement to bring about this kind of follow-the-leader effect in a concentrated industry."). Furthermore, when one firm is substantially larger than the others in an oligopoly, its pricing policies will have more influence on the market. **[**177]** *See* *In re Baby Food, 166 F.3d at 128* ("Because Gerber controlled 70% of the market in baby foods and was the acknowledged leader in this industry, Gerber's pricing understandably may have had an influence on its competitors' pricing."). Therefore, it is particularly important to distinguish between parallel pricing and collusive activity in the cigarette industry because there is one firm that carries nearly 50% of the market. *See* Facts, PP 58-59 (Philip Morris' market share between 42.2% and 49.6% during period of alleged conspiracy).

Plaintiffs' expert does not defer to the legal distinction between conscious parallelism and cartel behavior. Dr. Fisher testified that "facilitating practices" could refer to something that different companies "explicitly agreed to do" or "it can also refer to things that firms agree to do without reaching an explicit agreement." Fisher Depo., at 265. He further testified that certain practices could be facilitating, but would be acts the firm would take regardless because they were in the economic self-interest of the firm. *Id. at 271*. Thus, Dr. Fisher cannot state **[*1321]** that what he labels a "facilitating practice" would distinguish **[**178]** between conscious parallelism and cartel behavior.

Dr. Fisher's testimony illustrates the breadth of his terminology and the fact he recognizes that what he labels "facilitating practices" might not be unlawful conduct:

> Q: . . .
> I understand that you have expressed the opinion that there are certain practices you call facilitating practices here, correct?
> A: Yes.
> Q: And within your definition of anticompetitive acts, you believe that these practices are anticompetitive acts, correct?
> A: Yes.
> Q: Based on your understanding of the law, that doesn't make them illegal necessarily, correct?
> A: Yes.
> MR. REINHARDT: I object as calling for a legal conclusion.
> Q: But as you define anticompetitive practices which includes anything that can only be explained by a desire to obtain supercompetitive profits, these are anticompetitive acts, correct?
> A: Yes.
> Q: And you concede that your definition of anticompetitive acts includes what you term as purely conscious parallelism?
> A: Yes.
>
> Q: So that your definition of anticompetitive act does not distinguish for us those actions that are purely conscious parallelism from those that are beyond purely conscious parallelism, correct? **[**179]**
> A: That's true.

Id. at 305-06. Dr. Fisher then expresses his opinion that "there are real problems with rules against conscious parallelism. They are unintended consequences and you can't prevent it, but that doesn't mean there are unintended consequences and you can't prevent facilitating -- certain kinds of facilitating actions designed to protect conscious parallelism." *Id. at 307*. The failure of Plaintiffs' expert to distinguish conscious parallelism from cartel behavior makes his subsequent opinion inadmissible as he finds inferences of collusion where the law finds none. Dr. Fisher is positing a new theory where certain aspects of conscious parallelism should be found to be anticompetitive. This is not the state of the law. This meshing of two terms is particularly troubling when the hallmark of a "plus factor" under the law is that it tends to exclude the possibility that the defendant was engaged in mere conscious parallelism.

Defendants also point out that the findings of Plaintiffs' expert at one point was inconclusive on the specific issue of whether Defendants engaged in collusive behavior. [51] Dr. Fisher stated: "The actions of the leading cigarette firms **[**180]** have gone beyond the bounds of simple conscious parallelism or independent economic self-interest. The industry's actions exhibit, at the very least, practices that facilitate tacit price coordination and may even embrace explicit price coordination." Fisher Report, P 145; *see also* Fisher Rebuttal Report, P 5 ("I assert that defendants engaged in a pattern of conduct that is, in most instances, consistent with loose, imperfect **[*1322]** coordination."). At oral argument, Plaintiffs' counsel asserted that Dr. Fisher was a bit more decisive in his "addendum" affidavit. There, Dr. Fisher stated:

> I characterize the behavior that I have observed in the cigarette industry during the relevant period as a "collusive oligopoly" or a "loose cartel." I believe that the cigarette companies have engaged in activities beyond mere conscious parallelism, and indeed have participated in various facilitating practices that are anticompetitive in purpose and effect.

Fisher Addendum, P 5. Because of his flawed view of the law, this testimony is inadmissible. As the court has discussed above, "facilitating practices" may not rise to the level of what the law requires in "plus factors" -- actions **[**181]** that tend to exclude the possibility of lawful action. Dr. Fisher's testimony does not explain how these "facilitating practices" exclude the possibility of lawful action. Moreover, as the court previously explained, Dr. Fisher's allegations of "anticompetitive" conduct are broad and could be read to include lawful activity. [52]

[182]** Defendants correctly note that Dr. Fisher's "addendum" was filed out of time. Dr. Fisher's "addendum" is dated February 7, 2002, and there is no certificate of service in the record to clarify when the document was served on Defendants. In an order dated September 5, 2001, based on the parties' agreement and proposed consent order, the court ordered that Plaintiffs' reply expert reports are due on January 28, 2002, and all expert discovery is to close on that date. *See* September 5, 2001, Order, at 2. For this reason, too, Dr. Fisher's addendum is rejected.

C. Practical Economic Sense of Alleged Conspiracy

Defendants contend that Plaintiffs' theory does not make practical sense, *see* *Matsushita, 475 U.S. at 597*, because during the alleged conspiracy Defendants "(1) took price increases at a slower pace and in smaller amounts than before the conspiracy, (2) spent billions of dollars competing with each other on price and other dimensions at retail; and (3) . . . experienced substantial market share shifts, with some defendants gaining at the expense of the other alleged conspirators." PM, Opening Brief, at 25.

1. Prices After Marlboro Friday

Defendants **[**183]** contend that allegations of a conspiracy from 1993 to 2000 do not make economic sense because prices rose less rapidly after Marlboro Friday than before. For the two years preceding Marlboro Friday, Defendants' wholesale list prices for premium cigarettes increased on average $ 7.80 per thousand per year. Fisher Report, Ex. 3, at 1; Facts, P 27. For the four years following Marlboro Friday, Defendants' wholesale list prices for premium cigarettes increased on average $ 2.00 per thousand per year. Fisher Report, Ex. 3, at 1-4; Facts, P 28. The wholesale list prices of premium brands did not exceed pre-Marlboro Friday levels until the price increases of

---

[51] When asked at his deposition whether he could "identify any prior price fixing case in which [he has] not given a definitive opinion one way or another as to the presence of actual collusion or an explicit agreement," Dr. Fisher could only name one other case. Fisher Depo., at 410-11.

[52] The assertions of Dr. Fisher's opinion alone are not sufficient to withstand a motion for summary judgment. *See* *In re Citric Acid, 191 F.3d at 1105 n.9* (rejecting plaintiff's claim that the reports of its expert economist "mandate the denial of [defendant's] summary judgment motion" and finding that the court considered the evidence discussed by the expert and determined that "no piece of evidence tends to exclude the possibility that [defendant] acted independently and is not affected by the conclusory statements in the expert report to the contrary") (citing *Brooke Group, 509 U.S. at 242*).

August 3, 1998, nearly five years after the alleged conspiracy began. Elzinga Report, Ex. 7; Facts, P 29. When adjusted for inflation, settlement **[*1323]** costs, and federal excise taxes, the wholesale list price for premium brands did not exceed the pre-Marlboro Friday levels until August 1999. Facts, P 34. *See also* Fisher Depo., at 96-115 (testifying there were more price increases before Marlboro Friday than after; pre-Marlboro Friday price increases were larger than the price increases from 1993 to 1998). Defendants assert that "if one **[**184]** simply projected manufacturer list prices from the pre-cartel period forward, making appropriate adjustment for MSA costs, the projected list prices would be *higher* than the list prices for Marlboro actually were during the alleged cartel period." Elzinga Report, at 38, Exhs. 7 and 8 (emphasis in original).

Plaintiffs respond that this is a "strawman" argument because prices were drastically reduced on Marlboro Friday. During the conspiracy, Plaintiffs contend, prices rose monotonically through February 2000. Plaintiffs, however, offer no econometric testimony specifically as to what prices should have been without a conspiracy. Thus, Defendants have proffered unrefuted expert testimony that projecting from the pre-cartel prices forward, one would have expected prices to be higher than they were during the alleged cartel period.

During oral arguments on the parties' motions for summary judgment, Plaintiffs also argued that Defendants' comparisons are inappropriate because the prices of cigarettes prior to Marlboro Friday were "supracompetitive," that is, they were higher than the market would continue to support, and thus, it is no surprise that prices had to drop. *See* Oral **[**185]** Argument, at 65. Defendants respond that the Supreme Court has rejected this argument in two forms. First, Defendants argue that Plaintiffs' assertion is akin to an argument that Defendants agreed to lower prices on Marlboro Friday so that they could raise them again during the conspiracy to recoup income lost as a result of the drastic price-cutting on Marlboro Friday. In *Matsushita*, Defendants aver, the Court declined to infer existence of an alleged predatory price conspiracy that would depend on the defendants' ability to recoup 15 years of artificially-depressed prices. *See* 475 U.S. at 595-97. Second, Defendants argue in *Brooke Group*, the Supreme Court specifically held that ***HN52***[] ***antitrust law*** should not "punish" competitive acts of reducing prices:

> Even in an oligopolistic market, when a firm drops its prices to a competitive level to demonstrate to a maverick the unprofitability of straying from the group, it would be illogical to condemn the price cut: The antitrust laws then would be an obstacle to the chain of events most conducive to a breakdown of oligopoly pricing and the onset of competition. Even if the ultimate effect of the cut is to induce **[**186]** or reestablish supracompetitive pricing, discouraging a price cut and forcing firms to maintain supracompetitive prices, thus depriving consumers of the benefits of lower prices in the interim, does not constitute sound antitrust policy.

See 509 U.S. at 223-24. This analysis is significant in its similarity to what Philip Morris achieved unilaterally with Marlboro Friday.

Even accepting Plaintiffs' argument that Marlboro Friday is an improper comparison point, Defendants have demonstrated that prices rose at a lesser rate during the alleged conspiracy period than during the period from 1988 to 1993, which Plaintiffs contend is a period of competitive pricing in the cigarette industry. *See* DeMario Ex. C1. Developing a trend line from the reduced Marlboro Friday prices from November 1993 through February 2000, one would expect a Marlboro list price of **[*1324]** $ 53.26 per thousand, which exceeds the $ 49.56 actual price. *See* Marlboro List Prices Adjusted for Federal Excise Taxes, Inflation and Ongoing Resolution Costs -- Linear Pricing Trends, Philip Morris Argument Binder Oral Argument on Motions for Summary Judgment, Tab 42. If the prices after Marlboro Friday **[**187]** had been increased at the same percentage rate during the alleged conspiracy as before the alleged conspiracy, the Marlboro list price would have been $ 64.35 per thousand. *See id.*, Tab 43.

Dr. Fisher also testified that he would have expected prices to rise after Marlboro Friday.

> A: After '93, there were various events affecting the cigarette industry. There were changes in taxes and there were settlement costs from the various health cases. Each of those -- as I recall, every one of those, but at least the ones I remember, had the property that they raised the marginal cost of cigarette, of the cigarette business.
>
> As a general rule, one would expect that when that happened, it would be in the individual self-interest of each company to raise its price. Whether it was in their individual self-interest to raise their price to the extent they

> did and to follow exactly other people's price, that is a different question. But the prices would go up, that is a natural outcome of what was going on. That's the first part of it.
>
> Q: Are you saying that you are sure prices would have gone up, but you are not sure they would have gone up or should have gone up as much as they did? **[**188]** Is that what you are saying?
> A: By the amount they did in the exact timing they did or for the same extent for everybody.
> Q: Have you attempted to estimate how much you think prices would have gone up in an industry with a structure of the cigarette industry without price coordination?
> . . .
> A: . . . The answer to that is partly yes and partly no. . . . The answer to that is mostly no in the sense that I have not made an econometric study or empirical investigation of how much. On the other hand, I have given some thought to what are the factors that one would have to know about.

Fisher Depo., at 52-54; at 109 (testifying only that prices for premium cigarettes "probably" would have increased less after Marlboro Friday in absence of price coordination). Neither Dr. Fisher, nor any other expert, however, made findings as to what they thought cigarette prices "should have" been absent a conspiracy. *See also* Reserve Supply, 971 F.2d at 52 (rejecting plaintiff's claim that defendants gained supracompetitive profits where plaintiff offered "no evidence, such as studies on the comparative costs of production or on market conditions, to indicate that these profits **[**189]** were above those available in a competitive market"). In sum, Defendants argue that if there had been a conspiracy, prices should have risen at a faster rate than during a competitive period. Defendants have demonstrated that they rose at a slower rate which contradicts a theory of conspiracy.

2. Wholesale v. Retail Prices

Defendants next contend that a theory of conspiracy is illogical because Defendants engaged in substantial competition at the retail level. Dr. Elzinga opines that "cartels are economically plausible only to the extent they influence the prices manufacturers actually 'take home.'" Elzinga **[*1325]** Report, at 21. Dr. Elzinga asserts that the substantial amount of competition at the retail level makes Plaintiffs' cartel theory implausible because (1) it would be "irrational" for the companies to spend this much money on retail competition if prices were fixed, and (2) the value of the cartel would be doubtful when companies like Philip Morris, for example, are permitted "to engage in such extensive price competition designed to draw smokers to the Marlboro brand and away from" the brands of the other companies. *Id.* at 25. There is also legal support for this analysis. **[**190]** In discussing the cigarette industry, the Supreme Court noted there is

> undisputed evidence that . . . list prices were not the actual prices paid by consumers. . . . Especially in an oligopoly setting, in which price competition is most likely to take place through less observable and less regular means than list prices, it would be unreasonable to draw conclusions about the existence of tacit coordination or supracompetitive pricing from data that reflects only list prices.

Brooke Group, 509 U.S. at 235-36; *see also* Reserve Supply, 971 F.2d at 53-54 (a system of fixed list prices "would be, to put it mildly, an awkward facilitator of price collusion because the industry practice of providing discounts to individual customers ensured that list price did not reflect the actual transaction price"); In re Baby Food, 166 F.3d at 128 ("In an industry with hundreds of products and a pervasive policy of allowing discounts and promotional allowances to purchasers, allowances that varied even to the same customer if it conducted business in different geographical areas, charts and reports focusing on *list prices* rather than **[**191]** *transactional prices* have little value.") (emphasis in original).

It has been likewise established here that through promotional expenditures, retail transactional prices varied for cigarettes even among brands identically priced at wholesale list. Facts, P 73. From 1993 to 2000, Defendants used promotions that directly reduced the prices paid by consumers at retail. Id., P 62. Retail discounts in the cigarette industry include (1) buydowns, direct reimbursements to retailers for reducing price on promoted brands, [53] (2) "buysomes" where a manufacturer offers a buy-some-get-some-free promotion, or (3) coupons, effectuating price reductions. *Id.*; Elzinga Report, at 21. According to the Federal Trade Commission, the cigarette manufacturers spent the following amounts on promotional allowances, coupons, and retail value added:

Year	**Cigarette Promotional Expenditures**
1994	$ 2.928 billion
1995	$ 3.214 billion
1996	$ 3.460 billion
1997	$ 3.961 billion
1998	$ 5.059 billion
1999	$ 6.634 billion

Facts, P 65. Philip Morris' expenditures on retail promotions, couponing, and its retailer incentive program increased from $ 1.268 billion in 1994 to **[**192]** $ 2.919 billion in 1999. *Id., P 66*. Philip Morris alone spent $ 13.8 billion on retail promotion during the time of the alleged conspiracy from 1994 to 2000. *See* Elzinga Report, at 49. Similarly, RJR's increased from $ 1.24 billion in 1993 to $ 1.81 billion in 1999. Facts, P 68. RJR's retail promotional spending in 1999 was 141.96 % of its operating income. *Id., P 69*. Lorillard's promotional spending increased from approximately $ 205 million in **[*1326]** 1993 to approximately $ 456 million in 1999. *Id., P 71*. In 1993, B&W spent $ 606 million on retail price discounting and promotional spending. By 1998, B&W spent more than $ 1 billion in these areas, almost one-quarter of the company's revenue for that year. *Id., P 70*.

Plaintiffs devote substantial argument to asserting **[**193]** that competition at retail does not mean that Defendants are not fixing prices at wholesale. *See* Pls.' Resp., at 80-85. For example, Plaintiffs argue that Defendants ignore the *per se* rule and cannot contend they should not be liable for the conspiracy because of their retail competition. This misses the mark. Defendants do not assert they should not be held liable because of retail competition, but rather argue that the high level of competition at retail shows that it would not make economic sense for Defendants to fix prices at wholesale while maintaining vigorous competition at retail. [54]

[194]** Plaintiffs contend that (1) because Defendants' profits increased during the conspiracy, it is irrelevant that they were spending money on promotional activities, (2) Defendants' spending at retail was not for competitive purposes, (3) retail price promotions are inferior to wholesale list price changes, and (4) Defendants' assertion that retail promotions are the only way to pass through pricing to consumers is unsupported. [55]

---

[53] A "buydown" is a "discount in the form of an allowance offered to a retailer. The allowance is conditioned on the retailer dropping the non-promoted price of cigarettes by at least the amount of the buydown." Elzinga Report, at 6.

[54] Plaintiffs offer no support for their assertion that "the issue of whether the existence and level of retail competition impacts the determination of liability for price-fixing at the wholesale level is one for the finder of fact." Pls.' Resp., at 84. Rather, Defendants are permitted to rebut Plaintiffs' contentions with evidence of their own. *See* *Todorov, 921 F.2d at 1456 n.30*.

Nor does the court find relevant Plaintiffs' citation to a document purporting to discuss strategy between Philip Morris International and BAT in Chile. As the court described above, Plaintiffs have not established the necessary predicate for the court to consider this document, even under *Rule 404(b)*.

[55] The court has addressed above the issue of whether wholesalers will tend to increase the price of all manufacturers' brands when one announces a price increase.

Dr. Fisher testified that in the three years after the start of the conspiracy, industry revenue increased more than $ 1.38 billion while promotional expenses increased only $ 532 million. *See* Fisher Rebuttal, PP 17-18. Dr. Fisher, however, does not agree that profitability is the proper measurement of the plausibility of a conspiracy. In his deposition, Dr. Fisher testified that

> I am the author of some articles **[**195]** on . . . the question of whether you can use profits to infer very much. . . . And what those article say -- and I remain, if I may say so, both committed to this, and rather forcefully committed to this. What the articles say is that you cannot use accounting profits to infer economic profits, and you certainly can't use them to infer that there are monopoly profits, and that attempts to do this are going to almost always end in failure.

Fisher Depo., at 509-10.

Furthermore, from 1996 to 1999, RJR spent $ 5.6 billion on promotional programs. *See* Blynn Aff., P 3. This exceeds the $ 3.2 billion Plaintiffs' damages expert claims that RJR overcharged during the conspiracy period. Similarly, during the time of the alleged conspiracy, Defendants spent a combined $ 25.256 billion on promotional allowances, coupons, and retail value added. Facts, P 65. This exceeds $ 13 to $ 15 billion, the total amount Plaintiffs allege Defendants overcharged during the alleged conspiracy period. Thus, Plaintiffs' claim that Defendants recouped through the conspiracy any losses on increased **[*1327]** promotional spending at retail is without force.

The fact that, as Plaintiffs allege, retail price promotions **[**196]** are not as "efficient" as wholesale list price changes, is irrelevant to whether it would make sense for Defendants to compete at the retail level and agree to fix prices at the wholesale level. Even Plaintiffs' own expert seems to take issue with that position.

> Q: . . . I am facing ways of deploying money to move share, and do you have a view as to the relative efficiency of various ways of deploying that money to move share?
>
> A: If I were to answer that question literally, the answer would be no . . . . I don't mean to suggest that retail promotions are a useless way to do this, nor on the other hand do I believe that resisting following at wholesale is a useless way of doing this either.
>
> Q: But in terms of the relative efficiency of one versus the other, you are not prepared to judge that as you sit here today, correct?
>
> A: Correct.

Fisher Depo., at 501. Furthermore, Defendants never claim that competing at retail is "economically superior to list price competition." Pls.' Resp., at 91. Defendants simply assert that it is illogical to argue that Defendants have fixed prices when their spending on promotional expenses exceeds that which Plaintiffs claim has been **[**197]** overcharged. Accordingly, the court finds persuasive Defendants' argument that Plaintiffs' theory of conspiracy does not make economic sense in light of the high level of spending on competition at the retail level.

3. Changing Market Shares

Defendants argue that the shifts in market shares that occurred among the companies are inconsistent with cartel activity. The following market share changes occurred between 1993 and 2000 in the cigarette industry:

Company	1993	1999	2000
Philip Morris	42.2 %	49.6 %	50.5 %
RJR	30.6 %	23.0 %	23.0 %
B&W	16.6 % [56]	13.4 %	11.7 %
Lorillard	7.1 %	10.4 %	9.6 %
Liggett	2.4 %	1.3 %	1.5 %

[56] The market share figures include those for most of the brands of the American Tobacco Co. acquired by B&W in 1994.

Company	1993	1999	2000
All Others	-	2.3 %	3.7 %

Facts, PP 58-60. Philip Morris' market share increased 17.5%, Lorillard's increased 46.5%, RJR's decreased 24.8%, and B&W's decreased 19.3%.

Defendants contend that it does not make **[**198]** sense that RJR and B&W would agree to and continue in a conspiracy where they continued to lose significant market share. *See* Elzinga Report, at 42 ("the stability of the conspiracy generally requires that cartelists' market shares remain stable"). Dr. Elzinga recognizes that a cartel might shift market shares in order to prevent detection or to appease a disgruntled cartel member, but there would have to be some way to control the redistribution under those circumstances. *See id.* Dr. Elzinga opines, however, that in the cigarette industry, market shares have changed too much for either of these scenarios to be present. *Id.* Philip Morris and Lorillard have gained market share, while B&W and RJR have lost share. The share of "other manufacturers," new entrants to the market, has also grown since 1996.

Plaintiffs recognize that Philip Morris and Lorillard gained market share during the alleged conspiracy while RJR and B&W **[*1328]** lost share. In response to this, however, Plaintiffs' expert testifies that "near constancy of shares is not likely to characterize collusive arrangements in the context of changing market conditions." Fisher Rebuttal, PP 22-23. To show that market shares **[**199]** stabilized after Marlboro Friday, Dr. Fisher relies on data reflecting monthly shipments to wholesalers. *See* Fisher Rebuttal, Exs. 1 & 5. But monthly shipments to wholesalers does not reflect what share of the market each Defendant had because it does not consider the percentage of sales each Defendant made to consumers, but rather what shipments were made to wholesalers. Defendants contend that it is inappropriate to consider market share changes on a monthly, as opposed to annual, basis because monthly basis shifts are affected by whether customers are "loading up" on a particular brand of cigarette. *See* Oral Argument, at 17; Defendants' Joint Post-Argument Reply Memorandum in Support of Their Motions for Summary Judgment, at 7.

Exhibit 13 to Dr. Elzinga's Report shows the year-by-year market share changes in the industry from 1986 to 2000. Over this time, Philip Morris' market share increased 17.5%, Lorillard's increased 46.5%, while RJR's decreased 24.8% and B&W's decreased 19.3%. *See* Fisher Depo., at 172-73 (testifying that a one percent shift in market share would have a "substantial impact on the revenue" of companies). This exhibit clearly shows that there were **[**200]** dramatic "winners and losers" during the alleged conspiracy period, a fact that is inconsistent with cartel behavior. *See also* *In re Baby Food, 166 F.3d at 137* ("It is inconceivable that with losses running at least 10% for every case sold, Nestle would have remained a party to a conspiracy to fix prices, preserve Gerber's market share year after year, and run up its own losses."); *Citric Acid, 191 F.3d at 1102-03*.

Even if the court were to consider the monthly shipping data, Dr. Fisher's exhibits demonstrate only that Defendants' permanent allocation programs were achieving their desired goal of stabilizing inventory shifts month-by-month by preventing "trade loading." As Defendants argue, each company's monthly shipment patterns became more regular as each implemented an allocation program. *See* Defendants' Joint Post-Argument Reply Memorandum, at 7 (citing Fisher Rebuttal Ex. 5 and noting that "RJR's shipment patterns smoothed" after they eliminated trade loading in 1989, Lorillard's in 1990, and Philip Morris' and B&W's in 1993).

Plaintiffs contend that the market share shifts would have been much more dramatic without the collusive agreement **[**201]** among Defendants. *See* Fisher Rebuttal, Ex. 1; Oral Argument, at 88, 91, 93-94 (commenting on RJR's declining market share and stating, "I suggest to the court that if this industry hadn't gotten some price -- back in place that would have continued and RJR and I suspect Brown & Williamson might likely be completely off the chart, they would have just disappeared, become part of Liggett or something"). But Plaintiffs offer no evidence, other than Plaintiffs' counsel's rumination, for their contention that B&W and RJR agreed to the conspiracy in order to slow their rates of decline and allow them to "hang on" a few more years in the industry.

V. CONCLUSION

The court finds that the evidence adduced by Plaintiffs does not singularly or in combination exclude the possibility that Defendants acted independently, as required by *Matsushita*. Even under the more standard summary judgment analysis, the inferences urged in support of Plaintiffs' theory of conspiracy require either that the jury merely guess between **[*1329]** lawful and unlawful activity or are the product of flawed logic. Finally, when the court looks at the case as a whole, the contemporaneous documents show Defendants **[**202]** operated under substantial uncertainty about each other's future pricing actions and are, thus, wholly inconsistent with a settled agreement to fix prices. At the same time, the amount of competition at the retail level forced Defendants to spend more in pro-competitive acts at retail than Plaintiffs contend Defendants gained at wholesale. Under these circumstances, the court finds that no reasonable jury could conclude that the activities in the cigarette industry during the relevant time frame reflect a conspiracy to fix prices.

Accordingly, the court GRANTS Defendant R.J. Reynolds' motion for summary judgment [170-1]; GRANTS Defendant Brown & Williamson's motion for summary judgment [171-1]; GRANTS Defendant Lorillard Tobacco Company's motion for summary judgment [173-1]; and GRANTS Defendant Philip Morris' motion for summary judgment [174-1].

In preparing this order, it came to the court's attention that Plaintiffs' Response to Defendants' Motions for Summary Judgment [180-1] was filed under seal. That document is ordered unsealed instanter. The court is of the opinion that anything submitted to the court and which the court relied on in ruling on the motions for summary **[**203]** judgment ought to be unsealed. The Clerk of the Court is DIRECTED in twenty days from the date of this order to UNSEAL all depositions and documents filed in support or opposition to Defendants' motions for summary judgment unless a party files a motion to keep some particular document or deposition sealed for a competitive or other unique circumstance. Open courts of record are grounded in the democratic process. This is a case of some importance and the public ought to know what information was before the court as the court made its decision.

During the last months of this case, Plaintiffs' counsel became engaged in a heated dispute which primarily centered around administrative issues of fee and expense allocations, but also contained suggestions that some members of the Plaintiffs' Management Committee were inattentive or ill-prepared. The court submitted the issues to a Special Master who determined that while the conduct was not professional, the class was vigorously represented during the conduct of the litigation.

SO ORDERED this 11th day of July 2002.

J. OWEN FORRESTER

UNITED STATES DISTRICT JUDGE

G-I Holdings v. Baron & Budd

United States District Court for the Southern District of New York

July 17, 2002, Decided ; July 18, 2002, Filed

01 Civ. 0216 (RWS)

Reporter

238 F. Supp. 2d 521 *; 2002 U.S. Dist. LEXIS 13009 **

G-I HOLDINGS, INC., Plaintiff, - against - BARON & BUDD; FREDERICK BARON; RUSSELL BUDD; NESS, MOTLEY, LOADHOLT, RICHARDSON & POOLE; RONALD MOTLEY; JOSEPH RICE; WEITZ & LUXENBERG; PERRY WEITZ and ROBERT GORDON, Defendants.

Disposition: [1]** Defendants' motion to dismiss granted in part and denied in part, and counts VII, XI and XIII dismissed. Defendant Ness Motley's motion to strike granted.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

In reviewing a motion to dismiss under *Fed. R. Civ. P. 12(b)(6)*, courts must accept as true the factual allegations of the complaint, and draw all inferences in favor of the pleader. Review must be limited to the complaint and documents attached or incorporated by reference thereto. In this context, a complaint is deemed to include documents that the plaintiffs either possessed or knew about and upon which they relied in bringing the suit. However, legal conclusions, deductions, or opinions couched as factual allegations are not given a presumption of truthfulness. The issue is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims. A complaint may only be dismissed when it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitled him to relief.

HN9[] **Tolling of Statute of Limitations, Fraud**

The standard tolling exceptions apply to civil Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, actions. Under the doctrine of wrongful concealment, the statute of limitations will be tolled if the plaintiff proves three elements: (1) wrongful concealment by the defendant, (2) which prevented the plaintiff's discovery of the nature of the claim within the limitations period, and (3) due diligence in pursuing discovery of the claim.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Governments > Legislation > Statute of Limitations > Tolling

HN10[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

With respect to the wrongful concealment element under the tolling doctrine of wrongful concealment, there are two general varieties: the defendant may have taken affirmative steps to prevent the discovery of the plaintiff's injury, or the nature of the wrong itself may have been self-concealing.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Governments > Legislation > Statute of Limitations > General Overview

HN11[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss on the basis on a plaintiff's failure to engage in due diligence cannot be granted unless the "undisputed facts" show a lack of reasonable diligence.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN12[] **Motions to Dismiss, Failure to State Claim**

In the absence of some "red flag," such as an introductory letter to that effect or the fact that the affiant is a known "scoundrel," whether a party may reasonably rely on sworn affidavits presents a factual issue that cannot be determined on a motion to dismiss.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN13[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

A plaintiff must allege a pattern of racketeering activity consisting of at least two acts of racketeering activity undertaken within 10 years of each other. *18 U.S.C.S. § 1961(5)*. The pattern element of a Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, claim requires a showing of "continuity" plus "relationship."

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Criminal Law & Procedure > ... > Crimes Against Persons > Coercion & Harassment > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN14[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

Continuity is both a closed- and open-ended concept, referring either to a closed period of repeated conduct, or to past conduct that by its nature projects into the future with a threat of repetition. It is, in either case, centrally a temporal concept. A party alleging a Racketeer Influenced and Corrupt Organizations Act (RICO), *18 U.S.C.S. § 1961 et seq.*, violation may demonstrate continuity over a closed period by proving a series of related predicates extending over a substantial period of time. Predicate acts extending over a few weeks or months and threatening no future criminal conduct do not satisfy this requirement: Congress was concerned in RICO with long-term criminal conduct. Often a RICO action will be brought before the continuity can be established in this way. In such cases, liability depends on whether the threat of continuity is demonstrated.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN15[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

In the context of the Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, in order to measure whether closed-ended continuity exists, several factors may be considered, including, inter alia: the length of time over which the alleged predicate acts took place, the number and variety of acts, the number of participants, the number of victims, and the presence of separate schemes. The length of time over which predicate acts occurred is an important factor and appears to be dispositive if the period of time is not sufficiently long. The Second Circuit has thus far only found closed-ended continuity where the conduct lasted for two years or more.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN16[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The duration of a pattern of racketeering activity is measured by the Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, predicate acts the defendants commit.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Crimes Against Persons > Coercion & Harassment > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN17[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

In the context of the Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, unlike closed-ended continuity, open-ended continuity does not require a substantial temporal showing. Rather, it requires a plaintiff to show a threat of on-going criminal activity beyond the period in which the predicate acts were committed. In the Second Circuit, cases assessing whether a threat of continuity exists look first to the nature of the predicate acts alleged or to the nature of the enterprise at whose behest the predicate acts were performed. Where the alleged enterprise primarily conducts a legitimate business, there must be some evidence from which it may be inferred that the predicate acts were the regular way of operating business, or that the nature of the predicate acts themselves implies a threat of continued criminal activity.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN18[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

In order to satisfy *18 U.S.C.S. § 1962(c)*'s requirement, a plaintiff must plead each defendant's participation in the "operation or management" of an "enterprise" as those terms are defined for the purposes of the statute. An enterprise within the meaning of the Racketeer Influenced and Corrupt Organizations Act (RICO), *18 U.S.C.S. § 1961 et seq.*, requires an "association in fact" between or among individuals and entities. *18 U.S.C.S. § 1961(4)*. Because *§ 1962(c)* speaks separately of a RICO "person" acting on or conducting the affairs of the "enterprise," which clearly envisions two entities, a plaintiff must also comply with the rule that the RICO person and enterprise referred to must be distinct.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > Elements

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

HN19[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

The corporate owner/employee, a natural person, is distinct from the corporation itself, a legally different entity with different rights and responsibilities due to its legal status. Nothing in the Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, requires more "separateness" than that.

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

Contracts Law > ... > Consideration > Enforcement of Promises > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

Contracts Law > Contract Formation > Consideration > General Overview

HN20[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

As part of a fraud-based Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C.S. § 1961 et seq.*, complaint, the plaintiff must plead detrimental and justifiable reliance on the defendant's misrepresentations.

Civil Procedure > ... > Justiciability > Standing > General Overview

Criminal Law & Procedure > ... > Racketeering > Racketeer Influenced & Corrupt Organizations Act > General Overview

Securities Law > RICO Actions > Standing

Antitrust & Trade Law > ... > Private Actions > Racketeer Influenced & Corrupt Organizations > General Overview

HN21[] **Justiciability, Standing**

The Racketeer Influenced and Corrupt Organizations Act (RICO), *18 U.S.C.S. § 1961 et seq.*, grants standing to sue to any person injured in his business or property by reason of a violation of *18 U.S.C.S. § 1962*. *18 U.S.C.S. § 1964(c)*. This language limits standing to plaintiffs whose injuries were both factually and proximately caused by the alleged RICO violation. While the term "proximate cause" is utilized, liability under statutes such as RICO does not depend on whether there is proximate causation as that term is used at common law. Instead, the question is whether the plaintiff was in the category the statute meant to protect, and whether the harm that occurred was the "mischief" the statute sought to avoid. Thus, to have standing, plaintiffs must show that they were the intended targets of the RICO violations and that any alleged RICO injury must have been the "preconceived purpose" of the RICO activities.

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

Contracts Law > Breach > Breach of Contract Actions > General Overview

HN22[] **Affirmative Defenses, Fraud & Misrepresentation**

To sustain a claim for fraudulent inducement alongside a claim for breach of contract under New York law, one must plead any one of the following: (i) a legal duty separate from the duty to perform under the contract; (ii) a fraudulent misrepresentation collateral or extraneous to the contract; or (iii) special damages that are caused by the misrepresentation and unrecoverable as contract damages.

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN23[] **Business Torts, Fraud & Misrepresentation**

To plead a claim of fraud under New York law, plaintiffs must allege five elements: (1) misrepresentation of a material fact; (2) the falsity of that representation; (3) scienter, or intent to defraud; (4) reasonable reliance on that representation; and (5) damage caused by such reliance.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

HN24[] **Pleadings, Heightened Pleading Requirements**

Fraud pleadings generally cannot be based on information and belief. However, fraud allegations may be so pleaded as to facts peculiarly within the opposing party's knowledge. Even then, the allegations must be accompanied by a statement of facts upon which the belief is founded, and this rule must not be mistaken for license to base claims of fraud on speculation and conclusory allegations. Where pleading is permitted on information and belief, a complaint must adduce specific facts supporting a strong inference of fraud or it will not satisfy even a relaxed pleading standard.

Civil Procedure > ... > Pleadings > Service of Process > General Overview

HN25[] **Pleadings, Service of Process**

Pursuant to *N.Y. C.P.L.R. 306-b*, a complaint must be served within 120 days of its filing.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > General Overview

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > General Overview

HN28[] **Defenses, Demurrers & Objections, Motions to Strike**

Although *Fed. R. Civ. P. 12(f)* allows motions to strike only up to the time a party responds to a pleading, it also permits a court to strike such material on its own initiative at any time. *Fed. R. Civ. P. 12(f)*. This provision allows courts to grant meritorious motions to strike even when they are untimely.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > General Overview

HN29[] **Defenses, Demurrers & Objections, Motions to Strike**

District courts are cautioned to approach motions to strike with caution: It is settled that the motion will be denied, unless it can be shown that no evidence in support of the allegation would be admissible. Thus the courts should not tamper with the pleadings unless there is a strong reason for doing so. In spite of this reluctance, allegations may be stricken if they have no real bearing on the case, will likely prejudice the movant, or where they have criminal overtones.

Opinion by: ROBERT W. SWEET

Opinion

[2] [*527] Sweet, D.J.,**

Defendant law firms Baron & Budd, Ness Motley, Loadholt, Richardson & Poole ("Ness Motley"), and Weitz & Luxenberg, and individual defendants Russell Budd ("Budd"), Frederick Baron ("Baron"), Ronald Motley ("Motley"), Joseph Rice ("Rice"), Perry Weitz ("Weitz") and Robert Gordon ("Gordon") (collectively, the "Defendants") have moved pursuant to *Federal Rule of Civil Procedure 12(b)(6)* for an order dismissing portions of the Third Amended Complaint of G-1 Holdings ("Holdings"). In addition, the Ness Motley defendants (the law firm and individual defendants Ness and Motley) have moved to strike certain allegations in the complaint.

For the following reasons, the Defendants' motion is granted in part and denied in part, and Ness Motley's motion is granted.

Parties

Holdings is a New Jersey corporation and is a holding company that includes certain former asbestos manufacturers and is the successor by merger to GAF Corporation ("GAF"). Plaintiffs have initiated many thousands of tort actions against GAF Corporation and Holdings arising out of the manufacture of a product known as Calsilite, an insulation product containing asbestos.

[3]** The Defendants are law firms and their principals. They have represented many of the plaintiffs in the asbestos litigation against Holdings.

Prior Proceedings

This action was initiated by the filing of an action by Holdings against the Defendants on January 10, 2001, alleging violations of the federal Racketeer Influenced and Corrupt Organizations Act, *18 U.S.C. § 1961 et seq.* ("RICO"). The First Amended Complaint (the "FAC") was filed on April 30, 2001 and alleged *inter alia* that the Defendants engaged in a scheme to inundate the judicial system, and Holdings, with hundreds of thousands of asbestos cases without regard to their merit, and in various illegal acts in connection with such litigation including suborning false testimony. The FAC contained ten counts and alleged that Defendants (1) maliciously interfered with GAF's right to **[*528]** petition Congress (prima facie tort) (Claim I); (2) tortiously interfered with GAF's contracts and economic advantage (Claim II); (3) violated federal ***antitrust law*** (Claim III); (4) violated the RICO statute (Claims IV-VII); (5) breached contracts with GAF (Counts VIII, IX); and (6) fraudulently induced **[**4]** GAF to enter into contracts they never intended to honor (Count X). That complaint was dismissed in part on December 11, 2001, but leave was granted to replead.

In a Second Amended Complaint, filed on January 25, 2002, Holdings repled certain of its state law claims, asserted a cause of action against Baron & Budd for common law fraud, and amended the allegations with regard to its witness tampering theory. Defendants moved to dismiss the Second Amended Complaint and Weitz & Luxenberg moved to strike certain allegations in the complaint.

On March 18, 2002, however, Holdings filed a Third Amended Complaint (the "TAC" or the "Complaint") in which it added a common law fraud claim against Weitz & Luxenberg and amended two paragraphs of its mail and wire fraud allegations against the Baron & Budd defendants to identify five cases and asserted on information and belief that "the Baron & Budd Memorandum was used to create false product identification and testimony in the deposition of each of the plaintiffs who were deposed in these actions." Holdings also sought the Court's permission to file the Third Amended Complaint after it had already filed it.

At a hearing on April 17, 2002, leave **[**5]** to file the Third Amended Complaint was granted, and the Defendants' motions to dismiss the Second Amended Complaint and strike certain allegations were denied inasmuch as they no longer targeted the current complaint. The Defendants were then given leave to renew their motions with regard to the TAC.

On April 26, 2002, the Defendants moved to dismiss certain of the counts, and Weitz & Luxenberg moved to strike certain allegations in the Complaint.

The Complaint consists of thirteen counts. However, not all the Counts are at issue, as demonstrated below:

. ***Count I*** (prima facie tort against all Defendants): not in contention; Holdings included it for the purposes of appeal.

. ***Count II*** (tortious interference with economic advantage against all Defendants): in contention.

. ***Count III*** (tortious interference with contract against all Defendants): not in contention; the Defendants did not move against it. [1]

. ***Count IV*** (antitrust violations against all Defendants): not in contention; Holdings included it for the purposes of appeal.

. ***Count V*** (RICO mail and wire fraud against Baron & Budd): in contention.

. **[**6]** ***Count VI*** (RICO mail and wire fraud against individual defendants Baron and Budd): in contention.

. ***Count VII*** (RICO substantive violation of witness tampering against all Defendants): not in contention except as to the grounds for dismissal.

. ***Count VIII*** (RICO conspiracy against all Defendants): not in contention; Holdings included it for the purposes of appeal.

. ***Count IX*** (breach of contract against Weitz & Luxenberg): not in contention; **[*529]** defendants did not move against it.

. ***Count X*** (breach of contract against Ness Motley): not in contention; defendants did not move against it.

. ***Count XI*** (fraudulent inducement against Weitz & Luxenberg and Ness Motley): in contention.

. ***Count XII*** (common law fraud against Baron & Budd): in contention.

. ***Count XIII*** (common law fraud against Weitz & Luxenberg): in contention.

[7]** In sum, of the thirteen Counts, only Counts II, V, VI, XI, XII, and XIII are in contention. In addition, Holdings seeks clarification for the grounds for dismissal of Count VII.

The motions were considered fully submitted on May 15, 2002, at which time oral argument was heard.

The Factual Allegations of the Complaint

The Complaint adopts in great measure the factual allegations of the First Amended Complaint. These facts were described in greater detail in *G-I Holdings v. Baron & Budd, 179 F. Supp. 2d 233 (S.D.N.Y. 2001)*, familiarity with which is presumed. Therefore, this section will only detail the additions or alterations from the First Amended Complaint.

---

[1] Defendants reserved the right to raise the issue of whether they induced a breach for the sole purpose of harming plaintiff, but do not argue it here.

None of the facts set forth below represent findings by the Court. As befits a motion to dismiss under Rule 12(b)(6), the facts are assumed to be as alleged in the complaint for purposes of the instant motion.

Specific Instances of Falsifications of Affidavits

Holdings alleges that Baron & Budd filed false affidavits in connection with asbestos litigation. In December 1995, paralegals at Baron & Budd working under the supervision of Melanie Oliver, a Baron & Budd supervisor ("Oliver"), **[**8]** were instructed to gather hundreds of affidavits from Baron & Budd clients for use against GAF and other asbestos defendants for trial and/or settlement purposes. Such affidavits were critical to establish liability against a particular defendant whether they were to be used for trial or settlement purposes.

Under Oliver's supervision, the paralegals gathered the affidavits and began to compile the results in a conference room at Baron & Budd. With their deadline looming, the paralegals realized that approximately 200 of the affidavits were missing necessary information, including: (1) the asbestos product to which the affiant had been exposed; (2) the work site(s) at which the affiant had been exposed/employed; and/or (3) the client's signature.

The paralegals reported these omissions to Oliver, who instructed that the affidavits be "fixed." None of the affidavits was returned to the affiant for completion, correction, review or signature. Instead, at Oliver's direction, the paralegals "filled in" the missing information themselves.

Missing product identification was added without reference to or knowledge of whether the client could truthfully testify that he had been exposed **[**9]** to a particular asbestos product. For example, where a client had failed to identify a particular asbestos product to which he had been exposed, the paralegals would attempt to research which of the manufacturer's products "might" have been used at the identified work site and then simply add that product to the affidavit. Where a client had failed to identify a work site, the paralegals would create that information using the client's social security printout (to identify employment history) and then would deduce an appropriate work site that would match the particular product **[*530]** and the particular asbestos manufacturer.

The paralegals also signed clients' names on the unsigned affidavits.

In each case, after a deficient affidavit was "fixed" by Baron & Budd's paralegals, it was filed with the court in which the case was pending or was submitted to the defendants to support a settlement. Holdings claims the affidavits were false and fraudulent and were known by Baron & Budd to be so when they were filed or submitted.

Following their falsification by Baron & Budd, all or substantially all of the affidavits included identification of Ruberoid (plaintiff's predecessor by merger) as a **[**10]** manufacturer of asbestos products to which the affiant was exposed. Holdings claims these identifications were false and fraudulent.

GAF, through its agent, the Center for Claims Resolution ("CCR"), relied upon these false and fraudulent identifications in settling the cases and in allocating portions of the settlement to GAF.

Based on settlement date, trial location, and other salient characteristics, Holdings claims on information and belief that the universe of settlements in which these 200 or so false and fraudulent affidavits were submitted is contained within the list of 190 cases listed in an exhibit to the Complaint. The amount that GAF was defrauded into paying in these cases is a substantial portion of the $ 891,663 it paid to settle these cases.

Until January 16, 2002, Holdings claims that plaintiff was not, and in the exercise of reasonable diligence could not have been, aware of the specific instances alleged above because (1) the nature of the fraud was self-concealing; (2) the volume of litigation by Defendants made individualized investigation into the merits of each case an impossibility; and (3) Baron & Budd took active steps to hinder GAF's investigation into **[**11]** Baron & Budd's ongoing fraud by, *inter alia,* interfering with GAF's ability to locate and interview former Baron & Budd employees. GAF has spent millions of dollars since the revelation of the Baron & Budd memorandum investigating Baron & Budd's misdeeds and seeking to identify the pattern of fraud and specific instances thereof.

The Effects of the Routine Falsification of Product Identification Evidence

The falsification of product identification was not limited to the events of December 1995 described above. Claim forms filed by the Baron & Budd bankruptcy department also included false product identifications provided by a Baron & Budd employee. A paralegal working under the supervision of Baron & Budd bankruptcy department manager Tiffany Tuggle ("Tuggle") routinely listed products on claim forms for clients that had never been identified by the client or were wholly inconsistent with the information that had been provided by the client. Baron & Budd was made aware of this practice and did nothing to stop it. In fact, the paralegal was promoted.

Backdating Claims and Falsifying Court Records

Subsequent to the filing of the Second Amended Complaint, **[**12]** Holdings claims to have uncovered additional evidence of wrongdoing by defendant Weitz & Luxenberg. The following eleven paragraphs are alleged on information and belief based on the investigation of private investigators working for Holdings.

In order to pursue claims against asbestos defendants that would otherwise be time-barred, Weitz & Luxenberg has backdated documents filed in asbestos personal injury cases and tampered with and falsified records of the Supreme Court of the State of New York.

[*531] In the spring of 2000, Weitz & Luxenberg maintained an office at 120 Wall Street in Manhattan that oversaw the prosecution of asbestos personal injury cases on behalf of clients who had died. In May 2000, Weitz & Luxenberg attorneys recognized that they had failed to amend in a timely fashion a complaint filed in New York County, the effect of which was to bar claims against one or more named or unnamed defendants under applicable statutes of limitations. Weitz & Luxenberg remedied the problem by backdating the amended pleading, falsifying the filing stamp and altering the books and records of the New York County Supreme Court to reflect the fact that the amendment had been filed long **[**13]** before it actually was filed.

Pleadings filed in the New York County Supreme Court all bear an official court stamp, affixed by court employees, reflecting the date upon which the pleading was filed in the County Clerk's office (the "Filed Stamp"). The filing date, reflected in the Filed Stamp, is relied upon by both the Court and by litigants (including GAF) in calculating the timeliness of the filing. In the spring of 2000, GAF was a named defendant in all, or substantially all, of the asbestos liability actions brought in New York County by Weitz & Luxenberg on behalf of its clients.

Sometime after Weitz & Luxenberg attorneys discovered the error, Weitz & Luxenberg personnel, acting under the direction of Weitz & Luxenberg attorney Marie Ochigrassi ("Ochigrassi"), undertook to ensure that the amended complaint would be filed with a false backdated Filed Stamp and that the court's records would be falsely altered to reflect that the pleading had been filed before it actually was filed. Ochigrassi was the head of a department comprised of two other attorneys and paralegals. The two supervising paralegals in the department were Alicia Ostracher and Vanessa Ostracher, both of whom **[**14]** are daughters of Elba Aguilar ("Aguilar").

Aguilar is and was at that time a court employee at the New York County Supreme Court building at 60 Centre Street in Manhattan. Aguilar's duties at the courthouse are such that she has and at all relevant times had access to the New York County Clerk's Filed Stamp and New York County Supreme Court case records.

Aguilar is the mother of three present or former Weitz & Luxenberg paralegals: the Ostrachers and Mary Jo Sci. In addition, Weitz & Luxenberg is representing Aguilar's former husband (with whom she is now reconciled) in litigation with Nassau County in which Aguilar's interests appear to be aligned with his. Weitz & Luxenberg is handling the litigation at no charge.

Under the direction of Ochigrassi, Weitz & Luxenberg personnel first prepared a back-dated amended complaint. When the new papers were ready, Ochigrassi summoned a paralegal to her office where paralegal Alicia Ostracher was also waiting. Ochigrassi instructed the paralegal that he was "to take something down to Alicia's mother" and "to follow Alicia's instructions." Ostracher handed the paralegal an envelope containing the amended complaint and indicated that she had **[**15]** called her mother who would be waiting to meet him at 60 Centre Street.

Ostracher instructed the paralegal to meet her mother inside the entrance to the courthouse at 60 Centre Street. When the paralegal arrived, Aguilar told him to go downstairs to the records department of the courthouse ahead of her, to make a copy of the document he had brought with him and to fill out a request form for the case file. He did so. As he was being handed the case file, Aguilar appeared by **[*532]** his side and showed the filing clerk her badge so that the file could be removed from the clerk's view. Aguilar also requested a document log book for a certain time period, which the clerk gave her.

Aguilar and the paralegal took the file, the logbook, and the documents to a space near the copy machine. Aguilar stamped the amended complaint with the court's Filed Stamp to reflect falsely that it had been filed at an earlier date, before the statute of limitations ran on the newly added claims. Aguilar then added a false entry to the court's log book. The entry Aguilar placed in the log book falsely indicated that the amended complaint had been filed on the false filing date. At Aguilar's instruction, the paralegal **[**16]** then took the case file to the copy machine, copied a document in it (so as to suggest that was the reason he had requested it) and then placed the falsely stamped pleading in the case file. The log book and case file were then returned to the filing clerk.

This was not an isolated incident. On several other occasions, the paralegal was instructed by Weitz & Luxenberg attorney Ochigrassi or Weitz & Luxenberg paralegal Ostracher to take blue-backed documents to Aguilar so that false Filed Stamps could be affixed on them. Once Aguilar took the paralegal upstairs at the courthouse at 60 Centre Street and made him wait on a bench. She then took the documents into another room and brought them back, all with back-dated Filed Stamps newly affixed. On another occasion, they met at the court's rotunda on the first floor. At that time, Aguilar simply ducked behind a column and quickly stamped the documents with the earlier, but false, filing dates. On yet another occasion, Aguilar met the paralegal outside the side entrance to 60 Centre Street to effectuate the falsification of filing stamps on case documents generated by Weitz & Luxenberg. On every occasion, Aguilar took steps to ensure that **[**17]** her conduct was not being observed by others.

Under Rule 3025 of New York's Civil Practice Law & Rules, amended complaints must be served on each party to the action, including each named defendant, and each named defendant must serve and file a response thereto. Weitz & Luxenberg's filing of fraudulently time-barred claims increased the litigation costs for all defendants in those cases.

The Producer Agreement

Prior to December 17, 1999, GAF had a valid, written contract with CCR known as the Producer Agreement Concerning Center for Claims Resolution (the "Producer Agreement"). The express purpose of the Producer Agreement was to "provide for the administration, defense, payment, and disposition of asbestos-related claims" for the benefit of its participating members. Under the terms of the Producer Agreement, CCR could only terminate its contract with GAF under certain conditions and subject to certain restrictions enumerated therein.

Pursuant to the terms of the Producer Agreement, GAF designated CCR as its sole agent to administer and arrange on its behalf for the evaluation, settlement, payment or defense of all asbestos-related claims against it. In this capacity, **[**18]** CCR investigated claims, tried cases, and negotiated settlements on behalf of all of its members, thereby substantially reducing GAF's transaction costs in the asbestos claim resolution process.

As lawyers who routinely negotiated such settlements with CCR on behalf of their asbestos liability clients, Defendants were aware of GAF's contract with CCR and the benefits GAF derived from the contract. As alleged in the FAC, Defendants intentionally caused CCR to expel **[*533]** GAF in breach of the Producer Agreement, thereby deliberately and wrongfully interfering with GAF's ongoing economic and contractual relationship with CCR.

By causing CCR to expel GAF, Defendants maliciously and without justification carried out the extortionate threats made in Defendants' campaign to coerce GAF to cease its efforts to lobby Congress for passage of the Fairness in Asbestos Claims Act, depriving GAF of the ongoing benefits of CCR membership and causing GAF special damages and other injury.

From January 17, 2000 to January 5, 2001, GAF was forced to establish and fund a free-standing network of defense counsel and to litigate asbestos bodily injury cases on its own. These expenses exceed the sum of $ 20 **[**19]** million.

Counts V and VI

These counts allege mail and wire fraud in association with a number of claimants. In the first complaint, Holdings had not identified the cases in which the claimants were plaintiffs. The Complaint now asserts that the claimants were plaintiffs in five cases: *Beverly Jean Brown v. Keene Corp.,* No. 93-10952 (98th Judicial District Court of Travis Co., TX); *Jimmy Leon Smathers v. Owens-Corning Fiberglas Corp.,* No. 95-06329 (126th Judicial District Court of Travis Co., TX); *Kenneth Shirley v. Owens-Corning Fiberglas Corp.,* No. 95-10495 (250th Judicial District Court of Travis Co, TX); *C.J. English v. Owens-Corning Fiberglas Corp.,* No. 96-06308 (134th Judicial District Court of Dallas Co., TX); *Edwin Ray McCray v. Owens-Corning Fiberglas Corp.,* No. 95-3109 (28th Judicial District Court of Neuces Co., TX). Further, Holdings alleges that Baron & Budd submitted false and fraudulent affidavits, and that GAF justifiably and reasonably relied upon these false and fraudulent affidavits to its detriment in the amount of several hundred thousand dollars.

Count VII

Holdings has amended its pleading to allege specifically **[**20]** that Defendants intended to prevent GAF; Samuel J. Heyman, the former chairman and chief executive officer of GAF ("Heyman"); and other members of the Coalition for Asbestos Resolution from testifying before Congress in support of FACA, or to cause their testimony to be less favorable to Defendants.

Holdings has included specific examples of attempts by Defendants to intimidate, threaten, or corruptly persuade former asbestos producers with the intent of preventing their testimony before Congress and causing them to withhold their testimony from Congress. With respect to GAF and Heyman, Holdings now alleges that Defendants had actual knowledge that Heyman was expected to be a witness in Congressional hearings on FACA. The conduct alleged above was undertaken with the specific intent of causing Heyman not to appear or, if he did appear, to moderate his testimony to be less unfavorable to the Defendants. Further, with respect to the other former asbestos producers, Defendants actually and correctly believed that some of their number would be called (or would voluntarily appear) as witnesses in those hearings. The conduct alleged above was undertaken with the specific intent of causing **[**21]** these individuals not to appear or, if they did appear, to moderate their testimony to be less unfavorable to the Defendants.

The Futures Agreement

Holdings now alleges that Ness Motley, Weitz & Luxenberg and the Affiliated Law Firms used the Futures Agreements and their explicit and implicit (but false and fraudulent) promises to perform thereunder to induce CCR's agreement to settle **[*534]** some 50,000 pending asbestos cases for approximately $ 750 million.

Discussion

I. *Motion To Dismiss*

A. *Standard for a Motion to Dismiss*

HN1[] In reviewing a motion to dismiss under *Rule 12(b)(6)*, courts must "accept as true the factual allegations of the complaint, and draw all inferences in favor of the pleader." *Mills v. Polar Molecular Corp., 12 F.3d 1170, 1174 (2d Cir. 1993)* (*citing IUE AFL-CIO Pension Fund v. Herrmann, 9 F.3d 1049, 1052 (2d Cir. 1993))*. Review must be limited to the complaint and documents attached or incorporated by reference thereto. *Kramer v. Time Warner, Inc., 937 F.2d 767, 773 (2d Cir. 1991)*. In this context, the Second Circuit has held that a complaint is deemed to "include . . . documents that **[**22]** the plaintiffs either possessed or knew about and upon which they relied in bringing the suit." *Rothman v. Gregor, 220 F.3d 81, 88 (2d Cir. 2000)*. However, "legal conclusions, deductions, or opinions couched as factual allegations are not given a presumption of truthfulness." *L'Eureopeenne de Banque v. La Republica de Venezuela, 700 F. Supp. 114, 122 (S.D.N.Y. 1988)*. "The issue is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims." *Villager Pond, Inc. v. Town of Darien, 56 F.3d 375, 378 (2d Cir. 1995)* (*quoting Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90,* 94 S. Ct. 1683 (1974)). A complaint may only be dismissed when "it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitled him to relief." Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957). *See also* Allen v. WestPoint-Pepperell, Inc., 945 F.2d 40, 44 (2d Cir. 1991); Bernheim v. Litt, 79 F.3d 318, 321 (2d Cir. 1996).

B. *Count II: Tortious Interference* [23] *with Economic Advantage May Be Pleaded in the Alternative***

In Count II of its First Amended Complaint, Holdings pled claims for both tortious interference with contract and tortious interference with prospective economic advantage, based on the existence of an alleged contractual relationship between GAF and the CCR. It was held that Holdings had adequately pleaded a claim for tortious interference with prospective contractual relations. G-I Holdings, 179 F. Supp. 2d at 253-54. However, the claim for tortious interference with contract was dismissed as Holdings failed to satisfy the requirement that it plead the existence of a "valid, existing contract" between itself and the CCR. Id. at 252-53.

In the Complaint, Holdings has restated its claim for tortious interference with prospective economic advantage without change (Count II) and repleaded its previously dismissed claim for tortious interference with contract (Count III). With respect to the latter claim, Holdings no longer relies on the ill-defined "contractual relationship" referred to in its prior pleading, but identifies the specific contract with which the Defendants purportedly interfered, **[**24]** the Producer Agreement, by which GAF designated CCR to act as its agent in the "evaluation, settlement, payment or defense of all asbestos-related claims." Compl. P 188. Defendants do not contest that this allegation cures the defect identified in the earlier opinion.

However, the Defendants argue that by sufficiently pleading Count III, Holdings has undermined its claim for interference with prospective economic advantage. To Defendants' argument that Count II is **[*535]** duplicative of Count III, [2] Holdings states that Count II is merely a claim pleaded in the alternative as permitted under the Federal Rules.

[25]**

Rule 8 of the Federal Rules of Civil Procedure states, in pertinent part, that:

> ***HN2***[] A party may set forth two or more statements of a claim or defense alternatively or hypothetically, either in one count or defense or in separate counts or defenses. When two or more statements are made in the alternative and one of them if made independently would be sufficient, the pleading is not made insufficient by the insufficiency of one or more of the alternative statements. A party may also state as many separate claims or defenses as the party has regardless of consistency and whether based on legal, equitable, or maritime grounds.

Fed. R. Civ. P. 8(e)(2); *see also* Aiena v. Olsen, 69 F. Supp. 2d 521, 531 (S.D.N.Y. 1999) (permitting alternative pleading for ERISA claim made in the alternative to state law claims because plaintiff not bound by alternative allegations at motion to dismiss stage). New York law is also in accord. CPLR § 3014; *see also* Raglan Realty Corp. v. Tudor Hotel Corp., 149 A.D.2d 373, 374, 540 N.Y.S.2d 240, 241 (1st Dep't 1989) (reversing dismissal in action

---

[2] Holdings alleges it was owed the same rights pursuant to the contractual relationship and to the Producer Agreement. *Compare* Compl. P 181 (pursuant to contractual relationship, "CCR investigated claims, tried cases, and negotiated settlements on a bulk basis on behalf of all of its members") with Compl. P 188 (pursuant to Producer Agreement, "CCR investigated claims, tried cases, and negotiated settlements on a bulk basis on behalf of all of its members"). In addition, the allegedly interfering behavior is the same. *Compare* Compl. P 182 ("defendants caused CCR to expel GAF") with Compl. P 190 ("defendants intentionally caused CCR to expel GAF in breach of the Producer Agreement"). Finally, the damages are also the same. *Compare* Compl. PP 183-85 (damages include denial of CCR benefits, inability to settle cases and special damages of more than $ 20 million as the result of "establishing and funding a free-standing network of defense counsel and litigating asbestos bodily injury cases on its own") with Compl. PP 191-93 (same).

for specific performance and fraud because plaintiff was allowed to **[**26]** plead alternative theories) (*citing* Mitchell v. New York Hosp., 61 N.Y.2d 208, 218, 473 N.Y.S.2d 148, 461 N.E.2d 285 (1984)).

In *Aiena,* for instance, the court permitted the plaintiffs to plead an ERISA claim in the alternative to their state law claims because "given the uncertainties concerning (a) whether the J&H arrangements were an ERISA plan and (b) the scope of ERISA preemption, it would be foolish to put all of one's eggs in either the ERISA or the state law basket." *Aiena, 69 F. Supp. 2d at 531*. If plaintiffs rested solely on the ERISA plan, it could turn out that the plan was not, in fact an ERISA plan. *Id.* Similarly, if they relied only on the state law claims, it could be determined that the plan was an ERISA claim and therefore the state law claims were preempted. *Id.*

The instant claims present an analogous situation. Should the Defendants demonstrate that Holdings' contract with CCR was not fully enforceable or, assuming the validity of the contract, that there was no breach, the claim for tortious interference might fail. *Catskill Dev. L.L.C. v. Park Place Entertainment Corp., 144 F. Supp. 2d 215, 232* (S. **[**27]** D.N.Y.) ("The New York Court of Appeals has made clear that ***HN3***[] an essential element of a claim for tortious interference of contract is the existence of an enforceable contract . . . .") (*citing* NBT Bancorp Inc. v. Fleet/Norstar Fin. Group Inc., 87 N.Y.2d 614, 641 N.Y.S.2d 581, 585, 664 N.E.2d 492 (N.Y. 1996)), *vacated in part on other grounds,* 154 F. Supp. 2d 696 (S.D.N.Y. 2001); **[*536]** *see also* Guard-Life Corp. v. S. Parker Hardware Manufacturing Corp., 50 N.Y.2d 183, 184, 428 N.Y.S.2d 628, 406 N.E.2d 445 (1980) (finding no liability under claim for tortious interference to "one whose actions have induced nonperformance of a contract deemed to be voidable and thus unenforceable"). In those circumstances, however, the alternative claim for tortious interference with economic advantage would be viable. *Catskill Dev., 144 F. Supp. 2d at 232* (plaintiff did not state claim for tortious interference with contract because contracts relied upon were unenforceable yet plaintiff nonetheless stated claim for tortious interference with prospective business relations).

The Defendants have presented three cases that hold that tortious interference **[**28]** with contract and tortious interference with prospective economic advantage cannot be pled in the alternative. *See* D'Andrea v. Ralfa-Demetrious, 3 F. Supp. 2d 239 (E.D.N.Y. 1996) (dismissing on summary judgment claim for tortious interference with prospective economic advantage as redundant of claim for tortious interference with contract because of existence of contract); Stomper v. Chicago Transit Auth., 1997 U.S. Dist. LEXIS 4416, 1997 WL 177844, at *4 (N.D. Ill. April 4, 1997) (dismissing claim for tortious interference with business relations under Illinois law because the existence of an employment contract rendered the claim "completely redundant" with one for tortious interference with contract); Egrets Pointe Townhouses Property Owners Ass'n Inc. v. Fairfield Communities, Inc., 870 F. Supp. 110, 116 (D.S.C. 1994) (under South Carolina law, existence of valid contract "precludes any recovery on a claim for interference with prospective contractual relations").

These cases are not controlling, however, and to follow their holdings would unfairly require Holdings to choose, at an early stage in the proceedings, which cause of action to base its claim. [3] **[**29]**

The Defendants also urge that Counts II and III cannot be "in the alternative" as they are not expressly labeled as such in the Complaint. However, ***HN4***[] Holdings "need not use particular words to plead in the alternative" as long as "it can be reasonably inferred that this is what [it was] doing." *Holman v. Indiana, 211 F.3d 399, 407* (7th Cir.), *cert. denied,* **[**30]** *531 U.S. 880, 148 L. Ed. 2d 132, 121 S. Ct. 191 (2000)*; *see also* Pair-A-Dice Acquisition Partners, Inc. v. Board of Trustees of the Galveston Wharves, 185 F. Supp. 2d 703, 708 n.6 (S.D. Tex. 2002) ("Although [plaintiff] fails to use the term 'promissory estoppel' to describe its theory of recovery . . . the Court assumes that [plaintiff intended to plead promissory estoppel as an alternative theory of recovery and will consider the merit of such argument."); Steel Warehouse of Wisconsin Inc. v. Caterpillar Inc., 1990 U.S. Dist. LEXIS 19153, 1990 WL 304266, at *3 (N.D. Ill. Nov. 13, 1990) (allowing leave to amend complaint to clarify alternative pleading

[3] It is true that in *D'Andrea,* the court recognized that there was a material issue of fact as to the validity of the employment contract. However, it did not take its recognition of that fact into consideration when determining whether the tortious interference with prospective economic advantage claim should withstand summary judgment. Presumably, if it had done so, the result might have been different. In addition, *D'Andrea* involved a motion for summary judgment, and the narrowing down of claims in that manner is more appropriate at the summary judgment stage, after parties have had the opportunity for necessary discovery.

because *Rule 8(a)* "does not state that a party must explicitly identify alternative pleadings, and the court will not dismiss plaintiff's complaint on that basis"). Holdings did not explicitly state **[*537]** that it was alleging Counts II and III in the alternative, but it may be reasonably inferred that it intended to do so. [4]

[31]**

Defendants' motion to dismiss Count II is denied. [5]

C. *Counts V and VI - Holdings Sufficiently Alleges RICO Mail and Wire Fraud Claims*

Counts V and VI state RICO mail and wire fraud claims against the law firm Baron & Budd (Count V) and the individual defendants Baron and Budd (Count VI).

HN5[] At a minimum, a plaintiff attempting to state a cognizable claim under *section 1962(c)* must plead the following elements: (1) that the defendants (2) through the commission of two or more acts (3) constituting a "pattern" (4) of "racketeering activity" (5) directly or indirectly invests in, or maintains an interest in, or participates in (6) an "enterprise" (7) the activities of which affect interstate commerce. *Citadel Mgmt., Inc. v. Telesis Trust Inc., 123 F. Supp. 2d 133, 154 (S.D.N.Y. 2000)* **[**32]** (*citing* *Moss v. Morgan Stanley, Inc., 719 F.2d 5, 17 (2d Cir. 1983))*.

The Defendants [6] argue that Holdings has failed to allege adequately the existence of predicate acts, a pattern, an enterprise, and that it has standing.

1. *Predicate Acts*

HN6[] In order to maintain a RICO claim, a plaintiff must allege that each defendant engaged in two or more predicate acts. *Citadel Mgmt., 123 F. Supp. 2d at 155* (*citing* *Lakonia Mgmt., Ltd. v. Meriwether, 106 F. Supp. 2d 540, 550 (S.D.N.Y. 2000)*; *Moeller v. Zaccaria, 831 F. Supp. 1046, 1056 (S.D.N.Y. 1993))*.

The RICO counts in the First Amended Complaint were dismissed for failure to plead a predicate act with requisite specificity. Holdings alleged in its FAC that the Baron & Budd defendants falsified documents, **[**33]** affidavits, and depositions and then submitted them in a "substantial portion" of 900 Ohio cases identified in an exhibit to the complaint as well as in 31 cases named in the text of the FAC. It was found that the First Amended Complaint failed to allege adequately specific instances of fraudulent conduct to satisfy the Federal Rules with respect to the specific dates, times and contents of the fraudulent statements constituting mail and wire fraud:

> Because Holdings has not alleged which of the over 900 cases specifically referenced **[*538]** in the Complaint (in which the Baron & Budd memorandum was used) included fraudulent product identifications and/or other false testimony, this claim must be dismissed… . Holdings has not pointed to a specific deposition, product identification, or affidavit from those cases that support its claims. Moreover, Holdings has held the

---

[4] The Defendants did not cite any authority to suggest the contrary. Several cases have found, however, that a reasonable inference may not be drawn in certain circumstances not applicable here. For instance, in *Samuels v. Old Kent Bank, 1997 U.S. Dist. LEXIS 11485, 1997 WL 458434*, at *14-*15 (N.D. Ill., Aug. 1, 1997), the court applied *Holman* and determined that a reasonable inference could not be drawn that the plaintiff had pleaded breach of contract and unjust enrichment in the alternative. Unjust enrichment may only be pleaded under the applicable state law, Illinois, in the absence of a valid contract. *Id.* The Complaint no where stated that the contract might not be valid, and the unjust enrichment count explicitly incorporated paragraphs alleging the existence of a valid contract. *Id.* Holdings' complaint does not face the same internal inconsistencies as it alleges that there was a contractual relationship in addition to the existence of a valid contract.

[5] The Defendants maintain their challenge to both Counts II and III on the basis that their supposed interference was not intended solely to harm GAF. Defendants do not reargue this point here, however, as they already did so unsuccessfully in their first motion to dismiss.

[6] Because the claim is only advanced against the Baron & Budd defendants (the law firm and the individuals), all references to "Defendants" in this section are to the Baron & Budd defendants only.

> Memorandum in its possession for over three years. A failure to specify any individual false statements and the dates and times they were transmitted is fatal to Holdings' claims.

G-I Holdings, 179 F. Supp. 2d at 262.

Holdings has made two pertinent amendments since the dismissal. It has added **[**34]** (1) the names of cases that it claims on information and belief were affected by the "Baron & Budd Memorandum" and (2) allegations regarding the "fixing" of affidavits by paralegals. The Defendants state the changes still leave the Complaint impermissibly unspecific and, even if the amendments do satisfy Rule 9(b), the new allegations are time-barred and equitable tolling is not applicable.

a. *Allegations Concerning the "Baron & Budd Memorandum" Continue To Lack Specificity*

HN7[] Fed. R. Civ. P. 9(b) requires that in all allegations of fraud, the circumstances constituting fraud must be stated with particularity. Shields v. Citytrust Bancorp, Inc., 25 F.3d 1124, 1127 (2d Cir. 1994). The rule is designed to further three goals: (1) providing defendants with fair notice of the claims against them; (2) protecting defendants from harm to their reputations or good will by unfounded allegations of fraud; and (3) reducing the number of strike suits. DiVittorio v. Equidyne Extractive Indus., Inc., 822 F.2d 1242, 1247 (2d Cir. 1987).

The Second Circuit has made clear that **HN8**[] "in the RICO context, Rule 9(b) calls for the complaint to 'specify the statements **[**35]** it claims were false or misleading, give particulars as to the respect in which plaintiffs contend the statements were fraudulent, state when and where the statements were made, and identify those responsible for the statements.'" *E.g.,* Moore v. Paine Webber, Inc., 189 F.3d 165, 173 (2d Cir. 1999) (citations omitted); *see also* Official Publications, Inc. v. Kable News Co., 692 F. Supp. 239, 245 (S.D.N.Y. 1988) (complaint alleging mail and wire fraud must "set forth the contents of the items mailed and specify how each of these items was false and misleading" and "must specify who made the allegedly fraudulent statements and the time and place such statements were made"), *rev'd on other grounds,* 884 F.2d 664 (2d Cir. 1989); Spoto v. Herkimer Co. Trust, 2000 U.S. Dist. LEXIS 6057, 2000 WL 533293, at *6 (N.D.N.Y. April 27, 2000) (dismissing RICO mail fraud claim because plaintiff failed to delineate "the who, what, why, where, and when" of the alleged misrepresentation).

Holdings realleges that the Defendants used the "Baron & Budd Memorandum," entitled "Preparing Your Deposition," to manufacture evidence and coach answers from clients. This claim **[**36]** was dismissed from the FAC for lack of specificity. 179 F. Supp. 2d at 262.

In the FAC, Holdings listed 30 claimants who were "involved" with these allegations. The Complaint now states that the 30 claimants were plaintiffs in five cases and alleges that "on information and belief, the Baron & Budd Memorandum was used to create false product identification testimony in the depositions of each of the plaintiffs who were deposed in these actions." Compl. P 234.

Holdings' addition of new cases, without addressing the specific information **[*539]** deemed necessary in the earlier opinion, is without effect. Holdings fails to allege which claimants were in which case, which claimants were actually deposed, and whether depositions were taken in the cases. In addition, Holdings still does not provide the date of a single deposition, the participating individuals, or the false identification made during the deposition. Importantly, it does not state that the deponents even viewed the Baron & Budd Memorandum.

GAF was involved as a party in those cases and depositions that it refers to in the amended allegations. 179 F. Supp. 2d at 262. In addition, Holdings has had possession **[**37]** of the Memorandum for a number of years. As a result, Holdings must state this claim with much greater specificity than in the Complaint.

The additional allegations do not overcome the shortcomings outlined in the Opinion, and therefore Holdings' RICO mail and wire fraud claims based on the Baron & Budd Memorandum are dismissed.

b. *The "Fixed" Affidavits Constitute Predicate Acts*

Holdings alleges that in December 1995, unnamed paralegals at Baron & Budd noticed that approximately 200 affidavits filed in unnamed asbestos cases against plaintiff and other asbestos defendants were missing necessary information. TAC PP 82, 90. Holdings alleges that Melanie Oliver, a Baron & Budd supervisor, instructed the paralegals to "fix" the affidavits. Holdings further claims that the paralegals added the product identification information to and signed the affidavits without consulting the affiants. These allegations were not included in the First Amended Complaint and therefore have not been previously discussed.

i. *The Allegations Are Sufficiently Specific*

As discussed above, two rationales underlying *Rule 9(b)* are that pleadings should be sufficiently specific as to provide **[**38]** defendants with fair notice of the claims against them and protect them from harm to reputation or good will by unfounded allegations of fraud. Bearing these principles in mind, Holdings has cleared this hurdle -- albeit just barely -- with these particular allegations. The Defendants have notice of when the behavior is alleged to have taken place: in or around December 1995. The allegations are further specified by pointing to the particular supervisor under whose aegis the fraud is alleged to have taken place. Finally, Holdings has narrowed down a sea of potential cases to a smaller group of 200 cases, in which, as they note, it is highly probable that the alleged fraud was involved.

It is true, as Defendants point out, that Holdings does not refer to any specific affidavit or the specific information that was added to the affidavit. No specific product or work histories are mentioned, except that all or substantially all of them included identification of Ruberoid (Holdings' predecessor by merger) as a manufacturer of asbestos products to which the affiant was exposed.

In a typical case, it is true, such details would be mandatory. In the very fact-specific case before the court, **[**39]** it seems, such details are next to impossible to achieve at this stage of pleading. One of the very allegations underlying this Complaint is that the Defendants undertook to bury GAF and other asbestos producers with litigation so that they were unable to scrutinize each and every affidavit of each and every plaintiff in each and every complaint because it was financially ruinous to do so. Holdings is now attempting to do what it did not do before, a task requiring **[*540]** as much effort -- and with as little appeal -- as cleansing the Augean stables.

Holdings has provided sufficient notice so that the Defendants may defend themselves. Further, the allegations are specific enough so that they are not mere shots in the dark in an attempt to hit a broad target. [7] Whether these allegations are borne out in the end, however, is another matter -- but one for another day.

[40] ii. *The Allegations Are Not Time-Barred***

Because the "fixing" of the affidavits took place more than four years ago, Defendants assert that the allegations are barred by the four-year statute of limitations applicable to civil RICO actions. *In re Merrill Lynch Ltd. Partnership Litig., 7 F. Supp. 2d 256, 262 (S.D.N.Y. 1997)*.

Holdings does not contest that the alleged injury was suffered more than four years ago, but argues that the statute of limitations should be tolled either by equitable estoppel or by fraudulent concealment. Holdings asserts that it could not have learned of the falsification of affidavits until January 2002 [8] because (1) the nature of the fraud was self-concealing; (2) the volume of litigation fomented by Defendants made individualized investigation into the merits of each case an impossibility; and (3) Baron & Budd took active, aggressive, and effective steps to hinder

[7] The "fixing" allegations are distinguishable from the Baron & Budd Memorandum cases because of the time in which Holdings has had the requisite information. Holdings has known for years about the Baron & Budd memorandum, yet continues to plead unspecific allegations against Baron & Budd. By contrast, Holdings has only recently obtained the information regarding the alleged "fixing" and already has provided a more specific set of charges.

[8] Holdings learned of the specific instances of falsification on January 16, 2002, when a witness being interviewed under the auspices of Special Master Fitzpatrick provided the information. Nine days later, Holdings employed those allegations in its Second Amended Complaint.

GAF's investigation into Baron & Budd's ongoing fraud by, *inter alia,* seeking to interfere with GAF's ability to locate and interview former Baron & Budd employees.

[41]** The Second Circuit has held that ***HN9***[] the "standard tolling exceptions" apply to civil RICO actions. *Bankers Trust Co. v. Rhoades, 859 F.2d 1096, 1105 (2d Cir. 1988)*. "Under the doctrine of wrongful concealment, the statute of limitations will be tolled if the plaintiff proves three elements: (1) wrongful concealment by the defendant, (2) which prevented the plaintiff's discovery of the nature of the claim within the limitations period, and (3) due diligence in pursuing discovery of the claim." *Butala v. Agashiwala, 916 F. Supp. 314, 319 (S.D.N.Y. 1996)*; *see also* *State of New York v. Hendrickson Bros. Inc., 840 F.2d 1065, 1083 (2d Cir. 1988)*.

The Defendants first argue that Holdings' tolling claim fails as it lacks the specificity required by *Rule 9(b)*. *916 F. Supp. at 319-20*; *Glick v. Berk & Michaels, P.C., 1991 U.S. Dist. LEXIS 10347, 1991 WL 152614*, at *9-*10 (S.D.N.Y. July 26, 1991) (granting motion to dismiss for failure to allege equitable tolling on *Rule 9(b)* grounds). The third allegation, that the Defendants have somehow interfered with Holdings' ability to contact and interview employees was not pled with sufficient specificity. Holdings failed **[**42]** to allege what steps the Defendants took, when they took these steps, and which employees were the subject of these efforts. Without more information, the Defendants could not prepare a defense against that charge. In addition, the allegation that **[*541]** the nature of the fraud was self-concealing is insufficient by itself without more detail. However, the second reason is sufficiently specific: the deluge of litigation made it impossible to verify the merits of each and every case.

The Defendants also contend that Holdings has failed to allege the three elements of fraudulent concealment. They argue first that the first element of concealment [9] was lacking because the affidavits allegedly containing the misrepresentations were disclosed in connection with pending civil actions, and that "they were transmitted directly to GAF's agent." *G-I Holdings, 179 F. Supp. 2d at 261*. While this argument on the surface has appeal, it ignores the recurring theme of this case. The affidavits were transmitted directly to GAF's agent amidst a host of other, similar affidavits. The act of providing the allegedly falsified affidavits in such a manner constitutes "concealment" -- according **[**43]** to Holdings, the Defendants knew that it would be unlikely, and perhaps financially disastrous, for GAF or its agent to sift through all of the affidavits to determine their veracity.

The Defendants also challenge Holdings' showing of due diligence. ***HN11***[] A motion to dismiss on the basis on a plaintiff's failure to engage in due diligence cannot be granted unless the "undisputed facts" show a lack of reasonable diligence. *E.g., Nelson v. Stahl, 173 F. Supp. 2d 153, 166 (S.D.N.Y. 2001)* (rejecting defendants' argument that plaintiffs' claim was barred by statute of limitations because plaintiffs were on inquiry notice of the fraud "because the question of whether plaintiffs should have discovered fraud earlier than they did, and **[**44]** thus whether the action is timely, is a question for the trier of fact"); *Dietrich v. Bauer, 76 F. Supp. 2d 312, 346 (S.D.N.Y. 1999)* (whether plaintiff engaged in due diligence in pursuing claims could not be answered on motion to dismiss because pleading did not establish "undisputed facts" to show inquiry notice and a lack of reasonable diligence on plaintiff's part in discovering the fraud).

Defendants present two related arguments as to why the undisputed facts fall in their favor.

First, they argue that because GAF's agent, CCR, was actively involved in litigation in which the alleged fraudulent statements were made, Holdings could have pursued depositions, written interrogatories, and other similar tactics to ensure that the affidavits were correct. Holdings itself admits this fact. Compl. P 188 (pursuant to the Producer Agreement, CCR "investigated claims, tried cases, and negotiated settlements" on behalf of its members); Opp. Mot. to Dismiss at 34 ("Any individualized claim could perhaps be defended."). While this may be the case, the Defendants are not persuasive in arguing that the decision by CCR not to investigate each claim and try each case was a business **[**45]** decision that prevents any reasonable reliance as a matter of law on sworn affidavits filed "as a prerequisite to implementation of certain mass settlements." Compl. P 76. After making the decision to settle,

---

[9] ***HN10***[] With respect to this element, "there are two general varieties": the "defendant may have taken affirmative steps to prevent the discovery of the plaintiff's injury, or the nature of the wrong itself may have been self-concealing." *Butala, 916 F. Supp. at 319*.

there was no perceived need to determine the verity of each and every affidavit. In fact, to do so would obviate the rationale behind the mass settlements. Thus, the mere fact that GAF, through its agent, *could* have investigated each and every claim does not in the situation presented here mean that it was unreasonable **[*542]** in relying on the affidavits at issue.

The Defendants' final argument with regard to Holdings' due diligence is somewhat more persuasive. They argue, in essence, that a party to litigation can never reasonably rely on its adversaries' statements -- even if those statements are presented in sworn affidavits. Defendants, however, fail to cite any authority that holds that a party to litigation may not as a matter of law reasonably rely on deliberate untruths in a sworn affidavit.

The closest case cited by Defendants is *DeLorean v. Cork Gully, 118 B.R. 932, 943 (E.D. Mich. 1990)*, in which the court stated that a party could not justifiably rely **[**46]** on a proposed affidavit, provided by the defendants with an introductory cover letter that clearly put the party on notice that facts in the affidavit needed to be confirmed as true. There was no such introductory cover letter here that would have put GAF on notice, and the affidavits were signed, rather than merely proposed. The other cases cited do not involve sworn affidavits, but rather (1) the advice of adversaries, *id.; Kregos v. Associated Press, 3 F.3d 656, 665 (2d Cir. 1993)* (stating it was "unreasonable for one to rely on the advice of an adversary's counsel . . . when both parties are aware that adverse interests are being pursued"); (2) omissions of fact, *Phoenix Canada Oil Co. v. Texaco Inc., 749 F. Supp. 525, 530 (S.D.N.Y. 1990)* (stating that a party's neglect to inform its adversary "of a fact which may or may not have been useful . . . in fashioning a response to [a] . . . defense" cannot be the basis of a party's reasonable reliance claims); and (3) non-egregious adversarial conduct, *Lazich v. Vittoria & Parker, 189 A.D.2d 753, 754, 592 N.Y.S.2d 418, 419* (2d Dep't 1993) (finding, in divorce case, that "all the statements **[**47]** and actions complained of were undertaken in the course of adversarial proceedings and were fully controverted").

In the absence of authority to the contrary, to hold that a party cannot as a matter of law rely on a sworn affidavit goes too far.

In certain fact-specific circumstances, of course, even sworn affidavits may not as a matter of law be reasonably relied upon. *DeLorean* presents one such exception. Another was presented in *Shaw Steel Inc. v. Morris, 240 B.R. 553, 555 (Bankr. N.D. Ill. 1999)*, where the court was faced with the question of whether a creditor's reliance on the misrepresentations of a debtor (a self-proclaimed "liar," "scoundrel," and "fraudster") regarding his financial condition was justifiable. Shaw Steel argued that it relied on the defendant's misrepresentations because they were in affidavits submitted under oath as part of the resolution of disputed litigation. *Id. at 558*. The court rejected this claim: "Shaw Steel does not cite to any case law standing for the proposition that a party may reasonably rely upon the affidavit of a known liar and cheat which, on its own admission, it distrusted, did not know to be true, **[**48]** and would not accept ("Not on your life.") without further investigation." *Id.; see also Friedgood v. Axelrod, 593 F. Supp. 395*, (S.D.N.Y. 1984) (despite numerous inconsistencies in client's affidavit, attorney could reasonably rely on affidavit when it was supported by other sworn statements).

The exceptions here prove the rule. ***HN12***[] In the absence of some "red flag," such as an introductory letter to that effect or the fact that the affiant is a known "scoundrel," whether a party may reasonably rely on sworn affidavits presents a factual issue that cannot be determined at this stage of the proceedings.

The undisputed facts here do not present such an exception to the rule. The affidavits were not proffered during the **[*543]** give-and-take of ongoing litigation, but in connection with settlement, as conditions precedent to the obligation of CCR (as GAF's agent) to fund the settlement. As discussed above, any attempt to conduct inquiries into the affidavits would defeat the purpose of settling, which was to staunch the ongoing defense expenditures. Furthermore, there is no evidence that GAF believed at the time CCR received the affidavits that the Defendants were liars and/or **[**49]** scoundrels.

For these reasons, it is inappropriate to dismiss the mail and wire fraud claim on the basis of whether Holdings acted reasonably in not verifying the accuracy of the affidavits prior to settling the cases. Therefore, Holdings has alleged predicate acts, and the claims will not be dismissed on this ground.

2. *Pattern of Racketeering Activity*

HN13[] Holdings must allege a "pattern of racketeering activity" consisting of "at least two acts of racketeering activity" undertaken within ten years of each other. *18 U.S.C. § 1961(5)*. The pattern element of a RICO claim requires a showing of "continuity" plus "relationship." *Sedima S.P.R.L. v. Imrex Co., 473 U.S. 479, 496 n. 14, 87 L. Ed. 2d 346, 105 S. Ct. 3275 (1985)* (quoting S.Rep. No. 91-617, p. 158 (1969)). The Defendants do not challenge the "relationship" aspect on this motion.

In *H.J. Inc. v. Northwestern Bell Tel. Co., 492 U.S. 229, 106 L. Ed. 2d 195, 109 S. Ct. 2893 (1989)*, the Supreme Court defined the "continuity" element as follows:

> ***HN14***[] Continuity is both a closed- and open-ended concept, referring either to a closed period of repeated conduct, or **[**50]** to past conduct that by its nature projects into the future with a threat of repetition. It is, in either case, centrally a temporal concept… . A party alleging a RICO violation may demonstrate continuity over a closed period by proving a series of related predicates extending over a substantial period of time. Predicate acts extending over a few weeks or months and threatening no future criminal conduct do not satisfy this requirement: Congress was concerned in RICO with long-term criminal conduct. Often a RICO action will be brought before the continuity can be established in this way. In such cases, liability depends on whether the *threat* of continuity is demonstrated.

Id. at 241-42. Later cases have further developed the concepts of closed- and open-ended continuity.

a. *Closed-Ended Continuity*

HN15[] In order to measure whether closed-ended continuity exists, the Second Circuit has stated that several factors may be considered, including, *inter alia:* "the length of time over which the alleged predicate acts took place, the number and variety of acts, the number of participants, the number of victims, and the presence of separate schemes. **[**51]** " *GICC Capital Corp. v. Technology Fin. Group, Inc., 67 F.3d 463, 467 (2d Cir. 1995)* (citations omitted).

The length of time over which predicate acts occurred is an important factor and appears to be dispositive if the period of time is not sufficiently long. The Second Circuit has thus far only found closed-ended continuity where the conduct lasted for two years or more. *De Falco v. Bernas, 244 F.3d 286, 321 (2d Cir. 2001)*; *see also* *GICC, 67 F.3d at 467* (*citing* *Jacobson v. Cooper, 882 F.2d 717 (2d Cir. 1989)* (predicate acts occurred over "a matter of years" from 1980 to 1988); *Metromedia v. Fugazy, 983 F.2d 350 (2d Cir. 1992)* (upholding RICO verdict, despite erroneous jury instruction that "a few weeks or months" might constitute a substantial period **[*544]** of time, because predicate acts occurred over two years); *Procter & Gamble Co. v. Big Apple Indus. Bldgs. Inc., 879 F.2d 10, 18 (2d Cir. 1989)* (concluding, prior to *H.J.,* that allegations of predicate acts occurring over "period of nearly two years" as part of five-part fraudulent scheme were sufficient to plead pattern of racketeering **[**52]** activity)). [10]

HN16[] The duration of a pattern of racketeering activity is measured by the RICO predicate acts the defendants commit. *De Falco, 244 F.3d at 321*. The only predicate acts at issue here are the alleged falsification of affidavits in December 1995. The last of the 190 cases alleged to be involved in this scheme was settled in June 1996. As a result, the period of time over which the predicate acts took place is at most seven months. Closed-ended continuity cannot exist over such an abbreviated period of time. Therefore, Holdings must establish open-ended continuity.

b. *Open-Ended Continuity*

---

[10] Holdings suggests that the Second Circuit found closed-ended continuity based on a pattern of predicate acts occurring over a period of one year in *Azrielli v. Cohen Law Offices, 21 F.3d 512, 520-21 (2d Cir. 1994)*. However, the Second Circuit in *GICC* cited *Azirelli* as a case in which open-ended continuity had been found. *67 F.3d at 466*.

HN17[] Unlike closed-ended **[**53]** continuity, open-ended continuity "does not require a substantial temporal showing." *Jordan (Bermuda) Inv. Co. v. Hunter Green Inv. Ltd., 154 F. Supp. 2d 682, 694 (S.D.N.Y. 2001)* (*citing Cofacredit, S.A. v. Windsor Plumbing Supply Co., 187 F.3d 229, 242 (2d Cir. 1999)*). Rather, it "requires a plaintiff to show a threat of on-going criminal activity beyond the period in which the predicate acts were committed." *Id.*

"In this Circuit, 'cases assessing whether a threat of continuity exists have looked first to the nature of the predicate acts alleged or to the nature of the enterprise at whose behest the predicate acts were performed.'" *DeFalco, 244 F.3d at 323* (*citing GICC, 67 F.3d at 466* (collecting cases)). Where, as here, the alleged enterprise "primarily conducts a legitimate business, there must be some evidence from which it may be inferred that the predicate acts were the regular way of operating business, or that the nature of the predicate acts themselves implies a threat of continued criminal activity." *Cofacredit, 187 F.3d at 243*; *see also H.J., 492 U.S. at 242-43* (finding **[**54]** threat where it can be demonstrated that predicate acts are "a regular way of conducting defendant's ongoing legitimate business . . . or of conducting or participating in an ongoing and legitimate RICO 'enterprise.'").

The nature of the predicate acts at issue imply a threat of on-going criminal activity. According to Holdings, unnamed paralegals were told to "fix" affidavits by a supervisor in order to meet a looming deadline, and they "fixed" them without the assistance or permission of the affiants. First, the alleged "fixing" involved 200 affidavits, rather than merely one or two or even a handful of affidavits. The sheer scope of the predicate acts ratchets up the seriousness and suggests a future threat. Second, a supervisor gave the instruction to "fix" the affidavits, suggesting that it was not merely the independent actions of paralegals who, in the future, may be advised to act differently. Instead, the management was involved. Finally, although perhaps the situation of finding 200 incomplete affidavits on the eve of their due date was quite extreme, the legal profession is in general inundated with deadlines. Further, the sort of asbestos litigation performed by Baron **[**55]** & **[*545]** Budd involves, conservatively, hundreds of clients and thousands of documents. Another group of paralegals almost inevitably has been and will be faced with a similar situation, even if not of the same magnitude. Given the factors discussed above, there is a threat that the affidavits again will be "fixed."

In addition, Holdings alleges that these predicate acts were performed as part of Baron & Budd's regular course of business. The Baron & Budd Defendants' regular course of business is the practice of law, and, in particular, the representation of individuals who claim to have been harmed by toxic substances, including asbestos. *See* *www.baronandbudd.com/About* (last visited June 26, 2002). As discussed above, mass tort litigation spawns numerous documents and requires that they be filed by certain deadlines. Certainly, Baron & Budd must very often take and file the affidavits of its clients as part of the regular course of business. Holdings also alleges that the falsification of the affidavits were part of a larger scheme that was part of Baron & Budd's regular course of business. Holdings alleges that the Baron & Budd defendants falsified claims forms filed by the Baron & **[**56]** Budd bankruptcy department, implemented and used firm policies to encourage false testimony, and intentionally gathered false testimony to support personal injury claims against former asbestos manufacturers. Taking these allegations as a whole, Holdings has sufficiently alleged for the purposes of this motion that there was open-ended continuity as the predicate acts were part of Baron & Budd's regular course of business.

The Defendants argue, however, the scheme is "inherently terminable" and thus cannot constitute open-ended continuity. *GICC, 67 F.3d at 466*; *see also First Capital Asset Mgmt., Inc. v. Brickelbush, 150 F. Supp. 2d 624, 634 (S.D.N.Y. 2001)* ("The scheme here is 'inherently terminable' in that it necessarily ended with the bankruptcy to which it was related."). The Defendants point to the bankruptcy of asbestos manufacturers, including GAF, as the inevitable terminus of the scheme. Compl. P 3 ("This avalanche of asbestos lawsuits . . . has driven more than two dozen once prosperous companies into bankruptcy including, just since the beginning of 2000, such major companies as Owens Corning, The Babcock & Wilcox Company, Armstrong World **[**57]** Industries, Pittsburgh Corning Corporation, and W.R. Grace & Co.").

The scheme is not inherently terminable, however, as asbestos litigation continues to this day. *E.g., In re Asbestos Litigation, 2002 R.I. Super. LEXIS 89, 2002 WL 1378959* (R.I. Super. Jun 20, 2002); *see also* N.Y.L.J., Verdicts and Settlements (July 1, 2002) (reporting on jury verdicts in asbestos-injury case in New York Supreme Court on May 31, 2002); Patti Bond, Asbestos Verdict vs. G-P Upheld, Atlanta J. & Atlanta Const. at D.1, 2002 WL 3725935 (June 12, 2002) (noting that a Maryland appeals court had upheld $ 9 million verdict against Georgia-Pacific and that company stated that the award "will not affect its ability to defend the other cases); Nat'l L.J., $ 5.6 Million in Punitives Was Awarded to Smoker, at B2 col. 1 (June 10, 2002) (reporting on jury verdict in asbestos-related case). In addition, the past behavior of plaintiffs' attorneys in asbestos cases is instructive. After the first major bankruptcy of a asbestos manufacturer in 1981, "plaintiffs' attorneys began looking for anyone else who was culpable." Next Wave of Asbestos Filings Will Stretch on as Companies Buckle Under Weight, 39 No. 15 Bankr. Ct. Dec. (LRP) 1 **[**58]** (June 18, 2002). There is good reason to assume that the more recent filings similarly will not deter the effort to prosecute asbestos claims. *Id.* In **[*546]** any case, to suggest that the scheme is "inherently terminable" because at some point in the future the Defendants will no longer be able to descry potential asbestos-injury defendants because they will have financially ruined all their other prospects is too tenuous -- and fantastical -- an argument to succeed at this stage.

Holdings therefore has pled open-ended continuity.

3. *Existence of a RICO Enterprise*

HN18[] In order to satisfy *section 1962(c)*'s requirement, a plaintiff must plead each defendant's participation in the "operation or management" of an "enterprise" as those terms are defined for the purposes of the statute. *Dietrich v. Bauer, 76 F. Supp. 2d 312, 347 (S.D.N.Y. 1999)* (*citing* *Reves v. Ernst & Young, 507 U.S. 170, 183, 122 L. Ed. 2d 525, 113 S. Ct. 1163 (1993))*. An enterprise within the meaning of RICO requires an "association in fact" between or among individuals and entities. *18 U.S.C. § 1961(4)*; *see also* *Kashelkar v. Rubin & Rothman, 97 F. Supp. 2d 383, 391* **[**59]** (S.D.N.Y.) ("To plead an enterprise, plaintiff must allege facts showing a group of persons associated together for a common purpose, which is proved by evidence of an ongoing organization . . . and by evidence that the various associates function as a continuing unit." (internal quotation marks omitted), *aff'd 242 F.3d 365 (2d Cir. 2001)*.

Because *§ 1962(c)* speaks separately of a RICO "person" acting on or conducting the affairs of the "enterprise," which clearly envisions two entities, *Bennett v. United States Trust Co., 770 F.2d 308, 315 (2d Cir. 1985)*, a plaintiff must also comply with the rule that the RICO "person and enterprise referred to must be distinct." *Riverwoods Chappaqua Corp. v. Shapiro, 30 F.3d 339, 344 (2d Cir. 1994)*.

a. *Count V*

The sole defendant in Count V is the law firm Baron & Budd. It is charged with conducting the "Baron & Budd Association-in-Fact Enterprise" (the "B&B Enterprise") through a pattern of racketeering activity consisting of acts of mail and wire fraud related to the falsification of evidence in asbestos cases and the carrying out of the extortionate threats during 1999 and 2000 **[**60]** through the filing and instigation of fraudulent asbestos actions against Holdings.

The B&B Enterprise is defined as an "association in fact of Baron & Budd, its various local counsel, various doctors and/or various unions." TAC P 203. Holdings has alleged that the law firm Baron & Budd is part of, but smaller than, an ongoing existing enterprise that includes other law firms, trade unions, and doctors. Further, it alleges that each of the participants in that enterprise has a specific role: the trade unions locate plaintiffs; Baron & Budd and the doctors manufacture evidence; and local counsel process cases through courts around the country. Holdings further alleges that this collection operates under the overall direction of Baron & Budd.

The Defendants suggest that the local counsel, unions and doctors are merely agents of the Defendants and thus fail the distinctiveness requirement.

Under Second Circuit case law prior to *Cedric Kushner Promotions Ltd. v. King, 533 U.S. 158, 150 L. Ed. 2d 198, 121 S. Ct. 2087 (2001)*, it is clear that if the additional entities are merely agents acting within the scope of their employment, there cannot be an enterprise. **[**61]** *E.g.* *Riverwoods, 30 F.3d at 344-45*. Holdings suggests that

[*547] *Cedric Kushner* has stretched this rule. [11] There is no need to determine this unsettled issue because, taking the facts in the light most helpful to Holdings, the Complaint fits under the *Riverwoods* rubric. Even if the local counsel, unions and doctors are Baron & Budd's agents -- which Holdings contests -- they were not acting within the scope of the agency. Viewing Holdings' complaint under the applicable standard, the allegations of Holdings' RICO claim can fairly be read to allege that Baron & Budd and its agents went beyond conducting the normal affairs of Baron & Budd, and were acting on behalf of the enterprise with the goal of encouraging large settlements from GAF and others for their own benefit through the device of the enterprise.

[62] b. *Count VI***

Count VI alleges the same wrongdoing against individual defendants Baron and Budd. Messrs. Baron and Budd are the "persons." Holdings alleges two enterprises: the B&B Enterprise, discussed above, and the law firm itself.

This situation falls squarely under the rule of *Cedric Kushner.* In *Cedric Kushner,* the Supreme Court upheld a RICO claim against fight promoter Don King, who as the "person" was alleged to have conducted an "enterprise" consisting of a corporation in which he was the sole shareholder. *533 U.S. at 166*. The Court held that ***HN19***[] "the corporate owner/employee, a natural person, is distinct from the corporation itself, a legally different entity with different rights and responsibilities due to its legal status. And we can find nothing in the statute that requires more 'separateness' than that." *Id. at 163*.

Similarly, Fred Baron and Russell Budd, as named partners and members of the law firm of Baron & Budd, are separate and distinct legal entities from the law firm they control, and which in turn purportedly controls the B&B Enterprise.

Defendants also argue that Holdings has failed to allege how Messrs. Baron **[**63]** and Budd participated in or oversaw the underlying actions which constitute the mail and wire fraud claims. The complaint, however, does allege that the individual defendants were responsible for implementing and maintaining the policies at Baron & Budd and for supervising the law firm's attorneys and personnel. Compl. PP 230, 232. Further, the Complaint states that Messrs. Baron and Budd caused the employees of the law firm and the members of the B&B Enterprise to target GAF, decline to settle cases with GAF, and focus the on-going subornation of perjury through bogus identifications of Calsilite. At the very least, the last allegation regarding bogus identifications of Calsilite covers the specific predicate acts alleged and permits the claim to survive this motion to dismiss on this ground.

4. *Holdings Has Standing*

Defendants challenge Holdings' standing, alleging that it has not alleged reasonable reliance and proximate cause.

[*548] a. *Reasonable Reliance*

HN20[] As part of a fraud-based RICO complaint, plaintiff must plead detrimental and justifiable reliance on defendant's misrepresentations. *Metromedia, 983 F.2d at 368* ("In the context of an alleged **[**64]** RICO predicate act of mail fraud, we have stated that to establish the required causal connection, the plaintiff was required to demonstrate that the defendant's misrepresentations were relied on." (*citing* *County of Suffolk v. Long Island Lighting Co., 907 F.2d 1295, 1311 (2d Cir. 1990))*.

[11] *E.g.* *Wiwa v. Royal Dutch Petroleum Co., 2002 U.S. Dist. LEXIS 3293, 2002 WL 319887*, at *23 (S.D.N.Y. Feb. 28, 2002) ("Although some authority weighs against recognizing an 'enterprise' that is comprised of a corporation and its agents or subsidiaries, recent Supreme Court case law suggests that the 'distinctiveness' requirement imposed by *Section 1962(c)* is not as rigid as prior circuit precedent suggests."); *see also* *Chen v. Mayflower Transit, Inc., 159 F. Supp. 2d 1112, 1114-15 (N.D.Ill. 2001)* (*citing Cedric Kushner* for the proposition that the formal legal distinction created by incorporation is sufficient for the RICO statute and holding plaintiff pleaded RICO enterprise comprising common carrier corporation and its local agents).

Defendants allege that Holdings has failed to allege reasonable reliance on the allegedly false affidavits because (1) GAF could not reasonably rely on the sworn affidavits, and (2) Holdings fails to allege a number of specific things about the affidavits it purportedly received from Baron & Budd.

The former argument has been rejected above. Further, Defendants fail to present case law that supports the latter point, which appears to rehash their *Rule 9(b)* arguments. [12] For the reasons discussed in greater length in Part I.C., Holdings has satisfied *Rule 9(b)* for the purposes of a motion to dismiss and, in the absence of any case law requiring a separate showing of specificity for the purposes of demonstrating standing, the motion to dismiss on this ground is denied.

[65] b. *Proximate Cause***

Defendants also allege that Holdings has failed to allege proximate cause. [13]

HN21[] RICO grants standing to sue to "any person injured in his business or property by reason of a violation of *section 1962* of this chapter." *18 U.S.C. § 1964(c)*. This language limits standing to plaintiffs whose injuries were both factually and proximately caused by the alleged RICO violation. *Laborers Local 17 Health and Benefit Fund v. Philip Morris, Inc., 191 F.3d 229, 234 (2d Cir. 1999)* (*citing Holmes v. Securities Investor Protection Corp., 503 U.S. 258, 268, 117 L. Ed. 2d 532, 112 S. Ct. 1311 (1992))*. While the term "proximate cause" is utilized, the Second Circuit **[**66]** has made clear that liability under statutes such as RICO does not "depend on whether there is proximate causation as that term is used at common law." *Abrahams v. Young & Rubicam Inc., 79 F.3d 234, 237 (2d Cir. 1996)*. Instead, the question is whether the plaintiff was "in the category the statute meant to protect," and whether "the harm that occurred [was] the 'mischief' the statute sought to avoid." *Id.; see also BCCI Holdings (Luxembourg), Societe Anonyme v. Pharaon,* ***[*549]*** *43 F. Supp. 2d 359, 365 (S.D.N.Y. 1999)*. Thus, to have standing, plaintiffs must show that they were "the intended targets of the RICO violations" and that any alleged RICO injury must have been the "preconceived purpose" of the RICO activities. *In re American Express Co. Shareholder Litig., 39 F.3d 395, 400 (2d Cir. 1994)* (*citing Sperber v. Boesky, 849 F.2d 60, 64-65 (2d Cir. 1988))*.

Holdings has alleged that GAF was an intended target of the RICO violations. Further, it has alleged that the injury it purportedly suffered -- the payment of higher settlements (and the Defendants' concomitant receipt of more generous legal fees) -- was the preconceived **[**67]** purpose of the violations. This is sufficient to allege standing.

The Defendants' motion to dismiss Counts V and VI is denied.

D. *Count VII: RICO Witness Tampering Claim Is Dismissed*

Holdings has reasserted its former Count VI concerning witness tampering allegations as Count VII for the sole purpose of clarifying the reason for dismissal. In the First Amended Complaint, Holdings alleged that all the Defendants violated the witness tampering statute, *18 U.S.C. § 1512*, in that they attempted to and did use intimidation to corruptly persuade former asbestos producers not to testify before Congress regarding the Fairness

[12] Defendants first cite to *G-I Holdings, 179 F. Supp. 2d at 262*, which did not even discuss the specific allegations of "fixed" affidavits as those allegations were not part of the FAC. Further, the cited section addresses the requirements of *Rule 9(b)*. Defendants cite only one other case for this proposition in their Reply Memorandum, but the portion cited similarly involves a discussion of *Rule 9(b)*. *Associated Wrecking, Inc. v. Local 95 Pension Fund,* 1994 U.S. Dist. LEXIS 3952, 1994 WL 118987, at *5 (S.D.N.Y. March 31, 1994) (dismissing RICO mail and wire fraud claims for, *inter alia,* failure to allege specific times and places that documents were sent). In their Memorandum, Defendants also quoted *Grumman Allied Indus. v. Rohr Indus., 748 F.2d 729, 737-38 (2d Cir. 1984)*, which deals generally with reliance and not with the fact specific situation here. *Id.* ("Where sophisticated businessmen engaged in major transactions enjoy access to critical information but fail to take advantage of that access, New York courts are particularly disinclined to entertain claims of justifiable reliance."

[13] The Defendants appear to concede this argument in their reply memorandum and focus instead on the reliance argument. Defs.' Reply Mem. at 25 ("Proximate Cause Cannot Substitute for the Reliance Requirements"). Because they did not expressly do so, it nevertheless will be discussed.

in Asbestos Compensation Act ("FACA"). That count was dismissed as to the Georgia Pacific allegations on several bases. *179 F. Supp. 2d at 265-67*.

Count VII of the Third Amended Complaint now asserts witness tampering predicate acts other than those related to Georgia Pacific. Holdings acknowledges that it cannot distinguish the facts alleged as to the non-Georgia Pacific witnesses from those alleged and dismissed as to Georgia Pacific. However, it claims to have addressed and satisfied one of the shortcomings found above, **[**68]** that Holdings had not sufficiently alleged that the witnesses were in fact expected to testify before Congress. 179 F. Supp. 2d at 265.

It was earlier held that "at a minimum, Holdings would need to allege an intent to induce someone not to testify or to testify falsely at an actual official proceeding." *Id. at 265*. Holdings has amended its pleading to allege specifically that Defendants intended to prevent GAF, Heyman, and other members of the Coalition for Asbestos Resolution from testifying before Congress in support of FACA, or to cause their testimony to be less favorable to Defendants. The Complaint alleges:

> "265. As described above, upon information and belief, defendants attempted to and did use intimidation, threatened, and corruptly persuaded former asbestos producers with the intent to prevent their testimony before Congress and to cause them to withhold their testimony from Congress, in violation of *18 U.S.C. § 1512(b)*.
>
> > (a) With respect to GAF and Mr. Heyman, defendants had actual knowledge that Mr. Heyman was expected to be a witness in Congressional hearings on FACA, as indeed he was. The conduct alleged **[**69]** above was undertaken with the specific intent of causing Mr. Heyman not to appear or, if he did appear, to moderate his testimony to be less unfavorable to defendants.
> >
> > (b) With respect to the other former asbestos manufacturers, defendants actually and correctly believed that some of their number would be called (or would voluntarily appear) as witnesses in those hearings. The conduct alleged above was undertaken with the specific intent of causing **[*550]** these individuals not to appear or, if they did appear, to moderate their testimony to be less favorable to defendants.

Complaint, P 265.

These allegations are sufficient to allege an intent to induce someone not to testify or to testify falsely at an actual official proceeding. However, as Holdings acknowledges, Count VII is dismissed for the other reasons identified in the earlier opinion. The Defendants' motion to dismiss Count VII is granted.

E. *Count XI: Holdings Again Has Failed to Distinguish Its Fraudulent Inducement and Breach of Contract Claims*

For its breach of contract claim, Holdings alleges that defendants Weitz & Luxenberg and Ness Motley each breached the Futures Agreement by "failing to recommend **[**70]** to its non-sick clients that they defer filing asbestos claims until they met the medical criteria set forth" in those Futures Agreements. Compl. P 289, 299. For its fraudulent inducement claim, Holdings alleges that it was fraudulently induced to make a $ 200 million payment in a transaction that was separate and apart from the parties' obligations under the Futures Agreements. *Id. at PP 306-09*.

As noted in the earlier opinion, ***HN22***[] to sustain a claim for fraudulent inducement alongside a claim for breach of contract under New York law, one must plead any one of the following: (i) a legal duty separate from the duty to perform under the contract; (ii) a fraudulent misrepresentation collateral or extraneous to the contract; or (iii) special damages that are caused by the misrepresentation and unrecoverable as contract damages. *G-I Holdings, 179 F. Supp. 2d at 269* (*citing* *Blank v. Baronowski, 959 F. Supp. 172, 180 (S.D.N.Y. 1997)* (*citing* *Bridgestone/Firestone, Inc. v. Recovery Credit Services, Inc., 98 F.3d 13, 20 (2d Cir. 1996))*).

As a result, Holding's fraudulent inducement claim was dismissed previously as indistinguishable **[**71]** from its breach of contract claims:

> Holdings contends the fraudulent inducement claim is based on a $ 200 million payment plaintiff made toward a $ 750 million settlement of certain asbestos claims in reliance on the Defendants' representations that they would perform under the Futures Agreement. The Futures Agreement itself is alleged to consist of CCR agreeing to toll the statute of limitations on numerous asbestos claims in exchange for a promise that, subject to the exercise of their professional judgment, Defendants Weitz & Luxenberg and Ness Motley would recommend to their non-sick clients that they seriously consider deferral of their claims. However, P 138 of the Complaint states that "the consideration for the Futures Agreements included CCR's agreement to settle some 50,000 pending asbestos cases for approximately $ 750 million." This allegation belies Holdings' contention that the settlement was an independent agreement and represents damages not recoverable in contract.
>
> The claim apparently is that the partial settlement payment was made in reliance on the representation that the Futures Agreements would be complied with. Though Holdings contends this agreement is **[**72]** extraneous to the contract, and that damages arising therefrom could not be recovered in contract, the claim is not sufficiently distinguishable from the underlying contract claim. A viable fraudulent misrepresentation claim requires that the misrepresentation pertain to facts that are "collateral or extraneous" to the contract, … not **[*551]** that the plaintiff participated in a separate "event" based on statements contained in the contract, as plaintiff currently asserts.

Id.

In response to the opinion, Holdings has altered former Paragraph 138 [14] to state:

> Ness Motley, Weitz & Luxenberg and the Affiliated Law Firms used the Futures Agreements and their explicit and implicit (but false and fraudulent) promises to perform thereunder to induce CCR's agreement to settle some 50,000 pending asbestos cases for approximately $ 750 million [of which GAF contributed approximately $ 200 million].

Compl. P 162.

[73]** Holdings has failed to cure the defect identified in the earlier holding. It still does not allege that an independent agreement existed. By its statement that Defendants somehow "used" the Futures Agreements and the promises to perform them to "induce" the settlement, Holdings alleges again that the Futures Agreements promises were the very inducement that led to the settlement. This raises the same problem found in the First Amended Complaint: "the claim apparently is that the partial settlement payment was made in reliance on the representation that the Futures Agreements would be complied with." *179 F. Supp. 2d at 269*.

Because Holdings has not altered the failing identified in the earlier opinion, the Defendants' motion to dismiss Count XI is granted.

F. *Count XII States a Common Law Fraud Claim Against Baron & Budd*

Count XII is premised on the same allegations that form the basis of the existing RICO mail and wire fraud count and is alleged only against defendant law firm Baron & Budd. Holdings essentially alleges that Baron & Budd paralegals, at the behest of a supervisor, "fixed" approximately 200 affidavits by filling in missing information without seeking client approval **[**74]** or assistance. GAF then relied on these falsified affidavits in settling the cases.

HN23[] To plead a claim of fraud under New York law, plaintiffs must allege five elements: (1) misrepresentation of a material fact; (2) the falsity of that representation; (3) scienter, or intent to defraud; (4) reasonable reliance on that representation; and (5) damage caused by such reliance. *May Dep't Stores v. Int'l Leasing Corp., 1 F.3d 138, 141 (2d Cir. 1993)*.

---

[14] Former Paragraph 138 stated in pertinent part: "The consideration for the Futures Agreements included CCR's agreement to settle some 50,000 pending asbestos cases for approximately $ 750 million."

Baron & Budd argues that Count XII should be dismissed because it fails to meet specificity requirements, does not allege justifiable reliance, and is improperly based on information and belief. The first two allegations have already been discussed and rejected, *supra.*

As for the third, **HN24**[] fraud pleadings generally cannot be based on information and belief. *Stern v. Leucadia Nat'l Corp., 844 F.2d 997, 1003 (2d Cir. 1988)*. However, fraud allegations may be so pleaded as to facts peculiarly within the opposing party's knowledge. *Id.* (citations omitted). Even then, the allegations must be accompanied by a statement of facts upon which the belief is founded, *id.,* and this rule "must not be mistaken for **[**75]** license to base claims of fraud on speculation and conclusory allegations." *Wexner v. First Manhattan Co., 902 F.2d 169, 172 (2d Cir. 1990)* ("Where pleading is permitted on information and belief, a complaint must adduce **[*552]** specific facts supporting a strong inference of fraud or it will not satisfy even a relaxed pleading standard.").

Baron & Budd challenges the sufficiency of Holdings' claim that "on information and belief," the "200 or so" false affidavits resulting from the paralegals' "fixing" "is contained within the set of 190 cases listed in Exhibit D." Compl. P 90.

Which of the 190 cases -- if any -- contain the allegedly falsified information is, at this moment, peculiarly within the opposing party's knowledge. Holdings' discovery of the falsifications is relatively recent, and it has been unable to engage in the sort of discovery that would make this allegation more clear. Moreover, Holdings has provided a statement of facts elucidating how it came to the conclusion that at least some of these 190 cases contained falsified affidavits. Therefore, at this stage of the pleading, pleading this aspect of the claim on information and belief is sufficient.

Therefore, **[**76]** Baron & Budd's motion to dismiss Count XII is denied.

G. *Count XIII: Claim of Common Law Fraud Against Weitz & Luxenberg Fails to State a Claim with Specificity*

In Count XIII, Holdings asserts that Weitz & Luxenberg "backdated documents filed in asbestos personal injury cases and . . . tampered with and falsified records of the Supreme Court of the State of New York." Compl. P 97. Specifically, Holdings contends that in approximately May 2000, in an unidentified case that was then pending in Supreme Court, New York County, Weitz & Luxenberg realized that it had failed to amend a complaint in a timely fashion, and thus drafted a backdated complaint. *Id. PP 98, 101*. Then, Weitz & Luxenberg enlisted the aid of a court employee related to Weitz & Luxenberg paralegals who stamped the amended complaint with an earlier date and placed a false entry into the court's log book so that it appeared as if the complaint had been filed prior to the expiration of the limitations period. *Id. PP 101-02, 104-05*. Holdings also alleges that this backdating was not an "isolated incident" and that it occurred in other unnamed cases. *Id. P 106*.

Holdings has failed to satisfy *Rule **[**77]** 9(b)*'s requirements with these allegations. Holdings alleges a particular incident of backdating in May 2000 and generally alleges "other occasions" in which the same occurred. Holdings does not appear to challenge that the allegations regarding "other occasions" lack sufficient specificity, [15] but does argue that it has met the requirements of *Rule 9(b)* with regard to the May 2000 incident in that it has alleged (1) the statements that were fraudulent (the false filing date); (2) identified the speaker (Weitz & Luxenberg); (3) where and when the statement was made (at the New York Supreme Court, 60 Centre Street, New York, New York in mid-May 2000); and (4) why the statement was fraudulent (the "filed" stamp did not reflect the true date on which it was filed with the court). *Mills v. Polar Molecular Corp., 12 F.3d 1170, 1175 (2d Cir. 1993)*.

[78]** Yet the Complaint fails to identify, *inter alia:* (1) any of the cases (or even group of cases) in which Weitz & Luxenberg purportedly backdated the amended complaints; (2) the claimant in the case; (3) the asbestos manufacturers in the case; **[*553]** and (4) when the statute of limitations began to run or expired.

---

[15] Such defense would be fruitless. Holdings fails to allege even a time frame for these "other occasions" much less the other more specific information that Holdings also fails to allege with regard to the alleged May incident.

Holdings acknowledges that the identity of the specific case in which this backdating occurred is missing, but states that the information is "particularly within the defendants' control and awaits discovery to obtain the necessary physical evidence." Pl.'s Mem. at 56. This information is not particularly within Weitz & Luxenberg's control, as Holdings was able to obtain at least partial information from an interview with an unnamed source. In any case, Holdings should be able to identify at least a group of cases [16] -- if not the actual case itself -- based on New York Civil Practice Law and Rules.

[79]** ***HN25***[] Pursuant to *C.P.L.R. Section 306-b*, a complaint must be served within 120 days of its filing. [17] **[**80]** Therefore, the "backdated" amended complaint could not have been backdated to a date more than 120 days prior to mid-May (because it then would not have been timely served) [18] and yet must have been served after mid-May (when the backdating allegedly occurred). As a result, Holdings has several distinguishing characteristics: the document is an amended complaint where Weitz & Luxenberg served as plaintiffs' counsel, and it should have been served on GAF less than 120 days after mid-May 2000, with a filed date of less than 120 days prior to mid-May 2000. Given these characteristics, Holdings should have delimited the universe of cases to ones meeting these criteria.

The identity of the backdated complaint involved is important because Holdings must do more than conclusorily allege that GAF was a defendant in that complaint [19] and so "incurred expenses in defending" it. Compl. P 316.

The allegations further do not satisfy two of the concerns behind *Rule 9(b)*: (1) to provide defendants with fair notice of the claims against them so that they may prepare a defense; and (2) to protect defendants from harm to their reputations **[**81]** and good will by unfounded allegations of fraud. *DiVittorio, 822 F.2d at 1247*. Holdings finally suggests that its allegations satisfy the first concern, relying on statements from a Weitz & Luxenberg spokesman in response to these allegations. Mark Hamblett, Weitz & Luxenberg Responds to Charges It Falsified Documents, N.Y.L.J., April 12, 2002, at 1; Mark Hamblett, Weitz & Luxenberg Accused of Falsifying Documents, N.Y.L.J., March 20, 2002, at 1. However, this argument is disingenuous as Weitz & Luxenberg's general denials in the legal press cited above are not the type of defense contemplated by *Rule 9(b)*.

[*554] Weitz & Luxenberg's motion to dismiss Count XIII is therefore granted, but leave to replead is permitted for this claim alone. As discussed below, Holdings at oral argument stated that it did not seek leave to replead its complaint after this iteration. Nonetheless, this is the first time Holdings has pressed this claim. Further, if Holdings can identify the amended complaint that was backdated -- or at least a group of potential cases -- and can otherwise add greater specificity to the allegations, then Holdings may have a viable claim and should have the opportunity **[**82]** to replead it.

H. *Leave to Replead Is Denied Except as to Count XIII*

---

[16] For instance, it was sufficient at this stage of the proceedings for Holdings in Count XII to identify a group of cases that likely contained the falsified affidavits.

[17] *Section 306-b* provides:

> ***HN26***[] Service of the summons and complaint ... shall be made within one hundred twenty days after their filing ... . If the service is not made upon a defendant within the time provided in this section, the court, upon motion, shall dismiss the action without prejudice as to that defendant, or upon good cause shown or in the interest of justice, extend the time for service.

[18] If the purportedly backdated amended complaint was not served within 120 days of the purported stamp, Holdings could not reasonably have relied on it as such complaint would be subject to summary dismissal pursuant to *§ 306-b*.

[19] Holdings does not directly state that it was a named defendant; rather it states that "the named defendants" relied on the false date, Compl. P 315, and that Holdings "incurred expenses in defending" the complaint. *Id. at P 316*.

Holdings has had four chances over the course of more than fifteen months to prepare its complaint, and has received a lengthy opinion that has addressed the elements and pleading requirements for most of the claims asserted here. In addition, counsel for Holdings stated at oral argument on May 15, 2002, that Holdings did not seek leave to replead. [20] For these reasons, leave to replead is denied on all of the claims except for Count XIII.

II. *Motion To Strike*

The Ness Motley Defendants have moved to strike the following "scandalous" allegations **[**83]** from the Third Amended Complaint pursuant to *Fed. R. Civ. Proc. 12(f)*:

> Upon information and belief, defendant Ness Motley provided … inducement to medical experts to obtain their favorable testimony. Upon information and belief, certain of Ness Motley's female secretaries and paralegals were expected to, and did, "entertain" expert witnesses who would visit the firm in connection with pending asbestos litigation. Upon information and belief, at least one partner of the firm indicated to his secretary that she should have sex with a particular expert witness, and defendant Motley supplied several female employees with cash and encouraged them to "be nice to" certain of the firm's expert and out-of-state counsel.

Compl. P 109. Ness Motley contends that the above allegations are immaterial and prejudicial.

Fed. R. Civ. Proc. 12(f) provides:

> ***HN27***[] Upon motion made by a party before responding to a pleading or, if no responsive pleading is permitted by these rules, upon motion made by a party within 20 days after the service of the pleading upon the party or upon the court's own initiative at any time, the court may order stricken from any pleading any insufficient **[**84]** defense or any redundant, immaterial, impertinent, or scandalous matter.

Fed. R. Civ. Proc. 12(f).

As an initial matter, Holdings challenges the timeliness of Ness Motley's motion.

HN28[] Although *Rule 12(f)* allows motions to strike only up to the time a party responds to a pleading, it also permits a court to strike such material on its own initiative at any time. *Fed. R. Civ. P. 12(f)*. As the very case cited by Holdings makes clear, "this provision has been interpreted to allow courts to grant meritorious motions to strike even when they are untimely." *Phillips v. Dalton, 1997 U.S. Dist. LEXIS 419, 1997 WL 24846*, at *3 n.8 (E.D. Pa. Jan. 22, 1997) (denying motion because material was not sufficiently **[*555]** prejudicial, rather than due to untimely filing); *see also* 5A Charles Alan Wright & Arthur R. Miller, *Federal Practice and Procedure* § 1380, at 652-54 (2d ed. 1990); *Wine Markets Int'l Inc. v. Bass, 177 F.R.D. 128, 133 (E.D.N.Y. 1998)* ("In effect, the Court's discretion renders the [rule requiring a motion to strike prior to response to a pleading] 'essentially unimportant.'") (citation omitted). *But see* *Eaton V. American Media Operations, Inc., 1997 U.S. Dist. LEXIS 46, 1997 WL 7670* at *5 (Jan. 9, 1997), **[**85]** (dismissing motion to strike as untimely because not filed prior to filing responsive pleading). Therefore, it is necessary to determine whether Ness Motley's motion is meritorious.

The Court of Appeals has ***HN29***[] cautioned district courts to approach such motions with caution: "It is settled that the motion will be denied, unless it can be shown that no evidence in support of the allegation would be admissible . . . . Thus the courts should not tamper with the pleadings unless there is a strong reason for doing so." *Lipsky v. Commonwealth United Corp., 551 F.2d 887, 893 (2d Cir. 1976)*. In spite of this reluctance, allegations may be stricken if they have no real bearing on the case, will likely prejudice the movant, or where they have criminal overtones. *Toto v. McMahan, Brafman, Morgan & Co., 1995 U.S. Dist. LEXIS 1399, 1995 WL 46691*, at *16 (S.D.N.Y. Feb. 7, 1995) (citation omitted); *see also* Wright, Miller & Marcus, *Fed. Prac. & Proc.: Civil 2d* § 1382, at 714 (West 1994 & Supp. 2001) ("Scandalous allegations . . . will often be stricken from the pleadings in order to purge the court's files and protect the subject of the allegations.")

---

[20] Counsel stated that Holdings may wish to amend the complaint if the Special Master's investigation yields more information. If particularly specific facts leading to meritorious claims are uncovered, Holdings may *move* to replead. Holdings may not replead as of right except as to Count XIII, and any such pleadings without seeking leave of court will be summarily dismissed.

As a result **[**86]** of Part I of this opinion, only three claims remain against Ness Motley: (1) tortious interference with business relations [21] (Count II); (2) tortious interference with contract [22] (Count III); and (3) breach of contract [23] (Count X).

[87]** Counts II and III allege that all the defendants, including Ness Motley, "caused CCR to expel GAF," carrying out their "extortionate threats . . . to coerce GAF to cease its efforts to lobby Congress for passage of the [FACA] . . . ." Compl. PP 182-83. The only possible materiality of the allegations are to provide background regarding the strength of the "improper" means, the purported "extortionate threats." This background has "no real bearing on the case."

Count X alleges a breach of the Futures Agreement by Ness Motley's "failing to recommend to its non-sick clients that they defer filing asbestos claims until they met the medical criteria set forth" in the Agreement. Compl. P 209. The allegations have no bearing on whether Ness Motley breached the Futures Agreement.

In addition to the lack of relevance of the allegations, they are also prejudicial. **[*556]** They are amorphous, unspecific and cannot be defended against. Further, the allegations, which have been publicized, harm Ness Motley in the public eye and could influence prospective jury members.

Holdings cites the myriad media reports concerning these allegations to suggest that any prejudice has already occurred and that **[**88]** striking the allegations will not cause the legal community, the public or a jury to ignore the proverbial white elephant standing in the corner of the room. If a party has suffered prejudice as a result of scandalous allegations -- as is likely here -- the solution under *Rule 12(f)* is not thereafter to ignore the party's plight. The portion is therefore stricken.

Conclusion

For the foregoing reasons, the Defendants' motion to dismiss is granted in part and denied in part. Counts VII, XI and XIII are dismissed, but leave is granted to replead Count XIII. Further, Counts I, IV, and VIII were previously dismissed, and Holdings did not replead them. As a result, the following claims remain: (1) Count II (tortious interference with economic advantage against all defendants); (2) Count III (tortious interference with contract against all defendants); (3) Count V (RICO mail and wire fraud against Baron & Budd); (4) Count VI (RICO mail and wire fraud against the individual defendants Baron and Budd); (5) Count IX (breach of contract against Weitz & Luxenberg); (6) Count X (breach of contract against Ness Motley); and (7) Count XII (common law fraud against Baron & Budd).

[89]** In addition, Ness Motley's motion to strike is granted.

It is so ordered.

New York, NY

July 17, 2002

---

[21] ***HN30***[] Under New York law, the elements of tortious interference with a business relationship are: (1) interference by the defendants with an existing contract or business relationship; (2) the interference was accomplished by dishonest, unfair, or improper means or was done intentionally; and (3) damages therefrom. *Martin Ice Cream Co. v. Chipwich Inc., 554 F. Supp. 933, 945 (S.D.N.Y. 1983)* (citation omitted).

[22] ***HN31***[] The elements of tortious interference with a contract are: (1) the existence of a valid contract between plaintiffs and a third party; (2) that the defendants had knowledge of it; (3) the defendants intentionally procured a breach by the third party; and (4) damages therefrom. *Id.*

[23] ***HN32***[] Under New York law, the elements of breach of contract are: (1) a valid contract; (2) plaintiff's due performance; (3) breach by defendants; and (4) damages from breach. *E.g., R.H. Damon & Co. v. Softkey Software Prods. Inc., 811 F. Supp. 986, 991 (S.D.N.Y. 1993)*.

HN2[] **Summary Judgment, Opposing Materials**

Summary judgment is appropriately granted where the movant shows that there is no genuine issue as to any material fact and the moving party is entitled to judgment as a matter of law. *Fed. R. Civ. P. 56(c)*. To survive a motion for summary judgment, the nonmoving party must come forward with evidence sufficient to establish the existence of every element essential to its case on which it bears the burden of proof at trial, even if the moving party presents no evidence. The nonmoving party must do more than simply show that there is some metaphysical doubt as to the material facts. A mere scintilla of evidence is not enough to defeat summary judgment.

HN8[] **Robinson-Patman Act, Defenses**

Putative infringers may challenge incontestability by bearing the burden of showing one or more of the following nine statutory exceptions to incontestability: (1) fraud in obtaining the registration or the status of incontestability, (2) abandonment, (3) use of the mark to misrepresent its source, (4) "fair use" of the mark, (5) limited territory defense of an intermediate junior user, (6) prior registration of plaintiffs, (7) use of the mark to violate federal ***antitrust law***, (8) that the mark is functional, and (9) equitable defenses such as laches, estoppel, and acquiescence. *15 U.S.C.S. § 1115(b)*.

Trademark Law > ... > Registration Procedures > Federal Registration > Federal Registration as Evidence

Trademark Law > ... > Particular Subject Matter > Names > General Overview

Trademark Law > ... > Names > Generic Names > General Overview

HN9[] **Federal Registration, Federal Registration as Evidence**

While the generic nature of a term is not on the *15 U.S.C.S. § 1115(b)* list, the Lanham Act also requires that no incontestable right shall be acquired in a generic name.

Evidence > Burdens of Proof > Clear & Convincing Proof

Trademark Law > Abandonment > General Overview

HN10[] **Burdens of Proof, Clear & Convincing Proof**

Plaintiffs are required to prove abandonment by clear and convincing evidence.

Trademark Law > ... > Federal Unfair Competition Law > Trade Dress Protection > General Overview

Trademark Law > ... > Similarity of Marks > Appearance, Meaning & Sound > General Overview

Trademark Law > Trademark Cancellation & Establishment > Incontestability > General Overview

HN13[] **Civil Infringement Actions, Determinations**

The final element of a claim of unfair competition and trademark infringement under the Lanham Act, *15 U.S.C.S. § 1114* and *1125(a)*, is whether the record shows that unauthorized use of terms creates a likelihood of confusion for an ordinary consumer as to the source or sponsorship of the services. Although a showing of incontestability affects the validity of a trademark, it does not establish the likelihood of confusion necessary to warrant protection from infringement. Rather, likelihood of consumer confusion remains an independent requirement for trademark infringement. And, determining whether a putative infringer's actions create a likelihood of confusion requires consideration of the following factors: (1) the strength of the mark, (2) the similarity between the alleged infringer's domain name and/or use and the mark, (3) the similarity between defendant's services and the services provided at the domain name, (4) the similarity between the facilities defendant uses in its business and the facilities used in connection with the provision of services under the disputed domain names, (5) the similarity between defendant's advertising and advertising used to promote services offered by plaintiffs, (6) plaintiffs' intent underlying use of the mark, and (7) the existence of any actual confusion. These factors are neither exhaustive nor exclusive.

Trademark Law > ... > Infringement Actions > Summary Judgment > General Overview

HN14[] **Infringement Actions, Summary Judgment**

Although the likelihood of confusion is factual issue dependent on the circumstances of each case, summary judgment is appropriate when the material, undisputed facts disclose a likelihood of confusion, a determination that courts make.

Trademark Law > Likelihood of Confusion > Consumer Confusion > General Overview

Trademark Law > Likelihood of Confusion > General Overview

HN15[] **Likelihood of Confusion, Consumer Confusion**

The burden falls upon the putative senior trademark holder to establish likelihood of confusion. For the burden to shift to plaintiffs, copying must be shown to be intentional.

Trademark Law > ... > Particular Subject Matter > Names > General Overview

Trademark Law > ... > Particular Subject Matter > Names > Internet Domain Names

HN16[] **Trademark Protection, Civil Infringement Actions**

The Anticybersquatting Consumer Protection Act, *15 U.S.C.S. § 1125(d)*, (ACPA) imposes liability in a civil action on a person by the owner of a mark if, without regard to the goods or services of the parties, that person (1) has a bad faith intent to profit from that mark and (2) registers, traffics in, or uses a domain name that (a) in the case of a mark that is distinctive at the time of registration of the domain name, is identical or confusingly similar to that mark, or (b) in the case of a famous mark that is famous at the time of registration of the domain name, is identical or confusingly similar to or dilutive of that mark. *15 U.S.C.S. § 1125(d)(1)(A)*. Thus, to succeed in an in personam ACPA claim, a party must prove the following two elements: (i) that the other party's use of domain names constitutes either trademark infringement or trademark dilution and (ii) that party has or had a bad faith intent to profit from use of the marks.

Computer & Internet Law > ... > Trademark Protection > Protection of Rights > Internet Domain Names

HN17[] **Protection of Rights, Internet Domain Names**

The Anticybersquatting Consumer Protection Act, *15 U.S.C.S. § 1125(d)*, lists nine nonexclusive factors for courts to consider in determining whether a domain name has been registered or used in bad faith. Although courts are not obliged to consider every factor and may also consider factors not listed in *15 U.S.C.S. § 1125(d)(1)(B)(i)*, the statutory factors are typically what courts use to determine bad faith. Each factor addresses whether there is some legitimate reason for the registrant or user of a domain name to possess or make use of the disputed domain name.

Computer & Internet Law > ... > Trademark Protection > Protection of Rights > Internet Domain Names

Copyright Law > ... > Fair Use > Fair Use Determination > Factors

HN18[] **Protection of Rights, Internet Domain Names**

The purpose of *15 U.S.C.S. § 1125(d)(1)(B)(i)(IV)*, bona fide noncommercial or fair use, is to protect domain name registrants and users engaged in protected activities, such as political criticism.

Trademark Law > ... > Factors for Determining Confusion > Intent of Defendant to Confuse > General Overview

HN19[] **Factors for Determining Confusion, Intent of Defendant to Confuse**

As intent is rarely discernible directly, it must typically be inferred from pertinent facts and circumstances.

Computer & Internet Law > ... > Trademark Protection > Civil Infringement Actions > General Overview

Trademark Law > ... > Eligibility for Trademark Protection > Distinctiveness > General Overview

HN20[] **Trademark Protection, Civil Infringement Actions**

A trademark's distinctive nature is sufficient to satisfy *15 U.S.C.S. § 1125(d)(1)(B)(i)(IX)*.

Computer & Internet Law > ... > Trademark Protection > Protection of Rights > Internet Domain Names

Trademark Law > ... > Infringement Actions > Standards of Review > General Overview

HN21[] **Protection of Rights, Internet Domain Names**

It is important to pursue the analysis of the issue of bad faith factor-by-factor, and it is significant that when this is done and on balance points persuasively to a finding of bad faith, it is equally important to step back and examine the larger picture to determine whether it is consistent with a finding of bad faith.

Opinion by: T. S. Ellis, III

Opinion

[*614] MEMORANDUM OPINION

This is a dispute over the ownership of the domain name "cosmos.com." Plaintiffs, one of which is the current owner of the disputed domain name, seek a declaration confirming the propriety of their use and ownership of the domain name. Defendant, the owner of a registered trademark for the term "Cosmos," counterclaims against plaintiffs for trademark infringement and unfair competition in violation of the Lanham Act, 15 U.S.C. §§ 1114, 1125(a), cybersquatting in violation of the Anticybersquatting Consumer Protection Act, 15 U.S.C. § 1125(d), and common law unfair competition.

The parties, having filed and fully briefed cross-motions for summary judgment, agree that the matter **[**2]** is now ripe for resolution on the current record and that a trial is unnecessary.

I.

Plaintiffs Eurotech, Inc. ("Eurotech") and Eurotech Data Systems Hellas, Ltd. ("Hellas") [1] are two related entities that provide consumer and business exchange information and technology services via the Internet to various businesses. Hellas, a Greek corporation with its principal place of business in Athens, Greece is a subsidiary of Eurotech, an Illinois corporation with its principal place of business in Illinois. Eurotech's founder and owner is Dino Matingas, who is also the sole owner of Hellas.

Eurotech purchased the domain name, cosmos.com, in May 1998 from an individual unaffiliated with any of the parties in this dispute. [2] The record reveals that, in **[*615]** the course of making this purchase, Eurotech did not conduct a trademark search to determine whether the mark "Cosmos" was already registered or in use as a trademark or trade name. Eurotech **[**3]** claims that since acquiring the cosmos.com domain name in 1998, it has operated under the Cosmos.com name. Then, in March 2002, Eurotech changed its business name to CosmoTravels.com, Inc. Undisputed record evidence reveals that plaintiffs were not actively in business prior to purchasing the cosmos.com domain name and posting travel-related information at that Internet address.

[1] Eurotech and Hellas are referred to collectively as "plaintiffs."

