West Texas Utilities Co. v. Texas Electric Service Co.

United States District Court for the Northern District of Texas, Dallas Division

January 30, 1979

No. CA3-76-633-F

Reporter

470 F. Supp. 798 *; 1979 U.S. Dist. LEXIS 14771 **; 1979-2 Trade Cas. (CCH) P62,851

WEST TEXAS UTILITIES COMPANY and Central Power and Light Company v. TEXAS ELECTRIC SERVICE COMPANY and Houston Lighting and Power Company

Core Terms

interconnection, electricity, customers, plaintiffs', interstate, intrastate, synchronous, electric utility, reliability, generation, interstate commerce, savings, holding company, costs, Sherman Act, disconnect, studies, mode of operation, contracts, parties, prices, subsidiaries, defendants', cooperate, wholesale, plants, plans, intrastate commerce, group boycott, anticompetitive

Counsel: **[**1]** Richard E. Powell, Richard G. Ferguson, Michael I. Miller, Thomas G. Ryan, David M. Stahl, Isham, Lincoln & Beale, Chicago, Ill., Stan McMurry, Rain Harrell Emery Young & Doke, Dallas, Tex., for plaintiffs.

M. D. Sampels, Robert Woolridge, F. K. Slicker, Worsham, Forsythe & Sampels, Dallas, Tex., J. A. Gooch, Cantey, Hanger, Gooch, Collins & Munn, Fort Worth, Tex., for defendant Texas Elec. Service Co.

H. Dudley Chambers, Jackson, Walker, Winstead, Cantwell & Miller, Dallas, Tex., E. W. Barnett, T. F. Weiss, Jr., J. G. Copeland, Baker & Botts, Houston, Tex., for defendant Houston Lighting and Power.

Opinion by: PORTER

Opinion

[*804] MEMORANDUM OPINION

This case involves the interconnected group of electric utilities companies serving the vast majority of the electric consumers in the State of Texas. Plaintiffs, two intrastate [1] Texas electric utility companies which are part of a

---

[1] Definition of terms used in this opinion:

Bulk transmission system : higher voltage and higher capacity lines tying together power plants and serving major loads going to interconnections

Closed connection : switch is closed and power can flow over the interconnection between the two systems

Distribution line : serves local loads

Generation : the production of electricity

Intrastate : electric utilities operating in such a manner that electric energy does not cross state lines

Interstate : electric utilities operating in such a manner that electric energy is either transmitted or received across state lines holding company that also owns other interstate electric utility companies, have sued under *§ 1* of the Sherman Antitrust Act, *15 U.S.C. § 1*, two other Texas intrastate electric utilities with whom plaintiffs are interconnected claiming that the defendants conspired to restrict their transmission **[**2]** of electric power to intrastate commerce. This conspiracy allegedly prevented plaintiffs from exchanging power with their interstate holding company counterparts through the use of defendants' transmission lines, at an estimated loss to the holding company of 2.2 billion dollars over the next twenty years. Plaintiffs seek an injunction permanently restraining this alleged conspiracy, restraining any enforcement of any written or oral contractual provision prohibiting the flow of electric energy in interstate commerce, and restraining defendants from disconnecting **[*805]** their systems from the plaintiffs' systems.

[3]** Defendants have asserted a number of defenses, including: (1) the intrastate method of operation is specifically permitted by Federal Power Act *16 U.S.C. § 824(b)*; (2) defendants had no anticompetitive intent; (3) any actions by defendants had no anticompetitive effect upon the plaintiffs; (4) defendants' conduct was reasonable; and (5) defendants acted independently and not in conspiracy. Defendants also question plaintiffs' motive for filing this suit in an effort to undermine the credibility of the testimony presented by the plaintiffs. Defendants introduced evidence suggesting that plaintiffs filed this suit to ensure the interstate exchange of power between the members of plaintiffs' holding company. This exchange of power is required by federal law which permits utility holding companies only if they are integrated systems. The SEC, charged with enforcing this provision, had permitted the holding company to operate without continuous interstate flow of power until 1974, when various municipal power companies filed a suit with the SEC challenging the holding company status of plaintiffs' holding company. Defendants note that this proceeding is only one of a number of proceedings **[**4]** instituted by the plaintiffs or which involve similar issues. These proceedings include:

FPC Docket # E-9558 CSW's request to FPC to order maintenance of interstate operations with ERCOT;

PUC Docket # 14 Request by Defendants and others to PUC to have PUC order reestablishment of pre-May 4, 1976, mode of operation;

U.S. District Court, Western District Texas, Austin Division Suit filed by CPL/WTU objecting to PUC interim order under Docket # 14 reestablishing interconnections in Texas as they were before May 4, 1976;

SEC Docket # 3-4951 Oklahoma cities filed motion with SEC requesting SEC review CSW holding company status;

NRC Docket Nos. 50-498-A and 50-499-A CPL's request to NRC to conduct antitrust hearing as part of construction permit proceedings before NRC involving South Texas Nuclear Project; and

FPC (FERC) Docket Nos. E-9593 and E-9578 CSW's request for joint hearings with PUC and proceeding to determine if TPL engages in interstate commerce.

The Court held a seven week non-jury trial commencing October 2, 1978. The Court renders the following memorandum decision, supplemented with additional findings contained in an appendix.

[5]** THE PARTIES

Open interconnection : switch at the interconnection is open with no power or energy being able to flow over the interconnection

Parallel operation : virtually the same as synchronous operation

Radial line : "single feed" one electric line to a town; two transmission lines to a town would be "dual feed"

Reserve : two types of electric energy reserve

Spinning reserve reserve that a utility has on line at any time

Capacity reserve total generation of the capacity of the utility system less expected peak demand (the maximum amount of energy demand on the system during the year), or reserve above the peak demand of generation

Synchronous operation : means two or more electric utilities systems interconnected with the generators operating in synchronism with each other

Transmission line : serves bulk power supply

All of the parties to this proceeding are electric utilities engaged in the generation, transmission, distribution and sale of electric energy. None of the parties' facilities used in the generation, transmission, distribution or sale of electric energy are located outside the State of Texas.

PLAINTIFFS

West Texas Utilities Company (WTU) and Central Power & Light (CPL) are wholly owned subsidiaries of Central and South West Corporation (CSW), a registered public utility holding company under the provisions of the Public Utility Holding Company Act of 1935. *15 U.S.C. § 79 et seq.* CSW also owns all of the capital stock of Public Service Company of Oklahoma (PSO) and Southwestern Electric Power Co. (SWEPCO), electric utilities operating in the States of Oklahoma, Arkansas, Louisiana and portions of East Texas.

WTU provides electric service to customers of central West Texas, an area including 167 communities, farms, ranches, and 18 electric cooperatives located in 53 counties. The cities of Abilene and San Angelo are the largest metropolitan centers served by WTU, and the company serves a total population of approximately 520,000. In 1977 WTU owned and operated 10 electric **[**6]** generating plants having a total net generating capability of 1,054 megawatts. That year the WTU system experienced a peak load of **[*806]** 758 megawatts for a reserve of 296 megawatts (see appendix C for a map of the WTU service area).

CPL provides electric service to customers in the Rio Grande Valley and the Gulf Coast regions of Texas in an area that includes 212 communities and adjacent and rural areas, seven rural electric cooperatives and two municipal electric systems in 45 counties. The cities of Corpus Christi, Laredo and Victoria are the largest metropolitan centers served by CPL and the company serves a total population of 1,200,000. In 1977 CPL owned and operated nine electric generating plants having a total net generating capability of 3,044 megawatts. That year the CPL system experienced a peak load of 2,323 megawatts for a reserve of 721 megawatts (see appendix B for map of the CPL service area).

WTU has historically operated its system as two divisions, with the "Northern Division" being interconnected with PSO, operating in the State of Oklahoma and the "Southern Division" interconnected with TESCO and other members of the Texas Interconnected Systems (TIS) **[**7]** and the Electric Reliability Council of Texas (ERCOT).

The TIS is a voluntary membership organization consisting of the major bulk electric power suppliers in Texas, including DPL, TESCO, TPL, HLP, CPL, Austin, CPSB, LCRA, TMPA and WTU. [2.] The primary purpose of TIS is to ensure maximum reliable electric service through coordination of planning of operations.

ERCOT was created in July, 1970 and is one of nine regional electric reliability councils forming the National Electric Reliability Council (NERC) (see appendix D).

The northern division of WTU, through its interconnection with PSO, operated in electric synchronism with PSO and other members of the Southwest Power Pool (SWPP). The two divisions were designed so as to permit occasional interchange of power, in part to permit CSW to satisfy the provisions of the 1935 Holding Company Act.

DEFENDANTS

Texas Electric Service Co. (TESCO) is a wholly owned subsidiary of Texas Utilities (TU), a holding **[**8]** company which also owns all of the capital stock of Texas Power & Light (TPL) and 99.6% Of the capital stock of Dallas Power & Light (DPL). TESCO provides electric service in North Central and West Texas, including the Cities of Fort Worth, Wichita Falls, Midland, Odessa, Arlington, Grand Prairie and 68 other incorporated municipalities, with a total population of approximately 4,000,000.

TPL, not a party to this suit, provides electric service in portions of 51 counties in North Central and East Texas, including the Cities of Irving, Waco, Tyler, Mesquite, Richardson, Killeen, Temple, Sherman, Denison, Paris, Lufkin,

---

[2.] Definitions of abbreviations used in this opinion:

Brownwood and 249 other incorporated municipalities. DPL provides electric service primarily in Dallas County. TESCO, TPL and DPL are separate corporate entities with their own officers and boards of directors (see appendix B for a map of the TESCO, TPL and DPL service territories, and Appendix C for a more accurate depiction).

Houston Lighting and Power (HLP) is a wholly owned subsidiary of Houston Industries, Inc., and serves an area of approximately 5,000 square miles in the Texas Gulf **[*807]** Coast region in which are located Houston, Galveston and 152 smaller **[**9]** cities and towns. In 1977, the peak load for the HLP system was 8,645 megawatts, with a total net generating capacity of 10,170 megawatts for a reserve of 1,525 megawatts (see appendix B for a map of the HLP service territory).

ELECTRICITY

Electricity is consumed the instant it is produced, and electric generators are designed to respond instantaneously to changes on demand. For example, each time an electric appliance is turned on, demand for electricity increases; and, conversely, every time an electric appliance is turned off, demand decreases. Each minute increase or decrease in demand requires the generators producing the electricity to produce more or less electricity as required.

Once electricity is produced the producer loses all effective control over it, since electricity moves by the forces of physics over wires connected from the generator to its point of consumption following the path of least resistance and in total disregard for who owns the path or who produced the electricity. Electricity is unique as a commodity because it cannot be seen, branded, traced, accumulated, stored or confined and is consumed the instant it is produced. Electric utility companies are **[**10]** also unique in that they must be ready to meet demand for services continuously, although electricity cannot be stored or inventoried. To provide this service, electric utilities must maintain reserve generating capacity in the form of both installed capacity and spinning reserve.

While this reserve can be maintained by each individual company, the electric utilities in the United States have developed interconnections between each other in order to assure greater reliability in the case of sudden emergencies, to permit the reduction of the total amount of installed reserves among the interconnected companies and to permit the exchange of electric power between interconnected or adjacent utilities. Electric interconnections between non-affiliated companies is an accepted industry wide practice but requires careful study and evaluation before they are installed. Interconnections between non-affiliated electric utilities give added assurance to both systems that an adequate, efficient and reliable source of electric power will exist, particularly in times of electrical emergency.

When two or more electric generators are electrically connected with each other, the laws of science require **[**11]** each generator to spin at exactly the same speed or frequency. Generators so connected are said to be operating in synchronism or in parallel with each other. This is true no matter who owns the generators and whether the generators are located adjacent to each other or are physically separated by several hundred miles. An important characteristic of electricity is man cannot force electricity to follow any specific path without disconnecting all undesired paths from the generator; thus, when interconnections are closed, electrical disturbances in one generator or transmission line instantaneously impact upon all interconnected generators. Also, the only effective assurance that power will not flow across Texas state lines, if Texas companies wish to preserve their intrastate status, is to either have no interconnections with any utilities that operate in interstate electrical transmissions (which would include severing ties with Texas electric utilities that transmit or receive power across state lines) or make sure that any points of interconnection between intrastate Texas electric utilities and interstate electric utilities remain open, preventing power flow between the two systems.

[12]** Various types of electric energy exchanges may be agreed to by interconnected utilities. These exchanges include:

(1) "Economy Energy" : Electric energy which one utility sells to another utility at a cost less than the receiving utility can generate its own electricity;

(2) "Emergency Energy" : Electric energy which one utility receives from another when the receiving utility is unable to provide its own system needs due to an unforeseeable failure of equipment, or "outage" on its system; and

[*808] (3) "Wheeled Energy" : Electric energy which one utility transmits to another utility (or to itself) over the transmission lines of a third, intermediate utility which charges a fee for such services.

INTERCONNECTIONS BETWEEN THE PARTIES

Interconnections between electric utilities in Texas began as early as 1924 with interconnections between TESCO and WTU. These two companies, along with TPL and DPL, later formed the North Texas Interconnected System (NTIS).

An emergency interconnection between HLP and Gulf States Utilities (GSU) was first made in 1928 (the Huffman tie), but this interconnection did not operate closed as a matter of normal operation until World War II, at **[**13]** which time HLP began operating continuously interconnected with CPL, LCRA, City of Austin and the CPSB to help alleviate capacity shortages brought on by the war. This action lead to the formation of the South Texas Interconnected System (STIS). While defendants were indirectly interconnected with each other in the 1940's, there was little, if any, coordination between the systems and STIS and NTIS until the 1960's. On or about August 26, 1935, solely because of the passage of the Federal Power Act, and solely to avoid becoming subject to FPC jurisdiction, WTU opened its interconnections with PSO. Both TESCO and WTU then believed that operation in interstate commerce in a manner which would subject them to the consequences of FPC jurisdiction was not in the best interest of their customers. There is no evidence in the record to suggest that TESCO and HLP reached any agreement or were even interconnected in 1935, or that DPL, TPL and TESCO reached any agreement when TESCO made its determination to avoid interstate commerce. TESCO's determination in 1935 was its unilateral effort to serve its customers in the most advantageous manner.

Interconnections were reestablished between TESCO **[**14]** and WTU pursuant to a written agreement which, as amended from time to time, was continued in effect until cancelled on May 11, 1976. This agreement required both WTU and TESCO to give prior notice in the event either wished to commence operation in interstate commerce so as to permit the other to choose the type of operation in which it desired to engage that is, in intrastate or interstate commerce.

In 1962, HLP and TPL built a direct tie to connect their systems as the next major step in the evolution toward interdependence and cooperation. Soon thereafter, NTIS and STIS were joined into the Texas Interconnected Systems (TIS) in 1967. At the time TIS was formed, all of its members operated and wished to continue operating on an intrastate basis (see appendix E).

In 1970 ERCOT was formed, consisting of the members of TIS as well as various municipalities and rural electric cooperatives; although the names "ERCOT" and "TIS" are sometimes used interchangeably, the two groups do have functional differences. TIS consists of only the bulk power systems whereas ERCOT includes all of the members of TIS and small municipal and REA cooperatives. ERCOT reports to NERC, while TIS coordinates **[**15]** bulk power systems. Membership in ERCOT is available to any electric utility which owns, controls or operates an electric power system in Texas, and ERCOT promotes reliable operations of power systems in Texas by providing a means to communicate and coordinate the planning and operation of its members.

TIS is operationally coordinated with all of the generators in TIS operating in synchronism with each other so that if there is a loss of any individual generator, all of the other generators in TIS respond automatically to compensate for the loss. Historically, all members of TIS and ERCOT, while maintaining interconnections among themselves, have not, except in times of emergency, maintained interconnections with electric utilities operating outside of the State of Texas.

The maintenance of interconnections among WTU, CPL, TESCO and HLP and **[*809]** other systems in Texas was mutually beneficial and permitted the interconnected parties to reduce the total amount of installed reserves and to exchange electric power in times of sudden emergencies. These interconnections also assured a greater degree of electric reliability for all participating companies. The interconnecting electric **[**16]** systems comprising TIS and

ERCOT are large enough to take advantage of all economies of scale and at the same time not too large to be unmanageable. The larger an interconnected system becomes, the greater the opportunity for cascading blackout and other operating difficulties.

The interconnection agreements between WTU and TESCO preserved the right of system self-determination, that is, the right to decide whether to operate in interstate commerce subject to the consequences of FPC jurisdiction or to operate in intrastate commerce subject only to state and local regulatory authority. The interconnection agreement between WTU and TESCO did not require either party to continue to operate in intrastate commerce, to maintain interconnections with each other or any TIS or ERCOT member and was cancellable at any time by either party for any reason without penalty. It also did not restrict either WTU or TESCO from providing electric service anywhere.

It has been the common understanding among the members of TIS and ERCOT that each individual system member believed it to be in the best interest of its customers to operate solely in Texas. It was also commonly understood among the members **[**17]** of TIS and ERCOT that if a system chose to engage in interstate commerce, it would give prior notice to all other members in order to permit each other system the right to choose whether to operate solely in Texas or to operate in interstate commerce as it determined was in the best interest of the customers. The coordination in TIS and ERCOT has resulted in perhaps the most reliable and lowest cost electric power in the nation. The president of plaintiff company CPL, R. W. Hardy, believes ERCOT and TIS have been and are models of efficiency and reliability.

INTRASTATE OPERATION

Since August 31, 1935, when Title 2 of the Federal Power Act became effective, any electric utility which owns or operates facilities used for the transmission of electric energy in interstate commerce has been subject to the regulatory powers of the Federal Power Commission (FPC), now the Federal Energy Regulatory Commission (FERC) (as used hereinafter FPC shall include FERC), set forth in Title 2 of the Federal Power Act, *16 U.S.C. §§ 824 to 828C*. Generally these regulatory powers include the power to order an electric utility to interconnect with another electric utility under certain circumstances (*16 **[**18]** U.S.C. § 824a*), the power to oversee the disposition of certain utility assets (*16 U.S.C. § 824b*), the power to regulate the issuance of an electric utility securities (*16 U.S.C. § 824c*), and the power to regulate rates for the transmission and sale of electric energy at wholesale in interstate commerce (*16 U.S.C. § 824d*).

The record indicates that the defendants began consulting with each other regarding their intrastate operations in the 1960's. These consultations were necessitated by a variety of factors. First, HLP and TESCO's affiliate TPL built a direct interconnection in 1962. Second, the standards of jurisdiction under the Federal Power Act changed drastically during the 1960's so that defendants became concerned with jurisdiction even though they had no facilities crossing state lines. Third, these concerns were confirmed when the FPC advised the defendants in the 1960's that they were in fact subject to the FPC jurisdiction under the Federal Power Act. The FPC's effort to assert jurisdiction was followed by its continuing effort through the early 1970's to promote the interconnection of TIS with the South West Power Pool (SWPP), which is the group of utilities operating **[**19]** to the north and east of TIS.

The only means to ensure freedom from federal regulation and the adverse electrical, economic, operational and administrative **[*810]** consequences flowing therefrom is not to operate interconnected with any facility used for the transmission or sale of electricity in interstate commerce. As a result of the events listed above HLP and TESCO have, from time to time, consulted with each other to determine whether there were points of interconnection which presented the potential for the interstate flow of electricity. Defendants were particularly concerned for many years with the points of interconnection between WTU and its affiliate PSO because of the very peculiar nature of the interconnection. Mr. Hardy, the current chief executive officer of CPL and previously the president of WTU, testified that these interconnections were designed to give CSW the ability to transfer power between its subsidiaries in order to qualify under an exemption under the Public Utility Holding Company Act. Defendants had in fact expressed concern over these interconnections through the years but were reassured by CSW that it desired to operate its two Texas subsidiaries **[**20]** on an intrastate basis and that the operational split of its subsidiaries presented no threat to its holding company status.

There were installed over the years at strategic locations between the northern and southern divisions of WTU various devices to prevent interstate flow of electricity under circumstances which would render TESCO jurisdictional and to protect against synchronous operation of TESCO with WTU's northern division, PSO and other members of SWPP. There was never any dispute between WTU and TESCO as to the object of avoiding synchronous operation. Some disputes did develop with respect to the use of interlocks as opposed to power flow relays in order to make certain that the FPC could not order synchronous interconnections of TESCO with SWPP, but these differences were always resolved to the mutual satisfaction of the parties.

In order to insure the validity of the securities issued by TESCO and others, the interlock devices which were owned by TESCO were inspected and tested periodically through the years. These inspections and tests did not interfere with the operations of WTU even though the testing of the interlock device did result in an annual flicker of certain **[**21]** loads on WTU's northern division. It would take the annual testing of the interlocks for 240 years for any loads on WTU's northern division, however, to be interrupted for a total of one minute.

It has been the common understanding and agreement among all the electric utilities and TIS that if one of the members of the TIS decided to commence interstate operations, it would provide prior notice to the other members so that each could independently decide whether to exercise its unilateral right to disconnect and remain in an intrastate mode. This understanding was, for example, reflected in the WTU-TESCO contract which was subject to immediate cancellation by telephonic notice. Plaintiff gave no notice prior to their commencement of interstate operation on May 4, 1976, because they feared defendants would exercise their right to disconnect.

Each defendant has indicated that it will engage in an interstate mode of operation when there is shown to be advantages to the customers of the defendants that outweigh the advantages of the present intrastate system of operation. There is considerable evidence of each defendant's past and present efforts to evaluate the benefits and costs of **[**22]** an interstate mode of operation. In fact, one of plaintiffs' own witnesses, Mr. Arey, was retained by TESCO and its affiliates in 1966 to study interconnection with SWPP, and he concluded that TESCO and all the other members of TIS would be better off operating on an intrastate basis. In contrast to plaintiffs' assertion that the defendants have acted unreasonably in operating intrastate, Mr. Arey testified that it would not have been unreasonable for defendants to continue intrastate operations based on the results of his study.

The wisdom of TESCO's determination to avoid synchronous interstate operations is illustrated repeatedly by the failure of all attempts by the Texas companies to operate in synchronism with the vast electrical system **[*811]** outside Texas. Synchronous operation of the Texas utilities and interstate utilities during 1942 to 1945 resulted in numerous system outages both in Texas and in other states. Some of these outages occurred because of trouble as far away as Alabama, Tennessee and Mississippi. Synchronous operations of the Texas utilities in interstate commerce during 1942 to 1945 were unsatisfactory and were tolerated only because of the emergencies **[**23]** of World War II.

In 1957, HLP and GSU tested whether their systems could operate in synchronism. The resulting electrical disturbances were so severe that the test had to be abandoned. In 1968, the FPC encouraged HLP, TPL and GSU to test synchronous operations through the GSU-HLP Huffman tie. The 1968 test also proved totally unacceptable and was abandoned.

From August 28, 1976, to January 22, 1977, plaintiffs attempted to operate in synchronism with the SWPP. Such operations resulted in serious reliability problems and at least nine system separations, two of which occurred because of generation difficulties in Mexico. Moreover, CSW has publicly acknowledged in a prospectus filed with the SEC that the TIS, including WTU and CPL, cannot operate in synchronism with PSO and SWEPCO and other members of SWPP without critical operating problems.

TESCO and HLP have stated that while they believe that intrastate operation is in their best interest and in the best interest of their customers, if it appeared advantageous to commence synchronous operation with SWPP, they would be among the first to undertake that mode of operation. Until such time as there is advantage to their customers **[**24]** from interstate operation, defendants prefer to avoid the cost of regulation which would inevitably result from interstate operation. This preference can hardly be regarded as unreasonable since defendants obviously received no benefits from any such regulation. Indeed, plaintiffs' economic expert admitted that it was in defendants' own best interest to avoid FERC regulations.

Events Leading to Filing of Plaintiffs' Complaint

Both plaintiffs, WTU and CPL, told the Department of Justice in 1973 that they did not want to interconnect with SWPP because the interconnection would degrade the reliability of TIS. Moreover, plaintiffs have admitted that intrastate operation was in their best interest until 1974. Plaintiffs' change in attitude in 1974 coincides with the date of the filing of the complaint against plaintiffs' parent holding company, CSW, in the Securities and Exchange Commission (SEC).

Five months after WTU and CPL advised the Department of Justice that they did not wish to interconnect with PSO and other members of SWPP and after advising the Department of Justice of their continued desire to limit their business to the State of Texas and intrastate commerce, a complaint **[**25]** was filed with the SEC alleging that CSW was not a single integrated electric utility system within the meaning of the 1935 Act. In response to this petition, CSW hired Power Technologies, Inc. (PTI) to perform a study concerning alternate modes of integrating the holding company. In the summer of 1974, Mr. S. B. Phillips, Jr., chairman of the board of CSW, invited TU to participate in the study. Mr. Phillips informed TU that the study would include modes of operation which integrated the CSW companies with synchronous operation with the SWPP. At such meeting the chief executive officer of CSW told the chief executive officer of TU that if he did not cooperate in proceeding with synchronous operation between ERCOT and SWPP, CSW would force such mode of operation upon ERCOT companies, including TESCO and HLP, against their will.

TU declined to participate in the study commissioned by CSW because the CSW study was limited to examining how best to integrate the CSW companies for the purpose of complying with the 1935 Act and would not include examination of whether ERCOT should be connected with SWPP.

[*812] The preliminary results of the PTI study were presented to the CSW board **[**26]** of directors at a meeting on October 16, 1975. At that meeting, CSW, on the advice of its counsel, adopted a policy to integrate its affairs by causing its four subsidiaries to operate in synchronism while at the same time maintaining all interconnections with non-affiliated companies, including TESCO and HLP. At the time such decision was made by CSW, no reliability studies had been conducted, the economic study was not complete and no effort was made to evaluate the impact of synchronous operation on other companies in SWPP or TIS/ERCOT.

Following completion of the PTI report, it was personally delivered by CSW to TU. Again, CSW advised TU that TU would either cooperate in the implementation of synchronous operation with SWPP, or it would be forced upon TU against its will. At no time did WTU or CPL or their parent, CSW, approach TESCO or HLP on the basis of conducting studies to determine the best mode of operation for electric utility systems in Texas or elsewhere but on the contrary, continuously insisted that synchronous operation would be instituted whether it was in their best interest or not.

In late December, 1975, CSW's chairman of the board delivered a copy of the PTI **[**27]** report to the president of HLP, inviting HLP's cooperation in the implementation by CSW of a Mode 4 operation, but stated that CSW was committed to an interstate mode of operation and CSW would force HLP's cooperation if HLP's cooperation was not voluntarily forthcoming.

On December 31, 1975, CSW filed the PTI report with the SEC and advised the SEC that it was committed to proceeding with the integration of its four subsidiaries by sewing together the electric systems comprising ERCOT and SWPP. CSW advised the SEC that Mode 4, the preferred mode of operation, would permit the CSW companies to utilize the transmission system of other member companies of ERCOT, which, in turn, would integrate the four CSW companies in a manner required by the 1935 Act. CSW further advised the SEC on December 31, 1975, that if defendants did not cooperate in such an interconnection, other options for securing the necessary cooperation would be considered. This representation was consistent with the other threats made by CSW against the defendants prior to such stay. Prior to December 31, 1975, the plaintiffs never advocated nor did they desire to operate in interstate commerce in synchronism with SWPP. **[**28]** Prior to the attack on CSW's holding company status, neither WTU nor CPL attempted to or desired to undertake synchronous operations with PSO or other members of the SWPP.

For 40 years prior to December 31, 1975, WTU, CPL and CSW believed that the nature of their operations, including the maintenance by WTU of its northern division electrically isolated from the southern division, was in their best interest and in the best interest of their customers. On January 30, 1976, the SEC ordered that an evidentiary hearing be held to consider, among other things, whether the electric utility facilities of the subsidiaries of CSW were capable of being economically operated as a single integrated and coordinated system within the meaning of the 1935 Act. TU and HLP intervened in the SEC proceeding announced by the January 30, 1976 notice, and a pretrial hearing was scheduled for May 12, 1976.

TESCO advised the SEC that the mode of operation proposed by CSW would radically alter the mode of operation of TU and the other members of TIS and would pose a threat to reliability of service and would impose unreasonable and uneconomic burdens upon TU and TIS customers and investors. Such a change **[**29]** in mode of operation would result in an unjustifiable risk to such customers and investors. TESCO further advised the SEC that it appeared that CSW's proposal was being made merely as a scheme by CSW to save its holding company.

CSW embarked on a secret and clandestine maneuver on May 4, 1976 to save its holding company status by utilizing the facilities of the defendants against their will. **[*813]** At a secret meeting of CSW executives and attorneys in the latter part of April, 1976, CSW's vice president and chief engineer memorialized a legal plan to save CSW's holding company and confirmed the lack of any other motivation for the action subsequently taken on May 4, 1976.

In the darkness of night on May 4, 1976, WTU performed a midnight wiring of electrical circuits charged with 69,000 volts of electricity between WTU and PSO, a procedure which placed WTU, and therefore all members of TIS and ERCOT, in interstate commerce. At trial WTU attempted to justify the establishment of this new radial line as part of its plan to implement Mode 4 operation. In fact, plaintiffs' own witnesses testified that the existence of this radial line was not in any way contemplated nor a necessary **[**30]** part of any plan to implement Mode 4 and although some of plaintiffs' witnesses stated that the radial line was necessary in order to ensure reliable electric service to the communities in Oklahoma, I find that the evidence is to the contrary and that the midnight wiring was done without any legitimate business purpose. By installing the radial line, often referred to as the "midnight wiring", WTU maliciously and willfully violated its long standing agreement with TESCO by failing to notify TESCO of the commencement of interstate operation and for the purpose of requiring TESCO and HLP to operate in synchronism with SWPP. This is also evidenced by the fact that this suit was filed on May 3, 1976, along with an application for a temporary restraining order, in an attempt to force the defendants into interstate operations without the defendants' voluntary consent.

At the time of the midnight wiring, defendants had evaluated the PTI report. Upon being notified of the midnight wiring TESCO concluded independently that it was done in furtherance of a plan to force the synchronous interconnection of ERCOT and SWPP against their will and in furtherance of the threats earlier made. TESCO **[**31]** had concluded that the implementation of Mode 4 would downgrade its reliability and would cost a significant amount of money with no corresponding benefits to it or to its customers. Based upon TESCO's prior evaluation of the mode of operation which was in its best interest and the best interest of its customers, the threats made, the purpose of the PTI study and its knowledge with respect to the adverse effects of interconnected operation gained over a long period of time, it had no reasonable alternative other than to disconnect from the plaintiff and from other electric utilities if it was going to be in a position of exercising its own choice as to the best mode of operation in the future. HLP had also reached the same conclusion, although independent of TESCO. Both defendants had to act quickly after the midnight wiring of May 4, 1976 occurred if they were to preserve their intrastate mode of operation. The longer the defendants remained interconnected with WTU, with the plaintiffs and other utilities which were connected in interstate commerce, the more likely it would be that the FPC would assert jurisdiction over the companies.

In severing connections with plaintiffs on May **[**32]** 4, 1976, defendants acted independently and defensively in pursuing the only action that would allow them to preserve their ability to decide for themselves the manner in which they would conduct their operations. The purpose of the actions of WTU and PSO on May 4, 1976 was to force TESCO and HLP into interstate commerce and subject TESCO and HLP to federal regulation against their will. The motive behind the actions of WTU and PSO on May 4, 1976 was to preserve CSW's corporate structure and CSW's status as a regulated holding company under the 1935 Act. Any economic benefit realized by WTU as a result of the establishment of the radial feed into Oklahoma on May 4, 1976 was minimal at best, and was not a justification in itself for establishing the radial tie.

THE COURT'S DECISION

The Court has spent the last eight weeks reviewing both the record in this case, which is over 3,500 pages of testimony and about 1,000 exhibits, the court's notes and **[*814]** recollections and the law that applies to this case, and I think I have a pretty fair understanding of what this case is all about. Plaintiffs have advanced a number of theories of recovery, and there is a lot of evidence, so **[**33]** from that standpoint it is a complicated case; but I think many of the key questions in this case are simply questions of law.

This case, as it has been presented over the past two and one-half years, really boils down to a single, preliminary question of law, that is, whether or not it is a violation of *§ 1* of the Sherman Act for an electric utility to exercise the freedom of choice provided by Congress in § 201(b) of the Federal Power Act (*16 U.S.C. § 824(b)*) and decide to confine its facilities and operations solely within a single state. Plaintiffs have made much of the argument that this is a group boycott, that they are not talking about just one electric utility deciding to operate in intrastate commerce, but a group of utilities, and the defendants' concerted action means that interstate utilities cannot connect to them, specifically that the plaintiffs cannot connect to the defendants and remain in interstate commerce.

In this context I do not perceive a difference between one utility deciding to operate intrastate, or a group of utilities, independently or even in concert, deciding to operate intrastate. Congress must have been aware of the unique characteristics of **[**34]** the electric utility industry at the time it adopted the Federal Power Act and must have been aware that the operation of a totally intrastate electric utility system could have potential antitrust considerations. Congress gave the electric utilities a choice: intrastate operation or interstate operation. If taking advantage of the intrastate option violates the Sherman Act, then the provision of the Federal Power Act becomes meaningless. Congress can rewrite the Federal Power Act and eliminate that provision; I cannot. Therefore, I do not think that the actions of the defendants violate the Sherman Act, *§ 1*.

I want to emphasize one factor which I took into account in evaluating the credibility of the witnesses, which I must do in this case as the trier of fact. I mentioned that this case turns primarily on questions of law, but I certainly recognize that there are significant factual issues in this case, particularly the testimony concerning the alleged economic savings and increased reliability to CSW if Mode 4 is implemented. I think it is a fair statement of the law that when a court considers an antitrust case, the focus of the court's inquiries should be upon the actions of **[**35]** the defendants, not the plaintiffs. Stated another way, for purposes of determining whether or not the defendants have violated the Sherman Act, the motive of the plaintiffs in bringing the suit is irrelevant to a determination of the plaintiffs' claim.

There has been a lot of testimony in this case concerning CSW and the plaintiffs' bad motives in bringing this case, and I think that I should make clear that I have not considered that testimony in making my determination on the merits. On the other hand, I do think that that testimony can be relevant to my evaluation of the credibility of the witnesses, particularly when that testimony is essential to plaintiffs' factual support for the Sherman Act claims, such as the testimony regarding competition and the alleged savings to the plaintiffs from Mode 4 operation. In the same regard, I think I must carefully consider testimony that was given in documents that were prepared after the SEC challenged CSW's holding company status and after the May 4, 1976 wiring into Oklahoma. Certainly the plaintiffs' alleged motive in bringing this case merely to integrate CSW's holding company and avoid divestiture is not conclusive in my evaluation **[**36]** of the credibility of certain witnesses, but I think that the defendants have amply demonstrated in this record, as I have found earlier in this opinion, that the plaintiffs had this motive available to them, and used it, other than the motives plaintiffs have advanced, for filing this lawsuit, and, more particularly, for developing testimony that would support the alleged Sherman Act violations.

[*815] Group Boycotts

Concerted refusals to deal, or "group boycotts", are per se illegal under the *Sherman **Antitrust Law**. Fashion Originators Guild of America, Inc. v. FTC, 312 U.S. 457, 61 S. Ct. 703, 85 L. Ed. 949 (1941)*. The principle of the group boycott cases is that where businessmen concert their actions to deprive others of access to merchandise which the latter wish to sell to the public, we need not inquire into the economic motivation underlying their conduct, because exclusion of traders from the market by means of combination or conspiracy is so inconsistent with the free market principles embodied in the Sherman Act that we will not consider any alleged justification. *United States v. General Motors, 384 U.S. 127, 146, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*.

"Group **[**37]** boycotts . . . have not been saved by allegations that they were reasonable in the specific circumstances, nor by failure to show that they "fixed or regulated prices, parcelled out or limited production, or brought about a deterioration in quality' ". *Klor's v. Broadway-Hale Stores, 359 U.S. 207, 212, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)* (Quoting from, *Fashion Originators, 312 U.S. at 466-468, 61 S. Ct. 703, 85 L. Ed. 949*). It is of no consequence under the Sherman Act that each party acted in its own lawful interest and it is unnecessary to find an explicit agreement to find the Sherman Act conspiracy. *United States v. General Motors, 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*.

It is the intent to eliminate competition that determines the illegality of a joint refusal to deal. The court must examine the purpose and intent of the alleged conspirators, not to determine whether or not the defendants engaged in a refusal to deal to achieve purported beneficial results brought about through the elimination of competition, but rather to discover whether or not the purpose and intent was anticompetitive.

For example, in *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, 340 U.S.* ***[**38]*** *211, 71 S. Ct. 259, 95 L. Ed. 219 (1951)* the court stated, quoting from *United States v. Socony Vacuum Co., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129*:

> "Under the Sherman Act a combination formed for the purpose and with the effect of raising, depressing, fixing, pegging, or stabilizing the price(s) of a commodity in interstate or foreign commerce is illegal per se";

and in *Eastern States Retail Lumber Dealers Association v. United States, 234 U.S. 600, 606, 34 S. Ct. 951, 952, 58 L. Ed. 1490 (1914)* the Court stated:

> ". . . it appears that the defendant associations have for their object, among other things, the adoption of ways and means to protect such trade and to prevent the wholesale dealers from intruding therein."

Other group boycott cases also indicate that the Court must consider whether or not the alleged group boycott had the requisite anticompetitive purpose. *Associated Press v. United States, 326 U.S. 1, 65 S. Ct. 1416, 89 L. Ed. 2013 (1945)* (holding that a bylaw was "plainly designed in the interest of preventing competition"); *Radiant Burners Inc. v. Peoples Gas, Light & Coke Co., 364 U.S. 656, 81 S. Ct. 365, 5 L. Ed. 2d 358 (1961)*; *United States* ***[**39]*** *v. General Motors Corp., 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*; *Binderup v. Pathe Exchange, 263 U.S. 291, 44 S. Ct. 96, 68 L. Ed. 308 (1923)* ("(t)he alleged purpose and direct effect of the combination and conspiracy (were) to put an end to these contracts . . . and "restricts . . . the liberty of a trader to engage in business.' " at 312, *44 S. Ct. at 101*). The plaintiffs need not show specific intent on the part of the defendants to restrain trade; in an antitrust case, it is unlikely that there will be an express agreement in violation of the antitrust laws, and therefore circumstantial evidence assumes a heightened importance that may sustain a finding of a conspiracy. *Coughlin v. Capitol Cement Co., 571 F.2d 290 (5th Cir. 1978)*; *In re Yarn Processing Patent Validity Litigation, 541 F.2d 1127 (5th Cir. 1976)*.

[*816] The Fifth Circuit has recognized three types of group boycotts that are per se violations of the antitrust laws; (1) horizontal combinations among traders at one level of distribution, whose purpose is to exclude direct competitors from the market (e.g., Eastern States Retail Lumber); (2) vertical combinations among traders at different marketing **[**40]** levels, designed to exclude from the market direct competitors of some members of the combination (e.g., Klors v. Broadway-Hale Stores, Inc.); and (3) combinations designed to influence coercively the trade practices of boycott victims rather than to eliminate them as competitors (e.g., Fashion Originators). *E. A. McQuade Tours, Inc. v. Consolidated Air Tour Manufacturing Co., 467 F.2d 178 (5th Cir. 1972)*. "In all of these cases, the touchstone of per se illegality has been the purpose and effect of the arrangement in question. Where exclusionary or coercive conduct has been present, the arrangements have been viewed as "naked restraints of trade' and have fallen victim to the per se rule. On the other hand, where these elements have been missing, the per se rule has not been applied to collective refusals to deal. *Id. at 186-7*. Where exclusionary or coercive conduct is not present, the court should apply the rule of reason test to determine whether there is a violation of the *Sherman Act. Hatley v. American Quarter Horse Association, 552 F.2d 646 (5th Cir. 1977)*.

I must exercise extreme caution in applying a per se label to conduct that allegedly violates the antitrust laws. "To **[**41]** outlaw certain types of business conduct merely by attaching the "group boycott' and "per se' labels obviously invites the chance that certain types of reasonable concerted activity will be proscribed". *Worthen Bank & Trust v. National Bank Americard, Inc., 485 F.2d 119, 125 (8th Cir. 1973)*. While it is true that the Supreme Court has outlawed group boycotts as per se illegal, "a multitude of lower courts have continued to evaluate alleged boycotts under a "rule of reason' analysis rather than by the per se doctrine employed by the Supreme Court in the aforementioned cases. As one commentator has observed, "the law in Washington, however, is quite different from the law in the rest of the country.', Woolley, Is A Boycott A Per Se Violation of the Antitrust Laws, 27 Rutgers L.R. 773 (1974)", *Cullum Electric & Mechanical Inc. v. Mechanical Contractors Association of South Carolina, 436 F. Supp. 418, 428 (D.C.S.C.1976)*, and the Fifth Circuit closely scrutinizes group boycott allegations. See *E. A. McQuade Tours, Inc. v. Consolidated Air Tour Mfg. Co., 467 F.2d 178 (5th Cir. 1972)*; *Sulmeyer v. Coca Cola Co., 515 F.2d 835 (5th Cir. 1975)*; *Hatley v. American Quarter Horse Association, 552* ***[**42]*** *F.2d 646 (5th Cir. 1977)*; *Coughlin v. Capitol Cement Co., 571 F.2d 290 (5th Cir. 1978)*; *Pinder v. Hudgins Fish Co., Inc., 570 F.2d 1209 (5th Cir. 1978)*.

As I read them, then, there are three types of group boycott cases recognized by the Fifth Circuit, and a requirement that the alleged boycott have an anticompetitive purpose, with exclusionary or coercive conduct; I don't think this case fits any of those descriptions.

First, there has been ample testimony in the record (for instance, the testimony of Hardy and Price) that there is no direct competition between CPL and either HLP or TESCO, and no direct competition between TESCO and HLP with WTU, except de minimis competition in certain areas duly certified to TESCO and WTU. So this case does not fit within the first two McQuade categories of group boycotts that involve direct competition.

Second, the key to the third category of group boycott cases cited in McQuade was the "coercion practiced indirectly on a rival method of competition . . ." *467 F.2d at 187*. In Fashion Originators, cited by McQuade as an example of this third category, a group of garment manufacturers refused to sell original designs to stores that stocked copies **[**43]** of those designs made by other manufacturers, and thus there was a conspiracy to eliminate the copiers from the market. Here, except in certain multiply certified areas I mentioned earlier, there is no direct competition between **[*817]** plaintiffs and defendants. Defendants can't conspire to deprive plaintiffs of a market they do not share and, under the Public Utility Commission of Texas' (PUC's) certification procedure, they cannot share since utilities are certified for only certain areas. I will discuss this competitive aspect of the case in more detail later in this opinion.

Third, I must examine the purpose of the alleged boycott. HLP and TESCO's purpose in remaining in intrastate commerce was to avoid FPC jurisdiction. The second purpose was to serve the best interests of their customers by providing reliable, economical power. On this record after hearing all the testimony, I do not find that the purpose was in any way anticompetitive or coercive because plaintiffs do not meet their burden of showing any anticompetitive or coercive intent.

If I am to find a Sherman Act violation in this case, I must also find a contract, combination, agreement or conspiracy in restraint **[**44]** of trade. As I understand the pleadings and the evidence, the plaintiffs are claiming that over a period of some 40 plus years, at least since the adoption of the Federal Power Act in 1935, the defendants have been engaged in a combination and conspiracy, the essence of which is recorded in certain contracts between the defendants, to restrict the flow of power in the defendant companies to intrastate commerce.

To analyze this allegation properly, it is important to understand that unilateral refusals to deal, without more and "in the absence of any purpose to create or maintain a monopoly", are lawful under the *Sherman Act. United States v. Colgate, 250 U.S. 300, 307, 39 S. Ct. 465, 468, 63 L. Ed. 992, 997*, (1919); *United States v. Parke, Davis & Co., 362 U.S. 29, 80 S. Ct. 503, 4 L. Ed. 2d 505 (1960)*. A manufacturer has a right to select its customers and to refuse to sell its goods to anyone for reasons sufficient to itself, and "inherent in this right is the opportunity to show unilateral as opposed to conspiratorial conduct at trial." *Coughlin v. Capitol Cement Co., 571 F.2d 290, 301 (5th Cir. 1978)*.

I recognize, as did the Fifth Circuit in Coughlin, that the so-called Colgate **[**45]** Doctrine has been carefully circumscribed by the Supreme Court. *571 F.2d at 301 n.22*. The doctrine does not apply to a case where there is an agreement between the seller and a purchaser to maintain resale prices, *United States v. Bausch & Lomb Optical Co., 321 U.S. 707, 64 S. Ct. 805, 88 L. Ed. 1024 (1944)*, and *United States v. Parke, Davis & Co., 362 U.S. 29, 80 S. Ct. 503, 4 L. Ed. 2d 505 (1960)*, and a producer secures adherence to prices by means which go beyond his mere declination to sell to a customer who will not observe this announced policy. See *Parke, Davis, & Co. and Federal Trade Commission v. Beech-Nut Packing Co., 257 U.S. 441, 42 S. Ct. 150, 66 L. Ed. 307*. "However, the post-Colgate decisions of the Supreme Court do not in any way limit a manufacturer's right to attempt to disprove the existence of concerted action." *Coughlin, 571 F.2d at 301, n.22*.

I do not think that the plaintiffs have proved concerted action in this case. They have established that both HLP and TESCO want to remain in intrastate commerce and that they both wish to do so to avoid FPC regulations. Plaintiffs also established that TESCO and HLP took measures, such as flying the Red River (as Mr. Robinson **[**46]** testified), or checking the power flow relays and points of interconnection, to protect against inadvertent interstate flows of electricity. I think the evidence, however, shows that each of the companies, including the plaintiff companies, who, interestingly enough, did not object to this intrastate arrangement and apparently wanted to participate in that type of operation until around 1974-75, decided that for one reason or another, the intrastate method of operation which would avoid FPC jurisdiction was the method of operation that each wanted to pursue. Plaintiff companies apparently did this because they saw high immediate costs of interconnecting interstate rather than remaining intrastate (see Px 19) although plaintiffs apparently made no long range study, as they now have, to determine the long range economic costs **[*818]** and savings of interstate vs. intrastate operations.

The evidence also shows that each of the companies, including plaintiffs and defendants, have always had the opportunity for withdrawing from the intrastate method of operation in connecting interstate. None had elected to do so until May 4, 1976 (except in the war years, and other unusual situations), **[**47]** and there was ample evidence that the only objection defendants had to plaintiffs' withdrawal from intrastate operations and connection to interstate operation on May 4, was that the defendants were not permitted to make their own independent decision about whether or not to join the plaintiffs in that decision; the decision was forced upon them. For a period of time on that day defendants were involuntarily drawn into interstate operation because of the midnight wiring.

I think one of the most damaging pieces of evidence to plaintiffs' conspiracy theory is the fact that when, on May 4, the defendants were involuntarily placed in interstate commerce, they each disconnected from all other utilities, not just WTU and CPL, in order to isolate their systems because they were not sure whether or not these other utilities, who had not participated in the midnight wiring, would remain in interstate commerce. If there was an agreement, combination or conspiracy by defendants among themselves to remain in intrastate commerce, it certainly would not have been necessary to disconnect from everyone and isolate their systems. TESCO clearly did not know whether HLP would remain in interstate commerce; **[**48]** and HLP did not know whether TESCO would remain in interstate commerce either. Even though up to May 4, 1976, each defendant thought the other defendant was committed to intrastate operation, there was clearly not a firm understanding or a joint conspiracy to that effect or the disconnections would have been unnecessary, as between the defendants.

A lot of contracts have been introduced in this case, and the plaintiffs claim that these contracts evidence the agreement by the defendants to remain in intrastate commerce. Some of the contracts have clear indications of intention that the parties will remain in intrastate commerce; others have clauses which indicate that the contracts are cancellable on certain notice if the parties wish to enter interstate commerce. The plaintiffs were parties to some of these contracts and never complained about them, perceiving them to be in their own best interest for nearly forty years before suddenly objecting to their character.

Justice Brandeis once observed that all contracts were really restraints of trade and thus violated the Sherman Act, if the Act were carried to illogical extremes. These contracts do restrict the flow of electricity to **[**49]** intrastate commerce, but I do not find that they force the plaintiffs to remain in intrastate commerce. Plaintiffs have the choice of abiding by the contracts and remaining in intrastate commerce, or deciding to go into interstate commerce and cancelling the contracts. I think it is significant that different contracts were negotiated between the different parties with different provisions relating to the intrastate flow of electricity over the years.

Here I think is a situation that is covered by the Supreme Court's ruling in Colgate : None of the defendants are doing anything more, and have done nothing more, than decline to sell to any utility, not just plaintiffs, who are engaged in interstate electrical operations, or to connect with that type of utility. No one has forced the plaintiffs to remain in intrastate commerce; they are free to leave that mode of operation whenever they choose to do so. And each of the defendants is free to do so, also. The contracts do not limit that freedom; they merely make clear to the parties to the contract that the exchange of electricity provided for in the contract is premised on the intrastate character of that electricity. The contract provisions **[**50]** only preserve each party's right to operate on an intrastate basis. See *16 U.S.C. § 824(b)*. An effort to avoid FPC regulation is "not unlawful, is indeed not immoral not even if it fails." *Hartford Electric Light Co. v. FPC, 131 F.2d 953, 960* ***[*819]*** *(2d Cir. 1942)*. See also *Connecticut Light & Power Co. v. FPC, 324 U.S. 515, 518-19, 65 S. Ct. 749, 89 L. Ed. 1150 (1925)*, and on remand, *Connecticut Power & Light Co., 6 F.P.C. 104, 110 (1947)*.

Competition

The Sherman Act requires that the Court find, when evaluating this case under the rule of reason, anticompetitive effect, and when looking at this case as a group boycott or one of the other per se theories, I must look to see if there was an anticompetitive purpose. In addition, the Court must look at the competitive impact of the alleged Sherman Act violations to determine the scope of the requested injunctive relief. *Zenith Radio Corp. v. Hazeltine Research, 395 U.S. 100, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*.

To determine an agreement or act's anticompetitive purpose or its impact on competitive conditions, the court must have a thorough understanding of the competition between plaintiffs and defendants, including the geographic **[**51]** and product market in which they compete. *Northwest Power Products, Inc. v. Omark Industries, 576 F.2d 83 (5th Cir. 1978)*; *Dougherty v. Continental Oil Co., 579 F.2d 954 (5th Cir. 1978)*. Although decided in a slightly different context, the cases decided under § 7 of the Clayton Act are helpful in identifying the types of competitive interests which are protected by the antitrust laws.

In *United States v. General Dynamics Corp., 415 U.S. 486, 94 S. Ct. 1186, 39 L. Ed. 2d 530 (1974)* the Supreme Court affirmed the District Court's decision that the economic reality of the coal industry at the critical time was such that United Electric Coal Co. was not in a position to compete with anyone because its reserves were limited and were also totally committed to long term contracts with utilities. In addition, in *United States v. Marine Bancorporation, Inc., 418 U.S. 602, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974)* the Supreme Court held that NBC (a Seattle bank) was not a competitor of WTB (a Spokane bank) because NBC did not market goods and services in the Spokane bank's area of operation. The Court held that the "relevant geographical market" was the area in which the relevant product was, **[**52]** in fact, marketed by the alleged competitor.

"The proper question to be asked . . . is not (whether) the parties . . . do business or even where they compete, but where, within the area of competitive overlap, the effect of the merger on competition will be direct and immediate. (citations omitted) This depends upon "the geographic structure of (the) supplier-customer relations' . . ." *United States v. Philadelphia National Bank, 374 U.S. 321, 83 S. Ct. 1715, 10 L. Ed. 2d 915 (1963)*. Where two department stores sold entirely different types of merchandise and only 2%-5% Of the merchandise was sold by those stores, the two stores were not competitors, and to hold that they were "competitors" would be to ignore the realities of the situation. *Evans v. S. S. Kresge Co., 544 F.2d 1184 (3rd Cir. 1976)*.

The definition of market under *§ 1* of the Sherman Act is different from the definition under § 2. *Columbia Metal etc. v. Kaiser Aluminum & Chemical Co., 579 F.2d 20 (3rd Cir. 1978)*. "The § 2 market definition looks to the existence of competitors as evidence of countervailing power which would preclude monopolization. *§ 1*, in contrast, is concerned with patterns of competition as a **[**53]** means of judging whether a restraint of trade is unreasonable". *Id. at 27 n.11*. "Prohibition of conspiracies in restraint of trade, except where practices fall under a judicially crafted per se ban, a finding of illegality presupposes the determination in any given case that the "effect upon competition in the marketplace is substantially adverse.' " *Id. at 26*. The inquiry must focus on the percentage of business controlled, the strength of the remaining competition, and whether the actions spring from business requirements or purpose to monopolize. *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 615, 73 S. Ct. 872, 884, 97 L. Ed. 1277, 1294 (1953)*; Columbia. In drawing the narrow circle around the relevant product market, **[*820]** care must be taken to exclude any product to which, within reasonable variation and price, only a limited number of buyers will turn. Id. Analysis of the market may reveal well defined sub-markets for antitrust purposes whose boundaries can be determined by examining industry or public recognition, or the sub-market as a separate economic entity, the products' peculiar characteristics or uses, unique production facilities, distinct customers, **[**54]** distinct prices, sensitivity of price changes, and specialized vendors. *Brown Shoe Co. v. United States, 370 U.S. 294, 325, 82 S. Ct. 1502, 1524, 8 L. Ed. 2d 510, 535-36 (1962)*.

I can find no evidence of competition between plaintiffs and defendants for purposes of the Sherman Act. First, there is no direct competition between the plaintiffs and defendants except in the limited dual certification areas or fringe areas of WTU and TESCO, which is only determined competition. The Texas Legislature expressly recognized the absence of meaningful competition among electric utilities by stating:

> ". . . the legislature finds that public utilities are by definition monopolies in the areas they serve; that therefore the normal forces of competition which operate to regulate prices in a free enterprise society do not operate; and therefore utility rates, operations, and services are regulated by public agencies, with the objective that such regulation shall operate as a substitute for such competition . . ." *Tex.Rev.Civ.Stat.Ann. Art. 1446(c)*.

Electric utilities in Texas are required to serve all customers in their certified service territory. They are permitted to operate only within **[**55]** and are prohibited from serving beyond the geographic limits of their service territory as approved by the PUC. They are also required to sell electricity at rates established either by the PUC or by an incorporated municipality, and are prohibited from offering a special rate to customers.

Plaintiffs have admitted to the U. S. Department of Justice, which was then conducting an antitrust review in connection with licensing of the construction of nuclear powered generation plants, that there exists no competition between plaintiffs and defendants and that the defendants' maintenance of their intrastate status did not injure plaintiffs' ability to compete with others. Retail competition exists only among utilities within dually certified areas, and HLP has no dually certified areas with WTU or CPL. TESCO has no dually certified areas with CPL and the areas which are dually certified between WTU and TESCO are so insignificant that the revenue to TESCO in 1977 from customers located in those areas constituted less than one-half of 1% Of its total revenues. Consequently, actual and potential direct competition among WTU and TESCO is de minimis. In addition, there exists no consequential **[**56]** competition in the fringe areas between the service areas of plaintiffs and defendants. These areas are sparsely populated, with no consequential economic growth and no economic incentive for WTU or TESCO to engage in competition in these areas. Plaintiffs rely primarily on examples of indirect competition, therefore, to establish that defendants and plaintiffs really compete.

As I understand the evidence, the areas of indirect competition supposedly include: (1) competition between the plaintiffs and other electric utilities, not necessarily the defendants, in areas that are multiply certified by the PUC in certain fringe areas located between the two utilities; (2) competition between plaintiffs and other utilities including defendants to attract new customers (including industrial, commercial and residential, though primarily industrial) to locate in their service territory; (3) competition to retain current customers by providing low cost reliable electric service that outperforms alternative methods available to the industrial, commercial or residential user; and (4) competition for wholesale customers.

Some of plaintiffs' witnesses said that two utilities are in competition **[**57]** when one utility takes some action that will affect, in some way, the price charged by the other **[*821]** utility for its electric power. Thus, the defendants alleged refusal to operate electrically interstate has an effect on plaintiffs' prices, as evidenced allegedly from plaintiffs' economic testimony, and therefore plaintiffs are in competition with the defendants. The theory is that if defendants' actions raise (or restrict the lowering of) plaintiffs' price it charges its customers for electricity, then plaintiffs will be unable to compete effectively for new industrial customers, existing customers, or wholesale customers of plaintiffs' power since those customers may be lost to cheaper forms of electricity or other forms of power. Competition to the plaintiffs means a choice (see Mr. Price's testimony). Plaintiffs are in competition with all of those choices, and if the defendants affect that choice in any manner that affects plaintiffs' price of electricity, plaintiffs and defendants are in competition.

I will confine my remarks here to a discussion of plaintiffs' witnesses on competition; my views on how defendants' affect the price of plaintiffs' electricity are discussed **[**58]** later. First, though, I should point out that if plaintiffs' view of competition is correct, then every Sherman Act case is really a price fixing case. If we accept plaintiffs' view of competition, then every purchaser has an ultimate choice of whether to buy a particular product, and every manufacturer in some way (significant or insignificant) affects the price of every commodity, thus there are no geographic limitations (and probably few product limitations) to the competitive market in an antitrust case. Dr. Wenders admitted that the geographic extent of the market for new industrial customers could be nation-wide or even world-wide. This is an incredibly broad market, and plaintiffs made absolutely no effort to measure the impact on competition which would occur in this market as a result of defendants' alleged antitrust violations. The case law also does not support such a broad reading of the term market in a *Section 1* case, or for that matter, in a Section 2 case either.

Dr. Wenders' definition of competition in an economic sense, as I understand it, was that if a customer had a reasonable alternative choice (and he never did adequately define exactly what he meant by reasonable **[**59]** alternative choice) to buying electric power from the defendants, then there was competition with the defendants. The same would be true with the plaintiffs. Thus, for example, when an industrial customer considered locating in the HLP service territory and other territories around the country, including CPL, HLP would be competing with those territories including CPL even though HLP did not seek the customer, did not want the business, did not know it was being considered by the customer as a possible location, did not know about the alternative choices being considered and electricity rates and reliability were not of any consequence in a customer's decision to locate in one service territory or another. Dr. Wenders also testified that as to product market, all types of fuel were reasonable alternatives or could be reasonable alternatives to electricity, and were thus in competition with electricity, including batteries, wood, gas, windmills and solar power. Under the Sherman ***Antitrust Law***, I cannot accept these definitions of competition either. They are far too broad, and in fact, I am not aware of any court that has accepted these broad definitions of either product or geographic **[**60]** market. If I were to accept these definitions, I would, it seems to me, be virtually eliminating the concepts of geographic and product market from consideration in an antitrust case.

Dr. Wenders testified about a coordinated services market which, on cross examination, he admitted was not really a market where competition occurred, but rather an area of cooperation. The competition occurred at markets, in his words, "downstream", of this coordinated services market, but the allegations in this antitrust case, he admitted, relate to an alleged violation of *Section 1* that resulted in failure of the defendants to Cooperate in this so-called coordinated services market which then had an indirect effect on the downstream markets.

[*822] I am not sure if plaintiffs are really advancing Dr. Wenders' theory or not; one of the problems I have had with this case has been that just when I understand all of the theories plaintiffs are advancing in their claim under *Section 1*, their theory of the case shifts to accommodate a change in case law or arguments by the defendants. Assuming Dr. Wenders is correct in his analysis of plaintiffs' case, however, it is certainly not a violation of **[**61]** *§ 1* of the Sherman Act to refuse to cooperate in an area where there is currently no competition between the parties.

It would rewrite the antitrust laws, which the plaintiffs seemed to be suggesting should be done in a number of areas, for this court to say that it was a violation of *§ 1* for the defendants To refuse to cooperate with the plaintiffs.

Plaintiffs failed to establish the size, scope or geographic limits to the downstream markets. Furthermore, plaintiffs did not show any threatened harm to competition in these markets. Specifically, there is no proof that even if plaintiffs' rates increased, they would lose business or be unable to attract new business because of some unidentified increase in their rates attributable to the inability to operate in Mode 4.

A review of the evidence demonstrates that plaintiffs failed to prove substantial effect on competition in any of the downstream markets. To begin with, plaintiffs assert that there is competition for franchises to serve retail load in the cities and towns within Texas. There is no evidence that HLP has ever lost a franchise or that another utility has ever been franchised in a town in which HLP had a franchise. No **[**62]** HLP franchise will expire before the year 2007 and no CPL franchises will expire for many years. There was no evidence that plaintiffs and defendants have ever competed for franchises and no evidence that they will in the future. Dr. Wenders admitted that defendants would have no economic incentive to disadvantage plaintiffs in regard to franchise competition. Finally, plaintiffs made no effort to measure the amount of competition involved with franchises.

Plaintiffs also contend that they will be disadvantaged in interfuel competition. The interfuel market, as described by Dr. Wenders, includes virtually every conceivable energy source which could serve as a substitute for electric energy. As I have stated, this is an extremely large market, and plaintiffs made no attempt to measure the amount of competition in this market. Likewise, plaintiffs made absolutely no effort to measure the impact on competition within this market as of the time of defendants' disconnections on May 4, 1976. Finally, plaintiffs' economic expert admitted that the defendants would have no economic incentive to try to affect such competition.

Plaintiff next advanced a competitive theory of self-generation **[**63]** with respect to the choice that their customers have to generate their own supplies of electricity. Dr. Wenders admitted that the feasibility of self-generation of electricity usually depends upon the availability of waste steam. With respect to its customers who have waste steam available, however, HLP encourages self-generation. As with interfuel competition, plaintiffs made no effort to define the size, scope or geographic limit of this market. Moreover, plaintiffs totally failed to demonstrate how decisions by their customers to commence self-generation would have any effect on competition among the electric utilities, including plaintiffs and defendants.

Again, with respect to wholesale competition, plaintiffs failed to define the size, scope and geographical limits of such market. Dr. Wenders even volunteered that while he thought wholesale competition related primarily to TIS, the geographic extent of this market was limited only by the distance at which electricity could be transferred economically. Plaintiffs made no effort to establish this distance, and again it must be presumed that this market would be extremely broad since plaintiffs are themselves planning to transmit **[**64]** power to their affiliated companies in Oklahoma, Arkansas and Louisiana under CSW's interconnection proposals. There was no attempt **[*823]** by plaintiffs to show that competition in the wholesale market would be restrained by plaintiffs' inability to implement Mode 4. More specifically, there was no showing that even if plaintiffs' rates were increased, they would lose existing wholesale customers or would be disadvantaged in competing for new wholesale loads. At most, plaintiffs showed that there were a few situations in which wholesale customers in Texas switched suppliers for reasons that may or may not have been related to differences in electric rates, but there was no evidence of competition between plaintiffs and defendants for wholesale customers. Mr. Jordan, president of HLP, testified that HLP had only one wholesale customer and that HLP did not want any more wholesale customers.

With respect to retail customers, direct competition among electric utilities in Texas is possible only in areas where the PUC has certified two or more utilities to provide service. There is affirmative evidence that there is no dual certification of territories served by plaintiffs and defendant **[**65]** HLP. The amount of load served by TESCO in areas dually certified with WTU amount to approximately one-half of 1% Of TESCO's total load. Accordingly, the potential for retail competition among the parties is so minimal as to be virtually non-existent.

Plaintiffs have attempted to bolster their theory of retail competition with assertions that the parties compete for the location of new industrial customers in their service areas. While there appears to be evidence that all the parties have made efforts to attract new industrial customers in the past, the changing economic conditions for electric utilities in Texas during the 1970's, including rising costs and fuel shortages, have reduced, if not eliminated the incentives these utilities might have in seeking to obtain industrial or wholesale customers. HLP had abolished its area development department by 1973.

There was ample testimony that although there had been industrial company inquiries to the plaintiffs concerning electric rates in their area, electricity is not really a significant factor, except perhaps in one or two industries that are not well represented in Texas, in a decision to locate a plant in one location or another. **[**66]** Corporations deciding on the location of new industrial plants normally consider a wide range of factors, including availability of raw materials, location of markets, transportation costs and taxes. Compared with other factors, the cost and availability of electricity have had little or no significance in influencing corporate decisions concerning locations of industrial plants in Texas. Plaintiffs in fact failed to show a single instance where a decision to locate a new plant was based primarily on electric rates. Added to this is the fact that plaintiffs did not cite a single situation in which both plaintiffs and defendants were actively attempting to induce the same industrial customer to locate in their respective service areas.

Plaintiffs' Exhibit 733, which represents dually certified areas in the WTU system, shows very few towns that are dually certified with very small populations. Finally, and these are just a few examples of many instances that I can cite, WTU told the Justice Department (TESCO 296, DHX 68 and DHX 156) that TESCO and WTU did not compete, at a time that the Justice Department was investigating to determine whether or not possible antitrust violations had **[**67]** occurred in the Commanche Peak project; CPL made the same admission. (DHX 199, DHX 200). Apparently WTU's and CPL's definition of competition, for antitrust purposes, has changed since the time of that response.

I also did not find Dr. Wenders to be a very credible or qualified witness, and I will outline in brief some of the reasons I reached that judgment. Dr. Wenders based his testimony on the record in this case and on the depositions on file in this case, as well as his own investigation. Dr. Wenders unqualifiedly relied on the depositions on file in this case, and subsequently qualified that statement in a very significant respect, when on cross examination he said he did not agree with everything Dr. Gols had said, including a definition of competition **[*824]** offered by Dr. Gols that differed from Dr. Wender's definition. And, although he said he based his testimony on the actual transcript of this case, it appears that Dr. Wenders had read selected portions of the transcript, and in some instances had only read the direct examination of some witnesses, excluding the cross examination. His outside preparation to determine the proper market analysis also appeared to me **[**68]** to be rather selective. In short, Dr. Wenders impressed me as an expert who selected material favorable to an analysis of this case that favored the theories advanced by the plaintiffs, ignored the evidence or theories produced by the defendants and chose not to make a complete review of the record or evidence available, leading me to view his conclusions with grave suspicion.

I think, from the record, and considering what I have said so far, that if any product and geographic market has been shown, the correct product market should be limited to electricity and the relevant geographic market should be limited to the physical service areas of the plaintiffs and defendants because that is where the direct competition, if there is any, and I think there either is none or de minimis competition, occurs. *United States v. Marine Bancorporation, Inc., 418 U.S. 602, 94 S. Ct. 2856, 41 L. Ed. 2d 978 (1974)*.

Aside from plaintiffs' failure to show any meaningful or significant competition among electric utilities in Texas, they totally failed to prove that defendants were motivated to any degree whatsoever by any anticompetitive intent in their decisions to disconnect from plaintiffs on May **[**69]** 4, 1976. In fact, plaintiffs did not show that defendants even considered possible effects on competition prior to the disconnections on May 4, 1976. Defendants' representatives testified that they decided to disconnect because interconnection with the Southwest Power Pool, which could result from a failure to sever connections with plaintiffs, would produce a heavy economic burden for their customers without offsetting advantages, would degrade the reliability of their electric systems and would impose additional costs associated with federal regulation. Plaintiffs presented no evidence to the contrary and do not even assert that defendants had an anticompetitive purpose in deciding to disconnect and preserve their right to decide for themselves whether to commence interstate operations.

Plaintiffs' theory of the competitive impact resulting from defendants' disconnections on May 4, 1976 proceeds indirectly through several steps. First, plaintiffs contend that the disconnections precluded them from implementing Mode 4 which would reduce their costs and revenue requirements. Second, higher costs and revenue requirements would presumably cause plaintiffs to have higher rates. Third, **[**70]** assuming plaintiffs had higher rates, they would theoretically be hampered in their ability to compete in various "downstream" retail and wholesale markets for electric service. Contrary to this multi- faceted theory, plaintiffs' company witnesses admitted that they had no knowledge of any lost customers or other competitive disadvantages suffered by plaintiffs as a result of defendants' disconnections. Moreover, plaintiffs' economic expert, Dr. Wenders, admitted that if plaintiffs could obtain greater economic benefits from intrastate operation as opposed to interconnection with the other CSW subsidiaries in interstate commerce, plaintiffs' whole theory of competitive impact would fail. On this record I think plaintiffs are better off remaining in intrastate commerce or Mode 2 interstate commerce, when compared to Mode 4. Finally, despite all of his testimony concerning theories of competition and competitive impact, Dr. Wenders had "no idea" whether it was reasonable or unreasonable for defendants to disconnect from plaintiffs under the circumstances of May 4, 1976. In Dr. Wenders' words "May 4th, to me, is a matter of sideshow."

Price Fixing

An agreement that interferes with the **[**71]** setting of price by free market forces is illegal on its face. *United States v. Container Corp., 393 U.S. 333, 89 S. Ct. **[*825]** 510, 21 L. Ed. 2d 526 (1969)*. The per se rule applies even when the restraint on prices is somewhat indirect. *Simpson v. Union Oil Co., 377 U.S. 13, 16-22, 84 S. Ct. 1051, 1054-57, 12 L. Ed. 2d 98, 101-105 (1964)*; *United States v. General Motors Corp., 384 U.S. 127, 147, 86 S. Ct. 1321, 1331-32, 16 L. Ed. 2d 415, 427-28 (1966)*. The court must examine the purpose of any alleged agreement to fix prices, however, just as it examines the purpose of any alleged group boycott. Id.

> "If a manufacturer is unwilling to rely on individual self interest to bring about general voluntary acquiescence which has the collateral effect of eliminating price competition, and takes affirmative action to achieve uniform adherence by inducing each customer to adhere to avoid such price competition, the customer's acquiescence is not then a matter of individual free choice prompted alone by the desirability of the product. The product then comes packaged in a competition free wrapping a valuable feature in itself by virtue of concerted action induced by the manufacturer. **[**72]** The manufacturer is thus the organizer of a price maintenance combination or conspiracy in violation of the Sherman Act."

United States v. Parke, Davis & Co., 362 U.S. 29, 46-47, 80 S. Ct. 503, 513, 4 L. Ed. 2d 505, 517 (1960).

> "(A) combination formed for the purpose . . . of raising, fixing, pegging, or stabilizing the price of a commodity in interstate or foreign commerce is illegal per se."

United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 233, 60 S. Ct. 811, 844, 84 L. Ed. 1129, 1168 (1940).

There are a number of examples of typical price fixing cases, such as the exchange of price fixing information with an agreement to adhere to a price schedule, *Sugar Institute v. United States, 297 U.S. 553, 56 S. Ct. 629, 80 L. Ed. 859 (1936)*, *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*; agreements to eliminate sales of a product by competitors in order to protect against real or apparent price competition, *United States v. General Motors Corp., 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*; and refusal to deal with wholesalers who did not cooperate with the company's goal of obtaining adherence to suggested minimum **[**73]** retail prices, *United States v. Parke, Davis & Co., 362 U.S. 29, 80 S. Ct. 503, 4 L. Ed. 2d 505 (1960)*, *United States v. Sealy, Inc., 388 U.S. 350, 87 S. Ct. 1847, 18 L. Ed. 2d 1238 (1967)*. When per se treatment is inappropriate, the court should examine the allegations under the rule of reason standard. In *Re Nissan Antitrust Litigation, 577 F.2d 910 (5th Cir. 1978)*. The power to fix prices, whether reasonably exercised or not, involves power to control the market and to fix arbitrary and unreasonable prices. *United States v. Trenton Potteries Co., 273 U.S. 392, 397, 47 S. Ct. 377, 379, 71 L. Ed. 700, 705 (1927)*.

Plaintiffs have evaluated several modes of future operation of their systems. Under one mode (Mode 4), WTU and CPL will allegedly engage in completely interconnected interstate operation with PSO and SWEP, have their generating plants centrally dispatched with those of PSO and SWEP and retain their interconnections with the other

TIS companies, including TESCO and HLP, placing the latter companies in interstate commerce. Under another mode (Mode 2), WTU and CPL will engage in completely interconnected centrally dispatched interstate operation with PSO and SWEP, but will **[**74]** not retain their interconnections with any TIS companies including TESCO and HLP and those latter companies will remain in intrastate operation. Plaintiffs also evaluated another mode of operation (Mode 1) which refers to that mode of operation in which all ERCOT member companies are interconnected, directly or indirectly, but have no direct or indirect interconnections with electric utilities operating in interstate commerce.

I think I have already indicated that I do not think this case falls within the traditional concept of a price fixing case. There has been no effort by the defendants to set either minimum or maximum prices, or to exchange price information or to in **[*826]** any way protect prices. The only relation this case has to prices is plaintiffs' argument that because defendants' actions allegedly affect or will affect over the next 20 years the prices the plaintiffs charge for electricity and these charges, being higher than if Mode 4 were implemented, will affect plaintiffs' competition in the electric industry with the defendants. I have already rejected that broad theory of price fixing as transforming all antitrust cases into price fixing cases, and I find no **[**75]** interference in this case by the defendants with the free market forces at work in the business world. "A manufacturer's refusal to deal with a distributor or dealer does not violate the antitrust laws merely because it adversely affects the entity refused." *Marquis v. Chrysler Corp., 577 F.2d 624, 640 (9th Cir. 1978)*. These effects are immaterial if the refusal is for business reasons which are sufficient to the manufacturer as long as there is no arrangement restraining trade. Id.; *Joseph & Sons, Inc. v. Hawaiian Inc. Oaks and Liquors Ltd., 416 F.2d 71 (9th Cir. 1969)*.

Plaintiffs' evidence concerning the defendants' effect on plaintiffs' prices of electricity due to the refusal to interconnect into interstate commerce and integrate the CSW system is not persuasive to me. The existence of a threatened injury to the plaintiff companies is also a requirement for the extreme injunctive relief sought by the plaintiffs. Zenith.

Plaintiffs' first evidence of the injury to the plaintiffs by this alleged violation of *§ 1* was a study conducted by Power Technologies, Inc. "This particular study was triggered by specific questions raised before the Securities & Exchange Commission involving **[**76]** C&SW's present operating pattern. The possibility of changing this pattern raises the broad question of the possibility of altering the basic operating pattern of the entire region to one where all utilities in ERCOT and SWPP are interconnected. This study does not attempt to examine and answer directly this broader question but instead evaluates the three alternative possibilities in terms of the potential economic impact on each of the customers of C&SW." (Page vii-viii PTI study, Px 671). Thus the study was commissioned not because plaintiffs had long desired to enter interstate commerce nor because they felt defendants were boycotting them, but rather it was done in response to the SEC proceedings in which a group of utilities challenged CSW's holding company status. This, in my mind, throws into serious doubt the credibility of the studies that were conducted by CSW, some of which were going on and were completed only after the beginning of this trial. The PTI study had a definite purpose in mind: to examine the cost of integrating the CSW system and it did not consider the impact on ERCOT in terms of cost or alleged savings, and in fact did not break out the savings for the plaintiffs **[**77]** in this case.

The PTI study did not undertake to evaluate the best mode of operation for WTU and CPL nor the best mode of operation for PSO and SWEPCO nor the best mode of operation for utilities operating in the State of Texas or in SWPP. I am not able to place much faith in such a dictated study, and the other studies introduced into evidence by the plaintiff following the PTI study are also, I believe, tainted with the same questionable motive. I discussed earlier plaintiffs' motive which I have taken into account, so I will not expand on this point any further.

I will note a few things about this study and the other studies. For example, in the PTI report Dr. Wood relied on CSW's operating committee to get his information on fuel availability for power plants put in the generation plant, and the CSW planning subcommittee for load forecast and fuel cost. These two factors were very important in the study, but rather than making an independent analysis (or being permitted to make that analysis) he principally relied on CSW for the information. In Mode 1, Plan One, which I recognize has supposedly been abandoned by the plaintiffs now, its base case application in comparison to Mode **[**78]** 4, Plan 11 was seriously hampered by the fact that Mode 1, Plan One contained a **[*827]** large number of very small generating units as compared with the preferred plan. While Mode 4 was developed by PTI, the economic results were compared to Mode 1, which was developed by CSW personnel.

No plans were drawn by Plaintiffs which "optimized" (to use the term of the witnesses) ERCOT with centralized dispatch for comparative purposes, although that could have easily been done. The PTI report did not include costs for wheeling, line losses or off-system economy sales (except those PSO had under contract), even though PSO has historically engaged in massive off-system opportunity sales. None of the defendants were ever offered by the plaintiffs any compensation for the cost of installation of Mode 4. The PTI transmission system was a broad brush treatment and no reliability study was conducted. "It is planned to conduct a reliability study in order to consider the interrelation of interconnection capability, generating unit size and type with the reserve requirements necessary to hold a given, objective standard of service reliability calculated using probability methods." (PTI at 8).

[79]** The economic benefits shown on the study supporting the plan submitted to the SEC are clearly speculative in nature and provide no basis for a finding of competitive injury:

(a) There are no savings to CSW from Mode 4 until 1986;

(b) 50% Of the savings come in the last three years of the 20 year study and there is no provision for sites or fuel for any of the plants planned for any of those three years;

(c) After 1986, 12 of the 22 new power plants to be built by CSW are lignite-fuel plants for which CSW has no assured supply of fuel;

(d) 90% Of the alleged savings come from differences in fuel costs. The fuel costs used in these studies are very speculative, and in fact, certain of the fuel cost assumptions changed drastically in the short time between preparation of the PTI report and the SEC study;

(e) If Mode 4 is not implemented by 1982, the studies would have to be reevaluated and there are numerous regulatory hurdles that CSW must clear before it can begin implementation of Mode 4.

Dr. Wood admitted that his cost calculations should but did not, include costs that would be imposed on defendants and other members of TIS as a result of the proposed power transfers between **[**80]** CSW subsidiaries. The omission of these records has been justified by CSW's position that the interconnection between CPL and SWEPCO would serve as a "contract path" (a term that no expert in the electric utilities industry had heard before it was proposed as a conceptual idea by the plaintiffs in this and related litigation), the cost of which would supposedly approximate the cost of wheeling power through TIS. Plaintiffs' transmission design expert, Mr. Arey, admitted that notwithstanding the existence of this "contract path" up to 70% Of the CSW transfers would still go over the transmission lines of defendants and other members of TIS. The evidence shows that the "contract path" was not in any way designed to compensate defendants. In his deposition, Mr. Arey admitted that he was told to include the direct tie between CPL and SWEPCO in his transmission design because of CSW's legal problems at the SEC. Mr. Arey also admitted that CSW would be using the TIS transmission system and that the ability to use the TIS system represented the difference in cost to CSW between Mode 4 and Mode 2. Nonetheless, plaintiffs have never offered to pay defendants for either the use of their systems **[**81]** or the cost imposed on them, but have in fact insisted that defendants should bear part of the costs of the interconnections.

Dr. Wood admitted that either Mode 2 or Mode 4 would achieve integration of CSW and that Mode 4 would save only 1.1% To 1.6% More than Mode 2 for all four subsidiaries combined, over a 20 year period. This difference is without the penalty which should be charged against Mode 4 for wheeling and internal costs that would be imposed on the non-CSW members of TIS. **[*828]** Dr. Wood also admitted that he was not able to make any allocation of the Mode 4 savings among the four CSW subsidiaries. He further admitted that the actual allocation of savings would ultimately depend on the outcome of regulatory hearings in the States of Texas, Oklahoma, Arkansas and Louisiana.

And yet, this is the study, with all of its weaknesses (including the fact that the PTI study became outmoded to some extent with the inclusion in the study of generation based primarily on coal resources which had not been contracted for), that the CSW Board used to base its decision to enter interstate operations and upon which it based its conclusion that an antitrust case should be filed in **[**82]** this court because plaintiffs were being boycotted by defendants, and this would have a terrible impact upon the price of plaintiffs' electricity in the future.

I recognize, as I think counsel for plaintiffs pointed out during the testimony, that just because the initial figures were wrong and that new, more accurate figures are provided, that that fact alone does not negate the existence of an antitrust violation. But in this case I think it clearly goes to the credibility of the plaintiffs' case an apparently hasty decision was made on incomplete data, which included some broad brush studies of transmission, and no reliability studies. If plaintiffs were seriously concerned about procuring the alleged savings and pursuing the most economical mode for CSW, their actions would seem, at best, hasty, and the fact that those decisions were hasty and were apparently primarily motivated by the SEC proceedings and preservation of the holding company, rather than by concern over antitrust violations, makes me seriously question the correctness of the PTI study and all studies thereafter as they relate to this litigation. That skepticism is heightened by my recollection of the testimony, **[**83]** and review of it over the past few weeks, because serious holes and erroneous assumptions were built into the various studies and restudies of the economics of the situation.

Another of plaintiffs' witnesses, Mr. Bruggeman, attempted to update Dr. Wood's work in studies completed after the trial of this lawsuit had begun. These CSW plans, proposed without Dr. Wood's assistance, projected for a twenty year period, with losses for the first ten years of the study. There was no evidence that CSW had any fuel resources for generators for the second ten years of the study period, and there was no competent evidence upon which Mr. Bruggeman could rely in projecting the fuel cost for plants during the second half of the study period. Coal contracts had not been secured, lignite leases not developed nor plant locations determined.

These studies, based almost entirely on hearsay, were not even admitted in evidence for the truth of the information they contain. Nevertheless, in reliance on its studies, Mr. Bruggeman sought to make an arbitrary allocation of the savings to show the possibility that plaintiffs would share in them, even though he was not qualified as an expert on allocation of **[**84]** savings within a power pool. That allocation depends on future decisions by regulatory authorities, so there is no basis for determination on this record that plaintiffs will share in any portion of the savings attributable to Mode 4. Any savings projected without any competent evidence with respect to cost are purely conjectural and speculative.

CSW has apparently decided to implement the generation plans proposed by Mr. Bruggeman's study, (R. 2332-33 (Bruggeman)), and has apparently abandoned the PTI and other generation plans. (R. 2404 (Bruggeman)). Mr. Bruggeman assembled new generation plans which were completed after two weeks of trial. I might add, in passing, that I had no real idea, most of the time, what Mr. Bruggeman was talking about, and after rereading his testimony, I still find it very confusing and not any more enlightening. I think the plaintiffs had a duty to present the evidence to the court in a comprehensible form I don't know too many judges that are electrical engineers or system planners, and when it **[*829]** came to Mr. Bruggeman, the plaintiffs failed in that respect.

I found Mr. Scarth's testimony the most enlightening of all, and, despite plaintiffs' **[**85]** cross examination, I believe his exhibits and testimony about Bruggeman's figures showing alleged savings to CSW, and not Bruggeman's testimony, at least what I understood Bruggeman to say.

The Bruggeman studies which were completed after this trial began were illogical and biased in favor of Mode 4 as compared with Mode 1B:

(a) Bruggeman's Mode 1B generation plan assumes three more expensive 400 megawatt coal units at Lake Diversion and two less expensive 640 megawatt coal units at Lake Diversion in Mode Four. The same assumption in both modes reduces the alleged savings of Mode 4 over Mode 1B;

(b) Bruggeman's studies do not include off-system opportunity sales even though PSO has historically had extensive off-system opportunity sales. Off-system sales reduces the alleged savings of Mode 4 over Mode 1B;

(c) Bruggeman's studies do not include any charge for wheeling even though such costs will be required for the massive amounts of power proposed to move over transmission lines of the TU companies and other non-CSW companies. The inclusion for wheeling costs reduces the alleged savings of Mode 4 over Mode 1B;

(d) Bruggeman's studies do not include a charge for line losses or **[**86]** other essential transmission lines for non-CSW companies. The inclusion of costs for line losses and minimum additional transmission lines just for the TU system reduces the savings of Mode 4 over Mode 1B.

Even using the same assumptions and date, Mode 1B results in a savings not a loss as compared to Mode 4 if only these reasonable changes and costs are included.

The conclusions and opinions of Mr. Bruggeman were based upon fuel costs and other estimates which are not in evidence and upon which there was no evidentiary predicate laid. Mr. Bruggeman was not qualified to opine as a fuel expert. Consequently, those conclusions were admitted into evidence only for the fact that he made such conclusions and not to the truth thereof.

The opinions of Dr. Wenders concerning the nature and extent of competition among electric utilities in Texas is based entirely upon the conclusions of Mr. Bruggeman (see R. 2702 (Wenders)) and upon the realization of net savings in a Mode 4 configuration. Since Mr. Bruggeman's conclusions have not been established by competent evidence for the truth thereof, the opinions of Dr. Wenders do not support their conclusions. Indeed, the implementation of Mode **[**87]** 4 is likely to result in substantial net cost rather than any savings.

Cascading blackouts can and do occur on electric systems at a time when the systems on "paper" appear reliable. The northeast blackout is an example of this. Electric systems in Texas form a peninsula and are capable of being interconnected with just one other Reliability Council. Human error impacts the reliability of an electric system, and the larger the interconnected system becomes, the more complicated communication among system members and the chance for human error creating a cascading type blackout is greater. From the testimony, the plaintiffs have not established that the interconnection of TIS/ERCOT with SWPP would be as reliable as the current intrastate operation, or even a reliable network.

Even assuming that plaintiffs had proved a violation of the antitrust laws by defendants, there is no evidence that they are threatened with harm as a result of such violation. Plaintiffs' parent holding company has not yet obtained approval from the SEC which would result in a synchronous, interstate mode of operation for the four CSW subsidiaries. In addition, plaintiffs have not even submitted plans for interstate **[**88]** operations to the Texas PUC for approval. Under the latest Mode 4 plans presented by CSW at the SEC, no savings would be realized by plaintiffs until at least **[*830]** 1986, and under the evidence in the record, savings that far in the future are speculative at best. Apart from Mode 4, plaintiffs have the option of interconnecting with SWPP in a Mode 2 configuration which defendants do not oppose. Under these circumstances, plaintiffs have failed to prove threatened loss or damage sufficient to support their claim for permanent and injunctive relief.

To summarize, "recovery and damages under the ***antitrust law*** is (sic) available to those who have been Directly injured by the lessening of competition and is withheld from those who seek the windfall of treble damages because of incidental harm." *Larry R. George Sales Co. v. Cool Attic Corp., 587 F.2d 266 at 271 (5th Cir. 1978)*, (emphasis added) (Robinson-Patman Act case). Here there is only an incidental, if any, effect on prices, and plaintiffs are not entitled to a windfall of injunctive relief because of incidental harm.

Vertical and Horizontal Restraints

When this case was originally filed in 1976, certain territorial restrictions **[**89]** were per se illegal under the *Sherman Act. United States v. Arnold, Schwinn & Co., 388 U.S. 365, 87 S. Ct. 1856, 18 L. Ed. 2d 1249 (1967)*. "Under the Sherman Act it is unreasonable without more for a manufacturer to restrict and confine areas (for) persons with whom an article may be traded after the manufacturer has parted with dominion over it." *Id. at 379, 87 S. Ct. at 1865, 18 L. Ed. 2d at 1260*, but when a "manufacturer retains title, dominion and risk with respect to the product and the position and function of the dealer in question are, in fact indistinguishable from those of an agent or salesman of the manufacturer" then the rule of reason governs. *Id. at 380, 87 S. Ct. at 1866*. The per se rule applied in Schwinn to territorial restriction was overruled in *Continental TV Inc. v. GTE Sylvania, 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*, although the Court left the door slightly ajar for applying per se illegality to particular applications of vertical restrictions if they were based upon demonstrable economic effect, rather than Schwinn's formalistic line drawing. *Id. at 58, 97 S. Ct. 2549, 53 L. Ed. 2d at 585*.

> "(T)here are certain agreements or practices which **[**90]** because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use."

Northern Pacific Railway v. U. S., 356 U.S. 1, 5, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545, 549 (1958). Horizontal markets divisions, as opposed to the vertical restrictions discussed in Schwinn and Continental are per se illegal under the *Sherman Act. Timken Roller Bearing Co. v. U. S., 341 U.S. 593, 71 S. Ct. 971, 95 L. Ed. 1199 (1951)*; *Dougherty v. Continental Oil Co., 579 F.2d 954 (5th Cir. 1978)*, and entities in a seemingly vertical relationship may be deemed capable of horizontal restraints if they are actual or potential competitors. Id.

Horizontal agreements are those in which the participants in the normal course of things will be competing among themselves. *Arnold, Schwinn & Co., 388 U.S. at 372, 87 S. Ct. at 1862, 18 L. Ed. 2d at 1256*. As stated in *United States v. Topco Associates, Inc., 405 U.S. 596, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*, it is a per se violation of *§ 1* of the Sherman Act when there is an agreement **[**91]** between competitors of the same level of the market structure to allocate territories in order to minimize competition, or, a horizontal restraint.

Again, I must consider whether or not plaintiffs and defendants are competitors, and I reach the same conclusion: for purposes of *§ 1*, and horizontal restraints, they are not, and therefore the per se approach should not apply, but rather the rule of reason analysis. In addition, I cannot see any way that the plaintiffs can argue that the defendants have allocated territories in order to minimize competition. The PUC in Texas allocates geographic territories for the electrical market in Texas, and while defendants have some influence in the PUC as do the plaintiffs, they have no **[*831]** open control over those decisions. For these reasons also, I do not see how this is a horizontal restraint case.

Plaintiffs have cited a recent Fifth Circuit case involving electric utilities as authority for per se treatment, *Gainesville Utilities Dept. v. Florida Power & Light Co., 573 F.2d 292 (5th Cir. 1978)*. In Gainesville, unlike the factual circumstances in this case, the plaintiffs were able to show opportunities for one utility to "invade" **[**92]** the service territory of another utility, a history of consultation between two neighboring utilities and the allocation of new wholesale customers between utilities as requests for service arose. In Gainesville there was an agreement to allocate customers which was obviously anticompetitive in effect and intent; no similar agreement exists in this case.

If this is a vertical restraint case, and I am not sure that it is, (the Fifth Circuit has found it difficult on occasions, (see Dougherty) to determine which pigeonhole the facts in this case belong) it would be governed by the rule of reason.

Rule of Reason

Justice Brandeis articulated the basis for the so-called "rule of reason" test in the Sherman Act cases in *Chicago Board of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 244, 62 L. Ed. 683, 687 (1918)*.

> "The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress (and) even destroy competition. To determine the question the court must originally consider the facts peculiar to the business to which the restraint is applied; its condition before and after the **[**93]** restraint was imposed; the nature of the restraint and its effect, actual or probable. The history of the restraint, the evil believed to exist, the reason for adopting the particular remedy, the purpose or end sought to be attained, are all relevant facts. This is not because a good intention will save an otherwise objectionable regulation or the reverse; but because knowledge of the intent may help the court to interpret facts and to (prevent) consequences."

The rule of reason does not permit the court to consider any argument in favor of a challenged restraint that could be labeled reasonable; rather the court must focus on the challenged restraints impact on competitive conditions. *National Society of Professional Engineers v. U. S., 435 U.S. 679, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. The test prescribed by the Supreme Court in *Standard Oil v. United States, 221 U.S. 1, 31 S. Ct. 502, 55 L. Ed. 619 (1910)* is that the challenged contracts or acts may be unreasonable if that determination is based either on the nature or the character of the contracts or the surrounding circumstances giving rise to the inference or presumption that they were intended to restrain trade and **[**94]** enhance prices. National Society. Again, the intent or purpose of the contract must be considered when the court decides whether or not a Sherman Act violation has occurred. *Standard Oil, 221 U.S. at 58, 31 S. Ct. 502, 55 L. Ed. at 644*; *Chicago Board, 246 U.S. at 238, 38 S. Ct. 242, 62 L. Ed. at 687*; National Society. The key inquiry, however, is whether or not the challenged agreement (if one is found) merely regulates and promotes competition or suppresses it. *National Society, supra.* Absent anticompetitive effect, an unlawful intent will not establish a rule of reason violation, nor will the use of unfair methods of competition. *H&B Equipment Co., Inc. v. International Harvester, 577 F.2d 239 (5th Cir. 1978)*.

As of May 4, 1976, defendants had been advised that CSW was going to integrate its four subsidiaries to avoid legal problems at the SEC. CSW had clearly threatened to take action against defendants to force them to participate in CSW's scheme to integrate its system. When defendants learned of the radial tie into Oklahoma, and the legal actions associated therewith, it is clear they had to either disconnect or surrender to CSW's plan of coercion.

Defendants have established **[**95]** a long history of examination of the question of the **[*832]** benefits of interconnection with SWPP, and they have always concluded that they were better off operating in their intrastate mode. Defendants concluded early in 1976 that the PTI report provided absolutely no basis for a change in their view. The PTI report, which was the only study given defendants before May 4, 1976, does not even address the benefits or costs for non-CSW systems resulting from the proposed interconnection. Accordingly, as of May 4, 1976, defendants had no basis upon which to change their prior convictions that interconnection with SWPP would degrade their reliability and would impose substantial costs upon their customers with no resultant benefits.

As of the time of this trial, defendants have exhibited willingness to continue their past history of examining the costs and benefits associated with interstate connection with SWPP. Defendants have shown a reasonable belief that interconnection with SWPP would not be economical and would degrade their reliability. Plaintiffs have presented no evidence showing that defendants would benefit from the interconnection, other than some rank speculation by **[**96]** Mr. Arey about the ability to sell some power to SWPP. Mr. Arey conceded, however, that it is not the normal industry practice to build interconnections to make such opportunity sales. There is absolutely no evidence suggesting that the companies in SWPP would desire interconnection or would desire to purchase any such power. The only other potential benefit from interconnection, a reduction in reserve capacity, would not be economically practical according to Dr. Wood.

Plaintiffs themselves conceded that TIS is one of the most reliable interconnected systems in the United States. In addition, plaintiffs' expert, Mr. Arey, admitted that TIS was a reliable system and that there was no need for interconnection with SWPP from a reliability standpoint. Defendants have shown that TIS has an outstanding record of success in responding to emergencies, and they believe that their method of operation accounts for the high reliability of TIS. Interconnection with SWPP would necessarily alter this method of operation and thus lead to degradation in reliability.

Defendants also believe that interconnection with SWPP would greatly complicate management and communication problems within the interconnected **[**97]** group. Mr. Arey admitted that the most recent blackout of New York City was attributable in part to such communication problems. None of the voluminous reliability studies conducted by plaintiffs addressed these concerns voiced by the defendants.

As of May 4, 1976, defendants had reason to believe that interconnection with SWPP would degrade their reliability and increase their cost of operation with no significant offsetting benefits. Plaintiffs had presented them with absolutely no evidence to the contrary as of that date. Notwithstanding this fact, HLP was still evaluating the question of whether it would participate in an interconnection with TIS and SWPP. Thus, when HLP learned of the midnight wiring, it elected to disconnect in order to preserve for itself the right to make unilateral decisions as to the desirability of such interconnections. Both defendants were concerned that the FPC might take steps to order the interconnection of TIS and SWPP over the objection of defendants in light of the long history of efforts by the FPC to bring about such an interconnection despite the opposition of defendants and the other members of TIS. Defendants believe they are pursuing the best **[**98]** course of action for their customers and had no anticompetitive intent or purpose in disconnecting from plaintiffs. I also believe from the testimony presented at the trial that defendants are pursuing the best course of action for their customers.

There is absolutely no evidence of any prior agreement by defendants to disconnect from any member of TIS which commenced interstate operations. Mr. Jordan, president and chief executive officer of HLP, testified that as of May 4, 1976, he had never even talked with anyone from TU or its subsidiaries about the issue of **[*833]** intrastate operations. In fact, if there had been a prior agreement to disconnect between defendants, there would have been no need for them to have disconnected from each other. The absence of any preexisting agreement to disconnect is further confirmed by the extended negotiations that were required before defendants restored their interconnections on May 10, 1976.

The evidence clearly establishes that at the time TIS was formed, all of its members were committed to the proposition that it was in their mutual best interest to operate on an intrastate basis. Nonetheless, if any member of TIS chose to withdraw **[**99]** from TIS, it was free to do so. The other members were to be given notice of such a decision and were to be given an opportunity to decide for themselves whether they would go interstate as well or remain intrastate. Given the defendants' reasonable opposition to interconnection with SWPP and threats by CSW to force both of them into such an interconnection, it is not surprising that they both elected to disconnect from plaintiffs on May 4, 1976. Defendants acted unilaterally and took the only course of action open to them if they were to avoid the adverse effects of interstate operations.

I think it is clear from the evidence that there was no anticompetitive effect by the alleged actions of the defendants and therefore no violation of *§ 1*. In addition, again I must look to the competition between plaintiffs and defendants, and again, for the reasons stated before, I find it non-existent or de minimis.

Finally, considering the purpose of defendants to avoid FPC jurisdiction and the reason for adopting the intrastate mode to avoid FPC jurisdiction, as well as my belief that the effect of defendants' actions on the plaintiffs is highly speculative and questionable, I believe plaintiffs **[**100]** have failed to show a violation of *§ 1* of the Sherman Act under the rule of reason. For the reasons set forth above, and in the appendix, I find no violation of *§ 1* of the Sherman Act and I deny plaintiffs' request for injunctive relief.

HLP's Counterclaim

HLP, CPL, City of Austin and the City of San Antonio are all participants in the construction of a nuclear power and generation facility known as the South Texas Project. The South Texas Project (STP) involves the construction and operation of two 1250 megawatt nuclear generating stations in Matagorda County, Texas. The participants all signed a document, executed as of July 1st, 1973, known as the participation agreement, which HLP alleges that CPL breached. The estimated cost of the project exceeds one billion dollars.

HLP alleges that CPL, under pressure from CSW, breached § 8.2 of the South Texas Participation Agreement, which provides:

> "8.2. Each participant shall design, construct, own, operate and maintain the transmission facilities necessary to connect its system to the South Texas project switch yard, with the objective of permitting each participant to transmit under normal operating conditions its generation **[**101]** entitlement share from units of the South Texas Project to assist in a manner which will not unreasonably affect the operation of electric systems of the other participants or the interconnected system of others . . ." (HLP Ex. # 208)

CPL's participation in the May 4, 1976, interstate interconnection, plus the August 27, 1976, commencement of CPL/WTU operation in synchronism with the Southwest Power Pool allegedly created a situation in which the South

Texas project could not be planned, constructed or operated as originally contemplated. If CPL establishes interstate interconnections and/or operates in synchronism with the Southwest Power Pool, HLP alleges in its complaint that it would incur enormous expense in redesigning and reconstructing its entire transmission system in order to operate in a synchronous AC mode or, by the construction of a direct current (DC) interconnect which would allow any entity operating in synchronism with the Southwest Power Pool to remove its power entitlement from the **[*834]** South Texas Project by direct rather than alternating current. These costs allegedly amount to over one billion dollars and HLP asks for recovery of this sum plus entry **[**102]** of a permanent injunction commanding CPL, WTU and CSW to refrain from taking any action which would require any participant in the South Texas Project to transmit its power and entitlement under abnormal operating conditions in a manner which would unreasonably affect the operation of the electric systems of the various participants in the South Texas Project or the other interconnected systems of others.

At the time the STP participation agreement was signed, it was not contemplated that any participant in STP would unilaterally commence synchronous operation with systems outside of the TIS while remaining a member of TIS. In August, 1976, CPL and WTU commenced synchronous operation with SWPP, and on December 14, 1976, CSW advised the SEC that it was going to make permanent the synchronous interconnection of its four subsidiaries. Evidence presented in this record indicates that this synchronous operation created substantial operating problems for plaintiffs until it was terminated by CSW in January, 1977, following the filing of HLP's counterclaim. The evidence is undisputed that had CPL continued to operate in this manner, both CPL and HLP could not have both obtained their power **[**103]** from STP absent a physical separation of the two plants with the installation of DC transmission equipment, neither of which have been planned for at this time. The testimony is also undisputed that had CSW and CPL informed HLP that they wished to operate in interstate commerce when the project was originally conceived, it would have been possible to design the STP in a different manner so that CPL and HLP/TIS could both get power from STP without there being a connection between the two systems.

While plaintiffs are now constrained by the terms of the orders of the Texas Public Utility Commission, CSW is nonetheless committed to the establishment of synchronous ties between its four companies, notwithstanding the fact that CPL is still participating in STP. This problem is compounded by the fact that CPL and WTU are refusing to make future plans on any basis other than an assumption that they will be operating on a synchronous basis with their affiliates in SWPP. CSW has demonstrated a past history of causing precipitate operating changes among its subsidiaries despite the problems created by such changes and without any prior study of the anticipated effect.

HLP has also shown **[**104]** that if CSW was able to force its mode 4 plan of operation on the STP participants, and the systems with whom they are interconnected, this mode of operation will unreasonably interfere with the operation of its electric system. First, the interconnection may require an upgrading of existing transmission lines because of the additional flows that will come into HLP's system in the event of an emergency. Second, to the extent existing lines are adequate for the power flows under mode 4, the capacity of these lines will be used by CSW for their proposed transfers and as a backup in emergencies within the proposed CSW powerpool. The net effect, therefore, is to use capacity planned by HLP and other systems for their use in transmitting power from STP and other plants on their systems. Since the TIS transmission system is not presently designed to act in synchronism with SWPP, it could not have been contemplated that CPL would unilaterally bring about the kind of drastic operating changes in TIS that necessarily would follow from any form of synchronous interconnection with SWPP as long as CPL remained a member of STP. This is a clear cut example of action by one participant which would **[**105]** interfere with the electric systems of the other participants in the systems with which they are presently connected.

I find that CSW and CPL's commitment to the establishment of synchronous operation between WTU, CPL, PSO and SWEP violates § 8.2 of the South Texas Participation Agreement because that commitment is an "objective" which will **[*835]** "unreasonably affect the operation of electric systems of other participants", specifically HLP. While CPL/CSW's operation in synchronism will not affect the participant's ability to get electricity until the STP actually begins operation (it is still under construction), HLP need not wait for fission before seeking an injunction prohibiting violation of § 8.2. I find that under the evidence in this case plaintiff CPL's conduct threatens a violation of Section 8.2 of the STP agreement and CPL is hereby permanently enjoined from permitting power it receives from STP to enter interstate commerce as long as CPL remains a participant in the STP Agreement and as long as § 8.2 of that Agreement remains in force.

Costs and Attorneys Fees

While both sides have vigorously contended that they are protecting the public interest by attempting **[**106]** to preserve or eliminate the current intrastate electric utility system in Texas, both sides in this proceeding have ignored the impact on the public of the staggering costs and attorneys fees expended by the parties in this case and in the proceedings before the SEC, FPC, FERC, PUC, NRC, and other forums. It would be naive to assume that the companies will absorb these expenses by way of reductions of earned surplus; it is more reasonable to assume that these expenses will be passed along to the public in the rate structure.

I have no control over whether or not the costs and attorneys fees in this case, or any of the other proceedings involving these parties, can be passed along in the form of increased rates to the public. While the motive of CSW and the plaintiffs in bringing this antitrust action is irrelevant (except as I have otherwise noted) to a determination on the merits of plaintiffs' antitrust claims, I think it is very relevant to the question of whether or not the public should be forced to pay increased rates to cover the expenses of this action. [3.] CSW's apparent primary purpose for filing this lawsuit was to preserve its holding company status. [4.] I do not feel that **[**107]** the public should have to pay any of the expenses incurred in the attempt to preserve CSW as a holding company. I hope that the PUC seriously considers denying the inclusion of these expenses and those incurred by the parties in the related SEC, NRC, PUC, etc. hearings, in any rate request by these companies. [5.]

It is so Ordered.

End of Document

---

3. The PUC has deferred a ruling on issues similar to the issues presented in this case pending a ruling by this court on the merits of this suit. I therefore think it appropriate to comment on these attorneys fees, even though I cannot award attorneys fees, since the PUC will be relying on this court's view of the evidence.

4. This finding is limited only to this discussion concerning the propriety of passing through these legal expenses to the public in the rate structure.

5. The Defendants may have a valid argument that they should be able to pass through their costs to the public because they did not institute this litigation, and were forced to defend it.

Armstrong v. O'Connell

United States District Court for the Eastern District of Wisconsin

February 8, 1979

Education Law > ... > Racial Discrimination > Desegregation > Remedies

HN1[] **Desegregation, Faculty & Staff**

The duty of both a federal district court and a federal court of appeals in a case where mandatory segregation by law of the races in the schools has long since ceased, is to first determine whether there was any action in the conduct of the business of a school board which was intended to, and did in fact, discriminate against minority pupils, teachers, or staff. All parties should be free to introduce such additional testimony and other evidence as the district court may deem appropriate. If such violations are found, the district court in the first instance, subject to review by the court of appeals, must determine how much incremental segregative effect those violations had on the racial distribution of the school population as presently constituted, when that distribution is compared to what it would have been in the absence of such constitutional violations. The remedy must be designed to redress that difference, and only if there has been a systemwide impact may there be a systemwide remedy.

HN2[] Desegregation, Racial Imbalances

Where certain plaintiffs prove that school authorities have carried out a systematic program of segregation affecting a substantial portion of the students, schools, teachers, and facilities within the school system, it is only common sense to conclude that there exists a predicate for a finding of the existence of a dual school system. In the absence of such a determination (that the geographical structure of, or the natural boundaries within, a school district have the effect of dividing the district into separate, identifiable and unrelated units), proof of state-imposed segregation in a substantial portion of the district will suffice to support a finding by a trial court of the existence of a dual system. Of course, where that finding is made, as in cases involving statutory dual systems, the school authorities have an affirmative duty to effectuate a transition to a racially nondiscriminatory school system. A finding of intentionally segregative school board actions in a meaningful portion of a school system creates a presumption that other segregated schooling within the system is not adventitious and shifts to those authorities the burden of proving that other segregated schools within the system are not also the result of intentionally segregative actions.

Education Law > ... > Racial Discrimination > Desegregation > De Jure Segregation

Evidence > Burdens of Proof > General Overview

Education Law > ... > Racial Discrimination > Desegregation > Racial Imbalances

HN3[] Desegregation, De Jure Segregation

With reference to the present effects of systemwide past intentional discrimination by a school board, at some point in time the relationship between past segregative acts and present segregation may become so attenuated as to be incapable of supporting a finding of de jure segregation warranting judicial intervention. However, a connection between past segregative acts and present segregation may be present even when not apparent and that close examination is required before concluding that the connection does not exist. Intentional school segregation in the past may have been a factor in creating a natural environment for the growth of further segregation. Thus, if the school board cannot disprove segregative intent, it can rebut the prima facie case only by showing that its past segregative acts did not create or contribute to the current segregated condition of the core city schools.

Education Law > ... > Racial Discrimination > Desegregation > Remedies

Evidence > Burdens of Proof > General Overview

HN4[] Desegregation, Remedies

After a showing of past intentional segregation having a systemwide effect is made, and the further showing of present systemwide segregation is made, then the defendants must show that their past segregative acts did not create or contribute to the current segregated condition of the city schools if they wish to escape the imposition of a systemwide remedy. A district court must determine how much incremental segregative effect those violations had on the racial distribution of the school population as presently constituted, when that distribution is compared to what it would have been in the absence of such constitutional violations.

Education Law > ... > Racial Discrimination > Desegregation > Remedies

HN5[] **Desegregation, Remedies**

Once a finding is made of state-imposed segregation in a substantial portion of a school district, a school board has an affirmative duty to effectuate a transition to a racially nondiscriminatory school system.

Civil Procedure > Preliminary Considerations > Equity > General Overview

Education Law > ... > Racial Discrimination > Desegregation > Remedies

HN6[] **Preliminary Considerations, Equity**

In desegregation cases, a district court possesses broad and flexible equity powers. Depending on the circumstances present in each case, pupil assignment alone does not automatically remedy the impact of previous, unlawful educational isolation. The remedy should be commensurate to the scope of the violations. Thus, if the evidence shows that the present effects of the defendants' past intentional segregative actions include negative psychological attitudinal effects, there is no reason why the district court should not, to the extent, if any, that it is appropriate, fashion a remedy to cure those effects.

Education Law > ... > Racial Discrimination > Desegregation > Facilities Selection

Evidence > Burdens of Proof > General Overview

HN7[] **Desegregation, Facilities Selection**

Where a trial court has made a finding of segregative intent, the trial court is then required to make a determination of what are the present effects of the defendants' past intentional segregative actions. Once the defendants are found to have engaged in intentionally segregative conduct in a meaningful portion of the school system, the burden shifts to the defendants to show that the present segregated condition of the school system would have occurred even absent the defendants' intentionally segregative conduct.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Actual Monopolization > General Overview

Civil Procedure > Remedies > General Overview

HN8[] **Monopolies & Monopolization, Actual Monopolization**

A wrongdoer cannot invoke the complexity of his wrong to avoid answering for it. For example, in ***antitrust law*** the very success of a violation may make it impossible to compute damages as, for instance, when a monopolist drives a competitor out of business. The violator's success, however, is not a reason for allowing him to retain the fruits of his misdeeds. The violator must accept, as part of the cost of his violation, the fact that the remedy may be less precise than would be necessary in a world of perfect information.

Counsel: [1]** Lloyd A. Barbee, Milwaukee, Wis., for named plaintiffs.

Irvin B. Charne, Milwaukee, Wis., for the absent members of the plaintiff classes.

L. C. Hammond, Jr., Patrick W. Schmidt and Ronald E. Klipsch, Milwaukee, Wis., for defendants.

Curry First, Milwaukee, Wis., for Milwaukee Teachers' Ed. Ass'n, undesignated intervenor.

Opinion by: REYNOLDS

Opinion

[*1297] FINDINGS OF FACT, CONCLUSIONS OF LAW, AND DECISION AND ORDER

On June 28, 1977, in *Brennan v. Armstrong, 433 U.S. 672, 97 S. Ct. 2907, 53 L. Ed. 2d 1044 (1977)*, the United States Supreme Court vacated the judgment of the United States Supreme Court of Appeals issued July 23, 1976, in *Armstrong v. Brennan, 539 F.2d 625 (7th Cir. 1976)*, wherein the court of appeals had affirmed the finding of liability made by this court on January 19, 1976, in the above-entitled action. See *Amos v. Board of School Directors of the City of Milwaukee, 408 F. Supp. 765 (E.D.Wis.1976)*. The Supreme Court remanded the case to the court of appeals for reconsideration in light of *Village of Arlington Heights v. Metropolitan Housing Development Corp., 429 U.S. 252, 97 S. Ct. 555, 50 L. Ed. 2d 450 (1977)*, and *Dayton Board of Education v. Brinkman, 433* ***[**2]*** *U.S. 406, 97 S. Ct. 2766, 53 L. Ed. 2d 851 (1977)*, and the court of appeals thereafter remanded the case to this court for proceedings consistent with the Supreme Court's mandate. *Armstrong v. Brennan, 566 F.2d 1175 (7th Cir. 1977)*.

In *Dayton, supra, 433 U.S. at 420, 97 S. Ct. at 2775*, the Supreme Court had held:

> ***HN1***[] "The duty of both the District Court and the Court of Appeals in a case such as this, where mandatory segregation by law of the races in the schools has long since ceased, is to first determine whether there was any action in the conduct of the business of the school board which was intended to, and did in fact, discriminate against minority pupils, teachers, or staff. Washington v. Davis, supra (426 U.S. 229, (96 S. Ct. 2040, 48 L. Ed. 2d 597) (1976)). All parties should be free to introduce such additional testimony and other evidence as the District Court may deem appropriate. If such violations are found, the District Court in the first instance, subject to review by the Court of Appeals, must determine how much incremental segregative effect these violations had on the racial distribution of the Dayton school population as presently constituted, when that distribution **[**3]** is compared to what it would have been in the absence of such constitutional violations. The remedy must be designed to redress that difference, and only if there has been a systemwide impact may there be a systemwide remedy. Keyes (V. School District No. 1, Denver, Colorado), 413 U.S. (189 (1973)), at 213, (*413 U.S. 189, 93 S. Ct. 2686, 37 L. Ed. 2d 548*)."

Accordingly, after discussion with counsel and over the objection of defendants' counsel, the Court took additional evidence on the issue of past intentional discrimination. On June 1, 1978, the Court found:

> " * * * that the defendants discriminated against the plaintiffs with segregative intent * * * and in so doing violated the *Equal Protection Clause of the Fourteenth Amendment to the United States Constitution* and the Civil Rights Act of 1871, *42 U.S.C. § 1983*." *Armstrong v. O'Connell, 451 F. Supp. 817, 820 (E.D.Wis.1978)*.

The Court also found:

> "F-89. The objective evidence previously described in detail demonstrates that defendants' decisions, at least since 1950, with respect to teacher assignment and transfers, student bussing, student transfers, school siting, leasing and constructing of school **[**4]** facilities, use of substandard classrooms, and boundary changes were undertaken with an intent to segregate students and teachers by race. In making these decisions, defendants did not believe they were shortchanging black students. Defendants, however, viewed racially-mixed schools as problem schools, likely to be plagued by racial incidents, poor teacher morale, and declining academic standards. Moreover, the prevailing belief of the School Board was that any large influx of blacks into white schools would lower the quality of education available to white students there and would eventually cause the white students to leave those schools. Accordingly, defendants undertook a systematic program designed to prevent **[*1298]** whites from being required to attend classes with large numbers of blacks." *Armstrong v. O'Connell, supra, at 866*.

Finally, the Court found that defendants

> " * * * deliberately separated most of the whites from most of the blacks, and this the Constitution forbids." *Armstrong v. O'Connell, supra, at 866*.

On July 10, 1978 through July 14, 1978, and on October 23, 1978 through October 25, 1978, the Court took evidence on the issue of the present **[**5]** effects of defendants' past segregative acts. The parties in December 1978 submitted to the court proposed findings of fact and conclusions of law and comments on each other's submissions. The decision which follows draws on those submissions, and it constitutes the Court's findings of fact and conclusions of law on the issue of the present effects on the Milwaukee public school system of the defendants' past intentional segregative acts.

There are two preliminary matters which are determinative of the outcome of this case and which the Court will discuss before making its findings of fact and conclusions of law. First is the impact of the Dayton decision on Keyes and its application to the retrial of this action. Second is the manner in which the Court has viewed the expert testimony which it heard in the second phase of the retrial of this action.

In *Keyes v. School District No. 1, Denver, Colorado, 413 U.S. 189, 93 S. Ct. 2686, 37 L. Ed. 2d 548 (1973)*, the Supreme Court examined the principles applicable in a school desegregation case not involving a statutory dual school system. It stated that:

> ***HN2***[] " * * * where plaintiffs prove that the school authorities have carried out a **[**6]** systematic program of segregation affecting a substantial portion of the students, schools, teachers, and facilities within the school system, it is only common sense to conclude that there exists a predicate for a finding of the existence of a dual school system. * * * " *413 U.S. at 201, 93 S. Ct. at 2694*.

It also stated:

> " * * * In the absence of such a determination (that the geographical structure of, or the natural boundaries within, a school district have the effect of dividing the district into separate, identifiable and unrelated units), proof of state-imposed segregation in a substantial portion of the district will suffice to support a finding by the trial court of the existence of a dual system. Of course, where that finding is made, as in cases involving statutory dual systems, the school authorities have an affirmative duty "to effectuate a transition to a racially nondiscriminatory school system.' Brown II (*Brown v. Board of Education, 349 U.S. 294, (75 S. Ct. 753, 99 L. Ed. 1083) (1955))*, *Supra, at 301*." *413 U.S. at 203, 93 S. Ct. at 2695*.

The Court held:

> " * * * that a finding of intentionally segregative school board actions in a meaningful **[**7]** portion of a school system, as in this case, creates a presumption that other segregated schooling within the system is not adventitious * * * and shifts to those authorities the burden of proving that other segregated schools within the system are not also the result of intentionally segregative actions. * * * " *413 U.S. at 208, 93 S. Ct. at 2697*.

HN3[] With reference to the present effects of systemwide past intentional discrimination by the school board:

> "This is not to say, however, that the prima facie case may not be met by evidence supporting a finding that a lesser degree of segregated schooling in the core city area would not have resulted even if the Board had not acted as it did. In *Swann (V. Charlotte-Mecklenburg Board of Education, 402 U.S. 1, (91 S. Ct. 1267, 28 L. Ed. 2d 554) (1971))*, we suggested that at some point in time the relationship between past segregative acts and present segregation may become so attenuated as to be incapable of supporting a finding of De jure segregation warranting judicial intervention. *402 U.S. at 31-32, (91 S. Ct. 1267*) (Citation omitted.) We made it clear, however, that a connection **[*1299]** between past segregative acts and **[**8]** present segregation may be present even when not apparent and that close examination is required before concluding that the connection does not exist. Intentional school segregation in the past may have been a factor in creating a natural environment for the growth of further segregation. Thus, if respondent School Board cannot disprove segregative intent, it can rebut the prima facie case only by showing that its past segregative acts did not create or contribute to the current segregated condition of the core city schools." *413 U.S. at 211, 93 S. Ct. at 2698*.

The defendants suggest that Keyes did not deal with the present effects issue discussed in Dayton and, therefore, that the presumptions created in Keyes are not applicable in this phase of the retrial. In the alternative, they argue that Dayton and other post-Keyes decisions, see, e. g., *Austin Independent School District v. United States, 429 U.S. 990, 97 S. Ct. 517, 50 L. Ed. 2d 603 (1976)* (Powell, J., concurring); *Pasadena City Board of Education v. Spangler, 427 U.S. 424, 96 S. Ct. 2697, 49 L. Ed. 2d 599 (1976)*, have modified the analysis required and demand factual proof on a school-by-school basis of the present effects **[**9]** of defendants' past intentional segregative acts.

The plaintiffs and the United States, which has filed a brief as amicus curiae, argue that, as witnessed by the citation to Keyes in Dayton at *433 U.S. at 420, 97 S. Ct. 2766*, Dayton did not work any fundamental change in the law, and the burden rests on the defendants to show that the segregation in the Milwaukee school system as of the 1975-76 school year did not result from their segregative conduct. In the alternative, plaintiffs submit that they have established by factual proof that defendants' past segregative conduct had a systemwide impact on the Milwaukee school system in the 1975-76 school year.

After reviewing the Keyes and the Dayton decisions, as well as the decisions of the many district courts and courts of appeal which have studied the interrelationship of those decisions since June of 1977, [1.] the Court is persuaded that the Keyes decision does have application to the issue of present effects and also that Dayton does not bear the weight which defendants would have it bear as an instrument for overruling Keyes. The Court in Keyes directed its attention specifically to "the relationship between past segregative acts **[**10]** and present segregation," *413 U.S. at 211, 93 S. Ct. at 2699*, and it held that ***HN4***[] after a showing of past intentional segregation having a systemwide effect is made, and the further showing of present systemwide segregation is made, then the defendants must show that their "past segregative acts did not create or contribute to the current segregated condition of the * * * city schools" if they wish to escape the imposition of a systemwide remedy. *413 U.S. at 211, 93 S. Ct. at 2699*. The Court in Dayton stated at *433 U.S. 420, 97* S. Ct. at -- - that:

[11]**

> " * * * the District Court * * * must determine how much incremental segregative effect these violations had on the racial distribution of the Dayton school population as presently constituted, when that distribution is compared to what it would have been in the absence of such constitutional violations. * * * "

In Dayton, however, the district court found only three isolated instances of intentional segregative conduct. Consequently, none of the predicates for the application of the presumptions discussed in Keyes were present, and plaintiffs retained the burden **[*1300]** of presenting factual proof of the specific effect of each of the defendants' intentionally segregative actions. Whether or not Dayton is a "foreshadowing" of the demise of the Keyes presumptions at least in the area of present effects, see *Austin, supra*; *Pasadena City Board of Education, supra*; and "Defendants' Post Trial Memorandum of Law, Memorandum on Proposed Findings of Fact and Conclusions of Law, and Proposed Findings of Fact and Conclusions of Law as to the Issue of Present Effects" filed December 8, 1978, at 5, n. 4, the Supreme Court has not yet arrived at that result. Unless and until it **[**12]** does so, in language more precise than anything contained in the Dayton decision, this Court considers itself bound by the principles set forth in the Keyes decision.

In addition to its significance on the issues of presumptions and burden of proof, Keyes has a second application to this phase of the retrial. In the original decision and order issued in this case on January 19, 1976, *Amos v. Board of School Directors of the City of Milwaukee, 408 F. Supp. 765 (E.D.Wis.1976)*, it was held at 821:

[1.] See, e. g., *Brinkman v. Gilligan, 583 F.2d 243 (6th Cir. 1978)*, cert. granted ***439 U.S. 1066, 99 S. Ct. 831, 59 L. Ed. 2d 31 (1979)***; *Penick v. Columbus Board of Education, 583 F.2d 787 (6th Cir. 1978)*, cert. granted ***439 U.S. 1066, 99 S. Ct. 831, 59 L. Ed. 2d 31***, (1979); *Evans v. Buchanan, 582 F.2d 750 (3d Cir. 1978)*; *United States v. Texas Education Agency, 579 F.2d 910 (5th Cir. 1978)* (en banc); *Arthur v. Nyquist, 573 F.2d 134 (2d Cir. 1978)*; *United States v. School District of Omaha, 565 F.2d 127 (8th Cir. 1977)* (en banc); *Booker v. Special School District No. 1, Minneapolis, Minnesota, 451 F. Supp. 659 (D.Minn.1978)*; *Berry v. School District of Benton Harbor, 442 F. Supp. 1280 (W.D.Mich.1977)*.

"The Court concludes that the defendants have knowingly carried out a systematic program of segregation affecting all of the city's students, teachers, and school facilities, and have intentionally brought about and maintained a dual school system. * * * "

While the Court did not specifically reiterate its finding of a dual school system in the June 1, 1978, decision, it did make the finding that:

" * * * defendants undertook a systematic program designed to prevent whites from being required to attend classes with large numbers of blacks," *Armstrong v. O'Connell, 451 F. Supp. 817, 866 (E.D.Wis.1978)*,

and in addition that defendants:

" * * * deliberately separated **[**13]** most of the whites from most of the blacks * * *." *451 F. Supp. at 866*.

HN5[] Once a finding is made of "state-imposed segregation in a substantial portion of the district," *Keyes, 413 U.S. at 203, 93 S. Ct. at 2695*, the school board has an affirmative duty " 'to effectuate a transition to a racially nondiscriminatory school system.' " *Keyes at 203, 93 S. Ct. at 2695*; *Brown v. Board of Education, 349 U.S. 294, 301, 75 S. Ct. 753, 99 L. Ed. 1083 (1955)*; *Green v. County School Board, 391 U.S. 430, 437-438, 88 S. Ct. 1689, 20 L. Ed. 2d 716 (1968)*.

Defendants have agreed that the Milwaukee school system is "as segregative" "or as integrative" now as it was in 1950. See "Defendants' Post Trial Memorandum of Law, Memorandum on Proposed Findings of Fact and Conclusions of Law, and Proposed Findings of Fact and Conclusions of Law as to the Issue of Present Effects" filed December 8, 1978, at 31-32. Keyes imposes on the defendants the duty to show that the degree of segregation in the Milwaukee school system in 1975-76 would have existed even absent their intentional segregative actions. *413 U.S. at 211, 93 S. Ct. 2686*. If the evidence which they present to explain those conditions fails **[**14]** to show that the conditions would have existed even absent their past actions, then the Court believes, following Keyes, that it can make the finding that the degree of present segregation in the Milwaukee school system arises out of the defendants' failure to perform the affirmative duty imposed on them in Keyes to effect a transition to a racially neutral system and is itself a significant present effect of the defendants' past intentional segregative actions.

The defendants also argue that even if the Keyes presumptions survive Dayton, they must be deemed rebutted and have no further application "if * * * a reasonable jury Could find the contrary of the presumed fact more probable than not." "Defendants' Post Trial Memorandum of Law, Memorandum on Proposed Findings of Fact and Conclusions of Law, and Proposed Findings of Fact and Conclusions of Law as to the Issue of Present Effects," filed December 8, 1978, at 8. Also they argue that Dayton requires that present segregative effects be measured on a school-by-school basis, that it requires that the present racial distribution of the school **[*1301]** population be compared to what it would have been absent the defendants' violations, **[**15]** and therefore that

" * * * (t)he untested claims of Drs. Green, Taeuber and Foster (plaintiffs' experts) with respect to psychological attitudinal effects transcend the bounds of the task assigned this Court. The only issue presented is what the racial distribution of the school population would be today, not what psychological harm might have been caused and not what attitudinal concepts might have been developed because of the violations. * * * " Defendants' Post Trial Memorandum filed December 8, 1978, at 10.

As stated above, the Court does not read Dayton as requiring a school-by-school analysis. Furthermore, in face of defendants' systematic program of intentional segregative action, a school-by-school analysis which fails to take into account that there may be ramifications of the action felt outside of the individual school or schools involved may fail to measure the "incremental" effect of an individual action or of the individual actions at issue when they are viewed in total. In Keyes, the Court noted at 433 U.S. at 203, 93 S. Ct. 2686 that school board actions have an impact beyond their impact on the individual school or schools at which they are directed. Similarly, **[**16]** in *Milliken v. Bradley, 433 U.S. 267, 97 S. Ct. 2749, 53 L. Ed. 2d 745 (1977)*, the Court recognized ***HN6***[] "the broad and flexible equity powers" of the court, *433 U.S. at 288, 97 S. Ct. at 2761*, and noted that, depending on the circumstances present in each case, "pupil assignment alone does not automatically remedy the impact of previous, unlawful educational isolation * * *." *433 U.S. at 287, 97 S. Ct. at 2761*. See also *Swann v. Charlotte-Mecklenburg Board of Education, 402 U.S. 1, 91 S. Ct. 1267, 28 L. Ed. 2d 554 (1971)*; *United States v.*

Montgomery County Board of Education, 395 U.S. 225, 89 S. Ct. 1670, 23 L. Ed. 2d 263 (1969). Even in Dayton, the Court noted that the remedy should be commensurate to the scope of the violations. *433 U.S. at 417, 97 S. Ct. 2766*. Thus, if the evidence shows that the present effects of the defendants' past intentional segregative actions include negative psychological attitudinal effects, the Court is unaware of any reason why it should not, to the extent, if any, that it is appropriate, fashion a remedy to cure those effects.

As for defendants' argument with respect to rebutting the Keyes presumptions, that argument presupposes that defendants have presented **[**17]** to the Court sufficient evidence to enable the Court, sitting as the finder of fact, to decide that the present segregated condition of the Milwaukee schools was not caused by the defendants' intentional segregative actions. The defendants limited their presentation of evidence to the schools as to which specific violations were found, and as to those schools, to a comparison of what the present population of each school would have been had the specific violations not occurred to what the population was at the time the violation occurred. For the reasons set forth below, the Court finds that the flaws in the defendants' analysis would preclude it as factfinder from relying on the evidence presented by defendants and therefore would not enable it to make the finding that it was more likely than not that defendants' actions did not contribute to the present segregated conditions in the Milwaukee public schools.

Both matters the use of evidence relating to psychological attitudinal effects and the analysis and use of evidence of incremental segregative effects as defined by the defendants raise the issue of the manner in which the Court has viewed the expert testimony presented during **[**18]** the second phase of the retrial of this case. That view is in turn determinative of the outcome of the case and thus will be discussed prior to the making of specific findings of fact and conclusions of law.

Initially, the Court notes that this second phase of the retrial the so-called "battle of the experts" has required the Court as factfinder to consider and to evaluate almost entirely contrary sociological and urban geographic theories. In so doing, the Court of necessity has had to rely on the qualifications and the persuasiveness of the expert witnesses in reaching its own conclusions **[*1302]** on the ultimate issue of present effects. Plaintiffs' witnesses were Dr. Robert P. Stuckert, formerly the director of the Milwaukee Fact Book Project; Dr. Robert L. Green, an educational psychologist and presently the dean of one of the colleges at Michigan State University; Dr. Karl Taeuber, a sociologist and urban demographer, presently at the University of Wisconsin-Madison; and Dr. Gordon Foster, presently a professor in the School of Education at the University of Miami. Defendants' witnesses were Dr. William Clark, an urban geographer presently from the University of California **[**19]** at Los Angeles, and Dr. David Armor, a sociologist, formerly from Harvard University and presently with the Rand Corporation.

The defendants have criticized plaintiffs' witnesses for failing to make detailed analyses of the Milwaukee urban area and residential living patterns and of the Milwaukee public school system. Also, defendants have criticized them for testifying as to the "psychological attitudinal effects" of defendants' past segregative actions rather than trying to quantify except by use of terms like "substantial" or "not minimal," the incremental effects of the defendants' constitutional violations. (Defendants' Memorandum filed December 8, 1978, at 10, 12-13.)

The Court has already determined that evidence of psychological attitudinal effects is relevant to its present inquiry and that a remedy can be predicated on a finding that such effects exist. With respect to the failure of plaintiffs' witnesses to quantify present effects mathematically, this Court is in agreement with the statement of the Court in *Booker v. Special School District No. 1, Minneapolis, Minnesota, 451 F. Supp. 659, 662 (D.Minn.1978)*, that the use of an " "alternative universe theory,' " i. e., **[**20]** a comparison of a universe where no violations occurred to what in fact exists, is fraught with difficulties and moreover is probably not what the Supreme Court intended in Dayton. As stated by the Court in Booker in note 5 at 663:

> " * * * (T)he many problems of the statistical approach defendants have used reinforces this Court's view that Dayton cannot be interpreted so "mathematically.' As another court has remarked, no court in any school case will ever be able to say with any assurance "where people would have lived, where schools would have been located (or) how much integration would have obtained' absent officially imposed discrimination. *U. S. v. Columbus Municipal Separate School Dist., 558 F.2d 228, 231 n. 11 (5th Cir. 1977)*, Cert. denied *434 U.S. 1013, 98 S. Ct. 728, 54 L. Ed. 2d 757 (1978)*."

See also *Teamsters v. United States, 431 U.S. 324, 372, 97 S. Ct. 1843, 52 L. Ed. 2d 396 (1977)*. Any "alternative universe" created, whether by plaintiffs' or defendants' experts, will necessarily be an approximation of what in fact would have existed absent the defendants' constitutional violations. Consequently, use of a term like "substantial" to quantify the present **[**21]** effect of past actions by a person whose expertise qualifies him to make a judgment on present effects is all that is reasonably possible and all, in the opinion of this Court, that the law presently requires.

Finally, the defendants take too narrow a view of what their constitutional violations were as found by the Court in its June 1, 1978, decision. They have examined and used in this second phase of the trial the individual violations which the Court found but have ignored the Court's conclusion that:

> " * * * the defendants acted with a discriminatory intent in their decisions and actions respecting boundary changes, site selection, and school construction." *Armstrong v. O'Connell, 451 F. Supp. 817, 866 (E.D.Wis.1978)*.

They have also ignored the Court's conclusion that:

> "(t)he objective evidence previously described in detail demonstrates that defendants' decisions, at least since 1950, with respect to teacher assignment and transfers, student bussing, student transfers, school siting, leasing and constructing **[*1303]** of school facilities, use of substandard classrooms, and boundary changes were undertaken with an intent to segregate students and teachers **[**22]** by race. * * * Accordingly, defendants undertook a Systematic program designed to prevent whites from being required to attend classes with large numbers of blacks." Ibid., at 866. (Emphasis added.)

The Court concluded in the just-quoted findings that the defendants' violations occurred on a systemwide basis and not merely in the individual instances set forth earlier in the June 1, 1978, decision. By choosing to ignore the Court's conclusions, the defendants have also taken too narrow a view of the evidence on which the opinions of plaintiffs' witnesses were based. The criticism leveled at plaintiffs' witnesses of failing to make the proper analysis of the Milwaukee public school system could therefore better by leveled at defendants' witnesses who failed to take into account the most significant of the findings made by the Court on the issue of defendants' past intentional segregative acts.

Defendants' witness, Dr. William Clark, testified about the reciprocal effects of segregated schooling on residential patterns. In reliance on his testimony, the defendants have suggested that the Court adopt the following finding of fact:

> "40. The primary forces which influence residential **[**23]** patterns are economics, spatial forces, geographic barriers, choice and discrimination (Tr. II-37, Clark). All of these forces contribute to the way in which people behave with respect to residential selection, one aspect of which is that people tend to move shorter distances rather than longer ones (Tr. II-18-21, Clark). One way to measure this observed behavior is through the use of a scientific device called a "distance decay curve,' which itself represents the forces that go into the selection of new residences (Tr. II-21, Clark). By taking the distance decay curve and doing a scientific simulation based upon the probabilities of individuals moving particular distances, one can simulate where people would be expected to live if the forces which comprise the distance decay curve are valid (Tr. II-25-26, 27-29, Clark). If the simulated pattern one obtains from running the study is close to the actual pattern (based upon census information), then the simulation establishes that the forces which are at work in contributing to the distance decay curve are causing the actual pattern to develop (Tr. II-40, Clark).
>
> "Dr. Clark conducted a simulation study of the movements of black **[**24]** families for the City of Milwaukee for the period of 1960 to 1970 using a distance decay curve of the white population (Tr. II-44, Clark). By using this curve rather than the distance decay curve for blacks, the portion of observed behavior which is due to discrimination is eliminated and therefore whatever correlation this simulation has to the actual will reflect those factors which are part of the distance decay curve except for discrimination (Tr. II-44-5, Clark). The simulations which Dr. Clark ran produced a mathematical correlation of .81 and .83 which establishes that the distance decay curve was a good representation of the movements of black households (Tr. II-39, Clark). The difference between the correlation number received and the number one represents the factors which are left over that are not included in the distance decay formula, which factors include discrimination (Tr. II-102, Clark). Dr. Clark

has always tended to think that each of the factors, economics, barriers, spatial factors, choice and discrimination have about 20% Of the explanation for residential living patterns (Tr. II-121, Clark). The discrimination element, which is in the range of 15-20%, includes **[**25]** both individual and governmental discrimination (Tr. II-123, Clark). Since individual acts of discrimination and other governmental discrimination besides the School Board are part of the residual of 20% Which explain the black living patterns, the Court-found violations are far outweighed as having any influence on residential patterns (Tr. II-42, Clark). Dr. Clark testified that he did **[*1304]** not think that the School Board had an impact on the residential patterns and that there was no evidence in the literature that school boards have been a force in influencing the residential mosaic, and this Court agrees with that testimony and so finds (Tr. II-43, Clark)." (Defendants' memorandum filed December 8, 1978, at 35-36.)

The Court declines to adopt the finding. As stated within it, the finding assumes that "if the simulated pattern one obtains from running the study is close to the actual pattern * * *, then the simulation establishes that the forces which are at work in contributing to the distance decay curve are causing the actual pattern to develop * * *." What the forces are, however, is determined by the person conducting the study. No attempt was made by Dr. Clark **[**26]** to determine whether or not a set of other factors taken in conjunction, or several such sets, might have created the same pattern. Consequently, of course, no effort was made by him, and his study does not show, that the set of forces on which he chose to base the study was the only set which could have created the actual pattern.

Dr. Armor undertook to evaluate each individual discriminatory act which the Court found in its June 1, 1978, decision, and to predict, assuming an otherwise static situation, what the present population of the school or district involved would have been absent the single act of discrimination, or what the rate of contact between black and white students would be today absent the act of discrimination. The Court finds several fundamental flaws in his analysis. First, it fails to take into account that the individual violations set forth in the June 1, 1978, decision were not the only violations which the Court found to have occurred, but rather that the Court found, based on those individual acts, that systemwide violations had occurred. Second, the analysis assumes that had the individual intentionally discriminatory acts not occurred, no other neutral **[**27]** and nondiscriminatory actions would have been taken. Third, the analysis ignores the possible psychological and attitudinal effects of the acts, i. e., it measures integration on the basis of contact alone without regard for the nature of the contact. Finally, the analysis fails to take into account that a single act of discrimination may have an effect beyond that felt by the persons, or in the schools or districts of immediate impact. For other criticisms of Dr. Armor's work, see *United States v. Board of School Commissioners of the City of Indianapolis, Indiana, 503 F.2d 68, 85* and n. 21 at 85 (7th Cir. 1974); *Northcross v. Board of Education of Memphis, 466 F.2d 890, 894 (6th Cir. 1972)*.

The Court recognizes, as all courts which have looked at the problem have done, the difficulties of proof of cause and effect in the context of school segregation. Relying on the Keyes decision, the Court is of the opinion that its finding of systemwide intentional discrimination, in conjunction with defendants' failure to present satisfactory evidence that the present segregated condition of the Milwaukee public school system would have been the same even absent the acts of intentional discrimination, **[**28]** necessitates imposition of a systemwide remedy. As stated by the Court in *Booker v. Special School District No. 1, Minneapolis, Minnesota, 451 F. Supp. 659, 663-664 (D.Minn.1978)*:

"Indeed, at bottom, there is an inherent contradiction in attempting to apply either of defendants' views of Dayton to a systemic school segregation case. This Court's findings of a systemwide pattern of discrimination in the Minneapolis schools cannot now be challenged or relitigated and Dayton itself reemphasized that once systemwide impact is found, a systemwide remedy must be imposed. Dayton did not overrule the cases which have guided the district courts in formulating systemwide remedies the goal is to desegregate the entire system "root and branch,' *Keyes v. School District No. 1, 413 U.S. 189, 213, 93 S. Ct. 2686, 37 L. Ed. 2d 548 (1973)*, Quoting *Green v. County School Board, 391 U.S. 430, 438, 88 S. Ct. 1689, 20 L. Ed. 2d 716 (1968)*, and to achieve the "greatest possible degree of **[*1305]** actual desegregation, taking into account the practicalities of the situation,' *Davis v. Board of School Commissioners, 402 U.S. 33, 37, (91 S. Ct. 1289, 28 L. Ed. 2d 577) (1971)*. See *U. S. v. Columbus **[**29]** Municipal Separate School Dist., 558 F.2d 228, 230-31 (5th Cir. 1977)*,

> Cert. denied, *434 U.S. 1013, 98 S. Ct. 728, 54 L. Ed. 2d 757 (1978)*. The concept of "incremental segregative effect,' however it may be interpreted or applied when a district court is faced in the first instance with isolated unconstitutional acts, has little application where the segregative effect has already been determined to have been pervasive and to require a systemwide remedy. * * * "

Nevertheless, even assuming that the Keyes presumptions should not be applied to the present effects analysis, the Court is persuaded that plaintiffs have presented sufficient evidence during the second phase of the retrial to justify imposition of a systemwide remedy.

The Court makes the following findings of fact and conclusions of law on the issue of the proper scope of the remedy to be imposed in this case. [2] These findings and conclusions are supplemental to, and generally in harmony with, those findings and conclusions on the same issue contained in the Court's original decision in this case, *Amos v. Board of School Directors of the City of Milwaukee, 408 F. Supp. 765 (E.D.Wis.1976)*. In case of a conflict, however, **[**30]** between the findings and conclusions of the original decision and the findings and conclusions of this decision, the later ones are intended as controlling. The findings of fact are numbered consecutively below, with each number being preceded by the designation "F," while the conclusions of law are numbered consecutively in a separate sequence, with each number being preceded by the designation "L."

FINDINGS OF FACT AND CONCLUSIONS OF LAW

L-1. ***HN7***[] Where, as in this case, the trial court has made a finding of segregative intent, the Court is then required to make a determination of what are the present effects of the defendants' past intentional segregative actions. *Dayton Board of Education v. Brinkman, 433 U.S. 406, 97 S. Ct. 2766, 53 L. Ed. 2d 851 (1977)*; *Brennan v. Armstrong, **[**31]** 433 U.S. 672, 97 S. Ct. 2907, 53 L. Ed. 2d 1044 (1977)*.

F-1. For the purposes of this case, "present effects" should be judged as of the 1975-76 school year, which was the last year prior to the phasing in of a court-ordered remedy in this case.

L-2. Once the defendants are found to have engaged in intentionally segregative conduct in a meaningful portion of the school system, see *Armstrong v. O'Connell, 451 F. Supp. 817, 866 (E.D.Wis.1978)*, the burden shifts to the defendants to show that the present segregated condition of the school system would have occurred even absent the defendants' intentionally segregative conduct, *Keyes v. School District No. 1, Denver, Colorado, 413 U.S. 189, 211, 93 S. Ct. 2686, 37 L. Ed. 2d 548 (1973)*. In this case, however, even without the use of the Keyes presumption, the plaintiffs have established that the defendants' unconstitutional conduct had a substantial systemwide impact on the racial distribution of students and teachers in the Milwaukee public school system.

F-2. The Court previously found that defendants themselves fallaciously assumed that "educationally undesirable characteristics are common to all black children" and that "the influx **[**32]** of a large number of black students into a white school would lower the quality of education in that school." *Armstrong v. O'Connell, 451 F. Supp. 817, 866 (E.D.Wis.1978)*. As a result of defendants' unconstitutional decisionmaking, similar false assumptions were taught to Milwaukee school children and the Milwaukee community in general. Specifically, defendants' discriminatory conduct has taught school children and adults in Milwaukee **[*1306]** that racial separation is legitimate and desirable behavior. It has taught white children that this is a white-dominant society and that white children need not have more than token contact with black children or black professionals. It has taught whites that blacks are in some ways inferior and that interracial contact is detrimental and to be avoided. Defendants' conduct provided the same lessons to black children and black adults. Moreover, defendants' conduct was a message that a major government agency in Milwaukee formally and openly sanctioned racial discrimination and segregation. Defendants' deliberate separation of white and black children in a variety of ways, and their separation of white children from black teachers, thus had **[**33]** the effect of fostering general attitudes of prejudice and racial hostility throughout the Milwaukee area.

---

[2] The Court has adapted its findings of fact and conclusions of law from the plaintiffs' proposed findings of fact and conclusions of law filed December 8, 1978, with such minor additions and deletions as the Court has considered proper.

F-3. Intact busing conveyed the message to whites that their children were being protected from blacks because even if it was necessary to bus largely black classes to predominantly white schools, there was nothing to fear because the busing would be temporary and the bused children would be kept reasonably separate at the white schools. Intact busing taught blacks that black children were not welcome in white schools, that black parents were not welcome at the white schools' P.T.A.'s, and that blacks were not likely to make friends in the white areas of Milwaukee. Milwaukee public school busing practices also taught both black and white students that blacks were inferior. Accordingly, the great efforts made by the school system through its busing practices to minimize contact between students from black and white schools reinforced defendants' general educational message that white contact with too many blacks is unfortunate and to be avoided.

F-4. The impact of intact busing is uncertain; however, a substantial number of parents and children had first-hand knowledge of intact **[**34]** busing. Moreover, in light of the community conflict over intact busing and the media coverage of the conflict, Milwaukeeans in general were aware of intact busing practices and the racial lessons they taught.

F-5. The deliberate concentration of black teachers in schools outside of the predominantly white areas of the city conveyed the message that an important government agency, the school board, did not want blacks in the white areas of the city. It also was a message to school children that whites are dominant and that blacks are to be kept apart in Milwaukee's public schools and in the city generally.

F-6. Defendants' free and open transfer policies let whites know that their children would be permitted to escape from schools becoming increasingly black, and facilitated defendants' policy of "deliberately separating most of the whites from most of the blacks," *Armstrong v. O'Connell, 451 F. Supp. 817, 866 (E.D.Wis.1978)*. These policies had the further effect of identifying certain neighborhoods in Milwaukee as being no longer suitable for whites.

F-7. The attitudinal effects resulting from defendants' intentionally segregative conduct have broad social consequences. These attitudinal **[**35]** effects influence the behavior of teachers and school administrators throughout the school system in carrying out their duties, and they affect other government officials in discharging their public responsibilities. They also influence the behavior of private citizens as members of the community and as actors in the housing market. In addition to being broad in scope, unless there is an extensive program of remediation, these attitudinal effects will last a lifetime. *Brown v. Board of Education, 347 U.S. 483, 494, 74 S. Ct. 686, 98 L. Ed. 873 (1954)*.

F-8. In 1950, approximately 3 1/2 % Of Milwaukee's citizens were black. In that year, no census tracts were more than 90% Black, and only five tracts were majority black. Although in 1950 some blocks in Milwaukee were predominantly black, no black person lived more than four blocks from a majority white residential area. Thus, unlike in other large northern cities in 1950, as a result of the small percentage of black citizens, **[*1307]** Milwaukee blacks lived in relatively close geographic proximity to whites; on the other hand, the residential living pattern was extremely concentrated and there was a high degree of residential segregation.

[36]** F-9. From 1950 through 1970, Milwaukee's black population nearly quintupled, and by 1970 blacks constituted approximately 14 1/2 % Of the city's population. Milwaukee's ghetto, defined herein as a concentrated area of predominantly black residents, grew up since 1950, and principally in the 1960's. In 1970, seventeen census tracts were more than 90% Black and an additional twenty tracts were majority black.

F-10. Defendants' segregative decision-making thus occurred simultaneously with the growth of Milwaukee's black ghetto. An expert witness called by plaintiffs, Dr. Karl Taeuber, whom one of the defendants' experts described as a very well-known, renowned demographer best known for his work on race-related issues and on cities, testified that in Milwaukee "there was a continuing reciprocal interplay between schooling and housing, such that the highly concentrated black ghetto and the highly concentrated portions of the school system grew up together, and the reciprocal influence on the white areas produced solidly white resident and school areas." (Transcript of July 11, 1978, at 255) The Court, in its January 19, 1976, opinion, indicated that it did not doubt that schools had **[**37]** a reciprocal effect on housing, but that the evidence then in the record did not support such a finding. *Amos v. Board of School Directors of the City of Milwaukee, 408 F. Supp. 765, 821-822 (E.D.Wis.1976)*. Based on the evidence presented at the second phase of the retrial on present effects, a reciprocal effect finding, as stated in the above-quoted excerpt from Dr. Taeuber's testimony, is now justified. See also *Swann v. Charlotte-Mecklenburg Board of Education, 402 U.S. 1, 20-21, 91 S. Ct. 1267, 28 L. Ed. 2d 554 (1971)*; *Keyes v. School District No. 1, Denver, Colorado, 413 U.S. 189, 202, 93 S. Ct. 2686, 37 L. Ed. 2d 548 (1973)*.

F-11. It is an impossible task at least for this court and this judge to determine with any degree of specificity how substantial the reciprocal effect of schooling on housing in Milwaukee has been. There is credible evidence in the record to support the finding, which the Court now makes, that the factors of economics, choice, spatial factors, and discrimination also have a substantial role in creating residential segregation. Nevertheless, based on Dr. Taeuber's testimony, the Court is persuaded that the school board's actions also were one of the substantial **[**38]** causes of residential segregation in Milwaukee.

F-12. The Court, in its June 1, 1978, decision, found that defendants' decisions to deal with overcrowding in inner city schools, including the building and siting of new schools, building additions to existing schools, leasing or purchasing unused buildings for school purposes, utilizing substandard classrooms, changing district boundaries, and intact busing, "individually and in conjunction with each other had the effect of increasing racial imbalance." *Armstrong v. O'Connell, 451 F. Supp. 817 (E.D.Wis.1978)*. Together these actions formed a "pattern of boundary compression and facility expansion" which resulted in many instances in schools in contiguous districts being of one race or another. *Armstrong, at 859*. Thus, defendants' unlawful conduct increased the racial identifiability of schools. Moreover, the intentional concentration of black teachers in those schools attended by large numbers of black children perpetuated the racial identifiability of schools. Similarly, defendants' transfer policies facilitated a much more rapid transition in school racial identifiability than would come about simply through neighborhood residential **[**39]** change.

F-13. A school, as a principal and visible neighborhood entity, often acts as the central identifying institution for a neighborhood. Within an otherwise undifferentiated residential area, school boundaries tend to be the most meaningful boundaries in defining a neighborhood. Thus, the racial identifiability of a school helps to racially identify the neighborhood. This racial identifiability, in conjunction with the message **[*1308]** conveyed by defendants' unlawful conduct that contact between blacks and whites is to be avoided, had a substantial impact on the housing patterns in Milwaukee. It contributed to the drying up of the demand by whites for housing in areas which, in part as a result of defendants' wrongful acts, were racially earmarked as being for blacks. Similarly, defendants' conduct contributed to the black housing demand being channeled into the black residential areas of Milwaukee rather than being dispersed throughout the city.

F-14. *Dayton Board of Education v. Brinkman, 433 U.S. 406, 420, 97 S. Ct. 2766, 2775, 53 L. Ed. 2d 851 (1977)*, requires the Court to consider, as part of its "present effects" determination, what the "school population as presently **[**40]** constituted * * * would have been in the absence of such (defendants') constitutional violations." The record in this case demonstrates that the Milwaukee public school system would have been substantially less segregated in 1975-76 had defendants not engaged in the intentionally segregative conduct found by the Court in its June 1, 1978, decision. Milwaukee would have had substantially less housing segregation in 1975 and, as a result, substantially less school segregation had defendants administered the school system in a racially neutral manner.

F-15. Had defendants assigned teachers in a racially neutral manner and administered the rest of the system in such a manner, many more white students throughout the system would have had first-hand experiences with both black and white teachers. The school system, by example, would have taught these white students and white Milwaukeeans generally that blacks and whites were equally capable of educational attainment, of handling major responsibilities, and of working together harmoniously; black students and black Milwaukeeans generally would have been taught the same lesson and would have had the example of the school system practicing **[**41]** equal rights and ignoring racial prejudices. Schools would not have been racially identifiable on the basis of the racial composition of their staffs. There is a substantial probability that fewer Milwaukeeans would have engaged in discriminatory housing practices and that more would have sought out and resided in racially mixed residential areas.

F-16. Had defendants assigned teachers in a racially neutral manner, more black teachers would have been dispersed throughout the system. There is a substantial probability that some of the black teachers who would have been assigned to white schools outside the inner city would have chosen to live closer to their assigned school and to enroll their children in that school; that they would have demonstrated that blacks could be good neighbors; and that, as a result of this interracial contact, which defendants by their conduct discouraged, whites would have accepted other black families as their neighbors. Black demand for housing, therefore, would have been dispersed throughout the city rather than concentrated in one area.

F-17. Had defendants mixed bused students rather than intact bused students from majority black schools to majority **[**42]** white schools, thousands of black and white students would have had meaningful interracial contact. Social psychological evidence in the record indicates that persons who have had meaningful interracial experiences in school as children are more likely to seek out and live in integrated residential areas as adults. Moreover, had mixed busing been employed, Milwaukee public school busing practices would not have been perceived by the community as a device to protect white students from attending school with black students on an equal basis. Had defendants engaged in a racially neutral busing practice and administered the rest of the system in a neutral manner, students and citizens of Milwaukee would have been given a lesson in racial tolerance rather than racial intolerance. There is a substantial probability that more citizens would have sought racially mixed housing. Furthermore, many of the white and black students are now young adults. They are renting or buying homes and deciding where to send their own children to school. Had these students had meaningful interracial **[*1309]** contact, facilitated by mixed busing, there is a substantial probability that many more of them would **[**43]** seek out racially mixed rather than racially isolated residential areas.

F-18. Had defendants operated a racially neutral student transfer program and administered the rest of the system in a racially neutral manner, there is a substantial probability that housing in Milwaukee would have been less segregated; that there would have been fewer white transfers out of schools with increasing black student populations; that neighborhoods would not have been as identifiable and considered as no longer suitable for whites; and that the white demand for housing in those areas would not have dried up. Had there been a majority to minority transfer plan or some type of neutral transfer program, black parents seeking interracial education for their children would have been better able to secure it. These parents would have acquired a whole different set of attitudes that affect housing choices and, therefore, they would have made different housing choices.

F-19. Had defendants engaged in neutral policies relating to school siting, construction and boundary changes, and operated the rest of the system neutrally, schools would have been less racially identifiable. More students and parents would **[**44]** have been exposed to interracial education. There is a substantial probability that a greater number of Milwaukeeans would have chosen to live in interracial neighborhoods, and the development of the solid black ghetto would have been diminished.

L-2. Defendants' discriminatory conduct conveyed a clear message to the entire Milwaukee community that a governmental institution was intentionally protecting white students from attending schools with large numbers of black students and from being taught by black teachers. Milwaukeeans were taught lessons of racial prejudice and hostility which molded and reinforced prejudicial attitudes. These attitudes influenced the housing decisions of black and white Milwaukeeans. Had the defendants operated the school system in a racially neutral manner, Milwaukeeans would have received a different message that a governmental institution was approving treatment of blacks and whites on an equal basis. Defendants, by direct example, would have taught Milwaukeeans lessons of racial tolerance and acceptance which would have formed and reinforced positive racial attitudes. There is a substantial probability that more Milwaukeeans would have made housing **[**45]** choices which would have resulted in much greater housing desegregation and, in turn, much greater school desegregation. Thus, defendants' constitutional violations had an incremental segregative effect throughout the school system.

L-3. In order to redress the pervasive, systemwide impact of defendants' constitutional violations, a systemwide remedy encompassing both student population and teacher assignment is required.

L-4. Defendants contend that since plaintiffs were unable to prove with precision what the racial make-up of each school in the system would be in 1975-76 had defendants' constitutional violations not occurred, plaintiffs are not entitled to this remedy. Unfortunately, it is true that the overriding effect which defendants' unlawful conduct had on housing patterns makes it impossible to determine with precision how each school in the system would have looked had defendants not violated plaintiffs' constitutional rights. No court in any school case will ever be able to determine with statistical precision "where people would have lived, where schools would have been located (or) how much integration would have been obtained" in the absence of officially imposed discrimination. **[**46]** *United States v. Columbus Separate School District, 558 F.2d 228, 231 n. 11 (5th Cir. 1977)*, Cert. denied *434 U.S. 1013, 98 S. Ct. 728, 54 L. Ed. 2d 757 (1978)*, and *Booker v. Special School District No. 1, Minneapolis, Minnesota, 451 F. Supp. 659, 663 n. 5 (D.Minn.1978)*.

In this case the special master previously reported:

> **[*1310]** " * * * It may be that we have no way of knowing what the Milwaukee Public School system would look like today had the defendants not violated the plaintiffs' constitutional rights. I would submit, however, that the defendants should not be permitted to profit from their wrongdoing by using such uncertainty as the basis for resisting imposition of an appropriate remedy." (Special Master's Progress Report and Recommendations, February 17, 1977, at 10.)

This view is jurisprudentially sound. Indeed, it is an accepted principle of law that ***HN8***[] a wrongdoer cannot invoke the complexity of his wrong to avoid answering for it. For example, in ***antitrust law*** the very success of a violation may make it impossible to compute damages as, for instance, when a monopolist drives a competitor out of business. The violator's success, however, is not a reason **[**47]** for allowing him to retain the fruits of his misdeeds. *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 123-125, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*. The violator must accept, as part of the cost of his violation, the fact that the remedy may be less precise than would be necessary in a world of perfect information. In any event, Dayton cannot be read to require the mathematical precision requested by defendants. *Booker, supra, 451 F. Supp. at 663 n. 5*. Moreover, since defendants have not themselves proven that the present segregated condition of the Milwaukee public school system would not have been the same even absent their constitutional violations, see *Keyes v. School District No. 1, Denver, Colorado, 413 U.S. 189, 211, 93 S. Ct. 2686, 37 L. Ed. 2d 548 (1973)*, this court, sitting as a court of equity, cannot be "so callous as to accept the contention that although vestiges of De jure discrimination pervade to this day, it is helpless to fashion a remedy to root them out." *Evans v. Buchanan, 582 F.2d 750, 766 (3d Cir. 1978)* (en banc).

The Court will require the plaintiffs to prepare a proposed remedial plan designed to cure the present effects of the defendants' **[**48]** past constitutional violations. The defendants will have an opportunity to comment on the plan or to submit their own plan, and a hearing on the plan(s) will be held at the end of March 1979, as hereafter set forth:

ORDER

For the foregoing reasons,

IT IS ORDERED that this decision shall constitute the findings of fact and conclusions of law made pursuant to the remand of this action from the United States Court of Appeals for the Seventh Circuit on the issue of the present effects of the defendants' past constitutional violations.

IT IS FURTHER ORDERED that the parties shall observe the following scheduling dates:

1. On or before February 23, 1979, the plaintiffs shall serve and file a proposed remedial plan designed to cure the present effects, as found in this decision and order, of the defendants' past constitutional violations.

2. On or before March 9, 1979, the defendants shall serve and file their comments, if any, on the plaintiffs' proposed remedial plan or, if they choose, an alternative plan.

3. On or before March 16, 1979, the plaintiffs shall serve and file their response, if any, to the defendants' comments, or their comments on the defendants' plan.

4. A hearing **[**49]** on the proposed remedial plan(s) is scheduled for 9:30 A.M. on Friday, March 23, 1979, in Courtroom 425 of the Federal Building, 517 East Wisconsin Avenue, Milwaukee.

Antitrust & Trade Law > Clayton Act > General Overview

HN1[] **Antitrust & Trade Law, Sherman Act**

The United States Supreme Court has settled that a state does have standing to sue under the antitrust laws to protect its quasi-sovereign interest in the well being of its general economy and the welfare of its citizens.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Horizontal Refusals to Deal > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] **Price Fixing & Restraints of Trade, Horizontal Refusals to Deal**

"Boycott" has been defined as "a method of pressuring a party with whom one has a dispute by withholding, or enlisting others to withhold, patronage or services from the target. From the very beginning of antitrust enforcement, the boycott or concerted refusal to deal has been held to be a combination in restraint of trade, in violation of *§ 1* of the Sherman Act, *15 U.S.C.S. § 1*.

Counsel: John E. Vanderstar, Donna L. Kohansky, Covington & Burling, Washington, D. C., for defendant.

Roger Bern, Walter O. Theiss, Gregory D. Hoffmann, Nanette K. Laughrey, Asst. Attys. Gen., Jefferson City, Mo., for plaintiff.

Opinion by: HUNTER

Opinion

[*291] OPINION AND ORDER

The State of Missouri brings this action for injunctive relief against the National Organization for Women, Inc. (NOW) under § 16 of the Clayton Act, *15 U.S.C. § 26*. Missouri alleges that NOW has engaged in a combination and conspiracy in restraint of trade in violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1*. Missouri also alleges that NOW's conduct violates the Missouri antitrust statute, *§ 416.031.1, RSMo*, and constitutes the tortious intentional infliction of economic harm without legal justification or excuse. This Court has jurisdiction over the federal antitrust claim under *28 U.S.C. § 1337* and pendent jurisdiction over the state law claims.

Missouri is a sovereign state of the United States and brings this action in that capacity and as Parens patriae. NOW is a nonprofit membership corporation organized under the laws of the District of Columbia. It has approximately **[**2]** 77,000 members nationwide, half of whom belong to 690 local chapters. These chapters and individual members are organized into a national federation with the stated purpose of bringing women "into full participation in the mainstream of American society."

I. Factual Findings

The factual basis for Missouri's Complaint can be supplied by this single stipulation of fact:

> NOW has sought to persuade and urge those organizations that support making equal rights for women a part of the Constitution to refrain from holding conferences, conventions, and meetings in unratified states.

It is necessary, however, to place NOW's activities within the broader series of occurrences leading to the filing of this action and therefore to set out a summary of the substantial record before the Court.

The proposed Equal Rights Amendment to the Constitution (ERA) was passed by both houses of Congress and submitted to the states for ratification on March 23, 1972. [1] The ERA has been ratified by the legislatures of thirty-five states, short of the thirty-eight required for the amendment to become a part of the Constitution. [2] Ratification of the ERA became a hotly-contested issue in many **[**3]** states, and, as is characteristic of the political system in this country, various individuals and organizations undertook lobbying efforts to influence legislators, both in support and in opposition. Such efforts have included giving testimony before legislative committees, personal contacts with legislators, letter writing campaigns, and solicitation of media attention. Many national membership organizations and associations, including NOW, have engaged in such lobbying.

---

[1] H.R.J. Res. 208, 92d Cong., 2d Sess., 86 Stat. 1523 (1972) provides:

Section 1. Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex.

Sec. 2. The Congress shall have the power to enforce, by appropriate legislation, the provisions of this article.

Sec. 3. This amendment shall take effect two years after the date of ratification.

[2] *U.S.Const. art. V*.

As early as April of 1975, the National Federation of Business and Professional Women (BPW), a large national **[**4]** women's organization, retained a political consultant and consulting firm to advise the group on **[*292]** strategy for its efforts in support of ratification. The advice received was that a move by BPW, in conjunction with other national organizations, to cancel its national convention, scheduled for a state which had not ratified the ERA (Nevada), might be a powerful tool to influence legislators' votes on ratification. Also in April, 1975, the National Association of Women Deans, Administrators and Counselors adopted a resolution not to convene in unratified states. In May, 1975, the League of Women Voters adopted its resolution to urge the national political parties not to hold conventions in unratified states. Both BPW and the National Education Association took action in July, 1975, and resolved not to hold conventions in unratified states. The American Association of University Women passed its resolution in November, 1975. In September, 1976, the American Political Science Association adopted a similar resolution not to convene in unratified states. There is no evidence that any of these groups were contacted or influenced in any way by NOW. Some groups took this **[**5]** action believing that the convention boycott was an original idea. Others were aware that a convention boycott resolution had been adopted by another group or groups at an earlier time. Some groups made no effort to influence others to adopt boycott resolutions; some took active steps to communicate their decisions and to urge similar action by other groups.

The national NOW organization did not become involved with this movement until 1977. In January of that year, Eleanor Smeal, the current president of NOW, was in Nevada taking part in an effort to secure ratification of the ERA in the Nevada legislature. As a part of that effort, the League of Women Voters and the California state NOW organization sponsored an advertisement in the San Francisco Chronicle, a newspaper read by Nevada legislators, urging California residents to refrain from traveling to Nevada until that state ratified the ERA. From the reactions of the Nevada Governor and legislators to the advertisement, it was determined that the potential of such a boycott as long as a state remained unratified could have an effect on legislators' votes.

The then-president of NOW made telephone calls to members of several **[**6]** national organizations asking if any might be in a position to adopt and publicize a boycott resolution aimed at the state of Nevada in an effort to influence the upcoming vote on the ERA in the Nevada legislature. She discovered that it was difficult to secure immediate decisions due to the requirements of the formal decision-making processes in each group. As a result, before the Nevada legislature voted on the ERA, there was little activity of substance undertaken by NOW that was directed at a convention boycott of Nevada or other unratified states. The evidence shows that NOW officials were then of the impression that the convention boycott was an original idea and were unaware that some organizations had adopted boycott resolutions as much as one and one-half years earlier.

NOW adopted its own convention boycott resolution in February, 1977. At that February meeting, NOW decided to pursue a centralized convention boycott strategy. A committee was appointed to implement the new national strategy, but there is no evidence that much, if anything, was done in that regard during the first six months of 1977. NOW officers did complete studies of the legislative and political **[**7]** situation in each of the fifteen unratified states. Many organizations adopted convention boycott resolutions during the first half of 1977, but there is little evidence that NOW was actively soliciting such actions or coordinating a centralized convention boycott campaign during that period.

Dr. Frances Kolb was appointed to chair NOW's reconstituted Economic Sanctions Committee in July, 1977, after which NOW's role in furthering the convention boycott movement increased significantly. A paid staff person was retained by NOW in August, 1977, to work on the boycott campaign, among other things. Although there is evidence that much of the time of the individuals in question was expended to prepare for NOW's role in the International **[*293]** Women's Year meeting in Houston in November, 1977, NOW's active role in the convention boycott campaign began that summer.

As the parties have stipulated, from that time until the trial of this case in October-November, 1978, NOW actively engaged in an "economic boycott campaign" that has been a significant part of and shared common goals with a larger convention boycott movement directed at unratified states. The stipulated goal of NOW's **[**8]** economic boycott campaign and the end of all of NOW's activities relevant to this action is the ratification of the Equal Rights Amendment.

There are many facets to NOW's campaign. NOW set up a committee on the national level to centrally coordinate the convention boycott movement. For at least some period of time, NOW retained a full-time staff person to work on the boycott campaign. NOW sent a letter urging the adoption of a convention boycott resolution to hundreds of organizations and arranged for follow-up telephone contacts. NOW arranged for the printing and distribution of a boycott brochure [3.] which urges individuals to join the boycott campaign by working for a boycott resolution within their own organizations. This brochure incorporated a business reply card with which interested individuals could request further information on the boycott campaign. NOW also arranged for the manufacture of a campaign-style button identifying the wearer as a supporter of the convention boycott of unratified states.

[9]** NOW maintains an office in Washington, D. C., in which the mentioned boycott campaign work was done. The office served as a "clearinghouse" for information on the boycott. Individuals and groups were actively solicited to contact the NOW office for information and materials. For a period of time, NOW maintained a "Countdown House," utilizing a nationwide telephone campaign, in order to contact its local chapters concerning boycott activities and other projects. NOW officials and staff put together a "boycott kit" which was made available to individuals on request. In addition, this kit was sent to NOW members across the country who were taking leadership roles in local NOW activities. The kit contained various materials for use by individuals desiring to promote the boycott. [4.] NOW also prepared and distributed material suggesting that local governments be approached and urged to adopt boycott resolutions imposing limits on official travel to unratified states. This material contained tactical suggestions, including a sample resolution, whereby city and county legislators could be approached to solicit support for a boycott resolution. Materials provided to members of local **[**10]** NOW chapters also included tactical pointers for local boycott activities. Local chapters were urged to take an "inventory" of the organizational memberships of chapter members in order that local members could request boycott action of other organizations as members of those organizations and not as members of NOW.

Much of the boycott work carried on at NOW's Washington, D. C., office concerned NOW's effort to gather statistics on the boycott. NOW attempted to **[**11]** maintain an up-to-date list of organizations which had adopted a boycott resolution. It appears that maintenance of an accurate list was not a simple undertaking. The list required constant updating and checking for accuracy. Some of the information concerning **[*294]** boycott resolutions was provided to NOW as a result of NOW inquiries and general solicitation of information about the boycott; some was provided by groups or individuals on a completely voluntary basis. NOW took steps to ensure that the list of organizations was accurate. Procedures were adopted which required notification from an official of an organization and provided for subsequent telephone verification that an official action had been taken by a particular group. In addition to the list of organizations, NOW devised a statistical questionnaire which requested information on group size, convention attendance, and potential economic impact in terms of revenue loss due to a convention cancellation or site change.

NOW made a series of direct, personal contacts with many groups. Some of these personal contacts were part of specific assignments to NOW officials. Some of the contacts were more general in **[**12]** nature, consisting of telephone calls, letters, speeches, and personal appearances of NOW officials or members. Some personal contacts were directed specifically to the adoption of a boycott resolution; some were generally directed at generating support for the ERA, without specific mention of the boycott. NOW also made a concerted effort to generate media interest in the ratification effort generally and the convention boycott specifically. NOW officers arranged for press conferences, provided press releases to media, submitted to interviews, and made many personal appearances. NOW also included stories on the boycott in its internal publication, the National NOW

[3.] There were two printings of 20,000 copies each. Several thousand brochures were distributed at the International Women's Year Conference in Houston, Texas, in November, 1977. The small fraction of NOW's 1977 budget ($ 5,000) earmarked for the economic boycott campaign went mainly for printing expenses.

[4.] The kit contained the brochure and button described above, a list of the members of the national committee with their telephone numbers, a "guidelines for action" paper, a current list of organizations which had adopted a convention boycott resolution, a "position paper," a "boycott fact sheet," a list of convention changes, and a "contact sheet" listing the names and addresses of legislative leaders in unratified states. The boycott kit was not being distributed at time of trial because NOW officials found it to be prohibitively expensive.

Times, urging participation in boycott projects by local members. The attainment of extensive press coverage for NOW's boycott efforts was a critical part of the economic boycott campaign.

There is evidence that several of NOW's local chapters and individual NOW members carried out boycott projects of their own, in particular, active efforts to secure adoption of boycott resolutions by local governments. Although there is ample evidence to support a finding that NOW actively encouraged and aided such projects with **[**13]** materials and information, the parties have stipulated that NOW has no control or supervision over its local chapters, and that the local chapters are independent and autonomous and do not act as agents of NOW.

Although NOW's economic boycott campaign is a significant part of a larger convention boycott movement, it does not occupy the field. ERAmerica, a coalition of many pro-ERA groups, was formed as a neutral umbrella-type organization to provide leadership and coordination to the ERA ratification effort. Represented on the board of directors of ERAmerica are groups such as the National Education Association, the National Federation of Business and Professional Women, the National Womens' Political Caucus, the League of Women Voters, and the Coalition of Labor Union Women. ERAmerica has engaged in many of the same activities in support of the convention boycott as has NOW, including writing letters to organizations urging convention site changes away from unratified states, offering sample boycott resolutions, and keeping lists of organizations which have adopted such resolutions. [5.] There is evidence that NOW and ERAmerica exchanged information on a staff level relating to **[**14]** corrections in their respective lists of boycotting organizations; however, there is nothing to indicate that the two groups made any effort to coordinate their activities in support of the convention boycott. ERAmerica recognized NOW's organizational role in the boycott movement, but has pursued an essentially independent, though somewhat parallel, course of action.

There is evidence of at least one completely independent effort in support of the boycott movement. Several professional historians conducted their own campaign to influence historical associations to which **[*295]** they belonged. This campaign involved letter writing and the organization of a petition drive among association members, all at the personal expense of the **[**15]** individuals. There is no evidence that this individual campaign was a result of solicitation by or a combination or agreement with NOW or anyone else. [6.]

It is evident that even though NOW came to occupy what is perhaps the leadership role in the convention boycott movement, it was and still is one actor among many. The circumstances surrounding each convention cancellation in Missouri and the adoption of each convention boycott resolution are as varied as the number of organizations involved. Missouri alleges that these decisions were made "at the express urging" and "in combination with" NOW. In fact, NOW's influence in the decisions varied greatly. As discussed above, there were several large groups which made boycott decisions far in advance of the inception of NOW's economic boycott campaign, and which could not have been influenced in any way by NOW. On the other hand, there are groups **[**16]** which were the objects of direct and active solicitation by NOW, including letters, personal contacts, speeches, and telephone calls. In these situations, active solicitation by NOW was followed by a boycott decision. [7.]

There are other cases in which NOW's contacts with particular groups were of varying degree. Some groups adopting boycott resolutions were the recipients of a single letter as a part of a NOW mass mailing. Some groups were actively solicited by local NOW chapters, but had no contact whatever with NOW. Some groups were not contacted at all, but were influenced indirectly by NOW through **[**17]** the publicity surrounding the boycott movement and NOW's campaign. [8.] Resolutions adopted by some groups expressly refer to NOW or the "NOW

[5.] On February 8, 1977, ERAmerica released a list of 15 national organizations which had adopted boycott resolutions, erroneously including the National Organization for Women. This list reflects activity in the convention boycott movement long before NOW took any part.

[6.] On the contrary, the evidence shows that NOW did not even respond to correspondence from these individuals.

[7.] Groups in this category include the American Nurses Association (in relation to the convention of the International Congress of Nursing), the National Council of Senior Citizens, and the American Home Economics Association. However, there was evidence that many groups in this category were considering some sort of participation in the convention boycott movement before the initial contact from NOW.

boycott." It is clear that some were influenced by the number and type of organizations which had previously adopted resolutions. This lends importance to the influence of NOW's list of boycotting organizations and its broad publication.

The parties have stipulated that the goal of NOW's convention boycott campaign is the ratification of the ERA. A careful review of the entire record in this case confirms that no contrary finding is possible. The motivation of NOW and of the organizations involved in the boycott movement can be viewed from two points, both aimed directly at the legislative process. One reflects a desire of these groups to make a symbolic gesture. The evidence shows that the various decisions to encourage and to participate in the **[**18]** boycott were intended as demonstrations of support for ERA ratification. The affirmative step of a boycott resolution or convention cancellation, urged by NOW and taken by many organizations including NOW, was conceived to show strong support for a political issue, support of a nature beyond a simple expression of policy or preference. The other view of the intent behind the boycott movement concerns publicity. The public acts of these organizations were meant to attract attention and bring public visibility to the issue of ratification. This publicity was intended to engender discussion and lend an air of importance to the issue and to bring the question to a higher position among legislators' priorities. NOW and the other groups also intended that the adverse economic impact of the boycott on those who would otherwise profit from conventions in Missouri would cause those persons to influence their legislators to support ERA ratification. The record is convincing **[*296]** that the above-described actions were not intended as punitive, in the sense that the boycott was not intended to punish Missouri for its past failure to ratify but to promote ratification in the future, **[**19]** and were not motivated by any type of anticompetitive purpose.

NOW argues that the evidence is not sufficient to sustain a finding of combination or conspiracy within the meaning of *§ 1* of the Sherman Act. Assuming, Arguendo, that the above-described actions taken by NOW fall within the purview of the Sherman Act, there is sufficient evidence to justify a finding that NOW entered into a combination to implement a convention boycott of unratified states. It is clear that at least some of the decisions to boycott convention facilities of unratified states were taken in direct response to NOW's advocacy. In addition, the invitation to act, the presence of a strong motive for concerted action, and the knowledge that others were taking similar action are sufficient to find conspiracy under the *Sherman Act. Interstate Circuit, Inc. v. United States, 306 U.S. 208, 59 S. Ct. 467, 83 L. Ed. 610 (1939)*. [9.]

[20]** II. Standing [10.]

The State of Missouri asserts that it has standing to bring this action for injunctive relief as "Parens patriae, trustee, guardian and representative of its citizens and the economy of the State." [11.]

HN1[] The Supreme Court has settled that a state does have standing to sue under the antitrust laws to protect its quasi-sovereign interest in the well-being of its general economy and the welfare of its citizens. *Georgia v. Pennsylvania R. R., 324 U.S. 439, 65 S. Ct. 716, 89 L. Ed. 1051 (1945)*. This question of standing was reviewed in *Hawaii **[**21]** v. Standard Oil, 405 U.S. 251, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972)*, in which the Court held that Hawaii, as Parens patriae, could not recover damages for an injury to its economy under § 4 of the Clayton Act, *15 U.S.C. § 15*. However, state standing to obtain injunctive relief to remedy an injury to its economy was effectually reaffirmed when the Court distinguished as "notably different" § 4, which requires injury to "business or property" in

---

8. The convention boycott movement was the subject of a front page article in the New York Times on November 13, 1977.

9. It was enough that, knowing that concerted action was contemplated and invited, the distributors gave their adherence to the scheme and participated in it. Each distributor was advised that the others were asked to participate; each knew that cooperation was essential to successful operation of the plan.

Interstate Circuit, Inc. v. United States, supra, at 226, 59 S. Ct. at 474.

10. Because this substantial legal issue, raised in NOW's motion for summary judgment, was interposed so close to time of trial, this Court deferred its ruling until after the trial on the merits.

11. It is unnecessary to reach other grounds for standing asserted by Missouri.

order to recover damages, and § 16 of the Clayton Act, *15 U.S.C. § 26*, which authorizes injunctive relief upon a showing of "threatened loss or damage." [12.] Missouri brings this action under § 16.

At the pleading stage of this case, Missouri alleged substantial injury to **[**22]** the "economy and prosperity" of the state, which included financial loss suffered by convention and tourist-related businesses and diminished tax revenues for the state and local governments as a result of the lower level of economic activity within the state. The evidence revealed that more than ten major conventions definitely booked [13.] into Missouri cities have been cancelled as a result of the boycott movement. [14.] These cancellations represent a **[*297]** very approximate revenue loss of at least $ 8.6 million to Missouri hotels, restaurants and numerous other businesses catering to the convention trade. Although no revenue loss estimate was available, at least six smaller conventions, also definitely booked into Missouri hotels, have been moved to facilities in other states. A substantial amount of tentative convention business, perhaps exceeding the dollar volume of cancelled definite bookings, has also been moved to locations outside of Missouri. [15.] It is difficult to produce accurate estimates of revenue loss due to these cancellations because some of the conventions were scheduled to occur two or more years in the future. Obviously, the sales personnel in the convention **[**23]** and visitors bureaus and the affected hotels are and will be making efforts to rebook the previously reserved space with other conventions. There is evidence that some amount of such rebooking has taken place, which would reduce any estimate of revenue loss by the volume of the substituted business. The revenue loss equation, however, must include the consideration that most national conventions are booked from three to five years in advance, some as far as ten years in advance. It is difficult, therefore, to rebook a large block of space with another large convention, if given only one or two year's notice from the time of cancellation.

[24]** The lead time requirement for most national conventions adds an additional factor to the estimation of injury. Although Missouri businesses catering to conventions have already been harmed in some degree due to cancellations of definite convention bookings, the evidence shows that the impact of the convention boycott may be felt to a greater extent some years in the future. Decisions being made currently concern site selection for conventions to be held five or ten years in the future. At least the larger organizations have a limited time frame in which advance bookings can be made and once that time is past, the potential business is lost because an alternative site will have been selected. There may be no additional cancellations of definite bookings, but the refusal of the large number of boycotting groups to even Consider a Missouri convention site poses an undeniable threat of injury in the future.

The estimate of revenue loss due to the convention boycott published by NOW in January, 1978, listed revenue loss to St. Louis of $ 11 million and revenue loss to Kansas City of $ 8 million. [16.] The NOW list of boycotting organizations dated October 17, 1978, contains 273 organizations **[**25]** and independent decision-making components thereof and 34 city and county governments.

[12.] In holding that damage to a state's general economy is not an injury to its "business and property" necessary for recovery of damages under § 4, the Court contrasted the potential of multiple recoveries inherent to a Parens patriae damage claim with the unitary effect of an injunction.

[13.] In the parlance of the convention industry, a definite booking is the confirmation, probably in writing, of the official decision of the organization to designate a certain city or particular facilities for its meeting.

[14.] At least one of these cancellations, occurring in 1976, predated NOW's active role in the boycott campaign.

[15.] A tentative booking is notification from the organization that it is interested in particular facilities and constitutes a request that the space be reserved on a tentative basis pending an official decision. At this stage, the organization may tentatively book several locations, with the result that every tentative booking does not become a definite booking.

[16.] NOW's estimate represents revenue loss over the period 1978-1981 and does not include revenue loss resulting from the cancellation of the 1981 International Congress of Nursing convention in Kansas City, Missouri. That convention is estimated to represent.$ 3.2 million revenue to the convention site.

NOW argues that Missouri lacks standing as Parens patriae because the state seeks to represent the interests of a single industry, which is quite small in relation to Missouri's total economy, [17.] and which is capable of action in its own behalf to protect individual interests. [18.] NOW categorizes this case as one in which the interests of particular individuals are paramount, rather than one in which the interests of all the citizens of the State of Missouri are adversely affected, **[*298]** citing *Land O'Lakes Creameries, Inc. v. Louisiana State Board of Health, 160 F. Supp. 387 (E.D.La.1958)*. In that case, several **[**26]** Minnesota manufacturers of dried milk sued to overturn Louisiana milk labeling provisions. The Attorney General of Minnesota described the dairy industry as one which involves "a major economic activity of importance to the people of Minnesota" and sought leave to intervene as Parens patriae on behalf of all Minnesota dried milk producers not already party to the suit. The court denied the state's motion to intervene, taking judicial notice that the dairy industry was neither the only nor the largest industry in Minnesota.

[27]**

> The dairy industry statistics offered by Minnesota fail to demonstrate that the sale of dried milk is of such pervasive importance to that industry and to Minnesota citizens generally that restrictions on the interstate distribution of dried milk would directly and materially affect the "welfare of the people of Minnesota." Thus the interests of the single industry here involved must be held to be private interests, not interests affecting the whole economy or all of the people of the state. This type of interest is insufficient to give Minnesota the right to sue as Parens patriae in behalf of all, or a substantial number of her citizens. *Id. at 389*.

It is NOW's argument that the facts before this Court are analogous to those in Land O'Lakes Creameries; that Missouri's suit is for the benefit of individual interests rather than for the benefit of all the people of the state and that therefore the state lacks standing as Parens patriae. [19.]

[28]** Over NOW's strong relevancy objection, Missouri offered the testimony of an expert economist to illustrate (1) that the injury resulting from the boycott is not confined to a narrowly defined convention industry, but cuts across the entire economy of the state, and (2) that the magnitude of the injury to the general economy is much greater than the figures contained in the estimates of revenue loss to convention businesses. The economy of a political region, such as the State of Missouri, has been divided by economists into various sectors for the purpose of analysis. [20.] The economic units (businesses and individuals) that make up each sector produce output which is exchanged with other sectors to obtain necessary inputs. These economic linkages between and among the various sectors are a primary cause of the interdependence which characterizes the complex state of a modern economy. There is evidence that the dollars spent by the average convention delegate flow fairly directly into thirteen sectors of the economy of the convention site. [21.] However, the linkages between the sectors receiving convention dollars and other sectors operate to move that money through all the sectors, **[**29]** with the result that dollars spent by convention delegates affect Every sector in the economy of the convention site. As convention dollars move through the economy, each turnover between sectors generates new dollars of business income in a

---

[17.] It is NOW's position that whatever injury has been proved is insignificant if compared with the dollar volume of all economic activity within the state of Missouri. In 1977, the convention industry brought $ 183 million in revenue to the state. Total personal income in Missouri in 1977 was in the neighborhood of $ 25 billion.

[18.] See Action Committee for Tourism, Inc. v. National Organization for Women, Inc., Civil Action No. 78-1510 (E.D.La., filed May 6, 1978) (suit with issues common to this case brought by private interests).

[19.] See *Oklahoma v. Atchison, T. & S. F. Ry., 220 U.S. 277, 31 S. Ct. 434, 55 L. Ed. 465 (1911)*; *Kansas v. United States, 204 U.S. 331, 27 S. Ct. 388, 51 L. Ed. 510 (1907)*.

[20.] E.g., livestock, textiles and apparel, primary metals, household appliances, heavy construction contractors, etc. There are over 50 such sectors.

[21.] Sectors receiving convention dollars are hotels, eating and drinking places, meat processing, dairy products, grain mill products, other food products, gasoline service stations, other retail businesses, miscellaneous manufacturing, transportation services, other services, wholesale businesses, and imports. International Association of Convention and Visitors Bureaus, Convention Delegate Expenditure Survey 1973 (sector classifications were modified to comport with the analytical model of Missouri's expert witness).

phenomenon known as the "multiplier effect." Economists have calculated multiplier figures that measure the flow of dollars into the economy and the successive turnover of those dollars into new business income until the identifiable dollars finally disappear. Using multiplier figures for the Missouri economy, it has been calculated that every dollar spent by people attending **[*299]** conventions in Missouri generates $ 2.78 in spending throughout the economy of the State of Missouri.

[30]** Missouri thus argues that, as convention spending affects all sectors of the economy, the withdrawal of convention dollars from Missouri has an adverse effect on All sectors of Missouri's economy. Missouri also urges consideration of the economic Effect of the withdrawal of convention dollars, after application of the multiplier figure. Missouri maintains that the thus broadened base of incidence of injury (every economic sector affected) coupled with a consideration of the magnitude of its economic Effect (post-multiplier) is sufficient to constitute an injury to the "general economy" of the state. The state, says Missouri, should have standing as Parens patriae to remedy such injury.

The question thus presented to this Court is whether an economic injury of the type and extent as has been proved by the State of Missouri is sufficient to confer upon it standing as Parens patriae. It is a question not likely to produce an easy answer. The District of Columbia Circuit considered the problem in *Pennsylvania v. Kleppe, 174 U.S.App.D.C. 441, 447-48, 533 F.2d 668, 674-75*, Cert. denied sub nom. *Pennsylvania v. Kobelinski, 429 U.S. 977, 97 S. Ct. 485, 50 L. Ed. 2d 584 (1976).*

> **[**31]**
> The nature of the economic or welfare interest necessary to justify state standing is one of the more obscure issues with which we must deal. The valid though largely unhelpful generality which guides us is that the controversy must in substance implicate the state's interest in economic supervision, and not merely affect the fortunes of a limited class of her citizens. However, in view of the substantial interrelationship of all economic activity, no clear demarcation is possible between individualized harms and injury to the economy as a whole. This appears to be one area where the sufficiency of the injury actually alleged is highly contingent upon other relevant factors bearing on the appropriateness of letting the plaintiff state pursue the case on the merits.
>
> At one extreme, it is entirely clear that a state never has standing on the basis of personal claims assigned to it by individuals. It also seems well established that there can be no standing in the state where the primary thrust of an alleged wrong is injury to a narrowly limited class of individuals, and the harm to the economy as a whole is insignificant by comparison. However, in some cases, it has been **[**32]** held sufficient that the direct impact of the alleged wrong be felt by a substantial majority, though less than all, of the state's citizens, so that the suit can be said to be for the benefit of the public. And even where the most direct injury is to a fairly narrow class of persons, there is precedent for finding state standing on the basis of substantial generalized economic effects.
> It thus appears that injury to the state's economy or the health and welfare of its citizens, if sufficiently severe and generalized, can give rise to a quasi-sovereign interest in relief as will justify a representative action by the state. The cases indicate not only that the nature and degree of essential harm cannot be characterized with any precision, but that factors other than the degree of injury are influential in determining state standing. . . . It Also appears that the sufficiency of the state interest asserted may sometimes be influenced by policy concerns arising from the context of the suit quite apart from the injury itself. (emphasis added)

This Court is convinced that Parens standing is not foreclosed simply because the most direct injury is suffered by a rather narrow **[**33]** class of individuals. NOW argues that the businesses that have been injured are capable of bringing suit to protect their individual interests and thus there is no justification for intervention by the state as Parens patriae, citing *Oklahoma v. Atchison, Topeka & Santa Fe Ry., 220 U.S. 277, 31 S. Ct. 434, 55 L. Ed. 465 (1911)*. In *Burch v. Goodyear Tire Co., 420 F. Supp. 82 (D.Md.1976)*, *Aff'd, 544 F.2d 633 (4th Cir. 1977)*, the Attorney General of Maryland **[*300]** brought suit for injunctive relief under § 16 of the Clayton Act. It was alleged that Goodyear and Cities Service Oil Company had combined to restrain competition among tire manufacturers and foreclose competition in the tire replacement market, which consisted of individual Cities Service service station dealers. Goodyear argued that the suit was for the benefit of the individual service station dealers and that therefore the state lacked standing as Parens. The district court, later affirmed by the Fourth Circuit, rejected that argument and distinguished *Oklahoma v. Atchison, Topeka & Santa Fe Ry., supra*, as it involved a direct monetary benefit to the "individual" being represented by the state. The district court **[**34]** in Burch noted that there was no claim by Goodyear that the individual service station dealers would receive any monetary gain as a result of the suit and held that the state did have standing to sue.

> Any suit by a state on behalf of its citizens as a whole will benefit some of its citizens more than others. . . . The premise of the antitrust laws is that an anticompetitive injury felt acutely by a few is also an injury to the commonweal. The fact that some will benefit more than others is not a barrier to maintenance of this lawsuit. *Burch v. Goodyear Tire & Rubber Co., supra, at 89*.

The facts in Burch are analogous to this case inasmuch as there is no claim by NOW that any of the businesses that make up the convention industry in Missouri will receive any monetary benefit as a result of this lawsuit.

As a part of the reasoning process to determine whether a state will be recognized to have standing as Parens patriae, courts have had the occasion to consider factors other than the type and extent of injury involved. In Pennsylvania v. Kleppe, quoted Supra, the court referred to and considered "policy concerns arising from the context of the suit quite apart from the **[**35]** injury itself." NOW cites Land O'Lakes Creameries, in which the court found the interests involved to be private and denied state standing as Parens patriae. However, removed from its analysis of the Type of injury alleged, the district court in that case noted that it considered "the advisability of allowing the Attorney General of Minnesota to range at large in courts of other states, and of the United States, seeking to have declared unconstitutional laws passed by the legislatures of those states." *Id. at 390*. Indeed, the issue of Parens patriae standing has been most often litigated in the context of an assertion of the original and nonexclusive jurisdiction of the Supreme Court. It is undeniable that such cases "do not present an isolated question" and may "involve the concern to shepard the scarce time and resources of that tribunal." *Pennsylvania v. Kleppe, supra, 174 U.S.App.D.C. at 447 n.36, 533 F.2d, at 674 n.36*. See, e.g., *Pennsylvania v. New Jersey, 426 U.S. 660, 665, 96 S. Ct. 2333, 49 L. Ed. 2d 124 (1976)*. This court has found that the businesses of Missouri's convention industry have suffered economic injury as a result of the boycott and are threatened with additional **[**36]** injury in the future. Although the dollar volume of that injury is a small relative proportion of the entire Missouri economy, the injury is not insubstantial in the absolute. The adverse effect of the injury extends to all parts of the economy of the state. After having considered the nature and the extent of the injury to the economy of Missouri, this Court is compelled to turn to the additional factors and policy concerns mentioned in *Pennsylvania v. Kleppe and Land O'Lakes Creameries, supra.*

It has been remarked that this case has no precedent; that it presents a unique set of circumstances not before determined in any other court. That fact weighs as heavily in that balance on the issue of standing as it does on the merits. The parties stipulate that the aim of the boycott is to secure ratification of the Equal Rights Amendment. All of the boycott activity undertaken by NOW insofar as it has affected the State of Missouri, has been directed toward securing an act of the Missouri General Assembly. NOW's target, if such a word can be used, is the state legislature, **[*301]** the supreme policy-making body of the state. The State of Missouri as a political entity is as **[**37]** much a part of the underlying controversy as is Missouri a formal party to the lawsuit. In this unique set of circumstances, after giving full consideration to the type and extent of general economic injury suffered, this Court is drawn to the conclusion that it is appropriate that the State of Missouri have standing as Parens patriae to pursue this matter on the merits and seek injunctive relief under the antitrust laws. The Court is of the opinion that this is not a case "in which the state is gratuitously attempting to prosecute purely personal claims of its citizens, . . . but rather is one in which the state is seeking to protect the public interest." *Kelley v. Carr, 442 F. Supp. 346, 357 (W.D.Mich.1977)*.

It must be noted that this conclusion is the result of a consideration of the economic and policy factors in this case. This opinion is not to be read as a general approval of Parens patriae standing as a matter of law in any case in which the state adduces expert testimony to show generalized economic injury due to linkage or interdependence among the various sectors of the state's economy. [22.]

[38]** III. Antitrust Claims

HN2[] "Boycott" has been defined as "a method of pressuring a party with whom one has a dispute by withholding, or enlisting others to withhold, patronage or services from the target." *St. Paul Fire & Marine Insurance Co. v. Barry, 438 U.S. 531, 541, 98 S. Ct. 2923, 2930, 57 L. Ed. 2d 932 (1978)*. From the very beginning of antitrust enforcement, the boycott or concerted refusal to deal has been held to be a combination in restraint of trade, in violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1*. E.g., *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*; *Fashion Originators' Guild v. F.T.C., 312 U.S. 457, 61 S. Ct. 703, 85 L. Ed. 949 (1941)*; *Eastern States Retail Lumber Dealers' Association v. United States, 234 U.S. 600, 34 S. Ct. 951, 58 L. Ed. 1490 (1914)*. Missouri contends that the convention boycott fostered by NOW is a combination in restraint of trade and as such violates the Sherman Act. [23.]

[39]** It is NOW's position that the antitrust laws simply do not apply to the convention boycott because of its "noncommercial" nature. [24.] **[**40]** "(T)he Act is aimed primarily at combinations having commercial objectives and is applied only to a very limited extent to organizations, like labor unions, which normally have other objectives." *Klor's, Inc. v. Broadway-Hale Stores, Inc., supra, 359 U.S. at 213 n.7, 79 S. Ct. at 710 n.7*. NOW argues that the convention boycott takes place in a political, rather than business, context and thus is outside the scope of the Sherman Act, [25.] which was intended **[*302]** to concern "commercial enterprises, competing in particular markets, arguing over issues which will determine the commercial success and profitability of one or the other of the parties to the dispute." *Council for Employment and Economic Energy Use v. WHDH Corp., 580 F.2d 9, 12 (1st Cir. 1978)*, cert. denied, *440 U.S. 945, 99 S. Ct. 1421, 59 L.Ed.2d 633 (1979)*.

[22.] NOW argues that "acceptance of the state's theory (of economic linkage causing damage to the general economy) would give the state standing to sue in every case where any Missouri business claims injury by reason of any tort, including violations of antitrust laws, or presumably even in ordinary breach of contract cases." Defendant's post-trial brief, at 10. The Court shares this concern and notes that the economic interdependence rationale for Parens patriae standing cannot be viewed in isolation or accepted as the sole justification for state standing. To do so would carry the doctrine of Parens patriae far beyond its proper bounds.

[23.] Missouri further argues that withholding patronage from Missouri convention businesses in order to influence the Missouri legislature constitutes a secondary boycott, I. e., economic pressure on innocent third parties to achieve some result with respect to the boycott target, and therefore is Per se unlawful under the Sherman Act. See *Klor's, Inc. v. Broadway-Hale Stores, Inc., supra*; *Fashion Originators' Guild v. F.T.C., supra.*

[24.] See *Apex Hosiery Co. v. Leader, 310 U.S. 469, 493 n.5, 60 S. Ct. 982, 84 L. Ed. 1311 (1940)* (Sherman Act intended to control problems of "business competition").

[25.] Missouri cites cases for the proposition that the Sherman Act does apply to "non-traditional" boycotts, the ultimate focus of which is an objective other than the business or commercial advancement of the participants. *American Medical Assoc. v. United States, 317 U.S. 519, 63 S. Ct. 326, 87 L. Ed. 434 (1943)* (exclusion from hospital facilities of doctors on salary with prepaid group health plan); *Hennessey v. National Collegiate Athletic Assoc., 564 F.2d 1136 (5th Cir. 1977)* (application of Sherman Act to regulation of non-profit educational association limiting the number of assistant football coaches of member institutions); *Council of Defense v. International Magazine Co., 267 F. 390 (8th Cir. 1920)* (boycott of Hearst publications organized by officially-supported state organization); *Tondas v. Amateur Hockey Assoc., 438 F. Supp. 310 (W.D.N.Y.1977)* (non-profit athletic association); *Tropic Film Corp. v. Paramount Pictures Corp., 319 F. Supp. 1247 (S.D.N.Y.1970)* (film rating program); *American Brands, Inc. v. National Assoc. of Broadcasters, 308 F. Supp. 1166 (D.D.C.1969)* (guidelines prohibiting advertising of "low tar" cigarettes). But cf. *Marjorie Webster Junior Colleges, Inc. v. Middle States Assoc. of Colleges and Secondary Schools, Inc., 139 U.S.App.D.C. 217, 432 F.2d 650*, Cert. denied, ***400 U.S. 965, 91 S. Ct. 367, 27 L. Ed. 2d 384 (1970)***.

[41]** In *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*, the Supreme Court considered the scope of the Sherman Act in a political context. In that case, the railroads conducted a publicity campaign designed to promote stricter government regulation of the trucking industry. The campaign, utilizing methods characterized as unethical, was motivated by a purely anticompetitive purpose. Citing *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*, the Court reiterated that a restraint of trade resulting from a valid government action could not be the basis of a Sherman Act violation and stated:

> We think it equally clear that the Sherman Act does not prohibit two or more persons from associating together in an attempt to persuade the legislature or the executive to take particular action with respect to a law that would produce a restraint or a monopoly. Although such associations could perhaps, through a process of expansive construction, be brought within the general proscription of "combination(s) . . . in restraint of trade," they bear little if any resemblance to the combinations normally held **[**42]** violative of the Sherman Act, combinations ordinarily characterized by an express or implied agreement or understanding that the participants will jointly give up their trade freedom, or help one another to take away the trade freedom of others through the use of such devices as price-fixing agreements, boycotts, market-division agreements, and other similar arrangements. This essential dissimilarity between an agreement jointly to seek legislation or law enforcement and the agreements traditionally condemned by *§ 1* of the Act, even if not itself conclusive on the question of the applicability of the Act, does constitute a warning against treating defendants' conduct as though it amounted to a common-law trade restraint. And we do think that the question is conclusively settled, against the application of the Act, when this factor of essential dissimilarity is considered along with the other difficulties that would be presented by a holding that the Sherman Act forbids associations for the purpose of influencing the passage or enforcement of laws.
>
> In the first place, such a holding would substantially impair the power of government to take actions through its legislature **[**43]** and executive that operate to restrain trade. In a representative democracy such as this, these branches of government act on behalf of the people and, to a very large extent, the whole concept of representation depends upon the ability of the people to make their wishes known to their representatives. To hold that the government retains the power to act in this representative capacity and yet hold, at the same time, that the people cannot freely inform the government of their wishes would impute to the Sherman Act a purpose to regulate, not business activity, but political activity, a purpose which would have no basis whatever in the legislative history of that Act. Secondly, and of at least **[*303]** equal significance, such a construction of the Sherman Act would raise important constitutional questions. The right of petition is one of the freedoms protected by the *Bill of Rights*, and we cannot, of course, lightly impute to Congress an intent to invade these freedoms. Indeed, such an imputation would be particularly unjustified in this case in view of all the countervailing considerations enumerated above. For these reasons, we think it clear that the Sherman Act does not **[**44]** apply to the activities of the railroads at least insofar as those activities comprised mere solicitation of governmental action with respect to the passage and enforcement of laws. *Id., 365 U.S. at 136-38, 81 S. Ct. at 529-530*. (emphasis added)

The Court found that the anticompetitive purpose underlying the railroads' campaign was irrelevant, in that the right of the people to inform their representatives could not depend upon their intent in so acting. The unethical and misleading methods employed by the railroads also were found not to be a basis for Sherman Act liability.

> Insofar as the Act sets up a code of ethics at all, it is a code that condemns trade restraints, not political activity, and, as we have already pointed out, a publicity campaign to influence governmental action falls clearly into the category of political activity. The proscriptions of the Act, tailored as they are for the business world, are not at all appropriate for application in the political arena. Congress has traditionally exercised extreme caution in legislating with respect to problems relating to the conduct of political activities, a caution which has been reflected in the decisions of **[**45]** this Court interpreting such legislation. All of this caution would go for naught if we permitted an extension of the Sherman Act to regulate activities of that nature simply because those activities have a commercial impact and involve conduct that can be termed unethical. *Id. at 140-41, 81 S. Ct. at 531*.

Missouri's analysis would limit the Court's holding in Noerr to its facts and distinguish that case from this. The convention boycott fostered by NOW, it is argued, is the very antithesis of the activity protected in Noerr. The Court in Noerr found that concerted activity to influence the legislature to adopt a law which would result in a restraint of trade was not a Sherman Act violation. The restraint of trade in Noerr was the result of a valid legislative act, already held nonviolative of the Sherman Act in *Parker v. Brown, supra.* On the contrary, says Missouri, the restraint of trade in this case is a direct result of the concerted action undertaken by NOW and the boycott participants; the harm results from the combination, and not from the legislative act which is the boycott's ultimate goal. Missouri states that NOW's actions have gone far beyond the "mere solicitation **[**46]** of government action" in *Noerr, supra*, and are therefore not within the Noerr "exclusion" from antitrust coverage.

Missouri's conclusion of antitrust liability is based on the presumption against implied exclusions from the Sherman Act. In *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)*, the Court referred to the "overarching and fundamental" policies represented in the antitrust laws which argue against implied exclusions. The Court noted that two policies have been held sufficiently weighty to overcome this presumption: the Parker v. Brown "state action" exclusion, and the Noerr "political" exclusion, concerted action to influence lawmakers. The Court found common to both of these exclusions a potential conflict between the Sherman Act and " "policies of signal importance in our national traditions and governmental structure of federalism.' " However, the Court did remark that even these exclusions would not prevent antitrust enforcement unless it was thought to "severely impinge" upon the fundamental policies underlying the exclusions.

Missouri argues specifically against a general "*first amendment* exclusion" from Sherman **[**47]** Act coverage. In *Giboney v. Empire Storage & Ice Co., 336 U.S. 490, 69 S. Ct. 684, 93 L. Ed. 834 (1949)*, the Supreme Court held that the *first amendment* does not protect speech or writing used as an integral part of conduct in violation of a **[*304]** valid criminal statute. Missouri cites cases applying this principle to Sherman Act enforcement. *National Society of Professional Engineers v. United States, 435 U.S. 679, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*; *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*; *Associated Press v. United States, 326 U.S. 1, 65 S. Ct. 1416, 89 L. Ed. 2013 (1945)*. These cases hold that conduct found to be in violation of the Sherman Act is not immunized from antitrust liability simply because it involves some element of speech. "*First Amendment* rights may not be used as the means or the pretext for achieving "substantive evils' . . .." *California Motor Transport Co. v. Trucking Unlimited, supra, 404 U.S. at 515, 92 S. Ct. at 614*. However, they do not touch the issue in this case, which is whether NOW's actions, which are themselves an exercise of *first amendment* rights, constitute a violation **[**48]** of the Sherman Act. [26.]

[49]** The activities of the railroads complained of in *Noerr, supra*, were undertaken in what was essentially a commercial context. The parties and the industries they represented were in a competitive relationship. It was clear that the sole motivation behind the railroads' actions was to destroy that competition. Although such a commercial setting is the context in which the antitrust laws were intended to operate, the Supreme Court found that the railroads' publicity campaign was not subject to the Sherman Act, as a contrary construction would hinder the communication vital to a representative government and raise important constitutional questions implicating the *first amendment*.

In contrast, the convention boycott complained of in this case takes place in what is essentially a political context. The parties have stipulated that the sole purpose of the boycott is ratification of an amendment of the Constitution. The participants are not moved by any anticompetitive purpose; [27.] they are not in a competitive relationship. The

---

26. *Council of Defense v. International Magazine Co., 267 F. 390 (8th Cir. 1920)*, cited by Missouri, is not to the contrary. The Eighth Circuit found that a boycott of Hearst magazines organized by a state-supported organization was a violation of the Sherman Act. The court stated: "Any contention that appellants were within their constitutional rights of free speech in saying, writing, and publishing the objectionable matter, is answered by *Gompers v. Buck Stove Co., supra.*" In *Gompers v. Bucks Stove & Range Co., 221 U.S. 418, 31 S. Ct. 492, 55 L. Ed. 797 (1911)*, the *first amendment* question raised was identical to that in *Giboney v. Empire Storage & Ice Co., supra*, in which the Court held that an otherwise illegal action is not protected simply because speech is used to advance the illegal activity. The *first amendment* protections for freedom of petition and of political association, which are implicit in this case, were neither presented to nor treated by the court in Council of Defense.

boycott can be characterized as "non-commercial," in that its participants are not business interests and its purpose is not increased profits. [28.] The boycott **[**50]** also can be termed "noneconomic"; it was not undertaken to advance the economic self-interest of the participants. The "essential dissimilarity" between the convention boycott directed at the legislatures of unratified states and agreements traditionally held violative of *§ 1* of the Sherman Act is of a greater magnitude in this case than that in Noerr.

Application of the Sherman Act to NOW's boycott campaign also would involve serious questions concerning the right of petition and the freedom of association protected by the *first amendment*. [29.] **[**52]** In Noerr the Supreme Court "recognized a necessary limitation in order to resolve the conflict between the legislative intent to foster competition and the fundamental **[**51]** precepts embodied in the *First Amendment* which protect legitimate attempts to influence the operation of the executive and **[*305]** legislative process." *Bethlehem Plaza v. Campbell, 403 F. Supp. 966, 969 (E.D.Pa.1975)*. [30.] The Supreme Court's reasons for nonapplication of the antitrust laws in Noerr apply with greater weight to this case, which "involves political opponents, not commercial competitors; and political objectives, not market place goals. [31.] For these reasons, this Court concludes that the Sherman Act does not apply to the actions of NOW in furtherance of its convention boycott campaign. [32.] "There are areas of our economic and political life in which the precepts of antitrust must yield to other social values." [33.] **[**53]** It is clear that this is such a case. [34.] Likewise, the Missouri ***antitrust law***, *§ 416.031.1, RSMo*, does not apply to NOW's activities in furtherance of the boycott campaign. [35.]

32. This Court has considered and dismissed the theory advanced in Bird, Sherman Act Limitations on Noncommercial Concerted Refusals to Deal, 1970 Duke L.J. 247, in which the author urges that noncommercial boycotts be treated as Per se unlawful under the antitrust laws. The noncommercial boycott is seen as an "undesirable aggregation of private (economic) power" with no more than self-imposed restraints on harm caused to others. The author hypothesizes that such power could be wielded by zealous believers willing to impose economic harm upon their victims without limit until their noneconomic goal is achieved. This theory does not confront the *first amendment* guarantees of freedom of association and the right to petition which must be dealt with by the courts. This lack, coupled with the political realities of American government, makes it impossible for this Court to subscribe to it.

33. Handler, Annual Review of Antitrust Developments, 71 Yale L.J. 75, 88 (1961).

34. See *Mark Aero, Inc. v. Trans World Airlines, Inc., 580 F.2d 288 (8th Cir. 1978)*; *Metro Cable Co. v. CATV of Rockford, Inc., 375 F. Supp. 350 (N.D.Ill.1974)*, *Aff'd, 516 F.2d 220 (7th Cir. 1975)*; Kestenbaum, The Antitrust Challenge to the Arab Boycott, 54 Tex.L.Rev. 1411, 1423-24 (1976).

35. *Section 416.141, RSMo*, provides: "Sections 416.011 to 416.161 shall be construed in harmony with ruling judicial interpretations of comparable federal antitrust statutes."

Missouri alleges that NOW has intentionally inflicted economic harm upon the state without legal justification or excuse, and offers as authority § 766 of the Restatement of Torts (1939). [36.] **[**55]** That section provides that the unprivileged inducement of third parties not to engage in business relations with another is tortious. Missouri courts have stated that the unjustified interference with reasonable expectancies of commercial relations is an actionable tort, citing § 766 of the Restatement. *Downey v. United Weatherproofing, Inc., 363 Mo. 852, 253 S.W.2d 976 (Mo.1953)*. The absence of justification, **[**54]** or existence of privilege, is an essential and required element of any such claim. *Cady v. Hartford Accident & Indemnity Co., 439 S.W.2d 483 (Mo.1969)*. [37.] In this case economic pressure is being utilized in a good faith effort to influence the ratification of an amendment to the Constitution. In these circumstances, the interest sought to be advanced by NOW and especially the constitutional interests involved in protecting NOW's ability to exercise its **[*306]** right to petition and right to political association outweigh the interest in protecting the business expectancy involved. [38.] If NOW's actions were not a legitimate effort to influence the legislature, this Court would be presented with a different case. [39.] Under the particular facts of this case, the Court finds that NOW's convention boycott activities are privileged and therefore not actionable in tort under Missouri law.

[56]** Accordingly, the relief prayed for by the State of Missouri should be, and it is hereby, denied. In accordance with this opinion, judgment is to be entered for defendant.

IT IS SO ORDERED.

End of Document

[36.] ***Restatement of Torts § 766*** provides:

Except as stated in Section 698, (dealing with interference with a marriage contract) one who, without a privilege to do so, induces or otherwise purposely causes a third person not to

(a) perform a contract with another, or

(b) enter into or continue a business relation with another is liable to the other for the harm caused thereby.

Missouri cites no cases from its own courts on this issue.

[37.] Factors applicable to the determination of justification or privilege are set out in ***Restatement of Torts § 767*** (1939):

In determining whether there is a privilege to act in the manner stated in § 766, the following are important factors:

(a) the nature of the actor's conduct,

(b) the nature of the expectancy with which his conduct interferes,

(c) the relations between the parties,

(d) the interest sought to be advanced by the actor, and

(e) the social interests in protecting the expectancy on the one hand and the actor's freedom of action on the other hand.

The discussion of privilege in the Restatement, including §§ 767 and 768, is referred to in *Downey v. United Weatherproofing, supra.*

[38.] See *Sierra Club v. Butz, 349 F. Supp. 934 (N.D.Cal.1972)* (recognition of privilege based on *first amendment* right of petition).

[39.] See *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)* ("sham" exception); *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 144, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*.

HN1[] Injunctions, Preliminary & Temporary Injunctions

Fed. R. Civ. P. 65 provides that an injunction is binding upon the parties to an action, their officers, agents, servants, employees, and attorneys, and upon those persons in active concert or participation with them who receive actual notice of the order by personal service or otherwise.

Civil Procedure > ... > Discovery > Methods of Discovery > Stipulations

HN2[] Methods of Discovery, Stipulations

When the parties to an action agree that an evidentiary hearing need not precede resolution of a motion filed in the action, no evidentiary hearing is required.

Civil Procedure > Preliminary Considerations > Equity > Adequate Remedy at Law

Civil Procedure > Preliminary Considerations > Equity > Irreparable Injury

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Evidence > Burdens of Proof > General Overview

HN3[] **Equity, Adequate Remedy at Law**

Under Sonesta International Hotels Corp. v. Wellington Associates, a preliminary injunction should issue only upon a clear showing of either: (1) probable success on the merits and possible irreparable injury; or (2) sufficiently serious questions going to the merits to make them a fair ground for litigation and a balance of hardships tipping decidedly toward the party requesting the preliminary relief. It has been held, however, that irreparable injury is required under both prongs of the test, such being a fundamental and traditional requirement of all preliminary injunctive relief, since equity cannot intervene where there is an adequate remedy at law. That said, the balancing of hardships test necessarily includes the showing of irreparable harm.

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Civil Procedure > Remedies > Injunctions > Preliminary & Temporary Injunctions

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN7[] **Practices Governed by Per Se Rule, Boycotts**

In antitrust actions, the per se rule respecting boycotts applies only where competitors engage together to inhibit others with whom they compete by depriving those others of elements needed in the competitive context.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The United States Supreme Court has held that under the Sherman Act, any agreement by a group of competitors to boycott a particular buyer or group of buyers is illegal per se. and that whatever other characterizations are possible, a petitioner's conduct may be viewed as "an organized boycott" if it induces its competitors to refuse to deal on any terms with its customers.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN9[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

When viewing an agreement in an antitrust action in the light of the rule of reason, the decisive issue is whether the challenged agreement is one that promotes competition or one that suppresses competition. Crucial to such evaluation is inquiry into the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed, to the end that the court may form a judgment about the competitive significance of the restraint. Thus, the court must ultimately analyze the purpose and effect of the agreement and determine whether on balance its anticompetitive effects outweigh its pro-competitive benefits.

Antitrust & Trade Law > ... > Monopolies & Monopolization > Attempts to Monopolize > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Monopolies & Monopolization, Attempts to Monopolize**

Combinations are no less unlawful because they have not as yet resulted in restraint. An agreement or combination to follow a course of conduct that will necessarily restrain or monopolize a part of trade or commerce may violate the Sherman Act, whether it be wholly nascent or abortive on the one hand, or successful on the other.

Opinion by: HAIGHT

Opinion

[*666] MEMORANDUM OPINION

This is an antitrust case brought by the North American Soccer League ("NASL") and 21 of its member clubs against the National Football League ("NFL") and 25 of its member clubs to test the legality under the Sherman Act, *15 U.S.C. § 1 Et seq.*, of a proposed amendment to the NFL's constitution and by-laws implementing a "cross-ownership ban." The amendment, if enacted, would prevent the owner of a majority interest in an NFL club, or a member of his family, from acquiring any interest in another major team sport. To the extent that such cross-ownership presently exists, the amendment mandates divestiture, and imposes fines and other sanctions for non-compliance within the time specified. Plaintiffs assert their complaint under *Sections 4* and 16 of the Clayton Act, *15 U.S.C. §§ 15* and *26*, and *28 U.S.C. § 2201*. They claim injunctive and declaratory relief, and treble money damages. Jurisdiction **[**2]** is posited upon *28 U.S.C. §§ 1331* and *1337*, and venue asserted under *28 U.S.C. § 1391* and *Sections 4* and 12 of the Clayton Act, *15 U.S.C. §§ 15* and *22*. Plaintiffs now move pursuant to *Rule 65, F.R.Civ.P.* and Section **[*667]** 16 of the Clayton Act, *15 U.S.C. § 26*, for a preliminary injunction restraining enactment of the amendment. Because plaintiffs have made the requisite showing for such relief, the injunction will issue.

I.

Preliminarily, we note that a number of the defendant NFL clubs have by their answers contested the Court's jurisdiction over their persons. Whatever the merits of those assertions and the jurisdictional issue is not pressed on this motion it is clear that a preliminary injunction, if otherwise appropriate, would not be inhibited. The NFL does not contest In personam jurisdiction. *Rule 65* ***HN1***[] provides that an injunction is binding:

> " . . . upon the parties to the action, their officers, agents, servants, employees, and attorneys, and upon those persons in active concert or participation with them who receive actual notice of the order by personal service or otherwise."

All member clubs of the NFL are by definition "in active concert or participation **[**3]** with" the League they formed to conduct their joint affairs. There is, in short, the requisite showing of privity. *Golden State Bottling Co. v. National Labor Relations Board, 414 U.S. 168, 179-180, 94 S. Ct. 414, 38 L. Ed. 2d 388 (1973)*; *Hart v. Community School Board of Brooklyn, N. Y. School District No. 21, 383 F. Supp. 699, 753 (E.D.N.Y.1974)*, Appeal dismissed, *497 F.2d 1027 (2d Cir. 1974)*; 7 Moore's Federal Practice P 65.13 (2d ed. 1978). No difficulty in notifying the NFL member clubs of the Court's order need be anticipated.

II.

Plaintiffs move for a preliminary injunction, prohibitory in nature, to prevent the NFL and its member clubs from enacting a particular amendment to the NFL constitution and by-laws. The record on the motion consists of the pleadings, affidavits and exhibits. Two oral arguments have been heard, the first shortly after service of the motion and the second after filing of extensive and able briefs. While discovery is proceeding on the merits, both plaintiffs and defendants stated that an evidentiary hearing need not precede resolution of the present motion. ***HN2***[] In these circumstances no evidentiary hearing is required. *Jacobson & Co., Inc. v. Armstrong* ***[**4]*** *Cork Co., 548 F.2d 438, 442 (2d Cir. 1977)*.

The showing a plaintiff must make to obtain a preliminary injunction has been the subject of a number of recent Second Circuit decisions, not all of them entirely reconcilable. For a time *Sonesta International Hotels Corp. v. Wellington Associates, 483 F.2d 247, 250 (2d Cir. 1973)* appeared to declare a two-pronged test as the rule of the Circuit:

> "The settled rule is that ***HN3***[] a preliminary injunction should issue only upon a clear showing of either (1) probable success on the merits And possible irreparable injury, Or (2) sufficiently serious questions going to the merits to make them a fair ground for litigation And a balance of hardships tipping decidedly toward the party requesting the preliminary relief." (emphasis in original).

The Sonesta formulation was repeated in numerous subsequent cases. However, in *Triebwasser & Katz v. A. T. & T. Co., 535 F.2d 1356, 1359 (2d Cir. 1976)*, the Court stressed that irreparable injury was required under both prongs of the Sonesta test:

> "(T)his language of the second prong of the Sonesta test does not eliminate the basic obligation of the plaintiff to make a clear showing of the threat of irreparable **[**5]** harm. That is a fundamental and traditional requirement of all preliminary injunctive relief, since equity cannot intervene where there is an adequate remedy at law. If the element of irreparable damage is prerequisite for relief where the plaintiff must show probable success on the merits, then A fortiori where the plaintiff establishes something less than probable success as to the merits, need for proof of the threat of irreparable damage is more pronounced. In sum, the balancing of hardships test of Sonesta **[*668]** necessarily includes the showing of irreparable harm." (emphasis in original) (citations omitted).

Some commentators regarded Triebwasser as a major revision of the Sonesta test, in that Triebwasser required a showing of irreparable harm in the second prong where none had been required before. Other commentators argued that irreparable harm had in the past been part of the second prong's proof of "balance of hardships," a view endorsed shortly after Triebwasser by at least one member of the Second Circuit. Mulligan, Preliminary Injunction in the Second Circuit, 43 Bklyn.L.Rev. 831, 832 (1977); to the extent that Sonesta indicated "that irreparable harm is **[**6]** not necessary for every preliminary injunction," Judge Mulligan disagreed with it. Id. at 839. In *New York Association of Homes for Aging v. Toia, 559 F.2d 876, 880 (2d Cir. 1977)*, the Court said that under either Sonesta test "the movant must show a threat of irreparable harm"; a comparable holding in *New York v. Nuclear Regulatory Commission, 550 F.2d 745, 755 (2d Cir. 1977)* was embellished by the requirement that "the alleged threats of irreparable harm are not remote or speculative but are actual and imminent." A trace of confusion creeps back in, however, in the Court's recent citation of Sonesta for the proposition that the "moving party must make a showing of Possible irreparable harm," *Selchow & Righter Co. v. McGraw-Hill Book Co., 580 F.2d 25, 27 (2d Cir. 1978)*. Cf. *Caulfield v. Board of Education, 583 F.2d 605 (2d Cir. 1978)*, where the Court announced the standard as "Possible irreparable injury" but found that the District Court "could not conclude that the appellants were Likely to suffer irreparable injury." (emphasis added).

Since the case at bar falls within the antitrust statutes, we must also conjure with *15 U.S.C. § 26*, ***HN4***[] which authorizes a preliminary injunction **[**7]** under general principles of equity "and a showing that the danger of irreparable loss or damage is immediate . . . ." In *Triebwasser, supra*, the Second Circuit, after characterizing the showing of irreparable harm as necessary under either Sonesta test, went on to observe:

> "In antitrust cases, the proposition requires no further elucidation since *15 U.S.C. § 26* explicitly requires for a preliminary injunction a showing "that the danger of irreparable loss or damage is immediate,' and we have so held in a recent private antitrust case, *SCM Corp. v. Xerox Corp., 507 F.2d 358, 360 (2d Cir. 1974)*."

In SCM Corp. v. Xerox Corp., cited by the Second Circuit in Triebwasser, the Court characterized the Clayton Act's requirements as "merely declarative of ordinary equitable principles." *507 F.2d at 360*. Thus the degree to which the Second Circuit regards the statute's requirement of Immediacy as a separate element is somewhat obscure. *Jacobson, supra*, also an antitrust case, reiterates the Sonesta formulae, *548 F.2d at 441 n. 2*, but says nothing about the requirements of *§ 26*. Jacobson does make clear that, ***HN5***[] as to the merits, within the antitrust context:

> ". . . the second branch **[**8]** of the Sonesta test requires no more than a showing of "sufficiently serious questions going to the merits to make them a fair ground for litigation.' *483 F.2d at 250*."

The formula I distill from these authorities is that the plaintiffs in this antitrust action are entitled to a preliminary injunction if they bring themselves within either of the two branches of Sonesta ; and, in so doing, demonstrate a substantial threat of immediate irreparable harm.

I hold that plaintiffs have made the requisite showings.

III.

A. The Threat of Irreparable Harm to the NASL and Its Members.

I conclude that the NASL and its plaintiff clubs have made a sufficient showing of a threat of irreparable harm, should the NFL proceed to enact the proposed amendment or otherwise attempt to enforce the cross-ownership ban, to satisfy that requirement of the applicable standards. To **[*669]** appreciate the nature and immediacy of the harm, some background discussion is necessary. [1]

[9]** The NASL is a relative newcomer to the ranks of professional team sport leagues in America, having been established in 1968. On the basis of the undisputed factual recitations in NASL Commissioner Woosnam's affidavit, I find that the ten year history of the NASL has been one of struggle for financial security, franchise stability, and public recognition. Although the 1978 soccer season was the most successful in NASL history, only one of the 28 NASL franchises is expected to show a profit for that year; the remaining teams suffered operating losses, which in one instance ran as high as $ 1.5 million. However, for the first time in some ten years, the NASL has negotiated major television network coverage for its 1979 season. Commissioner Woosnam asserts that such television coverage is vital to the NASL in two respects: first, network television exposure generates fan interest which leads to increased attendance at games and increased gate receipts; second, a network contract provides direct revenues for the financially pressed NASL clubs. The Commissioner points out that for the NASL to retain and expand such television coverage, the major networks must be convinced "that the NASL **[**10]** is a stable and successful league" [2] with a bright economic future.

An important element of stability for the NASL has been furnished by individuals or families who own member soccer clubs, and also own NFL football clubs. Perhaps the foremost among these "cross-owners" is Lamar Hunt of Dallas, Texas, a sporting world legend in his own time. Hunt, as owner of the Kansas City Chiefs football team, was in the early 1960's one of the founders of the American Football League, subsequently merged with the NFL. Hunt is now chairman and sole owner of the NFL Kansas City franchise. Hunt also is a part owner of the Chicago Bulls of the National Basketball Association, and the founder of the World Championship Tennis circuit. In 1967 Hunt purchased a Dallas soccer franchise which, in 1968, became the NASL's Dallas club, called the Dallas Tornado. Woosnam's affidavit pays eloquent and, in my judgment convincing, tribute to the past **[**11]** and continuing importance to the struggling NASL of Hunt's presence and participation. [3]

In addition to Mr. Hunt, the present NASL and NFL cross-owners include two well-known sports families whose participation in the NASL has contributed in some measure to its stability. The Robbie family is a case in point. Elizabeth Robbie is the owner and managing general partner of the NASL's Fort Lauderdale Strikers franchise; her husband, Joe Robbie, is the managing general partner and principal owner of the NFL's Miami Dolphins franchise; their son, Tim, serves as the Strikers' public relations director. Mrs. Robbie's NASL involvement has increased from that of a limited partner in 1973 to managing general partner in 1976, a position she assumed "to preserve her investment when all of the remaining general partners resigned from the partnership." [4] The Robbies have thus provided an NASL club with crucial capital and sports entrepreneurial skill, and, according to Commissioner Woosnam, have **[**12]** "dramatically turned around the prospects for the NASL's Fort Lauderdale franchise." [5]

Another cross-owning family is the Nordstroms of Seattle. They present a unique situation in that family members had a prior NASL investment when, in 1975, an entity owned by the Nordstrom Family **[*670]** Partnership was

---

[1] It is perhaps more common to discuss merits questions first and then consider the elements of irreparable harm. I reverse that order here because certain historical and economic factors, useful to an understanding of the case as a whole, fit more naturally within this topic.

[2] Affidavit of Philip A. Woosnam, NASL Commissioner, September 27, 1978, at p. 10, P 17.

[3] Id. at pp. 6-7, PP 9-11.

[4] Affidavit of Joe Robbie, October 27, 1978, at p. 1, P 1.

[5] Woosnam affidavit at p. 11, P 19.

awarded the new NFL Seattle franchise. Commissioner Woosnam asserts, and the NFL does not seriously dispute, that the Nordstroms' soccer success "paved the way for their entry into the NFL." [6]

A fourth instance of NASL/NFL cross-ownership is presented by William Bidwell, an owner of the NFL St. Louis Cardinals and the holder of a 3 percent interest in the NASL California Surf. [7]

[13]** We now consider the effect of the NFL's proposed amendment upon this presently existing cross-ownership. The amendment was prefaced by a series of four resolutions enacted by the NFL in 1967, 1972, 1973 and 1976, the texts of which are reproduced in the margin. [8] While these resolutions condemned in principle certain species of cross-ownership, no effort was made to enforce divestiture of such cross-ownership as existed. The 1967, 1972 and 1973 resolutions said nothing about divestiture. The 1976 resolution contented itself was calling upon those NFL owners holding an interest in another major team sport to "use best effort(s) to dispose of current holdings." No sanctions were imposed for failure to do so, and it does not appear that any divestitures in fact occurred. While the 1967 resolution "instructed" counsel for the league to draft "appropriate amendments to the Constitution and By-Laws," the record does not reveal any action in response to those instructions. "NFL Resolutions Concerning Cross-Ownership

[14]** Now an amendment to the by-laws is proposed. Its provisions form the subject matter of this action. The amendment is also reproduced in the margin. [9] Its terms **[*671]** would expand the scope of the June 16, 1976

---

[6] Ibid.

[7] Affidavit of Pete Rozelle, NFL Commissioner, October 13, 1978, at p. 18, P 30.

[8] Resolution adopted January 16, 1967:

"RESOLVED that the National Football League does reaffirm its traditional position that no person having operating control of a franchise in the National Football League may acquire or possess control, directly or indirectly, of any other team sports enterprise or business, and that league counsel is instructed to draft appropriate amendments to the Constitution and By-Laws and necessary related resolutions defining the word "control' for the purpose of this resolution."

Resolution adopted May 25, 1972:

"RESOLVED, that no person owning a majority interest in or in direct or indirect operational control of a member club may acquire any interest in another major team sport. Additionally, any person holding such financial interest at the time this Resolution is adopted will in no case increase his percentage of such interest in another major team sport. The adoption of the foregoing Resolution shall not affect or modify the provisions of Article III, Section 3.5 of the Constitution and By-Laws."

Resolution adopted June 26, 1973:

"RESOLVED, that no person owning a majority interest in or in direct or indirect operational control of a member club may acquire any interest in another major team sport. Additionally, any person holding such financial interest at the time this Resolution is adopted will in no case increase his percentage of such interest in another major team sport. The adoption of the foregoing Resolution shall not affect nor modify the provisions of Article III, Section 3.5 of the Constitution and By-Laws."

Resolution adopted June 16, 1976:

"RESOLVED, That no person owning a majority interest in or in direct or indirect operational control of a member club may acquire any interest in another major team sport. Additionally, any person holding such financial interest at the time this resolution is adopted will in no case increase his percentage of such interest in another major team sport and will use best effort to dispose of current holdings. Major team sport, for purposes of this resolution, is defined as major league basketball, hockey, baseball and soccer. The adoption of the foregoing resolution shall not affect nor modify the provisions of Article III, Section 3.5 of the NFL Constitution and By-Laws." Affidavit of Donald Weiss, NFL Executive Director, September 29, 1978, at Exhibit A.

[9] The proposed amendment reads as follows:

"Amend Article IX, by adding a new Section 9.4 as follows:

"9.4(A) No person (1) owning a majority interest in a member club, or (2) directly or indirectly having substantial operational control, or substantial influence over the operations, of a member club, or (3) serving as an officer or director of a member club, resolution currently in effect in three important respects. Similar to the 1976 resolution, it would prohibit an NFL "control person" from Acquiring any interest in a competing major league team sport, defined to include baseball, basketball, hockey and soccer. The amendment, however, would significantly expand the class of persons subject to the prohibition. With respect to the Retention of a present cross-ownership interest, the amendment would replace the resolution's "best effort to dispose" requirement with a flat prohibition. Finally, the amendment would set a definite date February 1, 1980 for divestiture of cross-ownership holdings, and would authorize substantial financial penalties and ultimately, ouster from the NFL, for violation of the cross-ownership ban after that date.

[15]** If the amendment takes effect, all four of the present cross-ownership situations discussed Supra would be affected. That is because the amendment, going beyond the bounds of the resolution, embraces family members of NFL club owners; thus the soccer interests of Mrs. Robbie and the Nordstrom family would be condemned. In consequence, passage of the amendment would require Hunt, the Robbies, Bidwell, and arguably the Nordstroms, [10] to divest themselves of their interests in their NASL clubs. Bidwell's soccer interest is minor, but Hunt and Mrs. Robbie control the Dallas and Miami soccer clubs, and the Nordstroms' interests in the Seattle club are substantial.

[16]** To meet a divestiture deadline of February 1, 1980, it is reasonable to assume that the affected NASL owners would have to begin sales negotiations now. The sale and purchase of a major sports franchise is a considerable undertaking.

I also find, on the basis of NASL Commissioner Woosnam's affidavit, that as a consequence of the NASL's continuing battle for economic stability the league is "experiencing a significant degree of change in both the ownership and location of its franchises," so that "before the beginning of the NASL's 1979 playing season, controlling interests in as many as five NASL clubs are likely to be sold." [11] In those circumstances, the NASL has a vital interest in attracting potential new investors. The affidavits reveal, however, that the mere prospect of the NFL's proposed amendment has had a chilling effect upon presently football-oriented **[*672]** investors who might otherwise favorably consider ownership of an NASL franchise. [12]

---

nor (4) any spouse or minor child of any such person, may directly or indirectly acquire, retain, or possess any interest in another major team sport (including major league baseball, basketball, hockey and soccer).

"(B) The prohibition set forth in subsection (A) hereof shall also apply to relatives of such persons (including siblings, parents, adult children, adult and minor grandchildren, nephews and nieces, and relatives by marriage) (1) if such person directly or indirectly provided or contributed all or any part of the funds used to purchase or operate the other sports league entity, or (2) if there exists between such person and any such relative a significant community of interest in the successful operation of the other sports league entity.

"(C) The Commissioner shall investigate, to the extent he deems necessary or appropriate, any reported or apparent violation of this Section and shall report his findings to the Executive Committee prior to imposition of disciplinary action by the Committee.

"(D) Beginning on February 1, 1980, any person who, after notice and hearing by the Executive Committee, is found to have violated subsection (A) or (B) above will be subject to fines of up to $ 25,000 per month for each of the first three months of violations; up to $ 50,000 per month for each of the next three months; and up to $ 75,000 per month thereafter. In addition, violations of more than six months' duration may be dealt with by the Executive Committee pursuant to Article VIII, Section 8.13(B).

"(E) If such person does not pay such fine to the League Treasurer within 20 days of its assessment, the unpaid amount thereof may be withheld, in whole or in part, by the Commissioner from available funds in possession of the League Office belonging to the member club with which the person in violation is affiliated." Weiss affidavit at Exhibit B.

[10] Apparently the Nordstroms take the position, Vis-a-vis the NFL, that the "overlapping minority interest holders" comprising the Nordstrom Family Partnership are not subject to the amendment, "since none of them controls either team" (i. e., the Seattle NFL and NASL franchises). Rozelle affidavit at p. 22, P 38. I need not resolve that issue. The present inquiry relates to the threat of harm to the NASL. The NFL does not appear to accept the Nordstroms' contention; Rozelle affidavit at p. 22, P 39. Its position may be considered in assessing the potential effect of the NFL amendment upon the NASL.

[11] Woosnam affidavit at p. 8, P 15.

[12] The record contains ample and essentially undisputed evidence that some seven NFL owners (in addition to the current cross-owners) have recently expressed interest in acquiring all or part of various NASL franchises. (Woosnam affidavit at pp. 15-

[17]** These factors combine to establish the NFL cross-ownership ban as a source of harm to the NASL sufficiently grave and immediate to satisfy Second Circuit and Clayton Act Standards. Loss of the stabilizing Hunt, Robbie and Nordstrom presences [13] would be injurious in itself. The forced addition of three franchises to an already burdened market would have an obviously depressing influence, particularly when viewed in combination with the chilling effect of the ban upon potential new investors. I am not persuaded by the defendants' argument that the present cross-owners could elect to retain their NASL interests and divest themselves of their NFL holdings. According to Woosnam [14] the current value of an NASL franchise is $ 2 million and that of an NFL franchise in excess of $ 30 million. A cross-owner is not likely to abandon the latter for the former.

I find that plaintiffs have made a sufficient showing of immediate and irreparable **[**18]** harm to satisfy that requirement of a preliminary injunction.

B. The Merits.

On the merits, the question that arises is whether the cross-ownership ban is open to serious challenge on antitrust grounds.

With respect to the general applicability of the Sherman Act to the facts of this case, it is well-settled that ***HN6***[] the business of professional football is subject to antitrust scrutiny, *Radovich v. NFL, 352 U.S. 445, 77 S. Ct. 390, 1 L. Ed. 2d 456 (1957)*; *Smith v. Pro Football, Inc., 193 U.S.App.D.C. 19, 593 F.2d 1173 (1978)* Reprinted in 1978 BNA ATTR No. 889 at E-1 (Nov. 16, 1978); *Mackey v. NFL, 543 F.2d 606 (8th Cir. 1976)*, Cert. denied, *434 U.S. 801, 98 S. Ct. 28, 54 L. Ed. 2d 59 (1977)*; *Kapp v. NFL, 390 F. Supp. 73 (N.D.Cal.1974)*, and there is no serious dispute but that enactment of the proposed by-law amendment would constitute an agreement among the NFL and its member teams sufficient to satisfy the "contract, combination . . . or conspiracy" language of *section 1* of the Sherman Act, *15 U.S.C. § 1*. *Denver Rockets v. All-Pro Mgmt., Inc., 325 F. Supp. 1049, 1062 (C.D.Cal.1971)*; *Kapp v. NFL, supra, 390 F. Supp. at 81*; *U. S. v. NFL, 116 F. Supp. 319, 321 (E.D.Pa.1953)*. Cf. *Associated **[**19]** Press v. U. S., 326 U.S. 1, 11-12, 65 S. Ct. 1416, 89 L. Ed. 2013 (1945)* (bylaws of association in and of themselves a contract in restraint of trade).

Plaintiffs contend that the proposed cross-ownership ban constitutes an unlawful conspiracy or agreement among the NFL and its member clubs to deprive a competitor, the NASL, of a necessary competitive resource sports entrepreneurial know-how and capital by eliminating a fertile source of that resource, to wit, NFL owners. Plaintiffs argue that the cross-ownership ban constitutes a classic group boycott, Per se unlawful under the Sherman Act, e.g., *Klor's Inc. v. Broadway Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*; *Associated Press v. U. S., 326 U.S. 1, 65 S. Ct. 1416, 89 L. Ed. 2013 (1944)*; *Fashion Originators Guild v. F. T. C., 312 U.S. 457, 61 S. Ct. 703, 85 L. Ed. 949 **[*673]** (1940)*; *Drayer v. Krasner, 572 F.2d 348 (2d Cir. 1978)*, or at best, a restraint of trade which must fall as unreasonable when tested under the rule of reason. See generally, *National Soc. of Prof. Engineers v. U. S., 435 U.S. 679, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*; *Standard Oil Co. v. U. S., 221 U.S. 1, 31 S. Ct. 502, **[**20]** 55 L. Ed. 619 (1911)*; *Smith v. Pro Football, Inc., supra* ; *Mackey v. NFL, supra.* For the reasons that follow, I conclude that the Per se rule of illegality usually applied to "horizontal" group boycotts is inapplicable to the concerted action at issue here, but that plaintiffs have raised sufficiently serious litigable questions going to the merits as to satisfy the second prong of the preliminary injunction test.

16, P 27; Rozelle affidavit at p. 25, P 44). In one instance in 1978, following discussions between Robert R. Hermann, Chairman of the Board of an NASL franchise and an NFL owner (concerning the latter's desire to purchase the soccer franchise), Mr. Hermann asserts he was told "point blank that there was no sense in proceeding any further with our conversations in light of the NFL's stated intention to adopt and/or enforce" the cross-ownership ban. (Affidavit of Robert R. Hermann, September 21, 1978). A similar "chilling" as a result of the impending by-law amendment of another NFL owner's interest in purchasing a soccer franchise also apparently occurred within the past year. (Reply Affidavit of Philip A. Woosnam, October 27, 1978, at p. 3, P 4).

[13] No disrespect is meant to Mr. Bidwell.

[14] Affidavit, pp. 8, 12, PP 13, 20.

In his comprehensive analysis of boycott caselaw, Professor L. A. Sullivan limits the concept of the "classic group boycott," horizontal in nature, which is condemned as Per se unlawful under the Sherman Act:

> "If the Per se rule respecting boycotts is to become coherent, we must recognize that ***HN7***[] it applies only where competitors engage together to inhibit others with whom they compete by depriving those others of elements needed in the competitive context." L. A. Sullivan, Antitrust p. 259. [15]

[21]**

The Second Circuit in Oreck Corp. v. Whirlpool Corp., 579 F.2d 126, 131 (2d Cir. 1978), signalled its approval of the limitations Sullivan suggests upon the Per se rule respecting boycotts (see note 17, Infra); as did the *District of Columbia Circuit in Smith v. Pro Football, Inc., supra*, a case which considered the validity of the NFL player draft. [16]

The Supreme Court has had occasion recently to observe that "the (boycott) decisions reflect a marked lack of uniformity in defining the term . . . express(ing) **[**22]** no opinion, however, as to the merits of any of (the proffered) definitions." *St. Paul Fire & Marine Ins. Co. v. Barry, 438 U.S. 531, 542* and n. 14, *98 S. Ct. 2923, 2930* and n. 14, *57 L. Ed. 2d 932 (1978)*. The Court quoted its prior decision in *FMC v. Svenska Amerika Linien, 390 U.S. 238, 250, 88 S. Ct. 1005, 19 L. Ed. 2d 1071 (1968)*, to the effect that " ***HN8***[] "(under) the Sherman Act, any agreement by a Group of competitors to boycott a particular buyer or group of buyers is illegal Per se,' " Id. (former emphasis added), and concluded that "(whatever) other characterizations are possible, ( ) petitioners' conduct may be viewed as "an organized boycott,' *Fashion Guild v. Trade Comm., 312 U.S. 457, 465, 61 S. Ct. 703, 85 L. Ed. 949 (1941)* . . . (in that petitioner) induced Its competitors to refuse to deal on any terms with its customers." *Id. at 2931* (emphasis added). The Supreme Court's focus in the St. Paul case appears to have been on whether the members of the boycotting group were competitors Inter se, rather than on whether their action was aimed at harming competitors. In this sense, the Supreme Court's view of the classic group boycott may be somewhat broader than Professor Sullivan's, **[**23]** but under either approach a crucial element is agreement among competitors.

The problem with applying the "classic group boycott" label to the facts of this case lies in the peculiar relationship among the NFL and its member clubs. It is by now a well-recognized principle of the relevant **[*674]** caselaw (and the instant record does not demonstrate otherwise) that the members of a professional team sports league are more like "economic joint venturers" than competitors Inter se. E.g., *Smith v. Pro Football, Inc., supra*; *Mackey v. NFL, supra*; *Levin v. N. B. A., 385 F. Supp. 149 (S.D.N.Y.1974)*; *San Francisco Seals, Ltd. v. N. H. L., 379 F. Supp. 966 (C.D.Cal.1974)*. This is not a case where sports league members in competition with each other, e.g., for the services of players concertedly impose restraints on those players, E.g., *Smith v. Pro Football, Inc., supra.* In short, because under these facts, the NFL teams are not economic competitors among themselves, their action does not fit the classic group boycott definition, at least as that has been articulated by Professor Sullivan. [17]

---

[15] In Professor Sullivan's analysis, a boycott is "horizontal" when it operates, i. e., when its effect is felt, on the same market level at which the boycotting group operates. In short, it is a boycott of competitors by competitors. To be distinguished are "vertical" boycotts, as for example where a group of sellers agrees to withhold their product from a particular buyer with whom, of course, they do not compete. Sullivan focuses upon whether the boycotting group's target is or is not a competitor; he views the former situation as more pernicious and thus more appropriate for Per se condemnation. L. A. Sullivan, Antitrust, pp. 229-232.

[16] The Smith court adopted Professor Sullivan's definition of the classic group boycott but refused to apply a Per se rule to the NFL player draft for two reasons. First, the court opined that notwithstanding competition among league members for players, the joint venture nature of the league made Per se rules inappropriate. Second, the court found the NFL's player boycott to be vertical rather than horizontal. See note 15 Supra. The restraint was found to be illegal, however, under the rule of reason.

[17] In *Oreck Corp., supra, 579 F.2d at 131*, the Second Circuit said:

" "While the boycott concept is infinitely expandable, the Per se doctrine ought not to be.' Sullivan, Antitrust 256 (1977), quoted in *Drayer v. Krasner, 572 F.2d 348 (2d Cir. 1978)*. It is important to distinguish between "horizontal' restraints, I. e. agreements

[24]**

There is a substantial degree of judicial recognition, in antitrust cases, that the business structure of league team sports is unique. *Smith v. Pro Football, Inc., supra*; *Kapp v. NFL, 390 F. Supp. 73, 79-81, 88-89 (N.D.Cal.1974)*; *Philadelphia World Hockey Club, Inc. v. Philadelphia Hockey Club, Inc., 351 F. Supp. 462, 503-4 (E.D.Pa.1972)*; *Flood v. Kuhn, 316 F. Supp. 271, 273-6 (S.D.N.Y.1970)*, *Aff'd., 443 F.2d 264 (2d Cir. 1971)*, *Aff'd., 407 U.S. 258, 92 S. Ct. 2099, 32 L. Ed. 2d 728 (1972)*; *Molinas v. National Basketball Association, 190 F. Supp. 241, 243-4 (S.D.N.Y.1961)*; *United States v. National Football League, 116 F. Supp. 319, 323-6 (E.D.Pa.1953)*; *State of Milwaukee v. Milwaukee Braves, 31 Wis.2d 699, 144 N.W.2d 1, 10 (1966)*. These authorities indicate that the NFL should not be regarded as an association of economic competitors attempting to shield concerted anticompetitive behavior behind a joint venture facade. [18] **[**26]** Cf. *United States v. Topco Associates, 405 U.S. 596, 92 S. Ct. 1126, 31 L. Ed. 2d 515 (1972)*. While neither the able presentations of counsel nor the Court's own research has uncovered a case dealing with **[*675]** the type of restraint at issue here, so that **[**25]** the lawfulness of the NFL's cross-ownership ban poses a question of first impression, I am presently persuaded that the NFL's structure, its particular business needs, and the lack of judicial familiarity with this type of restraint, combine to call for application of "rule of reason" principles to test the legality of the cross-ownership ban. [19]

---

between competitors at the same level of market structure, and "vertical' restraints, I. e. combinations of persons at different levels of the market structure, such as manufacturers and distributors."

[18] The rationale for a relaxed antitrust approach to league sports was stated in *United States v. National Football League, supra, 116 F. Supp. at 323*:

"Professional football is a unique type of business. Like other professional sports which are organized on a league basis it has problems which no other business has. The ordinary business makes every effort to sell as much of its product or services as it can. In the course of doing this it may and often does put many of its competitors out of business. The ordinary business man is not troubled by the knowledge that he is doing so well that his competitors are being driven out of business.

"Professional teams in a league, however, must not compete too well with each other in a business way. On the playing field, of course, they must compete as hard as they can all the time. But it is not necessary and indeed it is unwise for all the teams to compete as hard as they can against each other in a business way. If all the teams should compete as hard as they can in a business way, the stronger teams would be likely to drive the weaker ones into financial failure. If this should happen not only would the weaker teams fail, but eventually the whole league, both the weaker and the stronger teams, would fail, because without a league no team can operate profitably."

In *Philadelphia World Hockey Club, supra, 351 F. Supp. at 503-04* Judge Higginbotham stated generally:

"The sports field is in some ways a hybrid, in that it is both similarly and dissimilarly affected by the normal economic variables governing business success. For a corporation producing aluminum, any entrant in the field is a competitor. From a traditional oligopolist's or monopolist's view, one might consider any new entrant as an adversary and thus undesirable. But by the nature of a sports contest, there must always be an adversary. By analogy, who would enjoy Vida Blue blazing strikes across home plate when the batter's box was empty, or Mark Spitz' triumphs, if he were the only one in the pool. Sports teams need competition, and if there are more than two teams, some type of league is probably desirable.

"For maximum customer receptivity and profit it is in the best interest of any club that its opponents not generally be viewed by the public as totally incompetent and utterly unable to compete effectively."

[19] The NASL makes the argument that Per se rules have been deemed inappropriate because of the joint venture nature of the league only when the restraint at issue applies to Intra -league competition. Plaintiffs would distinguish the instant case on the ground that the cross-ownership ban hinders Inter -league competition, i. e. that between the NFL and the NASL. Thus, the NASL contends that the "joint venture" defense is unavailing to save this "group boycott" from Per se condemnation.

I am not persuaded that the joint venture defense should be so narrowly construed. For example, *Philadelphia World Hockey Club, supra*, concerned a challenge by the World Hockey Association to the National Hockey League's player restrictions. The hindering of Inter -league competition was clearly at issue, yet Judge Higginbotham refused to apply a Per se rule to the alleged violation of *section 1* of the Sherman Act, largely because of the unique nature of the business of professional hockey. *351 F. Supp. at 503-04*.