[2] The domain name, cosmos.com, was registered with Network Solutions, Inc. (NSI) on September 21, 1994. NSI has since been acquired by Verisign Global Registry Services. Verisign, located in Herndon, Virginia, continues to operate as one of a number of domain name registrars and the sole registry for all ".com" domain names.

Defendant Cosmos European Travels Aktiengesellschaft is a privately-held Liechtenstein company that is part of a privately-held family of companies under common ownership. It appears from the record that defendant's role in this family of companies is, in part, to serve as a holding company to administer trademark **[**4]** applications and registrations for the "Cosmos" mark. In this role, defendant filed applications in the United States Patent and Trademark Office (PTO) to register the marks "Cosmos" and "Cosmos Tourama" for "conducting travel tours" in the United States Patent and Trademark Office (PTO) on March 18, 1987. Registrations on these applications issued on November 10, 1987 under registration numbers 1,464,902 and 1,464,901, respectively. [3] These registrations became incontestable pursuant to *15 U.S.C. § 1065* on July 28, 1993, when the PTO accepted and acknowledged the appropriate affidavits. [4] As early as 1995, defendant licensed the "Cosmos" mark to another member of defendant's family of companies, Tourama, Ltd., a Bahamian company. Tourama, in turn, also as early as 1995, sublicensed the mark to yet another member of this business family, Group Voyagers, Inc. (GVI), a subsidiary of defendant, [5] for use in the United States in connection with the business of selling or conducting travel tours. Uncontroverted evidence shows that GVI's use of the "Cosmos" mark is pursuant to the conditions contained in the license and under the supervision and control of the **[**5]** majority owners of defendant's group of companies.

It is further undisputed that defendant's efforts to promote the "Cosmos" mark, chiefly through its affiliate, GVI, have been both **[**6]** substantial and substantially successful. Specifically, these efforts are as follows:

> . In the past four years, GVI has spent over $ 32 million on marketing and promotion involving the "Cosmos" mark. These marketing and promotional activities have included magazine advertising, co-operative advertising, attendance at trade shows, and distributing brochures. **[*616]** GVI has also used the "Cosmos" mark on a variety of items, such as brochures, stationery letterhead, envelopes, post cards, luggage tags, and travel portfolios.
> . GVI also uses the "Cosmos" mark on the Internet, where it and its affiliated entities use websites at the domain names cosmosvacations.com and globusandcosmos.com for the purpose of promoting its services by providing travel information for travel arrangements of clients and potential clients. These websites provide United States residents with information on booking travel and vacation reservations.
> . GVI has enjoyed significant successes in marketing and providing travel and vacation tours under the "Cosmos" mark. In the past five years alone, sales in the United States of "Cosmos" brand tours have exceeded $ 400 million.
>
> . There has been substantial unsolicited **[**7]** media coverage of the Cosmos companies and "Cosmos" brand services in publications, such as *Forbes.*

In 2001, Matingas, plaintiffs' owner, approached GVI, proposing that plaintiffs, using the cosmos.com domain name, could serve as vendors or distributors for defendant, and asked that GVI pay Eurotech $ 250,000 up front, and $ 100,000 quarterly, for five years. Matingas's rationale for this proposal was that plaintiffs had received Internet inquiries at their cosmos.com site from consumers mistakenly seeking defendant's travel tour services and thus GVI should be willing to pay plaintiffs to reap the benefits of this consumer interest. After some negotiation, GVI's director of marketing rejected the proposal. Matingas responded with a second offer, pursuant to which GVI, as vendor, would pay Eurotech, as distributor, a $ 20,000 "one-time fee" and a $ 10,000 monthly charge in return for

---

[3] Defendant has also registered these marks in the United Kingdom, Canada, and Australia for use in connection with its business of selling and conducting travel tours.

[4] *Section 1065(4)* provides that

> the incontestable right with reference to a mark registered under this chapter shall apply to a mark registered under the Act of March 3, 1881, or the Act of February 20, 1905, upon the filing of the required affidavit with the Director within one year after the expiration of any period of five consecutive years after the date of publication of a mark

15 U.S.C. § 1065(4). *See also infra* notes 14-15 and accompanying text.

[5] Defendant, Tourama, and GVI all are under the controlling ownership of trusts controlled by three individuals: Sergio Mantegazza, Mario Albek, and Geo Mantegazza.

which plaintiffs would release the most appropriate email messages it received from customers mistakenly seeking to contact defendant via the cosmos.com website. This discussion, too, eventually ended with no deal being struck between GVI and plaintiffs.

A review of the cosmos.com website and **[**8]** websites to which it is linked, including cosmotravels.com, reveals prominent use of the terms "Cosmos.com" and "Cosmotravels" in connection with the travel information services posted on those sites. [6] More specifically, plaintiffs' various websites exhibit the following features:

. all pages currently appearing on the cosmos.com or cosmotravels.com website contain some material that is related to travel or tourism;

. below the text "cosmotravels.com front page" on the cosmos.com or cosmotravels.com website is the text "travel reservations," "vacations," "cruises," and "destination guides;"

. below the text "cosmotravels.com front page" on the cosmos.com or cosmotravels.com website is a banner with the text "Vacations," "Cruises," "Hotels," and "Airlines."

. if the cursor is placed on the text "Vacations," "Cruises," "Hotels," or "Airlines" on the cosmos.com or cosmotravels.com website, the names of different vacation, cruise, hotel, or airline packages scroll across the screen.

Although plaintiffs do not offer travel tours through their websites, the undisputed record reflects that these websites provide travel information and, according to the website itself, **[**9]** serve as an "On-line **[*617]** Market Place for the Travel Industry by Third Party Sellers of Goods and or Services," which permits third-party businesses to offer their products and services. The record also reflects that Eurotech owns twenty-five domain names that are similar to the "Cosmos" mark. [7]

On July 20, 2001, defendant filed a complaint with the World Intellectual Property **[**10]** Organization (WIPO) in accordance with the Uniform Domain Name Dispute Resolution Policy (UDRP). [8] In its WIPO complaint against Hellas, defendant asserted a claim for trademark infringement based on allegations (i) that defendant had consistently used its registered trademarks "Cosmos" and "Cosmos Tourama;" (ii) that the cosmos.com domain name was identical to its "Cosmos" trademark, and confusingly similar to defendant's "Cosmos Tourama" trademark; and (iii) that Hellas used the cosmos.com domain name as an integral part of a travel business that competes directly with defendant's business. Defendant further claimed that Hellas had no rights or legitimate interest in the cosmos.com domain name and that the domain name was registered and used in bad faith. The relief defendant sought was an order transferring ownership to defendant of the registrar certificate for cosmos.com.

[11]** In the WIPO proceeding, defendant also alleged that Hellas offered to sell the cosmos.com domain name to defendant, an allegation Hellas disputed. After Hellas filed its response denying that an offer of sale had been made, defendant was allowed to amend its complaint to withdraw this allegation. Although the WIPO arbitrator [9] **[**12]** allowed defendant to amend the complaint, he declined to give Hellas the opportunity to respond to the

---

[6] Record evidence reveals that all plaintiffs' travel-related information has been directly available at cosmos.com, but that within the past two months, plaintiffs moved that content from cosmos.com to cosmotravels.com and cosmotravels.com/index1.html, two websites that are linked to cosmos.com.

[7] These domain names include cosmos.com, cosmosnews, cosmobusiness, cosmofinance, cosmoscitech, cosmosports, cosmoshow, cosmokids, cosmoreligion, cosmohealth, cosmohome, cosmostyle, cosmoarts, cosmotravels, cosmogovern, cosmostransport, cosmoedu, cosmoradio, cosmoweather, cosmotvc, cosmovvtel, cosmocommerce, cosmopolis, cosmonetshow, and mycosmos.

[8] On October 24, 1999, the Internet Corporation for Assigned Names and Numbers (ICANN) adopted the Uniform Domain Name Dispute Resolution Policy, which effectively altered all contracts between domain name registrars and their customers, mandating the use of WIPO arbitration to resolve domain name disputes before resorting to litigation in United States courts. Plaintiffs do not dispute this, nor do they dispute that the agreement with Verisign for the cosmos.com domain name now mandates a WIPO arbitration proceeding.

[9] The complaint was assigned to a sole arbitrator, an attorney from the United Kingdom, the location of defendant's principal place of business.

amended complaint. On the basis of the arbitration record, the arbitrator ruled that the domain name cosmos.com should be transferred to defendant (i) because the domain name cosmos.com was identical or confusingly similar to defendant's registered trademarks "Cosmos" and "Cosmos Tourama;" (ii) because there was evidence that Hellas was commonly known by the name "Cosmos.com;" and (iii) because Hellas's use of the cosmos.com domain name was not legitimate or fair. *See* WIPO Case No. D2001-0941. [10] Thus, on October 22, 2001, Hellas was notified by Verisign that unless it commenced a lawsuit by 5 p.m., November 5, 2001, the domain name cosmos.com **[*618]** would be transferred to defendant.

To avoid the transfer, plaintiffs filed this complaint against defendant, asserting the following claims:

(i) declaratory relief with respect to the domain name cosmos.com;
(ii) unlawful conversion;
(iii) tortious interference with prospective economic advantage; and
(iv) abuse of process.

Defendant responded with a motion seeking threshold dismissal of counts (iii) and (iv), which motion was granted. *See* *Eurotech, Inc. v. Cosmos European Travels Aktiengesellschaft, 189 F. Supp. 2d 385, 390-94 (E.D. Va. 2002)*. [11] Defendant also filed a counterclaim, alleging **[**13]** that plaintiffs

(i) engaged in trademark infringement and unfair competition under the Lanham Act, *15 U.S.C. §§ 1114*, *1125(a)*;
(ii) engaged in common law unfair competition; and

(iii) violated the Anticybersquatting Consumer Protection Act (ACPA), *15 U.S.C. § 1125(d)*.

Plaintiffs filed a motion to dismiss defendant's counterclaim and a motion to strike defendant's affirmative defenses, both of which were denied. *See* *Eurotech, 189 F. Supp. 2d at 389*. The parties thereafter completed discovery and then filed various miscellaneous motions as well as cross-motions for summary judgment. The miscellaneous motions were resolved [12] **[**15]** and the cross motions for summary judgment are now ripe for resolution as the parties have fully briefed the issues and waived oral argument. *See Eurotech, Inc. v. Cosmos European Travels Aktiengesellschaft,* Civil Action No. 01-1689-A (E.D. Va. July 2, 2002) (order). [13] At issue on summary judgment are the following claims:

(i) plaintiffs' claim for declaratory relief with respect to the domain name cosmos.com;

(ii) defendant's claim of trademark infringement and unfair **[**14]** competition in violation of the Lanham Act, *15 U.S.C. §§ 1114*, *1125(a)*;

---

[10] ***HN1***[] Worth noting here is that the result reached in the WIPO proceeding is neither admissible, nor entitled to any deference, with respect to the merits issues presented in this suit. Review here must be *de novo* and independent of any WIPO panel conclusion. *See International Bancorp v. Societe des Bains de Mer et du* *Cercle des Etrangers a Monaco, 192 F. Supp. 2d 467, 475 n.16 (E.D. Va. 2002)* (citing *Parisi v. Netlearning, Inc., 139 F. Supp. 2d 745, 752 (E.D. Va. 2001))*.

[11] The tortious interference and abuse of process claims were dismissed because (i) plaintiffs were unable to establish the necessary elements of their claims; (ii) the *Noerr-Pennington* doctrine confers immunity to defendant's seeking WIPO redress to protect its mark; and (iii) plaintiffs' prior agreement to submit to a WIPO proceeding precluded their claims. *See* *Eurotech, 189 F. Supp. 2d at 390-94*.

[12] The motions were resolved as follows (i) plaintiffs' motion to strike expert report and bar expert testimony of defendant's expert, Michael Rappeport, was denied; (ii) plaintiffs' motion to strike defendant's reply brief in support of defendant's motion for summary judgment was denied; (iii) defendant's motion to withdraw its claims for a monetary award was granted; (iv) plaintiffs' claim for unlawful conversion was dismissed; and (v) defendant's motion to strike jury demand was granted. *See Eurotech, Inc. v. Cosmos European Travels Aktiengesellschaft,* Civil Action No. 01-1689-A (E.D. Va. July 12, 2002) (order).

[13] The parties reiterated during oral argument on July 12, 2002 that the case should be adjudicated on the existing summary judgment record.

(iii) defendant's claim of common law unfair competition; and

(iv) defendant's claim of cybersquatting in violation of the ACPA, 15 U.S.C. § 1125(d).

II.

HN2[] Summary judgment is appropriately granted where the movant shows "that there is no genuine issue as to any material fact and the moving party is entitled to judgment as a matter of law." Rule 56(c), Fed. R. Civ. P.; *see also* Celotex Corp. v. Catrett, 477 U.S. 317, 322, **[*619]** 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986). To survive a motion for summary judgment, the nonmoving party must come forward with evidence sufficient to establish the existence of every element essential to its case on which it bears the burden of proof at trial, even if the moving party presents no evidence. *See* id. at 321-24. The nonmoving party "must do more than simply show that there is some metaphysical doubt as to the material facts." Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 586, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986). A "mere scintilla" of evidence is not enough to defeat summary judgment. Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 252, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986). **[**16]**

III.

Defendant first claims that plaintiffs' use in American commerce of the term "Cosmos" in the cosmos.com domain name and on websites constitutes infringement of defendant's "Cosmos" and "Cosmos Tourama" marks in violation of the Lanham Act, 15 U.S.C. §§ 1114, 1125(a). HN3[] To prevail on this trademark infringement and unfair competition cause of action, defendant must prove the following elements:

(i) that defendant possesses a protectible mark;
(ii) that plaintiffs used the mark;
(iii) that plaintiffs' use of the mark occurred "in commerce;"
(iv) that plaintiffs used the mark "in connection with the sale, offering for sale, distribution, or advertising" of goods or services; and

(v) that plaintiffs used the mark in a manner likely to confuse consumers.

People for the Ethical Treatment of Animals v. Doughney, 263 F.3d 359, 364 (4th Cir. 2001); *see also* 15 U.S.C. §§ 1114, 1125(a). [14]

[17]** Elements two through four are plainly met here. Thus, there is no dispute that plaintiffs used the "Cosmos" mark both as a domain name and on websites. [15] Furthermore, there can be no dispute that plaintiffs' use of the mark occurred in American commerce. Indeed, maintaining a website that provides commercial information originally supplied by third-party companies clearly satisfies the "use in commerce" requirement. *See Cable News Network L.P., L.L.L.P. v. cnnews.com,* 177 F. Supp. 2d 506, 516-18 (E.D. Va. 2001). And further, it is also clear that plaintiffs use the "Cosmos" mark in connection with the distribution of travel and tourism information services. Only

[14] These five criteria establish a claim by a registered mark holder for trademark infringement and unfair competition pursuant to Sections 1114 and 1125(a). *See* Doughney, 263 F.3d at 364.

[15] Although plaintiffs no longer provide travel information at the website found at the cosmos.com domain name, *see supra* note 6, such a move does not absolve plaintiffs from any liability they may have incurred. To begin with, cosmos.com still provides travel related information in the form of the prominent link to cosmotravels.com, which along with related websites, contains travel information. Further, it is well-established that HN4[] "a defendant's voluntary cessation of a challenged practice does not deprive a federal court of its power to determine the legality of the practice." City of Mesquite v. Aladdin's Castle, Inc., 455 U.S. 283, 289, 71 L. Ed. 2d 152, 102 S. Ct. 1070 (1982); *see also American Legion Post 7 of* Durham, N.C. v. City of Durham, 239 F.3d 601, 605 (4th Cir. 2001) (same). Thus, plaintiffs have not shielded themselves from liability by moving the direct travel-related links from cosmos.com to cosmotravels.com.

elements (i) and (v) are seriously contested here and thus defendant's trademark infringement claim depends on whether the undisputed record establishes as a matter of law that defendant possesses a protectible mark and whether plaintiffs' domain name cosmos.com is likely to cause confusion among consumers.

[18]** **[*620]** As an initial matter, the record evidence reflects that defendant's registered marks, "Cosmos" and "Cosmos Tourama" are incontestable. ***HN5***[] Incontestability is "conclusive evidence of the validity of the registered mark and of the registration of the mark, of the registrant's ownership of the mark, and of the registrant's exclusive right to use the registered mark in commerce." *15 U.S.C. § 1115(b)*; *see also* *Lone Star Steakhouse & Saloon, Inc. v. Alpha of Virginia, Inc., 43 F.3d 922, 930 (4th Cir. 1995)*. A registrant's right to use a mark may become incontestable after five years of continuous and unchallenged use, if such use has been averred to in an affidavit filed with the PTO within one year after the five-year period. *See* *15 U.S.C. § 1065*, *Lone Star, 43 F.3d at 930*. Here, it is undisputed that defendant did precisely this for the marks "Cosmos" and "Cosmos Tourama."

HN6[] Merely establishing a mark's incontestability does not, alone, mean that the mark is protectible. *See* *Lone Star, 43 F.3d at 930*; 5 J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition* § 32:147 (4th **[**19]** ed. 1998) (hereinafter "McCarthy"). Incontestability, however, forecloses challenges that the mark is not inherently distinctive or that it lacks secondary meaning. [16] It also precludes a claim that the mark is not owned by the registrant because it is inferior in priority to plaintiffs' previously used mark. *See* McCarthy § 32:148.

[20]** Although defendant has met the requirements for incontestability for the marks "Cosmos" and "Cosmos Tourama," plaintiffs, as ***HN8***[] putative infringers, may challenge incontestability by bearing the burden of showing one or more of the following nine statutory exceptions to incontestability:

(i) fraud in obtaining the registration or the status of incontestability;
(ii) abandonment;
(iii) use of the mark to misrepresent its source;
(iv) "fair use" of the mark;
(v) limited territory defense of an intermediate junior user;
(vi) prior registration of plaintiffs;

(vii) use of the mark to violate federal ***antitrust law***;
(viii) that the mark is functional; and
(ix) equitable defenses such as laches, estoppel, and acquiescence.

See *15 U.S.C. § 1115(b)*; *Lone Star, 43 F.3d at 930*. [17] Here, plaintiffs assert only exceptions (i) and (ii). Thus, plaintiffs argue (i) that defendant engaged in fraud to obtain both the registrations and the **[*621]** marks' incontestable status and (ii) that defendant abandoned its rights in the "Cosmos" and "Cosmos Tourama" marks. Neither argument has merit. First, plaintiffs have adduced no evidence that defendant's **[**21]** registration and the

---

[16] Notwithstanding the issue of incontestability, it is quite apparent that the marks "Cosmos" and "Cosmos Tourama" are distinctive, not generic, and therefore protectible under the Lanham Act. Indeed, because it is clear that these marks are either arbitrary or suggestive, they are deemed distinctive without requiring a showing of secondary meaning. *See* *Washington Speakers Bureau, Inc. v. Leading Authorities, Inc., 33 F. Supp. 2d 488, 494 (E.D. Va. 1999)* ***HN7***[] (holding that both arbitrary and suggestive marks are deemed distinctive and are afforded the highest protections under the Lanham Act).

Plaintiffs argue that because the term "Cosmos" is, ostensibly, a commonly-used term, the mark "Cosmos" is generic. This is not so; simply because a word is commonly-used does not render it generic. Rather, many commonly-used terms receive Lanham Act protection within a particular industry: "Delta" faucets, "Polo" clothing, and "Apple" computers.

[17] A distinguished commentator has also noted that ***HN9***[] while the generic nature of a term is not on the *Section 1115(b)* list, the Lanham Act also requires that no incontestable right shall be acquired in a generic name. *See* McCarthy § 32:149. *Cf.* *Lone Star, 43 F.3d at 930* (not recognizing this additional exception). In any event, the terms "Cosmos" and "Cosmos Tourama" are not generic. *See infra* note 16.

status of incontestability were the product of fraud on the PTO. They also have not met their burden of showing by clear and convincing evidence [18] defendant's abandonment of the marks. [19]

[22]** ***HN12***[] The Lanham Act provides that a mark is deemed abandoned "when any course of conduct of the registrant, including acts of omission as well as commission, causes the mark to lose its significance as an indication of origin." *15 U.S.C. § 1127(b)*. Here, plaintiffs claim defendant abandoned its rights in the "Cosmos" and "Cosmos Tourama" marks by its uncontrolled or "naked" licensing of the marks to defendant's family of companies. While it is true that so-called "naked" or uncontrolled licencing can result in abandonment, nothing of the sort has been shown here. Under the Lanham Act, "naked (or uncontrolled) licensing of a mark occurs when a licensor allows a licensee to use the mark on any quality or type of good [or service] the licensee chooses." *Stanfield v. Osborne Industries. Inc., 52 F.3d 867, 871 (10th Cir.)*, *cert. denied, 516 U.S. 920, 133 L. Ed. 2d 217, 116 S. Ct. 314 (1995)*. Here, the undisputed record shows that far from "naked" licensing, all use of defendant's mark by Tourama or GVI occurred pursuant to licenses that closely regulated such use and under the control and supervision of the majority owners of defendant's group of companies. [20] For **[**23]** instance, defendant's licensing agreements prohibit use of the "Cosmos" mark in connection with businesses unrelated to travel. In sum, defendant has clearly established the incontestability of "Cosmos" and "Cosmos Tourama" and plaintiffs have not met their burden of establishing the contrary.

HN13[] The final element of a claim of unfair competition and trademark infringement under *Sections 1114* and *1125(a)* is whether the record shows that plaintiffs' unauthorized use of the terms "Cosmos" or "Cosmos Tourama" creates a likelihood of confusion for an "ordinary consumer as to the source or sponsorship of the [services]," in this case travel tour services. *See* *Anheuser-Busch, Inc. v. L & L Wings, Inc., 962 F.2d 316, 318 (4th Cir. 1992)* (internal quotation marks omitted). Although **[**24]** a showing of "incontestability affects the validity of [defendant's] trademark, [it] does not establish the likelihood of confusion necessary to warrant protection from infringement." *Lone Star, 43 F.3d at 935*. Rather, "likelihood of consumer **[*622]** confusion remains an independent requirement for trademark infringement." *Id.* And, determining whether a putative infringer's actions create a likelihood of confusion requires consideration of the following factors:

(i) the strength of the mark;
(ii) the similarity between the alleged infringer's domain name and/or use and the mark;
(iii) the similarity between defendant's services and the services provided at the domain name;
(iv) the similarity between the facilities defendant uses in its business and the facilities used in connection with the provision of services under the disputed domain names;
(v) the similarity between defendant's advertising and advertising used to promote services offered by plaintiffs;

(vi) plaintiffs' intent underlying use of the mark; and

(vii) the existence of any actual confusion.

---

[18] ***HN10***[] Plaintiffs are required to prove abandonment by "clear and convincing evidence." McCarthy § 17:12.

[19] ***HN11***[] Even if a mark somehow loses its incontestable status, it may still be found to be protectible if the remaining requirements of *Section 1125(a)* are met. *See* McCarthy § 31:60 (noting that a mark holder's "separate federal rights in unregistered marks under *[Section 1125(a)*] continue unabated even if a registration is disregarded or cancelled"); *see also* *Orient Express Trading Co. v. Federated Dep't Stores, Inc., 842 F.2d 650 (2d Cir. 1988)* (holding that fraud in the registration process leading to cancellation of registrations does not bar possible relief based upon a *[Section 1125(a)*] claim for infringement of unregistered rights). Thus, even if defendant's "Cosmos" mark were unregistered, the mark would still be protectible because it is "arbitrary" or "suggestive." Such marks are categorically deemed distinctive and therefore entitled to the highest level of protection. *See supra* note 16.

[20] This lack of "naked" licensing distinguishes the case at bar from *CNA Financial Corp v. Brown, 922 F. Supp. 567, 574 (M.D. Fla. 1996)*, the case plaintiffs cite in support of their claim of abandonment.

See Petro Stopping Centers, L.P. v. James River Petroleum, Inc., 130 F.3d 88, 91 (4th Cir. 1997) **[**25]** (citing Pizzeria Uno Corp. v. Temple, 747 F.2d 1522, 1527 (4th Cir. 1984)). These factors are neither exhaustive nor exclusive. *See* Pizzeria Uno, 747 F.2d at 1527. [21]

[26]** Because six of the seven *Petro Stopping* factors weigh in defendant's favor, a likelihood of confusion is convincingly established. [22] As an initial matter, there can be no doubt that the first factor points toward a likelihood of confusion: the terms "Cosmos" and "Cosmos Tourama" are strong because their registrations are incontestable and the marks themselves, which are arbitrary or suggestive, are distinctive. The second factor--that of similarity between the alleged infringer's domain name or use of the mark and the mark itself--also weights heavily, if not conclusively, in favor of a likelihood of confusion. Indeed, plaintiffs' domain names, such as "cosmos.com" and "cosmotravels.com" are virtually identical to defendant's "Cosmos" mark. It also appears that defendant's services are essentially similar to those services provided at the cosmos.com domain name or at related sites to which cosmos.com provides a link. Indeed, defendant conducts travel tours and plaintiffs' websites provide travel information. The fourth factor--similarity of facilities--also weighs in favor of a finding of likelihood of confusion: plaintiffs use the Internet, specifically the cosmos.com domain **[**27]** name and related websites, to offer their travel-related services. Similarly, uncontradicted record evidence shows that **[*623]** defendant uses the Internet to offer travel-related services. And, although there is no evidence that plaintiffs engaged in advertising, this lack of advertising suggests that plaintiffs sought to obtain a free ride off the goodwill of defendant's registered trademarks. The final factor, existence of actual confusion, also points convincingly toward a likelihood of confusion. Indeed, Matingas attempted to entice GVI to enter into an agreement with plaintiffs with the promise of forwarding scores of email messages or web hits from confused consumers who mistakenly thought they were communicating with defendant.

[28]** In sum, defendant has established a strong likelihood of confusion and, therefore, has proven all the necessary elements of unfair competition and trademark infringement pursuant to 15 U.S.C. §§ 1114, 1125(a). [23]

IV.

Next, defendant alleges that plaintiffs' use of the "Cosmos" and "Cosmos Tourama" marks violates the *in personam* provisions of the ACPA, 15 U.S.C. § 1125(d)(1). ***HN16***[] The ACPA imposes liability in a civil action on a person by the owner of a mark if, without regard to the goods or services of the parties, that person

(i) has a bad faith intent to profit from that mark and

(ii) registers, traffics in, or uses a domain name that-

(I) in the case of a mark that is distinctive at the time of registration of the domain name, is identical or confusingly similar to that mark; [or]

---

[21] It is also well-established that ***HN14***[] although "the likelihood of confusion is factual issue dependent on the circumstances of each case…, summary judgment is appropriate when the material, undisputed facts disclose a likelihood of confusion," a determination that courts make in light of the seven factors. Resorts of Pinehurst, Inc. v. Pinehurst Nat. Corp., 148 F.3d 417, 422 (4th Cir. 1998). Thus, although likelihood of confusion is a factual issue, "weighing the seven factors that determine likelihood of confusion is a judicial function." International Bancorp, 192 F. Supp. 2d at 483 (citing Pinehurst, 148 F.3d at 422). Furthermore, in determining whether a likelihood of confusion exists, courts should consider the specific facts and circumstances of each case. *See* Anheuser Busch, 962 F.2d at 318.

[22] ***HN15***[] The burden falls upon defendant, the putative senior mark holder, to establish likelihood of confusion. Defendant argues that this burden ought to fall upon plaintiffs because they have engaged in copying defendant's mark. For the burden to shift to plaintiffs, however, such copying must be shown to be intentional. *See* Larsen v. Terk Technologies Corp., 151 F.3d 140, 149 (4th Cir. 1998); International Bancorp, 192 F. Supp. 2d at 483. Because the evidence of intentional copying is not compelling, the analysis here proceeds with defendant as the party bearing the burden of proving likelihood of confusion.

[23] The same proof establishes trademark infringement and unfair competition under Sections 1114 and 1125(a).

(II) in the case of a famous mark that is famous **[**29]** at the time of registration of the domain name, is identical or confusingly similar to or dilutive of that mark....

15 U.S.C. § 1125(d)(1)(A). Thus, for defendant to succeed in this *in personam* ACPA claim, it must prove the following two elements: (i) that plaintiffs' use of cosmos.com and other related domain names constitutes either trademark infringement or trademark dilution and (ii) that plaintiffs have or had a bad faith intent to profit from use of the "Cosmos" or "Cosmos Tourama" marks. *See* *Doughney, 263 F.3d at 366-68*. As reflected in Part III, *supra,* defendant has established the first element; plaintiffs' use of cosmos.com infringes defendant's registered marks pursuant to *15 U.S.C. §§ 1114(a)*, *1125*. It remains, therefore, to determine whether this summary judgment record establishes that plaintiffs acted in bad faith by registering the cosmos.com domain name.

HN17[] The ACPA lists nine nonexclusive factors for courts to consider in determining whether a domain name has been registered or used in bad faith. [24] Although **[*624]** courts are not obliged to consider every factor and may also consider factors **[**30]** not listed in *Section 1125(d)(1)(B)(i)*, the statutory factors are typically what courts use to determine bad faith. *See International Bancorp v. Societe des Bains de Mer et du Cercle des Etrangers a Monaco, 192 F. Supp. 2d 467, 485 (E.D. Va. 2002)*; *Cnnews.com, 177 F. Supp. 2d at 522*. Each factor addresses whether there is some legitimate reason for the registrant or user of a domain name to possess or make use of the disputed domain name. *See id.*

[31]** The first factor is whether plaintiffs have any legitimate rights in the "Cosmos" and "Cosmos Tourama" marks. *See 15 U.S.C. § 1125(d)(1)(B)(i)(I)*. On this issue the undisputed record reflects the following: (i) defendant registered and obtained an incontestable trademark for "Cosmos" and "Cosmos Tourama" in 1993, long before plaintiffs purchased the domain name cosmos.com in 1998; and (ii) plaintiffs did not conduct a trademark search before purchasing the disputed domain name. Had plaintiffs done so, they would have discovered defendant's registration of the marks. It follows that plaintiffs have no rights in these marks. This factor, therefore, weighs in favor of a finding of bad faith.

---

[24] The ACPA bad faith factors are:

(1) the trademark or other intellectual property rights of the registrant, if any, in the domain name;

(2) the extent to which the domain name consists of the legal name of the person or a name that is otherwise commonly used to identify that person;

(3) the person's prior use, if any, of the domain name in connection with the bona fide offering of any goods or services;

(4) the person's bona fide noncommercial or fair use of the mark in a site accessible under the domain name;

(5) the person's intent to divert consumers from the mark owner's online location to a site accessible under the domain name that could harm the goodwill represented by the mark, either for commercial gain or with the intent to tarnish or disparage the mark;

(6) the person's offer to transfer, sell, or otherwise assign the domain name to the mark owner or any third party for financial gain without having used, or having intent to use, the domain name in the bona fide offering of any goods or services or the person's prior conduct indicating a pattern of such conduct;

(7) the person's provision of material and misleading false contact information when applying for the registration of the domain name, the person's intentional failure to maintain accurate contact information, or the person's prior conduct indicating a pattern of such conduct;

(8) the person's registration or acquisition of multiple domain names that the person knows are identical or confusingly similar to the distinctive marks of others or are dilutive of the famous marks of others; and

(9) the extent to which the mark incorporated in the domain name is distinctive and famous within the meaning of the Federal Trademark Dilution Act.

See 15 U.S.C. § 1125(d)(1)(B)(i).

The second factor is whether the terms "Cosmos" or "Cosmos Tourama" constitute a legal name or commonly-used name of plaintiffs. *See* 15 U.S.C. § 1125(d)(1)(B)(i)(II). They do not; neither term consisted of the legal or commonly-used name of plaintiffs prior to the acquisition of the cosmos.com domain name. Although Eurotech has now evidently changed its name to CosmoTravels.com, Inc., this name change does not allow plaintiffs to escape liability. **[**32]** [25] If such a name change could preclude a finding of bad faith, an entity could escape the effect of the ACPA simply by registering an infringing domain name and then changing its business name to match the infringing domain name. Thus, the second factor also supports a finding of bad faith.

The third factor is whether plaintiffs engaged in prior, bona fide use of the "Cosmos" and "Cosmos Tourama" marks. *See* 15 U.S.C. § 1125(d)(1)(B)(i)(III). They did not; there is no evidence in this record that plaintiffs used these marks in connection with providing travel-related services at any time prior to defendant's registration and use of its marks for this purpose. Accordingly, the third factor also weighs in favor of a finding of bad faith.

The fourth factor--whether plaintiffs engaged in any bona fide noncommercial or "fair use" of the marks at issue--does not operate in plaintiffs' favor here. *See* 15 U.S.C. § 1125(d)(1)(B)(i)(IV). **[**33]** It is established that ***HN18***[] "the purpose of this factor is to protect domain name registrants and users engaged in protected activities, such **[*625]** as political criticism." International Bancorp, 192 F. Supp. 2d 467, 486; *see also* Cnnews.com, 177 F. Supp. 2d at 525. It is abundantly clear that plaintiffs' websites do not reflect any such protected conduct and, therefore, this factor does not help plaintiffs avoid a finding of bad faith.

The fifth factor is whether plaintiffs intended to divert consumers from defendant's online location to a website accessible at one of the disputed domain names that could harm the goodwill of defendant's mark, either for commercial gain or with the intent to tarnish or disparage the mark by creating a likelihood of confusion as to the source, sponsorship, affiliation, or endorsement of the website. *See* 15 U.S.C. § 1125(d)(1)(B)(i)(V). In this regard, it is important to note that, ***HN19***[] "as intent is rarely discernible directly, it must typically be inferred from pertinent facts and circumstances." International Bancorp, 192 F. Supp. 2d 467, 486. On this point, defendant notes that plaintiffs received **[**34]** a significant number of Internet inquiries from defendant's potential consumers. While this is evidence of actual confusion, there is no convincing evidence that plaintiffs intended to divert such consumers. Thus, this factor does not point to a finding of bad faith.

The sixth factor--whether plaintiffs offered to transfer or sell a disputed domain name for financial gain without having an intent to use it in the bona fide offering of any goods or services--is a close question. *See* 15 U.S.C. § 1125(d)(1)(B)(i)(VI). While it may appear that plaintiffs are offering legitimate, travel-related services on their website (even if those services do infringe defendant's marks), it also appears that plaintiffs tried to sell GVI access to the cosmos.com website for a substantial fee, which suggests that this offer to sell to defendant may have been plaintiffs' real or principal reason for acquiring the domain name. Indeed, that plaintiffs failed to conduct a trademark search prior to buying the disputed domain name and then received communications at cosmos.com seeking defendant's services all weigh in favor of a finding of bad faith. In sum, whether this factor **[**35]** supports a finding of bad faith is a close question.

The seventh factor is whether plaintiffs provided material and misleading false contact information when applying for the registration of the disputed domain name. *See* 15 U.S.C. § 1125(d)(1)(B)(i)(VII). Because there is no evidence of plaintiffs' supplying any misleading information, this factor does not support a finding of bad faith.

The eighth factor is whether plaintiffs registered or acquired multiple domain names that they knew were identical or confusingly similar to the distinctive marks of others. *See* 15 U.S.C. § 1125(d)(1)(B)(i)(VIII). Defendant contends that plaintiffs' registration of twenty-five domain names that contain the term "Cosmos" is sufficient to satisfy this factor. Yet, of all the additional registered domain names, only two use the term "cosmos" together with a word connoting or describing travel. Furthermore, there is no record evidence of plaintiffs' registering domain names containing trademarks other than "Cosmos." Thus, this factor does not militate strongly in favor of bad faith, but does not negate bad faith either. *Cf.* International Bancorp, 192 F. Supp. 2d 467, 487 **[**36]** (holding that the

[25] *See supra* note 15.

eighth bad faith factor was satisfied by the plaintiffs' registration of forty-three domain names employing both the disputed mark, "Monte Carlo," *and* referencing the industry in which the defendant used the mark, *i.e.,* gambling services).

The ninth factor--the extent to which the mark incorporated in the registrant's domain name is or is not distinctive and famous--supports a conclusion of bad faith. *See* 15 U.S.C. § 1125(d)(1)(B)(i)(IX). **[*626]** Defendant's "Cosmos" mark clearly satisfies this factor as it is registered, incontestable, and distinctive. *See* International Bancorp, 192 F. Supp. 2d 467, 487 **HN20**[] (holding that a mark's distinctive nature is sufficient to satisfy this factor). Thus, defendant has clearly satisfied five of the nine ACPA factors and two others are close decisions. [26]

[37]** **HN21**[] It is important to pursue the analysis of the issue of bad faith factor-by-factor, and it is significant that when this is done here, the factors on balance point persuasively to a finding of bad faith. It is equally important, however, to step back and examine the larger picture to determine whether it is consistent with a finding of bad faith. [27] It is. The larger picture does not reveal an ongoing business entity that, prior to purchasing a domain name, made a reasonable investigation to ensure that the name was non-infringing and then purchased a relatively obscure domain name. To the contrary, the big picture here reflects that plaintiffs did not engage in any business until they purchased the disputed domain name and when they did so, they made no effort to ascertain whether the "Cosmos" name was a registered trademark, as it then had been for eleven years. Nor did plaintiffs make any reasonable investigation to determine whether the name was used in the travel industry. Had plaintiffs conducted the proper investigation, they not only would have easily discovered that defendant had registered the "Cosmos" and "Cosmos Tourama" marks, but they also likely would have seen evidence **[**38]** of the fact that defendant had spent millions of dollars promoting the "Cosmos" mark and had succeeded in generating a large amount of revenue in the travel business ($ 400 million over five years). In the larger picture, these facts loom large, and it is hard to see how they could have been missed by plaintiffs. Furthermore, within three years of purchasing the cosmos.com domain name, plaintiffs, armed with the certain knowledge that many consumers thought the cosmos.com website belonged to defendant, sought to sell defendant space and access to the site for a substantial sum of money. This is closely akin to purchasing a domain name with an intent to exploit it by selling it to the registered owner of the trademark incorporated in the domain name. In sum, the big picture is fully consistent with a finding of bad faith.

[39]** Yet, even were there no ACPA violation, defendant's proof of unfair competition and trademark infringement under the Lanham Act is sufficient to provide defendant the relief it seeks, namely transfer of the cosmos.com domain name and an injunction against the use of "cosmos.com," "cosmotravels," "cosmotravels.com," or any other term confusingly similar thereto. [28] **[*627]** Put differently, even if plaintiffs' conduct does not run afoul the ACPA, defendant would still be entitled to the relief it seeks.

[40] V.**

---

[26] It is also apparent that plaintiffs fall outside the ACPA's "safe harbor," which provides that "bad faith intent… shall not be found in any case in which the court determines that the person believed and had reasonable grounds to believe that the use of the domain name was a fair use or otherwise lawful." 15 U.S.C. § 1125(d)(1)(B)(ii). Nothing in the record reflects that plaintiffs meet this standard.

[27] *See* International Bancorp, 192 F. Supp. 2d 467, 485 (noting that it is permissible to look beyond the nine ACPA factors to determine whether a putative infringer acted with the requisite bad faith); Cnnews.com, 177 F. Supp. 2d at 522 (same).

[28] **HN22**[] The Lanham Act, standing alone without the ACPA, is sufficient to order the transfer of domain names and the issuance of an injunction. *See* Washington Speakers, 33 F. Supp. 2d at 488; McCarthy § 25:71.

Such a result does not render the ACPA meaningless, for it, *inter alia,* (i) reinforces the concept established in cases such as *Washington Speakers* that courts may transfer ownership of infringing domain names, (ii) provides an *in rem* cause of action, and (iii) provides a statutory damages remedy, pursuant to 15 U.S.C. § 1117(d), relief not sought by defendant here.

Defendant also asserts a state common law trademark infringement claim against plaintiffs, but neither party addresses which jurisdiction's substantive law applies or the appropriate elements. [29] **[**41]** For this reason, because the unfair competition laws of many states are similar to those of the Lanham Act, [30] and because federal law adequately provides the relief defendant seeks, it is unnecessary to address defendant's claim of common law unfair competition.

VI.

Thus, plaintiffs engaged in unfair competition and trademark infringement, in violation of *15 U.S.C. §§ 1114*, *1125(a)*, and cybersquatting, in violation of *15 U.S.C. § 1125(d)*. These statutory violations demonstrate that judgment on the counterclaims for defendant and against plaintiffs is appropriate with respect to the domain name cosmos.com and the following remedies should issue:

(i) transfer of the cosmos.com domain name to defendant and

(ii) issuance of an injunction against the use by plaintiffs and plaintiffs' successors in interest of "cosmos.com," "cosmotravels," "cosmotravels.com," or any other term confusingly similar thereto in United States commerce.

Accordingly, plaintiffs' request for declaratory relief must be **[**42]** denied and their complaint dismissed with prejudice.

An appropriate Order has issued.

214 F. Supp. 2d 810 *; 2002 U.S. Dist. LEXIS 14222 **; 2002-2 Trade Cas. (CCH) P73,837

THE OHIO BELL TELEPHONE CO., Plaintiff, v. CORECOMM NEWCO, INC., Defendant, Counterclaimant, and Third-Party Plaintiff v. AMERITECH CORP., et al., Third-Party Defendant

Disposition: [1]** Plaintiff and Third-Party Defendants' Motion to Dismiss Counts Two and Three of Defendant's First Amended Counterclaim denied.

Core Terms

Telecommunications, facilities, customers, competitors, anti trust law, Counterclaim, alleges, motion to dismiss, Sherman Act, antitrust, contractual, monopolist, terms, Interconnection, conversion, misrepresentation, fraudulent, telephone, convert, infrastructure, intentionally, incumbents, provisions, violations, monopoly, compete

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN1[] **Motions to Dismiss, Failure to State Claim**

On a motion brought under *Fed. R. Civ. P. 12(b)(6)*, the court's inquiry is limited to the content of the complaint, although matters of public record, orders, items appearing in the record of the case, and exhibits attached to the complaint may also be taken into account.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

In evaluating a motion for dismissal under *Fed. R. Civ. P. 12(b)(6)*, the district court must consider the pleadings and affidavits in a light most favorable to the non-moving party. However, though construing the complaint in favor of the non-moving party, a trial court will not accept conclusions of law or unwarranted inferences cast in the form of factual allegations.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN3[] Motions to Dismiss, Failure to State Claim

The court will not dismiss a complaint for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. In deciding a *Fed. R. Civ. P. 12(b)(6)* motion, the court must determine not whether the complaining party will prevail in the matter but whether it is entitled to offer evidence to support the claims made in its complaint.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN4[] Motions to Dismiss, Failure to State Claim

If materials outside the pleadings have been attached to a motion to dismiss brought pursuant to *Fed. R. Civ. P. 12(b)(6)* the court has two options. First, the court may exclude the additional material and decide the matter based upon the complaint alone. Second, the court can treat the motion as one for summary judgment and dispose of it as provided in *Fed. R. Civ. P. 56*; *Fed. R. Civ. P. 12(b)(6)*.

HN5[] Introducing Competition, Interconnection Agreements

Title *47 U.S.C.S. §§ 251* and *252* of the Telecommunications Act impose cooperative duties which are incorporated into a interconnection agreement between the incumbent local exchange carriers and their new competitors. The Telecommunications Act requires incumbents to provide services for resale with reasonable pricing and without unreasonable limitations. *47 U.S.C.S. § 251 (b)*. The Telecommunications Act also requires incumbents to negotiate in good faith with new competitors to establish terms under which the competitors will be allowed to access the incumbents services and facilities. Negotiated terms must be submitted to the state public utilities commission for review and approval. *47 U.S.C.S. § 252 (a)*, *(e)*. The commission will also mediate disputes arising in the negotiations, and arbitrate any impasses. *§ 252(a)(2)*, *(b)(1)*. Any disputes not resolved through arbitration may be reviewed in a federal district court. *§ 252(e)(6)*.

HN6[] **Communications, Sherman Act**

Only if *§ 2* of the Sherman Act, codified at *15 U.S.C.S. § 2*, somehow incorporates the more particularized statutory duties the 1996 Act has imposed on incumbent local exchange carriers (ILECs) would the ILECs' alleged failure to comply with the Telecommunications Act of 1996 be, in itself, also an antitrust violation. So far as it goes, this is a correct statement, however, it does not follow that no Telecommunications Act violations can constitute antitrust violations.

Communications Law > ... > Regulated Practices > Introducing Competition > Interconnection Agreements

HN7[] **Communications, Telecommunications Act**

While not every violation of the Telecommunications Act and resulting interconnection agreements can be the basis for an antitrust claim, it is possible, that some actions, such as a failure to provide access to essential facilities on reasonable and non-discriminatory terms, could violate both the Telecommunications Act (through violations of an interconnection agreement) and the Federal Antitrust laws. Although the duties imposed on incumbent providers by the Telecommunications Act are not coterminous with the duty of a monopolist to refrain from exclusionary practices, neither are those duties mutually exclusive.

Governments > Legislation > Interpretation

HN8[] Legislation, Interpretation

The principle that more specific legislation should take precedence over the general laws, where the two are covering precisely the same field does not apply if the legislature intended the general act to retain independent force.

Antitrust & Trade Law > Regulated Industries > Communications

Communications Law > Federal Acts > Telecommunications Act > General Overview

Communications Law > Federal Acts > General Overview

HN11[] Regulated Industries, Communications

Congress has clearly expressed its intention that the Telecommunications Act was not to interfere in any way with the application of the antitrust laws. Therefore, if an act or failure to act constituted an antitrust violation prior to the enactment of the Telecommunications Act, it should still constitute a violation of the antitrust laws following the enactment. If an act or failure to act did not constitute a violation of the antitrust laws prior to the enactment of the Telecommunications Act, it still does not constitute a violation of the antitrust laws, though it may form the basis for a claim under the Act itself.

Governments > Legislation > Interpretation

HN12[] Legislation, Interpretation

When there are two legislative acts addressing the same subject, and Congress does not provide a clear and manifest intent to repeal one of them, the rule is to give effect to both if possible.

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

Communications Law > Federal Acts > Telecommunications Act > General Overview

Antitrust & Trade Law > Regulated Industries > Communications

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

HN13[] **Communications, Sherman Act**

The United States Supreme Court has also long noted that repeals of the antitrust laws by implication from a regulatory statute are strongly disfavored, and have only been found in cases of plain repugnancy between the antitrust and regulatory provisions.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN14[] **Sherman Act, Claims**

Generally a plaintiff can establish a violation of *Section 2* of the Sherman Act, codified at *15 U.S.C.S. § 5*, by proving two elements (1) the possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of that power, as distinguished from growth or development as a consequence of superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN15[] **Monopolies & Monopolization, Actual Monopolization**

A monopolist generally has no duty to cooperate with its competitors, however, a monopolist may not, of course, use its market power, whether obtained lawfully or not, to prevent or impede competition in the relevant market. The United States Supreme Court has explained that the absence of an unqualified duty to cooperate does not mean that every time a firm declines to participate in a cooperative venture, that decision may not have evidentiary significance, or that it may not give rise to liability in certain circumstances. The high value that we have placed on the right to refuse to deal with other firms does not mean that the right is unqualified.

Antitrust & Trade Law > Regulated Industries > Communications

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN16[] Regulated Industries, Communications

A monopolist has a duty to provide competitors with reasonable access to "essential facilities" which are facilities that are essential to effective competition and are under the control of the monopolist. Under the antitrust laws, those in possession of essential facilities must allow them to be shared on fair terms, unless such sharing would be impractical or would inhibit their ability to serve their customers adequately.

Antitrust & Trade Law > Regulated Industries > Communications

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

HN17[] Regulated Industries, Communications

The elements necessary to establish an essentials facility claim are: (1) control of the essential facility by a monopolist; (2) the competitor's inability practically or reasonably to duplicate the essential facility; (3) denial of the use of the facility to a competitors; and (4) the feasibility of providing the facility. Access to essential facilities must be provided upon such just and reasonable terms and regulations as will, in respect of use, character and cost of service, place every competitor upon as nearly an equal plane as may be with respect to expenses and charges as that occupied by the proprietary companies.

Torts > ... > Fraud & Misrepresentation > Negligent Misrepresentation > Remedies

HN18[] Contracts Law, Breach

The economic loss doctrine prevents a party from suing in tort when the only duty breached is a contractual duty and the only damages claimed are direct or indirect economic losses due to the breach. The doctrine applies only if the claimant does not allege a separate and unique duty not created by contract which would exist even in the absence of a contract.

Opinion

[*812] MEMORANDUM OPINION

This matter is before the Court on **[**2]** a Motion to Dismiss Counts II and III of Defendant's First Amended Counterclaim, filed on behalf of Plaintiff, The Ohio Bell Telephone Company and Third-Party Defendants, Ameritech Corporation, Ameritech Services, Inc., SBC Communications, Inc., SBC Operations, Inc., and SBC Services, Inc. (collectively "SBC" or "Counterdefendants"). The Counterdefendants have moved for a dismissal of CoreComm Newco, Inc.'s ("CoreComm") claim for maintenance of a monopoly under Section two of the Sherman Act, *15 U.S.C. § 2*, and for fraudulent and negligent misrepresentation. After careful consideration of the pleadings and a review of all relevant statutes and cited authority, the Counterdefendants' Motion to Dismiss is denied.

STANDARD OF REVIEW

HN1[] On a motion brought under *Fed.R.Civ.P. 12(b)(6)*, this Court's inquiry is limited to the content of the complaint, although matters of public record, orders, items appearing in the record of the case, and exhibits attached to the complaint may also be taken into account. *See* *Chester County Intermediate Unit v. Pennsylvania Blue Shield, 896 F.2d 808 (3rd Cir. 1990)*.

HN2[] In evaluating a motion for dismissal under **[**3]** *Rule 12(b)(6)*, the district court must "consider the pleadings and affidavits in a light most favorable to the [non-moving party]." *Jones v. City of Carlisle, Ky., 3 F.3d 945, 947 (6th Cir. 1993)* (quoting *Welsh v. Gibbs, 631 F.2d 436, 439, 19 Ohio Op. 3d 333 (6th Cir. 1980))*. However, though construing the complaint in favor of the non-moving party, a trial court will not accept conclusions of law or unwarranted inferences cast in the form of factual allegations. *See* *City of Heath, Ohio v. Ashland Oil, Inc., 834 F. Supp. 971, 975 (S.D.Ohio 1993)*.

HN3[] This Court will not dismiss a complaint for failure to state a claim "unless it appears beyond doubt that the plaintiff can **[*813]** prove no set of facts in support of his claim which would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1980)*. In deciding a *Rule 12(b)(6)* motion, this Court must determine not whether the complaining party will prevail in the matter but whether it is entitled to offer evidence to support the claims made in its complaint. *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683, 71 Ohio Op. 2d 474 (1974)*.

HN4[] If materials outside **[**4]** the pleadings have been attached to a motion to dismiss brought pursuant to *Fed.R.Civ.P. 12(b)(6)* this court has two options. First, the court may exclude the additional material and decide the matter based upon the complaint alone. Second, the court can treat the motion as one for summary judgment and dispose of it as provided in *FED.R.CIV.P. 56*. *Carr v. Armstrong Air Conditioning, Inc., 817 F. Supp. 54, 55 (N.D.Ohio 1993)*; *FED.R.CIV.P. 12(b)(6)*. In this case, the Court will treat the motion as a true motion to dismiss limited to the allegations and facts set forth in the counterclaim.

FACTUAL AND LEGAL OVERVIEW

[1]

CoreComm competes with SBC to provide local telephone **[**5]** services (including exchange access, Internet access, facsimile transmissions, data transmissions, caller I.D. services, call waiting, call forwarding, voicemail and other services) to residential and business customers in greater Cleveland and greater Columbus. SBC allegedly serves about 95 percent of residential consumers and 90 percent of the business customers in these areas.

SBC controls the "last mile" of telephone infrastructure connecting individual customers to the rest of the telephone network, as well as other forms of infrastructure necessary for the provision of local telephone service in greater Cleveland and greater Columbus. Duplication of this infrastructure is alleged to be prohibitively expensive for companies wishing to break into the local phone service business, though CoreComm does admit that over time SBC competitors could acquire their own facilities and could profitably develop alternatives to significant segments of this local infrastructure. Access to this infrastructure is allegedly essential to any company wishing to compete in the provision of local exchange service and exchange access services.

In November of 1997, SBC Ameritech Ohio ("SBC") [2] and **[**6]** OCOM Corporation ("OCOM") entered into a contract whereby SBC was to provide a variety of services to OCOM. OCOM assigned its interests under the Contract to CoreComm in June of 1998. The contract obligates SBC to (1) provide CoreComm with access to SBC's network elements, including provisioning, pricing, billing, maintenance and performance standards for such access; (2) provide CoreComm with services for resale; (3) provide CoreComm with collocation, including pricing, billing and performance standards for collocation; and (4) provide CoreComm with promotional discounts for certain services. The contract further defines performance measurements and standards and sets time frames within which certain services are to be performed.

[*814] There have been a multitude of disputes relating to the parties' duties and performance under the contract since it was implemented in 1998. The parties have communicated extensively **[**7]** about the disputes and have attended mediation through the Public Utilities Commission of Ohio's ("PUCO") dispute resolution program. In July of 2001, in an attempt to collect monies allegedly owed by CoreComm under the Contract, SBC filed a complaint with the PUCO and shortly thereafter filed a complaint in the Court of Common Pleas in Cuyahoga County, Ohio. CoreComm had the common pleas court complaint removed to this Court, and SBC then amended its Complaint to consolidate the claims it brought in both the Common Pleas case and the PUCO case into a single action.

According to CoreComm's counterclaim, SBC has failed to live up to the terms of the Contract; imposed unreasonable fees for its services; charged for services not properly administered; provided faulty service and support; provided inaccurate billing; overcharged competitors; caused customers to be unnecessarily without service for extended periods of time if they chose to switch from SBC to CoreComm; and erroneously rejected, limited, and delayed service and customer change orders. CoreComm alleges that none of these quality and service issues arise with SBC 's direct customers, but appear only in connection with the **[**8]** wholesale services provided to SBC's competitors and their customers. More than seventeen companies who attempted to compete with SBC have filed for bankruptcy, allegedly as a result of SBC's discriminatory and improper handling of those companies' service and access agreements.

CoreComm further alleges that SBC has denied CoreComm access to its shared transport network preventing it from being able to route inter LATA [3] toll traffic and, therefore, requiring it to toll traffic through third-party interexchange carriers, which is more expensive and limits the scope of CoreComm's local coverage. Despite having agreed to provide such access, SBC has argued that the denial is warranted before the PUCO and before

---

[1] The facts as stated in this Memorandum and Order are taken from Defendant's Counterclaim and should not be construed as findings of this Court. In a motion to dismiss, the Court is obligated, for the purposes of that motion, to accept as true the facts set forth by the non-moving party, in this case, the Defendant.

[2] SBC Ameritech Ohio is a trade name under which The Ohio Bell Telephone Company conducts its business.

[3] CoreComm explains that a LATA is a geographic market section that was established when AT&T was broken up. There are six LATA's in Ohio.

the Federal Communications Commission ("FCC"). All of these failures, delays and hurdles are alleged to have intentionally raised CoreComm's and other competitors' costs to a point where they cannot effectively compete, and to have intentionally interfered with CoreComm's customer relations. The Counterclaim also sets forth other allegedly anti-competitive behavior of SBC.

[9]** In addition to its claims of anti-competitive behavior CoreComm claims that SBC made fraudulent or negligent misrepresentations upon which CoreComm relied to its detriment. Primarily these representations centered around SBC's assurances that it could, without disrupting customer service, convert CoreComm customers' service from resale to an arrangement called UNE-P. UNE-P is a form of service that would allow CoreComm to provide service using a combination of elements in SBC's network and without need of its own facilities, but at a lesser cost than pure resale. SBC and CoreComm contracted for a UNE-P service arrangement in 1998. CoreComm first considered converting customers to UNE-P service in 1999 but did not go forward with this plan because it knew it would have to pay a large conversion charge and it "knew that Counterdefendants were not prepared to provide a technically workable UNE-P **[*815]** product." In 2001 SBC informed CoreComm that it was ready to convert to UNE-P, however CoreComm alleges that SBC had never tested the transfer process in Ohio and as a result virtually ever customer who made the conversion lost some or all of its service in the process.

CoreComm alleges that **[**10]** SBC knew or should have known that it was incapable of performing an efficient conversion, and that SBC had the ability to make effective conversions had it wanted to do so. When, despite its apparent inability to perform the service, SBC nonetheless misrepresented to CoreComm that it was ready and able to make the conversions, CoreComm relied on these representations and allowed thousands of customers to convert. CoreComm allegedly suffered loss of clients and goodwill due to the poor implementation of the conversions.

ANALYSIS

I. Count Two: Illegal Monopoly in Violation of *Section 2* of the Sherman Act

SBC contends that this case is a simple contract action and that CoreComm's claim for monopolization should fail because it rests solely on the allegation that SBC did not "more actively help[] CoreComm to compete less expensively and more efficiently than it already does for telecommunications customers in Ohio." According to SBC any affirmative duty to aid competitors in the telecommunications industry stems from either a contractual responsibility or a duty imposed by the Telecommunications Act of 1996, not from any ***antitrust law***.

SBC is correct that many **[**11]** of the complaints set forth in CoreComm's Counterclaims stem from violations of the Interconnection Agreement and are, therefore, subject to the provisions of the The Telecommunications Act of 1996 ("Telecommunications Act"). ***HN5***[] *Sections 251* and *252* of the Telecommunications Act impose cooperative duties which are incorporated into a interconnection agreement between the incumbent local exchange carriers and their new competitors. The Telecommunications Act requires incumbents to provide services for resale with reasonable pricing and without unreasonable limitations. TCA *§ 251 (b)*. The Telecommunications Act also requires incumbents to negotiate in good faith with new competitors to establish terms under which the competitors will be allowed to access the incumbents services and facilities. Negotiated terms must be submitted to the state public utilities commission for review and approval. TCA *§ 252 (a)*, *(e)*. The commission will also mediate disputes arising in the negotiations, and arbitrate any impasses. TCA *§ 252(a)(2)*, *(b)(1)*. Any disputes not resolved through arbitration may be reviewed in a federal district court. TCA *§ 252(e)(6)*.

CoreComm, however, has articulated claims **[**12]** not only for breach of the Interconnection Agreement and violation of the Telecommunications Act, but has further alleged that SBC's actions and failures to act violate Section two of the Sherman Antitrust Act, *15 U.S.C. § 2*. SBC argues that actions which violate the Telecommunications Act, or breach an interconnection agreement cannot be the basis for an antitrust claim under the Sherman Act. Courts across the country appear to be split in their approach to this question.

SBC relies heavily on the *Goldwasser* decision out of the Seventh Circuit. In *Goldwasser v. Ameritech Corporation, 222 F.3d 390 (7th Cir. 2000)*, the Court of Appeals dismissed a consumer claim for a violation of the Sherman Antitrust Act *§ 2*. The *Goldwasser* Court reviewed the history of telecommunications regulation, including the Telecommunications Act, and **[*816]** reviewed the antitrust case law which generally does not impose upon a monopolist any duty to assist or even deal with its competitors. The court held that "***HN6***[] only if *Section 2* [of the Sherman Act] somehow incorporates the more particularized statutory duties the 1996 Act has imposed on ILECs like Ameritech would **[**13]** Ameritech's alleged failure to comply with the 1996 Act be, in itself, also an antitrust violation." So far as it goes, this is a correct statement, however, it does not follow, as the *Goldwasser* decision seems to imply, that no Telecommunications Act violations can constitute antitrust violations.

HN7[] While not every violation of the Telecommunications Act and resulting interconnection agreements can be the basis for an antitrust claim, it is possible, that some actions, such as a failure to provide access to essential facilities on reasonable and non-discriminatory terms, could violate both the Telecommunications Act (through violations of an interconnection agreement) and the Federal Antitrust laws. *See generally, Southern Pacific Communications v. AT & T, 238 U.S. App. D.C. 309, 740 F.2d 980 (D.C. Cir. 1984)*(stating that the antitrust laws prohibit unreasonable and discriminatory restrictions on access to essential facilities) (citations omitted). Although, as the *Goldwasser* court noted, the duties imposed on incumbent providers by the Telecommunications Act are not "coterminous with the duty of a monopolist to refrain from exclusionary practices," neither **[**14]** are those duties mutually exclusive. *Cf. Goldwasser, 222 F.3d at 399*, *Law Offices of Curtis V. Trinko, LLP v. Bell Atlantic Corporation, 305 F.3d 89, 106-107 (2nd Cir. 2002)*.

The *Goldwasser* court based its decision on the maxim that more specific legislation should take precedence over the general laws, where the two are covering precisely the same field. *222 F.3d at 401*. However, as many courts have noted, "***HN8***[] this principle does not apply if the legislature intended the general act to retain independent force." *See, e.g., Watson v. Fraternal Order of Eagles, 915 F.2d 235 (6th Cir. 1990)*. ***HN9***[] The Historical and Statutory Notes of the Telecommunications Act explicitly state that "nothing in this Act or the amendments made by this Act shall be construed to modify, impair, or supersede the applicability of any of the antitrust laws." *47 U.S.C.A. § 152*, Applicability of Consent Decrees and Other Laws (b)(1). ***HN10***[] Similarly, *Section 601(c)(1)* states that "this Act and the amendments made by this Act shall not be construed to modify, impair, or supercede Federal, State, or local law unless expressly so provided **[**15]** in such Act or amendments." *47 U.S.C.A. § 601(c)(1)*. Thus, ***HN11***[] Congress has clearly expressed its intention that the Telecommunications Act was not to interfere in any way with the application of the antitrust laws. Therefore, if an act or failure to act constituted an antitrust violation prior to the enactment of the Telecommunications Act, it should still constitute a violation of the antitrust laws following the enactment. If an act or failure to act did not constitute a violation of the antitrust laws prior to the enactment of the Telecommunications Act, it still does not constitute a violation of the antitrust laws, though it may form the basis for a claim under the Act itself. [4]

[16]** ***HN12***[] When there are two legislative acts addressing the same subject, and Congress does not provide a clear and manifest intent **[*817]** to repeal one of them, "the rule is to give effect to both if possible." *Morton v. Mancari, 417 U.S. 535, 550-551, 41 L. Ed. 2d 290, 94 S. Ct. 2474*. ***HN13***[] The Supreme Court has also long noted that "repeals of the antitrust laws by implication from a regulatory statute are strongly disfavored, and have only been found in cases of plain repugnancy between the antitrust and regulatory provisions." *Otter Tail Power Co. v. United States, 410 U.S. 366, 372, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973)*(quoting *United States v. Philadelphia National Bank, 374 U.S. 321, 350-351, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963)*. [5] Here, both the

---

[4] The parties also included a clause in their Interconnection Agreement in which they agreed that "no remedy under this Agreement is intended to be exclusive and each and every remedy shall be cumulative and in addition to any other rights or remedies now or hereafter existing under applicable law or otherwise." Interconnection Agreement § 26.6.

[5] Prior to the 1996 Telecommunications Act, it was well settled that there was no repugnancy between the antitrust laws and the regulatory scheme that was then applicable to the telecommunications industry. *See Southern Pac. Communications Co. v. AT&T, 238 U.S. App. D.C. 309, 740 F.2d 980, 999-1000(D.C. Cir. 1984)*(citations omitted). While the 1996 Telecommunications

Telecommunications Act and the Sherman Act set forth responsibilities for monopolists.. The two acts have different scope, different remedies, and different procedural requirements, yet they are complimentary in purpose. These acts are clearly not repugnant, and it is possible to give effect to both. Thus, in order to determine whether the Plaintiff's motion to dismiss Count Two of the Amended Counterclaim should be granted, this Court should **[**17]** evaluate the Counterclaim to see if it would state a claim for a violation of Section two of the Sherman Act if the Interconnection Agreement and the Telecommunications Act did not exist.

HN14[] Generally a plaintiff can establish a violation of *Section 2* of the Sherman Act by proving two elements "(1) the possession of monopoly power in the relevant market; and (2) the willful acquisition or maintenance of **[**18]** that power, as distinguished from growth or development as a consequence of superior product, business acumen, or historic accident." *Volvo N. Am. Corp. v. Men's Inter. Prof'l Tennis Council, 857 F.2d 55, 73 (2d Cir. 1988)*(citations omitted). CoreComm has clearly alleged facts that, taken in the light most favorable to it, would support a claim that SBC has monopoly power in an identified market. Therefore, the only question is whether it has stated a claim that SBC has willfully maintained or attempted to maintain that monopoly power by a means other than its actual superiority in product, service, and business development.

HN15[] A monopolist generally has no duty to cooperate with its competitors, however, "[a] monopolist may not, of course, use its market power, whether obtained lawfully or not, to prevent or impede competition in the relevant market" *United States Football League v. National Football League, 842 F.2d 1335, 1360-61 (2d Cir. 1988)*(citations omitted). The Supreme Court has explained that

> the absence of an unqualified duty to cooperate does not mean that every time a firm declines to participate in a cooperative venture, that **[**19]** decision may not have evidentiary significance, or that it may not give rise to liability in certain circumstances. . . . The high value that we have placed on the right to refuse to deal with other firms does not mean that the right is unqualified.

Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 601, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985).

HN16[] A monopolist has a duty to provide competitors with reasonable access to "essential facilities" which are facilities that are essential to effective competition **[*818]** and are under the control of the monopolist. *See Southern Pac. Communications Co. v. AT&T, 740 F.2d at 1009*. Under the antitrust laws, those in possession of essential facilities "must allow them to be shared on fair terms," *Directory Sales Management Corp. v. Ohio Bell Tel. Co., 833 F.2d 606, 612 (6th Cir. 1987)*, unless "such sharing would be impractical or would inhibit [their] ability to serve [their] customers adequately." *Hecht v. Pro-Football, Inc., 187 U.S. App. D.C. 73, 570 F.2d 982, 992-993 (D.C. Cir. 1977)*.

HN17[] The elements necessary to establish an essentials facility claim are: (1) **[**20]** control of the essential facility by a monopolist; (2) the competitor's inability practically or reasonably to duplicate the essential facility; (3) denial of the use of the facility to a competitors; and (4) the feasibility of providing the facility. *Ideal Dairy Farms, Inc. v. John Labatt, Ltd., 90 F.3d 737, 748 (3d Cir. 1984)*. Access to essential facilities must be provided 'upon such just and reasonable terms and regulations as will, in respect of use, character and cost of service, place every [competitor] upon as nearly an equal plane as may be with respect to expenses and charges as that occupied by the proprietary companies." *Southern Pac. Communications Co., 740 F.2d at 1009*(quoting *United States v. Terminal R.R. Assoc., 224 U.S. 383, 56 L. Ed. 810, 32 S. Ct. 507*, (1912)).

CoreComm has alleged (1) that SBC is a monopolist, (2) that SBC has control of allegedly "essential facilities;" (3) that SBC has in some cases outright denied CoreComm access to such facilities, and in others cases has denied access under just and reasonable terms; and (4) that it is feasible for SBC to provide just and reasonable access to the facilities in question. Although SBC **[**21]** may eventually be able to show that the facilities in question are not essential, that access was provided under just and reasonable terms, or that it was somehow infeasible to provide such access, these defenses are issues of fact which cannot be decided on a 12(b)(6) motion to dismiss.

Act added additional requirements, both the 1996 Act and the prior regulatory scheme subjected rates or tariffs, and other conditions for interconnections and other access to local distribution facilities to FCC approval. *Id.*

CoreComm argues that its Counterclaim also alleges other anti-competitive activities that could form the basis for a violation of Section two of the Sherman Act including, disruption of CoreComm operations, price-quality squeeze, sham litigation, and a general failure to deal. While these each state a potential means of violating Section two, they are not discreet claims in the Counterclaim. Therefore, having found that a claim has been stated under Section two, the Court need not pass on the validity of each of these individual allegations. Nonetheless, it is doubtful that these alleged activities would support an antitrust claim in the absence of an essential facilities violation in this case. [6] The charges of disruption of CoreComm operations, general refusal to deal, and price-quality squeeze are all premised on the same allegations that support the essential facilities claim. If the facilities **[**22]** at issue are not essential to competition, then SBC has no duty to deal with CoreComm reasonably or unreasonably, or to provide any particular level of quality, service or pricing under the antitrust laws. [7] Any **[*819]** violation of a duty arising solely from the Telecommunications Act or the Interconnection Agreement, does not state a claim under the antitrust laws.

[23]** As neither side has been able to cite to a case in which a charge of "sham litigation" was upheld where the complaining party actually initiated the proceedings complained of, this Court would not find that a the sham litigation charge states a claim for a Sherman Act Section two violation under these circumstances. CoreComm's grievance on this matter is really that SBC violated its contract, causing CoreComm to have to sue, which is a different type of harm than CoreComm would have suffered if SBC, itself, initiated fraudulent proceedings thus using the governmental process as an affirmative anticompetitive weapon. To hold otherwise would be to create a potential cause of action for "sham litigation" against any defendant who intentionally breached a contract or otherwise acted in a manner which allowed them to be sued. As for claims that SBC intentionally and baselessly prolonged litigation, CoreComm, itself, pointed out, there are other remedies, including Rule 11 sanctions, for baseless motions filed by SBC within a procedure initiated by CoreComm.

Although CoreComm has stated a claim for a violation of Section two of the Sherman Act, this does not mean that the claim will be **[**24]** successful. In order to prevail, or indeed to defeat any possible summary judgment motions that may be filed after further factual development, CoreComm will have to produce evidence proving that the facilities it has been denied are indeed essential to competition. Denial of fair access to non-essential facilities, and the provision of inferior quality or service, no matter how unreasonable, would not equal a violation of the antitrust laws under these circumstances.

II. Count Three: Fraudulent or Negligent Misrepresentation

SBC asserts that CoreComm's claim for fraudulent or negligent misrepresentation is in reality a breach of contract claim alleging only economic loss, and that this count is, therefore, barred by the economic loss doctrine. ***HN18***[] The economic loss doctrine prevents a party from suing in tort when the only duty breached is a contractual duty and the only damages claimed are direct or indirect economic losses due to the breach. *See* *Picker Int'l v. Mayo Found., 6 F. Supp. 2d 685, 689 (N.D. Ohio 1998)*. The doctrine applies only if the claimant does not allege a "separate and unique duty not created by contract which would exist even in the **[**25]** absence of a contract." *Textron Fin. Corp. v. Nationwide Mut. Ins. Co., 115 Ohio App. 3d 137, 150, 684 N.E.2d 1261 (Summit App. 1996)*.

SBC and CoreComm contracted for a UNE-P service arrangement in 1998. CoreComm first considered converting customers to UNE-P service in 1999 but did not go forward with this plan because it knew it would have to pay a

[6] It is possible that although these activities don't state independent antitrust claims in the context of this case, they could be additional evidence of SBC's alleged intent to maintain its monopoly.

[7] An exception to the general rule that competitors, outside of an essential facilities claim, have no duty to assist or even deal with their competitors was established in *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*. This exception, however, does not apply under the facts set forth in the Counterclaim. In *Aspen,* the competitors had a previous history of voluntary cooperation in a joint marketing venture that had proven profitable for both parties. In this case, there is no history of prior cooperation, and no allegation that SBC's cooperation with CoreComm would be profitable for SBC. The only basis alleged for any agreement or cooperation between SBC and CoreComm has been forced through regulation.

large conversion charge and it "knew that Counterdefendants were not prepared to provide a technically workable UNE-P product." In 2001 SBC informed CoreComm that it was ready to convert to UNE-P, however CoreComm alleges that SBC had never tested the transfer process in Ohio and as a result virtually ever customer who made **[*820]** the conversion lost some or all of its service in the process. CoreComm further alleges that SBC knew or should have known at the time it made this representation that it was false, and that CoreComm would rely on it.

The Court has not been provided with a copy of the provisions of the contract relating to the UNE-P service agreement. It is possible that the claims alleged may be addressed by the contract language, which could then prevent CoreComm from recovering economic damages under a theory of **[**26]** misrepresentation. However, without proof that the issues allegedly misrepresented were part of the contractual terms, CoreComm has stated a claim for negligent or fraudulent misrepresentation. The contractual duties alleged in the Counterclaim apply to CoreComm's claims that UNE-P service was not timely provided and that it was not provided pursuant to the contractual terms. However, CoreComm has stated a separate allegation that, regardless of SBC's contractual promises, CoreComm withheld its requests for transfer to UNE-P service for nearly three years because it knew SBC was not prepared to effectuate those changes. When SBC affirmatively represented (outside of the contractual promises) that it was indeed ready to make the changes, CoreComm relied on that representation, and began requesting UNE-P service changes. The harm CoreComm seeks to recover, according to the Counterclaim, is the harm resulting from making those changes before SBC was prepared to handle them, not the harm from waiting additional years for SBC to become ready. The latter is a contractual claim, the prior is a claim based on a general duty to avoid negligently or intentionally misrepresenting facts upon which **[**27]** another party can be expected to rely.

Thus, though it is possible that the facts will not bear out the claim, or that contractual provisions not yet known to the court actually govern SBC's representations of readiness, at this stage CoreComm has stated a claim for negligent or fraudulent misrepresentation. [8] Counterdefendants' Motion to Dismiss Count Three is, therefore, denied.

CONCLUSION

For the reasons set forth above. Plaintiff and Third-Party Defendants' Motion to Dismiss Counts Two and Three of Defendant's First Amended Counterclaim are hereby DENIED.

IT IS SO ORDERED.

DONALD C. NUGENT

[28]** United States District Judge

DATED: July 25, 2002

ORDER

Plaintiff, The Ohio Bell Telephone Company and Third-Party Defendants, Ameritech Corporation, Ameritech Services, Inc., SBC Communications, Inc., SBC Operations, Inc., and SBC Services, Inc. (collectively "SBC" or "Counterdefendants") have moved for a dismissal of Counts Two and Three of CoreComm Newco, Inc.,'s ("CoreComm")'s Counterclaim and Third Party Complaint. After careful consideration of the pleadings and a review

---

[8] None of the cases cited by SBC in support of its motion to dismiss addressed a 12(b)(6) motion to dismiss. Though in the cited cases, the facts did not bear out a distinction between the contract claims at issue and the additional misrepresentation claims, these cases were decided at the summary judgment stage or later after there had been more opportunity for factual development of the claims.

of all relevant law, for the reasons set forth in the accompanying Memorandum Opinion, the Counterdefendants' Motion to Dismiss is DENIED.

IT IS SO ORDERED.

Opinion by: DIANA GRIBBON MOTZ

Opinion

[*283] DIANA GRIBBON MOTZ, Circuit Judge:

Two United States companies that purchase rubber thread brought this private antitrust action, alleging a price-fixing conspiracy led by Southeast Asian producers **[**2]** of the thread. After an eight-day trial, the jury returned a special verdict, finding that although one or more of the producers engaged in a conspiracy to fix prices that was intended to affect United States commerce, that conspiracy had no "substantial effect" on this country's commerce. The district court then entered judgment on the verdict for the producers. The purchasers appeal, principally contending that the substantial-effect test applies only to "wholly" foreign conduct, and so does not govern this case because the rubber-thread conspiracy resulted in the sale of price-fixed goods directly into the United States. Because the conspiracy involved primarily foreign conduct, we hold that the district court did not abuse its discretion in applying the substantial-effect test. Accordingly, we affirm.

I.

In 1997, Dee-K Enterprises, Incorporated, and Asheboro Elastics Corporation (collectively Dee-K), United States corporations that purchase rubber thread to make elastic fabric, brought this class action, alleging a conspiracy to fix the price of rubber thread in the United States, in violation of the Sherman Act. *See* 15 U.S.C.A. § 1 (West 1997). Rubber **[**3]** thread, also called extruded rubber thread or elastic rubber thread, and sometimes abbreviated as "ERT," is manufactured in Southeast Asia and used to make elastic fabric, bungee cords, toys, and other products.

Dee-K named as defendants nine Southeast Asian producers of rubber thread and some of their subsidiaries and distributors in the United States. Five of the producers are Malaysian companies: Heveafil Sendirian Berhad, Filmax Sendirian Berhad, Rubfil Sendirian Berhad, Rubberflex Sendirian Berhad, and Filati Lastex Sendirian **[*284]** Berhad. (The suffix "Sendirian Berhad," used in Malaysia and abbreviated "Sdn. Bhd.," translates as "private limited company.") Two are Indonesian: PT. Bakrie Rubber Industries and PT. Perkebunan III. Two are Thai: Longtex Rubber Industries Company, Limited, and Natural Rubber Thread Company, Limited. Dee-K also named as defendants the United States subsidiaries of three Malaysian producers (Rubfil USA, Incorporated, Flexfil Corporation of Rhode Island, Flexfil Corporation, and Filati Lastex Elastofibre USA, Incorporated) and two United States independent distributors used by other producers (Consortium International and JPS Elastomerics).

In its complaint, **[**4]** Dee-K alleged that the members of the class it sought to represent, domestic purchasers of rubber thread, paid "artificially high and non-competitive prices" for rubber thread, that they "were deprived of free and open competition in the market" for rubber thread, and that "competition among defendants" in the United States sale of rubber thread "was restrained." As to injury, Dee-K contended that "plaintiffs . . . purchased substantial quantities of extruded rubber thread from defendants."

Dee-K originally filed this action in the Eastern District of Virginia. Following a number of early rulings not relevant to our disposition of this appeal, the district court determined that venue did not lie in Virginia and transferred the case to the Western District of North Carolina. *See* Dee-K Enters. v. Heveafil Sdn. Bhd., 985 F. Supp. 640 (E.D. Va.

1997). Prior to trial, that court denied class certification. After most defendants settled, declined to appear, or were dismissed, the case against the five Malaysian producers and the United States subsidiary of one of them (Rubfil USA), none of whom now contest personal jurisdiction, *see* Dee-K Enters. v. Heveafil Sdn. Bhd., 174 F.R.D. 376 (E.D. Va. 1997), **[**5]** proceeded to trial before a jury.

Dee-K introduced substantial evidence at trial of horizontal price fixing among the producers. This price fixing apparently originated at least in part in reaction to 1991 threats by the United States government to punish Southeast Asian rubber-thread producers for violating antitrust prohibitions against "dumping." "Dumping" occurs when a foreign producer injures a United States producer by selling a product in the United States at less than what would be "fair value" in the foreign producer's home market. *See* 19 U.S.C.A. § 1673 (West 1999) (authorizing an "antidumping duty"). ***HN1***[] The United States Department of Commerce may impose tariffs on dumpers to bring the United States price into line with the price in the producer's home market. *See id.* Thus, if a product sells for $ 1 in the home market, it warrants dumping duties if it sells for less than $ 1 in the United States. Of course, avoidance of dumping penalties in itself does not provide foreign producers with a license to fix prices in violation of United States antitrust laws. ***HN2***[] Although to avoid dumping a company must price goods at or above the price in its own **[**6]** home market, it may not agree with its competitors to fix prices, restricting the market movement of prices in the United States market. *See* Dee-K Enters. v. Heveafil Sdn. Bhd., 982 F. Supp. 1138, 1156 & n.45 (E.D. Va. 1997); *see also* United States v. Nippon Paper Indus., 62 F. Supp. 2d 173, 180 (D. Mass. 1999) (noting that foreign companies threatened with anti-dumping provisions must "walk a fine line").

In December 1991, responding to the dumping accusations, officials of the Malaysian producers representing Heveafil, Rubfil, Rubberflex, and Filati Lastex met with a Malaysian government official and **[*285]** agreed to fix rubber-thread prices throughout the world. Later joined by other rubber-thread producers from Malaysia, Indonesia, and Thailand, they continued to meet for several years, at conventions and in other settings, to discuss and implement these and other efforts to fix prices. They met regularly between 1992 and 1995 -- in Kuala Lumpur, in Columbo, in Bali, and in Penang. They never met in the United States.

Throughout the period during which they met to fix prices, the Malaysian producers sold their rubber thread around the world, distributing **[**7]** it to the United States market in three different ways. Heveafil and Filmax sold to the United States through a division of Heveafil based in the United States. Rubfil, Rubberflex, and Filati Lastex all sold to large United States customers directly and to smaller customers through wholly owned subsidiaries incorporated in the United States, all four of which were named as defendants. *See* Dee-K, 982 F. Supp. at 1142. The record does not disclose the United States share of the global market.

From 1991 to 1996, United States prices for rubber thread (adjusted for inflation using the producer price index) generally rose, with some decreases on various scales. Dee-K attributes these increases to the price-fixing conspiracy. The producers attribute them to an antidumping order entered by the United States Department of Commerce in 1992 that imposed a duty on rubber thread and to increases in the price of raw materials, particularly the price of latex.

At the conclusion of an eight-day trial, the district court submitted a special verdict form to the jury. The verdict form included two questions: (1) Was there "a conspiracy . . . to fix the prices of extruded rubber thread, **[**8]** which was intended to have a substantial effect in the United States"? (2) If so, did "the conspiracy have a substantial effect in the United States"?

The jury answered the first question in the affirmative, finding a conspiracy to fix prices with the intent of affecting the United States. But the jury answered the second question in the negative, finding that the conspiracy did not have a substantial effect in the United States. In accordance with this verdict, the court entered judgment for the producers.

Dee-K moved for a new trial pursuant to Rule 59, arguing that the jury's verdict as to the lack of a substantial effect on United States commerce was contrary to the weight of the evidence. The district court denied the motion and simultaneously denied a late-filed Rule 50 motion for judgment as a matter of law on the substantial-effect question.

Dee-K appeals, contending that the substantial-effect test (at least as stated in the jury instructions and special verdict) does not govern this case. [1]

[9]** II.

In *Hartford Fire Insurance Co. v. California*, the Supreme Court noted that **[*286]** "it is well established that the Sherman Act applies to foreign conduct that was meant to produce and did in fact produce some substantial effect in the United States." *509 U.S. 764, 796, 125 L. Ed. 2d 612, 113 S. Ct. 2891 (1993)* (citations omitted).

Dee-K argues that this statement in *Hartford Fire* does not govern the case at hand, primarily because the price-fixing conspiracy it proved does not constitute "foreign conduct." Dee-K contends that instead ***HN3***[] the jurisdictional test used in domestic antitrust cases controls here; in domestic cases a plaintiff need only demonstrate "that the defendant's activity is itself *in* interstate commerce, or . . . that it has an effect on some other appreciable activity demonstrably *in* interstate commerce." *See McLain v. Real Estate Bd. of New Orleans, 444 U.S. 232, 242, 62 L. Ed. 2d 441, 100 S. Ct. 502 (1980)* (emphasis added and citation omitted). Accordingly, Dee-K asserts that the district court abused its discretion by applying the substantial-effect test from *Hartford Fire*. *See Nelson v. Green Ford, Inc., 788 F.2d 205, 208-09 (4th Cir. 1986)* **[**10]** (noting that we review jury instructions for abuse of discretion); *Tights, Inc. v. Acme-McCrary Corp., 541 F.2d 1047, 1060 (4th Cir. 1976)* (noting that we review special verdict interrogatories for abuse of discretion).

The producers respond that *Hartford Fire* is "analytically indistinguishable" from Dee-K's case. Thus, they maintain that the district court correctly applied *Hartford Fire* when it required Dee-K to show a "substantial effect in the United States" before concluding that "the Sherman Act applies" to the "foreign conduct" that Dee-K alleged.

The mixture of foreign and domestic elements in this case makes its analysis challenging; either an entirely foreign or an entirely domestic conspiracy would present a comparatively easy jurisdictional question. If the conspiracy had involved participants with United States affiliations, acting only in the United States, and targeting a United States market, the jurisdiction of United States courts would be clear, without any proof of effect. [2] At the other extreme, if everything about the conspiracy were foreign -- if it were a conspiracy formed in Southeast Asia, by Southeast Asian persons and corporations, **[**11]** intended to affect only Southeast Asian markets, and affecting only those markets -- the Sherman Act would not provide a United States court any jurisdiction to address it. *See Matsushita*

---

[1] Dee-K does not appeal the denial of its Rule 50 motion. It does, however, appeal the denial of its motion for a new trial, asserting that the jury's finding of no substantial effect was against the weight of the evidence. In fact, the producers provided the jury with a good deal of evidence supporting the challenged finding, including evidence that increased latex prices or antidumping duties, or both, accounted for rubber-thread price increases. Given these alternatives, nothing about this case presents the "exceptional circumstances" that might lead us to conclude that the verdict was against the weight of the evidence. *See Bristol Steel & Iron Works, Inc. v. Bethlehem Steel Corp., 41 F.3d 182, 186 (4th Cir. 1994)* (citation omitted); *see also Poynter v. Ratcliff, 874 F.2d 219, 223 (4th Cir. 1989)*; *see generally* 11 Charles Alan Wright et al., *Federal Practice and Procedure* § 2819 (2d ed. 1995 & Supp. 2002).

[2] We recognize that the Ninth Circuit has suggested that the foreign-conduct question affects the substantive analysis of a particular offense under the antitrust laws. *See Metro Indus. v. Sammi Corp., 82 F.3d 839, 844-45 (9th Cir. 1996)*. Although market effect of course has its place in substantive antitrust analysis, we follow the Supreme Court and Congress in treating allegations that an antitrust case involves only foreign conduct as raising a jurisdictional issue. *See 15 U.S.C.A. § 6a (West 1997)* (addressing the presence of certain types of foreign conduct in an antitrust case by providing that the Sherman Act does not apply to such cases at all); *Hartford Fire*, 509 U.S. at 795-96; *see also Restatement (Third) of the Foreign Relations Law of the United States § 415*, reporter's note 3 (1987) ("Accurate analysis distinguishes between the requirement of sufficient effect on commerce of the United States to support application of United States law, and the requirement of sufficient injury or anti-competitive effect to establish liability."); Wilbur L. Fugate, *Foreign Commerce and the Antitrust Laws* § 2.14 at 16 (Supp. 2002) (criticizing the *Metro Industries* court on this point); IA Philip Areeda & Herbert Hovenkamp, ***Antitrust Law*** § 273 (2d ed. 2000) ("We emphasize that 'jurisdictional' and 'substantive' inquiries are not wholly independent.").

Elec. Indus. v. Zenith Radio Corp., 475 U.S. 574, 582, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986) ***HN4***[] ("American antitrust laws do not regulate **[*287]** the competitive conditions of other nations' economies.").

[12]** We earn our keep, of course, in the middle ground between such extremes -- in cases such as this. Dee-K alleged (and proved to the jury) a largely foreign conspiracy with some domestic elements, aimed at a global market including, but certainly not limited to, a United States import market. Indeed, the conspiracy mixed foreign and domestic elements in several respects: it included many *participants* with foreign affiliations but a few who also had United States affiliations; *acts* that range from a series of conspiratorial meetings, all held abroad, to routine communications, a few with the United States; and a *target market* embracing dozens of nations including the United States. This sort of mixed fact pattern will probably become increasingly familiar as global economic links and assertions of transnational jurisdiction increase. *See generally* Kenneth W. Dam, *Extraterritoriality in an Age of Globalization: The Hartford Fire Case*, 1993 Sup. Ct. Rev. 289, 290-92. But this is one of the few cases to date that involves an import market and presents such a mixed fact pattern, and neither the statutory scheme nor the case law provides clear guidance.

[13]** Although the Supreme Court noted in *Hartford Fire*, 509 U.S. at 796, that the substantial-effect test applies to "foreign conduct," no antitrust statute defines "foreign conduct." Nor does any statute explicitly address any aspect of a case involving the effect of foreign conduct on United States *import* commerce, like that at issue here.

To be sure, Congress legislated in this area relatively recently, establishing a threshold jurisdictional standard for "conduct involving trade or commerce (other than import trade or import commerce) with foreign nations." Foreign Trade Antitrust Improvements Act (FTAIA) of 1982 § 402, Pub. L. 97-290, 96 Stat. 1246 (codified at *15 U.S.C.A. § 6a*). According to that statutory standard, United States antitrust laws do not apply to such conduct unless it has "a direct, substantial and reasonably foreseeable effect" on United States commerce. *Id.* Because this case involves importation of foreign-made goods, however -- conduct Congress *expressly exempted* from FTAIA coverage as "involving . . . import trade or import commerce . . . with foreign nations," *id.* -- the FTAIA standard obviously does not **[**14]** directly govern this case, even though it may constitute an effort to "clarify the application of United States antitrust laws to foreign conduct" in other circumstances. [3] *See Den Norske Stats Oljeselskap AS v. Heeremac Vof, 241 F.3d 420, 421 (5th Cir. 2001)*; *Hartford Fire*, 509 U.S. at 796 n.23 (refusing to decide whether the FTAIA applies to the conduct alleged, an agreement between foreign and United States participants, formed abroad, to refuse to sell a service to United States consumers); *see also id.* (refusing to decide whether the FTAIA's "direct, substantial, and reasonably foreseeable effect" provision "amends existing law or merely codifies it"); *Kruman v. Christie's Int'l P.L.C., 284 F.3d 384, 399 n.5 (2d Cir. 2002)* (same). Nor do we find any guidance in the FTAIA as to what constitutes "foreign conduct."

We thus must rely **[**15]** on case law, which provides some, albeit limited, assistance. Only a few cases give any hint of how to decide whether conduct is foreign.

[*288] In cases that date from the early twentieth century, silence on this point is hardly surprising, because the Supreme Court then rejected any exercise of jurisdiction based only on acts committed abroad, on the theory that the law of the country where an act occurred should govern it. *See American Banana Co. v. United Fruit Co., 213 U.S. 347, 356, 53 L. Ed. 826, 29 S. Ct. 511 (1909)*; IA Areeda & Hovenkamp § 272b at 350-51 (describing post-*American Banana* Supreme Court cases in which jurisdiction depended on finding "actions within the United States").

In 1945, a leading opinion by Judge Learned Hand, which the Supreme Court later endorsed, displaced this approach based on the location of the conduct, and shifted attention to the location of the conduct's actual or intended effect. *See United States v. Aluminum Co. (Alcoa), 148 F.2d 416 (2d Cir. 1945)*; IA Areeda & Hovenkamp § 272c; I Wilbur L. Fugate, *Foreign Commerce and the Antitrust Laws* § 2.10 at 68-69 (5th ed. 1996). The case, *Alcoa*, thus **[**16]** introduced a predecessor of *Hartford Fire*'s effects test. Although *Alcoa* refocused the jurisdictional analysis on the location of the effects of alleged violations of the antitrust laws, it did not eliminate the

---

[3] Not even the producers suggest that we should, by analogy or otherwise, borrow the FTAIA standard in this import case.

location of the conduct from the inquiry entirely, since its test applied only to cases involving foreign conduct. [4] *See, e.g.*, *Kruman, 284 F.3d at 393-94* ("Under [*Alcoa*'s] . . . 'effects test,' *foreign conduct* was actionable under our antitrust laws if it was intended to affect domestic commerce and actually did so." (emphasis added)). Yet *Alcoa* does not discuss how to assess whether conduct is "foreign," rather than domestic and therefore subject to *McLain*'s test.

[17]** In the decades after *Alcoa*, courts and commentators analyzed not how to assess whether conduct is foreign, but how to interpret and apply *Alcoa*'s effects test. They disagreed as to whether antitrust jurisdiction over foreign conduct requires both "an effect" on United States commerce and an "intent to affect United States commerce," or just effect or just intent, and as to the magnitude of any effect. *See, e.g.*, *Matsushita, 475 U.S. at 582 n.6* (characterizing the Sherman Act as "reaching conduct outside our borders, but only when the conduct has *an effect* on American commerce") (emphasis added)); *Restatement (Third) of Foreign Relations Law § 415* (concluding that the Sherman Act applies to a foreign-made agreement with "a principal purpose . . . to interfere with the commerce of the United States" and "some effect on that commerce" and to other foreign-made agreements with a "substantial effect" on United States commerce if "the exercise of jurisdiction is not unreasonable"); Fugate § 2.12 at 82 (proposing "the 'direct and substantial' [effect] test, plus an element of intent" where "U.S. jurisdiction is based upon acts or agreements abroad which **[**18]** are not in the flow of foreign commerce" (emphasis omitted)); *id.* § 2.5 at 56, § 2.8 at 62 (suggesting and citing authority for a requirement of a "substantial effect"); IA Areeda & Hovenkamp § 272a at 350, § 272f at 354 (describing a minimal requirement of "significant effects"); *see also* *Den Norske Stats Oljeselskap, 241 F.3d at 423-24* & n.12 **[*289]** (describing the "general [] disagreement," "assorted tests," and "confusing and unsettled" federal case law governing "the extraterritorial reach of the antitrust laws" before (and after) *Hartford Fire*). In promulgating these variants on the effects test, however, the authorities do not explore how to define "foreign conduct" in deciding whether to apply an effects test at all.

Although *Hartford Fire* itself does not discuss how to define "foreign conduct" either, it gives us some guidance by characterizing certain conduct as foreign. The complaint in *Hartford Fire* alleged multiple, partially overlapping conspiracies among reinsurers and their insurers (that is, insurers of reinsurers, also known as providers of retrocessional insurance) to limit the kinds of policies written for general corporate coverage **[**19]** in the United States market. *See* *509 U.S. at 770-78*. Three counts specifically alleged that companies in London agreed among themselves to refuse to reinsure policies covering the United States market unless the policies contained certain restrictions on liability. Two of these alleged conspiracies involved *only* international participants, *see id. at 776, 778* & n.7, but one involved both international and United States participants. *See id. at 775-77*.

It was in its discussion of these three counts that the *Hartford Fire* Court stated that "it is well established by now that the Sherman Act applies to foreign conduct that was meant to produce and did in fact produce some substantial effect in the United States." *509 U.S. at 796*. The Court thus plainly characterized the three counts it was then considering (including the count involving conspirators based in the United States) as "foreign conduct," but did not further define the term. The Court did not explain whether or how it had weighed the national affiliation or affiliations of the violators, the location of their acts, the location of the target market, or **[**20]** some combination of these factors in determining that the counts involved "foreign conduct." [5]

---

[4] After *Alcoa* as before, a wholly domestic antitrust case does not necessarily require any proof of an effect on commerce. *See, e.g.*, *Fed. Trade Comm'n v. Superior Ct. Trial Lawyers Ass'n, 493 U.S. 411, 432-36, 107 L. Ed. 2d 851, 110 S. Ct. 768 (1990)* (expounding on the rationale for *per se* antitrust rules that create a presumption of effect in many cases); *McLain, 444 U.S. at 242* (explaining that antitrust jurisdictional requirements in a domestic case may be satisfied by a showing that "the defendants' activity" of any magnitude "is itself in interstate commerce").

[5] Nor, as Dee-K notes, did the Court resolve whether the Sherman Act might also apply to foreign conduct (however defined) that meets some lesser standard -- that is, whether intent alone, substantial effect alone, or some "effect" less than "substantial" coupled with intent might suffice. Instead, the Court stated that the Sherman Act *does* apply to foreign conduct when intent and substantial effect exist, without explicitly excluding the possibility of jurisdiction in other circumstances. *509 U.S. at 796*; *see also* IA Areeda & Hovenkamp § 273. (Indeed, the parties presented no jurisdictional issue to the Court in *Hartford Fire*; rather, the

[21]** III.

Dee-K seeks to rely on the *Hartford Fire* Court's silence on these issues to argue that it need not satisfy the substantial-effect test described in *Hartford Fire*. **[*290]** Specifically, Dee-K maintains that, even if the *Hartford Fire* statement does set forth minimal requirements for antitrust jurisdiction over foreign conduct, those requirements govern only antitrust violations involving "wholly" foreign conduct -- and do not govern foreign conspiracies that result in the sale of price-fixed goods directly into United States commerce. Meanwhile, the producers argue that *Hartford Fire* directly controls here, without acknowledging any distinctions between the two cases. They insist that the only relevant consideration in assessing whether conduct is foreign is the location of actual conspiratorial meetings. We ultimately reject both sides' rigid views of *Hartford Fire* and apply a more nuanced analysis.

A.

We begin with Dee-K's contention that the standard set forth in *Hartford Fire* does not govern this case because the conduct at issue here is not foreign enough. Dee-K offers two arguments in support of this contention. Neither is persuasive.

First, Dee-K **[**22]** relies on the fact that two of our sister circuits have characterized *Hartford Fire* as involving "wholly foreign" conduct. *See* *Carpet Group Int'l v. Oriental Rug Importers Ass'n, 227 F.3d 62, 75 (3d Cir. 2000)*; *United States v. Nippon Paper Indus., 109 F.3d 1, 9 (1st Cir. 1997)*. Dee-K maintains, in line with this characterization, that *Hartford Fire* does not govern a conspiracy like that at hand, with some domestic elements, including direct sales into the United States and one or more participants based in the United States (here the United States subsidiaries and distributors of the producers). Dee-K does not specify whether it is the nationality of the participants involved in the alleged antitrust violation, the location of their acts, the nature of their target market, or some combination of these factors that must be foreign to render their conduct "wholly foreign."

The *Carpet Group* and *Nippon Paper* courts did not state or suggest the origin of the phrase "wholly foreign." A possible source for the phrase is the legislative history of the FTAIA, the 1982 statute that required "a direct, substantial and reasonably foreseeable **[**23]** effect" on United States commerce for antitrust jurisdiction over conduct involving non-import foreign commerce. *See* *15 U.S.C.A. § 6a(1)*; H.R. Rep. No. 97-686, at 10 (1982), *reprinted in* 1982 U.S.C.C.A.N. 2487, 2495. A House Report explained that the FTAIA covers "wholly foreign transactions as well as export transactions" but *not* "import transactions." *Id.* In the FTAIA's legislative history, then, "wholly foreign transactions" appear to be those conducted entirely outside the United States -- transactions that have no point of contact with this country. *See also* *In re Ins. Antitrust Litig., 723 F. Supp. 464, 486 (N.D. Cal. 1989)* (characterizing the FTAIA as applicable to "wholly foreign commerce") (subsequent history, culminating in *Hartford Fire, 509 U.S. 764, 125 L. Ed. 2d 612, 113 S. Ct. 2891*, omitted). If this legislative history indeed constitutes the source of the phrase "wholly foreign," the history itself makes plain that the phrase does not apply to cases like ours, which involve "import transactions." Dee-K derives little benefit, however, from this possible origin of the phrase, because based on the **[**24]** legislative history, "wholly foreign" cannot be an appropriate characterization of the transactions at issue in *Hartford Fire* itself -- which involved a refusal to sell to United States consumers. Thus, if the FTAIA's legislative history is the source of the term "wholly foreign," a court certainly should not use the term in deciding whether to apply the *Hartford Fire* test.

---

defendant reinsurers "conceded" jurisdiction, but contended that "the District Court should have declined to exercise such jurisdiction under the principle of international comity." *509 U.S. at 795-97*.)

However, we need not decide whether the *Hartford Fire* formulation is the *only* test for jurisdiction in antitrust cases involving foreign conduct, because Dee-K has waived this argument by failing to pursue it in the district court. Dee-K now contends that the district court should have applied a test drawn from the *Restatement (Third) of Foreign Relations Law § 415(2)*, permitting a lesser effects test if the intent to affect the United States was a "principal purpose" of the conduct -- but Dee-K never so much as mentioned a "principal purpose" requirement in the district court, nor objected to the jury instructions or special verdict form on this basis. Never having proposed its theory or alternative test to the district court, Dee-K cannot prevail on this argument on appeal.

[*291] *Carpet Group* and *Nippon Paper*'s characterization of *Hartford Fire* as involving "wholly foreign" conduct may, however, simply have been a shorthand description of the case, for in neither *Carpet Group* nor *Nippon Paper* does the holding turn on this characterization or otherwise assist Dee-K. Indeed, the analysis of the Third Circuit in *Carpet Group* is directly contrary to that suggested by Dee-K. The Third Circuit did refuse to apply the *Hartford Fire* test to a conspiracy among United States and foreign entities to protect the role of distributors in the United States market for imported carpets. However, the *Carpet Group* court did not simply point to the existence of *some* domestic contacts and end its analysis, as Dee-K would have us do. Rather, before applying the **[**25]** *McLain* domestic-conduct jurisdictional standard, the *Carpet Group* court determined that the alleged conduct "dealt primarily with conduct in the United States," because of the United States location of most participants, several targets of their pressure, and several of their meetings. *227 F.3d at 64-68, 75*. Thus, looking at participants' affiliations and the locations of both acts and targets, the court focused on whether the conduct at issue was "primarily" domestic or foreign, not whether it was "wholly" domestic or foreign.

Furthermore, and perhaps most importantly, characterization of a prior case by a lower court cannot revise or amend the case's language or facts. Hence, even if *Carpet Group* or *Nippon Paper* had held that *Hartford Fire* controlled only "wholly foreign" conduct, that could not change the language or facts of *Hartford Fire* itself. In *Hartford Fire*, although the district court had used the term "wholly foreign" in a related context, *see In re Ins. Antitrust Litig., 723 F. Supp. at 486*, the Supreme Court *never* described the conduct before it as "wholly" foreign. Moreover, some of the participants in one **[**26]** of the conspiracies alleged in *Hartford Fire* were entities based in the United States, *see509 U.S. at 775, 776, 795*, all of the London-based corporate defendants were "subsidiaries of American corporations," and at least one key meeting attended by London-based defendants occurred in New York City. *See In re Ins. Antitrust Litig., 938 F.2d 919, 922-23, 929 (9th Cir. 1991)*, *rev'd on other grounds sub nom. Hartford Fire, 509 U.S. 764, 125 L. Ed. 2d 612, 113 S. Ct. 2891*. Thus, *Hartford Fire* itself severely undercuts Dee-K's claim that the substantial-effect test applies only to "wholly" foreign conduct, and Dee-K has shown no other reason to limit *Hartford Fire* to such conduct. *But see* IA Areeda & Hovenkamp § 272e at 354 (hypothesizing that the Sherman Act might reach even conduct with "only remote[] and insignificant[]" effects on the United States and no intent to affect the United States if "American firms participate" or "some planning or other conduct" occurs here).

Dee-K's other foreign-conduct argument, although reiterated several times, fares no better. Dee-K repeatedly contends that whenever conspirators **[**27]** "sell price-fixed goods directly into U.S. commerce," the conspiracy must be regarded as domestic rather than foreign conduct, because these goods by definition are then "in" United States commerce. This single-factor test -- under which even a conspiracy hatched and planned entirely on foreign soil by foreign entities would be domestic if it resulted in direct sales of price-fixed goods into a United States import market -- comes perilously close to clear conflict with *Hartford Fire*. After all, there the Supreme Court characterized as "foreign conduct" a conspiracy to refuse to sell reinsurance policies directly into United States markets. The *Hartford Fire* conspiracy **[*292]** had a direct, anticompetitive impact on a United States import market -- just like the direct anticompetitive impact that Dee-K attributes to the rubber-thread price-fixing conspiracy.

Dee-K apparently hopes to distinguish *Hartford Fire* simply because that case concerned a *refusal* to sell to, rather than a sale to, purchasers in the United States. We acknowledge that in some circumstances this factual distinction may have significance. [6] When we consider actual harm to United States consumers, however, **[**28]** we see no distinction between the impact of refusing to sell and that of fixing the price of imported goods, both of which may seriously and directly harm United States consumers. Both situations involve harmful conduct affecting a transaction in which a United States participant takes place.

[6] The *Hartford Fire* Court specifically declined to decide whether the FTAIA governed a refusal to sell a service into the United States, even though the lower courts had held that the FTAIA did not apply to such conduct. *See In re Ins. Antitrust Litig., 723 F. Supp. at 486*, *aff'd on this ground*, *938 F.2d at 932*, *rev'd on other grounds sub nom. Hartford Fire, 509 U.S. at 796 n.23* (taking no position on the applicability of the FTAIA). Perhaps the Court declined to decide the issue because a refusal to sell a service into the United States does not 'enter' the United States in some sense, as an import does.

In refusal cases, courts have not hesitated to require antitrust **[**29]** plaintiffs to allege and prove a substantial effect on the United States. In addition to the *Hartford Fire* Court itself, the Ninth Circuit required such proof in a case involving allegations that competitors had divided up the right to sell directly to United States consumers, even though market division rings the same alarm bells as price fixing; indeed, both constitute *per se* Sherman Act violations. *See* *Metro Indus., 82 F.3d at 841, 843-44*.

Moreover, given complex global trade patterns of sale, resale, and distribution, Dee-K's formulation would grant United States courts jurisdiction over a great variety of foreign conduct. *Cf.* *Den Norske Stats Oljeselskap, 241 F.3d 420* (rejecting the existence of any form of antitrust jurisdiction over a foreign conspiracy even though it assertedly indirectly raised prices in a United States import market, in part because the plaintiff was not a buyer or seller in that market). For example, ***HN5***[] in every case involving direct sales to the United States in which our antitrust laws condemn an activity *per se*, however foreign the conduct, United States courts would have jurisdiction without any showing whatsoever **[**30]** of an effect on United States commerce. *See, e.g.*, *Stephen Jay Photography, Ltd. v. Olan Mills, Inc., 903 F.2d 988, 995 (4th Cir. 1990)* (noting that explicit horizontal minimum price fixing is a *per se* violation of the Sherman Act). Yet ***HN6***[] the rationale for *per se* rules in cases addressing domestic conduct seems plainly "inapplicable to foreign restraints that . . . pose very little danger to American commerce." IA Areeda & Hovenkamp § 273 at 370-71 (noting that "price fixing in a foreign country might have some but very little impact on United States commerce," and concluding that "appraising restraints abroad requires an assessment of effects on American foreign commerce").

Perhaps for this reason, ***HN7***[] courts have consistently required a showing of effect on United States commerce even in cases involving price fixing on imports. Before *Hartford Fire*, the Seventh Circuit considered a conspiracy among "twenty domestic and nine foreign corporations. . . to fix the price of uranium in the world market" at meetings in five foreign countries and the United States. *See* *In re Uranium Antitrust Litig., 617 F.2d 1248, 1254 (7th Cir.* ***[*293]*** *1980)*. In that **[**31]** case the Seventh Circuit applied *Alcoa*'s effects test, although the domestic participants greatly outnumbered the foreign participants, a meeting occurred in the United States, and the target market included the United States. *See* *id. at 1253-54*. Similarly, in *Nippon Paper*, on which Dee-K heavily relies, the First Circuit had no trouble treating a criminal conspiracy resulting in price fixing of goods imported into the United States as "foreign conduct" requiring proof of a substantial effect on United States commerce. *Nippon Paper, 109 F.3d at 2*. [7]

[32]** Finally, the Executive Branch has endorsed the view that plaintiffs alleging antitrust violations affecting imports into a United States market must still prove a substantial effect on United States commerce. *See* U.S. Dep't of Justice & Fed. Trade Comm'n, *Antitrust Enforcement Guidelines for International Operations* § 3.11 (1995), *available at* *http://www.usdoj.gov/atr/public/guidelines/internat.htm* (as of July 2, 2002) (advising that "imports into the United States by definition affect the U.S. domestic market directly" but that they yet must "produce the requisite substantial effects," while commenting that effects are likely to be "clear" in such a case).

For these reasons, we reject Dee-K's contention that *Hartford Fire* never applies when a conspiracy involves price-fixed goods sold directly into United States commerce.

B.

---

[7] The *Nippon Paper* court stated that the Sherman Act treated civil and criminal jurisdiction alike and then extended criminal jurisdiction by applying the *Hartford Fire* test from the civil context. *See* *109 F.3d at 4-8*. Dee-K seeks to distinguish *Nippon Paper* on the ground that it involved goods not directly sold into the United States market by the price-fixers themselves. However, Dee-K can point to no authority applying *per se* condemnation to foreign price fixing simply because the price fixing was on directly imported goods. Moreover, nothing in *Nippon Paper* suggests that the corporate layer between the price-fixers and the United States market protected the price-fixers from full domestic treatment, i.e., that the case might have been analyzed as domestic conduct if the price-fixing scheme had not been indirect. Indeed, the commentators see *Nippon Paper* as novel, not because it applied an effects test as a prerequisite for jurisdiction, but because it asserted jurisdiction *at all* in a criminal context. *See* Fugate § 2.14 at 14, 15 (Supp. 2002); IA Areeda & Hovenkamp § 272i at 364-68.

We likewise reject the producers' equally rigid view as to the applicability of *Hartford Fire*. The producers contend that in assessing whether "conduct" is "foreign" (and thus subject to the substantial-effect, rather than the domestic *McLain* test), we should consider only the location of acts that themselves independently violate **[**33]** the Sherman Act. According to the producers, "the *Hartford Fire* test . . . is based solely upon the situs of a conspiratorial agreement." The producers thus turn Dee-K's argument back upon it: even if *Hartford Fire* does apply just to "wholly foreign conduct," the only relevant "conduct" is the conspiratorial meetings themselves. In this case, they argue, we should therefore focus only on the location of the meetings at which the conspirators agreed to fix prices -- and all of those meetings were held outside the United States.

The producers' suggested rule eliminates any examination of the national affiliation of the participants in the conduct, the scope and location of the target market, and the location of all acts other than the actual conspiratorial acts. This rigidity troubles us. A noted commentary has warned against an overly rigid approach in this area of ***antitrust law***: "to say that domestic *per se* rules are not necessarily **[*294]** and automatically applicable in the international context is not to say that an antitrust court needs to hesitate very long before condemning restraints with significant and obvious effects on United States commerce, and without any plausible **[**34]** purpose other than the suppression of competition with and in the United States." IA Areeda & Hovenkamp § 273 at 371. In short, the flexibility that permits a court not to apply domestic rules to a defendant engaging in foreign conduct should be balanced by a court's ability to allow a plaintiff to pursue foreign conduct that does harm United States interests -- even if the defendants scrupulously entered into their illegal agreements only outside the United States.

The suggestion that we consider only the location of certain acts concerns us particularly given that ever since *Alcoa*, the Supreme Court's jurisdictional analysis has emphasized above all else the effects, i.e., the intended location, actual location, and magnitude of those effects. *See, e.g.*, *Kruman, 284 F.3d at 395*. Quite simply, the Supreme Court has moved away from its earlier doctrine focused solely on the location of acts. We therefore doubt whether a jurisdictional rule focused exclusively on defining and locating a certain limited set of acts could possibly be appropriate.

The potential consequences of the rule that the producers champion only confirm our doubts. If, for example, executives **[**35]** of United States corporations that did business solely in the United States met abroad simply to consummate a price-fixing conspiracy that was carried out entirely within the United States, the producers' proposed rule would *still* require special proof of the conspiracy's effect before a United States court could assert jurisdiction.

We reject this overly narrow view. *McLain* might well apply to such a conspiracy, even though the acts that constituted the illegal agreement took place exclusively abroad. Conversely, as the Second Circuit has noted, ***HN8***[] meetings in the United States to negotiate "an agreement to fix prices in an overseas foreign market that had no effect on domestic commerce" do not yield antitrust jurisdiction in our courts. *See* *Kruman, 284 F.3d at 395*. The universe of factors relevant to our jurisdictional analysis must be greater than the location of the specific conspiratorial acts alone.

C.

Instead of the parties' bright-line rules, we believe a court should properly engage in a more flexible and subtle inquiry. ***HN9***[] In determining which jurisdictional test (*Hartford Fire* or *McLain*) applies, a court should consider whether the participants, **[**36]** acts, targets, and effects involved in an asserted antitrust violation are primarily foreign or primarily domestic.

This inquiry will best accommodate the cases with mixed fact patterns, defying ready categorization as "foreign" or "domestic" conduct, which our increasingly global economy will undoubtedly produce. We cannot begin to foresee the scope or complexity of future transactions. To adopt the simplistic rules the parties favor might well yield unintended and unfortunate results.

Moreover, this area of ***antitrust law*** has historically been marked by change, and remains a subject of serious debate. Not only the courts, but also numerous commentators and even representatives of various other countries (as frequent amici), have presented differing views, focusing on various elements of conduct as crucial in addressing whether assertion of jurisdiction is appropriate. Given these concerns, **[*295]** we believe courts should remain able to consider the full range of factors that may appropriately affect the exercise of our antitrust jurisdiction in any given case.

We note that this approach echoes that of the Third Circuit in *Carpet Group* and finds support in several of the treatises. **[**37]** *See* *Carpet Group, 227 F.3d at 75*; Fugate § 2.12 at 80-82 (discussing the location of "acts and agreements," the location of their effects, and the nationality of participants in considering jurisdiction); *Restatement (Third) of Foreign Relations Law § 415(2)* (applying the same proposed jurisdictional test to "any agreement in restraint of United States trade that is made outside of the United States, and any conduct or agreement in restraint of such trade that is carried out *predominantly* outside of the United States" (emphasis added)); *cf.* *Montreal Trading Ltd. v. Amax, Inc., 661 F.2d 864, 869 (10th Cir. 1981)* ("When the contacts with the United States are few, the effects upon American commerce minimal, and the foreign elements overwhelming, . . . we do not accept jurisdiction.").

In this case, the bulk of the conduct related to the global conspiracy alleged in the complaint and proved at trial occurred abroad. As in *Nippon Paper*, the agreements here were all formed entirely outside the United States -- in several other countries. The target of the conspiracy was a global market, and the participants monitored prices in many markets around **[**38]** the world. Although dozens of people participated in the meetings over the years, Dee-K can only point to two who held office in United States companies, and both of them also had important and in fact primary roles in Southeast Asian companies.

To be sure, the producers sold rubber thread in the United States to United States consumers. In particular, Heveafil sold through a United States division of the parent producer, directing pricing by communications from Southeast Asia, while Rubfil sold through a wholly owned United States subsidiary and co-defendant. In addition, a handful of faxes from the producers describe pricing in the United States. It further appears that a United States distributor was made aware, by a fax sent "FYI," of a group commitment not to hire an executive whom one producer had fired for his opposition to price increases.

But these links to the United States are mere drops in the sea of conduct that occurred in Southeast Asia (and around the world). *See* *In re Uranium Antitrust Litig., 617 F.2d at 1254* (applying *Alcoa*'s effects test in a price-fixing case even though twenty participants were domestic and only nine foreign and the United **[**39]** States was part of the target market). Just as the Third Circuit looked at a mass of conduct and concluded it was "primarily" domestic in *Carpet Group, 227 F.3d at 75*, so examining all of the conduct here, we can only conclude that it is primarily foreign. The handful of contacts with the United States that Dee-K cites cannot change the fact that the rubber-thread conspiracy was formulated and furthered at numerous meetings, all of which took place in Southeast Asia, with attendees, all of whom worked for Southeast Asian firms, and who directed their activity to the global market. Only a few of the participants had any United States affiliation, and each of those also had a primary Southeast Asian affiliation. In addition, although we have explained that we do not find this factor alone dispositive, we consider it significant that not one of the conspirators' many meetings took place in the United States. In light of all of these factors, we conclude that the price-fixing conspiracy Dee-K alleged and proved was **[*296]** primarily "foreign conduct" to which the *Hartford Fire* test properly applied.

In closing, we note that even when a conspiracy constitutes "foreign conduct, **[**40]** " an antitrust plaintiff still has access to the federal courts to challenge it. The district court did not dismiss Dee-K's lawsuit because its claim involved foreign conduct. The court merely required Dee-K to prove that the foreign conduct had a substantial effect on United States commerce in order to recover. Other litigants who claim that foreign conduct, which violates our antitrust laws, has harmed them may also have their day in court, and the federal courts will provide redress for those who can show that the harm of which they complain had a substantial effect on our commerce. For Dee-K, that day in court has come and gone.

IV.

For the reasons given herein, the judgment of the district court is

AFFIRMED.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

HN1[] **In Rem & Personal Jurisdiction, In Personam Actions**

In response to a claim, a party may assert the defense of lack of jurisdiction over the person. *Fed. R. Civ. P. 12(b)(2)*. When the defendant raises such a defense, the burden shifts to the plaintiff to prove, by a preponderance of the evidence, facts sufficient to establish jurisdiction. To satisfy its burden, the plaintiff may not rely on the bare pleadings, but must establish jurisdictional facts through sworn affidavits or other competent evidence. Nevertheless, disputed facts must be construed in favor of the plaintiff.

Civil Procedure > ... > Pleadings > Service of Process > General Overview

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

HN2[] Pleadings, Service of Process

Before a court can exercise personal jurisdiction over a defendant, there must be a basis for the defendant's amenability to service of summons. Unless otherwise provided by federal law, federal courts must follow the methods prescribed by the state in which the court is located to determine whether a defendant is amenable to service. *Fed. R. Civ. P. 4(e)*. Thus, a federal district court must look either to a federal statute or to the long-arm statute of the state in which it sits. This rule also applies to service upon corporations. *Fed. R. Civ. P. 4(h)*.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Minimum Contacts

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

HN3[] Jurisdiction, Jurisdictional Sources

Under the *Due Process Clause of the Fifth Amendment*, a federal court may not exercise personal jurisdiction over a foreign defendant unless that defendant has certain minimum contacts with the forum such that the maintenance of the suit does not offend traditional notions of fair play and substantial justice. The analysis will vary with the quality and nature of the defendant's activity, but it is essential in each case that there be some act by which the defendant purposefully avails itself of the privilege of conducting activities within the forum state, thus invoking the benefits and protections of its laws. In that regard, a court must examine the relationship among the defendant, the forum, and the litigation. A plaintiff may meet this burden by establishing the court's general jurisdiction by virtue of the defendant's continuous and systematic general business contacts with the forum state. Alternatively, a plaintiff may show that the court has specific jurisdiction because the particular cause of action arose from the defendant's forum-related activities. Pennsylvania courts have stated that a cause of action is sufficiently related to a defendant's forum contacts where the acts of the defendant within the forum state represent the factual predicates upon which the cause of action are to be based.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > Preliminary Considerations > Venue > Multidistrict Litigation

HN4[] Jurisdiction, Jurisdictional Sources

In multi-district litigation that is consolidated for pretrial purposes under *28 U.S.C.S. § 1407*, the transferee court can exercise personal jurisdiction to the same extent that the transferor court could. Thus, if the transferor court in an individual case has jurisdiction over a defendant in the transferor court's forum, the transferee court also has jurisdiction in that action regardless of the defendant's contacts with this forum.

Civil Procedure > Discovery & Disclosure > General Overview

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN5[] **Civil Procedure, Discovery & Disclosure**

Before dismissing a case for lack of personal jurisdiction, courts should generally permit discovery into jurisdictional facts. The general rule in the Third Circuit is that jurisdictional discovery should be allowed unless the plaintiff's claim is clearly frivolous. A court may deny jurisdictional discovery where the plaintiff has failed to meet its burden of making out a threshold prima facie case of personal jurisdiction. The plaintiff has the burden of establishing a threshold prima facie showing of personal jurisdiction. The scope of discovery is within the court's discretion, and allowing such discovery is premised on the assumption that further discovery would be worthwhile.

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN6[] **In Rem & Personal Jurisdiction, In Personam Actions**

A federal court's personal jurisdiction may be assessed on the basis of the defendant's national contacts when the plaintiff's claim rests on a federal statute authorizing nationwide service of process or service wherever defendant is doing business or may be found.

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Federal Questions > General Overview

HN7[] **Antitrust & Trade Law, Clayton Act**

See *15 U.S.C.S. § 22*.

Governments > Legislation > Interpretation

HN8[] **Legislation, Interpretation**

The starting point for interpreting a statute is the language of the statute itself.

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > General Overview

HN9[] **Antitrust & Trade Law, Clayton Act**

The word "such" means the aforementioned. Thus, when "such" precedes a noun it is assumed to refer to a particular antecedent noun and any dependent adjective or adjectival clauses modifying that noun, but not to any other part of the preceding clause or sentence. Applying this rule to *section 12* of the Clayton Act, *15 U.S.C.S. § 22*, "in such cases" would refer to any suit, action, or proceeding under the antitrust laws against a corporation, and not to anything else in *section 12*'s first clause.

Governments > Legislation > Interpretation

HN10[] Legislation, Interpretation

The general canon of statutory construction, that referential and qualifying words and phrases, where no contrary intention appears, refer solely to the last antecedent, i.e., the last word, phrase, or clause that can be made an antecedent without impairing the meaning of the sentence, is merely an aid to interpretation and is not inflexible or uniformly binding. The canons of interpretation are more appropriately applied to divine intent from statutes that are carefully worded and assiduously compiled than from imprecise statutory language.

Antitrust & Trade Law > Clayton Act > Jurisdiction

Civil Procedure > Preliminary Considerations > Venue > Multidistrict Litigation

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

HN11[] Clayton Act, Jurisdiction

Perhaps more than any other law, the antitrust laws are national in scope and impact. In interpreting *section 12* of the Clayton Act, *15 U.S.C.S. § 22*, courts are mindful that antitrust cases, especially those involving aliens, may pose problems for any one district court to obtain jurisdiction over all the defendants, if left to state long arm statutes. If the antitrust laws are to be effective, district courts' jurisdiction must reach the limits of the power of the United States of America. In the case of antitrust laws, it makes no sense to tie a district court's jurisdiction to the state in which it sits; it neither promotes the enforcement of ***antitrust law*** nor the management of litigation.

Antitrust & Trade Law > Clayton Act > Jurisdiction

Civil Procedure > Preliminary Considerations > Venue > Special Venue

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > Private Attorneys General

Civil Procedure > Preliminary Considerations > Venue > General Overview

Civil Procedure > Preliminary Considerations > Venue > Multiparty Litigation

HN12[] Clayton Act, Jurisdiction

Enactment of the venue provision in *section 12* of the Clayton Act, *15 U.S.C.S. § 22*, does not preclude application of the Alien Venue Statute, *28 U.S.C.S. § 1391(d)*. In general, special venue provisions supplement rather than preempt general venue statutes. Indeed, the purpose of enacting the specific venue provisions under the Clayton Act was to enlarge jurisdiction to give an antitrust plaintiff the widest possible selection of forums to promote the plaintiff's role as a private attorney general. Moreover, *§ 1391(d)* was intended to have broad and overriding application to prevent an alien defendant from using narrower venue statutes as a shield against suit.

Civil Procedure > Preliminary Considerations > Venue > Corporations

Evidence > ... > Demonstrative Evidence > Photographs > Visual Formats

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > Jurisdiction

Civil Procedure > Preliminary Considerations > Venue > General Overview

Civil Procedure > Preliminary Considerations > Venue > Multiparty Litigation

HN13[] **Venue, Corporations**

On its face, the Alien Venue Act, *28 U.S.C.S. § 1391(d)*, is not applicable to domestic corporations, which remain covered by the venue provision of *section 12* of the Clayton Act, *15 U.S.C.S. § 22*.

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > Preliminary Considerations > Venue > Corporations

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > Preliminary Considerations > Venue > General Overview

HN14[] **Antitrust & Trade Law, Clayton Act**

The holding of Go-Video permits a plaintiff to sue only an alien corporation in any district; nothing in Go-Video permits a domestic corporation to be sued in any district. Rather, a domestic corporation could only be sued, according to *section 12* of the Clayton Act, in the judicial district whereof it is an inhabitant, or in any district wherein it may be found or transacts business. *15 U.S.C.S. § 22*.

Civil Procedure > Preliminary Considerations > Venue > Corporations

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > Doing Business

HN15[] **Venue, Corporations**

Typically, a foreign corporation is not subject to personal jurisdiction merely because of its ownership of the shares of stock of a subsidiary doing business in the state. There are, however, several lines of cases discussing when the contacts of a subsidiary my be imputed to the parent under an alter ego theory when direct contacts between the parent and forum are absent.

Civil Procedure > Preliminary Considerations > Venue > Corporations

Civil Procedure > ... > In Rem & Personal Jurisdiction > In Personam Actions > General Overview

HN16[] **Venue, Corporations**

To prevail under the alter-ego theory of personal jurisdiction over corporation holding companies, the plaintiff must demonstrate that the degree of control exercised by the parent must be greater than normally associated with common ownership and directorship. Plaintiffs must prove that the parent controls the day-to-day operations of the subsidiary such that the subsidiary can be said to be a mere department of the parent. The court should examine all relevant factors that relate to the intimacy of the relationship between the parent and subsidiary to assess whether the contacts of the subsidiary with the forum should be imputed to the parent. The test perforce incorporates all the factors that have been historically used in determining whether a subsidiary is an alter ego or agent of the parent.

Business & Corporate Law > Agency Relationships > Types > General Overview

Civil Procedure > Preliminary Considerations > Venue > Corporations

Trademark Law > Conveyances > General Overview

Business & Corporate Law > Agency Relationships > General Overview

HN17[] **Agency Relationships, Types**

Among the factors courts have considered in determining whether the parent exercises sufficient control over the subsidiary to justify application of the corporate alter-ego jurisdictional theory are (1) ownership of all or most of the stock of the related corporation, (2) common officers and directors, (3) a common marketing image, (4) the common use of a trademark or logo, (5) the common use of employees, (6) an integrated sales system, (7) the interchange of managerial and supervisory personnel, (8) the performance by the related corporation of business functions which the principal corporation would normally conduct through its own agents or departments, (9) the acting of related corporation as marketing arm of the principal corporation, or as an exclusive distributor, and (10) receipt by the officers of the related corporation of instruction from the principal corporation.

Civil Procedure > ... > Jurisdiction > In Rem & Personal Jurisdiction > Constitutional Limits

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN18[] **In Rem & Personal Jurisdiction, Constitutional Limits**

Courts have recognized jurisdiction over non-residents based upon the contacts of the alleged co-conspirators. A court looks not only at the defendant's forum contacts, but at those of the defendant's resident co-conspirators. The court imputes the contacts of the resident co-conspirator over whom it has jurisdiction to the foreign co-conspirator to see if there are sufficient contacts to exercise jurisdiction over the latter. However, merely belonging to a civil conspiracy does not make a member subject to the jurisdiction of every other member's forum. There must also be substantial acts in furtherance of the conspiracy within the forum, of which the out-of-state co-conspirator was or should have been aware.

Judges: R. Barclay Surrick, Judge.

Opinion by: R.Barclay Surrick

Opinion

MEMORANDUM & ORDER

SURRICK, J.

JULY 31, 2002

Plaintiffs filed a Consolidated and Amended Class Action Complaint (the "Amended Complaint") on behalf of all individuals and entities who purchased automotive refinishing paint in the United States directly from Defendants, their predecessors or their controlled subsidiaries from at least as early as January 1, 1993 to at least December 31, 2000 (the "Class Period"). The Amended Complaint alleges that during that period, Defendants conspired to fix, raise, maintain or stabilize prices for automotive refinishing paint sold in the United States, thereby artificially inflating prices for automotive refinishing paint in violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*. Plaintiffs seek damages and injunctive relief pursuant to *Sections 4* and *16* of the Clayton Act, *15 U.S.C. §§ 15*, *26*.

Among the Defendants in this case are Defendant BASF Aktiengesellschaft ("BASF AG") and Defendant BASF Aktiengesellschaft Coatings ("BASF Coatings"). Presently before **[*2]** the Court are Defendant BASF AG's Motion to Dismiss for Lack of Personal Jurisdiction (the "BASF AG Motion," Docket No. 22) and Defendant BASF Coatings AG's Motion to Dismiss for Lack of Personal Jurisdiction (the "BASF Coatings Motion," Docket No. 23) (collectively, the "Motions to Dismiss"). For the following reasons, the Motions will be denied.

I. BACKGROUND

Defendants BASF AG and BASF Coatings are foreign corporations based in Germany. In the Amended Complaint, Plaintiffs allege that BASF AG and BASF Coatings have extensive operations and affiliates in the United States. Cmpl. PP 20-21. Defendants are alleged to have "manufactured, marketed and/or sold automotive refinishing paint in the United States during the Class Period, both directly and through its predecessors, affiliates and/or subsidiaries." Id. Defendants are alleged to have artificially fixed, raised, maintained or stabilized the prices of automotive refinishing paint by engaging in the following anti-competitive activities: a) participating in meetings and conversations to discuss the prices of automotive refinishing paint in the United States and elsewhere, b) agreeing during those meetings to fix, **[*3]** raise, maintain and stabilize the prices at which automotive refinishing paint was sold in the United States and elsewhere, c) agreeing to refrain and in fact refraining from competing among themselves with respect to the sale of automotive refinishing paint and d) selling automotive refinishing paint to customers in the United States at supracompetitive prices. Id. P 52.

In connection with its Motion to Dismiss, BASF AG filed an affidavit to demonstrate its lack of involvement in the paint refinishing business and its lack of contacts with the State of Pennsylvania. See Affidavit of Jorg Buchmuller (the "Buchmuller Affidavit"). According to the Buchmuller Affidavit, BASF AG is a German corporation with its principle offices and manufacturing plant located in Germany. Id. P 2. Contrary to the allegations in the Amended Complaint, BASF AG does not manufacture, market or sell automotive refinishing paint. Id. P 3. BASF AG was not subpoenaed by the Department of Justice in connection with its investigation of the automotive refinishing paint industry. Id. P 4. BASF AG purports to be a chemical company and denies having substantive contact with the State of Pennsylvania. **[*4]** Id. PP 5-13. BASF AG is not authorized or registered to do business in Pennsylvania. Id. P 6. It does not have an office, a manufacturing plant, a bank account, post office box or telephone listing in Pennsylvania. Id. P 7. It has never paid Pennsylvania income tax or franchise fees, and it does not own or lease property in Pennsylvania. Id. PP 9, 10.

Although BASF AG indirectly owns all the shares of BASF Corporation, another defendant in this case that is not contesting jurisdiction, BASF AG specifically avers that it does not dominate or control BASF Corporation. Id. PP 14-25. BASF Corporation produces and sells chemicals, polymers, fibers, coatings, agricultural chemicals, vitamins and other products in the United States. Id. P 15. It maintains its own research and development facilities and holds numerous patents. Id. According to the Buchmuller Affidavit, all of BASF Corporation's officers are employees of BASF Corporation. Id. P 16. BASF Corporation's Chairman and CEO, and the president of its divisions, manage the day-to-day operations of the corporation. Id. BASF Corporations management and business are overseen by its own board of directors, **[*5]** and BASF AG has never participated in the management of BASF Corporation's day-to-day operations and decisions. Id. P 18. Because BASF AG is an indirect owner of all of BASF Corporation's stock, BASF AG is represented on BASF Corporation's board of directors; however, since at least 1986, BASF AG's employees have never comprised a majority of BASF Corporation's board of directors. Id. P 19. [1] Meetings of BASF Corporation's board of directors have always been held at different times and places than those of the BASF AG board. Id. P 20. BASF Corporation maintains its own books and records and files its own United States tax returns. Id. P 24.

[*6] BASF Corporation maintains offices, manufacturing, research, sales and distribution facilities separate from the operations of BASF AG. Id. P 21. Although BASF AG supplies BASF Corporation with certain products, as it does with other companies, BASF Corporation obtains those products through arm-length transactions involving purchase and distribution agreements. Id. P 22. Furthermore, the majority of BASF Corporation's sales are derived from products manufactured by BASF Corporation. Id. BASF Corporation also pays its own expenses and maintains a separate payroll for it employees. Id. P 23. It provides its employees its own benefit plans and its own pension program independent of any support from BASF AG. Id.

Similarly, BASF Coatings filed an affidavit to describe its business and demonstrate its lack of contacts with Pennsylvania. See Affidavit of Jurgen Hinteresch (the "Hinteresch Affidavit"). According to the Hinteresch Affidavit, BASF Coatings does not manufacture, market or sell automotive refinishing paint in Pennsylvania. Id. P 3. BASF Coatings was not subpoenaed by the Department of Justice in connection with its investigation of the automotive **[*7]** refinishing paint industry. Id. P 4. BASF Coatings is not authorized or registered to do business in Pennsylvania. Id. P 6. It does not have an office, a manufacturing plant, a registered agent, a bank account, post office box or telephone listing in Pennsylvania. Id. P 7. It has never paid Pennsylvania income tax or franchise fees. Id. P 9. It does not own or lease property in Pennsylvania. Id. P 10.

Based on public information prepared by Defendants, Plaintiffs submit the following facts to demonstrate BASF AG's and BASF Coatings's contacts with the United States. BASF AG and BASF Coatings are the holders of numerous patents in the United States. In its BASF AG's Form 20F, BASF's 2001 Annual Report and the company's website, BASF AG presents itself as part of a integrated entity, i.e., BASF or the BASF Group, that is comprised of BASF AG and its 153 subsidiaries. BASF AG is, however, the only BASF corporate entity that reports to the SEC. In its 2002 Form 20F, BASF AG refers to itself simply as "BASF" and defines itself as follows:

> BASF is comprised of the parent company, BASF Aktiengesellschaft of Ludwigshafen, Germany, and 153 consolidated subsidiaries. **[*8]** The company has customers in more than 170 countries and operates production sites in 39 countries.

2002 Form 20F, at 84. Shares of BASF AG have traded on the New York Stock Exchange since 2000. BASF AG 2002 Form 20F, at 141.

Despite BASF AG's averment that it "does not, and never has, manufactured, marketed or sold automotive refinishing paint in the United States or in any other country," see BASF AG Mem. in Supp. at 2, the BASF 2001 Annual Report for BASF AG and its many subsidiaries plainly states the following:

---

[1] Of BASF Corporation's board, only two of eight directors are employees of BASF AG. Buchmuller Aff. P 19. BASF AG has not had a greater proportion of representation on BASF Corporation's board since 1994. Prior to 1994, BASF Corporation's board varied from 12 to 13 members, but only five members were employees of BASF AG. Id. Presently, there is one employee of BASF Corporation on the eight-person board of executive directors of BASF AG. Id.

> Be honest now: What would even the most beautiful car look like without the appropriate paint finish?
> ***
>
> BASF is now one of the *global* market leaders in high-quality automotive OEM *and refinish* coatings and industrial coatings.
> ***
>
> We develop, produce and market coating systems as well as the associated coating processes.

BASF 2001 Annual Report at 32 (emphasis added).

In addition, BASF AG owns 100% of the shares of BASF Corporation, which is located in Mount Olive, New Jersey. BASF AG 2002 Form 20F, at 79. BASF AG sold approximately $ 1.5 billion in goods to the BASF Corporation. See Affidavit of Jorg Buchmuller **[*9]** P 19, filed in 2000 in Wyman's Auto Body v. BASF AG, Civ. No. CV-01-423 (Sup. Ct. Me. Nov. 20, 2001) (the "Buchmuller Wyman's Auto Affidavit"). Approximately 21% of the domestic BASF Corporation's revenues come exclusively from the distribution and sale of products manufactured by other members of the BASF Group. BASF AG Mem. in Supp. at 11.

According to BASF's web-site, BASF Coatings belongs to the Coatings Division of BASF, which had sales of 2.3 billion Euros in 2001 and which has a "significant market position[] in North America." [2] The Coatings Division operates a facility in Morganton, North Carolina. BASF AG 2002 Form 20F, at 82. According to the Paint & Coatings Industry web-site, BASF Coatings maintains an office in Southfield, Michigan, a Detroit suburb where many other suppliers to the U.S. automotive industry are based. [3]

Defendants also explicitly endorse the **[*10]** "exchange of staff among BASF Group companies" as being "critical" in achieving BASF's worldwide corporate goals. 2001 Annual Report, at 51. For example, according to the BASF web-site, Klaus Peter Lobbe, Chairman and Chief Executive Officer of BASF Corporation and also a member of the Board of Executive Directors of BASF AG, is responsible for BASF's operations in North America and for the company's worldwide coatings business. [4] As of March 1, 2002, Mr. Lobbe assumed responsibility for the newly created Ressort IX, based in Mount Olive, New Jersey. The Coatings Division of BASF, including BASF Coatings, will be a part of Ressort. [5] Dr. Hans U Engel, who is currently the Chief Financial Officer of BASF Corporation and whose previous assignments included a position in the BASF AG General Counsel's office, was most recently Chief Executive Officer of BASF Schwarzheide GmbH, which also is based in Germany. [6] Hans W. Reiners is the Executive Vice President of BASF Corporation and President of the Company's Agricultural Products Division, located in Mount Olive, NJ. Prior to this, Mr. Reiners worked as Director of Business Management, Agricultural Products, for Southern Europe and moved **[*11]** to BASF's Regional headquarters in Barcelona, Spain. He returned to Germany in 1998 to serve as Group Vice President, Global Marketing. [7]

II. NATURE AND STAGE OF PROCEEDING

In their Motions to Dismiss, Defendants BASF AG and BASF Coatings argue that personal jurisdiction cannot be exercised in Pennsylvania. In particular, BASF AG contends that the evidence demonstrates an absence of

---

[5] *www.basf.com/static/latest_news.html*

[6] *www.basf.com/static/OpenMarket/Xcelerate/Preview_cid-974236657882_pubid-974129513031_c-Article.html*

[7] *www.basf.com/static/OpenMarket/Xcelerate/Preview_cid-974236657882_pubid-974129513031_c-Article.html*

personal jurisdiction, general or specific, because BASF AG has almost no contact with Pennsylvania and Plaintiffs' causes of action do not arise out of BASF AG's contacts with Pennsylvania. BASF AG Mem. in Supp. at 5-6. BASF Coatings makes essentially the same **[*12]** arguments but adds that it "has absolutely no contact with Pennsylvania whatsoever." BASF Coatings Mem. in Supp. at 5-6.

In opposition to the Motions to Dismiss, Plaintiffs argue that personal jurisdiction in this case should be assessed based on BASF AG's and BASF Coatings's contacts with not only Pennsylvania but also with the United States as a whole. Plaintiffs contend they have adduced more than sufficient evidence of BASF AG's and BASF Coatings's contacts with the United States as a whole to justify jurisdictional discovery. Plaintiffs argue that the national contacts of the entire BASF corporate conglomeration, which includes BASF AG and BASF Coatings, and the pervasive contacts of BASF Corporation, BASF's wholly-owned American based subsidiary, are attributable to BASF AG. Plaintiffs also argue that jurisdiction over BASF AG and BASF Coatings may be grounded on the jurisdictional contacts of Defendants' co-conspirators. In addition, Plaintiffs separately argue that sufficient contacts are established by BASF AG's and BASF Coatings's use of the United States patent laws. Finally, Plaintiffs contend that jurisdiction exists pursuant to *Rule 4(k)(2) of the Federal Rules of Civil* **[*13]** *Procedure*, and under the Rules for Multi-District Litigation.

III. STANDARD

HN1[] In response to a claim, a party may assert the defense of lack of jurisdiction over the person. *Fed.R.Civ.P. 12(b)(2)*. When the defendant raises such a defense, the burden shifts to the plaintiff to prove, by a preponderance of the evidence, facts sufficient to establish jurisdiction. *IMO Industries, Inc. v. Kiekert AG, 155 F.3d 254, 257 (3d Cir. 1998)*; *Carteret Sav. Bank, F.A. v. Shushan, 954 F.2d 141, 146* (3d Cir.), cert. denied, *506 U.S. 817, 121 L. Ed. 2d 29, 113 S. Ct. 61 (1992)*. To satisfy its burden, the plaintiff may not rely on the bare pleadings, but must establish jurisdictional facts through sworn affidavits or other competent evidence. *Time Share Vacation Club v. Atlantic Resorts, Ltd., 735 F.2d 61, 66 n. 7 (3d Cir.1984)*. Nevertheless, disputed facts must be construed in favor of the plaintiff. *Pinker v. Roche Holdings Ltd., 292 F.3d 361, 368 (3d Cir. 2002)* (quoting *Carteret Sav. Bank, 954 F.2d at 142 n.1*).

HN2[] Before a court can exercise personal jurisdiction over a defendant, there must **[*14]** be a basis for the defendant's amenability to service of summons. *Omni Capital Int'l, Ltd. v. Rudolf Wolff & Co., Ltd., 484 U.S. 97, 104, 98 L. Ed. 2d 415, 108 S. Ct. 404 (1987)*. Unless otherwise provided by federal law, federal courts must follow the methods prescribed by the state in which the court is located to determine whether a defendant is amenable to service. *Id. at 105*; *Fed.R.Civ.P. 4(e)*. Thus, a federal district court must look either to a federal statute or to the long-arm statute of the state in which it sits. *Omni Capital, 484 U.S. at 105*. This rule also applies to service upon corporations. See *Fed.R.Civ.P. 4(h)*.

HN3[] Under the *Due Process Clause of the Fifth Amendment*, a federal court may not exercise personal jurisdiction over a foreign defendant unless that defendant has "certain minimum contacts with the forum such that the maintenance of the suit does not offend 'traditional notions of fair play and substantial justice.'" *International Shoe Co. v. Washington, 326 U.S. 310, 316, 90 L. Ed. 95, 66 S. Ct. 154 (1945)*. The analysis "will vary with the quality and nature of the defendant's activity, but **[*15]** it is essential in each case that there be some act by which the defendant purposefully avails itself of the privilege of conducting activities within the forum State, thus invoking the benefits and protections of its laws." *Hanson v. Denckla, 357 U.S. 235, 253, 2 L. Ed. 2d 1283, 78 S. Ct. 1228 (1958)*. In that regard, a court must "examine the relationship among the defendant, the forum, and the litigation." *Pinker, 292 F.3d at 368*.

A plaintiff may meet this burden by establishing the court's general jurisdiction by virtue of the defendant's "continuous and systematic general business contacts" with the forum state. *Helicopteros Nacionales de Colombia, S.A. v. Hall, 466 U.S. 408, 416, 80 L. Ed. 2d 404, 104 S. Ct. 1868 (1984)*; see also Provident Nat'l Bank, 819 F.2d at 437. Alternatively, a plaintiff may show that the court has specific jurisdiction because the particular cause of action arose from the defendant's forum-related activities. See *Helicopteros, 466 U.S. at 414*; *Wims v. Beach*

Terrace Motor Inn, Inc., 759 F. Supp. 264, 268 (E.D. Pa.1991) (rejecting "but for" causal link between **[*16]** advertisement and injury as too broad, stating "Pennsylvania courts have stated that a cause of action is sufficiently related to a defendant's forum contacts where the acts of the defendant within the forum state represent the factual predicates upon which the cause of action are to be based.").

HN4[] In Multi-District Litigation that is consolidated for pretrial purposes under *28 U.S.C. § 1407*, such as the instant action, the transferee court can exercise personal jurisdiction to the same extent that the transferor court could. *In re Agent Orange Prod. Liability Litigation, 818 F.2d 145, 163 (2d Cir.1987)*; *In re Telectronics Pacing Systems Inc., 953 F. Supp. 909 (S.D. Oh. 1997)*. Thus, if the transferor court in an individual case has jurisdiction over a defendant in the transferor court's forum, the transferee Court also has jurisdiction in that action regardless of the defendant's contacts with this forum.

HN5[] Before dismissing a case for lack of personal jurisdiction, courts should generally permit discovery into jurisdictional facts. *Massachusetts School of Law at Andover, Inc. v. American Bar Assoc., 107 F.3d 1026, 1042 (3d Cir. 1997)* **[*17]** (stating that the general rule in the Third Circuit is that "jurisdictional discovery should be allowed unless the plaintiff's claim is clearly frivolous."); *Renner v. Lanard Toys, Ltd., 33 F.3d 277, 283-84 (3d Cir. 1994)* (permitting jurisdictional discovery and stating that leave to conduct jurisdictional discovery should be freely granted); *Arch v. American Tobacco Co., Inc., 984 F. Supp. 830 (E.D. Pa. 1997)* ("A court may deny jurisdictional discovery where the plaintiff has failed to meet its burden of making out a threshold *prima facie* case of personal jurisdiction."); *Southern Ocean Seafood Co. v. Holt Cargo Systems, Inc., 1997 U.S. Dist. LEXIS 12159*, *Civ. A. No. 96-5217, 1997 WL 539763*, *8 (O'Neill, S.J.) (E.D. Pa. Aug. 11, 1997) (holding that plaintiff has burden of establishing a "threshold *prima facie* showing" of personal jurisdiction, and denying request to conduct jurisdictional discovery where plaintiff failed to contend that any defendant had contacts with the forum). "The scope of discovery is within the court's discretion, and allowing such discovery is premised on the assumption that further discovery would be worthwhile." *Molnlycke Health Care AB v. Dumex Med. Surgical Prods. Ltd., 64 F. Supp. 2d 448, 454 (E.D. Pa. 1999)*. **[*18]**

IV. ANALYSIS

A. *Section 12* of the Clayton Act Require Analysis of Personal Jurisdiction Based on National Contacts.

Plaintiffs first argue that Defendants's Motions to Dismiss must be denied because Defendants fail to consider BASF AG's and BASF Coatings's contacts with the United States as a whole. ***HN6***[] "A federal court's personal jurisdiction may be assessed on the basis of the defendant's national contacts when the plaintiff's claim rests on a federal statute authorizing nationwide service of process" or "service wherever defendant is 'doing business' or 'may be found.'" *Pinker v. Roche Holdings Ltd., 292 F.3d 361, 369 (3d Cir. 2002)*. See also *Go-Video, Inc. v. Akai Electric Co., 885 F.2d 1406, 1414-15 (9th Cir. 1989)*.

Plaintiffs contend that the Court must consider BASF AG's and BASF Coatings's national contacts because Plaintiffs advance antitrust claims and the Clayton Act provides for service on a defendant corporation wherever it may be found. *Section 12* of the Clayton Act states as follows:

> ***HN7***[] Any suit, action, or proceeding under the antitrust laws against a corporation may be brought not only in the judicial district **[*19]** whereof it is an inhabitant, but also in any district wherein it may be found or transacts business; and all process in such cases may be served in the district of which it is an inhabitant, or wherever it may be found.

15 U.S.C. § 22. *Section 12* is comprised of two clauses: the first relating to venue and the second concerning service of process. Relying on the Ninth Circuit's decision in Go-Video, Plaintiffs argue that the second clause operates independently from the venue provision, and that venue in this case may be obtained under the Alien Venue Act, *28 U.S.C. 1391(d)*, which provides that an alien may be sued in any federal district. See *Go-Video, Inc. v. Akai Electric Co., 885 F.2d 1406 (9th Cir. 1989)*. Defendants, on the other hand, rely heavily on the D.C. Circuit's holding in *GTE New Media Servs. Inc. v. BellSouth Corp., 339 U.S. App. D.C. 332, 199 F.3d 1343 (D.C. Cir. 2000)* and argue that *Section 12* must be read as an integrated whole and that the service of process provision is effective only when, pursuant to the first clause of *Section 12*, the action is brought in a district where **[*20]** the defendant resides, is found or transacts business. See *GTE New Media Servs. Inc. v. BellSouth Corp., 339 U.S. App. D.C. 332, 199 F.3d 1343 (D.C. Cir. 2000)*.

To resolve the dispute, we are drawn to the text of the statute and called upon to interpret the meaning of the words "in such cases" found in the second clause, dealing with service of process. If "in such cases" refers only to "any suit, action, or proceeding under the ***antitrust law*** against a corporation," Plaintiffs' argument would be correct, Defendants may be served wherever they may be found, and the Court would therefore assess personal jurisdiction based on Defendants' contacts with the United States as a whole. If, on the other hand, "in such cases" was intended to refer to the entire first clause, Plaintiffs would not be authorized under *Section 12* to serve BASF AG and BASF Coatings wherever they may be found because they have not been sued in the judicial district where they are inhabitants, or in any district where they may be found or transact business. [8]

[*21] Our Court of Appeals has not yet directly addressed this issue. We are, however, persuaded that Plaintiffs' position is correct. First, "it is axiomatic that ***HN8***[] the starting point for interpreting a statute is the language of the statute itself." *Tippins Inc. v. USX Corp., 37 F.3d 87, 92-93 (3d Cir. 1994)* (citing *Consumer Prod. Safety Comm'n v. GTE Sylvania, Inc., 447 U.S. 102, 108, 64 L. Ed. 2d 766, 100 S. Ct. 2051 (1980))*. In examining the text of the *Section 12* of the Clayton Act in this fashion, we agree with the analysis of the court in *General Elec. Co. v. Bucyrus-Erie Co., 550 F. Supp. 1037 (S.D.N.Y. 1982)*, a case relied upon by Go-Video:

> ***HN9***[] The word "such" means "the aforementioned," *Webster's Third International Dictionary* (unabr. ed.1963). Thus, when "such" precedes a noun it is assumed to refer to a particular antecedent noun and any dependent adjective or adjectival clauses modifying that noun, but not to any other part of the preceding clause or sentence. Applying this rule to *section 12*, "in such cases" would refer to "any suit, action, or proceeding under the antitrust laws against a corporation," and not **[*22]** to anything else in *section 12*'s first clause.

Bucyrus-Erie, 550 F. Supp. at 1042, n.7 (citing *Leasco Data Processing Equipment Corp. v. Maxwell, 468 F.2d 1326, 1340, n.10 (2d Cir. 1972)*, which construed terms "in such cases" in securities statute, *15 U.S.C. § 78aa*, a statute modeled upon *Section 12*); *In re Magnetic Audiotape Antitrust Litig., 171 F. Supp. 2d 179, 184-85 (S.D.N.Y. 2001)*, rev'd on other grounds by, *Texas International Magnetics, Inc. v. BASF Aktiengesellschaft, 31 Fed. Appx. 738* (2d Cir., Mar. 12, 2002) (holding that, under the circumstances, plaintiffs were entitled to discovery prior to dismissal for lack of personal jurisdiction). [9]

[*23] Moreover, even if we were to assume that the text of *Section 12* is ambiguous, Plaintiff's position is clearly in greater harmony with the purpose of the antitrust laws. ***HN11***[] "Perhaps more than any other law, the antitrust laws are national in scope and impact." *Paper Systems Inc. v. Mitsubishi Corp., 967 F. Supp. 364, 368 (E.D. Wisc.*

---

[8] Many of the cases in this consolidated action were transferred to this District pursuant to the MDL Transfer Order. Although a transferee court in an MDL action consolidated for pretrial purposes under *28 U.S.C. § 1407* can exercise personal jurisdiction to the same extent that the transferor court could, *In re Agent Orange, 818 F.2d at 163*; *In re Telectronics Pacing Systems, 953 F. Supp. 909 (S.D. Oh. 1997)*, the parties have not presented evidence or argument regarding BASF AG's or BASF Coatings's contacts with respective jurisdictions of the transferor courts.

[9] Although this interpretation of *Section 12* appears to conflict with ***HN10***[] the general canon of statutory construction that "referential and qualifying words and phrases, where no contrary intention appears, refer solely to the last antecedent[,] [i.e.,] the last word, phrase, or *clause* that can be made an antecedent without impairing the meaning of the sentence," see NORMAN J. SINGER, SUTHERLAND STATUTORY CONSTRUCTION § 47.33 (6th ed. 2000), the rule is merely an aid to interpretation and is not inflexible or uniformly binding. Id. See also ***Tippins*, *37 F.3d at 93*** (stating that the canons of interpretation are more appropriately applied to divine intent from statutes that carefully worded and assiduously compiled than from imprecise statutory language); *Shendock v. Director, Office of Workers' Compensation Programs, 893 F.2d 1458, 1464 (3d Cir. 1990)*; *Paper Systems Inc. v. Mitsubishi Corp., 967 F. Supp. 364, 367 (E.D. Wisc. 1997)*.

1997). In interpreting *Section 12* of the Clayton Act, we are mindful that "antitrust cases, especially those involving aliens, may pose problems for any one district court to obtain jurisdiction over all the defendants, if left to state long arm statutes." Id. As stated in Paper Systems:

> If the antitrust laws are to be effective, district courts' jurisdiction must reach the limits of the power of the United States of America. In the case of antitrust laws, it makes no sense to tie a district court's jurisdiction to the state in which it sits; it neither promotes the enforcement of ***antitrust law*** nor the management of litigation.

Id. [10]

[*24] Furthermore, as discussed in Go-Video, nothing in the legislative history of *Section 12* explains how "in such cases" is to be interpreted or suggests that Congress intended service of process under *Section 12* to be contingent upon satisfaction of the statute's venue provision. See *Go-Video, 885 F.2d at 1410*. We find it appropriate, however, that the court in Go-Video was guided by the relationship between general and specific venue statutes. ***HN12***[] Enactment of the venue provision in *Section 12* of the Clayton act does not preclude application of the Alien Venue Statute, *28 U.S.C. § 1391(d)*. In general, special venue provisions supplement rather than preempt general venue statutes. *Go-Video, 885 F.2d at 1409* (citing *Pure Oil v. Suarez, 384 U.S. 202, 16 L. Ed. 2d 474, 86 S. Ct. 1394 (1966))*; *Philadelphia Housing Authority v. American Radiator & Standard Sanitary Corp., 291 F. Supp. 252, 257-59 (E.D. Pa. 1968)* Indeed, the purpose of enacting the specific venue provisions under the Clayton Act was to enlarge jurisdiction to give an antitrust plaintiff the widest possible selection of forums to **[*25]** promote the plaintiff's role as a private attorney general. *Go-Video, 885 F.2d at 1410-11* (citing *United States v. Scophony Corp., 333 U.S. 795, 806-07, 92 L. Ed. 1091, 68 S. Ct. 855 (1948))*; *Bucyrus-Erie, 550 F. Supp. at 1040* (quoting Scophony Corp.); *Professional Adjusting Systems of America, Inc. v. General Adjustment Bureau, 352 F. Supp. 648, 651 (E.D. Pa. 1972)*; *Albert Levine Assocs. v. Bertoni & Cotti, S.p.A., 314 F. Supp. 169 (S.D.N.Y. 1970)* ("specific venue provisions of the antitrust statutes were intended to facilitate the prosecution of [antitrust violations] and "not to make unavailable the general venue provisions").

Moreover, *section 1391(d)* was intended to have "broad and overriding application" to prevent an alien defendant from using narrower venue statutes as a "shield against suit." *Go-Video, 885 F.2d at 1409-10* (quoting *Brunette Machine Works, Ltd. v. Kockum Indus., Inc., 406 U.S. 706, 714, 32 L. Ed. 2d 428, 92 S. Ct. 1936 (1972))*. In Brunette, the Supreme Court held that a specific venue provision for patent infringement cases under **[*26]** *28 U.S.C. § 1400(b)* did not bar suit where venue had been satisfied under the Alien Venue Act, *28 U.S.C. § 1391(d)*, even though the Court had previously held the same venue statute for patent infringement cases did preclude application of the general corporate venue provision of *28 U.S.C. § 1391(c)*. *Brunette, 406 U.S. at 713-14* (distinguishing *Fourco Glass Co. v. Transmirra Products Corp., 353 U.S. 222, 1 L. Ed. 2d 786, 77 S. Ct. 787 (1957)*, and holding that "suits against aliens are wholly outside the operation of all the federal venue laws, general and special.").

In contrast, we are not persuaded by Defendants' arguments, which rely heavily on the D.C. Circuit's holding in GTE. In that case, the court explicitly rejected the holding of Go-Video and, instead, opted to follow the Second Circuit's explanation of *Section 12* in *Goldlawr, Inc. v. Heiman, 288 F.2d 579, 581 (2d Cir. 1961)* (stating, in dicta, that "the extraterritorial service privilege [of *Section 12*] is given only when the other requirements [of the statute] are satisfied"), rev'd on **[*27]** other grounds, *369 U.S. 463, 8 L. Ed. 2d 39, 82 S. Ct. 913 (1962)*. As discussed in Go-Video, Goldlawr was decided prior to the Supreme Court's decision in Brunette, where the Court held that a specific venue statute supplements rather than preempts the Alien Venue Statute. *Go-Video, 885 F.2d at 1411*.

[10] We note that even the D.C. District Court, bound by the Circuit's holding in GTE, has "questioned whether the holding of GTE comports with the goals of the antitrust laws . . . ." *In re Vitamins Antitrust Litig., 94 F. Supp. 2d 26, 27, n.3 (D.D.C. 2000)*. Originally, in that case, the district court upheld the national contacts standard espoused in Go-Video. *In re Vitamin Antitrust Litig., 1999 U.S. Dist. LEXIS 12405, 1999 WL 728100* (D.D.C., July 29, 1999). However, in light of the D.C. Circuit's subsequent holding in GTE, the district court reconsidered its decision and ruled that *Section 12* does not permit a national contacts test in determining the existence of personal jurisdiction. *94 F. Supp. 2d at 27, n.2*. The district court nevertheless expressed its concern with the effect of the GTE holding on the consolidation and management of multidistrict litigation. *Id., at 30* and n.2.

Furthermore, the decision in Goldlawr did not reach the special case of an alien corporation, see Go-Video, 885 F.2d at 1411; Bucyrus-Erie, 550 F. Supp. at 1041-42. That distinction is significant given the Supreme Court's broad application of the Alien Venue Act. See Brunette, 406 U.S. at 713-14. Thus, the Goldlawr court was not squarely presented with the question at issue in the instant action. See In re Magnetic Audiotape, 171 F. Supp. 2d at 184 (stating that "the question presented [in Goldlawr, where defendants argued they had not been served, and plaintiff did not challenge the transferor court's determination that it lacked personal jurisdiction,] appeared to be whether transfer was appropriate while jurisdiction was still lacking, not whether jurisdiction, **[*28]** under Section 12 or any other provision, had been properly found."), rev'd on other grounds.

The GTE court also reasoned that a broad interpretation of Section 12, as adopted in Go-Video, would render Section 12's venue provision wholly redundant. GTE, 199 F.3d at 1351. We disagree. **HN13**[] On its face, the Alien Venue Act is not applicable to domestic corporations, which remain covered by the venue provision of Section 12.

Defendants also cite Management Insights, Inc. v. CIC Enterprises, Inc., 194 F. Supp. 2d 520 (N.D. Tex. 2001) to support their interpretation of Section 12. In that case, the court rejected the holding of Go-Video based on the belief that the Ninth Circuit in Go-Video failed to consider the general venue statute's treatment of corporations under 28 U.S.C. 1391(c). 194 F. Supp. 2d at 531-32. The Management Insights court stated:

> If the defendant is a domestic corporation, the Ninth Circuit's approach, in conjunction with § 1391(c), allows a plaintiff to sue a defendant *in any district,* even if that district has absolutely no relation to the defendant's business or **[*29]** to the incident that prompted the suit. For instance, a Texas plaintiff could hale an Alaskan corporate defendant into its courts even though the defendant has had no dealings at all with the forum state.

Id., at 532 (footnote omitted). This conclusion significantly distorts the holding of Go-Video. The broad grant of venue under the Alien Venue Statute is inapplicable to domestic corporations. **HN14**[] The holding of Go-Video permits a plaintiff to sue only an alien corporation in any district; nothing in Go-Video permits a domestic corporation to be sued in any district. Rather, a domestic corporation could only be sued, according to Section 12, "in the judicial district whereof it is an inhabitant," or "in any district wherein it may be found or transacts business." 15 U.S.C. § 22. [11]

[*30] Accordingly, we reject the reasoning of the GTE and hold that Section 12 authorizes Plaintiffs to serve foreign defendants, BASF AG and BASF Coatings, wherever they may be found. Our determination of jurisdiction over those Defendants will therefore be based on their respective contacts with the United States as a whole, rather than just Pennsylvania or the individual districts from which each individual case was transferred. Go-Video, Inc. v. Akai Electric Co., 885 F.2d 1406 (9th Cir. 1989); In re Magnetic Audiotape Antitrust Litig., 171 F. Supp. 2d 179, 184-85 (S.D.N.Y. 2001), rev'd on other grounds, Texas International Magnetics, Inc. v. BASF Aktiengesellschaft, 31 Fed. Appx. 738 (2d Cir., Mar. 12, 2002); Miller Pipeline Corp. v. British Gas, 901 F. Supp. 1416, 1423 (S.D. Ind. 1995) (exercising personal jurisdiction over a British corporation under the national contacts approach based on the foreign company's license agreements with at least one U.S. company in New Jersey, its status as a U.S. patent holder and a service contract for an oil refinery). [12]

[*31] Here, Plaintiffs have presented evidence that both BASF AG and BASF Coating hold United States patents. In addition, twenty one percent of BASF Corporation's sales in 2000 were based on products purchased from BASF

[11] We have no occasion here to determine whether any of the general venue statutes would, in addition to Section 12, be applicable to domestic corporations sued under the federal antitrust laws.

[12] Having held pursuant to Section 12 of the Clayton Act that Plaintiff may establish personal jurisdiction based on Defendants' national contacts, we will not address Plaintiffs' arguments under Fed. R. Civ. P. 4(k)(2). We note, however, application of Rule 4(k)(2) against BASF AG or BASF Coatings is undermined by several of the allegations and arguments raised by Plaintiffs, including the alleged sales of BASF AG to BASF Corporation and BASF Coatings's operation of offices in the United States. See Pls. Mem. in Opp. at 12, 15.

AG and other BASF affiliates. Buchmuller Aff. P 19. BASF AG sold approximately $ 1.5 billion in goods to the BASF Corporation located in Mount Olive New Jersey. See Buchmuller Wyman's Auto Affidavit P 19. According to BASF's web-site, BASF Coatings belongs to the Coatings Division of BASF, which had sales of 2.3 billion Euros in 2001 and which has a "significant market position[] in North America." The Coatings Division operates a facility in Morganton, North Carolina. BASF AG 2002 Form 20F, at 82. According to the Paint & Coatings Industry web-site, BASF Coatings maintains an office in Southfield, Michigan, a Detroit suburb where many other suppliers to the U.S. automotive industry are based. Plaintiffs' allegations and preliminary evidence thus support the existence of contacts between BASF AG and BASF Coatings and the United States. In our view, Plaintiffs have made a threshold *prima facie* showing of personal jurisdiction over Defendants. The allegations **[*32]** and facts presented warrant further discovery into BASF AG's and BASF Coatings's contacts with the United States. See *Texas International Magnetics v. BASF AG, 31 Fed. Appx. 738, 2002 WL 385569 (2d Cir. 2002)* (reversing dismissal and permitting jurisdictional discovery). Plaintiffs will be permitted to conduct discovery into whether Defendants BASF AG and BASF Coatings had sufficient contacts with the United States so that it can be said fairly that they purposefully availed themselves of the privilege of conducting activities within the United States, thus invoking the benefits and protections of its laws.

B. The Jurisdictional Contacts of BASF Corporation Are Not Attributable to BASF AG or BASF Coatings.

Plaintiffs argue that personal jurisdiction exists over BASF AG because the contacts of its wholly owned American subsidiary, BASF Corporation, are attributable to BASF AG. Defendant responds by drawing the Court's attention to, among other cases, *Arch v. American Tobacco Co., Inc., 984 F. Supp. 830 (E.D. Pa. 1997)* and In re: *Latex Gloves Products Liability Litig., 2001 U.S. Dist. LEXIS 12757*, MDL No. 1148, 2001 WL 964105 **[*33]** (Ludwig, J.) (E.D. Pa. Aug. 22, 2001).

HN15[] Typically, a foreign corporation is not subject to personal jurisdiction "merely because of its ownership of the shares of stock of a subsidiary doing business in the state." *Lucas v. Gulf & Western Indus., Inc., 666 F.2d 800, 805-06 (3d Cir.1981)*; see also *Renner v. Lanard Toys Ltd., 33 F.3d 277, 283-84 (3d Cir.1994)* (emphasizing need to clarify relationship between distributor and foreign corporation). There are, however, several lines of cases discussing when the contacts of a subsidiary my be imputed to the parent under an alter ego theory when direct contacts between the parent and forum are absent. See *Latex Gloves, 2001 U.S. Dist. LEXIS 12757, 2001 WL 964105*, *3-4 (E.D. Pa. Aug. 22, 2001); *Visual Sec. Concepts, Inc. v. KTV, Inc., 102 F. Supp. 2d 601, 605 (E.D. Pa. 2000)*; *Arch v. American Tobacco Co., Inc., 984 F. Supp. 830 (E.D. Pa. 1997)*.

HN16[] To prevail under this theory, the plaintiff must demonstrate that "the degree of control exercised by the parent must be greater than normally associated with common ownership and directorship." *Latex Gloves, 2001 U.S. Dist. LEXIS 12757, 2001 WL 964105*, *3; **[*34]** *Visual Sec. Concepts, 102 F. Supp. 2d at 605*; *Arch, 984 F. Supp. at 837*. "Plaintiffs must prove that the parent controls the day-to-day operations of the subsidiary such that the subsidiary can be said to be a mere department of the parent." *Latex Gloves, 2001 U.S. Dist. LEXIS 12757, 2001 WL 964105*, *3 (quoting *Arch, 984 F. Supp. at 837*, and citing other cases following its holding). The Court "should examine all relevant factors that relate to the intimacy of the relationship between the parent and subsidiary to assess whether the contacts of the subsidiary [with the forum] should be imputed to the parent." *Arch, 984 F. Supp. at 837* (stating that the test "perforce incorporates all the factors that have been historically used in determining whether a subsidiary is an alter ego or agent of the parent"). [13]

HN17[] Among the **[*35]** factors courts in this district have considered in determining whether the parent exercises sufficient control over the subsidiary to justify application of this jurisdictional theory are: 1) ownership of all or most of the stock of the related corporation; 2) common officers and directors; 3) a common marketing image; 4) the common use of a trademark or logo; 5) the common use of employees; 6) an integrated sales system; 7) the interchange of managerial and supervisory personnel; 8) the performance by the related corporation of business

[13] Arch has been followed numerous time in our District. See *Latex Gloves, 2001 U.S. Dist. LEXIS 12757, 2001 WL 964105*, *3 n.10 (citing cases).

functions which the principal corporation would normally conduct through its own agents or departments; 9) the acting of related corporation as marketing arm of the principal corporation, or as an exclusive distributor; and 10) receipt by the officers of the related corporation of instruction from the principal corporation. *Latex Gloves, 2001 U.S. Dist. LEXIS 12757, 2001 WL 964105*, *3-4 (citing *Superior Coal Co. v. Ruhrkohle, A.G., 83 F.R.D. 414, 421 (E.D. Pa.1979)* (permitting discovery of relationship between affiliate companies in antitrust case for purpose of establishing jurisdiction); *Savin Corp. v. Heritage Copy Prods., Inc., 661 F. Supp. 463, 469 (M.D. Pa.1987))*. **[*36]** See also *Zenith Radio Corp. v. Matsushita Elec. Indus. Co., 402 F. Supp. 262, 321 (E.D. Pa. 1975)* (exercising jurisdiction over a Japanese consumer electronics corporation in antitrust cases brought under *Section 12* of the Clayton Act firm based on the forum-related activity of corporation's United States distribution subsidiary) (citing *United States v. Scophony Corp., 333 U.S. 795, 814, 92 L. Ed. 1091, 68 S. Ct. 855 (1948)*.

After a careful examination of the relevant factors and the facts presented by Plaintiffs, we find that Plaintiffs have failed to establish that BASF AG has sufficient control over BASF Corporation to permit the exercise of alter ego jurisdiction. Although Plaintiffs have presented facts to establish some of the factors identified in Latex Gloves, including BASF AG's indirect ownership of all of BASF Corporation's stock and the use of BASF as a common marketing image for BASF AG and its subsidiaries, the primary factor that precludes a finding of alter ego jurisdiction in this case is the lack of representation of BASF AG on BASF Corporation's board of directors. Unlike the circumstances in Latex Gloves, only one of BASF **[*37]** AG's employees is currently a director of BASF Corporation, and at no time since 1986 have BASF AG's employees constituted a majority of BASF Corporation's board. See *Latex Gloves, 2001 U.S. Dist. LEXIS 12757, 2001 WL 964105*, *4 (finding that a "nearly complete congruence" of management and directors of the respective entities showed that the parent could exercise control over its subsidiaries). In our view, that type of control is no more than what is typically associated with majority ownership. *Latex Gloves, 2001 U.S. Dist. LEXIS 12757, 2001 WL 964105*, *3; *Visual Sec. Concepts, 102 F. Supp. 2d at 605*; *Arch, 984 F. Supp. at 837*; *Savin Corp., 661 F. Supp. at 470*. The facts also fail to demonstrate that BASF Corporation performs business functions that BASF AG would normally conduct through its own agents and functions; rather, BASF AG supplies products to BASF Corporation just as BASF AG does for other companies, on an arms length basis. These facts demonstrate that BASF Corporation is not controlled in its day-to-day operations such that it is a mere department of BASF AG.

C. Plaintiffs Have Not Properly Presented a Case for Co-Conspiratorial **[*38]** Jurisdiction.

Plaintiffs further argue, in a footnote, that jurisdiction over BASF AG and BASF Coatings may also be established on the basis of the jurisdictional contacts of the Defendants' co-conspirators. ***HN18***[] Courts have recognized jurisdiction over non-residents based upon the contacts of the alleged co-conspirators. *Massachusetts School of Law at Andover, Inc. v. American Bar Assoc., 846 F. Supp. 374, 379 (E.D. Pa.1994)* ("[A] court looks not only at the defendant's forum contacts, but at those of the defendant's 'resident' co-conspirators. The court imputes the contacts of the 'resident' co-conspirator over whom it has jurisdiction to the 'foreign' co-conspirator to see if there are sufficient contacts to exercise jurisdiction over the latter."), aff'd, *107 F.3d 1026 (3d Cir.1997)*. See also *Santana Products, Inc. v. Bobrick Washroom Equipment, 14 F. Supp. 2d 710, 718 (M.D. Pa. 1998)* (listing cases); but cf. *Philadelphia Housing Authority v. American Radiator & Standard Sanitary Corp., 291 F. Supp. 252, 261 (E.D. Pa. 1968)* (citing *Bankers Life & Cas. Co. v Holland, 346 U.S. 379, 98 L. Ed. 106, 74 S. Ct. 145 (1953))*. **[*39]**

However, "merely belonging to a civil conspiracy does not make a member subject to the jurisdiction of every other member's forum. . . . There must also be substantial acts in furtherance of the conspiracy within the forum, of which the out-of-state co-conspirator was or should have been aware." *Id. at 379-80*. See also *Santana Products, Inc. v. Bobrick Washroom Equipment, 14 F. Supp. 2d 710 (M.D. Pa. 1998)*; *Ethanol Partners Accredited v. Wiener, Zuckerbrot, Weiss & Brecher, 635 F. Supp. 15 (E.D. Pa. 1985)*; In re Arthur Treacher's Franchisee *Litigation, 92 F.R.D. 398 (E.D. Pa. 1981)*.

In furtherance of their conspiracy, Defendants are alleged to have engaged in the following anti-competitive activities: 1) participating in meetings and conversations to discuss the prices of automotive refinishing paint in the United States and elsewhere, and 2) selling automotive refinishing paint to customers in the United States at supracompetitive prices. *Id. P 52*. Plaintiffs have not alleged, however, that meetings, planning sessions, conferences or any other concerted action occurred with the forum. See *Santana Products, 14 F. Supp. 2d at 720*. **[*40]** Having raised this argument in a single footnote, Plaintiffs have failed to identify exactly what acts occurred in the relevant forum. Furthermore, even if we were to assume such acts occurred in the United States, Plaintiffs have neither alleged nor argued that BASF AG or BASF Coatings knew or should have known of their occurrence in the forum. See *Von Pein v. Ciccotelli, 1995 U.S. Dist. LEXIS 2189, 1995 WL 79527*, *2 (E.D. Pa. 1995) (finding lack of personal jurisdiction under conspiracy theory where complaint failed to allege that out-of-state defendants were aware of the alleged co-conspirator's activities within the forum).

Under these circumstances, where Plaintiffs have neither alleged sufficient facts nor presented complete argument on this issue, we will not permit discovery in furtherance of such theory where such discovery would be intertwined with the merits of Plaintiffs substantive conspiracy claims. See *Mass. School, 107 F.3d at 1042*; In re Arthur Treacher's Franchisee *Litigation, 92 F.R.D. 398 (E.D. Pa. 1981)*.

V. CONCLUSION

For these reasons, we will deny Defendants' Motion to Dismiss. An appropriate Order follows.

ORDER

[*41] AND NOW, this 31st day of July, 2002, upon consideration of Defendant BASF AG's Motion to Dismiss for Lack of Personal Jurisdiction (Docket No. 22) and Defendant BASF Coatings AG's Motion to Dismiss for Lack of Personal Jurisdiction (Docket No. 23) and all papers filed in support thereof and in opposition thereto, it is ORDERED that the Motions to Dismiss are **DENIED** without prejudice. Plaintiffs shall conduct jurisdictional discovery with respect to BASF AG and BASF Coatings AG. Jurisdictional discovery shall be completed within sixty (60) days of this Order. Within ten (10) days thereafter, Defendants BASF AG and BASF Coatings AG may file, if necessary, renewed motions to dismiss pursuant to *Rule 12(b)(2)*.

AND IT IS SO ORDERED.

Title *47 U.S.C.S. § 252* provides for the negotiation, arbitration, and approval of interconnection agreements and requires all parties to participate in any arbitration. *47 U.S.C.S. § 252(b)(1)*, *(5)*. All interconnection agreements adopted by negotiation or arbitration must be submitted for approval to the respective state public service commission. *47 U.S.C.S. § 252(e)*.

Civil Procedure > Appeals > Standards of Review > De Novo Review

HN5[] **Standards of Review, De Novo Review**

The appellate court reviews a district court's dismissal of a complaint de novo. In particular, whether specific conduct is anti-competitive is a question of law reviewed de novo.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN6[] **Motions to Dismiss, Failure to State Claim**

A complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. The court must accept the facts pleaded as true and construe them in a light favorable to plaintiffs.

Antitrust & Trade Law > Regulated Industries > Communications

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN7[] **Regulated Industries, Communications**

Fed. R. Civ. P. 12(b)(6) dismissals are particularly disfavored in fact-intensive antitrust cases. In claims under *§§ 1* and *2* of the Sherman Act, codified at *15 U.S.C.S. §§ 1* and *2*, according to the United States Court of Appeals for the Eleventh Circuit, the threshold of sufficiency that a complaint must meet to survive a motion to dismiss for failure to state a claim is exceedingly low. Although authorized by the Federal Rules of Civil Procedure, the liberal rules as to the sufficiency of a complaint make it a rare case in which a motion to dismiss should be granted.

Antitrust & Trade Law > Regulated Industries > General Overview

Antitrust & Trade Law > Regulated Industries > Communications

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

Antitrust & Trade Law > Regulated Industries > Communications > Telecommunications Act

HN8[] **Communications, Sherman Act**

Regarding the question of whether a litany of facts pleaded in a complaint, if taken as true, state a cause of action for the violation of the Sherman Act, answering this question requires a two-tiered inquiry. First, the court must determine whether the Telecommunications Act of 1996's (1996 Act) regulation of local telecommunications markets precludes application of the Sherman Act, so that a claim based on facts "inextricably linked" to an alleged violation of the 1996 Act can never, as a matter of law, form the basis of an independent Sherman Act claim. If the court concludes that the 1996 Act precludes "inextricably linked" antitrust claims, then the inquiry is at an end. However, if such a claim can stand as an independent Sherman Act claim, then the court must determine whether the allegations in the complaint adequately allege a violation of the Sherman Act.

Antitrust & Trade Law > Regulated Industries > Communications

Antitrust & Trade Law > Exemptions & Immunities > General Overview

HN9[] **Regulated Industries, Communications**

As a general principle, a statute does not automatically limit causes of action under another statute, and conduct that is alleged to violate one statute can also violate another, subjecting the perpetrator to liability for the violation of each. Moreover, the same conduct may support various theories of liability and expose the perpetrator to different types of damages. At the same time, Congress can determine the contours and extent of the remedy for specific conduct it determines to be unlawful and accordingly limit the causes of action for such conduct. While such congressional limitations can be established explicitly, courts have also determined that if two statutes are deemed to be plainly repugnant to each other, then Congress has implicitly limited one or the other. However, the court must be mindful that courts should be reluctant to imply a limitation resulting in antitrust immunity. Repeals of the antitrust laws by implication from a regulatory statute are strongly disfavored, and have only been found in cases of plain repugnancy between the antitrust and regulatory provisions.

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

Communications Law > Federal Acts > Telecommunications Act > Federal Preemption

Antitrust & Trade Law > Regulated Industries > Communications

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

Antitrust & Trade Law > Regulated Industries > Communications > State Regulation

Communications Law > Federal Acts > Telecommunications Act > General Overview

HN10[] **Communications, Sherman Act**

Rather than pre-emptive language, Congress specifically and directly stated that the Sherman Act and the Telecommunications Act were intended to be used in tandem to accomplish the congressional goals served by both acts--namely, the stimulation of competition. Congress explicitly stated--both through a savings clause directed specifically at antitrust enforcement and through an additional general savings clause--that the Telecommunications Act does not supplant or change the antitrust laws.

Antitrust & Trade Law > Regulated Industries > Communications

Communications Law > Federal Acts > Federal Communications Act > Federal Preemption

Communications Law > Federal Acts > Telecommunications Act > General Overview

HN11[] **Regulated Industries, Communications**

See 47 U.S.C.S. § 152 note.

Communications Law > Overview & Legal Concepts > General Overview

Communications Law > Federal Acts > Telecommunications Act > General Overview

Communications Law > Federal Acts > Telecommunications Act > Federal Preemption

HN12[] **Communications, State Regulation**

In enacting the Telecommunications Act of 1996, Congress did not explicitly supersede the salience of the antitrust laws in the telecommunications industry.

Antitrust & Trade Law > Exemptions & Immunities > Exempt Cartels & Joint Ventures

Communications Law > Federal Acts > Telecommunications Act > General Overview

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Regulated Industries > General Overview

Antitrust & Trade Law > Regulated Industries > Communications

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

Antitrust & Trade Law > Regulated Industries > Communications > Telecommunications Act

HN13[] **Exemptions & Immunities, Exempt Cartels & Joint Ventures**

The United States Court of Appeals for the Eleventh Circuit agree with the United States Court of Appeals for the Second Circuit that the savings clause of the Telecommunications Act of 1996 unambiguously establishes that there is no plain repugnancy between the Telecommunications Act and the antitrust statutes and thus that the Telecommunications Act does not provide an implicit immunity from the antitrust laws.

Governments > Legislation > Interpretation

HN14[] **Legislation, Interpretation**

When the words of a statute are unambiguous, then, the first canon of statutory construction is also the last: judicial inquiry is complete.

Antitrust & Trade Law > Regulated Industries > Communications

Communications Law > Federal Acts > Telecommunications Act > General Overview

Antitrust & Trade Law > Regulated Industries > General Overview

Communications Law > Federal Acts > General Overview

HN15[] **Regulated Industries, Communications**

The United States Court of Appeals for the Eleventh Circuit agrees with the United States Court of Appeals for the Second Circuit, which concluded that controlling case law does not support the theory that specific legislation meant to encourage competition necessarily takes precedence over the general antitrust laws. The Second Circuit also noted that it is unlikely that allowing antitrust suits would substantially disrupt the regulatory proceedings mandated by the Telecommunications Act. While injunctive relief in such suits may require judicial restraint, awarding damages for the willful maintenance of monopoly power would not substantially interfere with the regulatory scheme envisioned by the Telecommunications Act, noting that in some instances, it is possible that the antitrust laws will be needed to supplement the regulatory scheme to bring competition to the local phone service markets.

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

Communications Law > Federal Acts > Telecommunications Act > General Overview

Antitrust & Trade Law > Regulated Industries > Communications

Antitrust & Trade Law > Regulated Industries > Communications > General Overview

HN16[] **Communications, Sherman Act**

Merely pleading violations of the Telecommunications Act of 1996 (1996 Act) alone will not suffice to plead Sherman Act violations. Thus, a claim that a defendant failed to live up to its contractual obligations under an agreement made pursuant to the 1996 Act in and of itself will be insufficient to establish an antitrust violation. However, if a plaintiff also pleads facts that, if true, tend to show an anticompetitive purpose to create or maintain a monopoly, then that plaintiff has pleaded an antitrust violation.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > General Overview

HN17[] Sherman Act, Claims

Establishing a § 2 of the Sherman Act, codified at 15 U.S.C.S. § 2, monopolization violation requires proof of two elements: (1) the possession of monopoly power in the relevant market and (2)"the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. Monopoly power is defined as the power to control prices or exclude competition. A firm that does not achieve monopoly power may nonetheless violate § 2 through attempted monopolization. Proving attempted monopolization requires a showing of: (1) anticompetitive or exclusionary conduct; (2) with specific intent to monopolize; and (3) a dangerous probability of achieving monopoly power. Anticompetitive conduct is the use of monopoly power, however lawfully acquired, to foreclose competition, to gain a competitive advantage, or to destroy a competitor. An assessment of intent is critical in determining whether an accused monopolist's actions qualify as anti-competitive conduct. In the absence of any purpose to create or maintain a monopoly, the Sherman Act does not restrict the long recognized right of a trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal.

Antitrust & Trade Law > Sherman Act > General Overview

HN18[] Antitrust & Trade Law, Sherman Act

The antitrust laws in general do not require that firms (including monopolies) affirmatively help their competitors to succeed, there is a narrow exception to this general rule when a monopolist improperly withholds access to an "essential facility" without which a competitor cannot enter or compete in a market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

HN19[] Monopolies & Monopolization, Actual Monopolization

Although a party may ordinarily choose freely the companies with which it will conduct business, when a monopolist's refusal to deal is accompanied by the intent to monopolize and the requisite degree of market power, that refusal to deal may violate § 2 of the Sherman Act, 15 U.S.C.S. § 2.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > Predatory Hiring & Price Squeezes

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN20[] Anticompetitive & Predatory Practices, Predatory Hiring & Price Squeezes

In an antitrust action, a price squeeze is an intentional pattern of pricing wholesale inputs at such a high level that the competitor cannot absorb those costs and still compete profitably in the downstream retail markets.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN21[] Actual Monopolization, Anticompetitive & Predatory Practices

Monopoly leveraging occurs when a firm uses its market power in one market to gain market share in another market other than by competitive means. The use of monopoly power attained in one market to gain a competitive advantage in another is a violation of *§ 2* of the Sherman Act, even if there has not been an attempt to monopolize the second market.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Computer & Internet Law > Internet Business > Licensing > Trademark Antitrust Issues

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

HN22[] Actual Monopolization, Anticompetitive & Predatory Practices

Monopoly leveraging can violate *§ 2* of the Sherman Act, codified at *15 U.S.C.S. § 2*. When a party with monopoly power abuses its monopoly power in one market as a means of gaining an unlawful competitive advantage in and monopolizing another market, the United States Court of Appeals for the Eleventh Circuit does not hesitate to conclude that the Sherman Act prohibits such conduct. The United States Supreme Court has also found that a triable question of fact exists on a *§ 2* claim where a defendant uses its control over one market to gain dominance in another market.

Governments > Courts > Judicial Precedent

HN23[] Courts, Judicial Precedent

The United States Court of Appeals for the Eleventh Circuit adopted as binding precedent all United States Court of Appeals for the Fifth Circuit decisions handed down prior to the close of business on September 30, 1981.

Energy & Utilities Law > Natural Gas Industry > Distribution & Sale

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Claims

Energy & Utilities Law > Antitrust Issues > General Overview

Energy & Utilities Law > Pipelines & Transportation > Access

Energy & Utilities Law > Pipelines & Transportation > Natural Gas Transportation

HN24[] **Natural Gas Industry, Distribution & Sale**

The withholding of access to an essential facility without which a competitor cannot enter or compete in a market is a violation of the antitrust laws. Under the well-established "essential facilities" doctrine, an inference of anticompetitive intent in violation of *§ 2* of the Sherman Act, codified at *15 U.S.C.S. § 2* arises upon a showing of four elements: (1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility. By exercising its control over an essential facility (sometimes called a "bottleneck") to withhold access to that facility, a monopolist can exclude competition. Thus, the antitrust laws have imposed on firms controlling an essential facility the obligation to make the facility available on non-discriminatory terms.

Governments > Courts > Authority to Adjudicate

HN25[] **Courts, Authority to Adjudicate**

A federal circuit court is not authorized to abrogate doctrines that have been endorsed and not yet rejected by the United States Supreme Court.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN26[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Section 2 of the Sherman Act, codified at *15 U.S.C.S. § 2* prohibits denial of access to essential facilities on reasonable terms. The "applicable legal standard" is that any company which controls an essential facility or a strategic bottleneck in the market violates the antitrust laws if it fails to make access to that facility available to its competitors on fair and reasonable terms that do not disadvantage them. As the United States Supreme Court explained, a monopolist must provide access to essential facilities upon such just and reasonable terms and regulations as will, in respect of use, character, and cost of service, place every such company upon as nearly an equal plane as may be with respect to expenses and charges as that occupied by the proprietary companies.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN27[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Breach of contract and antitrust are not mutually exclusive.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN28[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

Although a party may ordinarily choose the companies with whom it will conduct business, the existence of a right to refuse to deal with other firms does not mean that the right is unqualified. When a monopolist's refusal to deal is accompanied by the intent to monopolize and the requisite degree of market power, that refusal to deal may violate *§ 2* of the Sherman Act, codified at *15 U.S.C.S. § 2*. The right to refuse to deal is limited when the company possesses a monopoly because the danger exists that it may use its monopoly position to decrease competition in other markets. As the United States Supreme Court has explained, it is true that as a general matter a firm can refuse to deal with its competitors. But such a right is not absolute; it exists only if there are legitimate competitive reasons for the refusal.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN29[] **Actual Monopolization, Anticompetitive & Predatory Practices**

A vertically integrated monopolist that refuses to deal with a customer to foreclose competition in a second market may violate *§ 2* of the Sherman Act, codified at *15 U.S.C.S. § 2*.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN30[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Allegations that allege a failure to perform under an agreement that amount to a refusal to deal are sufficient to state a claim under the antitrust laws.

Opinion by: BARKETT

Opinion

[*1276] BARKETT, Circuit Judge:

Covad Communications Company and Dieca Communications, Inc. (collectively "Covad") [1] appeal the district court's dismissal, pursuant to *Federal Rule of Civil Procedure 12(b)(6)*, of their action against BellSouth Corporation and BellSouth Telecommunications Corporation (collectively "BellSouth"). Covad is a seller of high-speed Digital Subscriber Line ("DSL") internet service. BellSouth is a regional telephone service and telecommunications provider, which also sells DSL service. Covad and BellSouth have entered into an "interconnection agreement" to allow Covad to provide DSL service to consumers over BellSouth's existing telephone lines. However, Covad alleges that BellSouth has attempted to stifle competition both by failing to live up to its contractual obligations and through broad exclusionary behavior, including **[**2]** the use of price squeezes, misleading advertising, and the misuse of Covad's confidential customer information. Covad's 24-count complaint asserts that BellSouth's actions violated the Sherman Antitrust Act, the Telecommunications Act of 1996, state anti- monopoly statutes and unfair competition laws, and state law of breach of contract. On appeal, Covad argues that the trial court erred in dismissing Covad's complaint. We agree and REVERSE.

BACKGROUND

BellSouth is the incumbent local exchange carrier ("ILEC") that inherited monopoly control over the local telephone network in a nine-state region after the breakup of AT&T in 1983. Covad, formed in 1996, sells high speed DSL service, a technology that allows consumers and businesses to transmit and receive data over existing copper phone lines. Covad's DSL service competes directly with BellSouth's own DSL and other retail data services, such as dial-up internet access, Internet Services Digital Network ("ISDN") **[**3]** and dedicated line services such as "Frame Relay" and "T-1."

As Covad explains it, [2] to bring its services to consumers in BellSouth's region, Covad must have dependable, timely, and affordable access to the local telephone network controlled by BellSouth. Because of the ubiquitous nature of the local telephone network, the facilities controlled by BellSouth cannot practicably be duplicated. Thus, to operate feasibly, Covad must **[*1277]** be able to "interconnect" its DSL network with BellSouth's local telephone network, which means, at its most basic, that Covad needs to be able to connect its wires to the BellSouth wires that make up the local telephone network.

---

[*] Honorable Shelby Highsmith, U.S. District Judge for the Southern District of Florida, sitting by designation.

[1] Dieca is a wholly-owned subsidiary of Covad.

[2] ***HN1***[] Because in this appeal we review *de novo* the district court's grant of a motion to dismiss Covad's complaint, we take the facts as they are alleged in Covad's complaint. *See* *Quality Foods de Centro Am., S.A. v. Latin Am. Agribusiness Dev. Corp., S.A., 711 F.2d 989, 994-95 (11th Cir. 1983)*.

Congress recognized that new companies seeking **[**4]** entry into the market could not compete if they had to duplicate existing telephone networks, and addressed this concern by passing ***HN2***[] the Telecommunications Act of 1996 (the "1996 Act"), which requires, among other things, that ILECs allow competitors to interconnect with their networks. The centerpieces of the 1996 Telecommunications Act are *sections 251* [3] **[**5]** and *252*, [4] codified at *47 U.S.C. §§ 251* and *252*, which together impose a series of affirmative duties on ILECs like BellSouth, for the benefit of competitive local exchange carriers ("CLECs") like Covad. *Sections 251* and *252* also establish the standards for the arbitration and approval of interconnection agreements between ILECs and CLECs.

Pursuant to the 1996 Act, Covad entered into a contract in 1998 with BellSouth (the "Interconnection Agreement") in which BellSouth agreed, among other things: (1) to allow Covad to "collocate" (place Covad's equipment) in BellSouth central offices throughout its region, providing interconnection between the network controlled by BellSouth and Covad's network; (2) to provide interoffice transport facilities (high capacity connections necessary to connect Covad's equipment in various central offices); (3) to provide nondiscriminatory access to operational support systems ("OSS") to allow Covad to place orders for facilities; and (4) to provide loops (the actual copper wires used for DSL **[**6]** transmission).

In this suit, Covad alleges that Bell South aimed to stifle competition and protect and extend its local telephone monopoly, in violation of the Interconnection Agreement and the antitrust laws, by embarking on a series of dilatory, anti-competitive acts designed to prevent or delay Covad's entry into the DSL market, impede its ability to deliver service to consumers, and drive Covad from the marketplace. In particular, Covad alleges that BellSouth regularly misrepresented the availability of space in BellSouth's central offices so as initially to effectively deny collocation altogether. When it did permit collocation, BellSouth allegedly raised Covad's costs unnecessarily and systematically and in bad faith denied and delayed facilities essential to Covad's success, including interoffice transport, OSS, and local loops, resulting in delays and lost customers. Covad also asserts that BellSouth manipulated its dual role as both Covad's wholesale supplier (of local exchange elements) and its retail competitor (for DSL) **[*1278]** by engaging in a "price squeeze"--an intentional pattern of pricing wholesale inputs at such a high level that Covad (or indeed BellSouth itself) cannot **[**7]** absorb those costs and still compete profitably in the downstream retail markets. By assigning inordinately high costs to its wholesale offerings, and inordinately low costs to its retail offerings, BellSouth allegedly squeezed out competitors such as Covad, clearing the field for its own retail services.

Furthermore, Covad alleges that BellSouth strategically understaffed its wholesale division, which BellSouth created to serve customer-competitors like Covad. This strategy slowed down order processing and created backlogs that, at times, included over 5,000 Covad orders. By refusing to develop adequate systems for placing wholesale orders, BellSouth thwarted Covad's aggressive first-to-market strategy, caused Covad to lose customers, impeded Covad's ability to deliver high quality service, and protected BellSouth's monopoly.

Finally, Covad alleges that BellSouth acted with clear motive and intent to destroy DSL competition and competitors like Covad. Covad asserts that BellSouth possessed DSL technology, but did not offer it to the public as a means of internet access until forced to do so in competition with Covad; BellSouth preferred to offer more profitable alternatives such **[**8]** as ISDN or T-1 service, at the expense of consumer choice. When Covad threatened to

---

[3] ***HN3***[] *Section 251* imposes various duties on all local exchange carriers ("LECs"): to permit the resale of their telecommunication services; to provide number portability; to provide dialing parity to other LECs; to afford other LECs access to poles, ducts, conduits, and rights-of-way; and, most significantly here, to establish reciprocal compensation arrangements for the transport and termination of telecommunications. *47 U.S.C. § 251(b)*. *Section 251* also imposes additional obligation on ILECs, including the duty to interconnect their networks with that of any requesting telecommunications carriers "on rates, terms, and conditions that are just, reasonable, and nondiscriminatory," and to negotiate in good faith the agreements establishing the rates, terms, and conditions of these interconnections. *47 U.S.C. § 251(c)(1)* and *(2)*.

[4] ***HN4***[] *Section 252* provides for the negotiation, arbitration, and approval of interconnection agreements and requires all parties to participate in any arbitration. *47 U.S.C. § 252(b)(1)* and *(5)*. All interconnection agreements adopted by negotiation or arbitration must be submitted for approval to the respective state public service commission ("PSC"). *47 U.S.C. § 252(e)*.

compete for internet access customers with DSL, a cheaper and more convenient service, BellSouth itself began an aggressive campaign to offer DSL. BellSouth confirmed its anticompetitive intent, Covad says, by falsely disparaging Covad's services and using confidential Covad information to solicit its customers. Covad states that BellSouth's scheme has had the intended effect of denying Covad access to the local internet access markets, substantially lessening competition and consumer choice in those markets, creating higher prices, and stifling innovation.

These actions, according to Covad, violate the 1996 Act, the Sherman Act, and various state laws. The district court, relying on the Seventh Circuit's opinion in *Goldwasser v. Ameritech Corp., 222 F.3d 390 (7th Cir. 2000)*, dismissed Covad's Sherman Act claims, holding that allegations that are based on duties established by the 1996 Act cannot form the basis of a violation of the Sherman Act because (1) "'affirmative duties to help one's competitors . . . do not exist under the unadorned antitrust laws,'" D.C. Opinion at 15 n. **[**9]** 8 (quoting *Goldwasser, 222 F.3d at 400*); (2) "the 'elaborate enforcement structure' of the 1996 Act precludes suits under the Sherman Act for ILEC duties because 'antitrust laws would add nothing to the oversight already available under the 1996 law,'" *id.* at 15 (quoting *Goldwasser, 222 F.3d at 400-01*); and (3) even if such allegations could be entirely divorced from the 1996 Act context, such claims nonetheless would not constitute "allegations of a freestanding antitrust claim" because "'the elaborate system of negotiated agreements and enforcement established by the 1996 Act'" should not be "'brushed aside by any unsatisfied party with the simple act of filing an antitrust action.'" *Id.* at 16-17 (quoting *Goldwasser, 222 F.3d at 401*). [5]

[10]** **[*1279]** Turning to Covad's claims under Section 222 of the 1996 Act and for breach of contract, the district court found that, because state commissions have the power not only to approve interconnection agreements "but to later interpret and enforce them as well," "sections 206 and 207 do not grant federal courts jurisdiction . . . when claims directly implicate the regulatory scheme of the 1996 Act," except for the power to review "a determination by a [state commission]." *Id.* at 37-38. Because Covad's claims "relate directly to duties under the 1996 Act or the interconnection agreement, which are to be first reviewed and enforced by the respective [state commissions]," the court dismissed those claims. *Id.* at 38. Finally, the court dismissed Covad's tort claims for interference and unfair competition to the extent they involved any allegation other than "improperly soliciting customers not to enter into contracts with Covad or to breach existing contracts, [and] disparaging Covad's products and services." *Id.* at 40. [6] The trial court rejected the bulk of Covad's tort claims because they "are merely a restated breach of contract claim which the court has already dismissed **[**11]** for the reasons noted above." *Id.*

HN5[] We review a district court's dismissal of a complaint *de novo*. In particular, "whether specific conduct is anti-competitive is a question of law reviewed *de novo*." *SmileCare Dental Group v. Delta Dental Plan of Cal., Inc., 88 F.3d 780, 783 (9th Cir. 1996)*. "'[***HN6***[] A] complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.'" *St. Joseph's Hosp., Inc. v. Hosp. Corp. of Am., 795 F.2d 948, 953 (11th Cir. 1986)* (quoting *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957))*. This Court "must accept the facts pleaded as true and construe them in a light favorable to plaintiffs." *Quality Foods de Centro Am., S.A. v. Latin Am. Agribusiness Dev. Corp., S.A., 711 F.2d 989, 994-95 (11th Cir. 1983)*. **[**12]** ***HN7***[] *Rule 12(b)(6)* dismissals are particularly disfavored in fact-intensive antitrust cases. In *Quality Foods*, which involved claims under *sections 1* and *2* of the Sherman Act, this Court stated that "the threshold of sufficiency that a complaint must meet to survive a motion to dismiss for failure to state a claim is exceedingly low." *711 F.2d at 994*. "Although authorized by the Federal Rules of Civil Procedure, the liberal rules as to the sufficiency of a complaint make it a rare case in which a motion [to dismiss] should be granted." *St. Joseph's Hosp., 795 F.2d at 953* (footnote omitted).

---

[5] The district court, however, did not dismiss Covad's antitrust claims in their entirety; it found that allegations that "BellSouth engaged in predatory advertising and promotion" could support an antitrust violation and dismissed these claims only to the extent that they alleged misuse of proprietary information, a subject that is "covered by paragraph 9 of the Interconnection Agreement." D.C. Opinion at 29-31. The court also declined to dismiss Covad's "monopoly leveraging" claim to the extent it was based on conduct "not implicated by the 1996 Act." *Id.* at 33.

[6] The tort claims not dismissed by the district court were subsequently dismissed by stipulation and are not part of this appeal.

DISCUSSION

I. *Sherman Act Claims*

*We turn first to **HN8**[] the question of whether the litany of facts pleaded in Covad's complaint, if taken as true, state a cause of action for the violation of the Sherman Act. Answering this question requires a two-tiered inquiry. First, we must determine whether the 1996 Act's regulation of local telecommunications markets precludes application of the Sherman Act so that a claim based on facts "inextricably linked" to an alleged violation of the 1996 Act can never, as a matter of law, form the basis of an independent **[**13]** Sherman Act claim. If we conclude that the 1996 Act precludes "inextricably linked" antitrust claims, then our inquiry is at an end. However, if such a claim can stand as an independent Sherman Act claim, then we must determine* **[*1280]** *whether the allegations in Covad's complaint adequately allege a violation of the Sherman Act.*

A. Does the 1996 Act Preempt All Sherman Act Claims?

HN9[] *As a general principle, a statute does not automatically limit causes of action under another statute, and conduct that is alleged to violate one statute can also violate another, subjecting the perpetrator to liability for the violation of each. Moreover, the same conduct may support various theories of liability and expose the perpetrator to different types of damages. At the same time, Congress can determine the contours and extent of the remedy for specific conduct it determines to be unlawful and accordingly limit the causes of action for such conduct. While such congressional limitations can be established explicitly, courts have also determined that if two statutes are deemed to be plainly repugnant to each other, then Congress has implicitly limited one or the other. However, we must be mindful that **[**14]** courts should be reluctant to imply a limitation resulting in antitrust immunity. See Cantor v. Detroit Edison Co., 428 U.S. 579, 597, 49 L. Ed. 2d 1141, 96 S. Ct. 3110 (1976)*. "Repeals of the antitrust laws by implication from a regulatory statute are strongly disfavored, and have only been found in cases of plain repugnancy between the antitrust and regulatory provisions." *United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 350-51, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963)* (footnotes omitted).

The initial question before us in this case is whether Congress intended in the 1996 Act to provide immunity from antitrust violation claims for conduct covered in that Act. We begin by examining the plain language of the 1996 Act to determine whether it expresses any intention to preempt Sherman Act antitrust claims for conduct that is inextricably linked to the 1996 Act. Our examination reveals that, ***HN10***[] rather than pre-emptive language, Congress specifically and directly stated that the two Acts were intended to be used in tandem to accomplish the congressional goals served by both acts--namely, the stimulation of competition. [7] Congress explicitly stated--both **[**15]** through a savings clause directed specifically at antitrust enforcement and through an additional general savings clause--that the 1996 Act does not supplant or change the antitrust laws. ***HN11***[] The 1996 Act provides:

> SAVINGS CLAUSE . . . nothing in this Act or the amendments made by this Act shall be construed to modify, impair, *or supersede the applicability of any of the antitrust laws*.
> NO IMPLIED EFFECT . . . This Act and the amendments made by this Act shall not be construed to modify, impair, or supersede Federal, State or local laws unless expressly so provided in such Act or amendments.

Telecommunications Act of 1996, sec. 601(b)(1), (c)(1), *§ 152* note, 110 Stat. 56, 143 (1996) (emphasis added). Thus, ***HN12***[] in enacting the 1996 Act, Congress did not explicitly supersede the salience of the antitrust laws in the telecommunications industry.

---

[7] The purpose of the 1996 Act is to "provide for a pro-competitive, de-regulatory national policy framework designed to accelerate rapidly private sector deployment of advanced telecommunications and information technologies and services to all Americans by opening all telecommunications markets to competition." H.R. Conf. Rep. 104-458, 1996 WL 46795, at *1 (1996).

[16]** It is clear that plain repugnancy cannot be found between the 1996 Act and the antitrust laws in view of the 1996 Act's express language reserving the applicability of the antitrust laws. An act that expressly **[*1281]** preserves the antitrust laws' applicability and fully subjects anticompetitive activities to them cannot be read to impliedly repeal those laws. ***HN13***[] We agree with the Second Circuit that the "savings clause unambiguously establishes that there is no 'plain repugnancy' between the Telecommunications Act and the antitrust statutes [and thus] that the Telecommunications Act does not provide an 'implicit immunity' from the antitrust laws.'" *Law Offices of Curtis V. Trinko v. Bell Atl. Corp., 294 F.3d 307 (2d Cir. 2002)*. We conclude that the plain statutory language is sufficient to end our inquiry on this matter. *CBS Inc. v. Primetime 24 Joint Venture, 245 F.3d 1217, 1222 (11th Cir. 2001)* ("***HN14***[] When the words of a statute are unambiguous, then, this first canon [of statutory construction] is also the last: judicial inquiry is complete.") (brackets in original) (citations omitted).

However, should there be any doubt that the plain language of the savings clause **[**17]** resolves the issue, we find support for our conclusion in the legislative history surrounding the 1996 Act, reflecting that the President, the Congress, the Department of Justice, and the FCC have emphasized the critical need for the antitrust laws to work in conjunction with the 1996 Act in order to spur competition in the telecommunications industry. For example, the Senate Report analyzing the bill specifically provided: "The provisions of this bill shall not be construed to grant immunity from any future antitrust action against any entity referred to in the bill." S. Rep. No. 104-23, at 17 (1995) (R2-7-A18). Thus, the savings clause "prevents affected parties from asserting that the bill impliedly preempts other laws." Joint Explanatory Statement of the Committee of Conference, H.R. Conf. Rep. No. 104-458, S. Rep. No. 104-230, at 201 (1996) ("Conference Report"). Throughout the legislative record, Congress repeatedly emphasized that ILECs like BellSouth remain subject to antitrust enforcement:

> ***Antitrust law*** is synonymous with low prices and consumer protection -- and that is exactly what we need in our telecommunications industry . . . . The bill contains an all-important **[**18]** antitrust savings clause which ensures that any and all telecommunications merger and anticompetitive activities are fully subject to the antitrust laws. . . . And by maintaining the role of the antitrust laws, the bill helps to ensure that the Bells cannot use their market power to impede competition and harm consumers.

142 Cong. Rec. H1145-06 (daily ed. February 1, 1996) (statement of Rep. Conyers).

> The second important antitrust issue in this legislation is the unequivocal antitrust savings clause that explicitly maintains the full force of the antitrust laws in this vital industry. Today we take for granted that the antitrust laws apply to the communications sector. . . . Application of the antitrust laws is the most reliable, time-tested means of ensuring that competition, and the innovation that it fosters, can flourish to benefit consumers and the economy.

142 Cong. Rec. S687-01 (daily ed. February 1, 1996) (statement of Sen. Thurmond).

> I firmly believe that we must rely on the bipartisan principles of ***antitrust law*** in order to move as quickly as possible toward competition in all segments of the telecommunications industry, and away from regulation. **[**19]** Relying on antitrust principles is vital to ensure that the free market will work to spur competition and reduce government involvement in the industry.

141 Cong. Rec. S18586-01 (daily ed. December 14, 1995) (statement of Sen. Leahy).

Former President Clinton again emphasized the importance of antitrust enforcement **[*1282]** when he signed the 1996 Act into law:

> The Act's emphasis on competition is also reflected in its antitrust savings clause. This clause ensures that even for activities allowed under or required by the legislation, or activities resulting from FCC rulemaking or orders, the antitrust laws continue to apply fully.

Statement by President William J. Clinton upon Signing S. 652, 32 Weekly Comp. Pres. Doc. 218 (February 8, 1996), *reprinted in* 1996 U.S.C.C.A.N. 228-1, 228-3. Thus, both the legislative and executive branches recognized that the antitrust laws would coexist alongside the Act.

Finally, in implementing *sections 251* and *252* of the 1996 Act (governing the arbitration for and approval of interconnection agreements between ILECs like BellSouth and CLECs like Covad), the FCC formally acknowledged that its regulations did not provide the "exclusive **[**20]** remedy" for anticompetitive conduct. First Report and

Order, In re Implementation of the Local Competition Provisions in the Telecommunications Act of 1996, *11 F.C.C.R. 15499, P 124* (Aug. 8, 1996) (R2-7-A174). The FCC emphasized that, in addition to judicial review of arbitrations setting the terms of interconnection agreements, "parties have several options for seeking relief if they believe that a carrier has violated the standards under *section 251* or *252*," *id.*, expressly including private antitrust enforcement: "We clarify . . . that nothing in *sections 251* and *252* or our implementing regulations is intended to limit the ability of persons to seek relief under the antitrust laws." *Id. at P 129 (R2-7-A175)* (footnote omitted).

Thus, in view of the plain statutory language and the legislative pronouncements of the intended coexistence of the antitrust laws and the 1996 Act, we cannot agree with *Goldwasser* to the extent that it is read to say that a Sherman Act antitrust claim cannot be brought as a matter of law on the basis of an allegation of anti-competitive conduct that happens to be "intertwined" with obligations established by the 1996 Act. [8]

[21]** **[*1283]** At the same time, we agree with *Goldwasser* that ***HN16***[] merely pleading violations of the 1996 Act alone will not suffice to plead Sherman Act violations. Thus, a claim that a defendant failed to live up to its contractual obligations under an agreement made pursuant to the 1996 Act in and of itself will be insufficient to establish an antitrust violation. However, if a plaintiff also pleads facts that, if true, tend to show an anticompetitive purpose to create or maintain a monopoly, then that plaintiff has pleaded an antitrust violation. [9] Because we

---

[8] The *Goldwasser* court stated:

> Nevertheless, when one reads the complaint as a whole these allegations appear to be inextricably linked to the claims under the 1996 Act. Even if they were not, such a conclusion would then force us to confront the question whether the procedures established under the 1996 Act for achieving competitive markets are compatible with the procedures that would be used to accomplish the same result under the antitrust laws. In our view, they are not. The elaborate system of negotiated agreements and enforcement established by the 1996 Act could be brushed aside by any unsatisfied party with the simple act of filing an antitrust action. Court orders in those cases could easily conflict with the obligations the state commissions or the FCC imposes under the *§ 252* agreements. The 1996 Act is, in short, more specific legislation that must take precedence over the general antitrust laws, where the two are covering precisely the same field.

Goldwasser, 222 F.3d at 401.

The district court interpreted this language to mean that a Sherman Act antitrust claim cannot ever be brought if it alleges conduct also covered by the 1996 Act. We disagree that *Goldwasser* stands for such a broad proposition, and note that *Goldwasser* tied its conclusion to the specific allegations of the complaint in that case. We do agree, however, with the Second Circuit in *Trinko*, when it concluded that "***HN15***[] controlling case law does not support the theory that specific legislation meant to encourage competition necessarily takes precedence over the general antitrust laws," *Trinko*, ___F.3d at ___ (citing *Otter Tail Power Co. v. United States, 410 U.S. 366, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973))*. The Second Circuit also noted that "it is unlikely that allowing antitrust suits would substantially disrupt the regulatory proceedings mandated by the Telecommunications Act." *Id*. While acknowledging that injunctive relief in such suits may require judicial restraint, the *Trinko* court stated that "awarding damages for the willful maintenance of monopoly power would not substantially interfere with the regulatory scheme envisioned by the Telecommunications Act," noting that in some instances, "it is possible that the antitrust laws will be needed to supplement the regulatory scheme" to bring competition to the local phone service markets. *Id*. at ___ (footnote omitted).

[9] In *Goldwasser*, the plaintiff pleaded 20 counts, seventeen of which explicitly cited violations of the 1996 Act. Goldwasser then alleged that "all of these practices . . . violate both *§ 2* of the Sherman Act, *15 U.S.C. § 2*, and the 1996 Act itself." *Goldwasser, 222 F.3d at 395*. None of the charges involved any allegations of anticompetitive intent; rather, the complaint merely asserted that the defendant was a monopolist, and that it had violated the 1996 Act. The Seventh Circuit observed, consistent with what we have said above, that such allegations of mere failure to fulfill obligations under the 1996 Act are insufficient to state a claim under the Sherman Act: "The fundamental fallacy in the plaintiffs' theory is that the duties the 1996 Act imposes on ILECs are coterminous with the duty of a monopolist to refrain from exclusionary practices. They are not." *Id. at 399*. The *Goldwasser* court further observed that there exists no independent duty to help competitors under the antitrust laws. Therefore, "[a] complaint like this one, which takes the form 'X is a monopolist; X didn't help its competitors enter the market so that they could challenge its monopoly; the prices I must pay X are therefore still too high' does not state a claim under *Section 2*." *Id. at 400*.

believe that the 1996 Act does not preempt claims under the Sherman Act as a matter of law, we turn to the question of whether Covad has pleaded a valid antitrust claim.

[**22] B. Does Covad's Complaint Sufficiently Allege a Violation of the Sherman Act?

HN17[] Establishing a *Section 2* monopolization violation requires proof of two elements: "(1) the possession of monopoly power in the relevant market and (2) "the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*; *accord* *Eastman Kodak Co. v. Image Technical Servs., Inc., 504 U.S. 451, 481-83, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)*. Monopoly power is defined as "the power to control prices or exclude competition." *United States v. E.I. du Pont de Nemours & Co., 351 U.S. 377, 391, 100 L. Ed. 1264, 76 S. Ct. 994 (1956)*. A firm that does not achieve monopoly power may nonetheless violate *Section 2* through "attempted monopolization." Proving attempted monopolization requires a showing of: (1) anticompetitive or exclusionary conduct; (2) with specific intent to monopolize; and (3) a dangerous probability of achieving monopoly power. *See* *Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 456, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)*. **[**23]** Anticompetitive conduct is "the use of monopoly power, however lawfully acquired, to foreclose competition, to gain a competitive advantage, or to destroy a competitor." *United States v. Griffith, 334 U.S. 100, 107, 92 L. Ed. 1236, 68 S. Ct. 941 (1948)*, disapproved of on other grounds by *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*. An assessment **[*1284]** of intent is critical in determining whether an accused monopolist's actions qualify as anti-competitive conduct. *334 U.S. 100, 106-07*; *accord* *United States v. Colgate & Co., 250 U.S. 300, 307, 63 L. Ed. 992, 39 S. Ct. 465, 1919 Dec. Comm'r Pat. 460 (1919)* (stating that "in the absence of any purpose to create or maintain a monopoly, the [Sherman Act] does not restrict the long recognized right of [a] trader or manufacturer engaged in an entirely private business, freely to exercise his own independent discretion as to parties with whom he will deal").

Covad's Sherman Act claims fall under three different categories of alleged anti-competitive behavior. First, Covad complains that BellSouth denied Covad the use of an "essential facility," namely its network of **[**24]** telephone lines. Although, as Covad recognizes, ***HN18***[] the antitrust laws in general do not require that firms (including monopolies) affirmatively help their competitors to succeed, there is a narrow exception to this general rule when a monopolist improperly withholds access to an "essential facility" without which a competitor cannot enter or compete in a market. *See, e.g.*, *Consolidated Gas Co. of Fla., Inc. v. City Gas Co. of Fla., 880 F.2d 297, 301 (11th Cir. 1989)* (hereinafter, "*Consolidated Gas I*"). [10] Second, Covad complains about BellSouth's "refusal to deal." ***HN19***[] Although a party may ordinarily choose freely the companies with which it will conduct business, when a monopolist's refusal to deal is accompanied by the intent to monopolize and the requisite degree of market power, that refusal to deal may violate *Section 2*. *See, e.g.*, *Mr. Furniture Warehouse, Inc. v. Barclays Am./Commercial, Inc. 919 F.2d 1517, 1522 (11th Cir. 1990)*. Third, Covad alleges that BellSouth illegally manipulated its dual role as both Covad's wholesale supplier (of local exchange elements) and its retail competitor (for DSL) by engaging in a "price squeeze." ***HN20***[] A price **[**25]** squeeze is an intentional pattern of pricing wholesale inputs at such a high level that Covad cannot absorb those costs and still compete profitably in the downstream retail markets. *See, e.g.*, *Cities of Anaheim, Riverside, Banning, Colton & Azusa, Cal. v. Fed. Energy Regulatory Comm'n, 941 F.2d 1234, 1238 (D.C. Cir. 1991)*. Covad alleges that by assigning inordinately high costs to its wholesale offerings, and inordinately low costs to its retail offerings, BellSouth squeezes out competitors such as Covad, clearing the field for its own retail services.

It is important to recognize that each of these three theories is related to Covad's allegation that BellSouth engages in what is known as "monopoly leveraging. **[**26]** " ***HN21***[] Monopoly leveraging occurs when a firm uses its market power in one market to gain market share in another market other than by competitive means. *See*

[10] *Consolidated Gas I* was reinstated, *en banc*, by *912 F.2d 1262 (11th Cir. 1990)* ("*Consolidated Gas II*"), which was then vacated and remanded in ***499 U.S. 915 (1991)***, because the parties reached a settlement and the case therefore became moot."

Aquatherm Indus., Inc. v. Fla. Power & Light Co., 145 F.3d 1258, 1262 (11th Cir. 1998) (citing *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 276 (2d Cir. 1979)* ("The use of monopoly power attained in one market to gain a competitive advantage in another is a violation of *§ 2*, even if there has not been an attempt to monopolize the second market.")). For example, in this case, while BellSouth may not at present have a monopoly in the high-speed internet market, it can attempt to leverage its clear monopoly in the telecommunications market by refusing to deal with or provide essential facilities to competitors in the high-speed internet market. **[*1285]** ***HN22***[] We have previously held that monopoly leveraging can violate *Section 2*: "When a party with monopoly power abuses its monopoly power in one market as a means of gaining an unlawful competitive advantage in and monopolizing another market, we have no hesitation to conclude that the Sherman Act prohibits such conduct." *Key Enters. of Del., Inc. v. Venice Hosp., 919 F.2d 1550, 1568 (11th Cir. 1990)*, **[**27]** *vacated as moot by* *9 F.3d 893 (11th Cir. 1993)*. The Supreme Court has also found that a triable question of fact exists on a *Section 2* claim where a defendant used its control over one market to gain dominance in another market. *See* *Eastman Kodak, 504 U.S. at 482-83*; *see also* *Poster Exch., Inc. v. Nat'l Screen Serv. Corp., 431 F.2d 334, 339 (5th Cir. 1970)*. [11] Guided by these basic principles of ***antitrust law***, we consider Covad's three claims sequentially. [12]

[28]** 1. *Essential Facilities*

HN24[] The withholding of access to an essential facility without which a competitor cannot enter or compete in a market is a violation of the antitrust laws. *See* *Consolidated Gas I, 880 F.2d at 301*. Under the well-established "essential facilities" doctrine, an inference of anticompetitive intent in violation of *Section 2* arises upon a showing of four elements: (1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility. *See* *MCI Communications Corp. v. AT&T, 708 F.2d 1081, 1132-33 (7th Cir. 1983)*. By exercising its control over an essential facility (sometimes called a "bottleneck") to withhold access to that facility, a monopolist can exclude competition. For example, in *Consolidated Gas I*, we found that a massive system of natural gas pipes controlled by the defendant was an essential facility. Control over that bottleneck, the gas pipelines, enabled the defendant to exercise its power in the market to exclude competition. **[**29]** *See* *Consolidated Gas I, 880 F.2d at 301*. "Thus, the antitrust laws have imposed on firms controlling an essential facility the obligation to make the facility available on non-discriminatory terms." *MCI, 708 F.2d at 1132*.

In *MCI, 708 F.2d at 1133*, the Seventh Circuit held that the local telephone network was an essential facility and that AT&T could not deny MCI reasonable access to it. Covad argues that *MCI* is essentially indistinguishable from the present case, and uses it as a template in stating the elements of its essential facilities claim. First, Covad alleges that BellSouth controls an essential facility, indeed, the same essential facility (local telephone exchange) at issue in *MCI*. *See id.* Second, Covad alleges that it would not be economically feasible "to duplicate Bell's local distribution facilities (involving millions of miles of cable and line to individual homes and businesses), and regulatory authorization could not be obtained for such an uneconomical duplication." *Id*. Third, **[*1286]** Covad contends that BellSouth denied interconnections to the essential facilities, and fourth, did so even though the interconnections **[**30]** could have been feasibly provided. *See id*. Finally, Covad maintains that BellSouth's conduct was intended to, and did, leverage BellSouth's local exchange monopoly into the local internet access markets to exclude Covad and to create or preserve BellSouth's monopoly power in the local internet access markets. *See id*.

---

[11] In *Bonner v. City of Prichard, 661 F.2d 1206, 1209 (11th Cir. 1981)* (*en banc*), ***HN23***[] the Eleventh Circuit adopted as binding precedent all Fifth Circuit decisions handed down prior to the close of business on September 30, 1981.

[12] We stress here that our inquiry is limited by the standard of review appropriate to BellSouth's *Rule 12(b)(6)* motion. Covad need only have alleged necessary elements of the relevant claims. We are not presented here with deciding, for example, whether telephone lines are in fact essential facilities for providing high-speed internet service, or whether BellSouth in fact had monopolistic intent in performing the alleged anticompetitive conduct. The standard of review at this stage is, of course, different than those at summary judgment or at trial.

BellSouth's response to this claim begins with a critique of the essential facilities doctrine itself, explaining that "essential facilities claims--along with other doctrines that Covad invokes in passing--exist at the fringes of ***antitrust law***." Br. of Appellee at 34 (citing *Blue Cross & Blue Shield United of Wisc. v. Marshfield Clinic, 65 F.3d 1406, 1412 (7th Cir. 1995)* ("The essential-facilities line[] has been criticized as having nothing to do with the purposes of ***antitrust law***."). Whatever the merits of this critique, as the Seventh Circuit observed in *Blue Cross*, "**HN25**[] we are not authorized to abrogate doctrines that have been endorsed and not yet rejected by the Supreme Court." *Blue Cross, 65 F.3d at 1413* (citing *Olympia Equip. Leasing Co. v. W. Union Tel. Co., 797 F.2d 370, 376 (7th Cir. 1986))*.

With **[**31]** regard to the substance of Covad's essential facilities claim, BellSouth responds with three points. First, BellSouth argues that Covad cannot allege the most basic element of an essential facilities claim: the actual denial of access to an essential facility. BellSouth states that Covad conceded that BellSouth has participated in the interconnection and negotiation/arbitration process, and that BellSouth has provided all of the types of facilities that Covad has sought. According to BellSouth, the dispute is thus restricted to the following matters: the specific terms, timing, and implementation of the interconnection agreement; the alleged "delays" in obtaining collocation space and transport; and the "obstacles" in obtaining loops. BellSouth maintains that these complaints are properly characterized as claims regarding the terms or quality of access under the interconnection agreement, and that none of these claims can amount to an antitrust claim.

Second, BellSouth argues that Covad's claim fails because the essential facilities doctrine never applies where a competitor seeks "preferential access" or asks the owner to "abandon its facilities." Br. of Appellee at 39 (citing *MCI, 708 F.2d at 1133*). **[**32]** BellSouth explains that when Covad purchases an unbundled loop, it gains exclusive use of that loop, and that antitrust laws have never required a monopolist to "cease using its own facility so that [a competitor] can begin using it." *Id.* (quoting *City of Vernon v. S. Cal. Edison Co., 955 F.2d 1361, 1366 (9th Cir. 1992))*.

Third, BellSouth argues that Covad is attempting to use ***antitrust law*** not merely to gain access to facilities, but also to force BellSouth to construct new facilities or to alter the nature of its business and become a renter of facilities for competitors to use. BellSouth observes that "no case has suggested that the monopolist must build new capacity to satisfy a would-be sharer." *Id.* at 40 (quoting 3A Areeda & Hovenkamp, ***Antitrust Law*** P 773e, at 214). BellSouth characterizes Covad's claim as an attempt to harness the ***antitrust law*** to force BellSouth to build new facilities, to develop new software, or to modify existing facilities quickly enough to meet Covad's alleged business needs.

For the most part, these are arguments that must be addressed at a later stage of the proceedings, such as summary judgment or trial. We note that with **[**33]** regard to BellSouth's first point, **HN26**[] *Section 2* prohibits denial of access to essential **[*1287]** facilities *on reasonable terms*. *See* *Alaska Airlines, Inc. v. United Airlines, Inc., 948 F.2d 536, 542 (9th Cir. 1991)*; *City of Vernon, 955 F.2d at 1367*; *Laurel Sand & Gravel, Inc. v. CSX Transp., Inc., 924 F.2d 539, 545 (4th Cir. 1991)*; *accord* *Del. & Hudson Ry. v. Consol. Rail Corp., 902 F.2d 174, 179-80 (2d Cir. 1990)* ("it is sufficient if the terms of the offer to deal are unreasonable"). The "applicable legal standard" is that "any company which controls an 'essential facility' or a 'strategic bottleneck' in the market violates the antitrust laws if it fails to make access to that facility available to its competitors *on fair and reasonable terms* that do not disadvantage them." *United States v. AT&T, 524 F. Supp. 1336, 1352-53 (D.D.C. 1981)* (emphasis added) (citing *United States v. Terminal R.R. Ass'n of St. Louis, 224 U.S. 383, 411, 56 L. Ed. 810, 32 S. Ct. 507 (1912)*, and *Otter Tail Power Co. v. United States, 410 U.S. 366, 35 L. Ed. 2d 359, 93 S. Ct. 1022 (1973)*, among **[**34]** other cases). As the Supreme Court explained in *Terminal R.R.*, a monopolist must provide access to essential facilities "upon such just and reasonable terms and regulations as will, in respect of use, character, and cost of service, place every such company upon as nearly an equal plane as may be with respect to expenses and charges as that occupied by the proprietary companies." [13] **[**35]** *224 U.S. at 411*. Whether or not Covad can

[13] BellSouth cites to a number of cases denying essential facilities claims, but those cases are distinguishable from the present case. For example, *Ideal Dairy Farms, Inc. v. John Labatt, Ltd., 90 F.3d 737, 748 (3d Cir. 1996)*, affirming summary judgment, involved alleged overcharges under the parties' contract, not denial of access to essential facilities. *Anserphone, Inc. v. Bell Atl.*

ultimately prove a violation, its complaint does allege that Bell South sometimes denied access to its facilities outright and other times denied access on reasonable terms. [14]

As to BellSouth's second argument, we likewise note that the case upon which BellSouth relies, *City of Vernon, 955 F.2d at 1361*, affirmed a summary judgment, not a *Rule 12* dismissal. Moreover, *City of Vernon* sought exclusive use of a relative share of defendants' entire electrical transmission facilities. *See* *id. at 1364* & nn. 3 & 4. As we understand the claim here, Covad seeks temporary use of an element of the ratepayer-funded local telephone network only for so long as Covad has a customer, after which BellSouth **[**36]** regains full use of the facility (which at all times remains its property). That temporary use seems quite similar to the use of a pipeline in *Consolidated Gas I* and is nothing more than *MCI* found proper. *See* *MCI, 708 F.2d at 1132-33*. In any case, these are primarily fact issues that reflect upon the feasibility of the requested relief. It would thus be inappropriate to grant dismissal on this basis. Similarly, whether the relief sought would unreasonably require BellSouth to construct new facilities as opposed to granting nondiscriminatory access to existing ones is primarily a question **[*1288]** of fact inappropriate for disposition on a motion to dismiss.

Without venturing any opinion on the merits of its specific allegations, we conclude that Covad's complaint satisfies the "exceedingly low" threshold of sufficiency that a complaint must meet to survive a motion to dismiss for failure to state a claim, *Quality Foods, 711 F.2d at 995*, namely, that it must adequately allege that as an integrated telecommunications company with monopoly control, BellSouth attempted to leverage its monopoly power in the high-speed internet market by giving itself preferential **[**37]** access to its essential facilities.

2. *Refusal to deal*

Covad also claims anticompetitive conduct based on BellSouth's refusal to deal with a competitor or potential competitor. ***HN28***[] Although a party may ordinarily choose the companies with whom it will conduct business, the existence of a "right to refuse to deal with other firms does not mean that the right is unqualified." *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 601, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*. When a monopolist's refusal to deal is accompanied by the intent to monopolize and the requisite degree of market power, that refusal to deal may violate *Section 2*. *See* *Mr. Furniture, 919 F.2d at 1522* (citing *National Indep. Theatre Exhibitors, Inc. v. Charter Fin. Group, Inc. 747 F.2d 1396, 1402 (11th Cir. 1984)*, and *Otter Tail, 410 U.S. at 377-78*); *accord* *Lorain Journal Co. v. United States, 342 U.S. 143, 154, 96 L. Ed. 162, 72 S. Ct. 181 (1951)*; *Mid-Texas Communications Sys., Inc. v. AT&T Co., 615 F.2d 1372, 1387 (5th Cir. 1980)* (right to refuse to deal is "limited when the company possesses a monopoly **[**38]** because the danger exists that it may use its monopoly position to decrease competition in other markets"). As the Supreme Court has explained, "it is true that as a general matter a firm can refuse to deal with its competitors. But such a right is not absolute; it exists only if there are legitimate competitive reasons for the refusal." *Eastman Kodak, 504 U.S. at 483 n.32*; *accord* *Aspen, 472 U.S. at 600-05* (affirming jury's monopolization finding where monopolist ski resort ended joint marketing program with competitor).

The Seventh Circuit has summarized the Supreme Court's holding in *Aspen* in terms useful to our consideration of the present case:

> *Aspen Skiing Co. v. Aspen Highlands Skiing Corp.* . . . goes the furthest of any case we know toward imposing (more precisely, allowing a jury to impose) a duty under ***antitrust law*** to help a competitor; and as a recent decision by the Supreme Court it requires our most careful and respectful consideration. The Aspen Skiing

---

Corp., 955 F. Supp. 418, 428-29 (W.D. Pa. 1996), found plaintiff's evidence of poor service an insufficient "constructive denial" of access to withstand summary judgment. *Twin Labs., Inc. v. Weider Health & Fitness, 900 F.2d 566, 569 (2d Cir. 1990)* and *Valet Apt. Servs. Inc. v. Atlanta Journal & Constitution, 865 F. Supp. 828, 830-31 (N.D. Ga. 1994)*, involved fact-bound disputes about whether and where to place print advertisements.

[14] BellSouth's argument that the essential facilities claim is really an ordinary breach of contract claim does not support its motion to dismiss. Covad's allegations of anticompetitive conduct can and do "support antitrust liability" at the pleading stage. *Mr. Furniture Warehouse, 919 F.2d at 1522-23* (monopolist's refusal to deal supports *Section 2* claim where it is "designed to have an anticompetitive effect"). ***HN27***[] Breach of contract and antitrust are not mutually exclusive. *See* *City of Vernon, 955 F.2d at 1368*.

> Company owned three of the four mountains that make up the Aspen skiing complex. Aspen Highlands Skiing Corporation owned the fourth. The two companies had offered their **[**39]** customers a joint ticket, usable on all four mountains, and the suit arose because Aspen Skiing Company terminated this cooperative arrangement. The Supreme Court found that for the convenience of customers an owner of a ski mountain in a multi-mountain skiing area normally would want to offer a ski ticket usable on any of the mountains. The joint ticket had originated at a time when there was competition among the different ski mountains at Aspen, and similar tickets were offered at other multi-mountain ski areas. *105 S. Ct. at 2858*. In other words, competition required some cooperation among competitors. *Aspen Highlands* is not a conventional monopoly refusal-to-deal case like *Otter Tail* because Aspen Highlands was never a **[*1289]** customer of Aspen Skiing Company; the skiers are the customers. But it is like the essential-facility cases in that the plaintiff could not compete with the defendant without being able to offer its customers access to the defendant's larger facilities.

Olympia, 797 F.2d at 377.

As we understand it, Covad's refusal-to-deal claim is based on alleged facts that are virtually identical to those supporting its essential **[**40]** facilities claim; that is, Covad simply alleges that BellSouth has refused to deal with Covad with respect to an essential facility, and that this refusal was motivated by monopolistic intent. [15] The claim is thus an amalgam of *Aspen* and *Otter Tail*, in that Covad is a customer of BellSouth that would like to purchase from BellSouth the right to interconnect with BellSouth's essential facility.

[41]** In response, BellSouth argues that *Aspen* is inapposite, because in that case the Court held that the defendant had a duty to continue to deal where *termination* of the relationship would involve a "sacrifice [of] short-run benefits and consumer goodwill" in the interest of excluding a rival and reducing competition. *472 U.S. at 610-11*. BellSouth argues that Covad has never alleged that BellSouth has refused to deal (much less terminated a relationship); rather, BellSouth says, Covad alleged that Covad and BellSouth established a new relationship. We do not find this argument persuasive. In *Aspen*, which involved competitors only (not a competitor-customer relationship), defendant's termination of an existing joint-marketing relationship and accompanying sacrifice of short-term benefits supported the jury's inference of the defendant's anticompetitive intent. *See* *Aspen, 472 U.S. at 610-11*. However, those are not prerequisites for a refusal-to-deal claim, and *Aspen* does not say or suggest that they are. Other cases, such as *Otter Tail*, involve a refusal to deal where there has been no prior arrangement, and ***HN29***[] a vertically integrated monopolist **[**42]** that refuses to deal with a customer to foreclose competition in a second market may violate *Section 2*. *See* *Olympia, 797 F.2d at 376-77*. In other words, in *Aspen*, the fact that the defendant had terminated a long-standing and mutually economically beneficial agreement was significant only because it supported the jury's conclusion that the defendant's refusal to deal had been motivated by monopolistic intent rather than legitimate business purpose.

We note that in *Stein v. Pac. Bell Tel. Co., 173 F. Supp. 2d 975, 983 (N.D. Cal. 2001)*, the district court held that plaintiff had stated a valid antitrust claim on refusal-to-deal facts similar to those in the present case. In *Stein*, according to the plaintiff, Pacific Bell "entered into these optional and voluntary [1996 Act] agreements and then breached them or proceeded **[*1290]** to engage in bad faith conduct in carrying them out, without any business justification and with the intent to destroy its competitors . . . so as to unlawfully maintain its monopoly." *Id.* Citing *Aspen*, the plaintiff claimed that such conduct violated *Section 2* of the Sherman Act because Pacific Bell was "attempting **[**43]** to exclude rivals on some basis other than efficiency," thus making its conduct "predatory." *Id.*

---

[15] BellSouth argues that Covad's complaint contains no specific allegation that BellSouth has forgone any economic advantage by failing to provide Covad with the accommodations it desires. Although it may be true that there is no specific allegation of this sort, the entire complaint alleges that BellSouth's failure to live up to its contractual duties was motivated by its will to monopolize, and showing that BellSouth has forgone an economic advantage is simply a fact that, if true, would tend to support the contention of monopolistic intent in the fact of a proffered legitimate business justification. Here, on motion to dismiss, there is no proffered legitimate business justification for Covad to refute, so the absence of specific factual allegation is irrelevant. *See, e.g.,* *Eastman Kodak, 504 U.S. at 483-84* (ruling on a summary judgment motion and noting that after plaintiff's presentation of evidence of Kodak's exclusionary action with monopolistic intent, Kodak bore the initial burden of presenting evidence of "valid business reasons" to justify its actions).

The *Stein* court held that even accepting *Goldwasser* in its entirety, the plaintiff had stated a valid claim. *Id. at 983-84* ("*Goldwasser* did not consider whether violations of the 1996 Act, if done in a 'predatory' manner as defined in *Aspen Skiing*, can make up an independent basis for liability under the Sherman Act. The plaintiffs in *Goldwasser* did not allege, as Stein alleges here, that the defendant breached interconnection agreements in bad faith and engaged in other exclusionary practices.").

In essence, BellSouth asks this Court to conclude that it is impossible to find a refusal to deal where the defendant has formed an agreement with the plaintiff, in this case an agreement pursuant to the strictures of the 1996 Act. For the reasons stated above, we conclude that ***HN30***[] allegations that allege a failure to perform under an agreement that amount to a refusal to deal are sufficient to state a claim under the antitrust laws. [16]

[44]** 3. *Price Squeeze*

Covad also alleges that BellSouth manipulated its dual role as both Covad's wholesale supplier (of local exchange elements) and its retail competitor (for DSL) by engaging in a "price squeeze." BellSouth argues that Covad's allegations must fail because, as the district court stated, "there is no allegation that [BellSouth] set accompanying low retail prices for its own DSL services." BellSouth argues that in light of the 1996 Act's regulatory scheme, Covad's failure to allege accompanying low retail prices is fatal because BellSouth has no discretion over the prices it charges Covad for unbundled loops and other "inputs" that Covad uses; those charges are set by state commissions after extensive proceedings in accordance with the Act's standards. BellSouth maintains that these rates are not "merely tariffed" and BellSouth is not free to lower those rates unilaterally. *Compare* Br. of Amici Curiae Competitive Telecommunications Ass'n at 29 n.11. In addition, BellSouth argues that *section 252* provides that all network element rates must be "based on cost," *47 U.S.C. § 252(d)(1)*; accordingly, Covad's failure to allege that the rates **[**45]** BellSouth charges for its retail DSL service are below cost forecloses Covad's claim. BellSouth argues that ***antitrust law*** cannot possibly force a company to raise above-cost retail prices to give competitors a greater margin, because such a rule would hurt, rather than help, consumers. In essence, BellSouth contends that Covad's claim boils down to a complaint that the network element rates set by state commissions are too high. BellSouth further asserts that the appropriate remedy for this complaint is not a collateral antitrust action, but judicial review under *Section 252(e)(6)*.

Covad responds by stating that its complaint in fact did allege that BellSouth's retail prices "are set so low related to its unbundled wholesale loop prices that Covad cannot meet BellSouth's wholesale or retail prices and still make a reasonable return on its investment." More important, **[*1291]** Covad maintains, this issue is irrelevant because whether or not there is a price squeeze should not depend on whether retail prices are "too low," but rather on the "squeeze" created by the disparity between the wholesale prices Covad must pay BellSouth upstream and the prices Covad must charge downstream to remain competitive **[**46]** with BellSouth. *See, e.g.*, *City of Kirkwood v. Union Elec. Co., 671 F.2d 1173, 1176 n.4 (8th Cir. 1982)*. The presence of an illegal differential, Covad states, is precisely what Covad alleged. Covad also states that commission or other regulation at the wholesale end (or even both ends) of the price squeeze is no defense.

Both sides cite a number of cases in support of these positions, [17] but BellSouth's response to the claim is essentially factual in nature, and therefore it is inappropriate to grant BellSouth's motion to dismiss under *Rule 12*.

---

[16] Again, this case is presented to us on a motion to dismiss. BellSouth's response that it has not *in fact* refused to deal, while an appropriate issue for consideration on motion for summary judgment or at trial, is not open to consideration here.

[17] BellSouth cites *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 223, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)* (rejecting "the notion that above-cost prices that are below . . . the costs of a firm's competitors inflict injury to competition cognizable under the antitrust laws"); *Indeck Energy Servs., Inc. v. Consumers Energy Co., 250 F.3d 972, 978-79 (6th Cir. 2000)* (plaintiff "has no statutory right to compete in the economic marketplace on [its] own terms and in such a manner as to accumulate expected profits"). *Compare* Br. of Amici Curiae Competitve Telecomm. Ass'n at 29 n.11 (arguing that BellSouth should have raised retail prices to protect competitors).

Whether or not BellSouth has any control over the wholesale prices it charges, or whether the differential between the wholesale and retail prices is such that Covad and other would-be DSL competitors are squeezed out--these are questions of fact. BellSouth may very well prevail on summary judgment, but for the purposes of the pleading stage, Covad's complaint states a claim under ***antitrust law***.

[47] II. *Breach of Contract Claims***

*The district court dismissed Covad's breach of contract claims for lack of jurisdiction, finding that they must first be presented to PSCs. This Court, however, recently held that "**HN31**[] state commissions . . . are not authorized under section 252 to interpret interconnection agreements" at all. Bellsouth Telecomm., Inc. v. MCImetro Access Transmission Servs. Inc., 278 F.3d 1223, 1237 (11th Cir. 2002)*. BellSouth concedes that the trial court's reasoning is "inconsistent with *Bellsouth v. MCImetro*." In light of *MCImetro*, the trial court's dismissal for lack of jurisdiction must be reversed.

III. *The 1996 Act Claim*

***The trial court dismissed Covad's 1996 Act claim because it found any claims "related directly to duties under the 1996 Act" must be submitted to PSCs. R3-25-38. For the same reasons that apply to Covad's breach of contract claims, this ruling is inconsistent with MCIMetro* and must be reversed.**

IV. *State Law Claims*

***The trial court concluded that HN32[] Covad's state tort law claims were "preempted by the 1996 Act." This holding is irreconcilable with the Act's express "No Implied* [**48] Effect" clause, which set forth Congress' intent not to "modify, impair, or supercede Federal, State or local laws." Telecommunications Act of 1996, sec. 601(c)(1), *§ 152* note, 110 Stat. 56, 143 (1996).**

[*1292] *BellSouth does not attempt to defend the trial court's ruling, but argues instead that Covad has failed to plead any tort claims, asserting that conduct that constitutes a breach of contract can never support an interference claim. The cases BellSouth cites, St. Mary's Hosp. of Athens, Inc. v. Radiology Prof'l Corp., 205 Ga. App. 121, 421 S.E.2d 731, 735 (Ga. Ct. App. 1992)*, and *International Telecomm. Exch. Corp. v. MCI Telecomms. Corp., 892 F. Supp. 1520, 1543 n.19 (N.D. Ga. 1995)*, do not support that broad proposition. Rather, they were summary judgment cases where plaintiffs had failed to produce evidence that the defendant had actually induced any third party not to contract with the plaintiff. At the *Rule 12* stage, the only proper inquiry is whether Covad has alleged such direct interference. It has, in claiming that BellSouth "interfered with Covad's existing and prospective business relations with customers." Therefore, the dismissal of Covad's tort claims [49] must also be reversed.**

CONCLUSION

For the reasons stated above, the decision of the district court granting BellSouth's motion to dismiss is **REVERSED**, and the case is **REMANDED** for further proceedings in light of this opinion.

End of Document

Covad responds with *City of Kirkwood, 671 F.2d at 1179*, and *Fed. Power Comm'n v. Conway Corp., 426 U.S. 270, 279 (1976)* ("When costs are fully allocated, both the retail rate and the proposed wholesale rate may fall within a zone of reasonableness, yet create a price squeeze between themselves.") (citation omitted).

Fresh Made, Inc. v. Lifeway Foods, Inc.

United States District Court for the Eastern District of Pennsylvania

August 8, 2002, Decided ; August 9, 2002, Filed

CIVIL ACTION NO. 01-4254

Reporter

2002 U.S. Dist. LEXIS 15098 *; 2002-2 Trade Cas. (CCH) P73,779

FRESH MADE, INC., Plaintiff v. LIFEWAY FOODS, INC., et al., Defendants

Disposition: [*1] Motion of Defendants Lifeway Foods, Inc. and Michael Smolyansky to dismiss amended complaint in its entirety or in alternative for more definitive statement was granted in part and denied in part.

Core Terms

alleges, amended complaint, antitrust, kefir, relevant market, argues, antitrust claim, unfair competition, conspiracy, Sherman Act, distributors, probability, specialty, products, parties, restraint of trade, civil conspiracy, dairy product, Lanham Act, contractual relationship, conspire, settlement agreement, lawsuit, anti trust law, containers, geographic, motion to dismiss, malicious abuse, interchangeability, manufacturers

Civil Procedure > Settlements > Releases From Liability > General Overview

Civil Procedure > Settlements > Releases From Liability > General Releases

HN1[] **Private Actions, Remedies**

The United States Court of Appeals for the Third Circuit has held that there is nothing in the public policy behind antitrust laws that prohibits general releases encompassing antitrust claims, provided that the release does not seek to waive damages from future violations of antitrust laws. A general release is sufficient to release antitrust claims.

Civil Procedure > Settlements > Releases From Liability > Interpretation of Releases

HN2[] Types of Contracts, Releases

The United States Court of Appeals for the Third Circuit has held that there is no federal policy which mandates a uniform national rule to govern the effect of a contractual release as applied to antitrust claims. Therefore, as long as state law guards against the antitrust violator's use of deception to avoid the federally-created cause of action, state law is properly applied to interpret releases of antitrust claims.

Civil Procedure > ... > Relief From Judgments > Grounds for Relief from Final Judgment, Order or Proceeding > Discharge, Release & Satisfaction

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

HN3[] Private Actions, Remedies

The part and parcel doctrine provides that a release is invalid if the release itself was an integral part of a scheme to violate the antitrust laws. To satisfy this standard, the release must be an object of the combination or conspiracy or an integral part of the scheme in restraint of trade. If the release is merely an outgrowth, rather than a cause of the violation, it is not part and parcel of the antitrust conspiracy. In addition, the part and parcel doctrine cannot be read so broadly as to render void all releases relating to conspiracies alleged to continue post-release. The part and parcel doctrine has been rarely discussed and more rarely applied. In fact, no court of appeals has ever applied the part and parcel theory to invalidate a release.

Contracts Law > Contract Interpretation > General Overview

HN4[] Settlements, Releases From Liability

Where release language is clear and unambiguous on its face, a court need not look to extrinsic evidence to give meaning to its terms.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > General Overview

HN5[] Defenses, Demurrers & Objections, Motions to Dismiss

Under New York law, allegations of fraud in the inducement of a release warrant denial of a motion to dismiss that is grounded on a release.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Releases

Contracts Law > Remedies > Election of Remedies

Contracts Law > ... > Affirmative Defenses > Fraud & Misrepresentation > General Overview

HN6[] Types of Contracts, Releases

Because a release procured by fraud in the inducement is voidable at the option of the defrauded party, that party can choose to affirm or disaffirm the contract. In order to disaffirm the contract, the defrauded party must offer to return the consideration received. Under New York law, a party is entitled to affirm a contract and bring an action alleging fraud, while avoiding the defense of release.

HN7[] Sherman Act, Claims

Section 1 of the Sherman Act provides that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is declared to be illegal. *15 U.S.C.S. § 1*. To establish a *§ 1* violation, a plaintiff must prove (1) concerted action by the defendants, (2) that produced anti-competitive effects within the relevant product and geographic markets, (3) that the concerted action was illegal, and (4) that the plaintiff was injured as a proximate result of the concerted action. To state a violation of *§ 1*, a plaintiff must allege that there has been an antitrust injury. An antitrust injury is the type of injury that the antitrust laws were enacted to prevent: an injury to competition rather than competitors. In order to allege an injury to competition, a plaintiff must allege an injury to competition in a particular relevant market. The plaintiff bears the burden of defining the relevant market. Failure to do so may result in the dismissal of an antitrust complaint. To recover damages, a private antitrust plaintiff must also allege that it has suffered an injury-in-fact that is attributable to something the antitrust laws were designed to prevent.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN8[] Relevant Market, Geographic Market Definition

A relevant market for antitrust purposes is comprised of a geographic and a product market. The relevant product market is defined as those commodities reasonably interchangeable by consumers for the same purposes. The relevant geographic market is defined as the area in which a potential buyer may rationally look for the goods or services he or she seeks. This geographic market must conform to commercial reality.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN9[] **Market Definition, Relevant Market**

The United States Court of Appeals for the Third Circuit has instructed that although in most cases, proper market definition can be determined only after a factual inquiry into the commercial realities faced by consumers, there is no prohibition against dismissal of antitrust claims for failure to plead a relevant market. Where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in the plaintiff's favor, the relevant market is legally insufficient and a motion to dismiss may be granted. Therefore, where a complaint fails to allege facts regarding substitute products, to distinguish among apparently comparable products, or to allege other pertinent facts relating to cross-elasticity of demand, a motion to dismiss may be properly granted.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN10[] **Regulated Practices, Market Definition**

Reasonable interchangeability of use implies that one product is roughly equivalent to another for the use to which it is put. Reasonable interchangeability can be indicated by cross-elasticity of demand between the product itself and substitutes for it. Products in a relevant market are characterized by a cross-elasticity of demand; in other words, the rise in the price of a good within a relevant product market would tend to create a greater demand for other like goods in that market.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN11[] **Relevant Market, Product Market Definition**

Within a broad market, well-defined sub-markets may exist which, in themselves, constitute product markets for antitrust purposes. Factors indicating whether the finding of a sub-market is appropriate include industry or public recognition of the sub-market as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors. However, a complaint alleging a sub-market is not excused from grounding its allegations with facts regarding reasonable interchangeability and cross-elasticity of demand.

Governments > Courts > Judicial Precedent

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

HN12[] **Price Fixing & Restraints of Trade, Vertical Restraints**

If a plaintiff can show a per-se antitrust violation, market power in a relevant market need not be established. The United States Supreme Court has held that precedent limits the per-se rule in the boycott context to cases involving horizontal agreements among direct competitors. Therefore, ***antitrust law*** does not permit the application of the per-se rule in the boycott context in the absence of a horizontal agreement. In addition, no vertical restraint can be illegal per se unless it includes some agreement on price or price levels.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Business & Corporate Compliance > ... > Governments > Agriculture & Food > Distribution, Processing & Storage

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN13[] **Practices Governed by Per Se Rule, Boycotts**

An agreement between entities at different market levels is a vertical restraint, which is not illegal per se absent an agreement as to pricing levels.

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN14[] **Antitrust & Trade Law, Sherman Act**

To state a federal antitrust claim under *15 U.S.C.S. § 1* of the Sherman Act, a plaintiff must allege a conspiracy or concerted activity by the defendant. A general allegation of conspiracy without a statement of the facts is an allegation of a legal conclusion and insufficient of itself to constitute a cause of action. Therefore, a plaintiff must plead the facts constituting the conspiracy, its object and accomplishment.

Antitrust & Trade Law > Sherman Act > General Overview

HN15[] **Antitrust & Trade Law, Sherman Act**

An internal agreement to implement a single firm's policies does not raise the antitrust dangers that *15 U.S.C.S. § 1* of the Sherman Act, was designed to police. Some courts have recognized that in cases where the agent is acting for personal reasons, an exception to the general rule that a corporation cannot conspire with its employees, officers or agents may exist. Where a plaintiff has not alleged that a defendant executive was acting to further his own economic interest in a marketplace actor which benefits from the alleged restraint, the personal interest exception does not apply.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > General Overview

HN16[] Monopolies & Monopolization, Conspiracy to Monopolize

A corporation cannot conspire for antitrust purposes with a wholly-owned subsidiary.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN17[] Sherman Act, Claims

In order to prevail on an attempted monopolization claim under *15 U.S.C.S. § 2* of the Sherman Act, a plaintiff must prove that the defendant (1) engaged in predatory or anticompetitive conduct with (2) specific intent to monopolize, and with (3) a dangerous probability of achieving monopoly power. In order to determine whether there is a dangerous probability of monopolization, a court must inquire into the relevant product and geographic market and the defendant's economic power in that market. Under *§ 2*, as under *15 U.S.C.S. § 1*, the relevant market is defined by reasonable interchangeability and cross-elasticities of demand.

Antitrust & Trade Law > Consumer Protection > False Advertising > General Overview

HN18[] Consumer Protection, False Advertising

To establish a Lanham Act, *15 U.S.C.S. § 1051 et seq.*, violation, a plaintiff must prove that (1) the defendant has made false or misleading statements as to his own product or another's, (2) there is actual deception or at least a tendency to deceive a substantial portion of the intended audience, (3) the deception is material in that it is likely to influence purchasing decisions, (4) the advertised goods traveled in interstate commerce, and (5) there is a likelihood of injury to the plaintiff in terms of declining sales, loss of good will, or the like.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN19[] Antitrust & Trade Law, Sherman Act

Pennsylvania courts have recognized that the Sherman Act, *15 U.S.C.S. § 1 et seq.*, is merely the application of the common-law doctrine concerning the restraint of trade to the field of interstate commerce.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN20[] **Regulated Practices, Trade Practices & Unfair Competition**

Pennsylvania has recognized a common-law claim of unfair competition under the Restatement (Third) of Unfair Competition.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN21[] **Conspiracy, Elements**

A civil conspiracy under Pennsylvania law requires that two or more persons combined or agreed with intent to do an unlawful act or to do an otherwise lawful act by unlawful means. Proof of malice, i.e., an intent to injure is essential in proof of a conspiracy. In addition, under Pennsylvania law, as under federal ***antitrust law***, a corporation cannot conspire with itself, or with it officers or agents acting solely for the corporation.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN22[] **Inchoate Crimes, Conspiracy**

Under Pennsylvania law, a claim of civil conspiracy cannot be pled without also alleging an underlying actionable wrong. When a court dismisses the causes of action which underlie a civil conspiracy claim, the civil conspiracy claim must also be dismissed.

Torts > Intentional Torts > Abuse of Process > Elements

Civil Procedure > Parties > Joinder of Parties > General Overview

Torts > Intentional Torts > Abuse of Process > General Overview

Torts > Intentional Torts > Malicious Prosecution > General Overview

Torts > Negligence > Gross Negligence

HN23[] **Abuse of Process, Elements**

To establish a claim for malicious abuse of process under Pennsylvania law, it must be shown that the defendant (1) used a legal process against the plaintiff, (2) primarily to accomplish a purpose for which the process was not designed, and (3) harm has been caused to the plaintiff. Although the word "process" as used in this tort has been interpreted broadly to encompass the entire range of procedures incident to the litigation process, the gravamen of this tort is not the wrongful initiation of proceedings. Recognizing this fact, and the distinction between the tort of abuse of process and the tort of wrongful use of civil proceedings, courts have held that a complaint alleging only that one party initiated suit against another for improper purposes is insufficient to state a claim for malicious abuse of process. The tort of wrongful use of civil proceedings makes a person liable for initiating or continuing a civil proceeding if he acts (1) in a grossly negligent manner or without probable cause and primarily for a purpose other than that of securing the proper discovery, joinder of parties or adjudication of the claim in which the proceedings are based, and (2) the proceedings have terminated in favor of the person against whom they are brought. Absent allegations that a party has abused the process after its issuance, an abuse of process claim cannot stand.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN24[] **Intentional Interference, Elements**

To establish a claim for interference with contractual or prospective contractual relations under Pennsylvania law, a plaintiff must show (1) the existence of a contractual or prospective contractual relationship between the plaintiff and a third party, (2) a purpose or intent to harm an existing relationship or to prevent a prospective relationship from accruing, (3) the absence of privilege or justification on part of the defendant, and (4) the occurrence of actual harm or damage to the plaintiff as a result of the defendant's conduct. When alleging interference with existing contractual relations, a plaintiff should identify which existing contractual relationships were hindered. When alleging interference with prospective contractual relations, the allegations need not be as precise. A plaintiff must not, however, rest a claim for tortious interference with prospective contractual relations on a mere hope that additional contracts or customers would have been forthcoming but for defendant's interference.

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Express Contracts

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

Torts > Business Torts > Commercial Interference > General Overview

HN25[] **Types of Contracts, Express Contracts**

A complaint for tortious interference with prospective contractual relations must allege facts that, if true, would give rise to a reasonable probability that particular anticipated contracts would have been entered into. Such a probability may arise from an unenforceable express agreement or an offer, or where there is a reasonable probability that a contract will arise from the parties' current dealings. However, merely pointing to an existing business relationship or past dealings does not reach this level of probability.

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Interference With Business Relations

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN26[] **Causes of Action, Interference With Business Relations**

Although the federal rules require only a short and plain statement of the claim, that statement must be sufficient to give the defendants notice of the claim and the grounds upon which it is based.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN27[] **Intentional Interference, Elements**

Allegations of interference with business advantage must identify any particular potential relationships, or provide a basis for concluding that there was an objectively reasonable probability that such relationships would come into existence.

Opinion

MEMORANDUM AND ORDER

McLaughlin, J.

August 8, 2002

The present case arises out of a long-running business and legal dispute between two competing manufacturers of specialty dairy products such as kefir, a fermented yogurt-style drink. Plaintiff Fresh Made, Inc. alleges that the defendants have engaged in unfair competition and have violated federal antitrust laws, various state laws, and the Lanham Act. Defendants Lifeway Foods, Inc. and Michael Smolyansky have filed a Motion to Dismiss the Amended Complaint.

Because the Court concludes that the Amended Complaint does not **[*2]** sufficiently allege a relevant antitrust market, the federal antitrust claims will be dismissed. The Court also finds that the state law claims, which are largely predicated upon the conduct underlying the federal antitrust claims, are insufficiently pled and must also be dismissed. However, the Amended Complaint does state a valid claim under the Lanham Act, and the motion to dismiss will be denied insofar as it seeks to dismiss that claim. The Court will grant Fresh Made leave to amend the complaint.

I. Background

Plaintiff Fresh Made, Inc. ("Fresh Made") is a closely held Pennsylvania corporation which has, since 1982, been engaged in the business of manufacturing, distributing and selling certain specialty dairy products, such as kefir, a fermented yogurt-style drink. Fresh Made targets these products to immigrants from the former Soviet Union. Defendant Lifeway Foods, Inc. ("Lifeway") is a publicly traded Illinois corporation that is a principal competitor of Fresh Made. Defendant Michael Smolyansky is the President and CEO of Lifeway.

Fresh Made alleges that Lifeway has been engaged in an illegal campaign of unfair competition designed to suppress and stifle Fresh **[*3]** Made's attempt to compete with Lifeway in the sale of kefir and other specialty dairy products. As part of this campaign, Fresh Made alleges that Lifeway threatened to pull its business from distributors who also did business with Fresh Made, threatened legal proceedings against distributors who did business with Fresh Made, and threatened to "call in" lines of credit it had provided to certain specialty food markets if they did not stop carrying Fresh Made products. Fresh Made further alleges that Lifeway conspired with manufacturers of kefir containers to restrict the sale of such containers to Fresh Made in an effort to restrict competition.

The Amended Complaint states that 20% of Lifeway's outstanding common stock is owned by Danone Foods, Inc. ("Danone"), which allegedly either controls or exercises significant influence over Lifeway's business activities. It also states that Danone and Lifeway entered into an agreement not to compete with each other. This agreement allegedly gave Lifeway direct entry into Danone's extensive distribution network.

In addition, Fresh Made alleges that Lifeway has filed a series of lawsuits against it, with the intent of driving Fresh Made out **[*4]** of business by forcing it to expend large amounts of money on legal fees. The first of these lawsuits, filed in the Northern District of Illinois, claimed that Fresh Made had copied Lifeway's use of milk-bottle shaped kefir containers. That suit was dismissed for want of personal jurisdiction in October of 1996. Shortly thereafter, Lifeway filed a similar lawsuit against Fresh Made in the Eastern District of Pennsylvania. That suit was ultimately dismissed in June of 1997 because Lifeway failed to serve a timely complaint.

In March of 1998, Lifeway once again filed suit over Fresh Made's use of milk-bottle shaped kefir containers, again in the Eastern District of Pennsylvania. The parties ultimately settled this lawsuit for a modest sum.

In August of 1999, Lifeway filed a fourth lawsuit against Fresh Made, this time in the Eastern District of New York. The suit alleged that Fresh Made was improperly marketing some of its dairy products under a Russian term that had been trademarked by Lifeway. [1] In that action, Fresh Made brought a counterclaim seeking to invalidate Lifeway's trademark. In April of 2000, the parties entered into a settlement agreement and mutual release. Pursuant **[*5]** to the terms of the release, the parties dismissed their claims against each other, and Lifeway agreed to purchase from Fresh Made all unused product labels for Fresh Made cheese products bearing the disputed Russian term. Fresh Made alleges that the $ 30,000 paid by Lifeway for these labels was really compensation for Fresh Made's agreement not to prosecute its trademark invalidation counterclaim.

Following the execution of the settlement agreement, Fresh Made alleges that Smolyansky threatened to make Fresh Made pay back the $ 30,000. Smolyansky also allegedly said that in America, it was the destiny of a big company to swallow up a little company like Fresh Made.

In May of 2001, Lifeway brought another lawsuit against Fresh Made, this time in Illinois state court. The suit alleges that Fresh Made has breached the terms of the settlement agreement by using labels on its butter products that are **[*6]** not in conformity with the terms of the agreement. This action is still pending in Illinois.

In the present action, Fresh Made alleges that Lifeway has violated *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* & *2*, by conspiring to restrict competition and attempting to obtain a monopoly in the market which includes kefir and other specialty dairy goods (Counts I and II). Fresh Made also brings state law claims for Restraint of Trade (Count III), Malicious Abuse of Process (Count IV), Interference with Existing and Prospective Business Relationships (Count V), Civil Conspiracy (Count VI), and Unfair Competition and Attempted Monopoly (Count VII). Finally, Fresh Made alleges that Lifeway has violated the Lanham Act, *15 U.S.C. § 1125(a)*, through the use of an advertisement for kefir that contains allegedly false representations (Count VIII). [2]

---

[1] The Russian term is КРЕСТъЯНСКИЙ. The English transliteration of this term is Krest'yanskiy.

[2] The Amended Complaint also includes a claim for violation of Pennsylvania's Unfair Trade Practices and Consumer Protection Law (Count X). Fresh Made, however, wishes to withdraw the claim, and it will be dismissed.

[*7] Presently before the Court is a Motion to Dismiss the Amended Complaint filed by defendants Lifeway and Smolyansky. [3] They argue that this suit is barred by the terms of the settlement agreement and release signed by the parties in April of 2000. The defendants also argue that Counts I through VII should be dismissed for failure to state a claim. Finally, the defendants have moved for a more definitive statement on Count VIII, should the Court find that the Lanham Act claim is not barred by the settlement agreement and release.

II. Settlement Agreement and Release

The settlement agreement entered into by the parties in April of 2000 was intended not only as a settlement **[*8]** of the trademark suit that was then pending in the Eastern District of New York, but also as a global settlement of all differences between the parties. Am. Compl. P 87. Indeed, the release language of the agreement is broad and global in scope. The release provides that Lifeway and Freshmade release each other from "any and all actions, causes of actions, [and] suits . . . [which the parties] now know of or which should have been known for, upon, and by reason of any matter, cause or thing whatsoever, from the beginning of the world to the date of this Settlement Agreement and Mutual Release." Ex. A. to Def.'s Mot. to Dismiss ("Agreement"), P 12.

Fresh Made makes several arguments about why the release should not bar its claims in the instant suit. First, Fresh Made argues that to read the release to bar its antitrust claims would be against public policy. [4] **[*10]** ***HN1***[] The Third Circuit, however, has held that "there is nothing in the public policy behind antitrust laws that prohibits general releases encompassing antitrust claims, provided that the release does not seek to waive damages from future violations of antitrust laws." *Three Rivers Motors Co. v. Ford Motor Co., 522 F.2d 885, 896 n.27 (3d Cir. 1975)*. **[*9]** See *Ingram Corp. v. J. Ray McDermott & Co., 698 F.2d 1295, 1310 (5th Cir. 1983)* (recognizing that "a general release [is] sufficient to release antitrust claims"). Because the release language in question does not seek to immunize future antitrust violations, applying the release to Fresh Made's antitrust claims is not against public policy. [5]

The plaintiff also argues that the release is part and parcel of the larger pattern of antitrust activity, and as such the release is illegal and invalid. ***HN3***[] The part and parcel doctrine provides that a release is invalid if the release itself was "an integral part of a scheme to violate the antitrust laws." *VKK Corp., 244 F.3d at 125* (citations omitted). To satisfy this standard, the "release must be an object of the combination or conspiracy or an integral part of the scheme in restraint of trade." Id. (citation and internal quotation marks omitted). If the release is "merely an outgrowth, rather than a cause of the violation, it is not part and parcel of the antitrust conspiracy." Id. (citation and

---

[3] Lifeway and Smolyansky joined in the motion to dismiss, but the Court will refer throughout this memorandum to the parties collectively as "Lifeway." Danone was originally a defendant as well, but Fresh Made moved to dismiss Danone as a defendant, and by order of March 11, 2002, Danone was dismissed from the case. See Docket # 25.

[4] The settlement agreement has a choice of law clause which selects New York law to govern the terms of the agreement. See Agreement at P 17. At oral argument, Fresh Made's counsel conceded that New York law governs the agreement. Tr. of March 8, 2002 Hr'g ("Tr."), 3. However, in supplemental briefing, Fresh Made argued that federal common law should govern the agreement insofar as it is applied to bar any antitrust claim. ***HN2***[] The Third Circuit has held that there is no federal policy which mandates a uniform national rule to govern the effect of a contractual release as applied to antitrust claims. *Three Rivers Motors Co. v. Ford Motor Co., 522 F.2d 885, 889 (3d Cir. 1975)*. Therefore, as long as state law "guards against the antitrust violator's use of deception to avoid the federally-created cause of action", state law is properly applied to interpret releases of antitrust claims. *Id. at 892* (applying Pennsylvania law). Because contractual releases procured by fraud are not enforceable under New York law, the Court finds that New York law appropriately governs the interpretation of the release at issue. See *Ladenburg Thalmann & Co. v. Imaging Diagnostic Sys., Inc., 176 F. Supp. 2d 199, 204 (S.D.N.Y. 2001)*; *Steen v. Bump, 233 A.D.2d 583, 649 N.Y.S.2d 731, 732 (N.Y. App. Div. 1996)*. See also, *VKK Corp. v. Nat'l Football League, 244 F.3d 114, 121-22 (2d Cir. 2001)* (applying New York law to determine the validity of a release encompassing antitrust claims).

[5] By its terms, the release does not bar any cause of action arising after the date of the release agreement. For that reason, to the extent that Fresh Made alleges claims that post-date the release, such claims survive Lifeway's motion to dismiss based on the release.

internal quotation marks omitted). In addition, "the part and parcel doctrine [cannot] be read so broadly **[*11]** as . . . to render void all releases relating to conspiracies alleged to continue post-release." *Id. at 126*. [6]

Fresh Made argues that its allegations "establish that Lifeway entered into the agreement solely because it sought to procure a release of Fresh Made's challenge to [Lifeway's] trademark and not because it intended to end all litigation and claims between the parties." Plf.'s Supp. Br. at 5. Even if true, this does not establish that the release itself was an integral part of the allegedly illegal antitrust activity. The plaintiff does not explain how the release was integral to the vexatious use of litigation or the attempts to prevent Fresh Made from competing **[*12]** with Lifeway, nor does the plaintiff argue that the alleged conspiracy could not have proceeded without the release. *VKK Corp., 244 F.3d at 126*. For that reason, the Court finds that Fresh Made cannot invoke the part and parcel doctrine to avoid the terms of the release.

Fresh Made also asserts that Lifeway's filing of the May 2001 suit in Illinois breached the terms of the settlement agreement, suspending Fresh Made's obligations under the release. Fresh Made alleges that although the Illinois lawsuit is styled as a breach of contract action, Lifeway is seeking to revisit the trademark infringement issues that were settled and released by the April 2000 agreement. However, as that action is currently pending in Illinois, it would be improper for this Court to look beyond the pleadings in an effort to examine the substance of that proceeding.

Similarly, Fresh Made asserts that by filing the May 2001 suit in Illinois, Lifeway violated the forum selection clause of the April 2000 agreement. However, the clause in question does not mandate New York as the exclusive forum for litigating issues pertaining to the agreement. The clause only provides that the parties "consent[] **[*13]** to the jurisdiction [of] the United States District Court of the Eastern District of New York" and "waive any rights to challenge [that] jurisdiction and venue". Agreement at P 17. Therefore, Lifeway did not, simply by filing in Illinois, plainly violate the terms of the settlement agreement. [7]

[*14] Finally, Fresh Made argues that the agreement is unenforceable because it was procured by fraud. ***HN5***[] Under New York law, "allegations of fraud in the inducement of a release warrant denial of a motion to dismiss that is grounded on a release." *Ladenburg Thalmann & Co. v. Imaging Diagnostic Sys., Inc., 176 F. Supp. 2d 199, 205 (S.D.N.Y. 2001)*. See *Steen v. Bump, 233 A.D.2d 583, 649 N.Y.S.2d 731, 732 (N.Y. App. Div. 1996)*.

In the Amended Complaint, Fresh Made alleges that even when negotiating the April 2000 settlement agreement that was supposed to be a settlement of all differences between the parties, Lifeway intended to bring further litigation against Fresh Made. Am. Compl. at PP 87, 92. This allegation of fraud is sufficient, at this point, to avoid Lifeway's motion to dismiss insofar as it is based on the settlement agreement and release. [8]

---

[6] As the Second Circuit recently noted, the "part and parcel" doctrine has been "rarely discussed and more rarely applied." *VKK Corp., 244 F.3d at 125*. In fact, the VKK Court observed that no court of appeals "has ever applied the part and parcel theory to invalidate a release." *Id. at 126*.

[7] At oral argument, Fresh Made also argued that the release should not be applied at the motion to dismiss stage to bar its claims. Under New York law, Fresh Made argues, courts interpreting broad release language are required to go behind the language to determine what the intent of the parties to the agreement was. The caselaw relied on by Fresh Made, however, merely holds that when parties enter into a release "purporting to exempt a party from liability for injuries *which may occur in the future*", the release covers only those claims which were "within the contemplation of the parties at the time" of execution. *Bradley Realty Corp. v. State of New York, 54 A.D.2d 1104, 389 N.Y.S.2d 198, 199 (N.Y. App. Div. 1976)* (emphasis added). See *Beardslee v. Blomberg, 70 A.D.2d 732, 416 N.Y.S.2d 855, 856-57 (N.Y. App. Div. 1979)*. The release in this case does not seek to exempt either party from liability for future conduct, but releases only past claims. Therefore, because the ***HN4***[] release language is clear and unambiguous on its face, the Court need not look to extrinsic evidence to give meaning to its terms. See, e.g., *Goldberg v. Mfr's Life Ins. Co., 242 A.D.2d 175, 672 N.Y.S.2d 39, 44 (N.Y. App. Div. 1998)*.

[8] ***HN6***[] Because a release procured by fraud in the inducement is voidable at the option of the defrauded party, that party can choose to affirm or disaffirm the contract. See Laudenberg, 176 F. Supp. 2d at 204. In order to disaffirm the contract, the defrauded party must offer to return the consideration received. Id. Fresh Made asserts that it may maintain the current action

[*15] III. Sherman Act *Section 1*

HN7[] *Section 1* of the Sherman Act Provides: "Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal." *15 U.S.C. § 1*. Fresh Made alleges that Lifeway's agreements with manufacturers of kefir containers, distributors, and store owners to restrict Fresh Made's access to the market constitute a continuing conspiracy in restraint of trade that violations *Section 1*.

To establish a *Section 1* violation, a plaintiff must prove (1) concerted action by the defendants; (2) that produced anti-competitive effects within the relevant product and geographic markets; (3) that the concerted action was illegal; and (4) that the plaintiff was injured as a proximate result of the concerted action. *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 442 (3d Cir. 1997)*. Lifeway argues that Fresh Made has failed to sufficiently allege a relevant antitrust market, antitrust injury, or concerted action.

To state a violation of *Section 1*, a plaintiff must allege that there has been an antitrust injury. **[*16]** [9] An antitrust injury is the type of injury that the antitrust laws were enacted to prevent - an injury to competition rather than competitors. See *Alberta Gas Chems. Ltd. v. E.I. Du Pont de Nemours and Co., 826 F.2d 1235, 1241 (3d Cir. 1987)* ("***antitrust law*** aims to protect competition, not competitors"). In order to allege an injury to competition, a plaintiff must allege an injury to competition in a particular relevant market. See *Eichorn v. AT & T Corp., 248 F.3d 131, 147-48 (3d Cir. 2001)*. The plaintiff bears the burden of defining the relevant market. *Queen City, 124 F.3d at 436*. Failure to do so may result in the dismissal of an antitrust complaint.

[*17] ***HN8***[] A relevant market for antitrust purposes is comprised of a geographic and a product market. The relevant product market is defined as "those commodities reasonably interchangeable by consumers for the same purposes." *Tunis Bros. Co. v. Ford Motor Co., 952 F.2d 715, 722 (3d Cir. 1992)*. The relevant geographic market is defined as the "area in which a potential buyer may rationally look for the goods or services he or she seeks." *Id. at 726*. This geographic market must "conform to commercial reality." *Eichorn, 248 F.3d at 147*.

Lifeway argues that Fresh Made has failed to define a proper product or geographic market, and that the *Section 1* claim must, therefore, be dismissed. Fresh Made counters that it has fairly alleged a relevant market. It asserts that

---

without returning the $ 30,000 it received under the agreement because it is entitled to affirm the contract and seek to recover damages in an amount equal to the difference between the actual value of the contract and the value as fraudulently represented by Lifeway. Fresh Made argues that there is a question of fact about whether or not the $ 30,000 was given by Lifeway as consideration for the release or consideration for the purchase of labels. For that reason, Fresh Made believes that it is entitled to affirm the contract for the purchase of labels and to maintain its suit while avoiding the release. Under New York law, a party is entitled to affirm a contract and bring an action alleging fraud, while avoiding the defense of release. See *Goldsmith v. Nat'l Container Corp., 287 N.Y. 438, 442-43, 40 N.E.2d 242 (N.Y. Ct. App. 1942)* ("the releases given by the plaintiff, which the defendants' answer pleads as a defense, do not bar the present action at law whereby the plaintiff seeks damages due to alleged fraudulent misrepresentations and concealments which induced him to give such releases"). For that reason, Fresh Made need not, at this point, return the $ 30,000 received under the April 2000 agreement in order to avoid the release through its allegations of fraud.

[9] To recover damages, a private antitrust plaintiff must also allege that it has suffered an "injury in fact" that is attributable to something the antitrust laws were designed to prevent. See *J. Truett Payne Co. v. Chrysler Motors Corp., 451 U.S. 557, 562, 68 L. Ed. 2d 442, 101 S. Ct. 1923 (1981)*. The Amended Complaint alleges that Fresh Made suffered economic losses such as "lost income, revenues and profits", that it has been deprived of the opportunity to expand, grow or otherwise become more profitable, and that its participation in the market has been restricted or reduced. Am. Compl. at PP 100, 101, 105(b). These allegations sufficiently state that Fresh Made has suffered an injury in fact. See ABA Section of ***Antitrust Law***, ***Antitrust Law*** Developments, 762 (4th ed. 1997). In addition, as a direct competitor of Lifeway, the injuries to Fresh Made's business and participation in the market fall into the category of injuries that flow from the conduct that the antitrust laws were intended to prevent. See *Merican, Inc. v. Caterpillar Tractor Co., 713 F.2d 958, 964 & n.14 (3d Cir. 1983)*.

the relevant geographic market is the United States, and the relevant product market is specialty Russian dairy foods, including kefir. [10] See Am. Compl. PP 17, 19, 116.

[*18] *HN9*[] The Third Circuit has instructed that although "in most cases, proper market definition can be determined only after a factual inquiry into the commercial realities faced by consumers", there is no "prohibition against dismissal of antitrust claims for failure to plead a relevant market". *Queen City, 124 F.3d at 436*. "Where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor, the relevant market is legally insufficient and a motion to dismiss may be granted." Id. Therefore, where a "complaint fails to allege facts regarding substitute products, to distinguish among apparently comparable products, or to allege other pertinent facts relating to cross-elasticity of demand" a motion to dismiss may be properly granted. *Re-Alco Indus., Inc. v. Nat'l Ctr. for Health Educ., 812 F. Supp. 387, 391 (S.D.N.Y. 1993)* (cited by *Queen City, 124 F.3d at 437*).

In the Amended **[*19]** Complaint, Fresh Made does not ground its allegations regarding product market with reference to the rule of reasonable interchangeability and cross-elasticity of demand. [11] **[*20]** Fresh Made does not allege facts establishing that the market for specialty Russian dairy products, such as kefir, is distinct from the market for yogurt, other drinkable yogurt products, or from other dairy products in general. [12] The amended complaint contains no allegations relating to the price of and/or the demand for kefir and other specialty Russian dairy products relative to products in the larger dairy market as a whole. Fresh Made simply fails to allege whether there are reasonably interchangeable alternatives for its products. It is also unclear from the allegations what relationship kefir has to other specialty Russian dairy products or why they are appropriately in the same product market.

[*21] Without pleadings asserting otherwise, the Court cannot at this point conclude that the proposed market of kefir and other specialty Russian dairy products is an appropriately separate and distinct market, and therefore a relevant market for antitrust purposes. See, e.g., *Queen City, 124 F.3d at 436-37*, citing, *B.V. Optische Industrie De Oude Delft v. Hologic, Inc., 909 F. Supp. 162, 172 (S.D.N.Y. 1995)* (dismissing antitrust claim because there were no pleadings that the "chest equalization radiography" market was independent from the "overall X-ray market"); *E. & G. Gabriel v. Gabriel Bros., Inc. 1994 U.S. Dist. LEXIS 9455*, No. 93 Civ. 0894 (PKL), 1994 WL 369147, at **3-5 (S.D.N.Y. July 13, 1994) (dismissing antitrust claim because proposed market contained varied items with no cross-elasticity of demand); *Re-Alco Indus., 812 F. Supp. at 392* (dismissing antitrust claim where the

---

[10] The United States can, in appropriate instances, be a relevant geographic market. See, e.g., *United States v. Grinnell Corp., 384 U.S. 563, 575, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*.

[11] *HN10*[] Reasonable interchangeability of use implies that "one product is roughly equivalent to another for the use to which it is put." *Queen City, 124 F.3d at 437*. Reasonable interchangeability can be indicated by cross-elasticity of demand between the product itself and substitutes for it. Id. Products in a relevant market are "characterized by a cross-elasticity of demand, in other words, the rise in the price of a good within a relevant product market would tend to create a greater demand for other like goods in that market." Id. (quoting *Tunis Bros., 952 F.2d at 722*).