[27]**

Of course, the joint venture nature of the NFL does not pose an insurmountable barrier to plaintiffs' case. *Robertson v. NBA, 67 F.R.D. 691, 694 n. 3 (S.D.N.Y.1975)*. See generally, *Timken Roller Bearing Co. v. U. S., 341 U.S. 593, 598, 71 S. Ct. 971, 95 L. Ed. 1199 (1951)*. It is not a prerequisite to antitrust liability that "coconspirators" be competitors of one another. E.g., *Tondas v. Amateur Hockey Ass'n, 438 F. Supp. 310 (W.D.N.Y.1977)*; *DuPont Glore Forgan Inc. v. A. T. & T. Co., 437 F. Supp. 1104 (S.D.N.Y.1977)*; *Diehl & Sons, Inc. v. International Harvester Co., 426 F. Supp. 110 (S.D.N.Y.1976)*. Though united in a joint venture, the NFL members are discrete business entities individuals, partnerships and corporations whose concerted action can have antitrust implications, *Robertson, supra*; *Levin v. NBA, 385 F. Supp. 149, 152 (S.D.N.Y.1974)*; *San Francisco Seals v. NHL, 379 F. Supp. 966, 968, 970-71 (E.D.Cal.1974)*; *United States v. National Football League, supra.*

Viewing the cross-ownership ban in the light of the rule of reason, the decisive issue, recently articulated by the *Supreme Court in National Soc. of Professional Engineers v. U. S., supra*, is ***HN9***[] "whether the challenged **[**28]** agreement is one that promotes competition or one that suppresses competition." *435 U.S. at 691, 98 S. Ct. at 1365*. Crucial to this evaluation is inquiry into "the facts peculiar to the business, the history of the restraint, and the reasons why it was imposed," to the end that the court may "form a judgment about the competitive significance of the restraint." In short, I must ultimately analyze the purpose and effect of the cross-ownership ban, *Oreck Corp. v. Whirlpool Corp., supra, 579 F.2d at 133*, and determine whether on balance its anticompetitive effects outweigh its pro-competitive benefits. See e.g., *Professional Engineers, supra*; *Continental T. V. v. GTE Sylvania, Inc., 433 U.S. 36, 49-51, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*. Plaintiffs are entitled to a preliminary injunction if, within the context of that controlling issue, they have "raised questions going to the merits so serious, substantial, difficult and doubtful, as to make them a fair ground for litigation and thus for more deliberate investigation." *Jacobson, supra, 548 F.2d at 442*.

The NASL plaintiffs perceive two principal anticompetitive effects of the cross-ownership ban. First, they view the limited **[*676]** **[**29]** number of individuals in the United States with sufficient wealth, interest, time and entrepreneurial skills to operate a major sports franchise effectively as a decidedly limited market, of which the present NFL members constitute a significant part. Plaintiffs claim that the cross-ownership ban obstructs the NASL from competing in that market, since under its terms present cross-owners are under pressure to divest themselves of NASL franchises, and new prospects cannot be approached if they are NFL owners, present or potential. Secondly, plaintiffs argue, this anticompetitive effect leads directly to another, since the coercions and restraints placed upon present and potential NASL owners serve to "undermine the stability, credibility and ability of the NASL to compete successfully with other sports, including the NFL" in the broader market for the public's entertainment dollar and leisure time. [20]

In one of its leading "boycott" cases, the Supreme Court opined that conduct which could be characterized as a "group boycott" might be saved from Per se condemnation by a "justification derived from the policy of another statute Or otherwise." *Silver v. N. Y. S. E., 373 U.S. 341, 348-49, 83 S. Ct. 1246, 1252, 10 L. Ed. 2d 389 (1963)* (emphasis added). Several commentators have "suggested that where collective action is inherent in the structure of the industry, as it is in sports leagues, the "or otherwise' justification is present." Note, Professional Team Sports and the Antitrust Laws, 81 Harv.L.R. 418, 423 (1967), citing Note, Trade Association Exclusionary Practices: An Affirmative Role for the Rule of Reason, 66 Colum.L.Rev. 1486, 1501 (1966).

[20] Plaintiffs' main brief at pp. 39-40.

Plaintiffs make a third argument, that the cross-ownership ban runs afoul of the so-called "essential facility" doctrine of ***antitrust law***. See generally, *Otter Tail Power Co. v. U. S., 410 U.S. 366, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973)*; *U. S. v. Terminal R. R. Ass'n, 224 U.S. 383, 32 S. Ct. 507, 56 L. Ed. 810 (1912)*. The District of Columbia Circuit's recent discussion of the doctrine provides a helpful summary of the law:

" "(W)here facilities cannot practicably be duplicated by would-be competitors, those in possession of them must allow them to be shared on fair terms. It is illegal restraint of trade to foreclose the scarce facility.' . . . To be "essential' a facility need not be indispensible; it is sufficient if duplication of the facility would be economically infeasible and if denial of its use inflicts a severe

[30]**

Defendants dispute the accuracy of these perceptions. They point out that investors and potential investors in NASL franchises come from many walks and stations of life, so that the limited market of wealth and skill described by plaintiffs is illusory. The NFL scoffs at the dire anticompetitive effect visualized by the NASL, paraphrasing the plaintiffs to say that "their dynamically growing venture would collapse in a trice if two or three of its 24 franchises change ownership contrary to the league's wishes between now and 1980." [21] Defendants proclaim the cross-ownership ban to be procompetitive in overall effect, primarily because it inhibits the "creeping merger of the two leagues through joint ownership." [22]

The issues presented are interesting, complex and to a degree novel, such as the NASL's perception of wealthy, sportsminded individuals as components of a market for which rival leagues compete. One suspects that until now Mr. Hunt had thought **[**31]** of himself as a competitor, and not a commodity. At times the parties' arguments cut both ways. Thus defendants' characterizations of the cross-ownership ban as procompetitive, because it would prevent merger of the two leagues through "joint ownership," does not wholly square with their downgrading of the economic importance of the entrepreneurial sub-market: if **[*677]** NASL has so many and so wide a variety of investors to choose from, why is a cross-ownership ban necessary to prevent a "creeping merger" of the NASL and NFL?

Measured by the rule of reason and its quintessential issue as articulated in National Society of Professional Engineers the promotion or suppression of competition it is evident that the case at bar presents serious questions forming a fair ground for litigation, including the discovery procedures now in progress. If no prior case delineates sports entrepreneurs as a market with which ***antitrust law*** is properly concerned, no case holds that the concept is too fanciful to have validity. The precise boundaries of that market, in the case at bar, present substantial issues of fact. The cross-ownership ban would limit the options of (a) NFL owners and their **[**32]** family members who also own an NASL franchise or contemplate such an interest; and (b) NASL franchises seeking to interest such individuals as investors. The restraints attendant upon such limitations of choice fairly implicate the antitrust laws. *United States v. New Orleans Insurance Exchange, 148 F. Supp. 915, 920 (E.D.La.1957)*, *Aff'd, 355 U.S. 22, 78 S. Ct. 96, 2 L. Ed. 2d 66 (1957)*; *United States v. Insurance Board of Cleveland, 188 F. Supp. 949, 955 (N.D.Ohio 1960)*. I find no meaningful relationship between the proposed by-law amendment forming the subject matter of the instant case and the rejection by a professional basketball league of certain individuals for franchise ownership in *Levin v. National Basketball Association, 385 F. Supp. 149 (S.D.N.Y.1974)*, upon which defendants rely. That rejection in Levin was Ad hoc, ad hominem, and, as Judge Owen properly held, quite without antitrust implications. Such implications abound in the case at bar. [23] It is difficult for defendants to deny any anticompetitive intent for the

---

handicap on potential market entrants. Necessarily, this principle must be carefully delineated: the antitrust laws do not require that an essential facility be shared if such sharing would be impractical or would inhibit the defendant's ability to serve its customers adequately." *Hecht v. Pro-Football, Inc., 187 U.S.App.D.C. 73, 83, 570 F.2d 982, 992-93 (1977)* (citations and footnotes omitted).

Two problems with the applicability of this theory to the case at bar come immediately to mind. First, the cases cited by plaintiffs all deal with tangible physical objects as "essential facilities." *Otter Tail, supra* (electricity transmission lines); *Terminal R. R., supra* (railroad switching facilities); *Hecht, supra* (football stadium); *Helix Milling Co. v. Terminal Flour Mills Co., 523 F.2d 1317 (9th Cir. 1975)*, Cert. denied, *423 U.S. 1053, 96 S. Ct. 782, 46 L. Ed. 2d 642 (1976)* (flour mill); *U. S. v. Standard Oil Co., 362 F. Supp. 1331 (N.D.Cal.1972)*, *Aff'd, 412 U.S. 924, 93 S. Ct. 2750, 37 L. Ed. 2d 152 (1973)* (fuel storage facilities). The "essential facility" or "scarce resource" here is the sports capital and entrepreneurial skill of the NFL owners. Second, the cited cases all deal with situations where the defendant enjoyed a monopoly over the resource or facility. While it might be said that the NFL "monopolizes" NFL owners, I do not understand plaintiffs' position to be that the NFL monopolizes the entire field of "sports owners," nor is this a necessary showing to establish the right to relief under the other theories pressed. In sum, it seems that if the NASL succeeds on its primary theories of liability, then resort to "essential facility" law would be superfluous, if indeed it is applicable at all.

[21] Defendants' brief at p. 31.

[22] *Id. at p. 32*.

cross-ownership ban, in the face of Commissioner Rozelle's explanatory statement of June 28, 1978 to the NFL owners, which included the following discussion **[**33]** as a reason for the ban:

> "The NFL's success depends on fan interest and loyalty. The League competes with other major team sports for that interest and loyalty, as well as for gate receipts, television revenues, advertising dollars, and media coverage. Connections with NFL personnel may well enhance these competing team sports, both in fact **[**34]** and in the public's perception, at the expense of the NFL." [24]

In sum, there are present in this case merits issues of sufficient doubt and moment to satisfy the Sonesta and Jacobson tests.

C. The Balance of Hardships.

No extended discussion is necessary to demonstrate that the balance of hardships tips in favor of plaintiffs. The adverse effects to the NASL attendant upon immediate implementation of the cross-ownership ban have been considered Ante. Those effects may not be capable of precise calculation, but the potential is real. By way of contrast, the NFL points to no factor indicating that it will be harmed if a policy declared in 1967, but not sought to be enforced until 1978, is kept on the bench during the pendency of this litigation.

The parties have devoted some energy to debating whether the granting of a preliminary injunction to plaintiffs would preserve or disturb the Status quo. Clearly it is the former. The NFL made no meaningful efforts to enforce the cross-ownership ban, first declared **[**35]** in a resolution in 1967, until **[*678]** the 1978 proposed amendment, with its forced divestiture and Draconian penalties for non-compliance. Transforming a toothless tabby into a sabre-tooth tiger is no way to preserve the Status quo. The NFL's serene portrayal of cross-owners, cheerfully and without resentment, exercising their best efforts to divest themselves of other interests even prior to the proposed amendment, does not withstand analysis. Thus Hunt has expressed concern at the timing of an enforced divestiture. [25]

---

[23] Assuming Arguendo that the cross-ownership ban violates the antitrust laws, that it has not yet been formally enacted or put into effect is irrelevant: ***HN10***[] "Combinations are no less unlawful because they have not as yet resulted in restraint. An agreement or combination to follow a course of conduct which will necessarily restrain or monopolize a part of trade or commerce may violate the Sherman Act, whether it be "wholly nascent or abortive on the one hand, or successful on the other.' " *Associated Press v. U. S., 326 U.S. 1, 12, 65 S. Ct. 1416, 1421, 89 L. Ed. 2013 (1945)* Quoting *U. S. v. Socony-Vacuum Oil Co., 310 U.S. 150, 225, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*.

[24] Affidavit of Donald Weiss, NFL Executive Director, September 25, 1978, at Exhibit B.

[25] Defendants have submitted an exchange of letters between Lamar Hunt and Pete Rozelle, spanning the period of August 11, 1972 to March 8, 1977. The correspondence concerns Mr. Hunt's willingness and efforts to comply with the NFL policy resolutions on cross-ownership. Mr. Hunt's letters reveal his concern with being forced into divestiture at a time when there was little or no market for NASL franchises. His perceptions as to investor reaction to the sale of a "Hunt" business are instructive:

"The soccer investment of myself and my children (for which I am obviously responsible) is a Very substantial one unfortunately, at this point more than I expected. Though the picture looks infinitely brighter for the sport, it is still a long way from reaching fruition for the investors and, in fact, at present there is virtually no market for a going club especially one owned by a "Hunt.' (We have a historically bad record for selling any business for buyers seem to feel that anything we are selling must really be a "dog.' " Letter from Lamar Hunt to Pete Rozelle, at 1 (November 12, 1973).

More recently, Hunt has said:

"I am informed that NFL Commissioner Pete Rozelle has filed an affidavit in this action indicating that (i) I am in complete accord with this latest proposed rule by the NFL to bar NFL owners from having an interest in other team sports, and (ii) I am presently desirous of selling my other team sports interests. Neither of these assertions is true. In the past I have reluctantly indicated to the other owners in the NFL that, if they required me to do so, I would sell my interests in other team sports, specifically soccer and basketball, at an appropriate time when proper financial arrangements could be made in order to protect my investments in those franchises. However, as a businessman, I do not want to be in a position where I would be forced to sell either my soccer or basketball interest by a specified date and under threat of compulsion. Such a requirement would, in my view, jeopardize the

[36]**

For the purposes of this motion, the Court need not accept or reject plaintiffs' contention that the NFL's proposal to implement the cross-ownership ban at this time stems solely from anticompetitive animus toward the NASL, just as the latter begins to succeed. I recognize that the NFL asserts quite different motivations. [26] Resolution of this and other fact issues must await trial. It is sufficient for the present to say that the NFL's recently declared intent to implement a cross-ownership ban disturbs the Status quo in such a manner as to tip the balance of hardships in favor of plaintiffs; and that the other requisite elements are also established, thus entitling them to a preliminary injunction.

[37]**

CONCLUSION

The foregoing constitutes the Court's Findings of Fact and Conclusions of Law pursuant to *Rule 52(a), F.R.Civ.P.*

A preliminary injunction will issue, restraining the NFL and its member clubs, pending the final resolution of this case, **[*679]** from implementing by by-law amendment or otherwise its cross-ownership ban.

The giving of security by plaintiffs is referred to both by *Rule 65(c)* and *15 U.S.C. § 26*. The present motion papers do not address this issue. Counsel should do so in connection with settling the order.

Counsel for plaintiffs are directed to settle an order and form of injunction on five (5) days' notice.

End of Document

---

substantial investment I have made in particular in my soccer franchise over the last twelve years. In fact, at the present time, it is not my desire to relinquish my ownership in the Dallas Tornado (or the Chicago Bulls for that matter) unless I am compelled to do so by the cross-ownership ban proposed by the NFL." Affidavit of Lamar Hunt, October 26, 1978, at p. 2, P 3.

[26] The business justifications urged by defendants in support of the cross-ownership ban are summarized in the NFL's brief at p. 6:

"(1) protection of commercial confidentiality;

"(2) preservation of good relations with the public, including

(a) avoiding dilution of the goodwill which a prominent local NFL "salesman' wins for the entire NFL;

(b) remaining untarnished by adverse fan reactions to publicly visible owners whose activities in other sports may arouse local hostility;

(c) taking the procompetitive side of the public debate concerning the proper role of sports ownership "magnates' or human "conglomerates'; and

"(3) encouragement of maximum cooperation, and minimizing animosity and suspicion, among the NFL member joint-venturers."

HN10[] Sherman Act, Defenses

The test for determining when a seller has a valid meeting-competition defense is whether a seller can show the existence of facts which would lead a reasonable and prudent person to believe that the granting of a lower price would in fact meet the equally low price of a competitor. A good-faith belief, rather than absolute certainty, that a price concession is being offered to meet an equally low price offered by a competitor is sufficient to satisfy the defense under Robinson-Patman Act, *15 U.S.C.S. § 2(b)*. Since good faith, rather than absolute certainty, is the touchstone of the meeting-competition defense, a seller can assert the defense even if it has unknowingly made a bid that in fact not only met but beat his competition.

Lawyers' Edition Display

Decision

Buyer purchasing, from seller having meeting competition defense under *15 USCS 13(b)*, at lowest price competitively offered, held not to have induced or received illegal price discrimination under *15 USCS 13(f)*.

Summary

A grocery store chain, after deciding to switch from the sale of brand label milk to the sale of private label milk, solicited an offer from its longtime supplier to supply milk under the chain's private label. The chain was dissatisfied with the supplier's initial offer and solicited offers from other dairies, one of which submitted an offer lower than that of the supplier. The chain's buyer subsequently contacted the supplier and told it that it had another offer, that the supplier was "not even in the ballpark," and that a $ 50,000 improvement in the offer "would not be a drop in the bucket." The supplier then submitted a new bid, lower than the competing offer, emphasizing that it needed to keep the chain's business and that it made the new offer in order to meet the other dairy's bid. After the chain accepted the supplier's second offer, the Federal Trade Commission filed a complaint against the chain, charging, among other things, that it had violated 2(f) of the Clayton Act, as amended by the Robinson-Patman Act (*15 USCS 13(f)*) by knowingly inducing or receiving a price discrimination prohibited by 2 of the Act (*15 USCS 13*), namely the price discrimination of a seller, which is prohibited under 2(a) (*15 USCS 13(a)*). After proceedings before an administrative law judge, the Commission--rejecting the chain's contention that it could utilize, as a defense to its 2(f) liability, the meeting competition defense of 2(b) of the Act, which allows a seller to rebut a prima facie case of price discrimination by showing that the seller's lower price was made in good faith to meet a competitor's equally low price--held that the chain had violated 2(f), The United States Court of Appeals for the Second Circuit affirmed on review of the Commission's decision (*557 F2d 971*).

On certiorari, the United States Supreme Court reversed. In an opinion by Stewart, J., joined by Burger, Ch. J., and Brennan, Blackmun, Powell, and Rehnquist, JJ., it was held that a buyer who has done no more than accept the lower of two prices competitively offered does not induce or receive price discrimination in violation of 2(f) provided the seller has a valid meeting competition defense, the chain thus not being in violation of 2(f) since the supplier had a valid meeting competition defense under 2(b).

White, J., concurring in part and dissenting in part, expressed the view that the court should not have decided whether the supplier had a valid meeting competition defense, since neither the Commission nor the Court of Appeals had reached the issue.

Marshall, J., dissenting in part, agreed that the Commission and the Court of Appeals had applied an incorrect legal standard in assessing the chain's liability under 2(f), but disagreed with the court's ruling that 2(f) precluded buyer liability under the Act unless the seller could also be found liable for price discrimination, expressing the view that a buyer could claim the meeting competition defense if he acted in good faith to induce a seller to meet a competitor's price, regardless of whether the seller's price happened to beat the competitor's, but that a buyer who induced the lower bid by misrepresentation could not escape liability, and that the United States Supreme Court should not have resolved disputed factual issues in the case without a remand.

Stevens, J., did not participate.

MONOPOLIES §36 > buyer's inducement of price discrimination -- effect of seller's meeting competition defense --
> Headnote:
LEdHN[1A][] [1A]***LEdHN[1B]***[] [1B]***LEdHN[1C]***[] [1C]

A buyer who has done no more than accept the lower of two prices competitively offered does not knowingly induce or receive a seller's illegal price discrimination in violation of 2(f) of the Clayton Act, as amended by the Robinson-Patman Act, (*15 USCS 13(f)*) where the seller from whom the buyer purchases has a meeting competition defense under 2(b) of the Act (*15 USCS 13(b)*) to the Act's prohibition against price discrimination by sellers (*15 USCS 13(a)*). (Marshall, J., dissented from this holding.)

MONOPOLIES §36 > price discrimination -- seller's defenses -- > Headnote:
LEdHN[2A][] [2A]***LEdHN[2B]***[] [2B]

Under 2(a) and (b) of the Clayton Act, as amended by the Robinson-Patman Act, (*15 USCS 13(a)* and *(b)*), a seller who can establish that a price differential was cost justified or offered in good faith to meet competition has a complete defense to a charge of price discrimination under the Act.

MONOPOLIES §36 > price discrimination -- buyer's liability -- > Headnote:
LEdHN[3][] [3]

Under 2(f) of the Clayton Act, as amended by the Robinson-Patman Act, (*15 USCS 13(f)*), a buyer cannot be liable for inducing or receiving a discrimination in price if a prima facie case of price discrimination under 2(a) and (b) of the Act (*15 USCS 13(a)* and *(b)*) could not be established against a seller or if the seller has an affirmative defense. (Marshall, J., dissented from this holding.)

MONOPOLIES §36 > price discrimination -- meeting competition defense -- > Headnote:
LEdHN[4][] [4]

The test for determining whether a seller has a valid defense against illegal price discrimination under 2(b) of the Clayton Act, as amended by the Robinson-Patman Act, (*15 USCS 13(b)*) is whether a seller can show the existence of facts which would lead a reasonable and prudent person to believe that the granting of a lower price would in fact meet the equally low price of a competitor; a good faith belief, rather than absolute certainty, that a price concession is being offered to meet an equally low price offered by a competitor is sufficient to satisfy the 2(b) defense, and a seller can assert the defense even if it has unknowingly made a bid that in fact not only met but beat his competition.

MONOPOLIES §36 > price discrimination -- seller's meeting competition defense -- buyer's inducing or receiving price discrimination -- > Headnote:
LEdHN[5][] [5]

A seller is entitled to a meeting competition defense under 2(b) of the Clayton Act, as amended by the Robinson-Patman Act, (*15 USCS 13(b)*) to any illegal price discrimination under 2(a) of the Act (*15 USCS 13(a)*) arising from its sale to a buyer who had purchased under the seller's second bid at a price lower than the low bid made by prospective seller in a bid submitted after the buyer had rejected the eventual seller's initial bid, where (1) the seller submitted its second bid after the buyer had informed the seller that, as to the prospective seller's bid, its initial bid was "not even in the ballpark" and that a $ 50,000 improvement "would not be a drop in the bucket," (2) the seller could justifiably conclude, in light of its established business relationship with the buyer, that it was necessary to make the second bid offering substantial concessions in order to avoid loss of the buyer's account, (3) the seller had made the second bid without knowing of the details of the competing bid, and, thus, the buyer, who does no more than accept such seller's second offer, is not liable under 2(f) of the Act (*15 USCS 13(f)*) for inducing or receiving an illegal discrimination in price. (Marshall, J., dissented in part from this holding.)

Syllabus

Section 2 (a) of the Clayton Act, as amended by the Robinson-Patman Act, prohibits price discrimination by sellers, but under *§ 2 (b)* the seller may rebut a prima facie case of price discrimination by showing that his lower price was made in good faith to meet a competitor's equally low price. *Section 2 (f)* makes it unlawful "for any person engaged in commerce, in the course of such commerce, knowingly to induce or receive a discrimination in price which is prohibited by this section." Petitioner, in an effort to achieve cost savings, entered into an agreement with its longtime supplier, Borden Co., under which Borden would supply "private **[****2]** label" (as opposed to "brand label") milk to petitioner's stores in the Chicago area. Petitioner refused Borden's initial offer in implementation of the agreement and solicited offers from other companies, resulting in a lower offer from one of Borden's competitors. At this point petitioner's buyer informed Borden that its offer was "not even in the ball park" and that a $ 50,000 improvement in the offer "would not be a drop in the bucket." Borden then submitted a new offer that was substantially better than its competitor's and petitioner accepted it. Based on these facts, the Federal Trade Commission charged petitioner with violating § 5 of the Federal Trade Commission Act for allegedly misleading Borden during contract negotiations by failing to inform it that its second offer was better than its competitor's, and with violating *§ 2 (f)* by knowingly inducing or receiving price discrimination from Borden. The FTC dismissed the § 5 charge on the ground that the issue was what amount of disclosure is required of the buyer during contract negotiations and that to impose a duty of affirmative disclosure would be "contrary to normal business practice" and "contrary to the public **[****3]** interest," but held that petitioner had violated *§ 2 (f)*, the FTC rejecting, *inter alia*, petitioner's defense that the Borden offer had been made to meet competition. The Court of Appeals affirmed. *Held*: A buyer who has done no more than accept the lower of two prices competitively offered does not violate *§ 2 (f)* provided the seller has a meeting-competition defense, and here where Borden had such a defense and thus could not be liable under *§ 2 (b)* petitioner, who did no more than accept Borden's offer, cannot be liable under *§ 2 (f)*. Pp. 75-85.

(a) Since liability under *§ 2 (f)* is limited to price discrimination "prohibited by this section," and since only *§§ 2 (a)* and *(b)* deal with seller liability for price discrimination, a buyer, under *§ 2 (f)*'s plain meaning, cannot be liable if a prima facie case cannot be established against a seller or if the seller has an affirmative defense. *Automatic Canteen Co. of America v. FTC, 346 U.S. 61*. In either situation, there is no price discrimination "prohibited by this section." And the legislative history of *§ 2 (f)* confirms the conclusion that buyer liability under *§ 2 (f)* is dependent on seller **[****4]** liability under *§ 2 (a)*. Pp. 75-78.

(b) To rewrite *§ 2 (f)* to hold a buyer liable even though there is no price discrimination "prohibited by this section" would contravene the rule that this Court "cannot supply what Congress has studiously omitted," *FTC v. Simplicity Pattern Co., 360 U.S. 55, 67*. Pp. 78-79.

(c) Imposition of *§ 2 (f)* liability on petitioner would lead to price uniformity and rigidity contrary to the purposes of other antitrust legislation. P. 80.

(d) A duty of affirmative disclosure requiring a buyer to inform a seller that his bid has beaten competition would frustrate competitive bidding and, by reducing uncertainty, would lead to price matching and anticompetitive cooperation among sellers. P. 80.

(e) The effect of the finding that petitioner's same conduct violated *§ 2 (f)* as violated § 5 of the Federal Trade Commission Act is to impose the same duty of affirmative disclosure that the FTC condemned as anticompetitive, "contrary to the public interest," and "contrary to normal business practice," in dismissing the § 5 charge. Pp. 80-81.

(f) The test for determining when a seller has a valid meeting-competition defense is whether **[****5]** he can "show the existence of facts which would lead a reasonable and prudent person to believe that the granting of a lower price would in fact meet the equally low price of a competitor." *FTC v. A. E. Staley Mfg. Co., 324 U.S. 746*. Under the circumstances of this case, Borden did act reasonably and in good faith when it made its second bid, since, in light of its established business relationship with petitioner, it could justifiably conclude that petitioner's statements about the first offer were reliable and that it was necessary to make another bid offering substantial concessions to avoid losing its account with petitioner. Pp. 82-84.

Counsel: Denis McInerney argued the cause for petitioner. With him on the briefs were Raymond L. Falls, Jr., and William T. Lifland.

Deputy Solicitor General Easterbrook argued the cause for respondent. With him on the brief were Solicitor General McCree, Michael N. Sohn, Gerald P. Norton, W. Dennis Cross, and Jerold D. Cummins. [*]

Judges: STEWART, J., delivered the opinion of the Court, in which BURGER, **[****6]** C. J., and BRENNAN, BLACKMUN, POWELL, and REHNQUIST, JJ., joined, and in Parts I, II, and III of which WHITE, J., joined. WHITE, J., filed an opinion concurring in part and dissenting in part, post, p. 85. MARSHALL, J., filed an opinion dissenting in part, post, p. 85. STEVENS, J., took no part in the consideration or decision of the case.

Opinion by: STEWART

Opinion

[*71] **[***157]** **[**928]** MR. JUSTICE STEWART delivered the opinion of the Court.

LEdHN[1A][] [1A]The question presented in this case is whether the petitioner, the **[***158]** Great Atlantic & Pacific Tea Co. (A&P), violated *§ 2 (f)* of the Clayton Act, 38 Stat. 730, as amended by the Robinson-Patman Act, 49 Stat. 1526, *15 U. S. C. § 13 (f)*, [1] by knowingly inducing or **[**929]** receiving illegal price discriminations from the Borden Co. (Borden).

---

[*] Thomas A. Rothwell and Arthur H. Brendtson filed a brief for the Small Business Legislative Council as amicus curiae.

[1] Title *15 U. S. C. § 13 (f)* provides:

HN1[] "It shall be unlawful for any person engaged in commerce, in the course of such commerce, knowingly to induce or receive a discrimination in price which is prohibited by this section."

Title *15 U. S. C. §§ 13 (a)* and *(b)* provide in pertinent part:

"(a) . . . It shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality, where either or any of the purchases involved in such discrimination are in commerce, where such commodities are sold for use, consumption, or resale within the United States or any Territory thereof or the District of Columbia or any insular possession or other place under the jurisdiction of the United States, and where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination or with customers of either of them: *Provided*, That nothing herein contained shall prevent differentials which make only due allowance for differences in the cost of manufacture, sale, or delivery resulting from the differing methods or quantities in which such commodities are to such purchasers sold or delivered . . . .

[**7]** **[*72]** The alleged violation was reflected in a 1965 agreement between A&P and Borden under which Borden undertook to supply "private label" milk to more than 200 A&P stores in a Chicago area that included portions of Illinois and Indiana. This agreement resulted from an effort by A&P to achieve cost savings by switching from the sale of "brand label" milk (milk sold under the brand name of the supplying dairy) to the sale of "private label" milk (milk sold under the A&P label).

To implement this plan, A&P asked Borden, its longtime supplier, to submit an offer to supply under private label certain of A&P's milk and other dairy product requirements. After prolonged negotiations, Borden offered to grant A&P a discount for switching to private-label milk provided A&P would accept limited delivery service. Borden claimed that this offer would save A&P $ 410,000 a year compared to what it had been paying for its dairy products. A&P, however, was not satisfied with this offer and solicited offers from other **[*73]** dairies. A competitor of Borden, Bowman Dairy, then submitted an offer which was lower than Borden's. [2]

[**8]** At this point, A&P's Chicago buyer contacted Borden's chain store sales manager and stated: "I have a bid in my pocket. You [Borden] people are so far out of line it is not **[***159]** even funny. You are not even in the ball park." When the Borden representative asked for more details, he was told nothing except that a $ 50,000 improvement in Borden's bid "would not be a drop in the bucket."

Borden was thus faced with the problem of deciding whether to rebid. A&P at the time was one of Borden's largest customers in the Chicago area. Moreover, Borden had just invested more than $ 5 million in a new dairy facility in Illinois. The loss of the A&P account would result in underutilization of this new plant. Under these circumstances, Borden decided to submit a new bid which doubled the estimated annual savings to A&P, from $ 410,000 to $ 820,000. In presenting its offer, Borden emphasized to A&P that it needed to keep A&P's business and was making the new offer in order to meet Bowman's bid. A&P then accepted Borden's bid after concluding that it was substantially better than Bowman's.

I

Based on these facts, the Federal Trade Commission filed a three-count complaint against **[****9]** A&P. Count I charged that A&P had violated § 5 of the Federal Trade Commission Act by misleading Borden in the course of negotiations for the private-label contract, in that A&P had failed to inform Borden that its second offer was better than the Bowman bid. [3] **[*74]** Count II, involving the same conduct, charged that A&P had violated *§ 2 (f)* of the Clayton Act, as **[**930]** amended by the Robinson-Patman Act, by knowingly inducing or receiving price discriminations from Borden. Count III charged that Borden and A&P had violated § 5 of the Federal Trade Commission Act by combining to stabilize and maintain the retail and wholesale prices of milk and other dairy products.

[**10]** An Administrative Law Judge found, after extended discovery and a hearing that lasted over 110 days, that A&P had acted unfairly and deceptively in accepting the second offer from Borden and had therefore violated §

"(b) . . . Upon proof being made, at any hearing on a complaint under this section, that there has been discrimination in price or services or facilities furnished, the burden of rebutting the prima-facie case thus made by showing justification shall be upon the person charged with a violation of this section, and unless justification shall be affirmatively shown, the Commission is authorized to issue an order terminating the discrimination: *Provided, however*, That nothing herein contained shall prevent a seller rebutting the prima-facie case thus made by showing that his lower price or the furnishing of services or facilities to any purchaser or purchasers was made in good faith to meet an equally low price of a competitor, or the services or facilities furnished by a competitor."

[2] The Bowman bid would have produced estimated annual savings of approximately $ 737,000 for A&P as compared with the first Borden bid, which would have produced estimated annual savings of $ 410,000.

[3] Section 5 (a) of the Federal Trade Commission Act, 38 Stat. 719, as amended, *15 U. S. C. § 45 (a)*, provides in relevant part:

HN2[] "(1) Unfair methods of competition in or affecting commerce, and unfair or deceptive acts or practices in or affecting commerce, are declared unlawful."

5 of the Federal Trade Commission Act as charged in Count I. The Administrative Law Judge similarly found that this same conduct had violated § 2 (f). Finally, he dismissed Count III on the ground that the Commission had not satisfied its burden of proof.

LEdHN[2A][] [2A]On review, the Commission reversed the Administrative Law Judge's finding as to Count I. Pointing out that the question at issue was what amount of disclosure is required of the buyer during contract negotiations, the Commission held that the imposition of a duty of affirmative disclosure would be "contrary to normal business practice and, we think, contrary to the public interest." Despite this ruling, however, the Commission held as to Count II that the identical conduct on the part of A&P had violated § 2 (f), finding that Borden had discriminated in price between A&P and its competitors, that the discrimination had been injurious **[****11]** to competition, and that A&P had known or **[***160]** should have known that it was the beneficiary of unlawful price discrimination. [4] The Commission rejected A&P's defenses that the Borden bid had been made to meet competition and was cost justified. [5]

[**12]** **[*75]** A&P filed a petition for review of the Commission's order in the Court of Appeals for the Second Circuit. The court held that substantial evidence supported the findings of the Commission and that as a matter of law A&P could not successfully assert a meeting-competition defense because it, unlike Borden, had known that Borden's offer was better than Bowman's. [6] Finally, the court held that the Commission had correctly determined that A&P had no cost-justification defense. 557 F.2d 971. Because the judgment of the Court of Appeals raises important issues of federal law, we granted certiorari. *435 U.S. 922*.

[**13]** II

The Robinson-Patman Act was passed in response to the problem perceived in the increased market power and coercive practices of chainstores and other big buyers **[**931]** that threatened **[*76]** the existence of small independent retailers. Notwithstanding this concern with buyers, however, the emphasis of the Act is in § 2 (a), which prohibits price discriminations by sellers. Indeed, the original Patman bill as reported by Committees of both Houses prohibited only seller activity, with no mention of buyer liability. [7] Section 2 (f), making buyers liable for

---

[4] The Commission also found that the interstate commerce requirement of § 2 (f) was satisfied.

[5]

LEdHN[2B][] [2B]**HN3**[] Under §§ 2 (a) and (b) of the Act, a seller who can establish either that a price differential was cost justified or offered in good faith to meet competition has a complete defense to a charge of price discrimination under the Act. *Standard Oil Co*. v. FTC, 340 U.S. 231. See n. 1, *supra*.

With respect to the meeting-competition defense, the Commission stated that even though Borden as the seller might have had a meeting-competition defense, A&P as the buyer did not have such a defense because it knew that the bid offered was, in fact, better than the Bowman bid. With respect to the cost-justification defense, the Commission found that Commission counsel had met the initial burden of going forward as required by this Court's decision in Automatic Canteen Co. of America v. FTC, 346 U.S. 61, and that A&P had not then satisfied its burden of showing that the prices were cost justified, or that it did not know that they were not.

The Commission upheld the Administrative Law Judge's dismissal of Count III of the complaint.

[6] The Court of Appeals, like the Commission, relied on *Kroger Co*. v. FTC, 438 F.2d 1372 (CA6), for the proposition that a buyer can be liable under § 2 (f) of the Act even if the seller has a meeting-competition defense. The *Kroger* case involved a buyer who had made deliberate misrepresentations to a seller in order to induce price concessions. While the Court of Appeals in this case did not find that A&P had made any affirmative misrepresentations, it viewed the distinction between a "lying buyer" and a buyer who knowingly accepts the lower of two bids as without legal significance. See n. 15, *infra*.

[7] H. R. 8442, 74th Cong., 1st Sess. (1935); S. 3154, 74th Cong., 1st Sess. (1935).

inducing or receiving price discriminations by sellers, was the product of a belated floor amendment near the conclusion of the Senate debates. [8]

[**14]** ***LEdHN[3]***[] [3]As finally enacted, *§ 2 (f)* provides:

HN4[] " **[***161]** That it shall be unlawful for any person engaged in commerce, in the course of such commerce, knowingly to induce or receive a discrimination in price *which is prohibited by this section*." (Emphasis added.)

Liability under *§ 2 (f)* thus is limited to situations where the price discrimination is one "which is prohibited by this section." While the phrase "this section" refers to the entire *§ 2* of the Act, only subsections (a) and (b) dealing with seller liability involve discriminations in price. Under the plain meaning of *§ 2 (f)*, therefore, ***HN5***[] a buyer cannot be liable if a prima facie case could not be established against a seller or if the seller has an affirmative defense. In either situation, there is no price discrimination "prohibited by this section." [9] **[*77]** The legislative history of *§ 2 (f)* fully confirms the conclusion that buyer liability **[****15]** under *§ 2 (f)* is dependent on seller liability under *§ 2 (a)*. [10]

[**16]** The derivative nature of liability under *§ 2 (f)* was recognized by this Court in *Automatic Canteen Co. of America v. FTC, 346 U.S. 61*. In that case, the Court stated that even if the Commission has established a prima facie case of price discrimination, a buyer does not violate *§ 2 (f)* if the lower prices received are either within one of the seller's defenses or not known by the buyer not to be within one of those defenses. The Court stated:

"Thus, at the least, we can be confident in reading the words in *§ 2 (f)*, 'a discrimination in price which is prohibited by this section,' as a reference to the substantive prohibitions against discrimination by sellers defined elsewhere in the Act. It is therefore apparent that the discriminatory price that buyers are forbidden by *§ 2 (f)* to induce cannot include price differentials that are not forbidden to sellers in other sections of the Act . . . . For we are not dealing simply with a 'discrimination in price'; the 'discrimination in price' in *§ 2 (f)* must be one 'which is prohibited by this section.' Even if any price differential were to be comprehended within the term 'discrimination in price,' *§ **[****17]** 2 (f)*, which speaks of prohibited discriminations, cannot be read as declaring out of bounds price differentials within one or more of the 'defenses' available to sellers, such as that the price differentials **[*78]** reflect cost differences, fluctuating market conditions, or bona fide attempts to meet competition, as those defenses **[**932]** are set out in the **[***162]** provisos of *§§ 2 (a)* and *2 (b)*." *346 U.S., at 70-71* (footnotes omitted).

The Court thus explicitly recognized that a buyer cannot be held liable under *§ 2 (f)* if the lower prices received are justified by reason of one of the seller's affirmative defenses.

III

---

[8] F. Rowe, Price Discrimination Under the Robinson-Patman Act 423 (1962). *Section 2 (f)* has been described by commentators as an "afterthought." *Id*., at 421; J. McCord, Commentaries on the Robinson-Patman Act 96 (1969).

[9] Commentators have recognized that a finding of buyer liability under *§ 2 (f)* is dependent on a finding of seller liability under *§ 2 (a)*. McCord, *supra*, at 96 ("*[Section] 2 (f)* cannot be enforced if a prima facie case could not be established against the seller on the basis of the transaction in question under *Section 2 (a)* or if he could sustain an affirmative defense thereto"); Rowe, *supra*, at 421 ("the legal status of the buyer is derivative from the seller's pricing legality under the Act"); H. Shniderman, Price Discrimination in Perspective 136 (1977) (a buyer can be liable under *§ 2 (f)* only if the price received "cannot be excused by any defenses provided to the seller").

[10] In presenting the Conference Report to the House, Representative Utterback summarized the meaning of *§ 2 (f)* by stating: "This paragraph makes the buyer liable for knowingly inducing or receiving any discrimination in price which is unlawful under the first paragraph *[§ 2 (a)]*] of the amendment." 80 Cong. Rec. 9419 (1936).

LEdHN[1B][] [1B]The petitioner, relying on this plain meaning of *§ 2 (f)* and the teaching of the *Automatic Canteen* case, argues that it cannot be liable under *§ 2 (f)* if Borden had a valid meeting-competition defense. The respondent, on the other hand, argues that the petitioner may be liable even assuming that Borden had such a defense. The meeting-competition defense, the respondent contends, must in these circumstances be judged from the point of view of **[****18]** the buyer. Since A&P knew for a fact that the final Borden bid beat the Bowman bid, it was not entitled to assert the meeting-competition defense even though Borden may have honestly believed that it was simply meeting competition. Recognition of a meeting-competition defense for the buyer in this situation, the respondent argues, would be contrary to the basic purpose of the Robinson-Patman Act to curtail abuses by large buyers.

A

The short answer to these contentions of the respondent is that Congress did not provide in *§ 2 (f)* that a buyer can be liable even if the seller has a valid defense. The clear language of *§ 2 (f)* states that a buyer can be liable only if he receives a price discrimination "prohibited by this section." ***HN6***[] If a seller has a valid meeting-competition defense, there is simply no prohibited price discrimination.

A similar attempt to amend the Robinson-Patman Act judicially was rejected by this Court in *FTC v. Simplicity Pattern Co.,* ***[*79]*** *360 U.S. 55*. There the Federal Trade Commission had found that a manufacturer of dress patterns had **[****19]** violated *§ 2 (e)* of the Clayton Act, as amended by the Robinson-Patman Act, by providing its larger customers services and facilities not offered its smaller customers. [11] The manufacturer attempted to defend against this charge by asserting that there had been no injury to competition and that its discriminations in services were cost justified. Since liability under *§ 2 (e)*, unlike *§ 2 (a)*, does not depend upon competitive injury or the absence of a cost-justification defense, the manufacturer's primary argument was that "it would be 'bad law and bad economics' to make discriminations unlawful even where they may be accounted for by cost differentials or where there is no competitive injury." *360 U.S., at 67* (footnote omitted). The Court rejected this argument. Recognizing that "this Court is not in a position to review the economic wisdom of Congress, **[***163]** "the Court stated that "[we] cannot supply what Congress has studiously omitted." *Ibid*. (footnote omitted). The respondent's attempt in the present case to rewrite *§ 2 (f)* to hold a buyer liable even though there is no discrimination in price "prohibited by this section" must be rejected for **[****20]** the same reason. [12]

[**21]** **[*80]** **[**933]** B

In the *Automatic Canteen* case, the Court warned against interpretations of the Robinson-Patman Act which "extend beyond the prohibitions of the Act and, in so doing, help give rise to a price uniformity and rigidity in open conflict with the purposes of other antitrust legislation." *346 U.S., at 63*. Imposition of *§ 2 (f)* liability on the petitioner in this case would lead to just such price uniformity and rigidity. [13]

---

[11] *Section 2 (e)* provides:

HN7[] "It shall be unlawful for any person to discriminate in favor of one purchaser against another purchaser or purchasers of a commodity bought for resale, with or without processing, by contracting to furnish or furnishing, or by contributing to the furnishing of, any services or facilities connected with the processing, handling, sale, or offering for sale of such commodity so purchased upon terms not accorded to all purchasers on proportionally equal terms." *15 U. S. C. § 13 (e)*.

[12] Contrary to the respondent's suggestion, this interpretation of *§ 2 (f)* is in no way inconsistent with congressional intent. "[The] buyer whom Congress in the main sought to reach was the one who, knowing full well that there was little likelihood of a defense for the seller, nevertheless proceeded to exert pressure for lower prices." *Automatic Canteen Co. of America v. FTC, 346 U.S., at 79*. Here, by contrast, we conclude that a buyer is not liable if the seller *does* have a defense under *§ 2 (b)*.

[13] More than once the Court has stated that the Robinson-Patman Act should be construed consistently with broader policies of the antitrust laws. *United States v. United States Gypsum Co., 438 U.S. 422*; *Automatic Canteen Co. of America v. FTC, supra, at 74*.

In a competitive market, uncertainty among sellers will cause them to compete for business by offering buyers lower prices. Because of the evils of collusive action, the Court has held that **[****22]** ***HN8***[] the exchange of price information by competitors violates the Sherman Act. *United States v. Container Corp., 393 U.S. 333*. Under the view advanced by the respondent, however, a buyer, to avoid liability, must either refuse a seller's bid or at least inform him that his bid has beaten competition. Such a duty of affirmative disclosure would almost inevitably frustrate competitive bidding and, by reducing uncertainty, lead to price matching and anticompetitive cooperation among sellers. [14]

Ironically, the Commission itself, in dismissing the charge under § 5 of the Federal Trade Commission Act in this case, recognized the dangers inherent in a duty of affirmative disclosure:

"The imposition of a duty **[****23]** of affirmative disclosure, applicable to a buyer whenever a seller states that his offer is **[*81]** intended to meet competition, is contrary to normal business practice and, we think, contrary to the public interest.

. . . .

"We fear a scenario where the seller automatically attaches a meeting competition caveat to every bid. The buyer would then state whether such bid meets, beats, or loses to another bid. The seller would then submit a second, a third, and perhaps a fourth bid until finally he is able to ascertain his competitor's bid." *87 F. T. C. 1047, 1050-1051*.

The effect of the finding that the **[***164]** same conduct of the petitioner violated *§ 2 (f)*, however, is to impose the same duty of affirmative disclosure which the Commission condemned as anticompetitive, "contrary to the public interest," and "contrary to normal business practice," in dismissing the charge under § 5 of the Federal Trade Commission Act. Neither the Commission nor the Court of Appeals offered any explanation for this apparent anomaly.

As in the *Automatic Canteen* case, we decline to adopt a construction of *§ 2 (f)* that is contrary to its plain meaning and would lead **[****24]** to anticompetitive results. Accordingly, we hold that ***HN9***[] a buyer who has done no more than accept the lower of two prices competitively offered does not violate *§ 2 (f)* provided the seller has a meeting-competition defense. [15]

---

[14] A duty of affirmative disclosure might also be difficult to enforce. In cases where a seller offers differing quantities or a different quality product, or offers to serve the buyer in a different manner, it might be difficult for the buyer to determine when disclosure is required.

[15] In *Kroger Co*. v. *FTC, 438 F.2d 1372*, the Court of Appeals for the Sixth Circuit held that a buyer who induced price concessions by a seller by making deliberate misrepresentations could be liable under *§ 2 (f)* even if the seller has a meeting-competition defense.

This case does not involve a "lying buyer" situation. The complaint issued by the FTC alleged that "A&P accepted the said offer of Borden with knowledge that Borden had granted a substantially lower price than that offered by the only other competitive bidder and without notifying Borden of this fact." The complaint did not allege that Borden's second bid was induced by any misrepresentation. The Court of Appeals recognized that the *Kroger* case involved a "lying buyer," but stated that there was no meaningful distinction between the situation where "the buyer lies or merely keeps quiet about the nature of the competing bid." *557 F.2d 971, 983*.

Despite this background, the respondent argues that A&P did engage in misrepresentations and therefore can be found liable as a "lying buyer" under the rationale of the *Kroger* case. The misrepresentation relied upon by the respondent is a statement allegedly made by a representative of A&P to Borden after Borden made its second bid which would have resulted in annual savings to A&P of $ 820,000. The A&P representative allegedly told Borden to "sharpen your pencil a little bit because you are not quite there." But the Commission itself referred to this comment only to note its irrelevance, and neither the Commission nor

[**25] [*82] [**934]** IV

Because both the Commission and the Court of Appeals proceeded on the assumption that a buyer who accepts the lower of two competitive bids can be liable under *§ 2 (f)* even if the seller has a meeting-competition defense, there was not a specific finding that Borden did in fact have such a defense. But it quite clearly did.

A

LEdHN[4][] [4]***HN10***[] The test for determining when a seller has a valid meeting-competition defense is whether a seller can "show the existence of facts which would lead a reasonable and prudent person to believe that the granting of a lower price would in fact meet the equally low price of a competitor." *FTC v. A. E. Staley Mfg. Co., 324 U.S. 746, 759-760*. "A good-faith belief, rather than absolute certainty, that a price concession is being offered to meet an equally low price offered by a competitor is sufficient to satisfy the *§ 2 (b)* defense." *United States* ***[*83]*** *v. United States Gypsum Co., 438 U.S. 422, 453*.[16] **[***165] [****26]** Since good faith, rather than absolute certainty, is the touchstone of the meeting-competition defense, a seller can assert the defense even if it has unknowingly made a bid that in fact not only met but beat his competition. *Id., at 454*.

B

LEdHN[5][] [5] **[****27]** Under the circumstances of this case, Borden did act reasonably and in good faith when it made its second bid. The petitioner, despite its longstanding relationship with Borden, was dissatisfied with Borden's first bid and solicited offers from other dairies. The subsequent events are aptly described in the opinion of the Commission:

"Thereafter, on August 31, 1965, A&P received an offer from Bowman Dairy that was lower than Borden's August 13 offer. On or about September 1, 1965, Elmer Schmidt, A&P's Chicago unit buyer, telephoned Gordon Tarr, Borden's Chicago chain store sales manager, and stated, 'I have a bid in my pocket. You [Borden] people are so far out of line it is not even funny. You are not even in the ball park.' Although Tarr asked Schmidt for some details, Schmidt said that he could not tell Tarr anything except that a $ 50,000 improvement in Borden's bid 'would not be a drop in the [bucket].' Contrary to its usual practice, A&P then offered Borden the opportunity **[*84]** to submit another bid." *87 F. T. C., at 1048* (Footnotes and record citations omitted.)

Thus, Borden was informed by the petitioner that it was in danger of losing its **[****28] [**935]** A&P business in the Chicago area unless it came up with a better offer. It was told that its first offer was "not even in the ball park" and that a $ 50,000 improvement "would not be a drop in the bucket." In light of Borden's established business relationship with the petitioner, Borden could justifiably conclude that A&P's statements were reliable and that it was necessary to make another bid offering substantial concessions to avoid losing its account with the petitioner.

---

the Court of Appeals mentioned it in considering the *§ 2 (f)* charge against A&P. This is quite understandable, since the comment was allegedly made *after* Borden made its second bid and therefore cannot be said to have induced the bid as in the *Kroger* case.

Because A&P was not a "lying buyer," we need not decide whether such a buyer could be liable under *§ 2 (f)* even if the seller has a meeting-competition defense.

[16] Recognition of the right of a seller to meet a lower competitive price in good faith may be the primary means of reconciling the Robinson-Patman Act with the more general purposes of the antitrust laws of encouraging competition between sellers. As the Court stated in *Standard Oil Co*. v. *FTC, 340 U.S., at 249*:

"We need not now reconcile, in its entirety, the economic theory which underlies the Robinson-Patman Act with that of the Sherman and Clayton Acts. It is enough to say that Congress did not seek by the Robinson-Patman Act either to abolish competition or so radically to curtail it that a seller would have no substantial right of self-defense against a price raid by a competitor."

Borden was unable to ascertain the details of the Bowman bid. It requested more information about the bid from the petitioner, but this request was refused. It could not then attempt to verify the existence and terms of the competing offer from Bowman without risking Sherman Act liability. *United States v. United States Gypsum Co., supra.* Faced with a substantial loss of business and unable to find out the precise details of the competing bid, Borden made another offer stating that it was doing so in order to meet competition. Under these circumstances, the conclusion is virtually inescapable that in making that offer Borden acted in a reasonable and good-faith effort to meet **[****29]** its competition, **[***166]** and therefore was entitled to a meeting-competition defense. [17]

[**30]**

[*85] ***LEdHN[1C]***[] [1C]Since Borden had a meeting-competition defense and thus could not be liable under *§ 2 (b)*, the petitioner who did no more than accept that offer cannot be liable under *§ 2 (f)*. [18]

Accordingly, the judgment is reversed.

It is so ordered.

MR. JUSTICE STEVENS took no part in the consideration or decision of this case.

Concur by: WHITE (In Part)

Dissent by: WHITE (In Part); MARSHALL (In Part)

Dissent

MR. JUSTICE WHITE, concurring in part and dissenting in part.

I concur in Parts I, II, and III of the Court's opinion, but dissent from Part IV. Because it was thought the issue was irrelevant where the buyer knows that the price offered is lower than necessary to meet competition, neither the Commission nor the Court of Appeals decided whether **[****31]** Borden itself would have had a valid meeting-competition defense. The Court should not decide this question here, but should remand to the Commission, whose job it is initially to consider such matters.

For the reason stated by the Commission and the Court of Appeals, I am also convinced that the United States made a sufficient, unrebutted showing that Borden would not have a cost-justification defense to a Robinson-Patman Act charge.

MR. JUSTICE MARSHALL, dissenting in part.

---

[17] The facts of this case are thus readily distinguishable from *Corn Products Co*. v. *FTC, 324 U.S. 726*, and *FTC v. A. E. Staley Mfg. Co., 324 U.S. 746*, in both of which the Court held that a seller had failed to establish a meeting-competition defense. In the *Corn Products* case, the only evidence to rebut the prima facie case of price discrimination was testimony by witnesses who had no personal knowledge of the transactions in question. Similarly, in the *Staley Mfg. Co*. case, unsupported testimony from informants of uncertain character and reliability was insufficient to establish the defense. In the present case, by contrast, the source of the information was a person whose reliability was not questioned and who had personal knowledge of the competing bid. Moreover, Borden attempted to investigate by asking A&P for more information about the competing bid. Finally, Borden was faced with a credible threat of a termination of purchases by A&P if it did not make a second offer. All of these factors serve to show that Borden did have a valid meeting-competition defense. See *United States v. United States Gypsum Co., 438 U.S., at 454*.

[18] Because we hold that the petitioner is not liable under *§ 2 (f)*, we do not reach the question whether Borden might also have had a cost-justification defense under *§ 2 (a)*.

I agree with the Court that the Federal Trade Commission and the Court of Appeals applied the wrong legal standard in **[*86]** assessing A&P's liability under the Robinson-Patman Act. However, I cannot join the Court's interpretation of *§ 2 (f)* as precluding buyer liability under this Act unless the seller could also be found liable for price **[**936]** discrimination. Neither the language nor the sparse legislative history of *§ 2 (f)* justifies this enervating standard for the determination of buyer liability. To the contrary, the Court's construction disregards the congressional purpose to curtail the coercive practices of chainstores and other large buyers. **[***167]** Having formulated a new legal **[****32]** standard, the Court then applies it here in the first instance rather than remanding the case to the Commission. Given the numerous ambiguities in the record, I believe the Court thereby improperly arrogates to itself the role of the trier of fact.

I

Section 2 (f) provides that "[it] shall be unlawful for any person . . . knowingly to induce or receive a discrimination in price *which is prohibited by this section*." (Emphasis added.) The Court interprets the italicized language as "plainly meaning" that a buyer can be found liable for knowingly inducing price discrimination only if his seller is first proved liable under *§§ 2 (a)* and *2 (b)*. *Ante*, at 76, 81. Under this construction, proceedings involving only the Commission and a buyer will turn upon proof of a seller's liability, and whenever a seller could successfully claim the meeting-competition defense, the buyer must be exonerated.

In my view, the language of *§ 2 (f)* does not compel this circuitous method of establishing buyer liability. *Sections 2 (a)* and *2 (b)* of the Act define the elements of price discrimination and the affirmative defenses available to sellers. When Congress extended liability to buyers **[****33]** who encourage price discrimination, a ready means of defining the prohibition was to rely on the elements and defenses already delineated in *§§ 2 (a)* and *2 (b)*. Thus, the phrase "which is prohibited by this section" in *§ 2 (f)* incorporates these elements and **[*87]** defenses by reference, making them applicable to buyers. So construed, *§ 2 (f)* simply means that the same elements of a prima facie case must be established and the same basic affirmative defenses available, whether buyer or seller liability is in issue. The section does not require that another party actually satisfy all of the conditions of *§§ 2 (a)* and *2 (b)* before buyer liability can even be considered. Determining buyer and seller liability independently, I believe, places less strain on the "plain meaning" of the language of *§ 2 (f)* than does the absolutely derivative standard the majority announces today.

In construing *§ 2 (f)*, the Court relies on Congress' delay in adding the section to the final bill and on a remark by Representative Utterback during the legislative debates. *Ante*, at 75-77, and n. 10. The delay provides little logical justification for the Court's interpretation; rather, it more **[****34]** likely reflects Congress' late realization that halting the abusive practices of buyers [1] could not be accomplished solely through imposition of liability on sellers. Representative Utterback's statement, 80 Cong. Rec. 9419 (1936), amounts to a slight paraphrase of *§ 2 (f)* and in no way supports **[***168]** the Court's derivative standard.

[**35]** I agree with the Court's suggestion, *ante*, at 80, that we must resolve the dilemma confronting a buyer who properly invites a seller to meet a competitor's price and then fortuitously **[*88]** obtains a lower bid. Congress could not have expected the buyer to choose between asking the seller to increase the bid to a specific price or accepting the lower bid and facing liability under *§ 2 (f)*. Rather, it must have intended some accommodation **[**937]** for buyers who act in good faith yet receive bids that beat competition. This does not mean, however, that a buyer should be liable under *§ 2 (f)* only if his seller also would be liable. That solution to the buyer's dilemma would enable him to manufacture his own defense by misrepresenting to a seller the response needed to meet a

[1] See S. Rep. No. 1502, 74th Cong., 2d Sess. (1936); H. R. Rep. No. 2287, 74th Cong., 2d Sess., 3-7, 17 (1936); H. R. Conf. Rep. No. 2951, 74th Cong., 2d Sess. (1936); FTC, Final Report on the Chain-Store Investigation, S. Doc. No. 4, 74th Cong., 1st Sess. (1935); *FTC v. Henry Broch & Co., 363 U.S. 166, 168-169 (1960)*; W. Patman, Complete Guide to the Robinson-Patman Act 7-10 (1963); F. Rowe, Price Discrimination Under the Robinson-Patman Act 8-14 (1962). See generally Hearings on Price Discrimination (S. 4171) before a Subcommittee of the Senate Committee on the Judiciary, 74th Cong., 2d Sess. (1936); Hearings on H. R. 8442, H. R. 4995, and H. R. 5062 before the House Committee on the Judiciary, 74th Cong., 1st Sess. (1935).

competitor's bid and then allowing the seller to rely in good faith on incorrect information. The Court purports to reserve this "lying buyer" issue, *ante*, at 81-82, n. 15, but the derivative standard it adopts today belies the reservation. If "prohibited by this section" means that a buyer's liability depends on that of the seller, then absent seller liability, the buyer's conduct and bad **[****36]** faith are necessarily irrelevant.

I would hold that under § 2 (f), the Robinson-Patman Act defenses must be available to buyers on the same basic terms as they are to sellers. To be sure, some differences in the nature of the defenses would obtain because of the different bargaining positions of sellers and buyers. With respect to the meeting-competition defense at issue here, a seller can justify a price discrimination by showing that his lower price was offered in "good faith" to meet that of a competitor. *Ante*, at 82-83; *United States v. United States Gypsum Co., 438 U.S. 422, 450-455 (1978)*. In my view, a buyer should be able to claim that defense -- independently of the seller -- if he acted in good faith to induce the seller to meet a competitor's price, regardless of whether the seller's price happens to beat the competitor's. But a buyer who induces the lower bid by misrepresentation should not escape Robinson-Patman Act liability. See *Kroger Co*. v. *FTC, 438 F.2d 1372* (CA6) (Clark, J.), cert. denied, *404 U.S. 871 (1971)*. This definition of the meeting-competition defense both extricates buyers from an impossible **[****37]** dilemma and respects the congressional **[*89]** intent to prevent buyers from abusing their market power to gain competitive advantage. [2]

[**38]** **[***169]** *Automatic Canteen Co. of America v. FTC, 346 U.S. 61 (1953)*, is entirely consistent with this interpretation of § 2 (f). The issue there concerned the allocation of "the burden of coming forward with evidence under § 2 (f) of the Act," *346 U.S., at 65*, not the precise contours of the elements and defenses that determine the scope of buyer liability. *Automatic Canteen*'s general discussion of § 2 (f)'s substantive requirements, quoted *ante*, at 77-78, merely explains that the affirmative defenses "available to sellers" must also be available to buyers. Far from pronouncing that buyer liability is derivative, *Automatic Canteen* began with the observation that § 2 (f) is *"roughly the counterpart*, as to buyers, of sections of the Act dealing with discrimination by sellers." *346 U.S., at 63* (emphasis added). [3]

[**39]** **[*90]** **[**938]** II

In my judgment, the numerous ambiguities in the record dictate that this case be remanded to the Commission. The Court, however, avoids a remand by concluding in the first instance that A&P's seller necessarily had a meeting-competition defense. [4] In so doing, the Court usurps the factfinding function best performed by the

---

[2] See S. Rep. No. 1502, 74th Cong., 2d Sess., 3-4, 7 (1936); H. R. Rep. No. 2287, 74th Cong., 2d Sess., 3-7, 14-17 (1936); Patman, *supra*, at 7-10, 148-151; Rowe, *supra*, at 8-23.

The Court recently noted in *United States v. United States Gypsum Co., 438 U.S. 422, 455 n. 30 (1978)*, that "[it] may also turn out that sustained enforcement of § 2 (f) . . . will serve to bolster the credibility of buyers' representations and render reliance thereon by sellers a more reasonable and secure predicate for a finding of good faith under § 2 (b)." (Citation omitted.) But if neither a buyer nor a seller can be liable when the seller relies in good faith on the buyer's misrepresentations, then enforcement of § 2 (f) will not "bolster the credibility" of buyers. Thus, the derivative standard of liability adopted by the Court today is inconsistent with the premise underlying the Court's suggestion in *United States Gypsum*, see Note, The Supreme Court, 1977 Term, 92 Harv. L. Rev. 57, 288, 291-294 (1978), and it eliminates one means of reassuring sellers that they may rely on buyer representations.

[3] Given this preface to *Automatic Canteen*, language in that opinion provides little support for the Court's adoption today of a derivative standard with respect to the buyer's meeting-competition defense. Moreover, to the extent the majority believes its resort to literal construction of § 2 (f) forecloses further inquiry, it ignores the broader teaching of *Automatic Canteen*. That case adopted a common-sense approach for interpreting the often ambiguous Robinson-Patman Act, tempering a "merely literal reading of the language" with considerations of "fairness and convenience" when necessary to achieve Congress' purpose. *346 U.S., at 79*, and n. 23. On that basis, *Automatic Canteen* allocated to the Commission the burden of production regarding a buyer's cost-justification defense, even though the Commission does not bear that burden in a proceeding against a seller. *Id., at 75-76*; *FTC v. Morton Salt Co., 334 U.S. 37, 44-45 (1948)*. Indeed, the Court's interpretation of § 2 (f) today, which places buyers in the litigating position of their sellers, may also be incompatible with *Automatic Canteen*'s specific holding on the burden of production.

Commission. [5] Neither the Administrative Law Judge, the Commission, nor the Court of Appeals determined that Borden would have been entitled to claim the meeting-competition defense. Indeed, the Administrative Law Judge suggested the opposite, 87 F. T. C. 962, 1021 (1976), and the Commission stated:

"We believe that it is very probable that Borden did *not* have such a defense. To have a meeting competition **[*91]** defense, the record must demonstrate the existence of facts **[***170]** which would lead a reasonable and prudent person to conclude that the lower price would, in fact, meet the competitor's price. As noted, Borden had serious doubts concerning whether the competing bid was legal. Specifically, it believed that the other bid only considered direct costs. It should have asked A&P for more information **[****40]** about the competing bid. By not making the request, it was not acting prudently. As the record clearly indicates, A&P had knowledge of Borden's belief that other dairies might submit bids that did not include all costs." 87 F. T. C. 1047, 1057 n. 19 (1976) (citations omitted; emphasis in original).

[**41]** Furthermore, if the Court truly intends to avoid deciding the "lying buyer" issue, then it should remand the case for determination of whether the exception applies here. Testimony before the Administrative Law Judge directly raised the possibility that A&P misled Borden to believe a still lower price was necessary than Borden had offered when it first responded to the Bowman bid. App. 117a-118a, 123a-124a, 141a-142a. [6] Both the Administrative Law **[**939]** Judge and the **[*92]** Commission credited that testimony, see 87 F. T. C., at 979, 1021-1022; 87 F. T. C., at 1049 n. 3, but since evidence of misrepresentation was not material under the standard they applied, there were no clear findings of fact on the point. Under these circumstances, this Court should not attempt to elide such testimony by the unsubstantiated conclusion that Borden's final bid was unaffected by any misrepresentation. *Ante*, at 81-82, n. 15; see n. 6, *supra*.

[**42]** Accordingly, I dissent from the Court's adoption of a derivative standard for determining buyer liability and its resolution of disputed factual issues without a remand.

References

---

[4] Because the Court reverses the judgment without remanding for further consideration and does not expressly reach the merits of the cost-justification issue raised by A&P, *ante*, at 85 n. 18, I need not address that issue either.

[5] Considering the recent admonition in United States Gypsum, supra, at 456 n. 31, that "[the] case-by-case interpretation and elaboration of the § 2 (b) defense is properly left to the other federal courts and the FTC in the context of concrete fact situations," the Court's action is particularly inappropriate.

While I question the Court's decision to undertake resolution of this factual question, without even determining which party bore the burden of persuasion, I do not understand Part IV of its opinion as purporting to modify in any sense what was said last Term in *United States Gypsum* about the scope of the meeting-competition defense for sellers.

[6] The Court's opinion creates the impression that Borden submitted only two proposals, *ante*, at 81-82, n. 15, 83-84. In fact, A&P induced Borden to make a third proposal, even though the second was already more favorable than Bowman's.

When Borden initially responded to Bowman's bid, the A&P representative rejected Borden's offer on the ground that it included milk sold in glass gallon containers, whereas other bidders supposedly had not included that item. Actually, Bowman's bid had included glass gallons and A&P had subsequently decided against using glass containers. 87 F. T. C. 962, 979 (1976); App. 73a-74a, 116a-118a, 257a-260a, 774a-775a. The effect of forcing Borden to delete milk sold in glass gallons from the proposal without raising the overall bid, was to increase the savings to A&P on other products still covered because part of the promised savings had been derived from the sale of the cheaper glass gallons. See 87 F. T. C., at 979-980. In addition, while Borden was preparing a third proposal to reflect the deletion, A&P suggested that Borden make further price reductions, saying "'sharpen your pencil a little bit because you are not quite there.'" App. 118a. As a result, Borden reduced its prices still further to yield additional savings of approximately $ 5,000 to $ 8,000. The bid finally accepted by A&P incorporated these price reductions as well as those attributable to the deletion of glass gallons. See id., at 117a-118a, 123a-124a, 141a-142a.

The starting point in any case involving the meaning of a statute is the language of the statute itself.

Insurance Law > Contract Formation > General Overview

Insurance Law > Contract Formation

HN3[] **Insurance Law, Contract Formation**

The primary elements of an insurance contract are the spreading and underwriting of a policyholder's risk. It is characteristic of insurance that a number of risks are accepted, some of which involve losses, and that such losses are spread over all the risks so as to enable the insurer to accept each risk at a slight fraction of the possible liability upon it.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Insurance Law > Contract Formation > General Overview

HN4[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

In enacting the McCarran-Ferguson Act *15 U.S.C.S. § 1011*, Congress was concerned with: The relationship between insurer and insured, the type of policy which could be issued, its reliability, interpretation, and enforcement--these were the core of the "business of insurance." The focus is on the relationship between the insurance company and the policyholder.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Governments > Legislation > Enactment > Vetoes

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > Antitrust Regulations

Insurance Law > Industry Practices > General Overview

HN5[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

Congress provided in *15 U.S.C.S. § 1012(b)* that the antitrust laws shall be applicable unless the activities of insurance companies are the business of insurance and regulated by state law. Moreover, under *15 U.S.C.S. § 1013(b)* the Sherman Act, *15 U.S.C.S. § 1*, was made applicable in any event to acts of boycott, coercion, or intimidation. To allow the states time to adjust to the applicability of the antitrust laws to the insurance industry, Congress imposed a 3-year moratorium. After the expiration of the moratorium on July 1, 1948, however, Congress clearly provided that the antitrust laws would be applicable to the business of insurance to the extent that such business is not regulated by state law.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Business & Corporate Compliance > ... > Industry Practices > Federal Regulations > Antitrust Regulations

Insurance Law > Industry Practices > General Overview

HN6[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

While the power of the states to tax and regulate insurance companies was reaffirmed, the McCarran-Ferguson Act (the Act), *15 U.S.C.S. § 1011*, also established that the insurance industry would no longer have a blanket exemption from the antitrust laws. It is true that *§ 2 (b)* of the Act, *15 U.S.C.S. § 1012(b)* does create a partial exemption from those laws. Perhaps more significantly, however, that section, and the Act as a whole, embody a legislative rejection of the concept that the insurance industry is outside the scope of the antitrust laws.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

HN7[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

References to the meaning of the business of insurance in the legislative history of the McCarran-Ferguson Act, *15 U.S.C.S. § 1011*, strongly suggest that Congress understood the business of insurance to be the underwriting and spreading of risk.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

HN8[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

Congress certainly did not intend the definition of the business of insurance to be broader than its commonly understood meaning.

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Governments > Legislation > Interpretation

HN9[] **Antitrust & Trade Law, Exemptions & Immunities**

Exemptions from the antitrust laws are to be narrowly construed. This doctrine is not limited to implicit exemptions from the antitrust laws, but applies with equal force to express statutory exemptions.

Decision

Insurer-pharmacy agreements implementing prescription drug benefit for insurer's policyholders, held not exempt from antitrust laws as "business of insurance" under McCarran-Ferguson Act (*15 USCS 1012(b)*).

Summary

In order to implement provisions of its insurance policies which entitled policyholders to obtain prescription drugs, a Texas insurance company entered into agreements with pharmacies in Texas whereby the pharmacies agreed to furnish the insurer's policyholders with prescription drugs at the price of two dollars per prescription and the insurance company agreed to reimburse the pharmacies for their costs in acquiring prescription drugs sold to policyholders. Alleging violations of federal antitrust laws arising from the insurer-pharmacy agreements, certain pharmacies which had not entered into agreements with the insurance company brought an action in the United States District Court for the Western District of Texas, claiming that the insurance company and pharmacies with which it had entered into agreements had violated 1 of the Sherman Act (*15 USCS 1*) by agreeing to fix the retail prices of drugs and pharmaceuticals, and that their activities had caused the insurance company's policyholders not to deal with certain of the plaintiffs. The District Court granted summary judgment to the defendants on the ground that the agreements were exempt from federal antitrust laws under the McCarran-Ferguson Act (*15 USCS 1011 et seq.*), which, through 2(b) of the Act (*15 USCS 1012(b)*), renders the federal antitrust laws inapplicable to the "business of insurance" to the extent such business is regulated by state law and is not subject to the "boycott" exception of 3(b) of the Act (*15 USCS 1013(b)*), the District Court having found that for purposes of 2(b) of the Act, the agreements constituted the "business of insurance" regulated by Texas and that the agreements were not "boycotts" within the meaning of 3(b) of the *Act (415 F Supp 343*). The United States Court of Appeals for the Fifth Circuit reversed on appeal, holding that the agreements in question were not the "business of insurance" within the meaning of 2(b) of the *Act (556 F2d 1375*).

On certiorari, the United States Supreme Court affirmed. In an opinion by Stewart, J., joined by White, Blackmun, Rehnquist, and Stevens, JJ., it was held that the agreements between the insurance company and the pharmacies did not constitute the "business of insurance" for purposes of 2(b) of the McCarran-Ferguson Act, since the agreements did not involve any underwriting or spreading of risks, but were mere arrangements for the purchase of goods and services by the insurance company, and since the agreements were not between an insurer and insureds, but were separate contractual arrangements between the insurance company and parties engaged in the sale and distribution of goods and services other than insurance.

Brennan, J., joined by Burger, Ch. J., and Marshall, and Powell, JJ., dissenting, expressed the view that some "provider" agreements negotiated to carry out an insurer's policy obligations to its insureds should be considered part of the "business of insurance" for purposes of the McCarran-Ferguson Act, and that the specific agreements at issue in the case at bar should be considered part of such business.

Headnotes

MONOPOLIES §29 > McCarran-Ferguson Act -- "business of insurance" -- exemption from federal antitrust laws -- agreements between insurer and pharmacies -- > Headnote:
LEdHN[1A][] [1A]***LEdHN[1B]***[] [1B]***LEdHN[1C]***[] [1C]***LEdHN[1D]***[] [1D]

Agreements between an insurance company and pharmacies, whereby the pharmacies agree to furnish the insurer's policyholders with prescription drugs at a stated, fixed, relatively small price per prescription in return for the insurer's agreeing to reimburse the pharmacies for their costs in acquiring such prescription drugs do not constitute the "business of insurance" for purposes of the McCarran-Ferguson Act (*15 USCS 1011 et seq.*), which operates so as to render the federal antitrust laws inapplicable to the "business of insurance" to the extent such business is regulated by state law (*15 USCS 1012(b)*) and is not subject to the Act's "boycott" exception (*15 USCS 1013(b)*), since the agreements do not involve any underwriting or spreading of risk, but constitute mere arrangements for the purchase of goods and services by the insurer, and since the agreements are not between an insurer and insureds, but are separate contractual arrangements between an insurance company and parties engaged in the sale and distribution of goods and services other than insurance. (Brennan, J., Burger, Ch. J., and Marshall and Powell, JJ., dissented from this holding.)

COMMERCE §103(1) > STATUTES §163 > construction -- McCarran-Ferguson Act -- language -- > Headnote:
LEdHN[2][] [2]

The starting point in a case involving construction of the McCarran-Ferguson Act (*15 USCS 1011 et seq.*), setting forth the policy favoring regulation of the business of insurance by the state--like the starting point in any case involving the meaning of a statute--is the language of the statute itself.

MONOPOLIES §29 > McCarran-Ferguson Act -- exemption from federal antitrust laws -- "business of insurance" -- > Headnote:
LEdHN[3][] [3]

Section 2(b) of the McCarran-Ferguson Act (*15 USCS 1012(b)*), declaring that a federal statute is not to be construed to invalidate state laws enacted for the purpose of regulating the business of insurance unless the federal law specifically relates to the business of insurance, does not exempt the business of insurance companies from the scope of federal antitrust laws, the exemption being for the "business of insurance," not the "business of insurers"; 2(b) applies only when insurance companies are engaged in the "business of insurance."

INSURANCE §46 > contract -- primary elements -- policyholder's risk -- > Headnote:
LEdHN[4][] [4]

The primary elements of an insurance contract are the spreading and underwriting of a policyholder's risk.

INSURANCE §1 > underwriting or spreading of risk -- indispensable characteristic -- > Headnote:
LEdHN[5][] [5]

Underwriting or spreading of risk is an indispensible characteristic of insurance.

COMMERCE §103(1) > McCarran-Ferguson Act -- "business of insurance" -- agreement necessary for insurer's providing insurance -- > Headnote:
LEdHN[6A][] [6A]***LEdHN[6B]***[] [6B]

Simply because an agreement between an insurer and another party is necessary in order for the insurer to provide insurance does not mean that such an agreement constitutes the "business of insurance" for purposes of the provisions of 2(b) of the McCarran-Ferguson Act (*15 USCS 1012(b)*), which direct that a federal law is not to be construed to invalidate, impair, or supersede state laws enacted for the purpose of regulating the business of insurance unless the federal law specifically relates to the business of insurance; and thus, the fact that a line of credit agreement or other commercial arrangement with a bank is necessary in order for an indemnity insurer to pay off monetary claims does not mean that such an agreement constitutes the "business of insurance."

COMMERCE §103(1) > McCarran-Ferguson Act -- "business of insurance" -- acquisitions by insurer -- > Headnote:
LEdHN[7A][] [7A]***LEdHN[7B]***[] [7B]

For purposes of the provisions of 2(b) of the McCarran-Ferguson Act (*15 USCS 1012(b)*), providing that a federal law is not to be construed to invalidate, impair, or supersede any state laws enacted for the purpose of regulating the business of insurance unless the federal law specifically relates to the business of insurance, an insurance company's acquisition of a manufacturer or a retail chain in order to lower the insurer's cost of meeting its obligations to policyholders does not constitute the "business of insurance."

MONOPOLIES §7 > federal antitrust laws -- exemption -- construction -- > Headnote:
LEdHN[8][] [8]

The rule that exemptions from federal antitrust laws are to be narrowly construed is not limited to implicit exemptions from the antitrust laws, but applies with equal force to express statutory exemptions.

MONOPOLIES §46 > labor unions -- pattern bargaining -- > Headnote:
LEdHN[9A][] [9A]***LEdHN[9B]***[] [9B]

A union may make wage agreements with a multi-employer bargaining unit and may, in pursuance of its own union interests, seek to obtain the same terms from other employers without violating federal antitrust laws.

MONOPOLIES §9 > labor unions -- agreement for pattern bargaining -- > Headnote:
LEdHN[10A][] [10A]***LEdHN[10B]***[] [10B]

A union forfeits its exemption from federal antitrust laws when it agrees with one set of employers to impose a certain wage scale on other bargaining units; one group of employers may not conspire to eliminate competitors from an industry, and the union is liable with the employers if it becomes a party to the conspiracy.

Syllabus

Petitioner Blue Shield, a Texas insurance company, offers policies that entitle the insured to obtain prescription drugs. The insured may obtain the drugs from a pharmacy participating in a "Pharmacy Agreement" with Blue Shield (in which case the insured must pay only $ 2 for every prescription drug, with the remainder of the cost being paid directly by Blue Shield to the participating pharmacy) or from a nonparticipating pharmacy (in which case the insured pays the full price and may be reimbursed by Blue Shield for 75% of the difference between that price and $ 2). Blue Shield offered to enter into a Pharmacy Agreement with each licensed **[****2]** pharmacy in Texas, the participating pharmacy to agree to furnish Blue Shield policyholders prescription drugs at $ 2 each, with Blue Shield to agree to reimburse the pharmacy for its cost in acquiring the drug. Respondents, nonparticipating pharmacies, brought this antitrust action alleging that Blue Shield and three participating pharmacies, also petitioners, had violated *§ 1* of the Sherman Act by entering into agreements fixing the retail prices of drugs and that petitioners' activities had caused Blue Shield policyholders to boycott certain respondents. The trial court granted petitioners summary judgment on the ground that the agreements are exempt from the antitrust laws under *§ 2 (b)* of the McCarran-Ferguson Act (Act), because the agreements are the "business of insurance," are regulated by Texas, and are not boycotts within the meaning of the Act. The Court of Appeals reversed. *Held*: The Pharmacy Agreements are not the "business of insurance" within the meaning of *§ 2 (b)*. Pp. 210-233.

(a) *Section 2 (b)* exempts the "business of insurance," not the "business of insurers." Pp. 210-211.

(b) A primary element of an insurance contract is the underwriting or spreading **[****3]** of risk, *SEC v. Variable Annuity Life Ins. Co., 359 U.S. 65*, but that element is not involved in the Pharmacy Agreements, which are merely arrangements for the purchase of goods and services by Blue Shield, enabling it to effect cost savings. Pp. 211-215.

(c) The Pharmacy Agreements involve contractual arrangements between Blue Shield and the pharmacies, not its policyholders. Pp. 215-217.

(d) The legislative history of the Act confirms the conclusion that the "business of insurance" was understood by Congress to involve the underwriting of risk and the relationship and transactions between insurance companies and their policyholders, and no legislative intention is disclosed to exempt agreements or transactions between insurance companies and entities outside the insurance industry. Moreover, at the time of the Act's enactment health-care plans such as those of Blue Shield were not considered to constitute insurance at all, and it is difficult to assume that Congress, contrary to that contemporary view, could have considered such plans to be the "business of insurance" within the meaning of the Act. Even if Congress did consider certain aspects of such plans **[****4]** to be the "business of insurance," however, it still does not follow that the Pharmacy Agreements in this case are within the meaning of that phrase. Pp. 217-230.

(e) This result is consistent with the principle that exemptions from the antitrust laws are to be construed narrowly. Pp. 231-233.

Counsel: Keith E. Kaiser argued the cause for petitioners. With him on the briefs were J. Burleson Smith, R. Laurence Macon, Richard A. Whiting, Charles R. Shaddox, D. Dudley Oldham, Martin D. Beirne, William R. Pakalka, William C. Church, Jr., and Richard B. Moore.

Joel H. Pullen argued the cause and filed a brief for respondents.

Richard A. Allen argued the cause for the United States as amicus curiae urging affirmance. With him on the brief were Solicitor General McCree, Assistant Attorney General Shenefield, and Barry Grossman. *

[1] The Act provides in relevant part:

HN1[] "Congress hereby declares that the continued regulation and taxation by the several States of the business of insurance is in the public interest, and that silence on the part of the Congress shall not be construed to impose any barrier to the regulation or taxation of such business by the several States.

"*Sec. 2*. (a) The business of insurance, and every person engaged therein, shall be subject to the laws of the several States which relate to the regulation or taxation of such business.

"(b) No Act of Congress shall be construed to invalidate, impair, or supersede any law enacted by any State for the purpose of regulating the business of insurance, or which imposes a fee or tax upon such business, unless such Act specifically relates to the business of insurance: *Provided*, That after June 30, 1948, the Act of July 2, 1890, as amended, known as the Sherman Act, and the Act of October 15, 1914, as amended, known as the Clayton Act, and the Act of September 26, 1914, known as the Federal Trade Commission Act, as amended, shall be applicable to the business of insurance to the extent that such business is not regulated by State law.

"Sec. 3. (a) Until June 30, 1948, the Act of July 2, 1890, as amended, known as the Sherman Act, and the Act of October 15, 1914, as amended, known as the Clayton Act, and the Act of September 26, 1914, known as the Federal Trade Commission Act, . . . and the Act of June 19, 1936, known as the Robinson-Patman Anti-discrimination Act, shall not apply to the business of insurance or to acts in the conduct thereof.

"(b) Nothing contained in this Act shall render the said Sherman Act inapplicable to any agreement to boycott, coerce, or intimidate, or act of boycott, coercion, or intimidation." 59 Stat. 33-34, as amended, 61 Stat. 448.

court did not reach the other questions decided by the trial court. 556 F.2d 1375. We granted certiorari because of intercircuit conflicts as to the meaning of the phrase "business of insurance" in § 2 (b) of the *Act.* [2] *435 U.S. 903*.

[*209] I

[*267]** Blue Shield offers insurance policies which entitle the policyholders to obtain prescription drugs. If the pharmacy selected by the insured has entered into a "Pharmacy Agreement" with Blue Shield, and is therefore a participating pharmacy, the insured is required to pay only $ 2 for every prescription drug. The remainder of the cost is paid directly by Blue Shield to the participating pharmacy. If, on the other hand, the insured selects a pharmacy which has not entered into a Pharmacy Agreement, and is therefore a nonparticipating pharmacy, he is required to pay the full price charged by the pharmacy. The insured may then **[****8]** obtain reimbursement from Blue Shield for 75% of the difference between that price and $ 2.

Blue Shield offered to enter into a Pharmacy Agreement with each licensed pharmacy in Texas. Under the Agreement, a participating pharmacy agrees to furnish prescription drugs to Blue Shield's policyholders at $ 2 for each prescription, and Blue Shield agrees to reimburse the pharmacy for the pharmacy's cost of acquiring the amount of the drug prescribed. Thus, only pharmacies that can afford to distribute prescription drugs for less than this $ 2 markup can profitably participate in the plan. [3]

[**9]**

[*210] ***LEdHN[1B]***[] [1B]The only issue before us is whether the Court of Appeals was correct in concluding that these Pharmacy Agreements are not the "business of insurance" within the meaning of § 2 (b) of the McCarran-Ferguson Act. If that conclusion is correct, then the Agreements are not exempt from examination under the antitrust laws. [4] Whether the Agreements are *illegal* under the antitrust laws is an entirely separate question, not now before us. [5]

[**10]** **[***268]** **[**1073]** II

A

[2] The position of the Fifth Circuit is in conflict with that of the Third, Fourth, and District of Columbia Circuits. See *Frankford Hospital* v. *Blue Cross of Greater Philadelphia*, 554 F.2d 1253 (CA3 1977); *Anderson* v. *Medical Service of District of Columbia*, 551 F.2d 304 (CA4 1977); *Proctor* v. *State Farm Mutual Automobile Ins. Co*., 182 U. S. App. D. C. 264, 561 F.2d 262 (1977).

[3] The *amicus curiae* brief of the United States provides a useful illustration of the operation of the Pharmacy Agreement:

"Suppose the usual and customary retail price for a quantity of Drug X charged both by 'participating' Pharmacy A and 'non-participating' Pharmacy B is $ 10.00, and the wholesale price (or acquisition cost) to both is $ 8.00. If an insured buys Drug X from Pharmacy A, the insured pays $ 2.00. Pharmacy A receives $ 2.00 from the insured and $ 8.00 from Blue Shield, or $ 10.00 total. If an insured buys Drug X from Pharmacy B, the insured pays Pharmacy B $ 10.00, and receives $ 6.00 (75 percent of the difference between the retail price and $ 2.00) from Blue Shield. While Pharmacy B receives the same as Pharmacy A, the insured must pay $ 4.00 for the drug and also must take steps to obtain reimbursement.

"If the pharmacy's acquisition cost for the drug is $ 5.00 rather than $ 8.00, the situations of Pharmacy B and the insured are unchanged. But now Pharmacy A will receive only $ 5.00 from Blue Shield, for a total of $ 7.00."

[4] Even if they are the "business of insurance," the Agreements are exempt from the antitrust laws only if they are also "regulated by State law" within the meaning of § 2 (b) and not "boycotts" or other conduct described by § 3 (b). See n. 1, *supra*. See also *St. Paul Fire & Marine Ins. Co*. v. Barry, 438 U.S. 531.

[5] It is axiomatic that conduct which is not exempt from the antitrust laws may nevertheless be perfectly legal. The United States in its *amicus* briefs urging affirmance has taken the position that the Pharmacy Agreements probably do not violate the antitrust laws, though recognizing that that issue is not presented here.

LEdHN[1C][] [1C]**LEdHN[2]**[] [2]**LEdHN[3]**[] [3]As the Court stated last Term in *St. Paul Fire & Marine Ins. Co*. v. *Barry, 438 U.S. 531, 541*, [6] the starting point in a case involving construction of the McCarran-Ferguson Act, like **HN2**[] the starting point in any case involving the meaning of a statute, is the language of the statute itself. See also *Blue Chip Stamps v. Manor Drug Stores, 421 U.S. 723, 756* (POWELL, J., concurring). It is important, therefore, to observe at the outset that the statutory language in question **[*211]** here does not exempt the business of insurance companies from the scope of the antitrust laws. The exemption is for the "business of insurance," not the "business of insurers":

"The statute did not purport to make the States supreme in regulating all the activities of insurance *companies*; its language **[****11]** refers not to the persons or companies who are subject to state regulation, but to laws 'regulating the *business* of insurance.' Insurance companies may do many things which are subject to paramount federal regulation; only when they are engaged in the 'business of insurance' does the statute apply." *SEC v. National Securities, Inc., 393 U.S. 453, 459-460*. (Emphasis in original.)

Since the law does not define the "business of insurance," the question for decision is whether the Pharmacy Agreements fall within the ordinary understanding of that phrase, illumined by any light to be found in the structure of the Act and its legislative history. Cf. *Ernst & Ernst v. Hochfelder, 425 U.S. 185, 199*, and n. 19.

B

LEdHN[4][] [4] **[****12]** **HN3**[] The primary elements of an insurance contract are the spreading and underwriting of a policyholder's risk. "It is characteristic of insurance that a number of risks are accepted, some of which involve losses, and that such losses are spread over all the risks so as to enable the insurer to accept each risk at a slight fraction of the possible liability upon it." 1 G. Couch, Cyclopedia of Insurance Law § 1:3 (2d ed. 1959). See also R. Keeton, Insurance Law § 1.2 (a) (1971) ("Insurance is an arrangement for transferring and distributing risk"); 1 G. Richards, The Law of Insurance *§ 2* (W. Freedman 5th ed. 1952). [7]

[**13]**

[*212] **LEdHN[5]**[] [5]The significance of underwriting or spreading of risk as an indispensable characteristic of insurance was recognized by this Court in *SEC v. Variable Annuity Life Ins. Co., 359 U.S. 65*. That case involved several corporations, representing themselves as "life insurance" companies, that offered variable annuity contracts for sale in interstate commerce. **[***269]** The companies were regulated by the insurance commissioners of several States. Purchasers of the contracts were not entitled to any fixed return, but only to a pro rata participation in the investment portfolios of the companies. Thus a policyholder could receive substantial sums if investment decisions were successful, but very little if they were not. One of the questions presented was whether these variable annuity contracts were the "business of insurance" under *§ 2 (b)* of the McCarran-Ferguson Act. [8] The

---

[6] The issue in that case was the meaning of the "boycott" exception in § 3 (b) of the Act. The issue here, the meaning of the "business of insurance" exemption in *§ 2 (b)* of the Act, was not before the Court.

[7] Webster's New International Dictionary of the English Language 1289 (unabr. 2d ed. 1958) defines insurance as:

"Act of insuring, or assuring, against loss or damage by a contingent event; a contract whereby, for a stipulated consideration, called a *premium*, one party undertakes to indemnify or guarantee another against loss by a certain specified contingency or peril, called a *risk*, the contract being set forth in a document called the *policy*. . . ."

[8] The issue in *SEC* v. *Variable Annuity Life Ins. Co*. was whether the variable annuity contracts were subject to regulation under the Securities Act of 1933 and the Investment Company Act of 1940. The Court held that the contracts were subject to such

Court held that the **[**1074]** annuity contracts were not insurance, even though they were regulated as such under state law and involved actuarial prognostications of mortality. Central to the **[****14]** Court's holding was the premise that "the concept of 'insurance' involves some investment risk-taking on the part of the company." *359 U.S., at 71*. Since the variable annuity contracts offered no guarantee of fixed income, they placed all the investment risk on the annuitant and none on the company. *Ibid*. The Court concluded, therefore, that the annuities involved "no true underwriting of risks, the one earmark of insurance as it has commonly been conceived of in popular understanding and usage." *Id., at 73* (footnote omitted). Cf. *German Alliance Ins. Co*. v. *Lewis, 233 U.S. 389, 412* ("The effect of insurance -- indeed **[*213]** it has been said to be its fundamental object -- is to distribute the loss over as wide an area as possible").

[**15]** The petitioners do not really dispute that the underwriting or spreading of risk is a critical determinant in identifying insurance. Rather they argue that the Pharmacy Agreements do involve the underwriting of risks. As they state in their brief:

"In *Securities and Exchange Commission v. Variable Annuity Life Insurance Co., 359 U.S. 65, 73 (1959)*, the 'earmark' of insurance was described as the 'underwriting of risks' in exchange for a premium. Here the risk insured against is the possibility that, during the term of the policy, the insured may suffer a financial loss arising from the purchase of prescription drugs, or that he may be financially unable to purchase such drugs. In consideration of the premium, Blue Shield assumes this risk by agreeing with its insureds to contract with Participating Pharmacies to furnish the needed drugs and to reimburse the Pharmacies for each prescription filled for the insured. In short, each of the fundamental elements of insurance is present here -- the payment of a premium in exchange for a promise to indemnify the insured against losses upon the happening of a specified contingency."

LEdHN[6A][] [6A] **[****16]** The fallacy of the petitioners' position is that they confuse the obligations **[***270]** of Blue Shield under its insurance policies, which insure against the risk that policyholders will be unable to pay for prescription drugs during the period of coverage, and the agreements between Blue Shield and the participating pharmacies, which serve only to minimize the costs Blue Shield incurs in fulfilling its underwriting obligations. [9] **[****17]** The **[*214]** benefit promised to Blue Shield policyholders is that their premiums will cover the cost of prescription drugs except for a $ 2 charge for each prescription. [10] So long as that promise is kept, policyholders are basically unconcerned with arrangements made between Blue Shield and participating pharmacies. [11]

[1075]** The Pharmacy Agreements thus do not involve any underwriting or spreading of risk, but are merely arrangements for the purchase of goods and services by Blue Shield. By agreeing with pharmacies on the maximum prices it will pay for drugs, Blue Shield effectively reduces the total amount it must pay to its policyholders. The Agreements thus enable Blue Shield to minimize costs and maximize profits. Such **[****18]**

---

regulation as securities since they were not "insurance" or "annuity" policies specifically exempt from the Securities Act, and because they were not the "business of insurance" within the meaning of the McCarran-Ferguson Act.

[9] ***LEdHN[6B]***[] [6B]It is true that some type of provider agreement is necessary for a service benefit plan to exist. But it does not follow that because an agreement is necessary to provide insurance, it is also the "business of insurance." Assume, for example, that an indemnity insurer must have a line of credit or other commercial arrangement with a bank in order to pay off monetary claims. Despite the fact that the line of credit is "necessary" for the insurer to fulfill its obligations, it is nevertheless not the "business of insurance."

[10] Thus, the benefit promised to Blue Shield policyholders under the policy is that they "shall be required to pay no more than the drug deductible for each of such covered drugs."

[11] As the Court of Appeals stated:

"Blue Shield's policyholders are basically unconcerned with the contract between the insurer and the Participating Pharmacy. They are obligated to pay a Participating Pharmacy two dollars ($ 2.00) for a prescription regardless of the presence or absence of a price fixing arrangement. Thus, by minimizing costs and maximizing profits, the Participating Pharmacy Agreements inure principally to the benefit of Blue Shield." *556 F.2d 1375, 1381*.

costsavings arrangements may well be sound business practice, and may well inure ultimately to the benefit of policyholders in the form of lower premiums, but they are not the "business of insurance." [12]

[*215] ***LEdHN[7A]***[] [7A]The Pharmacy Agreements are thus legally indistinguishable from countless other business arrangements that may be made by insurance companies to keep their costs low and thereby also keep low the level of premiums charged to their policyholders. Suppose, for example, that an insurance company entered into a contract with a large retail drug chain whereby its policyholders **[****19]** could obtain drugs under their policies only from stores operated by this chain. The justification for such an agreement would be administrative and bulk-purchase savings resulting from obtaining all of the company's drug needs from a single dealer. Even though these cost savings might ultimately be reflected in lower premiums to policyholders, would such a contract be the "business of insurance"? Or suppose that the insurance company should decide **[***271]** to acquire the chain of drug stores in order to lower still further its costs of meeting its obligations to its policyholders. Such an acquisition would surely not be the "business of insurance." *SEC v. National Securities, Inc., 393 U.S. 453*. [13]

[**20]** C

Another commonly understood aspect of the business of insurance relates to the contract between the insurer and the insured. ***HN4***[] In enacting the McCarran-Ferguson Act Congress was concerned with:

"The relationship between insurer and insured, the type of policy which could be issued, its reliability, interpretation, **[*216]** and enforcement -- these were the core of the 'business of insurance.' Undoubtedly, other activities of insurance companies relate so closely to their status as reliable insurers that they too must be placed in the same class. But whatever the exact scope of the statutory term, it is clear where the focus was -- it was on the relationship between the insurance company and the policyholder." *SEC v. National Securities, Inc., supra, at 460*.

The Pharmacy Agreements are not "between insurer and insured." They are separate contractual arrangements between Blue Shield and pharmacies engaged in the sale and distribution of goods and services other than insurance.

The petitioners argue that nonetheless the Pharmacy Agreements so closely affect **[****21]** the "reliability, interpretation, and enforcement" of the insurance contract and "relate so closely to their status as reliable insurers **[**1076]** " as to fall within the exempted area. [14] This argument, however, proves too much.

---

[12] As the United States points out in its *amicus* brief, there is an important distinction between risk underwriting and risk reduction. By reducing the total amount it must pay to policyholders, an insurer reduces its liability and therefore its risk. But unless there is some element of spreading risk more widely, there is no underwriting of risk.

[13]

LEdHN[7B][] [7B]In *National Securities*, the Arizona Director of Insurance approved, pursuant to statute, a merger between two insurance companies. This Court held, however, that the Arizona statute was not enacted for the purpose of regulating the "business of insurance." *393 U.S., at 460*. If a merger between two insurance companies is not the "business of insurance," then an acquisition by an insurer of a manufacturer or a retail chain, although conceptually indistinguishable from the Pharmacy Agreements in this case, is also not the "business of insurance."

[14] The petitioners argue that the absence of the Pharmacy Agreements "which permit the insured to obtain drugs on the terms and for the amounts stated in the policies would constitute a breach of the contract of insurance." But the benefit Blue Shield provides its policyholders is the assurance that they can obtain drugs in return for a direct maximum payment of $ 2 for each prescription. The Pharmacy Agreements are separate contractual arrangements between Blue Shield and certain pharmacists fixing the cost Blue Shield will pay for drugs. The wholly separate nature of the two categories of agreements is in no way affected by the fact that the Pharmacy Agreements are indirectly referred to in the insurance policies.

At the most, the petitioners have demonstrated that the Pharmacy **[****22]** Agreements result in cost savings to Blue Shield which may be reflected in lower premiums if the cost savings are passed on to policyholders. But, in that sense, every business decision made by an insurance company has some impact on its reliability, its ratemaking, and its status as a **[*217]** reliable insurer. The manager of an insurance company is no different from the manager of any enterprise with the responsibility to minimize costs and maximize profits. If terms such as "reliability" and "status as a reliable insurer" were to be interpreted in the broad sense urged by **[***272]** the petitioners, almost every business decision of an insurance company could be included in the "business of insurance." Such a result would be plainly contrary to the statutory language, which exempts the "business of insurance" and not the "business of insurance companies."

III

A

LEdHN[1D][] [1D]The conclusion that the Pharmacy Agreements are not the "business of insurance" is fully confirmed by the legislative history of the McCarran-Ferguson Act. The law was enacted in 1945 in response to this Court's decision in *United States v. South-Eastern Underwriters Assn., 322 U.S. 533*. **[****23]** The indictment in that case charged that the defendants had conspired to fix insurance rates and commissions, and had conspired to boycott and coerce noncooperating insurers, agents, and insureds. In the District Court the defendants had successfully demurred to the indictment on the ground that the insurance industry was not a part of interstate commerce subject to regulation under the *Commerce Clause*. [15] On direct appeal, this Court reversed the judgment, holding that the business of insurance is interstate commerce, and that the Congress which enacted the Sherman Act had not intended to exempt the insurance industry from its coverage.

B

The primary concern of Congress in the wake of that decision was in enacting legislation that would ensure that **[*218]** the States would continue to have the ability to tax and regulate **[****24]** the business of insurance. [16] **[****25]** This concern is reflected in *§§ 1* **[**1077]** and *2 (a)* of the Act, [17] neither of which is involved in this case. A secondary concern was the applicability of the antitrust laws to the insurance industry. [18] **[****26]** Months

[15] Since the leading case of *Paul v. Virginia, 8 Wall. 168, 183*, it had been understood that "[issuing] a policy of insurance is not a transaction of commerce."

[16] S. Rep. No. 20, 79th Cong., 1st Sess., 2 (1945); H. R. Rep. No. 143, 79th Cong., 1st Sess., 2-3 (1945). The problem was that if insurance was interstate commerce, then the constitutionality of state regulation and taxation would be questionable. As the House Report stated:

"Inevitable uncertainties . . . followed the handing down of the decision in the *Southeastern Underwriters Association* case . . . .

"[Your] committee believes there is urgent need for an immediate expression of policy by the Congress with respect to the continued regulation of the business of insurance by the respective States. Already many insurance companies have refused, while others have threatened refusal to comply with State tax laws, as well as with other State regulations, on the ground that to do so, when *such laws may subsequently be held unconstitutional* in keeping with the precedent-smashing decision in the *Southeastern Underwriters case*, will subject insurance executives to both civil and criminal actions for misappropriation of company funds." *Ibid*. (Emphasis added.)

[17] See text of statute at n. 1, *supra*.

[18] There is no question that the *primary* purpose of the McCarran-Ferguson Act was to preserve state regulation of the activities of insurance companies, as it existed before the *South-Eastern Underwriters* case. The power of the States to regulate and tax insurance companies was threatened after that case, because of its holding that insurance companies are in interstate commerce. The McCarran-Ferguson Act operates to assure that the States are free to regulate insurance companies without

before **[*219]** this Court's **[***273]** decision in *South-Eastern Underwriters* was announced, proposed legislation to totally exempt the insurance industry from the Sherman and Clayton Acts had been introduced in Congress. [19] Less than three weeks after the actual decision, the House of Representatives passed a bill which would also have provided the insurance industry with a blanket exemption from the antitrust laws, thus restoring the state of law that had existed before the decision in *South-Eastern Underwriters*. [20]

Congress, however, rejected this approach. [21] Instead of a total exemption, ***HN5***[] Congress provided in *§ 2 (b)* that the antitrust laws "shall be applicable" unless the activities of insurance companies are the business of insurance and regulated by state law. Moreover, under § 3 (b) the Sherman Act was made applicable in any event to acts of boycott, coercion, or intimidation. To allow the States time to adjust to the applicability of the antitrust laws to the insurance industry, **[*220]** Congress imposed a 3-year moratorium. [22] After the expiration of the moratorium on July 1, 1948, however, Congress clearly provided that the **[****27]** antitrust laws would be applicable to the business of insurance "to the extent that such business is not regulated by State law." [23]

By making the antitrust laws applicable to the insurance industry except as to conduct that is the business of insurance, regulated **[****28]** by state law, and not a boycott, Congress did not intend to and did not overrule the *South-Eastern Underwriters* **[**1078]** case. [24] ***HN6***[] While the power of the States **[***274]** to tax and regulate insurance companies was reaffirmed, the McCarran-Ferguson Act also established that the insurance industry would no longer have a blanket exemption from the antitrust laws. It is true that *§ 2 (b)* of the Act does create a

---

fear of *Commerce Clause* attack. The question in the present case, however, is one under the quite different *secondary* purpose of the McCarran-Ferguson Act -- to give insurance companies only a limited exemption from the antitrust laws.

The repeated insistence in the dissenting opinion that the McCarran-Ferguson Act should be read as protecting the right of the States to regulate what they traditionally regulated is thus entirely correct -- and entirely irrelevant to the issue now before the Court. See n. 38, *infra*. For the question here is not whether the McCarran-Ferguson Act made state regulation of these Pharmacy Agreements exempt from attack under the *Commerce Clause*. It is the quite different question whether the Pharmacy Agreements are exempt from the antitrust laws.

In short, the McCarran-Ferguson Act freed the States to continue to regulate and tax the business of insurance companies, in spite of the *Commerce Clause*. It did not, however, exempt the business of insurance companies from the antitrust laws. It exempted only "the business of insurance." See *SEC v. National Securities, Inc., 393 U.S. 453*.

[19] H. R. 3270, 78th Cong., 1st Sess. (1943); S. 1362, 78th Cong., 1st Sess. (1943). These bills would have provided that nothing in the Sherman or Clayton Acts "shall be construed to apply to the business of insurance or to acts in the conduct of that business or in any wise to impair the regulation of that business by the several States."

[20] 90 Cong. Rec. 6565 (1944).

[21] The total exemption bill failed in the Conference Committee because of a fear that it could not pass in the Senate and in any event would be vetoed by the President. 91 Cong. Rec. 1087 (1945) (remarks of Rep. Hancock). Also important was the opposition of the National Association of Insurance Commissioners to a blanket antitrust exemption. 90 Cong. Rec. 8482 (1944).

[22] See n. 1, *supra*. The purpose of the moratorium was to allow the States three years to take steps to regulate the business of insurance. 91 Cong. Rec. 1443 (1945) (remarks of Sen. McCarran).

[23] *Ibid*. (remarks of Sen. Ferguson); McCarran, Federal Control of Insurance: Moratorium Under Public Law 15 Expired July 1, 34 A. B. A. J. 539, 540 (1948).

[24] That Congress did not intend to restore the law to what it had been before *South-Eastern Underwriters* is made dramatically clear in the following exchange between Senator McKellar and Senator Ferguson:

"Mr. McKELLAR. As I understand the bill its purpose and effect will be to establish the law as it was supposed to be prior to the rendering of the recent opinion of the Supreme Court of the United States. Is that correct?

"Mr. FERGUSON. No." 91 Cong. Rec. 478 (1945).

See also *id., at 1444* (exchange between Sens. Pepper and McCarran).

partial exemption from those laws. Perhaps more significantly, however, that section, and the Act as a whole, embody a legislative rejection of the concept that the insurance industry is outside the scope of the antitrust laws -- a concept that had prevailed before the *South-Eastern Underwriters* decision.

[**29]** C

HN7[] References to the meaning of the "business of insurance" in the legislative history of the McCarran-Ferguson Act **[*221]** strongly suggest that Congress understood the business of insurance to be the underwriting and spreading of risk. Thus, one of the early House Reports stated: "The theory of insurance is the distribution of risk according to hazard, experience, and the laws of averages. These factors are not within the control of insuring companies in the sense that the producer or manufacturer may control cost factors." H. R. Rep. No. 873, 78th Cong., 1st Sess., 8-9 (1943). [25] See also S. Rep. No. 1112, 78th Cong., 2d Sess., 6 (1944); 90 Cong. Rec. 6526 (1944) (remarks of Rep. Hancock).

[**30]** Because of the widespread view that it is very difficult to underwrite risks in an informed and responsible way without intra-industry cooperation, the primary concern of both representatives of the insurance industry and the Congress was that cooperative ratemaking efforts be exempt from the antitrust laws. The passage of the McCarran-Ferguson Act was preceded by the introduction in the Senate Committee of a report and a bill submitted by the National Association of Insurance Commissioners on November 16, 1944. [26] The views of the NAIC are particularly significant, because the Act ultimately passed was based in large part on the NAIC bill. [27] The report emphasized that the concern of the insurance commissioners was that smaller enterprises and insurers other than life insurance companies were unable to underwrite risks accurately, and it therefore concluded:

"For these and other reasons this subcommittee believes it would be a mistake to permit or require the unrestricted competition contemplated by the antitrust laws to apply to the insurance business. *To prohibit combined* ***[*222]*** *efforts for statistical and rate-making purposes would be a backward step in the development* **[****31]** *of a progressive business*. We do not regard it as necessary to labor this point any **[***275]** further because Congress itself recently recognized *the necessity for concert of action in the collection of statistical data and rate making* when it enacted the District of Columbia Fire Insurance Rating Act." *Id*., at A4405 (emphasis added).

The bill proposed by the NAIC enumerated seven specific practices to which the Sherman Act was not to apply. [28] **[****32]** Each of the specific practices involved intra-industry cooperative or concerted activities. **[**1079]** None involved contractual arrangements that insurance companies might make with providers of goods or services to reduce the costs to the companies of meeting their underwriting obligations to their policyholders. [29]

---

[25] The recognition by Congress that the ability to control costs was not within the ability of insurance companies is further evidence that the Pharmacy Agreements, which are solely designed to minimize costs, are not insurance.

[26] 90 Cong. Rec. A4403-4408 (1944).

[27] 91 Cong. Rec. 483 (1945) (remarks of Sen. O'Mahoney).

[28] 90 Cong. Rec. A4406 (1944). This specific list of exempted activities was not included in the law ultimately enacted.

[29] The dissenting opinion makes the argument that because Congress rejected bills that would have limited the "business of insurance" to a specific list of insurance company practices, Congress intended that the exemption it finally enacted be interpreted "broadly." Precisely the opposite is true.

At the time Congress was considering one of the early versions of the Act, H. R. 3270, 78th Cong., 1st Sess. (1943), which would have wholly exempted from the antitrust laws "the business of insurance or . . . acts in the conduct of that business," an amendment was introduced which would have exempted specific activities. 90 Cong. Rec. 6561 (1944). The proponent of the amendment, Representative Anderson, explained that its purpose was to provide broader protection than provided by H. R. 3270: "But I say to this House that some legislation should be passed which asserts the right of the States to control the questions of risks, rates, premiums, commissions, policies, investments, reinsurance, capital requirements, and items of that nature. It is for that purpose I have insisted upon bringing this at this time to the attention of the House. If you pass H. R. 3270 as it now stands and go back home and any of your insurance friends ask you what you did to safeguard the protection of

[**33] [*223]** The floor debates also focused simply on whether cooperative ratemaking should be exempt. Thus, Senator Ferguson, in explaining the purpose of the bill, stated:

"This bill would permit -- and I think it is fair to say that it is intended to permit -- rating bureaus, because in the last session we passed a bill for the District of Columbia allowing rating. What we saw as wrong was the fixing of rates without statutory authority in the States; but we believe that State rights should permit a State to say that it believes in a rating bureau. I think the insurance companies have convinced many members of the legislature that we cannot have open competition in fixing rates on insurance. If we do, we shall have chaos. There will be failures, and failures always follow losses." 91 Cong. Rec. 1481 (1945).

The consistent theme of the remarks of other Senators also indicated a primary concern that cooperative ratemaking would be protected from the antitrust laws. *Id., at 1444* and 1485 (remarks of Sen. O'Mahoney); **[***276]** 485 (remarks of Sen. Taft). [30] **[****35]** President Roosevelt, in signing the bill, also emphasized **[*224]** that the bill would allow cooperative **[****34]** rate regulation. He stated that "Congress did not intend to permit private rate fixing, which the Antitrust Act forbids, but was willing to permit actual regulation **[**1080]** of rates by affirmative action of the States." S. Rosenman, The Public Papers and Addresses of Franklin D. Roosevelt, 1944-1945 Vol., p. 587 (1950). [31] There is not the slightest suggestion in the legislative history that Congress in any way contemplated that arrangements such as the Pharmacy Agreements in this case, which involve the mass purchase of goods and services from entities outside the insurance industry, are the "business of insurance." [32]

---

insurance by the State, you must answer them in all truth that all you did was to pass a bill which provided antitrust protection for companies now under indictment."

The amendment was defeated. 90 Cong. Rec. 6562 (1944).

Thus, Congress rejected an amendment which exempted specific activities of insurance companies (not including anything remotely resembling the Pharmacy Agreements in this case) which was perceived to be broader than H. R. 3270. Since H. R. 3270 was itself broader than the Act as eventually enacted, it necessarily follows that the exemption of the Act is narrower than the bills which would have exempted specific practices. This pattern is consistent with the entire legislative history of the McCarran-Ferguson Act, which was characterized by a continual narrowing of the original blanket exemption.

[30] The dissenting opinion states that the "compelling explanation" for the lack of discussion of provider agreements in the legislative history was the congressional concern about fire insurance companies. *Post*, at 234, n. 2. However, input from all types of insurance companies was sought through the Insurance Commissioners of the various States "because the Commissioners were aware of the chaotic condition which exists at the present time." 91 Cong. Rec. 484 (1945) (remarks of Sen. Ferguson). Moreover, the National Association of Insurance Commissioners, whose concern was surely not limited to fire insurance, was certainly aware of provider agreements since it drafted model state enabling legislation to govern service-benefit health plans. But this Association, which played a major role in the drafting of the McCarran-Ferguson Act, did not include provider agreements in its proposed bill exempting specific practices of insurance companies from the scope of the antitrust laws. 90 Cong. Rec. A4406 (1944). Given this background, the failure of Congress to mention provider agreements, or anything in any way resembling them, suggests that Congress did not intend that provider agreements were to be exempt.

[31] The dissenting opinion states that the *National Securities* case recognized that the legislative history of the Act "sheds little light" on the meaning of the "business of insurance." *Post*, at 234. In *National Securities*, however, the Court went on to state that the legislative history indicated that "Congress was mainly concerned with the relationship between insurance ratemaking and the antitrust laws, and with the power of the States to tax insurance companies." *393 U.S., at 458-459*.

[32] One question not resolved by this legislative history is which of the various practices alleged in the *South-Eastern Underwriters* indictment Congress intended to be covered by the phrase "business of insurance." The indictment in that case had charged, for example, that the defendants had fixed their agents' commissions as well as premium rates. It is clear from the legislative history that the fixing of rates is the "business of insurance." The same conclusion does not so clearly emerge with respect to the fixing of agents' commissions.

The bills introduced before the *South-Eastern Underwriters* decision which would have totally exempted the insurance industry from the antitrust laws specifically included agreements regarding agents' commissions as an exempt practice. *E. g.*, H. R. 4444, 78th Cong., 2d Sess. (1944). Similarly, the bill proposed by the National Association of Insurance Commissioners two

[**36]** **[*225]** D

[*277]** At the time of the enactment of the McCarran-Ferguson Act, corporations organized for the purpose of providing their **[*226]** members with medical services and hospitalization were not considered to be engaged in the insurance business at all, and thus were not subject to state insurance laws. *E. g., Jordan v. Group Health Assn., 71 App. D. C. 38, 107 F.2d 239 (1939)*; *California Physicians' Service v. Garrison, 155 P. 2d 885 (Cal. App. 1945)*, aff'd, *28 Cal. 2d 790, 172 P. 2d 4 (1946)*; *Commissioner of Banking & Insurance v. Community Health Service, 129 N. J. L. 427, 30 A. 2d 44 (1943)*; *State ex rel. Fishback v. Universal Service Agency, 87 Wash. 413, 151 P. 768 (1915)*. [33] Similarly, States which regulated **[**1081]** prepaid health-service plans at the time the Act was enacted either exempted them from the requirements of the state insurance code or provided that they "shall not be construed as being engaged in the business of insurance" under state law. Rorem, Enabling Legislation for Non-Profit Hospital Service Plans, 6 Law & Contemp. Prob. 528, 534 (1939). **[****37]** [34] Since the legislative

months after the *South-Eastern Underwriters* case was decided would have also exempted agents' commissions. 90 Cong. Rec. A4406 (1944). The subsequent bill that followed the approach of the NAIC and exempted specific activities, however, was limited to traditional underwriting activities and made no mention of agreements with insurance agents:

§ 4 (b). "On and after March 1, 1946, the provisions of said Sherman Act shall not apply to any agreement or concerted or cooperative action between two or more insurance companies for making, establishing, or using rates for insurance, rating methods, premiums, insurance policy or bond forms, or underwriting rules . . . ." S. 12, 79th Cong., 1st Sess. (1945).

One inference that can be drawn from this pattern is that Congress was aware of the existence of agreements regarding agents' commissions, and chose not to include them within the exemption for the "business of insurance." On the other hand, the fact that the indictment in *South-Eastern Underwriters* had included a charge that insurance companies did boycott agents who insisted on selling other lines of insurance, together with the fact that § 3 (b) presumably removes an exemption that, but for its absence, would be conferred by *§ 2*, suggests that the "business of insurance" may have been intended to include dealings within the insurance industry between insurers and agents.

Even if it be assumed, however, that transactions between an insurer and its agents, including independent agents, are the "business of insurance," it still does not follow that the Pharmacy Agreements also fall within the definition. Transactions between an insurer and an agent, unlike the Pharmacy Agreements, are wholly intra-industry; an insurance agent sells insurance while a pharmacy sells goods and services. Moreover, there are historical reasons why the Pharmacy Agreements should not be considered the "business of insurance," whatever may be the status of agreements between an insurer and its agents. See Part III-D, *infra*.

[33] The only case to the contrary was *Cleveland Hospital Service Assn*. v. *Ebright, 142 Ohio St. 51, 49 N. E. 2d 929 (1943)*. There have been few cases dealing with the issue since the enactment of the McCarran-Ferguson Act; most of them have also held that Blue Cross and Blue Shield plans are not insurance. See, *e. g., Michigan Hospital Service v. Sharpe, 339 Mich. 357, 63 N. W. 2d 638 (1954)*; *Hospital Service Corp*. v. *Pennsylvania Ins. Co., 101 R. I. 708, 227 A. 2d 105 (1967)*.

[34] The dissenting opinion argues that "regulation of the service-benefit plans was a part of the system of state regulation of insurance that the McCarran-Ferguson Act was designed to preserve." *Post*, at 240. It is not at all clear that States that passed enabling statutes regarded the plans as insurance. These statutes typically authorized the plans to operate but did not specify whether or not they were insurance. *E. g*., 1935 Ill. Laws, p. 621 ("An Act to provide for the Incorporation and Regulation of nonprofit Hospital Service Corporations"); 1939 Mich. Pub. Acts No. 109 ("An Act to provide for and to regulate the incorporation of non-profit hospital service corporations"); 1938 N. J. Laws, ch. 336 ("An Act concerning hospital service corporations and regulating the establishment, maintenance and operation of hospital service plans"); ch. 698, 53 Stat. 1412 (1939) ("Providing for the incorporation of certain persons as Group Hospitalization, Inc."). This latter statute enacted by Congress also provided in § 7: "This corporation shall not be subject to the provisions of statutes regulating the business of insurance in the District of Columbia, but shall be exempt therefrom unless specifically designated therein." The Senate Report stated: "This bill does not change existing law but merely creates a private corporation which did not heretofore exist in the District of Columbia." S. Rep. No. 1012, 76th Cong., 1st Sess., 2 (1939). At the time this statute was passed in 1939, the group health services plan in the District of Columbia had been construed not to be engaged in the business of insurance. *Group Health Assn*. v. *Moor, 24 F.Supp. 445 (DC 1938)*.

[*227] history makes clear that **[***278]** ***HN8***[] Congress certainly did not intend the definition of the "business of insurance" to be *broader* than its commonly understood meaning, the contemporary perception that health-care organizations were not engaged in providing insurance is highly significant in ascertaining congressional intent.

[**38]** The *Jordan* v. *Group Health Assn*. case, *supra*, is illustrative of the contemporary view of health-care plans. Group Health was organized as a nonprofit corporation to provide various medical services and supplies to members who paid a fixed annual premium. To implement the plan, Group Health contracted with physicians, hospitals, and others, to provide medical services. These groups were compensated exclusively by Group Health. By contracting with the various medical groups directly, Group Health was able to obtain **[*228]** services at a lower cost than if each member contracted separately. The plan, therefore, was somewhat similar to the Pharmacy Agreements in this case. The court in *Group Health* held that this type of arrangement was not insurance:

"Whether the contract is one of insurance or of indemnity there must be a risk of loss to which one party may be subjected by contingent or future events and an assumption of it by legally binding arrangement by another. Even the most loosely stated conceptions of insurance . . . require these elements. Hazard is essential and equally so a shifting of its incidence.

. . . .

"Although Group Health's **[****39]** activities may be considered in one aspect as creating security against loss from illness or accident, more truly they constitute the **[**1082]** quantity purchase of well-rounded, continuous medical service by its members. Group Health is in fact and in function a consumer cooperative. The functions of such an organization are not identical with those of insurance or indemnity companies. The latter are concerned primarily, if not exclusively, with risk . . . . On the other hand, the cooperative is concerned principally with *getting service rendered to its members* and doing so at lower prices made possible by quantity purchasing and economies in operation." *71 App. D. C., at 44, 46, 107 F.2d, at 245, 247*. (Emphasis supplied in part; footnotes omitted.) [35]

Indeed, courts have continued to hold that Blue Shield plans are not insurance even in States that have enacted enabling statutes. *E. g., Michigan Hospital Service v. Sharpe, supra.* In that case, the court specifically rejected the proposition that the existence of the enabling statute was sufficient to demonstrate that the plan was insurance.

But even if certain aspects of a Blue Shield plan are the "business of insurance," the Pharmacy Agreements in this case are not -- for all the reasons set out in this opinion. It is to be emphasized that the question whether provider agreements like the Pharmacy Agreements in this case, or other aspects of insurance companies, were in 1945 or are now regulated by state law is irrelevant to the issue before the Court in the present case. See n. 38, *infra*.

[35] Despite the fact that courts did not view plans like Blue Cross and Blue Shield as insurance at the time of the passage of the McCarran-Ferguson Act, the petitioners argue that Attorney General Biddle's remarks when testifying in the Joint Hearing before the Subcommittees of the Committees on the Judiciary on S. 1362, H. R. 3269, and H. R. 3270, 78th Cong., 1st Sess., 41-42 (1943), indicate a congressional understanding that such plans were indeed insurance.

The thrust of Attorney General Biddle's remarks was that this Court's decision in *American Medical Assn*. v. *United States, 317 U.S. 519*, justified the indictment in the *South-Eastern Underwriters* case. In the *AMA* case, the Court had held that a health-maintenance organization was engaged in "trade" within the meaning of the Sherman Act. Based on this decision, Attorney General Biddle expressed the view that the plan was insurance and that therefore the Court had already held that insurance was commerce. Thus, he argued that the indictment in *South-Eastern Underwriters* was proper.

It seems clear, however, why this testimony does not demonstrate that Congress believed that Blue Cross or Blue Shield plans are insurance. First, the statement of the Attorney General that the plan in the *AMA* case was insurance was not accepted by Congress. Senator Bailey rejected the characterization, pointing out that the Court had not referred to the plan as insurance. To Senator Bailey, the plan was not insurance but a "group cooperative movement." (Indeed, the precise plan at issue was held not to be insurance in *Jordan v. Group Health Assn., 71 App. D. C. 38, 107 F.2d 239 (1939)*.) But even if it can nonetheless be inferred that some Members of Congress may have agreed with the Attorney General that prepaid health plans are insurance, his testimony did not remotely suggest that agreements between an insurer and a third party fixing the cost at which goods and services will be purchased is also insurance.

[**40] [*229] [***279]** Indeed, Blue Cross and Blue Shield organizations themselves have historically taken the position that they are not insurance companies in seeking to avoid state regulation and taxation. [36] **[****41]** It is thus difficult to assume that contrary to this historical position and a majority of court decisions, Congress in 1945 understood that advance-payment medical-benefits **[*230]** plans are the "business of insurance." [37] It is next to impossible to assume that Congress could have thought that agreements (even by insurance companies) which provide for the purchase of goods and services from third parties at a set price are within the meaning of that phrase. [38]

[**42] [*231] [***280] [**1083]** IV

LEdHN[8][] [8]***LEdHN[9A]***[] [9A]***LEdHN[10A]***[] [10A]It is well settled that ***HN9***[] exemptions from the antitrust laws are to be narrowly construed. *E. g., Abbott Laboratories v. Portland Retail Druggists Assn., Inc., 425 U.S. 1*; *Connell Construction Co*. v. *Plumbers & Steamfitters, 421 U.S. 616*; *FMC v. Seatrain Lines, Inc., 411 U.S. 726*; *United States v. McKesson & Robbins, Inc., 351 U.S. 305*. This doctrine is not limited to implicit exemptions from the antitrust laws, but applies with equal force to express statutory exemptions. *E. g., Abbott Laboratories v. Portland Retail Druggists Assn., Inc., supra, at 11-12* (the Nonprofit Institutions Act); *FMC v. Seatrain Lines, Inc.,*

Similarly, the fact that a few years later some witnesses at a Senate Committee hearing referred to Blue Cross as insurance in discussing alternatives to national health insurance, *e. g*., Hearings before the Senate Committee on Education and Labor on S. 1606, 79th Cong., 2d Sess., pt. 1, pp. 172-176 (1946), does not establish that Congress shared this view, let alone that provider agreements like the Pharmacy Agreements in this case are insurance.