[12] Fresh Made does allege that its products serve the needs of the "Russian-speaking immigrant community that has taken residence in the United States." Am. Compl. P 17. Fresh Made also alleges that it is these immigrants who represent the market for the "niche or specialty dairy products" that it produces. Id. at P 19. These allegations suggest that Fresh Made may be able to plead a relevant sub-market within the overall dairy market. See *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962)* *HN11*[] (holding that within a "broad market, well-defined submarkets may exist which, in themselves, constitute product markets for antitrust purposes"). Factors indicating whether the finding of a sub-market is appropriate include "industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." Id. See *Tower Air, Inc. v. Federal Express Corp., 956 F. Supp. 270, 280 (E.D.N.Y. 1996)*; *Tasty Baking Co. v. Ralston Purina, Inc., 653 F. Supp. 1250, 1258 (E.D. Pa. 1987)*. However, a complaint alleging a submarket is not excused from grounding its allegations with facts regarding reasonable interchangeability and cross-elasticity of demand.

complaint failed to "discuss the existence or nonexistence" of alternate products "and any relevant differences in demand"). The Court concludes that the Amended Complaint fails to sufficiently define a relevant product market in support of the *Section 1* claim.

Fresh **[*22]** Made argues that even if the Amended Complaint fails to adequately allege a relevant market, it has alleged activity that constitutes a *per se* antitrust violation, and as such, it need not plead or establish a relevant market. ***HN12***[] If a plaintiff can show a *per se* antitrust violation, market power in a relevant market need not be established. See *Fed. Trade Comm'n v. Superior Court Trial Lawyers Ass'n, 493 U.S. 411, 431-35, 107 L. Ed. 2d 851, 110 S. Ct. 768 (1990)*; *Eichorn, 248 F.3d at 147 n.4*; In re: *Mercedes-Benz AntiTrust Litig., 157 F. Supp. 2d 355, 359 (D. N.J. 2001)*. Fresh Made argues that because the complaint alleges a concerted refusal to deal (a boycott), it has alleged a *per se* violation, and any failure to plead a relevant market is immaterial.

The Supreme Court has, however, held that "precedent limits the *per se* rule in the boycott context to cases involving horizontal agreements among direct competitors." *NYNEX Corp. v. Discon, Inc., 525 U.S. 128, 135, 142 L. Ed. 2d 510, 119 S. Ct. 493 (1998)*. Therefore, "***antitrust law*** does not permit the application of the *per se* rule in the boycott context **[*23]** in the absence of a horizontal agreement." *Id. at 138*. In addition, no vertical restraint can be "illegal *per se* unless it includes some agreement on price or price levels." *Id. at 136* (citing *Bus. Elecs. Corp. v. Sharp Elecs. Corp., 485 U.S. 717, 735-36, 99 L. Ed. 2d 808, 108 S. Ct. 1515 (1988)*).

The Amended Complaint alleges only a vertical boycott between Lifeway, the kefir container manufacturers, distributors and store owners. [13] See, e.g., *TV Communications Network, Inc. v. Turner Network Television, Inc., 964 F.2d 1022, 1027 (10th Cir. 1992)* ***HN13***[] (agreement between "entities at different market levels" is a vertical restraint, which is not illegal *per se* absent an agreement as to pricing levels). In addition, there is no allegation that this boycott was designed to affect the price of kefir or other specialty dairy goods. For these reasons, the Amended Complaint does not properly allege a *per se* antitrust violation. Therefore, the failure to sufficiently allege a relevant antitrust market is fatal to Fresh Made's claim under *Section 1* of the Sherman Act.

[*24] Lifeway also argues that Fresh Made has failed to sufficiently allege an antitrust conspiracy or concert of action. ***HN14***[] To state a federal antitrust claim under *Section 1*, a plaintiff must allege a conspiracy or concerted activity by the defendant. See *Queen City, 124 F.3d at 442*. A "general allegation of conspiracy without a statement of the facts is an allegation of a legal conclusion and insufficient of itself to constitute a cause of action". *Fuentes v. South Hills Cardiology, 946 F.2d 196, 201-202 (3d Cir. 1991)* (citation omitted). Therefore, a plaintiff "must plead the facts constituting the conspiracy, its object and accomplishment." Id.

The Amended Complaint alleges that Lifeway conspired, with the "express or implicit consent" of Danone, with manufacturers of kefir containers, with distributors, and with store owners, in violation of *Section 1*.

To the extent that a conspiracy is alleged to exist between Lifeway and Smolyansky, such allegation is insufficient. ***HN15***[] Such an internal agreement "to implement a single firm's policies does not raise the antitrust dangers that *[Section 1*] was designed to police." *Siegel Transfer, Inc. v. Carrier Express, Inc., 54 F.3d 1125, 1132 (3d Cir. 1995)* **[*25]** (quoting *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 769, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*). Although some courts have recognized that in cases where the agent is acting "for personal reasons", an "exception to the general rule that a corporation cannot conspire with its employees, officers or agents" may exist, any such exception is not applicable here. *54 F.3d at 1135*. Because Fresh Made has not alleged that Smolyansky was acting to "further his own economic interest in a marketplace actor which benefits from the alleged restraint", the personal interest exception does not apply. *54 F.3d at 1136-37*.

In addition, to the extent that Fresh Made alleges a *Section 1* conspiracy between Lifeway and Danone, such allegations may be insufficient. Copperweld held that ***HN16***[] a corporation cannot conspire for antitrust purposes with a wholly-owned subsidiary. *Copperweld, 467 U.S. at 771-72*. The Amended Complaint states that Danone is

[13] There is no allegation that Danone is a competitor of Lifeway in the relevant market, so any argument that any alleged agreement between those two parties is sufficient to state a horizontal boycott would be unavailing.

the owner of 20% of Lifeway's outstanding common stock. Danone's alleged 20% interest in Lifeway does not appear to be enough to invoke the Copperweld rule. [14] However, the allegation that Danone controls **[*26]** or exercises significant and substantial influence over Lifeway arguably makes Danone and Lifeway a single entity with unity of interests, incapable of conspiring under Copperweld. [15] See *Eichorn, 248 F.3d at 138* (recognizing that a parent and its wholly owned subsidiary cannot conspire because they have "complete unity of interest" and one "corporate consciousness").

[*27] In any event, Fresh Made also alleges that Lifeway has conspired with manufacturers of kefir containers, distributors, and store owners. [16] Am. Compl. PP 97(a)-(d). No Copperweld problem arises with regard to these entities. [17]

[*28] Fresh Made has requested leave to amend its complaint to the extent that it has failed to adequately allege a proper market in support of its antitrust allegations. Plf.'s Br. at 50. Although the Court recognizes that Fresh Made has already amended its complaint once as a matter of right and has yet to plead a valid antitrust claim, the Court will permit Fresh Made an opportunity to amend its complaint. If Fresh Made can, in good faith, plead a relevant antitrust market with appropriate well-founded allegations to support a Sherman Act claim, it may attempt to do so.

IV. Sherman Act *Section 2*

HN17[↑] In order to prevail on an attempted monopolization [18] claim under *Section 2* of the Sherman Act, a plaintiff must prove that the defendant (1) engaged in predatory or anticompetitive conduct with (2) specific intent to monopolize, and with (3) a dangerous probability of achieving monopoly power. *Queen City Pizza, 124 F.3d at 442*; *Barr Labs., Inc. v. Abbott Labs., 978 F.2d 98, 112 (3d Cir. 1992)*. "In order to determine whether there is a dangerous probability of monopolization, a court must inquire into the relevant product and geographic market and **[*29]** the defendant's economic power in that market." *Queen City, 124 F.3d at 442* (citations and internal quotation marks omitted). Lifeway argues that the *Section 2* claim must be dismissed because Fresh Made cannot establish a dangerous probability of achieving monopoly power without defining the relevant product and geographic markets. [19]

---

[14] Courts have, however, extended Copperweld to situations where the parent corporation owned all but a *de minimis* portion of the subsidiary. See *Siegel Transfer, 54 F.3d at 1132-33* (applying Copperweld because 99.92% stock ownership was *de minimis* variation from 100% ownership); Julian O. von Kalinowski, et al., 1 Antitrust Laws and Trade Regulation, § 11.02[2][a][iii] at 11-16 through 11-17 (2d Ed. Matthew Bender, 2001) (citing cases).

[15] Fresh Made also cites a pre-Copperweld case from the Northern District of California to support its argument that single firm behavior can be litigated under *Section 1* under a "thin conspiracy" theory. See *Gen. Communications Eng'g, Inc. v. Motorola Communications and Elecs., Inc., 421 F. Supp. 274 (N.D. Cal. 1976)*. However, as it pre-dates Copperweld, it is of little value.

[16] Lifeway argues that because these persons or entities are unnamed, the allegation is insufficient. At oral argument, Fresh Made stated that if granted leave to amend the complaint, it would name at least some of the manufacturers, distributors, and store owners involved in the conspiracy. Tr. at 52. Such an amendment should alleviate Lifeway's concern.

[17] Lifeway also argues that Fresh Made's allegations of conspiracy between Lifeway and manufacturers, distributors, and store owners describe statements made exclusively by Lifeway, and action by the other entities only under duress. See Am. Compl. PP 36-40. However, "even if one is coerced by economic threats or pressure to participate in an illegal scheme, that does not make him any less a co-conspirator" for purposes of *Section 1*. E.g., *Otto Milk Co. v. United Dairy Farmers Coop. Ass'n, 261 F. Supp. 381, 385 (E.D. Pa. 1966)*, aff'd *388 F.2d 789 (3d Cir. 1967)*.

[18] *Section 2* can support a claim for monopolization or attempted monopolization. The Amended Complaint states only a claim for attempted monopolization. Am. Compl. PP 112-117.

[19] Lifeway did not challenge the Amended Complaint's allegations of anti-competitive conduct. In addition, Fresh Made alleges that Lifeway had specific intent to achieve monopoly power, and the alleged statements of Smolyansky are a sufficient factual basis for this assertion. See Am. Compl. PP 74 & 112.

Under *Section 2*, as under *Section 1*, the relevant market is defined by reasonable interchangeability and cross-elasticities of demand. *Id., at 442 n. 18*. Because **[*30]** the Court has found that Fresh Made has not alleged a sufficient market in terms of reasonable interchangeability and cross-elasticity of demand, the *Section 2* claim will also be dismissed. See *id. at 442*.

Even had Fresh Made sufficiently described a relevant antitrust market, the Amended Complaint has not sufficiently alleged that there is a dangerous probability that Lifeway would achieve monopoly power. Although the Amended Complaint states that there "exists a dangerous probability that Lifeway will succeed in achieving a monopoly over the Russian specialty dairy product market in the United States", such a conclusory allegation standing alone is insufficient to state a *Section 2* attempted monopolization claim. See, e.g., *E. & G. Gabriel, 1994 U.S. Dist. LEXIS 9455, 1994 WL 369147* at *5 (allegation that defendant had "a dangerous probability of achieving monopoly power" insufficient where claim was otherwise deficient).

The Amended Complaint alleges that Lifeway's gross annual revenues are five times as large as Fresh Made's, that Lifeway has achieved access to Danone's large distribution network, and that Lifeway has used its influence to threaten distributors and food **[*31]** markets who did not agree to its demands. Am. Compl. at PP 6, 10, 113 & 117. Fresh Made does not, however, allege the overall size of the proposed market, identify Lifeway's percentage share of the proposed market, identify other participants and competitors in the market, or allege what percentage of Lifeway's gross annual revenues are derived from the proposed market. Therefore, the allegations regarding the relative size of the parties do not sufficiently illustrate that Lifeway has a dangerous probability of achieving monopoly power in the relevant market.

V. Lanham Act

Count VIII of the Amended Complaint alleges that Lifeway has violated the Lanham Act by publishing certain advertisements for kefir that are false and misleading. The allegedly false advertisements state that Lifeway's kefir is "America's only real kefir." Am. Compl. P 170 & Ex. C.

Lifeway does not argue that Fresh Made has failed to plead the requisite elements of a Lanham Act claim. [20] Rather, Lifeway argues that because the Amended Complaint does not allege that the advertisements were published after the date of the April 2000 settlement agreement, the claim is barred by the release. The Amended **[*32]** Complaint does, however, allege that "Lifeway represents that it sells 'America's only real kefir.'" Am. Compl. at P 170. Read in a light most favorable to the plaintiff, this allegation asserts on-going conduct. As such, it alleges that the advertisements post-date the release. [21]

[*33] Lifeway also claims that because Count VIII incorporates by reference the previous allegations contained in the Amended Complaint, "it is impossible" for Lifeway to respond to the allegations as presently pled. Def.'s Br. at 23. Therefore, Lifeway argues that Fresh Made should be required to re-plead Count VIII. The Court disagrees. The allegations in Count VIII, standing alone, are sufficient to put Lifeway on notice as to the nature of Fresh Made's Lanham Act claim. Lifeway's request that Fresh Made be required to re-plead the claim will be denied.

VI. Unfair Competition and Restraint of Trade

---

[20] ***HN18***[] To establish a Lanham Act violation, a plaintiff must prove that: (1) the defendant has made false or misleading statements as to his own product or another's; (2) that there is actual deception or at least a tendency to deceive a substantial portion of the intended audience; (3) that the deception is material in that it is likely to influence purchasing decisions; (4) that the advertised goods traveled in interstate commerce; and (5) that there is a likelihood of injury to the plaintiff in terms of declining sales, loss of good will, or the like. *U.S. Healthcare, Inc. v. Blue Cross of Greater Phila., 898 F.2d 914, 922-23 (3d Cir. 1990)*.

[21] Of course, because Fresh Made has alleged that the release was procured by fraud, the release cannot, at this stage, act to bar the Lanham Act claim.

Lifeway argues that because Fresh Made is unable to state a valid federal antitrust claim, Counts III (Restraint of Trade) and VII (Unfair Competition) should also be dismissed. The Court agrees.

Fresh Made alleges that the actions underlying its Sherman Act claims also constitute an unreasonable restraint of trade under Pennsylvania law. Am. Compl. P 125. ***HN19***[] Pennsylvania Courts have recognized that the Sherman Act is "merely the application of the common-law doctrine concerning the restraint of trade to the field of interstate commerce." *Collins v. Main Line Bd. of Realtors, 452 Pa. 342, 304 A.2d 493, 496 (Pa. 1973)*. **[*34]** See *Yeager's Fuel, Inc. v. Pa. Power & Light Co., 953 F. Supp. 617, 668 (E.D. Pa. 1997)*; Lakeview Ambulance & Med. Servs., Inc. v. Gold Cross Ambulance & Med. Serv., Inc., No. 1994-2166, 1995 WL 842000, *4 (Pa. Ct. Comm. Pleas, Oct. 18, 1995). Therefore, the restraint of trade claim will be dismissed for the reasons given in the Court's Sherman Act discussion. [22] See *Yeager's Fuel, 953 F. Supp. at 668* ("the Court's decision regarding Plaintiffs' common-law restraint of trade claim mirrors the conclusion reached in assessing Plaintiffs' claim under *§ 1* of the Sherman Act").

[*35] ***HN20***[] Pennsylvania has recognized a common-law claim of unfair competition under the Restatement (Third) of Unfair Competition. See *Yeager's Fuel, 953 F. Supp. at 668*; Lakeview Ambulance, 1995 WL 842000 at *2; *Restatement (Third) Unfair Competition § 1(a)* & *Comment g*. Fresh Made alleges that Lifeway's efforts to "restrict [Fresh Made's] market share" and to "establish a monopoly over the specialized dairy products" market constitute acts of unfair competition. Am. Compl. PP 156 & 157. As these allegations essentially mirror Fresh Made's Sherman Act claims, they suffer from the same deficiencies in how Fresh Made has attempted to define market share and the relevant market. For that reason, the Unfair Competition claim will also be dismissed. Cf. *Yeager's Fuel, 953 F. Supp. at 668* (allowing unfair competition claim to go forward because there were "fact issues concerning whether [the defendant] violated the various federal antitrust statutes").

VII. Civil Conspiracy

Count VI of the Amended Complaint alleges that the "defendants have, among themselves, agreed to embark on a course of conduct with the specific intent of **[*36]** restraining Fresh Made's business." Am. Compl. P 150. Lifeway argues that this claim should be dismissed because it is merely a restatement of Fresh Made's antitrust claims, because the defendants, having unity of interest, cannot conspire with one another, and because Fresh Made has failed to allege the requisite degree of malice.

HN21[] "A civil conspiracy under Pennsylvania law requires that two or more persons combined or agreed with intent to do an unlawful act or to do an otherwise lawful act by unlawful means. Proof of malice, *i.e.*, an intent to injure is essential in proof of a conspiracy." *Keating v. Bucks County Water & Sewer Auth., 2000 U.S. Dist. LEXIS 18690*, *No. Civ. A. 99-1584, 2000 WL 1888770*, *16 (E.D. Pa. Dec. 29, 2000) (citing *Skipworth by Williams v. Lead Indus. Ass'n., Inc., 547 Pa. 224, 690 A.2d 169, 174 (Pa. 1997)* and *Thompson Coal Co. v. Pike Coal Co., 488 Pa. 198, 412 A.2d 466, 472 (Pa. 1979))*. In addition, under Pennsylvania law, as under federal ***antitrust law***, a corporation cannot conspire with itself, or with it officers or agents acting solely for the corporation. See, e.g., *Keating, 2000 U.S. Dist. LEXIS 18690, 2000 WL 1888770* at *16; *Fox v. Keystone Turf Club, Inc., 1997 U.S. Dist.*

[22] The Court also recognizes that it is questionable whether a plaintiff can recover damages under a common law restraint of trade theory in Pennsylvania. Some courts have concluded that there is no private remedy for damages under a common law restraint of trade theory, while others have left the question open. See *Collins, 304 A.2d at 498* (finding an agreement in restraint of trade to be invalid, but awarding only injunctive relief, holding that the record did "not provide any legal basis for an award of damages"); Lakeview Ambulance, 1995 WL842000 at *4 (recognizing that certain courts have recognized a common law anti-trust cause of action, "but only in the limited circumstances of trademarks, trade secrets, or restraint of trade pursuant to statute"); *XF Enters. Inc. v. BASF Corp., 47 Pa. D. & C.4th 147*, No. 9906-1477, 2000 WL 33155746, *1 (Pa. Ct. Comm. Pleas July 13, 2000) ("No court to date has held that a private remedy is available for damages under Pennsylvania's common law on antitrust violations."). Even if a private plaintiff in Pennsylvania could recover under common law restraint of trade theory, the Amended Complaint has failed to state such a claim. Therefore, the Court need not, at this point, decide whether it would be possible for a plaintiff to recover under such a theory.

LEXIS 19370, No. Civ. A. 97-1424, 1997 WL 793590,*2 (E.D Pa. Dec. 4, 1997); **[*37]** . Thompson Coal, 412 A.2d at 473.

Because there are no allegations that Smolyansky was acting outside of his role as a director of Lifeway, any alleged conspiracy between him and Lifeway fails as a matter of law. See, e.g., Fox, 1997 U.S. Dist. LEXIS 19370, 1997 WL 793590 at *2. Similarly, because Fresh Made alleges that Danone controls and exercises significant influence over Lifeway, any allegation of conspiracy between Danone and Lifeway raises similar concerns. [23]

[*38] In any event, ***HN22***[] under Pennsylvania law, a claim of civil conspiracy cannot be pled without also alleging an underlying actionable wrong. See Boyanowski v. Capital Area Intermediate Unit, 215 F.3d 396, 405 (3d Cir. 2000). When a court dismisses the causes of action which underlie a civil conspiracy claim, the civil conspiracy claim must also be dismissed. See, e.g., Samuel v. Clark, 1996 U.S. Dist. LEXIS 11487, No. Civ. A. 95-6887, 1996 WL 448229, *4 (E.D. Pa. Aug. 7, 1996) (dismissing conspiracy claim where underlying claims for fraud and discrimination were dismissed); Rose v. Wissinger, 294 Pa. Super. 265, 439 A.2d 1193, 1199 (Pa. Super. Ct. 1982) (dismissing conspiracy claim where defamation and outrageous conduct claims were dismissed); Raneri v. Depolo, 65 Pa. Commw. 183, 441 A.2d 1373, 1376 (Pa. Cmwlth. 1982) (dismissing conspiracy claim where underlying claim for defamation was dismissed); see generally Boyanowski, 215 F.3d at 405 (overturning civil conspiracy verdict where jury found no liability on underlying tortious interference claim); GMH Assocs., Inc. v. Prudential Realty Grp., 2000 PA Super 59, 752 A.2d 889, 905 (Pa. Super. 2000) **[*39]** (setting aside civil conspiracy verdict where underlying fraud verdict was reversed on appeal).

Fresh Made's civil conspiracy claim is predicated upon the same conduct underlying the antitrust, unfair competition, and restraint of trade claims. Because the Court will dismiss those claims, the claim for civil conspiracy must also be dismissed. See, e.g., Samuel, 1996 U.S. Dist. LEXIS 11487, 1996 WL 448229 at *4.

VIII. Malicious Abuse of Process

In Count IV of the Amended Complaint, Fresh Made alleges that the series of lawsuits filed against it by Lifeway constitute the tort of malicious abuse of process. ***HN23***[] To establish a claim for malicious abuse of process under Pennsylvania law, it must be shown that "the defendant (1) used a legal process against the plaintiff, (2) primarily to accomplish a purpose for which the process was not designed, and (3) harm has been caused to the plaintiff." Hart v. O'Malley, 436 Pa. Super. 151, 647 A.2d 542, 551 (Pa. Super. Ct. 1994) (citing Restatement (Second) Torts § 682). Although the word "process" as used in this tort "has been interpreted broadly [to] encompass the entire range of procedures incident to the litigation process", **[*40]** the restatement makes clear that the gravamen of this tort is not "the wrongful initiation" of proceedings. Restatement (Second) Torts § 682, Comment a.

Recognizing this fact, and the distinction between the tort of abuse of process and the tort of wrongful use of civil proceedings, [24] courts have held that a complaint alleging only that one party initiated suit against another for

[23] To the extent that Fresh Made's conspiracy claim is based on a conspiracy between Fresh Made and the unnamed manufacturers, distributors and store owners, the claim is also on unsound footing. See, e.g., Fox, 1997 U.S. Dist. LEXIS 19370, 1997 WL 793590 at *2 (dismissing civil conspiracy claim where the identity of the co-conspirators was "unclear at best"). As mentioned above, Fresh Made has indicated that it would name certain of the manufacturers, distributors and store owners if granted leave to amend. Tr. 52. This could cure any defect in the identification of any such conspirators.

[24] The tort of wrongful use of civil proceedings makes a person liable for initiating or continuing a civil proceeding if he acts (1) in a grossly negligent manner or without probable cause and primarily for a purpose other than that of securing the proper discovery, joinder of parties or adjudication of the claim in which the proceedings are based; and (2) the proceedings have terminated in favor of the person against whom they are brought. See Rosen v. Am. Bank of Rolla, 426 Pa. Super. 376, 627 A.2d 190, 191-92 (Pa. Super. Ct. 1993) (citing 42 Pa. Cons. Stat. Ann. § 8351). Here there are no allegations that any of the

improper purposes is insufficient to state a claim for malicious abuse of process. See *Todi v. Stursberg, 2001 U.S. Dist. LEXIS 20098*, *No. Civ. A. 01-2539, 2001 WL 1557517*, *2 (E.D. Pa. Dec. 4, 2001).

[*41] The Amended Complaint alleges only that the lawsuits at issue were "commenced" by Lifeway with an improper purpose. Am. Compl. P 133. In the absence of allegations that process was abused after the suits were commenced, Fresh Made has not adequately stated a claim for malicious abuse of process. See *2001 U.S. Dist. LEXIS 20098*, [WL] at *2 ("Absent allegations that a party has abused the process *after* its issuance . . . an abuse of process claim cannot stand.") (citations and internal quotation marks omitted). Therefore, the Court will dismiss Count IV of the Amended Complaint.

IX. Interference with Business Relationships

In Count V, Fresh Made alleges that Lifeway "with purposeful intent to interfere with [Fresh Made's] business, induced merchants and distributors to cease doing business with [Fresh Made] under threat of economic sanctions." Am. Compl. P 142. Fresh Made also alleges that Lifeway "interfered with Fresh Made's ability to develop future or prospective contractual business relationships with merchants and distributors. *Id. at P 143*. Lifeway argues that Count V must be dismissed because Fresh Made has not identified the specific existing and prospective business relationships **[*42]** which have been harmed by Lifeway's conduct.

HN24[] To establish a claim for interference with contractual or prospective contractual relations under Pennsylvania law, a plaintiff must show: (1) the existence of a contractual or prospective contractual relationship between the plaintiff and a third party; (2) a purpose or intent to harm an existing relationship or to prevent a prospective relationship from accruing; (3) the absence of privilege or justification on part of the defendant; and (4) the occurrence of actual harm or damage to the plaintiff as a result of the defendant's conduct. See *Pellegrino Food Prods. Co. v. City of Warren, 136 F. Supp. 2d 391, 408 (W.D. Pa. 2000)*; *Advanced Power Sys., Inc. v. Hi-Tech Sys., Inc., 1992 U.S. Dist. LEXIS 6479*, *Civ. No. 90-7952, 1992 WL 97826*, *10 (E.D. Pa. Apr. 30, 1992).

When alleging interference with existing contractual relations, a plaintiff should identify which existing contractual relationships were hindered. See *Allstate Transp. Co. v. Southeastern Pa. Transp. Auth., 1997 U.S. Dist. LEXIS 16638*, *No. 971482, 1997 WL 666178*, **10-11 (E.D. Pa. Oct. 20, 1997). When alleging interference with prospective contractual relations, the allegations need **[*43]** not be as precise. A plaintiff must not, however, "rest a claim for tortious interference with prospective contractual relations on a mere hope that additional contracts or customers would have been forthcoming but for defendant's interference." *Advanced Power Sys, 1992 U.S. Dist. LEXIS 6479, 1992 WL 97826* at *11. ***HN25***[] The complaint "must allege facts that, if true, would give rise to a reasonable probability that particular anticipated contracts would have been entered into." Id. Such a probability "may arise from an unenforceable express agreement or an offer", or where "there is a reasonable probability that a contract will arise from the parties' current dealings." *Allstate Transp., 1997 U.S. Dist. LEXIS 16638, 1997 WL 666178* at *11. However, "merely pointing to an existing business relationship or past dealings does not reach this level of probability." Id.

Fresh Made alleges that its existing contractual relationships with certain distributors and stores were interfered with by Lifeway. Fresh Made does not further identify any of the stores or distributors, or otherwise identify any contractual relationships that were interfered with. ***HN26***[] Although the federal rules require only a short and plain statement **[*44]** of the claim, that statement "must be sufficient to give the defendant[s] notice of the claim and the grounds upon which it is based." Id. Because the potential universe of identified relationships is enormous, [25] **[*45]** the Court concludes that the Amended Complaint does not give sufficient notice of the existing business relationships at issue here. [26] See, e.g., Id. (claim dismissed where claim identified relationships with "essential

court proceedings initiated by Lifeway terminated in favor of Fresh Made (indeed, the parties settled two of the lawsuits and one is ongoing), and the tort of wrongful initiation of civil proceedings is not applicable.

[25] As an illustration, Lifeway distributes its products to some 15,000 stores nationwide. Tr. at 55. Because the proposed relevant market encompasses the entire country, each of these stores is potentially implicated by Fresh Made's allegations.

contractors" and "other ParaTransit business relationships"); Centennial Sch. Dist. v. Independence Blue Cross, 885 F. Supp. 683, 688 (E.D. Pa. 1994) (claim dismissed where complaint "failed to identify what contractual relationships were threatened"); see generally, Fluid Power, Inc. v. Vickers, Inc., 1993 U.S. Dist. LEXIS 2012, Civ. A. No. 92-0302, 1993 WL 23854, *4 (E.D. Pa. Jan. 28, 1993) (claim sufficient where one contract was identified with particularity and where plaintiff provided customer lists with the names of plaintiff's other existing and prospective customers).

Fresh Made's allegations with regards to prospective business relationships are also insufficient. The Amended Complaint states only that Fresh Made "was developing future or prospective business relationships" with certain distributors and merchants, and that Lifeway interfered with Fresh Made's "ability to develop" those contractual relationships. Am. Compl. PP 141 & 143. **HN27**[] These allegations do not identify any particular potential relationships, nor do they provide any basis for concluding that there was "an objectively reasonable probability that [such relationships would] come into existence". Allstate Transp., 1997 U.S. Dist. LEXIS 16638, 1997 WL 666178 at *11. For that reason, Fresh Made's claim for interference with potential business relationships will be dismissed. See, e.g., Jaramillo v. Experian Inf. Solutions, Inc., 155 F. Supp. 2d 356, 365 (E.D. Pa. 2001) (claim dismissed where plaintiff failed to plead the "existence of any specific contract or prospective **[*46]** contract"); Advanced Power Sys., 1992 U.S. Dist. LEXIS 6479, 1992 WL 97826 at *12 (claim dismissed where plaintiff "failed to either identify particular potential customers or to allege the existence of a mechanism that would routinely bring it new customers"); see generally, Joyce v. Alti Am., Inc.,2001 U.S. Dist. LEXIS 17432, No. Civ. A. 00-5420, 2001 WL 1251489, *4 (E.D. Pa. 2001) (claim sufficient where plaintiff identified a "specific third party" with whom it had been attempting to enter a contract); Pellegrino, 136 F. Supp. 2d at 408 (claim sufficient where plaintiff alleged that it received inquiries about potential contracts from certain entities).

X. Request for Leave to Amend

In its Brief in Opposition to the Motion to Dismiss, Fresh Made reports that it has discovered another potential Lanham Act violation allegedly committed by Lifeway. Fresh Made states that Lifeway has been using a limited trademark which does not apply to butter on its butter products. Fresh Made has requested leave to amend the complaint to include additional claims, under the Lanham Act and common law unfair competition, for this alleged conduct. Lifeway did not oppose this request in its reply **[*47]** brief. The Court will grant Fresh Made's request for leave to amend to add these claims. See Fed. R. Civ. P. 15(a) ("leave shall be freely given when justice so requires").

An appropriate Order follows.

ORDER

AND NOW, this 8th day of August, 2002, upon consideration of the Motion of Defendants Lifeway Foods, Inc., and Michael Smolyansky to Dismiss the Amended Complaint in its Entirety, or in the Alternative for a More Definitive Statement as to Count VIII (Docket # 15), the plaintiff's Memorandum of Law in Opposition thereto, various supplemental filings by the parties, and after oral argument, IT IS HEREBY ORDERED that said Motion is GRANTED IN PART and DENIED IN PART, as follows, in accordance with the Memorandum of today's date:

1. The Motion is GRANTED as to Counts I (Sherman Act Section 1), II (Sherman Act Section 2), III (Restraint of Trade), IV (Malicious Abuse of Process), V (Interference with Existing and Prospective Business Relationships), VI (Civil Conspiracy), VII (Unfair Competition), and X (Unfair Trade Practices Act). Those counts are HEREBY DISMISSED.

2. The Motion is DENIED insofar as it seeks to dismiss Count VIII (Lanham Act).

---

[26] Fresh Made's intention to name certain stores and distributors in any amended pleading could address this shortcoming.

3. The Motion is DENIED **[*48]** insofar as it seeks a more definitive statement as to Count VIII (Lanham Act).

4. The plaintiff shall be permitted to file an amended complaint within forty-five (45) days.

BY THE COURT:

MARY A. McLAUGHLIN, J.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Criminal Law & Procedure > ... > Standards of Review > De Novo Review > General Overview

HN1[] **Motions to Dismiss, Failure to State Claim**

An appellate court reviews a district court's ruling on a *Fed. R. Civ. P. 12(b)(6)* motion de novo. In reviewing the dismissal of a claim pursuant to 12(b)(6), this court must accept all of the plaintiff's factual allegations as true. The motion may be granted only if it appears that no relief could be granted under any set of facts that could be proven consistent with the allegations. Dismissal is proper if the complaint lacks an allegation regarding a required element necessary to obtain relief.

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > Exclusive Dealing

HN3[] **Tying Arrangements, Clayton Act**

Section 3 of the Clayton Act makes it unlawful to sell goods on the condition, agreement, or understanding that the purchaser refrain from dealing with competitors of the seller if the effect may be to substantially lessen competition or tend to create a monopoly in any line of commerce. *15 U.S.C.S. § 14 (1997)*. Two types of restrictions on competition may be challenged under § 3: tying restraints and exclusive-dealing arrangements. Tying restraints occur when a seller agrees to sell one product on the condition that the buyer also agree to purchases a different, or tied product, or the buyer agrees that he will not purchase the same product from another supplier. Exclusive dealing, in contrast, occurs when a seller agrees to sell its output of a commodity to a particular buyer, or when a buyer agrees to purchase its requirements of a commodity exclusively from a particular seller. United States Court of Appeals for the Fifth Circuit has recognized that an exclusive-dealing arrangement does not violate § 3 of the Clayton Act unless the probable effect of the agreement will foreclose competition in a substantial share of the line of commerce affected.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

HN4[] **Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing**

When assessing whether an exclusive-dealing arrangement has the probable effect of substantially lessening competition, the United States Supreme Court has identified a three-part inquiry. First, the relevant product market must be identified by considering interchangeability and cross-elasticity of demand. Second, the relevant geographic market must be identified, by careful selection of the market area in which the seller operates and to which the purchaser can practicably turn for supplies. Finally, a plaintiff must show that the competition foreclosed by the arrangement constitutes a substantial share of the relevant market. That is, the opportunities for other traders to enter into or remain in that market must be significantly limited.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN5[] Relevant Market, Product Market Definition

In ascertaining the relevant product market, courts consider the extent to which the seller's product is interchangeable in use, and the degree of cross-elasticity of demand between the product itself and substitutes for it. Within the product market, there may exist submarkets which, in themselves, represent product markets for antitrust purposes. The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN6[] Relevant Market, Geographic Market Definition

The area of effective competition in the known line of commerce must be charted by careful selection of the market area in which the seller operates and to which buyers can practicably turn for supplies. The geographic market must correspond to the commercial realities of the industry and be economically significant. Thus, although the geographic market in some instances may encompass the entire nation, under other circumstances it may be as small as a single metropolitan area. The tests for determining a geographic market under §§ 3 and 7 of the Clayton Act are similar. Thus, cases determining a geographic area under § 7 are equally applicable to cases brought under § 3.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Banking Law > Federal Acts > General Overview

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

HN7[] Regulated Practices, Market Definition

When determining whether a geographic market corresponds to commercial realities, courts have taken into account practical considerations such as the size, cumbersomeness, and other characteristics of the relevant product. In addition, determinants that affect the behavior of market participants may also be considered such as regulatory constraints impeding the free flow of competing goods into the area, perishability of products, and transportation barriers. On the other hand, the economic significance of a geographic area does not depend upon singular elements such as population, income, political boundaries, or geographic extent, but rather upon the relationship between these elements and the characteristics of competition in the relevant product market within a particular area.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > General Overview

HN8[] Regulated Practices, Market Definition

In order for an area to qualify as being economically significant, it must contain an appreciable segment of the product market. Whether a segment is appreciable depends upon whether it includes either an appreciable proportion of the product market as a whole, or a proportion of the product market which is largely segregated from, independent of, or not affected by competition elsewhere. Therefore, it is not required that an area encompass a large percentage of all business activity in the relevant product market to be considered economically significant. An area containing only a small percentage of business activity may qualify as being economically significant if the relevant competition in that specific area is insulated from equivalent competition elsewhere.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN9[] Price Fixing & Restraints of Trade, Horizontal Market Allocation

After the relevant market has been identified, it must then be determined whether the arrangement foreclosed competition in a substantial share of the established market.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Conspiracy to Monopolize > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] Sherman Act, Claims

Section 1 of the Sherman Act provides that every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several states, or with foreign nations, is declared to be illegal. *15 U.S.C.S. § 1 (1997)*. In order to demonstrate a claim of unreasonable restraint of trade under *§ 1*, a plaintiff must establish that: (1) the accused parties engaged in a conspiracy, (2) the conspiracy had the effect of restraining trade, and (3) trade was restrained in the relevant market. The plaintiff has the burden of proving all the elements of a *§ 1* violation.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Sherman Act

Antitrust & Trade Law > Sherman Act > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Physicians

HN11[] **Regulated Practices, Price Fixing & Restraints of Trade**

If, as an initial matter, a plaintiff does not contend an anti-trust defendant's actions were per-se illegal, the rule of reason analysis is applied. Under this rule, the plaintiff must demonstrate that the complained-of actions unreasonably restrained trade. The court must then balance the anticompetitive evils of a restrictive practice against any procompetitive benefits or justifications within the confines of the relevant market. Proof that the defendant's activities, on balance, adversely affected competition in the appropriate product and geographic markets is essential to recovery under the rule of reason. Thus, as under the Clayton Act, the first step in analyzing a Sherman Act, *15 U.S.C.S. § 1*, claim is defining the relevant product and geographic markets. The same test applied for determining the relevant product and geographic markets for Clayton Act claims is also used for alleged violations of the Sherman Act.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN12[] **Market Definition, Relevant Market**

The Texas Free Enterprise and Antitrust Act (TFEAA) was enacted to establish antitrust laws for the State of Texas. *Tex. Bus. & Com. Code Ann. § 15.01 et seq.* (Vernon 1987). Each provision of the TFEAA is modeled after a corresponding provision of federal ***antitrust law***. As such, Texas courts are statutorily instructed to interpret the TFEAA in harmony with federal judicial interpretations of equivalent federal laws. *§ 15.04*. Accordingly, Texas courts have adopted federal standards for determining violations of the TFEAA, including the use of a relevant market to determine whether substantial reductions in competition have occurred.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN13[] **Relevant Market, Geographic Market Definition**

Whether a relevant market has been identified is usually a question of fact; however, in some circumstances, the issue may be determined as a matter of law. Where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor, the relevant market is legally insufficient, and a motion to dismiss may be granted.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

HN14[] **Relevant Market, Geographic Market Definition**

When assessing economic significance, a court must determine whether the geographic area contains an appreciable segment of the product market. Whether a segment is appreciable depends on whether the segment includes either an appreciable proportion of the product market as a whole, or a proportion of the product market largely segregated from, independent of, or not affected by, competition elsewhere.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

HN15[] **Regulated Practices, Monopolies & Monopolization**

Monopsony refers to price fixing or monopolization by a single buyer.

Civil Procedure > ... > Pleadings > Heightened Pleading Requirements > General Overview

HN16[] **Pleadings, Heightened Pleading Requirements**

A heightened pleading standard may not be applied to antitrust claims, however, a less stringent standard of pleading does not relieve a plaintiff from its obligation to allege facts sufficient to support an antitrust violation. Leatherman bars a district court from applying a heightened pleading standard in antitrust cases. However, to survive a motion to dismiss, plaintiffs still must set forth facts sufficient to create an inference that defendant had enough market power to create a monopoly.

HN17[] **Lease Agreements, Subleases**

The essential elements of a tortious interference with an existing business relationship cause of action are (1) unlawful actions undertaken without justification or excuse; (2) with intent to harm; and (3) actual damages. In proving this claim, the plaintiff does not need to prove the existence of a valid contract, but only that the defendant's interference is motivated by malice.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Exclusive & Reciprocal Dealing > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN18[] **Price Fixing & Restraints of Trade, Exclusive & Reciprocal Dealing**

Where a party has not violated any antitrust laws, entering into an exclusive agreement, in and of itself, does constitute an unreasonable restraint on trade.

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN19[] **Intentional Interference, Elements**

Although the Texas Supreme Court has not specifically set forth all of the elements necessary for a tortious interference with prospective business relations cause of action, it has recognized that to establish liability for interference with a prospective contractual or business relation the plaintiff must prove that it was harmed by the defendant's conduct that was either independently tortious or unlawful. The court clarified that "independently tortious" means conduct that would violate some other recognized tort duty.

Torts > ... > Concerted Action > Civil Conspiracy > Elements

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN20[] **Conspiracy, Elements**

To prove a cause of action for civil conspiracy under Texas law, a plaintiff must establish the following elements: (1) two or more persons, (2) an object to be accomplished, (3) a meeting of minds on the object or course of action, (4) one or more unlawful, overt acts, and (5) damages as the proximate result.

HN21[] Business & Corporate Law, Agency Relationships

Article I, Section 26 of the Texas Constitution provides that perpetuities and monopolies are contrary to the genius of a free government, and shall never be allowed, nor shall the law of primogeniture or entailments ever be in force in this state. *Tex. Const. art. I § 26*. Texas courts, however, have recognized several exceptions to this general rule of law. These exceptions are: (1) contracts between an agent and its principal wherein the agent is prohibited from dealing for himself or representing others besides his principal, (2) contracts involving the sale of a business in which the seller agrees not to engage in a competing business for a limited time, (3) lease agreements that require the lessee to sell only certain products on the leased premises, and (4) cases in which an exclusive right or privilege is granted only upon the property or premises of the grantor.

Opinion by: CARL E. STEWART

Opinion

[*623] CARL E. STEWART, Circuit Judge:

Plaintiff-Appellant, Apani Southwestern, Inc. ("Apani"), appeals from the district court's dismissal of its antitrust claims against Coca-Cola Enterprises, Inc. ("CCE") arising out of a contract between CCE and the city of Lubbock, Texas (the "City"), which granted CCE the exclusive right to sell bottled water on property owned by the City. For the reasons stated herein, we affirm.

FACTUAL AND PROCEDURAL BACKGROUND

Apani is a manufacturer of purified bottled water operating in and around the Lubbock, Texas area. Prior to the events in question, Apani had developed a business relationship with the City, which permitted Apani to sell its product in facilities owned and operated by the City. On August 26, 1999, however, the City entered **[**2]** into an exclusive contractual agreement with CCE allowing CCE to supply non-alcoholic beverages to all facilities "owned and operated" by the City and precluding the City from purchasing beverages from other parties. [2] The agreement, therefore, effectively eliminated the City's business relationship with Apani. [3] The contract between the City and CCE arose from a proposal by the City that CCE donate approximately one million dollars for the construction of two new scoreboards at the Lubbock Municipal Coliseum. CCE agreed to provide the funds for the scoreboards **[*624]** as long as it would be permitted to recoup some of its investment. Accordingly, a contract was drafted giving CCE "the exclusive right to advertise and promote Exclusive Beverages in and with respect to the Territory(s), the Locations and Sites, and with respect to the CITY of LUBBOCK, events at the Locations. . . ." The agreement, however, provided for several exceptions, including the following:

> (1) the right of the city to make available fresh-squeezed juice, tea, coffee products, water drawn from the public water supply, and milk products as long as CCE does not distribute a similar product;
>
> (2) permit trade **[**3]** show exhibitors who have an exclusive agreement for competitive products to advertise, display, serve, or sample products during trade show events;
> (3) allow customers with a single beverage serving for immediate consumption to drink but not refill them;
>
> (4) *permit local water bottling (Apani) company, that is the official sponsor of the Cotton Kings, to sell bottled water at professional hockey games. This water will not be chilled or iced down*; and
> (5) allow amateur sports leagues in city parks the option to sell concessions using competing products.

Apani filed suit against CCE seeking damages for violations of § 3 of the Clayton Act, *15 U.S.C. § 14*, and the Texas Free Enterprise and Antitrust Act ("TFEAA"), *TEX. BUS. & COM.* **[**4]** *CODE ANN. § 15.01 et seq.* It also alleged claims of tortious interference with existing and prospective business relations. CCE filed a motion to dismiss pursuant to *Rule 12(b)(6) of the Federal Rules of Civil Procedure*. The district court granted CCE's motion as to the state and federal antitrust claims, but denied the motion with regard to the tortious interference claims. Subsequent to the partial dismissal, the court allowed Apani to file a Second Amended Complaint adding causes of action under the Sherman Act, *15 U.S.C. §§ 1* and *15*, and a civil conspiracy claim. The district court again dismissed all of the antitrust claims pursuant to *Rule 12(b)(6)*. CCE then filed a Motion for Summary Judgment as to

---

[1] Judge Politz was a member of the panel that heard oral arguments. However, due to his death on May 25, 2002, he did not participate in this decision. This case is being decided by a quorum pursuant to 28 U.S.C. § 46(d) (1996).

[2] In its complaint, Apani stated that the property "owned and operated" by the City consisted of twenty-seven facilities.

[3] This contract provided for a ten-year term and the automatic right to renew for an additional five years.

the tortious interference and civil conspiracy claims. The district court granted the motion as to both claims. Thereafter, Apani filed a motion to Alter or Amend Summary Judgment, which the district court denied.

STANDARD OF REVIEW

HN1[] We review a district court's ruling on a *Federal Rule of Civil Procedure 12(b)(6)* motion *de novo*. *Jackson v. City of Beaumont Police Dep't, 958 F.2d 616, 618 (5th Cir. 1992)*. In reviewing the dismissal of a claim **[**5]** pursuant to 12(b)(6), this court must accept all of the plaintiff's factual allegations as true. *Blackburn v. City of Marshall, 42 F.3d 925, 931 (5th Cir. 1995)*. "The motion may be granted only if it appears that no relief could be granted under any set of facts that could be proven consistent with the allegations." *Jackson, 958 F.2d at 618* (quotation marks and citations omitted). "Dismissal is proper if the complaint lacks an allegation regarding a required element necessary to obtain relief." *Blackburn, 42 F.3d at 931* (citation omitted).

HN2[] A district court's grant of summary judgment is also reviewed *de novo*. *Melton v. Teachers Ins. & Annuity Ass'n of Am., 114 F.3d 557, 559 (5th Cir. 1997)*. Summary judgment is proper where the pleadings and summary judgment evidence present no genuine issue of material fact and the moving party is entitled to a judgment as a matter of law. *FED. R. CIV. P. 56(c)*; *Celotex Corp. v. Catrett, 477 U.S. 317, 322, 91 L. Ed. 2d 265,* ***[*625]*** *106 S. Ct. 2548 (1986)*. A factual dispute will preclude an award of summary judgment if the evidence is such that a reasonable jury could **[**6]** return a verdict for the nonmoving party. *Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 252, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*.

DISCUSSION

Apani asserts antitrust violations against CCE under the Clayton Act, the Sherman Act, and the TFEAA. Specifically, in its Second Amended Complaint, Apani asserted that "the Agreement, having a duration of ten (10) years, represents a contractual agreement resulting from an illegal combination or conspiracy by the City of Lubbock and Coca-Cola, and which constitutes a restraint of trade in violation of the Sherman Antitrust Act, the Clayton Antitrust Act, and the Texas Free Enterprise and Antitrust Act of 1983."

1. Clayton Act

HN3[] Section 3 of the Clayton Act makes it unlawful to sell goods on the "condition, agreement, or understanding" that the purchaser refrain from dealing with competitors of the seller if the effect "may be to substantially lessen competition or tend to create a monopoly in any line of commerce." *15 U.S.C. § 14 (1997)*. Two types of restrictions on competition may be challenged under § 3: tying restraints and exclusive-dealing arrangements. *Gulf Oil Corp. v. Copp Paving Co., Inc., 419 U.S. 186, 194, 42 L. Ed. 2d 378, 95 S. Ct. 392 (1974)*. **[**7]** Tying restraints occur when a seller agrees to sell one product on the condition that the buyer also agree to purchases a different, or tied product, or the buyer agrees that he will not purchase the same product from another supplier. *Kaiser Aluminum & Chem. Sales, Inc. v. Avondale Shipyards, Inc., 677 F.2d 1045, 1048 n.5 (5th Cir. 1982)*. Exclusive dealing, in contrast, occurs when a seller agrees to sell its output of a commodity to a particular buyer, or when a buyer agrees to purchase its requirements of a commodity exclusively from a particular seller. WILLIAM C. HOLMES, ***ANTITRUST LAW*** HANDBOOK § 4.02[3] (1999). Here, Apani's claim under § 3 arises from the exclusive arrangement between the City and CCE in which the City agreed to permit CCE to sell its products exclusively on property owned and operated by the City. This court has recognized that an exclusive-dealing arrangement does not violate § 3 of the Clayton Act unless the probable effect of the agreement "will foreclose competition in a substantial share of the line of commerce affected." *Bob Maxfield, Inc. v. Am. Motors Corp., 637 F.2d 1033, 1036 (5th Cir. 1981)* (citing *Tampa Elec. Co. v. Nashville Coal Co., 365 U.S. 320, 327, 5 L. Ed. 2d 580, 81 S. Ct. 623 (1961))*. **[**8]**

HN4[] When assessing whether an exclusive-dealing arrangement has the probable effect of substantially lessening competition, the Supreme Court has identified a three-part inquiry. *Tampa Elec. Co., 365 U.S. at 327-28*. First, the relevant product market must be identified by considering interchangeability and cross-elasticity of demand. Second, the relevant geographic market must be identified, "by careful selection of the market area in which the seller operates and to which the purchaser can practicably turn for supplies." Id. Finally, a plaintiff must show that the "competition foreclosed by the arrangement constitutes a 'substantial share of the relevant market.' " Id. That is, "the opportunities for other traders to enter into or remain in that market must be significantly limited." Id.

In applying this three-step analysis, it is clear that in order to determine whether a **[*626]** substantial portion of the competition has been foreclosed, Apani must first identify the relevant product and geographic markets.

A. Product Market

HN5[] In ascertaining the relevant product market, courts consider the extent to which the seller's product is "interchangeable in use" and **[**9]** the degree of "cross-elasticity of demand between the product itself and substitutes for it." *C.E. Servs., Inc. v. Control Data Corp., 759 F.2d 1241, 1245 (5th Cir. 1985)* (citing *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962))*. Within the product market, there may exist submarkets which, in themselves, represent product markets for antitrust purposes. *Heatransfer Corp. v. Volkswagenwerk, A. G., 553 F.2d 964, 980 (5th Cir. 1977)* (citing *United States v. E. I. duPont de Nemours & Co., 353 U.S. 586, 593-595, 1 L. Ed. 2d 1057, 77 S. Ct. 872 (1957))*. "The boundaries of such a submarket may be determined by examining such practical indicia as industry or public recognition of the submarket as a separate economic entity, the product's peculiar characteristics and uses, unique production facilities, distinct customers, distinct prices, sensitivity to price changes, and specialized vendors." *Heatransfer Corp., 553 F.2d at 980* (quoting *Brown Shoe Co., 370 U.S. at 325*). The district court properly determined, and neither of the parties contest, that **[**10]** the relevant product market is bottled water.

1. Geographic Market

We focus on the area of "effective competition" in determining the relevant geographic market. *Jim Walter Corp. v. F. T. C., 625 F.2d 676, 682 (5th Cir. 1980)*. ***HN6***[] The area of effective competition in the known line of commerce must be charted by careful selection of the market area in which the seller operates and to which buyers can practicably turn for supplies. *Tampa Elec. Co., 365 U.S. at 327*. The geographic market must " 'correspond to the commercial realities' of the industry and 'be economically significant.'" *Brown Shoe Co., 370 U.S. at 336-337*. "Thus, although the geographic market in some instances may encompass the entire Nation, under other circumstances it may be as small as a single metropolitan area." Id. (citation omitted). [4]

[11]** ***HN7***[] When determining whether a geographic market corresponds to commercial realities, courts have taken into account practical considerations such as the size, cumbersomeness, and other characteristics of the relevant product. In addition, determinants that affect the behavior of market participants may also be considered such as regulatory constraints impeding the free flow of competing goods into the area, perishability of products, and transportation barriers. EARL W. KINTNER, FEDERAL ***ANTITRUST LAW***: VOLUME IV THE CLAYTON ACT SECTION 3; SECTION 7; MERGERS AND MARKETS § 38.3 (1984); *United States v. Conn. Nat'l Bank, 418 U.S. 656, 669-671, 41 L. Ed. 2d 1016, 94 S. Ct. 2788 (1974)*; *United States v. Gen. Dynamics Corp., 341 F. Supp. 534 (N. D. Ill. 1972)*.

On the other hand, the economic significance of a geographic area "does not **[*627]** depend upon singular elements such as population, income, political boundaries, or geographic extent, but rather upon the relationship between these elements and the characteristics of competition in the relevant product market within a particular area." EARL W. KINTNER, FEDERAL ***ANTITRUST LAW***: VOLUME IV THE CLAYTON ACT SECTION **[**12]** 3; SECTION 7; MERGERS AND MARKETS § 38.2 (1984). ***HN8***[] Put differently, in order for an area to qualify as being economically significant, it must contain an "appreciable segment of the product market." Id. "Whether a segment is 'appreciable' depends upon whether it includes either an appreciable proportion of the product market as a whole, or a proportion of the product market which is 'largely segregated from, independent of, or not affected by' competition elsewhere." Id. Therefore, it is not required that an area encompass a large percentage of all

[4] Although Brown Shoe Co. involved a violation of § 7 of the Clayton Act, the tests for determining a geographic market under §§ 3 and 7 of the Act are similar. *Brown Shoe Co., 370 U.S. at 329*; *United States v. Philadelphia Nat'l Bank, 374 U.S. 321, 366, 10 L. Ed. 2d 915, 83 S. Ct. 1715 (1963)*. Thus, cases determining a geographic area under § 7 are equally applicable to cases brought under § 3. *Brown Shoe Co., 370 U.S. at 329-330*.

business activity in the relevant product market to be considered economically significant. An area containing only a small percentage of business activity may qualify as being economically significant if the relevant competition in that specific area is insulated from equivalent competition elsewhere.

2. Foreclosure of Competition

HN9[] After the relevant market has been identified, it must then be determined whether the arrangement foreclosed competition in a substantial share of the established market. *Tampa Elec. Co., 365 U.S. at 327-38*.

2. Sherman Act

HN10[] *Section 1* of the Sherman Act provides that "every contract, **[**13]** combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal." *15 U.S.C. § 1 (1997)*. In order to demonstrate a claim of unreasonable restraint of trade under *Section 1*, Apani must establish that: (1) the City and CCE engaged in a conspiracy, (2) the conspiracy had the effect of restraining trade, and (3) trade was restrained in the relevant market. *Spectators' Comm. Network Inc. v. Colonial Country Club, 253 F.3d 215, 220 (5th Cir. 2001)*; *Johnson v. Hosp. Corp. of Am., 95 F.3d 383, 392 (5th Cir. 1996)*. Apani, as the plaintiff, has the burden of proving all the elements of a *Section 1* violation. Id. (citing *Jefferson Parish Hosp. Dist. No. 2, v. Hyde, 466 U.S. 2, 29, 80 L. Ed. 2d 2, 104 S. Ct. 1551 (1984))*.

HN11[] As an initial matter, Apani does not contend on appeal that CCE's actions were *per se* illegal. Thus, the rule of reason analysis is applicable to Apani's claim. *Doctor's Hosp. of Jefferson, Inc. v. Southeast Med. Alliance, Inc., 123 F.3d 301, 307 (5th Cir. 1997)*. Under **[**14]** this rule, Apani must demonstrate that the "complained-of actions unreasonably restrained trade." Id. The court must then balance the "anticompetitive evils of a restrictive practice . . . against any procompetitive benefits or justifications within the confines of the relevant market. Proof that the defendant's activities, on balance, adversely affected competition in the appropriate *product and geographic markets* is essential to recovery under the rule of reason." Id. (citing *Hornsby Oil Co. v. Champion Spark Plug Co., 714 F.2d 1384, 1392 (5th Cir.1983))* (emphasis added). Thus, as under the Clayton Act, the first step in analyzing a *Section 1* claim is defining the relevant product and geographic markets. The same test applied for determining the relevant product and geographic markets for Clayton Act claims is also used for alleged violations of the Sherman Act. *Bob Maxfield, Inc., 637 F.2d at 1036*.

[*628] 3. Texas Free Enterprise and Antitrust Act

HN12[] The TFEAA was enacted to establish antitrust laws for the State of Texas. *TEX. BUS. & COMM. CODE § 15.01 et seq.* (Vernon 1987). Each provision of the Act is modeled after a corresponding provision **[**15]** of federal ***antitrust law***. *Roy B. Taylor Sales, Inc. v. Hollymatic Corp., 28 F.3d 1379, 1388 (5th Cir. 1994)*; *Caller-Times Pub. Co., Inc. v. Triad Communications, Inc., 826 S.W.2d 576, 580 (Tex. 1992)*. As such, Texas courts are statutorily instructed to interpret the TFEAA in harmony with federal judicial interpretations of equivalent federal laws. *TEX. BUS. & COMM. CODE § 15.04*; *Caller-Times Pub. Co., Inc., 826 S.W.2d at 580*. Accordingly, Texas courts have adopted federal standards for determining violations of the TFEAA, including the use of a relevant market to determine whether substantial reductions in competition have occurred. *Roy B. Taylor Sales, Inc., 28 F.3d at 1388*; *Caller-Times Pub. Co., Inc., 826 S.W.2d at 580*.

4. Dismissal of Antitrust Claims

The district court dismissed all of Apani's antitrust claims, finding Apani's geographic market definition legally insufficient as a matter of law. ***HN13***[] Whether a relevant market has been identified is usually a question of fact; however, in some circumstances, the issue may be determined as a matter of law. *Seidenstein v. Nat'l Med. Enters., Inc., 769 F.2d 1100, 1106 (5th Cir. 1985)*. **[**16]** Where the plaintiff fails to define its proposed relevant market with reference to the rule of reasonable interchangeability and cross-elasticity of demand, or alleges a proposed relevant market that clearly does not encompass all interchangeable substitute products even when all factual inferences are granted in plaintiff's favor, the relevant market is legally insufficient, and a motion to dismiss may be granted. See, e.g., *Queen City Pizza, Inc. v. Domino's Pizza, Inc., 124 F.3d 430, 436 (3d Cir. 1997)* (affirming the district court's dismissal of an antitrust claim for failure to plead a relevant market because the definition of the proposed market was too narrow); *TV Comms. Network, Inc. v. Turner Network Television, Inc., 964 F.2d 1022, 1025 (10th Cir. 1992)* (upholding the district court's dismissal of a claim for failure to plead a relevant market where the alleged market consisted of only one specific television channel). Because a relevant geographic market must be identified for Apani's claims under the Clayton Act, the Sherman Act, and the TFEAA, this court's analysis of the relevant market shall be equally applicable to all of Apani's **[**17]** antitrust claims.

As stated previously, the alleged geographic market must correspond to the commercial realities of the industry and be economically significant. *Brown Shoe Co., 370 U.S. at 336-337*. After giving careful consideration to each of the factors identified for determining whether a geographic area corresponds to the commercial realities of the industry, the district court concluded that the relevant geographic market could not consist of only the twenty-seven facilities owned by the City as Apani suggests. The court pointed out that Apani had done business in and throughout Lubbock, Texas with customers other than the City, such as Texas Tech University. Thus, it concluded that there were no limitations on Apani's geographic sales market by the size, cumbersomeness, or perishability of its bottled water that would warrant restricting the geographic market to the City facilities covered by the exclusive agreement. The court further noted that there were no regulatory requirements, or inherent shipping limitations affecting Apani's product distribution that would support confining **[*629]** the geographic market of competition to the twenty-seven City-owned facilities. **[**18]** Thus, the court found that Apani's relevant geographic market definition did not comport with the commercial realities of the industry. It stated that, at the very least, the commercial realities of the industry suggest that the relevant geographic market must include the entire city of Lubbock.

The district court next considered whether the restraint on the alleged geographic market was economically significant. ***HN14***[] When assessing economic significance, a court must determine whether the geographic area contains an appreciable segment of the product market. EARL W. KINTNER, FEDERAL ***ANTITRUST LAW***: VOLUME IV THE CLAYTON ACT SECTION 3; SECTION 7; MERGERS AND MARKETS § 38.2 (1984). As discussed supra, "whether a segment is appreciable depends on whether the segment includes either an appreciable proportion of the product market as a whole, or a proportion of the product market largely segregated from, independent of, or not affected by, competition elsewhere." Id. The district court found that "no unique limitation on competition would suggest that competition for the City of Lubbock bottled water business is separate from competition for bottled water business elsewhere in the Lubbock, **[**19]** Texas bottled water market." Because Apani failed to allege that an appreciable proportion of the sale of bottled water in the Lubbock area was affected by the agreement, the court determined that Apani's geographic market definition also failed to meet the economic significance test. Thus, the court concluded that "there is no set of facts under which Apani can recover; either the relevant geographic market is too small to meet the requirements set forth by the Supreme Court, or the injury to competition is not sufficiently significant to be a violation of the Act."

In the alternative, the court determined that Apani's geographic market definition was inadequate because the City is a "single purchaser," and "one purchaser in a market of competing purchasers cannot constitute a relevant geographic market, absent exceptional market conditions." See *Jayco Sys., Inc. v. Savin Bus. Mach. Corp., 777 F.2d 306, 319 n.43 (5th Cir. 1985)*. In Jayco, the plaintiff, a distributor for a major copier manufacturer, alleged that the defendant attempted to monopolize the copier business of one customer, the State of Texas. The plaintiff defined the relevant market as "low and **[**20]** medium volume copiers" for the State of Texas copier business. *Id. at 319*. We explained that "as a matter of common sense a single purchaser of a product cannot generally be considered a relevant market, lest we wish to clothe each and every sale with an antitrust suit." *Id. at 320*. However, this court noted that "we hazard the suggestion that a single purchaser could not be considered a relevant market unless plaintiff made some showing of the purchaser's monopsony power." [5] Id. at n. 46. The district court reasoned that Apani's asserted geographic market alleges a "single purchaser" within the meaning of Jayco and therefore, as a matter of law, it failed to properly define a relevant geographic market upon which relief may be granted.

---

[5] ***HN15***[] Monopsony refers to price fixing or monopolization by a single buyer. *In re Beef Industry Antitrust Litigation, 600 F.2d 1148 (5th Cir.1979)*.

In addition, the district court found that Apani's argument was deficient **[**21]** because it, in effect, suggested that a seller or owner of property to which potential buyers come, may not decide what products it will sell or permit to be sold on the property. **[*630]** In support of this proposition, the court relied on the Seventh Circuit's opinion in *Elliott v. United Ctr., 126 F.3d 1003 (7th Cir. 1997)*. In Elliott, a licensed peanut vendor, who formerly sold peanuts outside the United Center, an entertainment complex, sued the United Center on the grounds that its policy of prohibiting patrons from bringing food into the complex violated the Sherman Act. The vendor alleged that the "market for food concessions within and around the United Center itself" constituted a relevant market for antitrust purposes. *Id. at 1005*. The district court dismissed the claim finding that the vendor failed to adequately identify a relevant geographic market. In affirming the district court's ruling, the Seventh Circuit stated that

> The logic of Elliott's argument would mean that exclusive restaurants could no longer require customers to purchase their wines only at the establishment, because the restaurant would be "monopolizing" the sale of **[**22]** wine within its interior. Movie theaters, which traditionally (and notoriously) earn a substantial portion of their revenue from the sales of candies, popcorn, and soda, would be required by the antitrust laws to allow patrons to bring their own food.

Id.

In the instant case, the district court stated that Apani's argument, like the one presented in Elliott, would deny property owners the right to determine for themselves what products they will sell on their property. It reasoned that the antitrust laws are not designed to preclude businesses from selling what they choose on their property, rather the laws are intended to prevent persons from manipulating the marketplace in restraint of trade. The court concluded that Apani's claims fell outside the realm of injuries for which the antitrust laws were enacted to protect, and therefore Apani failed to state a claim upon which relief could be granted.

Apani asserts several points of error in connection with the district court's conclusion that it failed to sufficiently allege a relevant geographic market. First, Apani challenges the district court's determination that the "territory(s)" and "locations" owned by the **[**23]** City within the meaning of the exclusive dealing agreement are too narrow from a geographic standpoint to constitute a relevant market. It argues that the district court erroneously designated the relevant property as that "owned" by the City, which consists of twenty-seven locations, rather than that "owned *or* operated" by the City, as alleged in Apani's complaint, or "owned *and* operated" by the City, as provided in the exclusive agreement. Apani explains that, had the district court considered all the property owned and/or operated by the City, the effect would have been an expansion of the alleged geographic area.

Next, Apani concedes that identifying a relevant market requires more than a determination of "metes and bounds,"[6] however, it argues that there is no existing case law that places such a restrictive view in a *Rule 12(b)(6)* context. It suggests that in construing the pleading requirement for a relevant geographic market, we look to the Seventh Circuit's decision in *MCM Partners, Inc. v. Andrews-Bartlett & Associates, Inc., 62 F.3d 967 (7th Cir. 1995)*. In MCM Partners, Inc., MCM, a rental equipment company, brought an antitrust suit against **[**24]** exhibition contractors alleging that the contractors violated *Section 1* of the Sherman Act and the Racketeer Influenced and Corrupt Organizations Act, when they refused to rent forklifts and other material handling and personnel **[*631]** moving equipment from MCM. The district court dismissed MCM's antitrust claim with prejudice, finding that it failed to state a claim for which relief could be granted under *Section 1* because it had not sufficiently alleged a contract, combination, or conspiracy in restraint of trade. In the alternative, the court determined that MCM failed to plead facts supporting its definition of the relevant geographic market.

In its complaint, MCM defined the relevant market as "the rental of forklifts, material handling and personal moving equipment to the convention and trade show industry in Chicago, Illinois." *62 F.3d at 975*. It alleged that the "vast majority" of Chicago's convention and trade show activities take place at Chicago's McCormick **[**25]** Place Complex and that the consumers in that market consisted of "exhibition contractors who set up, install, and

---

[6] *Tampa Elec. Co., 365 U.S. at 331-32*.

disassemble the booths and other physical items" used in the industry. Id. The district court stated that these allegations defined the relevant market too narrowly because MCM failed to include in its complaint facts demonstrating that the market for MCM's equipment was limited to exhibition contractors. In overturning the district court's ruling the Seventh Circuit held that

> The district court's willingness to look behind MCM's allegations because it believed MCM had not alleged facts to support the complaint's market definition is in considerable tension with our recent decision in *Hammes v. AAMCO Transmissions, Inc., 33 F.3d 774, 778, 782 (7th Cir.1994)*. There, we explained that judicial attempts to apply *a heightened pleading standard* in antitrust cases had been "scotched" by the Supreme Court's decision in *Leatherman v. Tarrant County Narcotics Intelligence and Coordination Unit, 507 U.S. 163, 122 L. Ed. 2d 517, 113 S. Ct. 1160 (1993)*, and that after Leatherman, an antitrust plaintiff need not include "the particulars **[**26]** of his claim" to survive a motion to dismiss. *33 F.3d at 782*. It is instead sufficient for the plaintiff to include in its complaint only "a short and plain statement of the claim" showing an entitlement to relief. *FED .R. CIV. P. 8(a)(2)*; see *Leatherman, 507 U.S. at 168, 113 S. Ct. at 1163*; *Hammes, 33 F.3d at 778*. . . . It is not inconceivable to us that MCM could prove a set of facts supporting the relevant market definition alleged in its complaint. See *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 101-02, 2 L. Ed. 2d 80 (1957)*. It was therefore erroneous for the district court . . . to dismiss MCM's *section 1* claim on this ground.

62 F.3d at 976-77 (emphasis added).

Apani asserts that an application of the standard set out in MCM Partners, Inc., to the present case would compel a reversal of the district court's ruling. It directs our attention to the fact that the Seventh Circuit specifically determined that it is not inconceivable that MCM could prove a set of facts supporting the relevant market definition alleged in its complaint. Apani argues that its complaint indicated a more defined geographic **[**27]** area than that in MCM Partners, Inc. and involved absolute preclusion of competition as opposed to mere restraint. Thus, Apani submits that its allegations of a relevant market fully comply with *Federal Rule of Civil Procedure 8(a)(2)*'s "short and plain statement" requirement. However, Apani claims that in dismissing its complaint, the district court erroneously applied a heightened pleading standard to its antitrust claims, rather than that set forth in *Rule 8(a)(2)*. It argues that such an application is inconsistent with the Supreme Court's admonishment in Leatherman.

[*632] Lastly, Apani argues that the district court erroneously applied this court's reasoning in Jayco to the instant case. Specifically, Apani maintains that with regard to the relevant geographic market, the pertinent inquiry is not whether there is a "single purchaser," rather the court should consider the geographic area, and degree of market activity controlled by the City, which has been foreclosed by the agreement. It claims that by foreclosing competition in all public facilities owned, or controlled by the City, the agreement had the effect of totally eliminating competition in those venues in which **[**28]** there are mass gatherings of people, including conventions, trade shows, entertainment events, sports events, and other activities. Apani concludes that any reference to the City as a "single purchaser" mischaracterizes the offensive nature of the subject agreement, as the City may or may not be a purchaser of the product, but the City granted the "exclusive dealing arrangement," which dictates the beverage product offered to the captive persons in attendance at the defined properties, and forecloses any other competition at the public venues.

With respect to the district court's reliance on Ellliot, Apani argues that Ellliot can be distinguished from the present case. First, it points out that Ellliot presented claims of only antitrust violations under the Sherman Act. Second, Apani asserts that the alleged antitrust violation in Elliott was not based on an anti-competitive agreement entered into between the owner of the facility and a beverage or food supplier, but rather involved a complaint that the arena policy prohibited sale of peanuts outside of the arena to its patrons, which could not then be brought into the arena. It claims that such a factual situation **[**29]** is distinguishable from the instant case in that the agreement between CCE and the City represents a definite written agreement to foreclose competition through an "exclusive dealing arrangement," relating to all beverages sold or distributed by CCE within a defined geographic market.

In addition, Apani argues that the district court has failed to take into consideration that a patron attending an event at a City-owned facility will not likely cross the street to purchase a beverage at a convenience store where competing products may be displayed. It states that the patron is compelled by physical and/or time limitations to purchase the products of the entity that has obtained the exclusive right to sell the product within the specific building or area. Apani further argues that, as a practical matter, the elements of interchangeability and cross-elasticity of demand are of little significance because any analysis that determines the "relevant geographic market" only on the basis of square footage or acreage, ignores the intended prohibitions of the antitrust statutes. After reviewing the record on appeal, and considering Apani's arguments in light of the applicable law and standards, **[**30]** we conclude the district court correctly decided to dismiss the antitrust claims. With regard to Apani's criticism of the district court for purportedly misstating the scope of the alleged geographic market, we find that no error was committed. In its Second Amended Complaint, Apani alleged as the relevant market "all City of Lubbock owned or operated facilities, numbering approximately *twenty-seven (27) separate properties*." Apani now argues that the district court erroneously referred to the twenty-seven locations owned by the City as the claimed relevant market. Specifically, it maintains that the district court only considered property "owned" by the City, rather than "owned or operated" by the City. This argument is without merit. Whether the property at issue is referred **[*633]** to as the property "owned" by the City, or the property "owned or operated" by the City, according to the facts stated in Apani's complaint, the subject property consists only of twenty-seven locations. Thus, the "owned or operated" issue raised by Apani is no more than an exercise in semantics and does not alter the correctness of the district court's decision to dismiss the antitrust claims.

We reject **[**31]** Apani's claim that the language of the exclusive agreement itself expands the relevant market beyond the geographic area identified by the district court. The operative language of the agreement defines the relevant property as that "owned *and* operated by CITY OF LUBBOCK, except City Hall and Lubbock International Airport." Apani claims that the number of properties covered by the agreement would have been "expanded" had the district court considered properties both "owned and operated" by the City. This argument makes little logical sense. Given the use of the conjunction "and," there can be no subset of properties that might fit within the "owned and operated" category but not within the "owned" category since every facility "owned and operated" by the City must also be "owned" by the City.

Having concluded that the district court properly identified the twenty-seven City-owned facilities as the alleged relevant geographic market, we must now consider whether the defined market is insufficient as a matter of law. As an initial matter, Apani is correct in its assertion that ***HN16***[] a heightened pleading standard may not be applied to antitrust claims, however, a less stringent standard **[**32]** of pleading does not relieve Apani from its obligation to allege facts sufficient to support an antitrust violation. See *Endsley v. City of Chicago, 230 F.3d 276, 382 (7th Cir. 2000)* ("It is true that *Leatherman v. Tarrant County, 507 U.S. 163, 113 S. Ct. 1160, 122 L. Ed. 2d 517 (1993)*, bars the district court from applying a heightened pleading standard in antitrust cases. . . . However, to survive a motion to dismiss, plaintiffs still must set forth facts sufficient to create an inference that defendant had enough market power to create a monopoly." (citation omitted)).

In insisting that the relevant geographic market requirement has been met, Apani relies heavily on MCM Partners, Inc. That reliance is sorely misplaced. In MCM Partners, Inc., the alleged geographical market, i.e. the convention and trade show industry, is obviously broader than the geographic market alleged by Apani, even though most of the convention and trade show activity took place at Chicago's McCormick Place. Here, Apani has simply attempted to artificially narrow a broader economic market, the City of Lubbock, to specific venues. Such pleading maneuvers may not be **[**33]** used for the purpose of creating a fictitious market. Thus, we find Apani's geographic market definition insufficient as a matter of law.

Because we find that the district court's initial reason for dismissing Apani's claim, i.e. the alleged geographic market did not correspond to the commercial realities of the industry and was not economically significant, was proper, we do not reach the issue of whether the City is a "single purchaser" under the Jayco analysis.

5. Tortious Interference

Next, Apani argues that the district court erred in granting CCE summary judgment on its claims of tortious interference with both existing and prospective business relations.

1. Tortious Interference with Existing Business Relations

HN17[] The essential elements of a tortious interference with an existing business **[*634]** relationship cause of action are (1) unlawful actions undertaken without justification or excuse; (2) with intent to harm; and (3) actual damages. *Morris v. Jordan Fin. Corp., 564 S.W.2d 180, 184 (Tex. App. 1978)*. In proving this claim, the plaintiff does not need to prove the existence of a valid contract, but only that the defendant's interference is motivated by **[**34]** malice. *CF & I Steel Corp. v. Pete Sublett & Co., 623 S.W.2d 709, 715 (Tex. App. 1981)*. The district court dismissed Apani's claim because it concluded that Apani had failed to demonstrate the first element of the claim-an unlawful act. Apani argues that it produced credible evidence that the existing business relationship between Apani and the City would have continued had CCE not entered into a contract with the City, effectively eliminating the City's business relationship with Apani. Thus, it concludes that CCE was not entitled to summary judgment on this issue. In its brief, Apani does not point to any unlawful act supporting its claim. However, in its Second Amended Complaint, Apani alleges that CCE's conduct in entering into an exclusive contract with the City was "wanton, improper, unlawful, and unfair, in that the structure of the Agreement constituted an illegal restraint of trade and intentional interference with [its] business relations, both existing and prospective. . . . Such conduct constitutes a violation of the antitrust laws . . . and/or such conduct was illegal in causing the City of Lubbock to refuse to deal with Apani." ***HN18***[] Having already concluded **[**35]** that CCE has not violated any antitrust laws, and that entering into an exclusive agreement, in and of itself, does constitute an unreasonable restraint on trade, we affirm the district court's ruling on this issue.

B. Tortious Interference with a Prospective Business Relationship

The Texas Supreme Court has not yet set out all the elements of a tortious interference with a prospective business contract or relations claim, and the appellate courts have not been uniform in their characterization of such actions. Tortious interference with business relationships, in the context of prospective relationships, has been identified with two sets of elements. Some courts have found that such a claim requires: (1) a reasonable probability that the parties would have entered into a *business relationship*, (2) an intentional and malicious act by the defendant that prevented the relationship from occurring, with the purpose of harming the plaintiff, (3) the defendant lacked privilege or justification to do the act, and (4) actual harm or damage resulted from the defendant's interference. *Robles v. Consolidated Graphics, Inc., 965 S.W.2d 552, 561 (Tex. App. 1997)*. Other courts **[**36]** differ with regard to the first element by demanding that the plaintiff establish a reasonable probability that the parties would have entered into a *contractual relationship*. *Santa Fe Energy Operating Partners, L.P. v. Carrillo, 948 S.W.2d 780, 784 (Tex. App. 1997)*. The district court adopted the standard set out in Santa Fe Energy Operating Partners, L.P. and concluded that Apani failed to establish that there was a reasonable probability it would have entered into a *contractual relationship* with the City, but for the exclusive agreement. Apani argues that the district court improperly determined that it could not establish its claim, absent proof of a prospective contract.

HN19[] Although the Texas Supreme Court has not specifically set forth all of the elements necessary for a tortious interference with prospective business relations cause of action, it has recently recognized that "to establish liability for interference with a prospective contractual or business relation the plaintiff must prove that it **[*635]** was harmed by the defendant's conduct that was either independently tortious or unlawful." See *Wal-Mart Stores, Inc. v. Sturges, 52 S.W.3d 711, 713, 44 Tex. Sup. Ct. J. 486 (Tex. 2001)*. **[**37]** The court clarified that "by 'independently tortious' we mean conduct that would violate some other recognized tort duty." Id. Based on Sturges, the district court alternatively concluded that CCE was entitled to judgment as a matter of law since Apani had not shown any unlawful conduct on the part of CCE. Apani concedes that Sturges requires it to show that CCE's conduct was independently tortious or unlawful. However, Apani claims that it has met this burden because it alleged violations of state and federal antitrust statutes, the Texas Constitution, and municipal statutory bidding laws. As stated previously, we have found no violations of ***antitrust law***. Further, for the reason discussed below, Apani has also failed to establish claims under either the Texas Constitution, or municipal bidding statutes. Thus, we agree with the district court that Apani's claim must fail for the same reason its existing business relations claim fails-the absence of an unlawful act. Because a determination of whether a prospective contract is required to establish a claim for tortious interference of prospective business relations will not affect the outcome of this case, we find it unnecessary **[**38]** to decide the issue today, and decline to do so.

6. Civil Conspiracy

HN20[] To prove a cause of action for civil conspiracy under Texas law, a plaintiff must establish the following elements: "(1) two or more persons; (2) an object to be accomplished; (3) a meeting of minds on the object or course of action; (4) one or more unlawful, overt acts; and (5) damages as the proximate result." *Massey v. Armco Steel Co., 652 S.W.2d 932, 934 (Tex. 1983)*. Solely at issue here is whether Apani raised a fact issue with regard to an unlawful overt act to support its conspiracy cause of action. Apani alleges three independent unlawful acts, each of which Apani contends would individually support the civil conspiracy claim. First, it alleges that the creation of the agreement between CCE and the City violates *Article I, Section 26 of the Texas Constitution*. Second, Apani avers that the exclusive agreement was created in violation of Texas statutory bidding requirements under Section 252.021 of the Texas Government Code. Lastly, Apani contends that its separate claims for tortious interference with business relations may also support a civil conspiracy claim. Having concluded that **[**39]** Apani has not met the essential elements of a tortious interference claim, we will address only the alleged violations of the Texas Constitution and the statutory bidding laws.

1. Texas Constitution

HN21[] *Article I, Section 26 of the Texas Constitution* provides that "perpetuities and monopolies are contrary to the genius of a free government, and shall never be allowed, nor shall the law of primogeniture or entailments ever be in force in this State." *TEX. CONST. art. I § 26*. Texas courts, however, have recognized several exceptions to this general rule of law. These exceptions are: (1) contracts between an agent and its principal wherein the agent is prohibited from dealing for himself or representing others besides his principal, (2) contracts involving the sale of a business in which the seller agrees not to engage in a competing business for a limited time, (3) lease agreements that require the lessee to sell only certain products on the leased premises, and (4) "cases in which an exclusive right or privilege is granted only upon the property or premises of the grantor." Airport Coach Serv., **[*636]** *Inc. v. City of Fort Worth, 518 S.W.2d 566, 572 (Tex. App. 1974)*.

Apani **[**40]** asserts that the exclusive agreement violates Section 26's prohibition against states and their political subdivisions granting monopolies. CCE argues that the TFEAA provides the exclusive cause of action for claims concerning monopolies and that Apani's claim under the TFEAA had been previously found by the district court to be without merit. Alternatively, it contends that if this court concludes that Apani can assert a claim under the Texas Constitution independent of the TFEAA, Apani is still unable to prove a violation because CCE has met one or more of the exceptions under the constitutional provision. Lastly, CCE contends that its agreement with the City does not fall within the meaning of "monopoly" established by the Texas Supreme Court. [7]

[41]** After analyzing the cases relied on by Apani in support of its proposition that the exclusive right granted by the agreement violated Section 26, the district court concluded that the factual pattern here is totally distinguishable from the cases cited by Apani. See *Jones v. Carter, 45 Tex. Civ. App. 450, 101 S.W. 514 (Tex. App. 1907)*; see also *Ennis Waterworks v. City of Ennis, 136 S.W. 513 (Tex. 1911)* (holding that under *Article I, Section 26 of the Texas Constitution*, a municipal corporation is without the power to grant an exclusive franchise to a water company); *Lea County Elec. Co-op., Inc. v. City of Plains, 373 S.W.2d 90, 93 (Tex. App. 1963)* (finding that a city does not have a right to grant an exclusive franchise to itself or anyone else for the furnishing of electric energy to its inhabitants). Specifically, the court noted that these cases

> involved a city making an agreement with a third party, providing exclusive right to that party to provide either water, electric, or all utilities to that city and all of its inhabitants. The citizens of those cities were forced to purchase electrical, water or other utilities **[**42]** for their private consumption in their homes from a party the city chose to grant an exclusive franchise. In the instant action, however, the agreement is limited to the purchase of non-alcoholic beverages at 27 City facilities. Coke was not granted an exclusive right to sell its products throughout the City to the exclusion of other companies, including Apani.

---

[7] CCE also claims that in order to show a violation of *Article I, Section 26 of the Texas Constitution*, Apani must establish the elements necessary to sustain a cause of action under federal antitrust laws, namely, a relevant market. The district did not address this issue. Because we find that Apani has failed to demonstrate a viable cause of action under Section 26, we need not address this alternative basis for affirmance.

We agree that this case does not involve the degree of exclusivity required to constitute a "monopoly" under the Texas Constitution. We therefore uphold the district court's conclusion on this issue.

In addition to finding that Apani has failed to show a monopoly, the district court also determined that the agreement fell within one of the exceptions to Section 26. The court reasoned that since the subject property was owned by the City, the fourth exception under Airport Coach Services, Inc., i.e. cases in which an exclusive right or privilege is granted upon the property of the grantor, applies to this case. We agree. In Airport Coach Services, Inc., a Texas appellate court was presented with the issue of whether Dallas and Fort Worth, Texas, violated Section 26 by granting exclusive rights to a single business **[**43]** to provide ground transportation services at Dallas/Fort Worth Regional **[*637]** Airport. Finding that the airport was owned exclusively by the two cities, the court concluded that the agreement fell within the fourth exception, and therefore the grant of the exclusive contract for ground transportation services was not a prohibited monopoly. Apani argues that the court's reliance on Airport Coach Services, Inc. was misplaced because the court failed to take into consideration that the agreement gives CCE exclusive rights on property not only owned by the City, but also operated by the City. As stated previously, Apani has not shown that the facilities operated by the City are not also owned by the City. Thus, this argument is without merit. Finding no meaningful distinction between the situation presented here, and that addressed in Airport Coach Services, Inc., we conclude that the exclusive agreement met the fourth exception to Section 26. Because Apani is unable to show a violation of the Texas Constitution independent of the TFEAA, a determination of whether the TFEAA provides the exclusive remedy in Texas for monopoly claims is unnecessary.

2. Statutory Bidding Laws

Lastly, **[**44]** Apani alleges that CCE and the City negotiated a contract for the sale of beverages without complying with statutory bidding requirements set forth in Section 252.001 et. seq. of the Texas Local Government Code. ***HN22***[] Section 252.021(a) provides in relevant part that "Before a municipality may enter into a contract that requires an expenditure of more than $ 25,000 from one or more municipal funds, the municipality must . . . comply with the procedure prescribed by this chapter for competitive sealed bidding or competitive sealed proposals." *TEX LOC. GOV'T. CODE § 252.021(a)(1)* (Vernon 1999). Primarily, Apani contends that the statutory bidding laws were violated because no bidding was permitted on the exclusive beverage contract. In the district court, CCE presented several arguments as to why the court should not allow this claim to form the basis of Apani's conspiracy cause of action. The district court rejected all of CCE's contentions except for one. The court agreed with CCE that Apani failed to submit any evidence that CCE intentionally conspired with the City to violate the bidding laws. ***HN23***[] In Texas, a "civil conspiracy requires specific intent." *Triplex Comms., Inc. v. Riley, 900 S.W.2d 716, 719, 38 Tex. Sup. Ct. J. 765 (Tex. 1995)*. **[**45]** Proof that a defendant "intended to engage in the conduct" is insufficient. Id. Instead, "for a civil conspiracy to arise, the parties must be aware of the harm or wrongful conduct at the inception of the combination or agreement." Id. CCE argues that it not only was unaware of any violation, but it specifically negotiated a provision in the agreement requiring the City to represent that it had full authority to enter into the agreement. A review of the record reveals that Apani has not presented any evidence countering CCE's assertion of lack of intent. Therefore, the district court properly granted CCE judgment as a matter of law on this issue. [8]

[46]** **[*638]** CONCLUSION

For the foregoing reasons, we AFFIRM the district court's rulings dismissing all of Apani's claims.

---

[8] With respect to Apani's assertion that the alleged violation of the bidding laws is an unlawful act, which may support its tortious interference claim, we find this argument meritless. As the district court correctly stated, in denying Apani's motion to alter or amend summary judgment, Apani had failed to address or provide any authority supporting its conclusion that an independent cause of action under the Texas bidding statutes may be asserted against a third party who enters into a contract with a governmental entity. ***HN24***[] Since Apani did not present any evidence at the district court level on this issue, nor argue this question in its brief, we conclude that the issue is not properly before us. *St. Paul Mercury Ins. Co. v. Williamson, 224 F.3d 425, 445 (5th Cir. 2000)* ("We deem abandoned those issues not presented and argued in an appellant's initial brief, nor do we consider matters not presented to the trial court.").

AFFIRMED.

HN1[] **Introducing Competition, Duties of Incumbent Carriers & Resellers**

Under the Telecommunications Act of 1996 (1996 Act), *47 U.S.C.S. § 151 et. seq.*, states are no longer permitted to enforce laws prohibiting entry into the local telephone market. In order to generate competition in the local telephone service market, the Act imposes affirmative duties upon existing incumbent local exchange carriers (ILECs). These duties include providing access to the poles, ducts, conduits, and rights-of-way of such carrier to competing providers. *47 U.S.C. S.§ 251(b)(4)*). Additionally, the 1996 Act requires that ILECs provide interconnection with their networks to the competing local exchange carriers that is at least equal in its quality to that provide by the local exchange carrier to itself. *47 U.S.C.S.§ 251(c)(2)(C)*).

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > General Overview

HN2[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)* may be granted only if, accepting all well pleaded allegations in the complaint as true, and viewing them in the light most favorable to plaintiff, plaintiff is not entitled to relief. A court may not dismiss a complaint unless the plaintiff can prove no set of facts that would entitle him or her to relief. The issue is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN3[] **Complaints, Requirements for Complaint**

In setting forth a valid claim, a party is required only to plead a short plain statement of the claim showing that the pleader is entitled to relief. *Fed. R. Civ. P. 8(a)*.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN4[] **Motions to Dismiss, Failure to State Claim**

Under *Fed. R. Civ. P. 12(b)(6)*, a court must accept the allegations in the complaint as true, and draw all reasonable factual inferences in favor of the plaintiff. The motion can be granted only if no relief could be granted under any set of facts that could be proved. A complaint may be dismissed for failure to state a claim where it appears beyond any doubt that no relief could be granted under any set of facts which could be proved consistent with the allegations.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN5[] **Motions to Dismiss, Failure to State Claim**

A complaint should not be dismissed unless it appears beyond doubt that the facts alleged in the complaint, even if true, fail to support the claim. Legal conclusions made in the guise of factual allegations, however, are given no presumption of truthfulness.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN6[] **Motions to Dismiss, Failure to State Claim**

A district court reviewing the sufficiency of a complaint has a limited role. The issue is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support his or her claims. Generally, when conducting such an inquiry, material beyond the pleadings should not be considered.

Communications Law > ... > Regulated Practices > Introducing Competition > Interconnection Agreements

HN10[] **Antitrust & Trade Law, Regulated Industries**

The United States Court of Appeals for the Second Circuit finds that there is no inherent conflict with the regulatory scheme of the Telecommunications Act of 1996, *47 U.S.C.S. § 151 et. seq.*, if a plaintiff only seeks monetary damages. The appeals court does not find a conflict with making incumbent local exchange carriers subject to the antitrust laws as well as their interconnection agreements. The appeals court observes courts may not be suited to order particular actions by telecommunications carriers to make the local markets more competitive, particularly when there is a specific regulatory scheme meant to serve the same purpose.

Communications Law > Federal Acts > Telecommunications Act > General Overview

HN11[] **Federal Acts, Telecommunications Act**

The United States Courts of Appeals for the Seventh, Second, and Eleventh Circuits are in agreement on one principle; that violations of the Telecommunications Act of 1996, *47 U.S.C.S. § 151 et. seq.*, standing alone, do not create liability under the general antitrust laws.

Communications Law > Federal Acts > Telecommunications Act > General Overview

Communications Law > ... > Telephone Services > Local Exchange Carriers > General Overview

Communications Law > ... > Regulated Practices > Introducing Competition > Interconnection Agreements

HN12[] **Federal Acts, Telecommunications Act**

The United States District Court for the District of New Jersey agrees with the conclusion reached by the United States Court of Appeals for the Second, Seventh, and Eleventh Circuits; that allegations of a breach of an interconnection agreement, standing alone, do not state an antitrust claim. Parties to an interconnection agreement with claims that the making incumbent local exchange carrier has failed to honor that contract may not resort to antitrust litigation to resolve those claims.

Antitrust & Trade Law > Sherman Act > General Overview

Communications Law > ... > Telephone Services > Local Exchange Carriers > General Overview

HN13[] **Antitrust & Trade Law, Sherman Act**

The obligations arising under the express terms of interconnection agreements alone cannot form the basis of an antitrust action.

Antitrust & Trade Law > Sherman Act > General Overview

Communications Law > Federal Acts > Telecommunications Act > General Overview

Communications Law > ... > Orders & Hearings > Complaints & Charges > Rates

HN14[] **Antitrust & Trade Law, Sherman Act**

Allegations that an incumbent local exchange carrier lowered its own retail rates in an effort to make service with a competitor appear unattractive to consumers states a claim under the general antitrust laws even absent the existence of the Telecommunications Act of 1996, *47 U.S.C.S. § 151 et. seq.*

Antitrust & Trade Law > Sherman Act > General Overview

Communications Law > Federal Acts > Telecommunications Act > General Overview

HN15[] **Antitrust & Trade Law, Sherman Act**

Implied immunity is not created simply because a plaintiff's claims might also arise under the Telecommunications Act as well as the antitrust laws.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > General Overview

HN16[] **Sherman Act, Claims**

In order to establish a claim under *§ 2* of the Sherman Act, codified at *15 U.S.C.S. § 2*, a plaintiff must demonstrate: (1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN17[] **Monopolies & Monopolization, Attempts to Monopolize**

Even a monopolist does not have a general duty to cooperate with a competitor. However, a company's right to select its business associates is not unqualified. The alleged monopolist may not refuse to deal with a competitor if it has the specific intent to either maintain or create a monopoly. Evidence of this specific intent is abundant when a business refuses to engage in a deal that would profit both the business and the competitor.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

Antitrust & Trade Law > Robinson-Patman Act > General Overview

HN18[] **Robinson-Patman Act, Claims**

Section 2(a) of the Clayton Act, commonly referred to as the Robinson-Patman Price Discrimination Act, codified at *15 U.S.C.S. § 13 (a)*, can be established by a showing of different prices charged to different customers. Price discrimination in and of itself is not illegal. Rather a plaintiff must show a reasonable probability of competitive injury. Monopoly power, simply put, is the power to control prices and exclude competition.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

HN19[] **Motions to Dismiss, Failure to State Claim**

Where documents are relied upon and referred to in a complaint, the United States District Court for the District of New Jersey may refer to the contents of these contracts in ruling on a motion to dismiss.

Antitrust & Trade Law > Sherman Act > General Overview

HN20[] **Antitrust & Trade Law, Sherman Act**

The New Jersey antitrust statutes are to be construed consistently with federal antitrust regulations. The Pennsylvania and Maryland antitrust laws are also construed in line with the federal antitrust provisions.

Communications Law > ... > Regulated Practices > Introducing Competition > Duties of Incumbent Carriers & Resellers

Communications Law > Federal Acts > Telecommunications Act > General Overview

Communications Law > ... > Telephone Services > Local Exchange Carriers > General Overview

HN21[] **Introducing Competition, Duties of Incumbent Carriers & Resellers**

Section 251 of the Telecommunications Act of 1996, *47 U.S.C.S. § 151 et. seq.*, requires incumbent local exchange carriers (ILECs) to interconnect directly or indirectly with the facilities and equipment of other telecommunications carriers. *47 U.S.C.S. § 251(a)(1)*. It also imposes the duty of resale on ILECs. *47 U.S.C.S. §§ 251(c)(4)*. In providing its services, the ILEC must offer for resale at wholesale rates any telecommunications service that the carrier provides at retail to subscribers who are not telecommunications carriers. *§ 251(c)(4)(a)*. The incumbent must do so without the imposition of unreasonable or discriminatory conditions. *§ 251(c)(4)(B)*.

Communications Law > ... > Regulated Practices > Introducing Competition > Duties of Incumbent Carriers & Resellers

Communications Law > Federal Acts > Telecommunications Act > General Overview

Communications Law > ... > Telephone Services > Local Exchange Carriers > General Overview

Communications Law > ... > Regulated Practices > Introducing Competition > Interconnection Agreements

HN22[] **Introducing Competition, Duties of Incumbent Carriers & Resellers**

An incumbent local exchange carrier may chose to fulfill the obligations set forth in *§ 251* of the Telecommunications Act of 1996 (1996 Act), *47 U.S.C.S. § 151 et. seq.*, codified at *47 U.S.C.S. § 251*, by entering into a negotiated agreement as specified in 47 U.S.C.S. § 252. If the parties negotiate an interconnection agreement, they may enter a binding agreement without regard to the standards set forth in 47 U.S.C.S. § 251(b), (c). 47 U.S.C.S. § 252(a)(1). The 1996 Act expressly allows for agreements to be negotiated which do not necessarily define the same duties contemplated by 47 U.S.C.S. § 251.

Communications Law > Federal Acts > Telecommunications Act > General Overview

Communications Law > ... > Telephone Services > Local Exchange Carriers > General Overview

HN23[] **Federal Acts, Telecommunications Act**

Rather than negotiating agreements alleged to be discriminatory, a party can avail itself of the arbitration process to implement the duties imposed on incumbent local exchange carriers as enumerated under 47 U.S.C.S. § 251(b) and (c). 47 U.S.C.S. § 252(b)(1), (c)(1).

Communications Law > Federal Acts > Telecommunications Act > General Overview

HN24[] **Federal Acts, Telecommunications Act**

Where a party has not properly pled violations of the 47 U.S.C.S. § 251, there is no violation of the Telecommunications Act of 1996, 47 U.S.C.S. § 151 et. seq., which would be cognizable under 47 U.S.C.S. §§ 206 and 207.

Civil Procedure > ... > Pleadings > Crossclaims > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

Opinion by: GARRETT E. BROWN, JR.

Opinion

[*617] BROWN, District Judge

This matter comes before the Court upon the motion of Verizon for **[**2]** dismissal of **[*618]** Ntegrity's antitrust Counterclaim and Third Party Complaint, and upon Ntegrity's cross-motion to dismiss plaintiffs' collection action. The Court exercises jurisdiction over this matter pursuant to *28 U.S.C. § 1332* and having considered the submissions and the arguments of the parties, grants in part and denies in part Verizon's motion, and denies Ntegrity's motion.

I. BACKGROUND

A. Legislative and Factual Background

As it serves as the basis for the instant litigation and motion practice, the Court must first review the history and purpose of the Telecommunications Act of 1996 ("1996 Act" or "the Act"), which amended the Communications Act of 1934, 47 U.S.C. § 151 et. seq. At one point in history, local telephone service was a sanctioned monopoly. *See* Trinko v. Bell Atlantic Corp., 294 F.3d 307 (2d Cir. 2002). However, in 1996, Congress enacted the Telecommunications Act in an effort to create competition in the once monopolized market. *See* id. at 312. **HN1**[] Under the Act, states are no longer permitted to enforce laws prohibiting entry into the local telephone market. *See id.* **[**3]** In order to generate competition in the local telephone service market, the Act imposes affirmative duties upon existing incumbent local exchange carriers ("ILECs") such as Verizon. *See id.* These duties include providing "access to the poles, ducts, conduits, and rights-of-way of such carrier to competing providers." *Id.* (quoting 47 U.S.C. § 251 (b)(4)). Additionally, the Act requires that ILECs provide interconnection with their networks to the competing local exchange carriers ("CLECs") "that is at least equal in its quality to that provide by the local exchange carrier to itself." *Id.* (quoting 47 U.S.C. § 251 (c)(2)(C)).

The 1996 Act therefore imposed a duty upon Verizon, an ILEC, to provide services to CLECs such as Ntegrity. *See* Amended Answer Counterclaims and Third Party Complaint of Ntegrity ("Am. Answer") PP 16 - 17. Ntegrity was founded as a minority owned CLEC in 1998, with the goal of providing local telephone services to the general public. *See id.* P 17. Pursuant to the 1996 Act, Ntegrity entered into contracts with Bell Atlantic New Jersey, Bell Atlantic Pennsylvania and Bell Atlantic Maryland. [1] *See* **[**4]** *id.* Each of the interconnection agreements were filed with and approved by the respective state commissions. *See* Verizon's Brief in Support of Dismissal ("Verizon Br.") at 5. The negotiated contracts each provided for a one year term, after which either party could terminate the agreement by providing written notice 90 days in advance of the desired termination date. *See id.*

Ntegrity describes the local exchange services they sought to provide as the "originating or terminal point for interstate telephone and data transmission services." Am. Answer P 17. Ntegrity acquired its first customer in July 1998, and added more than 1,000 customers by September of that year and nearly 8,000 customers in both November **[**5]** and December of 1998. *See id.* P 18. The contracts created by Ntegrity and the Verizon entities serve as the basis for the instant disputes.

B. Procedural History

The parties in the instant matter have been engaged in this litigation for nearly three years. In November 1999, Verizon, **[*619]** formerly known as Bell Atlantic, filed two separate Complaints against the defendant, Ntegrity Telecontent Services. *See* Ntegrity's Brief in Opposition ("Ntegrity's Br.") at 6. Verizon Pennsylvania, claimed that defendant failed to pay overdue bills in violation of the resale agreement between the parties. *See id.* Similarly, Verizon New Jersey filed a complaint alleging that Ntegrity failed to pay its bills according to their contract. *See id.* In response, Ntegrity filed a Counterclaim alleging violations of Section 2 of the Sherman Act, 15 U.S.C. § 2, and Section 2(a) of the Clayton Act, 15 U.S.C. § 13 (a), as well as New Jersey and Pennsylvania state law antitrust statutes. *See* Am. Answer PP 84 - 181. Additionally, Ntegrity included a Third Party Complaint against Verizon Maryland alleging similar violations. *See id.* Ntegrity **[**6]** also included a number of state law breach of contract and tortious interference claims against all three Verizon parties. *See id.*

The parties consented to the consolidation of the Verizon Pennsylvania and Verizon New Jersey claims and this Court entered an Order to that effect on April 11, 2000. Shortly thereafter, Verizon filed a motion to dismiss Ntegrity's Counterclaim and Third Party Complaint in its entirety. The Court considered whether Ntegrity had properly asserted the necessary elements of an antitrust claim.

1. Decision of the Court in the Previous Motion to Dismiss

[1] Bell Atlantic is now known as Verizon. For the purposes of this Opinion, the Court will refer to the collective plaintiffs and the Third Party defendant as Verizon. When necessary, the Court will refer to the individual parties as Verizon Pennsylvania, Verizon New Jersey and Verizon Maryland.

In the prior Memorandum and Order of the Honorable Anne E. Thompson, U.S.D.J., the Court concluded that Ntegrity had sufficiently pled the elements of a section 2 Sherman Act claim for abuse of monopoly power. [2] *See* October 31, 2000 Memorandum and Order ("10/31/00 Order") at 3. Specifically, the Court found that Ntegrity alleged that Verizon "willfully acquired and maintained monopoly power" through various anti-competitive techniques. *Id.* at 3-4.

The **[**7]** Court also sustained Ntegrity's claims for Sherman Act liability for attempted monopolization. *See id.* at 5. The Court found that Ntegrity relied upon the same allegations as set forth in their alternate Sherman Act claim, and thus sustained Ntegrity's allegations. *See id.* Similarly, the Court allowed Ntegrity's claim of price discrimination under section 2 of the Clayton Act. *See id.* To do so, the Court inferred that Ntegrity defined telephone service as a commodity. *See id.*

However, Ntegrity's allegations of illegal tie-ins under Section 1 of the Sherman Act were dismissed. *See* id. at 6. The Court determined that Ntegrity had failed to state a claim because it did not allege that it was denied telephone service because it refused to buy other services from Verizon. *See id.* Ntegrity's claim under Section 206 of the Telecommunications Act was also dismissed. *See id.* at 7. The Court found that Section 206 did not create a separate cause of action, and dismissed that portion of the Counterclaim. *See id.*

Moving on to Ntegrity's state law claims, the Court determined that it had adequately pled claims for breach of contract and malicious interference **[**8]** with business relations. *See id.* at 7-8. Similarly, the Court sustained Ntegrity's claims for breach of good faith and fair dealing. *See id.* at 8-9. In conclusion, the Court allowed Ntegrity the opportunity to amend its Counterclaim and Third Party Complaint. *See id.* at 9. Ntegrity subsequently filed its amended pleading.

[*620] 2. Ntegrity's Amended Answer, Counterclaim and Third Party Complaint

Ntegrity alleges that at the time of its Counterclaim, Verizon controlled approximately 97% of the local telephone service in New Jersey, Pennsylvania and Maryland. *See* Am. Answer P 19. Ntegrity states that Verizon engaged in a number of anti-competitive tactics in an effort to maintain its monopoly market share. *See id.* Those alleged practices included illegal tie-ins; unjust discriminatory switching fees; discriminatory denial of access to pricing information; intentionally error-prone and discriminatory computer interface systems; error prone billing; and preventing Ntegrity customers from placing long-distance phone calls. *See id.*

Specifically, Ntegrity alleges that Verizon intentionally utilized a discriminatory and error prone billing method for CLECs like Ntegrity. **[**9]** *See id.* P 21. Ntegrity claims the billing errors created the need for it to extensively audit the bills submitted by Verizon, and this process utilized more than 100 hours per week. *See id.* PP 21, 25. Additionally, Ntegrity asserts that the error rate on the bills generated by Verizon for the CLECs was substantially higher than the error rate for Verizon's own large retail customers. *See id.* P 21. Ntegrity maintains that the billing errors made it impossible to conduct an actual accounting of the money it owes to Verizon. *See id.* P 24. Ntegrity contends that electronic billing would have alleviated some of the problems with the billing errors, but Verizon would only offer that service at "a prohibitive cost." *Id.*

Ntegrity also claims that the bills it received from Verizon were inaccurate because the tariffs assessed against Ntegrity were set by regulation based on the value of Verizon's equipment. *See id.* P 28. Ntegrity points to an audit conducted in 1999 by the FCC, which determined that the value of Verizon's equipment was overstated in New Jersey, Pennsylvania and Maryland. *See id.* P 29. Ntegrity maintains that this resulted in excess charges of more **[**10]** than $ 65,000,000.00 to Verizon customers. *See id.* Based on those figures, Ntegrity assumes that it has been overcharged by approximately $ 300,000.00. *See id.* P 31.

Further, Ntegrity alleges that Verizon charged new Ntegrity customers a switching penalty when they transferred their service from Verizon. *See id.* P 34. Ntegrity alleges that this was called a Record Order Charge, but that it was

---

[2] This matter was originally assigned to the Honorable Anne E. Thompson, U.S.D.J. and subsequent to her decision on Verizon's original motion, this matter was transferred to the undersigned.

actually "without justification and unreasonable." *Id.* Ntegrity contends that the Record Order Charge is not specifically enumerated in the contract between the parties, and is only indirectly incorporated into those agreements. *See id.* P 35. Ntegrity maintains that there is not a viable reason for the imposition of this charge, even though it is normally charged when a new customer establishes service with Verizon. *See id.* P 36. Ntegrity states "Third Party Defendants said they would charge only a $ 3.00 - $ 6.00 switching fee," and alleges that if Verizon had only charged a $ 4.00 switching fee, then it has been over billed for approximately $ 125,000.00. *Id.* P 38. Ntegrity also maintains that Verizon occasionally waives this Record Order fees for its retail customers, **[**11]** and thus alleges that these charges are discriminatory. *See id.* P 40.

Ntegrity also contends that Verizon has repeatedly cut off long distance service prior to switching customers from Verizon to Ntegrity. *See id.* P 43. Ntegrity alleges that when it switched its own long distance provider, its customers were unable to place long distance phone calls because Verizon failed to make that change in a timely manner. *See id.* P 45. Ntegrity provided its customers with dial **[*621]** around numbers to correct the problem and alleges that Verizon blocked those codes. *See id.* P 47. Ntegrity also complains of poor and late data it received about its customers from Verizon. *See id.* P 49.

Ntegrity alleges that Verizon refused to supply it with meaningful billing information that could be used to bill Ntegrity customers. *See id.* P 51. Ntegrity contends that Verizon refused to supply such information between April 1998 until August 1999, and that it was required to comb through Verizon's tariff books before it could decode the bills it received. *See id.* Ntegrity claims an 84% error rate on its bills and a consequent customer loss. *See id.* P 53.

Ntegrity also alleges that **[**12]** Verizon requires manual processing by resellers whenever a CLEC wins a new customer. *See id.* P 54. Defendant maintains that this processing must occur before it can switch a customer from Verizon to Ntegrity, and that it drives up the costs to the reseller. *See id.* Ntegrity contends that it should not have to provide such detailed information before a customer can be switched because Verizon already has all the relevant information about its current customers. *See id.* P 56. Ntegrity challenges that this process is cumbersome and creates numerous opportunities for human error. *See id.* P 57. Slow provisioning or switching is another issue addressed by defendant. *See id.* P 62. Ntegrity complains that it can take up to 30 days for Verizon to switch a customer over to Ntegrity and it only takes three days for them to add a new retail customer. *See id.*

Another complaint is that Verizon created illegal tie-ins between its Bell Atlantic Yellow Pages company and the provision of local telephone service. *See id.* P 63. Ntegrity claims that Verizon would offer month-to-month payment plans to its retail customers, and would require up-front payment for Yellow Pages **[**13]** ads for any customers that switched to a CLEC such as Ntegrity. *See id.* P 63. Ntegrity also contends that Verizon withheld voice mail services from Ntegrity customers, and that such services have since been required by legislation in New York, Delaware and Vermont. *See id.* P 64. Ntegrity alleges that it can only purchase voice mail service in New Jersey, Pennsylvania and Maryland if it signs a volume and term agreement. *See id.* P 65.

Ntegrity contends that its customers have been confronted with continuous attempts to win back their business. *See id.* P 66. Ntegrity maintains that Verizon has attempted to win back its customers before it even switched those customers over to Ntegrity's service. *See id.* Related is Ntegrity's claim that Verizon made repeated material misrepresentations about Ntegrity to its existing and potential customers. *See id.* P 67.

Ntegrity also sets forth complaints about the text and content of the contracts that the parties negotiated pursuant to the Act. *See id.* PP 69 - 79. Defendant claims that enforcement of the contracts "would permit the continuation of Third Party Defendants' anti-competitive conduct and violations of the Telecommunications **[**14]** Act under the protective umbrella of the contracts." *Id.* P 70. Ntegrity complains that the contracts require it to use the allegedly discriminatory computer interface system described in the Amended Answer. *See id.* P 71. Ntegrity also dislikes the requirement that it provide an irrevocable letter of credit guaranteeing payment of any disputed billing amounts. *See id.* P 72. Ntegrity states that the contracts obligate Verizon to provide daily customer usage records which were not immediately provided. *See id.* P 73. Ntegrity also maintains that the contracts allow Verizon **[*622]** to unilaterally determine what ancillary services, such as voice mail, could be provided "without unreasonable expense." *Id.* P 74. Ntegrity contends that Paragraph 32 of the contract "purports to limit the services that Subsidiary Third Party

Defendants will provide." *Id.* The contracts also specify that untimely and inaccurate bills are not considered breaches of the interconnection agreements. *See id.* P 78.

Based on these allegations, Ntegrity asserts claims for abuse of monopoly power under *Section 2* of the Sherman Act as well as under the New Jersey and Maryland antitrust statutes. **[**15]** *See id.* PP 84 - 102. Ntegrity also asserts claims alleging attempted monopolization under *Section 2* of the Sherman Act as well as the Maryland and New Jersey antitrust statutes. *See id.* PP 102 - 121. In addition, Ntegrity alleges a price discrimination claim under *Section 2(a)* of the Clayton Act, commonly known as the Robinson-Patman Act, and a claim under *Section 251(b)* and *(c)* of the Telecommunications Act. [3] *See id.* PP 122-130. Finally, Ntegrity asserts claims under the state laws of New Jersey, Maryland and Pennsylvania for breach of contract; tortious interference with business relationships and breach of the implied duty of good faith and fair dealing. *See id.* PP 130 - 181.

3. Ntegrity's Application for a Preliminary Injunction

Subsequent to the decision on plaintiff's **[**16]** first motion to dismiss, Verizon notified Ntegrity that it intended to discontinue service to Ntegrity's customers after January 31, 2000 because of its failure to pay overdue bills. *See* Verizon Br. at 6. On January 31, 2000, Verizon stopped providing service to any new Ntegrity customers and informed the state commissions of its decision to stop offering new service. *See id.* Verizon, however, continued to provide service for Ntegrity's already existing customers. *See id.* On May 11, 2001, Ntegrity filed a motion for a preliminary injunction to prevent Verizon from terminating service to those existing customers. *See id.* at 8.

This Court rejected Ntegrity's application, as did the New Jersey Board of Public Utilities. *See id.* at 8-9. The Board required a letter of credit from Ntegrity in the amount of $ 500,000.00, which Ntegrity declined to prepare. *See id.* at 9. The Board authorized termination of service upon proper notice to Ntegrity's existing customers. *See id.* After the required notice was provided, the Board authorized termination of service. *See id.* at 10. On July 25, 2001, Verizon stopped providing service to all remaining Ntegrity's customers. **[**17]** *See id.*

4. Instant Motions to Dismiss

Verizon filed the instant motion to dismiss subsequent to Ntegrity's submission of its Amended Answer Counterclaim and Third Party Complaint. Verizon asks this Court to re-visit the sufficiency of Ntegrity's antitrust claims based on newly decided precedent that was not considered in the prior Memorandum and Order. *See id.* at 11. Ntegrity opposes the motion and seeks to dismiss Verizon's collection claims based on a lack of prudential standing pursuant to *Fed. R. Civ. P. 17(a)*.

II. DISCUSSION

A. Standard for Motion to Dismiss

HN2[] A motion to dismiss pursuant to *Fed. R. Civ. P. 12(b)(6)* may be granted only if, **[*623]** accepting all well pleaded allegations in the complaint as true, and viewing them in the light most favorable to plaintiff, plaintiff is not entitled to relief. *See* *Oran v. Stafford, 226 F.3d 275, 279 (3d Cir. 2000)* (citation omitted); *Langford v. City of Atlantic City, 235 F.3d 845, 850 (3d Cir. 2000)* (citation omitted). The Court may not dismiss a complaint unless the plaintiff can prove no set of facts that would entitle him or her to relief. *See* *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*. **[**18]** "The issue is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims." *Scheuer v. Rhodes, 416 U.S. 232, 236, 40 L. Ed. 2d 90, 94 S. Ct. 1683, 71 Ohio Op. 2d 474 (1974)*. ***HN3***[] In setting forth a valid claim, a party is required only to plead "a short plain statement of the claim showing that the pleader is entitled to relief." *Fed. R. Civ. P. 8(a)*.

[3] As highlighted by Verizon, *Section 252(c)(4)* of the Telecommunications Act does not exist. *See* Verizon Br. at 11 n.5. Ntegrity confirms that it intended to cite *§ 251(b)* and *(c)*. *See* Ntegrity Br. at 38 n.5.

HN4[] Under *Rule 12(b)(6)*, the Court must "accept the allegations in the complaint as true, and draw all reasonable factual inferences in favor of the plaintiff. [The motion can be granted] only if no relief could be granted under any set of facts that could be proved." *Turbe v. Government of the Virgin Islands, 938 F.2d 427, 428* (citing *Unger v. National Residents Matching Program, 928 F.2d 1392, 1394-95 (3d Cir. 1991)*; *see also* *Langford, 235 F.3d at 850*; *Dykes v. Southeastern Pennsylvania Transp. Auth., 68 F.3d 1564, 1565 n.1 (3d Cir. 1995)*. A complaint may be dismissed for failure to state a claim where it appears beyond any doubt that no relief could be granted under any set of facts which could be proved consistent **[**19]** with the allegations. *See* *Hishon v. King & Spalding, 467 U.S. 69, 73, 81 L. Ed. 2d 59, 104 S. Ct. 2229 (1984)*.

HN5[] A complaint should not be dismissed unless it appears beyond doubt that "the facts alleged in the complaint, even if true, fail to support the claim." *Ransom v. Marrazzo, 848 F.2d 398, 401 (3d Cir. 1988)*. Legal conclusions made in the guise of factual allegations, however, are given no presumption of truthfulness. *See* *Papasan v. Allain, 478 U.S. 265, 286, 92 L. Ed. 2d 209, 106 S. Ct. 2932 (1986)*; *see also* *Morse v. Lower Merion Sch. Dist., 132 F.3d 902, 906 (3d Cir.1997)* ("[A] court need not credit a complaint's 'bald assertions' or 'legal conclusions' when deciding a motion to dismiss").

HN6[] A district court reviewing the sufficiency of a complaint has a limited role. "The issue is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support his [or her] claims." *Scheuer, 416 U.S. at 236*. Generally, when conducting such an inquiry, material beyond the pleadings should not be considered. *See* *In re Burlington Coat Factory Sec. Litig., 114 F.3d 1410, 1426 (3d Cir.1997)*; **[**20]** *Pension Benefit Guar. Corp. v. White Consol. Indus., 998 F.2d 1192, 1196* (3d Cir.), *cert. denied, 510 U.S. 1042, 126 L. Ed. 2d 655, 114 S. Ct. 687 (1994)*.

B. Verizon's Motion to Dismiss

1. Ntegrity's Antitrust Claims

Verizon urges this Court to re-examine the claims pled by Ntegrity in light of *Goldwasser v. Ameritech Corp., 222 F.3d 390 (7th Cir. 2000)*. Verizon argues that this Court should dismiss Ntegrity's Counterclaim because the Telecommunications Act imposes affirmative duties on ILECs which reach beyond the requirements found in the antitrust laws. *See* Verizon Br. at 15. Verizon contends that *Goldwasser* provides direction because it recognized the conflict between the general antitrust laws and the more specific legislation of the 1996 Act. *See id.*

Verizon argues that the Seventh Circuit properly upheld dismissal of the antitrust claims in that case because it correctly **[*624]** recognized that the Telecommunications Act duties are not coterminous with the duties imposed upon monopolies under the antitrust laws. *See id.* at 16. Verizon contends that the antitrust laws do not oblige a service provider to make **[**21]** its services available to a competitor, at a wholesale price, so that the competitor can then resell those services to the general public. *See id.* at 17. Verizon points to practice in other regulated industries which does not require the sale of commodities to "non-competitive middlemen" under the antitrust laws. *See id.* (citing *HyPoint Tech., Inc. v. Hewlett-Packard Co., 949 F.2d 874, 877-78 (6th Cir. 1991))*.

Further, Verizon argues that antitrust litigation in the face of the regulatory scheme would be interruptive to the experts that have been put in place to resolve the disputes between ILECs and their competitors. *See id.* at 19. Verizon contends that Ntegrity's claims all relate to matters that are specifically required by the 1996 Act and the interconnection agreement between the parties. *See id.* at 20. Verizon maintains that each allegation is directed at the terms of the interconnection agreements, which Ntegrity helped to draft. *See id.* at 21. Verizon points out that Congress has entrusted oversight of the interconnection agreements created under the 1996 Act to state created commissions. *See id.*

Verizon also argues that it does not have **[**22]** a duty under the antitrust laws to sell its services to a re-seller who in turn sells those same services to the general public. *See id.* at 22. Verizon contends that this makes the duties imposed by the Telecommunications Act more onerous than those created by the antitrust laws. Thus, it argues that the antitrust laws must not be applied to enforce obligations that were only created by very specific regulatory legislation. *See id.*

Ntegrity responds first that a motion to dismiss the antitrust claims has already been decided by the Honorable Anne E. Thompson during previous motion practice, and that the decision is binding law of the case. *See* Ntegrity Br. at 13. Ntegrity points out that the doctrine is not designed to limit the federal court's power, but that courts in the Third Circuit have applied the doctrine to interlocutory decisions. *See id.* at 13-14. Ntegrity argues that the holding in *Goldwasser* was made a subject of Verizon's reply brief in the previous motion practice, and that it submitted a letter in response to those arguments. *See id.* at 15-16.

Addressing the substance of the motion, Ntegrity argues that *Goldwasser* is not persuasive and **[**23]** does not create binding authority that this Court must follow. *See id.* at 21. Ntegrity also seeks to distinguish the holding in *Goldwasser* because that antitrust case was brought by consumers rather than a competitor. *See id.* Ntegrity argues that *Goldwasser* should have been decided on more limited grounds, and is inapplicable to claims brought by competitors. *See id.* at 22. Ntegrity contends that the Seventh Circuit did not need to reach the issue of whether violations of the 1996 Act alone would be sufficient to state an antitrust claim. *See id.* at 23. It also argues that the Seventh Circuit went even further in holding that antitrust claims that are related, but not identical, to claims under the 1996 Act are not cognizable. *See id.* at 24. Ntegrity maintains that Judge Thompson must have "necessarily decided not to follow this *dicta* from an out-of-circuit consumer case." *Id.* (alteration in original).

Ntegrity argues that its Counterclaim alleges conduct that violates the general antitrust laws. *See id.* at 25. It also argues that Verizon interprets its claims as alleging only conduct which violates the **[*625]** 1996 Act in an effort to make the Counterclaim **[**24]** amenable to dismissal on the grounds set forth in *Goldwasser. See id.* However, Ntegrity asserts that its claims are not limited only to plaintiffs' violations of the affirmative duties created by the 1996 Act. *See id.* at 26.

Ntegrity argues that it also alleges pernicious anti-competitive conduct such as fraudulent billings, illegal cancellation notices, misrepresentations made to Ntegrity customers, and illegal charges. *See id.* It contends that the antitrust laws were established to address plaintiffs' behavior. *See id.* Ntegrity asserts that it is irrelevant if Verizon's actions also violate the 1996 Act, and that this fact should not preclude its pursuit of an antitrust claim. *See id.*

Further, Ntegrity argues that the Telecommunications Act contains an express savings clause which states "nothing in this Act or the amendments made by this Act shall be construed to modify, impair, or supersede the applicability of any of the antitrust laws." *Id.* at 33 (quoting 47 U.S.C. § 152). Ntegrity also points to recent submissions by the Federal Communications Commission and the Department of Justice, both of whom have concluded that private actions **[**25]** seeking damages were not repealed by the 1996 Act. *See id.* at 34. Ntegrity notes that the opinion of an agency, on a matter within its jurisdiction, is entitled to great deference. *See id.* Ntegrity argues that deferral by this Court to a state commission essentially creates an abstention, and deprives it of a federal forum. *See id.* at 35. Ntegrity contends that state Public Utility Commissions ("PUCs") have only a very limited role in the negotiating and approval of interconnection agreements. *See id.* It further maintains that this role does not create a pervasive regulatory scheme that should divest this Court of jurisdiction. *See id.*

The instant motion presents narrow issues which have not already been considered by this Court. [4] Plaintiffs request that this Court dismiss defendant's antitrust Counterclaim arguing that the 1996 Act requires affirmative duties from ILECs that reach above and beyond the duties imposed by the antitrust laws. Ntegrity argues that its

---

[4] Ntegrity urges this Court to disregard the instant motion to dismiss the Counterclaim arguing that Judge Thompson has already considered the sufficiency of the Counterclaim and impliedly rejected the holdings of the Seventh Circuit in Goldwasser 222 F.3d 390. However, the holding in *Goldwasser* was not mentioned in the prior opinion, nor was the origin of the relationship between the these two parties. As such, this Court is obligated to consider issues of law which might preclude the antitrust causes of action. Further, Ntegrity's Counterclaim and Third Party Complaint were amended after the previous motion practice, thus inviting review of the revised pleading. Therefore, the Court will consider the instant motion because the rule of law created by *Goldwasser* was not fully briefed or considered in the prior motion to dismiss.

claims are not based solely upon the duties imposed by the 1996 Act, and that the allegations are sufficient to state a Sherman Act claim because Verizon engaged in general anti-competitive conduct. **[**26]**

Verizon brought the instant motion based upon the precedent set by *Goldwasser v. Ameritech Corp., 222 F.3d 390 (7th Cir. 2000)*. While the instant **[**27]** motion was under the consideration of this Court, the Second Circuit decided *Trinko v. Bell Atlantic Corp., 294 F.3d 307 (2d Cir. 2002)*, and the Eleventh Circuit decided *Covad Communications Co. v. Bellsouth Corp., 299 F.3d 1272, 2002 U.S. App. LEXIS 15486, 2002 WL 1777009 (11th Cir. 2002)*. All three cases examine the interplay between the antitrust laws and the more specific legislation of the Telecommunications Act of 1996.

[*626] In *Goldwasser,* the Seventh Circuit encountered a lawsuit brought by consumers who had purchased their telephone service from an incumbent local exchange carrier, Ameritech. *See* *Goldwasser, 222 F.3d at 392*. As purchasers of telephone services, the plaintiffs therein filed a lawsuit alleging antitrust violations for Ameritech's failure to comply with the 1996 Telecommunications Act. *See* *id. at 392, 395-96*.

The *Goldwasser* plaintiffs claimed that Ameritech controlled more than 90% of the markets for local telephone service in their states. *See* *id. at 394*. They also alleged that Ameritech operated in such a manner so as to exclude competition and did not provide competitors with access to the **[**28]** facilities as contemplated by the Act. *See id.* The plaintiffs alleged that Ameritech did not provide its competitors with access to quality service, unbundled services and nondiscriminatory access to its operational support systems. *See id.* Further, the *Goldwasser* plaintiffs claimed that Ameritech failed to fully unbundle its network elements, and that competitors have experienced undue delays in switching and fees for originating and terminating phone service. *See* *id. at 395*. The plaintiffs in *Goldwasser* asserted that Ameritech continued to bill customers that had been transferred to competitors and this caused some former Ameritech customers to be double-billed. *See id.*

The District Court dismissed the complaint holding that the filed rate doctrine barred the claims for damages under the antitrust statutes. *See id.* The District Court went on to find that the plaintiffs lacked standing under the antitrust laws, and that the consumers were not able to sue for enforcement of the duties imposed upon ILECs by the Telecommunications Act. *See* *id. at 396*.

On appeal, the Seventh Circuit affirmed the dismissal of the plaintiffs' complaint, **[**29]** but based upon a different rationale. *See* *id. at 399*. The Seventh Circuit determined that the *Goldwasser* plaintiffs did in fact have standing to allege antitrust claims. *See* *id. at 398*. The Court found that as direct purchasers of Ameritech's products, they had sufficiently alleged an antitrust injury, specifically, the overcharges they experienced as a result of the monopoly. *See id.* However, ***HN7***[] the Court found that the plaintiffs could not pursue their claim because the duties in the 1996 Act are not coterminous with the duties imposed by the antitrust laws. *See* *id. at 399*. In other words, the Seventh Circuit found that the 1996 Act imposed burdens on monopolists that were more comprehensive than the general duties under the antitrust laws. *See id.*

The Court reasoned that Congress could have simply lifted any existing regulatory prohibitions on phone service competition and allowed the antitrust laws to provide a solution for the existing telephone monopoly. *See* *id. at 399-400*. Rather, the Court observed, that Congress created a complex regulatory scheme to foster competition and ultimately enhance customer **[**30]** pricing for local phone service. *See id.* The Seventh Circuit determined that the plaintiffs' complaint alleged violations of duties which went beyond any requirements created by the antitrust laws. *See* *id. at 400*. The Court stated "we think it both illogical and undesirable to equate a failure to comply with the 1996 Act with a failure to comply with the antitrust laws." *Id.*

The Court went on to clarify that it did not find that the 1996 Act conferred an implied immunity from the antitrust laws. *See* *id. at 401*. The Seventh Circuit noted that the savings clause set forth in the legislation would seriously complicate such a determination, and held only that the more specific regulations in the 1996 Act should control. *See id.* Finally, the Court addressed whether any allegations in the **[*627]** plaintiffs' complaint could be divorced from the claims under the 1996 Act. *See id.* The Seventh Circuit reviewed plaintiffs' complaint and the contention that Ameritech's control of essential facilities stated a violation of the general antitrust laws. *See id.* The Court determined that those allegations, when read with the complaint as a whole, were **[**31]** inextricably linked to the duties required of the ILEC under the Act, and therefore could not create liability under the general antitrust rules. *See id.*

Also recently decided, is *Trinko, 294 F.3d at 329-30*, in which the Second Circuit determined that the consumer plaintiffs therein were entitled to maintain an antitrust action against an incumbent local exchange carrier. The plaintiffs in *Trinko* were purchasers of local telephone service from a competing carrier. *See Trinko, 294 F.3d at 310-11*. Those plaintiffs claimed they were damaged when Bell Atlantic denied their local service carrier, AT&T, equal access to the local network. *See id.* They alleged violations of section 202(a) of the Communications Act of 1934; violations of subsections (b) and (c) of section 251 of the Telecommunications Act of 1996; violations of section 2 of the Sherman Antitrust Act; and tortious interference with contract. *See id.*

After reviewing the legislative history of the 1996 Act, the Second Circuit reviewed the procedural history of the case under its review. *See id. at 312*. The Court observed that AT&T had negotiated and arbitrated **[**32]** an interconnection agreement with Nynex, the ILEC in the New York area. *See id. at 313*. Shortly after the creation of that agreement, AT&T filed complaints with the regulatory authorities alleging lost and delayed orders. *See id.* Nynex and AT&T entered into a consent decree and resolved their dispute in its entirety. *See id.*

Bell Atlantic moved to dismiss the plaintiffs' claims, and the District Court granted the motion with respect to the antitrust and 1934 Act claims and declined to retain jurisdiction over the remaining state law claims. *See id. at 314*. The District Court, relying on *Goldwasser,* found that the duties imposed by the Telecommunications Act alone did not create antitrust liability. *See id. at 314*. The District Court characterized the claims as solely alleging violations of the duties imposed by the 1996 Act, and thus insufficient to state an antitrust claim. *See id.*

Further, the District Court considered the claims under the Telecommunications Act and concluded that private lawsuits are generally incompatible with the regulatory scheme established by the Act. *See id.* The Court ultimately found **[**33]** that the consumer plaintiffs lacked prudential standing to pursue claims under the 1996 Act because § 251 created duties on behalf of an ILEC that must be rendered to a competing local exchange carrier, and not to a CLEC's customers. *See id.* Similarly, the District Court determined that only the customers of an incumbent carrier could state a claim under section 202(a) of the Communications Act because that section creates duties for the carrier with respect to its own customers. *See id.* The plaintiffs' complaint was dismissed in its entirety, with leave to re-plead. *See id. at 315*. Upon submission of the new complaint, the defendants once again moved to dismiss, and the District Court also granted that motion. *See id.*

The Second Circuit first considered whether the *Trinko* plaintiffs had standing to bring a claim under section 202(a) of the Communications Act and section 251(b) and (c) of the Telecommunications Act. *See id.* The Second Circuit found that the District Court had incorrectly dismissed the claims on the grounds of prudential standing and re-instated the section 202(a) claims. *See id. at 318-19*. However, the **[*628]** Court agreed **[**34]** with the dismissal of the section 251(b) and (c) claims, but for reasons other than those offered by the District Court. *See id. at 319-20*.

The Court examined the claims under section 251 and determined that they only alleged violations of the duties imposed on ILECs regarding the creation of interconnection agreements mandated by the Telecommunications Act. *See id.* Additionally, the Court found that AT&T and Bell Atlantic had already utilized the contracting process created by the 1996 Act, and arrived at a fully approved interconnection agreement. *See id. at 321*. Therefore, the Second Circuit found that the consumer plaintiffs would be unable to state a claim under section 251 of the Act. *See id. at 322*.

As for the plaintiffs' antitrust claims, the Circuit Court disagreed with the dismissal of those allegations. *See id. at 324*. The Court agreed, however, that the plaintiffs did have standing to allege antitrust violations. *See id. at 325*. ***HN8***[] The Second Circuit observed "it is clear that a plaintiff would not state an antitrust claim against a defendant simply by alleging that the defendant violated **[**35]** its duties under section 251." *Id. at 326*. However, parting company with the Seventh Circuit, the Court determined that the complaint did not solely describe activities which would violate section 251, but also made allegations "that may support an antitrust claim under a number of theories." *Id.*

Specifically, the amended complaint stated a claim under ***HN9***[] the essential facilities doctrine, which requires a monopolist to give access to necessary equipment so that competitors are able to compete in the market. *See id.* The plaintiffs also adequately alleged a monopoly leveraging claim. *See id.* Finally, they sufficiently alleged an attempted monopolization claim, which the Court found was derivative of the essential facilities and leveraging claims. *See* *id. at 327*.

The Second Circuit also discussed the result in the *Goldwasser* case. *See id.* The Court observed that an antitrust action cannot be precluded simply because the facts alleged might also state a claim under the 1996 Act. *See id.* An opposite determination would create an implied immunity that would override the legislative intent behind the specific savings clause in the **[**36]** Act. *See id.* However, the Court was careful to clarify that the *Trinko* plaintiffs would be unable to pursue a claim under *section 251* of the 1996 Act because they were not parties to the interconnection agreements, and needed protection under the antitrust laws. *See* *id. at 328*.

HN10[] The Court also found that there is no inherent conflict with the regulatory scheme of the 1996 Act if a plaintiff only sought monetary damages. *See* *id. 329*. The Court did not find a conflict with making ILECs subject to the antitrust laws as well as their interconnection agreements. *See id.* Finally, the Court observed "courts may not be suited to order particular actions by telecommunications carriers to make the local markets more competitive, particularly when there is a specific regulatory scheme meant to serve the same purpose." *Id.*

The most recent case to review antitrust claims raised in the context of the 1996 Act, is *Covad Communications, 299 F.3d 1272, 2002 U.S. App. LEXIS 15486, 2002 WL 1777009*. The plaintiff in *Covad,* a competing local exchange carrier, alleged that the defendant had violated their interconnection agreement and had engaged in broad exclusionary behavior. **[**37]** *See* *Covad, 299 F.3d 1272, 2002 U.S. App. LEXIS 15486, 2002 WL 1777009*, at * 1. Covad alleged that Bellsouth had denied them access to essential facilities, namely its network of phone lines. *See id.* at * 7. Further, Covad claimed that Bellsouth had refused to deal with it regarding those essential facilities. *See id.* Covad claimed the defendant had refused to deal with it because of an intent **[*629]** to maintain its local telephone service monopoly. *See id.* Finally, Covad alleged that Bellsouth had manipulated its role as a ILEC to create a price squeeze to eliminate Covad's competition by lowering its own retail prices to a level that was detrimental to itself. *See id.*

The District Court, relying on *Goldwasser,* dismissed the plaintiff's complaint. *See* *2002 U.S. App. LEXIS 15486*, at * 3. The Court found that in the absence of an affirmative duty to assist competitors, the plaintiffs had not stated a claim for an antitrust violation. *See id.* Further, the Court held that the remaining allegations could not be divorced from the duties imposed under the 1996 Act. *See id.* The District Court also dismissed Covad's 1996 Act claims under *sections 206* and *207*, finding that the regulatory scheme prohibited the filing of **[**38]** such claims in federal court. *See id.*

Reversing, the Eleventh Circuit found that the plaintiff had in fact stated claims arising under the general antitrust laws. *See id.* at * 10, * 13, * 14. Initially, the Court found that the plain language of the 1996 Act states that nothing in the legislation should be construed as a preemption of the antitrust laws. *See id.* at * 5. The Court examined each of plaintiff's claims for denial of access to essential facilities, refusal to deal, and price squeezing. *See* *2002 U.S. App. LEXIS 15486*, at * 10 - * 14. Each of Covad's theories stated a claim under the general antitrust laws absent the existence of the 1996 Act and the duties created thereunder. *See id.* The Court also reinstated the Telecommunications Act and common law claims based on recent authority which determined that state commissions were not authorized to interpret interconnection agreements. *See id.* at * 15.

Essentially, ***HN11***[] the Seventh, Second and Eleventh Circuits are in agreement on one principle; that violations of the 1996 Act, standing alone, do not create liability under the general antitrust laws. All three Courts of Appeal considered whether any of the allegations could be separated **[**39]** from the duties arising under that Act. Neither *Goldwasser* nor *Trinko* is directly on point with the issue before this Court. Both of those cases involved the application of antitrust litigation in the context of interconnection agreements as those agreements affected consumers, not the contracting parties. The holding in *Trinko* was expressly conditioned on the fact that the lawsuit at issue was brought by consumers, who had no recourse under the interconnection agreement between the ILEC and the CLEC. *See* *Trinko, 294 F.3d at 328*. The Court in *Covad* directly addressed the issue of whether a CLEC may state an antitrust claim against the ILEC with which it has formed an interconnection agreement. However, as will be discussed, the facts alleged in Covad's complaint are distinguishable from the allegations *sub judice.*

HN12[] This Court agrees, with the conclusion reached in all three cases; that allegations of a breach of an interconnection agreement, standing alone, do not state an antitrust claim. Parties to an interconnection agreement with claims that the ILEC has failed to honor that contract may not resort to antitrust litigation to resolve those claims. **[**40]** Essentially what is before this Court is Ntegrity's disappointment with the interconnection agreements that it negotiated with Verizon. The parties negotiated the terms of their own agreements, and those contracts were approved by the Public Utility Commissions in the respective states. *See* Am. Answer P 17; Verizon Br. at 4.

Ntegrity's antitrust claims stem only from Verizon's performance under the express terms of the interconnection agreements. *See* Am. Answer PP 21 - 67. **HN13**[] Those obligations alone cannot form the basis of an antitrust action. *See* *Covad, **[*630]** 299 F.3d 1272, 2002 U.S. App. LEXIS 15486, 2002 WL 1777009*, at * 7; *Trinko, 294 F.3d at 326*; *Goldwasser, 222 F.3d at 401*; *Cavalier Telephone, LLC. v. Verizon Virginia, Inc., 208 F. Supp. 2d 608, 2002 U.S. Dist. LEXIS 11131*, No. Civ. A. 3:01CV736 CV736, 2002 WL 1008380, at *6 (March 27, 2002); *MGC Communications, Inc. v. Bellsouth Telecommunications, Inc., 146 F. Supp. 2d 1344, 1352 (S.D. Fla. 2001)*. Ntegrity has not made any allegations that Verizon denied it access to essential facilities, or that Verizon refused to deal with it on that basis. Further, although Ntegrity complains about the charges it received from Verizon, there is not an **[**41]** allegation that Verizon lowered its own retail rates in an effort to make service with Ntegrity appear unattractive to consumers. Such **HN14**[] allegations would state a claim under the general antitrust laws even absent the existence of the 1996 Act. *See Covad,* 2002 U.S. App. LEXIS 15486, 2002 WL 1777009, at * 10 - * 14; *Trinko, 294 F.3d at 326*.

It is abundantly clear that **HN15**[] implied immunity is not created simply because a plaintiff's claims might also arise under the Telecommunications Act. *See* *Essential Communications Systems, Inc. v. AT & T, Inc., 610 F.2d 1114, 1120 (3d Cir. 1979)*; *Covad, 299 F.3d 1272, 2002 U.S. App. LEXIS 15486, 2002 WL 1777009*, at * 6 - * 7; *Trinko, 294 F.3d at 326*. Therefore, the remaining question before the Court is whether any of Ntegrity's allegations state a valid claim for anti-competitive conduct under the antitrust laws. **HN16**[] In order to establish a claim under *Section 2* of the Sherman Act, *15 U.S.C. § 2*, a plaintiff must demonstrate: "(1) the possession of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business **[**42]** acumen, or historic accident." *Eastman Kodak Co. v. Image Technical Services, Inc., 504 U.S. 451, 481, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992)* (citing *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966))*; *see also* *Pastore v. Bell Telephone Co., 24 F.3d 508, 512 (3d Cir. 1994)*.