[36] Weller, The McCarran-Ferguson Act's Antitrust Exemption for Insurance: Language, History and Policy, 1978 Duke L. J. 587, 624 n. 174. As one commentator has stated about the effectiveness of the traditional opposition of these organizations to being characterized as insurance:

"[Insurance] experts are fond of expressing amazement at Blue Cross and Blue Shield opinion that the Blues are not insurance but something else, such as 'pre-payment plans.' The insurance experts should control their incredulity of this view, or at least save some for the courts. For the fact is that the majority of cases have in effect upheld these so-called 'outrageous' opinions of Blue Cross adherents." Denenberg, The Legal Definition of Insurance, 30 J. Ins. 319, 322 (1963).

[37] This is not to say that the contracts offered by Blue Shield to its policyholders, as distinguished from its provider agreements with participating pharmacies, may not be the "business of insurance" within the meaning of the Act.

[38] This conclusion is in no way affected by the existence of state enabling statutes regulating advance-payment medical-benefits plans at the time the McCarran-Ferguson Act was enacted. *E. g*., 1937 Cal. Stats., ch. 882, as amended by 1941 Cal. Stats., ch. 311; 1939 Conn. Pub. Acts, ch. 150; 1935 Ill. Laws, p. 621; 1936 Miss. Gen. Laws, ch. 177; 1939 Mich. Pub. Acts, No. 109; 1938 N. J. Laws, ch. 719. These statutes generally provided that the plans were not insurance. See *supra, at 226-227*, and n. 34. Even if it is assumed that some state legislatures believed that these plans are insurance, however, it still does not follow that provider agreements like the Pharmacy Agreements in this case were considered by Congress to be the "business of insurance."

Many aspects of insurance companies are regulated by state law, but are not the "business of insurance." Similarly, the enabling statutes in existence at the time the Act was enacted typically regulated such diverse aspects of the plans as the composition of their boards of directors, when their books and records could be inspected, how they could invest their funds, when they could liquidate or merge, as well as how they could purchase goods and services by entering into provider agreements.

Provider agreements are no more the "business of insurance" because they were regulated by state law at the time of the McCarran-Ferguson Act than are these other facets of the plans which were similarly regulated. If Congress had exempted the "business of insurance companies," then these aspects of the plans which are not themselves insurance as that term is commonly understood would nevertheless be arguably exempt. But since Congress explicitly rejected this approach, they are not within the exemption even though they are the subject of state regulation.

This Court has implicitly recognized that state regulation of a practice of an insurance company does not mean that the practice is the "business of insurance" within the meaning of the McCarran-Ferguson Act. In both cases, *SEC v. Variable Annuity Life Ins. Co., 359 U.S. 65*, and *SEC v. National Securities, Inc., 393 U.S. 453*, the challenged conduct was regulated by the State Insurance Commissioner, but this Court held that the practices were not the "business of insurance."

supra, at 733 (§ 15 of the Shipping Act); United States v. McKesson & Robbins, supra, at 316 **[****43]** (the Miller-Tydings and McGuire Acts).

Application of this principle is particularly appropriate in this case because the Pharmacy Agreements involve parties wholly outside the insurance industry. In analogous contexts, the Court has held that ***HN10***[] an exempt entity forfeits antitrust exemption by acting in concert with nonexempt parties. The Court has held, for example, that an exempt agricultural cooperative under the Capper-Volstead Act loses its exemption if it conspires with nonexempt parties. *Case-Swayne Co*. v. Sunkist Growers, Inc., 389 U.S. 384; United States v. Borden Co., 308 U.S. 188. Similarly, the Court has consistently stated that a union forfeits its exemption from the antitrust laws if it agrees with one set of employers to impose a wage scale on other bargaining units. Ramsey v. Mine Workers, **[*232]** 401 U.S. 302, 313; Mine Workers v. Pennington, 381 U.S. 657, 665-666. [39]

[**44] [***281] [**1084]** If agreements between an insurer and retail pharmacists are the "business of insurance" because they reduce the insurer's costs, then so are all other agreements insurers may make to keep their costs under control -- whether with automobile body repair shops or landlords. [40] **[****45]** Such agreements **[*233]** would be exempt from the antitrust laws if Congress had extended the coverage of the McCarran-Ferguson Act to the "business of insurance companies." [41] But that is precisely what Congress did not do.

For all these reasons, the judgment of the Court of Appeals is

Affirmed.

Dissent by: BRENNAN

Dissent

39

LEdHN[9B][] [9B] ***LEdHN[10B]***[] [10B]As the Court stated in Pennington, 381 U.S., at 665-666 (footnote omitted):

"[A] union may make wage agreements with a multi-employer bargaining unit and may in pursuance of its own union interests seek to obtain the same terms from other employers. No case under the antitrust laws could be made out on evidence limited to such union behavior. But we think a union forfeits its exemption from the antitrust laws when it is clearly shown that it had agreed with one set of employers to impose a certain wage scale on other bargaining units. One group of employers may not conspire to eliminate competitors from the industry and the union is liable with the employers if it becomes a party to the conspiracy."

40 There is no principled basis upon which a line could rationally be drawn that would extend the McCarran-Ferguson Act exemption only to an insurer's agreement with providers of goods and services to be furnished to its policyholders -- such as agreements with hospitals, doctors, lawyers, and the like. But assuming that such a line could rationally be drawn, to hold that even such provider agreements are the "business of insurance" is to ignore the language and purpose of the Act not to exempt the insurance industry as such from the antitrust laws.

Moreover, exempting provider agreements from the antitrust laws would be likely in at least some cases to have serious anticompetitive consequences. Recent studies have concluded that physicians and other health-care providers typically dominate the boards of directors of Blue Shield plans. Thus, there is little incentive on the part of Blue Shield to minimize costs, since it is in the interest of the providers to set fee schedules at the highest possible level. This domination of Blue Shield by providers is said to have resulted in rapid escalation of health-care costs to the detriment of consumers generally. See Skyrocketing Health Care Costs: The Role of Blue Shield, Hearings before the Subcommittee on Oversight and Investigations of the House Committee on Interstate and Foreign Commerce, 95th Cong., 2d Sess., 4-34 (1978) (remarks of Michael Pertschuk, Chairman, Federal Trade Commission).

41 It might be argued that some such agreements are exempt from the antitrust laws under the state-action exemption of Parker v. Brown, 317 U.S. 341. But that exemption would exist because of the extent of state regulation and not because the agreements are the "business of insurance."

MR. JUSTICE BRENNAN, with whom THE CHIEF JUSTICE, MR. JUSTICE MARSHALL, and MR. JUSTICE **POWELL** join, dissenting.

The McCarran-Ferguson Act, 59 Stat. 33, as amended, *15 U. S. C. §§ 1011-1015*, renders the federal antitrust laws inapplicable to the "business of insurance" to the extent such business is regulated by state law and is not subject to the "boycott" exception stated in *§ 1013 (b)*. [1] The single question presented by this case is whether the "business of insurance" **[*234]** **[***282]** includes direct contractual arrangements ("provider agreements") between petitioner Blue Shield and third parties to provide benefits owed to the insurer's policyholders. **[****46]** The Court today holds that it does not.

[**47]** I disagree: Since (a) there is no challenge to the status of Blue Shield's drug-benefits *policy* as the "business of insurance," I conclude (b) that some provider agreements negotiated to carry out the policy obligations of the insurer to the insured should be considered part of such business, and (c) that the specific Pharmacy Agreements at issue in this case should be included in such part. Before considering this analysis, however, it is necessary to set forth the background of the enactment of the McCarran-Ferguson Act.

[1085]** I

SEC v. National Securities, Inc., 393 U.S. 453, 459 (1969), recognized that the legislative history of the McCarran-Ferguson Act sheds little light on the meaning of the words "business of insurance." See S. Rep. No. 20, 79th Cong., 1st Sess. (1945); H. R. Rep. No. 143, 79th Cong., 1st Sess. (1945). But while the legislative history is largely silent on the matter, [2] **[****49]** it does indicate that Congress deliberately chose **[*235]** to phrase the exemption broadly. Congress had draft bills before it which would have limited the "business of insurance" to a

---

[1] *Section 2 (b)* of the Act, as set forth in *15 U. S. C. § 1012 (b)*, provides:

"(b) No Act of Congress shall be construed to invalidate, impair, or supersede any law enacted by any State for the purpose of regulating the business of insurance, or which imposes a fee or tax upon such business, unless such Act specifically relates to the business of insurance: *Provided*, That after June 30, 1948, the Act of July 2, 1890, as amended, known as the Sherman Act, and the Act of October 15, 1914, as amended, known as the Clayton Act, and the Act of September 26, 1914, known as the Federal Trade Commission Act, as amended [*15 U. S. C. 41 et seq.*], shall be applicable to the business of insurance to the extent that such business is not regulated by State Law."

Section 3 (b), as set forth in *15 U. S. C. § 1013 (b)*, provides:

"(b) Nothing contained in this chapter shall render the said Sherman Act inapplicable to any agreement to boycott, coerce, or intimidate, or act of boycott, coercion, or intimidation."

[2] The Court argues that the silence with respect to agreements between insurers and third parties, coupled with the fact that Congressmen did discuss horizontal agreements between insurance companies, establishes by negative inference that third-party agreements were not considered "the business of insurance." There is, however, a compelling explanation for the lack of mention of provider agreements. As the Court has noted in several cases, see, *e. g., SEC v. National Securities, Inc., 393 U.S. 453, 459 (1969)*; *St. Paul Fire & Marine Ins. Co*. v. *Barry, 438 U.S. 531, 538-539 (1978)*, the McCarran-Ferguson Act was a reaction to the decision in *United States v. South-Eastern Underwriters Assn., 322 U.S. 533 (1944)*. See *infra*, at 236-237. That case involved an organization of fire insurance companies, and much of the congressional discussion accordingly concerned alleged abuses by and regulation of such companies. See, *e. g*., 91 Cong. Rec. 1091-1092, 1479 (1945); 90 Cong. Rec. 6449-6455, 6527 (1944). Indeed, health insurers did not even participate in the hearings on the Act. See Joint Hearing before the Subcommittees of the Committees on the Judiciary on S. 1362 et al., 78th Cong., 1st Sess. (1943). Since fire insurers paid their policyholders cash indemnities, these companies had no reason to contract with third parties for the provision of goods or services. That fact fully explains the absence of discussion of such contracts in the congressional debates. Such absence no more indicates a congressional intent to exclude provider agreements from the "business of insurance" than does the absence of any mention of health insurance companies indicate a congressional intent arbitrarily to exclude all health insurance from the "business of insurance."

narrow range of specified insurance company practices, but chose **[****48]** instead the more general language which ultimately became law. [3]

[**50]** **[*236]** The **[***283]** historical background of the statute's enactment, developed by the Court in *SEC v. National Securities, Inc., supra*, provides the guide to congressional purpose:

"The McCarran-Ferguson Act was passed in reaction to this Court's decision in *United States v. South-Eastern Underwriters Assn., 322 U.S. 533 (1944)*. Prior to that decision, it had been assumed, in the language of the leading case, that '[issuing] a policy of insurance is not a transaction of commerce.' *Paul v. Virginia, 8 Wall. 168, 183 (1869)*. Consequently, regulation of insurance transactions was thought to rest exclusively with the States. In *South-Eastern Underwriters*, this Court held that insurance transactions were subject to federal regulation **[**1086]** under the *Commerce Clause*, and that the antitrust laws, in particular, were applicable to them. Congress reacted quickly . . . [, being] concerned about the inroads the Court's decision might make on the tradition of state regulation of insurance. The McCarran-Ferguson Act was the product of this concern. Its purpose was stated quite clearly in its first **[****51]** section; Congress declared that 'the continued regulation and taxation by the several States of the business of insurance is in the public interest.' 59 Stat. 33 (1945), *15 U. S. C. § 1011*. As this Court said shortly afterward, '[obviously] Congress' purpose was broadly to give support to the existing and future state systems for regulating and taxing the business of insurance.' *Prudential Insurance Co*. v. *Benjamin, 328 U.S. 408, 429 (1946)*.

"The . . . Act was an attempt to turn back the clock, to assure that the activities of insurance companies in dealing with their policyholders would remain subject to state regulation." *393 U.S., at 458-459*.

See also *St. Paul Fire & Marine Ins. Co*. v. *Barry, 438 U.S. 531, 538-539 (1978)*; 90 Cong. Rec. 6524 (1944) (Cong. Walter) **[*237]** ("[The] legislation . . . is designed to restore to the status quo the position the insurance business of this Nation occupied before the Supreme Court recently legislated [in *South-Eastern Underwriters*]").

Since continuation of state regulation as it existed before *South-Eastern* was Congress' goal, [4] **[****52]** evidence of **[***284]** what States **[*238]** might reasonably have considered to be and regulated as insurance at the time the

[3] S. 12, 79th Cong., 1st Sess. (1945), would have specified

"any agreement or concerted or cooperative action *between two or more insurance companies* for making, establishing, or using rates for insurance, rating methods, premiums, insurance policy or bond forms, or underwriting rules." (Emphasis added.)

See also § 4 (b) of a draft bill of the National Association of Insurance Commissioners, 90 Cong. Rec. A4406 (1944). A significant Senate floor debate with regard to such limiting bills is the following:

"MR. PEPPER. Would it not be better that those agreements, if there are such that are legitimatized, be identified in the statute?

"MR. O'MAHONEY. I quite agree with the Senator, and I endeavored to the very best of my ability to induce the committees of Congress to write into the law specific exemptions from the ***antitrust law***, but I was unable to prevail in the Committee on the Judiciary and I was unable to prevail on the floor of the Senate." 91 Cong. Rec. 1444 (1945).

The Court challenges the conclusion that Congress intended to phrase the exemption broadly by referring to the legislative history of one obscure amendment to an early House version of the Act. *Ante*, at 222-223, n. 29. Closer examination of the short debate surrounding that amendment reveals only the Representatives' repeated expressions of their confusion over what the amendment meant. See 90 Cong. Rec. 6562 (1944) (remarks of Reps. Summers, Hobbs, and Fernandez).

[4] There can be no quarrel with the Court's statement, *ante*, at 220, and n. 24, that the McCarran-Ferguson Act was not intended to restore the law, *in all respects*, to what it had been before *South-Eastern Underwriters*. But the principal differences between pre-*South-Eastern* and post-McCarran-Ferguson law are irrelevant for purposes of this case, and do not detract from the Court's oft-repeated statement that the purpose of the Act was to preserve state regulatory schemes as they existed before *South-Eastern Underwriters*.

McCarran-Ferguson Act was passed in 1945 is clearly relevant to our decision. This does not mean that a transaction not viewed as **[**1087]** insurance in 1945 cannot be so viewed today.

"We realize that . . . insurance is an evolving institution. Common knowledge tells us that the forms have greatly changed even in a generation. And we would not undertake to freeze the [concept] of 'insurance' . . . into the mold [it] fitted when these Federal Acts were passed." *SEC v. Variable Annuity Life Ins. Co., 359 U.S. 65, 71 (1959)*.

It is thus logical to suppose that if elements common to the ordinary understanding of "insurance" are present, new forms of the business should constitute the "business of insurance" for purposes of the McCarran-Ferguson Act. The determination of the scope of the Act, therefore, involves both an analysis of the proximity between the challenged transactions and those well recognized as elements of "insurance," and an examination of the historical setting of the Act. On both counts, Blue Shield's **[****53]** Pharmacy Agreements constitute the "business of insurance."

[**54]** **[*239]** II

I start with common ground. Neither the Court, **[***285]** *ante*, at 230 n. 37, nor the parties challenge the fact that the drug-benefits policy offered by Blue Shield to its policyholders -- as distinguished from the contract between Blue Shield and the pharmacies -- is the "business of insurance." Whatever the merits of scholastic argument over the technical definition of "insurance," the policy both transfers and distributes risk. The policyholder pays a sum certain -- the premium -- against the risk of the uncertain contingency of illness, and if the company has calculated correctly, the premiums of those who do not fall ill pay the costs of benefits above the premiums of those who do. See R. Mehr & E. Cammack, Principles of Insurance 31-32 (6th ed. 1976). An important difference between Blue Shield's policy and other forms of health insurance is that Blue Shield "pays" the policyholder in goods and services (drugs and their dispensation), rather than in cash. Since we will not "freeze the [concept] of 'insurance' . . . into the

---

Before *South-Eastern*, insurance companies might boycott, coerce, and intimidate without violating federal antitrust statutes since insurance was not considered "commerce" and hence was beyond the reach of federal law. For the same reason, even unregulated insurance transactions were free from antitrust attack. Finally, Congress, because of the "commerce" problem, could not otherwise regulate insurance. None of these elements survived the decision in *South-Eastern*, and none was revived by McCarran-Ferguson. These differences between pre-*South-Eastern* and post-McCarran-Ferguson law were what Senator Ferguson had in mind when he answered "no" to Senator McKellar's question, cited by the Court, *ante*, at 220 n. 24, asking whether the effect of the Act was to re-establish the law as it stood prior to *South-Eastern*. This is revealed by quotation of Senator Ferguson's full answer to Senator McKellar.

"MR. FERGUSON. No. I would say that subsection (b), at the bottom of page 2, would allow the provisions of the Sherman Act to apply to all agreements or acts of boycott, coercion, or intimidation, and subsection 4 (a) would suspend the application of the provisions of the Sherman Act and the Clayton Act, insofar as States may regulate and tax such companies, until certain dates or until Congress may act in the meantime in respect to what Congress thinks should be done with the business of insurance." 91 Cong. Rec. 478 (1945).

These discrete differences between pre-*South-Eastern* and post-McCarran-Ferguson law are not applicable here, and do not conflict with the holdings of this Court's prior opinions that, with respect to *state-regulated* insurance practices *not constituting boycotts*, McCarran-Ferguson was intended to preserve pre-existing state insurance regulation.

This analysis also explains, and renders irrelevant for this case, Congress' rejection of the "total" exemption bills cited by the Court, *ante*, at 218-219, and n. 21. Those bills, unlike the one that passed, would have exempted boycotts and unregulated transactions. It was this aspect of the "total" exemption bills to which the National Association of Insurance Commissioners objected. See 90 Cong. Rec. 8482 (1944). These bills were rejected not because of a decision to narrow the scope of the nonboycott activities to be exempted, but because Congress determined that the business of insurance should be exempted only where regulated by the States, rather than unconditionally.

mold it fitted" when McCarran-Ferguson was passed, this difference cannot be a reason for holding that the drug-benefits policy **[****55]** falls outside the "business of insurance" even if our inquiry into the understandings of what constituted "insurance" in the 1930's and 1940's were to suggest that a contrary view prevailed at that time. [5]

Fortunately, logic and history yield the same result. It is true that the first health insurance policies provided only cash indemnities. However, although policies that specifically provided drug benefits were not available during the 1930's and 1940's, analogous policies providing hospital and medical services -- rather than cash -- were available.

The hospital service-benefit concept originated in Texas in **[*240]** 1929; medical services were first offered in 1939. R. Eilers, Regulation of Blue Cross and Blue Shield Plans 10, 15 (1963) (hereinafter **[****56]** Eilers). In 1940, 4,500,000 people in 60 communities were covered by Blue Cross or related hospital-benefits plans. C. Rorem, Non-Profit Hospital Service Plans 1-2 (1940) (hereinafter Rorem I). During the 1940's, health insurance became a subject of collective bargaining, with unions demanding the service-benefit approach of Blue Cross and Blue Shield. S. Law, Blue Cross 11 (1974) (hereinafter Law). By 1945, the year the McCarran-Ferguson Act was enacted, over 20 million people were enrolled in service-benefit programs, with service-benefit plans comprising 61% of the total hospitalization insurance market. See Hearings before the Senate Committee on Education and Labor, A National Health Program, 79th Cong., 2d Sess., pt. 1, p. 173 (1946); Eilers 19; Law 11.

[1088]** Moreover, regulation of the service-benefit plans was a part of the system of state regulation of insurance that the McCarran-Ferguson Act was designed to preserve. Led by New York in 1934, 24 States passed enabling Acts by 1939 which, while relieving the plans of certain reserve requirements and tax obligations, specifically subjected service-benefit plans to the supervision and control of state departments **[****57]** of insurance. [6] **[****58]** **[***286]** See Rorem, Enabling Legislation for Non-Profit Hospital Service Plans, 6 Law & Contemp. Prob. 528, 531, 534 (1939) (hereinafter Rorem II); N. Sinai, O. Anderson, & M. Dollar, Health Insurance in the United States **[*241]** 48-49 (1946) (hereinafter Sinai); Comment, Group Health Plans: Some Legal and Economic Aspects, 53 Yale L. J. 162, 174 (1943). Another 16 States apparently limited the issuance of hospitalization insurance to stock and mutual insurance companies. Nine acted on the premise that the plans were not "insurance" and authorized operation under general corporation laws, exempt from reserve requirements. Rorem II, p. 532. By the time the McCarran-Ferguson Act was passed, 35 States had enabling legislation. [7] During this period, the National Association of Insurance Commissioners (NAIC), the organization of state insurance directors which played a major role in drafting the McCarran-Ferguson Act, [8] was also drafting model state enabling legislation to govern service-benefit health plans. Proceedings of the NAIC, 75th Sess., 226 (1944); *id., 76*th Sess., 250 (1945). [9]

Acts, ch. 719; 1939 S. C. Acts No. 296; 1939 Tex. Gen. Laws, p. 123; 1939 Vt. Laws No. 174; 1939 Wis. Laws, ch. 118.

[7] F. Hedinger, The Social Role of Blue Cross as a Device for Financing the Costs of Hospital Care 51 (1966). The additional statutes were: 1945 Ariz. Sess. Laws, ch. 13 (1st Spec. Sess.); 1939 Fla. Laws, ch. 19108; 1941 Kan. Sess. Laws, ch. 259; 1940 La. Acts No. 267; 1941 Minn. Laws, ch. 53; 1941 Neb. Laws, ch. 43; 1941 N. C. Pub. Laws, ch. 338; 1943 N. D. Laws, ch. 103; 1945 Tenn. Pub. Acts, ch. 98; 1940 Va. Acts, ch. 230; 1943 W. Va. Acts, ch. 8.

[8] See 91 Cong. Rec. 483 (1945) (remarks of Sen. O'Mahoney).

[9] Debate arose during this period as to whether service-benefit plans were technically insurance. See *ante*, at 225-230. Most state insurance commissioners ruled during the 1930's that the plans constituted insurance, and therefore had to meet the capital stock, reserve, and assessment requirements applicable to the commercial stock and mutual insurance companies which offered cash indemnity policies. Eilers 101. In addition, this meant that the plans were subject to special state taxation. *Ibid*.

[**59] [*242] [***287] [**1089]** Thus, when the McCarran-Ferguson Act became law, service-benefit plans similar to the Blue Shield plan at issue here were a widespread and well-recognized form of insurance, subject to regulation in most of the States. Congress itself treated these important programs as insurance. In 1939, Congress adopted an enabling Act incorporating a hospitalization-benefits plan in the District of Columbia, with supervisory **[*243]** authority placed in the hands of the Superintendent of Insurance. See H. R. 6266, 76th Cong., 1st Sess. (1939); H. R. Rep. No. 1247, 76th Cong., 1st Sess. (1939); 84 Cong. Rec. 11224 (1939). And in hearings held the year after passage of the McCarran-Ferguson Act, the same Congress that approved that Act debated Blue Shield-type programs as alternatives to national health insurance, with participating Congressmen frequently referring to them as "insurance." Hearings before the Senate Committee on Education and Labor, A National Health Program, 79th Cong., 2d Sess., pt. 1, pp. 55, 83, 108, 172, pt. 2, p. 558 (1946). [10] The status of service-benefit policies as "insurance," both logically and historically, is therefore sufficiently **[****60]** established to make that the first premise in an analysis of the status of the Pharmacy Agreements at issue in this case.

III

The next question is whether at least some contracts with third parties to procure delivery of benefits to Blue Shield's insureds would also constitute the "business of insurance." Such contracts, like those between Blue Shield and the druggists in this case, are known as "provider agreements." The Court, adopting the view of the Solicitor General, today holds that no provider agreements can be considered part of the "business of insurance." [11] It contends that the "underwriting or **[****61]** spreading of risk [is] an indispensable characteristic of **[*244]** insurance," *ante*, at 212, [12] and that **[***288]** "[another] commonly understood aspect of the business of insurance

---

Such holdings limited the feasibility of the plans at a time when they were widely perceived as being socially beneficial. Moreover, it was argued that these rulings were inappropriate to service-benefit plans, which were generally "nonprofit," and often included guarantees by hospitals to provide services regardless of the financial state of the insurer -- potentially an adequate substitute for the cash reserves needed by indemnity plans. *Id., at 135-136, 239*.

Some courts, and even some Blue Cross-type organizations, attempted to surmount these barriers to effectuation of plans deemed to be in the public interest by arguing that the plans were not technically "insurance" subject to the jurisdiction of state insurance commissioners, and hence were not bound by the requirements of the stock and mutual insurance companies. See, *e. g., Jordan v. Group Health Assn., 71 App. D. C. 38, 107 F.2d 239 (1939)*. But see *Cleveland Hospital Service Assn*. v. *Ebright, 142 Ohio St. 51, 49 N. E. 2d 929 (1943)* (hospital service plans *are* insurance); *McCarty v. King County Medical Service Corp., 26 Wash. 2d 660, 175 P. 2d 653 (1946)* (same). But contemporary commentators questioned the soundness of such views and argued that the plans should be treated as insurance, although as a special kind not subject to the traditional requirements. See, *e. g*., Note, The Legal Problems of Group Health, 52 Harv. L. Rev. 809, 815 (1939); Comment, Group Health Plans: Some Legal and Economic Aspects, 53 Yale L. J. 162, 172 (1943). The 35 state enabling Acts governing service-benefit health plans reflected the States' agreement that the plans were "a special type of insurance" differing from the stock and mutual companies. Rorem II, p. 534; Sinai 48. This is most clearly demonstrated by the fact that the vast majority of the state statutes, while relieving the plans of "other" insurance law requirements (primarily the reserve requirements and special insurance taxes), subjected their activities to the control of the state insurance commissioner. The 1939 New Mexico Statute, for example, amended the State's *Insurance* Code by adding a new section entitled "Non-Profit Hospital Service Plans." The amendment subjected the plans, and in particular both their premiums and rates of payment to hospitals, to the approval of the *Superintendent of Insurance*, while exempting them from "all *other* provisions of the insurance law." 1939 N. M. Laws, ch. 66 (emphasis added). This approach was in accord with the commonly held view that such plans were forms of "insurance," as reflected by the statements of numerous Congressmen in the congressional hearings on the proposed National Health Program, see *infra*, at 243. And everyday meaning, rather than some technical term of art, is what Congress intended by its use of the word "insurance" in the McCarran-Ferguson Act.

[10] Messages of two Presidents to the Congress on the subject of national health care also referred to service-benefit plans as forms of insurance. Message from the President of the United States, Report and Recommendations on National Health, H. R. Doc. No. 120, 76th Cong., 1st Sess., 63 (1939); Message from the President, A National Health Program, H. R. Doc. No. 380, 79th Cong., 1st Sess., 9, 10 (1945).

[11] The respondents do not argue this view. They agree that some provider contracts may constitute the "business of insurance." Brief for Respondents 33.

relates to the contract between the insurer and the insured." *Ante*, at 215. Because provider agreements neither themselves spread risk, nor involve transactions between insurers and insureds, the Court excludes them from the "business of insurance."

The argument fails in light of this Court's **[****62]** prior decisions and the legislative history of the Act. The Court has held, for example, *FTC v. National Casualty Co., 357 U.S. 560 (1958)*, that the advertising of insurance, a unilateral act which does not involve underwriting, is within the scope of the McCarran-Ferguson **[**1090]** Act. And the legislative history makes it abundantly clear that numerous horizontal agreements between insurance companies which do not technically involve the underwriting of risk were regarded by Congress as within the scope of the Act's exemption for the "business of insurance." For example, rate agreements among insurers, a conspicuous congressional illustration, see, *e. g*., 91 Cong. Rec. 1481, 1484 (1945) (remarks of Sens. Pepper and Ferguson), and the subject of the *South-Eastern Underwriters* case, see *SEC v. National Securities, Inc., 393 U.S., at 460*, do not themselves spread risk. Indeed, the Court apparently concedes that arrangements among insurance companies respecting premiums and benefits would constitute the "business of insurance," despite their failure to fit within its formula. *Ante*, at 221 and 224-225, n. 32.

But the Court's **[****63]** attempt to limit its concession to horizontal transactions still conflicts with the legislative history. Compelling evidence is the fact that Congress actually rejected a proposed bill to limit the exemption to agreements between **[*245]** insurance companies. S. 12, 79th Cong., 1st Sess. (1945). See n. 3, *supra*. Moreover, vertical relationships between insurance companies and independent sales agencies were a subject of the indictment in *United States v. South-Eastern Underwriters Assn., 322 U.S. 533, 535 (1944)*, were the object of discussion in the House, 90 Cong. Rec. 6538 (1944) (remarks of Cong. Celler), and were expressly included as part of the "business of insurance" in an early draft of the Act, *id*., at A4406 (NAIC bill, § 4 (b)(5)). Again, the Court concedes that such transactions, between insurers and agents, might fall within the "business of insurance," despite the inconsistency with the Court's own theory. *Ante*, at 224-225, n. 32. [13]

[**64]** The Court's limitation also ignores the significance of pervasive state insurance regulation -- prevailing when the Act was passed -- of hospitalization-benefits plans whose "distinctive feature," Rorem I, p. 64; Proceedings of the NAIC, 75th Sess., 228 (1944), was the provider contract with the participating hospital to provide service when needed. The year prior to adoption of the Act the **[***289]** NAIC emphasized the relationship between provider agreements and service-benefit policies:

"A hospital service plan is designed to provide service rather than to indemnify and this can only be guaranteed through contractual arrangements between plans and hospitals." *Ibid*.

The Association also proposed, in the year McCarran-Ferguson passed, a model state enabling Act requiring "full approval of . . . contracts with hospitals . . . by the insurance commissioner." Proceedings of the NAIC, 76th Sess., 250 **[*246]** (1945). That proposal reflected well the actual contents of existing state enabling Acts which armed insurance commissioners with considerable authority to regulate provider agreements. [14] Congress itself authorized the service-benefit plan it incorporated in **[****65]** the District of Columbia "to enter into contracts with hospitals for

---

[12] "Underwriting," the Solicitor General argues, means "[spreading] risk more widely or [reducing] the role of chance events." Brief for United States as *Amicus Curiae* 17 (hereinafter Government Brief). For purposes of argument I will assume that this is a correct definition of "underwriting." But see R. Holtom, Underwriting Principles and Practices 11 (1973).

[13] The effort to distinguish insurer/agent transactions from provider agreements on the ground that the former are "wholly intra-industry" while the latter are not, *ante*, at 225 n. 32, constitutes argument by tautology. The former are "intra-industry" and the latter not, only because the Court so holds today.

[14] See, *e. g*., 1935 Cal. Stats., ch. 386; 1939 Iowa Acts, ch. 222; 1937 Md. Laws, ch. 224; 1939 Me. Acts, ch. 149; 1939 N. H. Laws, ch. 80; 1939 S. C. Acts No. 296. See also Rorem I, pp. 67-68; Sinai 48-49. Such provisions were often quite extensive, *e. g*., requiring approval by the insurance commissioner of contracts between hospitals and the corporation, including rates of payment, *ibid*.; requiring that the contracts contain guarantees of services by the hospitals to policyholders despite financial difficulties of the insurer, Rorem I, p. 67; or even limiting the kind of hospitals with which contracts could be made, *id., at 68*.

the care and treatment of [its subscribers]." H. R. 6266, 76th Cong., 1st Sess. (1939). In light of Congress' objective through the McCarran-Ferguson Act to insure the continuation of existing state regulation, the conclusion **[**1091]** that at least some provider agreements were intended to be within the "business of insurance" is inescapable.

[**66]** Logic compels the same conclusion. *Some* kind of provider agreement becomes a necessity if a service-benefits insurer is to meet its obligations to the insureds. The policy before us in this case, for example, promises payment of benefits in drugs. Thus, some arrangement must be made to provide those drugs for subscribers. [15] Such an arrangement obtains **[*247]** the very benefits promised in the policy; it does not simply relate to the general operation of the company. A provider contract in a service-benefit plan, therefore, is critical to "the type of policy which could be issued" as well as to its "reliability" and "enforcement." It thus comes within the terms of *SEC v. National Securities, Inc., 393 U.S., at 460*. That case explained that the "business of insurance" involves not only **[***290]** the "relationship between insurer and insured," but also "other activities of insurance companies [that] *relate so closely* to their status as reliable insurers that they too must be placed in the same class." Thus, "[statutes] aimed at protecting or regulating . . . [the insurer/insured] relationship, *directly or indirectly*, are laws regulating **[****67]** the 'business of insurance.'" *Ibid*. (emphasis added).

[**68]** The Congress that passed McCarran-Ferguson was composed of neither insurance experts nor dictionary editors. Rather than use the technical term "underwriting" to express its meaning, Congress chose "the business of insurance," a common-sense term connoting not only risk underwriting, but contracts closely related thereto. [16] Since Congress knew of service-benefit policies, and viewed them as insurance, it would strain common sense to suppose Congress viewed contracts **[*248]** necessary to effectuate those policies' commitments as being outside the business it sought to exempt from the antitrust laws.

[**69]** IV

The remaining question is whether the provider agreement in *this* case constitutes the "business of insurance." Respondents contend that even if some contract between Blue Shield and the pharmacies is necessary, this one is not. Under the contract at issue, the druggist agrees to dispense drugs to Blue Shield's insureds for a $ 2 payment, and Blue Shield agrees to reimburse the druggist for the acquisition cost of each drug so dispensed. The pharmacy is thus limited to a $ 2 "markup." With support from the Court of Appeals, respondents argue that only the first half of the bargain is necessary for Blue Shield to fulfill its policy obligations. Those are fulfilled when Blue Shield binds the pharmacy to dispense the requested drug for $ 2. The second half of **[**1092]** the agreement, the amount Blue Shield reimburses the druggist, is assertedly irrelevant to the policyholder. As an alternative to the existing plan, the respondents and the Court of Appeals suggest that Blue Shield could simply pay the pharmacist his usual charge (minus the $ 2 paid by the policyholder). The present plan, which limits reimbursement to acquisition cost

---

[15] Indeed, unions negotiating for drug-coverage plans have requested that the plans include contractual arrangements with pharmacies, in order to guarantee that the policy's promises are kept. See Brief for Motor Vehicle Manufacturers Assn. as *Amicus Curiae* 10-11.

It might be argued that the drug-benefits policy could operate successfully without any agreement between Blue Shield and the pharmacies. The consumer could simply pay the pharmacist his full price, whereupon he would normally receive the drugs without hesitation. Blue Shield could then reimburse the policyholder for the full price minus the $ 2 deductible. This would not, however, be the policy bargained for in this case. That policy guarantees provision of drugs upon a minimal $ 2 payment, without requiring the policyholder to advance the full price when the contingency of illness occurs -- a time when he may not be able to afford the out-of-pocket payment. Moreover, such cash-reimbursement plans almost inevitably include payment ceilings, again distinguishing them from the full-coverage service plan bargained for in this case. See discussion, *infra*, at 252, and n. 20.

[16] The Court errs in its reading of *SEC v. Variable Annuity Life Ins. Co., 359 U.S. 65 (1959)*. There a "variable annuity" plan was held not to be "the business of insurance" because all risk remained on the policyholder and no underwriting of risk occurred. The key to *Variable Annuity* is that neither the agreement at issue nor *any* with which it was involved effectuated a transference of risk. *Id., at 71*. That is not the case here, where the policyholder has successfully transferred his risk by trading his premium for the certainty of benefits in the event of illness.

and freezes the markup at $ 2, is said **[****70]** to set a "fixed" price. From this premise respondents argue that such fixed-price plans are "anticompetitive," and therefore not the "business of insurance."

Respondents' argument is directly contradicted by history. The service-benefit plans available when the McCarran-Ferguson Act was passed actually "fixed" more of the payment to their participating providers than does the plan here, which "fixes" only the markup. Those early plans **[***291]** usually paid established and equal amounts to their participating hospitals, rather than paying whatever each hospital charged. Rorem I, p. 64. Moreover, under the typical state enabling Act, those **[*249]** payments were subject to the approval of the state department of insurance. [17] The 1937 Pennsylvania statute, for example, provided that "all rates of payments to hospitals made by such [service-benefit plan] corporations . . . and any and all contracts entered into by any such corporation with any hospital, shall, at all times, be subject to the prior approval of the Insurance Department." 1937 Pa. Laws No. 378. Therefore, as insurer/provider fee agreements were part of the system of state regulation which the McCarran-Ferguson **[****71]** Act sought to preserve, there is no historical reason to exclude Blue Shield's Pharmacy Agreements from the ambit of the exemption; there is instead a good historical reason for including them.

Nor does respondents' claim that the Pharmacy Agreements are "anticompetitive" exclude them from constituting the "business of insurance." The determination of whether Blue Shield's Pharmacy Agreements actually involve antitrust violations or are otherwise anticompetitive has been held in abeyance, pending final decision as to whether the agreements fall within the scope of the McCarran-Ferguson Act. But even if the agreements were anticompetitive, that alone could not be the basis for excluding them from the "business of insurance." An antitrust exemption by its very nature must protect some **[****72]** transactions that are anticompetitive; an exemption that is extinguished by a finding that challenged activity violates the antitrust laws is no exemption at all.

While this reason for excluding the Pharmacy Agreements from the circle of exempt provider agreements is unconvincing, there are substantial reasons, in addition to history, for including them within that circle. First, it is clear that the contractual arrangement utilized by Blue Shield affects its **[*250]** costs, and thus affects both the setting of rates and the insurer's reliability. This is definitely a factor relevant to the determination of whether a transaction is within the "business of insurance." See *SEC v. National Securities, Inc., 393 U.S., at 460*. See also *Proctor v. State Farm Mutual Automobile Ins. Co., 182 U. S. App. D. C. 264, 561 F.2d 262 (1977)*. True, that factor alone is not determinative, for as argued by the Court, innumerable agreements, including the lease on the insurance company's offices, affect cost. This contract, however, has more than a mere incidental connection to the policy and premium. It is a direct arrangement to provide the very goods **[****73]** and services whose purchase is the risk assumed in the insurance policy. It is therefore integral to the insurer's rate-setting process, as the correlation between rates and drug prices in a drug-benefits policy is necessarily high. Moreover, the ability of state insurance commissioners to regulate rates, an important concern of the Act, is measurably enhanced by their ability **[**1093]** to control the formulas by which insurers reimburse **[***292]** providers. [18] The same is true of state efforts to ensure that plans are financially reliable. See *Travelers Ins. Co*. v. *Blue Cross of Western Pennsylvania, 481 F.2d 80, 83 n. 9 (CA3 1973)* (quoting the Pennsylvania Insurance Commissioner). This close nexus between the Pharmacy Agreements and both the rates and fiscal reliability of Blue Shield's plan speaks strongly for their inclusion within the "business of insurance." See generally *Proctor v. State **[*251]** Farm Mutual Automobile Ins. Co., supra, at 271-272, 561 F.2d, at 269-270*.

---

[17] Sinai 49. See, *e. g.*, 1937 Ga. Laws, p. 690; 1939 Iowa Acts, ch. 222; 1939 Mich. Pub. Acts No. 109; 1939 N. M. Laws, ch. 66; 1939 Tex. Gen. Laws, p. 123. The same is true of the modern state statutes. See Eilers 106-107.

[18] Indeed, some state insurance commissioners have made aggressive use of their authority over provider contracts as a means of controlling premium rates. See *Frankford Hospital v. Blue Cross of Greater Philadelphia, 417 F.Supp. 1104, 1106 (ED Pa. 1976)*, aff'd, *554 F.2d 1253* (CA3), cert. denied, ***434 U.S. 860 (1977)***; State of Michigan, Commissioner of Ins., No. 77-R-101 (Mar. 3, 1977); State of Illinois, Dept. of Ins., Hearing No. 1607 (Apr. 8, 1977). This may also explain why the Federal Government, in programs in which it functions as a health insurer, requires that its provider agreements include specified fee formulas. See, *e. g.*, ***42 U. S. C. §§ 1395u***, ***1395x (v)*** (Medicare).

[**74]** Another reason, in addition to this nexus to basic insurance elements, also supports the conclusion that fixed-price provider agreements are the "business of insurance." Such agreements themselves perform an important insurance function. It may be true, as the Court contends, that conventional notions of insurance focus on the underwriting of risk. But they also include efforts to reduce the unpredictable aspects of the risks assumed. Traditional plans achieve this end by setting ceilings on cash payments or utilizing large deductibles. R. Mehr & E. Cammack, Principles of Insurance 222 (6th ed. 1976). Even if the insurer cannot know how often a policyholder might become ill, it can know the extent of its exposure in the event of illness. The actuarial uncertainty, therefore, is greatly reduced. A fixed-price provider agreement attempts to reach the same result by contracting in advance for a price, rather than agreeing to pay as the market fluctuates. The agreement on price at least minimizes the variance of the "payoff" variable, even if the probability of its occurrence remains an unknown. Indeed, if examined carefully, this function comes within the latter half of the **[****75]** definition of "underwriting" offered by the Solicitor General: "[spreading] risk more widely or [reducing] the role of chance events." See n. 12, *supra*. Of course, the Pharmacy Agreements in this case do not totally control "the role of chance" in drug prices since acquisition costs may fluctuate even if "markup" is fixed, but they are at least an attempt to reduce the role of chance to manageable proportions. [19]

Moreover, a service-benefit plan which "[pays] the cost . . . whatever it might be," as hypothesized by the Court of **[*252]** Appeals, 556 F.2d, at 1381, would run grave risks of bankruptcy. Since it would expose the insurer to unknown liability, it would measurably increase the probability that an incorrect assessment of exposure would occur. This could lead to a failure to cover actual losses **[****76]** with premiums. Respondents argue that this fiscal-reliability problem could be solved by placing a dollar limit on benefits. But such a **[***293]** plan would be almost indistinguishable from a cash-indemnity policy. It would not be the full-service-regardless-of-price plan for which the policyholders bargained. [20] The Pharmacy Agreements are thus "other activities of insurance companies [related] so closely to their status as reliable insurers that they too must be placed in the same class." *SEC v. National Securities, Inc., supra, at 460*.

[1094]** V

The process of deciding what is and is not the "business of insurance" is inherently a case-by-case problem. It is true that the conclusion advocated here carries with it line-drawing problems. That **[****77]** is necessarily so once the provider-agreement line is crossed by holding some to be within the "business." But that is a line which history and logic compel me to cross. I would hold that the *concept* of a provider agreement for benefits promised in the policy is within the "business of insurance" because some form of provider agreement is necessary to fulfill the obligations of a service-benefit policy. I would hold that *these* provider agreements, Blue Shield's Pharmacy Agreements, are protected because they (1) directly obtain the very benefits promised in the policy [21] **[****78]** and therefore **[*253]** directly affect rates, cost, and insurer reliability, and (2) themselves constitute a critical element of risk "prediction." [22] The conclusion that these kinds of agreements are the "business of insurance" is that reached by every Court of Appeals except the Court of Appeals in this case. [23]

---

[19] The pharmacist respondents would not be better off if Blue Shield set acquisition cost as well as markup. In that event they might not even meet the cost of their own outlays.

[20] The plan here was "bargained for" in the literal sense. It had its origins in a 1967 collective-bargaining agreement between the United Auto Workers and the three largest domestic automobile manufacturers. Brief for Petitioners 6.

[21] The Solicitor General suggests that this test could be subverted by an insurer's decision to list all kinds of incidental and even unrelated transactions in its policy. As with other forms of antitrust immunity, I have no difficulty concluding that "sham" arrangements should not be honored. Cf. *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 144 (1961)*; *California Motor Transport Co*. v. *Trucking Unlimited, 404 U.S. 508 (1972)*.

[22] These factors together are sufficient to decide this case. I need not decide whether either would independently suffice, nor whether in the absence of these factors others might also be capable of bringing a provider agreement within the exemption.

[**79]** I would not suggest, however, that *all* provider agreements come within the McCarran-Ferguson Act proviso. Given the facts found by the District Court upon summary judgment, this is not a case where the petitioner pharmacies themselves conspired to exclude others from the market, and either pressured Blue Shield to go along, or were voluntarily joined by the insurer. See also Government Brief 13 n. 6. Such an agreement among pharmacies, itself neither necessary nor related to the insurer's **[***294]** effort to satisfy its obligations to its policyholders, would be outside the "business of insurance." An insurance company cannot immunize an illegal conspiracy by joining it. Cf. *Parker v. Brown, 317 U.S. 341, 351-352 **[*254]** (1943)*. Moreover, since in this case the Blue Shield plan was offered to all San Antonio pharmacies and was in fact agreed to by at least 12, I am not called upon to decide whether an exclusive arrangement with a single provider would be so tenuously related to providing policyholder benefits as to be beyond the exemption's protection. See generally *Proctor v. State Farm Mutual Automobile Ins. Co., 182 U. S. App. D. C., at 270 n. 10, 561 F.2d, at 268 n. 10*. **[****80]** [24]

Finally, the conclusion that Blue Shield's Pharmacy Agreements should be held within the "business of insurance" [25] **[****82]** **[*255]** does not alone establish **[***295]** whether the agreements enjoy **[**1095]** an exemption from

---

[23] See *Proctor v. State Farm Mutual Automobile Ins. Co., 182 U. S. App. D. C. 264, 561 F.2d 262 (1977)*, aff'g *406 F.Supp. 27 (DC 1975)*, cert. pending, No. 77-580; *Doctors, Inc*. v. *Blue Cross of Greater Philadelphia, 557 F.2d 1001 (CA3 1976)*, aff'g *431 F.Supp. 5 (ED Pa. 1975)*; *Frankford Hospital v. Blue Cross of Greater Philadelphia, 554 F.2d 1253 (CA3 1976)*, aff'g *417 F.Supp. 1104* (ED Pa.), cert. denied, ***434 U.S. 860 (1977)***; *Anderson v. Medical Service of District of Columbia, 551 F.2d 304 (CA4 1977)*, aff'g 1976-1 Trade Cases para. 60,884 (ED Va); *Travelers Ins. Co*. v. *Blue Cross of Western Pennsylvania, 481 F.2d 80* (CA3), aff'g *361 F.Supp. 774 (WD Pa. 1972)*, cert. denied, ***414 U.S. 1093 (1973)***.

[24] Such an arrangement could not be suspect simply because it would be anticompetitive, see discussion, *supra, at 249*. Rather, that means of providing policy benefits might be regarded as so unnecessary, and so likely to have its principal impact on pharmacies rather than policyholders, as to cross the boundary line of what constitutes the "business of insurance." I intimate no view upon the question.

[25] The analogies to other antitrust exemptions referred to by the Court, *ante*, at 231-232, are inapt. It is true that as a general rule an "exempt" party loses its immunity when it makes an agreement that is outside the scope of the exemption. But that general rule has no application here unless one assumes what the respondents need to prove -- that the Pharmacy Agreements are outside the scope of the McCarran-Ferguson Act. Reference to the cases under the Capper-Volstead Act is not helpful on the matter, as that Act limits its exemption to those who are "engaged in the production of agricultural products *as farmers, planters, ranchmen, dairymen, nut or fruit growers*." 42 Stat. 388, *7 U. S. C. § 291* (emphasis added). As a result, this Court has held that agreements involving nonfarmers are not exempt. *National Broiler Marketing Assn*. v. *United States, 436 U.S. 816 (1978)*. As the Court emphasizes, however, the McCarran-Ferguson Act exemption was not written in terms of "insurance companies," but extends instead to the "business of insurance." Hence, the participation of pharmacies does not automatically vitiate the exemption, as does the participation of nonfarmers in the Capper-Volstead "analogy."

Nor is reference to the labor exemption helpful to the Court. The quotation from *Mine Workers v. Pennington, 381 U.S. 657, 665-666 (1965)*, cited by the Court, *ante*, at 232 n. 39, is in complete accord with what I would conclude here: "[A] union [read 'insurer'] may make wage [pharmacy] agreements with a multi-employer bargaining unit [a group of pharmacies] . . . . But . . . [one] group of employers [pharmacies] may not conspire to eliminate competitors from the industry and the union [insurer] is liable with the employers [pharmacies] if it becomes a party to the conspiracy." The labor exemption is a particularly poor analogy for the Court to stress because in yet another footnote, *Pennington* expressly approved a set of transactions virtually identical to those complained of in this case. Here, respondents contend that Blue Shield adopted a uniform fee policy, even though it may have suspected that some pharmacies would not be able to compete if required to limit their markup to that demanded by Blue Shield. There was, however, no additional evidence of a conspiracy among the participating pharmacies to drive out their less able brethren, which Blue Shield then joined. This was precisely the set of circumstances held by the *Pennington* Court to be *within* the scope of the exemption:

"Unilaterally, and without agreement with any employer group to do so, a union may adopt a uniform wage policy and seek vigorously to implement it even though it may suspect that some employers cannot effectively compete if they are required to pay the wage scale demanded by the union. The union need not gear its wage demands to wages which the weakest units in the industry can afford to pay. Such union conduct is not alone sufficient evidence to maintain a union-employer conspiracy charge under the Sherman Act. There must be additional direct or indirect evidence of the conspiracy." *381 U.S., at 665 n. 2*.

the antitrust laws. To be entitled to an exemption, petitioners still would have to demonstrate that the transactions are in fact truly regulated by the State, *15 U. S. C. § 1012 (b)*, and that they do not fall within the "boycott" exception of *15 U. S. C. § 1013 (b)*. The District Court held for petitioners on both issues. Neither **[****81]** issue was reached by the Court of Appeals, however, in light of its holding that the contracts were not the "business of insurance." Accordingly, **[*256]** I would reverse the judgment of the Court of Appeals and remand the case for further proceedings. [26]

End of Document

Thus, the approach taken by the Court today does not merely "narrowly" construe "insurance" in accordance with our general practice. Rather, that approach actively discriminates between kinds of insurance, effectively confining "insurance" to traditional forms and effectively excluding forms that provide full-service coverage via provider agreements. It thereby places a significant obstacle in the path of the latter.

[26] The Court argues, *ante*, at 232 n. 40, that provider agreements may have anticompetitive consequences which could lead to escalation of health-care costs. The argument is not without force, but I must note that the very purpose of an antitrust exemption is to protect anticompetitive conduct. The argument, therefore, is better directed to the legislature, which has the power to modify or repeal McCarran-Ferguson, rather than to this Court. Referral to the legislators is particularly appropriate in this case, as the policy aspects may not be as one-sided as those painted by the Court. There is authority for the proposition that provider agreements, far from increasing costs, constitute an effective means for reduction in health-care prices and premiums. Council on Wage and Price Stability, Employee Health Care Benefits: Labor and Management Sponsored Innovations in Controlling Cost, *41 Fed. Reg. 40298, 40305 (1976)*. And the argument that "there is little incentive on the part of Blue Shield to minimize costs, since it is in the interest of the providers to set fee schedules at the highest possible level" overlooks the vital consideration that many if not most of these plans originate in collective-bargaining agreements where "the consumer power and negotiating expertise of organized labor" combine to "reduce the unit price of health services." *Ibid*. Control over provider agreements by state insurance commissioners constitutes a second "incentive" operating in the same direction. See n. 18, *supra*. Whether or not the potential anticompetitive impact of McCarran-Ferguson outweighs these positive effects on health-care costs is a judgment properly to be made by Congress.

Opinion by: STEPHENSON

Opinion

[*1180] National Beauty Supply, Inc. (National) appeals from the dismissal by the district court [1] of its third-party complaint against **[*1181]** La Maur Inc. (La Maur) for failure to state a claim upon which relief could be granted. [2] At this stage of the proceedings the issue is whether under any set of facts National could be entitled to contribution or indemnification from La Maur pursuant to either federal or Minnesota law. By dismissing the third-party complaint the district court held that neither contribution nor indemnification was available to National. **[**2]** We affirm in part, reverse in part, and remand for further proceedings consistent with this opinion.

This action was originally commenced by Professional Beauty Supply, Inc. (Professional) against National. In its complaint, Professional, a wholesaler of beauty supplies, alleged that National, also a wholesaler of beauty supplies, demanded that La Maur, a manufacturer of beauty supplies, grant National an exclusive dealership for La Maur's products in Minnesota. It was further alleged that as a result of these demands Professional was terminated as a La Maur dealer on April 2, 1973. In Count I of its complaint Professional claimed that the acts of National were done to monopolize **[**3]** or in an attempt to monopolize or to combine or conspire with another person to monopolize a part of trade or commerce in violation of federal ***antitrust law***, *15 U.S.C. § 2*. In Counts II and III, respectively, Professional claimed that the same acts constituted a violation of Minnesota ***antitrust law***, *Minn.Stat.Ann. §§ 325.8014*, *325.8015*, and a tortious interference with Professional's business relationship with La Maur.

On this appeal National states that after filing an answer and undertaking initial discovery it became apparent that Professional's entire claim was based on the alleged joint wrongdoing of La Maur and National. At that time National requested and was granted permission to file a third-party complaint against La Maur. In its third-party complaint National alleged that "La Maur solicited National to become a distributor of La Maur's products in the State of Minnesota," and that "National had no responsibility for, or control over La Maur's decision to terminate Professional." National further alleged that in the event it is found liable to Professional for violation of either federal or state antitrust laws, it is entitled to contribution from **[**4]** La Maur to the extent of at least one-half of the recovery. On appeal, National also argues that since it had no control over La Maur's decision to terminate Professional, it is at most secondarily liable to Professional and is thus entitled to indemnification from La Maur. Finally, National alleged that La Maur had a duty, which it failed to perform, to reveal to National the nature and extent of all business relationships between La Maur and others which might be unlawfully interfered with if National were granted an exclusive dealership in Minnesota. Thus, National claims that La Maur's failure to make such disclosure entitles it to indemnification from La Maur in the event National is found to have tortiously interfered with Professional's business relationships.

La Maur filed a motion under *Fed.R.Civ.P. 12(b)(6)* to have the third-party complaint dismissed for failure to state a claim upon which relief could be granted. On January 26, 1978, the district court entered an order dismissing the third-party complaint for failure to state a claim. The order was not accompanied by a memorandum opinion, but entry of final judgment was directed pursuant to *Fed.R.Civ.P. 54(b)*. This **[**5]** appeal followed.

---

[*] The Honorable William C. Hanson, Senior United States District Judge for the Northern and Southern Districts of Iowa, sitting by designation.

[1] The Honorable Edward J. Devitt, Chief Judge, United States District Court for the District of Minnesota.

[2] The district court expressly determined "that there is no just reason for delay" and directed entry of final judgment dismissing the third-party complaint against third-party defendant La Maur Inc. See *Fed.R.Civ.P. 54(b)*.

Since this matter is before the court as an appeal from ***HN1***[] the dismissal of the third-party complaint, the facts alleged in the third-party complaint must be accepted as true and the district court's dismissal upheld only if it appears beyond doubt that National can prove no set of facts which would entitle it to relief. See *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*; *Quality Mercury, Inc. v. Ford Motor Co., 542 F.2d 466, 468 (8th Cir.* ***[*1182]*** *1976)*, Cert. denied, *433 U.S. 914, 97 S. Ct. 2986, 53 L. Ed. 2d 1100 (1977)*.

I. Contribution Under Federal ***Antitrust Law***

We note at the outset that ***HN2***[] federal law governs the issue of whether there is a right to contribution in an antitrust case. El Camino Glass v. Sunglo Glass Co., (1977-1)Trade Reg.Rep. (CCH) P 61,533 (N.D.Cal.1976); *Sabre Shipping Corp. v. American President Lines, Ltd., 298 F. Supp. 1339 (S.D.N.Y.1969)*. [3] **[**6]** ***HN3***[] The traditional federal common law rule is that contribution is not available from joint tortfeasors. However, National urges that we adopt a rule which would allow contribution from joint tortfeasors in federal antitrust cases. We believe that sound policy reasons dictate such a result and accordingly hold that under certain circumstances an antitrust defendant may be entitled to pro rata [4] **[**7]** contribution from other joint tortfeasors. [5]

To our knowledge no circuit court has directly decided the precise issue before us. [6] At least four federal district courts have confronted the issue and have unanimously held that there is no right to contribution under federal ***antitrust law***. Olson Farms, Inc. v. Safeway Stores, Inc., (1977-2)Trade Reg.Rep. (CCH) P 61,698 (D.Utah 1977); Wilson P. Abraham Constr. Co. v. Texas Indus., Inc., No. 75-2820 (E.D.La. Oct. 5, 1977); El Camino Glass v. Sunglo Glass Co., supra; *Sabre Shipping Corp. v. American President Lines, Ltd., supra.* See also *Baughman v.*

---

3 When a federal statute condemns an act as unlawful, the extent and nature of the legal consequences of the condemnation, though left by the statute to judicial determination, are nevertheless federal questions, the answers to which are to be derived from the statute and the federal policy which it has adopted.

Sola Elec. Co. v. Jefferson Elec. Co., 317 U.S. 173, 176, 63 S. Ct. 172, 174, 87 L. Ed. 165 (1942).

4 Among courts allowing contribution in other areas of the law there is a conflict as to whether contribution is available on a pro rata or comparative fault basis. Compare *Herzfeld v. Laventhol, Krekstein, Horwath & Horwath, 378 F. Supp. 112, 136 & n. 58 (S.D.N.Y.1974)*, Aff'd in part, rev'd in part, *540 F.2d 27 (2d Cir. 1976)*, And *Globus, Inc. v. Law Research Serv., Inc., 318 F. Supp. 955, 958 (S.D.N.Y.1970)*, ***Aff'd, 442 F.2d 1346*** (2d Cir.), Cert. denied, ***404 U.S. 941, 92 S. Ct. 286, 30 L. Ed. 2d 254 (1971)***, And cases cited in W. Prosser, Law of Torts § 50, at 310 n. 84 (4th ed. 1971), With *Kohr v. Allegheny Airlines, 504 F.2d 400, 405 (7th Cir. 1974)*, And *Gomes v. Brodhurst, 394 F.2d 465, 469-70 (3d Cir. 1968)*. Because of the administrative difficulties of assessing exact percentages of fault in complicated antitrust actions and because we believe a rule of pro rata contribution will serve as a more effective deterrent to antitrust violations (I. e., under a comparative fault rule some parties may feel they have little to lose in joining in an antitrust violation in a minor capacity), we adopt a rule of pro rata contribution except in unusual circumstances. See *Wassel v. Eglowsky, 399 F. Supp. 1330, 1370-71 (D.Md.1975)*, *Aff'd 542 F.2d 1235 (4th Cir. 1976)*; W. Prosser, Law of Torts § 50, at 310 (4th ed. 1971); P. Corbett, Apportionment of Damages and Contribution Among Coconspirators in Antitrust Treble Damage Actions, 31 Ford.L.Rev. 111, 138-39 (1962).

5 In light of our holding we do not pass on National's claim that to deny it both contribution and indemnification would violate the due process clause.

6 In *Goldlawr, Inc. v. Shubert, 276 F.2d 614, 616 (3d Cir. 1960)*, the Third Circuit stated: "there would seem to be strong justification for appellee's contention that the tort asserted to lie in the third party complaint is governed by federal common law with no right of contribution between tort feasors" (footnotes omitted). However, this statement was dictum since the holding of the case was that the defendants-third-party plaintiffs and the third-party defendants were not joint tortfeasors. Further, this case is not persuasive authority for the position of no contribution in that no reasoning was provided to support the court's statement. *American Motor Inns, Inc. v. Holiday Inns, Inc., 521 F.2d 1230 (3d Cir. 1975)*, and *Walker Distrib. Co. v. Lucky Lager Brewing Co., 323 F.2d 1 (9th Cir. 1963)*, were also cited by the court in Wilson P. Abraham Constr. Co. v. Texas Indus., Inc., No. 75-2820 (E.D.La. Oct. 5, 1977), as holding that there is no right of contribution in federal antitrust cases. These cases only state the general rule, with which we do not disagree, that a plaintiff may choose to not join all coconspirators in an anti-trust action. *American Motor Inns, Inc. v. Holiday Inns, Inc., supra, 521 F.2d at 1244-45 n. 42*; *Walker Distrib. Co. v. Lucky Lager Brewing Co., supra, 323 F.2d at 8*. Such a statement stops far short of holding that one conspirator is not entitled to contribution from other coconspirators.

Cooper-Jarrett, Inc., 391 F. Supp. 671, 678 n. 3 (W.D.Pa.1975), Aff'd in part, rev'd in part, 530 F.2d 529 (3d Cir.), **[*1183]** Cert. denied, *429 U.S. 825, 97 S. Ct. 78, 50 L. Ed. 2d 87 (1976)* (dictum); Wainwright v. Kraftco Corp., 58 F.R.D. 9, 11-12 (N.D.Ga.1973) (arguably by implication); Washington v. American Pipe & Constr. Co., 280 F. Supp. 802, 804-05 (S.D.Cal.1968) **[**8]** (arguably by implication). Nevertheless, we are not persuaded that a rule barring contribution is correct. Of the above cited cases, only El Camino Glass, supra, and *Sabre Shipping Corp., supra*, provide any insight into the reasoning of the court.

[9]** In *Sabre Shipping Corp. v. American President Lines, Ltd., supra*, the primary case authority relied on by the court was *Halcyon Lines v. Haenn Ship Ceiling & Refitting Corp., 342 U.S. 282, 72 S. Ct. 277, 96 L. Ed. 318 (1952)*. Halcyon is a 1952 admiralty case which has been widely cited for the proposition that there is no federal common law right to contribution and that it should be up to Congress, rather than the courts, to alter the rule. E. g., *Sabre Shipping Corp. v. American President Lines, Ltd., supra, 298 F. Supp. at 1344*. However, the vitality of Halcyon was seriously eroded by Cooper Stevedoring Co. v. Kopke, Inc., 417 U.S. 106, 94 S. Ct. 2174, 40 L. Ed. 2d 694 (1974), decided after Sabre Shipping. In Cooper Stevedoring, the Supreme Court limited the application of Halcyon to those cases where the joint tortfeasor from whom liability is sought is immune from tort liability by statute. In limiting the breadth of Halcyon, the Court stated: "(A) "more equal distribution of justice' can best be achieved by ameliorating the common-law rule against contribution which permits a plaintiff to force one of two wrongdoers **[**10]** to bear the entire loss, though the other may have been equally or more to blame." Cooper Stevedoring Co. v. Kopke, Inc., supra, 417 U.S. at 111, 94 S. Ct. at 2177. The Court further stated "(since) (plaintiff) could have elected to make (third-party defendant) bear its share of the damages caused by its negligence, we see no reason why (defendant-third-party plaintiff) should not be accorded the same right." Id. at 113, 94 S. Ct. at 2178. As a minimum Cooper Stevedoring and earlier admiralty cases demonstrate that under certain circumstances the Supreme Court is willing to fashion a rule allowing contribution without express direction from Congress. See id. at 110-11, 94 S. Ct. 2174.

El Camino Glass v. Sunglo Glass Co., supra, relies on Sabre Shipping, and in addition discusses many of the policy reasons both for and against contribution in antitrust cases. We do not disagree with much of the court's discussion but do take exception to its conclusion that "(w)hile the above arguments in favor of permitting contribution are persuasive, the court concludes that on balance the ends of justice will be better served by holding **[**11]** that contribution is not available in an antitrust suit." El Camino Glass v. Sunglo Glass Co., supra, Trade Reg.Rep. (CCH) at 72,112.

From an examination of La Maur's brief and the El Camino Glass and Sabre Shipping cases we discern five principal reasons advanced in support of the rule not allowing contribution. First, it is argued that it was the intent of Congress to exclude contribution. The essence of this argument is that since Congress put provisions for contribution in certain sections of the Security Acts of 1933 and 1934, but not in the Antitrust Acts, there was congressional intent to not allow contribution in antitrust cases. Furthermore, Congress has not acted in the face of the longstanding common law rule against contribution or the lower court decisions which hold that contribution is not available in antitrust cases.

We initially note that the antitrust statutes are not purported to be comprehensive and, possibly as a result, courts have not been prone to await congressional action to resolve many of the questions left unanswered by these statutes, such as the nature of the cause of action, apportionment of judgments, assignment, survival and limitations. **[**12]** Additionally, contrary to La Maur's assertions, it is our view that the presence of contribution provisions in the security laws is some indication that if the question were presented today, Congress would include a right to contribution as part of the **[*1184]** antitrust laws. We further observe that there is a dearth of case law on this issue and comment that a complicated legal issue which is raised so infrequently is unlikely to spur immediate congressional action. Finally, we find further support for our position from the fact that federal courts have been willing to formulate rules for contribution in other areas of the law without express congressional direction. [7] E. g.,

[7] The trend among the states has been to allow contribution. A minimum of 23 states have enacted statutes which permit at least limited contribution and 6 other states are generally cited as having case law which recognizes the right to contribution

Kohr v. Allegheny Airlines, Inc., 504 F.2d 400 (7th Cir. 1974) (contribution and indemnification available on a comparative negligence basis in aviation collisions); *Chicago & N. W. Ry. v. Minnesota Transfer Ry., 371 F.2d 129 (8th Cir. 1967)* (contribution available in FELA case if state law provides); *Knell v. Feltman, 85 U.S.App.D.C. 22, 174 F.2d 662 (1949)* (contribution available in ordinary negligence cases in District of Columbia); *Grogg v. General Motors Corp., 72 F.R.D. 523, 527-28 (S.D.N.Y.1976)* **[**13]** (contribution available in federal sex discrimination cases); *Gould v. American-Hawaiian Steamship Co., 387 F. Supp. 163, 168-69 (D.Del.1974)*, Vacated on other grounds, *535 F.2d 761 (3d Cir. 1976)* (contribution available under section 14(a) of the Securities Exchange Act of 1934, *15 U.S.C. § 78n(a)*); *Globus, Inc. v. Law Research Serv., Inc., 318 F. Supp. 955 (S.D.N.Y.1970)*, *Aff'd, 442 F.2d 1346* (2d Cir.), Cert. denied, *404 U.S. 941, 92 S. Ct. 286, 30 L. Ed. 2d 254 (1971)* (contribution available under section 17(a) of the Securities Act of 1933, *15 U.S.C. § 77q(a)* and *section 10(b)* of the Securities Exchange Act of 1934, *15 U.S.C. § 78j(b)*).

[14]** Second, it is contended that allowing contribution will interfere with the plaintiff's ability to maintain control of his lawsuit. The fear expressed, which is indeed a legitimate one, is that a defendant may attempt to complicate the issues and confuse the jury by impleading numerous third-party defendants or fundamentally alter the lawsuit by impleading a third-party defendant with financial resources far superior to the plaintiff or the original defendant. Without downplaying the seriousness of this fear, we are confident that such problems can be avoided by the district court's prudent use of its power to sever where necessary to insure justice. In the present case Professional has not objected to the adding of La Maur as a third-party defendant.

A third reason advanced is that a right to contribution might serve as a possible deterrent to settlement. We are not convinced that a holding permitting contribution need undermine the judicial policy in favor of settlement. The problem of how to treat a joint tortfeasor who has settled in good faith is not present in this case. However, in the proper case the court should be able to fashion a rule of contribution which will protect **[**15]** the rights of settling defendants. See, e. g., *Herzfeld v. Laventhol, Krekstein, Horwath & Horwath, 540 F.2d 27, 38-39 (2d Cir. 1976)*; *Gomes v. Brodhurst, 394 F.2d 465, 468-70 (3d Cir. 1968)*. See also *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 348, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)* (if plaintiff recovered damages in settlement from one defendant he could not recover for the same damages from another defendant); *Leach v. Mon River Towing, Inc., 363 F. Supp. 637, 642-43 (W.D.Pa.1973)* (effect of release on amount of damages recoverable from remaining defendants); W. Prosser, Law of Torts § 50, at 309-10 (4th ed. 1971); F. James, Contribution Among Joint Tortfeasors: A Pragmatic Criticism, 54 Harv.L.Rev. 1156, 1161-62 (1941); C. Gregory, Contribution Among Joint Tortfeasors: A Defense, 54 Harv.L.Rev. 1170, 1172-73 (1941); F. Bohlen, Contribution and Indemnity Between Tortfeasors, 21 Corn.L.Q. 522, 567-68 (1936).

A fourth argument against contribution in antitrust cases is that antitrust suits are already enormously complex and it is unwise to further complicate matters **[**16]** by adding the issue of contribution among defendants. **[*1185]** We reemphasize that district courts have the ability to sever issues and parties if the need arises. More importantly, the vitality of this argument is somewhat suspect since contribution is allowed by statute under certain sections of the Security Acts, and security cases are often as complex as antitrust cases. We are aware of no unmanageable administrative problems which have been caused by allowing contribution in security cases. On the contrary, the trend has been to allow contribution in security actions which are brought under sections of the Security Acts which do not have express contribution provisions. See, e. g., *Odette v. Shearson, Hammill & Co., 394 F. Supp. 946, 957-58 (S.D.N.Y.1975)*; *Liggett & Myers Inc. v. Bloomfield, 380 F. Supp. 1044 (S.D.N.Y.1974)*; *Globus, Inc. v. Law Research Serv., Inc., supra, 318 F. Supp. 955*; *DeHaas v. Empire Petroleum Co., 286 F. Supp. 809 (D.Colo.1968)*, Aff'd in part, rev'd in part on other grounds, *435 F.2d 1223 (10th Cir. 1970)*. See also *Getter v. R. G. Dickinson & Co., 366 F. Supp. 559, 569 (S.D.Iowa 1975)*. **[**17]**

The final reason urged by La Maur for a rule of no contribution is that the deterrent effect of the antitrust laws is increased by not permitting defendants to redistribute the cost of an antitrust action. We believe that the question of deterrence actually cuts both ways and on balance a rule allowing contribution is actually a greater deterrent. The

---

where there is not intentional misconduct. See P. Corbett, Apportionment of Damages and Contribution Among Coconspirators in Antitrust Treble Damage Actions, 31 Ford.L.Rev. 111, 113 (1962).

fact that one tortfeasor may be held liable for all the damages arising from the antitrust violation necessarily means that other joint tortfeasors may go "scot free." This possibility of escaping all liability might cause many to be more willing, rather than less willing, to engage in wrongful activity.

This possibility significantly increases where a large or powerful tortfeasor has sufficient economic influence to prevent a plaintiff from including it as a defendant. National alleges that this is precisely what happened in the present case. National claims that in their depositions the principal shareholders of Professional stated that they were persuaded not to name La Maur as a defendant because of La Maur's decision to renew Professional's franchise. Whether such allegations are true can only be determined upon further factual **[**18]** development. However, such allegations are indicative of the exact abuses which are encouraged by a rule which automatically denies contribution to antitrust violators and which could be avoided by the formulation of a rule allowing contribution in certain cases. To deny contribution would be to dilute the deterrent effect of the antitrust laws, since a participant in an antitrust violation could escape all responsibility for its wrongdoing.

HN4[] Contribution is an equitable doctrine based on the principle of justice between the parties. See *Dawson v. Contractors Transport Corp., 151 U.S.App.D.C. 401, 405-406* & n. 7, *467 F.2d 727, 731-32 & n. 7 (1972)*. "The governing principle of contribution throughout has been that one of two or more joint wrongdoers should not be required to pay more than his share of a common burden, or to put it another way, that no obligor should be unjustly benefitted at the expense of another." *Gould v. American-Hawaiian Steamship Co., supra, 387 F. Supp. at 170*. In *Perma Life Mufflers, Inc. v. International Parts Corp., 392 U.S. 134, 138, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968)*, **[**19]** the Supreme Court cautioned against broad application of common law doctrines to prevent recovery if such application will defeat important public purposes. We are convinced that the result of automatically prohibiting contribution among antitrust defendants in all circumstances would be to allow a significant number of antitrust violators to escape liability for their wrongdoing and thereby undermine the policy of the antitrust laws.

The deciding factor in our decision is fairness between the parties. We conclude that fairness requires that the right of contribution exist among joint tortfeasors at least under certain circumstances. There is an obvious lack of sense and justice in a rule which permits the entire burden of restitution of a loss for which two parties are responsible to be placed upon one alone because of the plaintiff's whim or spite, or **[*1186]** his collusion with the other wrongdoer. See, e. g., *Gomes v. Brodhurst, supra, 394 F.2d at 467-68* & n. 1.

In sum, we adopt for ***HN5***[] the Eighth Circuit the rule that contribution may be enforced among joint tortfeasors **[**20]** in an antitrust action. Because of the deterrent policy of the antitrust laws, even intentional tortfeasors may obtain contribution so that tortfeasors will not escape liability. Cf. *Odette v. Shearson, Hammill & Co., supra, 394 F. Supp. at 958*; *Alexander & Baldwin, Inc. v. Peat, Marwick, Mitchell & Co., 385 F. Supp. 230, 238 (S.D.N.Y.1974)*; *Globus v. Law Research Serv., Inc., supra, 318 F. Supp. at 955* (contribution under the security laws even for intentional tortfeasors); sections 9(e), 18(b) of the Securities Exchange Act of 1934, *15 U.S.C. §§ 78i(e)*, *78r(b)*. We do not hold that contribution is available to all violators of the antitrust laws, regardless of the flagrancy of the conduct of the party seeking contribution. ***HN6***[] The decision of whether a particular party is entitled to contribution is best left to the trier of fact upon consideration of all of the circumstances of a case, including the factors specified by Justice White in his concurring opinion in *Perma Life Mufflers, Inc. v. International Parts Corp., supra.* **[**21]** [8] Cf. Section 11(f) of the Securities Act of 1933, *15 U.S.C. § 77k(f)* (contribution unless one party guilty of fraudulent misrepresentation and not the other). At this stage of the proceedings contribution in favor of National is a possibility. Therefore, the district court erred in dismissing its third party complaint.

---

[8] The factors listed by Justice White in connection with whether an in pari delicto defense should be allowed in an antitrust action are "facts as to the relative responsibility for originating, negotiating, and implementing the scheme; evidence as to who might reasonably have been expected to benefit from the provision or conduct making the scheme illegal under § 1; proof of whether one party attempted to terminate the arrangement and encountered resistance or counter-measures from the other; facts showing who ultimately profited or suffered from the arrangement." *Perma Life Mufflers v. International Parts Corp., supra, 392 U.S. at 146-47, 88 S. Ct. at 1988* (White, J., concurring).

[22]** II. Indemnification Under Federal ***Antitrust Law***

HN7[] The subject of indemnification under federal ***antitrust law***, like contribution, is governed by federal law. National claims that on remand it should be allowed to obtain indemnification from La Maur on the federal antitrust claim if it can prove that if any antitrust violation was committed, it was at La Maur's suggestion and urging, and thus La Maur was the "primary" wrongdoer and National was only "secondarily" liable. ***HN8***[] Indemnification, unlike contribution, permits a wrongdoer to escape loss by shifting his entire responsibility to another party. If indemnification were allowed, those found liable for breach of a statutory obligation might escape liability as effectively as if contribution were denied. We hold, therefore, that contribution may be allowed, but not indemnification. Thus, the loss will be apportioned among the joint wrongdoers so that the deterrent effect of the judgment will be felt by all culpable parties.

In *Perma Life Mufflers, Inc. v. International Parts Corp., supra, 392 U.S. at 138-39, 88 S. Ct. 1981*, **[**23]** the Supreme Court emphasized that the public interest and statutory aim of deterring antitrust violations and enforcing the antitrust laws are of paramount importance. To allow indemnification would dilute the deterrent impact of the antitrust laws. Only a realistic possibility of liability for damages will encourage compliance with the antitrust laws and will protect the public interest in preserving competition. Consequently, even if one joint tortfeasor bears greater responsibility for the wrongdoing, a person who violates the antitrust statutes should not be entitled to full indemnification from the more culpable third party. [9]

[24]** The only case cited by National as direct support of its position is *Wilshire Oil* ***[*1187]*** *Co. v. Riffe, 409 F.2d 1277 (10th Cir. 1969)*. Without accepting or rejecting the Tenth Circuit's analysis in that case, we note that it is distinguishable from the present case. In Wilshire, the court allowed a suit for indemnification by a corporation against its officers who had allegedly caused the firm to commit antitrust violations which resulted in the corporation paying fines, penalties, and other expenditures. The court was careful to point out that the indemnification suit was based on a separate state claim for breach of a fiduciary duty and the court was not deciding the question of whether indemnification is generally available in antitrust actions. *Id. at 1284*. In the present case no separate cause of action by National against La Maur under state law has been alleged in connection with the antitrust violation. We caution, however, that ***HN11***[] the threshold question in a claim for indemnification under a separate state law theory is whether allowing it would **[**25]** be inconsistent with the purpose of the antitrust laws. Under no circumstance should indemnification be allowed where such allowance would be inconsistent with the purpose of the antitrust laws.

III. Contribution and Indemnification Under Minnesota Law

Counts II and III of Professional's complaint involve pendent state claims. Count II alleged that National violated Minnesota's antitrust statutes, *Minn.Stat.Ann. §§ 325.8014*, *325.8015*, and Count III alleged tortious interference with its business relationships.

---

[9] Furthermore, in its complaint Professional alleges that National violated *section 2* of the Sherman Act by intentionally doing acts designed to exclude Professional as a competitor. Thus for Professional to prevail against National it will have to show that National was an intentional wrongdoer. Thus, the sound reasoning of the security cases which deny indemnity to tortfeasors who have committed a wrong graver than ordinary negligence is equally applicable here. These cases have held that ***HN9***[] where a party has been found guilty of misconduct in violation of the public interest as embodied in the securities laws, it would offend public policy to allow indemnification. See, e. g., *Alexander & Baldwin, Inc. v. Peat, Marwick, Mitchell & Co., supra, 385 F. Supp. at 238-39*; *Herzfield v. Laventhol, Krekstein, Horwath & Horwath, supra, 378 F. Supp. at 135*; *Globus v. Law Research Serv., Inc., 287 F. Supp. 188, 199 (S.D.N.Y.1968)*, Aff'd in part, rev'd in part, *418 F.2d 1276 (2d Cir. 1969)*, Cert. denied, ***397 U.S. 913, 90 S. Ct. 913, 25 L. Ed. 2d 93 (1970)***. See also *Odette v. Shearson, Hammill & Co., supra, 394 F. Supp. at 954-57*, And *Gould v. American-Hawaiian Steamship Co., supra, 387 F. Supp. at 166-68*, where the courts held that ***HN10***[] indemnification was not available even if the security violation was merely negligent. National should not be permitted to secure indemnity on a theory inconsistent with the theory on which it is ultimately held liable, I. e., that it was secondarily liable only because of La Maur's wrongdoing.

Minnesota is one of a minority of states where the common law has developed to allow contribution among joint tortfeasors under certain circumstances. Under Minnesota law, National will be entitled to contribution if it can show on remand that it was not guilty of conscious wrongdoing, even if there has been a finding that a violation of the Minnesota antitrust statutes has been committed. Cf. *Skaja v. Andrews Hotel Co., 281 Minn. 417, 161 N.W.2d 657 (1968)*; *Farmers Ins. Exch. v. Village of Hewitt, 274 Minn. 246, 143 N.W.2d 230, 235-39 (1966)*; *Hardware Mut. Cas. Co. v. Danberry, 234 Minn. 391, 48 N.W.2d 567, 570-72 (1951)* (application **[**26]** of contribution in personal injury cases). See also W. Prosser, Law of Torts § 50, at 306-08 & n. 68 (4th ed. 1971).

National also argues that it has stated a claim for indemnification under Count III, tortious interference with business relationships. In Minnesota, the leading case on indemnification is *Hendrickson v. Minnesota Power & Light Co., 258 Minn. 368, 104 N.W.2d 843 (1960)*. [10] In Hendrickson the court listed several situations in which ***HN12***[] indemnity is appropriate, two of which are relevant here:

> (2) Where the one seeking indemnity has incurred liability by action at the direction, in the interest of, and in reliance upon the one sought to be charged.

[27]**

> (3) Where the one seeking indemnity has incurred liability because of a breach **[*1188]** of duty owed to him by the one sought to be charged.

Id. at 848 (footnotes omitted).

With regard to Count III, National, in its third-party complaint, alleged that if it is found liable it will be "by action at the direction, in the interest of, and in reliance upon" La Maur; that La Maur had a duty to reveal to National the nature and extent of the business relationship between La Maur and Professional that might be interfered with by granting National an exclusive dealership; and that La Maur breached that duty. Since National may demonstrate that it falls within one of the exceptions to the no indemnification rule listed in *Hendrickson v. Minnesota Power & Light Co., supra*, the district court acted prematurely in dismissing National's claim under Minnesota law for indemnification under Count III.

The issue, whether if sufficient evidence is presented by Professional to hold National liable under Count III, such evidence will also be sufficient to preclude National from receiving indemnification from La Maur under Minnesota law, is not free from doubt. Since the **[**28]** case must be remanded on other grounds, we believe that the best course is to have this determination made in the first instance by the district court after more complete factual development.

IV. Conclusion

As we have indicated, this case is before us on appeal from the grant of a motion to dismiss. We conclude that it cannot be said beyond doubt at this stage of the proceedings that National can prove no set of facts in support of its claim for contribution under the federal antitrust laws, and for contribution or indemnification under Minnesota law. We affirm the dismissal of National's claim for indemnification under the federal antitrust laws.

Affirmed in part; reversed in part, and remanded for further proceedings not inconsistent with this opinion.

Dissent by: HANSON(In part)

Dissent

---

[10] See also *Bjerk v. Universal Eng'r Corp., 552 F.2d 1314, 1318-19 (8th Cir. 1977)*, Citing *Lambertson v. Cincinnati Corp., 312 Minn. 114, 257 N.W.2d 679 (Minn.1977)*, for latest application of Hendrickson.

HANSON, Senior District Judge, dissenting in part.

I respectfully dissent from the holding in Part I of the majority's opinion permitting contribution among joint tortfeasors in an antitrust action. I concur in the result reached in Part II of the opinion and in the Court's reasoning to the extent it is not inconsistent with my views expressed below concerning the issue of contribution. In view **[**29]** of the Court's holdings in Part I and Part II, I concur in the result reached in Part III of the majority opinion and in the judgment, but with the understanding that the district court retains discretion to dismiss pendent state claims.

Because I discern no compelling reason to allow contribution in antitrust causes, and strongly suspect that antitrust policy may be adversely affected by it, I would affirm the district court's dismissal of National's claim for contribution from La Maur under federal ***antitrust law***.

As an initial observation, this cause of action is an inopportune one in which to fashion a broad rule allowing contribution among joint tortfeasors, in an antitrust action. The only violation of federal ***antitrust law*** alleged by Professional is found in Count I of its complaint. That count alleges a violation of *Section 2* of the Sherman Act, *15 U.S.C. § 2*. *Section 2* proscribes monopolization, attempts to achieve a monopoly, and conspiracies to monopolize; and provides criminal penalties for those who violate its provisions. Under Section 4 of the Clayton Act, *15 U.S.C. § 15*, a plaintiff such as Professional may recover treble **[**30]** damages for a *Section 2* violation. The Court notes that under the allegations in Professional's complaint Professional will have to show that National was an intentional wrongdoer in order to prevail. Ante at 1186-1187 n. 9. This is clearly correct, for the substance of Professional's complaint as I read it is that National's acts were pursuant to an attempt or conspiracy to monopolize the sale of wholesale beauty supplies in Minnesota. Intent is an essential element of the proof of a *Section 2* attempt or conspiracy to monopolize. See **[*1189]** e. g., *United States v. Griffith, 334 U.S. 100, 105, 68 S. Ct. 941, 92 L. Ed. 1236 (1948)*; *Stifel, Nicolaus & Co. v. Dain, Kalman & Quail, 578 F.2d 1256, 1262 (8th Cir. 1978)*; *United States v. Empire Gas Corp., 537 F.2d 296, 298-99 (8th Cir. 1976)*, Cert. denied, *429 U.S. 1122, 97 S. Ct. 1158, 51 L. Ed. 2d 572 (1977)*; *International Railways of Central America v. United Brands Co., 532 F.2d 231, 239* (2d Cir.), Cert. denied, *429 U.S. 835, 97 S. Ct. 101, 50 L. Ed. 2d 100 (1976)*. If National is found liable to Professional, National will have been found to **[**31]** have conspired or committed an unlawful attempt to monopolize trade with "an intent to control prices or restrict competition unreasonably." *United States v. Empire Gas Corp., supra at 302*. See *United States v. DuPont & Co., 351 U.S. 377, 389, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*.

If found to be an antitrust violator under these circumstances, I believe that National is in a poor position to complain of any unfairness in being forced to assume the burden of restitution for the loss occasioned by its intentional wrongdoing, and it is in even worse position to complain about being penalized to the full extent of the treble damages allowed to a plaintiff by the Clayton Act. At least since Lord Kenyon's opinion in Merryweather v. Nixan, 8 Term.Rep. 186, 101 Eng.Rep. 1337 (K.B.1799), the common law has not allowed contribution in favor of an intentional wrongdoer on the theory that intentional wrongdoing is deterred by refusing to invoke equity to diminish the burden of liability otherwise incurred. See *Wright v. Haskins, 260 N.W.2d 536, 538-39 (Iowa 1977)*. Whatever trend may exist in favor of contribution among nonintentional **[**32]** tortfeasors, the rule against contribution as between intentional wrongdoers is still generally adhered to. See W. Prosser, Law of Torts § 50, at 308 (4th ed. 1971).

With respect to *Section 2* conspirators, the majority's partial reliance on trends in contribution law and equitable principles is misplaced.

I realize, however, that allegiance to common law rules cannot be allowed to undermine the purposes of the antitrust laws. *Perma Life Mufflers, Inc. v. International Parts Corp., 392 U.S. 134, 138-39, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968)*. In making the decision whether contribution is to be permitted or rejected in antitrust actions, the primary inquiry must be which course best furthers the public policy in favor of competition, or least detracts from it. *Id. at 139, 88 S. Ct. 1981*. The majority concludes that "(to) deny contribution would be to dilute the deterrent effect of the antitrust laws, since a participant in an antitrust violation could escape all responsibility for its wrongdoing."

Ante, at 1185. I am not convinced that this is so. First, the likelihood that a participant may escape responsibility for his antitrust violations is at **[**33]** best a speculative concern (particularly in non-class actions) since in any given case there may be any number of other potential plaintiffs who were damaged by the particular restraint of trade or monopoly in which the prospective third-party defendant has been a participant. Moreover, as the majority candidly observes, the question of deterrence "cuts both ways," and it could well be argued that potential antitrust violators would be more likely to refrain from anticompetitive activities if they know that any injured party may impose the full burden of a treble damage recovery on them even though, for instance, the violator played a relatively minor part in a conspiracy to monopolize. See El Camino Glass v. Sunglo Glass Co., (1977-1)Trade Reg.Rep. (CCH) P 61,533 (N.D.Cal.1976), Or, inversely, the possibility of dissipating the impact of a treble damage award among antitrust coconspirators may actually encourage anticompetitive activity. To me the arguments on either side of the deterrence question are inconclusive and as a result I find deterrence of potential violators insufficient as a basis on which to predicate a new rule permitting contribution.

In other respects, however, **[**34]** such a rule presents a substantial risk that antitrust lawsuits may become more difficult for trial courts to manage and, more importantly, the net result may be to deter private plaintiffs of relatively limited means from bringing **[*1190]** or maintaining a meritorious suit. Of particular concern in my mind is the potential for confusion, delay, and complexity inherent in permitting antitrust defendants a right to implead other alleged antitrust violators who may distort the litigation because of their size, nature of involvement, or position in the marketplace. It is not difficult to conceive of many circumstances in which the original plaintiff may simply be overwhelmed by embroilment in a lawsuit of a scope and size it never contemplated and is ill-equipped to handle. See *Sabre Shipping Corp. v. American President Lines, 298 F. Supp. 1339, 1346 (S.D.N.Y.1969)*. Aware that litigation may spiral out of their control, it is foreseeable that some plaintiffs will decide to forego a legitimate cause of action. Though district courts have the power to superintend complex litigation, the multiplication of issues and parties remains to be grappled with, and the chilling **[**35]** effect on the incentive to bring or pursue a lawsuit is unlikely to be diminished by the mere possibility of the favorable uses of district court discretion.

To a substantial extent, the enforcement of public antitrust policy depends on the attractiveness of litigation to private attorneys general. See *Hawaii v. Standard Oil of California, 405 U.S. 251, 262, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972)*. Mindful of this, the Supreme Court has recently shown itself to be sensitive to the danger of complicating issues in antitrust litigation to the point where a reduction in the incentive to sue is likely to result. See *Illinois Brick Co. v. Illinois, 431 U.S. 720, 745-46, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. Before formulating a rule which permits additional parties and issues to be joined in an antitrust case, we should be sure that we do not thereby counterbalance the motivation to sue provided by the treble damage award.

In any event, as the examples of the Antitrust Improvement Act of 1976, *15 U.S.C.A. §§ 15c-15h (Supp.1978)*, and the contribution sections of the Security Acts of 1933 and 1934 show, there is ample precedent for **[**36]** statutorily expanding the scope of antitrust litigation to include a right to seek contribution should Congress choose to do so. Congress has never acted despite the fact that those courts which have dealt with the issue have held against contribution, and despite the fact that the issue of contribution would appear to be fairly obvious. In view of the implications with respect to the effectiveness of ***antitrust law***, and with no strong policy reason in favor of contribution, I believe this is an appropriate instance to await congressional directive without risk of abdicating judicial function.

Opinion

[*352] DECISION AND ORDER

A bench trial was held in this action on January 11, 1979. The matter is before me for the resolution of the merits on the basis of certain stipulated facts, the evidence adduced at trial and the parties' briefs. The following decision constitutes my findings of fact and conclusions of law pursuant to *Rule 52(a), Federal Rules of Civil Procedure*.

This is an action under the Robinson-Patman Act, *15 U.S.C. § 13*, charging unlawful price discrimination, and under the Wisconsin Fair Dealership Law, Chapter 135, Wis.Stats., alleging an improper termination of a dealership agreement between the parties. The plaintiff seeks damages and equitable relief in connection with both causes of action. ***HN1***[] Jurisdiction over the Robinson-Patman claim is conferred by *28 U.S.C. § 1337* and *15 U.S.C. §§ 15*, *22* and *26*. ***HN2***[] Jurisdiction over the Wisconsin Fair Dealership Law claim is conferred by *28 U.S.C. § 1332*, there being diversity of citizenship and allegations of the requisite amount **[**2]** in controversy, and under the doctrine of pendent jurisdiction.

The plaintiff is a Wisconsin corporation with its offices and principal place of business in Milwaukee, Wisconsin. It is engaged in the wholesale hardware business.

The defendant is a corporation with its principal place of business in Connecticut. The defendant manufactures scissors and sells them to the plaintiff and others in Wisconsin, who resell them to schools, school boards and other customers.

For a period of over 20 years, the defendant has maintained a customer classification called "distributor of school supplies." (Hereinafter "distributors"). Distributors specialize in selling arts and crafts supplies **[*353]** to schools. Such distributors are entitled to receive a 5% Discount or promotional allowance off the regular jobber's prices when they purchase certain school supplies. It is agreed that the 5% Discount gives distributors a competitive advantage over other customers who purchase the defendant's products at the regular jobbers' prices.

The specific products in question are scissors and shears used by schools. At all pertinent times, there were six designated distributors in the relevant market, **[**3]** Wisconsin and Upper Michigan. The plaintiff was not one of them. The two major distributors by volume, Sax Arts & Crafts and Valley Schools Suppliers, Inc., had been receiving the 5% Discount for at least 20 years prior to 1977 based on an oral agreement with the defendant.

The plaintiff sells a large range of hardware items. It does a substantial amount of business with schools throughout the state of Wisconsin. In addition to scissors, items sold to schools by the plaintiff vary from plumbing supplies to shop tools; in the words of Mr. Gendelman, the plaintiff's president, it sells "anything and everything" needed by schools. The plaintiff's business with the Milwaukee schools alone involves over 1,000 bids a year and amounts to nearly $ 250,000 per year.

Although the plaintiff has sold the defendant's products for several years, no consideration was given by the defendant as to whether the plaintiff should be designated as a distributor and thus become eligible for the 5% Discount until November, 1976. At that time, Mr. Gendelman telephoned Mr. Farrington, the defendant's vice president of marketing, and informed him that the plaintiff was being underbid by competitors for sales **[**4]** of scissors to schools. Mr. Farrington stated that this was probably because the plaintiff was not a distributor of school supplies. Mr. Gendelman argued that the plaintiff should be considered a distributor of school supplies, and Mr. Farrington stated that he would investigate the plaintiff's eligibility for that status.

Mr. Farrington testified that as a result of Mr. Gendelman's phone call, the defendant reevaluated its discount system and decided to substitute written agreements with its distributors for the existing oral agreements. On or about January 1, 1977, the defendant circulated to the six designated distributors who had been receiving the 5%

Discount a letter announcing the 5% Promotional allowance on certain school supply items for school-line distributors. A form agreement entitled "agreement to provide promotional services" was enclosed. Neither the letter nor an agreement was sent to the plaintiff, and the requirements for eligibility for distributor status were not explained nor offered to the plaintiff until February 11, 1977, when Mr. Farrington wrote to Mr. Gendelman informing him why the defendant did not consider the plaintiff a distributor of school supplies. **[**5]** A copy of the new standard agreement used for distributors was enclosed.

On April 11, 1977, Mr. Gendelman executed the agreement to provide promotional services and returned it to the defendant the following day. Although the agreement recites on its face that "A copy of our latest catalog is submitted herewith," no catalog was submitted by the plaintiff.

On April 26, 1977, Mr. Farrington wrote to the plaintiff and informed it that it was not eligible for classification as a distributor because it failed to submit a copy of its latest catalog and because there was no evidence that the plaintiff was maintaining a stock of school supplies manufactured by the defendant.

Wisconsin Fair Dealership Law

The plaintiff attempted to show that the defendant violated the Wisconsin Fair Dealership Law, Chapter 135, Wis.Stats., by cancelling what it claims to be an "agreement" whereby the plaintiff would be a distributor of the defendant's school supplies and entitled to the 5% Discount.

HN3[] *Section 135.03* provides that a grantor of a dealership may not terminate the dealership agreement without good cause, and section 135.04 requires notice of a termination to be given in a specified manner. Section **[**6]** 135.06 allows an action for damages and injunctive relief for violations of the Act.

[*354] The plaintiff argues that the written agreement form executed by its president on April 11, 1978, was a binding contract which could only be terminated in compliance with the provisions of Chapter 135.

In my opinion, the plaintiff has failed to prove a violation of the Act because it did not establish that a dealership agreement was ever entered into by the parties. The agreement form prepared by the defendant and signed by Mr. Gendelman states that "the undersigned, a distributor of school supplies, in consideration of a promotional allowance to be given by Acme United Corporation, hereby agrees to provide the following services on behalf of Acme United Corporation: . . . The publication and distribution of a Catalog of School Supplies . . . A copy of our latest catalog is submitted herewith." It is undisputed that the plaintiff never provided a copy of such a catalog as required. It is elementary contract law that ***HN4***[] an acceptance is not effective unless the offeree accepts in the manner prescribed by the offeror. *Nelson, Inc. v. City of Milwaukee Sewerage Commission, 72 Wis.2d 400, 419,* ***[**7]*** *241 N.W.2d 390 (1976)*. The terms of acceptance were specified in the form agreement prepared by the defendant. They were not complied with by the plaintiff, and therefore no contract was formed. Consequently, the Wisconsin Fair Dealership Law claim must fail.

Robinson-Patman Act Claims

The Plaintiff contends that the discount is either an illegal price discrimination under *15 U.S.C. § 13(a)*, for which there is no cost justification, or an illegal promotional allowance under *15 U.S.C. § 13(d)*, or both. I believe that the case comes within the ambit of *§ 13(a)* but not within *§ 13(d)*. ***HN5***[] The former section covers price discrimination such as discounts; the latter section covers payments by the seller to the buyer in consideration of services or facilities provided by the buyer. See *Chicago Spring Products Co. v. U. S. Steel Corp., 254 F. Supp. 83, 84-85*, affirmed, *371 F.2d 428 (7th Cir. 1966)*. This case involves a price discount, although it is denominated a "promotional allowance," and therefore the case will be considered only under *§ 13(a)*.

The defendant does not dispute that several of the jurisdictional elements of a *§ 13(a)* claim are present: the defendant is a "person" covered **[**8]** by the Act; the alleged discrimination is attributable to the same seller in its dealings with different purchasers; the scissors in question are "commodities of like grade and quality"; and the alleged discrimination involves interstate commerce. See, 3 Von Kalinowski, ***Antitrust Law*** and Trade Regulation,

§ 23.02(1). The plaintiff also has met the contemporaneous-sales jurisdictional requirement. The uncontested facts reveal that the plaintiff was successful in receiving orders from schools in 1974 and 1975 at a time when the defendant was selling scissors to the designated distributors of school supplies at the discounted price. ***HN6***[] For purposes of proving its prima facie case, these contemporaneous sales at different prices are sufficient. The sales at different prices need only be reasonably contemporaneous. *Loren Specialty Mfg. Co. v. Clark Mfg. Co., 241 F. Supp. 493, 498 (N.D.Ill.1965)*, affirmed *360 F.2d 913* (7th Cir.), cert. denied *385 U.S. 957, 87 S. Ct. 392, 17 L. Ed. 2d 303 (1966)*.

The central issue in this case is whether there has been a substantive violation of the Robinson-Patman Act. That is, has there been a discrimination in price? The defendant argues that its price **[**9]** discount is functionally available to all purchasers who choose to qualify as distributors, and therefore the discount is not prohibited by the Act. *FLM Collision Parts, Inc. v. Ford Motor Co., 543 F.2d 1019, 1025 (2d Cir. 1976)*; *Chapman v. Rudd Paint and Varnish Co., 409 F.2d 635 (9th Cir. 1969)*; *Mueller v. F.T.C., 323 F.2d 44 (7th Cir. 1963)*, cert. denied, *377 U.S. 923, 84 S. Ct. 1219, 12 L. Ed. 2d 215 (1964)*. The plaintiff argues that the discount is not functionally available to all purchasers and was not available to Century Hardware in this case.

In *Mueller Co., supra*, the petitioner-seller of parts for water and gas distribution systems sold some of its products through two classes of jobbers: "stocking jobbers" and "regular jobbers." Both classes of jobbers received a 15% Discount in direct shipments to end users. The "stocking jobbers" received **[*355]** an additional 10% Discount on the stock they warehoused. The FTC charged that the additional 10% Discount on the petitioner's products was an illegal price discrimination, and after the commission found a violation of *§ 13(a)*, a cease and desist order was issued. Mueller Co. had argued that regular jobbers were free to **[**10]** enter the stocking jobber status, but the commission found to the contrary. Affirming, the court of appeals for the seventh circuit reasoned:

> "There were no objective standards to guide regular jobbers in qualifying as acceptable and there is substantial evidence to support the Commission's finding as well as evidence that petitioner's decisions on this point were influenced by whether it had already adequate distribution "in that particular area' and by its concern to protect "old established jobbers.' Theoretically, these discounts were available to all, but functionally they were not. *Federal Trade Comm. v. Morton Salt Co., 334 U.S. 37, 42, 68 S. Ct. 822, 92 L. Ed. 1196 (1948)*." *323 F.2d at 46*.

Under Mueller Co., therefore, ***HN7***[] a discount is functionally available when objective standards exist to guide regular jobbers in qualifying for the category of purchasers receiving the discount.

The defendant argues that the plaintiff "never was, is not, and probably never will be a "school distributor' as defendant uses that term." The defendant stresses the fact that the plaintiff's business wholesaling hardware products is qualitatively different from that of the designated distributors **[**11]** of school supplies because the plaintiff carries a large selection of products, most of which are unrelated to arts and crafts needs. Also, the plaintiff fails to carry many of the items carried by the distributors. A comparison of the plaintiff's catalog with those of the distributors demonstrates this difference. The defendant also showed that the plaintiff does not belong to the same trade associations and does not attend the same trade conventions as the distributors.

While these differences were satisfactorily proved, I find them to be irrelevant. The defendant never suggested to its customers that in order to qualify as a distributor, a dealer had to belong to particular trade associations, to attend conventions, or to specialize Only in arts and crafts supplies for schools. These contingencies were not shown to be part of the oral understanding between the defendant and its distributors, and they certainly were not specified in the standard agreement to provide promotional services which the defendant began using in 1977.

The standard agreement listed three requirements for distributors: (1) the maintenance of a stock of school supplies and equipment manufactured by the defendant **[**12]** throughout the year; (2) the publication and distribution of a catalog of school supplies featuring the defendant's school supplies on at least a biennial basis, and (3) sales personnel to promote the defendant's products through personal contact with purchasers. Facially, these requirements constitute objective standards which provide sufficient guidance to a dealer seeking to become a school supplies distributor.

Nevertheless, the defendant did not inform the plaintiff of these requirements until February 11, 1977. In fact, the plaintiff was completely unaware of the price discount which his competitors had been receiving until November, 1976, when Mr. Farrington so informed Mr. Gendelman. The defendant candidly concedes that in actions under *§ 13(d)* of the Act, courts have held that ***HN8***[] the seller must take affirmative action to inform customers of the availability of promotional payments and services. *Alterman Foods, Inc. v. F.T.C., 497 F.2d 993, 1001 (5th Cir. 1974)*; *Fred Meyer, Inc. v. F.T.C., 359 F.2d 351, 360 n. 10 (9th Cir. 1966)*, rev'd in part on other grounds, *390 U.S. 341, 88 S. Ct. 904, 19 L. Ed. 2d 1222 (1968)*. The defendant argues that this requirement cannot be uncritically **[**13]** injected into actions under *§ 13(a)*, but it fails to suggest any meaningful reason why such a notification requirement should not be applied in this case. No matter how facially objective the defendant's requirements for distributor status are, if only some purchasers are aware of their existence, it cannot **[*356]** be said that the distributor status and price discount are practically available to all.

The defendant may not be required to offer its price discount to a customer it knows will be uninterested or who will be unwilling to comply with its requirements for distributor. However, the defendant knew that the plaintiff was competing with its distributors for sales of scissors to schools and that it would be interested in receiving a price discount its competitors were receiving. Under the circumstances, I believe the defendant engaged in price discrimination in its sales of scissors.

HN9[] Having established that the defendant engaged in price discrimination, the plaintiff must also show that the effect of the price discrimination "may be substantially to lessen competition . . . or to injure, destroy or prevent competition with any person who either grants or knowingly receives **[**14]** the benefit of such discrimination, or with customers of either of them." *15 U.S.C. § 13(a)*. The defendant argues that the plaintiff is not in competition with the distributors since they operate at different functional levels. The defendant contends that the distributors operate at the retail level and that the plaintiff is a wholesale operation that performs none of the functions of a school supplies distributor.

I disagree. With respect to sales to schools, the plaintiff operates at the same level of distribution as do the distributors of school supplies. The character of the plaintiff's selling is no different from the character of the distributors' selling indeed, they bid for the same sales contracts to schools. *Kirby v. P. R. Mallory Co., Inc., 489 F.2d 904, 909 (7th Cir. 1973)*. The plaintiff has established that it competes with the favored purchasers.

I also find that the price discrimination has an adverse effect on competition and that the plaintiff has been damaged thereby. One of the stipulated facts is that the discount gives the recipient a competitive advantage in sales of scissors to schools. The fact that the plaintiff has been underbid by the favored distributors **[**15]** since 1976 supports this finding of adverse effect on competition.

The defendant contends that even if price discrimination is found, it has a complete defense because the price discount is cost-justified within the meaning of the first proviso of *§ 13(a)*. Such proviso states, in part, that ***HN10***[] price differentials which make due allowance for differences in the cost of sale or delivery resulting from different methods by which the commodities are sold or delivered to buyers, are not prohibited.

The defendant concedes that the burden of proving this cost-justification defense is on the defendant-seller. In my opinion, the defendant's proof on this point was inadequate. No cost analysis was introduced to demonstrate the actual savings, if any, resulting from the discount. The requirements set forth in the standard agreement in order to qualify as a distributor obligated the distributors to perform functions which would surely result in some savings to the defendant since it will not have to undertake these functions itself. However, this is not a substitute for specific evidence of cost savings. The defendant points to no such evidence in the record. For these reasons, I believe that **[**16]** the defendant has not established a cost-justification defense.

The plaintiff claims that it has been injured as a result of the defendant's unlawful conduct and is entitled to damages of two general types: (1) the difference between the discount and regular price for its sales to the Milwaukee public school district, and (2) lost profits on "anticipated sales" it would have made to the Milwaukee public schools had it received the discount. The plaintiff has not attempted to prove damages flowing from sales to other schools.

The defendant challenges the plaintiff's right to recover the first of the two types of damages set forth above on the basis that the price differential is not the proper measure of damages in a Robinson-Patman case. The courts are divided on the question whether the amount of a discrimination in prices between business competitors can be recovered as damages. Compare *Elizabeth Arden Sales Corporation v. Gus Blass Co., 150 F.2d 988* (8th Cir.), cert. **[*357]** denied *326 U.S. 773, 66 S. Ct. 231, 90 L. Ed. 467 (1945)*, with *Enterprise Industries, Inc. v. Texas Co., 240 F.2d 457* (2d Cir.), cert. denied *353 U.S. 965, 77 S. Ct. 1049, 1 L. Ed. 2d 914 (1957)*. See also **[**17]** *Fowler Manufacturing Co. v. Gorlick, 415 F.2d 1248 (9th Cir. 1969)*. From these cases, however, it appears that ***HN11***[] if the buyer is unable to pass on the higher price to its own customer, the price differential is a proper measure of damages.

I believe that ***HN12***[] in a case in which competing purchasers seek to resell the commodity in question through a bid-award procedure, the winner being the lowest bidder, it is probable that there is little or no opportunity for the winning bidder to pass on the higher price. An attempt to pass on the higher price necessarily raises the bid and increases the chance that a competitor's bid will be lower. Accordingly, I believe that the price differential is an appropriate measure of damages in this case. In the years 1974-1976, the plaintiff purchased $ 6,732.54 worth of school scissors for which it should have received the 5% Discount. The price differential on these purchases, therefore, is $ 336.63.

The second type of damages sought by the plaintiff lost profits on anticipated sales for the years 1974-1978 are not recoverable. Because of the nature of the bid-award sale procedure through which the plaintiff and its competitors sold to the Milwaukee schools, **[**18]** a bidder who does not win the contract award in question does not make a purchase since it has no order to fill. ***HN13***[] The Robinson-Patman Act prohibits two sales of the same product to different purchasers at different prices. *Holleb & Co. v. Produce Terminal Cold Storage Co., 532 F.2d 29, 34-35 (7th Cir. 1976)*. "No single sale can violate the Robinson-Patman Act. At least two transactions must take place in order to constitute a discrimination." *Bruce's Juices v. American Can Co., 330 U.S. 743, 755, 67 S. Ct. 1015, 1021, 91 L. Ed. 1219 (1947)*. One who merely seeks to purchase does not qualify as a purchaser. *Chicago Seating Co. v. S. Karpen & Bros., 177 F.2d 863 (7th Cir. 1949)*. For this reason, the plaintiff is not entitled to damages for lost sales.

Thus, the only damages the plaintiff may recover are the $ 336.63, representing the price differential. Such ***HN14***[] amount trebled pursuant to *15 U.S.C. § 15*, yields a total damage award of $ 1,009.89.

The plaintiff has also requested injunctive relief restraining the defendant from discriminating against the plaintiff and in favor of the distributors. I am not convinced that there is a significant threat of injury from a violation that is likely **[**19]** to continue or reoccur. The plaintiff now knows what the requirements are for attaining the status of distributor and can receive the discount if it meets those requirements. Under the circumstances, I do not believe that an injunction is warranted.

The plaintiff, having succeeded in proving its antitrust claim, is entitled to an award of attorney's fees as part of its costs. *15 U.S.C. § 15*. However, in view of the modest actual damages established by the plaintiff and the absence of any special complexity in the case, attorney's fees in the sum of only $ 250 will be awarded to the plaintiff. *In re Clark Oil & Refining Corp. Antitrust Litigation, 422 F. Supp. 503 (E.D.Wis.1976)*.

Therefore, IT IS ORDERED that judgment be entered in favor of the plaintiff in the amount of $ 1,009.89, with costs, including attorney's fees of $ 250.

Public Health & Welfare Law > Social Security > Medicaid > General Overview

Public Health & Welfare Law > Social Security > Medicare > General Overview

HN1[] **Public Health & Welfare Law, Healthcare**

Congress has established a Capital Expenditure Review program to assure that federal funds appropriated for Medicare, Medicaid and other federal programs are not used to support unnecessary capital expenditures for health care facilities.

Public Health & Welfare Law > Social Security > Medicaid > General Overview

Public Health & Welfare Law > Social Security > Medicare > General Overview

HN2[] **Social Security, Medicaid**

The federal Capital Expenditure Review program requires the Secretary of Health, Education and Welfare (HEW) to enter into an agreement with the governor of a state whereby a state health planning agency is established within the state. The state planning agency is to consider the findings and regulations of the appropriate regional planning agency, per *42 U.S.C.S. § 1320a-1(d)(1)(B)(ii)*. The regulations of the state planning agency are forwarded to the Secretary of HEW. An applicant receiving an adverse recommendation has the right to an appellate administrative hearing.

Public Health & Welfare Law > Healthcare > General Overview

Public Health & Welfare Law > Social Security > Medicaid > General Overview

Public Health & Welfare Law > Social Security > Medicare > General Overview

HN3[] **Public Health & Welfare Law, Healthcare**

Under *42 U.S.C.S. §§ 300L(a)*, *300L(b)*, the governor of each state, subject to the approval of the Secretary of Health, Education, and Welfare, designates health service areas within his or her state. A health systems agency corresponding to each health service area is to be established pursuant to *42 U.S.C.S. § 300L-1* and § 300L-4. Only states complying with these requirements may receive federal funding for a wide variety of purposes relating to health care.

Healthcare Law > ... > Facility Planning > Certificates of Need > General Overview

Public Health & Welfare Law > Healthcare > General Overview

Healthcare Law > Business Administration & Organization > Facility & Personnel Licensing > General Overview

HN4[] **Facility Planning, Certificates of Need**

Under Michigan law, persons wishing to engage in certain health care facility construction must first obtain a state Certificate of Need. Such a certificate is required for construction where no facility previously existed as well as for replacement of existing health care facilities. In determining whether to issue such certificate the Director of the Michigan Department of Public Health is to consider the recommendations of the relevant regional planning agency, and both planning agencies are directed to consider a variety of factors set out in the statute.

Administrative Law > Judicial Review > Reviewability > Standing

Healthcare Law > Business Administration & Organization > Facility & Personnel Licensing > General Overview

Healthcare Law > ... > Facility Planning > Certificates of Need > General Overview

Healthcare Law > ... > Facility Planning > Certificates of Need > Hospitals

HN5[] **Reviewability, Standing**

Michigan law provides that a Certificate of Need for one seeking to establish a healthcare facility shall be consistent with but need not follow exactly the state plan for hospital and medical facilities construction and the policies and procedures governing the issuance of Certificates of Need required under federal grant-in-aid programs or federal loan guarantee programs. Michigan law also establishes a State Health Facilities Commission within the Michigan

Department of Public Health, and charges that body with advising the Director of the Department. An applicant or the local health systems agency aggrieved by a decision of the Director with respect to a Certificate of Need application may request a hearing by the Commission and may appeal a final order of the Commission to the appropriate county circuit court.

Administrative Law > Judicial Review > Reviewability > Exhaustion of Remedies

Civil Procedure > ... > Justiciability > Exhaustion of Remedies > Failure to Exhaust

Labor & Employment Law > Collective Bargaining & Labor Relations > Enforcement of Bargaining Agreements > Exhaustion of Remedies

Civil Procedure > ... > Justiciability > Exhaustion of Remedies > General Overview

Civil Procedure > ... > Justiciability > Exhaustion of Remedies > Administrative Remedies

HN6[] **Reviewability, Exhaustion of Remedies**

Where a litigant has failed to exhaust administrative remedies (where such is explicitly provided or implicitly assumed to exist), judicial review is inappropriate.

Constitutional Law > Substantive Due Process > Scope

HN7[] **Constitutional Law, Substantive Due Process**

To have a cognizable property interest in a government benefit, there must be more than an abstract need or desire for it. A person must have more than a unilateral expectation of it. He must, instead, have a legitimate claim of entitlement to it.

Civil Procedure > ... > Justiciability > Standing > General Overview

Civil Procedure > Preliminary Considerations > Justiciability > General Overview

HN8[] **Justiciability, Standing**

A mere subjective intent to establish a new enterprise or to expand an already existing business is not enough on which to base standing to sue; there must be overt and objective preparations.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN9[] **Exemptions & Immunities, Parker State Action Doctrine**

Legislation is not invalid merely because it may have an anticompetitive effect; otherwise, the states' power to engage in economic regulation would be effectively destroyed. Legislative bodies have broad scope to experiment with economic problems. Moreover, the right to conduct a business, or to pursue a calling, may be conditioned.

Statutes prescribing the terms upon which those conducting certain businesses may contract, or imposing terms if they enter into agreements, are within the state's competency.

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN10[] **Exemptions & Immunities, Noerr-Pennington Doctrine**

Federal precedent protects attempts to influence governmental units and instrumentalities in order to obtain legislation, redress, or action favorable to particular interests. That precedent does not protect affirmative attempts to block access to adjudicatory tribunals. That precedent does shield from federal antitrust laws a concerted effort to influence public officials regardless of intent or purpose.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Constitutional Law > Bill of Rights > Fundamental Freedoms > Freedom to Petition

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Civil Procedure > ... > Pleadings > Amendment of Pleadings > General Overview

HN11[] **Parker State Action Doctrine, Local Governments & Private Parties**

If a governmental or agency action is valid as under state authority (despite anticompetitive effects), then seeking to influence the action and a successful outcome are exempt from federal antitrust laws. Conversely, for federal antitrust laws to be applicable to such actions, the parties induced must be public, as opposed to private, entities and legitimately acting as such.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN12[] **Exemptions & Immunities, Parker State Action Doctrine**

A violation of a state law, albeit a regulatory scheme affecting commercial activity, is not by that fact alone a violation of the federal antitrust statutes. A plaintiff cannot, by charging a conspiracy, turn what is basically a claim of violation of state law into a federal antitrust case.

Antitrust & Trade Law > Sherman Act > General Overview

Torts > Business Torts > General Overview

HN13[] **Antitrust & Trade Law, Sherman Act**

Tortious conduct against one engaged in interstate commerce or which has an effect on interstate commerce does not automatically constitute a violation of federal ***antitrust law***.

Opinion

[*1304] OPINION AND ORDER GRANTING DEFENDANTS' MOTIONS FOR SUMMARY JUDGMENT

Plaintiff Huron Valley Hospital, Inc. (Huron Valley or plaintiff) is a non-profit organization formed for the purpose of building a new hospital in northwest Oakland County, Michigan. It has filed this action alleging that all defendants with the exception of the Department of Health, Education and Welfare (HEW) have conspired to exclude it from the market of providing hospital facilities and services, in violation of the federal antitrust laws. It seeks treble damages and injunctive relief against all defendants except HEW and declaratory relief against HEW and the Michigan Department of Public Health (MDPH). All defendants have moved to dismiss and in the alternative for summary judgment.

In September, 1976, plaintiff made a combined application to the MDPH for a Certificate **[**2]** of Need under *M.C.L.A. § 331.451 Et seq.*, M.S.A. § 14.1179(51) Et seq. (the Certificate of Need Act), and for Capital Expenditure Review under *42 U.S.C. § 1320a-1* requesting approval for the construction of a new 153-bed hospital in the western part of Service Area 76 (an administrative area within Oakland County). The Michigan Legislature has established a hospital and medical facilities division within the Michigan Department of Public Health and vested it with various health facilities planning responsibilities.

HN1[] The Congress has established a "Capital Expenditure Review" program to assure that federal funds appropriated for medicare, medicaid and other federal programs are not used to support unnecessary capital expenditures for health care facilities. ***HN2***[] This program requires the Secretary of Health, Education and Welfare to enter into an agreement with the governor of a state whereby a state health planning agency is established within the state. MDPH has been designated in accordance with this procedure as the state health planning agency in Michigan. Among other duties it is to review applications from health care **[*1305]** providers for proposed capital expenditures **[**3]** to determine whether the proposals are consistent with plans developed pursuant to the Hill-Burton Act (*42 U.S.C. § 291 Et seq.*). The state planning agency is to consider the findings and regulations of the appropriate regional planning agency (*42 U.S.C. § 1320a-1(d)(1)(B)(ii)*). The regulations of the state planning agency are forwarded to the Secretary of HEW. An applicant receiving an adverse recommendation has the right to an appellate administrative hearing. ***HN3***[] The governor of each state, subject to the approval of the Secretary of HEW, designates health service areas within a state (*42 U.S.C. § 300L (a)*, *§ 300L (b)*). A Health Systems Agency corresponding to each health service area is to be established pursuant to *42 U.S.C. § 300L* -1 and *§ 300L -4*. Defendant Comprehensive Health Planning Counsel of Southeastern Michigan (CHPC-SEM) has been conditionally designated as the health systems agency for a seven-county area which includes Oakland County. It is charged with assembling and analyzing data regarding the health care delivery system in the area, developing a plan outlining regional goals and reviewing and making recommendations to the state planning agency with respect **[**4]** to proposed new institutional health services in its planning area (*42 U.S.C. § 300L* -2(f)). Only states complying with these requirements may receive federal funding for a wide variety of purposes relating to health care.

In 1972 the Michigan Legislature established the requirement that ***HN4***[] persons wishing to engage in certain health care facility construction must first obtain a state "Certificate of Need." 1972 P.A. 256 as amended, *M.C.L.A. § 331.451-462*, M.S.A. § 14.1179(51)-.1179(62). Such a certificate is required for construction where no facility previously existed as well as for replacement of existing health care facilities. In determining whether to issue such certificate the Director of MDPH is to consider the recommendations of the relevant regional planning agency, and both planning agencies are directed to consider a variety of factors set out in the statute. M.C.L.A. § 331.455a, M.S.A. § 14.1179(55a). The Act further provides that:

> A Certificate of Need shall be consistent with but need not follow exactly the state plan for hospital and medical facilities construction and the policies and procedures governing the issuance of Certificates of Need required **[**5]** under federal grant-in-aid programs or federal loan guarantee programs. M.C.L.A. § 331.454, M.S.A. § 14.1179(54).

HN5[] Act 256 further establishes a State Health Facilities Commission within the MDPH, M.C.L.A. § 331.452, M.S.A. § 14.1179(52), and charges that body with advising the Director, M.C.L.A. § 331.453(1), M.S.A. § 14.1179(53)(1). An applicant or the local Health Systems Agency "aggrieved" by a decision of the Director with respect to a Certificate of Need application may request a hearing by the Commission and may appeal a final order of the Commission to the appropriate county circuit court, M.C.L.A. §§ 331.453(2), 331.458, M.S.A. §§ 14.1179(53)(2), 14.1179(58).

The Plan Implementation Committee of the Comprehensive Health Planning Council of Southeastern Michigan, the regional health planning agency under *42 U.S.C. § 300L* -1 Et seq., reviewed plaintiff's application and recommended denial; the Health Facilities Commission of the MDPH endorsed this recommendation. The MDPH Director then reviewed the application for Certificate of Need and denied it on July 5, 1977. The Director also recommended that the Secretary of HEW deny the application for Capital Expenditure **[**6]** Review, and the Secretary acted in accord with this recommendation. Plaintiff then filed notices of administrative appeals of both denials which contained, Inter alia, allegations that the actions of the MDPH were in restraint of trade.

Defendant Pontiac General Hospital (Pontiac or PGH) filed an application for a Certificate of Need and Capital Expenditure Review with MDPH on December 1, 1977. MDPH has identified many deficiencies in the existing physical plant of Pontiac **[*1306]** General and if these deficiencies are not remedied it cannot continue to be licensed to operate under 1968 P.A. 17, *M.C.L.A. § 331.411 Et seq.*, M.S.A. § 14.1179(1) Et seq. The application for Certificate of Need and Capital Expenditure Review submitted by Pontiac General Hospital seeks the necessary state and federal approval for a replacement-renovation of the existing hospital. This replacement-renovation would reduce the number of medical-surgical beds from 383 to 350 and would correct existing defects in the physical plant in order to insure continued full licensing under Act 17. It is proposed that the construction program be financed through a combination of general obligation bonds of **[**7]** the City of Pontiac and revenue bonds of the State of Michigan Hospital Building Authority.

Pontiac's application was submitted to CHPC-SEM for review; the CHPC-SEM Plan Implementation Committee recommended approval and CHPC-SEM endorsed this recommendation on January 12, 1978. MDPH in turn recommended that the Secretary of HEW approve Pontiac's Capital Expenditure Review, and the Secretary issued his approval.