It must also be noted that **HN17**[] even a monopolist does not have a general duty to cooperate with a competitor. *See* *Aspen Skiing, Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 601, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*. However, a company's right to select its business associates is not unqualified. *See* *id. at 602*. The alleged monopolist may not refuse to deal with a competitor if it has the specific intent to either maintain or create a monopoly. *See id.* Evidence of this specific intent is abundant when a business refuses to engage in a deal that would profit both the business and the competitor. *See* *id. at 601-603*.

Ntegrity also alleges a violation of **HN18**[] *section 2(a)* of the Clayton Act, commonly referred to as the Robinson-Patman Price Discrimination Act, *15 U.S.C. § 13* **[**43]** *(a)*. Such a claim can be established by a showing of different prices charged to different customers. *See Stelwagon Mfg. Co. v. Tarmac Roofing Systems, Inc., 63 F.3d 1267, 1271 (3d Cir. 1995)*. Price discrimination in and of itself is not illegal. *See id.* Rather a plaintiff must show a reasonable probability of competitive injury. *See id.* Monopoly power, simply put, is "the power to control prices and exclude competition." *See* *Lansdale v. Philadelphia Electric Co., 692 F.2d 307, 311 (3d Cir. 1982)* (citation omitted).

A close reading of Ntegrity's allegations demonstrates that its claims stem only from Verizon's performance under the interconnection agreements based on the 1996 Act. The Counterclaim specifies Ntegrity's dissatisfaction with Verizon's performance, but does not allege behavior that would otherwise constitute an antitrust violation.

Ntegrity complains that Verizon refused to provide it with electronic bills so it could more efficiently audit its bills. *See* Am. **[*631]** Answer PP 21 - 25. However, as alleged in the Counterclaim, the interconnection agreement negotiated by the parties clearly stated that Ntegrity would only receive paper **[**44]** bills from Verizon. *See* id. P 72; Contracts PP 5.1, 5.5. [5] The same is true of Ntegrity's complaints regarding the allegedly discriminatory computer database that the Contracts require Ntegrity to utilize. Paragraph Seven specifically requires that Ntegrity utilize Verizon's processes and procedures for setting up new service and making service changes for its customers. *See* Contracts P 7. The Counterclaim alleges that Verizon discriminated against it as a competitor in the filing and pricing of its tariffs. *See* Am. Answer PP 28-32. However, the Counterclaim also states that these allegedly fraudulent tariffs were imposed on Verizon's regular customers, not solely on competing CLECs. *See id.* Ntegrity merely extrapolates what it believes it would have been overcharged if Verizon had only billed them the lowest fee contemplated by the Contracts. The same is true of Ntegrity's price discrimination claim. Ntegrity clearly states that all of Verizon's customers were subject to the same fees and alleged accounting errors that Ntegrity experienced. *See id.* PP 31-40. This allegation establishes that Verizon has not charged Ntegrity higher prices and fees than it has charged **[**45]** to its retail customers.

Additionally, the range, availability and quality of service provided by Verizon are all issues **[**46]** covered under the Contracts. *See id.* P 9.1. The interconnection agreements require Ntegrity to provide dedicated customer service to its customers and explicitly state that Verizon would not field any service or inquiry calls from Ntegrity's customers. *See id.* P 34.2. This express provision proscribes Ntegrity's complaints about Verizon's handling of Ntegrity customer inquiries. The same is true of Ntegrity's claims about the dial-around numbers it contends Verizon re-routed. The Contracts explicitly reserve the right for Verizon to "change the telephone numbers used by an end user." *Id.* P 38.3. This provision precludes Ntegrity's allegations based on Verizon's provision of service for particular numbers.

Although Ntegrity claims that the cancellation notices and billings it received were "illegal," the Counterclaim clearly establishes that those circumstances were created by the parties in the course of their negotiations under the Act. Ntegrity's complaint merely alleges that Verizon complied with the terms of the interconnection agreements that Ntegrity now finds objectionable. The Counterclaim confirms this reading because Ntegrity seeks cancellation of the contracts **[**47]** in order to discontinue "Third Party Defendants' anti-competitive conduct and violations of the Telecommunications Act under the … contracts." Am. Answer P 70. Sanctioning the use of antitrust lawsuits to resolve disputes under an interconnection agreement would invite CLECs to negotiate poor agreements and then allege antitrust violations in order to seek treble damages based on the ILECs' failings under, or, as **[*632]** in this case, compliance with those agreements. The antitrust laws were designed to promote free competition and enhance consumer access to services, not to be an end-run around legislation imposing very specific duties. Therefore, Ntegrity's antitrust claims will be dismissed.

Similarly, Ntegrity's state law antitrust claims will also be dismissed. ***HN20***[] The New Jersey antitrust statutes are to be construed consistently with federal antitrust regulations. *See* Nanavati v. Burdette Tomlin Mem. Hosp., 857 F.2d 96, 111 (3d Cir. 1988). The Pennsylvania and Maryland antitrust laws are also construed in line with the federal antitrust provisions. *See* Alvord-Polk, Inc. v. F. Schumacher & Co., 37 F.3d 996, 1014 (3d Cir. 1994);

[5] Each of the three interconnection agreements between the parties have been included in the pleadings of each plaintiff. The contract between Verizon Pennsylvania and Ntegrity was attached to plaintiff's initial Complaint, as was the contract between Verizon New Jersey and Ntegrity. Verizon Maryland included a copy of its interconnection agreement along with its Third Party Counterclaim. ***HN19***[] As these documents are relied upon and referred to by each of the Complaints and the Counterclaim, this Court may refer on the contents of these contracts in ruling on the instant motion to dismiss. *See* In re Burlington Coat Factories Securities Litigation, 114 F.3d 1410, 1426 (3d Cir. 1997). Each of the agreements are substantively similar, and the Court will refer to the collective agreements as the "Contracts" unless a specific provision varies in the context of an individual contract.

Hinkleman v. Shell Oil Co., 962 F.2d 372, 379 (4th Cir. 1992). **[**48]** Ntegrity does not offer any claims in support of its state law antitrust claims that are not proffered in support of its allegations under the federal antitrust laws. Therefore, Ntegrity's state law antitrust claims are also dismissed.

2. Ntegrity's Telecommunications Act Claim

Verizon also requests that this Court dismiss Ntegrity's allegations under *47 U.S.C. § 251 (b)* and *(c)(4)*. Verizon urges dismissal of Ntegrity's second attempt to plead a claim under the Telecommunications Act. *See* Verizon Br. at 23. The Verizon companies contend that the only authority this Court may exercise in relation to a dispute under the interconnection agreements arises when and if "a State commission makes a determination." *Id.* (quoting *47 U.S.C. § 252 (e)(6)*). Verizon maintains that Ntegrity's Counterclaim under the Act must be dismissed because they have not first attempted resolution through the state commissions. *See id.* at 24.

Ntegrity argues that it has stated a proper claim under the 1996 Act. *See id.* at 37. Defendant maintains that *sections 206* and *207* of the 1934 Telecommunications Act vest federal courts with jurisdiction to **[**49]** hear claims of violations of that act. *See* Ntegrity Br. at 35. Ntegrity asserts that Judge Thompson did not rule to the contrary in dismissing its original claim under the Telecommunications Act. *See id.* at 38. Rather, Ntegrity highlights that Judge Thompson granted it leave to re-plead its claims. *See id.* Ntegrity presumes that Judge Thompson granted defendant leave to re-plead because the Court did not find the claims to be futile. *See id.* at 39. Defendant argues that the amendments to the Act in 1996 do not operate independently of the original 1934 Act, and *sections 206* and *207* still provide a basis for a private cause of action under the Telecommunications Act. *See id.* at 40.

Ntegrity argues that it does not allege that the interconnection agreements at issue fail to meet the requirements of *sections 251* and *252* of the Act. *See id. at 42*. Rather, Ntegrity states that Verizon failed to fulfill the duties imposed by *section 251* of the Act. *See* Am. Answer PP 69-79. Ntegrity alleges that Verizon provided its own customers with better service than it provided for Ntegrity's customers. *See id. P 129*. Ntegrity complains that Verizon failed to provide **[**50]** it with the pricing information, and intentionally caused a loss of phone service to Ntegrity customers. *See id.*

HN21[] *Section 251* of the 1996 Act requires ILECs "to interconnect directly or indirectly with the facilities and equipment of other telecommunications carriers." *47 U.S.C. § 251 (a)(1)*. It also imposes the duty of resale on ILECs. *See id. § 251(c)(4)*. In providing its services, the ILEC must "offer for resale at wholesale rates any telecommunications service that **[*633]** the carrier provides at retail to subscribers who are not telecommunications carriers." *Id. § 251(c)(4)(a)*. The incumbent must do so without the imposition of unreasonable or discriminatory conditions. *See id. § 251(c)(4)(B)*.

HN22[] An ILEC may choose to fulfill the obligations set forth in *section 251* by entering into a negotiated agreement as specified in *section 252*. *See Trinko, 294 F.3d at 321*. If the parties negotiate an interconnection agreement, they may enter a binding agreement "without regard to the standards set forth in subsections (b) and (c) of *section 251*." *47 U.S.C. § 252 (a)(1)*. The Act expressly allows for agreements to be negotiated **[**51]** which do not necessarily define the same duties contemplated by *section 251*. *See Trinko, 294 F.3d at 322*. As set forth previously, Verizon negotiated with Ntegrity and agreed upon the terms of the interconnection agreements.

The Verizon companies complied with the requirements of *section 251(b)* and *(c)* by entering into a negotiated interconnection agreement with Ntegrity. *See 47 U.S.C. § 252 (a)(l)*. Upon the approval of the agreements, the duties of each party are defined by the parameters of their agreement rather than *section 251(b)* and *(c)*. *See Trinko, 294 F.3d at 323*. Ntegrity may not rely upon the general duties imposed by *section 251* to litigate around the specific language provided in the negotiated contracts. *See id.* ***HN23***[] Rather than negotiating agreements that Ntegrity now alleges are discriminatory, Ntegrity could have availed itself of the arbitration process to implement the duties enumerated under *section 251(b)* and *(c)*. *See 47 U.S.C. § 252 (b)(1)* and *(c)(1)*. Ntegrity has not stated a claim under *section 251* of the 1996 Act. [6] Therefore, plaintiffs' motion to dismiss the Counterclaim **[**52]** is granted as to Ntegrity's Telecommunications Act claim.

3. Ntegrity's State Law Claims

Finally, Verizon argues that if this Court dismisses Ntegrity's federal claims, it should also dismiss the remaining state law claims for a lack of jurisdiction because Verizon Maryland and Ntegrity are both citizens of Maryland. *See* Verizon Br. at 24. Verizon maintains **[**53]** that a dismissal of the federal question claims, and a lack of diversity, necessitates dismissal of Ntegrity's Counterclaim. *See id.* Verizon further argue that the remaining state law claims rely upon allegations similar to those asserted in support of Ntegrity's antitrust claims. *See id.* Ntegrity argues against dismissal of the state law claims. *See* Ntegrity Br. at 43. Ntegrity maintains that Verizon fails to set forth any new arguments that were not presented to this Court in the prior determination of the legal sufficiency of those claims. *See id. at 43*.

Initially, it must be noted that dismissal of the state law Counterclaims is not appropriate based on plaintiffs' suggestion of a lack of jurisdiction. ***HN25***[] As Counterclaims, Ntegrity's allegations are properly before this Court, and cannot be dismissed for the lack of an independent jurisdictional basis. *See 28 U.S.C. § 1367 (a)*. Additionally, Verizon does not provide any support for the dismissal of Ntegrity's state **[*634]** law claims beyond the reasons asserted for dismissal of the antitrust allegations.

Ntegrity alleges that Verizon violated the interconnection agreements by providing false and **[**54]** inaccurate billing. Ntegrity also alleges that Verizon failed to provide telephone service to its customers in accordance with its contracts. Finally, Ntegrity claims that Verizon contacted its customers and attempted to intercept their decision to switch to an alternate service provider. These factual allegations are sufficient to state claims for breach of contract, and tortious interference. The interconnection agreements give rise to these independent contractual obligations by virtue of their existence. The state law claims cannot be dismissed simply because they rely on the same factual allegations as the antitrust claims. [7] Therefore, Verizon's motion to dismiss is denied as to Ntegrity's remaining state law claims.

[55]** B. Ntegrity's Motion to Dismiss Verizon's Complaints

Ntegrity also moves to dismiss Verizon's collection actions for lack of standing pursuant to *Fed. R. Civ. P. 17(a)*. *See* Ntegrity Br. at 44. Ntegrity states that the original Complaints detail that Verizon Pennsylvania and Verizon New Jersey assigned their rights to enforce the contracts to Bell Atlantic Network Services ("Network Services"). *See id.* Ntegrity maintains that Network Services is the only proper plaintiff capable of prosecuting the instant collection actions. *See id.* Ntegrity argues that the Amended Complaint does not make any reference to Network Services as a plaintiff, and that this omission is fatal to the collection actions. *See id.*

Finally, Ntegrity seeks dismissal of the quasi-contractual claims. *See id. at 48*. Ntegrity argues that the existence of the contracts between the parties prevents Verizon from proceeding on an alternate theory of unjust enrichment.

---

[6] Ntegrity argues that its claim is cognizable under *sections 206* and *207* of the 1934 Act because those provisions provide for federal court jurisdiction over violations of the Act. However, as stated, ***HN24***[] Ntegrity has not properly pled violations of the *section 251*. Therefore, there is no violation of the Act which would be cognizable under *§§ 206* and *207*. This conclusion also moots the question of whether this Court may address disputes arising under interconnection agreements, or if it may only act once a state commission has made a final determination as Verizon urges. As Ntegrity has failed to state a claim, the Court does not need to reach this issue.

[7] Verizon does not argue that Ntegrity's state law claims are precluded under the Telecommunications Act. However, the Contracts between the parties specifically provide for dispute resolution by any means "that may be available under this Agreement or at law or in equity." *See* Contracts P 22. Although the issue has not been briefed by the parties, it does not appear that *section 252(e)(6)* precludes Ntegrity's state law claims. *See* ***HN26***[] *47 U.S.C. § 152* (expressly preserving antitrust and additional causes of action in light of the Act). Further, the Court notes that if Ntegrity's state law claims for breach of contract are precluded by the Telecommunications Act, Verizon's breach of contract actions would also be precluded.

See id. Ntegrity maintains that because Verizon has not alleged recision of the contract, it cannot proceed on a quasi-contractual theory. *See id.*

Verizon responds that all of the plaintiffs are subsidiaries of Verizon **[**56]** Communications, Inc., and any potential standing problem can be easily resolved. *See* Verizon Reply Brief ("Verizon Reply") at 28. In response to Ntegrity's request for dismissal of the quasi-contractual claims, Verizon states that it has pled the *quantum meruit* claim in the alternative, as is contemplated by *Federal Rule of Civil Procedure 8(a)*. *See id.* at 29. Verizon highlights that Ntegrity has justified its failure to pay the amounts due under the agreements by referring to an alleged prior breach by Verizon. *See id.* Verizon maintains that they are not seeking to alter the terms of the interconnection agreements through a quasi-contractual claim, but rather to ensure its ability to seek restitution if the contracts are deemed void. *See id.*

Federal Rule of Civil Procedure 17(a) states ***HN27***[] "every action shall be prosecuted in the name of a real party in interest." The rule also states "no action shall be dismissed on the ground that it is not **[*635]** prosecuted in the name of a real party in interest until a reasonable time has been allowed after objection for ratification of commencement of the action by, or joinder or substitution of, the real party in interest." *Fed. R. [**57] Civ. P. 17(a)*.

The purpose of requiring the real party in interest to prosecute a lawsuit is to avoid prejudice and the possibility of duplicate lawsuits. *See* *Metal Processing, Inc. v. Humm, 56 F. Supp. 2d 455, 461 (D.N.J. 1999)*. The Rule also exists to allow a defendant to set out all of its defenses in one action. *See id.* ***HN28***[] There is obviously a preference for a determination of a dispute on its merits rather than on a technicality. The facts in this case do not support dismissal under *Fed. R. Civ. P. 17(a)*. There is certainly no risk that Ntegrity might be subject to multiple actions because Verizon owns all of the claims against defendant in one form or another. Further, since the filing of Ntegrity's cross-motion to dismiss for failure to name a proper party, Verizon has filed a ratification by Network Services Inc., which was the assignee of its interest in prosecuting the collection actions. *See* Transcript of Oral Argument ("Tr.") at 30:17 - 31:1-11. Network Services has also re-assigned the collection claims to Verizon Pennsylvania and Verizon New Jersey. *See id.* at 31:2-5. This ratification and re-assignment corrects any potential issue presented **[**58]** by the Amended Complaint. Therefore, Ntegrity's *Rule 17(a)* motion is denied.

Finally, as to Ntegrity's motion to dismiss the *quantum meruit* claim, it is clear that ***HN29***[] Verizon may plead alternative causes of action. *See* *Fed. R. Civ. P. 8(e)(2)*. Verizon may state two alternative claims in order to preserve its rights, especially in light of Ntegrity's request for contract cancellation *See* Am. Answer P 70. As such, Ntegrity's motion to dismiss Verizon's *quantum meruit* claim is denied without prejudice.

III. CONCLUSION

Therefore, for the reasons expressed herein, plaintiffs' motion to dismiss is granted in part and denied in part and defendant's cross-motion to dismiss is denied. An appropriate form of Order shall be filed herewith.

GARRETT E. BROWN, JR., U.S.D.J.

ORDER

This matter having come before the Court upon the motion of the plaintiffs to dismiss defendant's Counterclaim; and upon the motion of the defendant to dismiss plaintiffs' Complaints; and the Court having considered the submissions and oral argument of the parties; and for the reasons expressed in the Memorandum Opinion filed herewith;

IT IS THIS 12th Day of August, 2002

ORDERED that plaintiffs' **[**59]** motion to dismiss [71-1] and [71-2] be and hereby is GRANTED in part and DENTED in part; and it is further

ORDERED that defendant's cross-motion to dismiss [72-1] be and hereby is DENIED.

GARRETT E. BROWN, JR., U.S.D.J.

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN1[] **Testimony, Expert Witnesses**

See *Fed. R. Evid. 702*.

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN2[] **Testimony, Expert Witnesses**

In the context of admitting expert testimony, a two-step inquiry is relevant: (1) whether the witness is qualified, and (2) if qualified, whether his opinion is reliable, in that it is based on sufficient facts and sound methodology.

Evidence > Admissibility > Expert Witnesses

Evidence > Types of Evidence > Testimony > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

Evidence > ... > Testimony > Expert Witnesses > Qualifications

HN3[] Admissibility, Expert Witnesses

In the context of admitting an expert witness' testimony, the first prerequisite demands that the witness have specialized knowledge, skill, experience, training, or education regarding the subject to which he will offer an opinion. *Fed. R. Evid. 702*. The witness' qualifications to render an expert opinion are liberally judged by *Fed. R. Evid. 702*. Indeed, when a witness's qualifications are challenged, the test for exclusion is a strict one, and the purported expert must have neither satisfactory knowledge, skill, experience, training nor education on the issue for which the opinion is proffered. One knowledgeable about a particular subject need not be precisely informed about all details of the issues raised in order to offer an opinion. However, a district court must not accept without scrutiny any witness with knowledge of a topic greater than that of a jury's.

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN4[] Testimony, Expert Witnesses

It is clear that although the first prerequisite (specialized knowledge, skill, etc.) is to be applied liberally, general business experience unrelated to antitrust economics does not render a witness qualified to offer an opinion on complicated antitrust issues such as defining relevant markets.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Scientific Evidence > Standards for Admissibility

Evidence > Types of Evidence > Testimony > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

Evidence > Admissibility > Expert Witnesses

Evidence > ... > Testimony > Expert Witnesses > Qualifications

HN5[] Expert Witnesses, Daubert Standard

In the context of admitting expert testimony, the second prerequisite to admissibility is the reliability test embodied in *Fed. R. Evid. 702* and developed through Daubert. In applying the rule, a district court acts as a gatekeeper to ensure that any and all scientific testimony is not only relevant, but reliable. Even if a witness is qualified to offer an expert opinion, that opinion can be excluded if it is based on inadequate facts or flawed methodology. Nothing in either Daubert or the Federal Rules of Evidence require a district court to admit opinion evidence that is connected to existing data only by the ipse dixit of the expert. When the assumptions made by an expert are not based on fact, the expert's testimony is likely to mislead a jury, and should be excluded by the district court.

Evidence > Admissibility > Expert Witnesses

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN6[] **Admissibility, Expert Witnesses**

In the context of admitting expert witness testimony, courts must consider whether the principles and methods used by the experts in reaching his opinions are reliable, and whether the expert has applied the principles and methods faithfully to the facts of the case. In making this assessment, a district court must make certain that an expert employs in the courtroom the same level of intellectual rigor that characterizes the practice of an expert in the relevant field.

Evidence > Admissibility > Expert Witnesses

Evidence > Types of Evidence > Testimony > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

Evidence > ... > Testimony > Expert Witnesses > Qualifications

HN7[] **Admissibility, Expert Witnesses**

In applying the admittance of expert testimony standards, a district court may exercise wide discretion in admitting or excluding proposed expert testimony. A witness's qualifications are liberally judged under *Fed. R. Evid. 702*. Of course, expert testimony in general, and a witness's qualifications in particular, also must be judged in light of the potential for the finder of fact to accept blindly the testimony of a witness who the court has qualified as an expert.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Geographic Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN8[] **Relevant Market, Geographic Market Definition**

The relevant market generally can be defined as the framework within which the competitive impact of conduct is assessed and a reliable definition of relevant market is an obvious prerequisite to determining whether a defendant has market power. A relevant market in antitrust analysis consists of a product market and a geographic market. The relevant product market identifies the products that compete with each other as defined by the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it. The relevant geographic market is defined as the area in which buyers or sellers of the product effectively compete and the area to which their customers can practicably turn for alternative sources of such products. Defining such specific product and geographic markets is no simple task.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Evidence > ... > Testimony > Expert Witnesses > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN9[] **Market Definition, Relevant Market**

Market analyses for antitrust markets generally require some expertise in the field of industrial organization. Individuals with experience in defining markets for a given product generally will not possess the skill and training of a professional economist necessary to define relevant market for antitrust purposes.

Evidence > Admissibility > Expert Witnesses

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN10[] **Admissibility, Expert Witnesses**

In the context of admitting expert testimony, the experience one has in a given trade, however extensive and however closely related to the business side of that industry, does not render one presumptively qualified to define that industry's relevant markets.

Opinion

[*531] MEMORANDUM OPINION AND ORDER

This case is before the Court on the defendants' motion to exclude the testimony of James B. Shaffer, whom the plaintiffs have designated as an expert qualified to testify to relevant matters in this case.

The plaintiffs are Berlyn, Inc. (Berlyn), Montgomery Sentinel Publishing, Inc. (Sentinel), and Kenneth C. Rossignol **[**2]** (Rossignol). Berlyn is wholly owned by Lynn Kapiloff (Kapiloff) and her husband. Kapiloff has served as the CEO and primary **[*532]** manager of Sentinel's newspapers in Montgomery and Prince George's Counties (the *Montgomery County Sentinel* and the *Prince George's Sentinel*) since December 1987. Plaintiff Rossignol publishes *St. Mary's Today,* a weekly paid newspaper published in Lexington Park, Maryland, which has a circulation of approximately 5,000, with most subscribers and advertisers located in St. Mary's County, Maryland.

The defendants in this case are The Washington Post Company (the Post), The Gazette Newspapers, Inc. (Gazette), and Baltimore Suburban Press Network, Inc. (Press Network). The Post is a publicly-held Delaware corporation. One of its operating units publishes the *Washington Post* newspaper. The Post owns all the stock of Gazette, but requires that Gazette operate as an independent entity. Gazette is a Maryland corporation that publishes approximately 44 newspapers in Montgomery, Frederick, Prince George's, Calvert, Charles, and St. Mary's Counties.

Press Network is a Delaware corporation which offers regional and national advertisers a "one contact/ one **[**3]** bill" method of placing advertising in multiple newspapers around Washington, D.C.

The plaintiffs Berlyn and Sentinel operated the *Prince George's Sentinel* in that county and received advertising clients through defendant Press Network. Eventually, Gazette launched publications in Prince George's County as well, and Press Network, which is half owned by Gazette, began recommending that advertisers direct their business to Gazette's publications instead of Sentinel's. The plaintiffs allege that the defendants' conduct amounts to an unreasonable restraint on trade, a conspiracy and an attempt to monopolize, unfair competition, breach of contract, and tortious interference. Also at issue is the defendants' acquisition of the Southern Maryland Division of The Chesapeake Publishing Company, which the plaintiffs argue resulted in a violation of Section 7 of the Clayton Act.

The events which gave rise to the plaintiffs' claims will be described with greater detail in the Opinion dealing with the defendants' motion for summary judgment, where the specific facts of this case are of greater importance. Clearly, the facts now relevant deal with Shaffer's qualifications to testify as an **[**4]** expert and the reliability of his opinions.

The defendants seek to prevent Shaffer from offering three opinions: (1) that the relevant product market, for antitrust purposes, is community newspapers and the zoned editions of metropolitan newspapers, and that the relevant geographic market is defined by county; (2) that, in a predatory pricing analysis, the value of certain of the Post's assets should be taken into account when determining whether the defendants were pricing below marginal cost; and (3) that Berlyn suffered lost profits, estimated between $ 700,000 and $ 850,000, as a result of Press Network's activities from 1997 to the present.

I. <u>Shaffer's Background</u>

Shaffer, a long-time friend of the Kapiloffs, was employed in the newspaper business from 1970 to 1998. His only employment in Maryland involved a two-year stint from 1977-1979 at Stromberg Publications, the publisher of 13 weekly newspapers in Baltimore, Carroll, and Howard Counties. He considers himself an expert in the business side of the newspaper business.

Shaffer is not an economist or attorney by education, training, or experience, and, upon his first deposition in November, 2001, he had almost no **[**5]** knowledge of antitrust economics. His undergraduate degree **[*533]** was in engineering. He took a few economics courses between 1967-1969, after which he received a master's degree in business administration with a financial specialty from Indiana University. He has no other training in economics.

Shaffer has never published anything related to economics or the law of antitrust, nor has he taught any courses in either field. He subscribes to no journals (and, upon his first deposition, knew of no journals) that cover <u>***antitrust law***</u> or antitrust economics. He did not know what journals might be helpful in a case like this. He has read only the articles provided to him by plaintiffs' counsel.

Before this case, Shaffer had never performed a relevant market analysis. He was not conversant with economic formulae; he said if he spent enough time, he thought he "could figure [them] out," but that he would have to "go back to … college textbooks and dig out some of the chapters on those kinds of equations." He was unfamiliar with basic terminology and concepts used by economists who deal with antitrust issues. Shaffer has never testified as an expert in economics or antitrust damages, and he has **[**6]** never been qualified as an expert on any subject in any court.

Shaffer, however, has performed and reviewed predatory pricing analyses for major national newspapers throughout his career. His positions with these newspapers were prominent, requiring a high level of business and financial sophistication. Shaffer served, for example, as Vice President and Chief Financial Officer (CFO) of The Los Angeles Times, Executive Vice President and CFO of the Sun Times Company (Chicago), and Chief Executive of Guy Gannett Communications. Shaffer also has taught media economics and newspaper costs and pricing structures at various colleges and universities throughout his career.

II. A Brief History of Shaffer's Relevant Market Opinion

Shaffer's first opinion, dealing with relevant market, and his knowledge of that subject have evolved over the course of litigation. At his first deposition on November 20, 2001, Shaffer demonstrated that he had just recently been exposed to antitrust economics and was unfamiliar with several economic terms. [1] Shaffer **[*534]** Dep. I at 165. Shaffer indicated, however, that he intended to study materials dealing with economics and relevant markets furnished to **[**7]** him by plaintiffs. On March 15, 2002, after this first deposition, Shaffer submitted an affidavit concluding that "the relevant product market for purposes of pricing and monopolization analysis [is] the market consisting of weekly community papers and the weekly zoned editions of daily papers, and that the relevant geographic market [is], in this instance, a market defined by county." Shaffer Aff. I at 3, P 11. From all outward appearances, Shaffer made this conclusion based on a simple review of documents: "Subsequent inspection of the newspapers concerned and of documents confirms this view, as do recognized studies." *Id.*

[8]** After offering this opinion, Shaffer was deposed again, and he admittedly was just beginning to learn how to approach the questions of this case from an economist's viewpoint. Shaffer Aff. II at 116. Shaffer had not done any independent research on relevant markets and was relying on the plaintiffs' attorneys to furnish him with economic literature to study. *Id.* at 116-17.

Finally, after the defendants challenged his qualifications, Shaffer submitted a supplemental affidavit. This affidavit again expressed his conclusion that the relevant markets were community newspapers and the zoned editions of metropolitan newspapers (product market) and individual counties (geographic market). Although he had already

---

[1] Shaffer's deposition testimony makes clear that it wasn't until just days before being deposed that he had ever read about some of the crucial economic issues in this case. When asked to "define the relevant market for antitrust purposes," Shaffer replied, "You asked that question, and I was asking for some definition, because I know of relevant market … primarily from what I read of the materials that you saw earlier, so you're basically asking me to parrot … back something that I've just learned just over the last few days." Shaffer Dep. I at 215. Shaffer's lack of knowledge as to other specific economic issues was apparent later in the deposition:

> Q. What is a diversion ratio for market definition purposes?
>
> A. I don't know.
>
> Q. Have you ever heard of the Elzinga-Hogarty procedure for a geographic market definition?
>
> A. I have not.
>
> Q. Do you know what the price correlation test for market definition is?
>
> A. No.
>
> Q. Do you know how an economist would define market power?
>
> A. I read some things about that in the material that you saw this morning, and from that I can tell you I do not know how an economist would define it, but I intend to investigate that further.
>
> Q. Do you know how an economist goes about diagnosing the presence or absence of market power?
>
> A. No. Although, again, I did see some tests. I mean, you will see in that literature that you saw this morning there will be tests that give some bullet points about the presence or absence of market power, and so I would - I'm not an economist, but I would start with that list.
>
> Q. I take it you're not familiar, then, other than what you've read, or what you were supplied with by Mr. Sykes, with any standard reference literature on the presence or absence of market power; is that correct?
>
> A. Correct.

Id. at 226-28.

reached this conclusion in his first affidavit, he explained in this second affidavit that, since his first two depositions, he had reviewed numerous deposition transcripts and exhibits submitted during discovery in this case.

III. Standards for Admitting Expert Testimony

Under *Federal Rule of Evidence 702*, if

> ***HN1***[] specialized knowledge will assist the trier of fact to understand the evidence or to determine a fact in issue, a witness qualified as an expert by knowledge, **[**9]** skill, experience, training, or education, may testify thereto in the form of an opinion or otherwise, if (1) the testimony is based upon sufficient facts or data, (2) the testimony is the product of reliable principles and methods, and (3) the witness has applied the principles and methods reliably to the facts of the case.

In short, ***HN2***[] a two-step inquiry is relevant here: (1) whether the witness is qualified, and (2) if qualified, whether his opinion is reliable, in that it is based on sufficient facts and sound methodology.

(A) Witness Qualifications

HN3[] This first prerequisite demands that the witness have specialized "knowledge, skill, experience, training, or education" regarding the subject to which he will offer an opinion. *FED. R. EVID. 702*. As the Fourth Circuit has pointed out, "the witness' qualifications to render an expert opinion are … liberally judged by *Rule 702*." *Kopf v. Skyrm, 993 F.2d 374, 377 (4th Cir. 1993)*. Indeed, when a witness's qualifications are challenged,

> the test for exclusion is a strict one, and the purported expert must have neither satisfactory knowledge, skill, experience, training nor education on the issue for **[**10]** which the opinion is proffered. One knowledgeable about a particular subject **[*535]** need not be precisely informed about all details of the issues raised in order to offer an opinion.

Thomas Kline, Inc. v. Lorillard, Inc., 878 F.2d 791, 799 (4th Cir. 1989).

However, the Court must not accept without scrutiny any witness with knowledge of a topic greater than that of the jury's. In *Kline* -- a case particularly relevant here due to its convergence of expert testimony and antitrust issues -- the Fourth Circuit held that the trial court abused its discretion in permitting a witness to testify as to whether the defendant's shift in credit practices was unjustified credit discrimination and price discrimination under § 13(a) of the Robinson-Patman Act. *Id.* The witness (who was employed as a professional expert) held a master's degree in business administration, but was not an economist. *Id.* She had published only one article in her career, but the piece had no relevance to the issues on which she was to testify. *Id.* Her work experience and experience as an expert witness had only tenuous relation to credit decisions and antitrust. *Id.* Moreover, she **[**11]** was admittedly unfamiliar with certain basic concepts related to credit discrimination. *Id.*

In reversing the trial court, the Fourth Circuit explained:

> Certainly no single one of these facts disqualifies [the witness] from giving opinions about the legitimacy of the justifications for [the defendant's] credit decisions. In combination, however, they lead us to the conclusion that this witness cannot satisfy even the minimal requirements of *FED. R. EVID. 702*. There was no indication, for example, that [her] general business education included *any* training in the area of antitrust or credit. Similarly, [the witness] admitted that she lacked *any* other experience in such matters. Although it would be incorrect to conclude that [her] occupation as a professional expert alone requires exclusion of her testimony, it would be absurd to conclude that one can become an expert simply by accumulating experience in testifying.

Id. at 800.

Kline was recently examined in *Virginia Vermiculite, Ltd. v. W.R. Grace & Co.-Conn. & the Historic Green Springs, Inc., 98 F. Supp. 2d 729 (W.D. Va. 2000)*. In that case, the district **[**12]** court held that a proposed expert was unqualified to offer an opinion as to relevant market due to his lack of training and expertise in economics and antitrust and that the proposed expert's testimony was unreliable due to methodological flaws. *See* id. at 732-35, 736-40. The plaintiffs (competitors of the defendant mining company) sued on state and federal antitrust grounds. The plaintiffs designated Mr. Seth Schwartz as a purported expert witness on market analyses, and Schwartz offered an expert opinion as to the relevant market for antitrust purposes. Schwartz's educational background was in geological engineering, which included a course in "micro-macro mineral economics." He had "devoted most of his professional career to advising energy companies about various matters, some of which required [him] to perform market research analyses, including identifying and forecasting prices as well as business analyses for investment decisions." Id. at 730. In his business role, Schwartz had prepared market analyses for numerous businesses, which were used "to define a market for investment purposes to best understand the ability to earn profits on different **[**13]** investments in different market situations." Id. at 732. Although Schwartz had testified as an expert in numerous non-antitrust cases, "none of these cases involved antitrust **[*536]** matters requiring the rigorous defining of a relevant market." *Id.*

As to Schwartz's education, the court explained that "though the curriculum of geological engineering, including [the] sole course in mineral economics, may provide some insight to vermiculite mining and the constraints of a market …, this curriculum cannot be assumed to provide its graduates with an economics background necessary to define a relevant market in an antitrust case." *Id.* As for Schwartz's experience in generating market analyses, the court explained that "though related to a relevant market determination in an antitrust issue, there are differences between an analysis for business investment and an analysis for antitrust purposes." *Id.* Relying on *Kline,* the court found that Schwartz lacked the necessary qualifications to testify as an expert on antitrust issues.

Thus, **HN4**[] it is clear that although this first prerequisite (specialized knowledge, skill, etc.) is to be applied liberally, general business **[**14]** experience unrelated to antitrust economics does not render a witness qualified to offer an opinion on complicated antitrust issues such as defining relevant markets.

(B) Reliability of the Opinion

HN5[] The second prerequisite to admissibility is the reliability test embodied in Rule 702 and recently developed through Daubert v. Merrell Dow Pharmaceuticals, Inc., 509 U.S. 579, 125 L. Ed. 2d 469, 113 S. Ct. 2786 (1993), and Kumho Tire Co. v. Carmichael, 526 U.S. 137, 143 L. Ed. 2d 238, 119 S. Ct. 1167 (1999). In applying this rule, the Court acts as a gatekeeper to "ensure that any and all scientific testimony … is not only relevant, but reliable." Daubert, 509 U.S. at 588; *see* Kumho, 526 U.S. at 141 (holding that *Daubert* "applies not only to testimony based on 'scientific' knowledge, but also to testimony based on 'technical' and 'other specialized' knowledge"). Even if a witness is qualified to offer an expert opinion, that opinion can be excluded if it is based on inadequate facts or flawed methodology. As noted by the Supreme Court, "nothing in either *Daubert* or the Federal Rules of Evidence requires **[**15]** a district court to admit opinion evidence that is connected to existing data only by the *ipse dixit* of the expert." Gen. Elec. Co. v. Joiner, 522 U.S. 136, 146, 139 L. Ed. 2d 508, 118 S. Ct. 512 (1997). The Fourth Circuit has explained further that "when the assumptions made by an expert are not based on fact, the expert's testimony is likely to mislead a jury, and should be excluded by the district court." Tyger Constr. Co. v. Pensacola Constr. Co., 29 F.3d 137, 144 (4th Cir. 1994).

HN6[] Courts also must consider whether the principles and methods used by the experts in reaching his opinions are reliable, and whether the expert has applied the principles and methods faithfully to the facts of the case. In making this assessment, this Court must "make certain that an expert … employs in the courtroom the same level of intellectual rigor that characterizes the practice of an expert in the relevant field." Cooper v. Smith & Nephew, Inc., 259 F.3d 194, 200 (4th Cir. 2001) (quoting Kumho, 526 U.S. at 152)).

IV. The Court's Discretion

HN7[] In applying the above standards, this Court may exercise wide discretion **[**16]** in admitting or excluding proposed expert testimony. *See* Gen. Elec. Co., 522 U.S. at 142; United States v. Dorsey, 45 F.3d 809, 814 (4th Cir. 1995). As noted above, a witness's qualifications are liberally judged under Rule 702. *See* Kopf, 993 F.2d at 377. Indeed, Rule 702 was drafted **[*537]** and adopted "to relax traditional barriers to expert opinion testimony." 4 JACK B. WEINSTEIN & MARGARET A. BERGER, WEINSTEIN'S FEDERAL EVIDENCE § 702.02[1] (2002). Of course, expert testimony in general, and a witness's qualifications in particular, also must be judged in light of the potential for the finder of fact to accept blindly the testimony of a witness who the Court has qualified as an expert. *See* Daubert, 509 U.S. at 595 ("Expert evidence can be both powerful and quite misleading because of the difficulty in evaluating it. Because of this risk, the judge in weighing possible prejudice against probative force under Rule 403 of the present rules exercises more control over experts than over lay witnesses." (citation omitted)); Dorsey, 45 F.3d at 815-16 (quoting *Daubert*).

With this evidentiary framework **[**17]** in mind, the Court now must consider whether Shaffer may offer the opinions in dispute.

V. Shaffer's Relevant Market Opinion

Defining the relevant market is essential to the plaintiffs' antitrust claims. **HN8**[] The relevant market generally can be defined as the "framework within which the competitive impact of conduct is assessed." 2 JULIAN O. VON KALINOWSKI, ANTITRUST LAWS AND TRADE REGULATION § 24.01[1] (2002), and a reliable definition of relevant market is an obvious prerequisite to determining whether a defendant has market power. A relevant market in antitrust analysis consists of a product market and a geographic market. The relevant product market identifies the products that compete with each other as defined by "the reasonable interchangeability of use or the cross-elasticity of demand between the product itself and substitutes for it." Brown Shoe Co. v. United States, 370 U.S. 294, 325, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962). The relevant geographic market is defined as "the area in which buyers or sellers of the product effectively compete," Consul, Ltd. v. Transco Energy Co., 805 F.2d 490, 495 (4th Cir. 1986), and the area "to which **[**18]** their customers could practicably turn for alternative sources of such products." M & M Med. Supplies & Serv. v. Pleasant Valley Hosp., 981 F.2d 160, 170 (4th Cir. 1993). Defining such specific product and geographic markets is no simple task. *See, e.g.,* Cogan v. Harford Memorial Hosp., 843 F. Supp. 1013, 1020 (D. Md. 1994) ("To allow a jury to make a finding as to the geographic market, [the plaintiff] must provide the Court with expert testimony on this highly technical economic question."); Victus, Ltd. v. Collezione Europa U.S.A., Inc., 26 F. Supp. 2d 772, 786 (M.D.N.C. 1998) (noting that defining relevant product markets is a "difficult economic question").

Shaffer's proposed opinion, which he set forth in his first affidavit of March 15, 2002, and reaffirmed in his second affidavit of June 11, 2002, is "that the relevant product market for purposes of pricing and monopolization analysis was the market consisting of weekly community papers and the weekly zoned editions of daily newspapers, and that the relevant geographic market was, in this instance, a market defined by county." Shaffer Aff. I, at 3, P 11.

Shaffer is not **[**19]** qualified to offer this opinion. Shaffer's background is completely devoid of specific education, training, or experience in economics or antitrust analysis. His education is in engineering and business administration. Admittedly, his experience is in "the business side of the newspaper industry," and not in antitrust or economic analysis. He has never performed a relevant market analysis for antitrust purposes, and at the time he was retained as an expert in this case, he was **[*538]** entirely unaware of how an economist would perform such a study. Clearly, Shaffer cannot qualify under the general requirements of Rule 702, which requires "knowledge, skill, experience, training or education."

Nor can Shaffer survive under any reading of *Thomas Kline, Inc., supra,* in which the Fourth Circuit held that it was an abuse of the trial court's discretion to allow a witness to offer expert testimony as to unlawful credit practices when the witness only had a master's degree in business administration and no personal experience in making credit decisions. 878 F.2d at 799-800. This case is clearly analogous as the plaintiff intends to establish relevant market through Shaffer, **[**20]** whose highest level of education is an MBA, who has minimal formal training in applied economics, and who admittedly has no experience in performing relevant market analyses. *See also* Va. Vermiculite, 98 F. Supp. 2d at 733 (**HN9**[] "Market analyses for antitrust markets generally require some expertise in the field of industrial organization. Individuals with experience in defining markets for [a given product] generally would not possess the skill and training of a professional economist necessary to define relevant market for antitrust purposes.").

Plaintiffs assert that Shaffer has taught "media economics" at various colleges, universities, or professional schools of journalism. There is, however, no evidence that such courses involved analysis of relevant markets for antitrust purposes. Moreover, unlike this Court, these institutions need not apply the criteria of *Rule 702* in deciding who will teach their students.

Shaffer's extensive background in the publishing industry certainly qualifies him to offer expert opinions as to the "business side of the newspaper industry." However, it does not give him license to offer opinions as to antitrust economics and relevant **[**21]** market analysis simply because these topics relate to newspapers in this particular case. ***HN10***[] The experience one has in a given trade, however extensive and however closely related to the "business side" of that industry, does not render one presumptively qualified to define that industry's relevant markets. *See* *Thomas Kline, Inc., 878 F.2d at 799-800*; *Va. Vermiculite, 98 F. Supp. 2d. at 732-33, 736*.

It is clear from the record that the plaintiffs anticipated that Shaffer would be able to learn the necessary mechanics of performing a relevant market analysis simply by reviewing the texts and articles they presented him. This clearly is a flawed approach, considering that Shaffer has had no formal training or actual experience in the area. Shaffer's experience in the publishing industry and his training and education in business does not make him especially capable of becoming an expert and learning the complex mechanics of antitrust economics within a few days (Shaffer stated in his second deposition that he worked ten days on this case, and that half of that time was devoted to work on his damages analysis, Shaffer Dep. II at 99-100). To accept Shaffer **[**22]** as an expert on this issue would be to recognize that, with minimal training and experience in antitrust economics, a person can *become* qualified to offer an expert opinion on the complex topic of defining relevant markets by applying himself to the topic for five or fewer days. The Court makes no such finding, and, for the reasons stated above, concludes that Shaffer is entirely unqualified to offer an opinion as to market definition.

Even if Shaffer were properly qualified by knowledge, skill, experience, training, or education, the plaintiffs have offered no evidence to show that his opinion is based on proper facts and data and that **[*539]** his methods in forming his opinion are reliable. Shaffer initially set forth his opinion as to the relevant product market in his first affidavit of March 15, 2002. According, to his second deposition, however, which took place on April 4, 2002, this conclusion was based on extremely thin and unscientific data. Shaffer based this opinion to a great extent on his own experience in the newspaper industry, drawing on instinct and intuition to patch holes in his methodology that properly should be filled with specific facts, research, and established **[**23]** economic principles.

Plaintiffs now argue that the lack of data at that time is moot because Shaffer now has reaffirmed these conclusions, after reviewing portions of deposition testimony and exhibits produced in discovery. According to the plaintiffs' opposition and Shaffer's final conclusion as set forth in his supplemental affidavit, his final opinions as to relevant market were based on: (1) review of the deposition testimony of several witnesses in this case, most of whom work for the Post or Gazette; (2) review of market studies completed by the defendants; (3) a visual review of the newspapers involved; and (4) unspecified "independent market analyses." All of this was colored by (indeed it relies upon) Shaffer's extensive experience in the publishing industry and his recent review of economics articles provided to him by the plaintiffs. The plaintiffs make no reasonable attempt to explain how this is a reliable methodology for defining a precise product or geographical market. Indeed, the lack of any specific and independent market research seems to indicate a decidedly unreliable route to determining the specific outer boundaries of markets. *See, e.g.,* *Va. Vermiculite, 98 F. Supp. 2d at 736-37* **[**24]** (discussing the complex research methods typically utilized in defining relevant markets); *Victus, Ltd., 26 F. Supp. 2d at 786* (same). Plaintiffs have offered no evidence that the methods Shaffer drew upon to reach his ultimate conclusion are of the type that other experts would use to determine the relevant markets in an antitrust case.

The plaintiffs make much of statements in the *defendants'* internal memoranda and deposition testimony which indicate that the defendants' independent market research reaches the same conclusion as Shaffer as to market definition. There is no indication, however, of the methods used to reach these conclusions or whether these market surveys were compiled with an eye toward determining relevant market *for antitrust purposes.* [2] To the extent that Shaffer relied on market research done by defendants or statements by the defendants regarding their perceptions of competition, market, and the like, there is no indication that these assessments were based on proper research methods.

[25]** In sum, aside from drawing on his own experience when reviewing the discovery materials in this case, Shaffer's methods are wholly lacking in independent research. There is absolutely no evidence now before the Court that indicates that Shaffer's opinion is the product of reliable **[*540]** principles and methods, and is based upon sufficient facts or data. For these reasons, the Court will exclude Shaffer's proposed opinions as to relevant product and geographic markets, and, thus, market power *vel non.*

VI. Shaffer's Pricing Opinion

The defendant also claims that the Court should exclude the following opinion:

> Assuming The Post purchased its presses and equipment partly for the purpose of zoning legal advertisements, then (a) an unspecified portion of the press and equipment costs should be considered in determining whether The Post's pricing for certain trustee advertisements was above marginal costs, and (b) The Post's pricing for trustee advertisements in Washington, D.C. for an unspecified period of time would not be above marginal costs."

Def.'s Mot. to Exclude at 8 (citing Shaffer Depo. II at 149-50).

Shaffer is qualified to offer his opinion as to pricing **[**26]** below marginal costs, which is relevant to plaintiffs' claims of predatory behavior. Shaffer has conducted and reviewed predatory pricing analyses for several major publications. He has studied finance and business administration and has served as a senior financial executive for several prominent companies. Moreover, from a review of the record, it appears that Shaffer's teaching experiences specifically deal with topics such as newspaper costs and price structuring. He is thus qualified by training and experience to offer the above opinion.

As for Shaffer's methods, the defendants identify specific steps which they believe Shaffer should have taken in reaching his conclusion. Defendants also note, not surprisingly, that their retained expert, Mr. Kenneth Baseman, disagrees with Shaffer's analysis. However, the defendants do not identify any widely-accepted tests for determining marginal costs, nor do they specifically substantiate that Shaffer's methodology as a whole is completely without rational basis. In short, although defendants disagree with Shaffer's methods and conclusions as to determining marginal costs, they have not convinced this Court that said conclusions are unreliable **[**27]** as a matter of law.

VII. Shaffer's Lost Profits Opinion

Finally, the defendants argue against the admissibility of Shaffer's opinion as to Berlyn's lost profits as a result of Press Network's actions. Shaffer concluded that Berlyn's lost profits, depending on certain assumptions, could be estimated at $ 700,000 to $ 852,000. These figures represent the amount Berlyn would have made but for the actions of Press Network, which, according to the plaintiffs, wrongfully directed advertisers away from Berlyn's publications and toward Gazette.

Shaffer is objectively qualified to offer an opinion as to lost profits, essentially for the same reasons he is qualified to discuss pricing below marginal cost. Shaffer has spent most of his career dealing with the financial aspects of the newspaper industry, has obtained a graduate MBA, and has taught on the business aspects of publishing

---

[2] *See* Va. Vermiculite, 98 F. Supp. 2d at 732-33 ("Though related to a relevant market determination in an antitrust issue, there are differences between an analysis for business investment and an analysis for antitrust purposes. For one, market analyses performed for business usually provide information regarding the various places a product would be sold, uses for which it might be sold, and the regions in which it might be traded. These analyses do not go into the detail required for antitrust matters. For instance, defining where a product could be sold is only a small part of defining a geographic market as there can be relevant markets that are narrower or broader than where individual producers sell their products.").

throughout his career. These qualifications render him capable under *FED. R. EVID. 702* to offer opinion evidence on general financial matters of newspaper business, including projected profits.

The defendants focus their challenge on Shaffer's methodology in reaching his lost-profits opinion. As with **[**28]** the "predatory pricing" opinion, the defendants identify alleged flaws which, they argue, lead to inaccurate assessments of damages. This Court, however, finds no specific flaw in Shaffer's methodology that renders his **[*541]** analysis of lost profits unreliable as a matter of law. Shaffer's opinion cannot be excluded simply because the defendants' expert has reached a different conclusion or applied different methods for assessing damages. Certainly, the defendants may argue and present evidence showing that theirs is a more accurate statement of damages, but, at this time, the Court is not persuaded to exercise its discretion and to exclude the testimony in its entirety.

CONCLUSION

For the reasons stated above, it is hereby ORDERED that the defendants' motion to exclude the expert testimony of James B. Shaffer BE, and it hereby IS, GRANTED IN PART and DENIED IN PART as stated above.

MEMORANDUM AND ORDER RE: CROSS-MOTIONS FOR SUMMARY JUDGMENT (PART TWO: Re: § 1 PER SE & QUICK-LOOK LIABILITY)

I. Introduction

This matter is before the court on the parties' cross-motions for summary judgment. The motions came on regularly for hearing on December 10, 2001. On May 21, 2002, we issued an order with respect to Plaintiffs' standing against SRI. We hereby adopt Sections II (Procedural History), III (Undisputed Facts), IV (Summary Judgment), and V.A (Antitrust Conspiracy Cases) of that May 21, 2002 order. We now rule on the remaining issues after considering the joint briefs, all pertinent papers, the evidence, and oral argument:

II. Per se and/or Quick-Look Antitrust Liability

The parties divide per se and/or quick-look liability into two subissues: (1) "Are Equilon and Motiva integrated such that SRI, Shell and Texaco are not subject **[*3]** to per se or "quick look" liability?" (2) "Are Equilon's and Motiva's claimed efficiencies sufficient such that SRI, Shell and Texaco are not subject to per se or quick look liability?" Joint Argument at i.

The parties appear to have borrowed this formulation from language in our *Rule 12(b)(6)* order. At that stage, we accepted Plaintiffs' allegations as true and identified any possible factual basis for § 1 per se or quick-look liability. That categorical framework is not as helpful at the summary judgment stage. We can now analyze the relevant legal principles in the context of a significant body of evidence.

In light of the admitted cost savings and significant commitment of resources into what appear to be legitimate joint ventures, joint Fact PP39, 48, we address two ultimate questions: (1) whether a reasonable trier of fact could conclude that Equilon and Motiva are either mere window-dressings for a price fixing conspiracy or (2) whether they are otherwise patently anticompetitive.

Since Plaintiffs waived any reliance on the rule of reason, we will not weigh all of the claimed benefits and purported anticompetitive effects to determine if the anticompetitive effects predominate. **[*4]** See, e.g., *Cal. Dental Ass'n v. FTC, 224 F.3d 942, 947 (9th Cir. 2000)*; *Tanaka v. Univ. of S. Cal., 252 F.3d 1059, 1063 (9th Cir. 2001)* (describing shifting burdens under rule of reason). The question is not whether Defendants violated § 1, but whether their conduct falls under the exceptional § 1 per se or quick-look doctrines. Moreover, Plaintiffs abandoned the per se or quick-look theory of market division.

A. Per se Analysis

To establish per se liability, Plaintiffs must do more than prove that Equilon and Motiva "more likely than not" affected competition negatively. *Am. Ad Mgmt. v. GTE Corp., 92 F.3d 781, 787 (9th Cir. 1996)*. The "per se approach can only be applied to an agreement which 'facially appears to be one that would almost always tend to restrict competition and decrease output.'" Id. (quoting *National Collegiate Athletic Ass'n v. Board of Regents, 468 U.S. 85, 100, 104 S. Ct. 2948, 82 L. Ed. 2d 70 (1984))*; see also *Eichorn v. AT&T Corp., 248 F.3d 131, 138 (3d Cir. 2001)* ("0n its face, [it] has 'no purpose except stifling competition.'"). Stated another way, if the conduct "does not invariably have anticompetitive **[*5]** effects," we will not condemn it under a per se analysis. *United States v. United States Gypsum Co., 438 U.S. 422, 441, 98 S. Ct. 2864, 57 L. Ed. 2d 854 & n.16 (1978)*; see also 1 Von Kalinowski et al., Antitrust Laws and Trade Regulation § 13.04, at 13-21 (2d ed. 1996).

For example, true price fixing is so "plainly anticompetetive," and so lacking in "any redeeming virtue," that we automatically condemn such arrangements as presumptively unreasonable. *Broadcast Music, Inc. v. Columbia Broadcasting System, Inc., 441 U.S. 1, 8, 99 S. Ct. 1551, 60 L. Ed. 2d 1 (1979)*; *NCAA, 468 U.S. at 100*; see also *Eichorn, 248 F.3d at 142-43*. Courts have repeatedly treated horizontal price fixing among competitors as per se violations. *Big Bear Lodging Ass'n v. Snow Summit, Inc., 182 F.3d 1096, 1101 (9th Cir. 1999)*.

However, the concept of "price fixing" cannot be applied literally. *BMI, 441 U.S. at 9*. Price fixing "will often, but not always, be a simple matter." Id. "When two partners set the price of their goods or services they are literally 'price fixing,' but they are not per se in violation of the Sherman Act." Id. Efficient joint ventures often entail agreements on prices **[*6]** and output as well as restrictions on competition, yet do not violate the prohibition against price fixing. See XI Herbert Hovenkamp, ***Antitrust Law***: An Analysis of Antitrust Principles and Their Application ("Hovenkamp") P1908, at 229-30 (1998).

If an agreement arguably promotes efficiency or productivity at the time adopted, we should apply the rule of reason and perform a more discriminating assessment. *Polk Bros., Inc. v. Forest City Enters., 776 F.2d 185, 189 (7th Cir. 1985)*. For example, competitors should be free to combine resources to create products that each could not develop alone. See *BMI, 441 U.S. at 23*. The joint operation may administratively require former competitors to set a single price, but this does not indicate a naked price fixing restraint. The price fixing is "merely ancillary to the main purpose" of producing the new product. See id.

Thus, the per se rule is less likely to apply when an agreement to set prices or impose some other restraint is part of a joint venture "in which persons who would otherwise be competitors pool their capital and share the risks of loss as well as the opportunities for profit." *Ariz. v. Maricopa County Med. Soc'y, 457 U.S. 332, 356-57, 102 S. Ct. 2466, 73 L. Ed. 2d 48 (1982)*; **[*7]** see also *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984)* (noting joint ventures are usually subject to rule of reason analysis since they unlock potential efficiencies); *Addamax Corp. v. Open Software Found., 152 F.3d 48, 52 (1st Cir. 1998)* ("Joint venture enterprises . . . unless they amount to complete shams, are rarely susceptible to per se treatment."); XIII Hovenkamp P2100g, at 14 ("In our relatively open market system we begin with the premise that joint productive activity is socially valuable and it is not antitrust's job to 'approve' joint ventures.").

Because per se violations settle the question of liability without any inquiry into anticompetitive impact, the Supreme Court has cautioned against expanding the per se rule to new business arrangements with which we have little experience. *State Oil Co. v. Khan, 522 U.S. 3, 10, 118 S. Ct. 275, 139 L. Ed. 2d 199 (1997)* (citing *Fed. Trade Comm'n v. Ind. Fed'n of Dentists, 476 U.S. 447, 458-59, 106 S. Ct. 2009, 90 L. Ed. 2d 445 (1986))*. "Where the conduct at issue is not garden-variety . . ., we have eschewed a per se rule and instead have utilized a rule of reason analysis. **[*8]** " *Metro Indus. v. Sammi Corp., 82 F.3d 839, 844 (9th Cir. 1996)*; see also *Am. Ad Mgmt., 92 F.3d at 784*. As a result, when conduct falls outside typical per se categories of "horizontal price fixing, division of markets, group boycotts, tying arrangements, and output limitations," we generally apply a rule of reason analysis. See *Am. Ad Mgmt., 92 F.3d at 784*; *Big Bear Lodging Ass'n, 182 F.3d at 1101*.

B. Quick-Look Analysis

Conduct outside the narrow per se categories can be condemned short of a full rule of reason analysis if "an observer with even a rudimentary understanding of economics could conclude that the arrangements in question would have an anticompetitive effect on customers and markets." *Cal. Dental Ass'n v. FTC, 526 U.S. 756, 770, 119 S. Ct. 1604, 143 L. Ed. 2d 935 (1999)*. Much like per se treatment, quick-look analysis applies "when the great likelihood of anticompetitive effects can easily be ascertained." Id. Our experience with such combinations must be so clear that we can confidently conclude the principal result will be anticompetitive. *Id. at 781*. If the potential **[*9]** anticompetitive effects are "far from intuitively obvious," we resort to a complete rule of reason analysis. *Id. at 759*.

C. **Initial Assessment of Evidence** [1]

Several undisputed facts appear to foreclose the conclusion that Equilon and Motiva are nothing but window-dressings for an old-fashioned price fixing cartel or are otherwise patently anticompetitive. Though the parties dispute the exact extent of integration, both ventures control significant refining and marketing assets. See Joint Facts P48. Both entail risk sharing based on the Defendants' respective capital investments. Id. PP43, 47; see also *Maricopa County, 457 U.S. at 356-57*. Both have in fact achieved cost savings, Pls.' Facts PP39-41, and each manufactures and markets **[*10]** branded gasoline. Joint Facts PP10, 42, 45, 53. In other words, Equilon and

---

[1] The parties address per se and quick-look together in their analysis. We do the same to avoid needless repetition and because the principles are substantially similar. See *Cal. Dental. Ass'n, 526 U.S. at 779*.

Motiva have achieved their parents' stated goals. On its face then, the undisputed evidence shows potential and realized efficiencies occurring within functioning and integrated enterprises.

Plaintiffs contend that every combination, whether efficient or anticompetitive, realizes cost savings from "closing offices, eliminating positions, and avoiding capital expenditures . . . ." Joint Argument at 25-26. Plaintiffs argue that Defendants cannot avoid per se or quick-look liability by identifying cost savings alone. However, businesses regularly combine resources to realize cost savings through elimination of redundant workers, capital, and overhead expenses. See, e.g., Fed. Trade Comm'n and U.S. Dep't of Justice, 1992 Horizontal Merger Guidelines § 4 (revised April 8, 1997); XIII Hovenkamp P2100, at 4, P2121b, at 117. So long as the newly formed business maintains a comparable level of production, it makes more efficient use of the remaining resources. Here, we have no evidence that Defendants decreased their overall level of production after forming Equilon and Motiva.

In any event, the undisputed evidence **[*11]** shows that Defendants anticipated operating efficiencies beyond cost savings alone. Defendants predicted that Equilon and Motiva would benefit from greater economies of scale. See, e.g., Vol 2, Tab 3 at 35; Vol. 3, Tab 25 at 820-21. The physical proximity of some refineries meant Defendants could improve overall efficiency through, among other things, the sharing of inputs and transportation costs. See, e.g., Defs.' Vol. 1, Tab 11 at 242, Tab 12 at 280; Vol. 2, Tab 19 at 454; Vol. 3, Tab 25 at 819, 844. Defendants also expected to tap into the capacity of previously unused pipelines, simultaneously eliminating the need to rely on third-party carriers. See, e.g., Defs.' Vol. 3, Tab 25 at 854, Tab 35 at 1205. Though in some instances Defendants expected to close refineries, those refineries were operating well below capacity, allowing Defendants to increase the efficiency of the remaining ones. See, e.g., Tab 25 at 843, Tab 29 at 971.

In addition to improved use of physical resources, Defendants anticipated economic benefits from an expanded knowledge base. They anticipated reductions in the number of plant failures from exchanges regarding best practices. See, e. **[*12]** g., Defs.' Vol. 3, Tab 25 at 791, 822-23. Defendants also could share knowledge and technologies acquired through research and development programs. See, e.g., id. at 809. Consequently, the claimed savings from forming Equilon and Motiva did not relate solely to the elimination of redundant costs.

Plaintiffs next argue that all such cost savings and efficiencies are legally irrelevant in the context of anticompetitive combinations. Joint Argument at 26. However, this argument takes for granted the existence of a per se or quick-look violation. [2] Unless and until Plaintiffs establish a per se or quick look violation, such as price fixing, we cannot categorically ignore identified and realized efficiencies. See, e.g., *Copperweld, 467 U.S. at 768*; *Polk Bros., 776 F.2d at 189*.

[*13] D. Plaintiffs' Arguments

1. Plaintiffs' Price Fixing Theory

Plaintiffs approach the question of price fixing too literally. Though Equilon and Motiva charge different prices for Shell and Texaco branded gasoline, according to Plaintiffs, both "fix" prices because each has decided to price the brands together. As a hypothetical, Equilon may sell Shell and Texaco branded gasoline for $ 1.50 a gallon, while Motiva sells the same gallon for $ 1.75, but both "fix" prices because, whatever price they charge, each prices Shell and Texaco branded gasolines the same.

Plaintiffs' theory would impose artificial and unnecessary requirements on joint ventures. Whether Equilon and Motiva charge the same or different prices for both brands, each literally "fixes" a price where Defendants formerly

[2] Moreover, Plaintiffs rely on § 2 monopoly cases for this proposition of law. In § 2 cases, cost savings and efficiencies are irrelevant because we are concerned with the dangers inherent in overwhelming market power. Plaintiffs have not brought a § 2 claim. See XIII Hovenkamp P2101, at 17 ("Joint ventures are analyzed under the 'restraint of trade' standard rather than the monopoly standard.").

set prices independently. Yet they and every other joint venture must, at some point, set prices for the products they sell. See *BMI, 441 U.S. at 9*.

Because almost any price setting constitutes price fixing under Plaintiffs' theory, Defendants would violate § 1 per se even if Equilon and Motiva had absolutely no connection to or interaction with each other. To avoid **[*14]** price fixing according to Plaintiffs' theory, Shell, Texaco and SRI would have to independently price the branded gasoline for Equilon or Motiva. While this may be possible temporarily, or in particular circumstances, there is no basis for imposing such an artificial arrangement indefinitely as a matter of law. [3] "[A] producer is free to fix and publish a retail price for his product and solicit business at that price." See *Dunn v. Phoenix Newspapers, Inc., 735 F.2d 1184, 1187 (9th Cir. 1984)*.

[*15] Plaintiffs would only allow joint ventures to establish prices for products that were somehow fundamentally new or different from those made by the parents. Requiring joint ventures to invent fundamental new products to operate independently or justify their existence would eliminate several types of efficient and pro-competitive combinations. Companies regularly combine assets for the legitimate purpose of realizing cost savings through economies of scale and information exchange, not only to develop new products.

In addition, Plaintiffs' price fixing theory is contrary to the undisputed facts. One person at Equilon and one person at Motiva set prices for both brands according to market conditions within their respective territories. Joints Facts PP18-21, 62-63. Shell, Texaco and SRI did not jointly agree pre- or post-formation on one universal price that would be applied nationally through Equilon and Motiva. Furthermore, they had no reason to fix prices because once Equilon and Motiva were formed, Shell, Texaco and SRI no longer competed in the market for Shell and Texaco branded gasoline, either amongst themselves or against the ventures in the United States. Equilon and Motiva **[*16]** operate in different regions of the country and thus also do not compete against each other. Id. PP42, 45, 62-63. A decision by Equilon to raise prices throughout the West Coast would not enable Motiva to raise prices on the East Coast.

Plaintiffs' theory has less to do with price fixing than with combinations in general. In essence, Plaintiffs seek per se or quick-look treatment because of the loss of a competitor. With few exceptions, Plaintiffs' theory would act as a per se rule against joint ventures between companies that produce competing products. Every such venture deprives the market of a competitor to the extent that where there were two or more entities producing a product, now there is one. Because of this, and the reasons stated above, we decline to adopt Plaintiffs' theory of price fixing.

2. Equilon and Motiva as Shams

As an alternative to their per se price fixing theory, Plaintiffs contend the ventures have an overall and presumptively anticompetitive purpose or structure. We address Plaintiffs' numerous arguments on this subject individually and then as a whole.

a. Pre-formation Conduct and Decisions

i. Regulatory Review and Confidentiality **[*17]** *Agreements*

According to Plaintiffs, Defendants from the outset expected that any combination would be subject to regulatory review. Pls.' Facts P14. They executed confidentiality agreements, which included provisions to return or destroy information exchanged during the discussion / negotiation stage. Id. P15. Defendants purportedly failed to produce

---

[3] At oral argument, Plaintiffs pointed out that Equilon and Motiva at least temporarily relied on their parents' former pricing systems. Equilon and Motiva apparently relied on the old pricing systems until new ones could be developed. Developing a new system would be one of the challenges faced by the joint ventures as they combined the considerable assets of their parents. The fact they temporarily relied upon the old systems does not explain why, as a matter of law, they should be required to do so indefinitely.

confidential documents exchanged during negotiations for government regulators. Id. P17. Thus Plaintiffs argue Defendants must have had an anticompetitive purpose.

Given Defendants' size, the nature of the oil industry, and the magnitude of the contemplated ventures, any business person would anticipate regulatory review. Defendants' foresight proves nothing. Second, confidentiality agreements serve an important business purpose. They protect sensitive financial information from dissemination or misuse by competitors, while enabling companies to explore potential collaborative efforts.

Withholding information from regulators could suggest an illegitimate motive. Id. P17. However, Plaintiffs have no evidence that Defendants concealed documents. Plaintiffs cite two depositions: one deponent states she has no knowledge on **[*18]** the matter, Pls.' Vol. 2, Tab 17, at p. 356, and the other was not asked about the production of documents for regulators, id. at pp. 358-60. Without such evidence, Plaintiffs have failed to make any showing of an anticompetitive purpose based on the confidentiality agreements.

ii. Exclusion of Assets

Plaintiffs claim the exclusion of various assets from Equilon and Motiva reveals that Defendants never intended Equilon or Motiva to operate as integrated joint ventures. However, the purpose of joint ventures is to combine particular productive assets without undertaking complete mergers. See, e.g., Fed. Trade Comm'n and U.S. Dep't of Justice, Antitrust Guidelines for Collaborations Among Competitors § 1.1, at 2, § 3.2, at 8 (April 2000) ("Antitrust Guidelines"). To realize the full benefits of a joint venture, the parents must of necessity exclude unrelated assets. [4] As always, the parents attempt to allocate resources where they will be most productive.

[*19] Here, Defendants formed Equilon and Motiva for the purpose of combining their downstream refining and marketing operations for branded gasoline. Joint Facts PP12, 31, 33, 36, 39, 40, 42, 45, 45. They did not include their worldwide businesses, upstream operations, marine fuels, aviation fuels, or chemical production plants, if any, because those assets and entities are not part of Defendants' downstream operations in the United States.

When selecting which assets to include in a joint venture, a parent company may reserve assets that serve vital functions in other businesses. Here, Defendants did not transfer ownership of the Shell and Texaco brands to Equilon and Motiva because they rely on those brands in other businesses around the globe. Because of the brands' international importance and value, forcing Shell and Texaco to transfer the brands to Equilon or Motiva is akin to requiring them to choose between merging or abandoning any joint venture. Joint venture parents are not required to abandon or devalue long-standing investments in brand good-will to avoid per se or quick-look condemnation. Furthermore, Equilon and Motiva have an exclusive right to license Shell and Texaco **[*20]** branded gasoline in the United States, Defs.' Fact P47, which is more than sufficient to enable each to fulfill its purpose.

A joint venture parent may also exclude assets because of prior commitments. In this case, the uncontroverted evidence is that Shell could not contribute Deer Park because it was a joint venture with PEMEX - the Mexican national oil company - and PEMEX rejected the proposal. Pls.' Facts P22 (Defs.' Response); Defs.' Facts P44. This is a legitimate reason for excluding Deer Park. Moreover, Shell's inability to include Deer Park explains why Texaco and SRI received the right to operate one comparable refinery independently. Pls.' Facts P27 and Defs.' Response. In any event, Plaintiffs have not explained how the exclusion of one relevant asset renders either Equilon or Motiva a sham. No reasonable trier of fact could conclude that the exclusion of Deer Park under these circumstances demonstrates that the joint ventures were shams designed to conceal price fixing.

iii. SRI's Ability to Compete Against Equilon

Since the formation of Equilon and Motiva, SRI has remained free to compete against Equilon. Joint Facts P60. This right, however, does not indicate **[*21]** that Equilon and Motiva are shams: It would be unnecessary to limit

---

[4] To the extent Plaintiffs believe *Citizen Publishing Co. v. United States, 394 U.S. 131, 89 S. Ct. 927, 22 L. Ed. 2d 148 (1969)*, requires complete mergers, we disagree. Citizen Publishing did not "prevent all forms of joint operation." *Id. at 135*; see also infra Section II.D.3.

SRI's ability to compete against Equilon since SRI held no financial stake in Equilon. Given the absence of any financial connection between SRI and Equilon, an agreement restricting SRI's ability to compete in the Western United States might instead raise an inference of improper collusion.

iv. "Sole Risk" Provisions

Plaintiffs consider the presence of "sole risk" provisions evidence that Defendants still compete in the downstream market in the United States, and thus the ventures' only purpose was to drive up prices. To the contrary, the presence of "sole risk" provisions bolsters our initial conclusion that Equilon and Motiva are not patently anticompetitive. The "sole risk" provisions permit Defendants to engage in refining opportunities [5] rejected by either Equilon or Motiva. Defs.' Response to Pls.' Facts P25. Rather than unnecessarily constrain competition, this ensures efficient allocation of resources and promotes beneficial competition. If Shell, Texaco or SRI perceives an opportunity where Equilon and Motiva do not, market principles dictate that they should be free to invest accordingly.

[*22] *v. Brand Management Protocol*

At the time Equilon and Motiva were formed, Defendants entered into Brand Management Protocol agreements. For example, Motiva's Brand Management Protocol "recognize[s] that coordination between Equilon and [Motiva] of uniform standards established by Texaco for the Texaco Symbols and by Shell for the Shell Symbols . . . , enhances and protects the value, reputation, prestige and goodwill associated with" those symbols and brands. Pls.' Vol. 1, Tab. 3 at 141. The Protocol agreements regulate the use of the Shell and Texaco brands in the ventures' respective regions. See id. at p. 140. Plaintiffs view these agreements as evidence of Defendants' intent to eliminate competition.

The Brand Management Protocol agreements do not reveal an invidious anticompetitive purpose. Defendants had a mutual and legitimate interest in promoting both brands since they were the principal method for marketing Equilon's and Motiva's products. Since Defendants chose not to merge, they adopted a program to ensure that Equilon's and Motiva's use of the brands would not diminish their value in the United States or abroad.

An agreement defining and regulating **[*23]** acceptable practices for brands does not invariably result in anticompetitive harms. Nor does it reveal a patently anticompetitive purpose. As such, these agreements do not validate Plaintiffs' position.

vi. Ease of Dissolution

Plaintiffs assert that Equilon and Motiva can be "easily unraveled and dissolved," providing evidence that neither was intended to operate as a productive and integrated economic collaboration. Joint Argument at 17.

Equilon and Motiva are not "fly-by-night" operations. Defendants negotiated for over a year before forming Equilon and Motiva, Joint Facts PP6-7, 33-34, which would be unnecessary if they simply intended to fix prices. Plaintiffs do not suggest that the negotiations leading up to the formation of Equilon and Motiva were perfunctory or that Defendants failed to undertake adequate due diligence regarding the potential costs or benefits of formation.

In addition, the right to dissolve Equilon and Motiva upon mutual consent must be evaluated alongside the substantial financial commitments made when forming the ventures. Equilon and Motiva control numerous refineries, lubricant plants, research laboratories, terminals, thousands of service stations, **[*24]** miles of pipeline, and employees. Id. P48. If Defendants wanted the ability to readily dissolve Equilon and Motiva, they would not have entrusted the ventures with such extensive resources. The significant integration of assets itself suggests that Defendants intended Equilon and Motiva to function as true joint ventures, rather than covers for price fixing. In any event, joint venture agreements frequently provide for dissolution upon mutual consent. The presence of such clauses does not indicate an intent to illegally fix prices.

---

[5] The "sole risk" provisions apply to refining, not marketing.

Other than by mutual consent, Equilon and Motiva can only be dissolved after five years, effective two years after notice. Id. P51. A five-year minimum with two-years notice would allow Defendants to move forward with Equilon and Motiva, hopefully recouping their investments, while leaving room should changes occur in the market or Defendants' individual circumstances. [6] Five years represents a significant commitment to the future of Equilon and Motiva.

[*25] Consequently, the above-described dissolution provisions are not per se illegal, and we do not see how an observer with only a rudimentary understanding of economics could view them as presumptively anticompetitive, especially in light of the time, effort, and resources invested into Equilon and Motiva. See *Cal. Dental. Ass'n, 526 U.S. at 770*.

b. Post-formation Conduct

i. Members Committee Meetings

Plaintiffs believe that Defendants "govern" Equilon and Motiva through Members Committees, presumably to carry out their price fixing conspiracy. Pls.' Facts P30. The Members Committee for Equilon consists of four Shell representatives and three Texaco representatives. Id. Motiva's Members Committee consists of two representatives from Shell, Texaco and SRI. Id. The Members Committees set "policies, business plans, and budgets" for the CEOs and officers running the ventures. Id. P32. Representatives on the Equilon and Motiva Members Committees have separate staffs at their own companies. Id P42.

To begin, Defendants had a legitimate interest in forming Members Committees to protect their substantial investments in Equilon and Motiva. In fact, **[*26]** it would be difficult to conceive of another method of management of a joint venture where the parents wish to maintain an actual, not passive, role in the advancement of their mutual interests.

Even assuming the same representatives from Shell and Texaco served on both committees, we cannot infer a conspiracy merely because Plaintiffs identified an opportunity to conspire. *In re Citric Acid Litig., 191 F.3d 1090, 1103 (9th Cir. 1999)* (refusing to "infer participation in the conspiracy from the opportunity to do so. Such meetings, at least in and of themselves, do not tend to exclude the possibility of legitimate activity."). The existence of Members Committees does not tend to exclude the equally likely inference of legitimate conduct, such as to protect and promote the Defendants' shared interest in the Shell and Texaco brands.

ii. Relationship Between Pricing & Purpose

Plaintiffs claim the practice of pricing Shell and Texaco brands the same is not sufficiently related to the joint ventures' beneficial efficiency-producing activities. Joint Argument at 26-28; Pls.' Facts PP45, 47. Plaintiffs argue that since Defendants did not identify any cost savings related **[*27]** to pricing at the time of formation, they had no reason for subsequently pricing both brands the same, except to raise prices. Id.

The fact that Defendants did not identify cost savings related to pricing at the time of formation does not negate the other substantial savings and efficiencies anticipated from formation. ***Antitrust law*** does not require every business decision to generate additional identifiable savings to survive per se or quick look scrutiny. Plaintiffs also do not explain how the decision to set the same price for Shell and Texaco branded gasoline after formation is inconsistent with permissible business practices.

Defendants offer a plausible and justifiable reason why Equilon and Motiva would independently choose to set the price of Shell and Texaco branded gasoline the same: from the perspective of the ventures, the products are fungible. While the brands appeal to different customers, Joint Facts P66, and contain different additives, Pls.' Fact

[6] Plaintiffs allege that Texaco is currently negotiating its withdrawal from the "Alliance, necessitated by Texaco's agreement to be acquired by Chevron." Joint Argument at 17. Chevron's acquisition of Texaco, resulting in Texaco's need to withdraw, serves as an example of why joint venturers provide for dissolution upon consent or reasonable notice.

P46, Plaintiffs provide no evidence that the costs of producing the brands, whether related to physical production, marketing, or advertising, would lead an efficient venture to set different prices for Shell and Texaco **[*28]** branded gasoline.

iii. Parallel Pricing

Plaintiffs assert that "within a relatively short time after their formation, Equilon and Motiva implemented a practice of charging the same price for the Shell and Texaco brands of gasoline in each of the pricing areas into which Equilon and Motiva had divided their geographic spheres of operation." Pls.' Facts P36. "Parallel pricing is a relevant factor to be considered along with the evidence as a whole; if there are sufficient other 'plus' factors, an inference of conspiracy can be reasonable." *In re Citric Acid, 191 F.3d at 1102*.

This is not a case of parallel pricing. Equilon and Motiva do not charge identical prices across the country, and the evidence does not reveal an agreement about what prices the other should charge. The parties stipulate that one person at Equilon sets prices for Equilon's territory, one person at Motiva sets prices for Motiva's territory, and each sets prices based on local market conditions. Joint Facts PP62, 63. [7]

[*29] The conduct in question is consistent with the practical consequences of forming Equilon and Motiva. Once formed, Equilon and Motiva had the power to establish any price for their products, just as any other business does, without collaborating with each other or Defendants. It is arbitrary to infer a conspiracy from the decision to charge the same versus different prices for both brands, since in any event, Equilon and Motiva produce both products and receive all of the revenues. In effect, Plaintiffs want the joint ventures to charge different prices for the brands and thus compete against themselves. "Yet no law requires competition within a company." See *Fraser v. Major League Soccer, L.L.C., 284 F.3d 47, 56 (1st Cir. 2002)*.

Furthermore, Plaintiffs have failed to overcome an additional burden. If the intent and plan to "fix" prices arose after formation, one cannot immediately assume that Defendants consciously committed themselves to such a scheme either pre- or post-formation. We are not suggesting, as Defendants do, that the post-formation conduct of Equilon and Motiva can never be considered evidence of pre-formation anticompetitive intent. See Joint **[*30]** Argument at 44-48 (citing *Copperweld Corp. v. Indep. Tube Corp., 467 U.S. 752, 768, 104 S. Ct. 2731, 81 L. Ed. 2d 628 (1984))*. Copperweld did "not consider under what circumstances, if any, a parent may be liable for conspiring with an affiliated corporation it does not completely own." *467 U.S. at 767*; see also *Fraser, 284 F.3d at 56-60* (rejecting argument that LLC members could not violate § 1 when the only complained of conduct occurred post-formation). But just as we do not attribute the acts of a subsidiary to a parent in other contexts, after a certain point it would be improper to attribute the post-formation conduct of Equilon or Motiva to Defendants for purposes of proving a § 1 conspiracy absent other evidence that the ventures are shams. [8]

[*31] In this case, Equilon and Motiva had a separate and legitimate reason for pricing Shell and Texaco branded gasoline the same - they were fungible. See supra discussion. Like any other business, they may set prices for their products. See *Dunn v. Phoenix Newspapers, Inc., 735 F.2d 1184, 1187 (9th Cir. 1984)*.

iv. Strategic Marketing Initiative and "Price Optimization"

According to Plaintiffs,

> Defendants implemented their price fixing in conjunction with a joint program called the Strategic Marketing Initiative, which was developed by Equilon, Motiva, and related service companies as an Alliance-wide

---

[7] At most, Defendants have exchanged information relating to the marketing of Shell and Texaco branded gasoline. However, information exchange is not per se illegal. *United States Gypsum Co., 438 U.S. at 440-41* & n.16. Some information exchange between Equilon and Motiva is necessary to protect and develop the jointly shared brands as resources.

[8] We recognize that a price fixing conspiracy offends § 1 whether former competitors agree beforehand to fix prices immediately upon formation or agree to wait eight months after formation to raise prices. Here, Plaintiffs have not raised a triable issue of fact as to a price fixing conspiracy.

> program; [it] called for price fixing as a means of "price optimization"; and [it] was regularly reviewed with the Members Committees of both Equilon and Motiva.

Pls.' Facts P37.

Plaintiffs reliance on the Strategic Marketing Initiative combines arguments we have already rejected. First, Plaintiffs rely on the theory that any setting of price by Equilon or Motiva constitutes "price fixing." If this were true, few joint ventures would survive § 1 scrutiny. Second, Plaintiffs attach significance to the fact that the Strategic Marketing **[*32]** Initiative was presented to the Members Committees for Equilon and Motiva. The fact Members Committees considered the same information does not automatically establish a nationwide conspiracy. See *In re Citric Acid, 191 F.3d at 1103*.

Plaintiffs also overlook the stated purpose of the Initiative, to develop the Shell and Texaco brands. Equilon and Motiva had a separate and legitimate interest in marketing the brands. Since Equilon and Motiva produce and market both brands, they have a legitimate reason to consider similar information and strategies. The Strategic Marketing Initiative, much like the Brand Management Protocol agreements, supports maintenance of the brands and their use by the ventures, something which we cannot lightly condemn as unavoidably anticompetitive. See *United States Gypsum Co., 438 U.S. at 440-41* & n.16.

v. Price Anomalies

Plaintiffs want us to assume an anticompetitive purpose or structure from the fact that Equilon and Motiva's wholesale prices rose when crude oil prices hovered around historic lows. Pls.' Facts P38.

If Equilon and Motiva were the only participants in the downstream market who raised prices during **[*33]** this period, one might suspect that they engaged in some type of anticompetitive collaboration. Yet we cannot determine whether all other downstream refiners also enjoyed higher wholesale prices despite the record low prices for crude oil. As a result, we might condemn Equilon and Motiva for benefitting from a phenomenon experienced across the entire downstream market at that time. [9]

vi. Failure to "Pass" Savings onto Consumers

Plaintiffs accuse Defendants of never explicitly directing that cost savings be passed onto consumers. **[*34]** Id. P41. Companies are not required to "pass on" savings to consumers in the form of lower prices. Absent monopoly power or a proven anticompetitive restraint, every business has the legitimate option of passing savings onto consumers in the form of lower prices or to shareholders in the form of increased stock values. The decision to retain all or some of any realized savings does not raise a triable issue on Plaintiffs' contention that the ventures were created for the purpose of fixing prices or that they almost certainly had anticompetitive effects.

vii. Post-formation Cost Savings

Plaintiffs also complain that "The Alliance" eliminated duplicative or redundant expenses and avoided capital expenditures. Pls.' Facts PP39, 40. The fact Defendants achieved cost savings bolsters one of their stated legitimate reasons for forming the ventures. The fact they actually commenced such programs indicates Equilon and Motiva were not simply fronts for an illegal conspiracy or combination. Hence, this provides no basis for inferring an anticompetitive purpose.

C. *Summary*

---

[9] Even if we assume Equilon and Motiva controlled over twenty-five (25) percent of the branded gasoline in specific markets, Pls.' Facts P33, we have no evidence that Equilon and Motiva contributed to the national rise in wholesale prices. Even in a concentrated market, "rising prices do not themselves permit an inference of a collusive market dynamic." See *Brooke Group Ltd. v. Brown & Williamson Tobacco Co., 509 U.S. 209, 236-37, 113 S. Ct. 2578, 125 L. Ed. 2d 168 (1993)*.

After carefully reviewing and considering Plaintiffs' evidence and arguments, and drawing all reasonable **[*35]** inferences in Plaintiffs' favor, we nonetheless conclude a reasonable trier of fact could not find that Defendants formed Equilon and Motiva merely to achieve an ulterior anticompetitive purpose or that the ventures are patently anticompetitive. None of the conduct identified by Plaintiffs is of the type that "always tend[s] to restrict competition and decrease output . . . ." *Am. Ad Mgmt., 92 F.3d at 787*. Our conclusion is reinforced by the fact that Defendants shared risks based on capital contributions, see *Maricopa County Med. Soc'y., 457 U.S. at 356-57*, and the fact that Equilon and Motiva achieved greater efficiency, productivity, and savings, see *Polk Bros., Inc., 776 F.2d at 189*.

3. Citizen Publishing

Despite the evidence of efficiencies and savings, Plaintiffs believe we must follow *Citizen Publishing Co. v. United States, 394 U.S. 131, 89 S. Ct. 927, 22 L. Ed. 2d 148 (1969)*, and hold Defendants liable under the per se and/or quick-look doctrines. The defendants in Citizen formed a joint venture to sell and distribute newspapers, yet maintained separate news and editorial departments. *Citizen, 394 U.S. at 134.* **[*36]** The newspapers realized considerable savings from combining their circulation and advertising departments. *United States v. Citizen Publ'g Co., 280 F. Supp. 978, 982 (D. Ariz. 1968)*. In spite of the savings, the Supreme Court concluded the joint venture violated § 1 per se. *Citizen, 394 U.S. at 135*. In so doing, the Court relied primarily on three facts: the newspapers pooled profits according to a fixed ratio, agreed not to compete, and improperly divided the market for daily newspapers. Id.

The profit pooling and non-compete arrangements in Citizen differ in several substantial respects from those in the instant case. First, the defendants, the *Star* and the *Citizen,* were the only daily newspapers in Tucson, Arizona. *Id. at 133*. By joining their circulation and advertising departments, they eliminated all competition for daily papers in Tucson. *Id. at 133-34*. In contrast, Equilon and Motiva continue to compete with several major oil companies in their relevant markets.

Second, the *Star* and the *Citizen* combined for the specific purpose of restricting competition and fixing prices. *Citizen Publ'g, 280 F. Supp. at 993.* **[*37]** Before forming the venture, the *Star* and the *Citizen* agreed to raise advertising rates within one year and in fact raised rates within that period. *Id. at 982*. The Supreme Court could safely presume anticompetitive harms since that was the express purpose from the outset. Without evidence of such an intent here, we cannot lightly ignore the legitimate and significant reasons offered by Defendants.

Third, the non-compete provision in Citizen was part of an agreement to divide the market for daily newspapers. It prohibited the *Star,* the *Citizen,* or any of their stockholders or executives from forming a competing daily newspaper in Pima County, the metropolitan area of Tucson. *Citizen, 394 U.S. at 135-36*. It effectively divided the market because there were only two competitors. Id. Here, Equilon and Motiva operate in diverse markets with several competitors. In addition, their non-compete provisions are not nearly as broad. [10]

[*38] Consequently, the three reasons supporting the Citizen Court's conclusion do not apply to Equilon and Motiva. Still, Plaintiffs note a possible organizational similarity between the joint venture in Citizen and Equilon and Motiva. The joint venture in Citizen priced, sold and distributed newspapers, yet the *Star* and Citizen maintained separate news and editorial departments. Equilon and Motiva market and refine gasoline, yet Shell and Texaco retain the ultimate rights to the Shell and Texaco brands and additives.

This organizational similarity, if any, does not compel per se condemnation. The joint venture in Citizen performed one aspect of producing newspapers, the physical printing and distribution, yet set prices and advertising rates as if it was responsible for all aspects of production. In this case, Equilon and Motiva have responsibility for purchasing necessary inputs and then refining and marketing Shell and Texaco branded gasoline. It is therefore appropriate that they set prices for Shell and Texaco branded gasoline.

---

[10] Even if Defendants' non-compete clauses were analogous, Plaintiffs waived any right to recover under a § 1 theory of market division. Thus, this aspect of Citizen is inapposite.

To the extent other similarities may exist between the venture in Citizen and Equilon and Motiva, they do not justify per se condemnation. **[*39]** Citizen did not elaborate on its § 1 per se analysis, and Plaintiffs cite no authorities building upon this part of the analysis. [11] We are reluctant to hypothesize about its application given recent Supreme Court admonitions against expanding the scope of per se liability. *Khan, 522 U.S. at 10* (citing *Ind. Fed'n of Dentists, 476 U.S. at 458-59*); see also *Sammi Corp., 82 F.3d at 844*.

4. Summary of Per se / Quick-Look

We recognize that upon a full rule of reason analysis the anticompetitive effects attendant to the formation of Equilon and Motiva, if any, might outweigh the benefits Defendants realized in cost savings and efficiencies. However, Plaintiffs have eschewed an exhaustive rule **[*40]** of reason analysis. We conclude Plaintiffs have failed to raise a triable issue of material fact on either price fixing or the presumptively anticompetitive nature of Equilon and Motiva. As a result, Plaintiffs failed to raise a triable issue of fact as to Defendants' liability under the per se or quick-look doctrines.

III. Disposition

Accordingly, Defendants' Motion is **GRANTED** as Plaintiffs failed to raise a triable issue of fact as to per se or quick-look § 1 liability. Defendants' purported Copperweld defense is **DENIED** as moot. Plaintiffs' Motion is **DENIED.** [12]

IT IS SO ORDERED.

Dated: 8/13/02

GEORGE H. KING

United States District Judge

JUDGMENT

By **[*41]** separate orders dated May 21, 2002, and August 13, 2002, we ruled that Defendants Shell Oil Company ("Shell"), Texaco, Inc. ("Texaco"), and Saudi Refining, Inc. ("SRI") were entitled to judgment as a matter of law pursuant to *Rule 56 of the Federal Rules of Civil Procedure.*

Accordingly, pursuant to those orders, it is hereby **ADJUDGED, DECREED** and **ORDERED** that Defendants Shell, Texaco, and SRI shall have judgment against Plaintiffs, and Plaintiffs shall recover nothing on their complaint.

IT IS SO ORDERED.

DATED: August 13, 2002

George H. King

United States District Judge

---

[11] Congress overruled Citizen by statute as it applied to combinations between newspapers. See *Haw. Newspaper Agency v. Bronster, 103 F.3d 742, 744 (9th Cir. 1996)* (citing Newspaper Preservation Act, *15 U.S.C. §§ 1801-04 (1970)*).

[12] Plaintiffs carry the ultimate burden of proof at trial and have the burden of showing entitlement to judgment as a matter of law. See *Fed. R. Civ. P. 56(c)*. Because we conclude they failed to even raise a triable issue of material fact, they cannot show entitlement to judgment as a matter of law.

Donnelly Corp. v. Reitter & Schefenacker USA L.P.

United States District Court for the Western District of Michigan, Southern Division

August 13, 2002, Decided ; August 13, 2002, Filed

Case No. 1:00-CV-751

Reporter

2002 U.S. Dist. LEXIS 15205 *; 2002-2 Trade Cas. (CCH) P73,817

DONNELLY CORPORATION, Plaintiff, v. REITTER & SCHEFENACKER USA LIMITED PARTNERSHIP and REITTER & SCHEFENACKER GmbH & CO. KG, Defendants.

Disposition: [*1] Plaintiff's Motion to Dismiss Defendants' Michigan Common Law Unfair Competition Counterclaim and for Separate Trials and Stay of Certain Discovery granted in part and denied in part.

Core Terms

unfair competition, patent, counterclaims, antitrust, patent misuse, discovery, patent infringement, common law, separate trial, infringement, bifurcation, allegations, patentee, customers, unfair, violations, cases, anti trust law, invalid, misuse, Defendants', convenience, competitor

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

HN1[] **Motions to Dismiss, Failure to State Claim**

Under *Fed. R. Civ. P. 12(b)(6)*, a district court may dismiss a claim only if it is clear that no relief can be granted under any set of facts that can be proven consistent with the allegations. The allegations must be construed in the light most favorable to a plaintiff. The rules generally require only a short and plain statement of the claim and not detailed allegations. The complaint, however, must contain either direct or inferential allegations respecting all the material elements to sustain a recovery under some viable legal theory.

Civil Procedure > Trials > Separate Trials

HN2[] **Trials, Separate Trials**

A district court may order a separate trial for any number of claims to promote convenience, expediency, economy, or to prevent prejudice. *Fed. R. Civ. P. 42(b)*. In order for a court to grant bifurcation, the party seeking bifurcation has the burden of demonstrating that judicial economy will be served and that no party will be prejudiced by separate trials, based on the circumstances of the individual case.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN3[] Regulated Practices, Trade Practices & Unfair Competition

Unfair competition ordinarily consists in the simulation by one person, for the purpose of deceiving the public, of the name, symbols, or devices employed by a business rival, or the substitution of the goods or wares of one person for those of another, thus falsely inducing the purchase of his wares and thereby obtaining for himself the benefits properly belonging to his competitor. The rule is generally recognized that no one shall by imitation or unfair device induce the public to believe that the goods he offers for sale are the goods of another, and thereby appropriate to himself the value of the reputation which the other has acquired for his own product or merchandise.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Trade Dress Protection > Causes of Action

Trademark Law > ... > Unfair Competition > Federal Unfair Competition Law > General Overview

Trademark Law > ... > Federal Unfair Competition Law > Trade Dress Protection > General Overview

HN4[] Trade Dress Protection, Causes of Action

An allegation that a company is threatening to assert its right to a product's trade dress, and therefore bar a plaintiff from entry into the market in that product, is not enough to state a claim for unfair competition under Michigan law. Few, if any, cases exist wherein a claim of unfair competition involve something other than the protection of names of corporations, buildings and other businesses.

Patent Law > Remedies > Equitable Relief > Injunctions

Torts > Business Torts > General Overview

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

Criminal Law & Procedure > ... > Crimes Against Persons > Coercion & Harassment > Elements

HN5[] Sales of Goods, Remedies

There are many ways, other than by interference with contract, of harassing, interfering with, and obstructing a competitor in such a manner as to amount to unfair competition, in the broadest sense of the term. The business of another may be unlawfully obtained by harassing his customers and salesmen, just as effectively as by passing off his goods as those of another. There may be also interference by bringing a multiplicity of suits. There is no question that it is lawful and proper for the owner of a patent to give a notice of infringement of his patent to any infringer thereof, or to any user of an infringing article. It is also his legal right to bring and prosecute a suit for recovery of damages against an infringer or user. Such suit, however, must be honestly brought and prosecuted in good faith, and not commenced and prosecuted to harass, annoy, intimidate, financially embarrass, and drive out of business a competitor, for such acts and conduct would amount to unlawful and unfair competition.

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN6[] **Regulated Practices, Trade Practices & Unfair Competition**

Michigan follows the general principles of unfair competition. Regarding the scope of ab unfair competition law, there is no hard and fast rule by which it can be determined when a district court will interfere by injunction to prevent what is practically a fraud upon a person engaged in business by unfair methods of business. Each case must depend upon its own facts, but where it is clearly established that an attempt is being made by one person to get the business of another by any means that involves fraud or deceit, a court of equity will protect an honest trader and restrain a dishonest one from carrying out his scheme.

Antitrust & Trade Law > Regulated Practices > Intellectual Property > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Torts > Procedural Matters > Preemption > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Bad Faith, Fraud & Nonuse > Bad Faith

Antitrust & Trade Law > Regulated Practices > Trade Practices & Unfair Competition > General Overview

HN7[] **Regulated Practices, Intellectual Property**

State law unfair competition claims are not preempted by federal patent or ***antitrust law*** so long as bad faith is an element of the state law claim. This is because the protection otherwise afforded by the patent laws to a patentee's conduct in enforcing its patent may be lost if the patentee acts in bad faith.

Civil Procedure > Trials > Separate Trials

HN8[] **Trials, Separate Trials**

A district court may order separate trials of claims or issues in furtherance of convenience or to avoid prejudice, or when separate trials will be conducive to expedition and economy. *Fed. R. Civ. P. 42(b)*. In deciding whether to bifurcate, the major consideration is directed toward the choice most likely to result in a just final disposition of the litigation.

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Civil Procedure > Trials > Separate Trials

HN9[] **Pleadings, Counterclaims**

In cases where there is a patent claim and an antitrust defense or counterclaim, it is acceptable procedure to sever the antitrust claims from the patent claims and to provide for separate trials of each. This practice is common because both issues require voluminous and complex proof and because the proof is non-duplicative.

Civil Procedure > ... > Pleadings > Counterclaims > General Overview

Civil Procedure > Trials > Separate Trials

HN10[] **Pleadings, Counterclaims**

In the context of determining whether to separate a trial, because patent infringement and antitrust matters involve two completely different and highly complex bodies of law, a single trial for both a patent infringement claim and an antitrust counterclaims will likely cause some degree of jury confusion. A trial requiring the determination of patent validity, infringement, and antitrust violations places a heavy burden on any jury.

Antitrust & Trade Law > Regulated Practices > Intellectual Property > General Overview

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Patent Law > Infringement Actions > Exclusive Rights > Manufacture, Sale & Use

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > Patent Misuse Defense

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN11[] **Regulated Practices, Intellectual Property**

Where the patent is used as a means of restraining competition with the patentee's sale of an unpatented product, the successful prosecution of an infringement suit even against one who is not a competitor in such sale is a powerful aid to the maintenance of the attempted monopoly of the unpatented article, and is thus a contributing factor in thwarting the public policy underlying the grant of the patent. Patent misuse is an equitable doctrine which prevents a patentee from enforcing its rights through wrongful action. The patentee may not claim the protection of the patent's grant of exclusivity given for reasons of public policy where the patentee uses the grant to subvert the public policy underlying patents.

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > Patent Misuse Defense

Business & Corporate Compliance > ... > Defenses > Inequitable Conduct > Anticompetitive Conduct

Antitrust & Trade Law > Regulated Practices > Intellectual Property > General Overview

Antitrust & Trade Law > ... > Intellectual Property > Misuse of Rights > General Overview

Patent Law > ... > Defenses > Inequitable Conduct > General Overview

Business & Corporate Compliance > ... > Infringement Actions > Defenses > Misuse

HN12[] **Misuse of Rights, Patent Misuse Defense**

To successfully assert a misuse defense, a defendant must prove the plaintiff has impermissibly broadened the physical or temporal scope of the patent grant with anticompetitive effect. While one who misuses a patent does not also necessarily violate antitrust laws, one who violates antitrust laws by using a patent is necessarily guilty of patent misuse.

Judges: RICHARD ALAN ENSLEN, United States District Judge.

Opinion by: RICHARD ALAN ENSLEN

Opinion

This matter is before the Court on Plaintiff Donnelly Corporation's Motion to Dismiss Defendants' Michigan Common Law Unfair Competition Counterclaim Pursuant to *Rule 12(b)(6)* and for Separate Trials and Stay of Certain Discovery Pursuant to *Fed. R. Civ. P. 42(b)*. The Court will deny Plaintiff's Motion to Dismiss Defendant Reitter & Schefenacker USA Limited Partnership's [1] ("R&S USA LP") Michigan common law unfair competition counterclaim. The Court will grant Plaintiff's request to bifurcate the trial of R&S USA LP's antitrust **[*3]** and unfair competition counterclaims and the patent misuse defense from the current patent infringement case. The Court will not, however, stay any discovery in this matter.

I. Standard of Review

A. Motions to Dismiss

HN1[] Under *Federal Rule of Civil Procedure 12(b)(6)*, a court may dismiss a claim only if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations. *Hishon v. King & Spalding, 467 U.S. 69, 73, 81 L. Ed. 2d 59, 104 S. Ct. 2229 (1984)*; *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*. The allegations must be construed in the light most favorable to the plaintiff. *Gregory v.*

[1] The Amended Answer and Counterclaims were filed on February 1, 2002 by Defendant R&S USA LP only and were not joined by Defendant Reitter & Schefenacker GmbH & Co. KG ("R&S GmbH"). (*See* Amended Answer and Counterclaims, Dkt. No. 147.)

Shelby County, Tenn., 220 F.3d 433, 446 (6th Cir. 2000) **[*4]** (citations omitted). The rules generally require only a "short and plain statement of the claim" and not detailed allegations. Leatherman v. Tarrant County Narcotics Intelligence & Coordination Unit, 507 U.S. 163, 168, 122 L. Ed. 2d 517, 113 S. Ct. 1160 (1993). The complaint, however, "must contain either direct or inferential allegations respecting all the material elements to sustain a recovery under *some* viable legal theory." Scheid v. Fanny Farmer Candy Shops, Inc., 859 F.2d 434, 436 (6th Cir. 1988) (quotations omitted) (emphasis in original).

B. Motions For Separate Trials

HN2[] The Court may order a separate trial for any number of claims to promote convenience, expediency, economy, or to prevent prejudice. Fed. R. Civ. P. 42(b). In order for a court to grant bifurcation, the party seeking bifurcation has the burden of demonstrating that judicial economy would be served and that no party would be prejudiced by separate trials, based on the circumstances of the individual case. Real v. Bunn-O-Matic Corp., 195 F.R.D. 618, 620 (N.D. Ill. 2000); Novopharm Ltd. v. Torpharm, Inc., 181 F.R.D. 308, 310 (E.D.N.C. 1998).

[*5] II. Facts

On October 5, 2000, Plaintiff Donnelly Corporation ("Donnelly") filed its Complaint for patent infringement against R&S GmbH and R&S USA LP ("Defendants" collectively), alleging that Defendants' manufacture, use, sale, and offering for sale to customers of lighted interior rearview mirrors infringed three Donnelly patents. [2] In their original Answer submitted on January 8, 2001, Defendants denied the infringement claim.

On February 1, 2002, R&S USA LP filed an Amended Answer and Counterclaims, alleging that Donnelly is: (1) guilty of patent misuse; [3] (2) in violation of the Sherman Act § 2 due to Walker Process fraud; [4] **[*7]** (3) in violation of the Sherman Act § 2 due to Donnelly's alleged filing of "sham litigation"; [5] and (4) in violation of Michigan's unfair competition common law. First, Donnelly requests dismissal of R&S USA LP's Michigan common **[*6]** law unfair competition counterclaim for failure to state a claim. Second, Donnelly asks for bifurcation of the trial of the Sherman Act antitrust counterclaims, the unfair competition counterclaim in the event that the Court denies the motion to dismiss it, and the patent misuse defense. Finally, Donnelly requests a stay of any litigation concerning these issues pending the resolution of the on-going patent infringement case that Donnelly originally brought against Defendants.

III. Analysis

A. Unfair Competition Under Michigan Common Law

In its Michigan common law unfair competition counterclaim, R&S USA LP alleges Donnelly: (1) obtained patents by fraud and inequitable conduct; (2) filed and maintained the current, allegedly baseless patent infringement

[2] These patents are U.S. Patent Nos. 4, 733, 336 ("the '336 patent"); 5, 671, 996 ("the '996 patent"); and 5, 938, 321 ("the '321 patent").

[3] When a patent infringement suit is used for the purpose of stifling competition with the patent holder's sale of an *unpatented* product, the defendants in the patent infringement suit are entitled to the *patent misuse* defense. Kolene Corp. v. Motor City Metal Treating, Inc., 440 F.2d 77, 84 (6th Cir. 1971). This defense has been subsequently limited by other case law. *See, e.g.,* Virginia Panel Corp. v. MAC Panel Co., 133 F.3d 860, 868-871 (Fed. Cir. 1997).

[4] *Walker Process* fraud is the enforcement of a patent procured by fraud on the patent office and may constitute a violation of the Sherman Act § 2, provided the other elements necessary to a Sherman Act case are present. *See* Walker Process Equip., Inc. v. Food Mach. & Chem. Corp., 382 U.S. 172, 174, 15 L. Ed. 2d 247, 86 S. Ct. 347 (1965).

[5] R&S USA LP's "sham litigation" claim made under § 2 of the Sherman Act seeks to demonstrate Donnelly undertook litigation against Defendants for the sole purpose of hindering and disrupting R&S USA LP's business operations. *See* Re/Max Int'l, Inc. v. Realty One, Inc., 173 F.3d 995, 1005 (6th Cir. 1999).

action; (3) publicized the pending action to R&S USA LP's actual and potential customers; and (4) advised R&S USA LP's actual and potential customers that R&S USA LP "will be unable to supply lighted interior automotive rearview mirrors because such mirrors infringe the patents in suit." (R&S USA LP's Amended Answer and Counterclaim at P 56.) Donnelly asserts that none of this conduct, even if true, gives rise to a claim under Michigan's unfair competition common law. However, **[*8]** the Court will deny Plaintiff's Motion to Dismiss this counterclaim.

In 1933, the Michigan Supreme Court described a principle of unfair competition law as follows:

> ***HN3***[] Unfair competition ordinarily consists in the simulation by one person, for the purpose of deceiving the public, of the name, symbols, or devices employed by a business rival, or the substitution of the goods or wares of one person for those of another, thus falsely inducing the purchase of his wares and thereby obtaining for himself the benefits properly belonging to his competitor. The rule is generally recognized that no one shall by imitation or unfair device induce the public to believe that the goods he offers for sale are the goods of another, and thereby appropriate to himself the value of the reputation which the other has acquired for his own product or merchandise.

Schwannecke v. Genesee Coal & Ice Co., 262 Mich. 624, 247 N.W. 761, 762 (Mich. 1933). This description is oft-quoted. *See, e.g., Love v. New York Times Co., 691 F.2d 261, 265 (6th Cir. 1982)*; *Pennwalt Corp. v. Zenith Labs., Inc., 472 F. Supp. 413, 418 (6th Cir. 1979)*; *Cawley v. Swearer, 936 F.2d 572, 1991 U.S. App. LEXIS 19971, 1991 WL 108725*, at *2-3 (6th Cir. 1991); *Marion Labs., Inc. v. Michigan Pharmacal Corp., 338 F. Supp. 762, 767 (E.D. Mich. 1972)*, *aff'd without op., 473 F.2d 910 (6th Cir. 1973)*; *Moon Bros. v. Moon, 300 Mich. 150, 1 N.W.2d 488, 493 (Mich. 1942)*. As a result, Donnelly asserts Michigan's common law unfair competition claim encompasses only trademark violations described in the passage in *Schwannecke,* particularly those violations known as "palming off," where one attempts to disguise his or her goods as those of another in order to trade on the other's business goodwill. [6] In essence, Donnelly asserts that Michigan's common law of unfair competition does not include claims for bad faith assertion of patent actions.

[*10] Donnelly also bases its argument that R&S USA LP's allegations are insufficient to state a claim on *Letica Corp. v. Sweetheart Cup Co., Inc., 790 F. Supp. 702 (E.D. Mich. 1992)*. In *Letica,* another federal court held that ***HN4***[] an allegation that a company was threatening to assert its right to a product's trade dress, and therefore bar the plaintiff from entry into the market in that product, was not enough to state a claim for unfair competition under Michigan law. *See id. at 706*. After so holding, the *Letica* Court noted that "few, if any, cases exist wherein a claim of unfair competition involved something other than the protection of names of corporations, buildings and other businesses." *Id.* In addition, the *Letica* Court noted there was no allegation of any improper business activity, like prosecuting baseless litigation for the purpose of harassing a competitor. *See id. at 706-07*. Unlike in *Letica,* however, R&S USA LP alleges that Donnelly has prosecuted the current patent litigation in bad faith to steal its customers.

Moreover, R&S USA LP counters that other Michigan cases have considered similar conduct to constitute **[*11]** unfair competition and that none of the cases cited by Donnelly conclude that Michigan's common law absolutely excludes a claim based on R&S USA LP's allegations. For example, the Michigan Supreme Court has said,

> ***HN5***[] There are many ways, other than by interference with contract, of harassing, interfering with, and obstructing a competitor in such a manner as to amount to unfair competition, in the broadest sense of the term. The business of another may be unlawfully obtained by harassing his customers and salesmen, just as

---

[6] Another federal court in this District has held that Michigan's unfair competition claim is mostly limited to "palming off," although recognizing unauthorized duplication and deception of the public are also theories under which unfair competition claims have been sustained. *See Action Publ'ns, Inc. v. Panax Corp., 1984 U.S. Dist. LEXIS 24846, 1984 WL 2268*, at *11 (W.D. Mich. Nov. 30, 1984) (Miles, J.) (citing *Schwannecke, 247 N.W. at 762* (main source of "palming off" theory); *A & M Records, Inc. v. M.V.C. Distributing Corp., 574 F.2d 312 (6th Cir. 1978)* (unauthorized duplication theory); *Clairol, Inc. v. Boston Discount Center of Berkley, 608 F.2d 1114, 1119-20 (6th Cir. 1979)* (deception of public theory)).

> effectively as by passing off his goods as those of another .... There may be also interference by bringing a multiplicity of suits. The bringing of a multiplicity of suits, started not in good faith, but for the purpose of deterring the public from purchasing from a rival and ruining his trade was enjoined in Wisconsin .... There is no question that it is lawful and proper for the owner of a patent to give a notice of infringement of his patent to any infringer thereof, or to any user of an infringing article. It is also his legal right to bring and prosecute a suit for recovery of damages against an infringer or user. Such suit, however, must be honestly brought **[*12]** and prosecuted in good faith, and not commenced and prosecuted to harass, annoy, intimidate, financially embarrass, and drive out of business a competitor, for such acts and conduct would amount to unlawful and unfair competition.

Attorney Gen. ex rel. James v. Nat'l Cash Register Co., 182 Mich. 99, 148 N.W. 420, 428 (Mich. 1914). These statements would appear to recognize a cause of action in Michigan for common law unfair competition to have been stated with the allegations made by R&S USA LP.

Donnelly counters that the above discussion concerned only whether the defendants in that case violated Michigan's anti-monopoly statute and did not relate to Michigan's common law of unfair competition. (*See* Donnelly's Reply to Motion to Dismiss, at 5 n.3 (citing *Nat'l Cash Register, 148 N.W. at 422*).) It is true that the only apparent claim at issue was a claim that defendants violated the anti-monopoly statute, probably owing to the fact that the case was brought by the State of Michigan on the relation of a private individual, instead of directly by the private individual. However, the *National Cash Register* Court's discussion of why defendants' **[*13]** conduct constituted unfair competition is still relevant to the issue of what may constitute a properly stated unfair competition claim in Michigan. Certainly, it can be inferred from *National Cash Register* that had there been a claim against defendants for unfair competition, the Michigan Supreme Court may very well have found such a claim to have been properly stated. *148 N.W. 420, 428*.

In another case, the Michigan Supreme Court affirmed a trial court decree enjoining the defendants from continuing to engage in practices found to constitute "unfair and immoral competition." *See Schwanbeck Bros. v. A. Backus, Jr., & Sons, 148 Mich. 508, 111 N.W. 1046, 1047 (Mich. 1907)*. There, the defendants wrote letters to the plaintiff's customers who purchased plaintiff's allegedly infringing product, threatening them with suit for infringement of defendants' patent. *111 N.W. 1046, 1046-47*. In addition, the defendants refused to litigate the matter of the patent infringement after the plaintiff invited them to do so, and engaged in other activities apparently leading the *Schwanbeck* Court to conclude that "unfair and immoral competition" was present. *See id.*

Donnelly **[*14]** responds that *Schwanbeck* "more closely approximates a tortious interference with business relations claim," not an unfair competition claim, and cites another federal district court who dismissed unfair competition claims because of a lack of evidence in the plaintiff's favor. *See Nagle Indus., Inc. v. Ford Motor Co., 173 F.R.D. 448, 456-57 (E.D. Mich. 1997)*. However, the *Nagle* Court asserted that the plaintiff's reliance on *Schwanbeck* was "misplaced" because Nagle had no evidence Ford interfered with its business relationships by threatening its customers with a patent infringement action, whereas "the *Schwanbeck* Court upheld an unfair competition claim against defendant because plaintiff had presented the court with evidence that defendant had interfered with its business relationships by threatening its customers with a patent infringement action if they purchased plaintiff's products ...." *Id. at 457*. Thus, the *Nagle* Court did *not* hold that these allegations could only constitute a tortious interference claim and not an unfair competition claim under Michigan law. *Cf. id. at 457*.

In addition, ***HN6***[] Michigan follows **[*15]** general principles of unfair competition. *Marion Labs., 338 F. Supp. at 767* (citing *Clipper Belt Lacer Co. v. Detroit Belt Lacer Co., 223 Mich. 399, 194 N.W. 125, 128 (Mich. 1923)*); *see also Clairol, Inc., 608 F.2d at 1120* ("measuring [the facts of the case] against principles of law which obtain in Michigan as throughout the United States"). Regarding the scope of unfair competition law, the *Clipper Belt* Court said,

> There is no hard and fast rule by which it can be determined when the court will interfere by injunction to prevent what is practically a fraud upon a person engaged in business by unfair methods of business. Each case must depend upon its own facts, but where it is clearly established that an attempt is being made by one

> person to get the business of another by any means that involves fraud or deceit, a court of equity will protect an honest trader and restrain a dishonest one from carrying out his scheme.

Clipper Belt, 194 N.W. at 128. [7] This statement leads this Court to believe that R&S USA LP's allegations state a cognizable claim under Michigan unfair competition law. IfR&S **[*16]** USA LP proves its allegations, it would be established that Donnelly attempted to take R&S USA LP's business by means involving fraud or deceit, both unfair methods of conducting business. *See id.*

Finally, this interpretation of Michigan law is consistent with the common law of other states. *See, e.g., Zenith Elecs. Corp. v. Exzec, Inc., 182 F.3d 1340, 1355 (Fed. Cir. 1999)* (referring to the claim both **[*17]** as a state law [8] unfair competition claim and a tortious interference claim); *Dow Chem. Co. v. Exxon Corp., 139 F.3d 1470, 1472, 1478-79 (Fed. Cir. 1998)* (same). In *Zenith,* the Federal Circuit had occasion to hold that ***HN7***[] state law unfair competition claims are not preempted by federal patent or ***antitrust law*** so long as bad faith is an element of the state law claim. *Zenith, 182 F.3d at 1355*. "This is because the protection otherwise afforded by the patent laws to a patentee's conduct in enforcing its patent may be lost if the patentee acts in bad faith." *182 F.3d 1340, 1343*.

Donnelly can present no case or other source stating that Michigan common law unfair competition claims *absolutely* cannot **[*18]** be sustained on the allegations at issue in this case. Moreover, other Michigan cases have recognized similar unfair competition claims under Michigan common law, and federal law apparently does not preempt such a claim. Therefore, Donnelly's Motion to Dismiss the unfair competition counterclaim will be denied.

B. Bifurcation

Donnelly further moves that the trial of all antitrust counterclaims, the patent misuse defense, and the unfair competition counterclaim be bifurcated from the current patent case to promote convenience, expediency, and economy for all participants in these matters. Donnelly further argues that conducting one trial on all issues poses the risk of unfairly prejudicing Donnelly's patent infringement claims by adding many new issues, documents, and witnesses, as well as a great deal more time and complexity to the patent proceedings.

HN8[] A court may order separate trials of claims or issues "in furtherance of convenience or to avoid prejudice, or when separate trials will be conducive to expedition and economy." *Fed. R. Civ. P. 42(b)*. In deciding whether to bifurcate, the major consideration is directed toward the choice most likely to result in a just final **[*19]** disposition of the litigation. *In re Innotron Diagnostics, 800 F.2d 1077, 1084 (Fed. Cir. 1986)*. In the interests of justice, the Court will order two separate trials in this matter -- the first trying issues pertaining to the patent infringement claim, and the second trying issues pertaining to the antitrust and unfair competition counterclaims and the patent misuse defense.

1. Antitrust and Unfair Competition Counterclaims

HN9[] In cases where there is a patent claim and an antitrust defense or counterclaim, it is "acceptable procedure to sever the antitrust claims from the patent claims and to provide for separate trials of each." *Standard Pressed Steel Co. v. Astoria Plating Corp., 1969 U.S. Dist. LEXIS 10541, 162 U.S.P.Q. 441, 442 (E.D. Ohio 1969)*. This practice is common because both issues require voluminous and complex proof and because the proof is non-duplicative. *Id.*

---

[7] *Clipper Belt* cites from 2 Nims on Unfair Competition § 4, at 12-16 (1917), which is apparently from where the statement quoted *supra* was reported. *See Clipper Belt, 194 N.W. at 128*. Also, *Clipper Belt* takes note of the statement which was later quoted and made famous in Michigan law by *Schwannecke* in 1933, *see supra,* which came from a different treatise or source identified as 26 R.C.L. 826 *et seq.* See id. The *Clipper Belt* Court uses both statements in a manner suggesting they both constitute Michigan common law of unfair competition. *See id.*

[8] This Court presumes that Illinois state law was at issue in *Zenith,* although the Federal Circuit did not specify. *Cf. Zenith, 182 F.3d at 1342* (referring to "the state's unfair competition laws," where the case originated in the Northern District of Illinois).

R&S USA LP's antitrust counterclaims are specifically dependant on a finding that Donnelly's patents in question are invalid and unenforceable since "antitrust laws do not negate a patentee's right to exclude others from patent property." In re Indep. Serv. Orgs. Antitrust Litig., 203 F.3d 1322, 1325 (Fed. Cir. 2000). **[*20]** Furthermore, R&S USA LP's counterclaims require the examination of many issues outside the scope of the current patent case. In order to prove an antitrust violation, in addition to demonstrating the core assertion of patent invalidity, R&S USA LP must first establish the relevant market and then demonstrate the indicia of monopoly power, including (but not limited to) the existence of barriers of entrance into the relevant market, the power to exclude others, the power to raise prices, the lack of product substitutability, predatory intent, market dominance, and guilty knowledge on the part of Donnelly. *See* Innotron Diagnostics, 800 F.2d at 1085.

R&S USA LP argues that because the evidence and proofs needed in the current patent infringement claim and the evidence and proofs needed in the antitrust counterclaim overlap considerably and have largely the same patent "invalidity and unenforceability" basis, bifurcation would result in an excess of redundant litigation. However, if a determination is made that Donnelly's patents are invalid and unenforceable, neither party in this case need again prove the same issues at the antitrust hearing, but need only establish **[*21]** other issues not previously determined, such as the relevant market or predatory intent. Furthermore, although the antitrust counterclaim depends heavily on a determination that Donnelly's patents in question are invalid, the amount of evidence, testimony, and presentation that R&S USA LP must show in addition to the basic determination of patent invalidity in order to successfully claim antitrust violations is considerable.

If the Court or a jury finds that Donnelly's patents in question were valid and enforceable, R&S USA LP's counterclaims will be weakened if not obviated altogether. *See* Indep. Serv. Orgs. Antitrust Litig., 203 F.3d at 1325. Although the possibility that antitrust and patent misuse counterclaims may be obviated does not alone warrant bifurcation, it does offer substantial support for it.

Moreover, ***HN10***[] because patent infringement and antitrust matters involve two completely different and highly complex bodies of law, a single trial for both the patent infringement claim and the antitrust counterclaims will likely cause some degree of jury confusion. A trial requiring the determination of patent validity, infringement, and antitrust violations places **[*22]** a heavy burden on any jury. Henan Oil Tools, Inc. v. Eng'g Enters., Inc., 262 F. Supp. 629, 631 (S.D. Tex. 1966). For all these reasons, the Court will bifurcate the possible trial of R&S USA LP's antitrust counterclaims from the current patent infringement proceedings.

The same reasoning applies to the unfair competition counterclaim here, since most of the conduct alleged underlying the unfair competition counterclaim is quite similar to that underlying the antitrust counterclaims. Therefore, trial of the unfair competition counterclaim will also be bifurcated from the patent infringement proceedings and tried together with the antitrust counterclaims.

2. Patent Misuse Defense

Finally, bifurcation of the patent misuse defense is also appropriate under Rule 42(b). The patent misuse defense has been explained as follows:

> ***HN11***[] Where the patent is used as a means of restraining competition with the patentee's sale of an *unpatented* product, the successful prosecution of an infringement suit even against one who is not a competitor in such sale is a powerful aid to the maintenance of the attempted monopoly of the *unpatented* article, and is thus **[*23]** a contributing factor in thwarting the public policy underlying the grant of the patent.

Kolene Corp. v. Motor City Metal Treating, Inc., 440 F.2d 77, 84 (6th Cir. 1971) (emphasis added). Patent misuse is an equitable doctrine which prevents a patentee from enforcing its rights through wrongful action. Hunter Douglas, Inc. v. Comfortex Corp., 44 F. Supp. 2d 145, 156 (N.D.N.Y. 1999). The patentee may not claim the protection of the patent's grant of exclusivity given for reasons of public policy where the patentee uses the grant to subvert the public policy underlying patents. *Id.* (quoting Morton Salt Co. v. G.S. Suppiger Co., 314 U.S. 488, 492-95, 86 L. Ed. 363, 62 S. Ct. 402, 1942 Dec. Comm'r Pat. 733 (1942)). [9]

R&S USA LP, **HN12**[] to successfully assert its misuse defense, must prove Donnelly "has impermissibly broadened the physical or temporal scope of **[*24]** the patent grant with anticompetitive effect." Hunter Douglas, Inc., 44 F. Supp. 2d at 156. While one who misuses a patent does not also necessarily violate antitrust laws, one who violates antitrust laws by using a patent *is* necessarily guilty of patent misuse. *Id.*

This Court adopts the reasoning of the *Hunter Douglas* Court in its conclusion that the patent misuse defense should be bifurcated and tried with antitrust counterclaims. *See* Hunter Douglas, Inc., 44 F. Supp. 2d at 156. Simply stated, this is primarily because the patent misuse defense and the antitrust claims involve the same essential operative facts. *See id.*

In more significant detail, the *Hunter Douglas* Court explained the benefits of trying the patent misuse defense separately from the question of infringement, all of which apply to the matter before this Court:

> In the abstract, the ultimate issue in determining the merit of a patent misuse defense is whether the patentee has sought to wrongfully extend the rights granted under the patent statute; not whether the patentee has violated the antitrust laws per se. Read in that light, it would in all cases **[*25]** make perfect sense as a matter of law to group the patent misuse defense with patent rather than antitrust issues. Practically speaking, however, a party claiming patent misuse predicated on alleged antitrust violations will present its most forceful case which will entail showing the patentee to be a violator of the antitrust laws. Thus, one missing the primary target of establishing antitrust liability may nonetheless meet the lesser burden of showing misuse. Antitrust and patent misuse, therefore, are connected as a matter of fact.
> Juries are fact-finders and as such are called upon to apply the relevant law to the facts presented. In cases involving complex issues, legal or otherwise, the interest of promoting the most orderly presentation of facts takes on added significance …. Given the foregoing, the patent misuse defense is better grouped with … antitrust counterclaims.
>
> Further, patent misuse is more logically connected to antitrust and state tort issues rather than issues of patent liability. As presently constructed, the first phase of the trial will involve presentation of infringement, validity, and enforceability matters. Each of these pertains to (1) the **[*26]** formalities of the … patents [in suit] as they existed on their respective dates of issuance and (2) the actions of [the patent holder] during the prosecution of the … patents …. Antitrust claims as well as the misuse defense, on the other hand, relate to [the patent holder's] conduct in practicing the patents.
>
> Moreover, placing the misuse defense with the antitrust counterclaims maintains the economies derived from separating the patent liability issues from … counterclaims. That is, grouping the misuse defense with the patent liability issues would inject antitrust issues into the patent liability phase when it has already been found that the interests of judicial economy, convenience, and minimizing prejudice are better served when the patent and antitrust issues remain separate.

Hunter Douglas, Inc., 44 F. Supp. 2d at 156. Accordingly, the Court will bifurcate R&S USA LP's patent misuse defense from the current patent infringement proceedings. The patent misuse defense will be tried with the antitrust counterclaims.

C. Stay on Discovery

The Court will not issue a stay on discovery of any issues which may solely relate to the **[*27]** antitrust or unfair competition counterclaims or the patent misuse defense. All discovery will continue so that it will completed prior to the two separate trials.

---

[9] Further discussion of the limits of this defense may be found in Virginia Panel Corp., 133 F.3d at 868-871.

The Court believes that such a course is best in this matter for several reasons. For one, it will eliminate disagreement between the parties about what is and is not related to which claims and thus what discovery is permitted now and what discovery has been stayed. This will permit the focus to be on the collection of discovery information instead of bickering.

Second, full discovery now, thus permitting the parties to have the complete picture of all available evidence, facilitates settlement of this matter more than a stay would. A more likely chance of settlement serves the interests of justice, convenience, expediency, and conservation of resources of all involved.

Third, full discovery now eliminates the possibility of unfair prejudice to the parties inuring from interpretation of a stay on discovery. For instance, the Court could deny a discovery request on the basis that it did not appear to be calculated to lead to pertinent information in the patent infringement phase. If, in actuality, the request would have **[*28]** led to relevant information in the infringement phase, it would be unfair to the requesting party but there would likely be no way to correct the unfairness.

Fourth, full discovery now will permit quicker resolution of this dispute. Conducting two separate rounds of discovery would undoubtedly delay resolution of the entire dispute assuming the second, antitrust trial is necessary after the patent trial. If the second, antitrust trial is not necessary after the patent trial, the length of the entire proceeding will likely be only slightly longer, if longer at all, than it would have been under a stay of antitrust and unfair competition discovery. Such a course of action will also permit the two separate trials to be conducted in swifter succession, allowing the issues to be fresher in all minds involved and increasing the likelihood of a fully fair resolution of this complex dispute.

III. Conclusion

For the reasons stated, the Court will deny Donnelly's Motion to Dismiss R&S USA LP's Michigan common law unfair competition counterclaim. The Court will grant Donnelly's request for a separate trial of R&S USA LP's antitrust and unfair competition counterclaims and patent **[*29]** misuse defense. However, the Court will not grant Donnelly's request for a stay of discovery. An Order consistent with this Opinion will be entered.

DATED in Kalamazoo, MI:

aug 13, 2002

RICHARD ALAN ENSLEN

United States District Judge

ORDER

In accordance with an Opinion issued this day,

IT IS HEREBY ORDERED that Plaintiff Donnelly Corporation's Motion to Dismiss Defendants' Michigan Common Law Unfair Competition Counterclaim Pursuant to *Rule 12(b)(6)* and for Separate Trials and Stay of Certain Discovery Pursuant to *Fed. R. Civ. P. 42(b)* (Dkt. No. 153) is GRANTED in part and DENIED in part.

IT IS FURTHER ORDERED that Donnelly's Motion to Dismiss R&S USA LP's Michigan common law unfair competition counterclaim is DENIED.

IT IS FURTHER ORDERED that Donnelly's request for separate trials is GRANTED. Two separate trials will be held in this matter. The first will determine the patent infringement claim. The second will determine all antitrust and unfair competition counterclaims and the patent misuse defense.

IT IS FURTHER ORDERED that Donnelly's request for a stay of discovery is DENIED.

IT IS FURTHER ORDERED that the parties **[*30]** are to contact Magistrate Judge Ellen S. Carmody within 4 days of the date of this Order to schedule a status conference in this matter.

DATED in Kalamazoo, MI:

aug 13, 2002

RICHARD ALAN ENSLEN

United States District Judge

HN1[] Summary Judgment, Entitlement as Matter of Law

Under *Fed. R. Civ. P. 56(c)*, summary judgment is appropriate when there is no genuine issue as to any material fact, and the moving party is entitled to judgment as a matter of law. In considering a motion for summary judgment, the judge's function is not himself to weigh the evidence and determine the truth of the matter but to determine whether there is a genuine issue for trial. A dispute about a material fact is genuine if the evidence is such that a reasonable jury could return a verdict for the nonmoving party. Thus, a judge must ask himself not whether he thinks the evidence unmistakably favors one side or the other but whether a fair--minded jury could return a verdict for the nonmoving party on the evidence presented. In undertaking this inquiry, a court must view the facts and the reasonable inferences drawn therefrom in the light most favorable to the party opposing the motion, but the opponent must bring forth evidence upon which a reasonable factfinder could rely. The mere existence of a scintilla of evidence in support of the nonmoving party's case is not sufficient to preclude an order granting summary judgment.

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN2[] Sherman Act, Claims

A plaintiff bears the burden of proving relevant market in antitrust actions. Thus, this is essential to the success of any claim of conspiracy under *§ 1* (*15 U.S.C.S. § 1*) of the Sherman Act, attempted monopolization under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, unlawful acquisition under the Clayton Act, and any violation of the Maryland Antitrust Act. Subsections (a)(1) and (a)(2) of the Maryland Antitrust Act are substantially similar to *§§ 1*, *2* (*15 U.S.C.S. §§ 1*, *2*) of the Sherman Act, and courts' analysis of the former should be guided by federal decisions under the latter.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN3[] Market Definition, Relevant Market

A relevant antitrust market has both a product and a geographic dimension, each of which is defined by its outer boundaries. The U.S. Supreme Court has explained that the outer boundaries of a product market can be proven through a showing of either of two market characteristics. First, a plaintiff may offer evidence of reasonable interchangeability of use, i.e., evidence that the products contained in the market are interchangeable for the consumer's purposes. Second, a plaintiff may offer evidence of cross-elasticity of demand, i.e., the responsiveness of the sales of one product to price changes of the other. Under either test, the key issue is whether and under what conditions consumers would substitute one product for another. The relevant geographic market, on the other hand, is the area in which buyers or sellers of the relevant product effectively compete. The important economic factors that delimit the boundaries of the geographic market or submarket include transportation costs, actual sales, localized demand, industry recognition, and price relationships. In sum, then, a relevant market is the narrowest market which is wide enough so that products from adjacent areas or from other producers in the same area cannot compete on substantial parity with those included in the market.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN4[] Regulated Practices, Market Definition

Where they bear the burden of proving relevant market, to survive summary judgment on antitrust claims, a plaintiff must offer admissible evidence sufficient for a jury to find that the proposed relevant markets are accurate. Relevant market cannot be proved through generalizations about any given industry, but instead must be based on the economic and commercial realities of the particular market studied.

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN5[] Regulated Practices, Market Definition

To prove relevant market in antitrust actions, expert testimony is of utmost importance, and that testimony, or any other evidence, must be based on specific facts pertaining to the proposed market.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN6[] Sherman Act, Claims

To prove a violation of *§ 1* (*15 U.S.C.S. § 1*) one of the Sherman Act, a plaintiff must show the existence of an agreement in the form of a contract, combination, or conspiracy that imposes an unreasonable restraint on trade. To withstand summary judgment the plaintiff must: (1) establish that a defendant had a conscious commitment to a common scheme designed to achieve an unlawful objective, and (2) bring forth evidence that excludes the possibility that the alleged coconspirators acted independently or based upon a legitimate business purpose.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Evidence > Inferences & Presumptions > General Overview

HN7[] **Regulated Practices, Price Fixing & Restraints of Trade**

Courts should not permit fact finders to infer conspiracies when such inferences are implausible, because the effect of such practices is often to deter procompetitive conduct.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN8[] **Regulated Practices, Price Fixing & Restraints of Trade**

Courts proceed under the standard "rule of reason" for determining whether a restraint on trade is reasonable. In proving that conduct is unreasonable under this standard, a plaintiff has to show that the alleged conspiracy adversely affected competition, which requires a showing that one or more of the defendants had market power. To prove market power, the plaintiff first must establish the relevant product and geographic markets.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN9[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

There are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. Among the practices which the courts have heretofore deemed to be unlawful in and of themselves are price fixing, division of markets, group boycotts, and tying arrangements. In determining whether conduct is per se unreasonable, the inquiry must focus on whether the effect and purpose of the practice are to threaten the proper operation of the predominately free market American economy--that is, whether the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output, or instead one designed to increase economic efficiency and render markets more, rather than less, competitive.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN10[] **Regulated Practices, Price Fixing & Restraints of Trade**

It is axiomatic that the antitrust laws were passed for the protection of competition, not competitors.

Civil Procedure > ... > Pleadings > Complaints > Requirements for Complaint

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

HN11[] Complaints, Requirements for Complaint

Fed. R. Civ. P. 8(a) requires a statement of a claim showing that the pleader is entitled to relief.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

HN12[] Regulated Practices, Price Fixing & Restraints of Trade

Under the "essential facility" theory of law, the elements are: (1) control of an essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the facility; (3) denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility to competitors.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN13[] Regulated Practices, Monopolies & Monopolization

To establish "control by a monopolist," a plaintiff must demonstrate that a defendant has monopoly power in a properly defined relevant market.

HN16[] **Sherman Act, Claims**

Even if a plaintiff can establish relevant market, to survive summary judgment on claims of attempting and conspiring to monopolize in violation of *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, the plaintiff must provide evidence from which a reasonable jury could find the following: (1) that a defendant had a specific intent to monopolize a relevant market; (2) that the defendant engaged in predatory or anticompetitive acts designed to further their intent; and (3) that there is a dangerous probability that the defendant will succeed in its attempt. Also, to establish a willful attempt to acquire monopoly power, the plaintiff must show that a jury could find no valid business reason or concern for efficiency in the defendant's choice to act as it did.

Antitrust & Trade Law > Sherman Act > Claims

Evidence > Inferences & Presumptions > Inferences

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN17[] **Sherman Act, Claims**

Absent direct evidence, an antitrust plaintiff may raise an inference of specific intent to monopolize (the first element of a claim under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act) by offering evidence of predatory or anticompetitive acts (the second element of a claim under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act).

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN18[] **Actual Monopolization, Anticompetitive & Predatory Practices**

Establishing predatory pricing requires a showing that complained of conduct lacked a business efficiency and that there was a likelihood of recoupment of losses. If a firm has been attempting to exclude rivals on some basis other than efficiency, it is fair to characterize its behavior as predatory. To show wilfulness under *§ 2* (*15 U.S.C.S. § 2*) of the Sherman Act, a plaintiff must show that a jury could find no valid business reasons or concern for efficiency in the defendants' allegedly anticompetitive act.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview

HN19[] **Robinson-Patman Act, Claims**

By its terms, the Robinson-Patman Act is limited to price discrimination in the sale of commodities. The majority of courts to consider the issue have concluded that newspaper advertising is not a commodity under the statute. Courts have held that newspapers are considered a commodity under the Act.

Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview

HN20[] **Regulated Practices, Price Discrimination**

Maryland law does not distinguish between "commodity" and "service" with regard to price differentials.

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > General Overview

HN21[] **Antitrust & Trade Law, Clayton Act**

Section 7 (*15 U.S.C.S. § 18*) of the Clayton Act prohibits acquisitions whose effect may be substantially to lessen competition.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Governments > Legislation > Statute of Limitations > Time Limitations

Contracts Law > Breach > Breach of Contract Actions > General Overview

Contracts Law > Breach > General Overview

HN27[] **Breach, Anticipatory Repudiation**

Under Maryland law, a cause of action for breach of contract must be filed within three years from the date that the cause of action accrues. *Md. Code Ann., Cts. & Jud. Proc. § 5-101* (1998). A breach of contract claim accrues when the contract is breached or anticipatorily breached.

Labor & Employment Law > Employment Relationships > Employment Contracts > Breaches

Torts > ... > Contracts > Intentional Interference > Elements

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Contracts > General Overview

HN28[] **Employment Contracts, Breaches**

To prove tortious interference with contract in Maryland, plaintiffs must prove (1) the existence of a contract between the plaintiff and a third party; (2) a defendant's knowledge of that contract; (3) the defendant's intentional interference with that contract; and (4) resulting damages to the plaintiff. Even if the plaintiff can establish these elements, a competitor who induces a breach of an at-will contract to serve his own competitive purpose does not interfere improperly unless the competitor employs wrongful means or creates a restraint of trade.

Torts > ... > Prospective Advantage > Intentional Interference > Elements

Torts > Business Torts > General Overview

Torts > Business Torts > Commercial Interference > General Overview

Torts > ... > Commercial Interference > Prospective Advantage > General Overview

HN29[] **Intentional Interference, Elements**

To prove a claim of tortious interference with a prospective economic relationship, a plaintiff must show (1) intentional and willful acts; (2) calculated to cause damage to the plaintiff in its lawful business; (3) done with the unlawful purpose to cause such damage and loss, without right or justifiable cause on the part of a defendant; and (4) actual damage and loss resulting. The tort requires conduct that is independently wrongful or unlawful, quite apart from its effect on the plaintiff's business relationships. Wrongful or unlawful acts include common law torts and violence or intimidation, defamation, injurious falsehood or other fraud, violation of criminal law, and the institution or threat of groundless civil suits or criminal prosecutions in bad faith.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Regulated Practices > Price Discrimination > General Overview

Antitrust & Trade Law > Robinson-Patman Act > Coverage > General Overview

HN30[] **Robinson-Patman Act, Claims**

Md. Code Ann., Com. Law II § 11-204(a)(3) is in pari materia with the Robinson-Patman Act's prohibition of price discrimination, *15 U.S.C.S. § 13(a)*. To establish liability under the Robinson-Patman Act, a plaintiff bear the burden of proving a relevant market within which the consequences of a defendant's anticompetitive acts can be measured.

Opinion

[*722] MEMORANDUM OPINION

The plaintiffs in this case filed a nine-count complaint, alleging violations of the *Sherman Act*, the *Clayton Act*, the *Copyright Act*, and the *Maryland Antitrust Act*, and state law claims for unfair competition, breach of contract, and tortious interference with contract. The case is now before the Court on three separate motions. The defendants have moved to exclude the testimony of James B. Shaffer, arguing that he is not qualified to offer opinion testimony relevant to this case. That motion has been dealt with in a separate Memorandum Opinion and Order dated August 13, 2002, which excludes Shaffer's opinions as to relevant market and market power. The defendants also have moved for summary judgment on all of the remaining counts of the complaint. [1] The plaintiffs have opposed that motion, and they have moved for preliminary injunctive relief. All issues have been fully briefed, and no oral hearing is necessary. Local Rule 105.6 (D. Md. 2002). For the reasons set forth below, by separate order, the Court will GRANT the defendants' motion for summary judgment, and DENY AS **[**3]** MOOT the plaintiffs' motion for preliminary injunctive relief.

I. BACKGROUND

A. Press Network and the Sale of Advertising in Prince George's County

The plaintiffs in this case are Berlyn, Inc. (Berlyn), Montgomery Sentinel Publishing, Inc. (Sentinel), and Kenneth C. Rossignol (Rossignol). Berlyn is wholly owned by Lynn Kapiloff (Kapiloff) and her husband. Kapiloff also has served as the CEO and primary manager of Sentinel's newspapers in Montgomery and Prince George's Counties (the *Montgomery County Sentinel* and the *Prince George's Sentinel*) since December, 1987. Rossignol publishes St. *Mary's Today*, a weekly paid newspaper published in Lexington Park, **[*723]** Maryland, which has a circulation of approximately 5,000, with most subscribers and advertisers located in St. Mary's County, Maryland.

The Washington Post **[**4]** Company (the Post) is a publicly -- held Delaware corporation. One of its operating units publishes the *Washington Post* newspaper. The Post owns all the stock of The Gazette Newspapers, Inc. ("Gazette"), but requires that Gazette operate as an independent concern. [2] Gazette is a Maryland corporation that publishes approximately 44 newspapers in Montgomery, Frederick, Prince George's, Calvert, Charles, and St. Mary's counties.

---

[1] Some counts of the plaintiffs' original complaint have already been dismissed. *See Berlyn, Inc. v. The Gazette Newspapers, Inc., 157 F. Supp. 2d 609 (D. Md. 2001)*.

[2] The plaintiffs argue that the Post exercises substantial control over Gazette, and that, in essence, the two function as one. The plaintiffs note that: (1) Gazette expenditures require the Post's approval; (2) Gazette's acquisitions were studied, strategized, negotiated, and funded by the Post; (3) Gazette regularly reported to the Post; (4) Gazette's CEO and CFO received their paychecks from the "Washington Post Newsweek Tech Media"; and (5) they had mutual interests in acquisitions of the assets of companies such as Comprint and the Chesapeake Publishing Company.

Baltimore Suburban **[**5]** Press Network, Inc. (Press Network or the Network), is a Delaware corporation, fifty percent of which is owned by Gazette. Press Network offers regional and national advertisers a "one contact/one bill" method of placing advertising in multiple newspapers around Washington, D.C.

Berlyn began publishing the *Montgomery County* and Prince *George's Sentinels* in the late 1980s, at which time both were small, paid -- circulation papers. By 1992, Kapiloff had added free, county -- wide papers in both counties based upon the advice of her advertising director, who believed advertisers would be attracted to the larger circulation of the free editions.

In 1992, Gaynelle Nuttall (Nuttall) was in the process of organizing Press Network. Nuttall invited several newspapers, including the Prince *George's Sentinel*, to become members of Press Network. She also sought to include strong community newspapers in the Washington suburbs, including Montgomery County, where she invited Gazette to become a member. At this time, Nuttall believed that the *Prince George's Sentinel* did not have the same level of circulation, penetration, and editorial quality as other Network members, but she hoped **[**6]** the paper would improve over time. According to the plaintiffs, Press Network contacted Kapiloff and nvited the Sentinel to become a member of the Network. The plaintiffs allege that Nuttall represented that Sentinel would be Press Network's only representative paper in Prince George's County and that she reiterated this assurance in November 1997 and April 1998. According to the plaintiffs, Press Network forbade Sentinel from directly dealing with advertisers procured by Press Network or advertisers Sentinel had served before joining Press Network. There was no written contract to this effect. The plaintiffs allege that their "agreement" prevented Berlyn from sustaining contracts with major accounts like Fashion Bug and Kay Bee Toys and caused the resignation of Sentinel sales representatives.

Nuttall testified that by 1995 the *sentinel* had not improved as she hoped, and that she had lost confidence in the paper's ability to measure up to the other publications included in the Network. Nuttall was concerned about the *Sentinel's* condition because she felt that a weak member could hurt the reputation of the entire Network. She came to believe that the Network would be best **[**7]** served by the addition of another member in Prince George's County, and she began to speak to other publishers about expanding into the County, **[*724]** including Chuck Lyons (Lyons), president of Gazette. At that time, none of the publishers she contacted was interested.

By 1997, Gazette had performed well in Montgomery County and had reached profitability in Frederick County. Around this time, Lyons became interested in possibly expanding into Prince George's County. Gazette formed a task force to examine the potential profitability of community -- specific weekly newspapers in the County. In so doing, the task force interviewed potential advertisers, reviewed the demographics of the communities in the county, compiled research and market information regarding potential competitors, and created comprehensive pro formas evaluating the financial aspects of Gazette's entry. Gazette considered potential revenues from several sources, including Press Network accounts. Gazette's pro formas focused on local advertising, which, according to Gazette, is the primary type of advertising that sustains the "community -- specific" model that Gazette had used with success in Montgomery County. According **[**8]** to the defendants, Gazette concluded that its most direct competition for advertising in the Prince George's County would be direct mailand shoppers, and that the *Prince George's Sentinel* was a weak product and was not considered a competitive factor.

Following its research, Gazette decided to enter Prince George's County with one or two community -- specific publications, and planned to launch additional publications only after its first two became successful. In October 1997, Gazette's made its first entry, The *Greenbelt/'College Park Gazette*. That publication became profitable in 1998, and Gazette began additional publications in other Prince George's County communities during the following three years.

According to the defendants, Gazette's new publications in Prince George's County were fast outperforming the Prince *George's Sentinel*, and Nuttall knew of Gazette's reliability first -- hand because Gazette had been the Network's representative in Montgomery County for years. Nuttall also testified on deposition that she believed Gazette could provide a superior product to advertisers, and therefore could generate higher revenues for Press Network. Press Network began **[**9]** presenting advertisers with both the Prince *George's Sentinel* and the *Prince George's Gazette* in late 1997 and included Gazette publications on its March 1, 1998 rate card. When asked to provide a recommendation, Press Network salespersons recommended Gazette's publications. According to the defendants, advertisers preferred these publications for their superior circulation, penetration, reliability, editorial quality, and overall advertising value.

The plaintiffs offer a different account of Gazette's entry into Prince George's County. The plaintiffs argue that Gazette and Press Network conspired to eliminate competition in Prince George's County, first by orchestrating Gazette's entry into the county. The plaintiffs argue that Press Network was conceived, and indeed operated, as Gazette's "corporate sales arm" to the detriment of other Network members. Plaintiffs also argue that Press Network's sales reps pressured advertisers to choose Gazette over the Sentinel, and that Press Network and Gazette conspired to give Gazette preferred treatment on the rate cards the Network provided to advertisers.

B. The Chesapeake Acquisition

St. *Mary's* Today began operating in **[**10]** St. Mary's County in 1990. During the years 1997 through 2000, the only years for which financial data are available, the newspaper's annual profits ranged from a low of $ 1,157 to a high of $ 16,138. These profits constituted the entire compensation that Rossignol took from the business, despite **[*725]** working more than 80 hours per week as a copywriter, delivery person, and general "one man band."

The Post first learned in October 2000 that the Chesapeake Publishing Company (Chesapeake) was for sale. Lyons, who had been president of Chesapeake from 1993 to 1998, was informed of this development and indicated Gazette's interest in acquiring Chesapeake's Southern Maryland Division. According to the defendants, Lyons believed that Chesapeake's Southern Maryland assets would compliment Gazette's existing operations, and that those assets likely would provide a solid return on investment if they could be acquired at a reasonable price.

The Post submitted a nonbinding offer of $ 40 million to $ 50 million on November 1, 2000. The Post was invited to submit a binding indication of interest, and it did so on December 15, 2001. The Post believed its bid (in the range of $ 46 million to $ 48 million) **[**11]** was so low that it had little likelihood of being accepted. The bid was accepted, however, and Gazette purchased the Division on February 28, 2002, for $ 46 million, with funds loaned by the Post and booked to Gazette as an intercompany payable.

The plaintiffs argue that this acquisition adversely affected (or had the potential to so affect) competition in southern Maryland, including Montgomery, Prince George's and St. Mary's Counties. The plaintiffs allege that following this acquisition, the Post and Gazette had a 99% market share in the three counties. Essentially, the plaintiffs argue that this acquisition was an intentional step toward eliminating a major competitor (Chesapeake) and seizing monopoly power.

II. THE STANDARD FOR SUMMARY JUDGMENT

HN1[] Under *Rule 56 (c) of the Federal Rules of Civil Procedure*, summary judgment is appropriate when there is no genuine issue as to any material fact, and the moving party is entitled to judgment as a matter of law. In Anderson *v. Liberty Lobby, Inc., 477 U.S. 242, 249, 91 L. Ed. 2d 202, 106 S. Ct. 2505 (1986)*, the Supreme Court explained that, in considering a motion for summary judgment, **[**12]** "the judge's function is not himself to weigh the evidence and determine the truth of the matter but to determine whether there is a genuine issue for trial." A dispute about a material fact is genuine "if the evidence is such that a reasonable jury could return a verdict for the nonmoving party." *Id. at 248*. Thus, "the judge must ask himself not whether he thinks the evidence unmistakably favors one side or the other but whether a fair -- minded jury could return a verdict for the [nonmoving party] on the evidence presented." *Id. at 252*. In undertaking this inquiry, a court must view the facts and the reasonable inferences drawn therefrom "in the light most favorable to the party opposing the motion," *Matsushita Elec. Indus. Co. v. Zenith Radio Corp., 475 U.S. 574, 587, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*, but the opponent must bring forth evidence upon which a reasonable fact -- finder could rely. *Celotex Corp. v. Catrett, 477 U.S. 317, 91 L. Ed. 2d 265, 106 S. Ct. 2548 (1986)*. The mere existence of a "scintilla" of evidence in support of the nonmoving party's case is not sufficient to preclude an order granting summary judgment. *Anderson, 477 U.S. at 252.* **[**13]**

III. DISCUSSION

A. Relevant Market

1. Product Market

In each of their antitrust claims, the HN2[] plaintiffs bear the burden of proving relevant market. Satellite Television & Assoc. Res., Inc. v. Cont'l Cablevision of Va., [*726] Inc., 714 F.2d 351, 355 (4th Cir. 1983). Thus, this is essential to the success of any claim of conspiracy under Section 1 of the Sherman Act, Murrow Furniture Galleries, Inc. v. Thomasville Furniture Indus., Inc., 889 F.2d 524, 528 (4th Cir. 1989); attempted monopolization under Section 2 of the Sherman Act, Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 459, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993); M & M Med. Supplies & Serv. Inc. v. Pleasant Valley Hosp., Inc., 981 F.2d 160, 166 (4th Cir. 1993); unlawful acquisition under the Clayton Act, United States v. E. I. Du Pont de Nemours & Co., 351 U.S. 377, 395, 100 L. Ed. 1264, 76 S. Ct. 994 (1956); and any violation of the Maryland Antitrust Act, see Natural Design, Inc. v. Rouse Co., 302 Md. 47, 53-56, 485 A.2d 663 (1984) (explaining that subsections (a)(1) and (a)(2) of the Maryland Antitrust Act are substantially similar to Sections [**14] 1 and 2 of the Sherman Act, and that courts' analysis of the former should be guided by federal decisions under the latter); Martello v. Blue Cross & Blue Shield of Md., Inc., 143 Md. App. 462, 494, 795 A.2d 185 (2002) ("In order to determine whether there is a dangerous probability of monopolization, courts have found it necessary to consider the relevant market.").

HN3[] The relevant market has both a product and a geographic dimension, each of which is defined by its outer boundaries. The Supreme Court has explained that the outer boundaries of a product market can be proven through a showing of either of two market characteristics. First, a plaintiff may offer evidence of reasonable interchangeability of use, i.e., evidence that the products contained in the market are interchangeable for the consumer's purposes. See du Pont, 351 U.S. at 395. Second, a plaintiff may offer evidence of cross -- elasticity of demand, i.e., "the responsiveness of the sales of one product to price changes of the other." Id. at 400. "Under either test, the key issue is whether and under what conditions consumers would substitute one product for another." **[**15]** 2 JULIAN O. VON KALINOWSKI, ET AL., ANTITRUST LAWS AND TRADE REGULATION § 24.02 (2d ed. 2002). The relevant geographic market, on the other hand, is "the area in which buyers or sellers of the relevant product effectively compete." Consul, Ltd. v. Transco Energy Co., 805 F.2d 490, 495 (4th Cir. 1986). "The important economic factors that delimit the boundaries of the geographic market or submarket include transportation costs, actual sales, localized demand, industry recognition, and price relationships." VON KALINOWSKI, *supra*, at § 24.03 2. In sum, then, a relevant market "'is the narrowest market which is wide enough so that products from adjacent areas or from other producers in the same area cannot compete on substantial parity with those included in the market.'" Int'l Wood Processors v. Power Dry, Inc., 792 F.2d 416, 430 (4th Cir. 1986) (quoting L. SULLIVAN, HANDBOOK OF THE LAW OF ANTITRUST § 12, at 41 (1977)).

The plaintiffs contend that the relevant product market consists of community newspapers and the zoned edition of dailies. Plaintiffs further contend that the geographic market is defined by county, and thus, for its Sherman Act **[**16]** claims, the geographic markets are Prince George's and Montgomery County, and for its Clayton Act claim the geographic market is "the areas comprising" Prince George's and Montgomery Counties and "the southern Maryland counties of Charles, St. Mary's and Calvert." Pls.'s Opp. at 26. The defendants argue that this market definition is not supported by the evidence, and, in any case, that the relevant product market should include shoppers and direct mail.

Because HN4[] they bear the burden of proving relevant market, to survive summary **[*727]** judgment on their antitrust claims, the plaintiffs must offer admissible evidence sufficient for a jury to find that the proposed relevant markets are accurate. See Celotex Corp., 477 U.S. at 322. Defining markets for antitrust analysis is an extremely complex task. *See, e.g.,* Cogan v. Harford Memorial Hosp., 843 F. Supp. 1013, 1020 (D. Md. 1994) (characterizing the issue of relevant geographic market as a "highly technical economic question"); Victus, Ltd. v. Collezione Europa U.S.A., Inc., 26 F. Supp. 2d 772, 786 (M.D.N.C. 1998) (noting that defining relevant product markets is a "difficult economic **[**17]** question"). Relevant market cannot be proved through generalizations about any given industry, but instead must be based on the economic and commercial realities of the particular market studied. See Eastman Kodak Co. v. Image Tech. Servs., 504 U.S. 451, 467, 119 L. Ed. 2d 265, 112 S. Ct. 2072 (1992); Brown Shoe Co. v. United States, 370 U.S. 294, 335, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962). Thus, HN5[] to prove relevant market, expert testimony is of utmost importance, and that testimony, or any other evidence, must be based on specific facts pertaining to the proposed market. [3] The plaintiffs' proposed expert in this case, James B. Shaffer, is not qualified to offer his opinion as to the relevant product or geographic markets, nor is he qualified to testify as to market power. See Memorandum Opinion and Order dated August 13, 2002. Thus, plaintiffs bear the difficult, if not impossible, burden of proving the outer boundaries of a relevant market and market power without the aid of an economic expert. Apart from Shaffer's testimony, the plaintiffs argue that other evidence supports their market definitions. The documents cited by the plaintiffs, however, are insufficient to support their **[**18]** proposed market definitions, as they are either inadmissible or irrelevant.

[19]** To demonstrate that the relevant product market excludes direct mail, shoppers, and any form of electronic broadcast media, the plaintiffs first cite a one -- page Press Network document of unknown origin stating that "Washington Is a Print Town" and explaining that Washington area residents look to suburban newspapers for product advertising more so than other media sources. The plaintiffs, however, offer no evidence as to the source of this document, thus raising technical problems of admissibility under FED. R. EVID. 802 and 901, see *Wilson v. Clancy, 747 F. Supp. 1154 (D. Md. 1990)*, *aff'd 940 F.2d 654 (4th Cir. 1991)*, nor do they assert that this document is the result of a careful inquiry aimed at defining relevant markets for antitrust purposes. See *Va. Vermiculite, **[*728]** Ltd. v. W.R. Grace & Co.Conn. & the Historic Green Springs, Inc., 98 F. Supp. 2d 729, 732-33 (W.D. Va. 2000)*. [4] Indeed, from all outward appearances, it was generated to attract advertisers to Press Network, and away from alternatives to newspaper advertising, including television, cable, **[**20]** radio, yellow pages and other forums for advertising.

[21]** The plaintiffs also cite two internal Post documents (WP003 & WP004). In short, these documents are irrelevant, as they are summaries of studies of metropolitan daily newspapers, and they do not focus specifically on the smaller product market proposed by the plaintiffs, viz., community newspapers and zoned editions of dailies. Moreover, the plaintiffs again failed to identify how these documents were generated, whether the methods used were reliable, or whether the researchers sought to determine market boundaries as defined in ***antitrust law***.

---

[3] It is unclear whether expert testimony, as a matter of law, is a necessary predicate to finding a market definition. Courts within this Circuit (and some outside) have indicated that a plaintiff must provide expert testimony on this issue. See *Military Servs. Realty, Inc. v. Realty Consultants of Va., Ltd., 823 F.2d 829, 832 (4th Cir. 1987)* (affirming summary judgment because, *inter alia*, the plaintiff's experts "were simply unable, when deposed, to provide any facts concerning injury to competition, nor could they adequately identify the relevant market"); *Cogan v. Harford Memorial Hosp., 843 F. Supp. 1013, 1020 (D. Md. 1994)* ("To allow a jury to make a finding as to the geographic market, [the plaintiff] must provide the Court with expert testimony on this highly technical economic question."); Am. *Key Corp. v. Cole Nat'l Corp., 762 F.2d 1569, 1579 (11th Cir. 1985)* ("Construction of a relevant economic market or a showing of monopoly power in that market cannot . . . be based upon lay opinion testimony."). The Supreme Court has indicated otherwise. See Brooke Group, *Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 242, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)* ("Expert testimony is useful as a guide to interpreting market facts, but it is not a substitute for them."). As a practical matter, however, it would seem impossible to prove such a complex economic question without the assistance of a qualified expert, viz., an economist.

[4]

> The court in *Virginia Vermiculite* explained that the purpose behind an offered market study can be critical: Though related to a relevant market determination in an antitrust issue, there are differences between an analysis for business investment and an analysis for antitrust purposes. For one, market analyses performed for business usually provide information regarding the various places a product would be sold, uses for which it might be sold, and the regions in which it might be traded. These analyses do not go into the detail required for antitrust matters. For instance, defining where a product could be sold is only a small part of defining a geographic market as there can be relevant markets that are narrower or broader than where individual producers sell their products. In addition, market analyses for antitrust markets generally require some expertise in the field of industrial organization. Individuals with expertise in defining markets for [a given product] generally would not possess the skill and training of a professional economist necessary to define relevant market for antitrust purposes.

98 F. Supp. 2d at 732-33.

The plaintiffs also cite several cases and economic articles that recite factual findings as to the extent to which newspapers compete with other media sources for advertising revenues. These findings are also irrelevant. There is no evidence that any of these cases or articles dealt with a determination of the specific outer boundaries of the proposed markets in this case, and the plaintiffs cannot offer them as evidence of such. In short, these are exactly the type of generalized conclusions that must be rejected in favor of concrete data reflecting economic and commercial realities.

2. Geographic Market

The plaintiffs' evidence as to geographic **[**22]** market is similarly deficient. The plaintiffs again cite internal Post documents and deposition excerpts that do not directly speak to outer geographical boundaries and lines of competition for antitrust purposes. The Post documents are probative only in that they list business statistics by county. The deposition excerpts generally are statements of other nonexperts as to what the geographical lines of competition are. There is no evidence, however, that the Post's internal documents or the opinions of its employees are based on specific research aimed at determining relevant market for antitrust purposes. In short, the plaintiffs have not undertaken an admissible, independent study of the proposed markets, and they therefore fail to offer admissible evidence as to the specific geographical lines of competition.

The plaintiffs have not offered sufficient evidence on the highly technical and fact -- specific question of relevant market. Plaintiffs' arguments based on decisions from courts in other cases are unpersuasive, **[*729]** as those cases did not deal with the specific product or geographic markets involved in this case. Plaintiffs' reliance on studies conducted by the defendants is **[**23]** also misplaced, absent a showing that these studies dealt specifically with the markets alleged here or that they were aimed at defining relevant market for antitrust purposes. Due to the plaintiffs' failure to offer admissible evidence on which a jury could accept their definition of relevant market, each of the plaintiffs' antitrust claims (Counts I (*Sherman Act § 1*), *II* (*Sherman Act § 2*), III (Robinson -- Patman Act); IV (*Clayton Act § 7*) and IX (respective sections of the Maryland Antitrust Act) of the amended complaint) fails as a matter of law. As discussed below, however, even if the plaintiffs were capable of proving relevant market, their antitrust claims suffer from other fatal defects.

B. Amended Complaint Count I -- Sherman Act Section 1

The plaintiffs contend that Gazette and Press Network conspired to restrain trade in violation of Section 1 of the Sherman Act, *15 U.S.C. § 1*. [5] ***HN6***[] "To prove a violation of section one of the Sherman Act, a plaintiff must show the existence of an agreement in the form of a contract, combination, or conspiracy that imposes an unreasonable restraint on trade." *Oksanen v. Page Memorial Hosp., 945 F.2d 696, 702 (4th Cir. 1991).* **[**24]** Under *Monsanto Co. v. Spray -- Rite Service Corp., 465 U.S. 752, 79 L. Ed. 2d 775, 104 S. Ct. 1464 (1984)*, and Matsushita *Electrical Industrial Co. v. Zenith Radio Corp., 475 U.S. 574, 89 L. Ed. 2d 538, 106 S. Ct. 1348 (1986)*, as interpreted in *Laurel Sand & Gravel, Inc. v. CSX Transportation, Inc., 924 F.2d 539, 542-43 (4th Cir. 1991)*, to withstand summary judgment the plaintiffs must: (1) establish that the defendants had a "'conscious commitment to a common scheme designed to achieve an unlawful objective'" id. (quoting *Monsanto, 465 U.S. at 768*); and (2) bring forth evidence that excludes the possibility that the alleged coconspirators acted independently or based upon a legitimate business purpose. *Id.*

Specifically, the plaintiffs allege that, "at the instance of and pursuant to an agreement **[**25]** with the other defendants," Press Network "revised its rate card so as to group all of the Gazette's newspapers together and quote a combined rate for them, thus encouraging advertisers to seek blanket coverage in the entire Gazette network." Am. Compl. 23(d). Plaintiffs also argue that "at the instance of and pursuant to an agreement with the other defendants," Press Network allegedly "followed inconsistent practices in listing members on its rate cards, in order to benefit the Gazette newspapers." Id. 23 (e). The plaintiffs also contend that, pursuant to the conspiracy, Gazette "abused their connection with Press Network by inducing [it] to agree to reduce the advertising obtained

[5] This Court has already found that "the Copperweld doctrine makes clear that Post and Gazette are incapable of conspiring under this statute." *Berlyn, Inc., 157 F. Supp. 2d at 615*.

from such network by the *Sentinel* and other independent newspapers, so as to build up Gazette's market power by allocating to it advertising volume and revenues the independent papers had before the conspiracies . . . were implemented." Id. 28(f).

1. Concerted Action

As evidence that there was concerted action as to the rate cards, the plaintiffs offer a 1992 letter from Davis Kennedy, the previous owner of Gazette, to Gay Nuttall, insisting that one of the Gazette's newspapers, the *Burtonsville* **[**26]** *Gazette*, be **[*730]** the "primary buy" for advertisers using Press Network. Plaintiffs also offer a copy of an email between two Gazette employees which describes Press Network as the "corporate sales arm" of Gazette. Finally, the plaintiffs offer a rate card, designed by Nuttall but never actually used, which placed the Gazette's publications first and listed the Sentinel only as "also available."

As for the alleged agreement to switch accounts from Sentinel to Gazette and the supposedly orchestrated entry of Gazette into Prince George's County, the plaintiffs offer the following: (1) evidence that, prior to entering the county, Gazette anticipated that it would eventually receive substantial revenue from future Press Network accounts; (2) testimony from a former sales representative who indicated that Press Network's sales reps were told to actively encourage advertisers to switch their ads to Gazette publications; (3) further testimony that there was a general feeling among sales reps that they were to switch accounts from Sentinel to Gazette because Gazette was the parent company, and that they worked for the parent company and not Sentinel; (4) a memo from Daniel N. Butcher (Gazette's **[**27]** CFO) to Nuttall (Press Network's CEO) indicating that he knew that Press Network intended to move business from Sentinel to Gazette when Gazette became more successful; (5) other evidence indicating that Press Network and Gazette knew of each other's goals in Prince George's and Montgomery Counties and that there was a general willingness to achieve those goals.

The plaintiffs' evidence as to a rate card conspiracy is irrelevant and cannot support a finding of concerted action, as a matter of law. The Kennedy letter was written six years before the rate card update, by a person who was no longer a representative of Gazette when the update took place. Moreover, it had nothing to do with Sentinel or any of the other plaintiffs. The email between Gazette employees is similarly irrelevant. It contains no references to either Press Network's rate cards or the *Prince George's Sentinel*, it is dated three years after the rate card update, and it reflects a communication between two Gazette employees, NOT between employees of Gazette and Press Network. Finally, evidence that Nuttall designed a rate card that listed Sentinel in a disadvantaged position is not probative of concerted action **[**28]** because (1) there is no evidence of any cooperative effort in designing this card (Nuttall, as president of Press Network, designed a rate card for Press Network); and (2) the card was never used.

The plaintiffs' evidence as to a concerted effort to switch accounts from Sentinel to Gazette also fails to raise a triable issue. First, plaintiffs cannot support an inference that Gazette's entry into Prince George's County was the result of some common scheme. The record clearly indicates that Gazette entered the county at least one year after rejecting Press Network's initial inquiries. The evidence that Gazette considered possible future income from Press Network accounts is not sufficient to prove that Gazette's entry was a communal effort with the Network or that the projected revenue would come as a result of switching accounts from Sentinel to Gazette. Most importantly, the plaintiffs have failed to provide evidence that it would be contrary to Gazette's business purposes to attempt an entry into Prince George's County, especially in light of Gazette's success in other nearby counties.

As for Press Network's efforts to cause advertisers switch from Sentinel to Gazette, the plaintiffs **[**29]** similarly have failed to show that such a recommendation was not consistent with Press Network's business interests. The evidence indicates that Gazette's offerings in Prince George's County **[*731]** had a higher circulation, deeper penetration, etc., and that Press Network viewed them as a superior product. Thus, it would be entirely consistent with Press Network's business purposes to recommend that their customers (advertisers) switch to a product more likely to reach their intended audience. The plaintiffs have failed to show that advertisers would not achieve better results by placing ads with Gazette.

As evidence that Press Network acted against its own interests, the plaintiffs point out that in 1997, Press Network's accounting department gave its owners, Gazette and Arundel, a 5% discount on commissions, resulting in a "loss" of $ 160,000. This evidence simply is not probative of whether Press Network's decision to recommend Gazette over Sentinel ran counter to the Network's independent interests.

For these reasons, the Court finds that there is no triable issue as to whether the defendants engaged in concerted action, as is necessary under *Section 1 of the Sherman Act.* In so finding, **[**30]** the Court is especially wary of permitting an inference of conspiracy where there is such a strong showing that the complained -- of acts were wholly consistent with the independent business interests of each alleged coconspirator. See *Matsushita Elec. Indus. Co., 475 U.S. at 593* ***HN7***[] ("Courts should not permit factfinders to infer conspiracies when such inferences are implausible, because the effect of such practices is often to deter procompetitive conduct." (citing *Monsanto, 465 U.S. at 762-64*)).

2. Unreasonable Restraint on Trade

Even if plaintiffs could show that there was concerted action in this case between Gazette and Press Network, as a matter of law they could not establish an unreasonable restraint on trade. It first should be noted that if this step were necessary, ***HN8***[] the Court would proceed under the standard "rule of reason" for determining whether a restraint on trade is reasonable. In proving that conduct is unreasonable under this standard, the plaintiffs would have to show that the alleged conspiracy adversely affected competition, which requires a showing that one or more of the defendants had market power. *Murrow Furniture Galleries, Inc., 889 F.2d at 528*; **[**31]** *Military Servs. Realty, Inc. v. Realty Consultants of Va., Ltd., 823 F.2d 829, 832 (4th Cir. 1987)*. To prove market power, "the plaintiff first must establish the relevant product and geographic markets." *Murrow Furniture Galleries, Inc., 889 F.2d at 528* (citing *Satellite Television, 714 F.2d at 355*); *Military Servs. Realty, 823 F.2d at 832*. As discussed at length above, the plaintiffs have failed to define any relevant market, which obviously forecloses them from demonstrating any anticompetitive effects within a relevant market, or market power of a defendant. *Murrow, 889 F.2d at 528*.

The only way for the plaintiffs to prevail on the issue of unreasonable restraint, therefore, would be if the complained of conduct triggered "per *se"* analysis. As the Supreme Court has explained,***HN9***[]

> there are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use. . . . **[**32]** Among the practices which the courts have heretofore deemed to be unlawful in and of themselves are price fixing, division of markets, group boycotts, and tying arrangements.

N. Pac. Ry. Co. v. United States, 356 U.S. 1, 5, 2 L. Ed. 2d 545, 78 S. Ct. 514 (1958) **[*732]** (citations omitted). In determining whether conduct is *per se* unreasonable, the "inquiry must focus on whether the effect and . . . purpose of the practice are to threaten the proper operation of our predominately free -- market economy -- that is, whether the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output, . . . or instead one designed to increase economic efficiency and render markets more, rather than less, competitive." *Broadcast Music, Inc. v. CBS, 441 U.S. 1, 19-20, 60 L. Ed. 2d 1, 99 S. Ct. 1551 (1979)* (quoting *United States v. United States Gypsum Co., 438 U.S. 422, 441 n.16, 57 L. Ed. 2d 854, 98 S. Ct. 2864 (1978)*.

There is no per *se* unreasonable conduct here, and the plaintiffs' attempts to argue the existence of such conduct are extremely unconvincing. The plaintiffs argue that the defendants have engaged in market allocation. In so arguing, however, **[**33]** the plaintiffs essentially allege that there was an agreement not between Gazette and Press Network, but between Gazette and ArCom Publishing, Inc., which is not even a defendant in this case. This argument fails for obvious reasons. Moreover, on its face, the conduct complained of here (the allegedly orchestrated entry of Gazette into Prince George's County, or the alleged agreement between Gazette and Press Network to convince advertisers to move their ads into Gazette's papers) is not the type of conduct that would "always or almost always tend to restrict competition and decrease output." *Id.* Courts often recognize that the purpose of the antitrust laws is to protect consumers, not competitors. ***HN10***[] "It is axiomatic that the antitrust laws were passed for the protection of competition, not competitors.'" *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp., 509 U.S. 209, 224, 125 L. Ed. 2d 168, 113 S. Ct. 2578 (1993)* (quoting *Brown Shoe Co., 370 U.S. at 320*). There is nothing in the record that indicates that the consumers in this case (advertisers) were disadvantaged by the introduction of a newspaper with higher circulation and deeper penetration, or that **[**34]** such an introduction was of the type that would "always or almost always tend to restrict competition and decrease output." Quite the opposite. Thus, the standard rule of reason would apply to the plaintiffs' *Section 1* claim, and that claim fails as a matter of law for the numerous reasons discussed above.

Presumably as part of their *Section 1* claim, the plaintiffs also now argue that Press Network illegally denied Rossignol and Sentinel access to an "essential facility," and in so doing opened itself to antitrust liability. The plaintiffs may not proceed on these grounds for a number of reasons. First, the theory of Press Network's liability for exclusion from an essential facility has not been properly put before the Court. It was not pleaded in the amended complaint, and it is well -- settled that a plaintiff cannot amend his complaint with a later filed brief. The plaintiffs argue that the "qualities" that make Press Network an essential facility are stated in the complaint, but that argument is unpersuasive. The paragraphs cited by the plaintiffs relate to theories entirely separate from those needed to allege a claim under the essential facility doctrine, and they therefore **[**35]** fail to comply with ***HN11***[] *FED. R. CIV. P. 8(a)*, which requires a statement of the claim showing that the pleader is entitled to relief. [6] **[*733]** Moreover, the plaintiffs have failed to produce evidence of elements required for establishing liability ***HN12***[] under this theory of law: (1) control of an essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the facility; (3) denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility to competitors. *Laurel Sand & Gravel, Inc. v. CSX Transp., Inc., 924 F.2d 539, 544 (4th Cir. 1991)*; *Advanced Health -- Care Servs., Inc. v. Radford Community Hosp., 910 F.2d 139, 151 (4th Cir. 1990)*. In short, the plaintiffs' inability to establish the first element above is enough to highlight the inapplicability of the "essential facility" doctrine to this case. ***HN13***[] To establish "control by a monopolist," plaintiffs obviously must demonstrate that Press Network has monopoly power in a properly defined relevant market. *Consul, Ltd., 805 F.2d at 494-95*. This Court previously found that "Press Network does not compete in **[**36]** the relevant market alleged by the plaintiffs in their complaint." *Berlyn, Inc., 157 F. Supp. 2d at 620*. Neither the plaintiffs nor their designated expert has made any attempt to define the relevant market in which Press Network competes or to show that it possesses market power, much less monopoly power. Finally, from the mere definition of the essential facility doctrine, it is apparent that said doctrine is inapplicable to this case: to prevail, the plaintiff must show that the facility be denied to a "competitor" -- a term that in no way describes any of the plaintiffs in this case.

[37]** Thus, for the several reasons stated above, it is clear that the plaintiffs' "essential facilities" argument cannot survive summary judgment.

C. Amended Complaint Count II -- Sherman Act Section 2

The plaintiffs next allege that the defendants, individually or in certain combinations, attempted and conspired to monopolize advertising in community weekly newspapers and the zoned editions of daily newspapers in Prince George's and Montgomery Counties, in violation of *Section 2 of the Sherman Act*. [7] From the outset, it is clear that

---

[6] Plaintiffs' substantive argument that Press Network denied them access to an "essential facility" is found in their memoranda supporting preliminary injunctive relief. In arguing that their essential facility theory was adequately stated in the amended complaint, the plaintiffs cite the amended complaint at paragraphs 12, 23(d) & (e), 28 (f), 30(d), and 47-49. Paragraph 12 of the amended complaint describes how Press Network came to be half owned by Gazette and states the circulation and revenue figures for papers involved in the Network. Paragraphs 23(d) and 23(e) consist of allegations that Press Network conspired with Gazette to restrain trade due to unlawful rate card practices, an allegation which has nothing to do with plaintiffs' theory that Press Network was an essential facility or that it deliberately excluded Rossignol and Sentinel. Paragraph 28 (f) is similarly without reference to recovery on essential facility grounds. Paragraph 30(d) describes Sentinel's damages. Finally, paragraphs 47-49 relate to the plaintiffs' breach of contract cause of action.

[7] Because ***HN15***[] a cause of action for conspiracy to monopolize requires a showing of concerted action, see *Advanced Health -- Care Servs., 910 F.2d at 150*, and because the plaintiffs have failed to show concerted action between Press Network and any other defendant, see Section III.B.1, supra, the plaintiffs cannot prevail on a conspiracy to monopolize theory as a

the plaintiffs cannot proceed to trial on these claims, because HN14[] a threshold requirement for liability under Section 2 is that the antitrust plaintiff must be able to prove a relevant market that the defendant attempted to monopolize. Consul, Ltd., 805 F.2d at 493.

[38]** HN16[] Even if plaintiffs could establish relevant market, to survive summary judgment on these claims, plaintiffs must provide evidence from which a reasonable jury could find the following: (1) that the defendants **[*734]** had a specific intent to monopolize a relevant market; (2) that the defendants engaged in predatory or anticompetitive acts designed to further their intent; and (3) that there is a dangerous probability that the defendants will succeed in their attempt. Spectrum Sports, Inc., 506 U.S. at 456; Abcor Corp. v. AM Int'l, Inc., 916 F.2d 924, 927 (4th Cir. 1990). Also, to establish a willful attempt to acquire monopoly power, the plaintiffs must show "'that a jury could find no valid business reason or concern for efficiency in the [defendants'] choice'" to act as it did. Oksanen, 945 F.2d at 710 (quoting White v. Rockingham Radiologists, Ltd., 820 F.2d 98, 105 (4th Cir. 1987)). The plaintiffs cannot establish these elements in either of their proposed markets, or as to either the Post or Gazette.

HN17[] Absent direct evidence, an antitrust plaintiff may raise an inference of specific intent to monopolize (the first **[**39]** element of a Section 2 claim) by offering evidence of predatory or anticompetitive acts (the second element of a Section 2 claim). Thus, it makes logical sense to consider the plaintiffs' allegations of predatory conduct first. As discussed below, the plaintiffs' direct evidence of predatory pricing either is not relevant (as it does not relate to the markets alleged), or it is otherwise insufficient to raise an inference of specific intent in any of the proposed markets. Moreover, their attempt to satisfy the specific intent element through other circumstantial evidence, as well as their reliance on Greenville Publishing Co. v. The Daily Reflector, Inc., 496 F.2d 391 (4th Cir. 1974), in doing so, is unavailing.

1. Weekly Newspapers / Zoned Editions of Dailies in Prince George's County

The plaintiffs allege that Gazette (and therefore the Post) attempted to monopolize this market. In opposition to summary judgment, as evidence of Gazette's intent to monopolize, the plaintiffs do not identify a specific pricing policy that they allege is predatory. Without direct evidence of suspicious pricing particular to Gazette in this market, the plaintiffs argue that other circumstances **[**40]** speak to the anticompetitive nature of Gazette's conduct and thus support an inference of monopolistic intent. The plaintiffs have offered evidence showing that: (1) the *Prince George's Gazette* projected and sustained losses in Prince George's County from 1998 through 2002; (2) during that time, the *Prince George's Gazette* was not "paying its own way," that is, it was funded by the Gazette as a whole, and thus by its larger owner, the Post; (3) during this time, the Gazette calculated the *Prince George's Gazette's* advertising price -- to -- cost ratio without factoring in numerous figures that, according to the plaintiffs, normally should be considered in calculating costs. The plaintiffs rely on *Greenville* for the proposition that where a plaintiff establishes that a business entity is losing money but not "paying its own way," there is a sufficient inference that the defendant's prices are designed to drive the plaintiff out of the market, and thus that the defendant has a specific intent to monopolize that market. The plaintiffs, however, have failed to identify any particular pricing policy that makes the *Prince George's Gazette's* losses suspicious. Moreover, **[**41]** *Greenville* is distinguishable on factual grounds. In *Greenville*, the defendant publishing company published a shopper, as a subsection to its larger publication. Id. at 393. The defendant offered advertisers a "combination advertising rate," which permitted advertisers who placed ads in the larger publication to rerun those ads in the shopper at half -- price. *Id.* In light of this discount, the expert opinion of an accountant, evidence that the defendant introduced the shopper for the specific purpose of competing with the plaintiff, **[*735]** and evidence that the defendant's shopper essentially was funded by the larger company, the Fourth Circuit found a sufficient inference of predatory pricing, and thus specific intent to monopolize. Id. at 398. Here, however, there is no evidence of questionable pricing policies. The plaintiffs have not, for example, identified Gazette's prices for advertising in Prince George's County and analyzed them with any specific cost accounting. Instead, the plaintiffs simply call attention to the fact that Gazette lost money in Prince George's County, and then cite language from *Greenville* stating that " proof **[**42]**

---

matter of law. Also, as noted in this Court's August 2001 opinion, the *Copperweld* doctrine prevents a finding that Gazette and the Post are capable of conspiracy. Moreover, this Court previously held that Press Network could not be held liable for attempted monopolization, as it is not a competitor in the weekly newspaper market. Berlyn, Inc., 157 F. Supp. 2d at 620.

that [a defendant] is not paying its own way would support an inference that defendants' pricing policies were designed to drive [competitors] out of the market." *Id.* Simply losing money is not a "pricing policy."

Moreover, ***HN18***[] establishing predatory pricing requires a showing that the complained -- of conduct lacked a business efficiency and that there was a likelihood of recoupment of losses (a requirement which did not exist at the time Greenville was decided, see *Brooke Group, Ltd., 509 U.S. at 222-26*). The defendants have shown that the *Prince George's Gazette* was run according to a previously successful business strategy, and there is no evidence that any particular conduct was without efficiency and instead was aimed at driving out competitors and monopolizing the Prince George's County market. See *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 605, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)* ("If a firm has been attempting to exclude rivals on some basis other than efficiency,' it is fair to characterize its behavior as predatory."); *White, 820 F.2d at 105* (to show willfulness under *Section 2*, a plaintiff must show that a jury could find **[**43]** no valid business reasons or concern for efficiency in the defendants' allegedly anticompetitive act). In short, the plaintiffs have failed to establish a *Section 2* claim in this proposed relevant market.

2. Community Weekly Newspapers and the Zoned Editions of Daily Newspapers in Montgomery County

The plaintiffs also allege that Gazette and the Post attempted to monopolize this market. As for Gazette, the plaintiffs allege that Gazette "targeted the Sentinel's Montgomery County legal advertising." Pis.' Opp. at 40. Plaintiffs also allege that Gazette's "charges per page for legal and directory advertising were less than $ 200.00 per page -- equal to or less than its combined printing and editorial costs per page -- while its charges for other advertising categories ranged up to $ 1,000 per page." However, the evidence cited to support these allegations is insufficient to raise an inference of predatory conduct. First, the plaintiffs cite a handful of Gazette documents showing only that: (1) in 1998, the Gazette as a whole (not limited to its Montgomery County publications) received about $ 200 per page (a very liberal reading of the graph, in the plaintiffs favor) in revenue from **[**44]** "Directories/Legals" advertising; (2) the average 1998 cost per page for printing the Gazette as a whole was around $ 85; (3) the average 1998 "editorial" cost per page was close to $ 100. Thus, based on these three cited graphs, the defendant priced an average of $ 15 *above* cost for legal advertising. Moreover, these documents represent the costs and revenues of Gazette as a whole, not just its Montgomery County publications. The plaintiffs cannot proceed to trial based on such evidence, as it clearly is inadequate to show specific intent, anticompetitive conduct, and/or dangerous probability of success.

The plaintiffs also argue that the Post is liable under *Section 2*. The plaintiffs claim that, in an attempt to drive the *Montgomery* ***[*736]*** *Sentinel* out of the competitive pool, the Post reduced its legal advertising rates below those of Sentinel in March 1998 and accorded Montgomery County legal advertisers free advertising in Prince George's County. In support of this claim, the plaintiffs cite the deposition testimony of Rita Coopersmith, an advertising sales representative for the Post. Coopersmith states that between 1999 and 2001 the Post had recently acquired presses that **[**45]** would allow it to geographically zone the content of certain newspaper sections, including classifieds, at the county level. During these years, however, the Post was not yet able to implement the zoning process, but it offered advertisers the opportunity to take advantage of a zoned advertising rate. What this meant in practical terms was that an advertiser could pay a zoned rate, but their ad would be seen throughout the Post's entire circulation area. According to Coopersmith, legal advertisers benefitted from this practice beginning in 1999, until February 2000, when the presses were capable of producing zoned editions.

This evidence is insufficient to raise an inference of attempted monopolization. There is absolutely no evidence that this conduct was not carried out for independent and legitimate business reasons to promote advertising in the Post in general. There is certainly no evidence (other than the mere existence of the practice alone, and in combination with the plaintiffs' bare allegations of anticompetitive intent) to show that the practice was carried out specifically for anticompetitive purposes, or to eliminate any particular competitor or competition in general, **[**46]** in the relevant markets proposed by the plaintiffs.

Finally, in opposition to summary judgment, the plaintiffs attack the Post's cost calculations. The plaintiffs argue that in establishing "cost" for advertising pricing purposes, the Post takes only into account printing costs, and excludes substantial costs such as print labor, ink, composition labor, circulation costs, etc. In support of this, the plaintiffs cite the deposition of Stephen Hills, a vice president of sales and marketing for the Post. Hills testified that he receives rate proposals for advertising that indicate a cost calculation, to be taken into account when setting an advertising rate. According to Hill, as far as he knows, the cost figure is simply a representation of the printing cost alone (i.e., the newsprint paper). He also testified that he does not contribute to calculating those figures.

Based on this evidence, the plaintiffs wish to raise an inference of predatory pricing by the Post as to legal advertising in community newspapers in Montgomery County. As noted above, however, predatory pricing requires proof of predatory conduct (which raises an inference of intent), and likelihood of recoupment in that **[**47]** relevant market. The plaintiffs' citation to deposition testimony of Hills's personal concept of cost calculation for the Post in general is not sufficient to support a finding that the Post engaged in below -- cost pricing for legal advertising in Montgomery County and that there was a dangerous probability that it could recoup its losses after the competition was eliminated. The plaintiffs also rely on evidence relating to the Post that does not concern the plaintiffs' proposed product or geographic markets. The documents the plaintiffs cite to show pricing below cost deal with the Post's full -- run pricing as a metropolitan daily to customers for trustee advertising in areas such as Washington, D.C. This clearly falls outside of the plaintiffs' proposed relevant markets, viz., community weekly newspapers and the zoned editions of daily newspapers. Moreover, there is no evidence in the record that if the Post were to obtain the plaintiffs' share of legal advertising they would have market or monopoly power over advertising **[*737]** in any market, let alone those proposed by the plaintiffs.

In sum, the plaintiffs have failed to establish a *Section 2* case as to any defendant. Most obviously, **[**48]** plaintiffs' failure to offer admissible evidence as to the relevant markets prevents them from satisfying the first and third elements of a *Section 2* claim, as described above. Moreover, the plaintiffs have not identified relevant predatory conduct sufficient to create a triable issue as to either defendant's liability under this statute. [8]

[49]** D. Count III: Violations of the Robinson -- Patman Act

In its August 2001 decision, this Court explained that ***HN19***[] "by its terms, the [*Robinson --Patman Act*] is limited to price discrimination in the sale of commodities. The majority of courts to consider the issue have concluded that newspaper advertising is not a commodity under the statute. . . . Therefore, plaintiffs may not pursue their Robinson -- Patman claim with respect to newspape advertising, and may only pursue it to the extent that they allege price discrimination in the sale of newspapers themselves, as courts have held that newspapers are considered a commodity under the Act." *Berlyn, Inc., 157 F. Supp. 2d at 621*.

---

[8] In arguing their *Section 2* claims, the plaintiffs also discuss "hiring allegations" and "merger and expansion allegations," presumably as evidence of specific intent on the part of the defendants to monopolize the proposed markets. The plaintiffs apparently wish this Court to find that Gazette's hiring of certain Sentinel employees in 1999 speaks to a specific intent to monopolize or to eliminate competition in general. The plaintiffs, however, offer insufficient evidence that these hires were anything but legitimate. The plaintiffs' other "hiring allegations" are plainly irrelevant. First, the plaintiffs offer evidence that Press Network (not a proper *Section 2* defendant) hired employees of the *Journal*, which is not a party to this case. Next, the plaintiffs offer evidence that the Post hired a Washington *Times* employee as a consultant concerning the market for legal advertising in the Washington, D.C. area.

As for the plaintiffs' "merger and expansion allegations," these are similarly irrelevant to the plaintiffs' *Section 2* claims. In short, the plaintiffs point to evidence that, over the years, the Post has considered a number of acquisitions, some of which it consummated. Most of these acquisitions had little to do with the specific markets alleged here, and the company's mere desire to expand is insufficient to raise an inference of anticompetitive intent. Moreover, the plaintiffs have failed to identify evidence which indicates that each of these acquisitions (or decisions not to acquire) were inconsistent with the Post's rational business purposes. Plaintiffs also describe a variety of agreements between the Post or Gazette and third parties, including facially appropriate marketing agreements and covenants not to compete. The plaintiffs have failed to show how such agreements were against the defendants' rational business interests, and they cannot support an inference that Gazette or the Post intended to monopolize any of the proposed relevant markets.

After discovery, the plaintiffs concede that their price discrimination claim relates to newspaper advertising, and that any remedy for plaintiffs on this count must come under ***HN20***[] Maryland law which does not distinguish between "commodity" and "service" with regard to price differentials. See *MD. CODE ANN., COM. LAW II § 11-204(a)(3)* (2000). For these reasons, the defendants are entitled to judgment as a matter of law on Count III of the amended complaint. Plaintiffs' **[**50]** state law price discrimination claims will be discussed *infra*, Section III.I.

E. Count IV: Section 7 of the Clayton Act -- The Chesapeake Acquisition

The plaintiffs also allege that the Post and Gazette violated ***HN21***[] Section 7 of the Clayton Act, which prohibits acquisitions whose effect "may be substantially to lessen competition." *15 U.S.C. § 18 (1997)*. The **[*738]** plaintiffs assert that through acquisition of the Chesapeake Publishing Company's southern Maryland division, the defendants may substantially lessen competition in Prince George's County and southern Maryland. The defendants have challenged this claim on a number of grounds, arguing that the plaintiffs lack standing, and that there is no evidence of a substantial lessening of competition or of damages. These arguments need not be dealt with in full, as the plaintiffs' Clayton Act claim fails for the same primary reason as its flawed Sherman Act claims: inability to offer sufficient evidence of a relevant market within which to judge the defendants' conduct. ***HN22***[] "The market share which companies may control by merging is one of the most important factors to be considered when determining the probable effects **[**51]** of the combination on effective competition in the relevant market." *Brown Shoe, 370 U.S. at 343*; see also *United States v. Grinnell Corp., 384 U.S. 563, 573, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)* (analysis of relevant market is the same under *Section 7 and the Sherman Act*). As discussed at length above, the plaintiffs have failed to produce sufficient evidence of relevant market, and, for that reason, they cannot proceed to trial on the merits of their Clayton Act claim.

F. Count V: Unfair Competition

In opposition to the defendants' motion for summary judgment, the plaintiffs essentially argue that the conduct giving rise to their antitrust claims also supports a cause of action for unfair competition under Maryland law. More specifically, the plaintiffs claim that "the use of Sentinel to build up revenue for Gazette is one of the many acts that qualify" as unfair competition under Maryland law. Pls.' Opp. at 59.

The majority of Maryland cases concerning unfair competition deal with allegations of trade confusion. See, *e.g., Mascaro v. Snelling & Snelling of Balt., Inc., 250 Md. 215, 243 A.2d 1 (1968)*; *Avalon Hill Co. v. Gebhardt, 224 Md. 52, 166 A.2d 740 (1961)*; **[**52]** *Edmondson Village Theatre, Inc. v. Einbinder, 208 Md. 38, 116 A.2d 377 (1955)*; *Balt. Bedding Co. v. Moses, 182 Md. 229, 34 A.2d 338 (1943)*; *Sea Watch Stores LLC v. Council of Unit Owners of Sea Watch Condo., 115 Md. App. 5, 691 A.2d 750 (1997)*. ***HN23***[] Maryland courts have defined unfair competition as "damaging or jeopardizing another's business by fraud, deceit, trickery or unfair methods. . . . What constitutes unfair competition in a given case is governed by its own particular facts and circumstances." Balt. *Bedding Co., 182 Md. at 237*; see also *Trimed, Inc. v. Sherwood Med. Co., 977 F.2d 885, 891 (4th Cir. 1992)*.

The defendants are entitled to judgment on this claim for two reasons. First, in its August 2001 opinion, the Court noted that ***HN24***[] "'a violation of antitrust laws could itself constitute unfair competition,' and therefore, this count will not be dismissed so long as plaintiffs' antitrust claims remain viable." *Berlyn, Inc., 157 F. Supp. 2d at 624* (quoting *Sun Dun, Inc. of Wash v. CocaCola Co., 740 F. Supp. 381, 397 (D. Md. 1990)*. As discussed above, none of plaintiffs **[**53]** antitrust claims can prevail, which precludes any finding of liability on the ground that the defendants violated the antitrust laws.

Second, the plaintiffs have failed to substantiate any independent grounds for an unfair competition claim. The plaintiffs allege that the unfair practice here was collusion between Press Network and Gazette to build up advertising revenues for Sentinel in Prince George's County, only later to steal that business away and to assign it to Gazette upon its entry into Prince George's County. Above, the Court has found insufficient evidence of **[*739]** concerted action between Gazette and Press Network, and plaintiffs' assertion that Sentinel was used by the two to guarantee business upon Gazette's entry is supported only by an unjustifiably liberal reading of two excerpts from Nuttall's deposition. Moreover, the plaintiffs have failed to show that the defendants' actions in this case were anticompetitive, or that each complained -- of action was not taken with some independent and legitimate business purpose. This is not enough to proceed to trial on unfair competition grounds, especially in light of the Court's dismissal of all of the plaintiffs' antitrust claims, **[**54]** and the nearly exclusive historical application of this cause of action to trademark cases. Thus, the defendants are entitled to judgment as a matter of law on this count of the amended complaint.

G. Count VI: Breach of Contract

The only contract the amended complaint claims has been breached is an alleged agency contract between Press Network and Berlyn. The plaintiffs assert that in 1993:

> Press Network, through Gay Nuttall, its chief executive officer, promised Berlyn . . . that Press Network would function fairly as a faithful agent for Berlyn in consideration of the Sentinel's joining the Press Network as a member and adding its circulation to Press Network. Berlyn agreed to participate on these terms. As a result in substantial part of the P.G. County Sentinel's membership, Press Network attained a dominant position in P.G. County. Defendant Press Network, in breach of its contractual obligations to Plaintiffs, has allocated advertising so as to favor Gazette newspapers.

Amended Complaint 47-49.

Thus, the plaintiffs' breach of contract claim is premised on the existence of an unwritten agency agreement between Berlyn and Press Network. ***HN25***[] To prove the existence **[**55]** of an agency relationship in the absence of a written agreement, the plaintiffs must show conduct proving: "(1) the agent [was] subject to the principal's right of control, (2) the agent [had] a duty to act primarily for the benefit of the principal, and (3) the agent [held] the power to alter the legal relations of the principal." *Huntington Mort. Co. v. Mort. Power Fin. Servs., Inc., 90 F. Supp. 2d 670, 674 (D. Md. 2000)* (citing *United Capitol Ins. Co. v. Kapiloff, 155 F.3d 488, 498 (4th Cir. 1998)*; *Patten v. Bd. of Liquor License Comm'rs, 107 Md. App. 224, 238, 667 A.2d 940 (1995))*.

In opposition to the defendants' motion for summary judgment, the plaintiffs have failed to specifically identify the evidentiary basis for any of these elements. In their opposition, the plaintiffs simply identify the paragraph of their complaint that asserted breach of contract, and state that "the breach has been fully proved by the evidence recited above." Assuming that "the evidence recited above" includes the preceding fifty -- nine pages of opposition, the only substantial discussion of the agreement between Kapiloff and Nuttall occurs **[**56]** in the plaintiffs' factual background section, which cites Kapiloff's deposition testimony to support the existence of an agreement. At best, the Kapiloff deposition shows that Nuttall orally agreed that the Sentinel would be "her paper" in Prince George's County, and that Press Network would "represent [Sentinel] for the corporate advertising." Kapiloff Dep. at 311-12. Kapiloff then agreed that those were all the terms of the contract, and that, although Nuttall never said so, Kapiloff assumed that this agreement would last "forever." Id. at 313-14. This clearly fails to establish any of the three elements of an agency agreement under Maryland law. Moreover, the plaintiffs' opposition is devoid of any substantive discussion or evidence that (1) Berlyn **[*740]** had the right to control Press Network; (2) that Press Network agreed to act primarily for Berlyn's benefit; or (3) that Press Network had the authority to alter Berlyn's legal relations. [9]

[57]** In sum, the plaintiffs have failed to identify the elements of an agency contract, either through express agreement or implied through conduct. Under settled law, ***HN26***[] the party who would bear the burden of proof on an issue at trial bears the similar burden of producing admissible evidence on that issue at the summary judgment stage. *Celotex Corp., 477 U.S. at 322*. The plaintiffs have failed to meet this burden, and the defendants therefore are entitled to judgment as to count VI of the amended complaint.

Finally, even if plaintiffs could establish a case for breach of contract based on Press Network's conduct upon Gazette's entry into Prince George's County, that cause of action would be time -- barred. ***HN27***[] Under Maryland law, a cause of action for breach of contract must be filed within three years from the date that the cause

[9] Even if there were some evidence of any of these elements somewhere in the substantial record generated during discovery, it is the plaintiffs' affirmative burden to identify admissible evidence that warrants denial of a motion for summary judgment. *Celotex Corp., 477 U.S. at 322*.

of action accrues. MD. CODE ANN., CTS. & JUD. PROC. § 5-101 (1998). A breach of contract claim accrues when the contract is breached or anticipatorily breached. The Catholic Univ. of Am. v. Bragunier Masonry Contractors, Inc., 139 Md. App. 277, 297, 775 A.2d 458 (2001) (citing Singer Co., Link Simulation Sys. Div. v. Balt. Gas & Elec. Co., 79 Md. App. 461, 473, 558 A.2d 419 (1989); **[**58]** DeGroft v. Lancaster Silo Co., 72 Md. App. 154, 171, 527 A.2d 1316 (1987); Yingling v. Phillips, 65 Md. App. 451, 460, 501 A.2d 87 (1985)). In this case, the plaintiffs allege an agency contract, including, presumably, exclusivity of representation in Prince George's County. If such a contract existed, it would have been breached, at the latest, in the fall of 1997, when Gazette expanded into Prince George's County and Press Network began to facilitate the placing of ads in the Prince George's Gazette. Plaintiffs' cause of action for breach of contract is therefore time -- barred, as the plaintiffs did not file a complaint until February 28, 2001.

For these several reasons, the defendants are entitled to judgment as a matter of law on the plaintiffs breach of contract claim.

H. Counts VII and VIII: Tortious Interference with Contract and with Business Relations

The plaintiffs argue that the Post and Gazette interfered with whatever contractual relationship existed between Press Network and Berlyn. ***HN28***[] To prove tortious interference with contract in Maryland, the plaintiffs must prove "1) the existence of a contract between the plaintiff and a third **[**59]** party; 2) defendant's knowledge of that contract; 3) defendant's intentional interference with that contract; and 4) resulting damages to the plaintiff." Cogan, 843 F. Supp. at 1021 (citing Fowler v. Printers II, Inc., 89 Md. App. 448, 466, 598 A.2d 794 (1991)). Even if a plaintiff can establish these elements, "a competitor who induces a breach of [an at -- will contract] to serve his own competitive purpose does not interfere improperly unless the competitor employs wrongful means or creates a restraint of trade." Fowler, 89 Md. App. at 468.

As discussed above, the plaintiffs have failed to establish the existence of an agency contract between Press Network and Berlyn. To the extent that there was *any* **[*741]** contract between those parties, there is no evidence in the record showing that the agreement was anything other than terminable at will. Moreover, the plaintiffs have failed to show that Gazette's conduct in this case was inconsistent with its competitive purposes, and the discussion above illustrates that there was no independently wrongful conduct or a restraint on trade. The defendants, therefore, are entitled to judgment on this **[**60]** issue.

The plaintiffs also assert the broader tort of interference with economic advantage, stating that "Post and Gazette have tortiously interfered with Berlyn's economic relationship with Press Network, and all three defendants have discouraged and interfered with attempts by Berlyn to deal directly with advertisers, disparaged the *Sentinel's* quality to prospective customers, and tortiously weakened Berlyn's ability to sell advertising space to prospective customers." Am. Compl. 52. The plaintiffs' claims here fail for several reasons.

HN29[] To prove a claim of tortious interference with a prospective economic relationship, the plaintiffs must show (1) intentional and willful acts; (2) calculated to cause damage to the plaintiffs in their lawful business; (3) done with the unlawful purpose to cause such damage and loss, without right or justifiable cause on the part of the defendants; and (4) actual damage and loss resulting. Alexander &# 38; Alexander, Inc. v. B. Dixon Evander &# 38; Assocs., Inc., 336 Md. 635, 652, 650 A.2d 260 (1994). The tort requires conduct "that is independently wrongful or unlawful, quite apart from its effect on the plaintiff's business **[**61]** relationships." Id. at 657. "Wrongful or unlawful acts include common law torts and' violence or intimidation, defamation, injurious falsehood or other fraud, violation of criminal law, and the institution or threat of groundless civil suits or criminal prosecutions in bad faith.'" Id. (quoting K & K Management, Inc. v. Lee, 316 Md. 137, 166, 557 A.2d 965 (1989) (quoting PROSSER, LAW OF TORTS, § 130, 952-953 (4th ed. 1971)).

The plaintiffs simply have failed to establish that each of these elements exists. In opposition to summary judgment, the plaintiffs essentially reassert their allegations of predatory conduct by the Post and Gazette, and identify several discounts that Gazette gave to Sentinel's advertisers. The plaintiffs fail to offer evidence to prove that these acts were calculated specifically to cause damage to the plaintiffs, or that they were done with unlawful purpose or without justifiable cause. As discussed in the antitrust context, the plaintiffs have failed to show that these acts were not pursuant to defendants' lawful business purposes. The plaintiffs cannot base tort liability simply on the ground that the Post or Gazette caused them incidental damage **[**62]** by attracting away certain advertisers. In short, the plaintiffs' general allegations of wrongdoing fail to satisfy the specific elements of a cause of action for tortious interference, and, for the above reasons, the defendants are entitled to judgment as a matter of law.

I. Count IX: Violations of the Maryland Antitrust Act

The final count of the amended complaint asserts that the defendants are liable for numerous violations of the Maryland Antitrust Act, on the same grounds as their numerous federal antitrust claims. All of the plaintiffs' arguments for state law liability must be dismissed, for the same reasons their federal claims failed. The Maryland Antitrust Act substantially mirrors its federal counterparts, and the plaintiffs' failure to establish a case under federal law warrants dismissal under state law for the many reasons discussed above. See *Natural Design, Inc., 302 Md. at 53-56*. This includes the plaintiffs' **[*742]** claim of price discrimination under *MD. CODE ANN., COM. LAW II, 11-204 (a) (3)*. ***HN30***[] That statute is in *pari materia* with the Robinson -- Patman Act's prohibition of price discrimination, *15 U.S.C. § 13* **[**63]** *(a)*. To establish liability under the Robinson -- Patman Act, as is the case with the other antitrust claims involved in this case, the plaintiffs bear the burden of proving a relevant market within which the consequences of the defendants' anticompetitive acts can be measured. *Brooke Group. Ltd., 509 U.S. at 222*. The plaintiffs cannot prove a relevant market on the evidence now before the Court, and, for that reason, the plaintiffs' state law price discrimination claim fails as a matter of law.

IV. CONCLUSION

For the reason stated above, by separate order, the Court will GRANT the defendants' motion for summary judgment and enter judgment in their favor. That order will also DENY AS MOOT the plaintiffs' motion for preliminary injunctive relief.

Date: August 16, 2002

Frederic N.Smalkin

Chief U.S. District Judge

ORDER AND JUDGMENT

For the reasons stated in the Memorandum Opinion issued on this day, it is this 16th day of August, 2002, ORDERED AND ADJUDGED:

1. That the defendants' motion for summary judgment BE, and it hereby IS, GRANTED;

2. That the plaintiffs' motion for preliminary injunctive relief BE, and it hereby IS, DENIED AS MOOT;

3. That **[**64]** judgment BE, and it hereby IS, ENTERED in favor of the defendants and against the plaintiffs;

4. That each party bear its own costs;

5. That this case BE, and it hereby IS, CLOSED; and

6. That the Clerk of the Court mail copies of this Order and Judgment and Memorandum Opinion to counsel.

Frederic N. Smalkin

Governments > Federal Government > US Postal Service

HN1[] **Federal Government, US Postal Service**

The Postal Reorganization Act of 1970, Pub. L. No. 91-375, 84 Stat. 719, provides that the Postal Service shall have the power to sue and be sued in its official name. *39 U.S.C.S. § 401(1)*.

Governments > Federal Government > Claims By & Against

HN2[] Federal Government, Claims By & Against

The United States Supreme Court has applied a two-step inquiry in analyzing whether a federal instrumentality enjoys immunity from a particular substantive area of law. Under this analysis, the first inquiry is whether there has been a waiver of sovereign immunity. If there has been, the second inquiry is whether the source of substantive law upon which the claimant relies provides an avenue for relief.

Governments > Federal Government > US Congress

Tax Law > State & Local Taxes > Administration & Procedure > Tax Liens

Governments > Federal Government > Claims By & Against

Governments > Federal Government > US Postal Service

HN3[] Fair Housing Rights, Fair Housing Act

When Congress establishes an agency, it authorizes it to engage in commercial and business transactions with the public, and permits it to "sue and be sued," it cannot be lightly assumed that restrictions on that authority are to be implied. To overcome this presumption it must be clearly shown that certain types of suits are not consistent with the statutory or constitutional scheme, that an implied restriction of the general authority is necessary to avoid grave interference with the performance of a governmental function, or that for other reasons it was plainly the purpose of Congress to use the "sue and be sued" clause in a narrow sense.

Civil Procedure > Remedies > Judgment Interest > General Overview

Business & Corporate Compliance > ... > Protection of Rights > Federally Assisted Programs > Civil Rights Act of 1964

Governments > Federal Government > Claims By & Against

HN4[] Judgment Interest, Prejudgment Interest

Title VII of the Civil Rights Act of 1964 allows for actions against the federal government, *42 U.S.C.S. § 2000e-16*, but it does not contain a provision allowing for prejudgment interest against the government.

Governments > Federal Government > Claims By & Against

Governments > Federal Government > US Postal Service

HN5[] Federal Government, Claims By & Against

Under the "no-interest rule," absent express consent by Congress, the United States is immune from interest awards. However, the no-interest rule is inapplicable where the Government has cast off the cloak of sovereignty and assumed the status of a private commercial enterprise. In creating the Postal Service, Congress cast off the cloak of sovereignty, and therefore, the no-interest rule does not apply to it.

Governments > Federal Government > Claims By & Against

HN6[] **Federal Government, Claims By & Against**

Sue-and-be-sued waivers are to be "liberally" construed, notwithstanding the general rule that waivers of sovereign immunity are to be read narrowly in favor of the sovereign.

Civil Rights Law > Protection of Rights > Implied Causes of Action

Governments > Federal Government > Claims By & Against

Governments > Federal Government > Employees & Officials

HN7[] **Protection of Rights, Implied Causes of Action**

Bivens actions cannot be filed against federal agencies, only against federal officers.

Business & Corporate Law > Distributorships & Franchises > Causes of Action > Restraints of Trade

Governments > Federal Government > Claims By & Against

Governments > Federal Government > US Postal Service

HN8[] **Causes of Action, Restraints of Trade**

The general liberal-construction rule of sue-and-be sued waivers can be overcome only if the Postal Service makes a clear showing that the type of suit filed against it is not consistent with the statutory or constitutional scheme, an implied restriction is necessary to avoid grave interference with the performance of a governmental function, or Congress plainly intended to use "sue and be sued" in a narrow sense.

HN23[] **Jurisdiction Over Actions, Exclusive Jurisdiction**

39 U.S.C.S. § 409(a) grants the district courts original but not exclusive jurisdiction over actions by or against the United States Postal Service.

Constitutional Law > Supremacy Clause > General Overview

HN24[] **Constitutional Law, Supremacy Clause**

Pursuant to conflict preemption, state law is preempted to the extent that it actually conflicts with federal law. Such a conflict arises when "compliance with both federal and state regulations is a physical impossibility," or where state law "stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress."

Administrative Law > Agency Adjudication > Alternative Dispute Resolution

Constitutional Law > Supremacy Clause > General Overview

Governments > Federal Government > US Postal Service

Administrative Law > Sovereign Immunity

Governments > Courts > Courts of Claims

HN25[] **Agency Adjudication, Alternative Dispute Resolution**

The Postal Service is expressly authorized by *39 U.S.C.S. § 401(3)* to determine the character and necessity of its expenditures. And, although *28 U.S.C.S. § 1491(b)(1)* allows for challenges to Postal Service procurement decisions, *28 U.S.C.S. § 1491(b)(4)* provides that such decisions may only be invalidated by a federal court applying the deferential Administrative Procedures Act standard of review codified at *5 U.S.C.S. § 706*. Allowing the requirements of *Cal Bus. & Prof. Code § 17200* to control the Postal Service's procurement decisions would impinge upon the Postal Service's right to control the character and necessity of its purchases free from state constraint, and would negate the deferential standard Congress has created for federal court review of such decisions.

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

Civil Rights Law > Protection of Rights > Section 1983 Actions > Scope

Governments > Federal Government > US Postal Service

HN26[] **Involuntary Dismissals, Failure to State Claims**

42 U.S.C.S. § 1983 does not allow for a suit based upon actions taken under color of federal law.

Civil Procedure > Preliminary Considerations > Venue > Corporations

HN27[] **Venue, Corporations**

See *15 U.S.C.S. § 22*.

Counsel: George P. Eshoo, Redwood City, California, for the plaintiffs-appellants.

Patricia J. Kenny, Assistant United States Attorney, San Francisco, California, for the defendant-appellee.

Judges: Before: Donald P. Lay, * David R. Thompson, and Richard C. Tallman, Circuit Judges. Opinion by Judge Thompson.

Opinion by: David R. Thompson

Opinion

* The Honorable Donald P. Lay, Senior United States Circuit Judge for the Eighth Circuit, sitting by designation.

[*988] THOMPSON, Circuit Judge.

Plaintiffs Flamingo Industries and its owner Arthur Wah (collectively "Flamingo") brought suit in the Northern District of California against the United States Postal Service. Flamingo asserted a number of federal and state law claims stemming from the Postal Service's termination of Flamingo's contract to produce U.S. Mail sacks. The district court dismissed the suit for lack of jurisdiction and improper venue, and did not reach the merits of any of the claims. Flamingo appeals.

According to the allegations of Flamingo's complaint, which we **[**2]** take as true for purposes of this appeal, the Postal Service terminated Flamingo's contract because it wanted to use cheaper mail sacks manufactured in Mexico, sacks that fail to meet safety and quality regulations. To disguise this scheme, the Postal Service adopted outdated requirements for mail sacks that could not be met by the modern machines used by Flamingo and other domestic manufactures, creating a pretext for canceling the domestic mail sack contracts. Once those contracts were canceled, the Service declared a fake emergency in the supply of mail sacks that allowed it to award future contracts to foreign manufactures on a no-bid basis. The Service sought to hide the false nature of this emergency by failing to follow regulations requiring documentation of any emergency.

Based on this alleged conduct, Flamingo asserted five federal antitrust claims, alleging that the Postal Service, in collusion with Mexican mail sack manufacturers, sought to suppress competition and create a monopoly in mail sack production in violation of federal antitrust laws. Flamingo also asserted claims alleging that the Postal Service violated the Postal Service Procurement Manual, the implied covenant **[**3]** of good faith and fair dealing, *California Business and Professions Code § 17200*, and *42 U.S.C. § 1983*.

The district court did not reach the merits of any of these claims. It dismissed the federal antitrust claims on the ground that the Postal Service was protected by sovereign immunity from antitrust liability. It determined that the claim for breach of the implied covenant of good faith and fair dealing was a tort claim, and dismissed it for lack of exhaustion under the Federal Tort Claims Act. The court dismissed the remaining claims on the ground that venue did not lie in the Northern District of California.

We have jurisdiction under *28 U.S.C. § 1291*. We affirm in part, reverse in part, and remand for further proceedings. We conclude that: (1) Flamingo may pursue claims against the Postal Service for alleged violations of federal antitrust laws because Congress has withdrawn the cloak of sovereign immunity from the Postal **[*989]** Service and given it the status of a private corporation; (2) the district court had jurisdiction over Flamingo's Procurement Manual claim pursuant to *28 U.S.C. § 1491(b)*; (3) the court **[**4]** properly dismissed Flamingo's breach of implied covenant claim for failure to exhaust under the Federal Tort Claims Act; (4) although the district court had original jurisdiction over Flamingo's claim asserted under *California Business & Professions Code § 1700*, that claim was properly dismissed because it is preempted by federal law; (5) Flamingo's *42 U.S.C. § 1983* claim fails to state a claim upon which relief can be granted; and (6) venue for the Postal Service Procurement Manual claim was properly laid in the Northern District of California.

I

THE FEDERAL ***ANTITRUST LAW*** CLAIMS

[1] Flamingo argues the district court erred in holding that sovereign immunity bars its suit against the Postal Service under federal antitrust laws. [1] Flamingo contends the Postal Service lost its sovereign status ***HN1***[] pursuant to the Postal Reorganization Act of 1970, Pub. L. No. 91-375, 84 Stat. 719 (codified as amended in Title 39 of the United States Code), which provides in relevant part that "The Postal Service shall have the . . . power[] to sue and be sued in its official name." *39 U.S.C. § 401(1)*. We agree.

---

[1] We do not distinguish between the various sections of the federal antitrust laws relied upon by Flamingo in its complaint -- *15 U.S.C. §§ 1*, *13*, *13a*, *14*, *45* -- because all of these sections are subject to the same analysis as to the sovereign immunity issue presented.

[5]** **[2]** In *FDIC v. Meyer, 510 U.S. 471, 484, 127 L. Ed. 2d 308, 114 S. Ct. 996 (1994)*, ***HN2***[] the Supreme Court applied a two-step inquiry in analyzing whether a federal instrumentality enjoys immunity from a particular substantive area of law. Under this analysis, "the first inquiry is whether there has been a waiver of sovereign immunity." *Id*. If there has been, "the second inquiry . . . [is] whether the source of substantive law upon which the claimant relies provides an avenue for relief." *Id*.

A

[3] Following *Meyer*, we first consider whether *39 U.S.C. § 401(1)* operates as a waiver of the Postal Service's sovereign immunity. More precisely, our inquiry is whether the sue-and-be-sued language of that section waives sovereign immunity as to the plaintiffs' antitrust claims.

The Supreme Court established the breadth of the Postal Service's sovereign immunity waiver in *Franchise Tax Board v. United States Postal Service, 467 U.S. 512, 81 L. Ed. 2d 446, 104 S. Ct. 2549 (1984)*. There, the issue was whether the Postal Service had to comply with a state tax board's liens on Postal Service employees' salaries. **[**6]** The Court began its analysis by recognizing that the general presumption is that a sue-and be-sued clause should be liberally construed: "***HN3***[] When Congress establishes . . . an agency, authorizes it to engage in commercial and business transactions with the public, and permits it to 'sue and be sued,' it cannot be lightly assumed that restrictions on that authority are to be implied." *Id. at 517* (quoting *FHA v. Burr, 309 U.S. 242, 245 (1940))*. To overcome this presumption "it must be clearly shown that certain types of suits are not consistent with the statutory or constitutional scheme, that an implied restriction of the general authority is necessary to avoid grave interference with the performance of a governmental function, or that for other reasons it was plainly the purpose of Congress to use the 'sue and be sued' clause in **[*990]** a narrow sense." *467 U.S. at 517-18* (quoting *Burr, 309 U.S. at 245*).

[4] The Postal Service could not overcome the presumption. In doing away with the Post Office Department and creating the Postal Service in the Postal Reorganization Act, Congress had "indicated that it wished the Postal Service to be **[**7]** run more like a business than had its predecessor . . . ." *467 U.S. at 519-20*. Congress had "'launched [the Postal Service] into the commercial world'; hence under *Burr* not only must we liberally construe the sue-and-be-sued clause, but also we must presume that the Service's liability is the same as that of any other business." *467 U.S. at 520* (brackets in original).

The Court reaffirmed the breadth of the Postal Service's waiver in *Loeffler v. Frank, 486 U.S. 549, 100 L. Ed. 2d 549, 108 S. Ct. 1965 (1988)*. There, a mail carrier had successfully maintained a Title VII action against the Postal Service and was seeking prejudgment interest on his award of damages. *Id. at 552*. ***HN4***[] Title VII allowed for actions against the federal government, *see 42 U.S.C. § 2000e-16*, but it did not contain a provision allowing for prejudgment interest against the government. Indeed, just two years earlier, in *Library of Congress v. Shaw, 478 U.S. 310, 92 L. Ed. 2d 250, 106 S. Ct. 2957 (1986)*, the Supreme Court had held that sovereign immunity barred the payment of interest on an award under Title VII against the Library **[**8]** of Congress. The Court in *Loeffler*, however, distinguished *Shaw* because, unlike the Library of Congress, the Postal Service's sovereign immunity had been waived. *Loeffler, 486 U.S. at 554-56, 565*.

The Court stressed the difference between a sovereign instrumentality, such as the Library of Congress, and a nonsovereign sue-and-be-sued instrumentality, such as the Postal Service. The Court stated that in *Shaw*, "the starting point for our analysis was ***HN5***[] the 'no-interest rule,' which is to the effect that, absent express consent by Congress, the United States is immune from interest awards . . . . The dispositive question was . . . whether Title VII contained an express waiver of the Library of Congress' immunity from interest." *Loeffler, 486 U.S. at 565* (citation omitted). It did not. However, "'the no-interest rule is . . . inapplicable where the Government has cast off the cloak of sovereignty and assumed the status of a private commercial enterprise.' " *Id*. (quoting *Shaw, 478 U.S. at 317 n.5*). "In creating the Postal Service, Congress [cast off the cloak of sovereignty], and therefore, the no-interest rule does not **[**9]** apply to it." *Id*.

In 1994, the Court returned to the sue-and-be-sued issue in *Meyer, 510 U.S. 471, 127 L. Ed. 2d 308, 114 S. Ct. 996*. There, the plaintiff prevailed at trial in a *Bivens* [2] action against the Federal Savings and Loan Insurance Corporation (FSLIC), which was a federal sue-and-be-sued instrumentality. After the FDIC, the successor in interest to the FSLIC, appealed unsuccessfully, the Supreme Court granted certiorari. *Id. at 473-75* . In rejecting the FDIC's argument that the FSLIC enjoyed sovereign immunity, the Court reiterated that ***HN6***[] "sue-and-be-sued waivers are to be 'liberally' construed . . . notwithstanding the general rule that waivers of sovereign immunity are to be read narrowly in favor of the sovereign." *Id. at 480* (citation omitted). Further, the fact that *Bivens* actions were not generally available against private corporations was not controlling. "We [have] looked to the liability of a private enterprise as a floor below which [a sue-and-be-sued] agency's liability **[*991]** could not fall," not a ceiling that may not be exceeded. *Id. at 482-83* (emphasis omitted). Thus, the waiver of **[**10]** the FSLIC's immunity included federal constitutional torts. *Id. at 483*. The Court went on to hold, however, that ***HN7***[] *Bivens* actions could not be filed against federal agencies, only against federal officers. *Id. at 484-86* .

[5] Relying on *Franchise Tax Board, Loeffler*, and *Meyer*, Flamingo argues that the Postal Service's waiver of immunity reaches federal antitrust actions. We agree. In *Franchise Tax Board*, the Court held that ***HN8***[] the general liberal-construction rule can be overcome only if the Postal Service makes a clear showing that the type of suit filed against it is not consistent with the statutory or constitutional scheme, an implied restriction is necessary to avoid "grave interference with the performance of a governmental function," or Congress **[**11]** plainly intended to use "sue and be sued" in a narrow sense. *Franchise Tax Bd., 467 U.S. at 517-18* (quoting *Burr, 309 U.S. at 245*); *accord* *Loeffler, 486 U.S. at 554-55* . Here, the Postal Service does not "attempt to make the 'clear' showing of congressional purpose necessary to overcome the presumption that immunity [from federal antitrust actions] has been waived." *Meyer, 510 U.S. at 481*. Further, it is doubtful the Postal Service could make that showing: As was the case in *Loeffler*, "since Congress expressly included several narrow and specific limitations on the operation of the [Postal Service's] sue-and-be-sued clause, *see* *39 U.S.C. § 409*, none of which is applicable here, the natural inference is that it did not intend other limitations to be implied." *Loeffler, 486 U.S. at 557* (footnote omitted).

B

[6] Having determined that Congress has waived the Postal Service's immunity, we turn to the second inquiry, "whether the source of substantive law upon which the claimant relies provides an avenue for relief." *Meyer, 510 U.S. at 484*. The **[**12]** source of substantive law upon which Flamingo relies is federal ***antitrust law***. The Postal Service argues that a federal antitrust claim may not be pursued against it because it is not a "person" within the meaning of that law. We disagree. Although a federal sovereign is not a "person," the Postal Service is not a sovereign.

The rule that the federal government and its instrumentalities are not "persons" for federal ***antitrust law*** purposes dates back to *United States v. Cooper Corp., 312 U.S. 600, 85 L. Ed. 1071, 61 S. Ct. 742 (1941)*. In *Cooper*, the federal government attempted to bring a civil suit under the Sherman Act. The Court rejected the suit, holding that ***HN9***[] the Sherman Act only allowed "persons" to bring civil suits and the United States did not meet the definition of a "person" under the Act. *Id. at 604, 614*. The Court explained that, "in common usage, the term 'person' does not include the sovereign, [and] statutes employing the phrase are ordinarily construed to exclude it." *Id. at 604*. Although "there is no hard and fast rule of exclusion" of the sovereign from the word "person," *id. at 604-05*, the **[**13]** Court was concerned because the Sherman Act used the word "person" to describe both who could bring suit and who could be sued. The Court wanted to avoid interpreting "person" in a manner in which the United States could be sued. *Id. at 606*. Hence, the Court reasoned that "the more natural inference . . . is that the meaning of the word was in both uses limited to what are usually known as natural and artificial persons, that is, individuals and corporations." *Id*.

Later circuit court decisions extended *Cooper* to exclude ***HN10***[] federal instrumentalities from the meaning of the word "person" in federal antitrust laws. In the seminal case **[*992]** of *Sea-Land Service, Inc. v. Alaska Railroad,*

[2] *Bivens v. Six Unknown Named Agents, 403 U.S. 388, 29 L. Ed. 2d 619, 91 S. Ct. 1999 (1971)* (recognizing an implied cause of action against federal officials who violate the Constitution).

212 U.S. App. D.C. 197, 659 F.2d 243, 244 (D.C. Cir. 1981), then-Judge Ginsburg wrote for the court in holding that "Congress did not place the United States or its instrumentalities under the governance of the Sherman Act." The *Sea-Land Service* opinion relied on *Cooper*, and on Congress's decision after *Cooper* to amend some of the federal antitrust laws to allow the United States to bring civil actions for single, but not treble, damages. 659 F.2d at 245-46 **[**14]** . This, the court reasoned, represented a Congressional intent to leave the word "persons" as the *Cooper* Court had defined it. Id. at 246.

In Sakamoto v. Duty Free Shoppers, Ltd., 764 F.2d 1285, 1288-89 (9th Cir. 1985), we applied *Sea-Land Service* and held that federal instrumentalities are immune from antitrust liability. Because the defendant government of Guam was "an instrumentality of the federal government," we held "there is no reason why Guam should enjoy less immunity than the federal government itself." Id. at 1289 (citing Jet Courier Servs., Inc. v. Fed. Reserve Bank of Atlanta, 713 F.2d 1221, 1228 (6th Cir. 1983), and Sea-Land Serv., 659 F.2d at 246-47).

Cooper, Sea-Land Service, and *Sakamoto* remain valid precedent, but they do not control our decision today. These holdings require (or assume) that the federal instrumentality at issue enjoys federal sovereignty. As the Second Circuit recently explained: "While the *Sea-Land* court's holding that the Sherman Act does not expose federal agencies to legal or equitable liability for alleged antitrust violations . . . is **[**15]** uncontroversial, such immunity was founded on the sovereign immunity of the United States." Name. Space, Inc. v. Network Solutions, Inc., 202 F.3d 573, 580-81 (2d Cir. 2000)(citation omitted). Here, the Postal Service does not enjoy federal sovereignty.

[7] ***HN11***[] The Postal Service's sue-and-be-sued waiver of immunity has created a presumption that the cloak of sovereignty has been withdrawn and that the Postal Service should be treated as a private corporation. *See* Franchise Tax Board, 467 U.S. at 520 ("We must presume that the Service's liability is the same as that of any other business."); *accord* Loeffler, 486 U.S. at 556 ("Congress has cast off the Service's 'cloak of sovereignty' and given it the 'status of a private commercial enterprise.' ") (quoting Shaw, 478 U.S. at 317 n.5.); *see also* Meyer, 510 U.S. at 482 (the Court has "looked to the liability of a private enterprise as a floor below which the [sue-and-be-sued] agency's liability could not fall."). Because the Postal Service is an entity with the status of a private commercial enterprise, it fits within the common meaning of the **[**16]** word "person," just as does any other private corporation. *See* 15 U.S.C. § 7 ("The word 'person,' or 'persons,' wherever used in [Title 15 of the United States Code] shall be deemed to include corporations . . . ."); *see also* Vt. Agency of Natural Res. v. United States ex rel. Stevens, 529 U.S. 765, 782, 146 L. Ed. 2d 836, 120 S. Ct. 1858 (2000) ("The presumption with regard to corporations is just the opposite of the one governing [sovereigns]: they are presumptively covered by the term 'person' . . . .") (citing 1 U.S.C. § 1) (emphasis omitted).

We find support for our conclusion in Global Mail Ltd. v. United States Postal Service, 142 F.3d 208, 216-17 (4th Cir. 1998). There, the Fourth Circuit held that ***HN12***[] the Postal Service was a "person" that could be sued under the Lanham Act. [3] The court explained:

> **[*993]** The Lanham Act itself contains no waiver of sovereign immunity for the federal government, and . . . the Act's definition of 'person' as an 'organization capable of being sued' falls short of the standard of explicitness required for such a waiver. But those agencies whose immunity has already been waived, and are capable of suing **[**17]** and being sued, fall squarely within the plain language of the Lanham Act's definition of 'juristic persons.' . . . [A] governmental agency engaged in a commercial enterprise, as is USPS, is indistinguishable in kind from a private 'firm' or 'association.'

[3] Since *Global Mail* was decided, the Lanham Act was amended to expressly cover the United States and its instrumentalities as "persons." *See* Pub. L. No. 106-43, §§ 4(c), 6(b), 113 Stat. 219, 220 (1999) (codified at 15 U.S.C. § 1127).

Id. at 216; [4] *accord* *Fed. Express Corp. v. United States Postal Serv., 151 F.3d 536, 544-46 (6th Cir. 1998)*; *United States v. Q Int'l Courier, Inc., 131 F.3d 770, 775 (8th Cir. 1997)*. This reasoning applies equally here, ***HN13***[] where federal ***antitrust law*** defines "person" as including any private corporation, *see* *15 U.S.C. § 7*, and where Supreme Court precedent establishes that the Postal Service is to be treated as a private corporation. *See* *Loeffler, 486 U.S. at 556*.

[18]** The Postal Service cites several cases involving sue-and-be-sued instrumentalities where such entities were held exempt from federal antitrust laws. *See* *Jet Courier Servs., 713 F.2d at 1228-29*; *E.W. Wiggins Airways, Inc. v. Mass. Port Auth., 362 F.2d 52, 56 (1st Cir. 1966)*; *Webster City Coal Corp. v. Tenn. Valley Auth., 476 F. Supp. 529, 531-32 (W.D. Ky. 1979)*. These cases predate the Supreme Court's decisions in *Franchise Tax Board, Loeffler*, and *Meyer* and are not persuasive authority in light of the Court's recent sue-and-be-sued jurisprudence.

[8] We hold that the Postal Service can be sued under federal antitrust laws because Congress has stripped the Postal Service of its sovereign status by launching it into the commercial world as a sue-and-be-sued entity akin to a private corporation. However, we add one significant caveat. Two types of immunity from federal antitrust laws exist. Our discussion has focused solely on the first kind of immunity -- "status-based" immunity, *see* *Name. Space, 202 F.3d at 581* -- because the parties only raise that type of immunity. A second type of immunity -- "conduct-based" **[**19]** immunity -- can apply when an entity does not enjoy status-based immunity, but acts at the direction of a federal sovereign. *See* *id. at 581-82* (holding that a nonsovereign contractor enjoyed immunity from ***antitrust law*** where it was exercising a Congressionally-mandated monopoly). Accordingly, our holding that ***HN14***[] the Postal Service does not enjoy status-based immunity does not prevent the Service from asserting conduct-based immunity if the action of the Postal Service being challenged was taken at the command of Congress. *See generally* *Air Courier Conf. v. Am. Postal Workers Union, 498 U.S. 517, 519, 112 L. Ed. 2d 1125, 111 S. Ct. 913 (1991)* (recognizing that Congress has conferred a legal monopoly on the Postal Service over mail delivery in and from the United States).

[*994] II

THE PROCUREMENT MANUAL CLAIM

The Postal Service argues that the district court lacked jurisdiction over Flamingo's claim that it violated the Postal Service Procurement Manual because Flamingo lacks standing to assert the claim. The parties' briefs devote much energy to an inconsistent series of cases from the 1970's to the 1990's discussing this issue. We need not attempt to reconcile **[**20]** these cases; they are irrelevant.

In 1996, Congress amended *28 U.S.C. § 1491*, part of the codification of the Tucker Act, by enacting the Administrative Dispute Resolution Act of 1996 ("ADRA"), Pub. L. No. 104-320, 110 Stat. 3870 (1996). ***HN15***[] The relevant portion of the ADRA, as codified, reads:

> Both the United States Court of Federal Claims and the district courts of the United States shall have jurisdiction to render judgment on an action by an interested party objecting to a solicitation by a Federal agency for bids or proposals for a proposed contract or to a proposed award or the award of a contract or any alleged violation of statute or regulation in connection with a procurement or a proposed procurement. Both the United States Court of Federal Claims and the district courts of the United States shall have jurisdiction to entertain such an action without regard to whether suit is instituted before or after the contract is awarded.

---

[4] The Postal Service points out that *Global Mail* holds that Lanham Act claims, which are federal tort claims, may be brought against the Postal Service. According to the Postal Service, this is contrary to the law of this circuit under *Pereira v. United States Postal Serv., 964 F.2d 873 (9th Cir. 1992)*. In *Pereira*, we held that the Postal Service is immune from suit for federal torts because the sue-and-be-sued clause is limited by the Federal Tort Claims Act (FTCA). *Id. at 876-77*. However, subsequent to *Pereira*, the Supreme Court held that the FTCA does not limit a sue-and-be-sued waiver as to federal tort claims because the FTCA only applies to state tort claims. *Meyer, 510 U.S. at 476-79* . This overruled *Pereira*.

28 U.S.C. § 1491(b)(1). A sunset provision in the ADRA terminated district court jurisdiction under § 1491(b)(1) on January 1, 2001; however, a savings provision states that **HN16**[] the termination **[**21]** of jurisdiction "shall not affect the jurisdiction of a court of the United States to continue with any proceeding that is pending before the court on December 31, 2000." ADRA, Pub. L. 104-320, § 12(d)-(e). Flamingo is within this savings clause because it filed its action on July 11, 2000. This being so, the questions presented are whether § 1491(b)(1) applies to the Postal Service, and if so, whether Flamingo has standing to assert the Procurement Manual claim. At our request, the parties addressed these questions at oral argument.

Having considered the parties' arguments, we hold that **HN17**[] § 1491(b)(1) applies to the Postal Service. In *Emery Worldwide Airlines, Inc. v. United States, 264 F.3d 1071, 1080-83 (Fed. Cir. 2001)*, the Federal Circuit held that the Postal Service could be sued under § 1491(b)(1). The court explained that, although Title 28 of the United States Code does not define "federal agency," it does define "agency" in a manner that covers the Postal Service. *Emery Worldwide Airlines, 264 F.3d at 1080-81* (citing 28 U.S.C. § 451 and 39 U.S.C. § 201). We agree with the reasoning of *Emery* **[**22]** *Worldwide Airlines*, and follow its holding. [5]

We also hold that Flamingo has standing under § 1491(b)(1) to assert its Procurement Manual claim. **HN19**[] Section 1491(b)(1) provides for district court jurisdiction **[**23]** over any claim by an "interested party objecting to a solicitation by a Federal agency for bids or proposals for a **[*995]** proposed contract or to a proposed award or the award of a contract or any alleged violation of statute or regulation in connection with a procurement or a proposed procurement." Flamingo alleges that the Postal Service violated its Procurement Manual by maintaining contracts with Mexican suppliers of mail sacks that violated the Manual while unfairly canceling a procurement contract with Flamingo. Flamingo also alleges that the Postal Service violated the Manual by falsely declaring an emergency in the supply of mail sacks and failing to document this emergency so as to be able to award no-bid contracts to Mexican suppliers. Flamingo has standing under 28 U.S.C. § 1491(b)(1).

III

THE IMPLIED COVENANT CLAIM

The district court held that it lacked jurisdiction over Flamingo's claim for an alleged violation of the implied covenant of good faith and fair dealing because that claim was an unexhausted tort claim barred under the Federal Tort Claims Act (FTCA), 28 U.S.C. §§ 1346(b), 2671-2680 . **HN20**[] The FTCA applies to the Postal **[**24]** Service, *see* 39 U.S.C. § 409(c), and Flamingo has never disputed that the claim is a tort claim covered by the FTCA. Under the FTCA, the claim had to be administratively exhausted for the court to have subject matter jurisdiction. *Jerves v. United States, 966 F.2d 517, 518-19 (9th Cir. 1992)*; *see* 28 U.S.C. § 2675(a).

HN21[] In determining that the claim was unexhausted, the district court considered a declaration submitted by the Postal Service and took note of Flamingo's failure to proffer contrary evidence. We therefore treat the court's dismissal of the claim as a grant of summary judgment, which we review de novo. *Lopez v. Smith, 203 F.3d 1122, 1131 (9th Cir. 2000)* (en banc).

The declaration submitted to the district court by the Postal Service demonstrated that Flamingo had not met the exhaustion requirement of the FTCA. Flamingo failed to present any evidence contradicting this declaration. We affirm the district court's dismissal of the claim.

IV

---

[5] 28 U.S.C. § 1491(b)(4) imports Administrative Procedures Act (APA) standards of review into procurement cases under 28 U.S.C. § 1491(b)(1). 39 U.S.C. § 410(a) exempts the Postal Service from most of the APA. In *Emery Worldwide Airlines*, the court noted the possibility that 28 U.S.C. § 1491(b)(4) and 39 U.S.C. § 410(a) are in conflict, although the court avoided deciding the issue. *See* *Emery Worldwide Airlines, 264 F.3d at 1084-85* . We do not see a conflict. **HN18**[] 28 U.S.C. § 1491(b)(4) incorporates by reference the APA review standards into cases under 28 U.S.C. § 1491(b)(1); 28 U.S.C. § 1491(b)(4) does not create APA liability.

THE *CALIFORNIA BUSINESS & PROFESSIONS CODE § 17200* CLAIM

The Postal Service argues that the district court lacked supplemental jurisdiction over **[**25]** the *California Business & Professions Code § 17200* claim and, alternatively, that the claim is preempted by federal law. We do not reach the issue of *supplemental* jurisdiction because we hold that the district court properly exercised *original* jurisdiction over this claim under *39 U.S.C. § 409(a)*. Nonetheless, the claim was properly dismissed because it is preempted by federal law.

A

We first consider the district court's jurisdiction. Subject to certain inapplicable exceptions, ***HN22***[] *39 U.S.C. § 409(a)* provides that "the United States district courts shall have original but not exclusive jurisdiction over all actions brought by or against the Postal Service." The plain language of this statute grants United States district courts original jurisdiction over lawsuits by or against the Postal Service, as other circuits have held. *E.g. Licata v. United States Postal Serv., 33 F.3d 259, 260-62 (3d Cir. 1994)*; *Cont'l Cablevision of St. Paul, Inc. v. United States Postal Serv., 945 F.2d 1434, 1437-41 (8th Cir. 1991)*; *Am. Postal Workers Union v. United States Postal Serv., 265 U.S. App. D.C. 146, 830 F.2d 294, 312 n.33 (D.C. Cir. 1987)*. **[**26]** **[*996]**

We would stop our discussion here, except for the need to clarify an arguable inconsistency in our cases interpreting *39 U.S.C. § 409(a)*. In *Janakes v. United States Postal Service, 768 F.2d 1091, 1093 (9th Cir. 1985)*, we quoted and adopted the Seventh Circuit's holding in *Peoples Gas, Light & Coke Co. v. United States Postal Service, 658 F.2d 1182, 1189 (7th Cir. 1981)*, that *§ 409(a)* "does not confer subject matter jurisdiction for actions in which the [Postal] Service is a party, but requires a 'substantive legal framework' of federal law to confer federal subject matter jurisdiction." According to *Peoples Gas* and *Janakes*, *§ 409(a)* "merely removes the barriers of sovereign immunity." *Id*. Later, without citing *Janakes*, we held in *Wright v. United States Postal Service, 29 F.3d 1426, 1430 (9th Cir. 1994)*, that " ***HN23***[] *39 U.S.C. § 409(a)* . . . grants the district courts original but not exclusive jurisdiction over actions by or against the USPS." *See also* *Silver v. United States Postal Serv., 951 F.2d 1033, 1035 & n.1 (9th Cir. 1991)* (per curiam) (citing without **[**27]** discussion *§ 409(a)* as a basis for jurisdiction).

A careful reading of our cases reveals that no true inconsistency exists because *Janakes* is distinguishable. In *Janakes*, the issue we decided was whether *§ 409(a)* created a substantive right to bring suit. *See* *Janakes, 768 F.2d at 1093*. We held it did not. *Id*. Although some language in *Janakes* suggests that *§ 409(a)* does not confer subject matter jurisdiction, that language is dicta. Indeed, the Seventh Circuit, which in *Peoples Gas* created the decision that prompted our *Janakes* language, later adopted a reading of *Peoples Gas* consistent with the reading we now apply to *Janakes. See* *Powers v. United States Postal Serv., 671 F.2d 1041, 1042 (7th Cir. 1982)*. We are satisfied that our reading, following *Wright*, is correct. The plain language of *§ 409(a)* states that the district courts "shall have original jurisdiction" -- the same words used to grant jurisdiction elsewhere in the United States Code. *E.g*. *28 U.S.C. §§ 1331*, *1332*.

We hold that the district court correctly exercised original subject matter jurisdiction under *39 U.S.C. § 409(a)* **[**28]** over Flamingo's claim asserted under *California Business & Professions Code § 17200*.

B

The district court's dismissal of the *California Business & Professions Code § 17200* claim was proper, however, because that claim is preempted by federal law. The district court did not reach this issue, but we may affirm on any ground supported by the record. *See* *Laboa v. Calderon, 224 F.3d 972, 981 n.7 (9th Cir. 2000)*.

Preemption comes in several forms. Here we are concerned with ***HN24***[] conflict preemption, by which "state law is preempted to the extent that it actually conflicts with federal law. Such a conflict arises when 'compliance with both federal and state regulations is a physical impossibility,' . . . , or where state law 'stands as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.' " *Pac. Gas & Elec. Co. v. State Energy Res. Conservation & Dev. Comm'n, 461 U.S. 190, 204, 75 L. Ed. 2d 752, 103 S. Ct. 1713 (1983)* (quoting

Florida Lime & Avocado Growers, Inc. v. Paul, 373 U.S. 132, 142-43, 10 L. Ed. 2d 248, 83 S. Ct. 1210 (1963), and Hines v. Davidowitz, 312 U.S. 52, 67, 85 L. Ed. 581, 61 S. Ct. 399 (1941)). **[**29]**

The state law at issue, California Business & Professions Code § 17200, is a notoriously broad statute. It applies to, among other things, "any unlawful, unfair or fraudulent business act or practice." Here, Flamingo is using the section to challenge procurement decisions made by the Postal Service involving the Postal **[*997]** Service's requirements for mail bags. This use of section 17200 conflicts with federal law.

HN25[] The Postal Service is expressly authorized by 39 U.S.C. § 401(3) to determine the character and necessity of its expenditures. And, although 28 U.S.C. § 1491(b)(1) allows for challenges to Postal Service procurement decisions, 28 U.S.C. § 1491(b)(4) provides that such decisions may only be invalidated by a federal court applying the deferential APA standard of review codified at 5 U.S.C. § 706 (for example, if the procurement decision is arbitrary and capricious). Allowing the requirements of California Business & Professions Code § 17200 to control the Postal Service's procurement decisions would impinge upon the Service's right to control the character and necessity of its purchases **[**30]** free from state constraint, and would negate the deferential standard Congress has created for federal court review of such decisions. *Cf.* United States v. City of Pittsburg, Cal., 661 F.2d 783, 785-86 (9th Cir. 1981) (holding that a local ordinance requiring letter carriers to obtain consent before crossing lawns was preempted by a Postal Service regulation allowing mail carriers to cross lawns unless the owner objects because of the clear conflict between the two provisions). Flamingo's claim asserted under California Business & Professions Code § 17200 is preempted by federal law.

V

THE § 1983 CLAIM

The Postal Service argues that we should dismiss Flamingo's 42 U.S.C. § 1983 claim for failure to state a claim upon which relief can be granted. We agree. The Postal Service acts under federal law, and **HN26**[] § 1983 does not allow for a suit based upon actions taken under color of federal law. Billings v. United States, 57 F.3d 797, 801 (9th Cir. 1995). Exercising our authority to affirm on any ground supported by the record, we dismiss with prejudice the § 1983 claim.

VI

VENUE

The district court, after dismissing the federal **[**31]** antitrust claims and the breach of implied covenant claim, dismissed the Procurement Manual, California Business and Professions Code § 17200, and 42 U.S.C. § 1983 claims for improper venue. It held that 15 U.S.C. § 22 did not support venue for these claims once the antitrust claims were dismissed.

HN27[] Section 22 states:

> Any suit, action, or proceeding *under the antitrust laws* against a corporation may be brought not only in the judicial district whereof it is an inhabitant, but also in any district wherein it may be found or transacts business; and all process in such cases may be served in the district of which it is an inhabitant, or wherever it may be found.

15 U.S.C. § 22 (emphasis added).

We have held earlier in this opinion that the district court erred in dismissing the antitrust claims on the ground of sovereign immunity. We now hold that under 15 U.S.C. § 22, venue for the antitrust claims was proper in the Northern District of California because the Postal Service may be found in, and transacts business in, that district. *See id*.

Because venue is proper in the **[**32]** Northern District of California for the antitrust claims, and because the Procurement Manual, *§ 17200*, and *§ 1983* claims arise out of the same common nucleus of facts, venue in the Northern District was proper for these claims as well. *See* *Beattie v. United States, 244 U.S. App. D.C. 70, 756 F.2d 91, 100-104 (D.C. Cir. 1984)*, *overruled on other grounds in* *Smith v. United States, 507 U.S. 197, 122 L. Ed. 2d 548, 113* ***[*998]*** *S. Ct. 1178(1993)*; *Seattle Audubon Soc'y v. Lyons, 871 F. Supp. 1286, 1290 (W.D. Wash. 1994)*. However, for alternative reasons previously discussed, we have affirmed the dismissal of the *§ 17200* and *§ 1983* claims. We now reverse the district court's dismissal of the Procurement Manual claim for improper venue.

VII

CONCLUSION

We reverse the district court's dismissal of Flamingo's antitrust claims and Procurement Manual claim. We affirm the district court's dismissal of Flamingo's claim for breach of the implied covenant of good faith and fair dealing, and its dismissal of the claims asserted under *California Business & Professions Code § 17200* and *42 U.S.C. § 1983*. The parties shall each bear **[**33]** their respective costs for this appeal.

AFFIRMED in part, REVERSED in part, and REMANDED for further proceedings consistent with this opinion.

Colorado courts recognize a cause of action for breach of fiduciary duty.

Contracts Law > Contract Interpretation > Fiduciary Responsibilities

Governments > Fiduciaries

Torts > Intentional Torts > Breach of Fiduciary Duty > General Overview

HN26[] **Contract Interpretation, Fiduciary Responsibilities**

Under the test that Colorado courts generally apply when determining whether there has been a breach of fiduciary duty, fiduciary duties may arise when parties are engaged in a fiduciary, or confidential, relationship. A fiduciary relation exists between two persons when one of them is under a duty to act for or to give advice for the benefit of another upon matters within the scope of the relation. Such a duty may arise when one party is in a superior position relative to the other party. But an unequal relationship does not automatically create a fiduciary duty. In order to be liable, the superior party must assume a duty to act in the dependent party's best interest. A fiduciary relationship can arise out of a relationship of blood, business, friendship, or association.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Civil Procedure > ... > Summary Judgment > Burdens of Proof > General Overview

HN27[] **Private Actions, Remedies**

To survive summary judgment, a plaintiff must demonstrate an "antitrust injury," which is an injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendant's acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. The purpose of this requirement is to ensure that courts connect the alleged injury to the purposes of the antitrust laws. Compensation for that injury must be consistent with the purposes of ***antitrust law*** generally and with the rationale for condemning the particular defendant. The point is to prevent an award of damages for losses stemming from continued or increased competition rather than diminished competition, a result that otherwise would be inimical to the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > Price Fixing

HN28[] **Private Actions, Remedies**

A dealer terminated for its refusal to abide by a vertical minimum price fixing agreement suffers antitrust injury.

Opinion by: G. Thomas Van Bebber

Opinion

[*788] ORDER AND JUDGMENT [*]

This action arose out of the termination of two separate contracts: a sales franchise **[*789]** agreement between a manufacturer of heating and air conditioning equipment, American Standard, Inc., d/b/a/ The Trane Company ("Trane"), and Frederick Haynes ("Haynes"); and a distributorship agreement between Trane and Haynes's family-owned business, Haynes Trane Service Agency, Inc. ("HTSA").

In 1968, Haynes entered into a sales franchise agreement with Trane. Under that contract, Haynes became a sales agent for Trane's large commercial systems. The contract was for an indeterminate period and stated that it could "be terminated by either party upon 30 days **[**4]** notice to the other." Haynes also formed HTSA, largely in order to fulfill his responsibilities under his sales franchise agreement with Trane. HTSA's employees solicited orders for Trane commercial systems and performed start-up and warranty services. HTSA also serviced and repaired Trane products and those of other manufacturers.

In 1990, Trane and HTSA entered into a distributorship agreement, whereby HTSA became a wholesale distributor of Trane's "unitary products," which are light commercial and residential products. The distributorship agreement did not include Trane's large commercial systems, for which Haynes continued to hold his sales franchise agreement. HTSA's distributorship agreement was for a term of one year, and it did not contain a renewal option. However, Trane and HTSA entered into new distributorship agreements every year through 1995. Each

---

[**] The Honorable G. Thomas Van Bebber, Senior District Judge, United States District Court for the District of Kansas, sitting by designation.

[*] This order and judgment is not binding precedent, except under the doctrines of law or the case, res judicata, and collateral estoppel. The court generally disfavors the citation of orders and judgments; nevertheless, an order and judgment may be cited under the terms and conditions of *10th Cir. R. 36.3*.

distributorship agreement was terminable "by either party, with or without cause, upon 90 days written notice." Under Trane's distributorship agreements, including those with HTSA, distributors bought unitary products from Trane at a set price and resold them at a profit. At times, market forces might require a distributor **[**5]** to resell a unitary product at an unusually low price. When this occurred, a distributor could complete a "claimback form" and submit it to Trane for a rebate, which would be credited to the distributor through Trane's "claimback program."

Early in 1995, Trane began auditing HTSA's claimback forms. Trane concluded that there was evidence of fraud by HTSA. Trane decided to terminate both Haynes's sales franchise agreement and HTSA's distributorship agreement. The sales franchise agreement was terminated, effective in thirty days (July 8, 1995); the distributorship agreement was terminated, effective immediately.

Haynes and HTSA filed this action against Trane, advancing claims for breach of both contracts, breach of implied covenants, breach of fiduciary duty, and violation of federal antitrust laws, as well as other claims which are not the subject of this appeal. Trane asserted counterclaims of fraud, unjust enrichment, and for an accounting, along with other counterclaims which are not the subject of this appeal.

Trane filed motions for summary judgment regarding most of Haynes's and HTSA's claims. In an order dated October 2, 1998, the district court entered summary judgment **[**6]** in favor of Trane on the antitrust claims. At a pretrial conference held February 5, 1999, the court announced that Trane's counterclaims for unjust enrichment and an accounting would not be tried to a jury; the court would decide those claims following a jury trial on the remaining claims. At a pretrial conference held September 17, 1999, the court dismissed Haynes's and HTSA's claims for breach of fiduciary duty. It also dismissed HTSA's claim for breach of the **[*790]** implied duty of good faith and fair dealing. No reasons for the dismissals were stated on the record.

The remaining claims were tried to a jury. The district court submitted three claims to the jury: (1) Haynes's claim for breach of the implied covenants of good faith, fair dealing, and cooperation under his sales franchise agreement; (2) HTSA's claim for breach of the distributorship agreement; and (3) Trane's counterclaim for fraud against HTSA. [1]

[7]** At the close of Haynes's and HTSA's evidence, the district court entered judgment against Haynes on his claim for breach of the sales franchise agreement, pursuant to *Fed. R. Civ. P. 50(a)*. The jury, in answers to special questions, found that Trane had violated the implied covenants of good faith, fair dealing, and cooperation under the sales franchise agreement and awarded Haynes $ 8.1 million in damages. The jury also found that Trane had breached its distributorship agreement with HTSA and awarded HTSA $ 9.9 million in damages.

The jury found in Trane's favor on its fraud counterclaim, but damages were not determined. However, the district court ruled, *sua sponte* at a post-trial hearing, that there was not sufficient evidence to support the jury's verdict for Trane. The court then entered judgment pursuant to *Fed. R. Civ. P. 50(a)* for HTSA on the fraud counterclaim. At the same hearing, the court dismissed Trane's counterclaims for unjust enrichment and an accounting.

Trane filed three post-trial motions: (1) a motion to amend the judgment on all of its counterclaims, requesting both reinstatement of the verdict on its fraud counterclaim and a trial to determine the amount **[**8]** of damages due Trane because of HTSA's fraud; (2) a motion for judgment in Trane's favor on Plaintiffs' claims as a matter of law, pursuant to *Fed. R. Civ. P. 50(b)*; and (3) an alternative motion for a new trial. The district court denied all three motions. In the order denying Trane's motion to amend the judgment on its counterclaims, the court stated that Trane had waived its counterclaims for unjust enrichment and an accounting by choosing to proceed with its fraud counterclaim.

On appeal, Trane asks us to: (1) vacate the verdict for Haynes on his claim for breach of the implied covenants of good faith, fair dealing, and cooperation under his sales franchise agreement; (2) vacate the verdict for HTSA on its

---

[1] At the close of Trane's evidence, the district court entered judgment against Trane on several counterclaims which are not at issue in this appeal.

claim for breach of its distributorship agreement; (3) reverse the judgment for HTSA on Trane's fraud counterclaim; and (4) reverse the dismissal of Trane's counterclaims for unjust enrichment and an accounting.

Haynes separately cross-appeals for reversal of the dismissal of his claim for breach of contract, should we vacate the verdict on his claim for breach of the implied covenants. HTSA separately cross-appeals for reversal of the dismissal of its claim for breach of **[**9]** the implied duty of good faith and fair dealing. HTSA also separately cross-appeals the district court's jury instructions on fraud, and an evidentiary decision regarding Trane's fraud counterclaim.

Finally, Haynes and HTSA both cross-appeal for reversal of the district court's dismissal of their claims for breach of fiduciary duty and antitrust violations, and they appeal the district court's refusal to award prejudgment interest on their judgments. We exercise jurisdiction pursuant **[*791]** to *28 U.S.C. § 1291*. We affirm in part, vacate in part, reverse in part, and remand for a new trial.

STANDARDS OF REVIEW

HN1[] A district court's ruling on an issue of law is subject to *de novo* review. *Moncrief v. Williston Basin Interstate Pipeline Co., 174 F.3d 1150, 1163-64 (10th Cir. 1999)*. A ruling on a motion for judgment as a matter of law pursuant to *Fed. R. Civ. P. 50* is also subject to *de novo* review. *Baty v. Willamette Indus., Inc., 172 F.3d 1232, 1241 (10th Cir. 1999)*. Likewise, ***HN2***[] a district court's interpretations of state law and decisions as to the ambiguity of a contract are subject to *de novo* review. *Devery Implement Co. v. J.I. Case Co., 944 F.2d 724, 727 (10th Cir. 1991)*; **[**10]** *City of Wichita v. S.W. Bell Tel. Co., 24 F.3d 1282, 1287 (10th Cir. 1994)*. ***HN3***[] A district court's decision that a cause of action has been waived is reviewed under two standards: factual conclusions are reviewed for clear error, and the application of law to those facts is reviewed *de novo*. *Fed. Deposit Ins. Corp. v. Oaklawn Apartments, 959 F.2d 170, 173 (10th Cir. 1992)*.

I. TERMINATION OF HAYNES'S SALES FRANCHISE AGREEMENT

The parties stipulated that the issues concerning termination of the sales franchise agreement are governed by Wisconsin law. Before submitting the case to the jury, the district court determined that the sales franchise agreement was terminable without cause by either party on thirty days notice. The court then concluded that Trane did not breach the agreement, because it provided Haynes with thirty days notice of its termination of the agreement. Having made that determination, the district court then permitted the jury to decide whether Trane breached implied covenants of good faith, fair dealing, and cooperation in terminating the sales franchise agreement without cause.

Trane appeals the jury's verdict that it **[**11]** breached the implied covenants under the sales franchise agreement. Haynes conditionally cross-appeals the court's decision that Trane did not breach the sales franchise agreement, asking us to review that decision only if we vacate the jury's verdict on the implied covenants claim. We affirm the district court's decision that Trane did not breach the terms of the sales franchise agreement as it was written. We reverse the court's decision to submit to the jury Haynes's claim for breach of implied covenants, and we remand for further proceedings on the issues of modification of the agreement and the applicability of equitable estoppel.

A. Haynes's Claim for Breach of the Sales Franchise Agreement.

The district court correctly concluded that, ***HN4***[] under Wisconsin law, contracts effective for an indeterminate period are terminable without cause unless the contract expressly provides otherwise. See *Cal. Wine Ass'n v. Wis. Liquor Co., 20 Wis. 2d 110, 121 N.W.2d 308, 316-18 (Wis. 1963)*; Regal Ware, Inc. v. TSCO Corp., *229 Wis. 2d 734, 1999 Wisc. App. LEXIS 721, 600 N.W.2d 54, 1999 WL 415370*, at *4 (Wis. Ct. App. June 23, 1999) ("Because none of the prior agreements . . . contained termination **[**12]** dates, the agreements were terminable at will."); *Rakowski Distrib., Inc. v. Marigold Foods, Inc., 193 F.3d 504, 508 (7th Cir. 1999)* (citation omitted) ("In Wisconsin as in other states, service contracts may be terminable at will unless the agreement specifies otherwise or unless some specific statute changes that background rule.").

Haynes urges us to create an exception to this rule for franchise agreements. In support of his argument, **[*792]** Haynes offers examples of cases from other jurisdictions that have required cause for the termination of franchise agreements when the agreements are silent. It appears, however, that Wisconsin courts have not adopted such an exception for franchise agreements. In light of California Wine Ass'n, Regal Ware, Inc., and Rakowski Distributing, Inc., we do not believe that, given the opportunity, Wisconsin courts would adopt such an exception.

In California Wine Ass'n, the Wisconsin Supreme Court considered whether an implied exclusive distributorship agreement with no termination provisions could be terminated only after reasonable notice. *121 N.W.2d at 316*. The parties to the agreement had a relationship which **[**13]** spanned more than 14 years. *Id. at 312-13*. The court appeared to assume that the agreement was terminable at will and merely held that reasonable notice was required before termination. *Id. at 317* ("The exclusive distribution contracts were implied from the conduct of the parties and could be terminated at will provided there was reasonable notice.").

In Regal Ware, Inc., an unpublished opinion by the Wisconsin Court of Appeals, the court considered a series of agreements with no termination provisions. *1999 Wisc. App. LEXIS 721, 1999 WL 415370*, at *1, *4. The parties entered into the agreements over a period of about ten years. *1999 Wisc. App. LEXIS 721*, [WL] at *1-2. The court stated that "because none of the . . . agreements . . . contained termination dates, the agreements were terminable at will." Id. As in California Wine Ass'n, the court's focus was not on whether the contract was terminable at will, but whether the notice given before termination was reasonable. *1999 Wisc. App. LEXIS 721*, [WL] at *4-6.

In Rakowski Distributing, Inc., the Seventh Circuit briefly addressed whether, under Wisconsin law, a service contract without termination provisions was terminable at will. *193 F.3d at 508*. We again **[**14]** note that at-will termination was not a central issue in the case. However, the decision remains instructive. The plaintiff was a small, family-owned trucking company that had done hauling and distribution for Marigold Foods for some ten years. *Id. at 505*. The plaintiff devoted about seventy-five percent of its labor force to hauling for Marigold, bought trailers especially suited to Marigold's products, and installed a lift gate on one of its trailers so that it could service one of Marigold's customers without a loading dock. *Id. at 505-06*. Marigold Foods terminated the hauling contract somewhat unexpectedly. Despite the relationship between the parties and the hardship inflicted on the plaintiff, the Seventh Circuit noted that, ***HN5***[] under Wisconsin law, "service contracts may be terminated at will unless the agreement specifies otherwise . . . ." *Id. at 508*.

While the agreements that were the subjects of these cases were not sales franchise agreements, the relationships involved were similar to the relationship between Haynes and Trane. In each case, the court appeared to assume that the contract, because it was for an indeterminate **[**15]** period of time and had no express provision to the contrary, was terminable at will. We find these cases persuasive, and we determine that, ***HN6***[] under Wisconsin law, a franchise agreement is terminable at will when it does not specify whether good cause is required for termination. [2] Consequently, **[*793]** we affirm the district court's decision that the sales franchise agreement, on its face, was terminable at will with thirty days notice, which was given.

B. Haynes's Claim for Breach of Implied Covenants.

HN7[] Wisconsin recognizes the implied covenants of good faith, fair **[**16]** dealing, and cooperation. *In re Chayka's Estate, 47 Wis. 2d 102, 176 N.W.2d 561, 564 n.7 (Wis. 1970)*. However, Wisconsin courts have held that conduct authorized by a contract cannot be a breach of the implied covenants. See *Wausau Med. Ctr. v. Asplund,*

---

[2] Haynes also urges us to apply the principles of the Wisconsin Fair Dealership Law ("WFDL") to import a good cause requirement into the sales franchise agreement. The WFDL is inapplicable, because it applies only to "dealers" operating within the state of Wisconsin. *Wis. Stat. Ann. § 135.02(2)*. Haynes did not operate his franchise in Wisconsin. We decline to impose the obligations of the WFDL on parties to an agreement not covered by the WFDL.

182 Wis. 2d 274, 514 N.W.2d 34, 43 (Wis. Ct. App. 1994) ("[Defendant] could not have breached the implied covenant of good faith by terminating his contract because the contract contemplated that he could do so at any time, as long as he gave sixty days' notice, which he did."); Super Valu Stores, Inc. v. D- Mart Food Stores, Inc., 146 Wis. 2d 568, 431 N.W.2d 721, 726 (Wis. Ct. App. 1988); see also Smith v. Rainsoft Water Conditioning Co., 848 F. Supp. 1413, 1417 (E.D. Wis. 1994).

Having decided that, as a matter of law, the sales franchise agreement was terminable at will, the district court should not have allowed the jury to decide whether Trane breached the implied covenants in terminating the sales franchise agreement as written, without cause. [3] We find the submission of that claim to be in error, and we vacate the jury's verdict on that claim.

[17]** Nevertheless, Haynes argues that the district court's decision to submit the implied covenants claim to the jury was not erroneous, because the sales franchise agreement was modified to include a good cause requirement for termination. We first note that there was no written modification of the sales franchise agreement. However, evidence was admitted at trial from which a jury might have found that the sales franchise agreement was otherwise modified to include a good cause requirement. Haynes testified that Trane officials, at franchisee meetings, communicated Trane's policy of only terminating franchise agreements for cause. Trane official Don O'Keefe testified that he interpreted franchise agreements to require cause for termination, and that he had never terminated a franchise agreement without cause. Trane official James Schultz testified that he was not aware of any time when a franchise agreement was terminated except for cause.

Although it was requested to do so, the district court did not submit to the jury the question of whether the contract had been modified. ***HN8***[] Whether a contract has been modified is a question of fact. Akrosil Div. of Int'l Paper Co. v. Ritrama Duramark, Inc., 847 F. Supp. 623, 628 (E.D. Wis. 1994). **[**18]** Moreover, the Wisconsin Supreme Court has held, "It is universally accepted that, unless a contract is one required by law to be in writing, the contract can be modified orally although it provides that it can be modified only in writing." S&M Rotogravure Serv., Inc. v. Baer, 77 Wis. 2d 454, 252 N.W.2d 913, 920 (Wis. 1977).

[*794] In response, Trane argues on appeal that any modification of Haynes's sales franchise agreement had to be in writing, because any oral modification of the contract to include a good cause requirement would violate the statute of frauds. We cannot locate in the record where Trane preserved this argument for appeal. ***HN9***[] Violation of the statute of frauds is an affirmative defense that must be raised in the trial court or be deemed waived. Fed. R. Civ. P. 8(c); Radio Corp. of Am. v. Radio Station KYFM, Inc., 424 F.2d 14, 17 (10th Cir. 1970). We conclude that Trane waived any statute of frauds defense as to modification of the sales franchise agreement.

Trane further argues on appeal that the parol evidence rule bars any attempt by Haynes to import a good cause requirement into the agreement. Trane's argument is misplaced. ***HN10***[] The parol evidence **[**19]** rule only bars evidence of prior or contemporaneous promises that contradict the written terms of an integrated contract. Fed. Deposit Ins. Corp. v. First Mortgage Investors, 76 Wis. 2d 151, 250 N.W.2d 362, 367 (Wis. 1977) (citations omitted). The district court properly admitted evidence to support modification which was not evidence of prior or contemporaneous promises.

We conclude that the district court committed reversible error when it refused to submit to the jury the question of whether the sales franchise agreement was modified to include a good cause requirement. We further conclude that the jury should have been requested to make factual determinations which would control the application of an equitable estoppel theory. Special questions or interrogatories should have been submitted and answered. [4] ***HN11***[

[3] Haynes alleged that Trane breached the implied covenants in both performance of the contract and termination of the contract. After reviewing the jury instructions, we conclude that the district court instructed the jury to find whether Trane breached the implied covenants only with regard to termination of the contract. We also note that Haynes's expert witness only testified about damages resulting from termination of the contract.

] Under the doctrine of equitable estoppel, Trane could be estopped from denying that the sales franchise agreement had been modified to require good cause for termination if Trane engaged in action or inaction which induced detrimental reliance by Haynes. See *Gabriel v. Gabriel, 57 Wis. 2d 424, 204 N.W.2d 494, 497 (Wis. 1973)*. Haynes testified **[**20]** that Trane officials stated in franchisee meetings that Trane's policy was to only terminate franchise holders for cause. Such evidence is sufficient to create an issue of fact for the jury as to whether Trane should be equitably estopped from denying that the agreement had been modified to require good cause for termination.

II. TERMINATION OF HTSA'S DISTRIBUTORSHIP AGREEMENT

A. HTSA's Claim for Breach of Contract.

The jury found that Trane breached the distributorship agreement with HTSA and awarded HTSA $ 9.9 million in damages. The claim should not have been submitted to the jury because HTSA failed to offer any relevant proof of damages. We vacate the jury's damages award as we explain more fully below.

The parties stipulate that Texas law applies to HTSA's **[**21]** breach of contract claim. HTSA alleged that Trane's termination without notice was a breach of the express terms of the distributorship agreement, and the jury found that Trane breached the agreement. Trane asserted an affirmative defense of fraud to HTSA's claim of breach. The affirmative defense was necessarily rejected by the jury when it found for HTSA on the breach issue. But the jury also found that HTSA defrauded Trane by filing false claimback forms, and **[*795]** returned a verdict for Trane on its counterclaim for fraud.

The trial court gave the following jury instruction regarding HTSA's breach of contract claim and Trane's affirmative defense of fraud to that claim:

> For [HTSA] to recover from Trane on its claim of breach of the distributor agreement, you must find that, one, Trane failed to terminate the contract in accordance with its terms and, two, [HTSA] has suffered resulting damages.
>
> If you find that [HTSA] has proven both of these elements by a preponderance of the evidence, then you must find for [HTSA], unless you also find that Trane has proven its affirmative defense to this claim by a preponderance of the evidence. Trane's affirmative defense to this claim **[**22]** is that [HTSA's] conduct was fraudulent.
> If you find that Trane's affirmative defense has been proven by a preponderance of the evidence, then your verdict on this claim must be in favor of Trane. On the other hand, if you find that Trane failed to terminate the contract in accordance with its terms, and that Trane has not proven its affirmative defense by a preponderance of the evidence, then you must find in favor of [HTSA].
> . . . .
>
> For Trane to prove its affirmative defense of fraud *and recover from [HTSA] on its counterclaim for fraud* by following a pattern or practice of falsifying documents submitted in support of claims for payment under the claimback program . . ., you must find that Trane has proven all of the following by a preponderance of the evidence . . . .

(App. 3969, 3641) (emphasis added).

By giving this instruction, the district court in effect instructed the jury that Trane must prove the same elements to win on its affirmative defense of fraud as it must prove to win on its counterclaim of fraud. Despite this instruction,

---

[4] Haynes submitted a requested jury instruction on equitable estoppel (Haynes Supp. App. 639) and also argued that his equitable estoppel claim should be submitted to the jury in opposition to Trane's *Rule 50(a)* motion (App. 3458-59).

the jury found *against* Trane on its affirmative defense and *for* Trane on its counterclaim. Such findings are **[**23]** incompatible under the instruction given.

HTSA argues that the verdicts were not inconsistent, because fraud is not an affirmative defense to a breach of contract claim. HTSA also argues that once the district court granted HTSA's *Rule 50* motion with respect to Trane's fraud counterclaim, there was no fraud verdict to be inconsistent with HTSA's breach of contract verdict.

We agree that the district court erred when it permitted Trane's fraud claim to be considered as an affirmative defense to HTSA's breach of contract claim. ***HN12***[] Fraud is a claim that sounds in tort; and fraud independent of a contract is not a proper affirmative defense to a claim that a contract was breached. See *Kaiser Trading Co. v. Associated Metals & Minerals Corp., 321 F. Supp. 923, 928 (N.D. Cal. 1970)* ("No case could be found, and no commentator has suggested, that a tort committed by one party to a contract against the other, independent of the contract itself, is a defense to a breach of contract action by the tortfeasor.").

HN13[] Fraud that is a prior material breach of a contract may be a viable affirmative defense to a breach of contract claim. *Hampton v. Minton, 785 S.W.2d 854, 857-58 (Tex. App. 1990)*. **[**24]** But in this case the district court had already ruled that HTSA's alleged fraud was not a prior breach of the distributorship agreement. Trane failed to appeal that ruling, thus rendering it the law of the case.

The district court should not have instructed the jury that fraud was an affirmative **[*796]** defense to HTSA's breach of contract claim. But, whether or not the instruction was valid, the jury obviously was confused by it and reached inconsistent and incompatible verdicts. The district court should have ordered a new trial. ***HN14***[] A court cannot let a verdict stand where juror confusion is evident, and we must reverse the judgment with respect to those verdicts. *Jarvis v. Commercial Union Assur. Cos., 823 F.2d 392, 395-96 (10th Cir. 1987)* (citations omitted); *Global Van Lines, Inc. v. Nebeker, 541 F.2d 865, 868 (10th Cir. 1976)* (citations omitted).

Our decision does not entitle HTSA to retry its claim for breach of the distributorship agreement. The district court should have dismissed HTSA's claim when Trane moved for judgment as a matter of law at the close of HTSA's evidence. (App. 2645-46). Judgment as a matter of law was appropriate under *Fed. R. Civ. P. 50(a)*, **[**25]** because HTSA failed to provide evidence of damages resulting from Trane's breach of the distributorship agreement.

HTSA claimed that Trane's termination without notice breached the agreement. The agreement provided that it could be terminated "(a) by either party, with or without cause, upon 90 days written notice; . . . ." or for other reasons not at issue here. (App. 4680-69). Under the plain language of the agreement, termination itself could not have been the breach. Trane was expressly entitled to terminate the agreement, with or without cause. Modification of the HTSA distributorship agreement was not an issue identified in the district court, nor was there any evidence offered at trial which suggested any modification. The only breach that the jury could reasonably have found was Trane's failure to give 90 days notice before terminating the agreement.

HTSA presented no evidence to support a finding of damages resulting from Trane's failure to give proper 90-day notice of termination. HTSA's damages evidence centered on damages resulting from the fact of termination. HTSA's damages expert, Jon Karraker, repeatedly stated that his calculations were based on damages **[**26]** stemming from termination of the contract. Trane argues, and we agree, that there was no evidence from which the jury could assess damages as a result of Trane's failure to give proper notice, which was the only identifiable breach of the distributorship contract.

HTSA argues on appeal that Trane did not argue the "causation issue" in its *Rule 50(a)* motion and thus did not properly preserve the issue for review. The phrase "causation issue" is inapt, but we assume that HTSA uses it to refer to the question of whether it offered evidence from which a reasonable jury could assess damages for Trane's failure to give 90 days notice of termination. The record reveals that Trane made several references to HTSA's failure to prove damages, specifically arguing that any damages caused by Trane's failure to give proper notice should be limited to those accruing within 90 days of the notice, and that HTSA did not offer such evidence. (App. 286; App. 340-43; App. 2645-50).

Even if Trane's objections were not clear from the record, ***HN15***[] this court would exercise its discretion to review the submission of HTSA's damages claim to the jury for plain error. See *Okland Oil Co. v. Conoco Inc., 144 F.3d 1308, 1314 n.4 (10th Cir. 1998)*. **[**27]** Under the plain error standard, we would reach the same conclusion. Because HTSA failed to present evidence of any damages incurred as a result of Trane's failure to give 90 days notice, the district court should have granted Trane's *Rule 50(a)* motion. We vacate the jury's verdict awarding damages to HTSA **[*797]** for breach of the distributorship agreement.

B. HTSA's Claim for Breach of Implied Duty Under the UCC.

The parties agree that Texas law applies to HTSA's claim for breach of the implied duty of good faith and fair dealing. During a pretrial conference, the district court dismissed that claim. HTSA argues that the dismissal was improper, because Texas law recognizes the implied duty of good faith and fair dealing in contracts for the sale of goods under the Uniform Commercial Code ("UCC").

Trane denies that the UCC applies to the distributorship agreement. However, the Texas Court of Appeals recently held, in accordance with the majority rule, that ***HN16***[] a distributorship agreement could be subject to the UCC. *Cont'l Casing Corp. v. Siderca Corp., 38 S.W.3d 782, 787-88 (Tex. App. 2001)*.

Nevertheless we agree that HTSA is not entitled to present evidence that **[**28]** Trane's termination of the distributorship agreement breached the implied duty under the UCC. ***HN17***[] Under Texas law, an implied covenant cannot contradict the express terms of a contract. *Exxon Corp. v. Atl. Richfield, 678 S.W.2d 944, 947 (Tex. 1984)*. By the express terms of its agreement, Trane had a right to terminate without cause on 90 days notice. HTSA already has failed to present evidence of any damages stemming from Trane's failure to give 90 days notice before terminating the agreement, and it is not entitled to another bite at that apple.

However, the terms of the distributorship agreement do not preclude HTSA from trying its claim for breach of the implied duty based on Trane's actions prior to termination. HTSA claimed in its First Amended Complaint and in the Pretrial Order that Trane's pretermination conduct constituted a breach of the implied duty. (App. 54; App. 105). Specifically, HTSA claimed that Trane:

> repeatedly withdrew products that Plaintiffs could sell or customers to whom Plaintiffs could sell such products; forced manufacturers of non-Trane equipment to pay Trane what amounted to a royalty on sales by Trane's franchises, including Plaintiffs, **[**29]** of such manufacturers' equipment without informing Plaintiffs; imposed price minimums and maximums and other pricing policies; and imposed numerous restrictions on how Plaintiffs could conduct their business -- including restrictions on the purchase and sale of "Commercial After-Market Products" and of non-Trane products.

(App. 105). If HTSA has evidence that those pretermination actions violated the implied duty of good faith and fair dealing, HTSA is entitled to present that evidence at trial.

We reverse the district court and remand for a trial on HTSA's claim with respect to Trane's pretermination actions. If, on remand, the jury determines that the sale of goods was the dominant factor in HTSA's distributorship agreement, thus making it subject to the Texas UCC, then the jury should also determine whether Trane breached the implied duty of good faith and fair dealing required under the UCC for such agreements.

III. TRANE'S COUNTERCLAIMS

A. The Counterclaim for Fraud.

The jury found for Trane on its fraud counterclaim against HTSA, but it was not asked to assess damages. The district court announced that it would assess damages after trial. However, before **[**30]** **[*798]** doing so, the district court overturned the jury's verdict. On January 12, 2000, the district court ruled, *sua sponte*, that "under the standards of *Rule 50*, the evidence does not support the counterclaim of fraud and, therefore, I'm dismissing it." (App. 3690). [5]

As previously explained, Trane's counterclaim for fraud must be retried. The jury returned inconsistent verdicts, demonstrating that it was confused. HTSA argues that the district court properly remedied this confusion by dismissing Trane's fraud counterclaim. We disagree. We have already discussed why no action short of retrying the case would remedy the inconsistent verdicts. Moreover, we find that there was sufficient evidence to support Trane's fraud counterclaim and the district court should not have dismissed it.

The parties agree that Colorado law **[**31]** applies to Trane's fraud claim. HTSA asserts that the district court was authorized to overturn the verdict because Trane was required to provide direct evidence of false transactions and failed to do so. However, ***HN18***[] direct evidence of fraudulent transactions is not required under Colorado law. *Kopeikin v. Merchs. Mortgage & Trust Co., 679 P.2d 599, 602 (Colo. 1984)* (*en banc*) (citations omitted) ("We have held repeatedly that fraud may be inferred from circumstantial evidence."). The cases from other jurisdictions cited by HTSA for the proposition that fraud must be proved by direct evidence are inapplicable. Under Colorado law, Trane needed only to produce circumstantial evidence from which the jury could infer fraud in order for the jury to find that HTSA was liable on Trane's counterclaim.

HTSA also argues that the district court erred when it instructed the jury that it only needed to find a pattern of fraudulent conduct in order to decide in favor of Trane on its fraud counterclaim. (App. 3641-42). [6] We reject this argument. The pattern and practice defined by the district court in its instruction clearly set forth for the jury the elements of fraud, and required **[**32]** the jury to find that each of them had been proved. The evidence that Trane presented at trial was sufficient for the jury to find a pattern of fraud by HTSA in submitting its claimback forms. Denice Louder, billing administrator for HTSA's distributor products group, testified by deposition that most of the claimback forms she submitted contained intentionally false information. She also testified extensively about the creation of false documentation intended to conceal the fraudulent claims. If **[*799]** believed, the evidence showed that the submission of false claimback forms and the subsequent concealment of their falsity was routine. Furthermore, the testimony regarding HTSA's pattern of fraud was supplemented by specific examples of claimback submissions that were fraudulent. HTSA asserts that Trane should not have been permitted to adduce evidence of specific fraudulent claimback submissions, because Trane was limited to presenting evidence on 336 claimback transactions which were the subject of a statistical analysis conducted by Trane's expert, Jo Marie Dancik. None of the specific examples of fraud offered by Trane at trial were within the statistical sampling transactions.

[33]** ***HN19***[] Admission of evidence is within the sound discretion of the trial court. *Seymore v. Shawver & Sons, Inc., 111 F.3d 794, 800 (10th Cir. 1997)* (citation omitted). We do not find that Trane was limited to presenting

---

[5] Because we find that the fraud counterclaim must be retried, we need not decide Trane's assertion that the court had no authority to vacate the verdict without a post-verdict motion by HTSA.

[6] The instruction, in pertinent part read:

> For Trane to . . . recover from [HTSA] on its counterclaim for fraud by following a pattern or practice of falsifying documents submitted in support of claims for payment under the claimback program . . ., you must find that Trane has proven all of the following by a preponderance of the evidence:
>
> 1. [HTSA] regularly made false representations of past or present fact.
>
> 2. The fact was material.
>
> 3. [HTSA] made the representations knowing them to be false, or [HTSA] was aware that [HTSA] did not know whether it was true or false.
>
> 4. [HTSA] made the representations with the intent that Trane act in reliance on the representations.
>
> 5. Trane relied on the representations.
>
> 6. Trane's reliance was justified; and
>
> 7. This reliance caused damage to Trane by causing it to make payments to which HTSA was not entitled.

evidence on the statistical sampling transactions. Only Dancik was limited in her testimony to discussing the transactions that she sampled. We are not persuaded that other witnesses should have been prohibited from discussing claimback transactions which were outside the statistical samples.