On February 4, 1978, plaintiff filed a complaint in the Oakland County Michigan Circuit Court seeking immediate judicial relief and alleging, Inter alia, that its administrative appeal was futile and that the imminent approval by MDPH of Pontiac's Certificate of Need application would moot the issues raised in its appeal. Plaintiff also alleged that the administrative actions were in restraint of trade and tended to create a monopoly. The Oakland County Circuit Court entered a preliminary injunction restraining the grant of Pontiac's application for a Certificate of Need. However, that court dismissed the remaining counts of plaintiff's complaint, including those alleging monopoly and restraint of trade, holding that plaintiff had failed to exhaust its administrative remedies **[**8]** and that all of these claims "can be heard and determined in said administrative proceedings." The Circuit Court initially retained jurisdiction of the action to preserve its preliminary injunction and to permit plaintiff to appeal (pursuant to Michigan's Certificate of Need Act) any final adverse administrative decision. The Oakland Circuit Court concluded on August 25, 1978 that since Pontiac's financial capability to construct the proposed replacement-renovation would be jeopardized if the Certificate of Need were not issued it would suffer immediate and irreparable harm if the preliminary injunction were allowed to remain in effect. The court therefore dissolved the preliminary injunction and certified its decision as final. Pontiac's Certificate of Need was then approved by MDPH. Plaintiff filed a timely notice of appeal to the Michigan Court of Appeals. That appeal is still pending.

Hearings on the administrative appeal from the MDPH Director's recommendation of Capital Expenditure Review denial have been indefinitely adjourned at plaintiff's request. Presentation of evidence to the hearing examiner in connection with the Certificate of Need appeal has been concluded, **[**9]** but the hearing examiner has not yet made his recommendations. When those recommendations are made they must then be forwarded to the Health Facilities Commission, which will review the entire record before entering a final order.

Huron Valley alleges in its complaint that defendant Pontiac General Hospital conspired with its co-defendants and certain other unnamed co-conspirators to allocate hospital beds within the market area (Pontiac Service Area 76) in order to restrain plaintiff from entering the market and to fix prices at non-competitive levels, all in violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1*. The means employed toward this end, plaintiff alleges, include (1) forming the North Oakland County Hospital Planning Steering Committee; (2) inducing CHPC-SEM and MDPH to act in concert with the conspirators in the denial of plaintiff's application and the approval of defendant Pontiac's application; and (3) creating publicity adverse to plaintiff (Count I). Plaintiff further alleges that each of the other acts complained of was taken at the instigation of Pontiac, and that these actions thus constitute monopolization, an **[*1307]** attempt to monopolize, and a conspiracy **[**10]** to monopolize on the part of Pontiac, in violation of *§ 2* of the Sherman Act, *15 U.S.C. § 2* (Count II).

During review of plaintiff's application by CHPC-SEM, the president of Pontiac General Hospital was invited to comment on the pending application and did so in writing. Defendants assert by affidavit that there was no other formal or informal influence by Pontiac upon Huron Valley's application.

During the relevant period, Pontiac also participated in the North Oakland County Planning Steering Committee, an unincorporated voluntary organization composed of representatives from four hospitals in Service Area 76 with a non-voting representative of defendant Greater Detroit Area Hospital Council (GDAHC). The function of the Steering Committee is to study and make recommendations concerning the provision of medical-surgical acute-care services by hospitals in the Oakland County area. GDAHC is composed of representatives of hospitals throughout the greater Detroit metropolitan area. Defendant Steering Committee denies any actions by itself or its members designed to influence the administrative consideration of plaintiff's application, other than the letter to CHPC-SEM from the **[**11]** then-President of Pontiac General Hospital.

Plaintiffs have requested the right to take discovery depositions of the persons involved in the various procedures referred to above as well as to examine the records of defendants. It has further responded to defendants' motions for summary judgment with affidavits. These affidavits, in brief, aver that plaintiff had to face more rigorous standards for approval than did defendant Pontiac, and that due to various other policies and procedures of GDAHC and CHPC-SEM which favor existing over new ("from ground up") facilities, plaintiff's fate was sealed in advance. It is alleged in addition that plaintiff's application was denied because of personal animosity on the part of certain members of CHPC-SEM toward Dr. Martin Trepel, a consultant to plaintiff's staff. Dr. Trepel states in his affidavit that an Assistant Executive Director of CHPC-SEM told him that plaintiff's getting its Certificate of Need depended on "twisting the proper arms" of CHPC-SEM's Executive Committee. Dr. Trepel also alleges that at a meeting with the city manager and the mayor of Pontiac, he was told by the latter that they could not afford politically to reach **[**12]** a public accommodation with plaintiff. In his affidavit, Ralph W. Wiese, Chairman of the Board of Directors of Huron Valley, states that on February 22, 1977, a group called "Pontiac Citizens Coalition on PGH" wrote to CHPC-SEM opposing plaintiff's application on the grounds that the granting of a Certificate of Need to plaintiff would undermine PGH's development plan. Wiese also alleges that at CHPC-SEM's executive hearing on plaintiff's application, Paul Masseron, Chairman of the Plan Implementation Committee of CHPC-SEM, acted as an advocate for PGH. Although disputed in part by defendants, for the purpose of these motions these allegations will be assumed to be true. None, however, raises issues of material fact required to be resolved for disposition of this action.

I. Ripeness and Related Doctrines Due Process

Plaintiff has two appeals still pending one in the Michigan Court of Appeals, and the other an appeal from the MDPH Director's denial of Capital Expenditure Review (indefinitely adjourned by plaintiff). Hence considerations of exhaustion of administrative remedies, ripeness, abstention and federal-state comity preclude entertaining the merits of plaintiff's claims. *HN6*[] **[**13]** Where plaintiff has failed to exhaust administrative remedies (where such is explicitly provided or implicitly assumed to exist), judicial review is inappropriate. *Renegotiation Board v. Bannercraft Clothing Co., Inc., 415 U.S. 1, 94 S. Ct. 1028, 39 L. Ed. 2d 123 (1974)*; *Sampson v. Murray, 415 U.S. 61, 94 S. Ct. 937, 39 L. Ed. 2d 166 (1974)*; *McGee v. United States, 402 U.S. 479, 91 S. Ct. 1565, 29 L. Ed. 2d 47 (1971)*; *McKart v. United States, 395 U.S. 185, 23 L. Ed. 2d 194, 89 S. Ct. 1657* ***[*1308]*** *(1969)*. The rationale for this rule is based on "the absence of any "lawful function' on the part of the courts "to anticipate the administrative decision with their own,' " *Renegotiation Board, supra, 415 U.S. at 21, 94 S. Ct. at 1039*, Quoting *Aircraft & Diesel Equipment Corp. v. Hirsch, 331 U.S. 752, 767, 67 S. Ct. 1493, 91 L. Ed. 1796 (1947)*. To the extent that plaintiff has filed appeals in accordance with 42 C.F.R. § 100.106(c), M.C.L.A. § 331.453(2) (M.S.A. § 14.1179(53)(2)) and M.C.L.A. § 331.458 (M.S.A. § 14.1179(58)) and filed an action in the Oakland County Circuit Court, further claims challenging the same actions of defendant would be superfluous and contrary to sound **[**14]** judicial policy. *Schaefer v. First National Bank of Lincolnwood, 509 F.2d 1287, 1299-1300 (7th Cir. 1975)*, Cert. denied, *425 U.S. 943, 96 S. Ct. 1682, 48 L. Ed. 2d 186 (1976)*. ("By electing to make their claim for relief under the securities acts, the plaintiffs have rendered their antitrust claims superfluous." *Id. at 1300*.)

The ripeness doctrine is especially relevant given the appeals pending in both the administrative and state tribunals. In a leading case, the Supreme Court stated that the purpose of the ripeness doctrine is "to protect the agencies from judicial interference until an administrative decision has been formalized and its effects felt in a concrete way by the challenging parties." *Abbott Laboratories v. Gardner, 387 U.S. 136, 148-49, 87 S. Ct. 1507, 1515, 18 L. Ed. 2d 681 (1967)*. While initial decisions were handed down by both the administrative and state tribunals, the full course of review on both tracks has not yet been run, so that judicial review is precluded at this premature stage. "Since the record now before (the court) demonstrates that these processes of adjustment are presently proceeding exactly as, and where the statute contemplated, and that no **[**15]** final resolution as to them has been arrived at, this case is not presently ripe for judicial review." *Buckeye Power, Inc. v. E. P. A., 525 F.2d 80, 84 (6th Cir. 1975)*, Citing *Abbott Laboratories, supra*, and *Toilet Goods Ass'n, Inc. v. Gardner, 387 U.S. 158, 87 S. Ct. 1520, 18 L. Ed. 2d 697 (1967)*.

Federal-state comity and abstention doctrines also militate against judicial review, since the state appeal and administrative review are still pending. *Ricci v. Chicago Mercantile Exchange, 409 U.S. 289, 93 S. Ct. 573, 34 L. Ed. 2d 525 (1973)*; *Lake Carriers' Ass'n v. MacMullan, 406 U.S. 498, 92 S. Ct. 1749, 32 L. Ed. 2d 257 (1972)*; *Railroad Comm. of Texas v. Pullman Co., 312 U.S. 496, 61 S. Ct. 643, 85 L. Ed. 971 (1941)*. The applicable policy considerations governing abstention were articulated for this *Circuit in Gay v. Board of Registration Commissioners, 466 F.2d 879, 883 (6th Cir. 1972)*:

> The first of these is the avoidance of a premature constitutional decision by a possible narrowing construction of the state law by a state court. *Lake Carriers' Association v. MacMullan, 406 U.S. 498, 92 S. Ct. 1749, 32 L. Ed. 2d 257 (1972)*; *Harman v. Forssenius, 380 U.S. 528, 85 S. Ct. 1177,* ***[**16]*** *14 L. Ed. 2d 50 (1965)*; Cf. *Zwickler v. Koota, 389 U.S. 241, 255, 88 S. Ct. 391, 19 L. Ed. 2d 444 (1967)* (Harlan, J., concurring). A second policy reason underpinning the principle is the avoidance of needless conflict in the federal-state relationship. *Younger v. Harris, 401 U.S. 37, 91 S. Ct. 746, 27 L. Ed. 2d 669 (1971)*; *Burford v. Sun Oil Co., 319 U.S. 315, 63 S. Ct. 1098, 87 L. Ed. 1424 (1943)*. A third consideration is the desirability of avoiding the necessity of a federal court making tentative decisions on issues of state law. *Reetz v. Bozanich, 397 U.S. 82, 90 S. Ct. 788, 25 L. Ed. 2d 68 (1970)*; *Meredith v. Winter Haven, 320 U.S. 228, 64 S. Ct. 7, 88 L. Ed. 9 (1943)*. A fourth basic reason justifying abstention is the avoidance of unnecessary interference with state functions or regulatory schemes. *Lake Carriers' Association v. MacMullan, supra*; *Younger v. Harris, supra.*

Most if not all of the same considerations exist here. The Michigan courts' decisions will permit the state to define the perimeters of state action in the procedures about which plaintiff complains. Nothing could be more disruptive of state regulatory procedures than for a litigant to have a suit **[**17]** **[*1309]** pending against the state regulatory body while that body is concluding its hearings on that litigant's claims.

Plaintiff urges that the defendants' conspiracy has prevented it from receiving a fair consideration of its application for a Certificate of Need. However, it does not claim that defendants' acts have prevented it from presenting anything to the Administrative Law Judge now hearing its appeal. The state procedures provide plaintiff with a full opportunity to assert and to have corrected all violations of state law. Thus *M.C.L.A. § 24.306*, M.S.A. § 3.560(206) (the Michigan Administrative Procedures Act) provides:

> (1) Except when a statute or the constitution provides for a different scope of review, the court shall hold unlawful and set aside a decision or order of any agency if substantial rights of the petitioner have been prejudiced because the decision or order is any of the following:
> (a) In violation of the constitution or a statute.
> (b) In excess of the statutory authority or jurisdiction of the agency.
> (c) Made upon unlawful procedure resulting in material prejudice to a party.
>
> (d) Not supported by competent, **[**18]** material and substantial evidence on the whole record.
> (e) Arbitrary, capricious or clearly an abuse or unwarranted exercise of discretion.
> (f) Affected by other substantial and material error of law.

Review is also provided for in the Certificate of Need Act, M.C.L.A. § 331.458, M.S.A. § 14.1179(58), as follows:

> If when the person who applies for a certificate of need is aggrieved by the decision of the director or if the recommendation of the local planning council is not accepted then he or the local planning council may request a hearing to be conducted by the commission in accordance with and subject to Act No. 306 of the Public Acts of 1969, as amended. If the certificate of need is not granted by the commission or the person who applies for the certificate of need is aggrieved by the decision of the commission, then he or the local planning council may appeal to the circuit court of the county in which the appealing health facility is located requesting an order reversing the decision of the commission in the same manner as is provided for a civil suit.

Plaintiff has yet to pursue any proceedings to become eligible for medicare and medicaid **[**19]** payments under *42 U.S.C. § 1320a-1*, since it is yet to be licensed as a hospital. Claims relating to procedures for that eligibility are therefore premature. Given the inconclusive status of the state proceedings, abstention precludes present review of plaintiff's claim by this court. Thus defendants are entitled at least to a stay of all proceedings.

The problem is close to that in *Ricci, supra*, and is, as the United States Supreme Court stated,

> recurring. It arises when conduct seemingly within the reach of the antitrust laws is also at least arguably protected or prohibited by another regulatory statute enacted by Congress. Often, but not always, the other regime includes an administrative agency with authority to enforce the major provisions of the statute in accordance with that statute's distinctive standards, which may or may not include concern for competitive considerations.

Ricci, supra, 409 U.S. at 299-300, 93 S. Ct. at 579 (footnote omitted). Plaintiff in Ricci had purchased a membership in the Chicago Mercantile Exchange, using funds borrowed from the Siegel Trading Company, a member of the Exchange. Subsequently the Exchange, at the behest of the **[**20]** Trading Company, transferred the membership without notice or hearing, utilizing a blank transfer authorization that had previously been revoked. Plaintiff charged that this conduct violated both the rules of the Exchange and the Commodity Exchange Act as well as *§ 1* of the Sherman Act. The Court held that the antitrust proceedings should be stayed until the Commodity Exchange Commission could assess the validity **[*1310]** of the defendants' conduct under the Commodity Exchange Act. The opinion recognized "that the courts, while retaining the final authority to expound the statute, should avail themselves of the aid implicit in the agency's superiority in gathering the relevant facts and in marshaling them into a meaningful pattern." *Federal Maritime Board v. Isbrandtsen Co., 356 U.S. 481, 498, 78 S. Ct. 851, 861, 2 L. Ed. 2d 926 (1958)*, Quoted in Ricci, supra, 409 U.S. at 305-06, 93 S. Ct. 573.

Plaintiff's application was reviewed and denied by MDPH a number of months before defendant Pontiac's application was submitted and approved. Under well-settled law, plaintiff has no *Fourteenth Amendment* due process right either to have participated in the Pontiac hearing since its **[**21]** own interest (if any) was by that time extinct and could not have been affected or to have its application approved. ***HN7***[] To have a cognizable property interest in a government benefit, the Supreme Court stated in *Board of Regents v. Roth, 408 U.S. 564, 92 S. Ct. 2701, 33 L. Ed. 2d 548 (1972)*, there must be more than an abstract need or desire for it. A person "must have more than a unilateral expectation of it. He must, instead, have a legitimate claim of entitlement to it." *408*

U.S. at 577, 92 S. Ct. at 2709. Accord, *Perry v. Sindermann, 408 U.S. 593, 92 S. Ct. 2694, 33 L. Ed. 2d 570 (1972)*. Since plaintiff had at best a unilateral expectation, and not a protected property interest, which in any event was eliminated before the Pontiac hearing, there has been no deprivation of a protected interest outside the standards of due process, nor has plaintiff alleged any circumstances which would place the nature of the hearings themselves (where the proceedings were matters of public record and conflicts of interest scrupulously disclosed) outside the bounds of due process. *Withrow v. Larkin, 421 U.S. 35, 95 S. Ct. 1456, 43 L. Ed. 2d 712 (1975)* (conclusory charges of bias insufficient to **[**22]** impugn due process fairness of state administrative hearing).

The State of Michigan may deny the plaintiff a Certificate of Need. If it does so, the plaintiff, never having been eligible to enter the market of supplying hospital services, can claim no deprivation of any due process right. In *New Motor Vehicle Board v. Orrin W. Fox Co., 439 U.S. 96, 99 S. Ct. 403, 58 L. Ed. 2d 361 (1978)*, a California statute required an automobile manufacturer to obtain the approval of the California New Motor Vehicle Board before opening or relocating a retail dealership within the market area of an existing franchise if the latter protested, and the statute also directed the California Board to notify the manufacturer of this requirement upon the existing franchisee's filing of a protest. The Board was not required to hold a hearing on the merits of the protest before sending the notice to the manufacturer. The Supreme Court held that the absence of a prior hearing requirement and the possibility of delaying the consummation of the business plans of the potential franchisees did not constitute a denial of *Fourteenth Amendment* procedural due process.

> Even if the right to franchise had constituted **[**23]** a protected interest when California enacted the (statute), California's Legislature was still constitutionally empowered to enact a general scheme of business regulation that imposed reasonable restrictions upon the exercise of the right. . . .
> In particular, the California Legislature was empowered to subordinate the franchise rights of automobile manufacturers to the conflicting rights of their franchisees where necessary to prevent unfair or oppressive trade practices. . . .
>
> Further, the California Legislature had the authority to protect the conflicting rights of the motor vehicle franchisees through customary and reasonable procedural safeguards; I. e., by providing existing dealers with notice and an opportunity to be heard by an impartial tribunal the New Motor Vehicle Board before their franchisor is permitted to inflict upon them grievous loss. Such procedural safeguards cannot be said to deprive the franchisor of due process. States may, as California has done here, **[*1311]** require businesses to secure regulatory approval Before engaging in specified practices. See, E.g. *North Dakota State Board of Pharmacy v. Snyder's Drug Stores, Inc., 414 U.S.* ***[**24]*** *156, (94 S. Ct. 407, 38 L. Ed. 2d 379) (1973)* (Pharmacy operating permit), *St. Louis Poster Adv. Co. v. St. Louis, 249 U.S. 269, (39 S. Ct. 274, 63 L. Ed. 599) (1919)* (billboard permits), *Hall v. Geiger-Jones Co., 242 U.S. 539, (37 S. Ct. 217, 61 L. Ed. 480) (1917)* (securities registration), *Adams v. Milwaukee, 228 U.S. 572, (33 S. Ct. 610, 57 L. Ed. 971) (1913)* (milk inspection), *Gundling v. Chicago, 177 U.S. 183, (20 S. Ct. 633, 44 L. Ed. 725) (1900)* (cigarette sales license).

At 99 S. Ct. at 410-11. (emphasis in original). That situation is made no less pertinent to this by the fact that the California Board may ultimately approve some of the franchise candidates; the Board may just as easily, as the MDPH has done here, reject the applicant.

Even assuming arguendo the activities in question come under the antitrust laws, an established line of cases holds that mere negotiations toward contracts (as opposed to finished, binding contracts) are not "business or property" deserving of antitrust protection. *Hecht v. Pro Football, Inc., 187 U.S.App.D.C. 73, 86, 570 F.2d 982, 995 (1977)*, Cert. denied, *436 U.S. 956, 98 S. Ct. 3069, 57 L. Ed. 2d 1121 (1978)*. Accord, *Peller v.* ***[**25]*** *Int'l Boxing Club, Inc., 227 F.2d 593 (7th Cir. 1955)*. Analogously to the Supreme Court's constitutional due process doctrine, ***HN8***[] "(a) mere subjective intent to establish a new enterprise or to expand an already existing business is not enough on which to base standing to sue; there must be overt and objective preparations." *N. W. Controls, Inc. v. Outboard Marine Corp., 333 F. Supp. 493, 507 (D.Del.1971)*; Accord, *Martin v. Phillips Petroleum Co., 365 F.2d 629 (5th Cir.)*, Cert. denied, *385 U.S. 991, 87 S. Ct. 600, 17 L. Ed. 2d 451 (1966)*; *Volasco Products Co. v. Lloyd A. Fry Roofing Co., 308 F.2d 383, 395-96 (6th Cir. 1962)*, Cert. denied, *372 U.S. 907, 83 S. Ct. 721, 9 L. Ed. 2d 717 (1963)*. Here, as in Volasco,

> There was only a stated intention to enter into this additional production with no overt act performed in connection therewith and no expenditure of money to provide the required facilities. Preparedness and capacity to engage in a business mean more than an intention so to do and an ability to buy the necessary facilities.

308 F.2d at 395-96 (authorities omitted). Hence under the standards of due process and antitrust standing, plaintiff fails to state a claim on **[**26]** which relief can be granted.

II. Exemption from the Antitrust Laws

The actions of which plaintiff complains, moreover, fall into well-defined exceptions to the antitrust laws. The regulatory actions of MDPH and CHPC-SEM alleged in the complaint are within the ambit of valid federal and state legislation, and as such are exempted from the antitrust laws under the "state action" defense of *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*; Accord, *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)*. ***HN9***[] Legislation is not invalid merely because it may have an anticompetitive effect; otherwise, "the States' power to engage in economic regulation would be effectively destroyed." *Exxon v. Governor of Maryland, 437 U.S. 117, 133, 98 S. Ct. 2207, 2218, 57 L. Ed. 2d 91 (1978)*. "Legislative bodies have broad scope to experiment with economic problems . . . ." *Ferguson v. Skrupa, 372 U.S. 726, 730, 83 S. Ct. 1028, 1031, 10 L. Ed. 2d 93 (1963)*. Moreover, "the right to conduct a business, or to pursue a calling, may be conditioned. . . . (Statutes) prescribing the terms upon which those conducting certain businesses may contract, **[**27]** or imposing terms if they enter into agreements, are within the state's competency." *Nebbia v. New York, 291 U.S. 502, 528, 54 S. Ct. 505, 512, 78 L. Ed. 940 (1934)* (footnotes omitted); Accord, *New Motor Vehicle Board, supra, 439 U.S. at 96, 99 S. Ct. 403, 58 L. Ed. 2d 361*.

Plaintiff has vigorously attacked the state Certificate of Need process because it excludes new entrants into the **[*1312]** hospital field for the benefit of existing hospitals. Yet this is exactly what the state regulatory scheme demands. Defendants are not relieved of liability because of their status as public bodies but rather because they are acting pursuant to the state's mandate in restricting entry of new health care providers. The legislative history of the Congressional enactments at issue unequivocally supports defendants' contention that state regulation of health care facilities is explicitly exempted from the reach of the antitrust laws. The express policy of one of the relevant statutory provisions, the National Health Planning and Resources Development Act of 1974, Pub.L. No. 93-641, *42 U.S.C. § 300k Et seq.*, is to effect "equal access to quality health care at a reasonable cost" as a priority **[**28]** of the federal government. *42 U.S.C. § 300k(a)(1)*. Specifically, the Senate Committee Report on the bill stated, as a reason for instituting the legislation,

> The need for strengthened and coordinated planning for personal health services is growing more apparent each day. In the view of the Committee the health care industry does not respond to classic marketplace forces. The highly technical nature of medical services together with the growth of third party reimbursement mechanisms act to attenuate the usual forces influencing the behavior of consumers with respect to personal health services. For the most part, the doctor makes purchasing decisions on behalf of the patient and the services are frequently reimbursed under health insurance programs, thus reducing the patient's immediate incentive to contain expenditures.

S.Rep. No. 93-1285, 93d Cong., 2d Sess., Reprinted in (1974) U.S.Code Cong. & Admin.News, pp. 7842, 7878 (emphasis added). See generally *American Medicorp, Inc. v. Humana, Inc., 445 F. Supp. 589, 592-93 (E.D.Pa.1977)* (history of the legislation as response to the spiralling cost of health care delivery). The activities covered by the 1974 Act were **[**29]** thus recognized as being outside the rationale and scope of the antitrust laws. One of the sponsors of the Act explained:

> Although Public Law 93-641 contains no specific exemption from the antitrust laws, an analysis of the activities required of HSA's (Health Systems Agencies, regional state boards established under *42 U.S.C. § 300L* -1 Et seq., such as CHPC-SEM) and providers indicates that Congress sanctioned actions which might otherwise be in violation of our antitrust laws. The intent of Congress was that HSA's and providers who voluntarily work with them in carrying out the HSA's statutory mandate should not be subject to the antitrust laws. If they were, Public Law 93-641 simply could not be implemented.

124 Cong.Rec. Hll, 963 (daily ed. Oct. 10, 1978) (remarks of Rep. Rogers) (emphasis added). Thus the Congress in authorizing state hospital planning agencies intended a partial repeal of the antitrust laws. In requiring the inclusion of current providers as members of planning agencies, and directing the planning agencies to restrict the building of unnecessary beds so that existing hospital beds would be more fully utilized, the inevitable effect is to restrict **[**30]** or restrain competition. It is, in fact, precisely the competition of the free market which the Congressional purpose seeks to check. Plaintiff admitted in oral argument that Congress intended some implied repeal of the antitrust laws in this respect but urges that it was only to permit a restriction on the total number of beds allowed in a geographic area, so that there should be free competition to supply those beds. Plaintiff fails, however, to suggest how this is to be done.

Further, the alleged conspiracy falls within ***HN10***[] the Noerr-Pennington doctrine, *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*, and *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*, which protects attempts to influence governmental units and instrumentalities in order to obtain legislation, redress, or action favorable to particular interests. *Lamb Enterprises, Inc. v. Toledo Blade Co., 461 F.2d 506* ***[*1313]*** *(6th Cir.)*, Cert. denied, *409 U.S. 1001, 93 S. Ct. 325, 34 L. Ed. 2d 262 (1972)*. The doctrine does not protect affirmative attempts to block access to adjudicatory tribunals, I. e. "sham **[**31]** protests." *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*. Bribery of a public purchasing agent may constitute a violation of *§ 2(c)* of the Clayton Act, as amended by the Robinson-Patman Act, *15 U.S.C. § 13(c)*. *Id. at 513, 92 S. Ct. 609*. No such affirmative act is alleged by plaintiff. All of defendants' challenged actions were expressly designed to secure favorable administrative or judicial action. "Nothing could be clearer from the (Supreme) Court's opinion (in Noerr) than that anticompetitive purpose did not illegalize the conduct there involved." *Pennington, supra, 381 U.S. at 669, 85 S. Ct. at 1593*. Defendants' motive or intent in the alleged publicity is irrelevant for Sherman Act purposes, since "Noerr shields from the Sherman Act a concerted effort to influence public officials regardless of intent or purpose." *Pennington, supra, 381 U.S. at 670, 85 S. Ct. at 1593*. Hence both the Parker v. Brown state action defense and the Noerr-Pennington defense are called into play and dovetail where, as here, defendants sought only to secure favorable administrative action from a duly authorized agency of the state acting **[**32]** pursuant to valid federal and state economic regulation. In *New Motor Vehicle Board, supra*, it was contended that the state statute conflicted with the Sherman Act since by delaying the establishment of dealerships whenever competing franchisees protest, the scheme gives effect to privately initiated restraints on trade, and hence was invalid under *Schwegmann Bros. v. Calvert Distillers, 341 U.S. 384, 71 S. Ct. 745, 95 L. Ed. 1035 (1951)*. The Court answered

> that the (statute's) regulatory scheme is a system of regulation, clearly articulated and affirmatively expressed, designed to displace unfettered business freedom in the matter of the establishment and relocation of automobile dealerships. The regulation is therefore outside the reach of the antitrust laws under the "state action" exemption.

-- - U.S. at -- , *99 S. Ct. at 412*, Citing *Parker v. Brown, supra*; *Bates v. State Bar of Arizona, 433 U.S. 350, 97 S. Ct. 2691, 53 L. Ed. 2d 810 (1977)*; *City of Lafayette v. Louisiana Power & Light Co., supra.* Moreover, the Court held that Noerr-Pennington protects "(protesting) dealers who invoke in good faith their statutory right to governmental action in the form of **[**33]** a Board determination that there is good cause for not permitting a proposed dealership." -- - U.S. at -- , *99 S. Ct. at 412*. By contrast, *Hospital Building Co. v. Trustees of Rex Hospital, 425 U.S. 738, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976)*, relied on by plaintiff to bring its claim under the Sherman Act, is inapplicable on its facts and leaves the Parker v. Brown and Noerr-Pennington defenses intact for the instant defendants. In Hospital Building, a 49-bed community hospital owned by an out-of-state proprietary chain alleged that a second hospital and its administrators had conspired with a local health planning official and others in violation of the Sherman Act to delay and prevent the issuance of a state Certificate of Need in order to keep the plaintiff from relocating and expanding its facilities. The Court held that "since in this case the allegations fairly claim that the alleged conspiracy . . . (would) place "unreasonable burdens on the free and uninterrupted flow' of interstate commerce, they are wholly adequate to state a claim." *425 U.S. at 746, 96 S. Ct. at 1853*, Quoting *United States v. Employing Plasterers Ass'n, 347 U.S. 186, 189, 74 S. Ct. 452, 98 L.* ***[**34]*** *Ed. 618 (1954)*. However, the plaintiff in Hospital Building accused respondents and their co-conspirators of having "employed a series of bad-faith tactics, including the bringing of frivolous litigation, to block the implementation of the expansion." *425 U.S. at 741, 96 S. Ct. at 1850*. The reason why those allegations fairly claim an unlawful conspiracy, and the present ones do not, is in significant part because the former charge activities falling squarely within the "mere sham" exception to the Noerr-Pennington rule. Noerr, supra, 365 U.S. at 144, 81 S. Ct. **[*1314]** 523. The exception applies to the use of administrative or judicial processes where the purpose to suppress competition, by depriving competition of meaningful access to the agencies and courts, is evidenced by repetitive lawsuits bearing the hallmark of insubstantial claims. Otter Tail Power Co. v. United States, 410 U.S. 366, 380, 93 S. Ct. 1022, 35 L. Ed. 2d 359 (1973); Trucking Unlimited, supra, 404 U.S. at 512-13, 92 S. Ct. 609. Such was the complaint in Hospital Building; instant plaintiffs, however, do not impute "mere sham" proceedings to defendants and plaintiff has in fact been able to pursue its claims **[**35]** in every tribunal available under the appropriate statutes.

Plaintiff, both in its Brief in Opposition to Defendants' Motion to Dismiss and in oral argument, relies on Duke & Co., Inc. v. Foerster, 521 F.2d 1277 (3d Cir. 1975), for the proposition that joint conduct (favoring defendants) is not immunized under the Noerr-Pennington doctrine where members of the alleged conspiracy include public officials. Plaintiff cites Duke as follows:

> Both Noerr and Pennington involved suits against Private parties who had allegedly conspired to influence governmental action. In neither case was it alleged that the governmental entity had collaborated to promote the conspiracy. Where the complaint goes beyond mere allegations of official persuasion by anti-competitive lobbying and claims official participation with private individuals in a scheme to restrain trade, the Noerr-Pennington doctrine is inapplicable.

521 F.2d at 1282, Quoted in Plaintiff's Opposition Brief at 36 (emphasis added by plaintiff). However, on the developed facts Duke is distinguishable because the acts taken by members of CHPC-SEM and MDPH were within the bounds of the state's enacting legislation; Noerr-Pennington **[**36]** would be inapplicable if, pursuant to a conspiracy, the relevant members took action inconsistent with their roles in the state's health care regulatory scheme, hence outside Parker v. Brown immunity as well. (The Noerr-Pennington rule was extended to attempts to influence administrative agencies and judicial proceedings in Trucking Unlimited, supra.) This is the distinction of Duke made by Kurek v. Pleasure Driveway and Park District of Peoria, 557 F.2d 580, 593 (7th Cir. 1977):

> Nor is the fact that GSM combined or conspired with governmental officials dispositive, for both of Noerr's premises with respect to that point are undercut by the factual setting of this case. Our determination that the Park District and its officials had no state mandate or authority to engage in the activities attacked here necessarily reduces the applicability of the reasoning of Noerr to the degree it is based on the need of governmental units for citizen input in making decisions that Parker holds to be outside the scope of the Sherman Act. See Duke & Company, Inc., supra, 521 F.2d at 1282.

GSM were defendant concessionaires who outbid plaintiffs, former concessionaires, for the right **[**37]** to sell golf equipment and services on municipal golf courses; defendant Park District allegedly demanded 5% Of gross sales as concession fee and required, as a condition of concession renewal, that plaintiffs raise and fix their prices. Defendant Park District also allegedly used the threat of an award of a monopolistic license to GSM. The court held that Park District lacked a state mandate for state-action exemption purposes since it had substantially less than statewide jurisdiction and "(w)e simply see little sense in automatically treating as state mandates the activities of local governmental units when these activities may vary substantially from unit to unit and may be wholly lacking in any express or implied state authorization or command." 557 F.2d at 590. GSM in its role of successful bidder for the concessions could not be found liable under the antitrust laws, since "successful bidding does not violate the antitrust laws substantively," 557 F.2d at 592. Thus in Duke, in the paragraph just preceding that cited by plaintiff, the court stated:

> Defendants contend that Noerr-Pennington immunity covers a state governmental entity which "listens to anti-competitive pleas." **[**38]** Doubtlessly this proposition **[*1315]** is correct so long as the public body acts within its legal discretion and in what it considers the public interest. . . .

521 F.2d at 1282. Similarly, in Metro Cable Co. v. CATV of Rockford, Inc., 516 F.2d 220 (7th Cir. 1975), defendant obtained the first granted cable television license in a city and successfully induced the city council not to license a

potential competitor. The Seventh Circuit Court of Appeals found that Noerr foreclosed antitrust liability. At 516 F.2d at 230, the court said:

> In the case at bar, the allegations on the basis of which the defendant mayor and alderman are said to have been co-conspirators are that they were persuaded by two members of the public, who are also defendants, to support the CATV application and to oppose plaintiff's application, and that they were given campaign contributions "in exchange," for this undertaking. These allegations do not take the case outside the protection of the Noerr doctrine. Plaintiff's position is in essence that an agreement to attempt to induce legislative action is a "conspiracy," and that if some of the "conspirators" persuade a member of the legislative **[**39]** body to agree to support their cause, he becomes a "co-conspirator" and a Sherman Act violation results. Such a role would in practice abrogate the Noerr doctrine. It would be unlikely that any effort to influence legislative action could succeed unless one or more members of the legislative body became such "co-conspirators." . . . Nothing in the Noerr opinion or any other case of which we are aware suggests any reason for believing that Congress, not having intended the Sherman Act to apply to combined efforts to induce legislative action, did intend the Act to apply if a member of the legislative body agreed to support those efforts.

Even a valid governmental decision made at least partially on the basis of personal or political considerations (Cf. instant plaintiff's allegations of personal animosity toward Dr. Trepel) is immune from antitrust liability:

> local government units such as city councils and county boards are seldom completely free from personal interest and outside influences, but the Sherman Act was not intended to regulate this type of activity. There is support for this view in that Noerr . . . holds that so long as the official's action is itself **[**40]** lawful, the action is without the scope of the federal antitrust laws, even if the motive for the action was a personal one.

Sun Valley Disposal Co. v. Silver State Disposal Co., 420 F.2d 341, 342 (9th Cir. 1969).

It will be seen that Noerr-Pennington immunity presupposes Parker v. Brown immunity: ***HN11***[↑] if the governmental or agency action is valid as under state authority (despite anticompetitive effects), then seeking to influence the action and a successful outcome are also exempt. Conversely, for a Noerr defense to be valid, the parties induced must be public, as opposed to private, entities and legitimately acting as such. To the extent that Noerr immunity is based on the *First Amendment* right to petition, *Noerr, supra, 365 U.S. at 137-38, 81 S. Ct. 523*, *Trucking Unlimited, supra, 404 U.S. at 510-11, 92 S. Ct. 609*, it is the right to petition the Government that is involved.

> Since the governmental actions of the city council and its committees were not themselves subject to the Sherman Act, the same was true under Noerr of concerted efforts to induce those governmental actions, even though those efforts had the anticompetitive purpose and effect alleged by plaintiff, **[**41]** if those efforts were genuinely aimed at inducing the governmental actions and were not a pretext for inflicting on plaintiff an injury not caused by any governmental action.

Metro Cable, supra, 516 F.2d at 229.

III. Violation of State Law vis-a-vis violation of Federal ***Antitrust Law***

Plaintiff's argument in open court that by violating the state regulatory scheme the defendants have thereby violated as well the federal antitrust laws is likewise faulty. ***HN12***[↑] A violation of a state law **[*1316]** (assumed here arguendo), albeit a regulatory scheme affecting commercial activity, is not by that fact alone a violation of the federal antitrust statutes, Cf. *Sun Valley, supra, 420 F.2d at 343*:

> A plaintiff cannot, by charging a conspiracy, turn what is basically a claim of violation of state law into a federal antitrust case. This conclusion finds support in the general reluctance of the federal courts to act before state remedies have been exhausted where there is adequate state review.

As the Supreme Court stated in *Apex Hosiery Co. v. Leader, 310 U.S. 469, 512, 60 S. Ct. 982, 1002, 84 L. Ed. 1311 (1940)* (labor violence during a strike):

> the Sherman Act was not enacted **[**42]** to police interstate transportation, or to afford a remedy for wrongs, which are actionable under state law, and result from combinations and conspiracies which fall short, both in their purpose and effect, of any form of market control of a commodity, such as to "monopolize the supply, control its price, or discriminate between its would-be purchasers." (Quotation from *United Leather Workers v. Herkert Co., 265 U.S. 457, 471, 44 S. Ct. 623, 68 L. Ed. 1104 (1924)*.)

Similarly, in *Hunt v. Crumboch, 325 U.S. 821, 826, 65 S. Ct. 1545, 1548, 89 L. Ed. 1954 (1945)* (union refusal to deal with a certain trucker, forcing him out of business) the Supreme Court said of the Sherman Act:

> That Act does not purport to afford remedies for all torts committed by or against persons engaged in interstate commerce.

Accord, *Larry R. George Sales Co. v. Cool Attic Corp., 587 F.2d 266, 272 (5th Cir. 1979)*. In the leading Sixth Circuit case, *Ace Beer Distributors, Inc. v. Kohn, Inc., 318 F.2d 283 (6th Cir.)*, Cert. denied, *375 U.S. 922, 84 S. Ct. 267, 11 L. Ed. 2d 166 (1963)*, the Court of Appeals affirmed the dismissal of a Sherman Act complaint charging that plaintiff's competitor had **[**43]** maliciously persuaded plaintiff's supplier to terminate plaintiff as a distributor in order to obtain the business for himself, I. e., the common law tort of malicious interference with contract. At 318 F.2d at 286 the Court of Appeals said:

> Whether a right of damages exists in some other action based on breach of contract or tort, is not before us in this case. Whether a cause of action exists under the antitrust laws is the sole issue in this case. In that connection it is well settled that ***HN13***[] tortious conduct against one engaged in interstate commerce or which has an effect on interstate commerce does not automatically constitute a violation of the Sherman Act.

Perhaps the clearest explanation of the distinction between federal antitrust and state common law violations is offered by *Judge Talbot Smith in B & B Oil & Chemical Co. v. Franklin Oil Corp., 293 F. Supp. 1313, 1317 (E.D.Mich.1968)*:

> The attempt is frequently made, with respect to the cases involving termination of dealerships (partially the allegation here, in effect), to employ the antitrust acts as a policing measure. . . . Usually the acts are such as to conceivably come within the ambit of state laws **[**44]** relating to what we may term generically unfair competition (lack of proper notice of termination, pirating of employees, taking over favored accounts, and similar activities). But the antitrust acts do not purport to formulate a code of business morality. They are not tablets of stone for the conduct of business generally. They are directed at one aspect of business life and one only: the preservation of free competition.

Here, of course, even the rationale of free competition is undercut since the state-action (Parker) and petition (Noerr) defenses operate on the instant facts to remove possible violation of free competition as a relevant legal consideration. Hence the alleged conspiracy is not violative of federal antitrust legislation, and it is not here appropriate to decide whether a state or common law rule has been violated.

Accordingly, defendants' motions for summary judgment will be GRANTED.

IT IS SO ORDERED.

Torts > Vicarious Liability > Agency Relationships > General Overview

HN4[] **Elements, Application of Agency Law Principles**

An agent who does an act otherwise a tort is not relieved from liability by the fact that he acted at the command of the principal or on account of the principal. Applied to corporations, this rule of agency law means that an officer or director is, in general, personally liable for all torts which he authorizes or directs or in which he participates, notwithstanding that he acted as an agent of the corporation and not on his own behalf. Courts have, however, consistently stated that a corporate executive will not be held vicariously liable, merely by virtue of his office, for the torts of his corporation. The few antitrust decisions considering this issue have also underscored the need for participation in the tort by the executive. Participation may be found not solely on the basis of direct action but may also consist of knowing approval or ratification of unlawful acts.

Business & Corporate Law > ... > Duties & Liabilities > Unlawful Acts of Agents > General Overview

Business & Corporate Law > ... > Management Duties & Liabilities > Causes of Action > Negligent Acts of Directors & Officers

HN5[] Duties & Liabilities, Unlawful Acts of Agents

Approval or ratification must be of acts or conduct which are inherently unlawful. Specific direction or sanction of, or active participation or cooperation in, a positively wrongful act of commission or omission which operates to the injury or prejudice of the complaining party is necessary to generate individual liability in damages of an officer or agent of a corporation for the tort of the corporation.

Business & Corporate Law > ... > Duties & Liabilities > Unlawful Acts of Agents > General Overview

HN6[] Duties & Liabilities, Unlawful Acts of Agents

Business & Corporate Law > ... > Corporate Finance > Initial Capitalization & Stock Subscriptions > Undercapitalization

Torts > Vicarious Liability > Corporations > Subsidiary Corporations

Torts > Vicarious Liability > Corporations > General Overview

HN7[] Initial Capitalization & Stock Subscriptions, Undercapitalization

A parent corporation is not liable for its subsidiaries' acts simply because the parent owns all the stock of the subsidiaries and shares common officers and directors. The evidence would have to show that the subsidiary was a mere instrumentality of the parent, indicated by such facts as inadequate capitalization, absence of independent activity, action in the interest of the parent rather than the subsidiary, and failure to observe the legal requirements of separate corporate existence.

Antitrust & Trade Law > Sherman Act > General Overview

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

Antitrust & Trade Law > Regulated Industries > Communications > Sherman Act

HN8[] Antitrust & Trade Law, Sherman Act

Antitrust law is concerned with the concerted action of distinct economic entities. Agreements must be judged in the light of the purpose of the antitrust laws to prevent restraints on competitive economic behavior. Because an agreement between a corporation and its employees does not restrain competition, it cannot form the basis for a conspiracy claim under the Sherman Act, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Labor & Employment Law > Wage & Hour Laws > Statutory Application > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN9[] **Scope, Exemptions**

The Supreme Court held that the labor exemption of the Sherman Act, *15 U.S.C.S. § 17* applies to agreements and restrictions which like wages, and unlike prices, are intimately related to wages, hours and working conditions.

Antitrust & Trade Law > Sherman Act > General Overview

HN10[] **Antitrust & Trade Law, Sherman Act**

The Supreme Court has repeatedly stated that common ownership and control of corporations will not insulate them against antitrust liability. On the other hand, the mere fact that commonly owned and controlled companies follow common policies does not give rise to antitrust liability. ***Antitrust law*** is concerned with the concerted action of distinct economic entities. It is when commonly owned and controlled corporations conduct themselves as distinct economic entities in the market that they become subject to antitrust constraints against concerted action which inhibits that conduct.

Antitrust & Trade Law > Sherman Act > General Overview

Torts > ... > Concerted Action > Civil Conspiracy > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

Commonly owned or controlled corporations may be held to be guilty of conspiracy under *15 U.S.C.S. § 1* only if the evidence shows their agreement or common action to lack a legitimate business purpose and to have an anticompetitive effect. An agreement or common action arising out of or inherently connected with the common ownership or control of the corporations normally would serve a legitimate business purpose. On the other hand, extraneous restraints producing anticompetitive effects imposed upon commonly owned or controlled corporations holding themselves out to be competitors in the market are evidence from which a jury may find a *§ 1* violation.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN12[] **Practices Governed by Per Se Rule, Boycotts**

The policy of refusing to work with competitors did not amount to a boycott because there was no refusal to deal, concerted or otherwise. Nor is that policy equivalent to a tying arrangement because separate products or services were not involved.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN13[] **Private Actions, Remedies**

Once it established with reasonable probability the existence of some causal connection between defendant's wrongful act and some loss of anticipated revenue the jury will be permitted to make a just and reasonable estimate of the damage based on relevant data, and render its verdict accordingly.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN14[] **Private Actions, Remedies**

While a plaintiff need not negative all possible alternative explanations for his decline in profits, there must be proof of some damage flowing from the unlawful conspiracy.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN15[] **Private Actions, Remedies**

To meet the minimum requirement of proof in a market exclusion case in which lost profits are sought, plaintiff must normally produce evidence falling into one of the following categories: (1) Comparison of plaintiff's performance before and after the wrongful conduct under otherwise similar conditions; (2) Comparison of performance in restrained and unrestrained markets which are otherwise comparable; or (3) Loss of specific business or customers.

Opinion

[*846] MEMORANDUM OPINION AND ORDER ON MOTIONS FOR JUDGMENT NOTWITHSTANDING THE VERDICT AND FOR NEW TRIAL

Plaintiff charges defendants with having violated *Sections 1* and *2* of the Sherman Act (*15 U.S.C. §§ 1*, *2*) and *Section 17045 of the California Business and Professions Code*. [1] After 28 days of trial and 5 days of deliberation,

[1] *Section 17045* prohibits the making of secret payments to the injury of competitors where such payments tend to destroy competition. Both plaintiff in its complaint and defendants in their counterclaim complained of violations. The jury declined to

the jury returned a verdict awarding plaintiff damages aggregating $ 700,000. Defendants have moved for judgment notwithstanding the verdict or alternatively for a new trial.

[2]** I. The Factual Background

The relevant facts established at the trial may be summarized as follows. Defendants Shipowners & Merchants Towboat Co., Ltd. ("Red Stack") and Bay Cities Transportation Company ("Bay Cities") have for many years been engaged in ship assisting and ship towing on San Francisco Bay and its tributaries. Although until recently a small percentage of Red Stack's capital stock was held by outsiders, both companies have at all material times been substantially owned and controlled, directly or indirectly, by the Crowley family. Major decisions by the management of either company have required the approval of defendant Thomas B. Crowley, who was the principal officer of each of the companies. Beginning about 1973, Crowley Maritime Corporation ("Crowley Maritime") became the holding corporation of these companies and gradually **[*847]** undertook to provide various administrative services. So far as the record shows, however, it engaged in no operations and performed no acts relevant to the matters at issue.

Plaintiff Murphy Tugboat Company ("Murphy") entered the ship assist business on San Francisco Bay about October 1971 with a single tug. It remained in business, **[**3]** acquiring additional tugs, until September 1975 when ship assist operations were discontinued.

Ship assist work consists of providing tugs to aid vessels in docking or undocking. Vessels are docked or undocked in a variety of ways, depending on their size and configuration, tide and weather conditions, the qualifications of the master or pilot, and other circumstances. They may or may not employ an inland pilot to assist in docking or undocking, and they may choose to dock or undock without tugs or with the aid of one or more tugs.

In addition to assisting vessels in docking or undocking, tugs from time to time perform so-called flat tows, i. e., shifting vessels not under power between locations on the Bay.

Murphy entered the ship assist business about 18 months following the end of a six-months tug strike which had idled Red Stack and Bay Cities. During that strike, other companies had entered the ship assist business in the area, including Murphy-Pacific Marine Salvage Corporation, which had acquired the use of some seven tugs. Roger Murphy, who subsequently organized and largely owned plaintiff Murphy Tugboat Company, headed the ship assist operations for Murphy-Pacific, which **[**4]** was also engaged in the construction and salvage business. After defendants resumed their operations, Murphy-Pacific began to suffer substantial losses in its ship assist operations and ultimately agreed to sell its tugs to the Crowley interests in June 1971. There is evidence which, although disputed by defendants, would have permitted the jury to find that as a part of that transaction Murphy-Pacific agreed to stay out of the ship assist business.

For some years prior to Murphy's entry into the ship assist business, Red Stack and Bay Cities had a policy of refusing, except in emergencies, to provide service to a vessel which was also being assisted by tugs of another company. Thus, if a vessel had arranged for ship assist services with another tugboat company, and more tugs were required for the job than that company could furnish, Red Stack and Bay Cities would decline to furnish the additional tugs to work with the tug of the other company. Defendants gave as a reason for the policy the hazards of divided responsibility in ship handling. Other Crowley controlled companies operating in Los Angeles harbor and Puget Sound, and other tugboat companies operating in New York harbor, **[**5]** did not adhere to such a policy.

During the period at issue, Red Stack and Bay Cities performed not less than 70 percent of the tug-assisted docking and undocking on San Francisco Bay (excluding military and other proprietary operations). The services of these companies were offered under two different tariffs. Bay Cities, operating smaller tugs, served primarily smaller vessels (i. e., less than 14,000 net tons). It charged a flat rate per tug, plus overtime. Red Stack, operating

---

award damages to either party. Inasmuch as no party has taken exception to this part of the verdict, the Court will not consider this phase of the case.

larger, more powerful tugs, generally served the larger vessels. Its charges were computed under a grid tariff which took into account the size of the vessel and the length of the ship assist move and generally produced higher charges.

The thrust of Murphy's case at trial was that defendants' policy of refusing to work with competitors effectively excluded it from the large vessel segment of the ship assist market, where most of the demand for multi-tug jobs arose. There was evidence from which the jury could find that potential customers were deterred from hiring a Murphy tug by the knowledge that if the need for additional tugs arose during the operation, defendants would not provide them.

Murphy contended **[**6]** that but for defendants' exclusionary practice, its share of the large vessel market would have been equal **[*848]** to the 28 per cent share it held of the small vessel market. In that event, it would have been able either to raise its rates or increase its volume substantially, resulting in additional revenue which it claimed would have eliminated the operating losses plaintiff incurred between 1972 and 1976.

Murphy also charged that Red Stack had entered into an unlawful conspiracy with the Red Stack pilots' association to fix the fees collected by Red Stack masters for pilotage services rendered by them on Red Stack jobs. Red Stack had for many years offered pilot services along with ship assist services; it was able to do so because the masters of its tugs were licensed inland pilots, and its tugs had five men crews. When Red Stack tugs assisted a vessel, the master of one of the tugs would, at the vessel's request, go on the bridge and serve as pilot. While Red Stack made no extra charge for this service, the master/pilot collected a fee from the vessel. The amount of that fee was set by agreement between Red Stack and the association. During the relevant time, the fee varied, **[**7]** depending on the specific job, but it was always considerably less than the fees charged by independent pilots. Murphy contended that the Red Stack pilots' agreement, by holding down the pilotage component of the package cost of using Red Stack's service, made it necessary for Murphy to hold down its tug charges so that the combined charge for the Murphy Tug-independent pilot package would remain competitive. As a result, Murphy claimed, it lost revenue which it would have realized had it been able either to raise its charges or to attract more jobs by reason of a greater price differential.

Murphy's damage proof consisted of evidence of its operating losses (reflected on its federal income tax returns) for the four fiscal years ended August 31, 1972, 1973, 1974 and 1975, as well as the loss suffered during fiscal 1976 following the shutdown of its operations. These losses totaled $ 490,936. In addition, Murphy computed its lost profits for the five succeeding years by applying to its average annual gross revenue of $ 435,928 the lowest net profit ratio experienced by Bay Cities during this period 8.2 percent. This resulted in a hypothetical annual profit of $ 35,756, or $ 178,730 **[**8]** for the five-year period. The total amount of damages claimed was $ 669,666. The jury awarded damages for violation of *Section 2* aggregating $ 700,000, assessed as follows:

$ 160,000 against Red Stack,
80,000 against Bay Cities,
180,000 against Crowley Maritime Corp., and
180,000 against Thomas B. Crowley.

In addition, the jury awarded $ 100,000 against Red Stack for violation of *Section 1* by reason of the Red Stack pilots' agreement. No verdict was reached on the remaining conspiracy claims. (See Exhibit A, attached.)

II. The Standard of Review

HN1[] Defendants' motion for judgment n. o. v. is governed by the same standards as a motion for directed verdict. The Court is bound to view the evidence in the light most favorable to the non-movant, drawing all permissible inferences in its favor. If, by that standard, there is substantial evidence to support a finding by a reasonable jury, the motion must be denied. *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 696, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*; *Autohaus Brugger, Inc. v. Saab Motors, Inc., 567 F.2d 901, 909* (9th Cir.), Cert. denied, *436 U.S. 946, 98 S. Ct. 2848, 56 L. Ed.* ***[**9]*** *2d 787 (1978)*.

The foregoing standard is applicable to the issues on which the jury returned a verdict for plaintiff (monopolization, attempt to monopolize, the Red Stack pilots' agreement as a violation of *Section 1*, and damages). With respect to those issues on which the jury failed to reach agreement (other violations of *Section 1* and conspiracy to monopolize), defendants' motion will be treated as one for a directed verdict governed by the same standard.

III. Monopolization and Attempt to Monopolize

A. Liability of Bay Cities and Red Stack

1. Monopolization

HN2[] To establish the offense of monopolization, plaintiff must prove (1) possession **[*849]** of monopoly power in the relevant market and (2) the willful acquisition or maintenance of that power. *United States v. Grinnell Corp., 384 U.S. 563, 570-71, 86 S. Ct. 1698, 16 L. Ed. 2d 778 (1966)*. The relevant geographic market is the area of effective competition defined in terms of where buyers can turn for alternative sources of supply. *Moore v. Jas. H. Matthews & Co., 550 F.2d 1207, 1218 (9th Cir. 1977)*. The relevant product market consists of commodities or services reasonably interchangeable by consumers for the same purpose. **[**10]** *United States v. E. I. du Pont de Nemours & Co., 351 U.S. 377, 395, 76 S. Ct. 994, 100 L. Ed. 1264 (1956)*.

There is no serious dispute that the relevant geographic market must be confined to San Francisco Bay, and the record would permit no different finding. To bring tugboats into the Bay to perform particular jobs would be prohibitive in terms of both money and time. The boundaries of the Bay for this purpose may not be clearly established i. e., it may or may not be feasible, in view of the running time, to perform San Francisco-Oakland jobs with tugs based as far away as Benicia but in view of defendants' overwhelming share of the ship assist business on the Bay, regardless how delineated, further refinement is unnecessary.

Defendants argue that the product (or service) market must include doing without commercial tug service, i. e., docking or undocking without tugs or with the use of inhouse tugs. The alternative of doing without is present in the market for virtually every product or service, except perhaps air or water. The readiness with which consumers will resort to the alternative is a function of the relationship of demand to supply, an element of every market. Thus, **[**11]** demand for a product or service may be more or less elastic, depending on circumstances. The degree of elasticity, however, does not aid in defining the limits of the product or service market in terms of reasonable alternatives; it is more properly taken into account in determining the degree of monopoly power possessed by the supplier once the market has been defined.

Defendants also seek to include jobs performed by tugs operated by the Navy and by the Standard Oil Company. Inasmuch as these tugs during the relevant period served only vessels operated by the Navy and Standard Oil, respectively, and were not available to serve the public, they did not offer an alternative source of ship assist services. The market must therefore be limited to commercial ship assist jobs. See *SmithKline Corp. v. Eli Lilly & Co., 575 F.2d 1056, 1063 (3rd Cir. 1978)*.

There was evidence from which the jury could find that defendants' share of the market based on revenue exceeded 80 percent. In addition, according to defendants' own contemporary records, between 1971 and 1975 Bay Cities and Red Stack together performed over 70 percent of the commercial ship assist jobs, even if so-called no tug jobs **[**12]** are included. No competing firm ever performed more than 15 percent of the jobs. Given the size of defendants' market share, there was substantial evidence to sustain a finding that defendants together possessed the power to exclude competition or control prices, [2] and hence monopoly power in the relevant market. [3] See United States v. du *Pont & Co., supra, 351 U.S. at 391, 76 S. Ct. 994*; *Greyhound Computer Corp., Inc. v.*

---

[2] There was, in addition, evidence that the rates charged by defendants were treated as the going rate and were followed by others performing ship assist services on the Bay.

[3] Inasmuch as Bay Cities and Red Stack were commonly owned and controlled, their market shares may reasonably be aggregated for purposes of determining whether they possessed monopoly power. The fact that they chose to behave as

International Business Machines Corp., 559 F.2d 488, 496 (9th Cir. 1977), Cert. denied, *434 U.S. 1040, 98 S. Ct. 782, 54 L. Ed. 2d 790 (1978)*; *United States v. Aluminum Co. of America, 148 F.2d 416, 424 (2nd Cir. 1945)*.

[13] [*850]** Defendants presented evidence from which it could be found that the demand for their services was relatively elastic. Thus, during the 1969-1970 strike, many vessels were docked and undocked without the use of tugs. After the strike, however, the use of tugs was resumed; the decline in the number of tug jobs in the post-strike period may have been attributable as much to the decline in shipping accompanying the wind-down of the Vietnam war as to vessels doing without tugs. Defendants also showed that bow thrusters, which improve vessel maneuverability and control, are being installed in increasing numbers, reducing the demand for tugs. All of this evidence could be considered by the jury but did not preclude a finding that defendants possessed the requisite monopoly power.

There remains the question whether defendants were guilty of willful acquisition or maintenance of that power. Defendants presented evidence reflecting the quality of their service and equipment and the large amount of goodwill gained by them over the years in support of the claim that, if defendants had monopoly power, it was the result of their superior service or business acumen. See *United States **[**14]** v. Grinnell Corp., supra, 384 U.S. 563, 86 S. Ct. 1698, 16 L. Ed. 2d 778*.

There was, however, abundant evidence to warrant the jury's rejection of that contention. Among other things, that evidence showed that the Crowley companies acquired the tugs of Murphy-Pacific Marine Salvage Corporation and a surplus tug put up for sale by Standard Oil Company although they considered this equipment inferior and had little if any use for it. There was evidence, albeit hotly disputed, that the purchase from Murphy-Pacific may have been accompanied by an agreement not to compete; certainly, the vigorous reaction of Crowley management to the appearance on the Bay of the Captain William, a 48-year-old, low-power tug which Roger Murphy had purchased shortly after the Murphy-Pacific sale, tends to confirm their expectation that no competition would appear from that quarter. [4]

[15]** The principal support for the jury's verdict is found in defendants' policy of refusing to work on ship assist jobs with the tugs of competitors except in emergencies. Defendants contended that this policy was a reasonable measure to assure that jobs would be performed safely and competently and to minimize their exposure to claims and litigation. The jury was entitled to weigh against that justification the evidence that neither the Crowley-controlled tugboat operations in Los Angeles harbor and Puget Sound nor other tugboat companies in New York harbor followed such a policy. There was, moreover, evidence that the tendency of the policy was to deter vessel owners, agents, and pilots from using plaintiff's tugs. In this connection, the evidence showed that shipowners and agents, knowing that defendants would not work on a job with Murphy tugs, were deterred from hiring Murphy, particularly for larger vessels requiring more tugs or where, because of tide or wind conditions, the possibility existed that additional tugs might have to be called in to assist. Since Murphy never had more than two large tugs in service, it lacked the capability to assure customers that its own equipment **[**16]** could meet whatever needs might arise in the course of the job. [5]

---

separate firms competing with each other in the market (See Part V. A. infra) does not eliminate the existence of Power derived from their combined market share by the person controlling their operations, regardless of whether it was exercised.

[4] Lester Bedient, then president of Bay Cities, cabled Thomas Crowley, who was on vacation in Switzerland, to report this event and advise that he would contact the union about it.

[5] From August 1971 to May 1972, Murphy Tugboat had only one small tugboat on the Bay. From May 1972 to June 1973, it had one large tug, one small tug, and another small tug for several months. From June 1973 to September-October 1974, it had in service on the Bay two large tugs, a small tug, and another small tug for three months. From October 1974 to April 1975, it had only one large tug on the Bay. From April 1975 to September 1975, when operations ceased, the company had one large tug and one small tug.

Thus, for the four years of its operation, Murphy Tugboat had two large tugboats for only one and one-half years. For approximately two years, it had only one large tug. For one-half year, it had only a small tug. Murphy had four vessels on the Bay (two large tugs and two small tugs) for only three months in 1973.

[*851] Defendants are, of course, under no legal duty to supply equipment to remedy plaintiff's deficiencies or to help **[**17]** it get jobs. Cf. *Scanlan v. Anheuser-Busch, Inc., 388 F.2d 918, 920-21* (9th Cir.), Cert. denied, *391 U.S. 916, 88 S. Ct. 1810, 20 L. Ed. 2d 654 (1968)*. Nor are they precluded from adopting reasonable practices to protect themselves against liability for the acts of others. But the policy pursued by defendants, whatever its business justification, also had anti-competitive effects. As already noted, prospective customers were deterred from employing Murphy by the knowledge that defendants would not supply tugs to assist on a Murphy job if needed. It is one thing for defendants to attract the business of customers by reason of their superior capacity to supply whatever tugs may be needed for a job. It is quite another, however, to reinforce their dominant market position by a restrictive rule against working on jobs on which competitors are employed. Given their market position, defendants were "precluded from employing otherwise lawful practices that unnecessarily excluded competition." *Greyhound Computer Corp. v. International Business Machines, supra, 559 F.2d at 498*.

This record amply supports the jury's verdict for plaintiff on the monopolization issue.

2. Attempt to Monopolize

[18]** ***HN3***[] An attempt to monopolize is established by proof that defendants, even if they failed to monopolize the market, nevertheless had a specific intent to monopolize and engaged in predatory conduct directed to accomplishing their unlawful purpose. *Moore v. Jas. H. Matthews & Co., supra, 550 F.2d at 1219*. Proof of specific intent can be supplied by inference drawn from proof of predatory or anticompetitive conduct which constitutes a restraint of trade. *Gough v. Rossmoor Corp., 585 F.2d 381, 389-90 (9th Cir. 1978)*; *Knutson v. Daily Review, Inc., 548 F.2d 795, 814-815 (9th Cir. 1976)*, Cert. denied, *433 U.S. 910, 97 S. Ct. 2977, 53 L. Ed. 2d 1094 (1977)*.

The evidence of defendants' practice of refusing to work on vessels with competitors, which the Court has found sufficient to support a finding of monopolization, coupled with the other evidence previously discussed raising an inference of intent to exclude competitors, is sufficient to support the verdict here. See *Janich Bros. Inc. v. American Distilling Co., 570 F.2d 848, 854 n. 4 (9th Cir. 1977)*, Cert. denied, *439 U.S. 829, 99 S. Ct. 103, 58 L. Ed. 2d 122 (1978)*.

B. Liability of Thomas B. Crowley and Crowley Maritime Corporation

[19]** 1. Thomas B. Crowley

It is undisputed that Thomas B. Crowley was at all material times defendants' chief executive officer with authority to exercise control over their operations. The Ninth Circuit has said that "(t)he individuals through whom a corporation acts and who shape its intentions can be held liable on a charge of attempted monopolization." *Tillamook Cheese & Dairy Association v. Tillamook County Creamery Association, 358 F.2d 115, 118 (9th Cir. 1966)*. But neither the facts of that case nor the decisions cited in support of this proposition disclose Under what circumstances an officer or a director may be held liable under the antitrust laws for his corporation's *Section 2* violation. [6]

[20]** **[*852]** Basic principles of tort and agency law provide the starting point for defining those circumstances. ***HN4***[] An agent "who does an act otherwise a tort is not relieved from liability by the fact that he acted at the

[6] Plaintiff's brief is of little assistance here. It relies primarily on *Lorain Journal Co. v. United States, 342 U.S. 143, 72 S. Ct. 181, 96 L. Ed. 162 (1951)*, and *Hartford-Empire Co. v. United States, 323 U.S. 386, 65 S. Ct. 373, 89 L. Ed. 322 (1945)*, both of which were government suits for injunctive relief and do not address the issue of liability for damages for past conduct. Plaintiff's contention that a treble damage judgment was subsequently rendered against both the corporate and individual defendants in the Lorain Journal litigation is apparently in error. See *Elyria-Lorain Broadcasting Co. v. Lorain Journal Co., 298 F.2d 356, 357 (6th Cir. 1961)* ("plaintiff radio station had begun a civil action for treble damages against the newspaper . . ."). In any event, there is no discussion whatever in the cited decisions of liability of officers or directors. Hartford-Empire, to the extent it has any bearing on the present issue, simply confirms the necessity of proof of participation by the individuals in acts constituting steps in the progress of the wrongful conduct. *323 U.S. 386 at 407, 65 S. Ct. 373, 89 L. Ed. 322*.

command of the principal or on account of the principal." *Restatement (Second) of Agency § 343* (1957). Applied to corporations, this rule of agency law means that "an officer or director is, in general, personally liable for all torts which he authorizes or directs or in which he participates, notwithstanding that he acted as an agent of the corporation and not on his own behalf." Ballantine, Corporations § 112 (rev. ed. 1946). Courts have, however, consistently stated that a corporate executive will not be held vicariously liable, merely by virtue of his office, for the torts of his corporation. *Tillman v. Wheaton-Haven Recreation Association, 517 F.2d 1141, 1144 (4th Cir. 1975)*; *Martin v. Wood, 400 F.2d 310, 313 (3d Cir. 1968)*; *Armour & Co. v. Celic, 294 F.2d 432, 439 (2d Cir. 1961)*. Personal liability must be founded upon specific acts by the individual director or officer. *Tillman v. Wheaton-Haven Recreation Association, supra, 517 F.2d at 1144*; *Davis H. Elliot* ***[**21]*** *Co. v. Caribbean Utilities Co., 513 F.2d 1176, 1182 (6th Cir. 1975)*. The few antitrust decisions considering this issue have also underscored the need for participation in the tort by the executive. *Higbie v. Kopy-Kat, Inc., 391 F. Supp. 808, 810 (E.D.Pa.1975)*; *Deaktor v. Fox Grocery Co., 332 F. Supp. 536, 542 (W.D.Pa.1971)*, *Aff'd, 475 F.2d 1112* (3d Cir.), Cert. denied, *414 U.S. 867, 94 S. Ct. 65, 38 L. Ed. 2d 86 (1973)*; *Bergjans Farm Dairy Co. v. Sanitary Milk Producers, 241 F. Supp. 476, 482 (E.D.Mo.1965)*, *Aff'd, 368 F.2d 679 (8th Cir. 1966)*.

Participation may be found not solely on the basis of direct action but may also consist of knowing approval or ratification of unlawful acts. E.g., *Donsco, Inc. v. Casper Corp., 587 F.2d 602 (3rd Cir. 1978)* (corporate officer arranged for the use and copying of materials constituting unfair competition); *Tillman v. Wheaton-Haven Recreation Association, supra, 517 F.2d 1141* (directors of the association promulgated and enforced a white-only membership policy); *Solo Cup Co. v. Paper Machinery Corp., 359 F.2d 754 (7th Cir. 1966)* (president of corporation, who arranged for the employment of plaintiff's former engineer and negotiated for the sale **[**22]** of machines in anticipation of the engineer's ability to duplicate plaintiff's machine, was liable to plaintiff for damages based on unfair competition); *Barry v. Legler, 39 F.2d 297 (8th Cir. 1930)* (officer had knowledge of misrepresentations made by agents under his control in connection with the sale of stock yet failed to act); *McCrea v. McClenahan, 131 App.Div. 247, 115 N.Y.S. 720 (Sup.Ct.1909)* (president of corporation personally converted plaintiff's chattels).

Such ***HN5***[] approval or ratification must, however, be of acts or conduct which are inherently unlawful. See, e.g., *Lobato v. Pay Less Drug Stores, Inc., 261 F.2d 406, 409 (10th Cir. 1958)* (emphasis added), where the court stated:

> "Specific direction or sanction of, or active participation or cooperation in, a Positively wrongful act of commission or omission which operates to the injury or prejudice of the complaining party is necessary to generate individual liability in damages of an officer or agent of a corporation for the tort of the corporation."

The principle is reflected in ***HN6***[] *Section 2343 of the California Civil Code*, which provides:

> "AGENT'S RESPONSIBILITY TO THIRD PERSONS. One who assumes to act as an agent **[**23]** is responsible to third persons as a principal for his acts in the course of his agency, in any of the following cases, and in no others:
> "1. When, with his consent, credit is given to him personally in a transaction;
> "2. When he enters into a written contract in the name of his principal, without believing, in good faith, that he has authority to do so; or
> "3. When his acts are wrongful in their nature." (emphasis added)

[*853] The application of this principle to cases in which Sherman Act liability is sought to be imposed for past conduct is supported by sound reasons, most recently explicated by the Supreme Court in *United States v. United States Gypsum Co., 438 U.S. 422, 98 S. Ct. 2864, 57 L. Ed. 2d 854 (1978)*. Although that case involved the imposition of criminal liability under the antitrust laws, the underlying policy considerations have a bearing as well on the civil liability of officers for corporate violations. After noting that "judicial elaboration of the Act (has not) always yielded the clear and definitive rules of conduct which the statute omits" and that "the behavior proscribed by the Act is often difficult to distinguish from **[**24]** the gray zone of socially acceptable and economically justifiable business conduct," *Id. at 438, 440, 98 S. Ct. at 2874, 2875*, the Court stated:

> "(W)here the conduct proscribed is difficult to distinguish from conduct permitted and indeed encouraged, as in the antitrust context, the excessive caution spawned by a regime of strict liability will not necessary (Sic, necessarily) redound to the public's benefit. The antitrust laws differ in this regard from, for example, laws designed to insure that adulterated food will not be sold to consumers. In the latter situation, excessive caution on the part of the producers is entirely consistent with the legislative purpose." *Id. at 442, 98 S. Ct. at 2876 n. 17*.

The generality of the Act's prohibition, the often uncertain line between proper and improper conduct, and the social interest in not deterring economically useful conduct by the imposition of excessive risks all of which the Supreme Court recognized in United States Gypsum make it appropriate to limit personal liability to cases of participation in inherently wrongful conduct. [7] The only reported cases involving the imposition of personal liability appear to be consistent. **[**25]** See *Bergjans Farm Dairy Co. v. Sanitary Milk Producers, supra, 241 F. Supp. 476* (individual corporate officers of the dominant dairy firm in the market held liable for violation of *Sections 1* and *2* where they knowingly participated in or approved a course of conduct which included predatory price reductions, payment and false reporting of secret rebates, pressuring customers to accept exclusive supply contracts and buying out those who would not cooperate); Kentucky-Tennessee *Light & Power Co. v. Nashville Coal Co., 37 F. Supp. 728 (W.D.Ky.1941)*, *Aff'd, 136 F.2d 12 (6th Cir. 1943)* (affirming denial of motion to dismiss charges of violation of Robinson-Patman Act against officer who accepted bribes from coal company to induce him to cause his corporation to make coal purchases).

[26]** The evidence of Thomas Crowley's conduct does not sustain a finding of participation in inherently wrongful conduct. His direct participation was limited to the purchase of the Murphy Pacific tugs which, even if coupled with a non-competition covenant, was not inherently wrongful. Cf. *California Business & Professions Code § 16601*; *Monogram Industries, Inc. v. Sar Industries, Inc., 64 Cal.App.3d 692, 134 Cal.Rptr. 714 (1976)*. While he must be assumed, as chief executive officer, knowingly to have approved or ratified the policy of refusing to work vessels with competitors, that policy also cannot be said to be inherently wrongful. It violates no per se prohibition (See p. 861 Infra), is supported by legitimate business considerations, and is simply evidence of monopolization or an attempt to monopolize when viewed in the light of all the surrounding facts and circumstances. In the absence of evidence of knowing approval of inherently wrongful acts, Thomas Crowley cannot be held personally liable for the corporate defendants' **[*854]** violation of *Section 2*. He is therefore entitled to judgment.

2. Crowley Maritime Corporation

Crowley Maritime became the holding company of Bay **[**27]** Cities and Red Stack sometime after 1973. It owned substantially all of their stock and shared common officers and directors with them. Its activities were substantially limited to providing computer and other corporate support services having no bearing on the matters in issue. There is no evidence that it engaged in any operations, let alone that it participated in any possibly unlawful practice or conduct.

Crowley Maritime can therefore not be held liable for having participated directly in the antitrust violations. If liability is to be imposed, it would have to be on the theory that Crowley Maritime is responsible for the acts of its subsidiaries. But ***HN7***[] a parent corporation is not liable for its subsidiaries' acts simply because the parent owns all the stock of the subsidiaries and shares common officers and directors. *Steven v. Roscoe Turner Aeronautical Corp., 324 F.2d 157, 161 (7th Cir. 1963)*; *Spears v. Transcontinental Bus System, 226 F.2d 94, 98 (9th Cir. 1955)*, Cert. denied, *350 U.S. 950, 76 S. Ct. 326, 100 L. Ed. 828 (1956)*; Annot., 7 A.L.R.3d 1343, 1350-51 (1966). The evidence would have to show that the subsidiary was a mere instrumentality of the parent, indicated by **[**28]** such facts as inadequate capitalization, absence of independent activity, action in the interest of the parent rather than

---

[7] That statement is not intended to suggest that proof of unlawful intent is necessary to impose civil liability on officers. Although that argument has been advanced by some commentators, See Whiting, Antitrust and the Corporate Executive (pt. I), 47 Va.L.Rev. 1938 (1965), Note, The Antitrust Laws and the Corporate Executive's Civil Damage Liability, 18 Vand.L.Rev. 1938 (1965), there is no warrant in the authorities previously discussed to impose a requirement which would in effect equate the standard of proof for civil and criminal liability.

the subsidiary, and failure to observe the legal requirements of separate corporate existence. *Steven v. Roscoe Turner Aeronautical Corp., supra, 324 F.2d at 161*; Annot., 7 A.L.R.3d 1343, *Supra, at 1354-55*. None of those factors is present here. On the contrary, Bay Cities and Red Stack were held out to be and acted as separate and independent operational and economic entities. (See Part V. A. Infra.)

Crowley Maritime is therefore entitled to judgment.

IV. The Red Stack Pilots' Agreement

A. Capacity to Conspire

The jury found the agreement between Red Stack and the pilots' association to be an agreement in unreasonable restraint of trade, presumably on the theory that it operated to fix the fees charged by Red Stack masters for performing pilot services. Assuming plaintiff to have standing under Section 4 of the Clayton Act, [8] the threshold question is whether the agreement falls within the ambit of *Section 1*.

[29]** The undisputed evidence establishes that an informal association of Red Stack masters was formed in 1946. The masters had been performing pilotage services for Red Stack customers for many years but had not received extra compensation for this service. About 1946, the Masters, Mates and Pilots Union, representing these masters, asked that they be permitted to charge a fee for providing this service. Red Stack agreed to a then pilotage fee of $ 5 or $ 10, **[*855]** depending on the move, to be paid by the vessel requesting the service, and it was in conjunction with this agreement that the association was formed.

The association collects the fees and disburses the proceeds. There is no evidence that it performs any significant additional functions other than to negotiate with Red Stack concerning the level of the fee to be charged.

HN8[] "***Antitrust law*** is concerned with the concerted action of distinct economic entities." *Knutson v. Daily Review, Inc., supra, 548 F.2d at 802*. Agreements must be judged in the light of the purpose of the antitrust laws to prevent restraints on competitive economic behavior. Because an agreement between a corporation and its employees does not restrain **[**30]** competition, it cannot form the basis for a conspiracy claim under *Section 1* of the *Sherman Act. Chapman v. Rudd Paint & Varnish Co., 409 F.2d 635, 643 n. 9 (9th Cir. 1969)*; *Morton Buildings of Nebraska, Inc. v. Morton Buildings, Inc., 531 F.2d 910, 917 (8th Cir. 1976)*; *Nelson Radio & Supply Co., Inc. v. Motorola, Inc., 200 F.2d 911, 914 (5th Cir. 1952)*, Cert. denied, *345 U.S. 925, 73 S. Ct. 783, 97 L. Ed. 1356 (1953)*. The agreement at issue here which is the raison d'etre of the association is one between a group of employees and their common employer concerning the amount of extra compensation they may collect from their employer's customers for rendering extra service to them during their regular working hours. It imposes no restraint on competitive or other independent economic activity of the association (which has no such purpose or function) [9] **[**31]** or its members. It must therefore be considered as being outside the ambit of *Section 1*. [10]

---

[8] Whether plaintiff, as a competitor of defendant Red Stack, has standing under the antitrust laws to attack an agreement between Red Stack and an association of its employees which has a tendency to place a ceiling on the price charged by Red Stack for the package of services it offers in competition with plaintiff is a matter not free from doubt. While plaintiff and defendants were engaged in the same "area of the economy," it does not follow that injury caused plaintiff by reason of a competitive advantage gained by defendants through an agreement controlling a component of the total price of their service is injury "by reason of anything forbidden in the antitrust laws." *15 U.S.C. § 15*; *In re Multidistrict Vehicle Air Pollution MDL No. 31, 481 F.2d 122, 125-29* (9th Cir.), Cert. denied, ***414 U.S. 1045, 94 S. Ct. 551, 38 L. Ed. 2d 336 (1973)***; See also *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 487-89, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. Plaintiff has cited no cases supporting recovery under Section 4 of the Clayton Act based on conduct by a competitor enabling him to price below plaintiff, and a court should be loath to entertain attacks on arrangements (not shown to have exclusionary effects) between persons who are not competitors the purpose of which is to lower the cost of goods or services to consumers. See generally *Murphy Tugboat Co. v. Crowley, 454 F. Supp. 847 (N.D.Cal.1978)*. In view of the disposition of this branch of the case, however, it is unnecessary to untangle this particular web; the court will therefore assume without deciding that plaintiff has standing.

[9] While plaintiff has at times contended that the Red Stack pilots' agreement somehow ran afoul of the prohibition against tying, there is no evidence whatever to support such an argument. Nothing in the record suggests that Red Stack required or even

B. Application of the Labor Exemption

The jury found that the agreement between Red Stack and the Red Stack pilots was not intimately related to the wages or working conditions of the members of the association as Red Stack employees and therefore not exempt.

The members of the association, all of whom were masters on Red Stack tugs, were employees of Red Stack. Their services as pilots were **[**32]** performed during the time when they were employed by Red Stack and the Red Stack tugs on which they worked were performing ship assist services on behalf of Red Stack for Red Stack customers. None of the services subject to the agreement was performed by the masters independently of their employment by Red Stack.

In *Local 189, Amalgamated Meat Cutters v. Jewel Tea Co., 381 U.S. 676, 689, 85 S. Ct. 1596, 1602, 14 L. Ed. 2d 640 (1965)*, ***HN9***[] the Supreme Court held that the labor exemption of the Sherman Act (*15 U.S.C. § 17*) applies to agreements and restrictions which "like wages, and unlike prices, (are) . . . intimately related to wages, hours and working conditions." In that case, the question involved a union demand that sales of meat by all markets be restricted to the hours of 9 a.m. to 6 p.m. The Court held that "the particular hours of the day . . . during which employees shall be required to **[*856]** work are subjects well within the realm of "wages, hours, and other terms and conditions of employment' about which employers and unions must bargain." *381 U.S. at 691, 85 S. Ct. at 1602*. It then went on to say:

> "And, although the effect on competition is apparent and real, perhaps **[**33]** more so than in the case of the wage agreement, the concern of union members is immediate and direct." Id.

Given that test, it is immaterial that, as plaintiff contends, the services performed by the masters as pilots may technically have been outside the scope of their employment. [11] The level of pilotage fees (whatever their effect on competition between Red Stack and independent pilots and tugs) being received in connection with the masters' employment clearly had an effect on their total compensation and hence was a matter of "immediate and direct" concern for them. That concern is borne out by the genesis of the agreement, which was the demand of the masters for permission to charge fees. Given such a demand upon their employer Red Stack, some agreement on the subject between the employer and a representative of the masters was virtually inevitable. That the employee

---

requested that its customers also use Red Stack masters as pilots; vessels were entirely free to use the (more expensive) services of independent pilots. Nor were Red Stack pilots precluded from rendering services outside working hours on whatever terms they might negotiate.

[10] Suppose the Red Stack pilots' agreement had simply prohibited the Red Stack pilots from charging for pilotage service performed while engaged in their duties as Red Stack employees. The result would have been to increase the price differential between the two packages to plaintiff's disadvantage. But could plaintiff complain of a rule imposed by an employer prohibiting his employees from collecting fees for themselves from his customers? Such an apparently reasonable restriction on one's employees would not seem to be an antitrust violation. If that is true, it is difficult to see how a more limited understanding with one's employees having a lesser impact on competitors could be found to be unlawful.

[11] Plaintiff points to a clause in the agreement stating that Red Stack shall not be liable for the acts of its employees when they are serving as pilots. But this clause is merely an attempt by Red Stack to relieve itself from liability; it does not change the essential fact that the pilotage services are furnished in connection with and as a result of the masters' employment by Red Stack. Moreover, the cases cited by plaintiff, even if relevant, do not support its contention that the masters are not acting within the scope of their employment when they perform pilotage services. *Bisso v. Inland Waterways Corp., 349 U.S. 85, 92-95, 75 S. Ct. 629, 99 L. Ed. 911 (1955)*; *Sun Oil Co. v. Dalzell Towing Co., 287 U.S. 291, 294-95, 53 S. Ct. 135, 77 L. Ed. 311 (1932)*; *United States v. SS President Van Buren, 490 F.2d 504-07 (9th Cir. 1973)*; and *California v. S/T Norfolk, 435 F. Supp. 1039, 1046-47 (N.D.Cal.1977)*, state no more than that for purposes of determining a vessel's liability, a pilot is considered the employee of the vessel he is navigating, not of the tug. That conclusion does not imply that the pilot cannot at the same time be viewed as acting within the general scope of his employment for purposes of applying the labor exemption especially where, as here, his pilotage is a direct result of his employment by the tug. Finally, plaintiff argues that the pilots' fees are not included in the W-2 statements issued by Red Stack and that the union's collective bargaining agreement does not discuss the pilotage work. But this contention, like plaintiff's other theories, ignores the totality of the circumstances of the Red Stack pilots' working conditions which give rise to the piloting services.

representative for this purpose is someone other than the regular collective bargaining representative and that the subject of the agreement is compensation collected from a third party does not diminish the immediate and direct concern of these employees in this aspect of their compensation. See *NLRB v. Harrah's **[**34]** Club, 403 F.2d 865, 873-75 (9th Cir. 1968)*; *Mitchell v. Gibbons, 172 F.2d 970 (8th Cir. 1949)*. Nor is the labor exemption rendered inapplicable by reason of any impact of the agreement on price. *American Federation of Musicians v. Carroll, 391 U.S. 99, 88 S. Ct. 1562, 20 L. Ed. 2d 460 (1968)*.

[35]** There is in this case the additional factor of the employer's legitimate concern that the activities of its employees while on the job, particularly the level of compensation collected by them from the employer's customers during the employees' working hours, should be regulated.

Under these circumstances, it must be concluded that the agreement is exempt as a matter of law.

C. Damages

The jury awarded plaintiff damages of $ 100,000 for injury caused by the Red Stack pilots' agreement.

The only damage evidence offered by plaintiff pertaining to this agreement consisted of Exhibit 608 and testimony by plaintiff's expert, Professor McFadden. Exhibit 608 showed that on ships over 14,000 tons, the average Red Stack package cost (i. e., the tug charge plus the pilotage fee as fixed by the agreement) was at all times twice as high or higher than the average package cost of using plaintiff plus the more expensive independent pilot. **[*857]** Even on the smaller vessels, the average Red Stack package cost substantially exceeded the average Murphy package cost at all times.

Inasmuch as plaintiff could therefore not argue that the relative magnitude of pilotage fees placed it under a **[**36]** competitive disadvantage, its theory, as articulated by Professor McFadden, was that had Red Stack permitted its pilots to charge more, Murphy could have increased its Tug charges by a similar amount, thus retaining the competitive price relationship while increasing its revenue. Alternatively, plaintiff could have maintained its charge and benefitted from the additional business attracted by the greater price differential. (R.T. 2405-06, 2410-11)

The logic of that theory, such as it is, rests on the assumption that whatever disadvantage was suffered by plaintiff flowed from the relatively higher pilotage fee of the independent pilots, i. e., Murphy's percentage share of the total package charge was reduced in proportion to the higher share represented by the pilots' fee. The cause of any loss, therefore, would be the differential between the total cost of using Red Stack and the total cost of using plaintiff. But if the independent pilots chose to maintain a level of fees that compelled plaintiff to maintain lower rates to be competitive, the resulting loss of revenue is not attributable to the Red Stack pilots' agreement. Thus, plaintiff has failed to prove "injury of the type the **[**37]** antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977)*. See also *Pacific Engineering & Production Co. of Nevada v. Kerr-McGee Corp., 551 F.2d 790* (10th Cir.), Cert. denied, *434 U.S. 879, 98 S. Ct. 234, 54 L. Ed. 2d 160 (1977)*; *Murphy Tugboat Co. v. Crowley, 454 F. Supp. 847 (N.D.Cal.1978)*.

Moreover, plaintiff has failed to offer any evidence from which the jury could have made a reasonable estimate of the amount of profit lost as a result of the agreement. Plaintiff's damage claim here was based on the theory that had the Red Stack pilot fees been increased, resulting in a relative increase in the Red Stack package cost over the cost of using plaintiff's tugs, plaintiff would have increased its revenue through higher rates or more jobs. That theory rests on a number of assumptions, none of which is supported by facts in the record, including the following: that in the absence of the agreement, the Red Stack pilots' fees would have been significantly increased; that had they increased, the independent pilots would not have increased **[**38]** their fees and plaintiff would have been able to increase its ship assist charges above the level of Bay Cities' competitive charges without loss of business; and that if plaintiff had instead maintained its charges unchanged and diverted substantial business, defendants would not have lowered their charges to meet the competition.

In a nutshell, plaintiff's damage theory is premised on a general increase in the price level for ship assist services as a result of which it would have increased its net revenue, either by charging more or by handling a greater volume. It is purely hypothetical, based on assumptions regarding competitive behavior which are wholly unrealistic and without any evidentiary support. Cf. *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., 416 F.2d 71, 85-88 (9th Cir. 1969)*, Cert. denied, *396 U.S. 1062, 90 S. Ct. 752, 24 L. Ed. 2d 755 (1970)*; See also *Gray v. Shell Oil Co., 469 F.2d 742, 749 (9th Cir. 1972)*, Cert. denied, *412 U.S. 943, 93 S. Ct. 2773, 37 L. Ed. 2d 403 (1973)* (" "By its own terms, Clayton Act recovery is available only where actual injury has been suffered.' ").

But even if all of these objections were overcome, there is no evidence **[**39]** at all from which the jury could have derived the amount of $ 100,000 as a reasonable estimate of the resultant revenue loss. From all that appears in the record, that figure was simply picked out of the air. [12]

[40]** **[*858]** For each of the foregoing separate and independent reasons, defendants are entitled to judgment on this claim.

V. The Conspiracy Charges Under *Sections 1* and *2*

A. Capacity to Conspire

The form of verdict submitted to the jury required it to find specifically whether defendants Red Stack, Bay Cities and Crowley Maritime, who had been charged with conspiracy in violation of both *Sections 1* and *2*, were legally capable of entering into such a conspiracy. The jury failed to reach a verdict on that issue and defendants have moved for judgment. [13]

Bay Cities and Red Stack are corporations which for many years have been substantially owned and controlled by the Crowley family. At some time after **[**41]** 1973, Crowley Maritime, a corporation wholly owned and controlled by the Crowley family, became the holding company for Bay Cities and Red Stack. Thomas Crowley succeeded his father sometime in the 1940's as chief executive officer of the Crowley companies and acted in that capacity during the period in issue. Each of the companies had its own management, but Mr. Crowley had the final authority in decisions affecting rates, equipment purchases, labor matters and operations.

At all material times, Red Stack and Bay Cities followed a common policy of refusing, except in emergencies, to work a vessel together with a competitor's tug. There is sufficient evidence to establish that the policy was discussed among the Crowley companies and was implemented by each in awareness of the fact that the other was doing the same.

Passing for the moment the question whether the Crowley policy constituted an unreasonable restraint of trade, the facts present a classic case of combination and conspiracy, unless the common ownership and control of the companies immunizes them against conspiracy liability.

HN10[] The Supreme Court has repeatedly stated that common ownership and control of corporations will **[**42]** not insulate them against antitrust liability. E.g., *United States v. Citizens & Southern National Bank, 422 U.S. 86, 116-17, 95 S. Ct. 2099, 45 L. Ed. 2d 41 (1975)*; *Perma Life Mufflers, Inc. v. International Parts Corp., 392 U.S. 134,*

---

[12] Although plaintiff in its brief claims that "the damage calculation for the customer boycott policy and the RSPA Agreement are entirely separate and cumulative," that is not the way in which plaintiff's case was presented to the jury. In his summation, counsel for plaintiff did not ask the jury to award damages discretely caused by that agreement. Instead, he treated that agreement as a part of defendants' exclusionary practices which caused plaintiff to lose jobs and revenue, for which loss he asked for aggregate damages of $ 669,666. (R.T. 4079-86, 4089-96) Inasmuch as the jury also awarded plaintiff damages for loss caused by defendants' exclusionary practices under *Section 2*, the instant award of $ 100,000 would in any case have to be struck as duplicative, requiring a new trial. Cf. *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 348, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*.

[13] The conspiracy claim against Thomas Crowley was previously dismissed on the ground that an officer is legally incapable of conspiring with the corporation by which he is employed. See *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., supra, 416 F.2d at 82-83*. See also Part IV. A. Supra.

141-42, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968); Timken Roller Bearing Co. v. United States, 341 U.S. 593, 598, 71 S. Ct. 971, 95 L. Ed. 1199 (1951); Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 215, 71 S. Ct. 259, 95 L. Ed. 219 (1951); United States v. Yellow Cab Co., 332 U.S. 218, 227, 67 S. Ct. 1560, 91 L. Ed. 2010 (1947). On the other hand, the mere fact that commonly owned and controlled companies follow common policies does not give rise to antitrust liability. As previously noted, "***antitrust law*** is concerned with the concerted action of distinct economic entities." *Knutson v. Daily Review, Inc., supra, 548 F.2d at 802*. It is when commonly owned and controlled corporations conduct themselves as distinct economic entities in the market that they become subject to antitrust constraints against concerted action which inhibits that conduct. *Id. at 802, n. 5* and cases cited. Cf. *Harvey v. Fearless Farris Wholesale, Inc., 589 F.2d **[**43]** 451 (9th Cir. 1979)* (intra-corporate **[*859]** conspiracy held not to exist where the decision not to deal with plaintiff was made by a single person, who was the stockholder, president, and chairman of the Board of the affiliated corporations, without participation of any other members of management of the corporations).

The evidence established that Bay Cities and Red Stack historically had separate managements, operated out of separate locations, conducted separate solicitation, used separate and different equipment, negotiated separate and different labor agreements, and charged under separate and different tariffs. As separate corporations, they had the benefits flowing from separate incorporation. They competed for the San Francisco Bay ship assist business, each offering services which differed somewhat in their cost and nature from those offered by the other. [14]

[44]** The question presented is whether corporations which are legally separate and conduct themselves as economically distinct entities in the market may escape antitrust liability for concerted action because authority for that action flows from the person exercising common control over both corporations. The Supreme Court's prior expressions seem to reject the existence of an across-the-board defense on that basis. (See cases cited at p. 858 Supra.)

The "distinct economic entity" analysis leads to the conclusion that *Section 1* reaches commonly owned firms to the extent that they act as ostensibly separate enterprises in the market. Where, as here, commonly-owned enterprises, enjoying the benefits of separate incorporation, compete for business in the market by offering distinct and independent services, a combination or agreement between them to impose a restraining practice on the market will affect not only their competitive behavior but, in all likelihood, the competitive behavior of other firms. Thus, market behavior will be adversely affected, and the effect on the market is not diminished by reason of the firms' common ownership.

> "The fact that these restraints occur in a **[**45]** setting described by the appellees as a vertically integrated enterprise does not necessarily remove the ban of the Sherman Act. The test of illegality under the Act is the presence or absence of an unreasonable restraint on interstate commerce. Such a restraint may result as readily from a conspiracy among those who are affiliated or integrated under common ownership as from a conspiracy among those who are otherwise independent. Similarly, any affiliation or integration flowing from an illegal conspiracy cannot insulate the conspirators from the sanctions which Congress has imposed. The corporate interrelationships of the conspirators, in other words, are not determinative of the applicability of the Sherman Act. That statute is aimed at substance rather than form." *United States v. Yellow Cab Co., supra, 332 U.S. at 227, 67 S. Ct. at 1565*.

On the present record, therefore, it cannot be concluded that defendants as a matter of law lacked capacity to conspire. [15]

---

[14] Although there is evidence reflecting public awareness that both Bay Cities and Red Stack were "Crowley companies," it is clear that customers dealt with each company separately and that, when it came to doing business with them, they were not regarded as being either unitary or interchangeable.

[15] The capacity issue was submitted by the Court to the jury, which apparently encountered great difficulty in dealing with it. On reflection, it seems to the Court to be more of a legal than factual issue (at least where, as here, none of the relevant facts are disputed) and hence more properly resolved by the Court, but there appear to be no reported decisions on this question.

[46]** B. Sufficiency of the Evidence

The existence of legal capacity to conspire does not, however, resolve the question whether a particular combination or agreement of commonly owned or controlled corporations subjects them to *Section 1* liability. The Supreme Court has not yet defined the parameters of the so-called intra-corporate conspiracy doctrine. What the cases so far decided establish is that **[*860]** common ownership or control of corporations does not immunize conduct which would otherwise violate *Section 1*. But common ownership or control of corporations will inevitably bring about communications, understandings, and common actions among them in areas reached by *Section 1* such as production, distribution, and price. Indiscriminate application of *Section 1* to commonly owned or controlled corporations could therefore have absurd and counterproductive results, subjecting them to liability for "an automatically self-proving conspiracy" on account of activity necessarily arising out of or inherently connected with common ownership or control. See *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd., supra, 416 F.2d at 83-84*; Willis and Pitofsky, Antitrust Consequences **[**47]** of Using Corporate Subsidiaries, 43 N.Y.U.L.Rev., 20, 29-30 (1968). The result would be the imposition of unreasonable and unwarranted risks and burdens on the routine and legitimate use of the corporate form, and "reduced economic efficiency and a less fluid market for transfer or financing of capital assets." Willis and Pitofsky, Antitrust Consequences, supra, 43 N.Y.U.L.Rev. at 28; see also Report of the Attorney General's National Committee to Study the Antitrust Laws 34 (1955).

Thus, ***HN11***[] commonly owned or controlled corporations may be held to be guilty of conspiracy under *Section 1* only if the evidence shows their agreement or common action to lack a legitimate business purpose and to have an anticompetitive effect. See *DuPont Glore Forgan Inc. v. American Telephone & Telegraph Co., 437 F. Supp. 1104, 1115-16 (S.D.N.Y.1977)*, *Aff'd, 578 F.2d 1367 (2d Cir. 1978)*; *Chastain v. American Telephone & Telegraph Co., 401 F. Supp. 151, 160 (D.D.C.1975)*. An agreement or common action arising out of or inherently connected with the common ownership or control of the corporations normally would serve a legitimate business purpose. See, e.g., *Syracuse Broadcasting Corp. v. Newhouse, 319 F.2d **[**48]** 683, 687 (2d Cir. 1963)* (internal redistribution of corporate profits). On the other hand, extraneous restraints producing anticompetitive effects imposed upon commonly owned or controlled corporations holding themselves out to be competitors in the market are evidence from which a jury may find a *Section 1* violation.

Defendants' policy of refusing to work with competitors falls into the latter category. Such a policy was not an integral aspect or necessary concomitant of common ownership or control. And, as heretofore discussed, the evidence showed that the policy was discussed among members of management of the companies and approved by Mr. Crowley, and was sufficient to permit the jury to infer that each company pursued it with knowledge that it was a common policy of the Crowley companies and for the purpose of implementing it as such. Thus the evidence was sufficient to sustain a *Section 1* verdict. Cf. *Theatre Enterprises Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 541, 74 S. Ct. 257, 98 L. Ed. 273 (1954)*; *Interstate Circuit, Inc. v. United States, 306 U.S. 208, 227, 59 S. Ct. 467, 83 L. Ed. 610 (1939)*.

Defendants' rates are a different matter. The evidence showed **[**49]** that the rates and tariffs of each company were subject to Mr. Crowley's approval. Crowley consulted with subordinates, and management discussed rates from time to time. Pricing of course is an integral part of the operation of any enterprise and is a legitimate concern of those who own and control it. Nothing is added to the picture by the evidence offered by plaintiff of a single instance in which one of the companies, Bay Cities, circulated a preliminary tariff to Red Stack prior to its implementation. There was no evidence that Bay Cities and Red Stack combined to employ pricing in any anticompetitive fashion. [16]

---

[16] Before the trial began, plaintiff pursued the theory that defendants conspired to depress the prices they charged for their services, presumably for the purpose of preventing plaintiff from operating profitably. The Court rejected this theory as a basis for computing damages, reserving for the trial the question whether defendants' pricing might be evidence of conduct violating *Section 1* or *2*. *Murphy Tugboat Co. v. Crowley, supra, 454 F. Supp. at 850*. Plaintiff produced no evidence at the trial, however,

[50] [*861]** C. Unreasonable Restraint of Trade

At the trial the Court rejected plaintiff's contention that defendants' conduct amounted to a per se violation. ***HN12***[] The policy of refusing to work with competitors did not amount to a boycott because there was no refusal to deal, concerted or otherwise. Cf. *Klor's, Inc. v. Broadway Hale Stores, Inc., 359 U.S. 207, 212, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*. Nor is that policy equivalent to a tying arrangement because separate products or services were not involved. Cf. *Northern Pacific Railway Co. v. United States, 356 U.S. 1, 5-6, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*; L. Sullivan, Antitrust 434-40 (1977).

Finally, the price fixing charge was rejected for the reasons stated in the preceding section.

Defendants' joint conduct may, however, (for the reasons stated in Part III. A. 1, Supra) be found to constitute a misuse of their dominant position in the market, tending to inhibit the free choice of customers seeking tugboat services. The effect of that conduct in tending to foreclose access of competitors to the market is somewhat analogous to that of exclusive dealing contracts imposed by the dominant firm in the market. Cf. *Tampa Electric **[**51]** Co. v. Nashville Coal Co., 365 U.S. 320, 329, 81 S. Ct. 623, 5 L. Ed. 2d 580 (1961)*. And from the point of view of economic efficiency, defendants' refusal to work policy artificially reenforces demand for their tugboat services, tending to lead to underutilization of the facilities of competitors.

These considerations, coupled with the fact that the Crowley companies followed a refusal to work policy only in the market where they held a dominant position, would have permitted the jury to find a combination in unreasonable restraint of trade.

Defendants, therefore, are not entitled to judgment as a matter of law on the *Section 1* claim. Inasmuch as the same conduct has heretofore been held to be sufficient to permit the jury to find a violation of *Section 2*, defendants are not entitled to judgment as a matter of law on the conspiracy to monopolize issue.

VI. Damages [17]

[52]** We come then to the question whether the jury's award of damages aggregating $ 600,000 for violations of *Section 2* can stand. [18]

---

from which a jury could find that defendants acted jointly to depress prices. The only evidence offered in this respect reflecting a relative increase in the labor to revenue ratio maintained by Bay Cities and Red Stack from time to time raised no inference of joint action to maintain depressed prices. Moreover, the substantive evidence disclosed that the prices charged by both Red Stack and Bay Cities, which differed from each other, exceeded average variable costs, exceeded the prices charged by plaintiff, and generally even produced a net profit. The Court therefore instructed the jury that these prices were lawful and could not be considered in arriving at a verdict for plaintiff under *Section 1* or *2*. The Court adheres to that view and further discussion of pricing under either *Section 1* or *2* is therefore unnecessary. See *Janich Bros. Inc. v. American Distilling Co., supra, 570 F.2d 848*.

[17] As stated in note 16 Supra, plaintiff's original theory of damages was premised on the existence of a conspiracy among defendants to depress the charges for ship assist services. Damages consisting of lost profits were sought on the theory that, but for defendants' conspiracy, their charges would have been higher, allowing plaintiff to increase its charges and thereby increase its revenue without additional expense. In a prior ruling, the Court rejected plaintiff's offer of proof based on this theory. *Murphy Tugboat Co. v. Crowley, supra, 454 F. Supp. 847*.

[18] For purposes of deciding the damage issue on the motion for judgment n. o. v., the Court will adopt plaintiff's interpretation of the verdict (Exh. A, attached) that the jury assessed $ 600,000 against defendants jointly and severally, and that the assessment of particular amounts to specific defendants was surplusage.

In the event the judgment were overturned on that issue, however, the verdict must properly be treated as imposing on each defendant liability for a specified amount of damages. The form of verdict specifically asked the jury to find and state separately the amount of damage caused by each defendant found to be liable. The terms of the verdict form cannot be ignored. Cf. *Fed.R.Civ.P. 49(b)* (in case of inconsistency between a general verdict and the jury's answers to special interrogatories, the latter control). The assessments of $ 180,000 each against Thomas Crowley and Crowley Maritime must then be set aside for

[53]** **[*862]** The Court has heretofore determined that, on the record before it, the jury was entitled to find that defendants' policy of refusing to work with competitors was unlawful and had an adverse impact on plaintiff. (See Part III. A. 1, Supra.) Plaintiff correctly points out that ***HN13***[] once it established "with reasonable probability the existence of some causal connection between defendant's wrongful act and some loss of anticipated revenue . . . the jury will be permitted to "make a just and reasonable estimate of the damage based on relevant data, and render its verdict accordingly.' *Bigelow v. RKO Radio Pictures, Inc., (327 U.S. 251, 264, 66 S. Ct. 574, 580, 90 L. Ed. 652 (1946))*." *Flintkote Co. v. Lysfjord, 246 F.2d 368, 392* (9th Cir.), Cert. denied, *355 U.S. 835, 78 S. Ct. 54, 2 L. Ed. 2d 46 (1957)*. Accord, *Kapp v. National Football League, 586 F.2d 644 (9th Cir. 1978)*; *Greyhound Computer Corp. v. International Business Machines, supra, 559 F.2d at 506*; *Knutson v. Daily Review, Inc., supra, 548 F.2d at 811-12*. Defendants' argument that any resulting injury suffered by plaintiff was not cognizable under the antitrust laws must therefore be rejected.

The issue before the Court **[**54]** is whether plaintiff offered evidence sufficient to enable the jury to make such a just and reasonable estimate. That mathematical certainty is not required for proof of damages is of course well settled, *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 563-66, 51 S. Ct. 248, 75 L. Ed. 544 (1931)*, but that is not the issue here. As the Court observed in Story Parchment:

> "The rule which precludes the recovery of uncertain damages applies to such as are not the certain result of the wrong, not to those damages Which are definitely attributable to the wrong and only uncertain in respect of their amount." *Id. at 562, 51 S. Ct. at 250* (emphasis added).

And in *Bigelow v. RKO Radio Pictures, Inc., supra, 327 U.S. at 264, 66 S. Ct. at 579-80*, the Court said that:

> "In the absence of more precise proof, the jury could conclude as a matter of just and reasonable inference from the proof of defendants' wrongful acts and their tendency to injure plaintiffs' business, And from the evidence of the decline in prices, profits and values, not shown to be attributable to other causes, that defendants' wrongful acts had caused damage to the plaintiffs. . . . (T)he jury **[**55]** could return a verdict for the plaintiffs, even though damages could not be measured with the exactness which would otherwise have been possible. . . . In such a case, even where the defendant by his own wrong has prevented a more precise computation, the jury may not Render a verdict based on speculation or guesswork. But the jury may make a just and reasonable estimate of the damage based on relevant data . . . ." (Emphasis added) See also *Zenith Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 123, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*.

HN14[] While a "plaintiff need not negative all possible alternative explanations for his decline in profits," *Knutson v. Daily Review, Inc., supra, 548 F.2d at 811*, there **[*863]** must be proof of some damage "flowing from the unlawful conspiracy." *Zenith Radio Corp. v. Hazeltine Research, Inc., supra, 395 U.S. at 114 n. 9, 89 S. Ct. 1562*. Causation, while relevant in the first instance to proof of the fact of damages, has a bearing as well on the sufficiency of the proof of the amount of damage. Unless the amount sought to be recovered is shown to be

---

the reasons stated in Part III. B., Supra. There would remain assessments of $ 160,000 and $ 80,000 against Red Stack and Bay Cities, respectively. Inasmuch as each may be separately liable for monopolization and attempt to monopolize, the jury could properly find each to be responsible for a different amount of damage.

This holding does not conflict with the common law principle that a jury has no right to apportion damages among joint tortfeasors, and that if it does, the total damage award will control and the attempted apportionment will be treated as surplusage. See *Gates v. L. G. DeWitt, Inc., 528 F.2d 405, 413 (5th Cir. 1976)* (applying state common law); *Dauenhauer v. Sullivan, 215 Cal.App.2d 231, 30 Cal.Rptr. 71, 74 (1963)*; Annot., 46 A.L.R.3d 801, 830-35 (1972). In those cases, the jury acted on its own in deciding to apportion damages after first determining a lump sum damage award. Here, however, the jury acted in accordance with the Court's instruction that it first assess the damage caused by Each defendant and then total these amounts. Plaintiff did not object to this form of verdict at the time of trial. It cannot now contend that the jury actually meant to award $ 600,000 jointly and severally against defendants.

"definitely attributable" to defendant's wrongful conduct, there is no basis for making a "just **[**56]** and reasonable estimate." [19]

[57]** ***HN15***[]

To meet the minimum requirement of proof in a market exclusion case in which lost profits are sought, plaintiff must normally produce evidence falling into one of the following categories:

(1) Comparison of plaintiff's performance before and after the wrongful conduct under otherwise similar conditions; *Bigelow v. RKO Radio Pictures, Inc., supra, 327 U.S. 251, 66 S. Ct. 574, 90 L. Ed. 652*; *Eastman Kodak Co. v. Southern Photo Materials Co., 273 U.S. 359, 376-78, 47 S. Ct. 400, 71 L. Ed. 684 (1927)*; *Pacific Coast Agricultural Export Association v. Sunkist Growers, Inc., 526 F.2d 1196, 1206-07 (9th Cir. 1975)*, Cert. denied, *425 U.S. 959, 96 S. Ct. 1741, 48 L. Ed. 2d 204 (1976)*;

(2) Comparison of performance in restrained and unrestrained markets which are otherwise comparable; *Zenith Radio Corp. v. Hazeltine Research, Inc., supra, 395 U.S. 100, 89 S. Ct. 1562, 23 L. Ed. 2d 129*; *Bigelow v. RKO Radio Pictures, Inc., supra, 327 U.S. 251, 66 S. Ct. 574, 90 L. Ed. 652*; *Richfield Oil Corp. v. Karseal Corp., 271 F.2d 709, 714-15 (9th Cir. 1959)*, Cert. denied, *361 U.S. 961, 80 S. Ct. 590, 4 L. Ed. 2d 543 (1960)*; or

(3) Loss of specific business or customers; *Herman Schwabe, Inc. v. United* ***[**58]*** *Shoe Machinery Corp., 297 F.2d 906, 913* (2nd Cir.), Cert. denied, *369 U.S. 865, 82 S. Ct. 1031, 8 L. Ed. 2d 85 (1962)*.

Plaintiff offered no "before and after" evidence, nor did it offer evidence of loss of particular sales. Instead, it relied on damage theories which are discussed in the following sections. [20]

[59]** **[*864]** A. Lost Past Profits

Plaintiff contends that had it not been for defendants' refusal to work policy it would have had the same share of jobs on vessels over 14,000 tons as it had of jobs on vessels of less than 14,000 tons. It handled 28 percent of the

[19] The cases cited by plaintiff confirm the necessity of proof sufficient to permit a reasonable inference that the loss or damage was attributable to acts of defendants. In *Eastman Kodak Co. v. Southern Photo Materials Co., 273 U.S. 359, 47 S. Ct. 400, 71 L. Ed. 684 (1927)*, where plaintiff, a distributor, complained of having been illegally cut off by defendant, its supplier, plaintiff's damage proof was based on a comparison with revenue it had received during the period prior to the cutoff. In *Story Parchment Co. v. Paterson Parchment Paper Co., supra, 282 U.S. 555, 51 S. Ct. 248, 75 L. Ed. 544*, where plaintiff complained of predatory price cuts, the proof was based on comparison of the prices previously charged with the unlawfully cut prices, allowing the jury to compute damages based on the differential. In *Bigelow v. RKO Radio Pictures, Inc., supra, 327 U.S. 251, 66 S. Ct. 574, 90 L. Ed. 652*, where plaintiff complained of having been deprived of first run motion pictures, the proof was based on comparison with the profits received by defendants' comparable theatre and also with the earnings of plaintiff's theatre during a prior period when it had received some first runs. And in *Zenith Radio Corp. v. Hazeltine Research, Inc., supra, 395 U.S. 100, 89 S. Ct. 1562, 23 L. Ed. 2d 129*, where plaintiff complained of having been excluded from the Canadian market for television sets and radios by an illegal patent pool, plaintiff's damage proof was based on its share in the comparable United States market and its ability to obtain the same share in Canada had its marketing not been impeded by defendant's conspiracy to deny it patent licenses. *Id. at 116 n. 11, 123-25, 89 S. Ct. 1562*. These decisions do not support plaintiff's contention that its operating losses constitute proof of the amount of damage attributable to defendants' wrongful conduct simply because that conduct precluded it from obtaining substantial additional business which it could have handled profitably.

[20] Plaintiff's damage theories have undergone several metamorphoses and no useful purpose would be served by recapitulating their evolution. At oral argument on these motions, the Court expressed its concerns on the damage issue and invited counsel to submit further memoranda setting out the theory and the substance of the supporting evidence. The following discussion then addresses plaintiff's position as most recently taken in its post-argument memorandum.

Regrettably, plaintiff chose not to respond to the Court's specific request at oral argument to address in its memorandum its theory of damages under the Red Stack pilots' agreement. The Court in this opinion has therefore had to rely on the arguments and theories previously urged by plaintiff on this aspect of the case.

small vessel jobs but only 2 percent of the large vessel jobs. (Exh. 606) Thus, its volume of work on large vessels would have substantially increased.

Next plaintiff contends that it would have adopted a Red Stack-type grid tariff under which charges would have increased with the size of the vessel, but at a level of approximately 80 percent of the corresponding Red Stack charge.

Finally, relying on testimony of its economist Professor McFadden, plaintiff contends that given the additional volume at the higher rates, it would have realized net profits on the business which would have eliminated its operating losses and caused it to break even. [21]

[60]** The threshold problem with this damage theory is the assumption that plaintiff's operating losses incurred in serving the small vessel segment of the market represent the amount of damage attributable to exclusion from the large vessel segment. Even assuming that plaintiff would have realized a net profit from working large vessels, the amount of that profit is not a function of the amount of loss suffered working small vessels. That loss logically cannot be said to be attributable to anything other than the small vessel operation. The fact that plaintiff might have realized from large vessel jobs profits to compensate for the losses incurred on small vessel jobs does not make the latter a measure of the former.

The mere fact that defendants' conduct had an adverse impact on plaintiff's business and that this business showed a loss does not provide a basis for equating that loss with the amount of damage caused by defendants. Plaintiff must prove albeit not with mathematical certainty "injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., supra, 429 U.S. at 489, 97* ***[**61]*** *S. Ct. at 697*. Professor McFadden's opinion, unsupported by facts, that but for defendants' conduct plaintiff would not have suffered losses does not convert the evidence of operating losses into evidence of damage flowing from defendants' antitrust violations. See *Autowest, Inc. v. Peugeot, Inc., 434 F.2d 556, 566 (2nd Cir. 1970)*; *Berkey Photo, Inc. v. Eastman Kodak Co., 457 F. Supp. 404, 420-21 (S.D.N.Y.1978)*. [22]

[62] [*865]** Even if we were to put aside this fatal defect, there are other flaws in the damage theory which are so obvious and substantial as to render it pure speculation.

First, the assumption that plaintiff would have acquired something on the order of a 28 percent share of the large vessel segment of the market, when all it ever had was a two percent share, is totally without evidentiary support.

---

[21] In his closing argument to the jury, plaintiff's counsel put it as follows:

"Now what kind of losses did we have? These losses on this chart are the losses from all operations for four years. And this is from Mr. Murphy's testimony, when he referred to his income tax returns, and this is the figure: $ 306,217. Those were our actual losses. And those are the losses that Professor McFadden testified that had we been operating in a competitive market where we had not been excluded, where we had free access to the big ships and the flat tows, those are the losses we would not have had." (R.T. 4093).

[22] Such evidence as there was refuted, rather than supported, the claim that plaintiff's tax losses provided a basis for a just and reasonable estimate of its antitrust losses. The evidence showed, for example, that plaintiff operated at a profit during its first year, when defendants' practices were the same as later, but that this profit was converted to a loss in subsequent years when plaintiff (1) increased officers' salaries substantially, e.g., Murphy's own salary went from $ 11,000 in 1971 to a high of $ 61,000 in 1975, at a time when operating results were the lowest (R.T. 640-42, 3451, 3511-12); (2) paid $ 9700 for a speedboat which produced only $ 600 of revenue and was used mainly for Mr. Murphy's pleasure (R.T. 770-73); (3) acquired an underpowered tug, the San Clemente, which, according to an application for a Small Business Administration loan, was "a terrific drain on the company," (R.T. 786, Exh. G3); and (4) paid $ 1000 for a coffee table which Mr. Murphy used in his home (R.T. 775-76; Exh. V). Finally, defendants' accountant showed that plaintiff incurred a two-year loss of $ 28,100 in its ship assist operations in Sacramento, where defendants did not operate and their practices therefore had no effect (R.T. 3440, 3460). Mr. Murphy's less detailed calculations showed that the Sacramento operation earned $ 4100 during these two years (R.T. 3869), but his testimony suggested that it suffered a loss instead. While these would normally of course be matters for the jury to weigh, they are relevant to the legal issue whether the proof offered of operating losses could qualify as the basis for a just and reasonable estimate of damages by the jury.

The evidence showed that there are substantial differences between docking and undocking small and large vessels. Docking large vessels is more hazardous and difficult, involves greater risks, and generally requires more, and more powerful, tugs. (R.T. 514, 523, 567, 893-94, 1348, 2222.) Moreover, plaintiff's participation in this work was necessarily premised on its working jointly with Red Stack on particular vessels. Although a number of witnesses testified in favor of having the option of calling on both Murphy and Red Stack, the evidence also indicated that some pilots and vessel operators prefer to avoid the risks of divided responsibility and liability. Thus, plaintiff's straight extrapolation from its share of small vessel jobs to project its share of large vessel jobs is too **[**63]** speculative to be accepted. Moreover, the possibility that plaintiff, operating most of the time with only one large tug, [23] could with Red Stack's help have captured more than one-fourth of the large vessel market from Red Stack, operating eight large tugs, is too remote and speculative to permit the jury to consider it as a basis for damages. [24]

[64]** Second, the assumption that plaintiff would have published a grid tariff with a different and substantially higher rate structure is purely hypothetical. There is no evidence that plaintiff was precluded from publishing such a tariff while it was in business. And certainly the assumption that plaintiff could have maintained a level of rates 20 percent below Red Stack's while taking away, on the strength of Red Stack's cooperation, a large share of Red Stack's business defies reason.

Third, plaintiff's conclusion that with 28 percent of the large vessel segment serviced at 80 percent of the Red Stack rates it would have generated a profit equal to the amount it lost while servicing the small vessel segment is pure speculation. Even **[*866]** accepting the contention that plaintiff could have performed additional jobs on which its revenue would have exceeded its costs, there are no computations in the record to support the particular numbers which plaintiff placed before the jury and the jury accepted.

It may well be that defendants' policy caused plaintiff to lose some jobs which it otherwise might have handled. But from all the record discloses, plaintiff made no effort to offer **[**65]** evidence reflecting the impact of defendants' policy on its business. Presumably, that approach would have generated figures far more modest than those placed before the jury. That fact, however, does not justify permitting the jury to base a verdict on theories and assertions that are wholly speculative and without evidentiary support.

B. Lost Future Profits

---

[23] See note 5 Supra.

[24] A further difficulty with extrapolation from plaintiff's 28 percent share of the small vessel jobs is that this share resulted in part from plaintiff's exclusion from the large vessel jobs. Defendants' practice inevitably forced plaintiff to concentrate on small vessels, leading to a penetration of that market segment greater than it would have been had plaintiff spread its limited resources over both small and large vessel jobs. Thus, plaintiff, by relying on the 28 percent figure, is in a sense seeking to profit from defendants' wrong, something it should not be permitted to do. See *Eastman Kodak Co. v. Southern Photo Materials Co., supra, 273 U.S. at 378, 47 S. Ct. 400*.

A related difficulty concerns the effect on plaintiff's share of small vessel jobs had it acquired the 28 percent share of large vessel jobs. Plaintiff's position on this question has vacillated. This of course is not a case where plaintiff had a proven capacity to handle additional volumes of business. Nor is this a case where plaintiff proposed to acquire additional equipment, intending instead to rely on the availability of defendants' equipment to augment its own capacity.

Professor McFadden's prediction in this regard that plaintiff could have greatly expanded its volume with its existing fleet of tugs (See note 5 Supra) depended on his assumption that each of plaintiff's tugs had a capacity of 2.9 jobs per day, and that plaintiff had not been working at its full capacity. (R.T. 2257-62) However, this capacity figure is speculative and is based only on Mr. Murphy's observation that during a five-month period, one of his tugs, the Go Getter, averaged 2.9 jobs per day. (R.T. 2104-05) There are serious problems with plaintiff's approach of taking the total number of jobs done, dividing by the number of workdays, and then assuming that this is the capacity of each tug for purposes of calculating damages: Red Stack did not operate at this 2.9 figure, although there is no reason to assume it was less efficient than Murphy; the 2.9 figure does not take into account the need to have standby capacity to handle periods of peak demand; and it is speculative to assume that each Murphy tug, no matter what size or in what condition, would have the same capacity as the Go Getter, a large tug which alone operated continuously for 3 1/2 years. (R.T. 2467-85, 2509-14)

Plaintiff also sought damages for the loss of future profits based on its prior years' revenues. In closing argument, plaintiff's counsel stated the theory of recovery to the jury as follows:

> "Now how do we figure out what would have happened to us in the future? I think it is a pretty simple matter. We would stay in business. We would continue to operate, and operate profitably. The only question is: how profitably?
>
> "We think that it is reasonable for you to conclude that we would have operated on about the same, at least as well as Bay Cities did in its worst year of this three-year period, the least of the Bay Cities and Red Stack performance for the entire three-year period, and that is that we would have earned something in the vicinity of 82% (sic, 8.2%) of our revenue as profit. That is what they earned. **[**66]** That is what can be earned in this business. There is no reason why we could not earn it.
>
> "So the calculation is thus: The first thing that you have to do is you have to figure what would our revenue have been. We have assumed for the purpose of this future analysis that our revenue would have been our same annual revenue that we had for the four years that we operated. And our annual revenue at that time was $ 435,000; $ 435,928. And if you take 8.2 percent of that, you get $ 35,746. That's annually.
>
> "We think that it is reasonable for you to conclude that if we had been in business five years beyond the date that we got driven out, and to give us credit after this year, after we had this going-out-of-business loss, beyond that year, for the years "77, "78, "79, "80, and "81, a five-year period, that's $ 178,730.
>
> "So I submit to you that our total losses are $ 178,730 for the future profits, and for the lost profits, $ 490,936, or total losses in this amount: $ 669,666." (R.T. 4095-96)

There is no evidence to support the assertion that plaintiff could have earned a profit of 8.2 percent of gross revenue or that this would have been its profit rate in **[**67]** the absence of defendants' conduct. Even assuming that Bay Cities' operation was in certain respects comparable, the fact that Bay Cities was able to operate profitably in the small vessel segment of the market and plaintiff (after the first year) was not, renders any reference to Bay Cities' profit rate entirely inappropriate. [25] Plaintiff's claim for future profits must be rejected as wholly speculative. See *Lessig v. Tidewater Oil Co., 327 F.2d 459, 473-74* (9th Cir.), Cert. denied, *377 U.S. 993, 84 S. Ct. 1920, 12 L. Ed. 2d 1046 (1964)*.

[68]** The Court is therefore compelled to conclude that the damage verdict is too speculative to stand. See *Joseph E. Seagram & Sons, Inc. v. Hawaiian Oke & Liquors, Ltd.,* ***[*867]*** *supra, 416 F.2d at 88*; *Volasco Products Co. v. Lloyd A. Fry Roofing Co., 308 F.2d 383, 390-93 (6th Cir. 1962)*, Cert. denied, *372 U.S. 907, 83 S. Ct. 721, 9 L. Ed. 2d 717 (1963)*. The words of the Ninth Circuit are appropriate here:

> "The verdict of a jury should not lightly be set aside certainly not for the mere reason that a court may disagree with it. However, in this case we are convinced that this verdict for the plaintiff, if allowed to stand, would be a legally unjustified windfall to the plaintiff and a miscarriage of justice." *Autohaus Brugger, Inc. v. Saab Motors, Inc., supra, 567 F.2d at 915*. [26]

---

[25] Bay Cities' financial statements, from which plaintiff derived the 8.2 percent figure, were received into the record in connection with plaintiff's sales below cost claim. There was no suggestion when they were offered that they would be used as a basis for making a comparison to support the claim for future profits, advanced for the first time in closing argument. This use, without adequate foundation that Bay Cities' business was comparable to plaintiff's, would in any event require granting a new trial on damages.

[26] The confusion engendered in the jury's mind by plaintiff's "damage proof" is confirmed by the verdict. In the closing argument counsel for plaintiff stated that "our total losses are . . . in this amount, $ 669,666," and went on:

"And that is what we firmly feel that these defendants damaged Murphy Tug, in that amount. And that is what we ask you to award as your verdict." (R.T. 4096)

With no other relevant evidence before it, the jury awarded an aggregate of $ 700,000, assessing different amounts for which there is no apparent basis against Bay Cities, Red Stack, Crowley Maritime and Thomas B. Crowley on the *Section 2* claim and Red Stack on the Red Stack pilots' agreement claim.