HTSA further argues that the district court committed reversible error when it erroneously overruled HTSA's objections, asserted under *Fed. R. Evid. 404(b)*, to introduction of the specific examples of fraudulent transactions. HTSA asserts that the specific examples of fraud were evidence of other bad acts which, under *Rule 404(b)*, could not be used to show that HTSA made false statements in the 336 claimback transactions which were the subject of the statistical sampling conducted by Dancik. HTSA's argument is inapplicable here, where the "general statements of wrongdoing" were offered, not as evidence of other bad acts, but as primary evidence of an ongoing fraudulent **[**34]** pattern or practice.

We conclude that the district court did not err when it admitted specific evidence of HTSA's allegedly fraudulent acts in order to show a pattern or practice of fraud. Furthermore, the district court did not err when it overruled HTSA's objections made under *Rule 404(b)*. [7] We find no error in the instructions that were given on the fraud counterclaim (with the exception of treating fraud as an affirmative defense to HTSA's breach of contract claim, as previously discussed), and we conclude that the verdict of the jury was supported by the record. The district court's post-trial dismissal was an impermissible re-weighing of the evidence. *Lucas v. Dover Corp., 857 F.2d 1397, 1400 (10th Cir. 1988)*.

[35]** The jury was entitled to find, under the instructions they were given, that Trane proved its fraud counterclaim. Nevertheless, we remand for retrial of the counterclaim because the verdict, under the instructions given, was inconsistent with HTSA's breach of contract verdict.

B. The Counterclaims for Unjust Enrichment and an Accounting.

After trial, the district court dismissed Trane's counterclaims for unjust **[*800]** enrichment and an accounting, holding that Trane had waived them by pursuing its fraud counterclaim. Trane argues on appeal that it was not required to make an election, but that it was entitled under *Fed. R. Civ. P. 8* to plead in the alternative. HTSA makes no response to that argument, but claims that Trane did not prove its unjust enrichment claim; or, in the alternative, that unjust enrichment is a legal claim, so that the only error the district court could have committed was its refusal to submit the claim to a jury. HTSA also argues that Trane was not entitled to the equitable remedy of an accounting because it had an adequate legal remedy. We reject HTSA's arguments as unresponsive to the issue on appeal, and we reverse the dismissal of the claims and remand **[**36]** them for consideration on the merits.

The parties use both Texas and Colorado law to support their positions. It is irrelevant which state's law applies, since the law is the same in both states.

We can find no support for the district court's conclusion that the two counterclaims were waived when Trane proceeded with its fraud counterclaim. Trane correctly points out that ***HN21***[] *Fed. R. Civ. P. 8* permits a party to "state as many separate claims or defenses as the party has regardless of consistency and whether based on legal, equitable, or maritime grounds." Furthermore, ***HN22***[] both Texas and Colorado courts have allowed plaintiffs to pursue claims for both fraud and unjust enrichment. See *Ludlow v. DeBerry, 959 S.W.2d 265, 275, 279 (Tex. App. 1998)*; *Bock v. Am. Growth Fund Sponsors, Inc., 904 P.2d 1381, 1384*, *24 Colo. Law. 2403, 19 Brief Times Rptr.*

---

[7] HTSA also argues that the district court committed reversible error when it admitted evidence of fraudulent acts under *Fed. R. Evid. 406*. However, HTSA has not indicated where in the record it preserved this objection for appeal. In any event, the question is moot, because we have determined that the evidence was properly admitted under *Fed. R. Evid. 402*. ***HN20***[] "If evidence is admissible under any of the Federal Rules of Evidence, this court may affirm the admission." *United States v. Robinson, 978 F.2d 1554, 1562 (10th Cir. 1992)*.

1299, 1387 (Colo. Ct. App. 1995). We hold that the district court erred in finding that Trane waived its counterclaims for unjust enrichment and an accounting. [8]

[37]** ***HN23***[] Both Colorado and Texas courts have recognized that claims for unjust enrichment are equitable. *Salzman v. Bachrach, 996 P.2d 1263, 1265*, 29 Colo. Law. No. 5 230 (Colo. 2000) (en banc); *Bransom v. Standard Hardware, Inc., 874 S.W.2d 919, 927 (Tex. App. 1994)*. On remand, the district court should make findings as to whether or not Trane has an adequate remedy at law with respect to its counterclaim for unjust enrichment before determining whether the claim may be tried to the court.

The same determination should be made with respect to Trane's counterclaim for an accounting. ***HN24***[] An equitable claim for an accounting is not cognizable where an adequate remedy exists at law. *Dairy Queen, Inc. v. Wood, 369 U.S. 469, 478, 8 L. Ed. 2d 44, 82 S. Ct. 894 (1962)* (citations omitted). However, an accounting may yet be appropriate where "the accounts between the parties are of such a complicated nature that only a court of equity can satisfactorily unravel them." Id. (citation and internal quotation marks omitted). Here, Trane claims nearly 3,000 claimback submissions are at issue. The district court declined to submit the issue of damages to the jury in the first instance, **[**38]** because of the complexity of the fraud counterclaim. We conclude that this case is one where the accounts are so complicated that an equitable accounting may be warranted.

IV. PLAINTIFFS' CLAIMS FOR BREACH OF FIDUCIARY DUTY

At a pretrial conference, without explanation, the district court dismissed Haynes's and HTSA's claims for breach of fiduciary duty. Trane previously had **[*801]** moved for summary judgment on those claims, and Trane's motion was ripe for consideration at the pretrial conference. Because the district court had affidavits and other evidence before it on these claims, we assume that it considered such evidence. We therefore review the dismissal of Haynes's and HTSA's claims for breach of fiduciary duty as a grant of summary judgment pursuant to Trane's motion, and we determine that the decision was in error as to both Plaintiffs.

The parties agree that the claims for breach of fiduciary duty are governed by Colorado law. ***HN25***[] Colorado courts recognize a cause of action for breach of fiduciary duty, but they do not appear to have specifically addressed whether such a cause of action is available in the context of a franchise relationship or a distributorship relationship. **[**39]** The only Colorado case we have found or been provided addressing the existence of a fiduciary duty in a franchise relationship is *Mr. Steak, Inc. v. Belleview Steak, Inc., 38 Colo. App. 278, 555 P.2d 179 (Colo. Ct. App. 1976)*. But that case provides no guidance on whether Colorado courts would recognize such a duty.

Some courts have found no inherent fiduciary duty in a franchise or distributorship relationship. See *Marcella & Co., Inc. v. Avon Prods., Inc., 282 A.D.2d 718, 724 N.Y.S.2d 192* (N.Y. App. Div.), leave to appeal denied, *759 N.E.2d 372 (N.Y. 2001)*; *Crim Truck & Tractor Co. v. Navistar Int'l Transp. Corp., 823 S.W.2d 591, 594-96 (Tex. 1992)*; *Power Motive Corp. v. Mannesmann Demag Corp., 617 F. Supp. 1048, 1051 (D. Colo 1985)* (applying Ohio law). Other courts have held that a fiduciary duty may arise in a franchise relationship, depending on the relationship between the parties. See *Gen. Bus. Machs. v. Nat'l Semiconductor Datachecker/DTS, 664 F. Supp. 1422, 1425 (D. Utah 1987)*; *Carter Equip. Co. v. John Deere Indus. Equip. Co., 681 F.2d 386, 390-91 (5th Cir. 1982)*. **[**40]**

In the absence of direction from Colorado courts that fiduciary duties never can arise in franchise relationships, we will apply ***HN26***[] the test that Colorado courts generally apply when determining whether there has been a breach of fiduciary duty. Fiduciary duties may arise when parties are engaged in a fiduciary, or confidential, relationship. *Moses v. Diocese of Colo., 863 P.2d 310, 321 (Colo. 1993)* (en banc). "'A fiduciary relation exists between two persons when one of them is under a duty to act for or to give advice for the benefit of another upon

[8] HTSA's assertion that Trane failed to offer adequate proof of its waived counterclaims is without merit, since the substance of those claims was never before the court or the jury.

matters within the scope of the relation.'" Id. (quoting Restatement (Second) of Torts § 874 cmt. a (1979)). Such a duty may arise when one party is in a superior position relative to the other party. Id. (citations omitted); First Nat'l Bank of Meeker v. Theos, 794 P.2d 1055, 1060-61 (Colo. Ct. App. 1990). But "an unequal relationship does not automatically create a fiduciary duty. In order to be liable, the superior party must assume a duty to act in the dependent party's best interest." Moses, 863 P.2d at 322 (citations omitted). "A fiduciary relationship can arise out of a **[**41]** relationship of blood, business, friendship, or association." Id.; see also First Nat'l Bank of Meeker, 794 P.2d at 1061 (setting forth test).

Haynes testified in an affidavit concerning his long relationship with Trane, the assurances of Trane, and the trust engendered by those assurances. (Haynes Supp. App. 121-22). This evidence is sufficient to create a genuine issue of material fact as to whether Haynes and Trane were involved in a fiduciary or confidential relationship and, if so, whether Trane breached that duty. Accordingly, we reverse and remand for trial on this issue.

[*802] V. PLAINTIFFS' ANTITRUST CLAIMS

The district court granted summary judgment for Trane on antitrust claims made by both Haynes and HTSA. These claims stem from Trane's pricing policies. Plaintiffs claimed that Trane's policies regarding the mixed sales of Trane and non-Trane products constituted vertical price fixing, in violation of the Sherman Act, 15 U.S.C. § 1. Plaintiffs sought treble damages under the Clayton Act, 15 U.S.C. § 15.

Trane's Manual on Policies and Procedures No. 34 regulated the division of profits when Haynes or **[**42]** HTSA made a "mixed sale" comprised of both a Trane product and a non-Trane product. Such sales were permitted when necessary to meet a customer's requirements. Essentially, the manual prevented Plaintiffs from allocating all of the profit from such a sale to the non-Trane product. The manual specified that Haynes or HTSA could keep the first thirty percent of any mark-up over cost on a non-Trane product involved in a mixed sale. After the first thirty percent, Plaintiffs were required to split the mark-up evenly with Trane. In addition, the mark-up of the non-Trane products had to be directly proportional to the mark-up of the Trane products, based on the lowest price at which Trane would sell its products. Haynes and HTSA contend that the provisions of the manual violate federal ***antitrust law***, because they effectively mandate minimum prices for Trane products and maximum prices for non-Trane products.

HN27[] To survive summary judgment, a plaintiff must demonstrate an "antitrust injury," which is an "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendant's acts unlawful. The injury should reflect the anticompetitive effect either of **[**43]** the violation or of anticompetitive acts made possible by the violation." Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977). The purpose of this requirement is to ensure that "courts connect the alleged injury to the purposes of the antitrust laws. Compensation for that injury must be consistent with the purposes of ***antitrust law*** generally and with the rationale for condemning the particular defendant." 2 Phillip E. Areeda & Herbert Hovenkamp, ***Antitrust Law***, P 362a (Revised ed. 1995). "The point is to prevent an award of damages for losses stemming from continued or increased competition rather than diminished competition -- a result that otherwise would be 'inimical' to the antitrust laws." Coors Brewing Co. v. Miller Brewing Co., 889 F. Supp. 1394, 1400 (D. Colo 1995) (citations and internal quotation marks omitted).

The district court held that Haynes and HTSA failed to show antitrust injury because they did not present evidence of an injury to competition or the relevant market. In so holding, the district court stated that "'the injury of the type the antitrust laws were intended to prevent' **[**44]** is an injury to competition or an injury to the relevant market." (App. 96-7). The court then explained Plaintiffs' lack of evidence regarding injury to competition.

Plaintiffs argue on appeal that they are not required to show an anticompetitive effect, because anticompetitive effect is an element of antitrust liability, rather than an antitrust injury. Plaintiffs disagree with the district court's definition of the "injury of the type the antitrust laws are intended to prevent." They claim that the relevant injury is not injury to competition, but rather the "crippling [of] the freedom of traders . . . thereby restraining their ability to sell in accordance with their own judgment." Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, 340 U.S. 211, 213, *95 L. Ed. 219, 71* ***[*803]*** *S. Ct. 259 (1951)*, overruled on other grounds by *Copperweld Corp. v. Independence Tube Corp., 467 U.S. 752, 81 L. Ed. 2d 628, 104 S. Ct. 2731 (1984)*.

Haynes and HTSA argue that, because the policies manual interfered with their ability to sell in accordance with their own judgment, they suffered antitrust injury. We disagree. Their definition is too broad. It could be used to find **[**45]** antitrust injury in a situation where pricing regulation resulted in increased competition. In such a case, the alleged injury certainly would not "reflect the anticompetitive effect" of the regulation. *Brunswick Corp., 429 U.S. at 489*.

Plaintiffs had to show that their alleged injuries reflect the anticompetitive effect of the alleged violation. Implicit in that requirement is the condition that they must first show an actual anticompetitive effect. Plaintiffs offered no evidence that showed an anticompetitive effect, and therefore, showed no antitrust injury.

The result is consistent with the way in which we have analyzed antitrust injury in the past. In *Full Draw Productions v. Easton Sports, Inc., 182 F.3d 745, 754-55 (10th Cir. 1999)*, we held that the plaintiff adequately alleged antitrust injury after finding that the defendants' actions resulted in a reduction of competition from two competitors in the market to one monopolist. Here, Haynes and HTSA made no attempt to show that the policies manual resulted in reduced competition. Rather, they merely offered evidence to suggest that the policies of the manual resulted in a reduction of their **[**46]** profits. We note, as did the district court, that the manual only affected the allocation of internal profits; customers saw no increase or decrease in prices because of its implementation. Moreover, there is no indication that Plaintiffs were foreclosed from competing in the market as a result of the policies. Cf. *Pace Elec., Inc. v. Canon Computer Sys., Inc., 213 F.3d 118, 145 (3d Cir. 2000)* ***HN28***[] ("[A] dealer terminated for its refusal to abide by a vertical minimum price fixing agreement suffers antitrust injury."). We affirm the district court's grant of summary judgment to Trane on Plaintiffs' antitrust claims.

CONCLUSION

For the reasons stated above, we AFFIRM in part, VACATE in part, REVERSE in part, and REMAND.

Specifically, we affirm the district court's dismissal of Haynes's claim for breach of the sales franchise agreement as it was written, we reverse and vacate the jury's verdict for Haynes on his claim for breach of implied covenants under the agreement as written, and we remand for further proceedings consistent with this opinion on the issues of modification of the agreement and equitable estoppel.

We reverse the jury's verdict for HTSA as **[**47]** to damages for breach of the express terms of the distributorship agreement with respect to termination. We remand for trial on HTSA's claim for breach of the implied duty with respect to Trane's pretermination actions.

We reverse the district court's decision to overturn the jury's verdict for Trane on its fraud counterclaim and remand for a new trial on the counterclaim. We reverse the district court's dismissal of Trane's counterclaims for unjust enrichment and an accounting, and we remand for consideration of those counterclaims, consistent with this opinion.

We reverse the grant of summary judgment on Haynes's and HTSA's claims for breach of fiduciary duty and remand for trial. We affirm the district court's grant of summary judgment on Haynes's and **[*804]** HTSA's antitrust claims. Haynes's and HTSA's requests for prejudgment interest have been rendered moot by this opinion.

Securities Law > Civil Liability Considerations > Securities Litigation Reform & Standards > General Overview

HN3[] **Prerequisites for Class Action, Numerosity**

Fed. R. Civ. P. 23 imposes four requirements on parties seeking to sue in behalf of a class: numerosity, commonality, typicality, and adequacy of representation. *Fed. R. Civ. P. 23(a)*. Typicality and adequacy are directly relevant to the selection of a lead plaintiff in a securities fraud class action. Thus, the "most adequate plaintiff" must (1) have claims or defenses that are typical of the claims or defenses of the class, and (2) fairly and adequately protect the interests of the class. *Fed. R. Civ. P. 23(a)*. The Private Securities Litigation Reform Act (PSLRA), *15 U.S.C.S. § 78u-4*, raises the standard adequacy threshold by requiring that securities class actions be managed by active, able class representatives who are informed and can demonstrate that they are directing the litigation. The "lead plaintiff" provisions of the PSLRA direct courts to appoint, as lead plaintiff, the most sophisticated investor available and willing so to serve in a putative securities class action.

Securities Law > Civil Liability Considerations > Securities Litigation Reform & Standards > Lead Plaintiff

HN6[] **Counsel, Right to Counsel**

With regard to appointment of lead plaintiff in a securities fraud class action suit, once a plaintiff or group of plaintiffs is selected as the "most adequate plaintiff," the most adequate plaintiff shall, subject to the approval of the court, select and retain counsel to represent the class. *15 U.S.C.S. § 78u-4(a)(3)(B)(v)*. The right to select and retain counsel is not absolute. The district court has the power and the duty to supervise lead counsel selection.

Civil Procedure > ... > Class Actions > Class Attorneys > Appointments

Securities Law > Civil Liability Considerations > Securities Litigation Reform & Standards > General Overview

Civil Procedure > ... > Class Actions > Class Attorneys > General Overview

HN7[] Class Attorneys, Appointments

Although appointment of multiple law firms as lead counsel in certain circumstances may be beneficial to the litigation of a class action, appointment of co-counsel more commonly will create needless complications, administratively and otherwise, substantial multiplicity of effort, and materially increased litigation costs and expenses. Thus, district courts have declined to appoint co-lead counsel in securities fraud class actions absent a showing that co-counsel will better protect the interests of the plaintiff class.

Opinion

MEMORANDUM AND ORDER

Pending are the Motion of the Boca Raton Police & Firefighters Retirement System and the Louisiana Retirement Funds for the Appointment as Lead Plaintiff and Approval of Their Selection of Co-Lead and Liaison Counsel (Document No. 12), [1] and Defendants' Motion to Consolidate Related Cases (Document No. 22). No opposition *has* been filed in response to these motions, and in accordance with Local Rule 7.4, the motions are deemed unopposed.

I. Consolidation

Defendants move to consolidate Civil Cause No. H-02-1837, *Pfau* **[*6]** *v. Reliant Energy*, Inc., Civil Cause No. H-02-1920, *Glenn v. Reliant Resources, Inc.*, Civil Cause No. H-02-2264, *Ferguson v. Reliant Energy, Inc.*, and Civil Cause No. H-02-2292, *Schroen v. Reliant Energy, Inc.*, into this consolidated action, Civil Cause No. H-02-1810, *In re Reliant Securities Litigation.* By Order entered August 1, 2002, numerous cases involving common questions of law and fact to those raised by Plaintiffs Pfau, Glenn, Page, Ferguson, and Schroen were consolidated into this action. The aforementioned Plaintiffs have filed no opposition to consolidation of their claims. Accordingly, Defendants' motion will be granted.

II. Lead Plaintiff

Boca Raton Police & Firefighters Retirement System and the Louisiana Retirement Funds, which consists of the Louisiana School Employees' Retirement System (LSERS) and the Louisiana Municipal Police Employees' Retirement System (MPERS), (collectively, the "Retirement Systems") seek to serve as lead plaintiff in this securities fraud class action. As a preliminary matter, ***HN1***[] to serve as a representative party in a securities fraud class action, a plaintiff must file a sworn certification stating certain matters specified **[*7]** by statute. *See 15 U.S.C. § 78u-4(a) (2) (A)*. Each of the Retirement Systems has filed a certification in compliance with this statute.

An Order of Consolidation in Civil Action No. H-02-1810 was entered August 1, 2002, and the additional four above-captioned cases are consolidated under the same cause number by this Order. "As soon as practicable" after ruling on pending motions to consolidate, "the court shall appoint the most adequate plaintiff as lead plaintiff for the consolidated actions." Id. at *§ 78u-4(a)(3)(B)(ii)*. ***HN2***[] The "most adequate plaintiff" is the "member or members of the purported plaintiff class that the court determines to be most capable of adequately representing the interests of class members." Id. at *§ 78u-4(a)(3)(B)(i)*. *Section 78u-4* creates a rebuttable presumption that the most adequate plaintiff is the person or group of persons that (1) filed the complaint or made a motion to serve as lead plaintiff; (2) in the court's determination, has the largest financial interest in the relief sought by the class, and (3) otherwise meets the requirements of *Fed. R. Civ. P. 23*. Id. at *§* ***[*8]*** *78u-4(a)(3)(B)(iii)(I)*.

HN3[] *Rule 23* imposes four requirements on parties seeking to sue in behalf of a class: numerosity, commonality, typicality, and adequacy of representation. *See fed. R. CIV. P. 23(a)*. Typicality and adequacy are directly relevant to the selection of a lead plaintiff in a securities fraud class action. *See In re Enron Corp. Sec. Litig., 206 F.R.D. 427, 441 (S.D. Tex. 2002)*. Thus, the "most adequate plaintiff" must (1) have claims or defenses that are typical of the claims or defenses of the class, and (2) fairly and adequately protect the interests of the class. *See FED. R. CIV. P. 23(a)*. "The PSLRA raises the standard adequacy threshold" by requiring that "securities class actions be managed by active, able class representatives who are informed and can demonstrate that they are directing the litigation." *Berger v. Compaq Computer Corp., 257 F.3d 475, 483 (5th Cir. 2001)* (quotation omitted). The "lead plaintiff" provisions of the PSLRA "direct courts to appoint, as lead plaintiff, the most sophisticated

---

[1] Various other potential class members also filed motions for appointment as lead plaintiff and for approval of lead counsel. These motions have been withdrawn. *See* Document No. 24.

investor available and willing so to serve in a putative securities class action. **[*9]** " *Berger v. Compaq Computer Corp., 279 F.3d 313, 313 (5th Cir. 2002)* (denying rehearing en banc).

HN4[] A member of the purported plaintiff class may rebut the presumption that a particular plaintiff or group of plaintiffs is the "most adequate plaintiff" upon proof that the presumptively "most adequate plaintiff" (1) will not fairly and adequately protect the interests of the class, or (2) is subject to unique defenses that render that plaintiff incapable of adequately representing the class. *15 U.S.C. § 78u-4(a) (3) (B) (iii) (II)*.

The Retirement Systems, as the only plaintiff or plaintiff group seeking appointment as lead plaintiff, have produced evidence that they collectively suffered over $ 1 million in financial losses. There is no indication of record that the Retirement Systems have claims and defenses that are not typical of the claims and defenses of the proposed class, nor is there any indication that the Retirement Systems will not fairly and adequately represent the interests of the proposed class. ***HN5***[] Large institutional investors such as the Retirement Systems tend to be sophisticated investors capable of controlling attorneys in securities **[*10]** fraud litigation, and the Private Securities Litigation Reform Act of 1995, by emphasizing financial stake, expresses a preference for appointing such investors. *See, e.g.*, *Takeda v. Turbodyne Techs., Inc., 67 F. Supp. 2d 1129, 1135 (C.D. Cal. 1999)*; *Gluck v. CellStar Corp., 976 F. Supp. 542, 548 (N.D. Tex. 1997)*. Because the Retirement Systems, the only plaintiff or plaintiff group seeking appointment as lead plaintiff, are the presumptive most adequate plaintiff, their unopposed motion for appointment as lead plaintiff will be granted.

III. Lead Counsel

HN6[] Once a plaintiff or group of plaintiffs is selected as the "most adequate plaintiff," the most adequate plaintiff "shall, subject to the approval of the court, select and retain counsel to represent the class." Id. at *§ 78u-4(a)(3)(B)(v)*. The right to select and retain counsel is not absolute. *In re Cendant Corp. Litig., 264 F.3d 201, 273 (3d Cir. 2001)*. The district court has the power and the duty to supervise lead counsel selection. *See* id.

Rather surprisingly, the Retirement Systems seek to appoint as lead counsel three separate law firms: Bernstein Litowitz **[*11]** Berger & Grossmann L.L.P., Berman DeValerio Pease Tabacco Burt & Pucillo, and Schiffrin & Barroway, L.L.P., plus a fourth law firm as local liaison counsel: Nickens, Lawless & Flack, L.L.P. ***HN7***[] Although appointment of multiple law firms as lead counsel in certain circumstances may be beneficial to the litigation of a class action, appointment of co-counsel more commonly will create needless complications, administratively and otherwise, substantial multiplicity of effort, and materially increased litigation costs and expenses. *See* *In re Milestone Scientific Sec. Litig., 187 F.R.D. 165, 176-80 (D.N.J. 1999)*. Thus, district courts have declined to appoint co-lead counsel in securities fraud class actions absent a showing that co-counsel will better protect the interests of the plaintiff class. *See* *Bell v. Ascendant Solutions, Inc., 2002 U.S. Dist. LEXIS 6850, 2002 WL 638571, *6 (N.D. Tex. 2002)*; *In re Orbital Sciences Corp. Secs. Litig., 188 F.R.D. 237, 240 (E.D. Va. 1999)*; *Milestone, 187 F.R.D. at 176, 181*.

The Retirement Systems have made no showing that the controversy in this case requires the retention of three separate law **[*12]** firms as lead counsel, nor have they made any effort to explain why any one of the law firms suggested is incapable of serving as sole lead counsel for the class in association with local liaison counsel. To the contrary, Retirement Systems have not demonstrated any identifiable shortcomings on the part of any of these law firms that require the addition of a second law firm, much less even a third law firm, as co-lead counsel. According to the biographies and resumes submitted, the Court is advised as follows:

BERMAN DEVALERIO PEASE TABACCO BURT & PUCILLO

> Berman DeValerio Pease Tabacco Burt & Pucillo is one of the nation's leading law firms devoted to representing the victims of securities fraud and ***antitrust law*** violations. The Firm concentrates its practice on complex litigation throughout the United States.
>
> With offices in Boston, San Francisco and West Palm Beach, the Firm consists of 34 attorneys focusing almost exclusively on prosecuting class actions. The Firm has prosecuted hundreds of class actions on behalf of

> defrauded individuals and institutions, chiefly victims of securities fraud, consumer fraud and ***antitrust law*** violations. The firm has recovered **[*13]** over $ 1 billion dollars for clients and achieved significant changes in corporate governance.

The Berman DeValerio law firm claims to have been lead counsel, sole lead counsel, or co-lead counsel in numerous cases, and has offered no explanation as to why it is incapable of acting as sole lead counsel in this particular case or why it would require the assistance of another law firm as co-lead counsel.

BERNSTEIN LITOWITZ BERGER & GROSSMANN LLP

> Bernstein Litowitz Berger & Grossman LLP, a firm of 32 attorneys in three offices located in New York, California and New Jersey, prosecutes class and private actions, nationwide, on behalf of individual and institutional clients. The firm's litigation practice concentrates in the area of securities class actions in federal and state courts; corporate governance litigation, including claims for breach of fiduciary duty and proxy violations; antitrust; prosecuting violations of federal and state anti-discrimination laws and vindication of employee rights; consumer and toxic/mass tort actions. We also handle, on behalf of major institutional clients and lenders, more general complex commercial litigation involving allegations **[*14]** of breach of contract, accountants' liability, breach of fiduciary duty, fraud and negligence.
>
> * * *
>
> Since its founding in 1983, Bernstein Litowitz Berger & Grossmann LLP has litigated some of the most complex cases in history. For example, the firm was lead counsel in the celebrated In re *Washington Public Power Supply System Litigation*, which, after seven years of litigation and three months of jury trial, resulted in the then largest securities fraud settlement ever. Equally important, Bernstein Litowitz Berger & Grossman LLP has successfully advanced novel and socially beneficial principles by developing important new law in the areas in which we litigate.

The Bernstein Litowitz law firm claims to have been lead counsel, sole lead counsel, or co-lead counsel in numerous cases, and has offered no explanation as to why it is incapable of acting as sole lead counsel in this particular case or why it would require the assistance of another law firm as co-lead counsel.

SCHIFFRIN & BARROWAY LLP

> Schiffrin & Barroway, LLP, located just outside of Philadelphia, has specialized in complex class action litigation for over fifteen years, representing individual **[*15]** and institutional stockholders and consumers in class action litigation pending in state and federal courts throughout the United States. During the firm's successful history, Schiffrin & Barroway has recovered hundreds of millions of dollars for defrauded stockholders and aggrieved consumers. The firm, which has developed a nationwide reputation for excellence, is led by its senior partners, Richard S. Schiffrin and Andrew L. Barroway, with assistance from partners, Marc A. Topaz, David Kessler and Krishna B. Narine and numerous experienced associates and staff able to manage all aspects of complex class action litigation.

The Schiffrin & Barroway law firm claims to have been lead counsel, sole lead counsel, or co-lead counsel in numerous cases, and has offered no explanation as to why it is incapable of acting as sole lead counsel in this particular case or why it would require the assistance of another law firm as co-lead counsel.

All other motions for appointment of lead plaintiff and accompanying motions for approval of lead counsel have been withdrawn. Given the submissions that have been made, the Court is of the opinion that the appointment of more than one lead law **[*16]** firm in this particular case is not necessary for the effective representation of the proposed class; that at least one if not all three of the law firms that have been proposed for co-lead counsel would appear to be capable of acting more efficiently as sole lead counsel; that there are other law firms capable of serving as sole lead counsel if none of the three above described firms is selected or will do so; and that, ***HN8***[] consistent with the PSLRA, Lead Plaintiff should act reasonably to minimize the incurrence of needless attorneys' fees and expenses in prosecuting their case. The motion and stipulation to appoint three different law firms all as co-lead counsel will therefore not be approved.

IV. Order

For the foregoing reasons, it is

ORDERED that Defendants' Motion to Consolidate Related Cases (Document No. 22) is GRANTED, and Civil Cause No. H-02-1837, *Pfau v. Reliant Energy, Inc.*, Civil Cause No. H-02-1920, *Glenn v. Reliant Resources, Inc.*, Civil Cause No. H-02-2264, *Ferguson v. Reliant Energy, Inc.*, and Civil Cause No. H-02-2292, *Schroen v. Reliant Energy, Inc.*, are hereby consolidated into Civil Action No. H-02-1810, In *re Reliant Securities Litigation.* **[*17]** It is further

ORDERED that the Motion of the Boca Raton Police & Firefighters Retirement System and the Louisiana Retirement Funds for the Appointment as Lead Plaintiff (Document No. 12-2) is GRANTED, and the Boca Raton Police & Firefighters Retirement System, the Louisiana School Employees' Retirement System, and the Louisiana Municipal Police Employees' Retirement System, are appointed as the lead plaintiff group in this case. It is further

ORDERED that the Motion of the Boca Raton Police & Firefighters Retirement System and the Louisiana Retirement Funds for Approval of Their Selection of Co-Lead and Liaison Counsel (Document No. 12-3), is DENIED. Principals of Lead Plaintiff Boca Raton Police & Firefighters Retirement System and the Louisiana Retirement Funds shall confer with one another, shall act with the kind of sophistication that the Court expects the lead plaintiff group to demonstrate in selecting and controlling attorneys and in managing the litigation and, within twenty-one (21) days after the entry of this Order shall move for approval of one law firm and a particular member of that law firm to serve as lead counsel. Lead Plaintiff if it wishes may also move for **[*18]** approval of a local liaison counsel.

The Clerk will enter this Order and provide a correct copy to all counsel of record.

SIGNED at Houston, Texas, on this 27th day of August, 2002.

EWING WERLEIN, JR.

UNITED STATES DISTRICT JUDGE

In re Warfarin Sodium Antitrust Litig.

United States District Court for the District of Delaware

August 30, 2002, Decided

MDL No. 98-1232-SLR

Reporter

212 F.R.D. 231 *; 2002 U.S. Dist. LEXIS 16375 **; 2002-2 Trade Cas. (CCH) P73,791

In re WARFARIN SODIUM ANTITRUST LITIGATION; This document relates to: All Actions.

Subsequent History: *Affirmed by In re Warfarin Sodium Antitrust Litig., 2004 U.S. App. LEXIS 25180 (3d Cir. Del., Dec. 8, 2004)*

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

HN5[] Class Actions, Certification of Classes

To be certified, a class must satisfy the four threshold requirements of *Fed. R. Civ. P. 23(a)*: (1) numerosity; (2) commonality; (3) typicality; and (4) adequacy of representation. In addition, the parties seeking certification must show the action is maintainable under *Fed. R. Civ. P. 23(b)(1)*, *(2)*, or *(3)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Notice of Class Action > Content of Notice > Opt Out Provisions

HN6[] Class Actions, Prerequisites for Class Action

Fed. R. Civ. P. 23(b)(3) allows for so-called "opt-out" class actions for damages.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN7[] Class Actions, Certification of Classes

Under *Fed. R. Civ. P. 23(b)(3)*, two additional requirements must be met for a class to be certified: (a) common questions must predominate over any questions affecting only individual members; and (b) class resolution must be superior to other available methods for the fair and efficient adjudication of the controversy. The court must take a "close look" at the predominance and superiority criteria, including the following pertinent factors: (A) the interest of members of the class in individually controlling the prosecution or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; (D) the difficulties likely to be encountered in the management of a class action.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN8[] Class Actions, Prerequisites for Class Action

Class certification requirements must be met even in the settlement context, except that the court need not inquire whether the case, if tried, would present intractable management problems for the proposal is that there be no trial.

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN9[] Class Actions, Judicial Discretion

A court does not inquire into the merits of a lawsuit while determining whether it may be maintained as a class action.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

HN10[] Class Actions, Certification of Classes

To be certified, a class must be so numerous that joinder of all members is impracticable. *Fed. R. Civ. P. 23(a)(1)*.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Commonality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

HN11[] Prerequisites for Class Action, Commonality

Commonality requires that class members share a single common issue. Predominance requires that common issues predominate over issues affecting only individuals. *Fed. R. Civ. P. 23(b)(3)*. The Third Circuit requires that the commonality and predominance requirements be analyzed together, because the predominance requirement, which is far more demanding, incorporates the commonality requirement.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN12[] Class Actions, Prerequisites for Class Action

The *Fed. R. Civ. P. 23(b)(3)* predominance inquiry tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation. Predominance is a test readily met in certain cases alleging consumer or securities fraud or violations of the antitrust laws.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > Significant Relationships

Contracts Law > Statute of Frauds > Requirements > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Contracts Law > Statute of Frauds > General Overview

Torts > Business Torts > Unfair Business Practices > General Overview

HN13[] **Choice of Law, Significant Relationships**

The Delaware Consumer Fraud statute, *Del. Code Ann. tit. 6, § 2511 et seq.*, protects non-residents as well as residents from unfair or deceptive merchandising practices conducted in part or wholly within the State. Hence, class members from other states can assert Delaware law, so long as the members' own state consumer fraud statutes do not have material conflicts with the Delaware statute and Delaware has significant contacts with the asserted claims of these plaintiffs.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > Sherman Act > General Overview

HN14[] **Sherman Act, Claims**

To prove a violation of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, plaintiffs must demonstrate that defendant possesses monopoly power and that it willfully acquired or maintained that power as distinguished from achieving growth or development as a consequence of a superior product, business acumen, or historic accident.

Contracts Law > Statute of Frauds > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

Torts > Business Torts > Unfair Business Practices > General Overview

HN15[] **Contracts Law, Statute of Frauds**

To prove a violation of the Delaware Consumer Fraud statute, plaintiffs need only show that defendant committed fraud or misrepresentation in connection with its sale of a product; no proof of individual reliance on the fraud or misrepresentation is required. *Del. Code Ann. tit. 6, § 2513*.

Contracts Law > Statute of Frauds > General Overview

Torts > Business Torts > Fraud & Misrepresentation > General Overview

Torts > Business Torts > Unfair Business Practices > General Overview

HN16[] **Contracts Law, Statute of Frauds**

Where state consumer fraud statutes do not require proof of reliance, a plaintiff need only establish a causal link between the deceptive conduct at issue and his or her injury, and this individual issue of causation does not necessarily defeat predominance of the common issues about defendant's course of conduct.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Predominance

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN17[] **Prerequisites for Class Action, Predominance**

The need for individual damages calculations does not defeat predominance and class certification.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Torts > ... > Settlements > Multiple Party Settlements > General Overview

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN18[] **Class Actions, Prerequisites for Class Action**

So far as differences between state laws impact only on case management, these differences are irrelevant to certification of a settlement class.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Typicality

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN19[] **Prerequisites for Class Action, Typicality**

The claims or defenses of the named class representatives must be typical of the claims or defenses of the class. *Fed. R. Civ. P. 23(a)(3)*. The typicality requirement is designed to align the interests of the class and the class representatives so that the latter will work to benefit the entire class through the pursuit of their own goals. Typicality lies where there is a strong similarity of legal theories or where the claims of the class representatives and the class members arise from the same alleged course of conduct by the defendant.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN20[] **Class Actions, Prerequisites for Class Action**

Differences in the amount of damages suffered between class representatives and class members does not render the named plaintiffs' claims atypical.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Adequacy of Representation

Civil Procedure > ... > Class Actions > Class Attorneys > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Attorneys > General Overview

HN21[] **Prerequisites for Class Action, Adequacy of Representation**

Fed. R. Civ. P. 23(a) requires that the representative parties will fairly and adequately represent the interests of the class. *Fed. R. Civ. P. 23(a)(4)*. First, the adequacy of representation inquiry tests the qualifications of the counsel to represent the class. Second, it serves to uncover conflicts of interest between named parties and the class they seek to represent.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN22[] **Class Actions, Prerequisites for Class Action**

The existence of separate consumer and third-party payors counsel provides adequate structural protections to assure that differently situated plaintiffs negotiate for their own unique interests.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Numerosity

Torts > ... > Settlements > Multiple Party Settlements > General Overview

Civil Procedure > ... > Class Actions > Class Attorneys > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > Superiority

HN23[] **Prerequisites for Class Action, Numerosity**

The superiority requirement asks a court to balance, in terms of fairness and efficiency, the merits of a class action against those of alternative available methods of adjudication. The factors set out in *Fed. R. Civ. P. 23(b)(3)* help the court assess whether a class action is superior to other available methods of adjudication. In the case of consumers, the class members here have little interest in individually controlling the prosecution or defense of separate actions, *Fed. R. Civ. P. 23(b)(3)(A)*, because each consumer has a very small claim in relation to the cost of prosecuting a lawsuit. A class action facilitates spreading of litigation costs among numerous litigants and encourages private attorney general enforcement of statutes.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

Contracts Law > Statute of Frauds > General Overview

HN24[] Federal & State Interrelationships, Choice of Law

Where the defendant's headquarters are located in Delaware and the alleged deceptive acts originated in Delaware, it is proper to apply the Delaware consumer fraud statute to a nationwide class.

Civil Procedure > Special Proceedings > Class Actions > Certification of Classes

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

HN25[] Class Actions, Certification of Classes

A class can be certified even where some individual, absentee class members may later prove not to be injured, in particular where causation can be shown by generalized damage to all and individual damage determinations can be left to the damages phase of litigation.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > ... > Notice of Class Action > Content of Notice > Opt Out Provisions

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN26[] Class Actions, Compromise & Settlement

Before certifying a class or approving a class settlement, a court must direct that notice of the proposed settlement be disseminated to class members. *Fed. R. Civ. P. 23(c)(2)*, *23(e)*. To alert class members to their right to "opt out" of a *Fed. R. Civ. P. 23(b)(3)* class, *Fed. R. Civ. P. 23(c)(2)* instructs the court to direct to the members of the class the best notice practicable under the circumstances, including individual notice to all members who can be identified through reasonable effort.

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Special Proceedings > Class Actions > Notice of Class Action

Civil Procedure > Special Proceedings > Class Actions > Voluntary Dismissals

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN27[] Class Actions, Prerequisites for Class Action

The settlement notice requirement is found in *Fed. R. Civ. P. 23(e)*, which specifies that no class action may be dismissed or compromised without court approval, preceded by notice to class members.

Civil Procedure > Special Proceedings > Class Actions > Voluntary Dismissals

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN30[] **Class Members, Absent Members**

Fed. R. Civ. P. 23(e) provides that a class action shall not be dismissed or compromised without the approval of the court, thereby protecting unnamed class members from unjust or unfair settlements affecting their rights when the representatives become fainthearted before the action is adjudicated or are able to secure satisfaction of their individual claims by a compromise. There is a need for heightened scrutiny where a case is settled before the class has been formally certified. The court's duty is to protect absent class members by assuring the settlement represents adequate compensation for the release of the class claims, a duty which some courts have described as a fiduciary responsibility.

Civil Procedure > Settlements > Settlement Agreements > General Overview

Commercial Law (UCC) > Negotiable Instruments (Article 3) > Indorsements, Negotiations & Transfers > General Overview

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

HN31[] **Settlements, Settlement Agreements**

An initial presumption of fairness for a settlement is established if the court finds that: (1) the negotiations occurred at arm's length; (2) there was sufficient discovery; (3) the proponents of the settlement are experienced in similar litigation; and (4) only a small fraction of the class objected.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

HN32[] **Class Actions, Compromise & Settlement**

To determine whether a settlement is fair, reasonable, and adequate under *Fed. R. Civ. P. 23(e)*, the United States Court of Appeals for the Third Circuit applies the nine-factor Girsh test.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Criminal Law & Procedure > Preliminary Proceedings > Pretrial Motions & Procedures > General Overview

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN33[] **Class Actions, Compromise & Settlement**

To determine whether a settlement is fair, reasonable, and adequate under *Fed. R. Civ. P. 23(e)*, the complexity, expense and likely duration of litigation factor captures the probable costs, in both time and money, of continued litigation. Settlement is particularly favored in a complex class.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN34[] **Class Actions, Compromise & Settlement**

To determine whether a settlement is fair, reasonable, and adequate under *Fed. R. Civ. P. 23(e)*, the class factor attempts to gauge whether members of the class support the settlement, although the court needs to be careful not to infer too much from a small number of objectors to a sophisticated settlement.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > ... > Class Actions > Class Attorneys > General Overview

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Attorneys > General Overview

Civil Procedure > Discovery & Disclosure > General Overview

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN35[] **Class Actions, Compromise & Settlement**

To determine whether a settlement is fair, reasonable, and adequate under *Fed. R. Civ. P. 23(e)*, the stage of proceedings and amount of discovery completed factor evaluates whether counsel had an adequate appreciation of the merits of the case before negotiating. To ensure that a proposed settlement is the product of informed negotiations, there should be an inquiry into the type and amount of discovery the parties have undertaken.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > ... > Class Actions > Class Attorneys > General Overview

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > ... > Class Actions > Prerequisites for Class Action > General Overview

Civil Procedure > Attorneys > General Overview

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN36[] **Class Actions, Compromise & Settlement**

To determine whether a settlement is fair, reasonable, and adequate under *Fed. R. Civ. P. 23(e)*, the risks of establishing liability factor considers the potential rewards or risks if class counsel decided to litigate rather than settle.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN37[] **Class Actions, Compromise & Settlement**

To determine whether a settlement is fair, reasonable, and adequate under *Fed. R. Civ. P. 23(e)*, the risks of establishing damages inquiry attempts to measure the expected value of litigating the action rather than settling it at the current time. In particular the court looks at the potential damage award if the case were taken to trial against the benefits of immediate settlement. Damages would likely be established at trial through a battle of experts, with each side presenting its figures to the jury and with no guarantee whom the jury would believe.

Civil Procedure > ... > Class Actions > Certification of Classes > Decertification

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN38[] Certification of Classes, Decertification

Fed. R. Civ. P. 23(a) allows a district court to decertify or modify a class at any time during the litigation if it proves to be unmanageable.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN39[] Class Actions, Compromise & Settlement

To determine whether a settlement is fair, reasonable, and adequate under Fed. R. Civ. P. 23(e), the ability to withstand greater judgment factor considers whether the defendants could withstand a judgment for an amount significantly greater than a settlement.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN40[] Class Actions, Compromise & Settlement

To determine whether a settlement is fair, reasonable, and adequate under Fed. R. Civ. P. 23(e), the range of reasonableness of settlement in light of best possible recovery and all attendant risks of litigation factors ask whether the settlement is reasonable in light of the best possible recovery and the risks the parties would face if the case went to trial. In cases primarily seeking monetary relief, the present value of the damages plaintiffs would likely recover if successful, appropriately discounted for the risk of not prevailing, should be compared with the amount of the proposed settlement. These damages estimates should generate a range of reasonableness within which a district court approving or rejecting a settlement will not be set aside. The court must keep in mind that settlement is a compromise, a yielding of the highest hopes in exchange for certainty and resolution.

Civil Procedure > Settlements > Settlement Agreements > General Overview

Contracts Law > Statute of Frauds > General Overview

HN41[] Settlements, Settlement Agreements

The standard for evaluating settlement involves a comparison of the settlement amount with the estimated single damages, not treble damages.

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN42[] Settlements, Settlement Agreements

A settlement is by nature a compromise between the maximum possible recovery and the inherent risks of litigation. The test is whether the settlement is adequate and reasonable and not whether a better settlement is conceivable.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN43[] **Class Actions, Compromise & Settlement**

In the context of a settlement, dollar amounts are judged not in comparison with possible recovery in the best of all possible worlds, but rather in light of the strengths and weaknesses of plaintiffs' case.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Settlements > Settlement Agreements > General Overview

Civil Procedure > Remedies > Costs & Attorney Fees > General Overview

HN44[] **Class Actions, Compromise & Settlement**

A thorough judicial review of fee applications is required in all class action settlements. In determining the fee award in a common-fund class action, the Third Circuit follows the percentage-of-the-recovery method. Several nonexclusive factors are considered in determining the appropriate percentage fee: (1) the size of the fund created and the number of persons benefitted; (2) the presence or absence of substantial objections by members of the class to the settlement terms and/or fees requested by counsel; (3) the skill and efficiency of the attorneys involved; (4) the complexity and duration of the litigation; (5) the risk of nonpayment; (6) the amount of time devoted to the case by plaintiffs' counsel; and (7) the awards in similar cases. The factors need not be applied in a formulaic way. Each case is different, and in certain cases, one factor may outweigh the rest.

Civil Procedure > Special Proceedings > Class Actions > Compromise & Settlement

Civil Procedure > ... > Class Actions > Class Attorneys > General Overview

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Settlements > Settlement Agreements > General Overview

Civil Procedure > Remedies > Costs & Attorney Fees > General Overview

HN45[] **Class Actions, Compromise & Settlement**

The single clearest factor reflecting the quality of class counsels' services to the class are the results obtained.

Civil Procedure > Remedies > Costs & Attorney Fees > General Overview

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN46[] **Remedies, Costs & Attorney Fees**

A court determines a reasonable award to the class counsel in the aggregate, and the counsel then determine how to allocate the award among themselves.

Civil Procedure > ... > Class Actions > Class Attorneys > Fees

Civil Procedure > ... > Class Actions > Class Attorneys > General Overview

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > ... > Costs & Attorney Fees > Attorney Fees & Expenses > Reasonable Fees

HN47[] **Class Attorneys, Fees**

Many courts, including several in the United States Court of Appeals for the Third Circuit, have considered 25% to be the benchmark figure for attorney fee awards in class action lawsuits, with adjustments up or down for significant case-specific factors.

Civil Procedure > ... > Costs & Attorney Fees > Attorney Fees & Expenses > Reasonable Fees

Legal Ethics > Client Relations > Attorney Fees > Excessive Fees

HN48[] **Attorney Fees & Expenses, Reasonable Fees**

The lodestar award is calculated by multiplying the number of hours reasonably worked on a client's case by a reasonable hourly billing rate for such services based on the given geographical area, the nature of the services provided, and the attorney's experience. When performing the lodestar analysis as a cross check on the fee award, the court may find it sufficient to review time summaries, rather than the actual billing records.

Civil Procedure > ... > Costs & Attorney Fees > Attorney Fees & Expenses > Reasonable Fees

HN49[] **Attorney Fees & Expenses, Reasonable Fees**

Multipliers in the range of one to four are frequently awarded in common fund cases.

Civil Procedure > Special Proceedings > Class Actions > Judicial Discretion

Civil Procedure > Parties > Intervention > Motions to Intervene

HN50[] **Class Actions, Judicial Discretion**

Objecting class members are eligible to appeal from any final order entered by the court.

Opinion by: Sue L. Robinson

Opinion

[*236] Dated: August 30, 2002

Wilmington, Delaware

ROBINSON, Chief Judge

I. INTRODUCTION

On March 30, 2001, consumers and third-party payors ("TPPs") who paid all or part of the purchase price of Coumadin(R) warfarin sodium [1] filed a consolidated class action complaint alleging, individually and on behalf of all others similarly situated, that defendant DuPont Pharmaceuticals Company [2] ("DuPont") caused them to overpay for Coumadin as a result of defendant's anticompetitive behavior and dissemination of false and misleading information about Coumadin and its generic competitor. (D.I. 163) Plaintiffs alleged violations of federal and state

[1] Coumadin(R) is the brand name for the prescription drug warfarin sodium, as manufactured and marketed by defendant. Warfarin sodium is prescribed for the prevention and treatment of blood clotting disorders. (D.I. 163 at P1)

[2] Formerly known as DuPont Merck Pharmaceutical Company (a partnership between E.I. duPont de Nemours & Company and Merck & Company).

antitrust statutes, the Delaware Consumer Fraud Act (*6 Del. C. § 2513*), and the consumer fraud and deceptive acts and practices statutes of the fifty states and the District of Columbia. Plaintiffs also claimed tortious inference with contract on behalf of the TPPs and unjust enrichment on behalf of the entire **[**4]** class.

In the motions at bar, plaintiffs seek the court's final approval of a proposed class action settlement agreement (D.I. 233) and seek an award of attorneys' fees and expenses (D.I. 235). For the reasons that follow, the court shall grant plaintiffs' motion for final approval of the settlement and award attorneys' fees in the amount of 22.5% of the Settlement Fund and expenses in the amount of $ 832,382.84.

II. BACKGROUND

A. Litigation History

The proposed settlement resolves related class actions in both federal and state courts. The course of this litigation is relevant to determining the fairness of the settlement and the **[**5]** reasonable attorneys' fees and expenses, thus a brief history is set forth below.

[*237] 1. Federal Court Actions

In December 1997, two consumer class actions, *Kusnerik v. DuPont Merck Pharmaceutical Company*, C.A. No. 97-659-SLR, and *Altman v. DuPont Merck Pharmaceutical Company*, C.A. No. 97-670-SLR, were filed in this court. The actions sought treble damages and injunctive relief under federal ***antitrust law*** on behalf of a nationwide class of indirect purchasers of Coumadin. By a February 9, 1998 order, the court consolidated the *Kusnerik* and *Altman* actions under the caption *In re Warfarin Sodium Antitrust Litigation*, C.A. No. 97-659-SLR. (D.I. 237 at P6)

In January 1998, another consumer class action was filed in the Southern District of Florida, *Tischler v. DuPont Merck Pharmaceutical Company*, C.A. No. 1:98-178. Plaintiffs in *Tischler* sought damages and injunctive relief under federal ***antitrust law***, the Florida Deceptive and Unfair Trade Practices Act, and other state consumer protection laws. (*Id.* at P11) A fourth consumer class action, *Steckel v. DuPont Merck Pharmaceutical Company*, C.A. NO. 98-697, was filed in the Western District of Pennsylvania **[**6]** in April 1998. The *Steckel* plaintiffs alleged violations of federal ***antitrust law*** and sought damages and injunctive relief. (*Id.* at P14)

Pursuant to a motion filed by counsel in the *Kusnerik/Altman* action, the Panel on Multi-District Litigation (the "MDL panel") transferred the *Tischler* and *Steckel* actions to this court in June 1998 for coordination of pretrial proceedings under MDL No. 98-1232-SLR. (*Id.* at P17)

Even prior to the MDL order, plaintiffs' counsel had engaged in negotiations with defendant to reach agreement on confidentiality orders, discovery, and scheduling. (*Id.* at PP9, 16, 19) Eventually the court entered a scheduling order for completion of fact and expert discovery, and plaintiffs' counsel began preparing discovery requests. (*Id.* at P24) In response to discovery requests in various related federal and state actions, defendant produced approximately 447 boxes of documents, which were made available to all plaintiffs' counsel at a document depository that defendant established and maintained in Maryland. (*Id.* at P26) Plaintiffs' counsel in the federal and state actions informally coordinated their efforts in reviewing and analyzing **[**7]** the voluminous documents produced by defendant. (*Id.*)

During this time, plaintiffs also worked extensively with an expert in preparation for filing a motion for class certification. (*Id.* at P27) Before plaintiffs filed the motion, their expert terminated his work with them because he had moved to a consulting firm that was then representing defendant in the matter. (*Id.*) Plaintiffs filed a motion to disqualify the consulting firm.

In October 1998, plaintiffs filed a joint motion for class certification to certify a nationwide class of Coumadin indirect purchasers and to appoint class counsel. (*Id.* at P28)

In December 1998, the court granted defendant's motion to dismiss the *Kusnerik*, *Altman*, *Tischler*, and *Steckel* actions. (D.I. 98) Plaintiffs appealed the portion of the court's judgment which had dismissed their claim for injunctive relief under the federal antitrust laws. (D.I. 237 at P29) On May 30, 2000, the Third Circuit reversed and remanded the court's decision with respect to injunctive relief, finding the consumer plaintiffs had standing under federal ***antitrust law***. *In re Warfarin Sodium Antitrust Litigation, 214 F.3d 395 (3d Cir. 2000)*. **[**8]**

Following remand of the *Kusnerik*, *Altman*, *Tischler*, and *Steckel* actions, several additional class actions were filed in this court and other federal courts by TPP plaintiffs and by a state medicaid agency. In *United Wisconsin Services, Inc. v. DuPont Pharmaceutical Company*, C.A. No. 00-979-SLR, plaintiffs asserted claims based on federal ***antitrust law*** and state deceptive acts and practices and consumer protection laws on behalf of a nationwide class of TPPs. (D.I. 237 at P34) A separate action was filed in this court in December 2000 on behalf of a nationwide class of TPPs alleging violations of federal and state antitrust laws as well as state consumer protection laws. *Arkansas Carpenters' Health & Welfare Fund et al. v. DuPont Pharmaceutical Company*, C.A. No. 00-1035-SLR. (*Id.* at P35)

In July 2000, a class action was filed in the Middle District of Louisiana on behalf of a **[*238]** nationwide class of TPPs. *Louisiana Health Svcs. and Indemnity Company v. DuPont Pharmaceuticals, Inc.*, C.A. No. 00CV538C-Z. The action alleged unlawful and anticompetitive acts by defendant in violation of, among other things, the Clayton Act, the Robinson-Patman Act, and the **[**9]** Lanham Act. The action was transferred to this court as a tag-along action pursuant to the earlier MDL order. (D.I. 237 at P36)

The Alabama Medicaid Agency and the State of Louisiana, through its Department of Health and Hospitals, filed a complaint against defendant in the Southern District of Alabama, Southern Division, in May 2000. *Alabama Medicaid Agency et al. v. DuPont Pharmaceutical, Inc. et al.,* C.A. No. 00-0420-BH-L. Plaintiffs alleged violations of federal antitrust laws and the state fraudulent misrepresentation statute. The case was also transferred to this court as a tag-along action to the MDL order. (*Id.* at P37)

After numerous discussions among consumer and TPP counsel and, subsequently, defendant's counsel, the parties negotiated and drafted a proposed pre-trial case management order that would establish a formal plaintiffs' Executive Committee, establish procedures for conducting settlement discussions, and specify how and when to file a consolidated class action complaint. (D.I. 237 at P40) On February 22, 2001, this court entered the case management order and consolidated the *Tischler*, *Steckel*, *Arkansas Carpenters*, and *United Wisconsin* actions **[**10]** with the previously consolidated *Kusnerik* and *Altman* actions. [3] (D.I. 159) The *Louisiana Blue Cross* action was added after its transfer to this court. (Civ. No. 01-124, D.I. 7) A consolidated class action complaint was filed on March 30, 2001. (D.I. 163)

As specified by the case management order, plaintiffs' counsel formed an Executive Committee consisting of the following members: Goodkind Labaton Rudoff & Sucharow LLP (co-chair for all plaintiffs); Miller Faucher and Cafferty LLP (co-chair for all plaintiffs); Zwerling, Schachter & Zwerling, LLP (consumer counsel); Lowey Dannenberg Bemporad & Selinger, P.C. (TPP counsel); and Youngdahl & Sadin, P.C. (TPP counsel). (D.I. 159 at 7) The co-chairs of the Executive Committee were assigned primary responsibility for, among other things, motions, discovery, negotiations with defendant, and acting as spokespersons at pretrial conferences. (*Id.* **[**11]** at 7-8) While the co-chairs had primary responsibility for negotiations, any settlement discussions had to be attended by at least one of the co-chairs, one consumer representative, and one TPP representative; no settlement offer could be made or accepted without the prior consent of all the consumer and TPP representatives on the committee. (*Id.* at 8)

2. State Litigation

Certain plaintiffs' counsel pursued related class actions in various state courts:

---

[3] The *Alabama Medicaid* case continued to be coordinated, but not consolidated, with the other cases.

. *Shirley Ricks Freeman, Walter R. Goldstein and Andrew D. Baugus v. DuPont Merck Pharmaceutical Company*, CV-98-58, Circuit Court of Lauderdale County, Alabama ("Baugus action")

. *Wilkinson v. E.I. duPont de Nemours & Co., Merck & Co., DuPont Merck Pharmaceutical Co.*, C.A. No. 3:98-440, Chancery Court of the State of Tennessee, 20th District, Davidson County ("Wilkinson action")

. *Newman v. DuPont Merck Pharmaceutical Company*, No. 788358, California Superior Court, Orange County ("Newman action")

. *Brahm v. E.I. duPont de Nemours & Co., Merck & Co., and the DuPont Merck Pharmaceutical Co.*, No. 719668, California Superior Court, San Diego County ("Brahm action").

Ambler v. DuPont **[**12]** *Merck Pharmaceutical Co.*, No. BC189002, California Superior Court, Los Angeles County ("Ambler action").

Kruse v. DuPont Merck Pharmaceutical Company, No. 97 CH 15799, Illinois Circuit Court, Cook County ("Kruse action").

[*239] *Dean Health Plan, Inc. v. DuPont Merck Pharmaceutical Co.*, Case No. 00CV2357, State of Wisconsin, Dane County ("Dean Health Plan action").

Krausman v. DuPont Pharmaceuticals Company, Index No. 49030/00, New York State Supreme Court, New York County ("Krausman action")

The state actions that are still pending, specifically, the *Kruse*, *Newman*, *Wilkinson*, *Krausman*, and *Dean Health Plan* actions, are included in the proposed settlement.

In the *Kruse* action, filed in December 1997, plaintiff sued on behalf of a nationwide Coumadin consumer class, alleging violations of the Illinois Consumer Fraud Act and similar statutes in other states. (D.I. 237 at P43) After surviving motions to remove the case to federal court and motions to dismiss, the case eventually proceeded to discovery and class certification. Plaintiff's counsel served and responded to document requests and interrogatories and engaged **[**13]** in extensive review of documents produced by defendant. Plaintiff's and defendant's counsel deposed several witnesses, including expert witnesses for each side. After briefing and a hearing on plaintiff's motion for class certification, in June 2000 the court certified a nationwide class of Coumadin indirect purchasers, appointed plaintiff Kruse as class representative, and designated the firms of Goodkind Labaton Rudoff & Sucharow LLP and Miller Faucher and Cafferty LLP as class counsel. After certification of the consumer class, several TPPs sought to intervene on behalf of a class of TPPs. Before the motions to intervene could be resolved, defendant successfully applied to the Illinois Supreme Court for a stay in the proceedings pending the disposition of another Illinois Supreme Court case involving potentially dispositive issues relating to the Illinois Consumer Fraud Statute. (*Id.* at PP43-69)

The *Newman* action in California state court was filed in December 1997 as a multistate class action under state antitrust and consumer protection laws. In the trial court, plaintiffs successfully defended against defendant's motion to strike the complaint as a so-called "SLAPP suit" **[**14]** [4] and against a motion to dismiss. Plaintiffs' counsel conducted and defended several depositions, conducted written discovery, and participated in document discovery at the document depository in Maryland. Subsequently, defendant appealed the SLAPP suit decision to the California Supreme Court; eventually the trial court decision was vacated and the issue was remanded to the trial court for further consideration. (*Id.* at PP70-83) Defendant also sought stay or dismissal of the *Newman* action on the basis of a settlement in another statewide antitrust class action which defendant claimed estopped the *Newman* action. After a hearing, the motion was denied. An appeal is currently stayed. (*Id.* at PP97-99)

The *Ambler* plaintiffs filed a multistate class action in April 1998 alleging violations of state antitrust and consumer protection laws, as well as common law claims for fraud and deceit, negligent misrepresentation, and negligence.

[4] "SLAPP" is a Strategic Lawsuit Against Public Participation.

[15]** (*Id.* at PP84-85) The *Brahm* plaintiffs brought a similar class action on behalf of consumers in 13 jurisdictions, including California. (*Id.* at PP87-89) The *Brahm* and *Ambler* plaintiffs jointly petitioned the Judicial Council of the State of California to coordinate the *Brahm*, *Ambler*, and *Newman* actions, and the petition was granted after a hearing on the petition. (*Id.* at PP86, 91-96) Defendant filed a motion to strike the *Brahm* complaint as a SLAPP suit and, after briefing and argument, the complaint was dismissed. (*Id.* at PP88-89)

In Alabama, the *Bauqus* plaintiffs filed a class action in February 1998 on behalf of Alabama consumers of Coumadin, pursuant to Alabama antitrust statutes. Plaintiffs pursued document discovery and spent many months reviewing voluminous documents in Alabama and the document depository established by defendant in Maryland. Defendant filed a motion for summary judgment alleging its acts fell outside the reach of Alabama antitrust statutes, which were wholly limited to intrastate commerce. The court granted defendant's motion, and the Supreme Court of Alabama affirmed the decision on appeal. (*Id.* at PP100-108)

[16] [*240]** In April 1998, the *Wilkinson* plaintiffs filed a class action suit in Tennessee state court alleging violation of the Tennessee Consumer Protection Act and similar consumer protection statutes in 45 other states. Defendant removed the action to federal court and sought its transfer to the District of Delaware, but the Tennessee district court remanded it back to the state. Defendant subsequently filed a motion a dismiss, which was denied with the exception of one count that was dismissed. Plaintiffs filed a motion for class certification and, after extensive discovery and oral argument before the court, the motion was denied. Plaintiffs have since filed an amended complaint alleging violations of the antitrust laws of sixteen jurisdictions as well as the Tennessee Consumer Protection Act. (*Id.* at PP109-116) In a related action in the District of Columbia, the target of a document and deposition subpoena served by the *Wilkinson* plaintiffs filed a motion for a protective order, seeking to quash or modify the deposition subpoena. The court denied the motion, and the movant there has appealed. (*Id.* at PP117-119)

In Wisconsin in August 2000, the Dean Health Plan health **[**17]** maintenance organization filed a class action on behalf of consumers or entities who had purchased Coumadin not for resale, alleging violation of Wisconsin antitrust statutes. (*Id.* at PP120-122) Finally, in December 2000, the *Krausman* plaintiffs filed a class action on behalf of consumer purchasers of Coumadin under the New York antitrust and consumer protection statutes. (*Id.* at PP123-125)

B. Consolidated Complaint

A consolidated class action complaint was filed in this court on March 30, 2001 by consumer [5] and TPP [6] **[**19]** plaintiffs on behalf of all similarly situated United States consumers who purchased Coumadin at supracompetitive prices and all similarly situated United States TPPs who paid for the fulfillment of their members' or insureds' prescriptions for Coumadin at supracompetitive prices beginning on July 28, 1997. (D.I. 163 at PP2) Plaintiffs sought an injunction and other equitable relief pursuant to Section 16 of the Clayton Act, *15 U.S.C. § 26*, to enjoin and prevent defendant's violation of the federal antitrust laws, particularly *Section 2* of the Sherman Act, *15 U.S.C.*

---

[5] The named consumer plaintiffs are John Kusnerik, a resident of New Jersey; Sara Altman, a resident of New York; Samuel Gordon Tischler, a resident of Florida; and Marie A. Steckel, a resident of Pennsylvania. (D.I. 163 at P16) Each claims to have purchased Coumadin during the class period at supracompetitive prices.

[6] The named TPP plaintiffs are Arkansas Carpenters' Health & Welfare Fund, a trust fund and employee benefit plan with its principal place of business in North Little Rock, Arkansas; Operating Engineers Local 312 Health & Welfare Fund, a trust fund and employee benefit plan with its principal place of business in Birmingham, Alabama; United Food and Commercial Workers Union and Employers Midwest Health Benefits Fund, a trust fund and employee benefit plan with its principal place of business in Park Ridge, Illinois; United Wisconsin Services, Inc., a Wisconsin corporation with its principal place of business in Milwaukee, Wisconsin that provides managed health cares services to more than 1.9 million people in 49 states through its various subsidiaries and affiliates; and Louisiana Health Services and Indemnity Company d/b/a Blue Cross and Blue Shield of Louisiana, a Louisiana corporation with its principal place of business in Baton Rouge, Louisiana that provides health and medical services and supplies to more than 750,000 people.

§ 2. (*Id.* at P3) On behalf of all **[**18]** TPPs, [7] plaintiffs sought treble damages pursuant to Section 4 of the Clayton Act, *15 U.S.C. § 15*. (*Id.* at P4) Plaintiffs also alleged violations of the Delaware Consumer Fraud Act, *6 Del. C. § 2513*; the consumer fraud and deceptive acts and practices statutes of the fifty states and the District of Columbia; and the antitrust statutes [8] **[*241]** of the "Indirect Purchaser" states. (*Id.* at PP5-7) In addition, plaintiffs alleged tortious interference with TPPs' contracts or agreements with health benefit plan members and pharmacies relating to the substitution of generic warfarin sodium and alleged unjust enrichment under the laws of all fifty states and the District of Columbia. (*Id.* at PP8-9)

[20]** In the complaint, plaintiffs accused defendant of disseminating false and misleading information to consumers, TPPs, and others about generic versions of warfarin sodium. Defendant allegedly disseminated information claiming generic warfarin sodium was not bioequivalent or therapeutically equivalent to Coumadin, thus creating a climate of fear that discouraged the use of generic warfarin sodium and caused millions of prescriptions to be filled with Coumadin that could and would have been filled with less expensive generic warfarin sodium. (*Id.* at P11)

Plaintiffs made the following factual allegations in the complaint. Warfarin sodium is a prescription oral anticoagulant medication sold in tablet form that is taken by more than 2 million Americans to treat blood clotting disorders. Until July 1997, defendant's brand name version of warfarin sodium, Coumadin, was the only warfarin sodium tablet available. (*Id.* at P29) Although defendant lost its patent protection for Coumadin in 1962, it was able to continue monopolizing the market for warfarin sodium and, between 1987 and 1997, raised the price of Coumadin by more than 400 percent. (*Id.* at PP32-33) In 1998 and 1999, defendant's **[**21]** annual sales of Coumadin were approximately $ 550 million and $ 464 million respectively. (*Id.* at P28)

In March 1997, the FDA approved Barr's generic warfarin sodium product, concluding that the generic warfarin sodium was bioequivalent and, therefore, therapeutically equivalent to Coumadin. [9] (*Id.* at P43) Barr introduced its generic warfarin sodium product to the market on July 26, 1997 at prices substantially lower than Coumadin. (*Id.* at P49)

[22]** Defendant allegedly published false and misleading statements concerning the bioequivalence, therapeutic efficacy, and safety of generic warfarin sodium to help it maintain its monopoly position in the face of generic competition. The purpose of these statements was to deter doctors, pharmacists, TPPs, and consumers from switching to the generic drug despite the FDA's findings that the generic was bioequivalent and therapeutically equivalent to Coumadin. (*Id.* at P40)

---

[7] Plaintiffs were barred from seeking treble damages on behalf of consumer plaintiffs due to this court's earlier dismissal of consumer damage claims under the federal antitrust laws. (D.I. 98)

Code §§ 47-18-1, et seq.*; *Wisconsin Stat. §§ 133.01, et seq.*

[9] Generic drug manufacturers can obtain approval from the FDA to market generic drugs by submitting detailed information proving that the generic version is equivalent to the previously approved brand name version. Bioequivalence is demonstrated by showing that the generic drug delivers to the body the same amount of active ingredient at the same rate and extent as its brand name counterpart. Once bioequivalence is established and the FDA approves the manufacturing controls and labeling of the generic substitute, the FDA grants approval for release of the generic drug to the market and assigns an "AB" rating. (*Id.* at P34-35)

As a specific example, in the days and months before and after introduction of Barr's generic warfarin sodium, defendant repeatedly claimed in press releases and promotional brochures targeted at doctors that additional blood tests and monitoring had to be done when interchanging Coumadin with a generic substitute. (*Id.* 49-51, 54) This warning was repeated directly to patients who called an "800" telephone number in response to full-page newspaper advertisements (*id.* at P52) and in a facsimile addressed to 45,000 pharmacists in October 1997 (*id.* at P57). Plaintiffs also alleged that a press release issued within days after Barr's generic was introduced implied that the cheaper generic substitute sacrificed **[**23]** patient safety to focus on cost. (*Id.* at P50)

On August 26, 1997, the FDA sent a letter to defendant warning that certain statements made by defendant with regard to Coumadin and generic warfarin sodium were false and/or misleading under the Federal Food, Drug, and Cosmetic Act and FDA regulations. (*Id.*, Ex. 1) The FDA objected to a **[*242]** slide presentation that "stated or suggested generic drug products, such as warfarin, that have been shown to be bioequivalent to a reference drug (Coumadin) and approved as such by FDA may not be therapeutically equivalent." (*Id.*) It also found statements made in a March 1997 press release and in several promotional brochures - claiming that additional blood testing and monitoring were required if a patient was switched to another warfarin sodium product - were misleading. (*Id.*) The FDA cautioned that these statements, based on previously approved Coumadin product labeling, applied to other, non-bioequivalent warfarin products (such as warfarin potassium) no longer available in the marketplace. To use these statements in reference to bioequivalent and therapeutically equivalent products was misleading. In a follow-up letter on January 5, 1998, the **[**24]** FDA reaffirmed its position and indicated the "seriousness with which we regard DuPont's false and misleading promotion of Coumadin." (*Id.*, Ex. 2) The FDA also commented that the offending activities had continued after the August 1997 FDA letter.

Defendant also allegedly revised its promotional and educational "CoumaCare" initiative following the launch of Barr's generic substitute. The revised program included false and misleading assertions and innuendoes about problems that patients could have as a result of slight variations in drug dosage and encouraged doctors and pharmacists to minimize risk by not substituting generics for branded drugs. (*Id.* at P41)

Plaintiffs further alleged that, through financial and other incentives, defendant induced large pharmacy and drugstore chains to dispense Coumadin rather than its less expensive generic substitute. (*Id.* at P62) Another allegation was that defendant misrepresented generic warfarin sodium as it engaged in a wide-ranging campaign to persuade state agencies and legislatures to restrict the sale and substitution of generic warfarin. (*Id.* at P59-60)

Finally, plaintiffs cited a DuPont press release about supposedly **[**25]** "spontaneous and unsolicited" reports of adverse drug reactions associated with patients who had switched from Coumadin to the generic equivalent. (*Id.* at P64) Defendant later admitted that it had solicited many of these reports. Plaintiffs asserted that the adverse events were similar to adverse events reported to the FDA about Coumadin itself, and thus it was misleading for defendant to imply a causal link between switching to a generic and the adverse events. (*Id.* at PP65)

As evidence that defendant's misrepresentations had their desired effect, plaintiffs cited the weak market penetration of generic warfarin sodium. Generally, about 40-70% of prescriptions for drugs available from multiple sources are filled with less expensive generics within one year of generic availability. (*Id.* at P70) However, more than 75% of prescriptions for sodium warfarin were still filled with Coumadin a year after Barr introduced its generic version, and DuPont continued to maintain a 67% market share up until the date the complaint was filed. (*Id.*) Plaintiffs also asserted that some pharmacies, including some large chains, refused to substitute the generic for Coumadin out of a mistaken **[**26]** belief that generic warfarin sodium was not equivalent to Coumadin. (*Id.* at P58) The reports of adverse events disseminated by defendant caused at least one physician's group to instruct their patients to take only brand name Coumadin. (*Id.* at P67)

Plaintiffs alleged this unlawful conduct "arose, was directed and emanated from Delaware" to the detriment of class members throughout the United States. (*Id.* at P96)

C. Settlement Negotiations and Stipulation of Settlement and Compromise

Settlement negotiations in the federal actions began in March 2000 and continued through the next year. (D.I. 237 at PP133, 135) In the course of negotiations, plaintiffs consulted with an economic expert to prepare a damages analysis. (*Id.* at P134) Plaintiffs' damages analysis "sharply conflicted" with that of the defense. (*Id.* at P135) Nevertheless, after TPPs got involved in negotiations, an oral agreement in principle to the basic terms of a settlement was reached on April 19, 2001 and a memorandum of understanding was executed by all parties on May 14, **[*243]** 2001. (*Id.* at P136) After spending a substantial amount of time negotiating and finalizing the formal, detailed terms **[**27]** of the settlement, the parties entered into a Stipulation of Settlement and Compromise on July 26, 2001. (*Id.* at P137)

The proposed settlement provides for defendant to pay $ 44.5 million to settle the claims of the following class to be certified for settlement purposes only:

> All consumers and Third Party Payors in the United States who purchased and/or paid all or part of the purchase price of Coumadin dispensed pursuant to prescriptions in the United States during the period March 1, 1997 through and including August 1, 2001 ("Class Period"). Excluded from the Class are Defendant and any of its officers and directors, and any governmental entity. "Third Party Payor" shall mean any non-governmental entity that is (i) a party to a contract, issuer of a policy, or sponsor of a plan, which contract, policy or plan provides prescription drug coverage to natural persons, and is also (ii) at risk, pursuant to such contract, policy or plan, to provide prescription drug benefits, or to pay or reimburse all or part of the cost of prescription drugs dispensed to natural persons covered by such contract, policy, or plan.

(*Id.* at P5) Upon final approval of the settlement, **[**28]** all pending actions against defendant arising from its alleged unlawful marketing and sale of Coumadin (both federal MDL proceedings and related state actions) would be dismissed. Defendant has already paid $ 44.5 million into an escrow account which is earning interest for the benefit of the class. (*Id.*)

Under the allocation and distribution plan negotiated between the consumer counsel representative and the TPP counsel representatives on the Executive Committee, the Net Settlement Fund [10] will be distributed to class members who have filed a Proof of Claim on or before April 30, 2002. (*Id.* at P138) The "recognized loss" for each class member will be total payments made for Coumadin (less the amounts received for reimbursements, discounts or rebates) multiplied by 15%. Eighteen percent of the Net Settlement Fund is to be set aside as a "Preferential Fund" out of which the recognized losses of consumers will be paid. If the total recognized losses of consumers are not fully satisfied out of the Preferential Fund, the unsatisfied amounts will be paid from the remainder of the Net Settlement Fund on a pro-rata basis with TPP claimants. If the recognized losses of consumers **[**29]** are fully satisfied from the Preferential Fund and money remains in that fund, the unexpended portion will be added to the Net Settlement Fund for payment of the recognized losses of TPPs. (D.I. 237 at P139)

As a condition of the settlement, plaintiffs and class members agree to release any legal, equitable, or administrative claims against defendant "that relate to the marketing, promotion or sale of Coumadin during the Class Period that were or could have been asserted" in the instant Coumadin litigation. (D.I. 172 at 7, 20-22) "To the extent permitted by applicable law," the class members also waive and release any "provisions, rights and benefits conferred by § 1542 of the California Civil Code [or other similar state or common law]," which states that **[**30]** a general release does not extend to claims which the creditor does not know or suspect to exist at the time the release is executed, if the knowledge would have "materially affected his settlement with the debtor." (*Id.* at 21-22) Excluded from the released claims are any claims for physical or bodily injury or defective products arising from the use or purchase of Coumadin; any claims that Coumadin is not safe or effective; and any breach of contract claims between defendant and TPPs that are unrelated to the current false and/or misleading information claims. (*Id.* at 8)

The stipulation of settlement is also conditioned on final approval of the settlement by the court without material modification. (*Id.* at 19)

---

[10] The Net Settlement Fund will be calculated as follows: $ 44.5 million plus interest, less court-awarded attorneys' fees, costs and expenses, less costs of notice to class members, less costs of administering the fund, and less taxes. (D.I. 172 at 6)

[*244] D. Preliminary Approval

On August 1, 2001, the court granted preliminary approval of the settlement and conditionally certified the settlement class. (D.I. 177) The order approved the plan for providing notice to the class members about the settlement terms and required class members to exclude themselves from the class ("opt out") by December 17, 2001. The court also required any class members who wished to object to the proposed settlement, but had chosen **[**31]** not to opt-out, to file a written statement of objection by December 17, 2001. Class members who wanted to file a claim were given until April 30, 2002 to file the appropriate Proof of Claim. A settlement hearing ("fairness hearing") was scheduled for January 23, 2002.

The court approved the Proof of Claim forms for consumers and TPPs on August 17, 2001. (D.I. 181)

E. Notice to Class and Response

Plaintiffs contracted with a nationally recognized settlement administrator, Complete Claim Solutions, Inc. ("CCS"), to prepare and implement a notice program. (D.I. 237 at P142) After the court approved the program, CCS published notice targeted at both consumer and TPP class members; set up a call center to receive telephone inquiries; prepared, printed, and distributed notice packets for consumers and TPPs who responded to the notice; and designed and developed a website for class members to review and access information about the settlement. (D.I. 237, Ex. C) Summary notice of the proposed settlement was published over a period of three months beginning in August 2001 in selected publications throughout the country, including *USA Today*, *USA Weekend*, and *Parade* magazine; **[**32]** newspapers in the top twelve United States markets for adults over the age of 50; and widely circulated magazines such as *Modern Maturity* and *Readers Digest*. (D.I. 237 at P145; Ex. C at P5, Young Affidavit) The publications have a combined circulation of approximately 115 million people. The notice was also published in *National Underwriter* and *Benefits and Compensation Solutions*. (D.I. 237 at P145)

The summary notice informed class members that a settlement on behalf of the class had been proposed and included the following information:

. Case caption;

. Settlement amount of $ 44.5 million plus interest;

. Date, time, and place for fairness hearing;

. Class description;

. Nature of litigation claims, i.e., that defendant had disseminated false and misleading information regarding the bioequivalence of Coumadin and other warfarin sodium products and had induced pharmaceutical distributors to favor Coumadin over other warfarin sodium products;

. Address and telephone number from which class members could obtain more detailed information about the settlement and their rights to participate in or object to the settlement;

. Deadline for receipt of Proof of Claim;

[33]** . Website address;

. Notice that class members who did not ask to be exluded would be bound by the final order and judgment entered by the court; and

. Deadline for exclusion from the final order and judgment, i.e., opt-out deadline.

(*Id.*, Ex. C at P5, Young Affidavit)

Separate notice packets were developed for consumers and TPPs. (*Id.*, Ex. C at P2) The notice packets included a full written notice of the proposed settlement, a Notice of Exclusion form, and a consumer or TPP Proof of Claim form. (*Id.*) CCS sent the TPP notice packet to 12,707 potential TPPs using first class mail. (*Id.*, Ex. C at PP3-4) Additional notice packets were mailed to consumer and TPP class members as requests were received by the claims administrator.

In addition to the same information provided in the summary notice, the full notice of the settlement included:

. Description of the litigation and the claims and defenses raised by the parties;

. Terms of the proposed settlement, including how to review a copy of the complete **[*245]** Stipulation of Settlement and Compromise;

. Description of the allocation and distribution plan;

. Explanation of the right to opt out of the class, how to **[**34]** file a Notice of Exclusion, and the consequences of opting out;

. Identification of counsel appointed as co-chairs of the Executive Committee;

. Scope of claims release and dismissal of litigation;

. Description of fairness hearing and how to participate;

. Procedure for submitting written and/or oral objections to settlement; and

. Counsels' plan to apply for attorneys' fees of no more than 25% of the settlement fund and reimbursement of expenses, all to be paid out of the settlement fund. (*Id.*)

Claimants who chose to exclude themselves from the settlement were required to send a Notice of Exclusion to the settlement administrator by December 17, 2001. On the exclusion form, claimants had to provide identification information and the amount paid for Coumadin during the class period and had to certify that the information provided was true. (*Id.*)

To make a claim, consumers were required to submit a Proof of Claim identifying their name, address, date they began using Coumadin (by year), and the amount paid for Coumadin during the class period (with any reimbursements from insurance deducted), along with proof of their most recent purchase of Coumadin during the class **[**35]** period. The claimants also had to certify that the information provided was true and correct. (*Id.*)

The TPPs were required to submit a Proof of Claim identifying the TPP or agent making the claim and the total amount paid for Coumadin during the class period. (*Id.*) TPP claimants also were required to certify that the amount claimed was true and accurate and based upon actual records maintained by or otherwise available to the claimants and to agree to furnish additional documentary backup upon request of the settlement administrator. (*Id.*)

The website developed by CCS provided class members access to the full notice of settlement, the Stipulation of Settlement and Compromise, and proof of claim forms. (*Id.*, Ex. C at P7)

By January 2, 2002, the settlement administrator had received over 89,000 telephone inquiries. (*Id.*, Ex. C at P6) In addition, more than 41,803 "visits" were made to the settlement website and 15,127 forms viewed and/or downloaded. (*Id.*, Ex. C at P7) An additional 7,273 requests for printed notice packets were received via e-mail. (*Id.*) Through June 3, 2002, the administrator had mailed claim forms to 90,926 potential consumer class members, **[**36]** and received and processed 48,305 consumer claims and 1,055 TPP claims. (D.I. 281 at P3; Ex. B) A total of 136 consumers and ten TPPs opted out of the proposed settlement by the December 17, 2001 deadline. (D.I. 237 at P146)

F. Objections

Thirteen objections to the settlement were filed by the December 17, 2001 deadline, including eleven from individual consumers or consumer groups [11] **[**37]** and two from TPPs. [12] The objections can generally be categorized into the following subject areas:

. Amount of settlement

. Conflicts of interest between consumers and TPPs

. Allocation of settlement proceeds

. Settlement class certification

. Sufficiency of notice

. Scope of release

[*246] . Amount of attorneys' fees and costs

The substance of the objections is summarized and addressed as appropriate within the individual discussions of class certification, notice, settlement fairness, and attorneys' fees and expenses.

In addition to objections to the settlement, several objectors filed motions to intervene in the litigation itself. [13]

G. Fairness Hearing

The fairness hearing was held January 23, 2002. Oral argument was presented by plaintiffs' counsel and by counsel representing objectors HCSC, Bradley, Bruce, Cleusman, Eagel, Galperin, Hansen, Hutchinson, McCarty, Nipper, O'Kelley, Palazzola, and Shapiro. (D.I. 267) No evidence was presented.

III. JURISDICTION

The court has subject matter jurisdiction over this action pursuant to *28 U.S.C. §§ 1331* and *1337*, providing for exclusive federal district **[**38]** court jurisdiction over "federal question" claims. ***HN1***[] Plaintiffs' claims for injunctive relief under Section 16 of the Clayton Act, *15 U.S.C. § 26*, to prevent violations of *Section 2* of the Sherman Act, *15 U.S.C. § 2*, meet the "federal question" requirement.

HN2[] The court asserts supplemental jurisdiction over plaintiffs' state law claims under *28 U.S.C. § 1367*. All of the claims flow from a common nucleus of operative fact and are part of the same case or controversy under Article III of the United States Constitution. [14] *See* *In re The Prudential Ins. Co. of American Sales Practices Litigation, 148 F.3d 283, 300-303 (3d Cir. 1998)*.

---

[11] Consumer objections were filed by: Jean Bradley et al. (D.I. 214); Shirley Bruce (D.I. 210); Mary L. Cleusman et al. ("Tennessee objectors") (D.I. 218); Julious M. Davis (D.I. 191); Seymour Eagel (D.I. 194); Alexander Galperin (D.I. 216); Kenard C. Hansen (D.I. 245); Willie Hutchinson, Jr. and Vincent Palazzola (D.I. 202); Garey L. McCarty (D.I. 198); Ramona Nipper (D.I. 252); Madison W. O'Kelley, Jr. (D.I. 205); J.G. Rodgers (D.I. 259, Ex. 13; not filed directly with the court); Alan Shapiro (D.I. 186).

[12] TPP objections were filed by: Trigon Blue Cross Blue Shield et al. ("Blue Cross Health Plans") (D.I. 196); Health Care Service Corporation ("HCSC") (D.I. 207).

[13] Objectors HCSC (D.I. 254), Bradley et al. (D.I. 212), Cleusman et al. (D.I. 218), and McCarty (D.I. 200) filed motions to intervene.

[14] Plaintiffs also claim diversity jurisdiction. However, plaintiffs do not allege that either the individual class representatives or the individual members of the class sustained the minimum amount of damages required for the court to assert diversity jurisdiction. *See* *In re The Prudential, 148 F.3d at 303 (3d Cir. 1998)*.

[39]** ***HN3***[] The court also finds that it obtained personal jurisdiction over absentee class members by providing proper notice of the impending class action to class members and by providing absentees with the opportunity to be heard and to exclude themselves from the class. This process satisfies due process requirements. *In re Prudential, 148 F.3d at 306* (citing *Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 811-12, 86 L. Ed. 2d 628, 105 S. Ct. 2965 (1985))*. Reasonable notice was provided to the consumer class members through the mass media and to TPP class members through individual mailings. The notice informed class members that they could either opt out of the settlement or submit objections in writing and/or orally at the fairness hearing.

Finally, the court finds that the named parties individually meet the requirements of Article III standing. Each named party sufficiently alleges injury in fact - overpayment for warfarin sodium - as a result of defendant's alleged product misrepresentations and monopolistic activities and has a valid "case or controversy" with respect to defendant. (Consol. Compl. PP70, 72) ***HN4***[] So long as the class representatives have **[**40]** constitutional standing to raise a particular issue before the court, no further constitutional standing requirements exist for the remainder of the class. *See* *In re Prudential, 148 F.3d 283 at 306-7*.

IV. CLASS CERTIFICATION FOR PURPOSES OF SETTLEMENT

Plaintiffs seek certification of the following class for settlement purposes:

> All consumers and Third Party Payors in the United States who purchased and/or paid all or part of the purchase price of Coumadin dispensed pursuant to prescriptions in the United States during the period March 1, 1997 through and including August 1, 2001 ("Class Period"). Excluded from the Class are Defendant and any of its officers and directors, and any governmental entity. "Third Party Payor" shall mean any nongovernmental entity that is (i) a party to a contract, issuer of a policy, or sponsor of a plan, which contract, policy or plan provides prescription drug coverage **[*247]** to natural persons, and is also (ii) at risk, pursuant to such contract, policy, or plan, to provide prescription drug benefits, or to pay or reimburse all or part of the cost of prescription drugs dispensed to natural persons covered by such contract, policy, **[**41]** or plan.

(D.I. 233)

HN5[] To be certified, a class must satisfy the four threshold requirements of *Rule 23(a) of the Federal Rules of Civil Procedure*: (1) numerosity; (2) commonality; (3) typicality; and (4) adequacy of representation. *See* *Amchem Products, Inc. v. Windsor, 521 U.S. 591, 613, 138 L. Ed. 2d 689, 117 S. Ct. 2231 (1997)*. In addition, the parties seeking certification must show the action is maintainable under *Rule 23(b) (1)*, *(2)*, or *(3)*. *Id. at 614*. ***HN6***[] *Rule 23(b) (3)*, the category at issue in this case, allows for so-called "opt-out" class actions for damages. *Id. at 614-5*. ***HN7***[] Under *Rule 23(b) (3)*, two additional requirements must be met for a class to be certified: (a) common questions must predominate over any questions affecting only individual members; and (b) class resolution must be superior to other available methods for the fair and efficient adjudication of the controversy. *Id. at 615*. The court must take a "close look" at the predominance and superiority criteria, including the following pertinent factors:

> (A) the interest of members of the class in individually controlling the prosecution **[**42]** or defense of separate actions; (B) the extent and nature of any litigation concerning the controversy already commenced by or against members of the class; (C) the desirability or undesirability of concentrating the litigation of the claims in the particular forum; (D) the difficulties likely to be encountered in the management of a class action.

Id. at 615-6 (quoting *Fed. R. Civ. P. 23(b) (3)*). The Supreme Court has noted that the dominant purpose behind certifying *Rule 23(b) (3)* cases is to vindicate the rights of people who individually would be without the strength to bring their opponents into court; it overcomes the problem of small recoveries, which do not provide enough incentive for individual actions to be prosecuted. *Id. at 617*.

HN8[] Class certification requirements must be met even in the settlement context, except that the court "need not inquire whether the case, if tried, would present intractable management problems . . . for the proposal is that there be no trial." *Id. at 620*.

HN9[] The court does not inquire into the merits of a lawsuit while determining whether it may be maintained as a class action. *See* *Eisen v. Carlisle and Jacquelin, 417 U.S. 156, 177, 40 L. Ed. 2d 732, 94 S. Ct. 2140 (1974)*. **[**43]**

A. Numerosity

HN10[] To be certified, the class must be "so numerous that joinder of all members is impracticable." *Fed. R. Civ. P. 23(a) (1)*. This class potentially includes 2 million or more members, thus it easily satisfies the numerosity requirement.

B. Commonality and Predominance

HN11[] Commonality requires that class members share a single common issue. *See* *Baby Neal ex rel. Kanter v. Casey, 43 F.3d 48, 56 (3d Cir. 1994)*. Predominance requires that common issues **predominate** over issues affecting only individuals. *Fed. R. Civ. P. 23(b) (3)*. The Third Circuit requires that the commonality and predominance requirements be analyzed together, because the predominance requirement, which is "far more demanding," incorporates the commonality requirement. *In re LifeUSA Holding, Inc., 242 F.3d 136, 144 (3d Cir. 2001)*.

HN12[] "The *Rule 23(b) (3)* predominance inquiry tests whether proposed classes are sufficiently cohesive to warrant adjudication by representation." *Amchem, 521 U.S. at 623*. The Supreme Court has opined that "predominance is a test readily met in certain cases alleging consumer or securities fraud or violations of the **[**44]** antitrust laws." *Id. at 625*.

The court finds that in the case at bar common questions of fact and law predominate over any questions affecting only individual **[*248]** members. Common questions of fact and law alleged by plaintiffs include:

. Whether defendant monopolized and attempted to monopolize the United States market for warfarin sodium;

. Whether defendant caused plaintiffs and the class to overpay for Coumadin by disseminating false and/or deceptive information to TPPs, patients, doctors, and pharmacists concerning the use, quality, and effectiveness of bioequivalent generic warfarin sodium;

. Whether and to what extent the conduct of defendant caused injury to plaintiffs and the class and, if so, the appropriate measure of damages;

. Whether defendant's misrepresentations concerning generic warfarin sodium have violated, and continue to violate, the Delaware Consumer Fraud Act; [15]

. Whether plaintiffs and members of the class are entitled to declaratory and/or injunctive relief;

. Whether defendant was unjustly enriched as a result of its actions.

---

[15] *HN13*[] The Delaware Consumer Fraud statute, *6 Del. C. §§ 2511 et seq.*, protects non-residents as well as residents from unfair or deceptive merchandising practices conducted "in part or wholly within" the State. *See* *Lony v. E.I. du Pont de Nemours and Company, Inc., 821 F. Supp. 956, 961 (D. Del. 1993)* (finding standing for citizen of Germany where the alleged misrepresentation commenced in Delaware). Hence, class members from other states can assert Delaware law in this case, so long as the members' own state consumer fraud statutes do not have material conflicts with the Delaware statute and Delaware has significant contacts with the asserted claims of these plaintiffs. *See* *Phillips Petroleum Co. v. Shutts, 472 U.S. 797, 814-823, 86 L. Ed. 2d 628, 105 S. Ct. 2965 (1985)*. Plaintiffs have alleged here that defendant's deceptive conduct "arose, was directed and emanated from Delaware," which is enough to invoke the Delaware statute on behalf of the class. (D.I. 163 at P96)

[45]** This case is clearly focused on the allegedly deceptive conduct of defendant and the effect that conduct had on market penetration by the generic substitute and the prices paid for warfarin sodium; it is not focused on the conduct of individual class members. *See* *In re Flat Glass Antitrust Litigation, 191 F.R.D. 472, 483-4 (W.D. Pa. 1999)* (noting predominance test is met in antitrust case because "consideration of the conspiracy issue would, of necessity, focus on defendants' conduct, not the individual conduct of the putative class members."). Plaintiffs' claims arise from an alleged broad-based communications campaign to deceive consumers, TPPs, physicians, and regulatory bodies into believing a generic version of warfarin sodium could not be directly substituted for Coumadin, thereby discouraging consumers from switching to lower priced generic warfarin sodium and allowing defendant to charge supracompetitive prices for Coumadin. The claims do not rely on the conduct or reliance of individual consumers or TPPs. Rather, they depend on proof that defendant made misrepresentations about Coumadin and generic warfarin sodium that allowed it to maintain its monopoly **[**46]** in the warfarin sodium market, discourage switching to lower-cost generic warfarin sodium, and charge supracompetitive prices for Coumadin. Proof of liability thus depends on evidence common to the class. [16]

[47]** Several other courts have recently certified nationwide or multi-state classes under federal and state laws in actions alleging overpayment for prescription drugs. [17] **[**48]** The case **[*249]** at bar also bears similarities to *In re Prudential, 148 F.3d 283 (3d Cir. 1998)*, in which the Third Circuit affirmed a class certification and settlement in a nationwide class action brought pursuant to federal and state securities fraud statutes. [18]

The fact that plaintiffs alleged purely economic harm from a common cause (overpayment for warfarin sodium that resulted from defendant's deceptive communications) further supports certification of the class. These allegations present none of the individual proof problems and divergent interests that have arisen in some other class actions. [19] *See* *In re Prudential, 148 F.3d 283 at 315* (noting "the complexity of a case alleging physical injury as a result of asbestos exposure [*Amchem*] differs greatly from a case alleging economic injury as a result of deceptive sales practices").

---

[16] ***HN14***[] To prove a violation of *Section 2* of the Sherman Act, plaintiffs must demonstrate that defendant possesses monopoly power in the warfarin sodium market and that it willfully acquired or maintained that power as distinguished from achieving growth or development as a consequence of a superior product, business acumen, or historic accident. *See* *United States v. Grinnell Corp., 384 U.S. 563, 570-1, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966)*. ***HN15***[] To prove a violation of the Delaware Consumer Fraud statute, plaintiffs need only show that defendant committed fraud or misrepresentation in connection with its sale of Coumadin; no proof of individual reliance on the fraud or misrepresentation is required. *See* Delaware Consumer Fraud Statute, *6 Del. C. § 2513*; *S&R Assocs. v. Shell Oil Co., 725 A.2d 431, 440 (Del. Super. Ct. 1998)*.

[17] The Northern District of Illinois certified separate nationwide consumer and TPP classes in a class action brought under federal ***antitrust law*** and the consumer fraud statutes of two states. *In re Synthroid Marketing Litigation, 188 F.R.D. 295 (N.D. Ill. 1999)* (consumer class certification); *In re Synthroid Marketing Litigation, 188 F.R.D. 287 (N.D. Ill. 1999)* (TPP class certification). The court in the District of Columbia recently approved various settlements of prescription drug antitrust litigation that included two multi-state consumer classes and two multi-state TPP classes. *In re Lorazepam & Clorazepate Antitrust Litigation, 205 F.R.D. 369, 2002 U.S. Dist. LEXIS 5677, 2002-1 Trade Cas. (CCH) P73649*, Nos. MDL 1290 (TFH) and 99 MS276 (TFH), 2002 WL 246664 (D.D.C. Feb. 1, 2002). A Michigan court certified a class of indirect prescription drug purchasers that included both consumers and TPPs in an action brought pursuant to state antitrust statutes. *In re Cardizem CD Antitrust Litigation, 200 F.R.D. 326 (E.D. Mich. 2001)*.

[18] The defendant in *In re Prudential* allegedly engaged in a common, nationwide scheme to defraud customers through standardized, deceptive sales presentations. *148 F.3d 283 at 314*. The Third Circuit affirmed the district court's determination that common issues predominated over individual issues, and rejected an objector's contention that predominance was defeated because the claims were subject to the laws of fifty states. *148 F.3d 283 at 315*.

[19] *See, e.g.*, *Georgine v. Amchem Products, Inc., 83 F.3d 610, 630 (3d Cir. 1996)*, *aff'd*, *Amchem Products, Inc. v. Windsor, 521 U.S. 591, 138 L. Ed. 2d 689, 117 S. Ct. 2231 (1997)* (reversing a certification in a personal injury class action because of "the multiplicity of individualized factual and legal issues, magnified by choice of law considerations," and because some class members would develop their injuries sometime in the future and other members were presently injured)

[49]** The case at bar can also be distinguished from cases where liability depends on specific deceptive communications made to individual class members and members' reliance on those communications. *See* *In re LifeUSA Holding, Inc., 242 F.3d at 144-6* (reversing a class certification in part because plaintiffs' claims of deceptive insurance sales practices arose from individual and nonstandardized presentations by numerous independent agents, rather than uniform, scripted presentations). Here, the alleged deception involved a broad-based, national campaign conducted by and directed from corporate headquarters, and individual reliance on the misrepresentations is irrelevant to liability. ***HN16***[] Where state consumer fraud statutes do not require proof of reliance, as is the case here, plaintiff "need only establish a causal link between the [deceptive] conduct at issue and his or her injury," and this individual issue of causation does not necessarily defeat predominance of the common issues about defendant's course of conduct. *Mulligan v. Choice Mortgage Corp. USA, 1998 U.S. Dist. LEXIS 13248*, No. 96-596- B, 1998 WL 544431, at *11-*12 (D.N.H. Aug. 11, 1998) (finding common issue of whether **[**50]** defendant's practices were unfair or deceptive in violation of state consumer fraud statute predominated despite need for individual proof of causation, where no proof of individual reliance was required by the statute); *see also* , *Hill v. Gateway 2000, Inc. 1996 U.S. Dist. LEXIS 16581*, No. 96 C 4086, *1996 WL 650631*, *6 (N.D. Ill. Nov. 7, 1996) (certifying class under Illinois and South Dakota consumer fraud statutes because no showing of reliance required, but denying certification of UCC claims because reliance was a necessary requirement).

The court also concludes that ***HN17***[] the need for individual damages calculations does not defeat predominance and class certification. *See* *Baby Neal, 43 F.3d at 57* (finding that individual damage determinations did not undermine commonality finding); *Bogosian v. Gulf Oil Corp., 561 F.2d 434, 456 (3d Cir. 1977)* (recognizing that the necessity for calculation of damages on an individual basis does not preclude class certification where common issues determining liability predominate); *In re Prudential Ins. Co. of America, 962 F. Supp. 450, 517 (D.N.J. 1997)* ("Individual damages issues do not defeat an otherwise valid **[**51]** class certification.").

One objector argues that claims under various state consumer fraud and antitrust laws **[*250]** defeat predominance because of variations in the state laws. (D.I. 194, Eagel Objection) However, the Third Circuit has recognized that these issues can be minimized by grouping state statutes and common law that share common elements of liability or common defenses, particularly where the lawsuits do not involve personal injuries. *See* *In re Prudential, 148 F.3d 283 at 315*; *In re School Asbestos Litigation, 789 F.2d 996, 1010* (3d cir. 1986). This court also notes that, ***HN18***[] so far as differences between state laws impact only on case management, these differences are irrelevant to certification of a settlement class. *See* *Amchem, 521 U.S. at 620* ("Confronted with a request for settlement-only class certification, a district court need not inquire whether the case, if tried, would present intractable management problems . . . for the proposal is that there be no trial.").

Based on the above, the court finds that common questions of fact and law predominate over any questions affecting only individual members.

C. Typicality

[52]** ***HN19***[] The claims or defenses of the named class representatives must be "typical of the claims or defenses of the class." *Fed. R. Civ. P. 23(a)(3)*. "The typicality requirement is designed to align the interests of the class and the class representatives so that the latter will work to benefit the entire class through the pursuit of their own goals." *In re Prudential, 148 F.3d 283 at 311*. "Typicality lies where there is a strong similarity of legal theories [] or where the claims of the class representatives and the class members arise from the same alleged course of conduct by the defendant. . . ." *In re the Prudential, 962 F. Supp. at 518* (internal citation omitted).

Here, the claims of the representative plaintiffs arise from the same course of conduct that gave rise to the claims of the other class members and are based on the same general legal theories. Plaintiffs allege that defendant misled consumers, TPPs and others regarding the bioequivalence of generic warfarin sodium to Coumadin, which resulted in economic harm to plaintiffs through overpayment for warfarin sodium. The most obvious differences between class members is that some are consumers **[**53]** of Coumadin and some are TPPs. However, the named class representatives include both consumers and TPPs, so each type of class member is represented by one or more named plaintiffs. Two of the named consumer plaintiffs reside in "indirect purchaser" states (New Jersey and

Florida), so potentially divergent interests on damages are also represented by named plaintiffs, though courts have found that ***HN20***[] differences in the amount of damages suffered between class representatives and class members does not render the named plaintiffs' claims atypical. *See* *In re NASDAQ Market-Makers Antitrust Litigation, 169 F.R.D. 493, 510 (S.D.N.Y. 1996)*.

Based on the above, the court finds the claims of the named plaintiffs are typical of the claims of the class.

D. Adequate Representation

HN21[] *Rule 23(a)* also requires that "the representative parties will fairly and adequately represent the interests of the class." *Fed. R. Civ. P. 23(a)(4)*. "First, the adequacy of representation inquiry 'tests the qualifications of the counsel to represent the class.' Second, it 'serves to uncover conflicts of interest between named parties and the class they seek to represent.'" *In re Prudential, 148 F.3d 283 at 313* **[**54]** (internal citations omitted).

The class counsel at bar are well qualified and experienced class action attorneys who have been involved in similar drug litigation around the country. Counsel vigorously pursued this litigation in this court and in several state courts over a period of more than three years, conducting extensive document discovery and numerous depositions before engaging in settlement negotiations. Any potential conflicts between consumers and TPPs were adequately represented by separate counsel for consumers and TPPs. ***HN22***[] The existence of separate consumer and TPP counsel provides adequate "structural protections to assure that differently situated plaintiffs negotiate for their own unique interests." *Georgine, 83 F.3d at 631* (finding inadequate representation of disparate **[*251]** groups of plaintiffs where no such structural protections existed).

As noted in the typicality discussion, named parties include both consumers and TPPs, and named consumers include two from "indirect purchaser" states. The named plaintiffs share a strong interest in establishing liability of defendant, seeking the same type of damages (compensation for overpayment) for the same type **[**55]** of injury (overpayment for warfarin sodium). The court finds that any alleged conflict goes to how the settlement fund should be allocated. (D.I. 214, Bradley Objection) While some courts in similar cases have certified consumers and TPPs as separate classes or subclasses, there does not appear to be any compelling reason to require separate classes or subclasses here in the context of settlement. Instead, the court will address allocation of the settlement fund between consumers and TPPs in its discussion of settlement fairness.

Based on the above discussion, the court finds the named plaintiffs will fairly and adequately represent the interests of the class.

E. Superiority

HN23[] "The superiority requirement asks the court 'to balance, in terms of fairness and efficiency, the merits of a class action against those of alternative available methods of adjudication.'" *In re Prudential, 148 F.3d 283 at 316*. The factors set out in *Rule 23(b)(3)* help the court assess whether a class action is superior to other available methods of adjudication. In the case of consumers, the class members here have little interest in "individually controlling the prosecution or defense of **[**56]** separate actions," *Fed. R. Civ. P. 23(b)(3)(A)*, because each consumer has a very small claim in relation to the cost of prosecuting a lawsuit. A class action facilitates spreading of litigation costs among numerous litigants and encourages private attorney general enforcement of statutes. *See* *In re General Motors, 55 F.3d 768 at 784*. This is less true for the TPP members of the class, some of whom have significant individual claims. However, the TPPs had the option to opt-out of the settlement if they believed it was worth it to them to pursue litigation separately. Plaintiffs assert there are potentially thousands of TPPs who have claims, so this large number of potential TPP plaintiffs - added to the 2 million consumers - strongly suggests the use of the class action device as the most efficient way to resolve the asserted claims.

In addition, a relatively small number of individual lawsuits were pending against defendant in this matter, indicating a lack of interest in individual prosecution of claims. *See* *In re Prudential, 148 F.3d 283 at 316*; see also *Fed. R.*

Civ. P. 23(b)(3)(C). Furthermore, the presence of defendant's place of business in Delaware **[**57]** and the initial filing of several separate class action lawsuits in Delaware make it a desirable forum in which to concentrate the litigation, a conclusion already reached by the Multi-District Litigation Panel that consolidated several pending federal lawsuits here. *See* *In re Prudential, 148 F.3d 283 at 316*; see also *Fed. R. Civ. P. 23(b)(3)(D)*.

In sum, the court finds that the class action device is clearly superior in terms of fairness and efficiency to other available methods of litigation.

F. Objections to Settlement Class Certification

Several class members object to certifying a single, nationwide class because some members may be eligible for treble damages or punitive damages under their state antitrust or consumer fraud statutes, and Tennessee and Kansas members may be eligible for "full consideration" damages, thereby destroying commonality. (D.I. 218, Tennessee Objectors) These differences, however, go to damages calculations and thus do not destroy commonality or predominance, though they may be considered by the court in assessing the fairness of the settlement.

The court is also unpersuaded by one class member's objection to applying Delaware state **[**58]** law to class members from other states. (D.I. 194, Eagel Objection) ***HN24***[] Where the defendant's headquarters are located in Delaware and the alleged deceptive acts originated in Delaware, it is proper to apply the Delaware consumer fraud statute to a nationwide class. *See* *In re Cordis Corp. Pacemaker Product* ***[*252]*** *Liability Litigation*, No. C-3-86-543, *1992 U.S. Dist. LEXIS 22612*, at *49 (S.D. Ohio Dec. 23, 1992) (noting that it is proper under Supreme Court precedent to apply a particular state's laws in a nationwide class action if the defendant's headquarters are in that state and many of the acts upon which liability is predicated took place there).

Finally, objectors assert that consumers who pay a fixed co-pay [20] for their prescription drugs cannot be included in the certified class because they have suffered no damages. (D.I. 245, Hansen; D.I. 205, O'Kelley; D.I. 210, Bruce; D.I. 198, McCarty; D.I. 216, Galperin) The court concludes, however, that fixed co-pay consumers need not be excluded from the settlement class, because they still have claims for injunctive and other equitable relief. In addition, ***HN25***[] a class can be certified even where some individual, absentee class **[**59]** members may later prove not to be injured, in particular where causation can be shown by generalized damage to all and individual damage determinations can be left to the damages phase of litigation. *See* *In re NASDAO Market-Makers Antitrust Litigation, 169 F.R.D. 493, 523 (S.D.N.Y. 1996)* ("Even if it could be shown that some individual class members were not injured, class certification, nevertheless, is appropriate where the antitrust violation has caused widespread injury to the class."). The fairness of including fixed co-pay consumers in the settlement fund distribution is addressed in the discussion of settlement fairness.

[60]** In conclusion, the court finds the objections raised to class certification unpersuasive, finds the proposed class meets the requirements of *Rule 23*, and certifies the class for settlement purposes.

V. NOTICE

HN26[] Before certifying a class or approving a class settlement, the court must direct that notice of the proposed settlement be disseminated to class members. *Fed. R. Civ. P. 23(c)(2)* & *23(e)*. "To alert class members to their right to 'opt out' of a (b)(3) class, [*Rule 23(c)(2)*] instructs the court to 'direct to the members of the class the best

[20] A "fixed co-pay" as it is used here means the insured pays the same co-pay amount for prescription drugs regardless of whether they are name-brand or generic. Plaintiffs assert that most insureds who have co-pays pay a higher co-pay for name-brand prescription drugs than for generic drugs. Another type of co-pay is a "percentage co-pay," in which the insured pays a percentage of the drug's cost.

notice practicable under the circumstances, including individual notice to all members who can be identified through reasonable effort.'" *Amchem, 521 U.S. at 617* (quoting *Fed. R. Civ. P. 23(c)(2)*).

HN27[] The settlement notice requirement is found in *Rule 23(e)*, which specifies that "no class action may be 'dismissed or compromised without [court] approval,' preceded by notice to class members." *Id.* (quoting *Fed. R. Civ. P. 23(e)*).

As described in detail earlier, plaintiffs executed a court-approved plan to provide notice to class members that began immediately after preliminary approval of the settlement. The **[**61]** notice was designed to meet the requirements of both *Rule 23(c)* and *Rule 23(e)* and follow the procedures recommended by the *Manual for Complex Litigation* ("MCL"), 3d ed., § 30.21. The parties provided individual notice to class members who could be identified through reasonable effort by assembling a mailing list of over 12,000 potential TPP class members and sending individual notice packets to all TPPs on the list by first class mail. This was supplemented by publication of a summary notice in industry-specific journals as well as general interest newspapers and magazines. Although individual notice was not reasonable or even possible to consumers, given the large number of potential consumer class members, the best notice practicable under the circumstances was given by publishing the summary notice in newspapers and magazines which were likely to be read by potential class members and which had a combined circulation of 115 million people. The summary notice provided potential class members with an address and toll-free telephone number from which they could obtain the full notice and claims packet, as well as the website address at which they could view or download the information **[**62]** themselves.

[*253] The summary and full notice properly informed potential class members of their right to be excluded from the class, indicated that the judgment would bind all class members who did not request exclusion, and informed members who did not request exclusion that they could enter an appearance through counsel. *See* *Fed. R. Civ. P. 23(c)(2)*. In addition, the notice informed class members (1) of the nature of the pending litigation; (2) of the settlement's general terms; (3) that complete information was available from the court files; and (4) that any class members could appear and be heard at the fairness hearing. *See In re Prudential Ins. Co. of America, 962 F. Supp. 450, 527 (D.N.J. 1997)* (citing 2 H. Newberg, *Newberg on Class Actions* § 8.32 at 8-103). In sum, the notice contained all the information recommended by other courts and by the *Manual for Complex Litigation*. *See In re Prudential, 962 F. Supp. at 496*; .

MCL 3d § 30.212 Notice was also timely in that class counsel initiated publication of the summary notice within several weeks of receiving the court's approval and well in advance of the opt-out deadline and the **[**63]** fairness hearing, giving potential class members a fair opportunity to obtain the full notice, submit a Notice of Exclusion, or file objections to the settlement. To avoid duplication of mailing and distribution expenses, the notice packets also included Proof of Claim forms and specified the date by which claims had to be received. *See MCL* 3d § 30.212.

While the notice itself did not include the full text of the proposed settlement due to its length, the notice summarized the key terms of the settlement and informed class members that they could review the Stipulation of Settlement by contacting the clerk of court. *See id.* ("***HN28***[] The notice must contain a clear, accurate description of the key terms [of the settlement] and tell class members where they can examine or secure a copy.") The Stipulation was also available for viewing at the Coumadin settlement website.

The court is unpersuaded by several objectors' challenges to the adequacy of the notice. (See D.I. 205, O'Kelley Obj.; D.I. 210, Bruce Obj.; D.I. 202, Hutchinson, Jr. Obj.; D.I. 198, McCarty Obj.) Class members were informed of the nature of the litigation and the claims and defense offered by the parties as well **[**64]** as the terms of the settlement and distribution plan. They were then given the opportunity to opt out of the settlement and pursue their own litigation. The notice did not need to include details such as how much each class member might receive from the settlement (a speculative amount at that stage), the confidential "opt-out" threshold beyond which defendant reserved the right to withdraw from the settlement (irrelevant to members' opt-out decision), the estimated number of class members and total damages they might claim (available from complaint), or boilerplate release language (available in Stipulation of Settlement). The purpose of the notice was to advise class members of the general terms of the settlement and their rights, not to speculate on potential distributions, provide details of the litigation, or discuss all the factors considered in approving the settlement. Furthermore, ***HN29***[] "class members are not expected to rely upon the notices as a complete source of settlement information." *Grunin v. International House of Pancakes, 513 F.2d 114, 122 (8th Cir. 1975)*.

Based on the above, the court finds the notice satisfied the requirements of both *Rule 23(c)(2)* **[**65]** and *Rule 23(e)* and complied with the standards suggested by the *MCL* and other courts. It provided potential class members with "the information necessary to make an informed and intelligent decision whether to participate in the class and whether to object to the Proposed Settlement." *In re Prudential, 962 F. Supp. at 526*.

VI. FAIRNESS OF SETTLEMENT

A. Role of Court and Presumption of Fairness

HN30[] *Federal Rule of Civil Procedure 23(e)* provides that "[a] class action shall not be dismissed or compromised without the approval of the court. . .," thereby protecting "unnamed class members from unjust or unfair settlements affecting their rights when the representatives become fainthearted before the action is adjudicated or are able to secure satisfaction of their individual claims **[*254]** by a compromise." *Amchem, 521 U.S. at 623*. The Third Circuit has expressed a need for heightened scrutiny where a case is settled before the class has been formally certified. *In re General Motors Corp. Pick-Up Truck Fuel Tank Prods. Liab. Litig., 55 F.3d 768, 805 (3d Cir. 1995)*. The court's duty is to protect absent class members by assuring **[**66]** the settlement represents adequate compensation for the release of the class claims, a duty which some courts have described as a "fiduciary responsibility." *Id.*

Nevertheless, the Third Circuit also has held that there is an overriding public interest in settling and quieting litigation, particularly in class actions. *See Id. at 784* ("the law favors settlement, particularly in class actions and other complex cases where substantial judicial resources can be conserved by avoiding formal litigation"); *In re School Asbestos Litig., 921 F.2d 1330 at 1333* (Third Circuit's policy is to encourage settlement of complex litigation "that otherwise could linger for years").

HN31[] An initial "presumption of fairness for the settlement is established if the court finds that: (1) the negotiations occurred at arm's length; (2) there was sufficient discovery; (3) the proponents of the settlement are experienced in similar litigation; and (4) only a small fraction of the class objected." *In re Cendant Corp. Litigation, 264 F.3d 201, 232 n.18 (3d Cir. 2001)* (citing *In re General Motors, 55 F.3d 768 at 785)*.

In the case at bar, class counsel **[**67]** submitted affidavits showing the settlement resulted from intensive, arm's length negotiations between counsel for plaintiffs and defendant, in which both consumer counsel and TPP counsel fully participated. The proposed settlement came after more than three years of litigation and discovery, including review of hundreds of thousands of documents produced by defendant, numerous depositions, and consultation with experts. Counsel also declare their experience in this type of complex class action litigation, including involvement in a similar prescription drug overcharge class action for which the district court recently approved settlement. *See In re Lorazepam, supra.* Finally, only a small fraction of the class objected to the settlement, as discussed more fully below. Accordingly, the court approaches the fairness determination with a presumption that the settlement is fair.

B. *Girsh* Factors

HN32[] To determine whether the settlement is fair, reasonable, and adequate under *Rule 23(e)*, the Third Circuit applies the nine-factor test set forth in *Girsh v. Jepson, 521 F.2d 153 (3d Cir. 1975)*. *See also In re Cendant, 264 F.3d at 231*.

1. [68] Complexity, Expense and Likely Duration of Litigation**

HN33[] "This factor captures 'the probable costs, in both time and money, of continued litigation.'" *In re Cendant, 264 F.3d at 233*. Settlement is particularly favored in a complex class action such as this. Although significant discovery has already taken place, to continue this litigation through trial would require additional discovery, extensive pretrial motions addressing complex factual and legal questions, and a complicated, lengthy trial. The costs would significantly increase the substantial costs already incurred. In addition, any judgment would likely be the subject of posttrial motions and appeals, further prolonging the litigation and reducing the value of any recovery to the class.

In sum, this factor strongly supports settlement.

2. Class Reaction

HN34[] "This factor attempts to gauge whether members of the class support the settlement," although the court needs to be careful not to infer too much from a small number of objectors to a sophisticated settlement. *In re Prudential, 148 F.3d 283 at 318*. After an extensive nationwide notice program, very few class members filed objections to **[**69]** the proposed settlement: eleven from consumers or consumer groups and two from TPPs. In addition, only 136 consumers and ten TPPs opted-out of the settlement class. The court finds the low number of objections from TPPs particularly significant, because these are sophisticated businesses **[*255]** with, in some cases, large potential claims, and they could be expected to object to a settlement they perceived as unfair or inadequate. Consequently, the court finds this factor weighs in favor of settlement.

3. Stage of Proceedings and Amount of Discovery Completed

HN35[] This factor evaluates whether counsel had an adequate appreciation of the merits of the case before negotiating. *In re Cendant, 264 F.3d at 235*. "To ensure that a proposed settlement is the product of informed negotiations, there should be an inquiry into the type and amount of discovery the parties have undertaken." *In re Prudential, 148 F.3d 283 at 319*.

As described in detail earlier, class counsel pursued this litigation for over three years on several fronts before negotiating this settlement. Consumer plaintiffs filed four separate actions in federal court which were eventually coordinated in **[**70]** this court by the Multi-District Litigation Panel. Consumer counsel also engaged in substantial discovery and coordinated these efforts with other plaintiffs' counsel in related state and federal actions. Several TPPs filed separate lawsuits in federal court and worked together with the consumer plaintiffs to consolidate their actions and reach settlement with defendant. In parallel with the federal actions, plaintiffs' counsel pursued actions in several state courts, including Illinois, California, Tennessee, New York, Alabama, and Wisconsin, on behalf of consumers and TPPs.

In the course of these various federal and state actions, voluminous documents were reviewed and numerous depositions taken and motions filed. In addition, an expert was engaged in at least one of the state actions, and experts were consulted by both consumers and TPPs in conjunction with settlement negotiations. The settlement resulted from over a year of intense, arm's length negotiations between consumer counsel, TPP counsel, and defendant's counsel.

Based on the above, the court finds that counsel had an adequate appreciation of the merits of the case before negotiating and, thus, the proposed settlement **[**71]** is the product of informed negotiations. As a result, this factor strongly favors approval of the settlement at this stage of the litigation.

4. Risks of Establishing Liability

HN36[] This factor considers the potential rewards or risks if class counsel decided to litigate rather than settle. *In re Cendant, 264 F.3d at 237*. The history of litigation in federal and state courts shows the risks of establishing liability in this case, both through procedural barriers to instituting and maintaining a nationwide class action and through barriers to proving liability.

Plaintiffs advanced several theories of liability under federal and state antitrust laws, state consumer protection laws, and state common law. Defendant successfully barred consumer plaintiffs' standing, as indirect purchasers, to recover damages under the federal antitrust laws. Getting nationwide class certification under state law also presented difficulties, with one state denying class certification under the "indirect purchaser" state antitrust laws. Nevertheless, one state court has certified a nationwide consumer class under state consumer protection law and was set to consider intervention by TPPs.

[72]** If the case at bar were to proceed to trial, defendant could be expected to challenge class certification, and a class certified now could be decertified at any time later in the litigation. The defendant could also challenge the standing of TPPs and raise several other substantial defenses, including the Noerr-Pennington doctrine and *First Amendment* defenses to protect its activities lobbying state pharmaceutical boards and providing information to pharmacists, doctors, and the public.

Based on the detailed allegations in the complaint, plaintiffs have strong evidence that defendant conducted a deceptive communications campaign to convince consumers, physicians, TPPs, and others that generic warfarin sodium could not be directly substituted for Coumadin. The FDA is on record warning defendant about its communications and calling them false and misleading. Nevertheless, to prove their antitrust and consumer fraud claims, plaintiffs would **[*256]** also have to show these activities caused harm to consumers and TPPs. In this regard, the learned intermediary doctrine presents a barrier to proving that any deceptive representations made by defendant were the proximate cause of plaintiffs' injuries. **[**73]** *See*, *e.g.*, *Rivera v. Wyeth-Ayerst Laboratories, 283 F.3d 315, 321 (5th Cir. 2002)*. Under the theory, a learned intermediary such as the prescribing doctor, pharmacist, or state pharmaceutical board could be deemed to have made the critical choice about whether Coumadin or the generic was available to the consumer.

The court concludes that, on balance, this factor favors settlement, despite low risk in establishing that defendant's activities were deceptive, because of the difficulty of obtaining class certification, the strong defenses that defendant could raise to liability, and the difficulties in proving causation.

5. Risks of Establishing Damages

HN37[] "Like the fourth factor, 'this inquiry attempts to measure the expected value of litigating the action rather than settling it at the current time.'" *In re Cendant, 264 F.3d at 238* (citation omitted). In particular the court looks at the potential damage award if the case were taken to trial against the benefits of immediate settlement. *In re Prudential, 148 F.3d 283 at 319*.

Damages would likely be established at trial through "a 'battle of experts,' with each side presenting **[**74]** its figures to the jury and with no guarantee whom the jury would believe." *In re Cendant, 264 F.3d at 239*. In an affidavit, plaintiffs' damages expert, Dr. Gary L. French, [21] **[**75]** discusses the various challenges defendant has made to his damages model and how that would affect defendant's liability. (D.I. 238) For example, defendant contends that the price differential between Coumadin and generic warfarin sodium is much less than 25%; that those consumers who maintain loyalty to Coumadin would not have been injured, because defendant increased the price of Coumadin even with generic competition (relying on brand loyal customers continuing to buy Coumadin, even at higher prices); that Narrow Therapeutic Index drugs [22] such as Coumadin resist generic penetration, thus

---

[21] Dr. French states that he is a Senior Vice President of Nathan Associates Inc., an economic and management consulting firm that provides economic research and analysis to public and private clients in the United States and abroad. He holds masters and doctoral degrees in economics and has experience analyzing economic and financial issues in antitrust and other complex litigation. (D.I. 238 at PP1-3)

increasing the number of consumers who would not have switched to the generic; and that its allegedly deceptive conduct ended less than one year after the start of the damage period, thus reducing damages. (*Id.* at P11)

The court finds that this factor strongly favors settlement at this time.

6. Risks of Maintaining Class Action Status Through Trial

HN38[] *Rule 23(a)* allows a district court to decertify or modify a class at any time during the litigation if it proves to be unmanageable. *In re Prudential, 148 F.3d 283 at 321*. The risk of decertification appears to be significant in the case at bar because of the potential difficulty of managing a nationwide class action under multiple state laws and the possibility that Delaware law could not be applied to every consumer in the nation. Other courts, including the Third Circuit, have raised concerns about maintaining nationwide class actions under multiple state laws such as this. *See In re LifeUSA Holding, Inc., 242 F.3d at 147*; *Georgine, 83 F.3d at 630*; *Tylka v. Gerber Products, Co., 178 F.R.D. 493, 498 (N.D. Ill. 1998)* **[**76]** (application of 50 states' consumer fraud statutes would be unmanageable). Even if the class were maintained through the liability portion of a trial, it is likely that the class would need to be divided into subclasses for the damages portion of a trial to manage potential conflicts between consumers and TPPs and among various consumer groups.

[*257] For these reasons, this factor strongly favors settlement.

7. Ability to Withstand Greater Judgment

HN39[] This factor considers "whether the defendants could withstand a judgment for an amount significantly greater than the Settlement." *In re Cendant, 264 F.3d at 240*.

There is no evidence of record about defendant's ability to pay or whether this factored into the settlement negotiations. The court finds this factor neither favors nor disfavors settlement in this matter.

8. & 9. Range of Reasonableness of Settlement in Light of Best Possible Recovery and All Attendant Risks of Litigation

HN40[] The eighth and ninth *Girsh* factors ask "whether the settlement is reasonable in light of the best possible recovery and the risks the parties would face if the case went to trial." *In re Prudential, 148 F.3d 283 at 322*. **[**77]** The Third Circuit has counseled that "in cases primarily seeking monetary relief, the present value of the damages plaintiffs would likely recover if successful, appropriately discounted for the risk of not prevailing, should be compared with the amount of the proposed settlement." *In re General Motors, 55 F.3d 768 at 806* (citing *Manual for Complex Litigation 2d* § 30.44). These damages estimates should generate a range of reasonableness within which a district court approving or rejecting a settlement will not be set aside. *Id.* The court must keep in mind that "settlement is a compromise, a yielding of the highest hopes in exchange for certainty and resolution." *Id.*

Plaintiffs' expert, Dr. French, estimated the maximum recoverable damages in this case to be approximately $ 133.8 million. [23] (D.I. 238 at P10) This estimate assumed several things: there are 1.8 million Coumadin users in the United States; defendant's market share would have fallen from 100% in July 1997 to 50% in September 1999 and thereafter, absent its illegal conduct; generic warfarin sodium cost 25% less than Coumadin; [24] and generic

---

[22] According to the French affidavit, a Narrow Therapeutic Index drug is one in which the tolerance to the drug is so narrow that too small a dose can be useless and too large a dose can be dangerous to the patient's health. (D.I. 238 at 5 n.4)

[23] This includes $ 105.63 million in damages to Coumadin customers who would have switched to the generic, and $ 28.14 million to those who would have continued using Coumadin, based on 2.5% supracompetitive pricing for Coumadin (D.I. 238 at P10)

competition would have made defendant charge 2.5% less **[**78]** for Coumadin. (*Id.* at P9) Because defendant would have vigorously challenged the basis for plaintiffs' damages figure at trial, Dr. French also estimated that recoverable damages could be as low as $ 7.1 million. (*Id.* at P20)

Dr. French based his estimates on pricing and industry data extracted from documents produced during discovery and on information from industry sources. (D.I. 237 at P148; D.I. 280 at 7-15) After reviewing the expert report and supporting materials, **[**79]** the court concludes that Dr. French's estimate of the range of possible damages if the case were to go to trial is reasonable.

One objector argues that the damages estimate is too low because it limits the potential generic penetration rate (absent defendant's unlawful conduct) to 50%, rather than the 90% market penetration typical for generic drugs. (D.I. 207, HCSC Obj.) However, Dr. French explained that he chose the 50% penetration level because warfarin sodium is a Narrow Therapeutic Index ("NTI") drug, and NTI drugs tend to have much lower generic penetration rates than non-NTI drugs. (D.I. 238 at P14; D.I. 280 at 9-10)

Some class members also contend that the damages estimate should have taken into account the potential for treble damages under antitrust or consumer fraud statutes. Recovery of such damages is purely speculative, however, and need not be taken into account when calculating the reasonable range of recovery. *See* *Lorazepam & Clorazepate Antitrust Litig., 205 F.R.D. 369, 2002 U.S. Dist. LEXIS 5677, 2002 WL 246664*, at *4 n.12 ("***HN41***[] The standard for evaluating settlement involves a comparison of the settlement amount with the estimated single **[*258]** damages," not treble damages.) (citing *In re Ampicillin Antitrust Litig., 82 F.R.D. 652, 654 (D.D.C. 1979)* **[**80]** and *City of Detroit v. Grinnell Corp., 495 F.2d 448, 458 (2d Cir. 1974))*.

To the extent that objectors argue the settlement is not high enough because it does not allow 100% recovery of claimants' losses, the court finds these objections without merit. (D.I. 207, HCSC Obj.; D.I. 214, Bradley Obj.; D.I. 218, Tennessee Obj.) ***HN42***[] A settlement is by nature a compromise between the maximum possible recovery and the inherent risks of litigation. "The test is whether the settlement is adequate and reasonable and not whether a better settlement is conceivable." *In re Vitamins Antitrust Litig., 2000 U.S. Dist. LEXIS 8931, 2001-1 Trade Cas. (CCH) P72,862, 2000 WL 1737867*, at *2 (D.D.C. Mar. 31, 2000) (internal citation omitted). The court also notes that all class members had the opportunity to opt out of the settlement and preserve their right to independently seek full recovery of their alleged damages, if they believed they could achieve better results.

The settlement amount of $ 44.5 million represents more than 33% of the maximum possible recovery, a very reasonable settlement when compared with recovery percentages in other class actions. *See* *In re Cendant, 264 F.3d at 241* **[**81]** (approving settlement for 36% recovery and noting that typical recoveries in securities class actions range from 1.6% to 14%). Even a small percentage of the maximum possible recovery can be a reasonable settlement. ***HN43***[] "Dollar amounts are judged not in comparison with possible recovery in the best of all possible worlds, but rather in light of the strengths and weaknesses of plaintiffs' case." *In re Union Carbide Sec. Lit., 718 F. Supp. 1099, 1103 (S.D.N.Y. 1989)*. When all the risks of litigation and defendant's alternate damages calculations are also taken into consideration, the $ 44.5 million settlement amount appears to be quite reasonable.

Accordingly, the court finds the final two *Girsh* factors, together with the other *Girsh* factors, strongly support approval of the settlement.

C. Allocation and Distribution Plan

Several class members object to the fairness of the settlement allocation plan and the inclusion of TPPs and fixed co-pay consumers in the distribution.

---

[24] Dr. French also assumed that Coumadin cost each user an average of $ 23.15 per month (total sales price, including amounts paid by consumers and by TPPs). He calculated this figure by dividing $ 500 million annual Coumadin sales equally among 1.8 million Coumadin users. (D.I. 280 at 11-12)

The court observes that some of these objections arise from a misunderstanding of the settlement, with some objectors believing consumers could only recover from 18% of the settlement **[**82]** fund. (D.I. 186, Shapiro Obj.; D.I. 210, Bruce Obj.; D.I. 216, Galperin Obj.) In fact, the settlement actually prefers consumers over TPPs in that consumers get preferential access to 18% of the net settlement fund, and then share in the remaining 82% on a *pro rata* basis with the TPP claimants. Because of this preference fund, consumer claimants will receive a higher percentage of their recognized losses than will the TPPs. [25] This preference is fair for several reasons. First, consumer counsel initiated this litigation and expended much of the time and expense related to the case. Second, consumer claimants are drawn mostly from an elderly population that warrants special protection in relation to the large, sophisticated insurance companies who will be making claims as TPPs, and who can more easily bear the losses. Third, individual consumer claims are expected to be quite small in relation to the claims of TPPs, making consumers much less likely to file a claim. The consumer preference provides an incentive to encourage more consumer claims and helps prevent TPPs from collecting an unfair share of the total settlement fund.

[83]** On the other hand, it would be unfair to allow consumers to collect a disproportionate share of the settlement fund. Class counsel asserted during oral argument that, during the class period, the TPPs paid for 67% of Coumadin costs, while consumers paid for 27%, so TPPs actually bear the greater share of damages. (D.I. 267 at 62) A settlement for consumers only, if it could be achieved, would be expected to be much smaller, as the **[*259]** TPP claims against defendant would still exist.

One objector asserts that the TPPs lack standing to assert any claims under the antitrust laws, so should receive a much smaller share or none of the settlement fund. (D.I. 186, Shapiro Obj., citing *Steamfitters Local Union No. 420 Welfare Fund v. Philip Morris, Inc., 171 F.3d 912 (3d Cir. 1999))*. [26] **[**85]** While TPP standing was never formally challenged in the case at bar, the Third Circuit has already held that the consumer class members in this case have antitrust standing for injunctive relief. *In re Warfarin Sodium Antitrust Litigation, 214 F.3d 395, 402 (3d Cir. 2000)*. The TPPs are arguably in the same position as consumers in that they allegedly paid supracompetitive prices **[**84]** for Coumadin or unnecessarily paid for Coumadin instead of lower-priced generic warfarin sodium. The TPPs here, as much as the consumers, could be considered "the target of DuPont's antitrust violation," in that they were the end parties absorbing the overcharges for the drugs. *In re Warfarin, 214 F.3d at 401*. In contrast, the *Steamfitters* TPPs only suffered injury (paying for treatment of smoking-related illnesses) after physical injuries were suffered by their insureds and, thus, the TPPs' harm was derivative of the consumers' harm. Even if the TPPs do not have standing to assert direct claims, they would have subrogation claims against consumer class members, [27] as Objector Shapiro acknowledged at the fairness hearing. (D.I. 267 at 12) Inclusion of the TPPs apparently facilitated settlement, because defendant had an interest in binding all parties who had potential claims against it. (D.I. 280 at 1) If TPPs or a subclass of consumers had been excluded from the settlement, this would have left defendant vulnerable to future lawsuits or class actions.

Similar objections have been raised to including fixed co-pay consumers in the distribution of the settlement fund. (D.I. 198, McCarty Obj.; D.I. 205, O'Kelley Obj.; D.I. 210, Bruce Obj.; D.I. 216, Galperin Obj.) As discussed earlier, some class members argue that fixed co-pay consumers have not suffered any damages, because they pay the same for warfarin sodium regardless of whether it is brand name Coumadin or the generic version. These consumers should therefore be excluded from the settlement distribution. While the argument has merit, ultimately the court finds that excluding the fixed co-pay consumers at this point in the litigation cannot be justified. The fixed

---

[25] Supplemental submissions by plaintiffs show consumer claimants are likely to receive 100% of their claims, based on the number of claims received by the April 30, 2002 deadline. (D.I. 280 at 5; D.I. 281 at P5)

[26] Objector also cites *In re Rezulin Products Liability Litigation, 171 F. Supp. 2d 299 (S.D.N.Y. 2001)*, for the proposition that TPPs cannot collect damages for payments made on behalf of insureds. The case at bar can be distinguished from *Rezulin*, however, in that plaintiffs here allege economic injury due only to price overcharges, whereas the crux of the *Rezulin* claims was the marketing of a defective pharmaceutical product that caused physical injury or threat of physical injury to consumers.

[27] *See* *In re Synthroid, 264 F.3d 712 at 717* (approving settlement including class of TPPs and noting that if TPPs had not been included in distribution they could have "held back and sued [consumers] in subrogation.").

co-pay consumers arguably have claims for injunctive or other equitable relief, if not damages, and thus can expect some compensation for releasing their claims against defendant. If fixed co-pay **[**86]** consumers were excluded altogether from the settlement, they could sue defendant for damages by invoking the "collateral source" doctrine, [28] thus continuing to expose defendant to lawsuits. Moreover, to exclude fixed co-pay consumers now would require sending additional notice and a new, more complicated claim form to the consumers who have already filed claims. (D.I. 280 at 5-6) A new opportunity to opt-out of the settlement would also have to be provided. This would further delay distribution to the rest of the class and result in additional administrative costs. All these factors, plus the knowledge that all consumers who have actually filed claims are likely to recover 100% of their recognized losses, persuade the court that fixed co-pay consumers should be allowed to share in the distribution of the settlement fund.

[87] [*260]** Finally, several class members question the basis for the 15% "recognized loss" calculation imposed on claims and the use of the same "loss" figure for all claimants. (D.I. 186, Shapiro Obj.; D.I. 207, HCSC Obj.; D.I. 210, Bruce Obj.; D.I. 216, Galperin Obj.; D.I. 218, Tenn. Obj.) After reviewing plaintiffs' explanation for the 15% figure, the court accepts it as a reasonable estimate of the loss each claimant has suffered due to defendant's alleged unlawful conduct. (D.I. 280 at 15-17) Dr. French made a reasonable analysis of available data to arrive at a 25% average retail price difference between Coumadin and generic warfarin sodium and to estimate 2.5% supracompetitive pricing for Coumadin. (*Id.* at 10-11, 12-15) The plaintiffs were justified in blending the 25% that would have flowed to users who switched to generic warfarin sodium with the 2.5% overcharges owed to users who remained loyal to brand name Coumadin, because determining which claimants fit into which category would have been difficult or even impossible. Also, according to defendant, the 25% price difference used by Dr. French was too high and the actual difference was closer to 17% (D.I. 238 at P17), a figure **[**88]** very close to the 15% "recognized loss" settled on by consumer and TPP class representatives.

Plaintiffs were also reasonable in applying the 15% loss figure to claimants from all states. It is purely speculative that claimants from indirect purchaser states could anticipate a greater recovery than claimants from other states; all claimants sought damages through consumer protection statutes, some of which also provide for punitive or treble damages. Any claim for recovery of full consideration in Tennessee or Kansas (the states that allegedly would allow recovery of the full purchase price, not just the overcharge) is also speculative since the application of this rule in the context of interstate competition is uncertain. (*See* D.I. 234 at 57-58)

Based on the above, the court finds the 15% recognized loss to be a reasonable and equitable figure with which to calculate distributions to all claimants.

The court also recognizes that the plan of allocation was agreed to by both consumer and TPP class representatives only after extensive, arm's length negotiations. (D.I. 241 at P6; D.I. 240 at P22) This further supports the fairness of the overall allocation and distribution of **[**89]** the settlement fund.