[69]**

VII. Motion For New Trial

HN16[] The Court may grant defendants' motion for a new trial conditionally, even if the verdict is supported by substantial evidence, if the verdict is contrary to the clear weight of the evidence or results in a miscarriage of justice. *Hanson v. Shell Oil Co., 541 F.2d 1352, 1359 (9th Cir. 1976)*, Cert. denied, *429 U.S. 1074, 97 S. Ct. 813, 50 L. Ed. 2d 792 (1977)*. In this case, defendants' motion for a new trial must be granted, conditioned on reversal of the judgment, in the following respects:

A. Damages Under *Section 2*

For the reasons discussed in Parts IV. C. and VI, Supra, the damage award is not supported by substantial evidence and is in any event excessive and against the clear weight of the evidence. A new trial, limited to the issue of damages, must therefore be granted. *Hanson v. Shell Oil Co., supra, 541 F.2d at 1360*; *Minthorne v. Seeburg Corp., 397 F.2d 237, 244 (9th Cir. 1968)*.

B. Liability of Thomas B. Crowley and Crowley Maritime Corporation

For the reasons discussed in Parts III. B. 1 and 2, Supra, the verdicts against Thomas Crowley and Crowley Maritime must be set aside as being against the clear weight of the evidence. There was no evidence **[**70]** permitting the jury to find either a sufficient degree of active participation or wrongful conduct or a sufficient causal connection with damage suffered by plaintiff.

C. Liability of Red Stack on Account of the Red Stack Pilots' Agreement

For the reasons discussed in *Part IV, supra*, the verdict against Red Stack based on the pilots' agreement is against the clear weight of the evidence, and the damage award is excessive. A new trial must be granted on that issue.

D. Liability for Conspiracy (other than the Red Stack Pilots' Agreement).

Because plaintiff presented no separate damage claim under *Section 1*, the Court's disposition of the *Section 2* claim on damage grounds disposes of this claim as well. In the event the judgment is reversed, however, and a new trial is ordered, plaintiff will be entitled to a new trial on the conspiracy issue. (See Part V, Supra)

In all other respects, defendants' motion for a new trial is denied.

CONCLUSION

For the reasons stated, defendants' motion for judgment notwithstanding the verdict is granted. In the alternative, defendants' motion for a new trial is granted to the extent stated above, conditional on reversal of the judgment. Each party **[**71]** shall bear its own costs.

IT IS SO ORDERED.

Opinion by: CLARKE

Opinion

Memorandum Opinion

CLARKE, D.J.: This matter came to trial before the Court and a jury. At the conclusion of plaintiff's evidence, all defendants moved for a directed verdict. Due to the number of attorneys involved in the case and the considerable additional expense that would be incurred by all parties in waiting for any action by the Court, the Court rendered an oral decision from the Bench granting each defendant's motion for a directed verdict. According to our comments from the Bench, this Memorandum Opinion is entered to elaborate more fully the Court's **[*2]** decision.

At the outset, it should be noted that plaintiff has had an ample opportunity to prepare its case. The period of discovery has exceeded one year. Some eleven months after initiation of the suit plaintiff first moved for production of documents and the Court, over defendants' objections, extended plaintiff's time for discovery. At the trial, plaintiff's evidence spread over six days and hundreds of documents. [1] However, notwithstanding the bulk of

---

[1] At trial the parties presented several stipulations, some of which were marked as "Court Exhibits." There was an additional stipulation which was not given a number. The Court informed the parties that the Court would hear arguments as to the

evidence before the Court, the Court holds as a matter of law that plaintiff has failed to make out a prima facie case which would justify submitting the case to the jury.

The general background surrounding this dispute can be stated quite simply. Plaintiff, owner and operator of two motion **[*3]** picture theatres which are now closed, instituted this action on October 12, 1977, under sections 1 and 2 of the Sherman Act and section 4 of the Clayton Act. The defendants are three chains of motion picture exhibitors in the Norfolk-Virginia Beach area and eleven motion picture distributors. [2]

Plaintiff asserts that the distributor defendants engaged in a conspiracy with the exhibitor defendants. In 1966, defendant exhibitor General Cinema opened the Janaf theatre adjacent to the Janaf Shopping Center. By the early 1970's, defendant exhibitors ABC Southeastern and American Multi-Cinema had opened their respective theatres at the Pembroke and Military Circle shopping malls. Janaf, Military Circle and Pembroke malls are all large, modern shopping centers which attract substantial numbers of shoppers, a favorable factor in theatre attendance. It is at this time plaintiff contends that the unlawful conspiracy began. Under the alleged conspiracy, the plaintiff contends, that the distributor defendants agreed to license first-run motion pictures only to the exhibitor defendants to the **[*4]** exclusion of plaintiff and the other independent exhibitors in the Norfolk-Virginia Beach area. Plaintiff further contends that this conspiracy caused its two theatres to lose business and ultimately to go out of business in December 1975.

There is little dispute concerning the substantive ***antitrust law*** which controls this action. Under section 1 of the Sherman Act, the plaintiff has the burden of proving three essential elements to establish its prima facie case:

(1) That there was an agreement, conspiracy, or combination among the defendants in restraint of trade;

(2) That as a direct and proximate result thereof plaintiff has been injured in its business and property; and

(3) That the damages which the plaintiff sustained are capable of reasonable ascertainment and are not speculative or conjectural.

Admiral Theatre Corporation v. Douglas Theatre Company , 585 F.2d 877 (8th Cir. 1978).

Initially, it should be noted that the exhibitor defendants admit the existence and operation of a split agreement during the time relevant to this case. However, the law in this Circuit is clear that a split system is neither per se illegal nor, standing alone, evidence of a conspiracy **[*5]** to violate the antitrust laws. *Seago v. North Carolina Theatres, Inc., 42 F.R.D. 627 (E.D. N.C. 1966)*, aff'd, *388 F.2d 987 (4th Cir. 1967)*, cert. denied, *390 U.S. 959 (1968)*; accord *Dahl, Inc. v. Roy Cooper Co., 448 F.2d 17 (9th Cir. 1971)*; *Viking Theatre Corp. v. Paramount Film Distrib. Corp., 320 F.2d 285 (3d Cir. 1963)*, aff'd by an equally divided court, *378 U.S. 123 (1964)*; Royster Drive-In *Theatres, Inc. v. American Broadcasting-Paramount Theatres, Inc., 268 F.2d 246* (2d Cir.), cert. denied, *361 U.S. 885 (1959)*.

Apart from the admitted operation of the split, plaintiff produced no evidence from which a reasonable inference could be drawn that a conspiracy existed or operated among exhibitor defendants as to restrict unreasonably the competitive market. There was no evidence that the split had the purpose or effect to foreclose the plaintiff from being allowed to license films or compete in the bidding and negotiation for films. Indeed, the evidence showed that non-split members, including the plaintiff, continually received letters soliciting bids on films, did bid and negotiate for pictures, and were licensed films when they offered the superior terms. Even the split member **[*6]** exhibitors were not required by their agreement to attempt to license films split to them. The only agreement was that other members of the split would not bid or attempt to negotiate films split to the other split exhibitors. The evidence showed the sole purpose and effect of the split was to curtail competitive bidding by split members so as hopefully

---

admissibility of the unnumbered exhibit at the time of arguments for a directed verdict. For purposes of this opinion, the Court considered all stipulations as part of plaintiff's case.

[2] One of the distributor defendants, MetroGoldwyn Mayer, subsequently was dismissed.

to lower prices of film licenses. Neither plaintiff nor any other exhibitor was ever prohibited from competitively bidding or negotiating for films. Such a situation does not harm a non-participating exhibitor and is not evidence of a conspiracy. See *Dahl, 448 F.2d at 20*; *Viking, 320 F.2d at 292-93*; *Seago, 42 F.R.D. at 638*.

Thus, in order for plaintiff to establish the first element of its prima facie case, the plaintiff had to show that the distributor defendants knowingly participated in implementing or promoting the split with the intent to deprive plaintiff of his "fair share" of high quality first-run films. *Admiral, 585 F.2d at 884*. Of course, the plaintiff is not required to prove directly the fact of an agreement among the distributor defendants or between the distributor defendants and the exhibitor defendants. Evidence **[*7]** from which an agreement could be inferred is sufficient. American Tobacco C3. v. *United States, 328 U.S. 781, 809-10 (1946)*; *Loew's, Inc. v. Cinema Amusements, Inc., 210 F.2d 86* (10th Cir.), cert. denied, *347 U.S. 976 (1954)*. However, to avoid a directed verdict "the facts and circumstances relied upon must attain the dignity of substantial evidence and not be such as merely to create a suspicion." *Admiral, 585 F.2d at 884*, quoting *Johnson v. J. H. Yost Lumber Co., 117 F.2d 53, 61 (8th Cir. 1941)*; see *Michelman v. Clark-Schwebel Fiber Glass Corp., 534 F.2d 1036* (2d Cir.), cert. denied, *429 U.S. 885 (1976)*; *Venzie Corp. v. United States Mineral Prods. Co., 521 F.2d 1309 (3d Cir. 1975)*. Furthermore, an inference which a jury is entitled to draw must be based upon proven facts and not on other inferences. *Admiral, 585 F.2d at 884*.

Plaintiff points to practices of competing distributors to support an inference of conspiratorial agreement. Plaintiff contends that the distributors acted uniformly in certain aspects of licensing of films. While evidence of conscious parallelism will sometimes support an inference of an agreement, an inference of a conspiracy is not warranted where such **[*8]** conduct is at least as consistent with legitimate business decisions by distributors as with the planned exclusion of the plaintiff. *Theatre Enterprises, Inc. v. Paramount Film Distrib. Corp., 346 U.S. 537, 540-41 (1954)*; *Admiral, 585 F.2d at 884*; *Dahl, 448 F.2d at 19-20*; Brown v. Western Mass. *Theatres, Inc., 288 F.2d 302, 305-06 (1st Cir. 1961)*. As the court noted in the Admiral case:

Section 1 of the Sherman Act does not prohibit independent business actions and decisions. Only where the pattern of action undertaken is inconsistent with the self-interest of the individual actors, were they acting alone, may an agreement be inferred solely from parallel actions. *First Nat'l Bank v. Cities Serv. Co., 391 U.S. 253 (1968)*.

Admiral, 585 F.2d at 884.

Plaintiff asserts that defendant distributors joined in the implementation of the split by (1) providing advance information to exhibitor defendants, (2) requiring unreasonably high advances and guarantees of plaintiff and other non-split exhibitors but not of split members, and (3) rejecting superior bids of non-split exhibitors and accepting inferior bids of split members.

Plaintiff's contention regarding advance information **[*9]** is nearly identical to the claim rejected in the Admiral case where the court wrote:

It is not surprising that a distributor would provide information concerning forthcoming films to any interested exhibitor. It is certainly not inconsistent with the distributor's self-interest to attempt to generate interest in its films.

Id. at 885. Furthermore, as in that case, even assuming that this advance information was unavailable to Wilder through the various trade journals, it is clear that the plaintiff neither requested nor was designedly refused the information that its competitors had acquired.

Plaintiff suggests distributor defendants all eventually adopted a practice requiring guarantees and that they discriminatorily made this demand only of non-split members. It is true that most all distributor defendants began to require guarantees of exhibitors. As to the date when the first distributor required this and when the other distributors adopted this practice, however, plaintiff's evidence ranged from a few weeks, to several months to over six years.Notwithstanding the date of inception differential, the evidence was overwhelming that from the mid-1960's through 1975 there **[*10]** have been consistently fewer films being released and more theatres competing for those pictures. That development could do nothing but put distributors in a stronger competitive position vis-a-vis exhibitors wherein distributors could demand such guarantees which were unquestionably in their business self-interests. Such parallel conduct cannot support an inference of an agreement.

Plaintiff's only evidence that defendant distributors required advances and guarantees of plaintiff and other non-split exhibitors while not requiring these terms on films licensed to exhibitor defendants was the silence of distributor representatives when plaintiff's representative said he suspected this was the case. Accepting this as true, the best inference that can be drawn from this evidence is that the split exhibitors were not putting up such funds. However, plaintiff's own evidence showed this was not the case. Contrary to what the plaintiff's representative "suspected," the evidence showed that split members were required to and did put up guarantees. Plaintiff is not entitled to an inference that is negated by other express evidence in its case. Moreover, evidence of a distributor remaining **[*11]** silent and refusing to disclose to one exhibitor the terms of a license granted to a competing exhibitor in a situation of secret bidding would seem highly consistent with good business judgment.

Plaintiff's evidence did show that at least on four occasions a split member was called by a distributor and told the terms on which an upcoming film would be licensed, and on one occasion that "you've got" a certain picture prior to bid solicitation letters being sent out. There are, however, two difficulties in drawing an inference of distributor participation in the split from this evidence. First, as also discussed below, there was no evidence that those films were not licensed to an exhibitor other than the exhibitor who made the best bid or offered the most lucrative terms to the distributor. Second, the same witness who testified to such contacts by distributors testified that: (a) he would only be licensed that film if he met the distributor's minimum terms; (b) that, indeed, he was not licensed one of these pictures when he could not pay the guarantee demanded by the distributor, and (c) regardless of the split selections, split exhibitors ran the risk that non-split exhibitors **[*12]** would offer superior terms and be licensed the film. The witness characterized the dealings with distributors on movies split to him as "[fighting] it out with the distributor over [the] terms." There was no evidence that exhibitors dictated the terms of licenses to distributors or that exhibitors were anything but free to select any bid or offer. See *Syufy Enterprises v. National General Theatres, Inc., 575 F.2d 233 (9th Cir. 1978)*; *Admiral, 585 F.2d at 887*.

Taking this evidence in the light most favorable to plaintiff, the best inference that can be drawn is that distributors were selecting split members to play their films prior to soliciting bids. The same witness, however, testified that he had no knowledge of any agreement by any distributor to boycott, discriminate or exclude any exhibitor in licensing films, no knowledge of any agreement to conduct sham bidding, and no knowledge of any agreement as to the selection of theatres for licensing. Again, there was no evidence that any film went to any exhibitor except the exhibitor offering the most lucrative proposal for the film.Since such a practice is consistent only with the business self-interests of each distributor, **[*13]** each distributor was free to license its films in any manner it determined in its own judgment was in its best interests. See, e.g., *Lamb's Patio Theatre, Inc. v. Universal Film Exchanges, Inc., 582 F.2d 1068 (7th Cir. 1978)*.

Most significant is the fact that plaintiff failed to prove that a single film went to any exhibitor other than the exhibitor (member of the split or not) which made the best bid or offered the most favorable terms to the distributor. This was overwhelmingly apparent even ignoring the fact (which would argue against plaintiff's case) that the evaluation of competing bids is "necessarily somewhat subjective" normally involving considerations of grossing potential including "location, quality of furnishings, demonstrated ability to attract patrons and the type of films previously shown." *Admiral, 585 F.2d at 885*. Accordingly, plaintiff's evidence that the great majority of films split by exhibitor defendants were eventually licensed to split members can raise no inference of distributor participation in the split.

In pretrial discovery and at trial, plaintiff failed to prove any other incidents of preferential treatment to split members by distributors such **[*14]** as shortened runs, pre-release screenings, move overs or adjustments of bids and film rentals. Even if this evidence were presented, there can be no conclusion drawn unless plaintiff can show it requested and was denied similar treatment. *Admiral Theatre Corp. v. Douglas Theater Corp., 437 F. Supp. 1268, 1290-91 (D. Neb. 1977)*, aff'd, *585 F.2d 877 (8th Cir. 1978)*.

Despite plaintiff's broad allegations, there is neither any evidence nor reasonable inference considered alone or in combination to prove a conspiracy among distributor defendants or between distributor and exhibitor defendants. To the contrary, plaintiff presented no evidence that any distributor acted alone or in concert in any manner except in his own selfinterest.

With regard to section 2 of the Sherman Act, plaintiff has not actively pursued this claim. Plaintiff offered no evidence as to who was attempting to monopolize or even what product was alleged to be the subject of the monopoly. Plaintiff's only evidence as to the fixing of prices was that plaintiff and all other exhibitors were free to establish and maintain their own price levels. Moreover, there was absolutely no showing of the requisite intent **[*15]** to monopolize or dangerous probability that an actual monopoly will be achieved. *White Bag Company v. International Paper Company, 579 F.2d 1384 (4th Cir. 1974)*.

Plaintiff has failed to meet its burden of establishing this first element of its prima facie case.

Even assuming plaintiff had proved the first element of its case, in order to establish a private cause of action under the Clayton Act, plaintiff must prove an injury. The mere fact of a violation, even if proven, does not automatically produce damages. *Kapp v. National Football League, 586 F.2d 644 (9th Cir. 1978)*. Moreover, there must be a causal relationship between the illegality and the injury if proved. The only damages recoverable in an antitrust suit are those which occur by reason of that which made the defendant's actions unlawful. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477 (1977)*. The Supreme Court has held:

Plaintiffs must prove antitrust injury, which is to say injury of the type the antitrust laws were intended to prevent and that flows from that which makes defendants' acts unlawful. The injury should reflect the anticompetitive effect either of the violation or of the anticompetitive **[*16]** acts made possible by the violation. It should, in short, be "the type of loss that the claimed violations… would be likely to cause." Zenith Radio Corp. v. Hazeltine Research, 395 U.S. [100, 125].

Brunswick, 429 U.S. at 489. This is the case regardless of whether the violation is thought to be unreasonable or per se illegal. *Admiral, 585 F.2d at 893*.

Plaintiff relied upon two theories to prove the fact of injury: (1) demand prerequisite theory and (2) comparative theatre or futility theory. Under the former theory, plaintiff contends it was injured by failing to receive first-run films. As a prerequisite to this approach, though, plaintiff must show it bid or attempted to negotiate to get each film it claims it did not receive due to defendants' unlawful action, and that it was unjustifiably denied those films.

One cannot show "fact of injury," by alleging he did not receive something when he initially never tried to obtain it. Thus, the "demand prerequisite" is also inherently necessary in showing damages, plus the causal connection of those damages to the split activities. If plaintiffs never attempted to obtain the film, ipso facto, exhibitor-defendants could **[*17]** not have prevented them from obtaining it, and thus could not have caused damages."We know of no principle of law which authorizes a person aggrieved by the deprivation of a right either statutory or constitutional to recover for such deprivation in the absence of a demand or request for its exercise." *Milwaukee Towne Corp. v. Loew's, Inc., 190 F.2d 561, 568 (7th Cir. 1951)* [footnote omitted].

Admiral, 585 F.2d at 893-94.

Plaintiff identified twenty-three films on which it said it bid or attempted to negotiate but did not receive due to defendants ' illegal activities. There is, however, no evidence that plaintiff bid or offered specific terms for any of these films or that such terms were rejected in favor of inferior bids or offers of defendant exhibitors. Even beyond the twenty-three films there is no evidence distributors unjustifiably denied any bid or offer for any film. Thus, plaintiff has prove no damages. Plaintiff failed to establish any factual basis on which the jury could determine that a conspiracy prevented him from obtaining any of these films.

Alternatively, plaintiff attempted to rely upon the comparative theatre or futility method of proving damages. **[*18]** Before relying upon this theory instead of the demand prerequisite theory, plaintiff must show that it would have been futile to make bids on all first-run films it wanted. As stated by the court in Admiral:

Only by this foundational route could plaintiffs appropriately use the comparative theatre method for showing causation. For if plaintiffs could not show futility of demand, there remained no justification for not using the demand prerequisite theory.

Admiral, 585 F.2d at 894. As discussed above, plaintiffs have not shown futility by means of evidence of irregular or preferential treatment afforded exhibitor defendants.

Plaintiff states it determined it was futile to bid on first-run films sometime in 1970 or 1971. The records show, however, that during the critical years when plaintiff was developing a feeling of futility, a large percentage of the films it played was licensed from distributor defendants.

Plaintiff presented no evidence that the films it was licensed from defendant distributors were of inferior quality, although plaintiff claims this was the case. There is no evidence on which the jury could make a determination of inferiority or superiority other **[*19]** than by pure speculation.

In addition, to rely on the futility theory, plaintiff must show it made superior bids or offered superior terms for films which were rejected and licensed pursuant to inferior bids. Rather than that showing, the evidence was clear that whenever the plaintiff or any other exhibitor offered the best terms, it licensed that film. Thus, plaintiff has utterly failed to present any evidence on which the jury could make a determination that the plaintiff failed to bid or bid with less vigor because of a feeling of futility.

The final element of an antitrust plaintiff's prima facie case is the proof of the amount of damages. In addition to the fact of injury and requisite causal relation, the damages accruing from the injury must be capable of reasonable ascertainment and must not be speculative or conjectural. *Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251 (1946)*. A jury may not render a verdict based upon speculation or guesswork. Id. Damages must be "susceptible of expression in figures" and there must be a "reasonable basis of computation" so that damages are proven by facts "from which they were logically and legally inferable." *Eastman Kodak Co.* ***[*20]*** *v. Southern Photo Materials Co., 273 U.S. 359 (1927)*.

Plaintiff has presented no evidence from which damages could be computed. Assuming the plaintiff was "frozen out" of the market on the twenty-three films discussed above, the only evidence on which the jury conceivably could make a determination of damages is by comparing the successful bidder's gross receipts with plaintiff's house expenses. However, when that was done, it was established that plaintiff would have lost money by playing those films. Plaintiff's evidence consisted of statements by its chief operating officer to the effect that on a few of the twenty-three films it "may have made a few bucks" or "a little bit of money." Moreover, plaintiff never established what his offsetting income was from films it did show during the weeks when plaintiff contends it could not get the pictures. Regardless of the evidence plaintiff might have presented regarding the revenue it may have received from pictures it did not play, plaintiff must offset that figure with the receipts it did earn during those times. Similarly, plaintiff's evidence regarding concession sales simply amounted to a statement of the average ratio of ticket **[*21]** sales to concession sales. However, without the evidence of the amount plaintiff actually made on films shown and without evidence of the amount of revenues from concession sales, that ratio does not provide sufficient information on which the jury could assess damages. Furthermore, plaintiff's evidence regarding the concession sales-ticket sales ratio did even indicate whether that figure was a gross or net figure.

With regard to plaintiff's alleged damages to its real property, plaintiff admitted that it was not injured in its real property valuation by the failure to obtain the twenty-three pictures. In addition, plaintiff presented no evidence of a diminution of value of its real estate by virtue of its being sold without an ongoing theatre business as opposed to its being sold as an ongoing enterprise. The jury cannot be allowed to speculate on such matters without benefit of any underlying evidence.

Furthermore, the only evidence of the value of the property was its tax assessment value, and when that is applied to the sales price, plaintiff made a profit rather than a loss on the sales.In addition, part of that property was leased commercially to unrelated businesses. **[*22]** Plaintiff's evidence made no allocation as to the respective valuations of the theatre and rental properties.

The plaintiff was unable to show damages resulting from the loss of a profitable business. The evidence clearly showed that in applying any reasonable figure for management and overhead to the gross profits or losses realized from the exhibition of pictures from 1965 until the theatres were closed, the plaintiff consistently lost money.

In sum, plaintiff's evidence regarding damages was such that any computation by the jury would amount to pure speculation or guesswork.

Plaintiff has failed to prove not one but each and every element of its prima facie case. There is no evidence upon which a jury could render a verdict without resorting to speculation or guesswork. For these reasons, the Court ordered that all defendants' motions for directed verdict be granted and that judgment be entered for defendants.

Mullins v. Kaiser Steel Corp.

United States District Court for the District of Columbia

March 9, 1979

Civ. A. No. 78-0650

Reporter
466 F. Supp. 911 *; 1979 U.S. Dist. LEXIS 13873 **; 105 L.R.R.M. 2575; 85 Lab. Cas. (CCH) P11,237; 1979-1 Trade Cas. (CCH) P62,587

Julius MULLINS et al., Plaintiffs, v. KAISER STEEL CORPORATION, Defendant

Core Terms

coal, antitrust, purchase-of-coal, contributions, illegality, unfair labor practice, onions, signatories, summary judgment, employees, purchases, courts

Counsel: **[**1]** Stephen J. Pollak, Washington, D. C., for plaintiffs.

A. Douglas Melamed, Washington, D. C., for defendant.

Opinion by: GREEN

Opinion

[*912] MEMORANDUM OPINION

The difficult questions before the Court concern the legality and enforceability of a clause of the National Bituminous Coal Wage Agreement of 1974 (hereinafter the "1974 Agreement") [1.] providing for a royalty payment to the United Mine Workers of **[*913]** America Health and Retirement Funds (hereinafter the "Funds") on all bituminous coal procured or acquired by a signatory employer for use or for sale on which contributions to the Funds had not been made (hereinafter the "purchase-of-coal clause"). [2.] **[**3]** The purchase-of-coal clause is only one component of the 1974 Agreement which establishes the terms and conditions of employment for Kaiser Steel Corporation (hereinafter "Kaiser") coal mining employees. The 1974 Agreement also requires Kaiser to make payments to the Funds based on the hours worked and coal produced by its employees. [3.] Kaiser, a member of the

---

[1.] The National Bituminous Coal Wage Agreement of 1974 is a collective bargaining agreement executed by the United Mine Workers of America International Union, various multi-employer bargaining entities, the largest of which is the Bituminous Coal Operators Association (hereinafter "BCOA"), and certain individual coal operators. The 1974 Agreement was in force and effect between December 6, 1974 and December 6, 1977.

[2.] Article XX(d)(1)(v) provides in part:

. . . during the life of the Agreement, each signatory Employer shall, for the periods of time indicated below, contribute to the Trusts established in this Article in the amounts shown below based on cents per ton on each ton of two thousand (2,000) pounds of bituminous coal after production by another operator, procured or acquired by such Employer for use or for sale on which contributions to the appropriate Trusts as provided for in this Article have not been made . . . .

Complaint, Exhibit A, p. 28.

BCOA and therefore a signatory to the 1974 Agreement, made contributions on the coal produced by its own 400 UMWA employees but failed to make any contributions **[**2]** pursuant to the purchase-of-coal clause. Kaiser never acknowledged any coal purchases voluntarily despite the fact that the terms of the 1974 Agreement were apparently based on the parties' understanding that the Trustees of the Funds would rely upon signatory operators to furnish information concerning the amount of coal produced and purchased (Complaint, Exhibit A, p. 29). The signatories reported under separate entries the tonnage of coal purchased and produced and also calculated the amount of contributions payable to the Funds on "remittance advice forms" supplied by the Trustees.

Kaiser also failed to inform the Trustees voluntarily of its decision to withhold Fund contributions required by the purchase-of-coal clause. Had Kaiser elected to test the purchase-of-coal clause during the term of the 1974 Agreement, a contract provision calling for renegotiation in the event of a successful challenge could have been invoked by the Union in order to remedy the resulting deficiency in pension benefit contributions from signatories. [4.] The Trustees contend that Kaiser effectively foreclosed the intended application of the renegotiation provision by failing to disclose coal purchases and deprived covered employees of part of their bargained-for wages which the Trustees now seek to recover.

[4]** On April 11, 1978, the Trustees of the Funds brought this suit under Section 301 of the Labor-Management Relations Act (LMRA), *29 U.S.C. § 185* and *Section 502* of the Employee Retirement Income Security Act of 1974, *29 U.S.C. § 1132* seeking to recover from Kaiser contributions alleged to be due and owing to the Funds pursuant to the purchase-of-coal clause. [5.]

Plaintiffs have moved for summary judgment arguing that the principles announced in *Kelly v. Kosuga, 358 U.S. 516, 79 S. Ct. 429, 3 L. Ed. 2d 475 (1959)* require judicial intervention and enforcement of payments pursuant to the purchase-of-coal provisions regardless of Kaiser's claims of illegality.

[*914] In opposition to the Trustees' motion and in support of its own motion for summary judgment, Kaiser contends that its agreement with the United Mine Workers union to contribute to the Funds **[**5]** pursuant to the coal purchase royalty clause is illegal, unenforceable and void as a "hot cargo" provision under Section 8(e) of the Labor-Management Relations Act, *29 U.S.C. § 158(e)*; that is, an implied agreement to cease doing business with non-signatory employees and signatories which are delinquent in Fund contributions. Kaiser also urges that the Kelly v. Kosuga decision permits the interposition of the defense of antitrust illegality under *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1* and *2* because the contract provision relied upon by the Trustees is itself unlawful. [6.]

[3.] The plaintiff Trustees have not claimed that Kaiser is delinquent in making contributions to the Funds based on the number of "hours worked" and coal produced by Kaiser employees covered by the 1974 Agreement.

[4.] Article XX(d)(1)(v)(v) provides in part:

The parties hereto mutually agree that, if at any time during the term of this Agreement a court or tribunal of competent jurisdiction determines by a final decision that is not appealable that the provision appearing in the paragraph just preceding (purchase-of-coal clause) is invalid or in violation of the National Labor Relations Act, 1947, as amended, or other Federal or state law, the parties shall, at the option and upon demand by the Union without affecting the integrity of any other provision of this Section or any other provision of the National Bituminous Coal Wage Agreement, meet and engage in good faith negotiations to agree upon a clause to be inserted into this Agreement in replacement of the provision found invalid or unlawful.

Complaint, Exhibit A, p. 28.

[5.] Memoranda submitted by the parties discuss recovery by the Trustees on a restitution theory but the complaint seeks recovery on the contract only.

[6.] The antitrust defense has been briefed by the parties only with reference to the decision in *Kelly v. Kosuga, 358 U.S. 516, 79 S. Ct. 429, 3 L. Ed. 2d 475 (1959)* and the availability of an antitrust defense to an action to recover pension contributions on an expired contract. Motion of Kaiser Steel Corporation for Summary Judgment at 2 n.2. Several other defenses raised by way of answer have not been argued by Kaiser. The Court finds the defenses of standing and failure to join an indispensable party to be without merit. See *Lewis v. Quality Coal Corp., 243 F.2d 769, 772-73 (7th Cir. 1957)*; *Paul v. Lindgren, 375 F. Supp. 843, 849 (N.D.Ill.1974)*.

[6]** Finally, the Trustees argue that the Court is without jurisdiction to hear a Section 8(e) defense and failing this, that several disputed issues of material fact preclude summary judgment in favor of Kaiser.

Antitrust Defense

The decision in *Kelly v. Kosuga, 358 U.S. 516, 79 S. Ct. 429, 3 L. Ed. 2d 475 (1959)* restated the position of the United States Supreme Court regarding recognition of a defense of antitrust illegality to an action brought on a contract. In Kelly, as in prior decisions, the Court attempted to accommodate the competing interests involved: enforcement of a contract provision which may in itself be unlawful or in furtherance of illegal ends and thereby frustrating public policy, or denial of recovery which may result in unjust enrichment at the plaintiff's expense or otherwise impose a penalty unrelated to the character of plaintiff's illegal acts and thereby give defendant a windfall.

The contract sued upon in Kelly [7.] provided for the sale of fifty carloads of onions at market price to an onion grower and included an agreement by the vendor not to deliver onions on the futures market in order to maintain artificially high prices. This contract was one aspect **[**7]** of a larger price maintenance scheme in which other onion growers purchased additional onions from the vendor and then agreed among themselves not to market the onions. The vendee accepted delivery of thirteen carloads but only made partial payment before refusing delivery of the remaining thirty-seven carloads. After repudiation by the vendee, the vendor sold the rapidly deteriorating onions at a reduced price in mitigation of damages and brought suit on the contract for the unpaid purchase price. The vendee argued that the sale was made pursuant to and as an indivisible part of an agreement restraining trade in violation of the Sherman Act. Plaintiff's motion to strike this affirmative defense was granted by the trial court which rendered summary judgment for the plaintiff.

The Supreme Court upheld a judgment for the contract price in favor **[**8]** of the vendor and stated:

> As a defense to an action based on contract, the plea of illegality based on violation of the Sherman Act has not met with much favor in this Court. This has been notably the case where the plea has been made by a purchaser in an action to recover from him the agreed price of goods sold.

358 U.S. at 518, 79 S. Ct. at 431. The Court noted its extreme reluctance to supplement the express remedies provided by the antitrust laws with an additional remedy of **[*915]** contract avoidance and also restated the limits of the defense of antitrust illegality:

> Past the point where the judgment of the Court would itself be enforcing the precise conduct made unlawful by the (Sherman) Act, the courts are to be guided by the overriding general policy, as Mr. Justice Holmes put it, "of preventing people from getting other people's property for nothing when they purport to be buying it." . . . Supplying a sanction for the violation of the Act, not in terms provided and capricious in its operation, is avoided by treating the defense as so confined (citations omitted).

358 U.S. at 520-21, 79 S. Ct. at 432.

The general rule emerging from Kelly is **[**9]** that a contract should be enforced whether or not it fosters illegal ends, unless the alleged illegality is of such a character that enforcement of the contract would "make the courts a party to the carrying out of one of the very restraints forbidden by the Sherman Act." *358 U.S. at 520, 79 S. Ct. at 432*. The extreme difficulty confronting Kaiser in attempting to demonstrate that the purchase-of-coal clause falls within the narrow exception noted in Kelly is underscored by the fact that the Supreme Court has sustained the defense of antitrust illegality on only one occasion. The unique factors present in *Continental Wall Paper Co. v. Louis Voight & Sons Company, 212 U.S. 227, 256, 29 S. Ct. 280, 290, 53 L. Ed. 486 (1909)* which led the Court to condemn a monopolization and price-fixing scheme characterized as "certain in results . . . widespread in its operation, and . . . evil in its purposes" and to sustain an antitrust defense to a contract action are not present in this case. See *D. R. Wilder Manufacturing Company v. Corn Products Refining Company, 236 U.S. 165, 177, 35 S. Ct. 398, 59 L. Ed. 520 (1915)*.

---

7. The opinion of the Seventh Circuit Court of Appeals in Kosuga v. Kelly, published at ***257 F.2d 48***, amplifies the factual background giving rise to the litigation.

In similar decisions preceding Kelly v. Kosuga, the Supreme Court sought **[**10]** to reconcile conflicting policies underlying ***antitrust law*** and contract principles by adhering to a difficult formula distinguishing between enforceable "collateral" agreements not illegal in themselves and "inherently" illegal agreements. Compare *Continental Wall Paper Co., supra*, with *Connolly v. Union Sewer Pipe Co., 184 U.S. 540, 22 S. Ct. 431, 46 L. Ed. 679 (1902)*. The Kelly decision signals abandonment of this troublesome test and in its place the Supreme Court has invited attention to the nature of the remedy sought as the touchstone for determining whether or not an alleged antitrust illegality should counsel a court to refuse assistance to a party presenting a contractual claim. [8.] See *Kelly v. Kosuga, 358 U.S. at 516, 79 S. Ct. 429, 3 L. Ed. 2d 475* .

[11]** The Trustees are seeking to recover one component of agreed compensation pursuant to the terms of a contract which has expired. The amounts claimed are based on purchases actually made. The contract is at an end decisions to purchase or not to purchase have been made and acted upon. Whether or not an express or implied agreement not to make Future purchases of coal, like the nondelivery agreement referred to in Kelly at 521, 358 U.S. 516, 79 S. Ct. 429, 3 L. Ed. 2d 475 would warrant a different result, the Court concludes that requiring payments pursuant to the purchase-of-coal clause cannot be said to be enforcing a restraint of trade within the meaning of Kelly v. Kosuga. [9.]

[*916] The "Hot Cargo" Defense

The Court disagrees with the arguments **[**12]** advanced by Kaiser concerning the proper application of Section 8(e) and concludes that Section 8(e) is not a bar to recovery by the Trustees under the facts and circumstances of this case.

In deciding whether or not to allow the interposition of a Section 8(e) defense, the Court is guided by *San Diego Building Trades Council et al. v. Garmon et al., 359 U.S. 236, 79 S. Ct. 773, 3 L. Ed. 2d 775 (1959)*. Thus, when an activity is arguably subject to Section 8 of the National Labor Relations Act, federal courts must defer to the exclusive competence of the NLRB. This is true, where as here, an aggrieved party declines to bring allegedly illegal Section 8 activity to the attention of the NLRB or, as noted in Garmon, where the NLRB failed to determine the status of the allegedly unlawful conduct. *Id. at 245-46, 79 S. Ct. 773*.

Congress enacted Section 8(e) in order to plug a "loophole" in the law of "secondary boycotts" recognized by the Supreme Court in *Local 1976, United Brotherhood of Carpenters v. NLRB (Sand Door), 357 U.S. 93, 78 S. Ct. 1011, 2 L. Ed. 2d 1186 (1958)* in its interpretation of Section 8(b)(4)(B) of the Taft-Hartley Act of 1947, *29 U.S.C. § 158(b)(4)(B)*. See *National **[**13]** Woodwork Manufacturers Association v. NLRB, 386 U.S. 612, 87 S. Ct. 1250, 18 L. Ed. 2d 357 (1967)*. The inclusion of "hot cargo" prohibitions within Section 8(e) along with the express introductory phrase "it shall be an unfair labor practice" suffice to create a presumption that, in enacting Section 8(e), Congress intended simply to expand the list of unfair labor practices subject to exclusive NLRB jurisdiction.

The addition of the "unenforceable and void" language without more cannot change the character of the "hot cargo" legislation so as to create a separate federal remedy not available in the enforcement of other unfair labor practices. As the Trustees point out in their Reply Memorandum at 11-12, the purpose of the "unenforceable and void"

[8.] In so holding the Court relied on Corbin on Contracts which explains:

There are cases in which the making of a bargain may be prohibited, even though the performances agreed upon are all perfectly lawful . . . . (For example), problems arise with respect to a bargain in unreasonable restraint of trade, the bargain being illegal although the performances promised are not; also with respect to the transaction of business without a license. It will be found that the determination of divisibility may depend as much upon the remedy that is sought (specific performance, injunction, damages, restitution, etc.) as upon the nature and extent of the illegality. 6A Corbin on Contracts § 1520 at 755-56 (1962).

[9.] The Court notes that Kaiser has failed to seek affirmative relief by availing itself of the powerful treble damage remedy provided for claimants who can demonstrate injury resulting from a restraint of trade such as that alleged here by way of defense.

language "was to ensure that the 8(e) prohibitions would reach all contracts even those in effect at the time of the enactment of the legislation."

Examination of the relevant legislative history supports rather than detracts from this Court's tentative construction of Section 8(e) and its proper application to the case at bar. Kaiser's reference to Senator Goldwater's remarks on the impact of Section 8(e) fully comports with the Court's **[**14]** view that the Trustees are not seeking damages but are attempting to recover agreed upon compensation which is in part measured by the amount of coal purchased by Kaiser. See Kaiser Memorandum at 18, n.22 Quoting II Legislative History of the Labor-Management Reporting and Disclosure Act of 1959 at 1857 (hereinafter "II Legislative History"). In addition, remarks made by Senator Kennedy, one of the sponsors of the bill, indicate his belief that Section 8(e) was intended simply to create a new unfair labor practice enforceable by the NLRB:

> Tomorrow, after thinking about it overnight, we might decide whether we should consider giving priority to the handling of unfair practices arriving under this provision. We should consider whether we ought to give priority to any unfair labor practice charges which might come to the attention of the Board in this particular category.

II Legislative History at 1163.

Cases cited by Kaiser do not undercut the Court's conclusion that it cannot entertain a Section 8(e) defense. Decisions such as *Smith v. Evening News Association, 371 U.S. 195, 83 S. Ct. 267, 9 L. Ed. 2d 246 (1962)* only hold that "(t)he authority of the Board to deal with **[**15]** an unfair labor practice which also violates a collective bargaining contract is not displaced by § 301, but it is not exclusive and does not destroy the jurisdiction of the courts in suits under § 301." *Id. at 197, 83 S. Ct. at 269*. Thus, federal courts are not precluded from deciding contract claims under the express grant of jurisdiction under Section 301 of the Labor-Management Relations Act, *29 U.S.C. § 185*, simply because the breach of contract might also be an unfair labor practice.

[*917] In *Connell Construction Co. v. Plumbers & Steamfitters Local Union No. 100, 421 U.S. 616, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)*, the Court was not confronted with an agreement claimed to constitute an unfair labor practice involving complex questions of intent and effect. Rather the Court was presented a task for which it is ideally suited; that is, balancing the labor and antitrust policy while determining whether the construction industry proviso of Section 8(e) removed certain activity from the reach of the antitrust laws. The Court agrees with plaintiffs' observation that the "collateral" labor law issue involved in Connell is very different from the question Kaiser is asking **[**16]** this Court to resolve, a question well beyond " "the conventional experience of judges' " which raises issues " "within the special competence' " of the NLRB. *International Brotherhood of Boilermakers, Iron Shipbuilders, Blacksmiths, Forgers and Helpers v. Hardeman, 401 U.S. 233, 238-39, 91 S. Ct. 609, 28 L. Ed. 2d 10 (1971)*. [10] See *Huge et al. v. Long's Hauling Co., Inc., 580 F.2d 457 (3d Cir. 1978)*.

The Court concludes that the record in this case does not raise any genuine issue of material fact and that the Trustees are entitled to summary judgment. An order reflecting the judgment of the Court and awarding appropriate relief, including the award of reasonable **[**17]** attorneys' fees, has been entered previously.

End of Document

---

[10] The memoranda submitted by the parties demonstrate that the issues raised by the attempt to enforce the purchase-of-coal clause are of central importance to the national labor policy and that the NLRB has consistently exercised its jurisdiction to resolve Section 8(e) issues raised throughout the evolution of the purchase-of-coal clause.

HN4[] **Antitrust & Trade Law, Sherman Act**

Section 1 of the Sherman Act has been construed for the most part to proscribe only those combinations that unduly restrain trade. In the classical § 1 controversy, therefore, a rule of reason is applied, and the plaintiff must prove that the combination or conspiracy produced adverse, anti-competitive effects within relevant product and geographic markets.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN5[] **Sherman Act, Claims**

The per se violations of the Sherman Act, those requiring no proof of an actually harmful impact, are specific exceptions to the general rule of reason.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN6[] **Antitrust & Trade Law, Sherman Act**

Per se violations of the Sherman Act are agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN7[] **Practices Governed by Per Se Rule, Boycotts**

Among those business practices that have been treated as per se violations are price fixing, resale price maintenance, group boycotts, tying arrangements, and certain types of reciprocal dealing.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Interbrand competition between manufacturers of different brands of the same commodity has been labelled the primary concern of ***antitrust law***. Nonetheless, intra-brand competition between sellers of the same product produced by a single manufacturer has not been of so little importance as never to merit the protection of a per se rule.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Law > Distributorships & Franchises > Termination > General Overview

Business & Corporate Law > Distributorships & Franchises > General Overview

HN9[] **Antitrust & Trade Law, Sherman Act**

It does not follow from the fact that a manufacturer may, when franchising a dealer, commit itself not to franchise another in a territory defined by the manufacturer, that it may, having earlier franchised two or more dealers, agree at the request of one to terminate the others.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN10[] **Antitrust & Trade Law, Sherman Act**

When a marketing decision, although ostensibly taken by a manufacturer, is in fact the result of pressure from another customer, such a decision must be scrutinized more closely than solely unilateral action might be. The court recently observed in a different context that particularly where the refusal to deal is not unilateral but rather is prompted by an understanding with other parties, an antitrust violation may be found, either by application of a per se rule or through a rule of reason analysis.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Cartels & Horizontal Restraints > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

When a manufacturer acts on its own, in pursuing its own market strategy, it is seeking to compete with other manufacturers by imposing what may be defended as reasonable vertical restraints. However, if the action of a manufacturer or other supplier is taken at the direction of its customer, the restraint becomes primarily horizontal in nature in that one customer is seeking to suppress its competition by utilizing the power of a common supplier. Therefore, although the termination in such a situation is, itself, a vertical restraint, the desired impact is horizontal and on the dealer, not the manufacturer, level.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN12[] **Antitrust & Trade Law, Sherman Act**

Price is the central nervous system of the economy, and an agreement that interferes with the setting of price by free market forces is illegal on its face.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN13[] **Price Fixing & Restraints of Trade, Vertical Restraints**

If the purpose and effect of the challenged conduct is to restrain price movement and the free play of market forces, it is then illegal per se violation of the Sherman Act.

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Vertical Restraints > General Overview

HN14[] **Antitrust & Trade Law, Sherman Act**

Any combination, which tampers with price structures, is engaged in an unlawful activity. Even though the members of the price-fixing group were in no position to control the market, to the extent that they stabilized prices they would be directly interfering with the free play of market forces.

Torts > ... > Commercial Interference > Contracts > General Overview

HN15[] **Commercial Interference, Contracts**

One who, without a privilege to do so, induces or otherwise purposely causes a third person not to (a) perform a contract with another or, (b) enter into or continue a business relation with another is liable to the other for the harm caused thereby.

Torts > ... > Commercial Interference > Contracts > General Overview

HN16[] **Commercial Interference, Contracts**

One who purposely causes a third person not to enter into or continue a business relation with another in order to influence the other's policy in the conduct of his business is privileged, if (a) the actor has an economic interest in the matter with reference to which he wishes to influence the policy of the other and (b) the desired policy does not illegally restrain competition Or otherwise violate a defined public policy and (c) the means employed are not improper.

Opinion

[*165] OPINION OF THE COURT

We are confronted in this appeal with the termination, by a manufacturer of kitchen cabinets, of one of its customers, a discount house, at the urging of another customer, a retailer, allegedly because of price considerations. Although the manufacturer's action was destructive to competition between the two customers, under the circumstances present here the plaintiff may recover only if the challenged conduct is termed a Per se violation of the Sherman Act, because under a "rule of reason" analysis the necessary anti-competitive effects as to a particular **[**2]** commodity in a relevant market cannot be proven. [1] Inasmuch as we believe, based on the allegations set forth by the plaintiff, that a Per se violation of the Act might be found, we reverse the summary judgment entered in favor of the defendants, and remand the case for trial.

I.

---

[*] Honorable Charles R. Weiner, United States District Judge for the Eastern District of Pennsylvania, sitting by designation.

[1] After discovery was completed, plaintiff filed a pretrial narrative statement that did not, and presumably could not, allege the harmful economic effects necessary to make out a § 1 violation under the rule of reason analysis. Under Local Rule 5. II. G. of the Western District of Pennsylvania, such evidence may not be introduced at trial because of the pretrial narrative statement and plaintiff's position at pretrial conference.

Plaintiff, Cernuto, Inc. (Cernuto), is a seller in Western Pennsylvania of supplies and appliances used in the construction or remodeling of buildings. One of these products is kitchen cabinets. Beginning in March, 1974, United Cabinet Corporation (United), through its sales representative, Robert L. **[**3]** Lappin Company (Lappin), agreed to supply Cernuto with United cabinets for at least a two year period. In return Cernuto agreed to promote, display and sell United's cabinets, and undertook to advertise them and alter its display area so as to feature them prominently. Only three months after entering into the contract, however, Lappin informed Cernuto that United would cease supplying the cabinets. Plaintiff alleges that Famous Furnace & Supply Co. (Famous), a retail store selling United cabinets in the same competitive area as Cernuto, complained to United about the discounter's price competition. Because this appeal concerns a grant of summary judgment, we must view the record in the light most favorable to the plaintiff, and consequently must infer that Famous' conduct was the cause of United's decision to terminate Cernuto's supply, and that Famous was motivated by direct price competition between it and Cernuto. [2]

[4]** Cernuto brought the present action against United, Lappin, and Famous, alleging, Inter alia, conduct violative of § 1 of the Sherman Act. After completion of discovery and the filing of pretrial narrative statements, defendants moved for summary judgment on two counts of the complaint, including the Sherman Act claim. The district judge concluded that plaintiff could not recover on these counts and that there was no just reason for delay. He therefore entered a judgment as to both counts, and Cernuto took a timely appeal to this Court. [3]

[5]** **[*166]** II.

Because almost all business agreements may be interpreted as restraining trade to some degree, § 1 of the Sherman Act ***HN4***[] has been construed for the most part to proscribe only those combinations that "unduly" restrain trade. In the classical § 1 controversy, therefore, a "rule of reason" is applied, and the plaintiff must prove "that the combination or conspiracy produced adverse, anti-competitive effects within relevant product and geographic markets . . .." [4] **[**6]** Thus, to demonstrate an antitrust violation under the "rule of reason" in the present case, Cernuto would have to show an actual anti-competitive impact on the sale of cabinets in Western Pennsylvania. However, Cernuto does not allege, and apparently cannot prove, such harmful effects. Other sources of cabinets were available, and it is clear from its pretrial narrative statement that plaintiff was not prepared to offer any market analyses at trial. Plaintiff's claim, therefore, is grounded entirely on the alleged Per se illegality of the defendants' combination. [5]

HN5[] The Per se violations of the Sherman Act those requiring no proof of an actually harmful impact are specific exceptions to the general rule of reason. They were described by Justice Black in *Northern Pacific Railroad Co. v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545 (1958)*, as:

---

[2] See *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)* ***HN1***[] (non-moving party entitled to have record viewed in the light most favorable to it). We note that ***HN2***[] summary judgment is to be used sparingly in complex antitrust litigation. Id.

[3] The complaint included seven counts: one count charging violation of § 1 of the Sherman Act (count 1), two counts charging breach of contract (counts 2 and 3), a count charging wrongful cancellation of the contract (count 4), a recoupment count (count 5), a count alleging tortious interference with contractual relations (count 6), and a count alleging unfair trade practices (count 7). The district court granted summary judgment as to counts 1 and 6, and retained jurisdiction over the other counts. Only these two counts, then, are before this Court.

HN3[] Under Fed.R.Civ.Proced. 54(b) the district court was empowered to enter a final judgment as to some claims without deciding others. This Court has jurisdiction to consider appeals from such judgments under *28 U.S.C. § 1291*. See Wright & Miller, Federal Practice and Procedure, § 2657.

[4] *Martin B. Glauser Dodge Co. v. Chrysler Corp., 570 F.2d 72, 81 (3d Cir. 1977)*.

> . . . ***HN6***[] agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use.

HN7[] Among those business practices that have been treated as Per se violations are price fixing, [6] **[**8]** resale price maintenance, [7] group boycotts, **[**7]** [8] tying arrangements, [9] and certain types of reciprocal dealing. [10] The question we must consider is whether the conduct at issue here a manufacturer deliberately withdrawing its product from a distributor that resold it for a price less than its competitors at the request of a competitor should be classified as a Per se violation of the Act. Following Justice Black's formulation, the activity under consideration in this case must be seen to have a pernicious effect on competition without having any redeeming virtue. The pernicious effect is apparent: one competitor has succeeded in excluding another from dealing in United cabinets through a combination with United and its agent, and, in so doing, has eliminated the possibility of price competition by the foreclosed dealer. Although this harm may have its impact solely in the market for United kitchen cabinets, rather than in the general market for kitchen cabinets, it is not for that reason, beyond the reach of the antitrust laws. [11]

[9]** **[*167]** The difficult problem here, as we read the case law, is whether the business decision that has been brought into question has the same redeeming pro-competitive virtues that have been relied upon in rejecting a Per se rule in other arguably similar cases. The conduct at issue, it might be said, is merely a decision by a manufacturer to terminate a customer. It is therefore, the argument goes, comparable to the conduct at issue in *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*, a case notable for the importance the Supreme Court placed on the pro-competitive aspects of the manufacturer's marketing plan. There, the Court upheld the right of a company to terminate a distributor of its television sets when that distributor began to sell them at an outlet outside of its allotted territory. The Supreme Court reasoned that the manufacturer's exclusive-franchise marketing plan was in fact beneficial to competition among the various television manufacturers and should therefore be governed by a "rule of reason."

For the most part, the Supreme Court has been disinclined to apply harsh or rigorous rules when reviewing **[**10]** unilateral decisions made by a single manufacturer in arranging its distribution structure. The interest of the manufacturer in controlling the marketing of its own product has been thought to justify restrictions on those who distribute it, or those who would like to do so. Thus, a manufacturer may sell its product to whomever it wishes, and a unilateral refusal to deal has not been considered to be a violation of the Act. [12] **[**11]** Moreover, a manufacturer may include in its marketing strategy certain restraints designed to improve its overall competitive position. Nor is it either uncommon or illegal for a manufacturer to enter into contracts that provide particular customers exclusive

10 *United States v. Griffith, 334 U.S. 100, 68 S. Ct. 941, 92 L. Ed. 1236 (1948)*.

11 ***HN8***[] Interbrand competition competition between manufacturers of different brands of the same commodity has been labelled the "primary concern of ***antitrust law***." *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 52 n.19, 97 S. Ct. 2549, 53 L. Ed. 2d 568*. Nonetheless, intrabrand competition competition between sellers of the same product produced by a single manufacturer has not been of so little importance as never to merit the protection of a Per se rule. See, e. g., *United States v. General Motors Corp., 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)* (Chevrolet automobiles); *United States v. Parke, Davis & Co., 362 U.S. 29, 80 S. Ct. 503, 4 L. Ed. 2d 505 (1960)* (Parke, Davis pharmaceutical products).

12 See, e. g., *United States v. Colgate & Co., 250 U.S. 300, 39 S. Ct. 465, 63 L. Ed. 992 (1919)*.

rights to sell the product in designated geographical areas. [13] And, under certain circumstances, a manufacturer may change its strategy, franchising new dealers or substituting new dealers for less productive old ones. [14] The result in GTE Sylvania, then, is not out of keeping with the law's traditional tolerance of unilateral decisions on the part of a manufacturer.

The ultimate reach of the GTE Sylvania decision is still uncertain, and continues to be a subject of considerable controversy, [15] but we are not persuaded that the **[*168]** law's tolerance of reasonable **[**12]** restraints designed to improve the manufacturer's competitive position may be converted into a blanket allowance of Any marketing decision made by a manufacturer. As Professor Sullivan has suggested in his treatise on the antitrust laws:

[13]**

> HN9[] "It does not follow from the fact that a manufacturer may, when franchising a dealer, commit itself not to franchise another in a territory defined by the manufacturer, that it may, having earlier franchised two or more dealers, agree at the request of one to terminate the others." [16]

HN10[] When a marketing decision, although ostensibly taken by a manufacturer, is in fact the result of pressure from another customer, such a decision must be scrutinized more closely than solely unilateral action might be. This Court recently observed in a different context:

> Particularly where the refusal to deal is not unilateral but rather is prompted by an understanding with other parties, an antitrust violation may be found, Either by application of a per se Rule or through a "rule of reason' analysis. [17]

[14]**

Thus, to the extent that the conduct here differs from the conduct held to be justifiable in other cases involving manufacturer decisionmaking, application of a Per se rule may be warranted.

Two of the most crucial differences between the conduct under consideration here and other accepted manufacturer actions are, upon analysis, readily apparent. HN11[] When a manufacturer acts on its own, in

---

[13] (A) manufacturer of a product other and equivalent brands of which are readily available in the market may select his customers, and for this purpose he may "franchise" certain dealers to whom, alone, he will sell his goods . . . .

United States v. Arnold, Schwinn & Co., 388 U.S. 365, 376, 87 S. Ct. 1856, 18 L. Ed. 2d 1249 (1967), Overruled on other grounds, Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977).

[14] " . . . (I)t is indisputable that a single manufacturer or seller can ordinarily stop doing business with A and transfer his business to B and that such a transfer is valid even though B may have solicited the transfer and even though the seller and B may have agreed prior to the seller's termination of A."

Ark Dental Supply Co. v. Cavitron Corp., 461 F.2d 1093, 1094 (3d Cir. 1972).

[15] It might be argued that GTE Sylvania, if pressed to its logical conclusion, may be read to undermine all Per se Rules applied to primarily vertical restraints. Cf. Handler, Changing Trends in Antitrust Doctrines: An Unprecedented Supreme Court Term 1977, 77 Colum.L.Rev. 979, 987 (1977) (questioning continuing validity of a previous decision); Posner, The Rule of Reason and the Economic Approach: Reflections on the Sylvania Decision, 45 U.Chi.L.Rev. 1 (1977) (evaluating effect of GTE Sylvania on precedents other than Schwinn). It should be noted however, that the GTE Sylvania Court was careful to preserve the Per se analysis traditionally applied to cases involving price-fixing or resale price maintenance, 433 U.S. at 51 n.18, 97 S. Ct. 2549, and we believe it would be ill advised to presume that so radical a change in existing law as the abolition of Per se rules in all arguably vertical cases was intended, absent an express declaration to that effect. Moreover, although we are confronted here with an apparently vertical conspiracy, the principal impact of that conspiracy, as we note Infra at page 168, is horizontal rather than vertical in nature.

[16] L. Sullivan, Antitrust, § 148 (1977).

[17] Harold Friedman, Inc. v. Thorofare Markets, Inc., 587 F.2d 127, 142 (3d Cir. 1978) (emphasis added).

pursuing its own market strategy, it is seeking to compete with other manufacturers by imposing what may be defended as reasonable vertical restraints. This would appear to be the rationale of the GTE Sylvania decision. However, if the action of a manufacturer or other supplier is taken at the direction of its customer, the restraint becomes primarily horizontal in nature in that one customer is seeking to suppress its competition by utilizing the power of a common supplier. Therefore, although the termination in such a situation is, itself, a vertical restraint, the desired impact is horizontal and on the dealer, not the manufacturer, level. **[**15]**

The importance of the horizontal nature of this arrangement is illustrated by *United States v. General Motors Corp., 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415 (1966)*. Although General Motors, the manufacturer, was seemingly imposing vertical restraints when it pressured recalcitrant automobile dealers not to deal with discounters, the Supreme Court noted that in fact these restraints were induced by the dealers seeking to choke off aggressive competitors at their level, and found a Per se violation, rejecting the suggestion that only unilateral restraints were at issue. [18] So here, if United and Lappin acted at Famous' direction, both the purpose and effect of the termination was to eliminate competition at the retail level, and not, as in GTE Sylvania, to promote competition at the manufacturer level. Accordingly, the pro-competitive redeeming virtues so critical in GTE Sylvania may not be present here.
[16]**

Equally important, the motivating factor in Famous' efforts and therefore the resulting conspiracy was at least according to Cernuto's theory of the case price. The pre-eminence of price considerations in ***antitrust law*** was summarized recently by Justice Stevens:

> ***HN12***[] "Price is the "central nervous system of the economy,' and an agreement that "interfere(s) with the setting of price by free market forces' is illegal on its face." [19]

It is true that the alleged combination in the case at hand did not set prices at an **[*169]** exact level. But such a traditional conspiracy is not a Sine qua non of a Per se violation of the Act under the price-fixing rubric. ***HN13***[] If the purpose and effect of the challenged conduct is to restrain price movement and the free **[**17]** play of market forces, it is then illegal Per se. As the Supreme Court stated in the celebrated price-fixing case, United States v. Socony-Vacuum Oil Co.:

> ***HN14***[] Any combination which tampers with price structures is engaged in an unlawful activity. Even though the members of the price-fixing group were in no position to control the market, to the extent that they . . . stabilized prices they would be directly interfering with the free play of market forces. [20]

Cernuto's pretrial narrative statement points to the centrality of price in the combination of Famous, Lappin, and United to cut off plaintiff. The thrust of Famous' communication to United, it is alleged, was "that (Cernuto) was selling United products in Famous' territory and that (Cernuto) was a low price volume dealer." [21] Cernuto is a "discount house", and, it must be presumed, was prepared to sell United cabinets at prices lower than those offered **[**18]** by Famous. Famous' concern, understandably, was that Cernuto's low prices would force Famous' own prices down if it were to compete effectively in selling United cabinets. By prevailing upon United and Lappin to terminate their contract with Cernuto, Famous effectively eliminated the threatened competition and was able to maintain prices at its own preferred levels. It is just this type of conduct that the antitrust laws were designed to reach.

---

[18] *384 U.S. at 144-45, 86 S. Ct. 1321*. General Motors, like the present dispute, involved a combination with conspirators at different levels of the distribution chain. Unlike this case, however, there was more than one conspirator at the dealer level.

[19] *United States v. National Society of Professional Engineers, 435 U.S. 679, 692, 98 S. Ct. 1355, 1365, 55 L. Ed. 2d 637 (1978)*.

[20] *310 U.S. 150, 221, 60 S. Ct. 811, 843, 84 L. Ed. 1129 (1940)*.

[21] 53a.

There are, it must be noted, a scattering of cases suggesting a result contrary to the one we reach today. The best known is the so-called Packard case. [22] **[**20]** There, the most successful car dealer in the Baltimore area threatened to cease selling the manufacturer's automobiles unless the dealer's competitors were terminated and it was granted an exclusive right for the entire region. The manufacturer was not in a strong enough overall competitive position to resist the demand of this dominant dealer, and acquiesced. Notwithstanding the horizontal impact of **[**19]** the dealer's action, the court reversed a jury verdict for plaintiff and refused to find an antitrust violation on the part of the manufacturer. A more recent case is Oreck Corp. v. Whirlpool Corp. [23] There, the Court of Appeals for the Second Circuit, sitting En banc, reversed a jury verdict for a plaintiff that had been deprived of its profitable trade in Whirlpool vacuum cleaners, as a result of an agreement between Whirlpool and Sears & Roebuck Co., the plaintiff's principal competitor. The court found the trial judge's instructions to the jury, which left open the possibility of finding a Per se Violation on such facts, to be erroneous, and remanded for a new trial presumably under a rule of reason analysis.

As a preliminary matter, we are not convinced that this Court would necessarily have decided Packard and Oreck the same way had we been presented with the identical factual configurations. But whatever result we might have reached in such situations, those two cases are distinguishable from this one. Packard, often criticized on its own facts, dealt with a manufacturer that was struggling to maintain a declining competitive position, and is frequently explained as an example of the failing-company doctrine. Moreover, in Packard the dealer was seeking not to fix prices but to secure an exclusive franchise, a form of marketing strategy that is not without certain **[*170]** overall competitive advantages. In contrast, Famous was not the exclusive dealer of United products in Western Pennsylvania and, at least as far as the record shows, was not seeking such a position. Instead it was desirous of eliminating a dealer that was providing price competition. **[**21]**

Similarly, in Oreck there was no proof that Sears, the aggressive dealer, was inspired by price. In fact, Sears was selling Whirlpool vacuum cleaners at prices below those offered by plaintiff Oreck. [24] Price control, then, was not the likely purpose of the Whirlpool-Sears agreement. Furthermore, Whirlpool did no more than refuse to renew a contract with Oreck, whereas here United breached its two year contract with Cernuto after only three months. Whirlpool's decision may be considered to be more an element of its own marketing strategy, in contradistinction to United's decision, which, given the sudden repudiation of a recently made agreement, is alleged to have been predominantly the result of customer pressure.

Thus, despite Packard And Oreck, the situation present in this case may be fairly considered to raise the possibility of a Per se violation of the Sherman Act. Given the alleged anti-competitive and arguably horizontal impact of United's decision, and given the price **[**22]** orientation of the alleged conspiracy, we cannot say that a Per se violation of the Act may not be shown. If Cernuto can prove at trial that United, Lappin and Famous conspired to protect Famous from price competition by Cernuto, and that United and Lappin terminated Cernuto at Famous' request and in pursuit of a price related end, then it can prevail on a price-fixing theory notwithstanding its failure to show any impact on competition involving kitchen cabinet sales in Western Pennsylvania. Of course, at trial the defendants may be able to demonstrate that the evidence does not at all conform to what plaintiff has alleged. If it could be shown, for example, that United's decision to terminate Cernuto was in fact its own the result of its own marketing strategy and judgment then notwithstanding Famous' actions, the alleged conduct would be essentially unilateral in nature and might be found to possess the pro-competitive redeeming virtues that would defeat the application of a Per se rule. [25] Similarly, if defendants can demonstrate that their actions were not motivated solely

[24] *Id. 130*.

by considerations of price then the use of a Per se rule might be inappropriate. But at present in reviewing **[**23]** a grant of summary judgment we must assume that the facts are otherwise. Under these circumstances, a Per se application of § 1 of the Sherman Act may well be warranted.

III.

The other count of the complaint ruled upon by the district court alleges tortious interference with a business contract. All parties are agreed that our resolution of this question must turn on whatever decision is reached on the antitrust claim. Pennsylvania has adopted § 766 of the Restatement of Torts [26] which applies only to those who act "without a privilege to do so." Lappin **[**24]** maintains that under § 771 of the Restatement [27] **[**25]** it had such a privilege, **[*171]** but acknowledges that the privilege would be destroyed were its actions found to be violative of the antitrust laws. [28] Because we have concluded that an antitrust violation might be found, we shall reverse the district court's judgment on the sixth count of the complaint as well as on the first.

The judgment of the district court will be reversed, and the case will be remanded for action consistent with this opinion.

End of Document

---

[25] On the other hand, if United acted in pursuit of its own policy, but that policy was itself a form of resale price maintenance, involving other parties in its enforcement, it might constitute a Per se violation of the Act under *United States v. Parke, Davis & Co., 362 U.S. 29, 80 S. Ct. 503, 4 L. Ed. 2d 505 (1960)*, and an antitrust violation may be made out, albeit under a slightly different rubric than the parties have argued heretofore.

[26] Section 766 of the Restatement of Torts reads:

Except as stated in Section 698, ***HN15***[] one who, Without a privilege to do so, induces or otherwise purposely causes a third person not to

(a) perform a contract with another or,

(b) enter into or continue a business relation with another is liable to the other for the harm caused thereby.

(emphasis added).

[27] Section 771 of the Restatement of Torts reads:

HN16[] One who purposely causes a third person not to enter into or continue a business relation with another in order to influence the other's policy in the conduct of his business is Privileged, if

(a) the actor has an economic interest in the matter with reference to which he wishes to influence the policy of the other and

(b) The desired policy does not illegally restrain competition Or otherwise violate a defined public policy and

(c) the means employed are not improper.

(emphasis added).

HN2[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

Although Congress' primary concern in enacting the McCarran-Ferguson Act (Act), *15 U.S.C.S. §§ 1011-1015*, was to ensure that the states would continue to be empowered to regulate the business of insurance, an additional concern was the applicability of the antitrust laws to the industry. Instead of a total exemption, Congress provided that the federal antitrust laws are applicable to the business of insurance to the extent that such business is not regulated by state law. *15 U.S.C.S. § 1012(b)*. Moreover, the Sherman Act remains applicable to any agreement to boycott, coerce, or intimidate or act of boycott, coercion or intimidation. *15 U.S.C.S. § 1013(b)*. Thus, there are three distinct elements to the Act's limited antitrust exemption: 1) the challenged practices must constitute the "business of insurance"; 2) they must be regulated by state law; and 3) they must not take the form of "boycott, coercion or intimidation."

HN3[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

McCarran-Ferguson does not exempt, the business of insurance companies from the antitrust laws; it exempts only the "business of insurance." In creating the exemption, Congress was concerned with the type of state regulation that centers around the contract of insurance. The relationship between insurer and insured, the type of policy which could be issued, its reliability, interpretation, and enforcement -- these were the core of the "business of insurance." The primary elements of an insurance contract are the spreading and underwriting of a policyholder's risk.

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Healthcare Law > Healthcare Litigation > Antitrust Actions > Insurers

Insurance Law > Industry Practices > Federal Regulations > General Overview

HN4[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

Determination of the rights of an insured under his policy is the "core of the business of insurance." Peer review, moreover, involves the spreading of risk, an indispensable element of the "business of insurance."

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Healthcare Law > Healthcare Litigation > Antitrust Actions > Insurers

Insurance Law > Industry Practices > Federal Regulations > General Overview

HN5[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

A party need not be defined by state law as an insurance company to be engaged in the "business of insurance."

Antitrust & Trade Law > Exemptions & Immunities > McCarran-Ferguson Act Exemption

Healthcare Law > Healthcare Litigation > Antitrust Actions > Insurers

Insurance Law > Industry Practices > Federal Regulations > General Overview

HN6[] **Exemptions & Immunities, McCarran-Ferguson Act Exemption**

The second element of the McCarran-Ferguson exemption is that the challenged activity be "regulated by state law." *15 U.S.C.S. § 1012(b)*. The state regulation which Congress provided should operate to displace federal law means regulation by the state in which the challenged activity is practiced and has its impact.

HN10[] **Summary Judgment, Opposing Materials**

A party opposing a motion for summary judgment simply cannot make a secret of his evidence until the trial, for in doing so he risks the possibility that there will be no trial. *Fed. R. Civ. P. 56(e)* provides that a party opposing summary judgment may not rest upon the mere allegations of his pleadings but must set forth specific facts showing that there is a genuine issue for trial. Although summary judgment must be used sparingly in antitrust actions, *Rule 56(e)* remains fully applicable and significant evidence in support of a claim must be produced if a well-supported motion for summary judgment is to be defeated. *Rule 56(e)* should not, in effect, be read out of antitrust cases and permit plaintiffs to get to a jury on the basis of the allegations in their complaint, coupled with the hope that something can be developed at trial in the way of evidence to support those allegations.

Civil Procedure > ... > Subject Matter Jurisdiction > Supplemental Jurisdiction > General Overview

HN11[] **Subject Matter Jurisdiction, Supplemental Jurisdiction**

Needless decisions of state law should be avoided both as a matter of comity and to promote justice between the parties, by procuring for them a surerfooted reading of applicable law. Certainly, if the federal claims are dismissed before trial, even though not insubstantial in a jurisdictional sense, the state claims should be dismissed as well.

Opinion by: GAGLIARDI

Opinion

GAGLIARDI, D.J.

Plaintiff A. Alexander Pireno, a licensed New York chiropractor, has commenced this action for injunctive and declaratory relief under the federal antitrust laws and for damages under state libel law. No jurisdictional basis is alleged in the complaint, but jurisdiction lies pursuant to *28 U.S.C. § 1337* and principles of pendent jurisdiction. At issue in this case is the defendants' "peer review" system, by which a committee of licensed chiropractors are utilized to review the "reasonableness" of claims submitted by insureds to their insurance company under policies providing for chiropractic coverage. Plaintiff alleges that through the peer review process the defendant Union **[*2]** Labor Life Insurance Company ("ULL") has conspired with the New York State Chiropractic Association ("NYSCA") and the International Chiropractors Association to fix the prices plaintiff charges for his professional services in violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1*. ULL and NYSCA have moved for summary judgment dismissing the complaint pursuant to *Rule 56, Fed. R. Civ. P.* For the reasons stated below, the motion is granted.

Statement of Facts

Defendant NYSCA, a New York not-for-profit corporation, is a professional association whose membership consists solely of licensed New York chiropractors. In the early 1970's the NYSCA became concerned about the reluctance of many health insurance companies to provide coverage for chiropractic services. Moreover, those companies that did provide such coverage disallowed many of the claims submitted to them on the advice of the doctors of medicine whom they employed to evaluate claims and who were skeptical of chiropractic services. In an effort to increase the number of insurance companies providing chiropractic coverage in their health policies and to reduce the number of claims denied by those companies providing coverage, **[*3]** the NYSCA, in 1971, established a Peer Review Committee (the "Committee"). NYSCA thereafter offered the Committee's claims review services to various insurance companies, including defendant ULL. In January, 1973, ULL accepted NYSCA's offer and proceeded to submit claims for chiropractic services submitted by its insureds for the Committee's review. The Committee performs this service without charge.

ULL is a licensed Maryland insurer which does business in New York. ***HN1***[] New York requires insurers like ULL to reimburse insureds for chiropractic treatment whenever a policy "provides for reimbursement for any service which is within the lawful scope of practice of a duly licensed chiropractor." New York Ins. Law § 221(5)(e) (McKinney Cum. Supp. 1978-79). ULL issues several different policies in which the coverage includes chiropractic services. Most of the plaintiff's patients who have submitted claims to ULL have been members of groups who had selected "basic" and "major medical" coverages for non-occupational sickness or accidental bodily injury. These policies provide that coverage is limited, inter alia, to "reasonable charges for necessary medical care and services." Other **[*4]** patients of plaintiff have had "supplemental accident expenses" coverage with ULL, providing reimbursement for charges for treatment of non-occupational, accidental bodily injuries.This coverage is limited to charges "not in excess of the regular and customary charges for the services and treatment furnished." In all instances, coverage is limited to those services lawfully within the scope of a chiropractor's services. [1] When ULL decides not to pay all or part of a claim for chiropractic services because it believes that the charges are not "reasonable" or are "in excess of the regular and customary" amount, it submits the claim to the Committee for its evaluation. [2]

[*5] Upon receipt of a request for review, the Committee sends a questionnaire form to the treating chiropractor. In addition to providing the information asked for in the questionnaire, the chiropractor will often provide additional documentation, including x-rays, to substantiate his patient's claim. The Committee's Procedural Guidelines provide that in formulating its opinions as to the "reasonableness" of a treating chiropractor's charges, the Committee must take into consideration the following factors: the practitioner's experience and specialty degrees; the location of his office; the number of visits and amount of time spent with the patient; the patient's age, occupation, general physical condition and history of prior treatment; and x-ray findings. The Committee, however, does not undertake its own examination of the insured patient. A Committee opinion letter generally contains only information as to whether the number of visits and the fee charged for the services performed is "usual, reasonable and customary." The defendants claim that Committee opinions, once rendered, are disclosed only to the party requesting review, generally the insurer, and the treating chiropractor. **[*6]** Plaintiff, however, contends that insured patients also receive copies of Committee opinions.

The Committee's Procedural Guidelines provide that Committee opinions are not binding upon any of the parties involved unless they so agree and advise the Committee in writing prior to the commencement of review. Thus, after the Committee renders its opinion the insurer remains free to reject it and make its own determination of its liability under its policy. Moreover, absent his consent to a binding determination, the patient remains free to contest the insurer's evaluation of the "reasonableness" of his claim and may bring suit to enforce the terms of his policy. Similarly, if the treating chiropractor accepts an assignment of contractual rights from his patient he may sue the insurer to recover on the policy. If the chiropractor does not accept such an assignment, of course, the patient is obligated to pay the chiropractor's entire fee notwithstanding the refusal of the insurer to pay all or part of the claim. Plaintiff contends, however, that ULL has generally regarded Committee opinions as "binding" even when the parties have not consented to such an arrangement.

Plaintiff **[*7]** has been engaged in the practice of chiropractic medicine in the New York City area since 1960. He claims that over forty of his patients have had their claims reviewed by the Committee; NYSCA contends that only twelve claims submitted by plaintiff's patients have been the subject of peer review of which only four involved defendant ULL. Plaintiff never accepts an assignment from a patient whereby he agrees to accept insurance proceeds as full payment of his bill; on rare instances he has accepted assignments of proceeds as partial payment of his fee while reserving the right to proceed against the patient for the remainder. Rather, plaintiff's usual practice is to request, and receive, payment from the patient at the time services are rendered. Plaintiff has never been involved in a peer review determination to which the parties agreed to be bound as provided in the Committee's Procedural Guidelines. Thus, whatever effect the Committee's opinion may have on ULL's decision to pay an insured's claim, plaintiff has usually received his full fee in advance. While the defendants contend that plaintiff's

---

[1] In New York, a license to practice chiropractic is generally limited to the correction "by manual or mechanical means structural balance, distortion, or subluxation in the human body for the purpose of removing nerve interference", Education Law § 6551(1), (McKinney 1972), and a chiropractor may not prescribe or administer drugs or use diagnostic or therapeutic methods involving biological means. Id. § 6551(3).

[2] The request for peer review almost always comes from the insurer although, on occasion, chiropractors and their patients have requested peer review if the insurer has denied or reduced a claim and it is hoped that favorable review from the Committee might convince the insurer that the claim is reasonable. Thus, plaintiff has requested peer review of ULL's denials of his patients' claims on several occasions.

fees for chiropractic services are among the highest in the profession, plaintiff **[*8]** denies that his fees are any higher than other practitioners similarly situated.

Plaintiff alleges that the defendant's actions constitute a conspiracy to fix the prices plaintiff charges for his services in violation of *§ 1* of the Sherman Act. The alleged effects of the conspiracy have been: 1. to deprive plaintiff's patients of both the benefits of free competition in the acquisition of his services and the coverage to which they are entitled from ULL under the terms of their policies; and 2. to restrain plaintiff in his ability to make his chiropractic services available to the public. Plaintiff seeks declaratory and injunctive relief against the practice of peer review. Plaintiff also alleges that opinion letters issued by the Committee to plaintiff's patients have libeled him in the practice of his profession for which he seeks $1,000,000 in punitive damages. [3]

[*9] Discussion

A. The Sherman Act Claim

Defendants NYSCA and ULL have moved for summary judgment dismissing plaintiff's antitrust claim on several grounds. The principal defense raised by these defendants to this claim is the statutory exemption contained in the McCarran-Ferguson Act, *15 U.S.C. §§ 1011-1015*. For the reasons stated below, the court concludes that the defendants are exempt under this statute and plaintiff's Sherman Act claim must be dismissed.

The legislative history of the McCarran-Ferguson Act has been canvassed at length in two recent Supreme Court decisions, Group Life & Health Insurance Co. v. Royal Drug Co., 47 U.S.L.W. 4203 (February 27, 1979) ("Royal Drug") and *St. Paul Fire & Marine Insurance Co. v. Barry, 98 S. Ct. 2923 (1978)*. The law was enacted in 1945 in response to the Supreme Court's decision in *United States v. South-Eastern Underwriters Association, 322 U.S. 533 (1944)*, which held, contrary to well-established precedent, that the insurance industry was part of interstate commerce subject to Congressional regulation under the *commerce clause* and, moreover, that Congress did not intend to exempt the business of insurance from the operation of **[*10]** the Sherman Act. Royal Drug, supra, 47 U.S.L.W. at 4206; *Barry, supra, 98 S. Ct. at 2928-29*. ***HN2***[] Although Congress' primary concern in the wake of that decision was to ensure that the States would continue to be empowered to regulate the business of insurance, an additional concern was the applicability of the antitrust laws to the industry. Instead of a total exemption, Congress provided that the federal antitrust laws are applicable "to the business of insurance to the extent that such business is not regulated by State law." *15 U.S.C. § 1012(b)*. Moreover, the Sherman Act remains applicable "to any agreement to boycott, coerce, or intimidate or act of boycott, coercion or intimidation." *15 U.S.C. § 1013(b)*. Thus, there are three distinct elements to the Act's limited antitrust exemption: 1.the challenged practices must constitute the "business of insurance"; 2. they must be regulated by state law; and 3. they must not take the form of "boycott, coercion or intimidation." Royal Drug, supra, 47 U.S.L.W. at 4216 (dissenting opinion); 7 Von Kalinkowski, Antitrust Laws & Trade Regulation §§ 47.01-.03 (1978 ed.).

1. The Business of Insurance

HN3[] McCarran-Ferguson does not exempt, **[*11]** the business of insurance companies from the antitrust laws; it exempts only the "business of insurance." Royal Drug, supra, 47 U.S.L.W. at 4207 n. 18. In creating the exemption, "Congress was concerned with the type of state regulation that centers around the contract of insurance… The relationship between insurer and insured, the type of policy which could be issued, its reliability, interpretation, and enforcement -- these were the core of the 'business of insurance.'" *SEC v. National Securities Inc., 393 U.S. 453, 460 (1969)*. "The primary elements of an insurance contract are the spreading and underwriting

---

[3] *Rule 10(b), Fed. R. Civ. P.*, requires that the contents of each alleged claim be limited as far as practicable to a statement of a single set of circumstances and that each claim founded upon a separate transaction be stated in a separate count whenever separation facilitates the clear presentation of the matters set forth. In apparent disregard of this rule, the complaint amalgamates in a single count the federal antitrust claim and the state law defamation claim. Since the parties have treated the complaint as attempting to state two separate causes of action, the court will do so as well.

of a policyholder's risk." Royal Drug, supra, 47 U.S.L.W. at 4205. Accord, *SEC v. Variable Annuity Life Insurance Co., 359 U.S. 65, 73 (1959)*.

In support of their contention that their actions constitute the "business of insurance", the defendants have relied upon cases from several Courts of Appeals holding that "provider agreements" between insurance companies or health care organizations and the providers of health or other services are part of the "business of insurance" under the Act.See, e.g., Proctor v. State Farm Mutual Automobile Insurance Co., 561 F. d 262 (1977), **[*12]** cert. pending, No. 77-580; *Doctors, Inc. v. Blue Cross of Greater Philadelphia, 557 F.2d 1001 (3d Cir. 1976)*; *Frankford Hospital v. Blue Cross of Greater Philadelphia, 554 F.2d 1253* (3d Cir.), cert. denied, *434 U.S. 860 (1977)*; *Anderson v. Medical Service of the District of Columbia, 551 F.2d 304 (4th Cir. 1977)*; *Travelers Insurance Co. v. Blue Cross of Western Pennsylvania, 481 F.2d 80* (3d Cir.), cert. denied, *414 U.S. 1093 (1973)*. These cases hold that the close nexus between the cost of reimbursing insureds on their claims and the rates the insurer must charge necessarily brings agreements reducing the cost of providing covered services within the scope of the exemption. The Supreme Court's recent decision in Royal Drug effectively overrules this substantial body of precedent. The Court reasoned that the contracts that Blue Shield entered into with providers of pharmaceutical services were unrelated to the underwriting or spreading of risk among its insureds and were merely arrangements enabling Blue Shield to purchase goods and services, and thereby fulfill its underwriting obligations, at reduced cost.

The benefit promised to Blue Shield policyholders is that their premiums **[*13]** will cover the cost of prescription drugs except for a $2 charge for each prescription. So long as that promise is kept, policyholders are basically unconcerned with arrangements made between Blue Shield and participating pharmacies.

47 U.S.L.W. at 4205.

In the instant case, by contrast, ULL's insureds are intimately and directly concerned with the peer review arrangement between ULL and the NYSCA's Committee. Unlike the agreement between Blue Shield and participating pharmacies, the peer review arrangement between ULL and the Committee serves to define the precise extent of ULL's contractual obligations to its insureds under their policies. Peer review may enable ULL to reduce its costs, but it does so through interpretation of the contractual relationship between insurer and insured. ***HN4***[] Determination of the rights of an insured under his policy is the "core of the business of insurance." *SEC v. National Securities, Inc., supra, 393 U.S. at 460*. Peer review, moreover, involves the spreading of risk, an indispensable element of the "business of insurance." Royal Drug, supra, 47 U.S.L.W. at 4206 n.12. The defendants determine the extent to which an individual insured must bear **[*14]** the full cost of chiropractic services, or instead have that cost borne by the insurer (and, through higher premiums, his fellow insureds). The Committee's role in evaluating claims submitted for review is thus akin to that played by the licensed adjuster, long an important figure in the settlement of claims against insurers. [4] See 16 J. Appleman & J. Appleman, Insurance Law & Practice, §§ 8646-50 (1968 ed.). The court thus concludes that ULL and the Committee are engaged in the "business of insurance." [5]

---

[4] This court does not read Royal Drug to hold that any contractual arrangement between an insurer and a party other than an insured is outside the scope of the "business of insurance." Thus, the Supreme Court explicitly noted that Congress intended to make cooperative ratemaking efforts -- horizontal agreements among insurers -- exempt from the antitrust laws. 47 U.S.L.W. at 4207. Moreover, the Court stated that transactions between an insurer and its agents may also fall within the scope of the exemption. 47 U.S.L.W. at 4208 n.32. The Court distinguished insurer-agent agreements from the provider agreements at issue in Royal Drug, stating: Transactions between an insurer and an agent, unlike the Pharmacy Agreements, are wholly intra-industry; an insurance agent sells insurance while a pharmacy sells goods and services.

Id. In the case at bar, the Committee's sole function is peer review of submitted claims; it, too, functions solely within the industry of insurance.

[5] ***HN5***[] A party need not be defined by state law as an insurance company to be engaged in the "business of insurance." Thus, in Royal Drug, the Supreme Court noted that at the time of the enactment of the McCarran-Ferguson Act most states did not consider health care organizations like Blue Shield to be engaged in the insurance business. 47 U.S.L.W. at 4208-09. The court stated, however,

[*15] 2. Regulation by the State

HN6[] The second element of the McCarran-Ferguson exemption is that the challenged activity be "regulated by State law." *15 U.S.C. § 1012(b)*. "[The] state regulation which Congress provided should operate to displace… federal law means regulation by the State in which the [challenged activity] is practiced and has its impact." *FTC v. Travelers Health Ass'n., 362 U.S. 293, 299 (1960)*. The parties agree that New York -- the state in which plaintiff's practice is located and most of his patients reside -- is the applicable state jurisdiction.

New York has enacted a pervasive scheme of regulation and supervision of insurance. *HN7*[] Article IX-D of the Insurance Law prohibits any person [6] from engaging in any "unfair method of competition or unfair and deceptive act or practice in the business of insurance in accordance with the intent of Congress as expressed in [the McCarran-Ferguson Act]." Id. § 270. Among the prohibited practices is the unfair settlement of claims. Id. § 40-d, 273. The Superintendent of Insurance is empowered to issue cease and desist orders against such practices, id. § 276, and may investigate, hold hearings and issue reports **[*16]** concerning unfair practices not specified elsewhere in Article IX-D. Id. § 278. The practices complained of by plaintiff are clearly regulated by New York's insurance law. See *Dexter v. Equitable Life Insurance Society, 527 F.2d 233, 236* (2d Cir. 1975(.

Moreover, New York's own ***antitrust law*** proscribes the conduct alleged in the complaint. *HN8*[] The Donnelly Act states that every contract, agreement or conspiracy whereby a monopoly is or may be established is illegal. *New York General Bus. Law § 340* (McKinney 1968). The Act was amended in 1948 and specifically made applicable to "licensed insurers… and other persons and organizations subject to the provisions of the insurance law." Id. *§ 340(2)*. On this basis too, the McCarran-Ferguson exemption operates as a bar to plaintiff's federal antitrust claim. *Steingart v. Equitable Life Assurance Society, 366 F. Supp. 790, 793-94 (S.D.N.Y. 1973)*.

3. Boycott, Coercion or Intimidation

HN9[] Section 3(b) of **[*17]** the McCarran-Ferguson Act provides that the Sherman Act remains applicable "to any agreement to boycott, coerce or intimidate, or act of boycott, coercion or intimidation." *15 U.S.C. § 1013(b)*. The complaint does not allege that the defendant's acts constitute "boycott, coercion, or intimidation." Nor do the facts alleged in the complaint fall within the scope of this exception. "The generic concept of boycott refers to a method of pressuring a party with whom one has a dispute by withholding, or enlisting others to withhold, patronage or services from the target." *St. Paul Fire & Marine Ins. Co. v. Barry, supra, 98 S. Ct. at 2930*. Plaintiff does not claim that the defendants have refused to deal with plaintiff's patients. It is not disputed that ULL continues to issue policies to plaintiff's patients and to reimburse them for plaintiff's charges to the extent that they are "reasonable" or "not in excess of the regular and customary charges." Nor does the complaint allege that the defendants have induced plaintiff's patients to refuse to patronize plaintiff. The complaint alleges only a conspiracy to fix prices and "price-fixing, in the absence of any additional enforcement activity, **[*18]** has [not] been treated either as a 'boycott' or 'coercion.'" *Id. at 2932 n.18*. Accord, Proctor v. State Farm Mutual Auto Ins. Co., supra, 561 F.2d at 274. Nor do plaintiff's affidavits in opposition to the motion for summary judgment make any factual showing on the issue of boycott. Rather, plaintiff conclusorily states that:

When a patient is under treatment and submits a claim to his insurance carrier who in turn is told by the committee and repeats to the patient that the treatment he is receiving is excessive and unreasonable, he invariably stops treatment or questions the doctor's competence based upon the opinion of his "peers."…

This is not to say that the contracts offered by Blue Shield to its policyholders, as distinguished from its provider agreements with participating pharmacies, may not be the "business of insurance" within the meaning of the Act.

47 U.S.L.W. at 4210 n.37. See also *Lowe v. Aarco-American, Inc., 536 F.2d 1160, 1162 (7th Cir. 1976)* (per curiam) (premium finance company engaged in "business of insurance"); *Manasen v. California Dental Services, 424 F. Supp. 657, 662-66 (N.D. Cal. 1976)* (prepaid health care plan engaged in "business of insurance").

[6] The statute defines "person" to mean "any individual, corporation, association, partnership… and any other legal entity engaged in the business of insurance, including agents, brokers and adjusters." Ins. Law § 271.

While this plaintiff is in no position to demonstrate specifically which plaintiffs ceased treatment because of these statements, since each of the patients who did so became alienated from the plaintiff as a result of the statements made about his professional competence, he will clearly demonstrate at trial that this in fact, was the effect of the actions of the defendants.

(Plaintiff's Affidavit in Opposition to NYSCA's Motion for Summary Judgment, p. 19) (emphasis added).

The question at this stage of the proceedings is whether plaintiff **[*19]** has come forward with sufficient evidentiary support for a claim of boycott -- a claim not even raised in his complaint -- to justify a trial on the merits. Plaintiff cannot preserve the issue of boycott for trial while sitting on his evidence concerning the defendant's inducement of his patients to refuse to deal with him. ***HN10***[] "A party opposing a motion for summary judgment simply cannot make a secret of his evidence until the trial, for in doing so he risks the possibility that there will be no trial." *Donnelly v. Guion, 467 F.2d 290, 293 (2d Cir. 1972)*. Accord, *United States v. Pent-R-Books, Inc., 538 F.2d 519, 529 (2d Cir. 1976)*; *Applegate v. Top Associates, Inc., 425 F.2d 92, 96 (2d Cir. 1970)*; *Dressler v. MV Sandpiper, 331 F.2d 130, 132-33 (2d Cir. 1964)*. *Rule 56(e), Fed. R. Civ. P.*, provides that a party opposing summary judgment "may not rest upon the mere allegations… of his pleadings but… must set forth specific facts showing that there is a genuine issue for trial." Although summary judgment must be used sparingly in antitrust actions, see, e.g., *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473 (1962)*, *Rule 56(e)* remains fully applicable and significant **[*20]** evidence in support of a claim must be produced if a well-supported motion for summary judgment is to be defeated. See, e.g., *Gordon v. New York Stock Exchange, Inc., 422 U.S. 659, 686-87 (1975)*; Proctor v. State Farm Mutual Auto Ins. Co., supra, 561 F.2d at 275; *Modern Home Institute, Inc. v. Hartford Accident & Indemnity Co., 513 F.2d 102, 109-10 (2d Cir. 1975)*. As the Supreme Court has stated:

Rule 56(e) should [not], in effect, be read out of antitrust cases and permit plaintiffs to get to a jury on the basis of the allegations in their complaint, coupled with the hope that something can be developed at trial in the way of evidence to support those allegations… While we recognize the importance of preserving litigants' rights to a trial on their claims, we are not prepared to extend those rights to the point of requiring that anyone who files an antitrust complaint setting forth a valid cause of action be entitled to a fulldress trial notwithstanding the absence of any significant probative evidence tending to support the complaint.

First National Bank v. Cities Service Co., 391 U.S. 253, 289-90 (1968).Where, as here, the facts concerning the plaintiff's claim are not **[*21]** otherwise discoverable by the defendants, the plaintiff's failure to come forth with such evidence cannot be excused. Despite the extensive discovery engaged in to date, [7] there is inadequate record support for finding a conspiracy among the defendants with the purpose or effect of boycotting plaintiff. The court thus concludes that the defendant's actions are exempt from application of the antitrust laws and that plaintiff's Sherman Act claim must be dismissed with prejudice.

B. The State Law Claim for Defamation

The sole remaining claim in the complaint is the state law claim for defamation. The complaint does not explicitly allege any jurisdictional predicate for this claim, but it appears that the principles of pendent jurisdiction are the only possible basis. [8] The court undoubtedly has the power to decide the state claim. Plaintiff's **[*22]** federal claim, though dismissed pre-trial, is not so obviously insubstantial as to prohibit the exercise of pendent jurisdiction, *Hagans v. Lavine, 415 U.S. 528, 543 (1974)*, and the federal and state claims "derive from a common nucleus of operative fact." *United Mine Workers v. Gibbs, 383 U.S. 715, 725 (1966)*. In considering whether to exercise its discretionary power to decide pendent claims, however, the court is mindful of the Supreme Court's admonition that:

---

[7] This discovery consists of the following: 1. deposition of plaintiff by NYSCA; 2. deposition of plaintiff by ULL; 3. deposition of NYSCA by plaintiff; 4. interrogatories by plaintiff to NYSCA; 5. interrogatories by plaintiff to ULL; 6. interrogatories by NYSCA to plaintiff; and 7. interrogatories by ULL to plaintiff.

[8] There is no complete diversity of citizenship among the parties; plaintiff and NYSCA are both citizens of New York for the purposes of *28 U.S.C. § 1332*.

HN11[] Needless decisions of state law should be avoided both as a matter of comity and to promote justice between the parties, by procuring for them a surerfooted reading of applicable law. Certainly, if the federal claims are dismissed before trial, even though not insubstantial in a jurisdictional sense, the state claims should be dismissed as well.

Id. at 726. Accordingly, the court declines to exercise jurisdiction over plaintiff's defamation claim, and it is dismissed for lack of subject matter jurisdiction.

Conclusion

Defendants' NYSCA and ULL motions **[*23]** for summary judgment are granted. As to plaintiff's Sherman Act claim only, the dismissal is with prejudice.

Let the Clerk enter judgment accordingly.

So Ordered.

HN5[] **Common Carrier Duties & Liabilities, State & Local Regulation**

Ala. Code § 301(17) places concomitant duties on the common carriers with respect to rates, fares, and charges, including : B. the duty of every common carrier of property by motor vehicle to provide safe and adequate service, equipment and facilities for the intrastate transportation of property in the State of Alabama; to establish, observe and enforce just and reasonable rates, charges and classifications, and just and reasonable regulations and practices relating thereto for all matters relating to or connected with the intrastate transportation of property in the State of Alabama. C. Common carriers of property by motor vehicle may establish reasonable through routes and joint rates, charges and classifications with other such carriers or with common carriers by railroad or express or water. In case of such joint rates, fares or charges, it shall be the duty of the carrier parties thereto to establish just and reasonable regulations and practices.

HN8[] Air & Space Transportation, Charters

The Interstate Commerce Act, 49 U.S.C.S. § 5b, provides: the rules and regulations governing the agreements between or among two or more carriers relating to rates, fares, classifications, division, allowances or charges including charges between carriers and compensation paid or received for the use of facilities or equipment, or rules and regulations pertaining thereto, or procedures for the joint consideration, initiation, or establishment thereof as set forth by the Interstate Commerce Commission in § 5a of the Interstate Commerce Act, 42 U.S.C.S. § 5b are hereby adopted by the Tennessee Public Service Commission; providing, however, that the final determination on any rates, fares, classification, divisions, allowances, charges, rules and regulations or procedures shall be left in its final determination to the Tennessee Public Service Commission.

Business & Corporate Compliance > ... > Transportation Law > Commercial Vehicles > Rates & Tariffs

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

HN9[] **Commercial Drivers & Vehicles, Rates & Tariffs**

Within the range of rates that will be approved as just and reasonable, the states do not impede the ability of the carriers to set prices competitively.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

HN10[] **Exemptions & Immunities, Parker State Action Doctrine**

The threshold inquiry in determining if an anticompetitive activity is state action of the type the Sherman Act was not meant to proscribe is whether the activity is required by the state acting as sovereign.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

HN11[] **Exemptions & Immunities, Parker State Action Doctrine**

The state action doctrine implies a requirement that the state's regulatory interest be evidenced by active supervision and a clear statement of intent to regulate the alleged activity.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > US Interstate Commerce Commission

Antitrust & Trade Law > Regulated Industries > General Overview

Antitrust & Trade Law > Regulated Industries > Transportation > General Overview

Antitrust & Trade Law > Regulated Industries > Transportation > Railroads

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

HN12[] **Exemptions & Immunities, Parker State Action Doctrine**

Collective setting of interstate railroad rates is not exempt from the antitrust laws merely because the interstate commerce commission holds power to approve the rates.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Local Governments & Private Parties

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN13[] **Parker State Action Doctrine, Local Governments & Private Parties**

Private conduct, if it is to come within the state-action exemption, must be not merely prompted but compelled by state action.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN14[] **Exemptions & Immunities, Parker State Action Doctrine**

The court must begin with the threshold determination of whether the defendants' acts are compelled by direction of the State acting as a sovereign. Only where that milepost is reached may the court test the extent of the state's involvement in the compelled activity.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Governments > Public Improvements > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Energy & Utilities Law > Antitrust Issues > Antitrust Immunity

Governments > Local Governments > Claims By & Against

Governments > State & Territorial Governments > General Overview

Real Property Law > Subdivisions > State Regulations

HN15[] **Exemptions & Immunities, Parker State Action Doctrine**

The Parker doctrine exempts only anticompetitive conduct engaged in as an act of government by the State as sovereign, or, by its subdivisions, pursuant to state policy to displace competition with regulation or monopoly public service. While a subordinate governmental unit's claim to Parker immunity is not as readily established as the same claim by a state government sued as such, an adequate state mandate for anticompetitive activities of cities and other subordinate governmental units exists when it is found from the authority given a governmental entity to operate in a particular area, that the legislature contemplated the kind of action complained of.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN16[] Exemptions & Immunities, Parker State Action Doctrine

Whether a governmental body's actions are comprehended within the powers granted to it by the legislature is, of course, a determination which can be made only under the specific facts in each case. A district judge's inquiry on this point should be broad enough to include all evidence which might show the scope of legislative intent.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Governments > Local Governments > Employees & Officials

HN17[] Exemptions & Immunities, Parker State Action Doctrine

A municipality may claim to act as an agent of the State. Thus the standard governing the antitrust immunity accorded state subdivisions differs from, but does not modify, the rules applicable to a private party.

Antitrust & Trade Law > Regulated Industries > Transportation > Common Carriers

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Regulated Industries > General Overview

Antitrust & Trade Law > Regulated Industries > Transportation > General Overview

HN18[] Transportation, Common Carriers

The Sherman Act protects competition, not competitors, and the added fact that the state scheme adversely affects smaller shippers does not justify an antitrust exemption.

Antitrust & Trade Law > Sherman Act > Defenses

Business & Corporate Compliance > ... > Transportation Law > Interstate Commerce > State Powers

Antitrust & Trade Law > Exemptions & Immunities > Noerr-Pennington Doctrine > General Overview

HN19[] Sherman Act, Defenses

The Noerr-Pennington Doctrine holds that concerted action consisting solely of activities aimed at influencing public officials does not violate the Sherman Act. The Supreme Court has expressly extended the doctrine to lobbying efforts before state administrative agencies.

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Expressive Conduct

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > General Overview

Constitutional Law > ... > Fundamental Freedoms > Freedom of Speech > Scope

HN20[] **Freedom of Speech, Expressive Conduct**

Even an activity which is itself communicative may nevertheless be penalized because of its non-speech aspects.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Compliance > ... > Transportation Law > Carrier Duties & Liabilities > State & Local Regulation

HN21[] **Antitrust & Trade Law, Sherman Act**

Collective rate-making violates the Sherman Act.

Antitrust & Trade Law > Sherman Act > General Overview

Business & Corporate Compliance > ... > Transportation Law > Carrier Duties & Liabilities > State & Local Regulation

HN22[] **Antitrust & Trade Law, Sherman Act**

State participation in an anticompetitive scheme does not render the private party a non-actor.

Antitrust & Trade Law > Sherman Act > Claims

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

HN23[] **Sherman Act, Claims**

Price fixing among competitors is a per se violation of *§ 1* of the Sherman Act, 15 U.S.C.S.

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > General Overview

Antitrust & Trade Law > Sherman Act > General Overview

HN24[] **Regulated Practices, Price Fixing & Restraints of Trade**

Any arrangement whose purpose or effect is to inhibit price competition is illegal. Such an arrangement need not be outright cartelization, so long as it brings about, or is intended to bring about, the raising, depressing, fixing, pegging, or stabilizing of prices.

Antitrust & Trade Law > Sherman Act > Remedies > Injunctions

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > Appropriateness

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Civil Procedure > Judgments > Summary Judgment > General Overview

HN25[] **Remedies, Injunctions**

Summary judgment is appropriate in per se price fixing cases.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN26[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition.

Opinion by: FREEMAN

Opinion

[*473] ORDER

On November 17, 1976 the United States filed a complaint under *Section 4* of the Sherman Act, *15 U.S.C. § 4*, [1] **[**4]** to enjoin the continuing violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*. [2] The three rate bureau defendants, Southern Motor Carriers Rate Conference, Inc. ("SMCRC"), Motor Carriers Traffic Association, Inc. ("MCTA"), and North Carolina Motor Carriers Association, Inc. ("NCMCA"), represent common carriers before the regulatory commissions of the States of Alabama, Georgia, Mississippi, North Carolina, and Tennessee. On behalf of their members, the defendants publish tariffs containing proposed rates for intrastate for-hire transportation of general commodities. **[**3]** The complaint alleges that the defendants and their co-conspirators have engaged in a continuing conspiracy to fix these rates within the five subject states. The parties completed discovery following the court's ruling, on July 4, 1977, on the defendants' motions to dismiss the complaint and the plaintiff's motion to strike certain affirmative defenses. *United States v. Southern Motor Carriers Rate Conference, Inc., 439 F. Supp. 29 (N.D.Ga.1977)*. As a part of that order, we invited the Attorneys General of the States of Alabama, Georgia, Mississippi, Tennessee and North Carolina "to participate in the instant action by filing briefs, memoranda, or evidence which may be a critical aid in the ultimate resolution of the issues presented . . . ." *Id. at 52*. The action is presently before the court on the parties' cross-motions for summary judgment, *Rule 56, Fed.R.Civ.P.* For the reasons set forth below, we GRANT the government's motion for summary judgment and DENY the summary judgment motions filed by the defendants.

Discovery in this action has led to the development of a substantial record. While the parties vigorously dispute the significance of the facts in the record, they do not dispute the facts themselves, and have filed extensive stipulations of fact. The statement of the case which follows will review first, the regulatory schemes in the five subject states; second, the operations of the defendants in formulating and publishing intrastate rates before the state commissions; and finally, the procedures followed by the commissions in reviewing the proposed rates. The regulatory schemes of the various states differ somewhat, and we will survey each separately. As the rate formulation practices are similar among the defendant conferences, and as the review mechanisms are similar among the commissions, we will describe these by **[**5]** reference to the North Carolina example. ***HN3***[] To the extent that there is a dispute among the parties, we will of course view the facts in a light most favorable to the defendants. See *Adickes v. S. H. Kress & Co., 398 U.S. 144, 90 S. Ct. 1598, 26 L. Ed. 2d 142 (1970)*; *United States v. Diebold, Inc., 369 U.S. 654, 655, 82 S. Ct. 993, 8 L. Ed. 2d 176 (1962)*.

THE STATE REGULATORY SCHEMES

Alabama Under Alabama law, all non-exempted motor carriers are subject "to control, supervision and regulation by the **[*474]** (Alabama Public Service) Commission." Title 48, Ala.Code § 301(3). That authority includes regulation of intrastate commerce "except insofar as the same may be in conflict with the provisions of the constitution of the United States and the acts of congress" in force in 1940 or thereafter enacted. Title 48, Ala.Code § 301(4). The powers and duties of the Alabama Public Service Commission are set forth in ***HN4***[] Title 48, Ala.Code § 301(5), and include:

---

[1] ***HN1***[] *Section 4* of the Sherman Act, *15 U.S.C. § 4*, provides in pertinent part:

The several district courts of the United States are invested with jurisdiction to prevent and restrain violations of *sections 1 to 7* of this title; and it shall be the duty of the several United States attorneys, in their respective districts, under the direction of the Attorney General, to institute proceedings in equity to prevent and restrain such violations. . . .

[2] ***HN2***[] *Section 1* of the Sherman Act, *15 U.S.C. § 1*, provides in relevant part:

Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal . . .

> 1. (The duty) to regulate common carriers by motor vehicle as provided in this article and to that end the commission may establish reasonable rules and requirements with respect to adequate service, transportation of passengers, **[**6]** baggage, freight and express, . . .
>
> 4. To supervise and regulate common carrier in all matters affecting the relationship between such common carriers and the traveling and shipping public. . . .

HN5[] Alabama Code § 301(17) further places concomitant duties on the common carriers with respect to rates, fares, and charges, including, Inter alia:

> B. . . . the duty of every common carrier of property by motor vehicle to provide safe and adequate service, equipment and facilities for the intrastate transportation of property in the State of Alabama; to establish, observe and enforce just and reasonable rates, charges and classifications, and just and reasonable regulations and practices relating thereto . . . (for) all . . . matters relating to or connected with the intrastate transportation of property in the State of Alabama.
>
> C. Common carriers of property by motor vehicle may establish reasonable through routes and joint rates, charges and classifications with other such carriers or with common carriers by railroad or express or water; . . . In case of such joint rates, fares or charges, it shall be the duty of the carrier parties thereto to establish just **[**7]** and reasonable regulations and practices . . . . [3]

These provisions illustrate a common pattern among the subject states: motor carriers are required to cooperate for the limited purpose of establishing joint rates, i. e., rates covering a shipment in which one carrier operates over only part of the route and another carrier serves the remainder. In this fashion, a shipper is able to obtain a single price for a shipment involving more than one carrier. On the other hand, Alabama does not require that two carriers providing identical service along the Same route charge identical prices, or confer as to the prices each will charge.

Georgia Motor **[**8]** common carriers came under the jurisdiction of the Georgia Public Service Commission in 1929. Pursuant to the requirements of the Georgia statutes all common carriers must obtain certificates of public convenience and necessity. The Public Service Commission has the sole authority to prescribe just and reasonable rates, fares and charges. The Commission maintains a staff of seven professionals and additional clerical personnel to analyze motor common carrier costs of Class "A" carriers. [4] As in Alabama, Georgia law sanctions cooperation between motor carriers in establishing through routes at prescribed joint rates. The statutory framework requires that the Georgia Public Service Commission

> prescribe just and reasonable rates, fares, and **[**9]** charges for transportation by motor **[*475]** common carriers of passengers, baggage and property, and for all services rendered by motor common carriers in connection therewith, and the tariffs therefor shall be in such form, and shall be filed and published in such manner and on such notice as the commission may prescribe, and shall be subject to change on such notice and in such manner as the commission may prescribe.

HN6[] Ga.Code Ann. § 68-613. Rule 10(a), General Motor Carrier Rules and Regulations of the Georgia Public Service Commission provides that

> Motor carriers of property operating under certificates Class "A' will be required to receive property destined to stations located on routes of other Class "A' carriers, and to interchange such property at rates prescribed by this Commission, with such connecting carriers.

---

[3] Interstate Commerce Tariff Circular No. 3 provides, "The term joint rate means a rate that applies over the lines or routes of two or more carriers. . . ." Horace F. Hartley, Director of Transportation Rates and Services, Georgia Public Service Commission, described a joint rate as a rate derived by two or more carriers to cover a single interlining movement of freight in which those carriers participate. Deposition of Horace F. Hartley at 61-62.

[4] Rule 2 of the Rules and Regulations defines Class A carriers as:

common carriers of passengers and/or property operating over a fixed route or between fixed termini in intrastate and interstate commerce, under Certificates of Public Convenience and Necessity.

Mississippi The regulation of motor common carriers operating in intrastate commerce within Mississippi was vested in the Mississippi Public Service Commission by the Motor Carrier Regulatory Act of 1938. The public policy expressed by the 1938 Act substantially paraphrases the National Transportation Policy, See 49 U.S.C. preceding *§§ 1*, 301, **[**10]** *901* and *1001*, and provides that the purpose of the regulation of motor common carriers is to ensure "reasonable charges . . . without unjust discriminations, undue preferences or advantages, and unfair or destructive competitive practices . . . ."

Mississippi law comes the closest to requiring uniform rates to be charged by competing carriers serving the same route. ***HN7***[] Rule 39d(4) of the Mississippi Public Service Commission provides:

> Where two or more freight rates are published to apply on certain articles or commodities between points in Mississippi, by the same motor carriers, or by different motor carriers, the lowest rate, whether class or commodity, shall be applied over all motor carriers accepting and transporting freight between such points; and in no instance should a rate be published or applied which exceeds the aggregate of published intermediate rate, class or commodity, or class and commodity, unless and until proof of the reasonableness of such rate is submitted to and approved by the Commission, provided that in the initial filing penalties will not apply for violation of this rule until such is called to the attention of the carriers and reasonable opportunity **[**11]** is given for adjustment or justification.

Even here, however, a carrier retains the right to file an independent rate, which may be lower than class rates in a tariff. See Deposition of David Screws at 73-75. A Transportation Rate Specialist for the Mississippi Commission has described the uniformity generally occurring in Mississippi intrastate rates as "unwritten law." *Id. at 71*.

North Carolina Since 1947 the North Carolina Utilities Commission has been charged with the exclusive authority to make rates for all motor common carriers subject to its jurisdiction.

House Bill 417 of the North Carolina Legislature, entitled "An Act to provide for Uniform and Joint Rates Among Motor Carriers of the Same Class" contains provisions similar to those in the federal Motor Carrier Act. The bill, which was enacted by the state legislature, *N.C.Gen.Stat. § 62-152.1*, allows two or more carriers to enter into an agreement relating to "rates, fares, classifications, divisions, allowances or charges . . . (f)or the purpose of achieving a stable rate structure." The law further provides that it "shall be the policy of (the State of North Carolina) to fix uniform rates for the same or similar **[**12]** services by carriers of the same class." As in Section 5a of the Motor Carrier Act, the parties to the agreement may apply to the state public service commission for approval of the agreement. The parties to any agreement so approved are relieved from the operation of the state antitrust laws in the making and carrying out of the agreement.

Tennessee Under Tennessee law, the Tennessee Public Service Commission fixes the rates which motor carriers may charge. Although any carrier is permitted to reduce **[*476]** its rates without prior authorization of the Commission, no general increase is permitted until hearings have been held and the approval of the Commission secured. Rule .40 of Chapter 1220-2-1 of the Tennessee Public Service Commission, Division of Motor Carriers, adopts Section 5a of the ***HN8***[] Interstate Commerce Act, 49 U.S.C. § 5b, providing:

> The rules and regulations governing the agreements between or among two or more carriers relating to rates, fares, classifications, division, allowances or charges (including charges between carriers and compensation paid or received for the use of facilities or equipment), or rules and regulations pertaining thereto, or procedures **[**13]** for the joint consideration, initiation, or establishment thereof as set forth by the Interstate Commerce Commission in Section 5a of the Interstate Commerce Act, are hereby adopted by the Tennessee Public Service Commission; providing, however, that the final determination on any rates, fares, classification, divisions, allowances, charges, rules and regulations or procedures shall be left in its final determination to the Tennessee Public Service Commission.

THE ROLE OF THE RATE CONFERENCES

Each of the three defendant conferences operates in the state of North Carolina. NCMCA's procedures are typical of all three. Its rate proposals to the North Carolina Utilities Commission are formulated in NCMCA's rate committee and then submitted to the Commission for approval, disapproval, or modification. Each member of NCMCA is entitled to have a representative on the rate committee; when the rate committee meets to consider rate proposals, shippers are invited to be and are present during the discussion of rate proposals. Approximately 300 shippers subscribe to the NCMCA tariff, and therefore receive notice of all meetings of the NCMCA rate committee. Many shippers send their professional **[**14]** rate specialists to the rate committee meetings. After a discussion of a rate proposal by carriers and shippers, the shippers and their rate specialists leave and the members of the rate committee vote on the proposal by secret ballot. Members of NCMCA are not bound by the action of the rate committee, but instead have the right to announce and file an independent rate proposal with the Commission.

Where general rate increase proposals are involved, the rate committee of NCMCA may meet with members of the two other North Carolina rate bureaus, SMCRC and MCTA. On some occasions NCMCA gives its members notice of the meeting dates of the general commodity rate committees of SMCRC and MCTA. Shippers are also invited to and do attend the meetings, and many shippers send their rate specialists. The defendants claim the joint meetings are encouraged by the shippers because they can attend just one rate committee meeting on a proposed general rate increase rather than three. After a discussion of the proposed increase by shippers and carriers, the shippers and their rate specialists leave and the members of the NCMCA rate committee vote by secret ballot on a rate proposal separately **[**15]** from the rate committees of SMCRC and MCTA.

Where general rate increase proposals are involved, the rate bureaus may submit the same proposals to the Commission with the same effective date, but each conference makes a separate decision on the proposal, and submits its proposal to the Commission separately. When a general rate increase is proposed to the Commission for its action, NCMCA may avail itself of SMCRC personnel to prepare traffic studies to be presented at the hearing, and these studies are sometimes presented by the three bureaus at a Commission hearing.

REGULATORY PROCEDURE

Procedures within each commission for review of published rates tend to be uniform. A published rate goes into effect unless set down for a hearing by the commission. The commissions consistently require hearings, however, and an order scheduling a hearing automatically suspends a proposed tariff.

[*477] In North Carolina, no general rate increase has been granted without a hearing before the Commission, with the exception of an emergency fuel surcharge allowed on an interim basis during the Arab oil embargo in 1974. Prior to the hearing, the North Carolina Commission's Public Staff undertakes **[**16]** a separate, independent study into the necessity of the proposed increase. The Public Staff will require the carriers to furnish freight bills and information concerning other expenses so that it can arrive at an operating ratio to submit as evidence at the hearing. In addition, the Public Staff undertakes on-site review and verification of motor carrier books and records in order to gather evidence to be submitted at the hearing. After its investigation, the Public Staff through sworn testimony at the hearing will make a recommendation as to a proposed rate increase.

Where a general rate increase proposal is involved, the matter is heard by the Commission en banc or by a panel of three Commissioners. The hearing is open to the public, and evidence may be submitted by any interested party, including the applicant, any intervenor, the Public Staff and the utility division of the Attorney General's office in North Carolina. At a hearing on a general rate increase, NCMCA and MCTA may rely on a rate justification statement prepared for them by SMCRC. The statement may contain information about rates in other cases.

The record, in sum, reveals a relationship between the defendants **[**17]** and the regulatory processes in which they participate that ranges from friendly to intimate. The states, as amici, have stressed the integral role of the conferences, and it is clear that, at the least, they are a part of daily regulatory life. Amidst the many ties between the states and the conferences, however, two important factors are not present in any of the subject states. First,

no state requires that all rates among competing carriers for identical service be uniform. [5] Second, no state requires, either by statute or regulation, or other express legislative or administrative mandate, that rates proposed by carriers be formulated or published by rate conferences. These facts, particularly **[*478]** the second, provide the primary basis for our resolution of the issues before the court.
[18]**

Based on the existing record, the parties are in agreement that the action is ripe for summary judgment. We concur, not merely because of the cross-motions, but because we agree that the existing disputes among the parties and amici are ones of characterization and law, not of fact. Extensive briefing of the action has narrowed the issues to three: first, whether the defendants' activities are immunized from antitrust liability by the "state action" doctrine; second, whether the defendants are protected by the "Noerr-Pennington" doctrine; and finally, whether their practices, if unprotected, are antitrust violations as to which the court should now enter summary judgment. We resolve each of these in the government's favor and conclude that the defendants are in violation of the Sherman Act.

STATE ACTION IMMUNITY

The pivotal issue in this action is whether the challenged practice of collective rate publication falls within the category of private activities that are immune from the antitrust laws under the "state action" doctrine. This question has received by far the greatest attention from the parties in their extensive briefing of the cross-motions for summary judgment. Besides **[**19]** being central to the case, the issue is, we think, a particularly difficult one. Application of the state action doctrine may call for extended inquiry and analysis of a state's regulatory statutes and programs; of the mix of public and private participation in administrative decisions; and even, perhaps, of the economic theory underlying a legislative scheme. See L. Sullivan, Handbook of the Law of Antitrust 738 (1977). To an extent, our resolution of the question obviates the need for such extraordinary probing, for we will conclude that the absence of actual compulsion renders the state action doctrine unavailable to each of the defendants. Nevertheless, any venture into the twilight zone dividing the realms of uncontested state and federal sovereignty requires that the traveller proceed with extraordinary caution.

---

[5] Had the defendants argued, or had they established, that state law required all prices for identical services along the same route be uniform, this would be a very different case. We do not doubt that the five subject states are capable of entirely displacing the marketplace mechanism of setting prices with a system in which price competition plays no part. The states might have determined that their businesses and consumers would be best protected by a regulatory rate-making process that mandates uniform prices for a given service, typically based on a "just and reasonable" standard, than by the marketplace. Consequently, they could have replaced price competition with a state-mandated price-setting scheme in which intrastate common carriers would compete, but only by means other than price competition.

The nature of the carrier's participation in such a system regulated by legislative or administrative mandate would seem to be entirely different from the nature of its role in the marketplace. Where price competition is permitted (and protected), the individual participant attempts to lower prices so as to attract business from his competitors. Once prices are regulated, however, his participation in the price-setting "system" changes significantly, for his interest will usually lie in raising prices instead of lowering them. By charging a lower price he will ordinarily not gain an advantage over his competitors, who must always charge an identical price. Moreover, he will act in essentially the same manner regardless of whether he is alone or combining with other carriers, by attempting to convince the regulatory body to accept higher tariffs.

Were prices made uniform by state mandate, we would question the applicability of an antitrust theory designed to stimulate price competition. Indeed it would be doubtful that such practices as are engaged in by the defendant conferences could correctly be said to be "in restraint of trade," within the meaning of *Section 1* of the Sherman Act. The parties have made it clear, however, that each of the subject states guarantees to individual carriers the right to charge rates lower than their competitors' rates for identical service. E.g., Statement of Material Facts, submitted in support of SMCRC's motion for summary judgment, filed Aug. 1, 1978, at 3, 4. By preserving the carriers' right of independent action, the subject states have permitted, to an admittedly limited degree, price competition. ***HN9***[] Within the range of rates that will be approved as just and reasonable, See *United States v. Chicago, Milwaukee, St. Paul & Pacific Railroad Co., 294 U.S. 499, 506, 55 S. Ct. 462, 79 L. Ed. 1023 (1935)*, the states do not impede the ability of the carriers to set prices competitively.

The state action doctrine begins with *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. California, by statute, had established a scheme whose admitted purpose was to maintain prices and restrict competition among raisin growers. The growers would develop, in combination, marketing and pricing programs which they would submit to a state commission **[**20]** for approval. The commission would sanction a program where it found, after a hearing, that the program would prevent agricultural waste without allowing excessive profits to the growers, and where the program was approved upon referendum by a requisite number of growers.

A raisin grower brought suit in federal court challenging the program, Inter alia, as invalid under the Sherman Act. Chief Justice Stone rejected the challenge, holding that Congress, in enacting the Sherman Act, did not intend to prohibit state action regulating economic activity:

> Here the state command to the Commission and to the program committee of the California Prorate Act is not rendered unlawful by the Sherman Act since, in view of the latter's words and history, it must be taken to be a prohibition of individual and not state action. It is the state which has created the machinery for establishing the prorate program. Although the organization of a prorate zone is proposed by producers, and a prorate program, approved by the Commission, must also be approved by referendum of producers, it is the state, acting through the Commission, which adopts the program and which enforces it with penal sanctions, **[**21]** in the execution of a governmental policy. The prerequisite approval of the program upon referendum by a prescribed number of producers is not the imposition by them of their will upon the minority by force of agreement or combination which the Sherman Act prohibits. The state itself exercises its legislative authority in making the regulation **[*479]** and in prescribing the conditions of its application. The required vote on the referendum is one of these conditions.

> The state in adopting and enforcing the prorate program made no contract or agreement and entered into no conspiracy in restraint of trade or to establish monopoly but, as sovereign, imposed the restraint as an act of government which the Sherman Act did not undertake to prohibit.

317 U.S. at 352, 63 S. Ct. at 314 (citations omitted).

Unresolved by the decision in Parker and perhaps unresolved to this day [6] is the question whether the doctrine announced in that case would protect not only the state itself, but private parties acting under state mandate. Read most conservatively, the quoted passage holds only that the state's immunity as a sovereign is not undermined by private participation in **[**22]** the state program. Yet the language also hints that the state may, in the exercise of its sovereignty, shelter individuals from antitrust liability, and that this immunity may in turn survive even where the private party has participated in the state's actions. Thus, Parker offered a basis for believing first, that a private individual acting at the command of a state sovereign could avoid the effect of federal antitrust laws, and second, that the individual's participation in bringing about the state action would not threaten his immunity thereunder.

[23]**

Neither of these notions was significantly shaken in *Goldfarb v. Virginia State Bar, 421 U.S. 773, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975)*. The Supreme Court held that enforcement of a price-fixing schedule by state and county bars was not exempt under Parker v. Brown because the activity was not compelled by the state:

---

[6] See *Bates v. State Bar of Arizona, 433 U.S. 350, 361 n.13, 97 S. Ct. 2691, 53 L. Ed. 2d 810 (1977)*, noting that only four justices joined in that part of *Cantor v. Detroit Edison, 428 U.S. 579, 96 S. Ct. 3110, 49 L. Ed. 2d 1141 (1976)*, holding Parker inapplicable to private defendants. In Cantor, however, Justice Stevens went on to suggest circumstances under which merely private conduct required by state law would still be exempt from the Sherman Act. Since his discussion of those circumstances was adopted by a majority of the court, the question of whether private parties are protected under Parker is largely mooted: a private party claiming "state action" exemption must always satisfy the stricter Cantor requirements.

> HN10[] The threshold inquiry in determining if an anticompetitive activity is state action of the type the Sherman Act was not meant to proscribe is whether the activity is required by the state acting as sovereign.

421 U.S. at 790, 95 S. Ct. at 2015. Thus, the court rejected the respondents' assertion that because their actions were "prompted" by the state, no antitrust liability could attach. Moreover, the court suggested that compulsion would not be the sole criterion, but that before the Parker doctrine afforded him safe conduct through the forbidden territory of anticompetitive practices, a private party might have to make a yet-unspecified additional showing:

> Here, we need not inquire further into the state-action question because it cannot fairly be said that the state of Virginia through its Supreme Court Rules required the anti-competitive activities **[**24]** of either respondent.

Precisely what would have to be shown in such a case was the subject of *Cantor v. Detroit Edison Co., 428 U.S. 579, 96 S. Ct. 3110, 49 L. Ed. 2d 1141 (1976)*. Detroit Edison, an investor-owned public utility, operated under a regulatory scheme similar to those involved in this action. Detroit Edison would file tariffs for the sale of electric power with the Michigan Public Service Commission, which was empowered by state statute "to regulate all rates, fares, fees, charges, services, rules, conditions of service, and all other matters pertaining to the formation, operation, or direction of such public utilities." *428 U.S. at 584, 96 S. Ct. at 3114*. The Commission would approve, modify, or reject the tariffs as filed. While Detroit Edison was free to propose modifications at any time, Michigan law forbade deviation from any tariff actually in force.

[*480] The Commission had approved one of Detroit Edison's tariffs containing a program of free distribution of standard-size light bulbs to customers. The petitioner, a retail druggist selling light bulbs, attacked the scheme as an illegal tying arrangement. The petitioner claimed the scheme allowed Detroit **[**25]** Edison to use its monopoly status in the electric power market to increase its power and reduce competition in the light bulb market. Detroit Edison answered that the program was protected under Parker and Goldfarb, because it was compelled by the state acting as sovereign.

As augured in Goldfarb, the court determined that the respondent's showing of formal compulsion was not enough. Justice Stevens' opinion for the court analyzed the state action in two sections. First, he held that Parker v. Brown only conferred antitrust immunity on the state agents acting in their official capacity. *428 U.S. 579 at 590-91, 96 S. Ct. 3110, 49 L. Ed. 2d 1141*. The language of Parker, Justice Stevens reasoned, was carefully chosen so as to exclude mere private parties claiming to be acting under compulsion of state law. *428 U.S. 579 at 590-92* & n.24, *96 S. Ct. 3110, 49 L. Ed. 2d 1141*.

Only three other justices joined in the portion of Justice Stevens' opinion holding Parker inapplicable to the Cantor facts. *428 U.S. 579 at 581, 96 S. Ct. 3110, 49 L. Ed. 2d 1141*. Backed by a majority of the court, however, Justice Stevens went on to suggest two instances where private conduct required by state **[**26]** law might still be exempt from the Sherman Act. First, Justice Stevens suggested that "it would be unacceptable ever to impose statutory liability on a party who had done nothing more than obey a state command." *428 U.S. at 592, 96 S. Ct. at 3118*. This "unfairness" theory recognizes the predicament of the citizen caught between conflicting demands of independent sovereigns, but only where the conflict is real. Justice Stevens refused to find unfairness in the facts before him because the predicament with which the respondent might claim to be faced was largely illusory. The respondent could not claim to have "done nothing more than obey the command of (its) state sovereign," Id.; Justice Stevens' perceptive analysis of the regulatory process revealed it to be "a blend of private and public decisionmaking" in which the private element of participation is so significant as to render the notion of coercion inapplicable to a characterization of the individual's compliance. The tying arrangement had not merely been imposed upon the respondent by the state Commission. It was the respondent who conceived, developed, and proposed the program; who argued the program's merits before the **[**27]** Commission; and who chose not to exercise its ever-present right to petition the Commission for elimination of the program.

Justice Stevens also supposed that Congress did not intend to impose conflicting antitrust standards upon an area already pervasively regulated by the state. *428 U.S. at 595, 96 S. Ct. at 3119*. Any private party seeking a defense under this "already regulated" theory, however, would necessarily face three obstacles:

> First, merely because certain conduct may be subject both to state regulation and to the federal antitrust laws does not necessarily mean that it must satisfy inconsistent standards; second, even assuming inconsistency, we could not accept the view that the federal interest must inevitably be subordinated to the State's; and finally, even if we were to assume that Congress did not intend the antitrust laws to apply to areas of the economy primarily regulated by a State, that assumption would not foreclose the enforcement of the antitrust laws in an essentially unregulated area such as the market for electric light bulbs.

Id.

Each of these related considerations in part explained Justice Stevens' refusal to exempt the tie-in under the **[**28]** "already regulated" theory. Most significant was the fact that the Michigan regulatory scheme was not to any meaningful degree concerned with the sale of light bulbs. This peripheral market was an "essentially unregulated area:"

> **[*481]** The application of that standard to this case inexorably requires rejection of respondent's claim. For Michigan's regulatory scheme does not conflict with federal antitrust policy and, conversely, if the federal antitrust laws should be construed to outlaw respondent's light-bulb-exchange program, there is no reason to believe that Michigan's regulation of its electric utilities will no longer be able to function effectively. Regardless of the outcome of this case, Michigan's interest in regulating its utilities' distribution of electricity will be almost entirely unimpaired.

428 U.S. at 598, 96 S. Ct. at 3121.

The court's willingness in Cantor to probe the degree of state interest and involvement has led to the generally-approved supposition that ***HN11***[] the state action doctrine implies a "requirement that the state's regulatory interest be evidenced by active supervision and a clear statement of intent to regulate" the alleged activity. **[**29]** See *United States v. Southern Motor Carriers Rate Conference, 439 F. Supp. 29, 41 (N.D.Ga.1977)*, Quoting 81 Harv.L.Rev. 1, 229-47 (1976). The defendants have striven to present the five subject regulatory processes in a light that best demonstrates that this standard has been more than satisfied. They have pointed to the close scrutiny with which they contend the state commissions review proposed rates and to the central function which collective ratemaking purportedly plays in the overall system of rate proposal and review. MCMCA also emphasizes North Carolina's "little section 5(a)," which announces a state policy approving of collective ratemaking and exempting the conference activities from the North Carolina antitrust laws.

The government, on the other hand, refuses to concede what it insists is the pivotal state action question. The government insists that as private parties, none of the defendants may invoke the state action doctrine without first showing that its challenged activities are compelled by the states acting as sovereigns. Nothing in any case decided after Goldfarb, the government argues, modifies this basic requirement, and regardless of the virtual romance **[**30]** between the states and their ratemaking conferences, no state Requires that rates be published collectively.

At the outset, we note that even under a test that does not include state compulsion, the defendants face an uphill battle. The Supreme Court held in *Georgia v. Pennsylvania Railroad Co., 324 U.S. 439, 435-64, 65 S. Ct. 716, 89 L. Ed. 1051 (1945)* that ***HN12***[] collective setting of interstate railroad rates was not exempt from the antitrust laws merely because the Interstate Commerce Commission held power to approve the rates. And in Cantor, 428 U.S. at 596, 96 S. Ct. at 2120, the Court reasoned, "Congress could hardly have intended state regulatory agencies to have broader power than federal agencies to exempt private conduct from the antitrust laws." Moreover, even though rate publication generally may be more central to the regulatory schemes here than light bulb sales were in Cantor, the Collective aspect of rate publication might prove peripheral. We need not decide the question here, however, for we agree with the government that compulsion by the state acting as a sovereign remains, as expressed in Goldfarb, a threshold barrier to application of the state action doctrine. **[**31]**

The first reason why compulsion is necessary is that this is the precise principle for which Goldfarb stands. The Goldfarb court found that further inquiry into the state action question was pretermitted by an absence of state compulsion. This holding, at least as it applies to private defendants, has been untroubled by subsequent decisions.

The defendants rely principally on Cantor in arguing that the compulsion requirement is less than absolute. Yet compulsion was the very starting point of that case. After holding Parker inapplicable to activities of private parties, Justice Stevens considered the availability of analogous state action principles to a private defendant:

> In this case we are asked to hold that private conduct Required by state law is exempt from the Sherman Act. Two quite different reasons might support such a rule.

[*482] *428 U.S. at 592, 96 S. Ct. at 3118* (emphasis supplied). The court went on to enunciate the "unfairness" and "already regulated" concepts that might support state action protection. The court premised its discussion, however, on the fact that the tie-in arrangement was "required," by state law.

The debate between the majority **[**32]** and dissenting opinions took place within the context of a private party's undertaking of state-mandated practices, and it is this context which gives meaning to the debate. Justice Stevens, writing for the court, and Justice Stewart, writing for the three dissenting justices, focused upon two related themes. The first was the extent to which courts might inquire beyond the formality of state compulsion. Justice Stewart found compulsion sufficient to invoke state action immunity anytime a state approved or established a practice, where the effect of approval was to proscribe subsequent deviation. The regulatory process, he reasoned, was a three-step affair in which the private party proposes, the state decides, and the private party complies. Proposal was protected by the *First Amendment* principles expressed in *Eastern Railroad Conference v. Noerr Motor, 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*. Compliance was protected by Parker and Goldfarb. *428 U.S. 579 at 624, 96 S. Ct. 3110, 49 L. Ed. 2d 1141*.

Justice Stevens answered that this analysis was simplistic, for it ignored the reality that regulatory decision making is typically a process in which public and private **[**33]** input are continuously combined. Formal compulsion by the state, he argued, ought not be given automatic deference by the courts where the compulsion also lacked substance.

The second, related, debate in Cantor centered on notions of federalism. Justice Stewart contended that Goldfarb compulsion was sufficient to bar federal incursion into the state realm:

> Goldfarb clarified Parker by holding that ***HN13***[] private conduct, if it is to come within the state-action exemption, must be not merely "prompted" but "compelled" by state action. Thus refined, the doctrine performs the salutary function of isolating those areas of state regulation where the State's sovereign interest is, by the State's own judgment, at its strongest, and limits the exemption to those areas.
>
> Beyond this the Court cannot go without disregarding the purpose of the Sherman Act not to disrupt state regulatory laws.

428 U.S. at 637-38, 96 S. Ct. at 3140 (footnotes omitted).

The majority conceived of a more forceful application of federal law. The "already regulated" theory of immunity, for instance, was only to be invoked where confrontation was unavoidable, and even then did not constitute a rule **[**34]** of automatic deference:

> First, merely because certain conduct may be subject both to state regulation and to federal antitrust laws does not necessarily mean that it must satisfy inconsistent standards; second, even assuming inconsistency, we could not accept the view that the federal interest must inevitably be subordinated to the State's; . . .

428 U.S. at 595, 96 S. Ct. at 3120.

Each of these questions is given meaning in the context of state compulsion of private activity. The first challenges the genuineness of the coercion. Such an inquiry would be unnecessary as it was in Goldfarb were there no coercion to judge. Similarly, the federalism debate derives its intensity from the circumstance of opposing Demands from discrete sovereigns.

Thus, the Goldfarb inquiry is not discarded by Cantor. ***HN14***[] The court must begin with the threshold determination of whether the defendants' acts are "compelled by direction of the State acting as a sovereign." *421 U.S. at 791, 95 S. Ct. at 2015*. Only where that milepost is reached may we test the extent of the state's involvement in the compelled activity. [7] In the case before the **[*483]** court, there is no such necessity: it **[**35]** is conceded by all sides that the practice of joint rate publication is not expressly required by any statute, regulation or other legislative or administrative command of any of the subject states. Though informally ratified and even encouraged by the procedures and pronouncements of the various regulatory agencies and, to a limited degree, by the states' laws themselves, the practice is nowhere compelled.

The parties have not produced, and we have not found, a single case decided subsequent to Goldfarb in which activities not required by the state were held immune under the state action doctrine. See *New Motor Vehicle Board v. Fox, 439 U.S. 96, 99 S. Ct. 403, 58 L. Ed. 2d 361 (1978)*; *Bates v. State Bar of Arizona, 433 U.S. 350, 97 S. Ct. 2691, 53 L. Ed. 2d 810 (1977)*. Indeed, the subsequent cases have tended to reiterate the compulsion requirement. E.g., *Bates, 433 U.S. at 350, 97 S. Ct. **[**36]** 2691* [8], *53 L. Ed. 2d 810* .

[37]**

A related strain of cases might suggest a less stringent test. In *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)*, the Court examined the extent to which Parker immunity was available to a city operating a municipal electric utility. The Court concluded:

> ***HN15***[] (T)he Parker doctrine exempts only anticompetitive conduct engaged in as an act of government by the State as sovereign, or, by its subdivisions, pursuant to state policy to displace competition with regulation or monopoly public service. . . .

---

7 For an excellent presentation of the pertinent inquiry in such a case, See Sullivan, supra, § 238 at 738-39.

8 A review of existing authority on the state action doctrine suggests the necessity of specifying the meaning we ascribe to the notion of compulsion by the state. Professors Areeda and Turner have argued that courts ought not require state "compulsion" of a private activity as a prerequisite to invocation of the state action defense. P. Areeda & Turner, I ***Antitrust Law*** § 215 (1977). Over-application of the Cantor principle that many regulatory decisions are industry-initiated, these observers fear, may lead courts to find antitrust liability in circumstances where, unlike Cantor, the challenged private practice lies at the heart of the regulatory scheme. Areeda and Turner cite the facts in Parker to illustrate a situation in which industry participation in regulatory decision making should not render the state action defense unavailable.

Areeda and Turner, are employing a special definition of state "compulsion." They characterize both Parker and Cantor as cases in which there was not "compulsion," evidently based on the fact that the Impetus for the state action came from the regulated entities.

The language of Cantor, and our discussion here, however, analyses compulsion differently. Justice Stevens specifically described the light bulb tie-in as "required." *428 U.S. 579 at 592, 96 S. Ct. 3110, 49 L. Ed. 2d 1141*. He then determined that such compelled activity might be protected under either an "unfairness" or an "already regulated" theory. In either case, the threshold compulsion that existed arose from the fact that state law Formally required the tie-in by virtue of the Commission's having approved Detroit Edison's tariff: so long as there was no new filing, Detroit Edison had to continue the light bulb distribution program. It is only this minimal, formal, compulsion that we find to be a necessary element to a Parker defense.

> While a subordinate governmental unit's claim to Parker immunity is not as readily established as the same claim by a state government sued as such, we agree with the Court of Appeals that an adequate state mandate for anticompetitive activities of cities and other subordinate governmental units exists when it is found "from the authority given a governmental entity to operate in a particular area, that the legislature contemplated the kind of action complained of" (*City of Lafayette v. Louisiana Power & Light Co., 532 F.2d 431, 434 (5th Cir. 1976))*.

435 U.S. at 413-415, 98 S. Ct. at 1137, 1138 (footnote omitted). **[**38]** [9]
[39]**

[*484] City of Lafayette does announce a standard of state action immunity that protects activities "contemplated" by the state legislature, but confers this immunity only on state subdivisions. That a municipality should have to make a smaller showing than a private party is only natural, for the municipality is already a limited sovereign, exercising, to the extent conferred by the state, an array of governmental features and powers. The Court made this very point when it distinguished Cantor, pointing out that ***HN17***[] a municipality may claim to act "as an agent of the State." *435 U.S. at 411 n.40, 98 S. Ct. at 1135-36 n.40*. Thus the standard governing the antitrust immunity accorded state subdivisions differs from, but does not modify, the rules applicable to a private party. See also *Duke & Co., Inc. v. Foerster, 521 F.2d 1277 (3d Cir. 1975)*.

Finally, we realize that state compulsion might not always be an absolutely immutable requirement. The case may arise in which a regulatory or legislative scheme, while not explicitly requiring a particular act, is structured so as to render the act indispensable to compliance with the scheme. In this sense an anticompetitive activity **[**40]** may be protected because it is impliedly or constructively compelled by the state. We think, however, that this argument is foreclosed to the present defendants by *Georgia v. Pennsylvania Railroad Co., 324 U.S. 439, 65 S. Ct. 716, 89 L. Ed. 1051 (1945)*. That case held collective rate setting by railroads to be subject to the antitrust laws despite the regulation of railroad rates by the Interstate Commerce Commission. It is true that the cost-saving features of collective ratemaking, which obviate the need for each carrier to make an independent investigation into the economic factors affecting rates he should publish, may be more significant in the trucking industry. The defendants' memberships include many small businesses, which, unlike railroads, may be hard pressed to absorb the added expense incurred in making individual rate formulations. This, however, merely means that by imposing their respective regulatory systems upon the intrastate truckers, the subject states have increased the cost of doing business. ***HN18***[] The Sherman Act protects "competition, not competitors," *Brown Shoe, Inc. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962)*, and the added **[**41]** fact that the state scheme adversely affects smaller shippers does not justify an antitrust exemption.

NOERR-PENNINGTON DOCTRINE

The defendants have devoted considerably less effort to advancing a Noerr-Pennington defense theory. The doctrine, briefly stated, ***HN19***[] holds that concerted action consisting solely of activities aimed at influencing

---

[9] Earlier in its opinion, the Court quoted, with apparent approval, the order of the Fifth Circuit:

"A subordinate state governmental body is not Ipso facto exempt from the operation of the antitrust laws. Rather, a district court must ask whether the state legislature contemplated a certain type of anticompetitive restraint. In our opinion, though, it is not necessary to point to an express statutory mandate for each act which is alleged to violate the antitrust laws. It will suffice if the challenged activity was clearly within the legislative intent. Thus, a trial judge may ascertain, from the authority given a governmental entity to operate in a particular area, that the legislature contemplated the kind of action complained of. On the other hand, as in Goldfarb, the connection between a legislative grant of power and the subordinate entity's asserted use of that power may be too tenuous to permit the conclusion that the entity's intended scope of activity encompassed such conduct. ***HN16***[] Whether a governmental body's actions are comprehended within the powers granted to it by the legislature is, of course, a determination which can be made only under the specific facts in each case. A district judge's inquiry on this point should be broad enough to include all evidence which might show the scope of legislative intent. *532 F.2d, at 434-435* (footnotes omitted).

435 U.S. at 393-394, 98 S. Ct. at 1126-27.

public officials does not violate the Sherman Act. [10] The Supreme Court has expressly extended the doctrine to lobbying efforts before state administrative agencies. *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*. The defendants argue that since all of their challenged activity is directed toward influencing the state commissions, no antitrust liability may attach.

The government answers that the complaint **[**42]** charges three distinct types of activity: (1) coordinating and fixing of rates; (2) presenting the collectively set rates to the state commissions; and (3) putting the rates into effect, ostensibly pursuant to state sanction. Implicitly conceding that **[*485]** the second activity is protected, the government contends that the first may be treated separately, and must itself give rise to antitrust liability.

This case is not technically one to which Noerr-Pennington has traditionally been applied. Noerr and its progeny have all involved concerted attempts to obtain governmental interference with a competitor. See Sullivan, supra, § 238 at 740. The parties have cited no cases in which courts have invoked Noerr-Pennington to immunize price fixing among competitors.

The *First Amendment* principles underlying Noerr-Pennington are nevertheless applicable by analogy. If the defendants may, in exercise of their right to petition the government, jointly submit rate proposals to the state commissions, it would follow that they must be permitted to confer and to formulate the rates they wish to propose. Just as the speaker must be permitted to prepare his notes and determine what he **[**43]** intends to say, so must the conferences be free to settle on the specific relief or benefits they seek to obtain from the commissions.

The difficulty with this analysis is that it ignores the teaching of Cantor. Justice Stevens' characterization of the regulatory process as a blend of public and private decision making illustrates that the regulated industry does not merely propose, but also decides. Even though the proposals require state sanction to take effect, the industry's participation in the process surpasses mere petitioning and renders the industry, in part, a decisionmaker.

This does not, of course, mean that Noerr-Pennington is inapplicable to rate making and related administrative activities. It does, however, suggest that a court may properly accord independent significance to the defendants' activities of rate formulation and proposal. *First Amendment* law has always recognized that ***HN20***[] even an activity which is itself communicative may nevertheless be penalized because of its non-speech aspects. See, e.g., *United States v. O'Brien, 391 U.S. 367, 88 S. Ct. 1673, 20 L. Ed. 2d 672 (1968)* (draft card burning is conduct not protected by the *First Amendment*); *Cox v. Louisiana,* ***[**44]*** *379 U.S. 559, 85 S. Ct. 476, 13 L. Ed. 2d 487 (1965)* (civil rights demonstration on a sidewalk opposite a courthouse is "speech plus," entitled to a lesser degree of protection than pure speech); *Teamsters Local 695 v. Vogt, 354 U.S. 284, 77 S. Ct. 1166, 1 L. Ed. 2d 1347 (1957)* (the state may prohibit picketing directed at achieving a union shop in violation of state law). Here, we agree with the government that the defendants' activities of collective rate formulation constitute independently cognizable acts outside the scope of *First Amendment* protection or the Noerr-Pennington doctrine.

THE SHERMAN ACT VIOLATION

In *Georgia v. Pennsylvania Railroad Co., 324 U.S. 439, 65 S. Ct. 716, 89 L. Ed. 1051 (1945)*, the Supreme Court held that collective rate publication by railroads constituted price fixing illegal under the antitrust laws even though the published rates were reviewed and approved by the Interstate Commerce Commission:

> (T)he Interstate Commerce Act does not provide remedies for the correction of all the abuses of rate-making which might constitute violations of the anti-trust laws. Thus a "zone of reasonableness exists between maxima and minima within which a carrier **[**45]** is ordinarily free to adjust its charges for itself." *United States v. Chicago, M., St. P. & P. R. Co., 294 U.S. 499, 506, 55 S. Ct. 462, 465, 79 L. Ed. 1023*. Within that zone the Commission lacks power to grant relief even though the rates are raised to the maxima by a conspiracy among carriers who employ unlawful tactics. If the rate-making function is freed from the unlawful restraints of the

[10] For a discussion by this court of the doctrine and its origins, See *United States v. Southern Motor Carriers Rate Conference, 439 F. Supp. 29, 46-47 (N.D.Ga.1977)*. See also Sullivan, supra, § 238 at 740-43.

alleged conspiracy, the rates of the future will then be fixed in the manner envisioned by Congress when it enacted this legislation. Damage must be presumed to flow from a conspiracy to manipulate rates within that zone.

324 U.S. at 460-61, 65 S. Ct. at 728. Relying on Pennsylvania Railroad, the courts appear to have assumed that **HN21**[] collective rate-making **[*486]** violates the Sherman Act. See Pan American World Airways v. United States, 371 U.S. 296, 305-06 & n.11, 83 S. Ct. 476, 9 L. Ed. 2d 325 (1963); Marnell v. United Parcel Service of America, Inc., 260 F. Supp. 391, 404-05 (N.D.Cal.1966).

The Pennsylvania Railroad case leaves the defendants very little breathing room. They argue, however, that their activities do not violate the Sherman Act (1) because the states, rather **[**46]** than the defendants, determine the prices to be charged by intrastate carriers; and (2) because the defendants' activities, properly viewed under Rule of Reason analysis, do not unreasonably restrain trade.

Throughout their extensive briefing of this case, the parties have debated the correct characterization of the defendants' actions. The government contends that the defendants are responsible for fixing intrastate trucking rates, and that the state commissions furnish no more than a formal stamp of approval. The defendants insist that they only propose, and that the "fixing" of rates is performed exclusively by the commissions.

The cases establish a middle ground and have the effect of refuting the defendants' protestations of nonparticipation in regulatory decision making. As a consequence, the government is correct to describe collective rate publication as price "fixing:" this is precisely the language employed by Justice Douglas in the Pennsylvania Railroad decision. 324 U.S. 439 at 460-61, 65 S. Ct. 716, 89 L. Ed. 1051. Similarly, the state action cases have uniformly recognized that **HN22**[] state participation in an anticompetitive scheme does not render the private party a **[**47]** non-actor. See Cantor, 428 U.S. at 579, 96 S. Ct. 3110, 49 L. Ed. 2d 1141 ; Goldfarb, 421 U.S. at 773 & n.21, 95 S. Ct. 2004, 44 L. Ed. 2d 572 .

Moreover, the practice of collective rate publication easily fits the classic description of a "naked price restraint." Since United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 (1940), it has been established law that **HN23**[] price fixing among competitors is a Per se violation of Section 1 of the Sherman Act. See, e.g., Goldfarb ; United States v. McKesson & Robbins, Inc., 351 U.S. 305, 76 S. Ct. 937, 100 L. Ed. 1209 (1956); United States v. Paramount Pictures, Inc., 334 U.S. 131, 68 S. Ct. 915, 92 L. Ed. 1260 (1948); Hartford-Empire Co. v. United States, 323 U.S. 386, 65 S. Ct. 373, 89 L. Ed. 322 (1945). Because the guiding principle behind all Sherman Act jurisprudence is the protection of competition, See United States v. Joint Traffic Ass'n, 171 U.S. 505, 577, 19 S. Ct. 25, 43 L. Ed. 259 (1898), **HN24**[] any arrangement whose purpose or effect is to inhibit price competition is illegal. Such an arrangement need not be outright cartelization, so long as it brings about, or is intended to bring about, the "raising, depressing, **[**48]** fixing, pegging, or stabilizing" of prices. Socony-Vacuum, 310 U.S. at 223, 60 S. Ct. at 844.

The defendants' activities have precisely such an effect. The very function they serve is to coordinate the rates that their member carriers will charge. Within the "zone of reasonableness" in which, free from regulatory interference, market forces would otherwise determine price, the defendants have displaced competition with concerted pricing decisions. In so doing, they violate the Sherman Act at its most sensitive spot. The defendants' practices of collective rate coordination and publication are Per se violations of Section 1, subject to injunction by this court. See White Motor Co. v. United States, 372 U.S. 253, 259-60, 83 S. Ct. 696, 9 L. Ed. 2d 738 (1960) **HN25**[] (summary judgment is appropriate in Per se price fixing cases) (dictum). See also First National Bank of Arizona v. Cities Service Co., 391 U.S. 253, 88 S. Ct. 1575, 20 L. Ed. 2d 569 (1968). [11] We will therefore GRANT the **[*487]**

---

[11] Nor would we necessarily reach a different result under rule of reason analysis. **HN26**[] "The true test of legality is whether the restraint imposed is such as merely regulates and perhaps thereby promotes competition or whether it is such as may suppress or even destroy competition." Board of Trade of the City of Chicago v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 244, 62 L. Ed. 683 (1918). Considerations such as the need of the smaller shippers for the supposed efficiencies accompanying collective rate formulation and the fact that current intrastate rates are materially lower than interstate rates in the subject states,

government's motion for summary judgment, holding that the defendants have violated *Section 1* of the Sherman Act.

[49]**

RELIEF

The arguments by the defendants and Amici intimate that the relief sought by the government will significantly interfere with the regulation of intrastate trucking in the subject states. We are of course hopeful that whatever transition is necessitated by this order be effected in the least disruptive manner possible. At the same time, it is apparent that the transition will inevitably cause difficulties, and that these must not stand in the way of swift compliance with the Sherman Act. The court will therefore direct the parties to this action to confer in an attempt to reach agreement as to the proper relief to be afforded by the court. [12] Within thirty (30) days of the date of this order, the parties shall, if possible, submit to the court a joint agreement detailing the nature and precise terms of the relief to be awarded. If the parties are unable to reach an accord, they shall within the same thirty-day period: (1) so notify the court; (2) indicate those matters as to which there is agreement; and (3) submit proposals from each side in the areas of disagreement. The court will refrain from ordering interim relief, but expects that the parties will diligently proceed **[**50]** in complying with this order.

Accordingly, the court hereby GRANTS the government's motion for summary judgment and DENIES the defendants' motions for summary judgment.

IT IS SO ORDERED.

---

while perhaps quite meaningful from a policy standpoint, would have only limited significance to our inquiry. The focus would continue to be on the effect of collective rate-making on price competition among intrastate carriers.

[12] The court expects that amici will be allowed full participation in all negotiations among the parties.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN1[] **Private Actions, Remedies**

Plaintiffs in an antitrust suit have the burden of proving damages. As many courts have noted, this requires them to prove both the fact of damage and the amount of damage. These are two separate proofs. For the former, plaintiffs must establish with reasonable probability the existence of a causal connection between defendants' violation of the ***antitrust law*** and plaintiffs' revenue-impairing injury. For the latter, plaintiffs must show the extent of the financial impact of defendants' antitrust violation. Generally, this can be accomplished through proof of lost profits.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN2[] **Private Actions, Remedies**

The measure of proof needed in an antitrust case to prove the existence and amount of damages differs significantly. Plaintiffs must bear a heavier burden in proving the fact of damage than in proving the amount of damage. Thus, although a plaintiff cannot recover damages that are uncertain in the sense that they are not the certain result of defendant's violation, once this fact of damage has been established, plaintiffs can recover all damages definitely attributable to that wrong, even if the amount of damage is uncertain or difficult to ascertain.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN3[] **Private Actions, Remedies**

In calculating damages for antitrust violations, the trier of fact can rely upon probable and inferential as well as direct and positive proof. It is permitted to make a just and reasonable estimate of the damage suffered by plaintiffs based on relevant data presented, and these findings will be sustained even if the result is only approximate. The essential requirement is only that plaintiffs develop a reasonable theory for calculating the amount of damages and that they introduce the data necessary to make this calculation. However, even where the defendant by his own wrong has prevented a more precise computation, the trier of fact may not render a verdict based on speculation or guesswork.

Counsel: **[**1]** G. Joseph Bertain, Jr., Timothy H. Fine, Patrick J. Carter, Edward Stadum, San Francisco, Cal., for plaintiffs.

Broad, Khourie & Schulz, Michael N. Khourie, Thomas Paine, San Francisco, Cal., for defendants.

Opinion by: RENFREW

Opinion

[*227] MEMORANDUM OF OPINION

In August 1973 a group of independent newspaper dealers brought suit in this Court against the publishers and certain officers of the newspapers they distributed, alleging violations of *Sections 1* and *2* of the Sherman Act, *15 U.S.C. §§ 1*, *2*. After extensive discovery and a lengthy trial, this Court on September 23, 1974, rejected three of plaintiffs' claims for relief but found that the publisher's written Dealership Agreement, which prohibited the dealers from selling their papers to subscribers at a price above the publisher's suggested price, constituted a vertical price restraint that violated *Section 1* of the Act. See *Knutson v. Daily Review, 383 F. Supp. 1346, 1357 (N.D.Cal.1974)*. [1.] Because plaintiffs had **[*228]** failed to prove either the fact or amount of their injury, however, the Court declined to award damages. *383 F. Supp. at 1384*.

[2]** On appeal, the Court of Appeals for the Ninth Circuit affirmed in part and reversed in part. It agreed that plaintiffs were not entitled to recover on the three claims for relief this Court had rejected. However, it disagreed with the Court's reasons for denying plaintiffs damages for the *Section 1* violation. Noting that plaintiffs need only prove Some damages to establish the fact of damage, and that once the fact of damage has been shown, the amount of damage can be established according to a relaxed standard of proof, the Court of Appeals remanded for a reconsideration of the damage issue. *Knutson v. Daily Review, 548 F.2d 795, 813* (9 Cir.), Cert. denied, *433 U.S. 910, 97 S. Ct. 2977, 53 L. Ed. 2d 1094 (1977)*. [2.]

[1.] Actually, because the dealers sold their papers to carriers, who in turn sold to the public, the agreement established a "resale-resale price." *Knutson v. Daily Review, 548 F.2d 795, 800 n.2* (9 Cir.), Cert. denied, ***433 U.S. 910, 97 S. Ct. 2977, 53 L. Ed. 2d 1094 (1977)***. For the sake of simplicity, and because the dealers took "all reasonable steps to insure that the carriers sold at the announced subscription price," Ibid., this Court will discuss the damage evidence as though plaintiff-dealers sold directly to the public. See *Knutson v. Daily Review, 383 F. Supp. 1346, 1376 n.35 (N.D.Cal.1974)*.

[2.] The Court of Appeals also ordered "a limited remand on the *Section 2* count." *Knutson, supra, 548 F.2d at 800*. However, it did not indicate which aspects of this Court's findings should be reconsidered. Having fully weighed the evidence presented at trial, and having considered the legal analysis contained in the Court of Appeals' decision, this Court reaffirms its finding that there has been no *Section 2* violation.

[3]** The case is now before this Court on remand. Having considered the opinion of the Court of Appeals, the arguments of counsel, and all the evidence presented, both at trial and at a post-trial remand hearing, this Court concludes that plaintiffs are entitled only to nominal damages for defendants' violation of *Section 1* of the Sherman Act.

ANTITRUST DAMAGES

Before discussing the facts of this case and analyzing the Ninth Circuit's damage holding, it may be helpful to reiterate the standards applicable to the computation of antitrust damages. For it is only in the context of a long line of Supreme Court and **[*229]** Ninth Circuit antitrust damage opinions that the Court of Appeals' decision can properly be applied to the evidence before this Court.

HN1[] Plaintiffs in an antitrust suit have the burden of proving damages. As many courts have noted, this requires them to prove both the Fact of damage and the Amount of damage. These are two separate proofs. See *Story Parchment Co. v. Paterson Parchment Co., 282 U.S. 555, 562, 51 S. Ct. 248, 75 L. Ed. 544 (1931)*; *Flintkote Co. v. Lysfjord, 246 F.2d 368, 392* (9 Cir.), Cert. denied, *355 U.S. 835, 78 S. Ct. 54, 2 L. Ed. 2d 46 (1957)*; **[**4]** *Newberry v. Washington Post Co., 438 F. Supp. 470, 483 (D.D.C.1977)*. For the former, plaintiffs must establish with reasonable probability the existence of a causal connection between defendants' violation of the ***antitrust law*** and plaintiffs' revenue-impairing injury. See *Pac. Coast Agr. Export Ass'n v. Sunkist Growers, Inc., 526 F.2d 1196, 1205-1206* (9 Cir. 1975), Cert. denied, *425 U.S. 959, 96 S. Ct. 1741, 48 L. Ed. 2d 204 (1976)*; *Flintkote, supra, 246 F.2d at 392*; But see *Sunkist Growers v. Winckler & Smith Citrus Products Co., 284 F.2d 1, 32* (9 Cir. 1960), Rev'd on other grounds, *370 U.S. 19, 82 S. Ct. 1130, 8 L. Ed. 2d 305 (1962)* (plaintiff must provide proof to a "reasonable certainty"). [3] For the latter, plaintiffs must show the extent of the financial impact of defendants' antitrust violation. Generally, this can be accomplished through proof of lost profits.

Plaintiffs' *Section 2* claim was that "sometime prior to 1970 defendants attempted and conspired to monopolize the publication of community or suburban daily newspapers in the southern Alameda County area in violation of *§ 2* of the Sherman Act, *15 U.S.C. § 2*," and that "as an integral part of that attempt to monopolize defendants fixed resale prices, imposed territorial restraints on dealer distribution, and terminated all independent home-delivery dealers." *383 F. Supp. at 1369, 1370-1371*. An attempt and conspiracy to monopolize can only be established if plaintiffs have proven that defendants "possessed "a specific intent to acquire unlawful monopoly power.' " *Id. at 1371*, Quoting *Chisholm Brothers Farm Equipment Co. v. Int'l Harvester Co., 498 F.2d 1137, 1144* (9 Cir. 1974). Because there was "no indication in the evidence as a whole * * * of predatory or knowingly unlawful activity in connection with defendants' effort to establish, by contract, the subscription price of their newspapers," *Id. at 1372*, and because defendants in fact "took prompt action to bring their distribution practices into compliance with the antitrust laws * * *," Ibid., this Court found that there was no specific intent to monopolize and denied plaintiffs relief on their *Section 2* claim. *Id. at 1372, 1376*.

The Court of Appeals agreed with the standards used to determine whether there had been a *Section 2* violation and disagreed only with the Court's determination that defendants had not knowingly engaged in any unlawful activity in setting a maximum resale price. *548 F.2d at 814*. However, despite this disagreement, the Court of Appeals concluded that

" * * * the *Section 1* violation alone, or in conjunction with (the publisher's) newspaper acquisitions, the questionable promotional practices, and the padding of circulation figures would have supported a district court finding of specific intent, but that finding was not compelled and We cannot say that the district court's contrary determination was clearly erroneous." *Id. at 815* (emphasis added).

Despite the Court of Appeals' assertion that defendants' conduct was "knowingly unlawful," the evidence demonstrates that there was no specific intent to monopolize and this Court therefore reaffirms its earlier holding that "plaintiffs have failed to prove that * * * defendants attempted or conspired to monopolize the publication of community daily newspapers in the southern Alameda County area." *383 F. Supp. at 1376*.

3. Defendant's violation need not be the sole cause of the injury; however, it must be at least a substantial factor in bringing the injury about. See *Mulvey v. Samuel Goldwyn Productions, 433 F.2d 1073, 1075 n.3* (9 Cir. 1970), Cert. denied, ***402 U.S. 923, 91 S. Ct. 1377, 28 L. Ed. 2d 662 (1971)***. Moreover, the injury must be of the type the antitrust laws were intended to prevent and

[5]** ***HN2***[]

The measure of proof needed to meet these burdens differs significantly. Plaintiffs must bear a heavier burden in proving the fact of damage than in proving the amount of damage. See *Flintkote, supra, 246 F.2d at 392*. Thus, although a plaintiff cannot recover damages that are uncertain in the sense that they are not the certain result of defendant's violation, once this Fact of damage has been established, plaintiffs can recover all damages definitely attributable to that wrong, even if the Amount of damage is uncertain or difficult to ascertain. See *Story Parchment, supra, 282 U.S. at 562, 51 S. Ct. 248*; *Flintkote, supra, 246 F.2d at 392*. [4.]

[6]** ***HN3***[]

In calculating damages for antitrust violations, the trier of fact can rely upon probable and inferential as well as direct and positive proof. See *Story Parchment, supra, 282 U.S. at 561-564, 51 S. Ct. 248*; *Eastman Kodak Co. v. Southern Photo Co., 273 U.S. 359, 377-379, 47 S. Ct. 400, 71* ***[*230]*** *L. Ed. 684(1927)*. It is permitted to make a "just and reasonable estimate of the damage (suffered by plaintiffs) based on relevant data" presented, and these findings will be sustained even if the result is only approximate. See *Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251, 264, 66 S. Ct. 574, 580, 90 L. Ed. 652 (1946)*; *Story Parchment, supra, 282 U.S. at 563, 51 S. Ct. 248*; *Eastman Kodak Co., supra, 273 U.S. at 379, 47 S. Ct. 400*; *Greyhound Computer Corp., Inc. v. Int'l Bus. Mach. Corp., 559 F.2d 488, 506* (9 Cir. 1977), Cert. denied, *434 U.S. 1040, 98 S. Ct. 782, 54 L. Ed. 2d 790 (1978)*. The essential requirement is only that plaintiffs develop a reasonable theory for calculating the amount of damages and that they introduce the data necessary to make this calculation. *Lehrman v. Gulf Oil Corp., 500 F.2d 659, 668* (5 Cir. 1974), Rehearing denied, *503 F.2d 1403*, Cert. denied, *420* ***[**7]*** *U.S. 929, 95 S. Ct. 1128, 43 L. Ed. 2d 400 (1975)*; *SCM Corp. v. Xerox Corp., 463 F. Supp. 983, at 1019 (D.Conn.1978)*; L. Sullivan, Handbook of the Law of Antitrust, § 251, at 786 (1977). However, "even where the defendant by his own wrong has prevented a more precise computation, the (trier of fact) may not render a verdict based on speculation or guesswork." *Bigelow, supra, 327 U.S. at 264, 66 S. Ct. at 579, 580*. The burden may be relaxed, but it is never eliminated.

LAW OF THE CASE

In addition to being influenced by these general standards for evaluating damage evidence, the Court must follow the more detailed instructions given it by the Court of Appeals in this case. *548 F.2d 795*. First, the Court of Appeals found that the Daily Review plaintiffs had met their initial burden of proving the fact of damage. [5.]

---

must flow from that which makes defendant's acts unlawful. See *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 489, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*; *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 125, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*; *Murphy Tugboat Co. v. Crowley, 454 F. Supp. 847, 850-851 (N.D.Cal.1978)*.

[4.] There are two reasons why plaintiff's burden of proving the amount of damages is relaxed in an antitrust case: first, the "self-evident intangible nature of the subject matter"; and second, the recognition that most difficulties in computing antitrust damages arise as a result of defendant's own wrongful conduct. See *Flintkote Co. v. Lysfjord, 246 F.2d 368, 391* (9 Cir.) Cert. denied, ***355 U.S. 835, 78 S. Ct. 54, 2 L. Ed. 2d 46 (1977)***. Precise calculation of damages is often made impossible where defendant has restrained plaintiff in his profit-making activities, as this restraint obscures the conditions that would have prevailed in a free market. Further, courts have recognized that to allow defendants to escape payment of damages because they have made it difficult for the plaintiff to prove the exact amount of injury would be to permit a wrongdoer to profit by his own wrongdoing. Such defendants should not be permitted to argue that inexact and imprecise damages are improper. If the courts were willing to accept such arguments, potential defendants would be encouraged to act in a manner that would render damages as uncertain and speculative as possible, and this would of course undercut the policies underlying the antitrust laws. See *Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251, 264-265, 66 S. Ct. 574, 90 L. Ed. 652 (1946)*; *Story Parchment Co. v. Paterson Parchment Co., 282 U.S. 555, 563, 51 S. Ct. 248, 75 L. Ed. 544 (1931)*; *Eastman Kodak Co. v. Southern Photo Co., 273 U.S. 359, 377-379, 47 S. Ct. 400, 71 L. Ed. 684 (1927)*; *Pac. Coast Agr. Export Ass'n v. Sunkist Growers, Inc., 526 F.2d 1196, 1207* (9 Cir. 1975).

[5.] There were two groups of independent newspaper distributors who brought this lawsuit, those who sold The Daily Review and those who sold the Argus. On remand, this Court is only concerned with The Daily Review plaintiffs, Joseph W. Berthiaume, Robert A. Dutra, Kenneth W. Jackson, Willard B. Kittredge, Jean E. Nyland, and Evan F. Williams. Gayle C. Ely, the seventh

Recognizing that "different standards govern proof of the fact and proof of the amount of damages," and that to prove the fact of damage, plaintiffs need only offer " "proof of Some damage flowing from the unlawful conspiracy,' " the Court of Appeals concluded that The Daily Review "plaintiffs (have) produced evidence that despite circulation drops their net profits would **[**8]** have been higher in some amount" had there been no price restraint. *Knutson, supra, 548 F.2d at 811, 813*. In addition, the Court of Appeals concluded that these "reduced net profits were "precisely the type of loss that the claimed violations of the antitrust laws would be likely to cause,' " and that therefore, even though there may be "some infirmities in (plaintiffs') evidentiary showing," these "Infirmities are not so significant as to call into question the fact of damage, but relate only to the amount of damage." *Knutson, supra, 548 F.2d at 813*, Quoting *Zenith Radio Corp., supra, 395 U.S. at 125, 89 S. Ct. 1562* (emphasis added).

[9]** This conclusion might be subject to some dispute, both on the grounds that plaintiffs' evidence of profit loss was found by this Court not to be credible, [6.] **[**10]** and because the alleged loss probably was not of "the type **[*231]** that the statute was intended to forestall." [7.] See *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S.*

Daily Review plaintiff, did not appeal from the adverse decision below. The Court of Appeals has agreed that the Argus plaintiffs are not entitled to damages, stating that

" * * * the Argus plaintiffs * * * did not meet the-fact-of-damage Flintkote test. * * * Unlike other plaintiffs, the Argus plaintiffs had a complete failure of proof of damages, not simply some deficiencies in the proof of amount of damages." *Knutson, supra, 548 F.2d at 813*.

6. Plaintiffs' proof of lost profits was based on a "before/after" theory under which the "before" period was the time during which plaintiffs were restrained from raising their prices and the "after" period was the time subsequent to September 1, 1973, when plaintiffs were free to charge whatever prices they wished. All the Daily Review plaintiffs raised their subscription prices during the "after" period. They all claim increased net profits resulting from this price hike, despite losses in circulation. See *Knutson, supra, 548 F.2d at 810*. As a result, they contend that the evidence proves that their profits would have been higher before September 1, 1973, had they been allowed to charge their subscribers the "profit-maximizing" price.

After considering the testimony and demeanor of the Daily Review plaintiffs, this Court found that their post-September 1973 actions were self-serving and that the evidence taken from the "after" period was unreliable:

"Since plaintiffs' crucial profit and loss data, * * * was recorded and compiled well after the complaint was filed in the very litigation in which it was to be used to prove actual injury, its credibility is certainly suspect. Plaintiffs clearly had the opportunity to vary their gross income and expense figures during the "after' period in order to exaggerate the favorable impact that price increases might have on profitability. * * * Some of plaintiffs' profit data strains the Court's credulity to the breaking point. * * *

" * * * Moreover, when assessing the credibility of these profit and loss statements the Court cannot ignore the fact that the unaudited financial statements originally offered by several of the plaintiffs purportedly reflecting their actual operations indicated significantly higher net profit figures than were reported on those plaintiffs' federal income tax returns for the years in question. * * *

"Another and equally fundamental weakness in plaintiffs' proof of the fact of damage arises from the artificiality of the "after' period upon which the claims of lost profits are based. Plaintiffs conceded that "damages must be predicated on real market conditions * * *.' (Footnote omitted.) Yet during the entire "after' period one dominant market factor the wholesale price charged by the publisher and paid by the dealers has been under a court-imposed restraint that prevents defendants from raising that price." *Knutson, supra, 383 F. Supp. at 1382-1383*.

Moreover, as will be seen later in this opinion, the evidence demonstrates that plaintiffs would not have charged a higher price for their papers, even if it had been profitable to do so, because of their fear of publisher response. Because of the need to maintain a uniform sales price and a high level of circulation, the publisher could not have permitted the dealers to raise their prices with the resulting drop in circulation without taking action to protect his interests.

For these reasons, it appears to this Court that there remains a substantial question as to whether plaintiffs have produced evidence that they were in fact injured by defendants' maximum resale price restraint.

7. Because vertical resale price restraints have long been viewed as Per se violations of *Section 1* of the Sherman Act, See *Albrecht v. Herald Co., 390 U.S. 145, 151-152, 88 S. Ct. 869, 19 L. Ed. 2d 998*, Rehearing denied, ***390 U.S. 1018, 88 S. Ct. 1258, 20 L. Ed. 2d 169 (1968)***; *Kiefer-Stewart Co. v. Seagram & Sons, 340 U.S. 211, 213, 71 S. Ct. 259, 95 L. Ed. 219*,

477, 487-488, 97 S. Ct. 690, 697, 50 L. Ed. 2d 701 (1977), Quoting Wyandotte **[*232]** Co. v. United States, 389

Rehearing denied, ***340 U.S. 939, 71 S. Ct. 487, 95 L. Ed. 678 (1951)***, courts have not found it necessary to evaluate the anti-competitive consequences of each violation. However, recent case law has called into question the continued application of Per se analysis to this type of case. See *Continental T. V. Inc., v. GTE Sylvania, Inc., 433 U.S. 36, 57-59, 97 S. Ct. 2549, 53 L. Ed. 2d 568* (vertical territorial restrictions should be subjected to rule of reason rather than Per se analysis); *Eastern Scientific Co. v. Wild Heerbrugg Instruments, Inc., 572 F.2d 883, 885-886* (1 Cir. 1978), Cert. denied, ***439 U.S. 833, 99 S. Ct. 112, 58 L. Ed. 2d 128 (1978)*** (resale price restraint having lesser anti-competitive effect than pure territorial restriction analyzed under rule of reason in light of Continental). For this reason, it seems appropriate for the Court to consider whether the purposes of the antitrust laws are truly served by a finding that plaintiffs have proven a violation and the fact of injury. See *Brunswick, supra, 429 U.S. at 487-488, 97 S. Ct. 690, 697* (respondents not allowed to recover under Clayton § 7 for lost profits suffered when large manufacturer acquired their competitors, thus preventing competitors from going out of business; Court held that because respondents sought to recover "the profits they would have realized had competition been reduced," their "injury was not of "the type that the statute was intended to forestall,' " and that it would be "inimical to the purposes of (the antitrust) laws to award damages for the type of injury claimed * * * "); *Murphy Tugboat Co. v. Crowley, 454 F. Supp. 847, 851-852 (N.D.Cal.1978)* (Brunswick reasoning applicable to Sherman *§ 1* claim).

The anticompetitive consequences that usually flow from the imposition of maximum resale price restraints were articulated by the Supreme Court in *Albrecht, supra* :

"(First,) agreements to fix maximum prices "no less than those to fix minimum prices, cripple the freedom of traders and thereby restrain their ability to sell in accordance with their own judgment.' (Footnote and citation omitted.)

" * * * (Second, maximum prices may be fixed too low for the dealer to furnish services * * * and conveniences which consumers desire and for which they are willing to pay. (Third, maximum price fixing may channel distribution through a few large or specifically advantaged dealers who otherwise would be subject to significant non-price competition. * * * (Fourth,) if the actual price charged under a maximum price scheme is nearly always the fixed maximum price, which is increasingly likely as the maximum price approaches the actual cost of the dealer, the scheme tends to acquire all the attributes of an arrangement fixing minimum prices." *390 U.S. at 152-153, 88 S. Ct. at 873*, Quoting *Kiefer-Stewart, supra, 340 U.S. at 213, 71 S. Ct. 259*.

None of these "evils" are present in this case. First, even if the restraint "cripple(d) the freedom" of plaintiffs, the Supreme Court has expressly rejected this factor as a basis for imposing antitrust liability. See *Continental T. V. Inc. v. GTE Sylvania, Inc., supra, 433 U.S. at 53 n. 21, 97 S. Ct. 2549*.

Second, plaintiffs have not alleged that they would have provided additional services or conveniences to their subscribers if they had been allowed to charge a higher price. The motivation for raising prices was to effect a decrease in circulation that, because of the dual rate structure, would lead to higher net profits. Setting higher prices In order to increase services would appear to be counterproductive; it would retard the desired circulation drop.

Third, there is no indication that the price restraint protected any dealer from "significant non-price competition." In fact, the dealers did not compete among themselves for subscribers and, if anything, the elimination of the price restraint would have made inter-dealer competition even less likely. The dealers wanted to restrict distribution. Because of the dual rate structure they had no interest in expanding their distribution into other dealers' territories. See *Knutson, supra, 548 F.2d at 809, 810*.

Fourth, it cannot be said that the price ceiling was actually a cover for a minimum price setting scheme. The resale price was not set at the dealers' cost. Had the dealers wanted to increase circulation, they could have afforded to undercut the suggested price. The reason they chose not to sell at a lower price was simply because they had no need and no motivation to increase circulation once the base level of sales had been reached.

In fact, it is not unreasonable to conclude that defendants' maximum resale price restraint had a pro-competitive effect and that price freedom would have had anticompetitive consequences. By seeking the removal of the resale price restrictions, plaintiffs sought the power to increase profits by raising subscription prices in their areas of distribution. However, because each plaintiff had a De facto monopoly in his or her area, these increased profits could only be characterized as monopoly rents. The result of lifting the price ceiling would therefore be to encourage each dealer's fortification and exploitation of his or her particular monopoly. Moreover, because the effect of a price hike would be to decrease circulation, a dealer's freedom to raise prices would logically lead to the elimination of any inter-dealer competition that may have existed on the fringes of each dealer's area of distribution.

This analysis suggests that although plaintiffs' alleged losses may be of the type that the claimed violation would be likely to cause, they are not of the type that the antitrust laws were intended to prevent. For this reason, the Court questions whether

U.S. 191, 202, 88 S. Ct. 379, 19 L. Ed. 2d 407 (1967). However, as the law of the case, these findings must be accepted on remand, and this Court must assume the fact of damages. Therefore, all that remains for this Court to do is ascertain the amount of damages to which each Daily Review plaintiff is entitled.

[11]** THE AMOUNT OF DAMAGES

After considering all the evidence presented at trial, this Court concluded that plaintiffs had failed to meet their burden of proving either the fact or the amount of damage. [8] The Court of Appeals disagreed, finding that this holding, by requiring proof to a reasonable probability that plaintiffs **[*233]** actually would have raised their prices, created "a nearly insurmountable barrier to recovery in maximum price-fixing cases." Knutson, supra, 548 F.2d at 812. As a result, and in order to ease plaintiffs' burden, the Court of Appeals established a presumption that the dealers' pricing policies would have been guided by the principle of profit-maximization. It did so in a paragraph that deserves extended scrutiny, for it is in this paragraph that the Court of Appeals sets forth the guidelines for evaluating the evidence on "amount of damages." The Court of Appeals stated:

[12]**

> "Rather than imposing the nearly impossible burden of proving what each dealer would have done if he had been free to make his own pricing decision, we assume that, absent evidence to the contrary, a dealer would have raised his prices had it been profitable to do so; that is, dealers are profit maximizers. (Footnote omitted.) This assumption merely amounts to a recognition that a "restraint' in fact restrains. The defendants can attempt to show plaintiffs would have kept their prices beneath a maximizing point despite their violative behavior. Contrary evidence might include dealer testimony that he would not have raised his price, or a showing by the defendants that the dealers had reasons other than the restraint for selling below a profit-maximizing price." 548 F.2d at 812.

Central to the Court of Appeals' holding was its "assumption" that absent the price restraint, each dealer would have raised his or her prices so long as it would have been profitable to do so. Although the Court of Appeals used the word "assume" rather than "presume," the context in which the word appears suggests that the Court was creating a rebuttable presumption that all dealers are profit maximizers. **[**13]** See Knutson, supra, 548 F.2d at 816 (Smith, J., dissenting).

But what does this presumption mean? At first glance, the language would suggest that the burden of proving damages at least in maximum price restraint cases should be shifted from plaintiff to defendant; that plaintiffs are presumed to have intended to charge the price at which they would have received the greatest profit; and that because a "restraint in fact restrains," this profit-maximizing price is presumed to be higher than the fixed price. However, this interpretation could place on the district court the burden of determining the profit-maximizing price, and the Court of Appeals could not have intended such a result.

---

plaintiffs should have been found to have demonstrated a violation and resulting fact of injury. See Brown Shoe Co. v. United States, 370 U.S. 294, 320, 82 S. Ct. 1502, 8 L. Ed. 2d 510 (1962) (antitrust laws were enacted for the protection of competition, not competitors); Cf. Albrecht, supra, 390 U.S. at 156-159, 88 S. Ct. 869 (Harlan, J., dissenting).

[8] Noting that "(t)he evidence * * * presented * * * amounted to no more than conjectural hindsight and even contained contradictory assertions of interested parties," 383 F. Supp. at 1379, that "(t)he credibility of the evidence is further diminished by the fact that these claims (of damage) were first made during the trial and lack any corroborating circumstantial evidence," 383 F. Supp. at 1380, that "plaintiffs' crucial profit and loss data * * * recorded and compiled well after the complaint was filed * * * is certainly suspect * * * (and) strains the Court's credulity to the breaking point," 383 F. Supp. at 1382, and that "the "after' period upon which the claims of lost profits are based" constitutes "an artificial rather than a real market experience thereby destroying the probative value of the "before/after' test relied upon by plaintiffs," 383 F. Supp. at 1383, the Court held

" * * * that plaintiffs have not shown that there is a reasonable probability that they actually would have increased their prices during the damage period if they had been permitted to do so or that they actually would have realized higher profits had they raised their prices. Consequently, plaintiffs have failed to prove both the fact and amount of damage on their lost profits claim." 383 F. Supp. at 1384.

The inappropriateness of this result is illustrated by the hypothetical case in which neither party has introduced any evidence as to the amount of damages. In such a case, even though plaintiffs have not shown what their pricing policies would have been, the district court, in presuming that plaintiffs would have raised their prices to the profit-maximizing level, would itself have the burden of determining what that level would be. Because the parties would have introduced no supporting evidence, **[**14]** the district court could only make this determination by combining economic analysis with speculation and conjecture. The district court would first have to determine whether the Court of Appeals' presumption was based on short-term profit maximization or on long-term profit maximization. Then it would have to calculate the optimum price to be charged. In doing so, it would be compelled independently to consider such factors as the effect of a price rise on circulation, the impact of intra-and inter-brand competition, and the response of the publisher to a dealer's pricing change. The obligation to undertake this type of speculative economic analysis should not be thrust on the district courts. See *Illinois Brick Co. v. Illinois, 431 U.S. 720, 742-743, 97 S. Ct. 2061, 52 L. Ed. 2d 707*, Rehearing denied, *434 U.S. 881, 98 S. Ct. 243, 54 L. Ed. 2d 164 (1977)*.

Moreover, adoption of this interpretation of the Ninth Circuit's decision would create a conflict with the clear line of judicial authority. In all other cases in which antitrust plaintiffs have sought compensation for lost profits, the courts have required them to introduce at least some evidence of the extent to which defendants' **[**15]** anti-competitive practices caused damage. See, e.g., *Bigelow, supra, 327 U.S. at 264-266, 66* ***[*234]*** *S. Ct. 574*; *Story Parchment, supra, 282 U.S. at 561, 51 S. Ct. 248*; *Eastman Kodak, supra, 273 U.S. at 379, 47 S. Ct. 400*; *Greyhound, supra, 559 F.2d at 505-506*; *Gray v. Shell Oil Co., 469 F.2d 742, 748* (9 Cir. 1972), Cert. denied, *412 U.S. 943, 93 S. Ct. 2773, 37 L. Ed. 2d 403 (1973)*; *Siegel v. Chicken Delight, 448 F.2d 43, 52-53* (9 Cir. 1971), Cert. denied, *405 U.S. 955, 92 S. Ct. 1172, 31 L. Ed. 2d 232 (1972)*; *Lessig v. Tidewater Oil Co., 327 F.2d 459, 471-472* (9 Cir.), Cert. denied, *377 U.S. 993, 84 S. Ct. 1920, 12 L. Ed. 2d 1046 (1974)*; *Flintkote, supra, 246 F.2d at 392-394*; *Newberry, supra, 438 F. Supp. at 483* ("There is simply no proof that provides a basis for determining when, if ever, a price increase would have been attempted by any (plaintiff news dealer) or in what amount * * * "). These courts have dealt with the problem of uncertain damages by relaxing plaintiffs' burden of proof, not by shifting the entire burden to defendants.

For these reasons, it seems more appropriate to interpret the Knutson decision in such a way as to maintain the burden of proof on the plaintiffs. **[**16]** This can be done by focusing on the "had it been profitable to do so" language.

The Ninth Circuit "assume(d) that, absent evidence to the contrary, a dealer would have raised his prices had it been profitable to do so; that is, dealers are profit maximizers." *548 F.2d at 812*. As noted above, this statement could be read as creating a presumption that absent a restraint, each dealer would have charged the profit-maximizing price, I. e., the price determined by the district court to be profit maximizing. However, the statement can also be read as holding that Once plaintiffs have proved that, absent restraints, it would have been profitable for them to have raised their prices, the Court must presume their intent to have done so. This interpretation would place on plaintiffs the burden of proving that the profit-maximizing price was greater than the price charged while the restraint was in effect. If plaintiffs produced no probative evidence in support of this contention, then they would not be entitled to damages. However, if they could demonstrate by use of the before/after test, the yardstick test, or by the use of experts that they would have profited by charging more for their **[**17]** product than defendants had allowed them to charge, the Court would presume their intent to have done so, and the burden would shift to defendants to offer evidence to the contrary. [9.]

[9.] As noted by the Court of Appeals, defendants could rebut the presumption that plaintiffs would have charged the profit-maximizing price by introducing contrary evidence such as

"dealer testimony that he would not have raised his price, or (other testimony) that the dealers had reasons other than the restraint for selling below a profit-maximizing price." *548 F.2d at 812*.

It is significant that these examples rebut the presumption that each dealer intended to charge the profit-maximizing price, not the presumption that the profit-maximizing price was higher than the fixed price.

The Court of Appeals' statement that a restraint in fact restrains is not necessarily inconsistent with this interpretation. That language should not be read as a declaration that a maximum price restraint restrains only if it is set below the profit-maximizing **[**18]** price and that the district court must therefore presume that the profit-maximizing price was higher than the fixed price. Rather, it should be read merely to state that the restraint imposed by defendants prevented plaintiffs from exercising free choice in setting prices, and that whether plaintiffs would in fact have set their prices above the imposed price still depends on whether they can show that it would have been profitable to have done so. See *Continental T. V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 53 n.21, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*; *Chicago Board of Trade v. United States, 246 U.S. 231, 238, 38 S. Ct. 242, 244, 62 L. Ed. 683 (1918)* ("Every agreement concerning trade, every regulation of trade, restrains. To bind, to restrain, is of their very essence.")

Thus, in evaluating the evidence on remand, this Court will not presume that plaintiffs would have set their prices at a level higher than the fixed price. Rather, **[*235]** plaintiffs must first demonstrate to this Court's satisfaction that the profit-maximizing price was higher than the fixed price. If the evidence presented does not support that contention, then plaintiffs are not entitled to more **[**19]** than nominal damages. [10.] However, if plaintiffs can demonstrate that the profit-maximizing price was higher than the fixed price, then the Court will presume that they would have charged that higher price to their customers, and it will shift the burden to defendants to rebut that presumption.

THE PROFIT-MAXIMIZING PRICE

In determining whether plaintiffs have met their burden of proving that the profit-maximizing price exceeded the fixed price, the Court must focus on the period from September 1, 1969 to September 1, 1973. This is the time interval during which plaintiffs are potentially entitled to damages, for defendants terminated their illegal dealership agreements with plaintiffs on August 31, 1973, **[**20]** and the applicable statute of limitations for private causes of action under the federal antitrust laws is four years. See *15 U.S.C. § 15b*; *Knutson, supra, 383 F. Supp. at 1353*.

Plaintiffs concede that from the start of this damage period to January 1, 1971, a period of sixteen months, the profit-maximizing price was virtually identical to the maximum resale price set by defendants. Their expert economist concluded that the prices were "so close" during this period that the dealers "would have followed the suggested price," and none of the plaintiffs alleged that the profit-maximizing price would have been higher. See Plaintiffs' Proposed Finding of Fact 17; Transcript, Oct. 13, 1978, at 7; Transcript, Jan. 25, 1978, at 23. Therefore, because there has been no showing that it would have been more profitable for plaintiffs to have charged a higher price for The Daily Review subscriptions from September 1, 1969 to January 1, 1971, this Court finds that plaintiffs are not entitled to any damages for that time period.

Plaintiffs argue that as of January 1, 1971, however, the profit-maximizing price of The Daily Review rose approximately fifty cents per month. On that date, the **[**21]** Oakland Tribune raised its monthly subscription price from $ 3.25 to $ 3.75. Plaintiffs contend that the Tribune's pricing policies had a direct competitive impact on their own prices, that their profit-maximizing price was fifty cents lower than whatever price the Tribune happened to be charging, and that this Court should therefore find that as of January 1, 1971, the profit-maximizing price of The Daily Review was approximately $ 3.25 per month. See Plaintiffs' Proposed Finding of Fact 13.

Plaintiffs support this contention with three arguments. First, they point to their own testimony that the price of the Tribune was a significant influence on their pricing policies and that they felt it important to maintain approximately a fifty-cent price differential. See Transcript, Jan. 26, 1978, at 18, 29-30, 44-45; Transcript, Jan. 27, 1978, at 56; Plaintiffs' Exhibit Nos. 1009-1014, Affidavits of Robert Dutra, Kenneth Jackson, Willard Kittredge, Joseph Berthiaume, Evan Williams, and Jean Nyland. Next, they point to the historical fact, that the subscription price of The Daily Review was set fifty cents below that of the Tribune from October 1, 1960 to May 18, 1967, from

---

[10.] Under most circumstances, plaintiffs who fail to establish the amount of their injury are not entitled to any damage award. However, in this case, the Court of Appeals' determination that "fact of injury" has been established compels a finding that plaintiffs are entitled to at least nominal damages.

November **[**22]** 1, 1967, to November 1, 1968, and again from October 1, 1969 to January 1, 1971. See Plaintiffs' Proposed Finding of Fact 13. Presumably, this indicates that there is a correlation between the profit-maximizing price of The Daily Review and the price of the Tribune. Finally, they note that Floyd Sparks, the publisher of The Daily Review, testified on numerous occasions that his pricing policies were greatly influenced by competition from the Tribune and that fifty cents seemed to be the most appropriate margin by which to **[*236]** undersell that paper. See Transcript, Vol. 3, Nov. 16, 1973, 11:50 A.M. Session, at 119; Transcript, Vol. 4, Nov. 30, 1973, 2d Session, at 12; Transcript, Jan. 27, 1978, at 13-14.

In light of plaintiffs' arguments and the testimony adduced at trial and on remand, the Court is willing to find that plaintiffs have met their initial burden of proving that as of January 1, 1971, the profit-maximizing price of The Daily Review rose to approximately $ 3.25 per month, fifty cents above the maximum subscription price set by defendants. The Court realizes the artificiality of this figure. Certainly the profit-maximizing price is in a constant state of flux **[**23]** and is influenced by many factors, including competition from other newspapers and news sources, the quality of the product, carrier demands, the state of the local economy, etc. However, the Court concludes that plaintiffs have produced enough evidence to show that a fifty-cent Daily Review price hike on or after January 1, 1971 would have led to increased dealer profits, assuming that the publisher continued to sell his papers to them at pre-1971 prices. Therefore, the Court finds that plaintiffs' initial burden has been met.

Having established that the profit-maximizing price was higher than the fixed price after January 1, 1971, the Court must determine whether defendants have rebutted the presumption that plaintiffs would actually have raised their prices to this level. The Court is mindful of the Court of Appeals' suggestion that this rebuttal can consist of evidence such as

> "dealer testimony that he would not have raised his price, or a showing by the defendants that the dealers had reasons other than the restraint for selling below a profit-maximizing price." *Knutson, supra, 548 F.2d at 812*.

After considering the testimony of the witnesses and the evidence presented, **[**24]** this Court finds that defendants have rebutted the presumption, and it therefore finds that plaintiffs are only entitled to nominal damages.

Defendants have rebutted the presumption that plaintiffs would have raised their subscription prices on January 1, 1971 with two arguments. First, they point to subsequent events which demonstrate that plaintiffs would have delayed for a period of at least several months before reacting to the Tribune's January 1, 1971 price hike. Second, they contend that plaintiffs were aware that if they had raised their prices on or after January 1, 1971, the publisher would have been forced to convert his independent distributor system to an employee distribution system or to take some other action that would have jeopardized the dealers' independent status. Knowing that their future existence as independent dealers would have been jeopardized by instituting a price hike, defendants argue that plaintiffs would voluntarily have maintained the publisher's suggested price even though their "profit-maximizing" price may have been higher.

TIME LAG

In late July 1973, defendants notified all plaintiffs that their Dealership Agreements would be terminated effective **[**25]** at the close of business on August 31, 1973. *Knutson, supra, 383 F. Supp. at 1353*. On August 6, 1973, plaintiffs filed this lawsuit. Shortly thereafter, the parties agreed, Inter alia, that during the pendency of this litigation, plaintiffs could continue to distribute The Daily Review, setting their own subscription price, but that defendants would be prohibited from selling the papers to them at other than the then prevailing rates. See *Knutson, supra, 548 F.2d at 801*; *383 F. Supp. at 1354*. In other words, as of September 1, 1973, plaintiffs could sell The Daily Review at any price they chose while defendants could not raise their prices or react to plaintiffs' decisions in any way.

The existence of this agreement provides the Court with an ideal situation for testing the profit-maximizing presumption. As of September 1, 1973, all of plaintiffs' pricing restraints had been lifted, the publisher's hands had been tied, and the Tribune's selling price had been established at one dollar higher than The Daily Review's. If plaintiffs were truly profit maximizers, they all **[*237]** would have immediately raised their prices to $ 3.25 per month. However, they did not. Although **[**26]** plaintiff Berthiaume raised his subscription price on September 1, plaintiffs Kittredge, Williams, and Nyland did not act until October 1, and plaintiffs Dutra and Jackson did not raise their prices until November 1. *Knutson, supra, 383 F. Supp. at 1378 n.40*. These time lags between the date of price freedom and the date of dealer response prove just how fragile the presumption of profit maximization can be.

At a minimum, the Court must find that five of the six plaintiff dealers would have hesitated one to two months after achieving price freedom before raising their prices to the profit-maximizing level. Their delay in responding to the actual lifting of the maximum price restraint compels such a result. Moreover, in light of this Court's earlier determination regarding plaintiffs' credibility, the Court now finds that the time lag would have been greater.

Plaintiffs knew that their entitlement to damages would depend in part on the profits they received after September 1, 1973. They knew that the sooner their prices were raised, the more likely it would be that this Court would find them to be immediate profit maximizers. Their delay in responding to price freedom only shows **[**27]** that the presumption of immediate profit maximization is unsupported here, and that plaintiffs actually would have hesitated for at least a few months before raising their prices to the "profit-maximizing" level. The Court must so find. [11.]

DEALER REACTION

The second piece of rebuttal evidence offered by defendants is even more harmful to plaintiffs' claim for damages. It consists of testimony that the publisher would have responded to plaintiffs' price freedom by converting to an employee distribution system, and that knowledge of the likelihood of this response would have been a "(reason) other than the restraint for (plaintiffs') selling below a profit-maximizing price." *Knutson, **[**28]** supra, 548 F.2d at 812*.

Although the publisher and the dealers all earned their income through sales of The Daily Review, their strategies for maximizing profits appear to have been in conflict. See Transcript, Vol. 11, Feb. 8, 1974, at 304. The publisher, whose gross income was derived 88% From advertising revenue, was predominantly concerned with maintaining a high circulation in order to promote his sales of advertising lineage. See Transcript, Vol. 4, Nov. 30, 1973, 2d Session, at 27; Transcript, Vol. 11, Feb. 8, 1974, at 319. Advertising rates are in large part a function of total circulation. The greater the circulation, and therefore the greater the potential market, the more willing advertisers are to purchase space from a newspaper. Therefore, because circulation tends to increase as subscription prices decrease, the publisher can maximize his profit by keeping the price of his paper low. This low price leads to higher circulation and therefore to more substantial advertising revenues. See *Albrecht v. Herald Co., 390 U.S. 145, 169 n.2, 88 S. Ct. 869, 19 L. Ed. 2d 998 (1968)* (Stewart, J., dissenting); *Knutson, supra, 383 F. Supp. at 1363*; Transcript, Vol. 4, Nov. 30, **[**29]** 1973, 2d Session, at 9.

Unlike the publisher, the dealers' profit picture depends solely upon circulation. *Knutson, supra, 383 F. Supp. at 1363-1364*. Their income is derived exclusively from sales of The Daily Review, not from sales of advertising.

Under the dual rate structure established by the publisher, the dealers pay a base rate for each paper purchased up to a specified number, and a higher rate for each additional paper purchased. *Id. at 1352 n.4*. These payments, plus the carriers' earnings, are subtracted from total subscription revenues to determine dealers' profits. *Id. at 1351-1352*; *548 F.2d at 808*. Because a dealer's profit per paper is higher when he **[*238]** pays the publisher only at the lower base level rate, his most logical profit strategy would be to raise subscription prices to the point that circulation drops to the base level. See Transcript, Vol. 9, Feb. 6, 1974, 2d Session, at 25; Transcript, Jan. 27, 1978, at 53. This strategy is obviously in conflict with the publisher's high circulation strategy. See *Knutson, supra, 383 F. Supp. at 1364*.

---

11. This conclusion is supported by plaintiffs' "Second Supplemental Damage Study," submitted after trial, in which their expert, Dr. David Bradwell, calculated damages based on the assumption that plaintiffs would not have raised their prices until July 1, 1971. See, e.g., Plaintiffs' Exhibits 1002B, 1005B, 1006B, and 1007B.

Sparks, the publisher of The Daily Review, acknowledged that a dealer's decision to raise subscription prices **[**30]** would seriously impair the profitability of his paper. See Transcript, Jan. 27, 1978, at 20-21. He had no doubt that a dealer price hike would lead to a drop in circulation that would in turn lead to diminished advertising revenues. See Transcript, Vol. 4, Nov. 30, 1973, 2d Session, at 9; Transcript, Jan. 26, 1978, 4 P.M. Session, at 23. [12.] This problem would have been particularly severe toward the beginning of the damage period because of the strong competition for advertising revenues then existing between The Daily Review, the San Leandro Morning News, and the Fremont News Register. Transcript, Jan. 27, 1978, at 22. However, the problem would continue so long as advertising revenues were the publisher's main source of income. Moreover, because a diminution of advertising revenues would decrease the funds available for future circulation promotions, a dealer price hike would trigger a downward profit spiral, ultimately leading to tremendous financial losses for The Daily Review. See Transcript, Vol. 11, Feb. 8, 1974, at 341; Transcript, Vol. 14, Feb. 14, 1974, at 220.

[31]** Sparks recognized also the need to maintain a uniform subscription price for his paper, both to avoid confusion among his subscribers and to make widespread circulation promotions more feasible. See *Knutson, supra, 383 F. Supp. at 1363*, Transcript, Vol. 2, Nov. 15, 1973, at 426; Transcript, Vol. 3, Nov. 16, 1973, 11:50 A.M. Session, at 127, 147; Transcript, Vol. 5, Dec. 1, 1973, at 27. For all these reasons, he testified that he would have responded to price freedom in such a way as to maintain as much control over subscription prices as would have been legally possible. See Transcript, Vol. 2, Nov. 15, 1973, at 421; Transcript, Vol. 3, Nov. 16, 1973, 11:50 A.M. Session, at 146; Transcript, Vol. 4, Nov. 30, 1973, 2d Session, at 34. [13.]

[32]** The Court finds that the need for swift reaction to a dealer price hike in order to maintain price uniformity and advertising revenues would have caused Sparks to respond to dealer price freedom either by immediately converting to an employee distribution system or by converting to a system of free distribution, even if that required cutting back on the frequency of publication. [14.] The evidence amply supports this finding. See Transcript, Vol. 11, Feb. 8, 1974, at 373; Transcript, Vol. 22, Apr. 25, 1974, at 194, 2 P.M. Session, at 6; Transcript, Jan. 26, 1978, 4 P.M. Session, at 21, 26-28, 44; Transcript, Jan. 27, 1978, at 35-36; Transcript, Feb. 2, 1978, at 148.

[33]** Furthermore, this conclusion is not undermined by Sparks' failure to respond to the dealer price hikes that occurred between September 1, 1973, and November 1, 1973. As noted above, the publisher's hands were tied by the stipulation of the parties approved **[*239]** by the Court that enjoined him from refusing to sell The Daily Review to plaintiffs at the established rates. See *Knutson, supra, 383 F. Supp. at 1354*. He was thus prohibited from raising his prices or from terminating their distributorships during the pendency of the litigation. The publisher's inaction during the post-September 1, 1973 period does not therefore provide probative evidence of whether Sparks would have converted to a new distribution system when the dealers gained price freedom.

DEALER AWARENESS

The presumption that plaintiffs would have charged the "profit-maximizing" price cannot be rebutted merely by evidence that their dealerships would have been terminated if they had raised their prices. If plaintiffs were unaware that the publisher would have been forced to respond to a price increase, they might have raised their

---

12. Plaintiffs' own expert, Dr. David Bradwell, testified that if the dealers had been permitted to effect the proposed price hike, circulation levels would have dropped approximately 22%. Transcript, Jan. 25, 1978, at 151.

13. Either of these options could have been pursued without violating the antitrust laws, particularly insofar as they would have been the result of a good-faith, valid business decision, having across-the-board effect, and authorized by the explicit terms of the termination clause of the Dealership Agreements. See *Knutson, supra, 548 F.2d at 804-807*; *383 F. Supp. at 1358, 1359-1367*.

14. This conclusion is reinforced by Sparks' "termination" letter of July 25, 1973, in which he stated that the conversion of his distribution system was "necessary to obtain closer supervision over our circulation, and in particular over efforts to increase such circulation. * * * Any loss in circulation to (our) competitors would adversely affect our advertising revenue." *Knutson, supra, 383 F. Supp. at 1353-1354*.

prices regardless of the likely consequences. [15.] However, upon consideration **[**34]** of the evidence, this Court concludes that plaintiffs Were aware of potential publisher response and that this awareness would have kept them from raising their subscription prices even if they had had price freedom earlier than September 1, 1973. See *Knutson, supra, 383 F. Supp. at 1364 n.19*A.

The presumption established by the Court of Appeals that plaintiffs were profit maximizers was partially based on the assumption that these dealers were knowledgeable business persons with the aptitude and inclination to act in their own self interest. After having observed the demeanor and having **[**35]** heard the testimony of these individuals during trial, this Court agrees; plaintiffs were sophisticated newsdealers who understood the dynamics of their industry and who therefore should be found to have been aware of the consequences of a price hike.

A number of plaintiffs admitted during trial that they had at least considered the impact of a dealer price hike on the publisher's profits. See, e.g., Transcript, Vol. 7, Dec. 13, 1973, Morning Session, at 16; Transcript, Vol. 8, Feb. 5, 1974, at 135. In addition, the evidence demonstrates plaintiffs' awareness of the "market fact" that subscription price, circulation, and advertising revenues are all interrelated. See Transcript, Vol. 8, Feb. 5, 1974, at 142; Transcript, Vol. 14, Feb. 14, 1974, at 363-364. Moreover, their own expert economist, Dr. David Bradwell, testified during the remand trial that plaintiffs were aware of the publisher's need to maintain a high circulation, and that they would not have raised prices if it meant putting themselves out of business. [16.]

[36]** **[*240]** In light of this evidence, and plaintiffs' testimony that their pricing decisions would be influenced by long-term rather than by short-term objectives, See Transcript, Jan. 26, 1978, 1:30 P.M. Session, at 11, 40; Transcript, Jan. 27, 1978, at 47, 49, the Court concludes that plaintiffs would not have been "profit-maximizers." Surely they were aware that any action on their part to raise subscription prices even if it would have been in their immediate self-interest would in the long run have had disastrous consequences for their businesses. Any price hike or threat of price hike would have caused the publisher to convert to an employee distribution system or to take some action that would destroy plaintiffs' positions as independent newsdealers. Therefore, because the evidence

---

[15.] If that were the case, the Court could award plaintiffs damages for the profits they lost between the date they would have responded to price freedom by raising prices and the date the publisher would have responded by converting his distribution system. Because of the time lag in dealer response mentioned earlier, however, and the publisher's need to act quickly, this damage period would have been very short indeed.

[16.] "Q. Did you happen to discuss with any of the plaintiffs the emphasis that the circulation department placed upon maintenance and growth of circulation and volume at the Hayward Daily Review?"

"A. Yes, there was some discussions (Sic) of the promotional activities of the circulation department.

"Q. Well, and the emphasis upon the part of the circulation management that the dealers' primary function was to develop circulation?

"A. Yes.

"Q. And the dealers recognized that, the extreme importance of that fact to circulation management?

"A. Oh, no question."

Transcript, Jan. 25, 1978, at 148-149.

"Q. Of course you recognize there are substantial differences in the factors which a publisher considered from those which a dealer considered, do you not?

"A. Yes.

"Q. Do you assume that the dealer is equally (concerned) about the impact of his actions upon the newspaper firm?

"A. In a different way, yes.

"Q. In which way, Doctor Bradwell?

"A. Well, if he were to act in such a predatory way that he destroyed his source of supply, he would be out of business."

Transcript, Jan. 25, 1978, at 153, 155.

shows that plaintiffs would not have raised their prices even if they had been free to do so, the Court can award only nominal damages. [17.] This award will be trebled pursuant to *15 U.S.C. § 15*. See *Newberry v. Washington Post Co., supra, 438 F. Supp. at 483*; *Siegfried v. Kansas City Star Co., 193 F. Supp. 427, 440 (W.D.Mo.1961)*, *Aff'd, 298 F.2d 1* (8 Cir.), Cert. denied, *369 U.S. 819, 82 S.* **[**37]** *Ct. 831, 7 L. Ed. 2d 785 (1962)*.

Plaintiffs' damage award is significant in two respects. First, it incorporates the finding of the Court of Appeals applicable here as the law of the case that plaintiffs **[**38]** have established the Fact of damages. See p. 230, Supra. Second, it indicates that even though the fact of damages has been established, plaintiffs have not proven the Amount of damages; they have failed to demonstrate to the Court's satisfaction that they suffered lost profits due to defendants' illegal maximum price restraint. In fact, the evidence points to the contrary conclusion, that the Sherman Act violation did not affect plaintiffs' profits.

In *Newberry, supra*, the court found that the publisher of the Washington Post violated *Section 1* of the Sherman Act by illegally restraining the price at which its dealers sold the newspaper. Those plaintiffs who had raised their prices despite the restraint were awarded treble damages based on their evidence of lost profits. *438 F. Supp. at 483*. The remaining plaintiffs received only nominal damages, however, because the Court found that

> "(there) is simply no proof that provides a basis for determining when, if ever, a price increase would have been attempted by any of (the plaintiffs) or in what amount * * *. The Court has found that (defendant restrained plaintiffs') freedom to price without interference; but this does not **[**39]** establish that but for the Post's action, all prices would have been raised, or by what amount. * * * Cognizant of the Supreme Court's establishment of a relaxed standard of proof of the amount of damages once an antitrust violation has been shown (citation omitted), the Court concludes nonetheless that it would be the sheerest speculation to award more than nominal damages." *438 F. Supp. at 483*.

In this case as well, the Court concludes that it would be sheer speculation, and in fact contrary to the evidence, to award more than nominal damages. Cf. *SCM Corp. v. Xerox Corp., supra, 463 F. Supp. at 1017-1020 (D.Conn.1978)* (evidence does not support plaintiff's lost profits damage theory). Accordingly, the Court concludes that plaintiffs are each entitled to an award of three dollars. See *Morning Pioneer Inc. v. Bismarck Tribune Co., 493 F.2d 383, 388* (8 Cir.), Cert. denied, *419 U.S. 836, 95 S. Ct. 64, 42 L. Ed. 2d 63 (1974)*; Siegfried v. Kansas City Star Co., supra, 298 F.2d 1, 6 (8 Cir.), **[*241]** Cert. denied, *369 U.S. 819, 82 S. Ct. 831, 7 L. Ed. 2d 785 (1962)*; *Newberry, supra, 438 F. Supp. at 483*; *United Exhibitors v. Twentieth Century Fox F. D. Corp., 31 F. Supp. 316,* ***[**40]*** *317 (W.D.Pa.1940)*. But see *Herman Schwabe, Inc. v. United Shoe Machinery Corp., 297 F.2d 906, 909 n.4* (2 Cir.), Cert. denied, *369 U.S. 865, 82 S. Ct. 1031, 8 L. Ed. 2d 85*, Rehearing denied, *370 U.S. 920, 82 S. Ct. 1552, 8 L. Ed. 2d 500 (1962)* (dictum); *Ledge Hill Farms, Inc. v. W. R. Grace & Co., 230 F. Supp. 638, 640 (S.D.N.Y.1964)*.

Accordingly, IT IS HEREBY ORDERED that The Daily Review plaintiffs Joseph W. Berthiaume, Robert A. Dutra, Kenneth W. Jackson, Willard B. Kittredge, Jean E. Nyland, and Evan F. Williams are each awarded damages from defendants in the amount of three dollars ($ 3.00).

IT IS HEREBY FURTHER ORDERED that a hearing will be held on Thursday, May 3, 1979, at 9 A.M. to determine reasonable attorneys' fees. Counsel shall file memoranda accordingly.

[17.] Although the record has not been fully developed, evidence of the Sacramento Union dealers' experience seems to support this conclusion. The Sacramento Union Dealership Agreements did not set any maximum resale prices; those dealers were free to charge whatever price they wished. See Transcript, Vol. 16, Apr. 16, 1974, at 74-75; Transcript, Vol. 16, Apr. 17, 1974, at 168, 232. However, none of them actually sold their papers at other than the publisher's suggested price. See Transcript, Jan. 25, 1978, at 134. This lends support to the Court's conclusion that because of the need for uniformity of prices and the need to maintain circulation at a level that would support advertising revenues, a newsdealer would not vary from his publisher's suggested resale price even if he or she were free to do so.

Civil Procedure > ... > Defenses, Demurrers & Objections > Motions to Dismiss > Failure to State Claim

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN1[] **Motions to Dismiss, Failure to State Claim**

In appraising the sufficiency of the complaint the court follows, of course, the accepted rule that a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief. On a motion to dismiss, material allegations of the complaint are taken as admitted, and the complaint is to be liberally construed in plaintiff's favor. The question presented is whether in the light most favorable to plaintiff, and with every doubt resolved in its behalf, the complaint states any valid claim for relief.

Antitrust & Trade Law > Robinson-Patman Act > General Overview

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > Robinson-Patman Act > Coverage > Commerce Requirement

HN2[] **Price Discrimination, Buyer Liability**

Section 2(f) of the Robinson-Patman Act (Act) renders it unlawful for any person engaged in commerce, in the course of such commerce, knowingly to induce or receive a discrimination in price which is prohibited by this section. The last clause of that section makes buyer liability dependent upon plaintiff's ability to meet the requirements of § 2(a) of the Act dealing with seller liability. Thus to state a claim based on buyer liability for price discrimination, plaintiff must allege the jurisdictional requirements of §§ 2(a) and (f) of the Act.

HN11[] **Robinson-Patman Act, Claims**

If a plaintiff, even as an indirect purchaser, can show that it has suffered competitive injury at the secondary level from conduct proscribed under the Robinson-Patman Act, it has the right to maintain a price discrimination action.

Antitrust & Trade Law > Robinson-Patman Act > Claims

Antitrust & Trade Law > ... > Price Discrimination > Competitive Injuries > General Overview

HN12[] **Robinson-Patman Act, Claims**

The competitive injury requirement of § 2(a) of the Robinson-Patman Act arises out of the following language of that section: It shall be unlawful where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them.

Opinion by: WOLLENBERG

Opinion

[*257] ORDER

This case involves the jurisdictional requirements of Sections 2(a) and 2(f) of the Robinson-Patman Act that deal with buyer and seller liability for acts of price discrimination. The imprecise language of the statute [1.] and the incompleteness of the case law has left undetermined the jurisdictional reach of those sections. Plaintiff's unique factual allegations touch upon several open questions that require determination by this Court.

---

1. See *F. T. C. v. Fred Meyer, 390 U.S. 341, 349, 88 S. Ct. 904, 908, 19 L. Ed. 2d 1222 (1968)* ("the Robinson-Patman amendments by no means represent an exemplar of legislative clarity"); and *Automatic Canteen Co. v. F. T. C., 346 U.S. 61, 65, 73 S. Ct. 1017, 1020, 97 L. Ed. 1454 (1953)* ("precision of expression is not an outstanding characteristic of the Robinson-Patman Act").

[2]** Plaintiff, Paceco, Inc., initially filed this antitrust action on April 25, 1978, against defendants Ishikawajima-Harima Heavy Industries Co., Ltd. ("IHI"), Nissho Iwai American Corp., Hitachi, Ltd. ("Hitachi"), Hitachi America, Ltd., I.H.I. Inc., and Does 1-100. The original complaint alleged several federal antitrust violations and violations of various state statutes. Jurisdiction of this Court was invoked pursuant to *28 U.S.C. § 1337*, *Sections 4* and 12 of the Clayton Act (*15 U.S.C. §§ 15* and *22*), and the doctrine of pendent jurisdiction.

On July 24, 1978, the named defendants filed motions pursuant to *Rule 12 of the Federal Rules of Civil Procedure* seeking to dismiss Counts III, IV, and V of the complaint and to strike references to "Doe" defendants. [2.] After further briefing and a hearing, this Court ordered the dismissal of Counts III and V and the striking of the fictitious defendants and granted plaintiff leave to amend Count IV.

[3]** In anticipation of the Court's order, plaintiff had filed on September 27, 1978, an amended complaint that incorporated certain paragraphs of the original complaint, deleted others, and added new Counts IVa and IVb which, respectively, charged defendants Hitachi and IHI with violations of Section 2(f) of the Robinson-Patman Act. Subsequently, defendants Hitachi and IHI filed the motion presently before the Court seeking to dismiss these counts under *Rule 12(b)(6) of the Federal Rules of Civil Procedure* for plaintiff's failure to state a claim.

FACTS

Plaintiff's complaint alleges the following factual situation. Defendants IHI and Hitachi are Japanese corporations engaged in the manufacture of large steel cranes used at ports for unloading freight containers from ships. Defendants sell those cranes, which are often taller than fifty feet, to ports and shipping companies in the United States. As a domestic manufacturer of similar cranes, plaintiff competes with defendants for American business.

Steel is the principal component of the cranes. The price at which the parties bought their steel gives rise to the price discrimination claim. Defendants purchase their steel directly from **[**4]** various Japanese steel manufacturers. Plaintiff alleges that it acquires steel from these manufacturers, and it is apparent from its pleadings that it is an indirect purchaser who buys this steel from domestic wholesalers. [3.] The complaint **[*258]** alleges that defendants, as sellers' favored buyers, knew that the price at which they purchased this steel was lower than the price at which the steel manufacturers sold to the United States market, and as a result of this discrimination, defendants consistently outbid plaintiff on domestic contracts.

The parties dispute the method by which the steel is incorporated into the finished product. To what degree the steel is processed at the premises of the crane manufacturer as **[**5]** opposed to the purchaser's chosen locale bears on several issues before the Court. The complaint alleges and the Court must accept that allegation as true on a motion to dismiss that defendants ship the steel in a relatively unprocessed state to the United States and assemble and erect the cranes at the purchaser's premises.

STANDARD OF REVIEW

The Supreme Court set out the standard test used to determine the sufficiency of a complaint in *Conley v. Gibson, 355 U.S. 41, at 45-46, 78 S. Ct. 99, at 102, 2 L. Ed. 2d 80 (1955)* when it stated that:

> ***HN1***[] In appraising the sufficiency of the complaint we follow, of course, the accepted rule that a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief.

[2.] Defendant IHI also brought a motion for dismissal under *Rule 12(b)(5) Fed.R.Civ.P.* for insufficiency of process. Plaintiff subsequently complied with the applicable service requirements.

[3.] Plaintiff's amended complaint states at paragraphs 156 and 183 that certain (named) Japanese steel manufacturers "furnish steel of like grade and quality to the United States market which is purchased by Paceco and incorporated into container cranes sold in competition with defendant(s)."

On a motion to dismiss, material allegations of the complaint are taken as admitted, and the complaint is to be liberally construed in plaintiff's favor. *Jenkins v. McKeithen, 395 U.S. 411, 421, 89 S. Ct. 1843, 23 L. Ed. 2d 404 (1969)*; *Kennedy v. H. & M. Landing, Inc., 529 F.2d 987 (9th Cir. 1976)*. The question presented is whether in the light **[**6]** most favorable to plaintiff, and with every doubt resolved in its behalf, the complaint states any valid claim for relief.

DISCUSSION

HN2[] Section 2(f) of the Robinson-Patman Act renders it "unlawful for any person engaged in commerce, in the course of such commerce, knowingly to induce or receive a discrimination in price which is prohibited by this section." The last clause of that section makes buyer liability dependent upon plaintiff's ability to meet the requirements of Section 2(a) dealing with seller liability. Thus to state a claim based on buyer liability for price discrimination, plaintiff must allege the jurisdictional requirements of Sections 2(a) and (f) of the Act. See *Great Atlantic & Pacific Tea Co. v. F. T. C., 440 U.S. 69, 99 S. Ct. 925, 59 L. Ed. 2d 153 (1979)*; *Automatic Canteen Co. of America v. F. T. C., 346 U.S. 61, 70-71, 73 S. Ct. 1017, 97 L. Ed. 1454 (1953)*.

Defendants base their motion to dismiss on plaintiff's failure to allege three jurisdictional elements required by those sections. First, they claim that plaintiff's complaint does not cover transactions that have occurred in the course of commerce as required by Section 2(f). Second, they argue that the **[**7]** complaint admits that the commodity allegedly sold at a discriminatory price was not sold "for use, consumption, or resale within the United States" as required by Section 2(a). And, finally, they argue that plaintiff lacks standing to sue because Section 2(a) allows only direct purchasers from the discriminatory seller to prosecute a price discrimination claim.

1. Commerce Requirements of Section 2(f)

Defendants claim that the fact that the purchase and delivery of their steel occurred solely within the boundaries of Japan demonstrates that the actions complained of herein do not involve commerce. ***HN3***[] Commerce, as used in the Clayton Act, which includes Section 2 of the Robinson-Patman Act, refers to trade or commerce among the states and among the states and **[*259]** foreign nations. [4.] **[**8]** Section 2(f) covers persons "engaged in commerce, (who) in the course of such commerce" commit the proscribed acts. Defendants read this language to require that the discriminatory sale to the buyer must occur in the course of commerce and that since a sale and delivery within Japan does not occur in commerce, plaintiff has failed to state a claim. [5.]

Case law demonstrates that transactions that initially or subsequently fail to cross state or international boundaries may still fall within the course of commerce as that term is used in the Robinson-Patman Act. The Supreme Court recently directed that ***HN5***[] the commerce requirements of the Robinson-Patman Act must be strictly construed; however, the Court noted that seller liability under Section 2(a) extends to activities that occur "in the flow of

---

[4.] ***HN4***[] The term "commerce" is defined in Section 1 of the Clayton Act (*15 U.S.C. § 12*) as follows:

"Commerce,' as used herein, means trade or commerce among the several States and with foreign nations, or between the District of Columbia or any Territory of the United States and any State, Territory, or foreign nation, or between any insular possessions or other places under the jurisdiction of the United States, or between any such possession or place and any State or Territory of the United States or the District of Columbia or any foreign nation, or within the District of Columbia or any Territory or any insular possession or other place under the jurisdiction of the United States: Provided, That nothing in this Act contained shall apply to the Philippine Islands.

[5.] Without referring to any applicable case law, defendants also contend that the "engaged in commerce" language requires an allegation that they purchased the commodity in question from a supplier in the United States. In analyzing commerce questions under the Robinson-Patman Act, courts have exclusively focused on the "in the course of commerce" language. Since defendants' reasoning on this issue simply reformulates their other commerce arguments, the Court rejects this contention without further consideration.

commerce." *Gulf Oil Corp. v. Copp Paving Co., 419 U.S. 186, 195, 95 S. Ct. 392, 42 L. Ed. 2d 378 (1974)*. [6.] One treatise has described ***HN6***[] the **[**9]** operation of the flow of commerce test as follows:

> (A) sale across state lines can carry the flow back to the initial shipment of the goods after manufacture and carry the flow forward to transformation or storage in the state of resale, embracing every transaction in between.

P. Areeda & D. Turner, ***Antitrust Law*** 1, P 233 (1978). Thus, ***HN7***[] subsequent transactions that fall within commerce may bring into the flow of commerce earlier transactions that considered on their own would not be viewed as within commerce.

In this case plaintiff argues that defendants' shipment to the United States of the unassembled steel cranes brings their purchases of steel into the flow of commerce. Plaintiff relies on a line of cases holding that the flow of commerce **[**10]** continues through the intrastate aspect of the transaction in cases in which raw materials purchased interstate and sold intrastate are not substantially altered by processing or manufacturing. See *Dean Milk Co. v. F. T. C., 395 F.2d 696 (7th Cir. 1968)*; *Foremost Dairies, Inc. v. F. T. C., 348 F.2d 674* (5th Cir.), Cert. denied, *382 U.S. 959, 86 S. Ct. 435, 15 L. Ed. 2d 362 (1965)*; *Baldwin Hills Building Material Co. v. Fibreboard Paper Products Corp., 283 F. Supp. 202 (C.D.Cal.1968)*. Plaintiff and defendants dispute the degree of processing of the steel that occurs in Japan. Because on a motion to dismiss the Court must resolve every doubt in the plaintiff's behalf, the allegation that the cranes are assembled and erected in the United States and the implication that the steel is not substantially altered in Japan must be accepted as true. On this basis, the Court finds that the complaint sufficiently alleges that defendants' activities fall within commerce. [7.]

[11]** **[*260]** 2. The Use, Consumption, or Resale Requirement of Section 2(a)

[6.] In Gulf Oil, the Court rejected the claims that allegations that certain activities had a "close nexus" to interstate commerce or "affected" interstate commerce would suffice to meet the jurisdictional requirements of Section 2(a) of the Robinson-Patman Act.

[7.] The Court also notes a potential alternative basis for this decision. Defendants claim that the commerce language of Section 2(f) requires that the wrongdoing buyer receive the discriminatory price concession in the course of its commerce. The Court acknowledges that a plain reading of the section supports this argument. On the basis of the Supreme Court's mandate in Gulf Oil to construe strictly the commerce requirements of the Robinson-Patman Act, one circuit court has specifically accepted this interpretation. *Great Atlantic & Pacific Tea Co. v. F. T. C., 557 F.2d 971, 979 (2d Cir. 1977)*, Aff'd on other grounds, *440 U.S. 69, 99 S. Ct. 925, 59 L. Ed. 2d 153 (1979)*.

Limiting buyer liability to those situations in which the buyer has received the discriminatory price concession in the course of its commerce creates an anomaly between buyer and seller liability. See generally, Von Kalinowski, Antitrust Laws and Trade Regulation 16D, § 36.04 (1976). Section 2(a) covering seller liability requires only that one of the two sales giving rise to the discrimination the higher or the lower be in interstate commerce. See e.g., *Moore v. Mead's Fine Bread Co., 348 U.S. 115, 118, 75 S. Ct. 148, 99 L. Ed. 145 (1954)*; *Foremost Dairies, Inc. v. F. T. C., 348 F.2d 674, 677 n.5 (5th Cir. 1965)*. Thus in a case in which a seller conveys to a favored buyer in a transaction that is wholly intrastate and sells to the disfavored buyer interstate, the buyer could escape liability on jurisdictional grounds whereas the seller in the same transaction would be liable on account of having made one of the two sales interstate. (This situation could arise in the case at hand if the Court determined that defendants substantially altered the steel in Japan.)

This anomaly may be inconsistent with the purposes of Section 2(f). The Supreme Court has recently noted the "derivative nature of liability under § 2(f)" stating that "buyer liability under § 2(f) is dependent on seller liability under § 2(a)." *Great Atlantic & Pacific Tea Co. v. F. T. C., 440 U.S. 69, 99 S. Ct. at 928, 931 (1979)*. The brief legislative history of this section indicates that its authors intended to make coextensive buyer and seller liability under the Act. 80 Cong. Rec. 9419 (1936) (remarks of Rep. Utterback). Several commentators have stated that they can conceive of no logical reason why Congress would have intentionally created this exception for favored buyers who purchase intrastate from discriminatory sellers. See Von Kalinowski, Antitrust Laws and Trade Regulation 16D, at § 36.04 (1976) and the authority cited therein. Thus, in order to give effect to the Congressional intent, it might be necessary to read liberally the commerce language of Section 2(f) and hold that that language imposes no additional requirements than those found in Section 2(a).

HN8[] One of the jurisdictional elements of Section 2(a) is that the commodities that are sold at discriminatory prices be sold "for use, consumption, or resale within the United States." Defendants contend that this language requires that commodities sold at Both the higher and lower price eventually end up in the United States for use, consumption, or resale. They further contend that the complaint only alleges that cranes were sold for use in the United States, but fails to allege that steel the commodity involved in the discrimination was used in the United States.

Two district court cases support defendants' interpretation of the statute. In *Zenith Radio Corp. v. Matsushita Electrical Industrial Co., 402 F. Supp. 244, 248 (E.D.Pa.1975)*, the court held that Section 2(a) would not apply to defendants' sales of consumer products in Japan (at higher prices) and in the United States because the products sold in Japan were not destined for use, consumption, or resale within the United States. Similarly, in *Fimex Corp. v. Barmatic Products, Co., 429 F. Supp. 978, 980 (E.D.N.Y.1977)*, the court held that seller's **[**12]** discriminatory sales to two purchasers within the United States did not violate the Act because one of the purchasers exported for sale abroad all of the products that he bought.

Neither of these cases appear directly relevant to this case. However defendants wish to characterize plaintiff's pleading, they now have ample notice that plaintiff alleges that the steel Was used in the United States in order to construct the cranes. This issue raises a question of fact not suitable for determination at this stage of the proceedings. Additionally, the subsequent sale of the cranes in the United States with the steel incorporated in that finished product might constitute sufficient use or resale to meet the jurisdictional element in question.

3. The Different Purchaser and Competitive Injury Requirements of Section 2(a)

Defendants also claim that plaintiff's failure to allege that it purchased the commodity in question Directly (not through middlemen) from the same discriminatory seller who sold to the favored purchaser necessitates the dismissal of this case. **[*261]** Plaintiff's ambiguous pleading that certain Japanese steel manufacturers "furnish steel of like grade and quality to **[**13]** the United States market which is purchased by PACECO and incorporated into container cranes sold in competition with defendant(s)," Plaintiff's Amended Complaint at PP 156 and 183, makes it clear that plaintiff cannot allege that it is a direct purchaser. The Court has determined, however, that *HN9*[] Section 2(a) does not bar an indirect purchaser from maintaining a price discrimination suit.

Defendants offer a two-pronged attack in support of their argument. First, they claim that case law incontrovertibly stands for the proposition that only an actual purchaser may sue under Section 2(a). Second, they argue that a party who must purchase the seller's goods through a wholesaler and who is in competition with a direct-buying favored customer of the seller cannot as a matter of law show the competitive injury required by Section 2(a).

With regard to their first claim, defendants have not misstated the bulk of the extant case law. Courts have often stated that only actual purchasers may bring an action under Section 2(a). See, e.g., *Klein v. Lionel Corp., 138 F. Supp. 560* (D.Del.), *Aff'd, 237 F.2d 13, 14-15 (3rd Cir. 1956)*; *Wales Home Remodeling Co. v. Alside Aluminum Corp., 443 F. Supp. **[**14]** 908, 911-12 (E.D.Wis.1978)*. Yet several factors lead to the conclusion that this line of cases does not preclude an indirect purchaser from maintaining such a suit if it alleges that Its wholesaler is a victim of discriminatory pricing vis-a-vis a competitor of plaintiff.

The case law upon which defendants rely contains key factual differences from this case and indicates no reasons why the actual purchaser rule should not be limited to the facts presented in those cases. The case law generally involves two different factual situations. In the leading case of *Klein v. Lionel Corp., 138 F. Supp. 560, at 566* (D.Del.), *Aff'd, 237 F.2d 13 (3rd Cir. 1956)*, recently relied upon in *Wales Home Remodeling Co. v. Alside Aluminum Corp., 443 F. Supp. 908 (E.D.Wis.1978)*, the court specifically held that:

> (A) plaintiff has no cause of action for discrimination under *15 U.S.C.A. Section 13(a)* where it appears that plaintiff was not a purchaser from the seller but a retailer purchasing from a jobber.

While Klein and Wales Home involve the dismissal of price discrimination suits brought by indirect purchasers, they both lack a crucial factual allegation present herein. In both cases plaintiffs **[**15]** did not allege that the wholesaler from whom they purchased suffered price discrimination vis-a-vis the favored purchasers; in fact, it was admitted that the jobbers received the Same price as the direct-buying competitors of plaintiffs and plaintiffs suffered because of the jobbers' surcharge passed on to them. The gravamen of plaintiffs' claims thus focused on sellers' refusal to deal directly with them. Here, plaintiff alleges that the wholesalers have purchased the steel at discriminatorily high prices vis-a-vis the defendants and that this discrimination as opposed to seller's legal choice as to whom it would sell directly has caused it injury.

The other cases cited in support of defendants' proposition deal with a related factual question. The cases upon which Klein relies involve situations in which seller has refused to deal with plaintiff either directly or indirectly. See cases cited at *237 F.2d at 14 n.1*. Since seller has a right under the Sherman Act to pick its customers, courts have used the "different purchasers" language of Section 2(a) to dismiss cases in which these plaintiffs have sought to characterize this seller action as price discrimination on the legitimate **[**16]** ground that the refusal to sell case involves only One purchaser. But this question raises a wholly different issue than that of the case at hand in which there are different purchasers.

A number of factors suggest that these cases, while correct on their facts, have overstated the rule. First, a review of the statute reveals that Section 2(a) does not contain explicit language limiting the right to sue to actual purchasers. The relevant language states:

> **[*262]** ***HN10***[] It shall be unlawful for any person engaged in commerce, in the course of such commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities of like grade and quality . . .

Courts have focused on the "different purchasers" language in divining the actual purchaser rule. Yet the statute makes no reference to who has the right to maintain a price discrimination suit.

Second, two cases have rejected an across-the-board application of the actual purchaser rule. In *Southern Concrete Co. v. United States Steel Corp., 394 F. Supp. 362, 377-78 (N.D.Ga.1975)*, *Aff'd, 535 F.2d 313 (5th Cir. 1976)*, *Cert. Denied, 429 U.S. 1096, 97 S. Ct. 1113, 51 L. Ed. 2d 543 (1977)* (appeals **[**17]** taken on other issues), the court rejected the purchaser-standing requirement, directing that a non-purchaser who was injured by reason of the price discrimination could bring an action under Section 2(a). That court relied on a previous Fifth Circuit case, *Littlejohn v. Shell Oil Co., 483 F.2d 1140*, Cert. denied, *414 U.S. 1116, 94 S. Ct. 849, 38 L. Ed. 2d 743 (1973)*. There, plaintiff was a gas station operator who alleged that defendants sold gas to consumers at lower prices than it sold it to other gas stations. Plaintiff failed to allege that he bought gas from defendants. The court, in a footnote, rejected the theory that plaintiff lacked standing simply because it was not a purchaser on the ground that one of the purposes of Section 2(a) was to grant protection to a competitor whose business is injured by the discriminatory pricing policies. *483 F.2d at 1143 n.3*. Plaintiff had alleged the occurrence of such an injury.

This Court submits that Littlejohn properly focuses the inquiry as to who has the right to sue on whom the discriminatory pricing injures. Two Supreme Court cases interpreting the coverage of Sections 2(a) and 2(d) indicate that any statutory construction of the **[**18]** Robinson-Patman Act requires a broad look at the basic purposes of the Act with a view towards ending the injury that results from the proscribed conduct.

In *Perkins v. Standard Oil Co., 395 U.S. 642, 89 S. Ct. 1871, 23 L. Ed. 2d 599 (1969)* the Court held that plaintiff, a direct buyer from seller-defendants, could recover damages suffered as a result of a price advantage granted to another buyer from defendant and passed on through two subsidiaries, the final subsidiary being a competitor of plaintiff. The Court's analysis rested on the conclusion that where a plaintiff can show a causal link between a price discrimination violation and an injury that it suffered, recovery of damages is proper "regardless of the "level' in the chain of distribution on which the injury occurred." *395 U.S. at 648, 89 S. Ct. at 1874*.

In *F. T. C. v. Fred Meyer, 390 U.S. 341, 88 S. Ct. 904, 19 L. Ed. 2d 1222 (1968)*, the Court interpreted Section 2(d) of the Act making it unlawful for a supplier in interstate commerce to grant advertising or other sales promotional allowances to one "customer" who resells the supplier's "products or commodities" unless the allowances are " "available on proportionally **[**19]** equal terms to all other customers competing in the distribution of such products or commodities.' " Fred Meyer raised the question of the proper construction of the term "customer." Defendants argued for a narrow construction limiting its scope to customers who were similarly situated in the chain of distribution. Thus when a retailer who was a direct buyer (Fred Meyer) was given a promotional allowance by the supplier but retailers who purchased supplier's goods through a wholesaler were not provided such allowances there would be no violation of the Act. The Court rejected this narrow view. Noting that the purpose of the Act was to protect small retailers who had to compete with big concerns such as Fred Meyer, the Court held that indirect purchasers were "customers" for purposes of Section 2(d).

While defendants correctly argue that neither Perkins nor Fred Meyer is directly on point to the question of whether an indirect purchaser may sue under Section 2(f), the cases do indicate that any statutory inquiry regarding the right to **[*263]** bring an action should focus on the substantive questions of causation and injury. [8.] One of the central purposes of the Robinson-Patman **[**20]** amendments was to remedy competitive injury at the secondary level that arises from price discrimination. See *F. T. C. v. Anheuser-Busch, Inc., 363 U.S. 536, 543-44, 80 S. Ct. 1267, 4 L. Ed. 2d 1385 (1960)*; *F. T. C. v. Morton Salt Co., 334 U.S. 37, 43, 68 S. Ct. 822, 92 L. Ed. 1196 (1948)*. Thus ***HN11***[] if plaintiff, even as an indirect purchaser, can show that it has suffered competitive injury at the secondary level from conduct proscribed under the Act, it has the right to maintain a price discrimination action.

[21]** Defendants also argue, however, that an indirect purchaser cannot as a matter of law show that it has suffered competitive injury as required by Section 2(a). [9.] Plaintiff has pled that the price discrimination enabled defendants to outbid it and win many domestic contracts. Defendants' contention that plaintiff cannot possibly make such a showing may be reduced to a question of practical economics.

In the leading case of *Secatore's, Inc. v. Esso Standard Oil Co., 171 F. Supp. 665 (C.D.Mass.1959)*, the court held that a supplier may discriminate in price between a **[**22]** retail customer and a consumer customer, giving the latter a lower price, where the retailer would not have been able to compete with the supplier for the business of that consumer customer were he to have been afforded equal price treatment. The basis of this argument is simple: the direct-purchase consumer will purchase a standardized commodity from the cheapest source. If the supplier sells to the retailer at the same price that it offers the consumer, the consumer will buy from the supplier since the retailer will have to add a surplus to make a sale worthwhile. Secatore's reasoned that if equality cannot help, and that is all the law requires, then discrimination cannot injure.

Defendants apply that reasoning to this case, arguing that since it is apparent that plaintiff purchases through a middleman while defendants have the legal competitive advantage of direct purchasing, plaintiff cannot be injured even if seller does practice price discrimination.

The problem with a general application of this theory is that the price of the commodity involved in the discriminatory transaction may not be the sole factor in determining competition. In dealing with a standardized product **[**23]** such as gasoline where a retailer acquires it for immediate resale, the price of that commodity plays the determinative role in competition. Yet in the sale of a complicated product like steel cranes, the price of steel is only one factor of an eventual sale. Assuming equality in the price of steel, as sold to defendants and the wholesalers, perhaps plaintiff could show that lower shipping costs, advanced technology, absence of duty payments, cheaper labor costs, etc., would enable it to compete with defendants even if it had to absorb the wholesalers' surcharge on the steel. In *Sano Petroleum Corp. v. American Oil Corp., 187 F. Supp. 345, 355*

---

8. See also, *Moore v. Mead's Fine Bread Co., 348 U.S. 115, 75 S. Ct. 148, 99 L. Ed. 145 (1954)*, in which the Court held that a plaintiff who maintained an Intrastate business could bring a price discrimination action against a competitor who maintained prices in interstate transactions but cut prices in intrastate transactions, thereby driving plaintiff out of business. Despite the local nature of the commerce involved, the Court noted that the requisite injury under the Act had occurred competitive injury at the primary level and defendant's connections with interstate commerce sufficed to meet Section 2(a)' § jurisdictional requirements.

9. ***HN12***[] The competitive injury requirement of Section 2(a) arises out of the following language of that section:

It shall be unlawful . . . where the effect of such discrimination may be substantially to lessen competition or tend to create a monopoly in any line of commerce, or to injure, destroy, or prevent competition with any person who either grants or knowingly receives the benefit of such discrimination, or with customers of either of them . . .

(E.D.N.Y.1960), a case cited by defendants, the court relied on Secatore's, but also recognized the limits **[*264]** of its application. Thus until plaintiff has had an opportunity to show the existence of manufacturing, transportation, or labor efficiencies that would have absorbed the wholesalers' surcharge, the Court would be acting prematurely if it dismissed these claims.

ACCORDINGLY IT IS HEREBY ORDERED that for the reasons stated herein, defendants' motion to dismiss for failure to state a claim is DENIED.

HN6[] **Discovery, Methods of Discovery**

At times, a remedy may be had through summary judgment, by which the protracted pretrial process may be brought to a prompt adjudication if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. This device has considerable utility, because although the non-moving party is entitled to the benefit of all reasonable doubts and inferences, when a motion for summary judgment is made and supported as provided in *Fed. R. Civ. P. 56*, an adverse party may not rest upon the mere allegations or denials of his pleadings, but his response, by affidavits or as otherwise provided in this rule, must set forth specific facts showing that there is a genuine issue for trial.

Civil Procedure > ... > Summary Judgment > Entitlement as Matter of Law > General Overview

HN7[] **Summary Judgment, Entitlement as Matter of Law**

Summary judgment, when appropriately granted, has been upheld even in antitrust actions, where summary procedures traditionally are sparingly used.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN8[] **Private Actions, Remedies**

In order to recover treble damages, the plaintiff must prove actual causation that it has been harmed by the defendants' infraction of the antitrust laws with "reasonable certainty."

Antitrust & Trade Law > ... > Actual Monopolization > Anticompetitive & Predatory Practices > General Overview

HN9[] Actual Monopolization, Anticompetitive & Predatory Practices

Admittedly, at least in an oligopolistic market, a price-fixing arrangement creates an umbrella under which a competitor may safely raise its prices without fear of a corresponding decrease in demand for its product. But in order to prevail, a purchaser from a competitor must prove more than the creation of an umbrella; it must also establish the more difficult proposition that its supplier would have sold to it at a lower price had the conspiracy not existed.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN10[] Private Actions, Standing

Although many remotely situated persons may suffer damage in some degree as the result of an antitrust violation, their damage is usually much more speculative and difficult to prove than that of someone who is an immediate victim of the violation, and if the flood-gates were opened to permit treble damage suits, the lure of a treble recovery would result in an overkill, due to an enlargement of the private weapon to a caliber far exceeding that contemplated by Congress.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN11[] Private Actions, Standing

When a manufacturer sells its product to a subsidiary before making it available to the public, to bar the purchaser from the subsidiary from suing on the authority of Illinois Brick would invite evasion of the antitrust laws by the simple expedient of inserting a subsidiary between the violator and the first noncontrolled purchaser.

Business & Corporate Law > ... > Establishment > Elements > General Overview

HN12[] Establishment, Elements

Under certain circumstances, a court will regard a parent and subsidiary as one entity. This is so, for example, when the parent dominates and controls the subsidiary to such an extent that the subsidiary is deemed to be an agent of the parent.

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

HN13[] Remedies, Injunctions

See *Section 16* of the Clayton Act, *15 U.S.C.S. § 26*.

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN14[] Private Actions, Remedies

In contrast to the treble damage action, a claim for injunctive relief does not present the countervailing considerations such as the risk of duplicative or ruinous recoveries and the spectre of a trial burdened with complex and conjectural economic analyses that the Supreme Court emphasized when limiting the availability of treble damages.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN15[] Clayton Act, Claims

Courts have held that for purposes of *§ 16* of the Clayton Act the complainant need only demonstrate a significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur, and that a person may have standing to obtain injunctive relief even when he is denied standing to sue for treble damages. Indeed, the test for standing under *§ 16* has been framed in terms of a proximate cause standard that is less constrained than that under § 4 of the Clayton Act and which might in fact be no more rigorous than the general rule of standing.

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > Regulated Practices > Private Actions > Prioritizing Resources & Organization for Intellectual Property Act

HN16[] Clayton Act, Remedies

For *§ 16* of the Clayton Act, *15 U.S.C.S. § 26*, which was enacted by the Congress to make available equitable remedies previously denied private parties, invokes traditional principles of equity and authorizes injunctive relief upon the demonstration of "threatened" injury. That remedy is characteristically available even though the plaintiff has not yet suffered actual injury; he need only demonstrate a significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur.

Civil Procedure > ... > Justiciability > Standing > General Overview

Constitutional Law > ... > Fundamental Freedoms > Judicial & Legislative Restraints > Overbreadth & Vagueness of Legislation

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN17[] **Justiciability, Standing**

Section 16 of the Clayton Act imposes a lower threshold standing requirement than § 4 of the Clayton Act. *Section 16* has been applied more expansively, both because its language is less restrictive than that of § 4, and because the injunctive remedy is a more flexible and adaptable tool for enforcing the antitrust laws than the damage remedy. A party with standing under § 4 ordinarily will have standing under *§ 16*.

Antitrust & Trade Law > Clayton Act > Remedies > Damages

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Claims

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

HN18[] **Remedies, Damages**

Courts take a less constrained view of standing in suits involving injunctive relief than in those demanding treble damages to achieve standing under *§ 16* of the Clayton Act the petitioner must demonstrate that he is threatened with loss or injury proximately resulting from the antitrust violation.

Antitrust & Trade Law > Clayton Act > Claims

Civil Procedure > ... > Justiciability > Standing > General Overview

Antitrust & Trade Law > Clayton Act > General Overview

Antitrust & Trade Law > Clayton Act > Scope

Antitrust & Trade Law > Clayton Act > Remedies > General Overview

Antitrust & Trade Law > Clayton Act > Remedies > Injunctions

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Antitrust & Trade Law > ... > Private Actions > Standing > Clayton Act

HN19[] **Clayton Act, Claims**

It is apparent from the language of *§ 16* of the Clayton Act that the applicable standing rules in suits to enjoin antitrust violations are the general rules of standing. The plaintiff need show only that he is threatened by injury proximately caused by the defendant.

Opinion

[*575] OPINION OF THE COURT

In this appeal we are called upon to apply the teaching of *Illinois Brick Co. v. State of Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*, to a number of settings, all in the context of a series of antitrust actions brought against manufacturers of consumer bags, alleging illegal price fixing under the Sherman Act and seeking both treble damages and injunctive relief. Because none of the plaintiffs purchased bags directly from the defendants, the district court relied on the holding **[**3]** in Illinois Brick that indirect purchasers from antitrust violators may not as a general matter sue for treble damages, granted defendants' motions for summary judgment, and dismissed the suits in their entirety.

With respect to all the plaintiffs, excepting only Mid-West Paper Products Company, we agree with the district court that Illinois Brick bars their claims for treble damages. But in our view such plaintiffs may still seek injunctive relief. We also believe that summary judgment on Mid-West's suit is inappropriate at least at this time.

I. FACTUAL AND PROCEDURAL HISTORY

These private antitrust actions were instituted in the wake of a grand jury indictment charging five corporations and seven individuals engaged in the manufacture of consumer bags with fixing prices in violation of *section 1* of the Sherman Act. [1]

[4]** The criminal indictment, the language of which was closely tracked in the complaints filed in the private civil actions, described consumer bags as single or multilayered paper bags that may also contain linings or coatings made from other materials and that are employed to prepackage products then marketed in them. Consumer bags are designed for capacities of less than twenty-five pounds. They often have printed exterior designs describing their contents and are used for packaging a variety of products, including pet foods, cookies, tea, coffee, and chemicals.

Plaintiffs in the civil actions fall into three categories: The first group, which includes Shopping Cart, Inc., 86th Street Food Specialty, Inc., C. G. Dairies, Inc. and 3 J's Farms, Inc., consists of supermarkets and retail grocery stores that do not purchase consumer bags directly from the defendants or from anyone else, but purchase products that are packaged in consumer bags for resale to their customers.

In the second category is Murray's of Baederwood, Inc. (Murray), a grocery store and delicatessen that sells products packaged in consumer bags, and also purchases empty consumer bags in which it packages its own **[**5]** brand of ice cream. The bags admittedly are not purchased directly from **[*576]** any of the defendants, but are for the most part bought from middlemen and wholesalers. However, one of Murray's officers suggested in a deposition that one of the firms from which Murray purchases bags "is a paper supplier and it's possible they manufacture. I don't know." [2] Together, the first two classifications will be referred to as the "supermarket plaintiffs."

Finally, there is Mid-West Paper Products Company (Mid-West), a middleman that purchases bags for resale to automobile manufacturers, which in turn put machine parts in the bags. Mid-West buys bags directly from various manufacturers, including Great Plains Bag Company (Great Plains), a subsidiary of defendant Continental Group, Inc. The parties are in dispute whether these bags are properly denominated consumer bags, rather than kraft bags.

Named as defendants in these actions are the five corporations listed in the criminal indictment: Continental **[**6]** Group, Inc., American Bag and Paper Corp., Chase Bag Co., Harley Corp., and St. Regis Paper Co. The cases involved in this appeal as well as other suits were consolidated for trial in the Eastern District of Pennsylvania, where plaintiffs sought certification to represent a class, and asked for treble damages and injunctive relief.

The district judge at first limited discovery to matters relevant to the class certification question. After the Supreme Court's decision in Illinois Brick, however, the judge requested the parties to show cause why the cases should not be dismissed because of that precedent. On April 5, 1978, summary judgment was granted in favor of the defendants on the authority of Illinois Brick. The order was not accompanied by an opinion. Plaintiffs filed a timely appeal.

II. Illinois Brick

---

[1] Of the five corporations indicted, two entered pleas of nolo contendere, two were convicted after jury trials, and one was found not guilty by the jury. *United States v. Continental Group, Inc., 456 F. Supp. 704 (E.D.Pa.1978)*. In addition to the criminal actions, the government filed a civil suit seeking injunctive relief, Civ. No. 76-3377 (E.D.Pa.), and several direct purchasers have sued for treble damages and injunctive relief.

[2] App. 231a.

According to Justice White, the author of the Illinois Brick opinion, the result there was logically compelled by the Court's earlier decision in *Hanover Shoe, Inc. v. United Shoe Machinery Corp., 392 U.S. 481, 88 S. Ct. 2224, 20 L. Ed. 2d 1231 (1968)*. In Hanover Shoe, a company that had illegally overcharged its customers was sued by one of them for treble **[**7]** damages under § 4 of the Clayton Act. [3] It was determined there that ***HN1***[] as a matter of law an antitrust violator may not, as a general matter, interpose as a defense that the direct purchaser has not been injured because it had passed on the illegal overcharge to its own customers. As described in Illinois Brick, the Court in Hanover Shoe

[8]**

> held that except in certain limited circumstances, ***HN3***[] a direct purchaser suing for treble damages under § 4 of the Clayton Act is injured within the meaning of § 4 by the full amount of the overcharge paid by it and that the antitrust defendant is not permitted to introduce evidence that indirect purchasers were in fact injured by the illegal overcharge. *392 U.S., at 494, 88 S. Ct. at 2232*. The first reason for the Court's rejection of this offer of proof was an unwillingness to complicate treble-damages actions with attempts to trace the effects of the overcharge on the purchaser's prices, sales, costs, and profits, and of showing that these variables would have behaved differently without the overcharge. *Id., at 492-493, 88 S. Ct. at 2231*. A second reason for barring the pass-on defense was the Court's concern that unless direct purchasers were allowed to sue for the portion of the overcharge arguably passed on to indirect purchasers, antitrust violators "would retain the fruits of their illegality" because indirect purchasers "would have only a tiny stake in **[**9]** the lawsuit" and hence little **[*577]** incentive to sue. *Id., at 494, 88 S. Ct. at 2232*. [4]

With Hanover Shoe already foreclosing the defensive use of "pass-on" except in limited circumstances, the Court in ***HN4***[] Illinois Brick adopted a rule of symmetry with respect to the offensive use of "pass-on", thereby barring indirect purchasers from suing for treble damages whenever the antitrust defendant would be precluded from asserting the pass-on defense against a direct purchaser.