D. Other Objections to Settlement

The Tennessee Objectors complain that the release of claims in the Stipulation of Settlement is too broad. (D.I. 218) The court is unpersuaded by this argument, because the release language clearly limits it to the subject matter of this litigation, that is, to claims about "the marketing, promotion and sale of Coumadin during the Class Period that were or could have been asserted" in the current litigation. (D.I. 172 at 7, 20-22)

To the extent that class members objected to the procedure by which objections could be raised, the court finds that objectors were given a full and fair opportunity to object to the settlement through written submissions and to appear and present argument at the fairness hearing, at which time the objectors could respond to the information

[28] At least one court has applied the collateral source rule to allow a consumer class to pursue the full overcharge for brand name prescription drugs in an antitrust case, even though insurance companies paid all or some of the overcharge. *See Goda v. Abbott Laboratories*, No. 01445-96, 1997 WL 156541 (D.C. Super. Ct. Feb. 3, 1997).

or arguments presented by class counsel in support of the settlement approval. The fact that a number of detailed objections were filed by the appropriate deadline shows that adequate notice and information was available to class members and potential objectors.

In conclusion, after considering all objections to the settlement, the court finds that none of **[**90]** the objections raised either in writing or orally at the fairness hearing bars approval of the settlement agreement.

VII. ATTORNEYS' FEES AND EXPENSES

Class counsel requests that the court award an aggregate attorneys' fee in the amount of twenty-five percent (25%) of the settlement fund, plus an award of litigation costs and expenses in the amount of $ 832,382.84. [29] All awards are to be paid out of the settlement fund before any distributions to the claimants.

[*261] A. Fee Analysis

HN44[] "[A] thorough judicial review of fee applications is required in all class action settlements." *In re General Motors, 55 F.3d 768 at 819*. In determining the fee award in a common-fund class action, the Third Circuit follows the percentage-of-the-recovery method. *See* *In re Cendant Corporation PRIDES Litigation, 243 F.3d 722, 734 (3d Cir. 2001)*; **[**91]** *In re Prudential, 148 F.3d 283 at 333-334*. Several nonexclusive factors are considered in determining the appropriate percentage fee: "(1) the size of the fund created and the number of persons benefitted; (2) the presence or absence of substantial objections by members of the class to the settlement terms and/or fees requested by counsel; (3) the skill and efficiency of the attorneys involved; (4) the complexity and duration of the litigation; (5) the risk of nonpayment; (6) the amount of time devoted to the case by plaintiffs' counsel; and (7) the awards in similar cases." *Gunter v. Ridgewood Energy Corp., 223 F.3d 190, 195 n.1 (3d Cir. 2000)*. "The factors . . . need not be applied in a formulaic way. Each case is different, and in certain cases, one factor may outweigh the rest." *Id.*

1. Complexity of the Litigation, Size of the Settlement, and Performance of Counsel

The court need not reiterate the complex legal and factual issues and procedural difficulties of this nationwide class action and related state cases. The litigation has already progressed for over three years on multiple fronts through motions, appeals, discovery, consolidation, **[**92]** and lengthy settlement negotiations. In addition, the litigation was entirely initiated and pursued by class plaintiffs, not as a tagalong to a government enforcement action.

As a result of their efforts, the attorneys obtained a substantial cash settlement of $ 44.5 million on behalf of the class, and approximately two million consumers and potentially thousands of TPPs are eligible to make claims. The class counsel are well-qualified to litigate this type of complex class action, and they showed their effectiveness in the case at bar through the favorable cash settlement they were able to obtain. *See* *Cullen v. Whitman Medical Corp., 197 F.R.D. 136, 149 (E.D. Pa. 2000)* ("***HN45***[] The single clearest factor reflecting the quality of class counsels' services to the class are the results obtained."). The court notes, however, that though the settlement is reasonable and adequate, it contained no guarantee of 100% compensation for class members who made claims, even with the 18% preference fund set aside for consumer claimants only.

The court finds that class counsel faced considerable contingent risk in pursuing this litigation. Counsel committed substantial time and resources **[**93]** to this litigation on a purely contingent basis, expending over 23,000 hours of work and spending $ 832,382.84 (not including hours and expenses incurred after the fee petition was submitted) without compensation and without any guarantee of receiving compensation. A reasonable percentage award must

---

[29] The original request was for $ 835,882.84, but the reported expenses were subsequently reduced by $ 3500 when detailed expense records were submitted to the court. (See D.I. 256)

compensate the contingent risks borne by counsel so as to ensure that "competent counsel continue to be willing to undertake risky, complex, and novel litigation." *Manual for Complex Litigation 3d*, § 24.121, at 191. Class counsel also submitted evidence that the typical range of contingency fee agreements negotiated by health insurance companies with their attorneys ranges from 20% to 30% of the gross recovery, though the court does not put too much weight on this factor. (D.I. 242); *see* *In re Prudential Ins. Co. Am. Sales Practice Litig., 106 F. Supp. 2d 721, 731 (D.N.J. 2000)* ("the fee percentage that likely would have been negotiated between private parties" is one factor that courts consider in setting percentage fee award).

Balanced against the favorable results for class members were several substantial objections to the settlement, particularly to the makeup **[**94]** of the class and the fairness of the settlement allocation and distribution. Class counsel could have minimized these objections in the first instance by more skillfully defining the class and by providing the court with more complete documentation and analysis supporting approval of the class and the **[*262]** settlement. [30]

Moreover, a thorough review of the supplemented record of expenses also reveals the degree of duplication of effort made by the twenty-seven different law firms involved in this litigation. The court recognizes that counsel at some point worked to coordinate the various state and federal cases, pursuing consolidation of cases where possible and coordinating document discovery and depositions in an effort to conduct the litigation efficiently. Nevertheless, there has been no effort on the part of the lawyers to explain why certain work was necessary and not **[**95]** duplicative. [31]

The court finds unpersuasive the objections lodged to the attorneys' fees themselves. ***HN46***[] The court determines a reasonable award to the class counsel in the aggregate, and the counsel then determine how to allocate the award among themselves. *See* *Spicer v. Chicago Bd. Options Exch., 844 F. Supp. 1226, 1256 (N.D. Ill. 1993)* ("Ideally, allocation of the fee award is a private matter to be handled among class counsel.") (citing Newberg, *Attorney Fee Awards* § 2.16 (1986)). Counsel asserts that there is no pre-existing agreement as to the distribution of the fee award, but that the shared understanding is that it will be based on lodestar amounts as well as other factors. **[**96]** (D.I. 236 at 19; D.I. 264 at 5) This is a private matter for the attorneys to resolve. Contrary to some objectors' concerns, there is no reason to believe that TPP and consumer counsel will collect fees in proportion to the amount of recovery for their respective clients - the settlement fund is not even allocated between TPP and consumers in such a way that would make such an attorneys' fee division possible. The court also rejects an argument that the fee should be set by auction. *See* *In re Cendant, 264 F.3d at 284 n.56* (endorsing application of *Gunter* factors to determine reasonable fee even where lead counsel is selected by auction).

2. Fee Awards in Other Cases

HN47[] Many courts, including several in the Third Circuit, have considered 25% to be the "benchmark" figure for attorney fee awards in class action lawsuits, with adjustments up or down for significant case-specific factors. *See, e.g., Manual for Complex Litigation 3d*, § 24.121 at 189; *Lazy Oil Co., 95 F. Supp. 2d 290 at 341*; *Seidman v. American Mobile Systems, 965 F. Supp. 612, 622 n. 7 (E.D. Pa. 1997)*; *Pozzi v. Smith, 952 F. Supp. 218, 225 (E.D. Pa. 1997)*. **[**97]** *Lazy Oil* found a 20-27% range of fees in cases that settled for $ 20-30 million, and noted that the percentage of the award decreases as the size of the settlement fund increases to avoid a windfall to the attorneys. *Lazy Oil Co., 95 F. Supp. 2d 290 at 322, 342* (awarding 28% of $ 18.9 million settlement fund). A New York court found that awards range from 20-30% with a benchmark of 25% for class action settlements up to $ 50 million. *In re NASDAO Market Makers Antitrust Litigation, 187 F.R.D. 465, 486 (S.D.N.Y. 1998)*. Another court found that as recoveries increased from $ 50 million, the range of attorney's fees decreased, with fees falling in a 13-20% range

---

[30] The court ordered supplementation of the record and further responses by all parties in interest to make up for this deficiency. (D.I. 273)

[31] The court is not inclined to order yet another supplemented record, and while the court is not questioning whether the expenses were actually incurred, the court has no way of divining whether the time and effort reflected in the consolidated expense record submitted was significantly related to the result.

for $ 51-75 million recoveries and a 6-10% range (or lower) for "megafund" recoveries of $ 75-200 million. *In re Domestic Air Transp. Antitrust Litig., 148 F.R.D. 297, 350-1 (N.D. Ga. 1993)*. A Minnesota court awarded 22.5% of $ 50 million recovery after eight years of litigation and extensive discovery and other proceedings, equivalent to a 2.5 lodestar multiplier. *In re Workers' Compensation Ins. Antitrust Litig., 771 F. Supp. 284 (D. Minn. 1991)*. [32]

[98] 3. Reasonable Fee**

Based on the factors discussed above, the court finds that a 22.5% percentage-of-recovery **[*263]** award is a reasonable attorneys' fee. The complexity of the case, the relatively advanced stage of litigation, the substantial cash settlement, the large number of hours expended by plaintiffs' attorneys on a contingent basis, and the fees awarded in other class actions all support a substantial fee award. Nevertheless, the duplication of effort among the twenty-seven law firms involved in this litigation and the initially inadequate submissions to the court in support of settlement approval warrant a modest reduction from the 25% benchmark fee award.

4. Lodestar Cross-check

The Third Circuit suggests that the district court cross-check the percentage award against the "lodestar" award to help ensure the reasonableness of the fee. *Gunter, 223 F.3d at 195 n.1*. ***HN48***[] The lodestar award is calculated by multiplying the number of hours reasonably worked on a client's case by a reasonable hourly billing rate for such services based on the given geographical area, the nature of the services provided, and the attorney's experience. *Id.* When performing **[**99]** the lodestar analysis as a cross check on the fee award, the court may find it sufficient to review time summaries, rather than the actual billing records. *Id. at 200* (citing *In re Prudential, 148 F.3d 283 at 332 n. 107*). Counsel in the case at bar submitted affidavits from each of the twenty-seven law firms involved in the litigation detailing the number of hours and hourly billing rate for each lawyer, paralegal, or law clerk who worked on the case. (D.I. 239, Ex. B) Each affidavit verified that an unenhanced, customary billing rate was used. Based on a review of these affidavits, the court finds that the submitted hours and hourly rates are reasonable, with the hourly rates appropriately varying based on position and experience.

When the aggregate lodestar (i.e., $ 7.54 million) is compared to the attorneys' fee award of 22.5% of the settlement fund (i.e., $ 10.01 million), the fee constitutes a lodestar multiplier of 1.33, well under the multiplier cap of 3 recently suggested in *In re Cendant Corp. PRIDES Litig., 243 F.3d 722 at 742*. The Third Circuit has also recognized that ***HN49***[] multipliers in the range of one to four are frequently awarded in common **[**100]** fund cases. *In re Prudential, 148 F.3d 283 at 341*. A modest enhancement of the lodestar amount is appropriate in this case for some of the same reasons supporting the 22.5% percentage-of-recovery fee - the risk of nonpayment and the complexity and duration of the litigation. *See id. at 340*. The court finds that the calculated lodestar fee supports the reasonableness of a 22.5% percentage-of-recovery fee award in this case.

B. Litigation Costs and Expenses Analysis

Class counsel also seek an award of litigation costs and expenses in the amount of $ 832,382.84 to be paid out of the gross settlement fund before distribution to claimants. After a thorough review of the detailed expense records submitted by class counsel (D.I. 257), the court finds that an award of $ 832,382.84 in expenses is fair and reasonable.

C. Administration Costs

---

[32] Contrary to one objector's suggestion, the case at bar is not a "megafund" case that warrants significant downward departure from the typical 20-30% fee range. *See, e.g.*, ***In re Prudential, 962 F. Supp. 450 at 585***.

The settlement administrator affirms that $ 2,058,294.60 in settlement administration costs had been incurred through May 31, 2002, including $ 1,531,106 for publication of notice to the class. (D.I. 281 at P6) The administrator estimates that an additional $ 137,875 in costs will be incurred to complete administration **[**101]** of the settlement. (*Id.*) The Stipulation of Settlement provides that all administration costs be paid out of the settlement fund. The court finds that the administration costs incurred to date are fair and reasonable. If the additional costs exceed $ 137,875 by more than 10%, the administrator shall submit an explanation for the additional requirements to the court for approval.

VIII. Motions to Intervene

Objectors HCSC (D.I. 254), Bradley et al. (D.I. 212), Cleusman et al. (D.I. 218), and McCarty (D.I. 200) filed motions to intervene. The movants' primary motivation in filing these motions to intervene is to preserve their rights to object to the settlement and appeal settlement approval. Intervention for these purposes is unnecessary in **[*264]** the Third Circuit. ***HN50***[] Objecting class members are eligible to appeal from any final order entered by the court. *See* *Carlough v. Amchem Prods., 5 F.3d 707, 710 (3d Cir. 1993)*. In addition, the court provided every class member who did not opt out with the opportunity to present argument or evidence of the unfairness of the settlement in writing and/or orally at the fairness hearing. This comported with Third Circuit law **[**102]** that "an objector . . . is entitled to an opportunity to develop a record in support of his contentions by means of cross examination and argument to the court." *Greenfield v. Villager Industries, Inc.*, 483, F.2d 824, 833 (3d Cir. 1973).

Based on the above, the court finds no reason to allow intervention under *Fed. R. Civ. P. 24(a)(2)* or *(b)(2)*. The moving objectors were adequately represented in this litigation by the named plaintiffs, and intervention at this stage of the litigation would serve no purpose except to potentially delay implementation of the settlement agreement. Thus, all motions to intervene shall be denied.

IX. CONCLUSION

After reviewing the submissions of the parties, the objections, and the record evidence, the court finds the proposed class meets the requirements of *Rule 23* and therefore certifies the proposed class for purposes of settlement. The court also finds the stipulated settlement is fair, reasonable, and adequate and grants approval under *Rule 23(e)*. The court awards attorneys' fees in the amount of 22.5% and expenses in the amount of $ 832,382.84. Finally, all motions to intervene shall be denied. An appropriate order shall issue.

[103] ORDER**

At Wilmington, this 30th day of August, 2002, consistent with the opinion issued this same day;

IT IS ORDERED that:

1. Plaintiffs' motion for final approval of a proposed class action settlement agreement (D.I. 233) is granted. The following class is certified for purposes of settlement:

> All consumers and Third Party Payors in the United States who purchased and/or paid all or part of the purchase price of Coumadin dispensed pursuant to prescriptions in the United States during the period March 1, 1997 through and including August 1, 2001 ("Class Period"). Excluded from the Class are Defendant and any of its officers and directors, and any governmental entity. "Third Party Payor" shall mean any non-governmental entity that is (i) a party to a contract, issuer of a policy, or sponsor of a plan, which contract, policy or plan provides prescription drug coverage to natural persons, and is also (ii) at risk, pursuant to such contract, policy or plan, to provide prescription drug benefits, or to pay or reimburse all or part of the cost of prescription drugs dispensed to natural persons covered by such contract, policy, or plan.

The parties are hereby directed **[**104]** to implement and consummate the Stipulation of Settlement (D.I. 172) according to its terms and provisions. The parties are authorized to agree to and adopt such amendments and modifications to the Stipulation as (i) shall be consistent in all material respects with this final order and (ii) do not limit the rights of the class members.

2. The terms of the Stipulation, including all exhibits thereto, and of this final order and judgment, shall forever be binding on, and shall have res judicata and claim preclusive effect in, all pending and future lawsuits maintained by or on behalf of, plaintiffs and all other class members, as well as their heirs, executors, administrators, successors, and assigns.

3. Without affecting the finality of this order and judgment, the court retains continuing and exclusive jurisdiction over all matters relating to the administration, consummation, enforcement, and interpretation of the Stipulation and this order and judgment, to protect and effectuate this final order and judgment, and for any other necessary purpose.

4. Plaintiffs' motion for an award of attorneys' fees and expenses (D.I. 235) is granted, with attorneys' fees awarded in the amount **[**105]** of 22.5% of the settlement fund and expenses **[*265]** in the amount of $ 832,382.84 to be paid to the Co-Chairs of the Executive Committee out of the settlement fund in accordance with the terms of the Stipulation of Settlement, together with interest thereon from the date of entry of this Final Order and Judgment to the date of payment out of the Settlement Fund at the rate earned by the Settlement Fund during such period. Co-Chairs of the Executive Committee shall allocate and distribute such awards among plaintiffs' counsel.

5. Objectors' HCSC (D.I. 254), Bradley et al. (D.I. 212), Cleusman et al. (D.I. 218), and McCarty (D.I. 200) motions to intervene are denied.

6. Objector Shapiro's motion to strike document (D.I. 261) and motion to require lead counsel to disclose fee arrangements (D.I. 262) are denied.

7. Objector Hansen's motions for enlargement of time to file objection (D.I. 246, D.I. 247) are denied.

8. This action is hereby dismissed, on the merits, with prejudice, against the plaintiffs and all other class members.

Sue L. Robinson

United States District Judge

Avery Dennison Corp. v. Four Pillars Enter. Co.

Evidence > ... > Testimony > Examination > Judicial Interrogation

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN3[] **Expert Witnesses, Daubert Standard**

A court examines expert witness testimony, under *Fed. R. Evid. 702*, for reliability and relevance. Under the Daubert standard, judges are to serve a gatekeeper function with respect to such expert testimony. Daubert sets forth a non-exclusive checklist for trial courts to use in assessing the reliability of scientific expert testimony. The specific factors explicated by Daubert are (1) whether the expert's technique or theory can be or has been tested; (2) whether the technique or theory has been subject to peer review and publication; (3) the known or potential rate of error of the technique or theory when applied; (4) the existence and maintenance of standards and controls; and (5) whether the technique or theory has been generally accepted in the scientific community. The list is not exclusive: courts have found, for example, that experts pass Daubert screening if they are proposing to testify about matters growing naturally and directly out of research they have conducted independent of the litigation. The Daubert analysis has been extended to non-scientific expert testimony.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN4[] **Expert Witnesses, Daubert Standard**

Pursuant to Daubert analysis, the focus must be solely on principles and methodology, not on the conclusions they generate. However, the two are not unrelated. A court may question the validity of an expert's testimony when he uses accepted methods to achieve highly anomalous results. *Fed. R. Evid. 702*, advisory notes. For this reason, *Fed. R. Evid. 702* explicitly states that the court must review whether or not the methods are reliably applied to the facts of the case. Although the court should confirm that the factual underpinnings of the expert's opinion were sound, vigorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof are the traditional and appropriate means of attacking shaky but admissible evidence.

Evidence > ... > Testimony > Expert Witnesses > General Overview

Evidence > ... > Testimony > Lay Witnesses > General Overview

Evidence > ... > Lay Witnesses > Opinion Testimony > Nonspecialized Knowledge

HN5[] Testimony, Expert Witnesses

Fed. R. Evid. 701 was amended in 2000 to prohibit lay opinion testimony that was based on scientific, technical or other specialized knowledge within the scope of *Fed. R. Evid. 702*. *Fed. R. Evid. 701* (2001). The amendment was to eliminate the risk that the reliability requirements set forth in *Rule 702* will be evaded through the simple expedient of proffering an expert in lay witness clothing. *Fed. R. Evid. 701*, advisory notes.

Evidence > Admissibility > Expert Witnesses > Daubert Standard

Evidence > Admissibility > Scientific Evidence > Standards for Admissibility

Evidence > ... > Testimony > Expert Witnesses > General Overview

HN6[] Expert Witnesses, Daubert Standard

Although a court is required to act as a gatekeeper, and should protect the jury from scientifically unsound testimony, there is no requirement that a judge hold a formal Daubert hearing. The judge must simply keep watch over the proceedings, and, with the aid of objections from council, eliminate methodologically unsound or irrelevant expert testimony.

Trade Secrets Law > ... > Remedies > Damages > Compensatory Damages

Trade Secrets Law > Misappropriation Actions > Elements of Misappropriation > General Overview

Trade Secrets Law > Misappropriation Actions > Elements of Misappropriation > Use

HN7[] Federal Versus State Law, *Antitrust Law*

Damages in trade secrets cases are difficult to calculate, because the offending company has mixed the profits and savings from increased quality and quantity of products, as well as savings from reduced research costs of research and production, with its own natural profits. When the misappropriated trade secret is used to field competing products, the best measure of damages is the plaintiff's lost profits or the defendant's illicit gains.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Trade Secrets

Trade Secrets Law > ... > Remedies > Damages > Royalties

Trade Secrets Law > ... > Remedies > Damages > General Overview

HN8[] Trade Secrets & Unfair Competition, Trade Secrets

The Uniform Trade Secrets Act, as enacted by Ohio, reads: Except to the extent that a material and prejudicial change of position prior to acquiring knowledge or reason to know of misappropriation renders a monetary recovery inequitable, a complainant in a civil action is entitled to recover damages for misappropriation. Damages may include both the actual loss caused by misappropriation and the unjust enrichment caused by misappropriation that is not taken into account in computing actual loss. In lieu of damages measured by any other methods, the damages caused by misappropriation may be measured by imposition of liability for a reasonable royalty that is equitable under the circumstances considering the loss to the complainant, the benefit to the misappropriator, or both, for a misappropriator's unauthorized disclosure of a trade secret. *Ohio Rev. Code Ann. § 1333.63(A)* (1994).

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Trade Secrets

HN9[] **Trade Secrets & Unfair Competition, Trade Secrets**

Ohio Rev. Code Ann. § 1333.68 instructs courts to construe the provisions of Ohio's Uniform Trade Secrets Act to effectuate their general purpose to make uniform the law with respect to their subject among states enacting them.

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Trade Secrets

Trade Secrets Law > ... > Remedies > Damages > General Overview

HN10[] **Trade Secrets & Unfair Competition, Trade Secrets**

Where a trade secret has not been destroyed and where the plaintiff is unable to prove specific injury, courts measure the value of the secret to the defendant. If the benefit to the defendant in terms of direct profits is not ascertainable, damages may be awarded based on the value to the defendant of the secret at the time of misappropriation, the value derived from savings because of increased productivity, or the value derived from savings in research costs. An increase in productivity a proper basis for damages for misappropriation of trade secrets.

Judges: BEFORE: RYAN and BOGGS, Circuit Judges; and HAYNES, District Judge. *

Opinion

[*481] PER CURIAM. Four Pillars (FP) appeals the jury verdict and the district court's denial of judgment as a matter of law and *remittitur* in this combined RICO and state law action for misappropriation of trade secrets, unjust enrichment, civil conspiracy, unfair competition, and conversion brought by Avery Dennison Corporation. FP argues that the district court abused its discretion by failing to screen the methodologies and factual foundations of Avery's witnesses **[**3]** for scientific acceptability. FP also asserts that the judge abused his discretion **[*482]** by not severing the trial of co-conspirator Tenhong Lee from the FP trial. Finally, FP alleges that the jury award of both state-law and RICO damages was improperly duplicative, that the judge incorrectly determined that the jury meant to impose damages separately for misappropriation and for other state law claims, that the jury verdict was excessive, and that the judge erred in failing to grant a *remittitur* of damages.

Because the "facts" that FP believes the district court should have reviewed for scientific veracity are rather the underlying questions of liability in the case, we affirm the decision of the district court to allow the expert witness testimony. We also affirm the district court's refusal to sever the trial, because defendants did not join the motion to sever when it was originally made. Finally, we affirm the jury verdict as correctly calculated, and affirm the district court's decision to refuse *remittitur,* because the jury verdict was not based on mistake or so excessive as to shock the conscience.

II

Avery Dennison is the world leader in the creation of pressure-sensitive **[**4]** adhesive labels; the company invests considerable time and effort in researching new adhesive products. In 1996, Avery discovered that FP, a Taiwanese competitor, was paying Avery scientist Dr. Tenhong Lee to provide FP with Avery adhesive formulas, manufacturing techniques, product specifications, and other fruits of Avery's research.

Avery contacted the FBI. The FBI confronted Lee after they videotaped him stealing confidential Avery documents. Lee confessed to stealing Avery formulas and other confidential information for eight years, and passing them on to FP.

On September 4, 1997, the FBI arranged and videotaped a meeting between Lee, P.Y. Young, Chairman of FP, and Sally Yang, an FP manager. The videotape showed Young accepting Avery confidential materials, removing Avery's confidential markings from the materials, and discussing how Four Pillars could use the information, and what sorts of thefts Lee should make next. Young and FP were convicted of conspiracy and attempt to violate the Economic Espionage Act, *18 U.S.C. § 1832(a)(4)*,*(5)*.

Avery then brought suit against Lee and FP for (1) violation of the Racketeer Influenced and Corrupt Organization **[**5]** Act (RICO), *18 U.S.C. §§ 1962(c)* and *1964(c)*; (2) conspiracy to violate RICO; (3) conspiracy; (4) misappropriation of trade secrets; (5) unfair competition; (6) conversion; and (7) unjust enrichment. Avery also sued Lee for fraud. Avery settled with Lee before trial. The settlement was partial: Lee conceded liability, and Avery agreed to limit the damages for which Lee could be held accountable to $ 160,000. Lee also agreed, as part of the settlement, to testify on Avery's behalf as to the nature and extent of the conspiracy.

At trial, Avery produced expert and lay testimony in support of its claim that FP used Avery manufacturing procedures (compounding specifications) and formulas in making and modifying adhesive products, and in

* The Honorable William J. Haynes, United States District Judge for the Middle District of Tennessee, sitting by designation.

overhauling its research and manufacturing methods. FP did not produce exact copies of Avery products, nor did it bring directly competing products to market; rather, as Young stated on the FBI videotape, "as a research institute, we do not need to copy the thing. We can modify it." In all, FP misappropriated 71 formulas and matching manufacturing instructions for Avery products. FP made multiple copies of these formulas, and attempted **[**6]** to reproduce the formulas. FP **[*483]** successfully copied Avery's S-246 flagship label adhesive, and modified it. Five copies of the compounding specification for S-246 and four copies of an S-246 laboratory notebook page were in FP's files. FP also received research memoranda concerning upcoming products and Avery's newly developed "high speed release" manufacturing techniques. Lee gave FP two Avery research reports, multiple copies of which were found in FP's files. Lee stressed to FP that the reports were/ "extremely confidential" and were the "fruit of painstaking work of Avery Research Center over a period of several years." FP obtained copies of a confidential Avery report on 5-roll coating; FP purchased a 5-roll coater and used it to create new products.

FP also obtained and used Avery's specifications for the paper used in its adhesive labels. FP introduced new thermal label products after Lee provided it with thermal label paper specifications and supplier information. Lee also provided FP with Avery's test methods. FP removed references to Avery, and distributed the methods for use in its R&D laboratory.

Based on their opinions that FP had misappropriated Avery secrets, Avery's **[**7]** witnesses proposed several theories for the calculation of damages to which FP objected. John Neels, an Avery damages witness, presented three theories of recovery: defendant's profits, defendant's avoided costs, and reasonable royalty.

The jury returned a verdict in Avery's favor. The verdict included $ 10 million on Avery's RICO claims; $ 10 million on the misappropriation claim; $ 10 million on the civil conspiracy and conversion claims; $ 25 million in punitive damages; $ 5 million against Young personally; and $ 160,000 against Lee. The district court tripled the RICO award under *18 U.S.C. § 1964(c)*. The total jury verdict was for $ 81,358,110, including attorneys' fees and costs. FP then appealed the matter to this court.

A. *Daubert* and Expert Testimony

HN1[] We review a district court's ruling on the admissibility of expert testimony for an abuse of discretion. *Kumho Tire Co. v. Carmichael, 526 U.S. 137, 152, 143 L. Ed. 2d 238, 119 S. Ct. 1167 (1999)*. ***HN2***[] *Rule 702 of the Federal Rules of Evidence* states:

> If scientific, technical or other specialized knowledge will assist the trier of fact to understand the evidence or to **[**8]** determine a fact in issue, a witness qualified as an expert by knowledge, skill, experience, training, or education, may testify thereto in the form of an opinion or otherwise, if (1) the testimony is based upon sufficient facts or data, (2) the testimony is the product of reliable principles and methods, and (3) the witness has applied the principles and methods reliably to the facts of the case.

HN3[] A court examines expert witness testimony, under *Rule 702*, for reliability and relevance. In *Daubert v. Merrell Dow Pharmaceuticals, 509 U.S. 579, 125 L. Ed. 2d 469, 113 S. Ct. 2786 (1993)*, the Supreme Court held that judges are to serve a gatekeeper function with respect to such expert testimony. *Daubert* set forth a non-exclusive checklist for trial courts to use in assessing the reliability of scientific expert testimony. *Fed. R. Evid. 702* (advisory notes). "The specific factors explicated by the *Daubert* court are (1) whether the expert's technique or theory can be or has been tested; (2) whether the technique or theory has been subject to peer review and publication; (3) the known or potential rate of error of the technique or theory when applied; (4) the **[**9]** existence and maintenance of standards and controls; and (5) whether the technique or theory has been generally accepted in the scientific community." *Ibid.* The list is not exclusive: **[*484]** courts have found, for example, that experts pass *Daubert* screening if they are "proposing to testify about matters growing naturally and directly out of research they have conducted independent of the litigation …." *Daubert v. Merrell Dow Pharmaceuticals, Inc., 43 F.3d 1311, 1317 (9th Cir. 1995)*. In *Kumho Tire Co. v. Carmichael, 526 U.S. 137, 143 L. Ed. 2d 238, 119 S. Ct. 1167 (1999)*, the Supreme Court extended the *Daubert* analysis to non-scientific expert testimony.

HN4[] *Daubert* held that the "focus, of course, must be solely on principles and methodology, not on the conclusions they generate." Daubert, 509 U.S. at 595. However, the two are not unrelated. A court may question the validity of an expert's testimony when he uses accepted methods to achieve highly anomalous results. Fed. R. Evid. 702 (advisory notes). For this reason, Rule 702 explicitly states that the court must review whether or not the methods are reliably applied to the **[**10]** facts of the case. Our precedent indicates that the court should confirm that "the factual underpinnings of the expert's opinion were sound." Greenwell v. Boatwright, 184 F.3d 492, 498 (6th Cir. 1999). However, vigorous cross-examination, presentation of contrary evidence, and careful instruction on the burden of proof are the traditional and appropriate means of attacking shaky but admissible evidence. Daubert, 509 U.S. at 596.

Federal Rule of Evidence 701 governs the testimony of lay witnesses. At the time of trial, the Rule read:

> If the witness is not testifying as an expert, the witness' testimony in the form of opinions or inferences is limited to those opinions or inferences which are (a) rationally based on the perception of the witness and (b) helpful to a clear understanding of the witness' testimony or the determination of a fact in issue.

After the trial, **HN5**[] Rule 701 was amended in 2000 to prohibit lay opinion testimony that was "based on scientific, technical or other specialized knowledge within the scope of Rule 702." Fed. R. Evid. 701 (2001). The amendment was to "eliminate the risk that the reliability requirements set **[**11]** forth in Rule 702 will be evaded through the simple expedient of proffering an expert in lay witness clothing." Fed. R. Evid. 701 (advisory notes).

HN6[] Although a court is required to act as a gatekeeper, and should protect the jury from scientifically unsound testimony, there is no requirement that a judge hold a formal *Daubert* hearing. Greenwell v. Boatwright, 184 F.3d 492 (6th Cir. 1999). The judge must simply keep watch over the proceedings, and, with the aid of objections from council, eliminate methodologically unsound or irrelevant expert testimony.

1. Lay Testimony: Decoding Avery Formulas

At trial, Avery presented testimony by one of its employees, Norman Conti. Conti's testimony consisted, in large part, of explaining the code used by Avery to protect its formulas. Essentially, two documents were needed in order to use an Avery formula. The ingredients list was kept separate from the formulas, so that a person stealing a formula would know the chemical amounts, but not the ingredients, to use in creation of the product. Conti explained how to read the code, and also testified as to whether handwritten notations on the formula pages indicated **[**12]** that someone at FP had tried to decode or modify the formulas. Conti also testified as to the cost of developing a new adhesive, based on his work on some of the adhesives that had been stolen. Conti was offered as a lay witness under the old Rule 701. The district court permitted Conti to **[*485]** testify about the attempts of FP to decode and modify the Avery formulas, and the cost of development of Avery formulas based on "things he knows from his experience and work."

FP argues that the court should have excluded Conti's testimony under *Daubert* even though Conti was properly admitted to testify as a lay witness under the then-governing Rule 701. It is an open question whether, prior to the amendment of Rule 701, such sophisticated lay testimony even fell under Rule 702's requirement that a court act as the arbiter of scientific reliability and relevance. However, we need not answer that question to decide this case. Assuming that *Daubert* applies, we find no reason that the district court should have excluded Conti's testimony on the grounds that it lacked either reliability or relevance.

FP offers no challenge at all to the reliability or the relevance of Conti's statements, rather, **[**13]** it chooses to challenge his conclusions. FP argues that Conti's estimation of the cost of creation of an Avery product should have been excluded under *Daubert.* Because the cost of the product was estimated rather than "proven," they argue, Conti's estimation was insufficiently reliable to meet the *Daubert* standard. This is not a valid basis for contesting Conti's testimony. Greenwell, 184 F.3d at 497-98 ("[Plaintiffs] challenge the inferences made by the expert and the jury from [expert] evidence. The testimony cannot be excluded on those grounds."). Conti testified that he relied on his personal knowledge, review of project plans, salary information, and interviews of Avery employees with experience in adhesive development. The estimate was not groundless. FP had and took the opportunity to cross-examine Conti extensively on the weaknesses of his testimony at trial; under *Daubert,* that is the proper way to challenge expert witness testimony that is weak, rather than methodologically unsound or irrelevant. [Daubert, 509 U.S. at 596].

We find Conti's testimony both relevant and reliable. Conti's testimony was directly relevant to the **[**14]** central question of the case: whether FP was able to make use of the stolen technology. Further, there is no serious challenge to the reliability of Conti's methodology. He was intimately familiar with the Avery code system, and his explanation of the code system helped the jurors to understand a key portion of the physical evidence before them. His product cost estimates were not based on speculation, but on personal experience developing Avery products. Because Conti's testimony was both reliable and relevant, we find no abuse of discretion in the district court's judgment that such testimony should be allowed to go before the jury.

2. Damages Calculations for Misappropration of Trade Secrets.

HN7[] Damages in trade secrets cases are difficult to calculate, because the offending company has mixed the profits and savings from increased quality and quantity of products, as well as savings from reduced research costs of research and production, with its own natural profits. *See* Michael A. Rosenhouse, *Proper Measure and Elements of Damages for Misappropriation of Trade Secrets,* 11 A.L.R. 4th 12 (1982). When the misappropriated trade secret is used to field **[**15]** competing products, the best measure of damages is the plaintiff's lost profits or the defendant's illicit gains. However, where the misappropriated secrets were not directly used to field competing products, but were used, for example, to save research and manufacturing resources, plaintiffs have used a number of different methods of calculation to determine damages.

[*486] ***HN8***[] The Uniform Trade Secrets Act, as enacted by Ohio, reads:

> Except to the extent that a material and prejudicial change of position prior to acquiring knowledge or reason to know of misappropriation renders a monetary recovery inequitable, a complainant in a civil action is entitled to recover damages for misappropriation. Damages may include both the actual loss caused by misappropriation and the unjust enrichment caused by misappropriation that is not taken into account in computing actual loss. In lieu of damages measured by any other methods, the damages caused by misappropriation may be measured by imposition of liability for a reasonable royalty that is equitable under the circumstances considering the loss to the complainant, the benefit to the misappropriator, or both, for a misappropriator's unauthorized **[**16]** disclosure of a trade secret.

O.R.C. 1333.63(A) (West 1994). Scant Ohio caselaw interprets this section. However, ***HN9***[] *O.R.C. 1333.68* instructs us to construe the provisions of the Act "to effectuate their general purpose to make uniform the law with respect to their subject among states enacting them." We therefore draw on the law of other jurisdictions as well to aid us in construing the Ohio statute.

HN10[] Where a trade secret has not been destroyed and where the plaintiff is unable to prove specific injury, courts measure the value of the secret to the defendant. *See, e.g., University Computing Co. v. Lykes-Youngstown Corp., 504 F.2d 518, 535-36 (5th Cir. 1974)*. If the benefit to the defendant in terms of direct profits is not ascertainable, damages may be awarded based on the value to the defendant of the secret at the time of misappropriation, the value derived from savings because of increased productivity, or the value derived from savings in research costs. *Ibid.* (increase in productivity a proper basis for damages for misappropriation of trade secrets); *Reinforced Molding Corp. v. General Electric Co., 592 F. Supp. 1083 (W.D. Pa. 1984)* **[**17]** (same).

In this case, FP did not use the stolen trade secrets to bring directly competing products to market. Rather, FP used the Avery secrets to create a panoply of new products, save significantly on time and resources devoted to research, and streamline their manufacturing processes. Avery's theories of damages therefore concentrated on the benefits that FP derived from the use of the secrets. John Neels, an economist and Avery's damages expert, presented three theories of damages: reasonable royalty, defendant's profits, and defendant's avoided costs. [1]

---

[1] Neels also discussed a damages theory, termed "loss of control," that sought to recapture damages sustained by Avery as a result of the fact that Avery no longer controlled the formulas and technologies. The idea is simple -- Avery is diminished

[18]** FP moved *in limine* to exclude Neels's testimony, based on its reading of *Daubert.* The court considered Neels's testimony in light of *Daubert,* and determined that Neels's methods of damage calculation were relevant and reliable enough to go before the jury. FP argues here that Neels's testimony was inadmissible as scientifically unreliable, under *Daubert,* because his calculations proceeded from **[*487]** several assumptions: that FP misappropriated trade secrets from Avery, that FP used and modified such technology, and that the use of the stolen Avery technology saved FP money. Although a *Daubert* challenge may certainly include arguments that the expert theory is invalid because it has no basis in fact, we do not conclude that the district court abused its discretion by determining that Neels's theories were sufficiently factually supported. The "facts" challenged by FP here are not scientific facts to be evaluated under *Daubert,* but are rather the central questions of liability in the case, which were properly presented to the jury.

Finally, FP points out that ***HN11***[] a reasonable royalty may not be used as a damages method where no evidence of commercial use was established. **[**19]** FP's definition of commercial use is unduly restrictive. The concept of commercial use is not limited to the fielding of directly competing products. *See, e.g.,* *University Computing, 504 F.2d at 536-37* (damages based on benefit to the defendant proper, on a "reasonable royalty" theory, when the defendant never successfully brought the product to market). Rather, ***HN12***[] courts seeking to establish a reasonable royalty measure the value of the secret to the defendant at the time that it was misappropriated, regardless of the commercial success of the enterprise. *Ibid.* Here, FP did not directly copy Avery's products; rather, it modified Avery formulas, and used Avery's manufacturing specifications to cut their own research time and streamline its manufacturing processes. Avery was not required to produce evidence of direct product copying. *See, e.g.,* *Pioneer Hi-Bred Int'l v. Holden Found. Seeds, Inc., 35 F.3d 1226, 1239 (8th Cir. 1994)* ("***HN13***[] The fact that [a defendant] may have altered [a trade] secret does not insulate it from liability."). Avery presented relevant and admissible evidence showing that FP valued, deciphered, modified, and used Avery trade **[**20]** secrets; it was not required to do more. [2] We therefore conclude that the district court's decision to allow the testimony was within its discretion.

[21]** 3. Severance

Lee, Young, and FP were all defendants in the trial. Lee concluded a settlement agreement with Avery pursuant to which he testified to the nature and extent of the theft of Avery's trade secrets by the conspirators. On appeal, FP asserts that the district court should have severed the trial, because Lee's testimony prejudiced the jury against FP. As a preliminary matter, FP's arguments on this issue are not properly before us: the original motion for severance was made by Lee, because he believed he was insufficiently prepared for trial. ***HN14***[] FP's argument, that the trials should have been severed because of undue prejudice to FP, was not presented to the district court; the issue was therefore not preserved for appeal. *Thurman v. **[*488]** Yellow Freight Sys., Inc., 97 F.3d 833, 835 (6th Cir. 1996)*.

Further, Lee has not appealed. Even were we to determine that he was not properly a party below, we would not dismiss claims against a party who has decided not to appeal. Finally, because there would be no reason to exclude Lee's testimony in a separate trial, the dismissal of Lee as a party would have had no impact on the testimony offered against Four Pillars.

---

because FP can pass Avery secrets and technologies on to even more competitors. Neels did not place a specific monetary amount on this loss. FP argues that this brief discussion of "loss of control" allowed the jury to engage in open ended speculation as to the amount of damages. The theory was not pursued, however, except to the extent that Neels's reasonable royalty calculation took into account the open-ended nature of the hypothetical license agreement in determining a $ 73 million amount.

[2] In relation to this argument, FP alleges that Avery did not state with specificity which trade secrets were misappropriated, or tie them to any FP products. They base this claim on the district court's statement that it was impossible to determine which items were found to be trade secrets. This is a misquotation of the record. The court denied Avery's Application for Injunctive Relief, filed after trial. In so doing, the court stated: "It is certain from the Jury's Answers to Interrogatories and the General Verdict that Four Pillars or P.Y. Young made use of trade secrets, but it is uncertain which items specifically were found to be trade secrets." In denying injunctive relief, therefore, the court merely admitted that it was unable to determine which trade secrets the jury had relied on in making their findings, not that Avery had made an insufficient showing of FP's use of stolen Avery technologies.

[22]** 4. RICO and State-Law Damages.

FP appeals the denial of its motion to amend the judgment, based on the argument that Avery could not recover for both RICO and state-law claims. The district court held that Avery was entitled to recover for both types of claims.

The question is not settled in this circuit. FP argues that the district court erred by imposing damages for both the RICO violation and for state-law misappropriation. The jury found FP liable both for RICO violations and for various state law claims. FP argues that recovery for both RICO and state-law violations is an "impermissible double recovery." FP cites several unpublished cases for the proposition that RICO damages and state-law damages may not be recovered for the same alleged conduct. *See, e.g., AIG Aviation, Inc. v. Boorom Aircraft, Inc., 142 F.3d 431, 1998 U.S. App. LEXIS 2143 (6th Cir. 1998)* (unpublished) ("We note that there is no reason for the jury or the district court to fear a double recovery. Just as these are alternative claims, the damages are alternative as well; AIG will recover the larger of either the state-law damages **[**23]** or the RICO damages.").

However, as the district court noted, because the claims in *AIG were* alternative, the question of whether or not non-alternative claims could yield two damage awards based on the same conduct was not presented to the *AIG* panel. Noting the unpublished nature of the *AIG* decision, the district court instead adopted as its guide the Ninth Circuit's opinion in *Neibel v. Trans World Assurance Co., 108 F.3d 1123, 1130 (9th Cir. 1997)*. *Neibel* stated: "we cannot ignore the text of ***HN15***[] RICO itself, which states: 'Nothing in this title shall supersede any provision of Federal, State, or other law imposing criminal penalties or affording civil remedies in addition to those provided for in this title.'" *Neibel, 108 F.3d at 1130*.

We agree with *Neibel* and the district court. Congress intended RICO to impose stringent civil penalties on organized illegal activity, above and beyond state-law remedies already available. There is no barrier to applying RICO as written; we therefore adopt the reasoning of *Neibel* and do so.

5. Calculation of State-law Claims

FP alleges that the district court erred in interpreting **[**24]** the jury verdict to impose $ 10 million for misappropriation of trade secrets, and a separate $ 10 million for civil conspiracy, conversion, and other state-law claims. The jury's responses to interrogatories were recorded on a verdict form. FP argues that the headings for two of the claims categories are confusing: the first interrogatory asks what damages to be allocated for misappropriation of trade secrets; the later interrogatory asks what damages should be ascribed to misappropriation of trade secrets along with conversion and civil conspiracy.

HN16[] Courts faced with apparent incongruities in a jury verdict construe the jury's decision to form a whole that expresses a coherent and reasonable view of the case. *Morales v. American Honda **[*489]** Motor Co., 151 F.3d 500, 509 (6th Cir. 1998)*. FP argues that the jury imposed $ 10 million for misappropriation of trade secrets, and then recorded that same $ 10 million under a heading entitled "Civil Conspiracy and/ or Misappropriation and/ or Unfair Competition and/ or Conversion." FP essentially treats the later damages line as a sum of the previous headings.

Avery argues that the jury meant to award two $ 10 million awards, the **[**25]** first for misappropriation, and the second for the other state law claims. Avery's position draws support from the verdict form: the jury found FP specifically liable on the conspiracy, conversion, and unfair competition claims. On each previous, unmixed count (RICO and misappropriation), the jury had found FP liable for $ 10 million. There was no other place in the interrogatories to record a damages amount for conversion and civil conspiracy.

We note that neither party objected to the verdict form beforehand, despite the obvious strangeness of a form that contained no independent damages line for several causes of action, and included misappropriation in two headers. The district court's determination that the jury intended to award $ 10 million for the other state law counts was reasonable, and gave effect to each part of the jury's verdict.

6. Remittitur

HN17[] We review the district court's denial of *remittitur* for abuse of discretion. *Gregory v. Shelby County, 220 F.3d 433, 443 (6th Cir. 2000)*. FP argues that the district court abused its discretion in failing to reduce the jury verdict amount. A jury verdict is properly reduced when, viewing all of **[**26]** the evidence in the light most favorable to the plaintiff, the court finds that the verdict is "clearly excessive, resulted from passion, bias or prejudice; or is so excessive or inadequate as to shock the judicial conscience of the court." *Gregory, 220 F.3d at 443*.

HN18[] Under Ohio law, punitive damages may be awarded in a trade secret case if the plaintiff establishes that the defendant acted with malice. *Pyromatics v. Petruziello, 7 Ohio App. 3d 131, 7 Ohio B. 165, 454 N.E.2d 588 (1983)*. Malice does not require, however, an intent to injure. *Malone v. Courtyard by Marriott Ltd. Partnership, 74 Ohio St. 3d 440, 659 N.E.2d 1242 (Ohio 1996)*. The element of malice can be established by proof of conscious, deliberate, or intentional wrongdoing, or by showing that the defendant had a conscious disregard for the rights of other persons. *Malone, 659 N.E.2d at 1247-48*.

FP makes two related arguments. First, FP points out that the jury found that FP did not act with intent to injure Avery's business. FP incorrectly asserts that this precludes a finding by the jury that FP acted with malice. As noted above, intent to injure is not a requirement of malice under Ohio law. **[**27]** Second, FP argues that the verdict is excessive in light of the evidence. The jury had before it evidence that FP conspired with Lee to steal many millions of dollars worth of research and development, manufacturing techniques, product specifications, formulas, and even information about suppliers. The jury was presented with detailed testimony regarding Avery's costs of research, and the degree to which Avery technologies were converted and used by FP. Given the longstanding and organized nature of the misappropriation, the jury was justified in its damages award.

Finally, FP asserts that *remittitur* was required, because the punitive damages award was almost double the net worth of Four Pillars. FP argues that the only evidence at trial of FP's ability to pay was Avery testimony estimating the net worth **[*490]** of FP at $ 13-15 million. *HN19*[] However, Avery is not required to put on testimony regarding FP's ability to pay; if FP wishes *remittitur,* it is incumbent upon it to provide the numbers. *See, e.g., Kemezy v. Peters, 79 F.3d 33, 36 (7th Cir. 1996)* ("It ill becomes defendants to argue that plaintiffs must introduce evidence of the defendant's wealth.").

The jury **[**28]** verdict was supported by the evidence, and was commensurate with the acts for which the jury found FP liable. The verdict neither shocked the conscience, nor was the product of mistake. The district court did not, therefore, abuse its discretion in refusing *remittitur.*

III

For the above reasons, we AFFIRM the district court's refusal to grant defendants summary judgment, a new trial, an amendment of the verdict, or *remittitur.*

HN9[] **Private Actions, Racketeer Influenced & Corrupt Organizations**

In the context of a civil case under the Racketeer Influenced and Corrupt Organizations Act (RICO), *18 U.S.C.S. §§ 1961-1968*, different standards govern proof of the fact and proof of the amount of damages.

Civil Procedure > ... > Justiciability > Standing > General Overview

Governments > Federal Government > Claims By & Against

Civil Procedure > Preliminary Considerations > Justiciability > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Governments > Federal Government > Employees & Officials

HN10[] **Justiciability, Standing**

Because a party is invoking federal jurisdiction, the party must establish the irreducible constitutional minimum of standing in addition to meeting any statutory standing requirements. This minimum or threshold consists of three factors: (1) injury in fact: an invasion of a legally protected interest which is (a) concrete and particularized, and (b) actual or imminent, not conjectural or hypothetical; (2) causation: the injury must be fairly traceable to the defendant's challenged action; and (3) redressability: it must be likely as opposed to merely speculative that the injury will be redressed by a favorable decision.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN11[] **Subject Matter Jurisdiction, Supplemental Jurisdiction**

The controlling constitutional standard for supplement jurisdiction remains that articulated in Gibbs: the claims must form but one constitutional "case" and derive from a common nucleus of operative fact.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Pendent Parties

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Same Case & Controversy

HN12[] Supplemental Jurisdiction, Pendent Parties

Finley imposes two requirements for supplemental jurisdiction: (1) the claims must be part of the same constitutional "case;" and (2) the jurisdiction must be expressly authorized by statute. *28 U.S.C.S. § 1367* supercedes this second Finley requirement.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

Constitutional Law > The Judiciary > Congressional Limits

Civil Procedure > Appeals > Appellate Jurisdiction > State Court Review

Constitutional Law > The Judiciary > Jurisdiction > General Overview

HN13[] Subject Matter Jurisdiction, Supplemental Jurisdiction

28 U.S.C.S. § 1367 functions as a general grant of jurisdiction. U.S. Const. art. III permits supplemental jurisdiction if the federal and state law claims derive from a common nucleus of operative fact and comprise but one constitutional case.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > Constitutional Sources

Constitutional Law > The Judiciary > General Overview

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > Limited Jurisdiction

HN14[] Jurisdictional Sources, Constitutional Sources

Federal courts are courts of limited jurisdiction. *U.S. Const. art. III, § 2*. The Gibbs standard defines the minimum constitutional constraints, offering both Congress and the district courts flexibility to shape each case in a way that is efficient for the courts, fair to the parties, and respectful of state sovereignty.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Jurisdiction Over Actions > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > Same Case & Controversy

HN15[] **Jurisdiction, Jurisdictional Sources**

Assuming that claims meet the Gibbs standard, a district court has the power to exercise supplemental jurisdiction. The decision to exercise that jurisdiction remains discretionary with the district court.

Civil Procedure > ... > Jurisdiction > Jurisdictional Sources > General Overview

Governments > Courts > Judicial Comity

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN16[] **Jurisdiction, Jurisdictional Sources**

District courts may decline to exercise jurisdiction over supplemental state law claims in the interest of judicial economy, convenience, fairness, and comity.

Opinion by: M. Margaret McKeown

Opinion

[*1166] McKEOWN, Circuit Judge:

This case arises from claims that two agricultural companies leveraged the hiring of undocumented immigrants in order to depress the wages of their legally documented employees. We are called upon to decide two significant **[**2]** issues. First, we must determine whether, under the Racketeer Influenced and Corrupt Organizations Act ("RICO"), *18 U.S.C. §§ 1961-1968*, legally documented agricultural workers have standing to sue their employers, whom they allege depressed their salaries by conspiring to hire undocumented workers at below market wages. Second, we must consider the constitutionality of supplemental subject matter jurisdiction involving a party over whom there is no independent basis for federal court jurisdiction. The district court resolved both questions in favor of the defendants and dismissed this lawsuit on the pleadings. We reverse.

BACKGROUND

Olivia Mendoza, Juana Mendiola, and the purported class ("employees") are agricultural laborers for Zirkle Fruit Company and Matson Fruit Company ("growers"), which operate fruit orchards and packing houses in Eastern

Washington, the heart of Washington's fruit industry. According to the complaint, [1] the employees are "persons legally authorized to be employed in the United States." They worked for the growers "at wages that are substantially depressed because of the Illegal Immigrant Hiring Scheme." Pursuant to the scheme, **[**3]** Zirkle and Matson "knowingly hire workers of illegal status because the illegal workers are willing to accept wages that are significantly lower than wages would be in a labor market comprised solely of legally authorized workers." They do so "for the purpose of depressing employee wages below the levels they would otherwise be required to pay if they were unable to hire substantial numbers of illegal immigrants who, due to their economic situation and fear of asserting their rights due to their illegal status, can be easily exploited and who are therefore willing to work for depressed wages." The complaint provides substantial background and detail about the scope of the challenged scheme:

> Eastern Washington is the heart of Washington's famed apple and fruit industry. This area …is uniquely suited for growing fruit ….
> In Washington state there are more than 15,000 fruit packers and 30,000 orchard pickers of fruit. Many operations require unskilled, low-wage laborers for harvesting and packing and other related tasks requiring manual labor. While the industry now generates over $ 1 billion, many of these workers live in poverty.
>
> Defendants Matson and Zirkle operate fruit **[**4]** orchards and packing houses. Matson and Zirkle are motivated to keep labor costs as low as possible and, due to a variety of complex social and economic factors, the industry's demand for low-skilled workers has attracted many workers of Mexican citizenship. Many of these Mexican nationals are illegal immigrants who have been smuggled into the U.S. and/or harbored in the U.S. by relatives, friends, and the employers. Matson and Zirkle …knowingly hire workers of illegal status because illegal workers are willing to accept wages that are significantly lower **[*1167]** than wages would be in a labor market comprised solely of legally authorized workers.

The Immigration and Naturalization Service has conducted investigations finding that as much as half the growers' workforce is employed illegally, and the growers have been targeted for "raids and other law enforcement procedures."

[5]** According to the complaint, the scheme is facilitated by Selective Employment Agency, Inc., a separate company that employs the workers and then "loans" them to the growers. "Defendants Matson and Zirkle use Selective Employment as a 'front company' for the purpose of perpetrating this scheme with the hope that each will be thus shielded from charges that they violated federal law." Although Selective Employment was named only as an association-in-fact enterprise, not as a defendant, in the federal RICO claim, the complaint alleged a state conspiracy claim that did name Selective Employment as a defendant.

The district court dismissed the complaint pursuant to *Federal Rules of Civil Procedure 12(b)(1)* and *12(b)(6)*. [2] **[**6]** Although the district court held that the employees pled a direct injury because there was no intervening third party from whom their injury was derived, the court dismissed the complaint on grounds that the damages were too speculative and difficult to ascertain. [3]

---

[1] ***HN1***[] These facts, which are derived from the complaint, must be taken to be true because the case was dismissed on the pleadings for lack of jurisdiction and failure to state a claim. *United States v. One 1997 Mercedes E420*, *175 F.3d 1129, 1131 n. 1 (9th Cir. 1999)*.

[2] The complaint also alleged a mail fraud RICO predicate in sending forms falsely verifying employment eligibility to the government. In a ruling that has not been appealed, the district court held that the mail fraud scheme did not provide an adequate RICO predicate act because the employees were not the party defrauded.

[3] The district court "remanded" the remaining state law claims against the growers. As the parties acknowledge, dismissal, not remand, was called for because this suit was originally brought in federal court. *See* *28 U.S.C. § 1447*.

The employees moved for reconsideration, proffering a proposed amended complaint that alleged a conspiracy broader than the named growers and included more specific causation allegations. The amended complaint states that the growers and unnamed conspirators "comprise a large percentage of the fruit orchards and packing houses in the area, and therefore affect wages throughout the labor market for apple pickers and fruit packers, [such that] competition with respect to wages is stifled and suppressed." The proffered complaint also adds six paragraphs explaining how the scheme injures the workers. Nonetheless, the district court denied the motion, clarifying that it was not dismissing merely for difficulty of proof, but for lack of concrete injury and proximate causation.

In addition, the district court, quite reluctantly, granted Selective **[**7]** Employment's motion to dismiss pursuant to *Rule 12(b)(1)*. The district court determined that it was bound by *Ayala v. United States, 550 F.2d 1196 (9th Cir. 1977)*, *cert. granted*, *434 U.S. 814 (1977), 54 L. Ed. 2d 70, 98 S. Ct. 50 cert. dismissed*, *435 U.S. 982 (1978), 56 L. Ed. 2d 76, 98 S. Ct. 1635* which it characterized as holding pendent-party jurisdiction unconstitutional.

DISCUSSION

We note at the outset that ***HN2***[] the district court dismissed this case on the pleadings. Consequently, our review is de novo, and we may affirm the dismissal "only if it is clear that no relief could be granted under any set of facts that could be proved consistent with the allegations." *Swierkiewicz v. Sorema N. A., 534 U.S. 506, 122 S. Ct. 992, 998, 152 L. Ed. 2d 1 (2002)* (quoting *Hishon v. King & Spalding,* ***[*1168]*** *467 U.S. 69, 73, 81 L. Ed. 2d 59, 104 S. Ct. 2229 (1984))*. ***HN3***[] In the RICO context, "at the pleading stage, general factual allegations of injury resulting from the defendant's conduct may suffice, for on a motion to dismiss we presume that general allegations embrace those specific facts that are necessary to support the claim." *NOW v. Scheidler, 510 U.S. 249, 256, 127 L. Ed. 2d 99, 114 S. Ct. 798 (1994)* **[**8]** (quoting *Lujan v. Defenders of Wildlife, 504 U.S. 555, 561, 119 L. Ed. 2d 351, 112 S. Ct. 2130 (1992))*.

The district court offered two bases for dismissal on the pleadings: RICO standing and supplemental jurisdiction. We discuss those issues below, but first we address one proffered alternative ground for affirming the dismissal for failure to state a claim, an argument that need not detain us long. ***HN4***[] RICO prohibits engaging in a pattern of "racketeering activity," defined as violating certain laws; as such, a predicate illegal act must be alleged. *18 U.S.C. §§ 1962(c)*, *1961(1)(F)*. The district court held that the "Illegal Immigrant Hiring Scheme" as pleaded involved a predicate RICO act, knowingly hiring undocumented workers in violation of Immigration and Naturalization Act § 274, *8 U.S.C. § 1324*. We are unpersuaded by the growers' argument that the district court erred in this respect. Their argument rests on a hypertechnical reading of the complaint inconsistent with the generous notice pleading standard. *See* *Swierkiewicz, 122 S. Ct. at 999*. The complaint alleges that the defendants had knowledge of **[**9]** illegal harboring "and/or" smuggling. Even if knowledge of smuggling were required by the statute, an issue about which we express no opinion, the complaint easily contains this allegation. We affirm the district court's analysis and reasoning on this issue, and turn to standing and supplemental jurisdiction.

I. STANDING

A. STATUTORY STANDING

We turn first to the statutory standing requirements particular to RICO. ***HN5***[] Under RICO, "any person injured in his business or property by reason of a violation of *section 1962* of this chapter may sue therefor in any appropriate United States district court" for civil damages. *18 U.S.C. § 1964(c)*. This statute is quite similar to the antitrust statute granting standing to "any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws," *15 U.S.C. § 15(a)*, and consequently the two have been interpreted in tandem. *Holmes v. Sec. Inv. Protection Corp., 503 U.S. 258, 268, 117 L. Ed. 2d 532, 112 S. Ct. 1311 (1992)*. The employees allege an injury to their property in the form of lost wages. [4] The key task is to determine **[**10]** whether this injury was "by reason of" the growers' alleged violations, a requirement the Supreme Court has interpreted to encompass proximate as well as factual causation.

In a series of cases beginning in the antitrust context and later extended to **[**11]** RICO, the Supreme Court clarified that ***HN6***[] potential plaintiffs who have suffered **[*1169]** "passed-on" injury - that is, injury derived from a third party's direct injury - lack statutory standing. *Ill. Brick Co. v. Illinois, 431 U.S. 720, 52 L. Ed. 2d 707, 97 S. Ct. 2061 (1977)*; *Assoc. Gen'l Contractors v. Calif. State Council of Carpenters, 459 U.S. 519, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*; *Holmes, 503 U.S. at 268*. *Illinois Brick* held that government consumers could not sue on a theory that high prices were passed on to them as a result of the defendants' illegal price-fixing scheme. *431 U.S. at 736*. Similarly, in *Associated General Contractors*, unions lacked standing to sue a contractors' association for an illegal conspiracy to use nonunion subcontractors because such a conspiracy would directly victimize the union subcontractors, not the unions. *459 U.S. at 520-21*. *Holmes* extended the requirement to RICO; nonpurchasing customers, forced to cover costs when brokers became insolvent as a result of an illegal stock manipulation scheme, could not sue for this derivative harm. *503 U.S. at 268*. **[**12]**

HN7[] In this circuit, we focus on three nonexhaustive factors in considering causation, that is whether the injury is "too remote" to allow recovery:

> (1) whether there are more direct victims of the alleged wrongful conduct who can be counted on to vindicate the law as private attorneys general; (2) whether it will be difficult to ascertain the amount of the plaintiff's damages attributable to defendant's wrongful conduct; and (3) whether the courts will have to adopt complicated rules apportioning damages to obviate the risk of multiple recoveries.

Ass'n of Wash. Pub. Hosp. Dists. v. Philip Morris Inc., 241 F.3d 696, 701 (9th Cir.) (quoting *Oregon Laborers - Employers Health & Welfare Trust Fund v. Philip Morris, Inc., 185 F.3d 957, 963 (9th Cir. 1999))*, *cert. denied*, *534 U.S. 891, 151 L. Ed. 2d 147, 122 S. Ct. 207 (2001)* ("Wash. Pub. Hosp."). At this stage of the proceedings, we cannot say that there is "no set of facts that could be proved," to satisfy these requirements. *Swierkiewicz, 122 S. Ct. at 998*.

Our analysis is guided by two key cases, both decided after the district court's original opinion. *See Knevelbaard Dairies v. Kraft Foods, Inc., 232 F.3d 979, 987 (9th Cir. 2000)*; **[**13]** *Commercial Cleaning Servs. v. Colin Serv. Sys., Inc., 271 F.3d 374, 378 (2d Cir. 2001)*.

The relationships among the parties in this case bear a striking resemblance to those in *Knevelbaard Dairies*, an antitrust case in which we recently held that the plaintiffs had standing. There, milk producers sued defendant cheese producers, who illegally fixed the price of cheese, which in turn set the price of milk artificially low. *232 F.3d at 989*. Applying classic antitrust standing principles, we looked "to the chain of causation between [plaintiff's] injury and the alleged restraint in the market." *Id. at 989* (quoting *Am. Ad Mgmt. Inc. v. General Tel. Co., 190 F.3d 1051, 1058 (9th Cir. 1999))*. We concluded that the milk producers' injury was sufficiently direct. Their allegations that they would "receive[]less for milk than they otherwise would have received in the absence of the defendants' unlawful conduct" were "disputed claims of causation and injury [that] cannot be decided on a *Rule 12(b)(6)* motion." *232 F.3d at 989*. The employees here, like the milk producers in *Knevelbaard Dairies*, claim a direct market **[**14]** injury as a result of the alleged illegal hiring scheme (or in the case of *Knevelbaard Dairies*, as a result of the price fixing in the cheese market). In fact, the causation allegations here are more direct than *Knevelbaard Dairies*, as the

---

[4] The growers suggest that the employees would have to show a "property right" in the lost wages, by showing that they were promised or contracted for higher wages. This argument is misplaced in the context of RICO. This case does not implicate procedural due process; rather, what is required is precisely what the employees allege here: a legal entitlement to business relations unhampered by schemes prohibited by the RICO predicate statutes. *18 U.S.C. §§ 1962(c)*, *1961(1)*; *Dumas v. Major League Baseball Prop., 104 F. Supp. 2d 1220, 1222 (S.D. Cal. 2000)*, *aff'd sub nom.* *Chaset v. Fleer/Skybox Int'l, LP, 300 F.3d 1083, 2002 U.S. App. LEXIS 16689* at *9, No. 00-56251 (9th Cir. Aug. 20, 2002) (holding no "injury to property" under RICO).

employees allege a direct impact on the labor market, not the more attenuated claim of **[*1170]** an impact on the cheese market, which in turn affected the milk prices.

The Second Circuit, the only circuit to have considered allegations of illegal immigrant hiring based on the same predicate act as that at issue here, held that the plaintiffs had standing to sue under RICO. In *Commercial Cleaning*, a competitor alleged that the defendant janitorial service underbid it by relying on laborers that the defendant knew to be undocumented. *271 F.3d at 378*. The injury was not derivative of an injury to a third party because "the theory of Commercial's claim is that Colin undertook the illegal immigrant hiring scheme in order to undercut its business rivals." *Id. at 384*. Similarly here, the employees allege that the illegal hiring scheme was divined in order to depress the normal labor market.

Turning to the first factor, **[**15]** taking the allegations in the complaint as true, we are unable to discern a more direct victim of the illegal conduct. The documented employees here do not complain of a passed-on harm. They allege that the scheme had the purpose and direct result of depressing the wages paid to them by the growers. Thus, as the district court correctly determined, "plaintiffs have stated a claim that they are the direct victims of the illegal hiring scheme."

As in *Knevelbaard Dairies* and *Commercial Cleaning*, the scheme aims to gain an illegal commercial advantage - here, disproportionate bargaining power in employment contracts - in the growers' dealings with the employees. Neither the government nor the undocumented workers are an intervening third party in this scheme, despite the growers' arguments to the contrary. The claims here thus differ fundamentally from passed-on injury cases. *See* *Imagineering Inc. v. Kiewit Pac. Co., 976 F.2d 1303, 1312 (9th Cir. 1992)* (holding that minority-and women-owned subcontractors could not sue general contractors under RICO for an illegal scheme to evade federally required quotas because the direct harm was to competitor general contractors **[**16]** who complied with the quotas); *Oregon Laborers*, 185 F.3d at 963-67 (holding that health care trust funds could not sue tobacco companies under RICO because their injury derived from the smokers' injury); *Wash. Pub. Hosp., 241 F.3d at 703* (same for health care providers). In contrast to these other cases, the alleged scheme here was intended to give the growers a contract advantage at the expense of the documented workers, a direct rather than a pass-through injury.

We also note that the undocumented workers cannot "be counted on to bring suit for the law's vindication." *Holmes, 503 U.S. at 273*; *cf.* *Hoffman Plastic Compounds Inc. v. NLRB, 535 U.S. 137, 152 L. Ed. 2d 271, 122 S. Ct. 1275 (2002)* (holding that undocumented workers are not entitled to backpay wrongfully withheld in a labor dispute). Although not dispositive, *see* *Oregon Laborers, 185 F.3d 957*, we heed the Supreme Court's example and consider this factor in our analysis. As the district court noted, ***HN8***[] the fact that RICO specifically provides that illegal hiring is a predicate offense indicates that Congress contemplated the enforcement of the immigration **[**17]** laws through lawsuits like this one. *18 U.S.C. § 1961(1)(F)*.

The second concern to which we direct our attention is the speculative measure of harm. The district court noted that "intervening factors …could have interfered with the plaintiffs receiving higher pay absent the defendants' hiring of undocumented workers. These intervening factors include the wage paid by other orchards in the area, the skill and qualifications of each plaintiff, the profitability of the defendants' businesses without the undocumented workers, and the general **[*1171]** availability of documented workers in the area." In other words, the district court dismissed the complaint based on the conclusion that factors other than the scheme coupled with the growers' power in the relevant labor market *could* account for the plaintiffs' depressed wages. The difficulty with this reasoning is that the employees allege that the growers singularly have the ability to define wages in this labor market, akin to monopsony or oligopsony power. *See* Phillip Areeda, et al., ***Antitrust Law*** P P 574, 1431 (1995). They further allege that it is the illegal scheme that has caused their injury. The proposed **[**18]** amended complaint lays to rest any remaining doubt about attributing the alleged harm to the scheme, by spelling out a broad conspiracy causing direct harm to the workers. For example, it makes clear that the scheme involves fruit growers that "comprise a large percentage of the fruit orchards and packing houses in the area, and therefore affect wages throughout the labor market."

The district court's analysis focused primarily on cause-in-fact, not proximate cause, and it is inappropriate at this stage to substitute speculation for the complaint's allegations of causation. As we explained in *Knevelbaard Dairies* when we rejected the claim that milk prices might have been lower due to independent factors instead of the cheese price fixing: "Whether experts will be able to measure the difference between the allegedly restrained price for milk and the price that would have prevailed but for the antitrust violation remains to be seen; in deciding a *Rule 12(b)(6)* motion we are dealing only with the complaint's allegations, which in this instance do not make the claim speculative." *232 F.3d at 991*.

Similarly here, the workers must be allowed to make their case through presentation **[**19]** of evidence, including experts who will testify about the labor market, the geographic market, and the effects of the illegal scheme. Questions regarding the relevant labor market and the growers' power within that market are exceedingly complex and best addressed by economic experts and other evidence at a later stage in the proceedings. For now, it is sufficient that the employees have alleged market power - they must not be put to the test to prove this allegation at the pleading stage. *See* *Scheidler, 510 U.S. at 256*; *In re Warfarin Sodium Antitrust Litigation, 214 F.3d 395, 398 (3d Cir. 2000)* (reversing dismissal based on lack of antitrust standing because "the District Court considered facts gleaned from counsel's argument and from its own experience, factors not contemplated by the dictates of *Rule 12(b)(6)*").

Finally, it is important to distinguish between uncertainty in the fact of damage and in the amount of damage. *Knutson v. Daily Review, Inc., 548 F.2d 795, 811 (9th Cir. 1976)* (***HN9***[] "Different standards govern proof of the fact and proof of the amount of damages."). That wages would be lower if, as alleged, the growers **[**20]** relied on a workforce consisting largely of undocumented workers, is a claim at least plausible enough to survive a motion to dismiss, whatever difficulty might arise in establishing how much lower the wages would be. *Cf.* *Oregon Laborers, 185 F.3d at 964* (holding medical costs resulting from injury to smokers easily established).

Turning to the final factor, the growers do not appear to argue that there is a significant risk of multiple recovery in this case. No other potential plaintiffs emerge with clarity. Also, as the Second Circuit reasoned, even if there are other classes of potential plaintiffs who could recover for the alleged illegal hiring scheme, such lawsuits would not threaten multiple recovery of passed-on harm. *Commercial Cleaning, 271 F.3d at 383-84*. **[*1172]** This factor does not bar suit for "different classes of plaintiffs, each of which suffered a different concrete injury, proximately caused by the violation." *Id. at 384*. In sum, there is no difficulty avoiding multiple recovery here because this is not a suit for derivative or passed-on harm.

B. CONSTITUTIONAL STANDING

HN10[] Because they are invoking federal jurisdiction, **[**21]** the employees must establish "the irreducible constitutional minimum of standing" in addition to meeting the statutory standing requirements. *Lujan, 504 U.S. at 560-61*. This minimum or threshold consists of three factors: (1) injury in fact: "an invasion of a legally protected interest which is (a) concrete and particularized, and (b) actual or imminent, not conjectural or hypothetical," *id. at 560* (citations and internal quotations omitted); (2) causation: the injury must be fairly traceable to the defendant's challenged action, *id.*; and (3) redressability: "it must be likely as opposed to merely speculative that the injury will be redressed by a favorable decision," *id. at 561* (internal quotations omitted).

Based on the complaint, the employees easily meet this test. First, they allege a concrete, actual injury in their lost wages. As discussed above, their causation allegations are sufficient at this stage. *See* *Scheidler, 510 U.S. at 256* (rejecting a constitutional causation challenge in a RICO suit where the plaintiffs alleged that a conspiracy to threaten staff and patients "has injured the business and/or property interests of the [petitioners]"). **[**22]** Finally, because the award of money damages will redress the injury of lost wages, the third element is also met.

II. SUPPLEMENTAL PARTY JURISDICTION

The employees sued Selective Employment solely under state law, precluding federal question jurisdiction, and all parties are Washington citizens, precluding diversity jurisdiction. *See* 28 U.S.C. §§ 1331 & 1332. In such a situation, absent an independent basis for federal subject matter jurisdiction, Congress has authorized the district court to exercise supplemental jurisdiction:

> The district courts shall have supplemental jurisdiction over all other claims that are so related to claims in the action within such original jurisdiction that they form part of the same case or controversy under Article III of the United States Constitution. Such supplemental jurisdiction shall include claims that involve the joinder or intervention of additional parties.

28 U.S.C. § 1367(a). [5]

[23]** Prior to the passage of § 1367, supplemental jurisdiction was more circumscribed and the addition of a party was one factor that barred jurisdiction over additional claims brought by plaintiffs. *See generally* Denis F. McLaughlin, *The Federal Supplemental Jurisdictional Statute - A Constitutional and Statutory Analysis*, 24 Ariz. St. L.J. 849, 859-89 (1992). In 1973, the Supreme Court expressed some skepticism about "pendent party jurisdiction" - jurisdiction over plaintiffs' claims requiring the addition of parties not involved in the main lawsuit. The Court characterized this issue as a "subtle and complex question with far-reaching implications." *Moor v. County of Alameda, 411 U.S. 693, 715, 36 L. Ed. 2d 596, 93 S. Ct. 1785 (1973)*. Continuing this thread, in *Aldinger v. Howard, 427 U.S. 1, 49 L. Ed. 2d 276, 96 S. Ct. 2413 (1976)*, the **[*1173]** Court held that pendent party jurisdiction was impermissible as a matter of statutory construction under the particular circumstances of the case. Finally, in *Finley v. United States, 490 U.S. 545, 549, 104 L. Ed. 2d 593, 109 S. Ct. 2003 (1989)*, the Court "assumed, without deciding, **[**24]** " that pendent party jurisdiction was constitutional, but cautioned that it requires an express statutory jurisdictional grant. In 1990, Congress enacted § 1367 to provide such an express grant. Pub. L. No. 101-650 § 310.

The statutory grant of jurisdiction is, of course, limited by constitutional boundaries. Upon careful review, however, we are convinced that ***HN11***[] the controlling constitutional standard remains that articulated in *United Mine Workers of America v. Gibbs, 383 U.S. 715, 725, 16 L. Ed. 2d 218, 86 S. Ct. 1130 (1966)*: The claims must form "but one constitutional 'case' "and "derive from a common nucleus of operative fact." We therefore decline Selective Employment's invitation to impose a per se constitutional bar on supplemental jurisdiction over claims against additional parties.

A. *AYALA v. UNITED STATES*

Selective Employment relies on *Ayala v. United States, 550 F.2d 1196, 1199-1200 (9th Cir. 1979)*, where we held that federal courts were without power to exercise pendent party jurisdiction under the Federal Tort Claims Act. At that time, neither of the key Supreme Court cases, *Moor* and *Aldinger*, had resolved the question, **[**25]** nor did we have the benefit of the explicit language of *Finley*, which came ten years later. Selective Employment, however, points to language that implied that, in addition to not being authorized under any statute, pendent party jurisdiction posed constitutional difficulties. *550 F.2d at 1199, 1200 n. 8*. These statements, however, are best read as flagging the necessity for caution due to potential constitutional problems that might arise with an unduly broad exercise of pendent jurisdiction.

Significantly, *Ayala* also came before intervening decisions that clarified that *Ayala's* restrictive interpretation does not survive the 1990 passage of § 1367. We explained in *Galt G/ S v. Hapag-Lloyd AG, 60 F.3d 1370, 1374 (9th Cir. 1995)*, that ***HN12***[] *Finley* imposed two requirements for supplemental jurisdiction: (1) the claims must be "part of the same constitutional 'case' "; and (2) the jurisdiction must be expressly authorized by statute. We further observed that " 28 U.S.C. § 1367 supersedes this second *Finley* requirement. ..." *60 F.3d at 1374 n. 3*; *see also* *Yanez v. United States, 989 F.2d 323, 327 n. 3 (9th Cir. 1993)* **[**26]** (holding that court lacked jurisdiction in pre-

---

[5] The statute restricts supplemental jurisdiction in certain cases where the underlying basis for federal jurisdiction is diversity. 28 U.S.C. § 1367(b). This provision is not at issue in this case, which rests on federal question jurisdiction.

1990 suit, but noting that "Congress has now explicitly authorized pendent party jurisdiction" (citing 28 U.S.C. § 1367)).

B. CONSTITUTIONALITY OF SUPPLEMENTAL JURISDICTION UNDER § 1367

Any lingering doubt that *Ayala* establishes a binding constitutional rule is put to rest by the Supreme Court's recent decision in Raygor v. Regents of the University of Minnesota, 534 U.S. 533, 122 S. Ct. 999, 1004, 152 L. Ed. 2d 27 (2002). Holding that a tolling provision was curtailed by the Eleventh Amendment, the Court discussed the history of supplemental jurisdiction:

> In *Mine Workers v. Gibbs*, this Court held that federal courts deciding claims within their federal question subject matter jurisdiction, 28 U.S.C.§ 1331, may decide state law claims not within their subject matter jurisdiction if the federal and state law claims "derive from a common nucleus of operative fact" and comprise "but one constitutional 'case.' " ...This Court later made **[*1174]** clear that *absent authorization from Congress*, a district court could not exercise pendent jurisdiction over claims **[**27]** involving parties who were not already parties to a claim independently within the court's subject matter jurisdiction. *See* Finley v. United States, 490 U.S. 545, 104 L. Ed. 2d 593, 109 S. Ct. 2003 (1989).

122 S. Ct. at 1004 (emphasis added; some citations omitted). The Court elaborated that ***HN13***[] § 1367 provided just such authorization, functioning as a "general grant of jurisdiction." Id. at 1005. As the Supreme Court explained in *Raygor*, Article III permits supplemental jurisdiction "if the federal and state law claims 'derive from a common nucleus of operative fact' and comprise 'but one constitutional case.' " 122 S. Ct. at 1004 (quoting Gibbs, 383 U.S. at 725) (some internal quotation marks omitted). Thus, any suggestion in *Ayala* that the Constitution imposes a bar on supplemental jurisdiction over additional parties independent of statutory authorization has been undermined by intervening Supreme Court authority. *See United States v. Gay, 967 F.2d 322, 327 (9th Cir. 1992)* (holding that a prior panel decision is not binding in such a situation).

Selective Employment provides no compelling rationale to **[**28]** restrict supplemental jurisdiction beyond the limitation imposed in *Gibbs*. Indeed, the district court suggested that it would hold otherwise but for the belief that its hands were tied by *Ayala*. The district court's instincts were vindicated by the Supreme Court's later ruling in *Raygor*. We acknowledge, of course, that ***HN14***[] federal courts are courts of limited jurisdiction. U.S. Const. Art. III, sec. 2; Finley, 490 U.S. at 550 (quoting *Gibbs*, Aldinger 427 U.S. at 15). The *Gibbs* standard defines the minimum constitutional constraints, offering both Congress and the district courts flexibility to shape each case in a way that is efficient for the courts, fair to the parties, and respectful of state sovereignty.

Finally, we note that none of our sister circuits has imposed a per se constitutional restriction on supplemental jurisdiction over additional parties. *See* Hinson v. Norwest Financial S. C., Inc., 239 F.3d 611, 615 (4th Cir. 2001) (holding that district court did not abuse its discretion in joining plaintiffs who asserted only state law claims); HB Gen'l Corp. v. Manchester Partners, L. P., 95 F.3d 1185, 1197-98 (3d Cir. 1996) **[**29]** (holding that nondiverse party could be joined for counterclaims); Ammerman v. Sween, 54 F.3d 423, 424 (7th Cir. 1995) (noting that only *Gibbs* now limits pendent party jurisdiction); Palmer v. Hosp. Auth., 22 F.3d 1559, 1566-67 (11th Cir. 1994) (holding that district court had pendent party jurisdiction because claims involved the "same facts, occurrences, witnesses, and evidence").

Thus, to avoid dismissal for lack of federal subject matter jurisdiction, the employees must show that the state conspiracy claims against Selective Employment constitute part of the same constitutional case as the federal RICO claims against the growers. ***HN15***[] Assuming that the claims meet the *Gibbs* standard, the district court has the power to exercise supplemental jurisdiction. The decision to exercise that jurisdiction remains discretionary with the district court. City of Chicago v. Int'l Coll. of Surgeons, 522 U.S. 156, 172-73, 139 L. Ed. 2d 525, 118 S. Ct. 523 (1997) (holding that ***HN16***[] district courts may decline to exercise jurisdiction over supplemental state law claims in the interest of judicial economy, convenience, fairness, and comity). We therefore **[**30]** remand for the district court to determine, in the first instance, whether the application of the *Gibbs* standard permits the exercise of supplemental jurisdiction, and to exercise discretion over whether such **[*1175]** jurisdiction would be appropriate in the context of this litigation.

REVERSED and REMANDED.

Yankees Entm't & Sports Network, LLC v. Cablevision Sys. Corp.

United States District Court for the Southern District of New York

September 4, 2002, Decided

02 Civ. 3242 (DAB)

Reporter

224 F. Supp. 2d 657 *; 2002 U.S. Dist. LEXIS 16291 **; 2002-2 Trade Cas. (CCH) P73,792

YANKEES ENTERTAINMENT AND SPORTS NETWORK, LLC, Plaintiff, -against- CABLEVISION SYSTEMS CORPORATION and CSC HOLDINGS, INC., Defendants.

Disposition: Motion to dismiss denied in part and granted in part.

Core Terms

antitrust, programming, Network, sports, advertising, broadcast, rights, monopoly, competitor, alleges, regional, cable, anti trust law, vertical, markets, Sherman Act, subscribers, Donnelly Act, monopolization, leveraging, television, anticompetitive, integrated, team, conspiracy, monopoly power, prices, Clayton Act, argues, rival

LexisNexis® Headnotes

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN1[] **Motions to Dismiss, Failure to State Claim**

In evaluating a motion to dismiss, the court must accept plaintiff's allegations as true and must draw all inferences in plaintiff's favor. The court's task is merely to assess the legal feasibility of the complaint, not to assay the weight of the evidence which might be offered in support thereof. Accordingly, dismissal of a complaint for failure to state a claim is warranted only where it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim that would entitle him to relief.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

HN2[] **Motions to Dismiss, Failure to State Claim**

Conclusory allegations which merely recite the litany of antitrust will not suffice to defeat a motion to dismiss.

Antitrust & Trade Law > ... > Market Definition > Relevant Market > Product Market Definition

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN3[] **Monopolies & Monopolization, Attempts to Monopolize**

An antitrust complaint must adequately define the relevant product market, allege antitrust injury, and allege conduct in violation of antitrust laws.

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Antitrust & Trade Law, Sherman Act**

See *15 U.S.C.S. § 2*.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Antitrust & Trade Law, Sherman Act**

Section 2 of the Sherman Act, found at *15 U.S.C.S. § 2*, is not primarily aimed at improper conduct which directly implicates the restraint of trade (as under *15 U.S.C.S. § 1*), but rather at the creation of a pernicious market structure by specific intent in which the concentration of power saps the salubrious influence of competition.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > Monopoly Power

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Sherman Act > Scope > Monopolization Offenses

HN6[] **Monopolies & Monopolization, Attempts to Monopolize**

The act of monopolization prohibited by *15 U.S.C.S. § 2* consists of two elements: the possession of monopoly power in the relevant market and the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident. Attempted monopolization has three elements: (1) that the defendant has engaged in predatory or anti-competitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power. As such, the Sherman Act is interpreted to condemn monopoly power only when it is accompanied by the "purpose or intent to exercise that power" in order to impede or destroy competition.

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

Antitrust & Trade Law > Regulated Practices > Market Definition > General Overview

HN7[] **Market Definition, Relevant Market**

The definition of the relevant market in an antitrust case involves the specification of its dimensions, specifically, its product, geographic and time dimensions. The United States Court of Appeals for the Second Circuit has elucidated that the relevant market definition must encompass the realities of competition.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Attempt > Elements

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Attempt > General Overview

HN8[] **Monopolies & Monopolization, Actual Monopolization**

In a Sherman Act case, the attempt to monopolize offense is closely tied to completed monopolization. The United States Supreme Court has approved of defining attempt to monopolize as the employment of methods, means and practices which would, if successful, accomplish monopolization, and which, though falling short, nevertheless approach so close as to create a dangerous probability of it.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Antitrust > Market Definition

HN9[] **Monopolies & Monopolization, Attempts to Monopolize**

The Clayton Act, *15 U.S.C.S. §§ 12-27*, was passed to strengthen and clarify the Sherman Act and, inter alia, *§ 7*, *15 U.S.C.S. § 18*, encompasses conduct where the effect of mergers may be substantially to lessen competition or tend to create a monopoly in any line of commerce. Despite the utilization of different verbiage in the two Acts, standards of liability under the Clayton Act largely mirror those under the Sherman Act.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN10[] **Private Actions, Standing**

The United States Supreme Court has identified several factors to consider in determining whether a particular plaintiff has "antitrust standing", including inter alia: (1) the causal connection between the alleged antitrust violation and the alleged harm suffered by the plaintiff; (2) whether the injury was of a type that Congress sought to redress with the antitrust laws; (3) the directness or indirectness of the connection between the asserted injury and the alleged restraint in the relevant market; (4) the existence of an identifiable class of persons other than plaintiff who were more direct victims of the antitrust violation; (5) the potential for duplicative recovery or complex apportionment of damages; and (6) the speculative nature of the damages.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN11[] **Private Actions, Standing**

The United States Court of Appeals for the Second Circuit has provided a "two-prong analysis" for determining antitrust standing. Under this test, courts must first determine whether the plaintiff suffered an antitrust injury. If such injury is found, the next step is to determine whether any of the other factors, largely relating to the directness and identifiability of the plaintiff's injury, prevent the plaintiff from being an efficient enforcer of the antitrust laws.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN12[] **Private Actions, Standing**

An antitrust injury is of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of anticompetitive acts made possible by the violation. In assessing injury, the United States Supreme Court has delineated: Conduct in violation of the ***antitrust law*** may have three effects, often interwoven: In some respects the conduct may reduce competition, in other respects it may increase competition, and in still other respects effects may be neutral as to competition. The antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN13[] **Private Actions, Standing**

The antitrust injury requirement for antitrust claims underscores the fundamental tenet that the antitrust laws were enacted for the protection of competition, not competitors.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN14[] **Private Actions, Standing**

The antitrust injury concept requires an antitrust plaintiff to show that its own injury coincides with the public detriment tending to result from the alleged violation.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN15[] **Private Actions, Standing**

In an antitrust case, the requirement that the plaintiff's injury results from a threat to competition is invaluable in distinguishing the efficient, vertically integrated defendant properly situated outside the ambit of antitrust laws from the economic monopoly which is the target of the antitrust laws.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN16[] **Antitrust & Trade Law, Sherman Act**

The antitrust laws do not operate to prevent a vertically integrated firm from reaping the rewards of its efficiency or to punish a company that profits from its expertise and innovativeness.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN17[] **Private Actions, Standing**

The United States Supreme Court has directed that an antitrust plaintiff should be given the full benefit of its proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each.

Antitrust & Trade Law > Regulated Practices > Monopolies & Monopolization > General Overview

Antitrust & Trade Law > Regulated Practices > Market Definition > Relevant Market

HN18[] **Regulated Practices, Monopolies & Monopolization**

Monopoly power is defined as the power to control prices in the relevant market or to exclude competitors.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN19[] **Antitrust & Trade Law, Sherman Act**

A rival has clear standing to challenge the conduct of rival(s) that is illegal precisely because it tends to exclude competitors from the market.

Antitrust & Trade Law > Sherman Act > General Overview

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

Antitrust & Trade Law > Clayton Act > General Overview

HN20[] **Antitrust & Trade Law, Sherman Act**

That alleged anticompetitive conduct creates a possible monopoly of "buyers" rather than "sellers" is not dispositive.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN21[] **Antitrust & Trade Law, Sherman Act**

Competitors may be able to prove antitrust injury before they actually are driven from the market and competition is thereby lessened.

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN22[] **Clayton Act, Claims**

A showing of antitrust injury is necessary but not sufficient to establish antitrust standing, and a plaintiff may indeed have suffered an antitrust injury yet not be considered the proper plaintiff to bring an antitrust action. To determine whether a plaintiff is a proper antitrust plaintiff, courts have focused on whether there are more direct victims of the alleged antitrust violations, and whether the plaintiff can effectively represent the interests of such victims. Put another way, where there exists an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement, such persons, not one who has suffered a more indirect harm from the defendant's conduct, are the proper plaintiffs to bring an antitrust action. The doctrine of antitrust standing reflects the United States Supreme Court's attempt to articulate a test for recovery of treble damages pursuant to § 4 (15 U.S.C.S. § 15) of the Clayton Act, 15 U.S.C.S. §§ 12-27, that will not encompass every conceivable harm that can be traced to alleged wrongdoing.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN23[] **Antitrust & Trade Law, Sherman Act**

It is improper, in the absence of a valid business policy, for a firm with monopoly power in one market to gain a competitive advantage in another by refusing to sell a rival the monopolized goods or services he needs to compete effectively in the second market.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

HN24[] **Antitrust & Trade Law, Sherman Act**

The United States Court of Appeals for the Second Circuit has found that to allege a monopoly leveraging claim, the plaintiff must show that the defendant: (1) possessed monopoly power in one market; (2) used that power to gain a competitive advantage in another distinct market; and (3) caused injury by such anticompetitive conduct.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > Sherman Act

HN25[] **Antitrust & Trade Law, Sherman Act**

Instructive on the issue of leverage claims is the following admonition: Offsetting the prevention of monopolies is the fear that many leverage claims are really complaints about the defendant's greater efficiency or aggressiveness and the willingness to turn the antitrust laws into a statute that protects firms from "unfair" but non-monopolistic practices. Thus, any monopoly leveraging claim must be limited to circumstances where (1) the "target" (B) market is properly defined; and (2) the alleged conduct threatens the B market with the higher prices or reduced output or quality associated with the kind of monopoly that is ordinarily accompanied by large market share. If the second requirement is met, then one literally does not need a distinctive "leveraging" doctrine--an action that yields monopoly performance in the B market could be regarded as "monopolization" or "attempt to monopolize" within the literal language of *§ 2* of the Sherman Act, *15 U.S.C.S. § 2*, notwithstanding that it fails to yield a monopoly market share. But courts must then take great care not to permit the second requirement to be satisfied with such alternative formulations as "unfairness," "competitive advantage," or "distorting competition" in the leveraged market.

Antitrust & Trade Law > Sherman Act > General Overview

HN26[] **Antitrust & Trade Law, Sherman Act**

Regarding leveraging claims in an antitrust lawsuit, the gravamen of the offense is not the enlargement of the defendant's market share at the plaintiffs' expense or even the destruction of plaintiffs by unfair means. Rather, it must be monopoly market performance measured by reduced output or higher prices in the secondary market.

Antitrust & Trade Law > Clayton Act > General Overview

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Mergers & Acquisitions Law > General Overview

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Antitrust > Vertical Acquisitions

HN27[] **Antitrust & Trade Law, Clayton Act**

In an analysis, under *§ 7* (*15 U.S.C.S. § 18*) of the Clayton Act, *15 U.S.C.S. §§ 12-27*, of vertical mergers, the competitive significance of a vertical merger results primarily from the degree, if any, to which it may increase barriers to entry into the market or reduce competition by (1) foreclosing competitors of the purchasing firm in the merger from access to a potential source of supply, or from access on competitive terms, (2) foreclosing competitors of the selling firm from access to the market or a substantial portion of it, or (3) forcing actual or potential competitors to enter or continue in the market only on a vertically integrated basis because of advantages unrelated to economies attributable solely to integration.

Antitrust & Trade Law > Clayton Act > General Overview

Mergers & Acquisitions Law > Antitrust > Antitrust Statutes > Clayton Act

Mergers & Acquisitions Law > Antitrust > General Overview

Mergers & Acquisitions Law > Antitrust > Vertical Acquisitions

HN28[] **Antitrust & Trade Law, Clayton Act**

The primary vice of a vertical merger or other arrangement tying a customer to a supplier is that, by foreclosing the competitors of either party from a segment of the market otherwise open to them, the arrangement may act as a clog on competition, which deprives rivals of a fair opportunity to compete.

Antitrust & Trade Law > Clayton Act > General Overview

HN29[] **Antitrust & Trade Law, Clayton Act**

In an antitrust case, the fact that entry into a market has occurred does not necessarily preclude the existence of "significant" entry barriers. If the output or capacity of the new entrant is insufficient to take significant business away from the predator, they are unlikely to represent a challenge to the predator's market power.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN30[] **Actual Monopolization, Anticompetitive & Predatory Practices**

A refusal to grant access to an essential facility violates the antitrust laws because of the danger that a monopolist in one market might use its market power to extend its monopoly into another.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN31[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The United States Court of Appeals for the Second Circuit has stated that, for purposes of the essential facilities doctrine, essential facilities include: facilities that are a natural monopoly, facilities whose duplication is forbidden by law, and perhaps those that are publicly subsidized and thus could not practicably be built privately. Most of the successful essential facility claims fall within these categories. In cases finding liability in other categories, however, the facility in question is more than dominant; it is effectively the only one in town.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN32[] **Actual Monopolization, Anticompetitive & Predatory Practices**

To state a claim under the essential facility doctrine, a plaintiff must allege: (1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN33[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The United States Court of Appeals for the Second Circuit has found that there need not be an outright refusal to deal in order to find that denial of an essential facility occurred. It is sufficient if the terms of the offer to deal are unreasonable. A defendant may ultimately be able to delineate a "legitimate business practice" which would shield the defendant from liability for conduct that otherwise would constitute denial of an essential facility.

Civil Procedure > Trials > Jury Trials > Province of Court & Jury

HN34[] **Jury Trials, Province of Court & Jury**

Finding that whether a facility is essential and/or what constitutes reasonable access are issues of fact that cannot be resolved on this motion to dismiss.

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN35[] **Actual Monopolization, Anticompetitive & Predatory Practices**

The direction of payment (i.e. liability attaches only where a plaintiff must pay for access to a facility not vice versa) plays no part in determining the applicability of the essential facilities doctrine, except in the determination of reasonableness of the access arrangement.

Antitrust & Trade Law > Sherman Act > General Overview

Tax Law > Federal Taxpayer Groups > S Corporations > Distributions by S Corporations

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

HN36[] **Antitrust & Trade Law, Sherman Act**

Sherman Act ramifications are quite different for combinations versus individuals. While a combination may be liable for effecting a mere restraint of trade, for a single firm to be liable there generally must be either monopolization or the threat of monopolization.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > General Overview

HN37[] Defenses, Demurrers & Objections, Motions to Strike

When sought to expunge irrelevant factual matters, a strike motion will not be granted unless those matters have no clear bearing on the issues in dispute. Accordingly, a motion to strike will be granted if the disputed matter is irrelevant under any state of facts which could be proved in support of the claims being advanced.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Strike > General Overview

Opinion by: DEBORAH A. BATTS

Opinion

[*662] DEBORAH A. BATTS, United States District Judge.

Plaintiff Yankees Entertainment and Sports Network, LLC (hereinafter "YES") brings this antitrust action pursuant to *Section 2* of the Sherman Act, *15 U.S.C. § 2*, *Section 7* of the Clayton Act, *15 U.S.C. § 18*, *Section 4* of the Clayton Act, *15 U.S.C. § 15*, as well as *Section 340* of the Donnelly Act, *N.Y. Gen. Bus. L. § 340*, for alleged monopolization of the greater New York area sports programming, broadcast rights, advertising, and distribution of multi-channel video programming markets. Defendants Cablevision Systems Corporation and CSC Holdings, Inc. (hereinafter together "Cablevision" or "Defendant") now move to dismiss pursuant to *Federal Rule of Civil Procedure **[**2]** 12(b)(6)* ten claims wholly or partially comprised in the Complaint's Counts I, II, III, IV, V, VI, and VII for failure to state a claim upon which relief can be granted. [1]

For the reasons set forth below, Defendant Cablevision's motion to dismiss is denied in part and granted in part.

I. BACKGROUND [2]

A. The Parties

[1] While the Parties appear to be in some disagreement as to the correspondence of Cablevision's ten "claims" to the "counts" enumerated in the Complaint (Def.'s Mem. Law at 12-14; Pl.'s Mem. Law at 3-4), for the purposes of clarity and simplicity, this Court will refer to the Counts alleged rather than the Claims enumerated by Defendant.

[2] **Since the instant motion is a *Rule 12(b)(6)*, the facts recited herein are drawn from the Plaintiff's Complaint.**

Defendant Cablevision and its wholly owned subsidiary CSC Holdings, **[**3]** Inc., are Delaware corporations which directly or indirectly own and operate cable television programs in various areas of New York, New Jersey, and Connecticut. (Compl. PP25,26,38.) As a cable operator which provides pay television programming within its service area, Cablevision is considered to be a multichannel video programming distributor ("MVPD"). [3] (Compl. P40.) Unlike other types of MVPDs, cable operators like Cablevision serve only those areas for which they are granted franchises by local government authorities for fixed periods of time. (Compl. P36.)

Plaintiff YES, a Delaware limited liability company, is a regional sports programming network launched on September 10, 2001 which has purchased the local broadcast rights to, among others, New York Yankees baseball games **[**4]** beginning with the 2002 baseball season. (Compl. PP2,4,24.) It has since reached agreement with more than 30 television operators and satellite direct broadcast systems (with the notable exception of Cablevision) for the distribution of its programming in the greater New York metropolitan area to approximately 5.3 million subscribers. (Compl. P4.)

According to YES, Cablevision's cable television systems are "clustered" in the New York metropolitan area (covering roughly more than 3 million households) and likely comprise the largest cluster of cable systems in the United States. **[*663]** (Compl. P38.) Specifically, Cablevision provides its customers with a subscription television service which includes television broadcast networks, news, entertainment, general programming, and national and regional sports programming. (Compl. PP 36,42.) Cablevision, subject to some regulation by local franchising authorities, decides which networks to distribute to their subscribers by paying a programming network, like YES, for the right to include a particular network in its programming options. (Compl. PP43,70-71,85.)

Moreover, Cablevision, like many MVPDs, determines the package of channels available **[**5]** to subscribers through a tiered system, whereby a subscriber can purchase the simplest "Broadcast Basic", an expanded "Family Cable", and then three tiers of "Optimum TV". (Compl. P43.) Each successive tier is more expensive and includes additional channels. (Compl. P43.) Cablevision may also sell subscriptions to "premium" programming, such as HBO, not as part of a package, but separately on a channel-by-channel basis. (Compl. PP42,85.)

In addition to its distribution of programming, Cablevision also indirectly owns a partial interest in Madison Square Garden LP ("MSG LP"), which in turn owns, inter alia, MSG Network ("MSG") and Fox SportsNet New York ("FSNY"). (Compl. P48.) MSG [4], FSNY, and now YES are the only existing regional sports networks, that is, networks focused primarily on airing live sporting events of local sports teams, in the greater New York metropolitan area. (Compl. PP7,29,35,48.) Cablevision sells MSG and FSNY to other MVPDs that want to make regional sports programming available to their subscribers as part of an expanded basic package. (Compl. P83.)

[6]** B. The Markets

YES has identified and defined four relevant markets for the purpose of the instant case: (1) local sports broadcast rights, (2) regional sports programming, (3) distribution of multi-channel video programming, and (4) advertising on regional sports networks. (Pl.'s Mem. Law at 3.) The first, the purchase and sale of local broadcast rights to local professional sports teams, concerns the sale by the owners/creators of sporting events of their rights to televise to owners of Programming Networks such as MSG and YES. (Compl. PP30,31.)

The second, the purchase and sale of programming of local professional sporting events, occurs between the aforementioned Programming Networks and various MVPDs, such as cable operators, for delivery to their subscribers. (Compl. PP27-29.)

---

[3] **Other examples of MVPDs include direct broadcast satellite operators, multi-point multi-direction system operators and others who use different delivery methods for the provision of pay television programming. (Compl. P40.)**

[4] **Prior to the creation of YES, MSG owned the local broadcast rights to the New York Yankees until early October 2001, when the Yankees exercised its option to terminate its contract with MSG. (Compl. P55.)**

The third, the market of the distribution of multi-channel programming, involves the purchase and sale of pay television services between competing MVPDs and the residents and businesses in their respective service area. (Compl. PP32,33.)

Finally, the advertising on regional sports networks market refers to the buying and selling of advertising time on regional sports programming services between advertisers **[**7]** and either the Programming Network or the MVPD. (Compl. PP34,35.)

C. The Dispute Between YES and Cablevision

Since its creation in September 2001, YES has actively sought to have its network **[*664]** distributed to the largest possible audience, and YES reached agreement with more than thirty subscription television distribution systems for its broadcast as part of expanded basic cable service, the "most popular tier of subscription television services." (Compl. PP4,62.) Cablevision is the only large cable operator in the greater New York metropolitan area with which YES has not reached an agreement, making New York Yankees games unavailable to Cablevision's 3 million subscribers. (Compl. P63.)

Despite a series of negotiations dating from October 2001, YES and Cablevision have been unable to reach agreement on two major issues: the tier of service on which YES would be offered to Cablevision subscribers and the price to be paid by Cablevision to YES. [5] (Compl. PP65-73.) Specifically, YES states that Cablevision, in alleged violation of Federal Communications Commission ("FCC") regulations, stated that "it would carry YES Network only if there were cable exclusivity, and YES Network would **[**8]** be unavailable to satellite distributors." (Compl. P66.) Further, YES alleges Cablevision offered to carry YES as a "premium" channel, instead of carrying it on an expanded basis tier__"an offer deliberately constructed to ensure that the YES Network would have minimal market penetration because regional sports networks generally cannot be successfully marketed on premium channels." (Compl. P67.) YES further characterizes Cablevision's offer of providing YES with its own wholly controlled subscription channel as unprecedented and untenable, since YES is not set up to administer billing or collections. (Compl. P70.) Finally, YES claims that the per-subscriber rate proposed by Cablevision is "significantly below the economic value of the YES Network by any standard industry measure" and is designed to "drive YES Network out of business." (Compl. P90.)

[9]** In sum, YES alleges that Cablevision "is using its status as a vertically integrated multichannel video programming distributor [6] to protect its monopoly over local sports programming by refusing to grant YES Network carriage on its system on nondiscriminatory terms such as those terms and conditions available to its affiliates." (Compl. P99.) YES claims injury stemming from "having fewer viewers, less advertising at reduced fees, and the loss of revenue from subscriber fees." (Compl. P121.)

As such, on April 29, 2002, YES set forth eight Counts alleging: (1) attempted monopoly of regional sports programming market in violation of the Sherman Act; (2) attempted monopoly of local broadcast rights market in violation of the Sherman Act; (3) depriving Plaintiff access to an essential facility in violation of the Sherman Act; (4) refusal to deal to maintain monopoly of regional **[**10]** sports programming in violation of the Sherman Act; (5) illegal monopoly leveraging in violation of the Sherman Act; (6) anticompetitive horizontal integration in violation of the Clayton Act; (7) anticompetitive vertical integration in violation of the Clayton Act; and (8) anticompetitive arrangement and combination in violation of the Donnelly Act. (Compl. PP116-169.)

Cablevision now moves to dismiss on the following grounds:

---

[5] **Cablevision disputes YES' following rendition of facts regarding the negotiations, which as stated here will be taken as true for the purposes of this motion to dismiss**.

[6] **"Vertical integration" refers to Cablevision's ownership of both a distribution facility and programming networks. (Compl. P157.)**

[*665] 1. YES does not have antitrust standing to pursue a claim of attempted monopolization of the alleged "local broadcast rights" market because no causation exists for YES' alleged injury and alternatively, the injury is not cognizable as an "antitrust injury".

2. YES does not have antitrust standing to pursue a claim for attempted monopolization of the alleged market for "sale of advertising time" solely on regional sports networks because no causation exists for YES' alleged injury and alternatively, the injury is not cognizable as an "antitrust injury".

3. YES has failed to plead, as required, that Cablevision has market power in Internet services in order to sustain its alleged tie-in claim and YES has no standing to attack Cablevision's **[**11]** approach to offering Internet and video programming services.

4. YES does not have antitrust standing to challenge the 1997 acquisition of Madison Square Garden.

5. YES cannot state a claim under the "essential facility" doctrine because (i) YES has access pursuant to the leased access provision of the Cable Act, *47 U.S.C. § 521, et seq.*; (ii) YES is trying to sell Cablevision a service, not gain access to a facility; and (iii) YES is seeking *better* access, not the same access. (emph. incl. in original)

6. YES' allegations regarding maintenance or expansion of a monopoly cannot state a claim under the Donnelly Act that requires, instead, a combination or conspiracy.

7. YES has no right to enforce in this Court the FCC regulations regarding programming carriage, *47 C.F.R. § 76.1301*, that it alleges Cablevision has violated.

II. DISCUSSION

It is well-settled that ***HN1***[] in evaluating a motion to dismiss, the Court must accept Plaintiff's allegations as true and must draw all inferences in Plaintiff's favor. See *Diezcabeza v. Lynch, 75 F. Supp. 2d 250, 255 (S.D.N.Y. 1999)*; *Mackey v. Property Clerk of New York City Police Dept., 26 F. Supp. 2d 585, 588 (S.D.N.Y. 1998)*. **[**12]** The Court's task "is merely to assess the legal feasibility of the complaint, not to assay the weight of the evidence which might be offered in support thereof." *Sims v. Artuz, 230 F.3d 14, 20 (2d Cir. 2000)*(quoting *Ryder Energy Distrib. Corp. v. Merrill Lynch Commodities Inc., 748 F.2d 774, 779 (2d Cir. 1984)*(internal quotation marks omitted)). Accordingly, dismissal of a complaint for failure to state a claim is warranted only where "it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim that would entitle him to relief." *Conley v. Gibson, 355 U.S. 41, 45-46, 2 L. Ed. 2d 80, 78 S. Ct. 99 (1957)*; see also *ICOM Holding, Inc. v. MCI Worldcom, Inc., 238 F.3d 219, 221 (2d Cir. 2001)*.

Nevertheless, it is axiomatic that ***HN2***[] "conclusory allegations which merely recite the litany of antitrust" will not suffice. *John's Insulation, Inc. v. Siska Constr. Co., 774 F. Supp. 156, 163 (S.D.N.Y. 1991)*; see also Re-Alco Indus., Inc. f. *National Ctr. for Health Educ., Inc., 812 F. Supp. 387, 391 (S.D.N.Y. 1993)*("***HN3***[] [an antitrust complaint] must adequately…define **[**13]** the relevant product market, …allege antitrust injury, [and] … allege conduct in violation of antitrust laws.").

A. Federal ***Antitrust Law***

As delineated by the Supreme Court, the Sherman Act was enacted to **[*666]** assure customers the benefits of price competition and with the "central interest" of "protecting the economic freedom of participants in the relevant market." *Associated General Contractors of CA v. CA State Council of Carpenters, 459 U.S. 519, 538, 74 L. Ed. 2d 723, 103 S. Ct. 897 (1983)*. Specifically, ***HN4***[] *Section 2* of the Sherman Act provides, in part, that "Every person who shall monopolize…any part of the trade or commerce among the several States…shall be deemed guilty of a felony." *15 U.S.C. § 2 (1976)*. ***HN5***[] *Section 2* is not primarily aimed at improper conduct which directly implicates the restraint of trade (as under *§ 1*), but rather at the creation of a pernicious market structure by specific intent in which the "concentration of power saps the salubrious influence of competition." *Berkey Photo, Inc. v. Eastman Kodak Co., 603 F.2d 263, 272 (2d Cir. 1979)*.

HN6[] The act of monopolization prohibited by 15 U.S.C. § 2 **[**14]** consists of two elements: "the possession of monopoly power in the relevant market [7] and ... the willful acquisition or maintenance of that power as distinguished from growth or development as a consequence of a superior product, business acumen, or historic accident." United States v. Grinnell Corp., 384 U.S. 563, 570-71, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966). Attempted monopolization has three elements: "(1) that the defendant has engaged in predatory or anti-competitive conduct with (2) a specific intent to monopolize and (3) a dangerous probability of achieving monopoly power." Ortho Diagnostic Sys., Inc. v. Abbott Labs., Inc., 822 F. Supp. 145, 153 (S.D.N.Y.1993) (quoting United States v. Grinnell Corp., 384 U.S. 563, 570-571, 16 L. Ed. 2d 778, 86 S. Ct. 1698 (1966), and Spectrum Sports, Inc. v. McQuillan, 506 U.S. 447, 122 L. Ed. 2d 247, 113 S. Ct. 884 (1993)) [8] As such, the Sherman Act is interpreted to condemn monopoly power only when it is accompanied by the "purpose or intent to exercise that power" in order to impede or destroy competition. Berkey, 603 F.2d at 274 (quoting Griffith, 334 U.S. 100 at 107, 68 S. Ct. at 945); **[**15]** see also United States v. Aluminum Co., 148 F.2d 416, 430 (2d Cir. 1945)("The successful competitor, having been urged to compete, must not be turned upon when he wins."); 3 Phillip Areeda, Hovenkamp, & Blair, ***Antitrust Law*** P 637 (2d ed. 2002).

[16]** HN9[] The Clayton Act, 15 U.S.C. §§ 12-27 (1976), was passed to strengthen and clarify the Sherman Act and, inter alia, § 7 encompasses conduct where the effect of mergers "may be substantially to lessen competition or tend to create a monopoly in any line of commerce." Despite the utilization of different verbiage in the two Acts, standards of liability under the Clayton Act largely mirror those under the Sherman Act. See 2 Areeda & Hovencamp, supra, § 301 at 7 ("No difference in the **[*667]** criteria for illegality or the mode of analysis follows from the difference between the 'unreasonable' formula of the Sherman Act and the 'substantial lessening of competition' formula of the Clayton Act.").

B. Antitrust Standing

HN10[] The Supreme Court has identified several factors to consider in determining whether a particular plaintiff has "antitrust standing", including inter alia: (1) the causal connection between the alleged antitrust violation and the alleged harm suffered by the plaintiff; (2) whether the injury was of a type that Congress sought to redress with the antitrust laws; (3) the directness or indirectness of the connection between the asserted injury **[**17]** and the alleged restraint in the relevant market; (4) the existence of an identifiable class of persons other than plaintiff who were more direct victims of the antitrust violation; (5) the potential for duplicative recovery or complex apportionment of damages; and (6) the speculative nature of the damages. See Associated General Contractors, 459 U.S. at 537-44 (1983).

HN11[] The Second Circuit has provided a "two-prong analysis" for determining antitrust standing. Under this test, "courts must [first] determine whether the plaintiff suffered an antitrust injury ." Balaklaw v. Lovell, 14 F.3d 793, 797 n. 9 (2d Cir.1994). If such injury is found, the next step is to "determine whether any of the other factors, largely relating to the directness and identifiability of the plaintiff's injury, prevent the plaintiff from being an efficient enforcer of the antitrust laws." Id.

1. Antitrust Injury: Local Broadcast Rights and Advertising Markets

[7] HN7[] **The definition of the relevant market involves the specification of its dimensions, specifically, its product, geographic and time dimensions. 2 Earl W. Kintner, Federal *Antitrust Law* § 12.2 (1980). The Second Circuit has elucidated that the relevant market definition "must encompass the realities of competition." Balaklaw v. Lovell, 14 F.3d 793, 797 n. 9 (2d Cir.1994)(quoting Oksanen v. Page Memorial Hosp., 945 F.2d 696, 709 (4th Cir. 1991))(defining relevant employment market as geographically broader than Plaintiff's exclusively local definition)**

[8] HN8[] **The attempt to monopolize offense is closely tied to completed monopolization. See American Tobacco Co. v. United States, 328 U.S. 781, 785, 90 L. Ed. 1575, 66 S. Ct. 1125 (1946) (approving jury instruction defining attempt to monopolize as "the employment of methods, means and practices which would, if successful, accomplish monopolization, and which, though falling short, nevertheless approach so close as to create a dangerous probability of it").**

Specifically, ***HN12***[] an antitrust injury is "of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect **[**18]** either of the violation or of anticompetitive acts made possible by the violation." Balakalow, 14 F.3d at 797, n.9 (quoting *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 50 L. Ed. 2d 701, 97 S. Ct. 690 (1977)*(finding no antitrust injury where plaintiff's claimed injury was "a result of his losing out in the competition for an exclusive [employment] contract [with Defendant], and nothing more."). In assessing injury, the Supreme Court has delineated:

> Conduct in violation of the ***antitrust law*** may have three effects, often interwoven: In some respects the conduct may reduce competition, in other respects it may increase competition, and in still other respects effects may be neutral as to competition. The antitrust injury requirement ensures that a plaintiff can recover only if the loss stems from a competition-reducing aspect or effect of the defendant's behavior.

Atlantic Richfield Co. v. USA Petroleum Co., 495 U.S. 328, 343-44, 109 L. Ed. 2d 333, 110 S. Ct. 1884 (1990).

HN13[] The antitrust injury requirement underscores the fundamental tenet that "the antitrust laws … were enacted for 'the protection **[**19]** of competition, not competitors. " *Brunswick, 429 U.S. at 488* (quoting *Brown Shoe v. United States, 370 U.S. 294, 320, 8 L. Ed. 2d 510, 82 S. Ct. 1502 (1962))*(finding no antitrust injury where the defendant had preserved competition by acquiring a number of plaintiff's bowling alley competitors that would have otherwise gone out of business); *Capital Imaging Assocs., P.C. v. Mohawk Valley Medical Assocs., Inc., 996 F.2d 537, 543 (2d Cir. 1993)* ("The challenged action has had an actual adverse effect on competition as a whole in the relevant market; to prove it has been **[*668]** harmed as an individual competitor will not suffice. Insisting on proof of harm to the whole market fulfills the broad purpose of the ***antitrust law*** that was enacted to ensure competition in general, not narrowly focused to protect individual competitors."); see also 2 Areeda & Hovenkamp, supra, P337 at 312 ***HN14***[] ("The antitrust injury concept thus requires the antitrust plaintiff to show that its own injury coincides with the public detriment tending to result from the alleged violation."). ***HN15***[] The requirement that the plaintiff's injury results from a threat to competition **[**20]** is invaluable in distinguishing the efficient, vertically integrated defendant properly situated outside the ambit of antitrust laws from the economic monopoly which is the target of the antitrust laws. See, e.g., *Viacom v. Time Inc., 785 F. Supp. 371, 379 (S.D.N.Y. 1992)*("It is of course axiomatic that ***HN16***[] the antitrust laws do not operate to prevent a vertically integrated firm from reaping the rewards of its efficiency or to punish a company that profits from its expertise and innovativeness.")

YES alleges that Cablevision has specifically intended to monopolize the market for sports broadcast rights in the greater New York metropolitan area and has "engaged in anticompetitive conduct" designed to "cause YES to fail." Compl. P118. The main basis for the conduct appears to consist of Cablevision's refusal to carry YES on its cable television systems: "Cablevison's anticompetitive conduct relevant to this claim includes at least its refusal to deal with YES on terms of carriage on its cable facility to preclude YES from competing with Cablevision and its MSG and FSNY networks in the broadcast rights market, and its attempt to use its monopoly in the regional sports programming **[**21]** market to monopolize the local broadcast rights market." Pl.'s Memo. Law at 11. YES alleges it is harmed by "having fewer viewers, less advertising at reduced fees and the loss of revenues from subscriber fees." Compl. P121. In other places in the Complaint, YES further alleges harms including the limitation of its ability to purchase broadcast rights and, by reducing its reach to subscribers, the rendering of YES as a "less desirable vehicle" for the distribution of programming. Compl. PP 106-08,124-5.

In the market for the sale of advertising, YES alleges it is harmed because (1) YES is made a less attractive seller in the advertising market; (2) YES is precluded from expanding its sales of advertising time; (3) YES's advertising sales revenues is lowered and (4) YES is sought to be eliminated as a competitor in the advertising market. See Compl. PP12, 34-5, 103, 108, 120, 135-36, 148-49.

Cablevision claims that YES has no standing to challenge the purported antitrust action in these markets because (1) YES is not a team owner/advertiser so increased rates do not cause YES any harm; (2) YES is a buyer of television rights in the local broadcast rights market and a seller in **[**22]** the advertising market and as such, benefits from the alleged antitrust violation; and (3) YES is not the best suited Plaintiff, as the owners of sports broadcast rights and advertisers are an "identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement." See Def. Mem. Law at 18-19.

YES responds that it has standing in these markets because Cablevision seeks to eliminate YES as a competitor in the markets for the acquisition of local broadcast rights and for the sale of advertising and because YES is the "only competitor of Cablevision's affiliated MSG and FSNY sports networks, the intended direct result of Cablevision's conduct is the **[*669]** suppression--and in fact elimination--of competition in the purchase of broadcast rights, enabling monopoly pricing." Pl.'s Mem. Law at 11-12 (quoting Compl. PP8-10), 30-32 (quoting Compl. PP12, 34-5, 103, 108, 120, 135-36, 148-49). Plaintiff also depends on the so-called "leverage" theory claim, an antitrust claim in which a violating defendant possesses monopoly power in one market and uses that power in support of an anticompetitive purpose in a second, competing market. **[**23]** See Pl.'s Mem. Law at 14-15.

Cablevision's arguments that YES did not suffer an antitrust injury because it is not a team owner and because it is a buyer in the market of broadcast rights are unavailing. The arguments appear to characterize the sole harm alleged by YES as a "reduction in the amount of money that team owners will be able to command for their television rights." Def.'s Mem. Law at 17. However, the harms alleged by the Complaint are broader in scope and do encompass, in addition to these alleged market distortions for sellers, harms to YES as an excluded competitor. The Complaint, read as a whole [9] **[**24]** , does allege further that Cablevision intends to shut out YES and any other potential competitors [10] in order to ensure that "Cablevision is the only entity seeking to acquire regional broadcast rights of local professional sports teams." Compl. P124. The same can be said for YES' allegations in the advertising market; specifically that by making YES less attractive to potential advertisers because of reduced subscriber access and fewer revenues, Cablevision is distorting and trying to eliminate competition in the market. Compl. PP103, 108.

Cablevision's argument appears to conflate the Complaint's purported damages with allegations necessary to constitute antitrust injury. YES does not, and indeed, cannot, claim damages based upon team owners forced to demand lower rates or advertisers forced to pay higher rates to reach their targeted market, i.e., the 3 million Cablevision subscribers that constitute almost 40% of the greater New York metropolitan area market. See Compl. P103; see, e.g. *Cargill, 479 U.S. 104, 93 L. Ed. 2d 427, 107 S. Ct. 484* (denying a plaintiff competitor standing to enjoin merger of two of its rivals on ground that it increased concentration among sellers because plaintiff could benefit by increasing its own prices). Rather, YES asserts that it is being driven from the markets, specifically, (1) of selling sports programming and buying broadcast rights and (2) of selling **[**25]** advertising time, by the alleged violations. It seeks damages to compensate for profits it would have earned by competing in the respective markets in the first place. See Compl. P126. [11] Irrespective of the team owners' or advertisers' injury, an excluded competitor like YES suffers a distinct injury if it is prevented from buying/selling its product. ***HN19***[] "[A] rival has clear standing to challenge the conduct of rival(s) that is illegal **[*670]** precisely because it tends to exclude competitors from the market." 2 Areeda et al., supra, P 348, at 387; Compl. P9 ("If Cablevision refuses to carry YES Network, Cablevision believes YES Network will fail and once again, Cablevision will be the only provider of local sports programming in the greater New York area, thus restoring its monopoly control of local sports programming."); see also *Andrx Pharmaceuticals, Inc. v. Biovail Corp. Intern., 347 U.S. App. D.C. 178, 256 F.3d 799 (D.C. Cir. 2001)*(finding standing is supported where alleged injury is not derived from or measured by the

---

[9] ***HN17***[] **The Supreme Court has directed that an antitrust plaintiff "should be given the full benefit of [its] proof without tightly compartmentalizing the various factual components and wiping the slate clean after scrutiny of each." *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 699, 8 L. Ed. 2d 777, 82 S. Ct. 1404 (1962)*.**

[10] ***HN18***[] **Monopoly power is defined "as the power to control prices in the relevant market or to exclude competitors." *Aspen Skiing Co. v. Aspen Highlands Skiing Corp., 472 U.S. 585, 596, n. 20, 86 L. Ed. 2d 467, 105 S. Ct. 2847 (1985)*.**

[11] **Cablevision asserts that YES' phrasing that it has suffered harm to reputation is not a cognizable antitrust injury. That may be so, but other claims in the complaint sufficiently allege that YES complains of being forced out of business and/or of being unable to compete for the purchase of broadcast rights. See Compl. PP9,10,124-26.**

injury to consumers, but measured by the loss of profits [plaintiff] would have otherwise made had it not been excluded from the market); *Yellow Pages Cost Consultants, Inc. v. GTE Directories, 951 F.2d 1158 (9th Cir. 1991)* **[**26]** (finding GTE's refusal to deal with plaintiff consultants directly injured consultants, who were found to compete with GTE for advertisers); *Sweeney v. Athens Regional Medical Center, 709 F. Supp. 1563 (M.D.Ga. 1989)*(standing found for direct competitor of defendant in suit alleging defendant conspiracy to drive her from market by limiting access to patients). For similar reasons, ***HN20***[] that this creates a possible monopoly of "buyers" rather than "sellers" is not dispositive; YES has entered into the market as the direct competitor of Cablevision affiliates (MSG Network and FSNY)for the purchase of broadcast rights. Compl. PP8-10.

In a related argument, **[**27]** Cablevision asserts that its dominance on the buyer's side can only result in an exit of a buyer and the accompanying decrease in selling prices and therefore constitutes a benefit, not detriment, to buyers such as YES. Def.'s Mem. Law at 18-19. Again, such an argument supposes that the only harms alleged in the Complaint are those on behalf of team owners and/or advertisers. Taking the facts in the Complaint as true, Cablevision's conduct was designed to ensure its status as the only buyer in town, with its control of MSG and FSNY, and its pricing for the purchase of broadcast rights and sale of advertising time can be unilaterally determined, causing price distortions. Indeed, the exclusion of competitors would ensure that no one but Cablevision would in fact benefit from those lowered broadcast rights costs or elevated advertising rates. Cf. *Brunswick, 429 U.S. at 489, n. 14, 97 S. Ct. at 698, n. 14* ***HN21***[] ("Competitors may be able to prove antitrust injury before they actually are driven from the market and competition is thereby lessened").

Accordingly, YES' allegations of injury to itself and competition which flow from Cablevision's purported exclusionary acts **[**28]** sufficiently alleges the type of injury the antitrust laws were intended to prevent in order to withstand the instant motion to dismiss. See, e.g., *Law Offices of Curtis V. Trinko v. Bell Atlantic Corp., 294 F.3d 307, 318-19 (2d Cir. 2002)*("While the district court may find otherwise after discovery and a motion for summary judgment, it is too early to conclude on this record that the plaintiff only suffered a wholly derivative injury".).

2. Suitability of Plaintiff: Local Broadcast Rights and Advertising Markets

HN22[] A showing of antitrust injury is necessary but not sufficient to establish antitrust standing, and a plaintiff may indeed have suffered an antitrust injury yet not be considered the proper plaintiff to bring an antitrust action. See *Cargill, Inc. v. Monfort of Colorado, Inc., 479 U.S. 104, 107, 93 L. Ed. 2d 427, 107 S. Ct. 484 (1986)*. To determine whether a plaintiff is a proper antitrust plaintiff, courts have focused on whether there are more direct victims of the alleged antitrust violations, and whether the plaintiff can effectively represent **[*671]** the interests of such victims. See, e.g., *Huhta v. Children's Hosp. of Philadelphia, 1994 U.S. Dist. LEXIS 7327, 1994 WL 245454* **[**29]** at *2 (E.D.Pa. May 31, 1994). Put another way, where there exists "an identifiable class of persons whose self-interest would normally motivate them to vindicate the public interest in antitrust enforcement," such persons, not one who has suffered a more indirect harm from the defendant's conduct, are the proper plaintiffs to bring an antitrust action. *Associated General Contractors, 459 U.S. at 542*. The doctrine of antitrust standing reflects the Supreme Court's attempt to articulate a test for recovery of treble damages pursuant to *§ 4* of the Clayton Act that will not "encompass every conceivable harm that can be traced to alleged wrongdoing." *Id. at 536*.

Cablevision's argument on this point can be summarized as follows. The main alleged antitrust violation by Cablevision is that it has "adamantly refused to carry YES Network on its cable systems, except on discriminatory and commercially unreasonable terms that it knows cannot be accepted by YES Network." Compl. P5. As such, Cablevision argues, the act of refusing to purchase and carry YES occurs only in the "regional sports programming" market. That YES' exit from this market as a competing Programming **[**30]** Service in turn has ripple effects, that is, results in weaker competition in the related "broadcast rights" market, Cablevision further argues, does not function to confer upon it automatic standing to challenge a purported monopoly in that related market. Def.'s Memo. Law at 3-6 ("Cablevision's alleged refusal to deal can harm YES only once: YES is not distributed on Cablevision's system only once and, for example, YES can go out of business only once. It does not go out of business three times_once in each of these markets.")

While Defendant's challenge has intuitive appeal, for indeed, there appears to be a dearth of cited acts other than the refusal to deal in the Complaint, there is no basis at this juncture of the case to find that a Plaintiff as a rival competitor alleging a distinct injury to competition and to itself in a defined market, lacks standing. The Second Circuit has found, in dicta, that ***HN23***[] "it is improper, in the absence of a valid business policy, for a firm with monopoly power in one market to gain a competitive advantage in another by refusing to sell a rival the monopolized goods or services he needs to compete effectively in the second market." *Berkey Photo v. Eastman Kodak Co., 603 F.2d 263, 284 (2d Cir. 1979)*; **[**31]** see *Twin Lab v. Weider Health & Fitness, 900 F.2d 566, 570-1 (2d Cir. 1990)*(finding Berkey required "tangible harm to competition" in second market); cf. *Virgin Atlantic Airways Ltd. v. British Airways, 872 F. Supp. 52, 64 (S.D.N.Y. 1994)*(accepting leveraging claim absent an attempt to monopolize second market, provided there was an attempt to gain a competitive advantage in second market and injury amounting to "tangible harm to competition"); *International Audiotext Network, Inc. v. American Tel. & Tel. Co., 893 F. Supp. 1207 (S.D.N.Y. 1994)*("The District Courts in the Second Circuit have adhered to Berkey, with the Twin Labs gloss [i.e. requiring tangible harm to competition]"); *Viacom Intl. v. Time, 785 F. Supp. 371 (S.D.N.Y. 1992)* (accepting monopoly leveraging claim involving cable system operators who obtained anticompetitive advantage in adjacent market for cable programming).

Most recently, ***HN24***[] the Second Circuit has found that to allege a monopoly leveraging claim, the plaintiff must show that the defendant: (1) possessed monopoly power in one market; (2) used that power to gain a competitive **[**32]** advantage…in another **[*672]** distinct market; and (3) caused injury by such anticompetitive conduct. *Law Offices of Curtis Trinko v. Bell Atlantic, 294 F.3d 307, 326 (2d Cir. 2002)*. Also ***HN25***[] instructive on the issue of leverage claims is the following admonition:

> Offsetting [the prevention of monopolies] is [the] fear that many leverage claims are really complaints about the defendant's greater efficiency or aggressiveness and [the] willingness to turn the antitrust laws into a statute that protects firms from 'unfair' but non-monopolistic practices. Thus, any monopoly leveraging claim must be limited to circumstances where (1) the 'target' (B) market is properly defined; and (2) the alleged conduct threatens the B market with the higher prices or reduced output or quality associated with the kind of monopoly that is ordinarily accompanied by large market share. If the (2) requirement is met, then one literally does not need a distinctive 'leveraging' doctrine--an action that yields monopoly performance in the B market could be regarded as 'monopolization' or 'attempt to monopolize' within the literal language of *§ 2*, notwithstanding that it fails to yield a monopoly **[**33]** market share. But courts must then take great care not to permit the (2) requirement to be satisfied with such alternative formulations as 'unfairness,' 'competitive advantage,' or 'distorting competition' in the leveraged market. ***HN26***[] The gravamen of the offense is not the enlargement of the defendant's market share at the plaintiffs' expense or even the destruction of plaintiffs by unfair means. Rather, it must be monopoly market performance measured by reduced output or higher prices in the secondary market."

3 Areeda et al., supra, § 652 at 97.

Accordingly, the focus of a court's review must be whether the Complaint alleges that the related broadcast rights and advertising (secondary) markets are faced with the requisite threats of "higher prices or reduced quality" associated with monopolies or attempted monopolies. Here, the Plaintiff has adequately alleged that Cablevision's monopoly in the regional sports programming market has been leveraged in the secondary markets of broadcast rights and advertising and caused price distortions consistent with a "tangible harm to competition". See, e.g., *Law Offices of Curtis V. Trinko, 294 F.3d at 326* (holding **[**34]** plaintiff's allegation that defendant used monopoly power in wholesale market to gain a "competitive advantage" in downstream retail market is a cognizable monopoly leveraging claim which survives a motion to dismiss); see also 3 Areeda et al., P652 at 96 (in discussing monopoly leveraging: "The plaintiff might claim that the defendant uses monopoly power in A to place rivals in B at a competitive disadvantage, perhaps by raising their costs or making their offerings less attractive.") Again, Cablevision may ultimately be able to refute these claims on summary judgment, but the Court is unable to resolve them on the instant motion.

Finally, other potential plaintiffs, that is the other teams not owned by Cablevision who are sources of programming rights and advertisers seeking to buy time on regional sports programming services, are not necessarily more efficient antitrust plaintiffs than the rivals who are alleging exclusion in the first instance. Unlike cases involving indirect purchasers, YES is a direct participant and competitor in the alleged markets affected.

Accordingly, Defendant's motions to dismiss Plaintiff's *§ 2* claims in the broadcast rights and advertising markets **[**35]** **[*673]** on the basis of standing are DENIED. [12]

[36]** 2. Antitrust Injury and Standing: Vertical Integration

For reasons similar to those discussed above, YES also has standing to claim in Count VII that Cablevision's acquisition of a "controlling interest" in Madison Square Garden, L.P., violated *§ 7* of the Clayton Act by conferring on Cablevision control over the broadcast rights licensed to MSG and FSNY and control over the New York Knicks and New York Rangers, i.e., "all locally broadcast games of all professional baseball, hockey, and basketball teams in the New York Area". Compl. P158. Cablevision's argument that YES cannot challenge a vertical integration because YES has managed to enter into the market and thereby cannot challenge entry barriers for others mischaracterizes the alleged injury.

HN27[] In a *Section 7* analysis of vertical mergers, the competitive significance of a vertical merger results primarily from the degree, if any, to which it may increase barriers to entry into the market or reduce competition by (1) foreclosing competitors of the purchasing firm in the merger from access to a potential source of supply, or from access on competitive terms, (2) foreclosing competitors of the selling firm from access to the **[**37]** market or a substantial portion of it, or (3) forcing actual or potential competitors to enter or continue in the market only on a vertically integrated basis because of advantages unrelated to economies attributable solely to integration. See *Fruehauf Corp. v. F. T. C., 603 F.2d 345, 352 (2d Cir. 1979)*; see also *Standard Oil Co. of California v. United States, 337 U.S. 293, 314, 93 L. Ed. 1371, 69 S. Ct. 1051 (1949)*("The ***HN28***[] primary vice of a vertical merger or other arrangement tying a customer to a supplier is that, by foreclosing the competitors of either party from a segment of the market otherwise open to them, the arrangement may act as a 'clog on competition, [which] 'deprive(s) . . . rivals of a fair opportunity to compete.' H.R. Rep. No. 1191, 81st Cong., 1st Sess. 8" (footnote omitted)). YES, therefore, has standing to assert that the acquisition has deprived it of a fair opportunity to compete in a market it has already entered. See, e.g., *Rebel Oil Co. v. Atlantic Richfield, 51 F.3d 1421, 1440 (9th Cir. 1997)*("The ***HN29***[] fact that entry has occurred does not necessarily preclude the existence of 'significant' entry barriers. **[**38]** If the output or capacity of the new entrant is insufficient to take significant business away from the predator, they are unlikely to represent a challenge to the predator's market power."); *Six West Retail Acquisition, Inc. v. Sony Management Corp., 2000 U.S. Dist. LEXIS 2604, 97* cv 5499, 2000 WL 264295, at *25 (S.D.N.Y. March 9, 2000)(finding sufficient standing and antitrust injury for a *§ 7* claim where merger presented Defendants with an avenue through which they could thwart **[*674]** Plaintiff's and other exhibitors' access to movies). Accordingly, Defendant's motion to dismiss Count VII is DENIED.

C. Essential Facilities Doctrine

HN30[] A refusal to grant access to an essential facility [13] violates the antitrust laws because of the danger that a monopolist in one market might use its market power to extend its monopoly into another. See *MCI*

---

[12] **While the Court has found that the allegations in the Complaint, taken as a whole, describe conduct that support standing for an antitrust claim under a number of theories, as discussed supra and infra, the Court is cognizant of Defendant's point that there is no separate Count for an attempted monopolization or monopoly leveraging of the market for the sale of advertising. For the purposes of clarity, Plaintiff, should it decide to pursue such a claim, shall file an amended complaint which explicitly sets all surviving claims pursuant to this Opinion, out in separate Counts. In amending, Plaintiff should also be cognizant of the Second Circuit's admonition in Law Offices of Curtis Trinko that monopoly leveraging claims are distinct from attempted monopolization claims, *294 F.3d at 326 n.13*, and should state its claims clearly and succinctly so that Defendant may answer them as such. In answering, Defendants should correlate its responses to Plaintiff's enumerated Counts.**

[13] ***HN31***[] **The Second Circuit has stated that essential facilities include: "'facilities that are a natural monopoly, facilities whose duplication is forbidden by law, and perhaps those that are publicly subsidized and thus could not practicably be built privately.' Most of the successful essential facility claims fall within [these] categories… In cases finding liability in other categories, however, the facility in question was more than dominant; it was effectively the only**

Communications Corp. v. American Tel. & Tel. Co., 708 F.2d 1081, 1132-33 (7th Cir.)("monopolist's control of an essential facility (sometimes called a 'bottleneck') can extend monopoly power from one stage of production to another, and from one market into another.").

[39]** ***HN32***[] To state a claim under the essential facility doctrine, a plaintiff must allege: (1) control of the essential facility by a monopolist; (2) a competitor's inability practically or reasonably to duplicate the essential facility; (3) the denial of the use of the facility to a competitor; and (4) the feasibility of providing the facility. *Twin Labs, Inc. v. Weider Health & Fitness, 900 F.2d 566, 569 (2d Cir. 1990)*. Here, Count III alleges that the essential facility is the distribution system by which Cablevision delivers programming to its franchise area subscribers. See Compl. PP129-30. YES further alleges that it cannot practically or reasonably duplicate the essential facility due to significant barriers to entry (PP131-132), and that it is feasible for Cablevision to provide access to the facility to YES (PP133-34).

Cablevision's objections center around the third prong and regard what circumstances actually constitute a "denial" in the use of a facility. Specifically, Cablevision argues the essential facility doctrine does not enable YES (1) to force access when YES already has access pursuant to the leased access provisions of the Cable Act, *47 U.S.C. § 532*; **[**40]** (2) to force Cablevision to purchase products or services from YES as opposed to forcing Cablevision to permit YES to use a facility; and (3) to obtain better treatment than its competitors. Def.'s Mem. Law at 26.

The only question before the Court is whether, as a matter of law, the essential facility doctrine encompasses cases where the alleged monopoly refuses to pay a "reasonable price" to carry the challenger's service on its facility. The Supreme Court's decision in *Aspen Highlands Skiing Corp. v. Aspen Skiing Co., 738 F.2d 1509, 1513 (1985)*, does not hold that a monopolist must make a facility available at a competitive rather than monopolistic price. [14] Indeed, such a ruling has great logical appeal, given that such determinations of "reasonable price" made by any court can often be Sisyphean undertakings_"nothing less than price regulation of the kind undertaken by regulatory agencies_something for which both the federal courts and the antitrust litigation process are extremely ill-suited and which is, in any event, inconsistent with antitrust's **[*675]** fundamental 'market' orientation to problems of lack of competition." Areeda et al., § 771 at 172; cf. *Corenswet, Inc. v. Amana Refrigeration, Inc., 594 F.2d 129, 134 n. 3 (5th Cir.1979)* **[**41]** (court should not "be called upon to weld together two business entities which have shown a propensity for disagreement, friction, and even adverse litigation").

Nevertheless, ***HN33***[] the Second Circuit in *Delaware & Hudson Ry. Co. v. Consolidated Rail Corp., 902 F.2d 174, 179-80 (2d Cir. 1990)*, found that "there need not be an outright refusal to deal in order to find that denial of an essential facility occurred. It is sufficient if the terms of the offer to deal are unreasonable." Defendant may ultimately be able to delineate a "legitimate business practice" (e.g., where YES should be required to lease the distribution system [15]) which would shield defendant from liability for conduct that otherwise would constitute **[**42]** denial of an essential facility. See *MCI Communications v. American Tel. & Tel. Co., 708 F.2d*

---

one in town." *Twin Labs, Inc. v. Weider Health & Fitness, 900 F.2d 566, 569 (2d Cir. 1990)*(quoting Areeda & Hovenkamp, P736.2 (Supp. 1998)).