The Court reasoned that symmetry was required to protect defendants from the serious risk of multiple liability. [5] Also, it considered the "principal basis for the decision in Hanover Shoe " the perception that it would greatly complicate and reduce the effectiveness of treble damages proceedings if they were to include an analysis of the price and output decisions of a direct purchaser to determine how much of the illegal overcharge was **[**10]** absorbed by it and how much was passed on to be equally applicable to the assertion of pass-on theories by plaintiffs. [6] In sum, Illinois Brick concluded: "Permitting the use of pass-on theories under § 4 essentially would

---

[3] ***HN2***[] Section 4 of the Clayton Act, *15 U.S.C. § 15* provides:

Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States in the district in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of suit, including a reasonable attorney's fee.

[4] *431 U.S. at 724-26, 97 S. Ct. at 2064* (footnotes omitted).

[5] Such risk was described as follows:

Even though an indirect purchaser had already recovered for all or part of an overcharge passed on to it, the direct purchaser would still recover automatically the full amount of the overcharge that the indirect purchaser had shown to be passed-on; similarly, following an automatic recovery of the full overcharge by the direct purchaser, the indirect purchaser could sue to recover the same amount.

Id. at 730, 97 S. Ct. at 2067.

[6] *Id. at 731-33, 97 S. Ct. at 2068*.

transform treble-damages actions into massive efforts to apportion the recovery among all potential plaintiffs that could have absorbed part of the overcharge from direct purchasers to middlemen to ultimate consumers." [7]

[11]**

HN5[] Under Hanover Shoe and Illinois Brick, however, the pass-on theory may still be used, offensively or defensively, in the limited circumstances when tracing the interaction of market forces is unnecessary. Of relevance here, and the only situation clearly delimited by the Supreme Court, [8] is an exception carved out for the situation where there is a pre-existing, fixed-quantity, cost-plus contract between the direct purchaser and its customer, as well as between all other parties in the distribution chain from the direct purchaser to the plaintiff, so that the plaintiff has absorbed the illegal overcharge in its entirety.

[12]**

> In such a situation, the purchaser is insulated from any decrease in its sales as a result of attempting to pass on the overcharge, because its customer is committed to buying a fixed quantity regardless of price. The effect of the overcharge is essentially determined in advance, without reference to the interaction of supply and demand that complicates the determination in the general case. [9]

[13]**

[*578] Like many Supreme Court decisions that are the product of a system in which the cases to be reviewed are carefully selected, Illinois Brick not only addresses the immediate problem presented, it also serves as a guidepost for future litigation. Accordingly, we frame our response to the issues raised in this appeal with an eye toward

---

[7] *Id. at 737, 97 S. Ct. at 2070*.

[8] In a footnote the Court commented, "another situation in which market forces have been superseded and the pass-on defense might be permitted is where the direct purchaser is owned or controlled by its customer." *Id. at 736 n.16, 97 S. Ct. at 2070*. We relied on this remark to fashion an exception to the Illinois Brick rule in ***In re Sugar Industry Antitrust Litigation (Stotter & Co., Inc. v. Amstar Corp.), 579 F.2d 13 (3d Cir. 1978)***, where although the plaintiff purchased directly from a division (as well as from a subsidiary) of two of the alleged offenders, it did not buy the price-fixed product itself but rather, a product that incorporated the price-fixed product as one of its ingredients. See discussion in Part III.C. Infra.

[9] *431 U.S. at 736, 97 S. Ct. at 2070*. Under a cost-plus contract a product is sold at a specified markup above the seller's own cost. The supermarket plaintiffs submit that this exception should be interpreted expansively so as to permit recovery even if the pre-existing cost-plus contract does not fix the quantity of goods to be purchased. Under such circumstances, plaintiffs point out, it is always true that the illegal profit earned by defendants is traceable in its entirety to the indirect purchaser. Also, plaintiffs suggest, the exception should be stretched to include informal arrangements and patterns of cost-plus pricing. Nevertheless, we are bound by the clear dictate of Illinois Brick and may not extend the exception beyond the limited circumstances recognized by the Supreme Court. The Court explicitly rejected any exception for "cost-based rules of thumb" and other informal arrangements. See *id. at 743-44, 97 S. Ct. 2061*. Furthermore, the Court has deemed it to be legally significant that when a cost-plus contract does not specify a fixed quantity of goods, the direct purchaser may suffer a loss in sales to its customers and seek damages for its losses, thereby complicating the allocation of the recovery. See *id. at 736, 97 S. Ct. 2061*. But rather than instruct that whenever a direct purchaser sells under a variable quantity cost-plus contract, the indirect purchaser to whom the entire burden of the overcharge is traceable may sue for treble damages in the full amount while the direct purchaser may sue separately for additional damages attributable to lost sales, the Supreme Court evidently has concluded that even in such circumstances, the entire overcharge, multiplied threefold, is to be awarded to the direct purchaser. The Court's approach is understandable in that it avoids the complexities that would inevitably result from an alternative rule, such as that urged by the supermarket plaintiffs, since under an alternative rule, inquiry would have to be made into each sale consummated by the direct purchaser to ascertain the terms under which it was made and determine accordingly who may sue for recovery. Even more important, by adopting a general rule with a very circumscribed exception the Court has ensured that under all circumstances there will be an incentive for direct purchasers to sue, a factor that, in the Court's view, is necessary to promote effective enforcement of the antitrust laws, See e. g., *id. at 734-35, 97 S. Ct. 2061*. See Schaefer, Passing-On Theory in Antitrust Treble Damage Actions: An Economic and Legal Analysis, 16 Wm. & Mary L.Rev. 883, 916-18, 925-26 (1975); Note, Scaling the Illinois Brick Wall: The Future of Indirect Purchasers in Antitrust Litigation, 63 Cornell L.Rev. 309, 329-30 (1978); Note, The Supreme Court, 1976 Term, 91 Harv.L.Rev. 70, 229-30 (1977).

blending with and complementing the themes that have been accentuated by the High Court. Thus, we must determine first, whether any of the supermarket plaintiffs qualify under the cost-plus contract exception so as to be in a position to sue defendants for treble damages. Second, although the Ratio decidendi in Illinois Brick focused upon the narrow issue of the necessity for symmetrical application of defensive and offensive use of the pass-on theory, defendants contend that that decision has broad implications regarding the general question of standing to sue. Therefore, we are required to assess whether Illinois Brick bars suits by purchasers from competitors of the antitrust defendants who allege that defendants' anticompetitive activity made it possible for their competitors to charge higher prices, thereby injuring plaintiffs. Third, **[**14]** it is necessary that we ascertain whether indirect purchasers, who may not sue for treble damages under § 4, may nonetheless seek injunctive relief under *§ 16*.

III. TREBLE DAMAGE CLAIMS

A. Indirect Purchasers

It is evident that none of the plaintiffs grouped in the first category supermarkets that purchased consumer bags only indirectly from the defendant manufacturers may maintain actions for treble damages unless they can prove that there were pre-existing, fixed-quantity, cost-plus contracts at each level of distribution between the direct purchasers from the defendants and the plaintiffs, and that therefore they have absorbed the illegal overcharge in its entirety. Similarly, to prevail on one of its theories, Murray must establish the existence of cost-plus contracts at each level of distribution. The district court apparently concluded on the basis of the documents before it that the plaintiffs could not prove that such contracts existed and that since there was no genuine issue as to any material fact, the defendants were entitled to judgment as a matter of law. On appeal, the supermarkets argue that summary judgment was inappropriate inasmuch as discovery with respect **[**15]** to the merits of the controversy had not yet proceeded, and since it was still possible for them to prove that they qualify under the cost-plus exception.

Any review of the propriety of a grant of summary judgment at the early stages of discovery is instructed by an appreciation of **[*579]** the nature of the trial process in federal courts. The Federal Rules of Civil Procedure are designed "to put an end to the "sporting theory of justice,' by which the result depends on the fortuitous availability of evidence or the skill and strategy of counsel." [10] **[**16]** One cornerstone of this scheme is the discovery apparatus, through which the issues in dispute may be isolated, defined, and clarified before trial and through which a party may ascertain what evidence, if any, his opponent intends to introduce on each issue. [11] It has been recognized, however, that the liberal discovery devices still leave ample room for strategic maneuvering by counsel. Protracted discovery could be used by a wealthy party to coerce an adversary with limited resources into submission. [12] Also, as the Supreme Court has warned,

> to the extent that (discovery) permits a plaintiff with a largely groundless claim to simply take up the time of a number of other people, with the right to do so representing an In terrorem increment of the settlement value, rather than a reasonably founded hope that the process will reveal relevant evidence, it is a social cost rather than a benefit. [13]

Often, there will be no easy solution to the problem presented by an overuse of discovery. But, ***HN6***[] at times, a remedy may be had through summary judgment, another cornerstone of civil procedure, **[**17]** by which the protracted pretrial process may be brought to a prompt adjudication "if the pleadings, depositions, answers to interrogatories, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to

[13] *Blue Chip Stamps v. Manor Drug Stores, 421 U.S. 723, 741, 95 S. Ct. 1917, 1928, 44 L. Ed. 2d 539 (1975)*.

any material fact and that the moving party is entitled to a judgment as a matter of law." [14] This device has considerable utility, because although the non-moving party is entitled to the benefit of all reasonable doubts and inferences, [15] **[**18]** "(w)hen a motion for summary judgment is made and supported as provided in (*Rule 56*), an adverse party may not rest upon the mere allegations or denials of his pleadings, but his response, by affidavits or as otherwise provided in this rule, must set forth specific facts showing that there is a genuine issue for trial." [16] ***HN7***[] Summary judgment, when appropriately granted, has been upheld even in antitrust actions, [17] where summary procedures traditionally are "sparingly" used. [18]

In their effort to forestall final dismissal of their claims for treble damages, the supermarket plaintiffs are able to adduce only two sets of facts. First, they direct the Court's attention to the deposition of an officer of Shopping Cart, in which he stated that Shopping Cart acquires the bulk of its merchandise from its major supplier under a cost-plus arrangement. Second, the supermarket plaintiffs **[**19]** point out that Shopping Cart moved to compel defendants to answer interrogatories and to produce documents that were claimed to be necessary for Shopping Cart to establish that similar cost-plus **[*580]** arrangements existed at the other levels of distribution, [19] but that the district court dismissed the suits without deciding the motion.

However, in our view, the record amply demonstrates that there is no genuine issue regarding the material fact whether there are pre-existing, fixed-quantity, cost-plus **[**20]** contracts at each level of distribution. Shopping Cart, the only supermarket plaintiff that even purports to come within the cost-plus exception, conceded in a deposition of one of its officers that it does not have fixed-quantity contracts with its major supplier. Rather, it has only an informal oral arrangement, and its orders vary and are usually based on consumer demand during the prior week. [20] **[**21]** Indeed, the position taken by the supermarkets and admitted at oral argument is that it is sufficient for them to prove that there were pre-existing cost-plus arrangements, and that it is not necessary, nor are they prepared, to prove that any such arrangements were reduced to a formal contract or that they were for fixed quantities of goods. This stance is manifestly not in accordance with the dictate of Illinois Brick. [21] Under such circumstances, plaintiffs may not, consonant with the summary judgment procedure, insist upon taking a

[18] See *Hospital Building Co. v. Trustees of Rex Hospital, 425 U.S. 738, 746, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976)*; *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473, 82 S. Ct. 486, 7 L. Ed. 2d 458 (1962)*.

[19] Shopping Cart sought to compel the defendants to disclose the names and addresses of all direct purchasers of consumer bags since 1950. It maintains that this information is necessary for it to ascertain whether any of the direct purchasers sold to Shopping Cart's supplier under a "cost-plus arrangement", as well as whether any of the direct purchasers were owned or controlled by the defendants so as to "establish direct overcharges to the plaintiff which were unaffected by market forces." App. 558a.

[20] See App. 492a (Shopping Cart). The absence of fixed-quantity cost-plus contracts between the other supermarket plaintiffs and their suppliers is also apparent. See App. 254a (Murray's of Baederwood); 279a-280a, 302a, 307a-308a (C. G. Dairies); 325 (3 J's Farms); 391a-392a (86th Street).

[21] See note 9 and accompanying text Supra.

roundabout, lengthy, and costly discovery route before submitting to the inevitable conclusion that their actions for treble damages cannot prevail. [22]

B. Murray's of Baederwood

In addition to arguing that it comes within the cost-plus exception, [23] Murray advances the theory that it may sue for treble damages because of injuries it suffered as a direct purchaser of consumer bags from competitors of the defendants, [24] **[**23]** who allegedly were able to charge artificially inflated prices as a consequence of defendants' price-fixing. [25] Murray concedes that *State of Washington v. American Pipe and* ***[*581]*** *Construction Co., 280 F. Supp. 802 (W.D.Wash.1968)*, is the only case that supports this position. There, plaintiffs charged that "the alleged conspiracy raised the general price level in the market, and that non-conspirators sold their product under this umbrella **[**22]** at higher prices than would have prevailed absent the illegal activity." [26] The district court in State of Washington denied the defendant's motion to dismiss all claims based on transactions with non-conspirators for lack of standing to sue, holding that causation was a question to be resolved by the jury and that the alleged injury was not too remote to support recovery. Applying the "target area" test established by the Ninth Circuit for § 4 standing whether the injury occurred within the " "area (of economic activity) which it could reasonably be foreseen would be affected' by the anti-trust violation" [27] the district court concluded that the purpose and foreseeable

---

[22] Cf. *George C. Frey Ready-Mixed Concrete, Inc. v. Pine Hill Concrete Mix Corp., 554 F.2d 551, 556 (2d Cir. 1977)*; *Donofrio v. Camp, 152 U.S.App.D.C. 280, 283-84, 470 F.2d 428, 431-32 (1972)* (both cases indicating that plaintiffs have no right to continue discovery when suit is groundless).

[23] See Part IIIA Supra.

[24] Apparently Murray believes that Illinois Brick would preclude indirect purchasers from competitors of the defendants from suing. Although this is a possibility, it is by no means a foregone conclusion. The Hanover Shoe-Illinois Brick rule is predicated in part on the perceived need to concentrate the recovery in direct purchasers from the defendants so that there be one group with an incentive to sue and enforce the antitrust laws. See text at note 4 Supra. If ever confronted with the issue, the Supreme Court may well conclude that there is no reason to give an added incentive to sue to direct purchasers from competitors of the defendants, and consequently no reason to deviate from the general rule that a plaintiff may recover only for harm sustained by it. See also note 46 Infra.

[25] Murray's argument is premised upon the uncontroverted averment in the deposition of one of its officers that "it's possible" that one of its suppliers of consumer bags also manufactures the bags. See app. 231a. It may well be that this would be proven false after further discovery, and that consequently Murray is in fact not a direct purchaser from a competitor of the defendants. But defendants, upon whom the burden rests to show that no dispute exists as to a material fact, have not met their burden in this regard, and we therefore must accept the uncontroverted statement of Murray's officer as true for purposes of reviewing the district court's grant of summary judgment. See *Smith v. Pittsburgh Gage and Supply Co., 464 F.2d 870, 874 (3d Cir. 1972)*.

[26] *280 F. Supp. at 805*.

[27] *Id. at 807*, Quoting *Hoopes v. Union Oil Co. of Calif., 374 F.2d 480, 485 (9th Cir. 1967)* and other Ninth Circuit cases. Originally, the "target area" test was framed as encompassing plaintiffs who were within "that area of the economy which is endangered by a breakdown of competitive conditions in a particular industry." See *Conference of Studio Unions v. Loew's Inc., 193 F.2d 51, 55 (9th Cir. 1951)*, Cert. denied, *342 U.S. 919, 72 S. Ct. 367, 96 L. Ed. 687 (1952)*. The injection of a foreseeability concept into the description of "target area" as occurred in State of Washington and some Ninth Circuit cases has been roundly criticized. Thus, for example, Professors Areeda and Turner have observed:

There is something to be said for excusing the defendant from damage liability for injuries that he neither intended nor could reasonably foresee. The law of torts often grants that excuse, and punitive treble damages create even more reason to do so. But query whether all reasonably foreseeable injuries should be recognized for antitrust purposes. What is foreseeable or even intended is not necessarily appropriate for antitrust protection.

2 P. Areeda & D. F. Turner, ***Antitrust Law*** P 334d at 165-66 (1978). See also Berger & Bernstein, An Analytical Framework for Antitrust Standing, 86 Yale L.J. 809, 835 (1977); Handler, The Shift from Substantive to Procedural Innovations in Antitrust Suits The Twenty-Third Annual Antitrust Review, 71 Colum.L.Rev. 1, 28-30 (1971).

consequence of the alleged conspiracy was to raise the market price of the commodity in question by eliminating competition among the conspirators.
[24]**

A literal reading of § 4 might arguably support Murray's contention, because it affords treble damage relief to "(a)ny person who shall be injured in his business or property by reason of anything forbidden in the anti-trust laws." As the Supreme Court has noted, however, notwithstanding the apparent breadth of this provision, the district and circuit "courts have been virtually unanimous in concluding that Congress did not intend the antitrust laws to provide a remedy in damages for all injuries that might conceivably be traced to an antitrust violation." [28] In addition, it has been recognized that "antitrust violations admittedly create many foreseeable ripples of injury to individuals, but the law has not allowed all of those merely affected by the ripples to sue for treble damages." [29] Therefore, a § 4 standing doctrine has been forged so as to confine the availability of treble damages "to those individuals whose protection is the fundamental purpose of the antitrust laws." [30] **[**26]** Traditionally, such parties have been identified under the alternative techniques of measuring the directness of the **[*582]** injury and asking whether they fall within the "target area" of the **[**25]** violation. [31]

Judge Garth, in Cromar Co. v. Nuclear Materials and Equipment Corp., 543 F.2d 501 (3d Cir. 1973), carefully surveyed the development in this Court of the doctrine of standing to assert a claim for treble damages. He concluded that the cases previously decided "create no binding test that is determinative of standing." "Regardless of the name given to a particular test or standard," he continued, the precedents are to be understood as representing a functional analysis of the factual context presented in each case.

> so as to preserve the effectiveness of **[**27]** the treble damage remedy without overextending its availability. The plaintiffs' relationship to the alleged violator of the antitrust laws the directness or indirectness of the injury as well as the plaintiff's position in the area of the economy threatened by the alleged anticompetitive acts are among the factors to be considered in resolving standing. No single formula captures the many considerations involved in determining whether the plaintiff is one "whose protection is the fundamental purpose of the antitrust laws." *In re Multi-district Vehicle Air Pollution, supra (481 F.2d) at 125*. [32]

As Judge Gibbons observed on a later occasion, this approach "recognizes that § 4 standing analysis is essentially a balancing test comprised of many constant and variable factors and that there is no talismanic test capable of resolving all § 4 standing problems." [33]

Interestingly enough, while approving the judicial creation of a treble damage standing doctrine, See id., the Supreme Court has for the most part abstained from participating in the formulation of its content, permitting the lower courts to struggle on their own with the difficult task of identifying the contours of such doctrine. See Berger & Bernstein, Supra note 27, at 841-42.

[28]**

Although it would not be feasible to make a comprehensive list of the factors that must be considered in evaluating each standing problem, a number may be identified, particularly when attention is focused upon a concrete factual configuration. Indeed, in applying a functional analysis to determine whether Murray has standing in its role as a purchaser from a competitor of the defendants, we may beneficially rely upon considerations emphasized by the Supreme Court when dealing with two other matters. These issues, the definition of antitrust injury [34] **[**29]** and the use of pass-on theories, [35] although "analytically distinct" from standing, [36] are nevertheless related in that they, too, implicate the enforcement of the antitrust laws. For standing, pass-on, and antitrust injury each address different aspects of the problem of determining when a person is sufficiently "injured in his business or property by reason of anything forbidden in the antitrust laws," so as to be eligible to sue for treble damages. Together, they constitute the judicial gloss upon the words of § 4 by which the courts have patrolled the portals to a treble damage action.

Underlying the precepts that guard access to § 4 is the recognition that the treble damage action represents a congressional **[*583]** choice that the antitrust laws be enforced in large measure by "private attorneys general" who are encouraged to sue by the prospect of recovering three times their actual damages. [37] Accordingly, whether the issue is the definition of injury in § 4, or the use of **[**30]** pass-on theories, or the proper scope of the standing doctrine, the line-drawing that necessarily takes place is informed by an inquiry into what posture best effectuates the dual purposes of the treble damage remedy, namely, compensating victims of antitrust violations for their injuries and deterring violators by depriving them threefold of "the fruits of their illegality," [38] **[**31]** while at the same time furthering the overriding goal of the antitrust laws preserving competition. [39] Aside from these basic objectives of antitrust enforcement, which occasionally are at odds with one another, additional concerns must be addressed in determining whether antitrust goals would be furthered by adopting a particular position. Among such concerns are whether a duplicative or ruinous recovery will result [40] and whether resolution of the claim will unduly

complicate the trial by necessitating the pursuing of complex and conjectural economic lines of causation and effect. [41]

Turning now to the situation presented by Murray whether a direct purchaser from a competitor of the defendants "is one whose protection is the fundamental purpose of the antitrust laws" so as to have standing to sue it may be assumed arguendo that Murray has been harmed in some way **[**32]** by the Economic impact of defendants' price-fixing conspiracy. In the same vein, viewing Murray's position in the area of the economy threatened by defendants' alleged anticompetitive acts, it may be that Murray is within that level of the economy, consisting of purchasers of consumer bags, threatened by the price-fixing conspiracy. Both these points find support in Murray's theory that the defendants created an "umbrella" under which their competitors were able to charge higher prices than otherwise. Their significance is questionable, however, in light of the tenuous line of causation between defendants' price-fixing and the prices paid by Murray. Moreover, other factors indicate that Murray is not among those "whose protection is the fundamental purpose of the antitrust laws."

Murray is not in a direct or immediate relationship to the antitrust violators: The defendants secured no illegal benefit at Murray's expense; their tainted gains were reaped from those firms to which they actually sold their products; and Murray's added costs, if any, were pocketed by defendants' competitors, who presumably were free to charge a lower price if they so desired. In that "the law has not **[**33]** allowed all of those merely affected by the ripples to sue for treble damages," [42] we must inquire further whether Murray's injury should be held legally imputable to the defendants, and whether defendants should be required to pay damages for benefits derived by others and for an occurrence that did not advantage them.

[*584] The question whether Murray's injury should be legally attributable to the defendants depends in some measure on whether and how accurately [43] Murray's alleged injury is economically traceable to the defendants. That issue in turn parallels the pass-on issue raised in Illinois Brick because in both situations the plaintiff seeks to recover for higher prices set by, and paid by it to, parties other than the defendants. And the rationale underlying Illinois Brick that it would be almost impossible, and at the very least unwieldy, to attempt to trace the incidence of the anticompetitive effect of defendants' conduct bears even greater truth **[**34]** in the context of a purchaser from a competitor of the defendants. For, although the dissenting opinion apparently assumes otherwise, it cannot readily be said with any degree of economic certitude to what extent, if indeed at all, purchasers from a competitor of the price-fixers have been injured by the illegal overcharge.
[35]**

The outcome of any attempt to ascertain what price the defendants' competitors would have charged had there not been a conspiracy would at the very least be highly conjectural. As noted in Hanover Shoe, "(a) wide range of factors influence a company's pricing policies. Normally the impact of a single change in the relevant conditions cannot be measured after the fact; indeed a businessman may be unable to state whether, had one fact been different . . ., he would have chosen a different price." [44] Insofar as cost of production is an element in arriving at a

---

[41] See, e. g., *Illinois Brick, supra, 431 U.S. at 731-33, 97 S. Ct. 2061*; *Hanover Shoe, supra, 392 U.S. at 492-94, 88 S. Ct. 2224*. See generally Berger & Bernstein, supra note 27, at 845-58 (identifying policies relevant to antitrust standing).

[42] See text accompanying note 29 Supra.

[43] ***HN8***[] In order to recover treble damages, Murray must prove actual causation that it has been harmed by the defendants' infraction of the antitrust laws with "reasonable certainty." See *Pitchford v. Pepi, 531 F.2d 92, 104-05 (3d Cir.)*, Cert. denied, ***426 U.S. 935, 96 S. Ct. 2649, 49 L. Ed. 2d 387 (1976)***; *Rea v. Ford Motor Company, 497 F.2d 577, 589 (3d Cir.)*, Cert. denied, ***419 U.S. 868, 95 S. Ct. 126, 42 L. Ed. 2d 106 (1974)***. Once Murray proves that it has been harmed, "the trier of fact may make a reasonable estimate of damages," Id., though there reaches a point at which it must be conceded that "even where the defendant by his own wrong has prevented a more precise computation, the jury may not render a verdict based on speculation or guesswork." *Bigelow v. RKO Radio Pictures, 327 U.S. 251, 264-65, 66 S. Ct. 574, 579, 90 L. Ed. 652 (1946)*. See also *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 160, 122-24, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*. See generally, P. Areeda & D. F. Turner, Supra note 27, at P 335a; P 343.

price, each manufacturer operates at a different level of efficiency and sustains at least slightly varying expenses, thereby incurring different costs in creating the finished product. And in addition to actual cost, pricing decisions are based on various other considerations, such as marketing strategy and elasticity of demand. Although in selecting a price for its product a manufacturer must also take into account the market price for comparable items, to some extent its pricing decisions remain unaffected by the prices charged by others. This is so because of entry and exit conditions in the industry, the degree of interchangeability **[**36]** among the products, and time lags in adjusting to changes in output, price and demand in the market, to name just a few factors. Thus, the competitors of the price-fixers may well have charged the same price notwithstanding the conspiracy, and purchasers such as Murray would be hard pressed to prove otherwise. Indeed, given the fact that economists have difficulty explaining the patterns of interdependence in any oligopolistic industry, which itself is invariably a necessary condition for successful price-fixing, it cannot be said that the noncompetitive pricing behavior of any manufacturer would not have taken place absent the conspiracy. [45]

[37]**

[*585] Apart from its speculative nature, any attempt to determine the effect of defendants' overcharges upon their competitors' prices would transform this antitrust litigation into the sort of complex economic proceeding that the Illinois Brick Court was desirous of avoiding if at all possible. [46] **[**39]** And as we read that decision, it is not only possible but imperative that such a transformation not occur in the present case. Illinois Brick represents in effect the proposition that when defendants have fixed prices above the competitive market price, where the benefit derived by them is readily ascertainable, the objectives of the treble damage action are fulfilled when the defendants are required to pay the direct purchasers three times the overcharge. [47] As explained in Illinois Brick, such an award not only deprives the violators of all the "fruits of their illegality" and deters further wrongdoing, it also compensates those victims who are most likely to assume the mantle of private attorneys general for the injuries they suffered. And by concentrating the entire award in the hands of the direct purchasers in all but unusual circumstances and thereby giving them an incentive **[**38]** to sue, effective and vigorous enforcement of the antitrust laws is, so far as the Supreme Court is concerned, for all practical purposes assured. [48] **[**40]** Once direct

---

[44] *Hanover Shoe, supra, 392 U.S. at 492-93, 88 S. Ct. at 2231*.

[45] ***HN9***[] Admittedly, at least in an oligopolistic market, a price-fixing arrangement creates an umbrella under which a competitor may safely raise its prices without fear of a corresponding decrease in demand for its product. But in order to prevail, a purchaser from a competitor must prove more than the creation of an umbrella; it must also establish the more difficult proposition that its supplier would have sold to it at a lower price had the conspiracy not existed. On oligopolistic market structures, See generally L. Sullivan, Antitrust §§ 61, 115-17 (1977) and authorities cited therein; 2 P. Areeda & D. F. Turner, *Supra, note 27 at P 404*; Posner, Oligopoly and the Antitrust Laws: A Suggested Approach, 21 Stan.L.Rev. 1562, 1571 (1969); Turner, The Definition of Agreement Under the Sherman Act: Conscious Parallelism and Refusals to Deal, 75 Harv.L.Rev. 655 (1962).

[46] In addition, if a court were unwilling to extend the Hanover Shoe-Illinois Brick rule to the context of a suit by purchasers from competitors, See note 24 Supra, the complexities would be greatly multiplied, as plaintiffs would also be required to establish what portion of the alleged overcharge was absorbed by them.

[47] A different problem is presented where prices are fixed below the competitive market price or where defendants engage in other forms of anticompetitive conduct, such as group boycotts, vertical restrictions, or monopolization, since defendants' benefits in those instances are not so readily ascertainable, and may not be sufficient to compensate "those individuals whose protection is the primary purpose of the antitrust laws." In such circumstances courts have awarded damages based upon the amount of injury suffered by the plaintiff rather than the benefits derived by the defendants. See, e. g., *Pitchford v. Pepi, supra, 531 F.2d at 107-09*.

[48] See *431 U.S. at 745-46, 97 S. Ct. 2061*. The Supreme Court noted that "direct purchasers sometimes may refrain from bringing a treble-damage suit for fear of disrupting relations with their suppliers," *Id. at 746, 97 S. Ct. at 2075*, but concluded that on balance this risk of non-enforcement does not warrant it to reconsider its conclusion that indirect purchasers are to be barred from suing. Given the fact that the Supreme Court evidently reached its decision without considering the possibility that purchasers from competitors could fill this gap in enforcement, we see no reason to expand upon the Supreme Court's

purchasers are singled out as the group " "whose protection is the fundamental purpose of the antitrust laws' " in such non-predatory price-fixing conspiracies and, through them, the objectives of the treble damage action are fulfilled, there appears to be little reason to expand the standing doctrine in a manner that would require complex and ultimately unrewarding economic analyses at trial, particularly where, as here, such analyses invariably are a prerequisite to establishing that the plaintiff has suffered compensable injury altogether. [49] **[**41]** In fact, given the result in Illinois **[*586]** Brick, it would be anomalous to permit purchasers from competitors of defendants who may not have been harmed at all to sue for the competitors' profits, when indirect purchasers, who always absorb part of defendants' overcharge, [50] may not sue the defendants.

Moreover, to permit a purchaser from a competitor of the defendants to sue for treble damages would appear to be incompatible with the antitrust goal of maintaining a competitive economy. Allowing recovery for injuries whose causal link to defendants' activities is as tenuous as it is here could subject antitrust violators to potentially ruinous liabilities, well in excess of their illegally-earned profits, because under the theory propounded by Murray, price fixers would be held accountable for higher prices that arguably ensued in the entire industry. [51] **[**43]**

assessment of the issue by suggesting, as does the dissent, that granting standing to purchasers from competitors "is one way of preventing that risk of non-enforcement from becoming a reality." Infra at p. 596. For, as we now know, on the basis of studies conducted in the wake of Illinois Brick, this fear of non-enforcement is not supported by the evidence; direct purchasers do indeed sue their suppliers under the antitrust laws and are "the backbone of private antitrust enforcement." See Handler, Antitrust 1978, 78 Colum.L.Rev. 1363, 1425-26 (1978). And although we agree with the dissent that enforcement efforts might be enhanced by granting purchasers from competitors standing to sue, as indeed would be the result whenever any plaintiff is granted standing to sue, we conclude that this benefit is outweighed by the countervailing factors discussed in the text.

[49] We recognize that on rare occasions it may be unnecessary to engage in such economic analyses because the particular competitor of the defendants that supplied the plaintiff would be able and willing to testify that it raised its prices by a specific amount as a result of the wrongdoers' pricing decisions. Nevertheless, inasmuch as we are fashioning a rule of standing, we must consider the general situation and not the unusual exception. To do otherwise would be to make determinations regarding standing to sue contingent upon what evidence a plaintiff has mustered at the time the court rules on the standing issue. In addition, given the other factors discussed in the text, we cannot say that were these problems of proof not present, a purchaser from a competitor would have standing to sue for treble damages.

The dissent apparently concedes that complex economic analyses usually would be required in treble damage suits brought by purchasers from competitors of the defendants, but maintains that there is little reason to believe that proof of damages would be significantly more complex or speculative than in actions by direct purchasers. Both with respect to the defendants and with respect to their competitors, the dissent points out, the price actually charged is known or easily ascertainable, and the only difficulty is in determining the price that would have been charged had the anticompetitive conduct not occurred. Infra at p. 599. What the dissent seems to overlook, however, is the purpose for which the admittedly speculative economic data is to be used in each situation. The direct purchasers have clearly been harmed by the price-fixing conspiracy in that they have absorbed at least a portion of the illegal overcharge, and would introduce the economic data merely to establish the amount of the illegal overcharge. As we know, an antitrust plaintiff is not held to the same standard of proof as are plaintiffs in other types of actions, and the factfinder is allowed to make a reasonable estimate of the amount of damages suffered. See note 43 Supra. In contrast, a purchaser from a competitor, in addition to proving the amount of damages suffered, ordinarily must also establish the very fact that it was injured, which fact it must prove with "reasonable certainty." See id. It therefore appears that a different sort of economic analysis is called for in each situation: whereas to establish the amount of damages, the factfinder simply has to settle on some approximation of the price that would have been charged by the defendants and their competitors in a competitive market, to establish the fact of injury, or causation, the factfinder must ascribe specific reasons to a competitor's pricing decisions and determine that such decisions would not have been made had one of a number of variables been slightly different. As discussed in the text accompanying notes 44-45 Supra, this task is difficult to perform, and indeed may be impossible.

[50] Only under an economist's hypothetical model either of perfect elasticity of demand or of a direct purchaser that does not wish to maximize profits would no portion of the overcharge be absorbed by the indirect purchasers. See Schaefer, Supra note 9, at 887-97, 901-06.

[51] The dissent attempts to minimize the potentially ruinous effect of such open-ended liability by suggesting that

Only businesses with a substantial share of a market are likely, by fixing prices, to significantly affect the prices charged by competing businesses. Thus, it can reasonably be assumed that there will only be large recoveries against large companies or

Notwithstanding the seriousness **[*587]** of the Per se violation present in this case, the judiciary should not be hasty to allow the treble damage action to become so destructive a force, when Congress intended only that it be used as a weapon to enforce the antitrust **[**42]** laws. In this regard, it should be noted that Congress has enacted relatively stiff criminal penalties to punish those who flout the antitrust laws, [52] that the Supreme Court has been especially reticent in sanctioning multiple treble damage recoveries for the same injury, [53] and that other courts have been wary of permitting "overkill" recoveries, [54] whose punitive impact may unduly cripple a defendant and lead to an overall deleterious effect upon competition.

For these reasons, we conclude that Murray, in its role as a purchaser of consumer bags from competitors of the defendants, has no standing to sue the defendants for treble damages allegedly resulting from such purchases. We recognize that an alternative approach to erecting a standing barrier would be to give an opportunity to purchasers from competitors of price fixers, who allege that they were harmed in some way by the antitrust violation, to attempt to prove such harm and to recover treble damages if they succeed. Implicit in the doctrine of standing, however, is the recognition that the benefits that would flow from such an alternative are outweighed by its **[**44]** practical consequences. Thus, the § 4 standing doctrine "acknowledges that while ***HN10***[] many remotely situated persons may suffer damage in some degree as the result of an antitrust violation, their damage is usually much more speculative and difficult to prove than that of (someone) who is an immediate victim of the violation," and that "if the flood-gates were opened to permit treble damage suits . . ., the lure of a treble recovery . . . would result in an overkill, due to an enlargement of the private weapon to a caliber far exceeding that contemplated by Congress." [55] These countervailing factors, which have prompted courts to close their doors to all but those "whose protection is the fundamental purpose of the antitrust laws," were emphasized by the Supreme Court though in a slightly different context in Illinois Brick, and we are not free to ignore the thrust of its decision. **[**45]**

C. Mid-West Paper Company

With respect to Mid-West, the district court order granted summary judgment on the ground that Mid-West "did not purchase consumer bags directly from the defendants . . . . See *Illinois Brick Co. v. State of Illinois, 431 U.S. 720 (97 S. Ct. 2061, 52 L. Ed. 2d 707) (1977)*." On appeal, defendants urge that this order be upheld for two reasons.

---

a large group of smaller companies who are best able to withstand such losses. . . . Thus, the operation of the market would tend to prevent recoveries in suits such as this from being of a ruinous or anticompetitive dimension.

Infra at p. 598. We are not persuaded by this statement. Although we agree with the premise that "only businesses with a substantial share of a market are likely, by fixing prices, to significantly affect the prices charged by competing businesses," See generally, L. Sullivan, Antitrust §§ 61, 115-17 (1977) we do not believe that the conclusion that large recoveries will be borne by those companies "who are best able to withstand such losses" follows from it. Noncompetitive pricing patterns can prevail under a variety of market conditions, See generally, Hay & Kelley, An Empirical Survey of Price Fixing Conspiracies, 17 J. Law & Econ. 12 (1974), and a firm may become an industry price leader with a remarkable small "substantial" share of the market, simply because it has a larger share than any other company and is perceived for one reason or another to be the industry pace-setter. Given this fact, merely because a company has become an industry price leader, whether advertently or inadvertently, it does not mean that it can withstand the burdens of a treble damage recovery that is based upon profits obtained by the rest of the industry.

[52] See *15 U.S.C. § 1 (1976)*.

[53] See e. g., *Illinois Brick, supra, 431 U.S. at 730-31, 97 S. Ct. 2061*; *Hawaii v. Standard Oil Co., supra, 405 U.S. at 262-64, 92 S. Ct. 885*.

[54] See, e. g. *Cromar, supra, 543 F.2d at 506*; *Jeffrey v. Southwestern Bell, supra, 518 F.2d at 1131*; *Calderone Enterprises Corp., supra, 454 F.2d at 1295*.

[55] *Calderone Enterprises, supra, 454 F.2d at 1295*.

First, they maintain that the bags purchased by Mid-West from Great Plains, a subsidiary of one of the defendants, and resold by Mid-West for packaging automobile and machine parts, are not consumer bags. In support of this position, defendants submit that Great Plains does not manufacture consumer bags, and that Mid-West's purchase orders from Great Plains demonstrate such fact in that they describe the bags that were ordered either as kraft or as plain paper bags. Defendants also argue that because Mid-West admits that it is relying on the government indictment, it is bound by that indictment as well as by the government's bill of particulars that elaborates upon the indictment. And, defendants point out, neither of these documents mention the packaging of machine **[*588]** parts as a use of consumer **[**46]** bags. [56] Defendants further contend that Mid-West has not controverted their affidavits attesting that the bags in question are not consumer bags, but instead has rested on the unsupported allegations of its complaint. Accordingly, they assert, Mid-West has not shown that a dispute exists concerning a material fact so as to preclude summary judgment.

Whether the bags purchased **[**47]** by Mid-West are consumer bags is of course a question of fact. But the district judge's order does not indicate whether his grant of summary judgment was based upon a determination that the bags were not consumer bags. Indeed, particularly when the portion of the order addressing Mid-West's claim is compared with other portions of the order, the inference is that the judge dismissed Mid-West's claim on a legal rather than on a factual ground. [57] In such circumstances, we have no alternative but to remand the case so that the district court may make a finding as to the nature of the bags in question. We do not deem the fact that Great Plains is a subsidiary of Continental Group and describes its product as a kraft or paper bag to be determinative of the issue. Obviously, a manufacturer may not insulate its activities from scrutiny by compartmentalizing its corporate organization and then giving different names to its product, depending on the division that fabricates it. Nor do we regard Mid-West as being bound by the government's framing of its criminal case in its bill of particulars. Rather, so long as Mid-West is prepared to prove its charges, independent factual determinations **[**48]** must be made whether the bags bought by Mid-West bear the same characteristics as the bags described in the government indictment [58] **[**49]** and whether a price-fixing conspiracy existed with respect to the marketing of such bags. [59] Finally, inasmuch as samples of the bags were presented for In camera inspection by the district court, it cannot be said that Mid-West rested on the allegations in its complaint and pleadings and did not controvert defendants' affidavits.

---

[56] Paragraph 6 of the government indictment states:

Consumer bags are used for packaging a variety of products including, among others, pet foods, cookies, tea, coffee, kitty litter, chemicals, and agricultural products. Consumer bags also include air sickness bags.

In response to the defendant's request in the criminal suit for a more specific definition of the term "consumer bags," the government filed a "Voluntary Bill of Particulars" that relied upon the defendants' price lists to identify the bags. None of the price lists mention the packaging of automobile or machine parts as one of the uses for the product being offered for sale.

[57] The order treats Mid-West's claim together with the claims of the supermarket plaintiffs that are grouped in the first category, which clearly were dismissed on the legal ground that such plaintiffs were indirect purchasers. In contrast, in dismissing the claim of another plaintiff, Sambo's Restaurants, Inc., the next paragraph of the order states that the dismissal is based "on the ground that the paper bag (Sambo's) purchases is not a "consumer bag.' "

[58] We note in this regard that paragraph 6 of the indictment did not purport to give an exhaustive list of uses for consumer bags, which are described in paragraph 5 in the following manner:

Consumer bags, also known in the trade as "small bags," are made from one or more plies of paper and may be combined with other materials used as linings and/or coatings. Consumer bags are preformed by the manufacturer in many styles and sizes according to customer specifications. Most consumer bags have printed exterior designs as specified by the customer. Consumer bags are designed for capacities of less than twenty-five pounds. They are normally used to pre-package products which are then marketed in such bags.

[59] We do not at this time address the question whether and in what circumstances a successful government prosecution would obviate the necessity for Mid-West to prove a price-fixing conspiracy. See *15 U.S.C. § 16*.

Defendants' second line of argument is that even conceding that the bags bought by Mid-West are consumer bags, as a matter of law Mid-West may not sue for treble damages because it did not purchase the bags directly from any of the defendants. To the extent that Mid-West bases its claim upon purchases from competitors of the defendants, we agree that Mid-West has no standing to sue, for the reasons elaborated **[*589]** upon in our discussion of Murray's cause of action. But Mid-West also purchased bags from a subsidiary of one of the defendants, and the possibility therefore exists that it may be entitled to sue defendants for injuries that resulted from these purchases.

Superficially, Mid-West's situation seems analogous to that of the plaintiff in *In re Sugar Industry Antitrust Litigation (Stotter v. Amstar), 579 F.2d 13 (3d Cir. 1978).* **[**50]** In that case, the plaintiff, which was seeking treble damages from refiners of sugar that had engaged in a conspiracy to fix prices, purchased from a subsidiary of one of the defendants candy that incorporated such sugar. Mid-West maintains that it, too, may benefit from our conclusion in Stotter that "at least for this purpose and this context, the subsidiary should be treated as the alter ego of the parent." [60] However, a closer look at the problem presented in Stotter makes it apparent that no such inference may be made with respect to this case. For in Stotter we recognized that ***HN11***[] when a manufacturer sells its product to a subsidiary before making it available to the public, to bar the purchaser from the subsidiary from suing on the authority of Illinois Brick "would invite evasion (of the antitrust laws) by the simple expedient of inserting a subsidiary between the violator and the first noncontrolled purchaser." [61] In contrast, the manufacturer-price fixer in the present case would not be insulated from suit under the Illinois Brick rule, because Mid-West is a direct purchaser from **[**51]** Great Plains and may sue it if it participated in this or any other price-fixing conspiracy. Accordingly, the rationale that underlay our willingness to disregard the separate legal existence of the subsidiary in Stotter is not applicable here.

Nevertheless, ***HN12***[] under certain other circumstances, a court will regard a parent and subsidiary as one entity. This is so, for example, when the parent dominates and controls the subsidiary to such an extent that the subsidiary is deemed to be an agent of the parent. [62] If Mid-West can establish facts that warrant holding Continental Group legally accountable for Great Plains' activities in that as a consequence of Continental's domination the subsidiary's prices were determined in accordance with the general price-fixing conspiracy, Mid-West would be entitled to sue defendants for damages resulting from **[**52]** its purchases from Great Plains.

In sum, then, Mid-West's case must be remanded to the district court for further proceedings to determine whether the bags purchased by Mid-West are consumer bags and whether Continental is to be held accountable for Great Plains' alleged participation in the conspiracy.

IV. INJUNCTIVE RELIEF

Aside from seeking treble damages, the various plaintiffs requested the district court to enjoin the defendants from continuing to conspire to fix prices. This request was based on *section 16* of the Clayton Act, *15 U.S.C. § 26*, ***HN13***[] which states in part:

> Any person, firm, corporation, or association **[**53]** shall be entitled to sue for and have injunctive relief, in any court of the United States having jurisdiction over the parties, against threatened loss or damage by a violation of the antitrust laws, . . . when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity . . . .

The district court granted summary judgment in favor of the defendants, thus implicitly holding that injunctive relief was not available to the plaintiffs. Two lines of argument are now set forth by defendants **[*590]** to support this result with respect to the supermarket plaintiffs. [63]

---

[60] ***579 F.2d at 18-19***.

[61] ***Id. at 19***.

[62] See, e. g., ***P. F. Collier & Son Corp. v. FTC, 427 F.2d 261, 266-67*** (6 Cir.), Cert. denied, ***400 U.S. 926, 91 S. Ct. 188, 27 L. Ed. 2d 186 (1970)***. See generally, W. M. Fletcher, Cyclopedia of the Law of Private Corporations § 277 (rev. ed. 1969).

[54]**

Defendants place primary reliance upon Illinois Brick. They interpret that case as defining who sustains judicially cognizable injury under the antitrust laws, and contend that if an indirect purchaser is considered not to have suffered actual injury for purposes of § 4, it also must be deemed not to be "threatened" with injury under *§ 16*. Also, defendants assert that the requirement, found in both § 4 and *§ 16*, that the injury or damage be proximately caused by the antitrust violation [64] is identical in each section, and that consequently Illinois Brick's ostensible holding that any injury sustained by indirect purchasers is not proximately caused by the antitrust violation, is equally relevant with respect to injunctive relief. Essentially, then, defendants maintain that in light of Illinois Brick the supermarket plaintiffs lack standing to seek injunctive relief.

[55]**

For a secondary argument, defendants submit that the supermarket plaintiffs have not demonstrated the irreparable injury that defendants claim is necessary to sustain a grant of injunctive relief. In that a consumer bag is a relatively miniscule element of the product purchased by the supermarkets, defendants maintain that any damage to the supermarkets is too minute to warrant injunctive relief. Furthermore, they argue that the supermarkets will be adequately protected by the injunctive relief already being sought, though apparently not yet obtained, by direct purchasers and by the government.

As in our treatment of standing to sue for treble damages under § 4, we look to the policies underlying *§ 16* to determine whether a party has standing to sue for injunctive relief. A private action for relief under *§ 16* is one of the weapons, together with private treble damage actions and government criminal and civil suits, in the arsenal established by Congress for policing the antitrust laws [65] and for vindicating "the important public interest in free competition." [66] In addition, *§ 16* shares with § 4 the objective of providing private relief from anticompetitive conduct that **[**56]** is injurious, or that threatens to be injurious, to a plaintiff. [67] But ***HN14***[] in contrast to the treble damage action, a claim for injunctive relief does not present the countervailing considerations such as the risk of duplicative or ruinous recoveries and the spectre of a trial burdened with complex and conjectural economic analyses that the Supreme Court emphasized when limiting the availability of treble damages. [68]

[57]**

---

[63] Apparently, both the defendants and Mid-West are of the belief that Mid-West's entitlement to injunctive relief is completely dependent upon whether Mid-West may sue for treble damages. That assumption overlooks the possibility that Mid-West may be found to have purchased consumer bags but that it may not sue defendants for treble damages because Continental Group is not legally accountable for its subsidiary's sales. In that event the issue would arise whether Mid-West, as a direct purchaser of consumer bags from competitors of the defendants, has standing to sue for injunctive relief. Inasmuch as neither side briefed that issue and since it is presently premature for decision, we merely note its existence. A parallel issue exists with respect to Murray, but we need not decide it either, since we conclude that Murray has standing to sue for injunctive relief in its capacity as an indirect purchaser, and "100 injunctions are no more effective than one." *Hawaii v. Standard Oil Co., supra, 405 U.S. at 261, 92 S. Ct. at 891*.

[64] See *Reibert v. Atlantic Richfield Co., 471 F.2d 727, 731* (10 Cir.), Cert. denied, ***411 U.S. 938, 93 S. Ct. 1900, 36 L. Ed. 2d 399 (1973)*** ("The aggrieved party must satisfy the "by reason of' and/or "by' requirements found in sections 4 and 16 of the Clayton Act, respectively. This prerequisite boils down to complainant proving that the antitrust violations are the proximate cause of his injury.")

[65] See Zenith Radio Corp., supra, 395 U.S. at 130-31, 89 S. Ct. 1562; *United States v. Borden Co., 347 U.S. 514, 518, 74 S. Ct. 703, 98 L. Ed. 903 (1954)*.

[66] *Fortner Enterprises, Inc. v. United States Steel Corp., 394 U.S. 495, 502, 89 S. Ct. 1252, 1258, 22 L. Ed. 2d 495 (1969)*.

[67] See Zenith Radio Corp., supra, 395 U.S. at 130-31, 89 S. Ct. 1562.

[68] See In re Multidistrict Vehicle Air Pollution M. D. L. No. 31, supra, *481 F.2d at 130*.

The difference between the two sections is reflected in their language as well as in **[*591]** their judicial construction. Thus, with respect to § 4, a body of law has developed that defines when a person is "injured . . . "by reason of anything forbidden in the antitrust laws,' " [69] and Illinois Brick is the latest major refinement of that definition. Similarly, other cases have expounded upon the requirement that the injury be to the "business or property" of the plaintiff. [70] And as already seen above, a complicated doctrine of standing, unique to § 4, has been applied to limit the availability of treble damage actions to those parties who further the policy goals of such remedy. **[**58]**

In contradistinction to § 4, *§ 16* does not ground injunctive relief upon a showing that "injury" has been already sustained, but instead makes it available "against Threatened loss or damage." Furthermore, *§ 16* does not state that the threat must be to the plaintiff's "business or property," and courts accordingly have held that noncommercial interests are also protected. [71] Most significantly, however, *§ 16* by its terms entitles a party to injunctive relief "when and under the same conditions and principles as injunctive relief against threatened conduct that will cause loss or damage is granted by courts of equity." Mindful of these distinctions, ***HN15***[] courts have held that for purposes of *§ 16* the complainant "need only demonstrate a significant threat of injury from an impending violation of the antitrust laws or from a contemporary violation likely to continue or recur," [72] **[**60]** and that a person may have standing to obtain injunctive relief even when he is denied standing to sue for treble damages. [73] **[**61]** Indeed, the test for standing under *§ 16* has been framed in terms of a proximate **[**59]** cause standard that is

imposes a lower threshold standing requirement than § 4 of the Clayton Act. L. Sullivan, (Antitrust (1970)) *Supra at 772*. *Section 16* has been applied more expansively, both because its language is less restrictive than that of § 4, See *Hawaii v. Standard Oil Co., 405 U.S. 251, 260-61, 92 S. Ct. 885, 31 L. Ed. 2d 184 (1972)*, and because the injunctive remedy is a more flexible and adaptable tool for enforcing the antitrust laws than the damage remedy, See *id. at 261-62, 92 S. Ct. 885*; *Zenith Corp. v. Hazeltine, 395 U.S. 100, 131, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*. A party with standing under § 4 ordinarily will have standing under *§ 16*. ***Tugboat, Inc. v. Mobile Towing Co., 534 F.2d 1172, 1174 (5th Cir. 1976)***; P. Areeda & D. Turner, Supra, § 335e.

Id. at 288-89.

"less constrained" than that under § 4 [74] and which **[*592]** might in fact be no more rigorous than the general rule of standing. [75]

We begin our examination whether, for purposes of injunctive relief, the defendants' price-fixing conspiracy may have been the proximate cause of any damage or loss incurred **[**62]** by the indirect purchasers, [76] **[**63]** by observing that Illinois Brick does not control this inquiry. That case, which was explicitly decided on grounds other than standing [77] and in any event never mentions *§ 16*, was determined earlier [78] to be relevant to the question whether a direct purchaser from a competitor of the defendants has standing to sue for treble damages. This conclusion was reached, however, only because similar policy considerations underlie the respective issues of standing to sue for treble damages and the use of pass-on theories in treble damage actions.

But no such common basis exists between the use of the pass-on theory in treble-damage actions and standing to obtain injunctive relief. The concerns that motivated the Supreme Court to bar offensive use of pass-on centered on problems created by the treble damage recovery. Obviously, the risk of exposure to multiple liability, the difficulty in tracing the allocation of the overcharge among different levels of purchasers, and the general desirability of symmetrical application of the pass-on theory to plaintiffs and defendants are wholly unrelated to the issue whether a party should be entitled to sue for injunctive relief. Nor does the position taken in Illinois Brick, that effective enforcement of the antitrust laws requires that only direct purchasers be permitted to sue for treble damages, have validity in the context of *§ 16*. The Court in Illinois Brick concluded that the effectiveness of the treble damage action would be impaired by allocating the recovery among all those who paid the illegal overcharge **[**64]** rather than by concentrating the recovery in the hands of the direct purchasers for in that event no one group would have a sufficient incentive to sue. [79] With respect to injunctive relief, however, the entitlement of one group to sue does not diminish the incentive of another group to sue. In fact, enforcement of the antitrust laws is augmented by allowing any individual threatened by the anticompetitive activity to challenge it. In view of the markedly different policies upon which § 4 and *§ 16* are based, then, we cannot subscribe to defendants' broad assertion that Illinois Brick defined injury and proximate causation for purposes of both sections.

---

[74] *Jeffrey v. Southwestern Bell, supra, 518 F.2d at 1132* ***HN18***[] ("Courts take a less constrained view of standing in suits involving injunctive relief than in those demanding treble damages. . . . To achieve standing under *§ 16* the petitioner must demonstrate that he is threatened with loss or injury proximately resulting from the antitrust violation.").

[75] See, e. g., ***Tugboat, Inc. v. Mobile Towing Co., 534 F.2d 1172, 1174 (5th Cir. 1976)*** (footnotes omitted):

HN19[] It is apparent from the language of *§ 16* that the applicable standing rules in suits to enjoin antitrust violations are the general rules of standing. The plaintiff need show only that he is threatened by injury proximately caused by the defendant.

[76] The question whether the damage sustained by indirect purchasers has been proximately caused by the antitrust violators for purposes of standing to sue for treble damages has, of course, been mooted by Illinois Brick's holding that as a matter of law indirect purchasers may not sue for treble damages. Prior to Illinois Brick there existed a split among the various courts of appeals on this issue. Compare, e. g., *Donson Stores, Inc. v. American Bakeries Co., 58 F.R.D. 481, 483-85 (S.D.N.Y.1973) And Philadelphia Housing Authority v. American Radiator & Standard Sanitary Corp., 50 F.R.D. 13, 30 (E.D.Pa.1970)*, Aff'd per curiam sub nom. *Mangano v. American Radiator & Standard Sanitary Corp., 438 F.2d 1187 (3d Cir. 1971)*, *With Illinois v. Ampress Brick Co., 536 F.2d 1163, 1166-67* (7 Cir. 1976), Rev'd sub nom. *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)* *And In re Western Liquid Asphalt Cases, 487 F.2d 191 (9th Cir. 1973)*, Cert. denied, *Standard Oil Co. of Cal. v. Alaska, 415 U.S. 919, 94 S. Ct. 1419, 39 L. Ed. 2d 474 (1974)*. Needless to say, in view of the different policy considerations reflected in § 4 and *§ 16* concepts of standing, these cases are not controlling here.

[77] *431 U.S. at 728 n.7, 97 S. Ct. 2061*.

[78] See Part IIIB Supra.

[79] See *431 U.S. at 745-46, 97 S. Ct. 2061*.

It should be noted that the element of causation is not at issue in resolving the question whether indirect purchasers have standing to obtain injunctive relief. As recognized by Illinois Brick, "in elevating **[*593]** direct purchasers to a preferred position as private attorneys general, the Hanover **[**65]** Shoe rule denies recovery to those indirect purchasers who may have been actually injured by antitrust violations." [80] Rather, the question is whether the line for proximate causation should be drawn at the same place as it was drawn for purposes of treble damage actions or not.

We have already seen that the reasons for adopting a constricted position with respect to proximate causation in the context of treble damage actions are inapposite in the context of injunctive relief and that at least one court has stated that a party may sue under *§ 16* so long as it satisfies the standing requirements generally applicable in the federal courts. We need not, however, measure the outer range of standing to sue under *§ 16* in order to decide this appeal. For unlike other potential plaintiffs, who may be only remotely affected by the ripples caused by the conspirators' tampering with the supply and demand curve, indirect purchasers can state unequivocally that under **[**66]** all circumstances prevalent in the real economic world, [81] money is passing from their hands into the pockets of the price fixers as a result of the conspiracy, and that no rational pricing decisions by any intermediary will erase this fact. [82]

[67]**

Moreover, the rule of standing urged by the defendants, which would completely bar indirect purchasers from seeking injunctive relief, would leave a serious gap in the antitrust enforcement scheme, as the fate of these injured parties, and of the competitive economy in an entire industry, would be made dependent upon the willingness of the government and the direct purchasers to assume the burdens of a lengthy lawsuit. Such a result would be inconsistent with the policies of assuring vigorous enforcement of the antitrust laws, preserving competition, and providing relief for those injured by anticompetitive conduct. Yet in contrast to treble damage suits, it would appear that no countervailing interests would be served [83] by placing all indirect purchasers **[*594]** in a straightjacket, so

---

[80] *Id. at 746, 97 S. Ct. at 2075*.

[81] As mentioned earlier, only in a hypothetical economic model would no portion of the illegal overcharge be absorbed by the indirect purchaser, and then only if the indirect purchaser's demand for the product was perfectly elastic or if the middleman did not wish to maximize its profits and therefore absorbed the entire overcharge on its own. See note 50 Supra.

[82] In this critical respect, the indirect purchaser is to be distinguished from those parties that have been denied standing to sue for injunctive relief by other courts. E. g., *Jeffrey v. Southwestern Bell, supra*; (residential telephone subscribers have no standing to seek to enjoin higher rates allegedly sought from, and approved by, public utility commission to recoup losses from illegal predatory pricing of telephone equipment); *Nassau County Ass'n of Insurance Agents, Inc. v. Aetna Life & Casualty Co., 497 F.2d 1151 (2d Cir.)*, Cert. denied, ***419 U.S. 968, 95 S. Ct. 232, 42 L. Ed. 2d 184 (1974)*** (unincorporated insurance associations have no standing under *§ 16* to prevent insurance companies from terminating contracts of insurance agents that are members of plaintiff associations, where only loss alleged is decrease in membership and dues); *Conference of Studio Unions v. Loew's Inc., supra* ; (unions, association of unions, and individual members may not sue major motion picture companies for allegedly destroying independent companies and thereby causing loss of wages to members, dues to association, and expenditures by unions to secure new employment for members). The district court in Parkview Markets, Inc. v. Kroger Co., -- - F. Supp. -- , 1978 CCH Trade Cases P 62,373 (S.D.Ohio 1978) relied on these factually dissimilar cases to deny standing under *§ 16* to an indirect purchaser.

[83] True, as the defendants' argument suggests, once the antitrust violation is being actively contested by other parties, the interest of the judicial system in economizing its own efforts comes into play. Similarly, if a defendant is already enjoined from engaging in the illegal activities, it would be wasteful to require it to defend another suit seeking to enjoin the same activities once again, particularly since attorneys fees may now be awarded to successful plaintiffs under *§ 16*. See *15 U.S.C.A. § 26 (1978 Supp.)*. In our view, however, these considerations do not bear upon the problem of determining proximate causation for purposes of *§ 16*. The "private and public actions were designed to be cumulative, not mutually exclusive. . . . They may proceed simultaneously or in disregard of each other." *United States v. Borden, supra, 347 U.S. at 518-19, 74 S. Ct. at 706*. And it would be odd if Congress' recent authorization of attorneys fees under *§ 16*, which was intended to enhance the effectiveness of private injunctive suits, See H.Rep.No.94-499, 94th Cong. 2d Sess. 18-20 (1975), U.S.Code Cong. & Admin.News 1976, p.

to speak, and preventing them from taking any legal action to protect themselves from injury, inasmuch as the equity principles that are to be considered under § 16 can effectively screen out those claimants that are undeserving of injunctive relief.
[68]**

In determining that indirect purchasers have standing to sue for injunctive relief under § 16 but that each plaintiff must establish its entitlement to such equitable relief, we have endeavored to chart an approach that preserves the flexibility of that provision by making the relief it affords available when necessary to further antitrust policies, yet inaccessible to those who should not benefit from injunctive relief. Because when dealing with the Sherman Act we are expounding one of the fundamental laws governing the American economic system and because Congress has not evinced an intent that its goal of free competition be treated in an niggardly fashion by the judiciary, such flexibility appears salutary. Indeed, we believe these efforts to steer a middle ground in interpreting § 16 are in keeping with the Supreme Court's own attitude regarding the provision:

> Section 16 should be construed and applied with this purpose (of enforcing the antitrust laws) in mind, and with the knowledge that the remedy it affords, like other equitable remedies, is flexible and capable of nice "adjustment and reconciliation between the public interest and private needs as well as between **[**69]** competing private claims." *Hecht Co. v. Bowles, 321 U.S. 321, 329-330, 64 S. Ct. 587, 592, 88 L. Ed. 754 (1944)*. Its availability should be "conditioned by the necessities of the public interest which Congress has sought to protect." *Id., at 330, 64 S. Ct., at 592*. [84]

We conclude therefore that for purposes of § 16, the damages if any sustained by the supermarket plaintiffs, as indirect purchasers, are proximately caused by the price-fixers' violations. But although we hold that Illinois Brick does not preclude indirect purchasers from suing for injunctive relief and that they have standing to sue under § 16, they still must establish, as the statute requires, that equity principles entitle them to injunctive relief. Because the district court has not yet had occasion to determine whether the supermarket plaintiffs in the present case are entitled to injunctive relief under principles of equity, we shall remand the case for such a determination in the first instance by that court. [85] **[**70]**
[71]**

[*595] V.

The judgment of the district court with respect to the supermarket plaintiffs will be affirmed insofar as it denies them treble damages, but reversed and remanded insofar as it precludes them from obtaining injunctive relief. With

---

2572, resulted in a circumscription of the parties eligible to sue. Instead, it would appear that these concerns are properly to be considered by the court when it exercises its equity powers to decide whether an injunction is appropriate under the circumstances.

[84] 84. Zenith Radio Corp., supra, 395 U.S. at 131, 89 S. Ct. 1562.

[85] We disagree with the defendants' argument that a remand is unnecessary because, they claim, it is evident that the plaintiffs are not entitled to injunctive relief. First, contrary to defendants' assertions that plaintiffs must prove irreparable injury, the proper standard is that articulated in *Zenith Radio Corp., supra*. Second, we do not regard the plaintiffs to be necessarily foreclosed from injunctive relief by the mere pendency of the government and direct purchaser suits for similar remedies. Generally, "they may proceed simultaneously or in disregard of each other," *United States v. Borden Co., supra, 347 U.S. at 519, 74 S. Ct. at 706*, and should be permitted to do so if, considering all the circumstances (including the present status of the government and direct purchaser suits), the plaintiffs are still able to establish a "significant threat of injury" under general equity principles. In this regard we note, however, that the district court may wish to consider whether any meaningful difference exists in the present case "with respect to the parties capable of enforcing" the injunction, or whether the reality here is that "one injunction is as effective as 100, and concomitantly, that 100 injunctions are no more effective than one. . . ." See *Hawaii v. Standard Oil Co., supra, 405 U.S. at 261, 92 S. Ct. 885, 891*. Also, in view of the fact that the natural litmus test for determining whether a party is sufficiently injured to obtain injunctive relief whether it was willing to bear the burden of litigation has been swept away by the recent congressional award of attorneys fees under § 16, and in view of the consequent potential for unnecessary litigation costs to defendants, the district court may wish to consider the feasibility of consolidating the various suits for injunctive relief.

respect to Mid-West Paper Products Company, the judgment will be vacated and the case remanded for further proceedings consistent with this opinion.

Dissent by: HIGGINBOTHAM, Jr.(In part)

Dissent

A. LEON HIGGINBOTHAM, Jr., Circuit Judge, dissenting in part.

The majority would deny standing to Murray's of Baederwood and Mid-West Paper Products Co. insofar as they seek to sue defendants for allegedly excessive prices paid to defendants' competitors as a result of defendants' price-fixing. The question of how to properly limit antitrust standing has been a troubling one for courts and commentators alike. Although it has been suggested that the issue is really not one of "standing" at all, [1] the appellation is appropriate at least in that the question has produced an amount of confusion and uncertainty in the law commensurate with that produced by traditional standing questions. It is generally conceded that the decisions on antitrust **[**72]** standing are, in the words of one commentator, "discordant, with inconsistent rationales and no common premise." [2] This court has wisely chosen not to rely on any one test or formula to answer the question posed here. I agree with the majority that considerations of compensation for antitrust victims and deterrence of antitrust violators must be central to our analysis. [3] I agree also that we must not lose sight of the ultimate purpose of the antitrust laws preserving competition. I disagree, however, that denying standing to those who suffer injury as a result of their purchases from competitors of price-fixers will best serve these related goals of just compensation, vigorous enforcement and free competition. Therefore, I respectfully dissent as to this issue. In all other respects I join in the majority opinion. Although few courts or commentators have analyzed this exact problem, those that I have found who have addressed the issue have agreed that recovery of this sort should be permitted. See *State of Washington v. American Pipe and Construction Co., 280 F. Supp. 802 (W.D.Wash.1968)*; Berger and Bernstein, An Analytical Framework for Antitrust Standing, **[**73]** 86 Yale L.J. 809, 879 (1977); Note, 82 Harv.L.Rev. 1374 (1969).

[74]** Since the determination of whether Murray's and Mid-West have standing must be arrived at pursuant to a balancing of factors, I will first discuss those factors that I believe weigh in favor of granting standing here and then analyze why I believe the factors potentially tilting the balance the other way are either not present or are outweighed. The first factor to be considered is that the injuries alleged here will go uncompensated if standing is denied. In other words, there is allegedly injury in fact. Also any recovery obtained would not be duplicative of any other recovery which might be obtained. Actual injury, of course, is only the starting place for standing analysis. It must not be forgotten, however, that the primary purpose of antitrust damage remedies is remedial rather than punitive. *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 485-86, 97 S. Ct. 690, 50 L. Ed. 2d 701 (1977)*. Therefore, **[*596]** we must not lightly deny standing where actual injury is alleged.

Allowing standing would also encourage enforcement, and thereby deter violation, of the antitrust laws. In *Illinois Brick Co. v. Illinois, 431 U.S. 720, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977),* **[**75]** the Court held that plaintiffs who

---

[1] See *Bogosian v. Gulf Oil Corp., 561 F.2d 434, 447 n. 6 (3d Cir. 1977)*, Cert. denied, ***434 U.S. 1086, 98 S. Ct. 1280, 55 L. Ed. 2d 791 (1978)***.

[2] Handler, The Shift From Substantive to Procedural Innovations in Antitrust Suits The Twenty-Third Annual Antitrust Review, 71 Colum.L.Rev. 1, 24 (1971). The variety of approaches which the different circuits have taken to this problem was described in *In re Multidistrict Vehicle Air Pollution M.D.L. No. 31, 481 F.2d 122, 127 n. 6*-8 (9th Cir.), Cert. denied, ***Morgan v. Automobile Mfgrs. Assn., 414 U.S. 1045, 94 S. Ct. 551, 38 L. Ed. 2d 336 (1973)***.

[3] I take mild exception to the majority's description of how antitrust violators are to be deterred: "by depriving them threefold of the "fruits of their illegality.' " *Supra, at p. 583*. As will be discussed later, not all antitrust remedies are based on a calculation of the defendant's ill-gotten profits.

purchased indirectly from antitrust violators could not sue for their resulting injury. [4] The primary basis for this holding was that allowing multiple suits would dilute the recovery that any one plaintiff could receive and would inject complex issues that would make this diluted recovery more expensive to obtain. [5] Thus the court determined that the antitrust laws would be most effectively enforced if one party, the direct purchaser, were able to sue for the full amount of damages incurred by those in the defendants' chain of distribution. [6] Here, however, there is no question of apportionment. If these plaintiffs cannot sue for these damages, no one can. Also the Court recognized that, once recovery was concentrated in the hands of the direct purchaser, there is a risk that those purchasers will be unwilling to sue because they can avoid actual injury to themselves by passing on the added costs to their purchasers and, by suing, they will endanger their source of supply. *431 U.S. at 746, 97 S. Ct. 2061*. Allowing recovery here is one way of preventing that risk of non-enforcement from becoming a reality. A plaintiff might well **[**76]** sue the competitor of his supplier where he would not risk suing his own supplier. Thus this situation is much different from that in Illinois Brick since allowing recovery here would not reduce the incentive for private parties to enforce the antitrust laws, and, moreover, would serve to encourage enforcement in situations where such enforcement is especially needed.

[77]** In deciding whether to allow standing in antitrust cases, courts have attempted to analyze the directness of the injury to the plaintiff. In its most restrictive form, this is essentially a privity test. [7] Such a narrow conception of directness has been generally rejected. [8] **[**78]** Instead, courts have utilized a proximate causation analysis. Indeed, on at least two occasions, this court has described the standing issue as one of proximate causation. [9] Although "proximate cause" is not much more definite in its meaning than **[*597]** "direct cause" or "standing" itself, one important indication of whether an injury is proximately caused by an act is whether its occurrence as a result of that act is reasonably foreseeable. [10] The injury here certainly meets this test. It is foreseeable if not inevitable that,

---

4 As the majority recognizes, Illinois Brick was not, itself, a standing case. I agree with the majority, however, that the reasoning utilized in that opinion has implications for standing analysis.

5 The Court, in Illinois Brick, stated:

(W)e understand Hanover Shoe as resting on the judgment that the antitrust laws will be more effectively enforced by concentrating the full recovery for the overcharge in the direct purchasers than by allowing every plaintiff potentially affected by the overcharge to sue only for the amount it could show was absorbed by it.

431 U.S. at 734-35, 97 S. Ct. at 2069.

6 I believe the majority is seriously mistaken when it states:

Illinois Brick represents in effect the proposition that when defendants have fixed prices above the competitive market price, where the benefit derived by them is readily ascertainable, the objectives of the treble damage action are fulfilled when the defendants are required to pay the direct purchasers three times the overcharge.

Supra, at p. 585 (footnote omitted). Neither the language nor logic of Illinois Brick justifies the conclusion that Only direct purchasers from price-fixers can ever recover when prices are fixed at above the market rate. Rather the conclusion is that, among direct and indirect purchasers from the defendant price-fixers, only the direct purchasers can recover and they can recover the entire amount of damages sustained by that whole chain. This limitation is designed to enhance enforcement of the antitrust laws. See n. 5, Supra. As is discussed in the text accompanying this note, denying standing here would not further that end.

7 See, e. g., *City and County of Denver v. American Oil Co., 53 F.R.D. 620, 631 (D.Colo.1971)*.

8 See, e. g., *Cromar Co. v. Nuclear Materials and Equipment Corp., 543 F.2d 501 (3d Cir. 1976)* (rejecting any single test of standing).

9 See *Bogus v. American Speech & Hearing Association, 582 F.2d 277 at 284 (3d Cir. 1978)* ("The doctrine of standing as applied to antitrust cases limits the apparent breadth of this provision by elaborating a concept of proximate causation between defendant's unlawful act and plaintiff's out-of-pocket losses."); *Bogosian v. Gulf Oil Corp., 561 F.2d at 447 n. 6*.

when those with a substantial share of the market fix prices, their competitors will also raise prices under the anti-competitive umbrella established by the price-fixers.

[79]** Another factor to be considered is "the plaintiff's position in the area of the economy threatened by the alleged anticompetitive acts." See *Cromar Co. v. Nuclear Materials & Equipment Corp., 543 F.2d at 508*. This is essentially a phrasing of the "target area" test of standing. Thus, although the "target area" formulation is not the controlling test of antitrust standing in this circuit, it is to be considered in reaching a decision on this issue. As just mentioned, where prices are fixed in an oligopolistic market, the result is likely to be that non-price-fixing competitors will also raise their prices. Murray's and Mid-West as purchasers from these competitors are, therefore, well within the area of economy threatened by defendants' price-fixing activities. [11]

[80]** Finally, the seriousness of the violation should also be considered in determining the extent of the violator's liability. [12] In *U. S. v. United States Gypsum Co., 438 U.S. 422, 98 S. Ct. 2864, 2875, 57 L. Ed. 2d 854 (1978)*, the Supreme Court recognized that "the behavior proscribed by the (antitrust laws) is often difficult to distinguish from the gray zone of socially acceptable and economically justifiable business conduct." The Court noted that some "conduct regarded as Per se illegal" is not difficult to distinguish from legal business behavior "because of its unquestionably anticompetitive effects." Id. The Court cited, on this point, *U. S. v. Socony-Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129 (1940)*, which held that price-fixing agreements are Per se violations of the Sherman Act. Because it is often difficult to determine exactly what conduct violates the antitrust laws, the Court in Gypsum held that a person cannot be subjected to criminal liability for such violations without an inquiry into the intent with which the unlawful actions were taken.

[81]** I believe that a similar concern for those who may unwittingly violate the antitrust laws makes it proper for courts to consider this factor in determining to whom the antitrust defendant will be held liable. Thus where businesses engage in practices that might reasonably be considered not to violate the antitrust laws, it would seem proper for courts, as a matter of fairness, to be most cautious in extending the scope of their liability once a violation is found. Where, as here, however, defendants have fixed prices probably the clearest violation of the antitrust laws and the one most obnoxious to the underlying policy of free competition considerations of punishment and deterrence warrant the imposition of broad liability.

Among the factors that have led courts to deny standing are the possibility of duplicative, derivative or windfall recovery. Allowing **[*598]** standing here, however, would not result in any such recovery. The recovery sought here would not be duplicative since, as mentioned above, no other party could seek damages for part or all of the injury claimed here. [13] The recovery would not be derivative since the parties are not related to some other entity **[**82]** at which the illegal practices are most directly aimed and which could sue in its own right. [14] The

---

[10] See generally, Prosser, Law of Torts (4th ed.) § 43. The majority criticizes "the injection of a foreseeability concept" into the determination of standing, at least with respect to the "target area" test. *Supra, at p. 581 n. 27*. I believe, however, that foreseeability is one of the relevant factors that must be considered as long as directness of injury is one of the criteria of standing. Although the majority cites Handler, supra note 2, as criticizing foreseeability analysis in the context of the "target area" test, that article concludes by listing the "reasonable foreseeability of injury" as a "significant element" in determining whether a plaintiff has standing to sue. Handler at 30. I believe it is a wise inclusion.

[11] One formulation of the target area test requires that the plaintiff not only be in the area, but that he be aimed at. See, e. g., *Calderone Enterprises Corp. v. United Artists Theatre Circuit, 454 F.2d 1292, 1296 (2d Cir. 1971)*, Cert. denied, ***406 U.S. 930, 92 S. Ct. 1776, 32 L. Ed. 2d 132 (1972)***. Plaintiffs admittedly would not have standing under such an analysis. This test, however, has not been adopted by this court, is unduly restrictive and inadequately serves the purposes of compensation and deterrence.

[12] See Handler, supra note 2 at 30.

[13] Although the majority expresses some doubt, I believe it is clear that the logic of Illinois Brick requires that any recovery by those in the chain of distribution beginning with defendants' competitors be concentrated in the hands of those that purchase directly from the competitors.

recovery could not be properly characterized as "windfall" since the plaintiffs are complaining of actual out-of-pocket losses.

[83]** The majority contends that the recoveries even if not duplicative, derivative or windfall, may well be ruinous, I. e., that allowing treble damages to purchasers from competitors of antitrust violators might drive the violators out of business thereby injuring rather than protecting competition. I agree that this is a concern to be taken most seriously. Because undue reliance on this factor might seriously undercut enforcement of the antitrust laws, however, I do not believe that the standing decision should turn on this factor unless there is a very persuasive basis from which to conclude that competition would actually be hurt by the allowance of standing. Otherwise courts might unnecessarily prevent enforcement of the antitrust laws in the guise of protecting competition. I believe further that there is a strong basis on which to believe that competition would Not be injured by allowing standing in cases such as this. Only businesses with a substantial share of a market are likely, by fixing prices, to significantly affect the prices charged by competing businesses. Thus, it can reasonably be assumed that there will only be large recoveries against large companies or a large **[**84]** group of smaller companies who are best able to withstand such losses. Where companies with a small market share fix prices, the effect on their competitors would be small and the likelihood of a ruinous damages assessment would be correspondingly minimal. Thus, the operation of the market would tend to prevent recoveries in suits such as this from being of a ruinous or anticompetitive dimension. The majority also indicates that the fact that the defendants did not directly profit from the plaintiffs injuries here is a factor to be considered in denying standing. It is clear from the very nature of the treble damage remedy, however, that recoveries in antitrust cases, as in many other areas of the law, are not intended solely to force the disgorgement of tainted profits. [15] Therefore, I would accord little if any weight to this factor.

[85]** Finally, the majority adverts to the complexity of proving damages in this type of case and, closely related to this, the speculative nature of the inquiry into the amount of such damages. Complexity and speculativeness, however, are endemic to antitrust litigation. The length of many antitrust cases is ample indication of their complexity. It is also well established that damages in antitrust action need not be proved with the degree of certainty required in most **[*599]** other areas of the law. See *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 123-24, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*.

The majority relies on Illinois Brick, however, to establish the importance of these factors to our decision today. Although the Court in Illinois Brick certainly focussed much of its attention on the added complexity that would result from allowing recovery to indirect purchasers, it is crucial to note the context of that discussion. The Court in Illinois Brick was concerned with allowing the injection of complex issues into antitrust actions because the injection of such complexity would increase the cost of litigation and thereby discourage the enforcement **[**86]** of the antitrust laws. Thus the Court states:

> Permitting the use of pass-on theories under § 4 essentially would transform treble-damage actions into massive efforts to apportion the recovery among all potential plaintiffs that could have absorbed part of the overcharge from direct purchasers to middlemen to ultimate consumers. However appealing this attempt to allocate the overcharge might seem in theory, it would add whole new dimensions of complexity to treble-damage suits and Seriously undermine their effectiveness.

---

[14] Creditors, shareholders and officers of corporations injured by antitrust violations have frequently been denied standing because their claims are derivative. See, e. g., *Pitchford v. Pepi, 531 F.2d 92 (3d Cir.)*, Cert. denied, ***426 U.S. 935, 96 S. Ct. 2649, 49 L. Ed. 2d 387 (1976)***. See also Von Kalinowski, 11 Antitrust Laws and Trade Regulation, § 81.02(2) and cases cited therein. Lessors have also been denied standing on this basis. See e. g., ***Melrose Realty Co. v. Loew's, Inc., 234 F.2d 518 (3d Cir.)***, Cert. denied, ***352 U.S. 890, 77 S. Ct. 128, 1 L. Ed. 2d 85 (1956)*** (per curiam).

[15] For example, in *Pitchford v. Pepi, supra*, this court approved measures of damages from illegal territorial restrictions and the termination of a dealership which looked to the amounts lost by the plaintiff without regard to whether there was a corresponding profit to the defendant. The Supreme Court has recognized that "the treble damage provision (of Section 4 of the Clayton Act) which makes awards available only to injured parties, and measures the awards by a multiple of the injury actually proved, is designed primarily as a remedy." *Brunswick Corp. v. Pueblo Bowl-O-Mat, Inc., 429 U.S. at 485-86, 97 S. Ct. at 696*.

431 U.S. at 737, 97 S. Ct. at 2070. (emphasis supplied).

As already discussed, allowing suits such as those here will encourage rather than undermine the effective enforcement of the antitrust laws. Where added complexity does not result in a disincentive to the enforcement of the antitrust laws, its potency as an argument against standing is seriously diminished.

Moreover, there is little reason to believe that proof of damages here will be significantly more complex or speculative than in a suit by a direct purchaser against a price-fixing defendant. In each case, the price actually charged is known. In each case, damages can only be **[**87]** assessed by determining what the market price would have been "but for" the price-fix. Of course in both cases, it is possible that the seller would have sold at a price above that of the market even without the price-fix and presumably the defendant would have an opportunity to present evidence of this. The only discernible difference is that the defendant is likely to have better access to proof regarding its own pricing policies than those of its competitors. This tactical problem of the defendants does not, however, persuade me that standing should be denied here.

Thus I am left with the conclusion that the antitrust policies of compensation and enforcement would be appreciably advanced by allowing recovery for the injuries alleged here. I am unconvinced that such recovery would drive antitrust violators out of the market and thus injure competition. I believe, therefore, that the balance here is properly struck in favor of granting standing to these appellants. [16]

[88]**

---

[16] The majority, on four occasions, refers to those " "whose protection is the fundamental purpose of the antitrust laws.' " I do not believe that the invocation of this phrase advances our analysis here. To the extent that the majority intends this phrase to do more than identify those who are properly allowed standing after consideration of the criteria referred to throughout this opinion, I believe it is pursuing a most misguided course. If Congress' purpose was to protect certain individuals through the treble damage remedy, it is irrelevant that the protection of such individuals was not the "fundamental" purpose of the antitrust laws. Thus we are left with the problem of defining exactly who Congress intended to be able to sue under Section 4. I have already discussed the factors to be considered in making such determinations. The ambiguity of the term "fundamental purpose" makes it ill-suited for service as an additional factor to be analyzed in resolving antitrust standing issues or as a substitute for the factors already discussed. I fear that overemphasizing this term may lead to a narrowing of antitrust standing unsupported by law or logic.

Elida, Inc. v. Harmor Realty Corp.

Supreme Court of Connecticut

December 13, 1978, Argued ; April 3, 1979, Decided

No Number in Original

LexisNexis® Headnotes

Antitrust & Trade Law > Public Enforcement > State Civil Actions

HN1[] **Public Enforcement, State Civil Actions**

Conn. Gen. Stat. § 35-26 provides that any contract in restraint of trade or commerce is unlawful. The fact that a contract may have been executed before the statute took effect is immaterial if it is in existence thereafter. The statute prohibits the continuing or entering into such an agreement for the future, and if the agreement be continued it then becomes a violation of the act. There is nothing of an ex post facto character about the act.

Constitutional Law > Congressional Duties & Powers > Contracts Clause > General Overview

Governments > Police Powers

Constitutional Law > Substantive Due Process > Scope

HN2[] **Congressional Duties & Powers, Contracts Clause**

It is settled that neither the "contract" clause nor the "due process" clause has the effect of overriding the power of the state to establish all regulations that are reasonably necessary to secure the health, safety, good order, comfort, or general welfare of the community and that all contract and property rights are held subject to its fair exercise.

Constitutional Law > Congressional Duties & Powers > Contracts Clause > General Overview

Governments > Local Governments > Police Power

Governments > Police Powers

HN3[] **Congressional Duties & Powers, Contracts Clause**

Contracts must be understood as made in reference to the possible exercise of the rightful authority of the government, and no obligation of a contract can extend to the defeat of legitimate government authority. Consequently, the state, pursuant to its lawful exercise of the police power, may rightfully prohibit the continuance in the future of those things already in existence which are deemed injurious to the rights and interests of its citizens so as to justify such an exercise of the power whether the continuance of the things is provided for by contract or not.

Constitutional Law > Congressional Duties & Powers > Contracts Clause > General Overview

Governments > Local Governments > Police Power

HN4[] **Congressional Duties & Powers, Contracts Clause**

The right of private contract must yield to the exigencies of the public welfare when determined in an appropriate manner by the authority of the State.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Business & Corporate Compliance > ... > Contracts Law > Types of Contracts > Covenants

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN5[] **Public Enforcement, State Civil Actions**

Under the common law, the well-settled rule is that an anticompetitive covenant ancillary to a lawful contract is enforceable if the restraint upon trade is reasonable.

Antitrust & Trade Law > Public Enforcement > State Civil Actions

Labor & Employment Law > ... > Conditions & Terms > Trade Secrets & Unfair Competition > Noncompetition & Nondisclosure Agreements

HN6[] **Public Enforcement, State Civil Actions**

To satisfy the requirement of reasonableness, the court has stated that the restraint must be limited in its operation with respect to time and place and afford no more than a fair and just protection to the interests of the party in whose favor it is to operate, without unduly interfering with the public interest.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > Per Se Violations

Estate, Gift & Trust Law > Trusts > General Overview

HN7[] **Per Se Rule & Rule of Reason, Per Se Violations**

The Connecticut Anti-Trust Act, Conn. Gen. Stat. §§ 35-224 to 35-44, incorporates, in modified form, various provisions of the federal antitrust laws, especially the Sherman Act, *15 U.S.C.S. § 1 et seq.* In such a situation, the judicial interpretation of the federal act is particularly pertinent in the construction of the state statute. *Conn. Gen. Stat. § 35-28(d)* has no specific counterpart in the federal antitrust laws, but rather, it is considered to be a codification of what have come to be known as "per se" violations of the Sherman Act, *15 U.S.C.S. § 1*.

Antitrust & Trade Law > ... > Per Se Rule & Rule of Reason > Practices Governed by Per Se Rule > Boycotts

Antitrust & Trade Law > Regulated Practices > Price Fixing & Restraints of Trade > Horizontal Market Allocation

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN8[] **Practices Governed by Per Se Rule, Boycotts**

The following are recognized as "per se" violations of the federal act: (1) price fixing; (2) agreements among competitors to divide markets or allocate customers; (3) certain tying arrangements; and (4) group boycotts.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Real Property Law > Encumbrances > Restrictive Covenants > Subdivisions

Real Property Law > Encumbrances > Restrictive Covenants > General Overview

HN9[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

Vertical territorial restrictions are now subject to a "reasonableness" test under federal law.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN10[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The Sherman Act, *15 U.S.C.S. § 1 et seq.*, "rule of reason" is intended to be the prevailing standard to be applied for the purpose of determining whether a particular act had or had not brought about the wrong against which the statute provided in a given case.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

Real Property Law > Encumbrances > Restrictive Covenants > General Overview

HN11[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

"Per se" rules of illegality should be applied only to conduct which is shown to be manifestly anticompetitive. Consequently, the actual impact of particular arrangements on competition must be examined to determine whether they have a pernicious effect on competition and lack any redeeming virtue.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN12[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The "rule of reason," by which the factfinder weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition is the appropriate standard for the trial court to apply.

Counsel: *Robert S. Reger,* for the appellant (plaintiff).

Stephen B. Alderman, with whom were *Raymond Parlatto,* and, on the brief, *Robert A. Ginsburg* and *Dana E. Friedman,* for the appellees (defendants The Gourmet Shoppe, Inc., et al.).

John R. Lacey, assistant attorney general, with whom, on the brief, were *Carl R. Ajello,* attorney general and *Gerard J. Dowling,* assistant attorney general, for the appellee (defendant state of Connecticut).

Judges: Cotter, C. J., Loiselle, Bogdanski, Longo and Peters, Js.

Opinion by: COTTER

Opinion

[*220] [1227]** In this appeal by the plaintiff, we are required to determine the applicability of the Connecticut Anti-Trust Act [1] to a restrictive covenant **[***2]** contained in a commercial lease between the plaintiff and the named defendant.

---

[1] *General Statutes §§ 35-24 to 35-44*.

The defendant Harmor Realty Corporation is the owner, landlord and lessor of premises in the Amity Shopping Center, a shopping complex located in New Haven and comprised of approximately twenty-five tenants. The plaintiff, a family-owned corporation doing business as Westville Home Bakery, entered into an agreement on October 28, 1970, with the defendant Harmor Realty Corporation wherein the plaintiff leased 2000 square feet of space located in the shopping center for the purpose of engaging in the production and retail sale of freshly baked goods. The lease continued from October 15, 1970, until November 14, 1976; and a contemporaneously-executed addendum to the lease gave the plaintiff the option to extend the term of the lease for an additional four-year period to November 14, 1980, which the plaintiff duly exercised. The lease addendum further provided that the plaintiff would have, subject **[***3]** to certain exceptions, "the exclusive right to sell products normally sold by a bakery shop," and that the defendant lessor would not "rent any other space in the shopping center for the purpose of baking on the premises." [2]

[*221] On or about December 28, 1976, the Harmor Realty Corporation leased other space in its shopping complex to the defendant The Gourmet Shoppe, Inc., a business engaged in the sale of products normally sold by a bakery shop. Although Harmor **[***4]** Realty Corporation knew, or should have known, that The Gourmet Shoppe, Inc., would engage in the sale of bakery products, [3] it failed to take any action to prohibit the sale of such products despite the plaintiff's repeated demands. Both defendant corporations, **[**1228]** and their respective presidents, had actual and constructive notice of the restrictive covenant contained in the plaintiff's lease.

The plaintiff brought the present action in the Superior Court seeking (1) a temporary and permanent injunction enjoining the defendant The Gourmet Shoppe, Inc., from engaging in the retail sale of bakery products for off-premises consumption; (2) a temporary and permanent injunction enjoining the defendant Harmor Realty Corporation from failing to perform its contractual obligations **[***5]** to the plaintiff "and/or from failing to otherwise act so as to cause the defendant The Gourmet Shoppe, Inc. . . . to cease and desist from the retail sale, for off-premises consumption," of bakery products; and (3) money damages and attorney's fees and costs. Following the entry of the trial court's order granting the temporary injunctions requested by the plaintiff pending a final hearing, the defendants filed special defenses alleging that the lease provision upon which the plaintiff based its claim for relief constituted an unlawful **[*222]** restraint of trade in violation of the state antitrust act and was, therefore, unenforceable. Pursuant to *General Statutes § 35-32 (b)*, the state of Connecticut was permitted to intervene as a party to this action with the status of defendant-intervenor. In a bifurcated trial for the purpose of which the defendants admitted the essential allegations of the first count of the plaintiff's amended complaint alleging irreparable injury as a result of a breach of the restrictive covenant in its lease, it was agreed that the sole issue to be decided by the court was whether the state antitrust act should be construed so as to prohibit the **[***6]** enforcement of the restrictive covenant and thus prohibit the issuance of the permanent injunctions sought by the plaintiff.

The trial court concluded that the restrictive covenant sought to be enforced by the plaintiff was intended to prevent competition with the plaintiff and will have that effect if enforced; and that the covenant in question was "per se" unreasonable and contrary to the express language of *General Statutes § 35-28 (d)*. Judgment was rendered in favor of all defendants on the first count of the plaintiff's amended complaint and the requests for permanent injunctions were denied. [4] The plaintiff appealed to this court from the judgment rendered.

I

---

[2] "Article XIX, *Section 1*. It is agreed that the Tenant will have the exclusive right to sell products normally sold by a bakery shop, but this exclusive right will not apply to nor prevent the sale of such products by chain tenants such as the super food markets, the Jr. Department store or the Variety store and the Drug store. The Landlord agrees not to rent any other space in the shopping center for the purpose of baking on the premises, with the exception of the Chains, however, the Landlord agrees not to rent any space to a bakery chain."

[3] The Gourmet Shoppe, Inc. is a corporation engaged in the general business of a restauranteur and retail sales of delicatessens, including baked goods, such as those which the plaintiff produces and sells at the Amity Shopping Center.

[4] The previously issued temporary injunctions were dissolved by the court.

At the outset, we consider the threshold question raised by the plaintiff whether the state antitrust act should be construed so as to apply to a claimed vested right it has in a restrictive covenant in a contract originally entered into prior to the effective **[*223]** **[***7]** date of the act. The plaintiff claims that such an interpretation would be contrary to well-settled principles regarding the retrospective application of statutes; violative of the plaintiff's right of redress for injuries guaranteed by article first, § 10 of the state constitution; in conflict with the contract clause of the federal constitution; and would amount to a denial of due process. In view of the accepted interpretation of the applicability of such legislation, we are not persuaded by the plaintiff's arguments in this regard.

General Statutes § 35-26 ***HN1***[] provides that any contract in restraint of trade or commerce is unlawful. The fact that a contract may have been executed before the statute took effect is immaterial if it is in existence thereafter. The prohibition is not directed at the formation and existence of the contract prior to the effective date of the act, but in the persistence of the parties in it after it has become unlawful. "The statute prohibits the continuing or entering into such an agreement for the future, and if the agreement be continued it then becomes a violation of the act. There is nothing of an *ex post facto* character about the act." **[***8]** *United States v. Trans-Missouri Freight Assn., 166 U.S. 290, 342, 17 S. Ct. 540, 41 L. Ed. 1007*; see *State v. Missouri, Kansas & Texas Ry. Co. of Texas, 99 Tex. 516, 527, 91 S.W. 214*; *54 Am. Jur. 2d, Monopolies § 454*.

[1229]** ***HN2***[] "[I]t is settled that neither the 'contract' clause nor the 'due process' clause has the effect of overriding the power of the state to establish all regulations that are reasonably necessary to secure the health, safety, good order, comfort, or general welfare of the community . . . and that all contract and property rights are held subject to its **[*224]** fair exercise." *Atlantic Coast Line R. Co. v. Goldsboro, 232 U.S. 548, 558, 34 S. Ct. 364, 58 L. Ed. 721*; *Ansonia v. Ansonia Water Co., 101 Conn. 151, 157, 125 A. 474*. ***HN3***[] "'[C]ontracts must be understood as made in reference to the possible exercise of the rightful authority of the government, and no obligation of a contract can extend to the defeat of legitimate government authority.' [*Knox v. Lee, 79 U.S. (12 Wall.) 457, 551]*." *Louisville & Nashville R. Co. v. Mottley, 219 U.S. 467, 482, 31 S. Ct. 265, 55 L. Ed. 297*. Consequently, the state, pursuant **[***9]** to its lawful exercise of the police power, may rightfully prohibit the continuance in the future of those things already in existence which are deemed injurious to the rights and interests of its citizens so as to justify such an exercise of the power whether the continuance of the things is provided for by contract or not. See *Ansonia v. Ansonia Water Co., supra, 156-58*. ***HN4***[] The right of private contract, therefore, "must yield to the exigencies of the public welfare when determined in an appropriate manner by the authority of the State." *Union Dry Goods Co. v. Georgia Public Service Corporation, 248 U.S. 372, 377, 39 S. Ct. 117, 63 L. Ed. 309*.

Our conclusion that the legislation in question may constitutionally apply to the contract entered into prior to the act's passage, which included the option to extend for an additional term, is in accord with the decisions of the United States Supreme Court regarding the applicability of federal antitrust provisions. See *United States v. Southern Pacific Co., 259 U.S. 214, 234-35, 42 S. Ct. 496, 66 L. Ed. 907*; *Addyston Pipe & Steel Co. v. United States, 175 U.S. 211, 234, 20 S. Ct. 96, 44 L. Ed. 136*; *United* **[***10]** *States v. Trans-Missouri Freight Assn., supra.* In view of the position we take on this issue, **[*225]** we need not consider whether the renewal of the plaintiff's lease for an additional four-year term after the Connecticut Anti-Trust Act was enacted might be considered the creation of a new lease as of the date of the renewal.

II

The plaintiff's principal claim of error in this appeal is directed at the trial court's determination that the restrictive covenant contained in the plaintiff's lease was "per se" unreasonable and contrary to the express langauge of *§ 35-28 (d) of the General Statutes.* [5] The plaintiff argues that the so-called "Rule of Reason" which is utilized, in certain cases, by federal courts construing the Sherman Antitrust Act (26 Stat. 209, as amended, *15 U.S.C. §§ 1-7*) was the appropriate standard for the trial court to apply in the present case. See, generally, Bork, "The Rule of Reason

---

[5] "[*General Statutes] Sec. 35-28*. ACTS UNLAWFUL WHEN PURPOSE OR EFFECT IS RESTRAINT OF TRADE OR COMMERCE. Without limiting *section 35-26*, every contract, combination, or conspiracy is unlawful when the same are for the purpose, or have the effect, of: . . . (d) refusing to deal, or coercing, persuading, or inducing third parties to refuse to deal with another person."

and the Per Se Concept," part 1, 74 Yale L.J. 775 (1965); Bork, "The Rule of Reason and the Per Se Concept," part 2, 75 Yale L.J. 373 (1966).

[*11]** ***HN5***[] Under the common law, the well-settled rule is that an anticompetitive covenant ancillary to a lawful contract is enforceable if the restraint upon trade is reasonable. *Scott v. General Iron & Welding Co., 171 Conn. 132, 137, 368 A.2d 111*; *Domurat v. Mazzaccoli, 138 Conn. 327, 330, 84 A.2d 271*; *Mattis v. Lally, 138 Conn. 51, 54, 82 A.2d 155*; *Dick v. Sears-Roebuck & Co., 115 Conn. 122, 126, 160 A. 432*; *Samuel Stores, Inc. v. Abrams, 94 Conn. 248, 252,* ***[*226]*** *108 A. 541*; *54 Am. Jur. 2d, Monopolies § 511*; see note, "Restrictive Covenants in Shopping Center Leases," 34 N.Y.U. L. Rev. 940 (1959). **[**1230]** ***HN6***[] To satisfy this requirement of reasonableness, we have stated that "the restraint must be limited in its operation with respect to time and place and afford no more than a fair and just protection to the interests of the party in whose favor it is to operate, without unduly interfering with the public interest. [Citations omitted.]" *Mattis v. Lally, supra, 54*. A prohibition against the conduct of a rival business contained in a deed, for example, has been held not to violate public policy where the restriction upon the conduct **[***12]** of a certain business is limited to the particular piece of land transferred, for a reasonable purpose and for a reasonable period of time. *Dick v. Sears-Roebuck & Co., supra.*

Mindful of the foregoing principles and authorities, we review the trial court's conclusion that the express language of *General Statutes § 35-28 (d)* renders the restrictive covenant in question per se unreasonable without resort to an examination of the "reasonableness" of that covenant under all the circumstances.

There is no dispute between the parties that ***HN7***[] the Connecticut Anti-Trust Act incorporates, in modified form, and with notable exceptions, various provisions of the federal antitrust laws, especially the Sherman Act, 26 Stat. 209, *15 U.S.C. §§ 1 et seq.* See *Mazzola v. Southern New England Telephone Co., 169 Conn. 344, 347-48, 363 A.2d 170*; Brodigan, "The Connecticut Antitrust Act," 47 Conn. B.J. 12, 16 (1973). In such a situation, the judicial interpretation of the federal act is particularly pertinent in our construction of the state statute. *United* ***[*227]*** *Aircraft Corporation v. International Assn. of Machinists, 161 Conn. 79, 85, 285 A.2d 330*, cert. denied, *404* ***[***13]*** *U.S. 1016, 92 S. Ct. 675, 30 L. Ed. 2d 663*; *Windsor v. Windsor Police Department Employees Assn., Inc., 154 Conn. 530, 536, 227 A.2d 65*. *Section 35-28 (d)* has no specific counterpart in the federal antitrust laws, but rather, it is considered to be a codification of what have come to be known as "per se" violations of the Sherman Act, notably *§ 1*. Brodigan, supra, 24.

In *Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 78 S. Ct. 514, 2 L. Ed. 2d 545*, the court, while recognizing that there were some agreements whose validity depended on the surrounding circumstances, observed (p. 5): "[T]here are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use." Since the area of per se violations is carefully limited; [6] *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corporation, 382 U.S. 172, 178, 86 S. Ct.* ***[*228]*** *347, 15 L. Ed. 2d 247*; it can be stated generally that ***HN8***[] the following are recognized as "per se" **[***14]** violations of the federal act: (1) price fixing; *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 60 S. Ct. 811, 84 L. Ed. 1129*, reh. denied, *310 U.S. 658, 60 S. Ct. 1091, 84 L. Ed. 1421*; (2) agreements among competitors to divide markets or allocate customers; *Continental Ore Co. v. Union Carbide & Carbon Corporation, 370 U.S. 690, 82 S. Ct. 1404, 8 L. Ed. 2d 777*; *Timkin Roller Bearing Co. v. United States, 341 U.S. 593, 71 S. Ct. 971, 95 L. Ed. 1199*; (3) certain tying arrangements; *Fortner Enterprises, Inc. v. United States Steel Corporation,*

[6] An example of the reluctance to apply the "per se" rule in an overly broad fashion might best be found in the recent United States Supreme Court decision in *Continental T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568*, wherein the court overruled *United States v. Arnold Schwinn & Co., 388 U.S. 365, 87 S. Ct. 1856, 18 L. Ed. 2d 1249*, which held that a per se violation results when a manufacturer sells products to his distributor subject to territorial restrictions on resale. Although the court left unanswered the possibility that some vertical restrictions might justify per se prohibition, it concluded that a return to the "rule of reason" which governed vertical restrictions prior to *Schwinn* was warranted. *Continental T.V., Inc. v. GTE Sylvania, Inc., supra, 58-59*. The court noted that "departure from the rule-of-reason standard must be based upon demonstrable economic effect rather than -- as in *Schwinn* -- upon formalistic line drawing." Id.

394 U.S. 495, 89 S. Ct. 1252, 22 [**1231] L. Ed. 2d 495; and (4) group boycotts. Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741.

[*15]** In the present case, the defendants argue that the prohibition of § 35-28 (d) of our state act may be construed with reference to federal cases dealing with group boycotts or concerted refusals to deal which have been held to be per se illegal. See United States v. General Motors Corporation, 384 U.S. 127, 86 S. Ct. 1321, 16 L. Ed. 2d 415; Klor's, Inc. v. Broadway-Hale Stores, Inc., supra. The restrictive covenant in the present case, however, is clearly distinguishable from "collective boycott" cases which involve horizontal restraints. Klor's, Inc. v. Broadway-Hale Stores, Inc., supra (agreement between suppliers); Fashion Originators' Guild of America, Inc. v. Federal Trade Commission, 312 U.S. 457, 668, 61 S. Ct. 703, 85 L. Ed. 949 (agreement between merchants); see note, "The Antitrust Implications of Restrictive Covenants in Shopping Center Leases," 86 Harv. L. Rev. 1201, 1212-18 (1973); Eagle, "Shopping Center Control: The Developer Besieged," 51 Jour. Urb. Law, 586, **[*229]** 605-608 (1974). Moreover, it is interesting to note that ***HN9***[] vertical territorial restrictions are now subject to a "reasonableness" test under federal law. See Continental [***16] T.V., Inc. v. GTE Sylvania, Inc., 433 U.S. 36, 97 S. Ct. 2549, 53 L. Ed. 2d 568.

The defendants nonetheless argue that the covenant contained in the plaintiff's lease is a "naked restraint of trade" which should be declared per se illegal under the provisions of our state antitrust act. While there is a general paucity of reported decisions specifically addressed to the type of restrictive covenant involved in the present case, our review of the relevant authorities leads us to reject the application of the "per se" rule urged by the defendants under the facts of this case.

In a recent case construing a state antitrust act which, not unlike our act, is similar to the federal act, the Kentucky Court of Appeals concluded that a restrictive covenant in a shopping center lease with a medium-size store which granted that store the exclusive right to sell men's and boys' clothing [7] was not unreasonable per se. *Mendell* v. *Golden-Farley of Hopkinsville, Inc.,* 1978-1 Trade Cases para. 61,814, p. 73,390 (Ky. Ct. App.). Applying the appropriate antitrust analysis set forth by the United States Supreme Court with regard to federal provisions, the Kentucky court concluded that **[***17]** its state's antitrust provisions did not effect a material change in the common law of Kentucky respecting the validity of restrictive covenants in leases. Id., **[*230]** p. 73,392. Similarly, a shopping center lease provision restraining a tenant from operating a similar sporting goods store within three miles of the center was held to be prima facie reasonable under Florida ***antitrust law***. *Pensacola Associates v. Biggs Sporting Goods Co., 353 So. 2d 944* (Fla. Dist. Ct. App.).

In Borman's Inc. v. Great Scott Super Markets, Inc., 433 F. Sup. 343 (D. E.D. Mich.), the court rejected (p. 349) the claim that a **[***18]** shopping center lease provision which granted a tenant a "partial exclusive" at the center constituted a per se violation of the antitrust laws. The court noted: "[S]uch a rule would disregard important distinctions between and among the types of shopping centers involved, the type of store involved and the type of restraint involved. Since very real distinctions should be made depending on the facts, any per se rule of illegality, or legality, should not be formulated." Id., 349. Likewise, another federal court has recently indicated that the federal antitrust implications of a restrictive lease provision granting exclusive rights to a shopping center tenant would be determined by examining all the surrounding circumstances to see if the particular lease provisions unreasonably restrain trade. *Dart Drug Corporation* v. *Peoples Drug Stores, Inc.,* 1977-1 Trade Cases para. 61,281, pp. 70,887-88 (D. D.C.); see *Pay Less Drug Stores Northwest, Inc.* v. **[**1232]** *City Products Corporation,* 1975-2 Trade Cases para. 60,385, p. 66,676 (D. Ore.).

We find the above ratiocination persuasive in the circumstances of the present case. As under ***HN10***[] the Sherman Act, the "rule **[***19]** of reason" was intended to be the prevailing standard to be applied for the purpose of determining whether a particular act had **[*231]** or had not brought about the wrong against which the statute provided in a given case. Standard Oil Co. of New Jersey v. United States, 221 U.S. 1, 59-61, 31 S. Ct. 502, 55 L.

---

[7] Like the provision in the instant case, the clause in the *Mendell* lease did not apply to the major chains. (See footnote 2 of this opinion). That clause also made exception for other tenants whose sale of such clothing is incidental to their main line of business. *Mendell* v. *Golden-Farley of Hopkinsville, Inc.,* 1978-1 Trade Cases para. 61,814, p. 73,390 (Ky. Ct. App.).

Ed. 619. **HN11**[] "Per se" rules of illegality should be applied only to conduct which is shown to be "manifestly anticompetitive." Continental T.V., Inc. v. GTE Sylvania, Inc., supra, 49-50. Consequently, the actual impact of particular arrangements on competition must be examined to determine whether they have a "pernicious effect on competition and lack . . . any redeeming virtue." Northern Pacific Ry. Co. v. United States, supra, 5. The restrictive covenant in the present case cannot be so characterized. [8]

[*20]** Hence, we conclude that the trial court was in error in determining that the plaintiff's lease provision was "per se" illegal. **HN12**[] The "rule of reason," by which the factfinder "weighs all of the circumstances of a case in deciding whether a restrictive practice should be prohibited as imposing an unreasonable restraint on competition"; Continental T.V., Inc. v. GTE Sylvania, Inc., supra, 49; was the appropriate standard for the trial court to apply. Since additional evidence may be necessary for a determination of the reasonableness of the covenant in the present case, a new trial must be ordered. We note, in this regard, that the facts which may be relevant upon remand include, but are not limited to, the following: The plaintiff's store was physically small in size, 20 feet by 100 feet, and located in **[*232]** a shopping complex consisting of approximately twenty-five tenants; its "exclusive right" to sell bakery products in the shopping center specifically did "not apply to nor prevent the sale of such products by chain tenants such as the super food markets, the Jr. Department store or the Variety store and the Drug store" (see footnote 2 of this opinion); and the plaintiff **[***21]** was not a major or anchor tenant, but a small business which was compelled to compete with the so-called chain stores or larger anchor tenants.

There is error, the judgment is set aside and a new trial is ordered.

In this opinion the other judges concurred.

End of Document

---

[8] "It is well known that the success of a shopping center depends upon the gathering together in one area of a variety of enterprises which are able to serve the needs of the general public and that this end can often best be accomplished by offering to the individual merchants the exclusive right to sell in the center the kind of merchandise he handles." Savon Gas Stations Number Six, Inc. v. Shell Oil Co., 309 F.2d 306 (4th Cir.).

Civil Procedure > ... > Jurisdiction > Subject Matter Jurisdiction > General Overview

HN4[] International Aspects, International Application of US Law

When two American litigants are contesting alleged antitrust activity abroad that results in harm to the export business of one, a federal court does have subject matter jurisdiction.

International Law > Dispute Resolution > Act of State Doctrine

HN5[] Dispute Resolution, Act of State Doctrine

The act of state doctrine requires American courts to reject private claims based on the contention that the damaging act of another nation violates either American or international law. To determine whether the act of state doctrine applies in a given factual context, the court must analyze the nature of the questioned conduct and the effect upon the parties in addition to appraising the sovereign's role.

Opinion by: WEIS

Opinion

[*322] [*1290]** OPINION OF THE COURT

Alleging that foreign patents were secured by fraud, which if perpetrated in securing a domestic patent would lead to antitrust liability, plaintiff seeks treble damages and injunctive relief. The district court dismissed the complaint, relying primarily upon the act of state doctrine. We conclude that in this instance that ground does not bar consideration of plaintiff's claim. Because we determine, however, that in deciding whether jurisdiction should be exercised the **[**2]** district court should weigh the enforcement of the antitrust laws against the interests of comity and international relations, we remand for the development of an adequate record.

Congoleum Corporation holds American patents for the manufacture of chemically embossed vinyl floor covering and owns corresponding patents in some 26 foreign countries. Mannington Mills, Inc., too, is in the business of manufacturing flooring and is licensed to use the Congoleum patents in this country. Although Mannington claimed to have similar rights under the foreign patents, that contention was decided adversely in companion litigation, Mannington Mills, Inc. v. Congoleum Industries, Inc., 197 U.S.Pat.Q. 145 (D.N.J.1977), and Congoleum has instituted infringement suits against Mannington in New Zealand, Canada, Australia, and Japan.

In 1974, Mannington filed suit in the district court of New Jersey alleging, Inter alia, that Congoleum's licensing practices in the overseas markets violated *§ 2* of the Sherman Antitrust Act, *15 U.S.C. § 2*. Summary judgment on the antitrust claim was entered in favor of the defendant and the case is presently on appeal. Mannington **[**3]** had sought to amend its complaint in that suit by adding allegations of Congoleum's fraud in securing its foreign patents. The district court denied leave to amend the complaint as to this specific contention. Thereafter, Mannington filed the present action based on essentially the same grounds. The district court dismissed the complaint for failure to state a claim and also declined to exercise jurisdiction in a pendent state unfair competition count.

* Honorable Charles R. Weiner, United States District Court for the Eastern District of Pennsylvania, sitting by designation.

Mannington's complaint alleges that Congoleum made fraudulent representations to various foreign patent offices in the following general categories:

1. False statements about the reactions and performance of some of the chemical components of the vinyl flooring;
2. Misrepresentation of test data;
3. Suppression of information critical to the practice of the invention;
4. Misleading statements about the status and contents of the United States patent applications.

The complaint charges that Congoleum enforced the foreign patents by bringing and threatening the institution of infringements suits in foreign countries. This activity allegedly restrained the export trade of the United States by restricting **[**4]** the foreign business of Mannington and other American competitors in addition to demonstrating an intent to monopolize. Mannington asserts further that Congoleum's false claims of priority dates were in violation of the Paris Convention of March 20, 1883, As amended, (1962) 13 U.S.T. 1, and the Pan-American Convention of August 20, 1910, 38 Stat. 1811.

[*323]** The district court held that since no private right of action was set out in the treaties no relief could be granted. The antitrust count was dismissed on the grounds that the validity of the foreign patents was to be determined by the courts of the respective issuing nations and there was no necessity for American firms to apply for foreign patents in any way other than as established by the respective nations. The court stated that to enjoin Congoleum from enforcing its foreign patents in other nations against Mannington would violate the act of state doctrine.

Mannington emphasizes that it is not challenging the right of a foreign government to confer patents under its own requirements and indeed does not seek to have the patents at issue adjudged invalid. **[*1291]** Rather, its claims are said to arise out of **[**5]** breach of standards imposed by American law and thus are properly determinable in the district court. Mannington argues that use of the United States courts to resolve antitrust claims stemming from fraud in the procurement of patents abroad is consistent with the extraterritorial jurisdiction of the Sherman Act, and litigation in a single forum furthers judicial efficiency. Congoleum contends, however, that Mannington's theory for antitrust relief is barred by the act of state doctrine, and subjecting a putative patentee to United States standards for foreign patent procurement is an unwarranted extension of the antitrust laws.

I

JURISDICTION

We turn first to the question of jurisdiction. Both parties are subject to service of process in New Jersey and in personam jurisdiction is concededly present. What is at issue, however, is subject matter jurisdiction.

The challenge here is to conduct by an American corporation in a foreign country, arguably legal there, and the issue is whether that activity is answerable in the courts of the United States under the Sherman Act's broad and potentially far-reaching language. The extraterritorial application of the Act to "trade or commerce **[**6]** . . . with foreign nations" has been and continues to be the subject of lively controversy. See, e.g., Kintner & Griffin, Jurisdiction Over Foreign Commerce Under the Sherman Antitrust Act, 18 B.C.Ind. & Com.L.Rev. 199 (1977). Neither the Act nor its legislative history gives any clear indication of the scope of the extraterritorial jurisdiction conferred, leaving such determination to the courts. Id. at 200-19; See Ongman, "Be No Longer a Chaos:" Constructing a Normative Theory of the Sherman Act's Extraterritorial Jurisdictional Scope, 71 Nw. U.L. Rev. 733, 735-41 (1977).

Justice Holmes's opinion in *American Banana Co. v. United Fruit Co., 213 U.S. 347, 29 S. Ct. 511, 53 L. Ed. 826 (1909)*, cast doubt on the intent of Congress to extend the Sherman Act to action perpetrated beyond United States territory. Since then, however, the Supreme Court has made it clear that ***HN1***[] "foreign commerce" applies to importing, exporting, and other commercial transactions, as well as transportation and communication between the

United States and a foreign **[**7]** country. [1] Acts and agreements occurring outside the territorial boundaries of the United States that adversely and materially affect American trade are not necessarily immune from United States antitrust laws. *Timken Roller Bearing Co. v. United States, 341 U.S. 593, 71 S. Ct. 971, 95 L. Ed. 1199 (1951)*; *United States v. National Lead Co., 332 U.S. 319, 67 S. Ct. 1634, 91 L. Ed. 2077 (1947)*; *United States v. Sisal Sales Corp., 274 U.S. 268, 47 S. Ct. 592, 71 L. Ed. 1042 (1927)*; *Thomsen v. Cayser, 243 U.S. 66, 37 S. Ct. 353, 61 L. Ed. 597 (1917)*; *United States v. Pacific & Arctic Railway & Navigation Co., 228 U.S. 87, 33 S. Ct. 443, 57 L. Ed. 742 (1913)*.

[8]** In oft-quoted language, Judge Learned Hand in *United States v. Aluminum Co. of America (Alcoa), 148 F.2d 416, 443-45 (2d Cir. 1945)*, concluded that although Congress did not intend ***HN2***[] the Sherman Act to prohibit conduct having no effect in the United States, it did intend the Act to reach conduct having consequences within this country even where the parties concerned had no allegiance to the United States if the conduct is intended to and actually does **[*1292]** have an effect upon United States imports or exports. This wide-reaching "intended effects" test has been cited with approval by the Supreme Court. See, e.g., *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. **[***324]** 690, 705, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*. See also Restatement (Second) of the Foreign Relations Law of the United States § 18 (1965).

It can no longer be doubted that ***HN3***[] practices of an American citizen abroad having a substantial effect on American foreign commerce are subject to the **[**9]** Sherman Act. As was observed in *Steele v. Bulova Watch Co., 344 U.S. 280, 282, 73 S. Ct. 252, 254, 97 L. Ed. 319 (1952)*, a case involving trademark infringement under the Lanham Trade-Mark Act of 1946, *15 U.S.C. §§ 1051-1127*, "Congress in prescribing standards of conduct for American citizens may project the impact of its laws beyond the territorial boundaries of the United States." This view has been criticized because its failure to abide by the basic tenet that a nation's legislation is valid only in the territory it governs leads to unnecessary international friction. [2] Nevertheless, ***HN4***[] when two American litigants are contesting alleged antitrust activity abroad that results in harm to the export business of one, a federal court does have subject matter jurisdiction. *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*. Therefore, we are satisfied that the district court did have jurisdiction in this case.

[10]** II

ACT OF STATE

The defendant relies heavily upon the act of state doctrine but we conclude that it does not preclude adjudication of Mannington's claims. The doctrine is a policy of judicial abstention from inquiry into the validity of an act by a foreign government. The premise upon which it rests is that an act by the sovereign power of a foreign state or by its authorized agent in its own territory and within the scope and authority of the office cannot be questioned or made the subject of legal proceedings in our courts. Similar to, and thought to be derived from the concept of sovereign immunity, the act of state doctrine has a distinguishing characteristic in that it can be invoked as a defense by a private litigant.

In one of the earliest expressions of this doctrine, Chief Justice Fuller in *Underhill v. Hernandez, 168 U.S. 250, 252, 18 S. Ct. 83, 84, 42 L. Ed. 456 (1897)* said: **[**11]**

---

[1] For commentary on the implications and erosion of the American Banana view of jurisdiction, See Fortenberry, Jurisdiction Over Extraterritorial Antitrust Violations Paths Through the Great Grimpen Mire, 32 Ohio St.L.J. 519, 523-31 (1971); Fugate, Antitrust Jurisdiction and Foreign Sovereignty, 49 Va.L.Rev. 925, 926-35 (1963); Kintner & Griffin, Supra at 204-12; Raymond, The Exercise of Concurrent Jurisdiction: "Move with Circumspection Appropriate," 8 B.C.Ind. & Com.L.Rev. 673, 683-89 (1967); Note, Sherman Act Jurisdiction and the Acts of Foreign Sovereigns, 77 Colum.L.Rev. 1247, 1249-50 & n. 12 (1977); Comment, Extraterritorial Application of the Antitrust Laws: A Conflict of Laws Approach, 70 Yale L.J. 259, 260-64 (1960).

[2] See Fortenberry, Paths Through the Great Grimpen Mire, Supra at 531-38; Raymond, "Move with Circumspection Appropriate," *Supra at 683-89*; Note, Sherman Act Jurisdiction and the Acts of Foreign Sovereigns, Supra at 1250 & nn.14-15; Comment, Extraterritorial Application of the Antitrust Laws: A Conflict of Laws Approach, Supra at 259-64.

> "Every sovereign State is bound to respect the independence of every other sovereign State, and the courts of one country will not sit in judgment on the acts of the government of another done within its own territory."

In later years, there was a shift in focus from the notions of sovereignty and the dignity of independent nations recognized in Underhill and in *American Banana Co. v. United Fruit Co., supra*, to concerns for preserving the "basic relationships between branches of government in a system of separation of powers," and not hindering the executive's conduct of foreign policy by judicial review or oversight of foreign acts. *Banco Nacional de Cuba v. Sabbatino, 376 U.S. 398, 423, 84 S. Ct. 923, 938, 11 L. Ed. 2d 804 (1964)*. Another more recent view is that the doctrine is based on notions of comity and a conflict of laws theory that foreign law is to be accepted as the rule of decision in passing upon acts occurring within the foreign power's jurisdiction. Note, Sherman Act Jurisdiction and the Acts of Foreign Sovereigns, 77 Colum.L.Rev. 1247, 1255 & n.36 (1977).

But whatever its theoretical foundation, by precluding **[**12]** inquiry into the validity of a foreign sovereign's ***HN5***[] act, the doctrine requires American courts to reject private claims based on the contention that the **[*1293]** damaging act of another nation violates either American or international law. [3] That preclusion is not lightly to be imposed and to determine whether the act of state doctrine applies in a given factual context, the court must analyze the nature of the questioned conduct and the effect upon the parties in addition to appraising the sovereign's role. See Restatement (Second) of Foreign Relations Law, Supra § 41, Comment d.

[13]** Cases involving confiscatory measures taken by foreign sovereigns provided the first opportunities to apply the doctrine and until recent years courts seldom referred to the subject in antitrust litigation. Timberg, Sovereign Immunity and Act of State Defenses: Transnational Boycotts and Economic Coercion, 55 Texas L.Rev. 1 (1976); See also Note, 69 Mich.L.Rev. 888 (1971). In the typical confiscation situation based on a foreign state's expropriation of property rights or its repudiation of contractual **[***325]** obligations, only private rights are sought to be vindicated. In antitrust litigation, however, in addition to claims of private injury, there is a public interest in clearing monopolistic activities from the channels of American commerce.

Similar in effect but somewhat conceptually distinct is the defense of foreign compulsion which shields from antitrust liability the acts of parties carried out in obedience to the mandate of a foreign government. The sovereign **[**14]** compulsion defense is not principally concerned with the validity or legality of the foreign government's order, but rather with whether it compelled the American business to violate American ***antitrust law***. Thus, in *Interamerican Refining Corp. v. Texas Maracaibo, Inc., 307 F. Supp. 1291 (D.Del.1970)*, the defendant was held not responsible for a boycott forced upon it by the Venezuelan government. See Michigan Note, Supra ; Note, Export Policy, Antitrust and the Arab Boycott, 51 N.Y.U.L.Rev. 94, 125-31 (1976). See also Fugate, Antitrust Jurisdiction and Sovereign Immunity, 49 Va.L.Rev. 925, 934-37 (1963); Antitrust Division, U.S. Dept. of Justice, Antitrust Guide for International Operations (Jan. 26, 1977) (Antitrust Guide). One asserting the defense must establish that the foreign decree was basic and fundamental to the alleged antitrust behavior and more than merely peripheral to the overall illegal course of conduct. In *United States v. Sisal Sales Corp., supra*, for example, the Court concluded that Mexican legislation solicited **[**15]** by American banks to facilitate the establishment of a cartel that monopolized United States imports was not a sufficiently coercive act by a foreign government to justify the banks' Sherman Act violations. In that instance, foreign governmental activity was in reality involvement arranged by the defendants rather than independently conceived legislation directed toward an essential part of the violations.

HN6[] Where the governmental action rises no higher than mere approval, the compulsion defense will not be recognized. It is necessary that foreign law must have coerced the defendant into violating American ***antitrust law***. *Continental Ore Co. v. Union Carbide & Carbon Corp., supra*; *Timberlane Lumber Co. v. Bank of America, 549 F.2d 597 (9th Cir. 1976)*. The defense is not available if the defendant could have legally refused to accede to the foreign power's wishes, *United States v. Watchmakers of Switzerland Information Center, Inc., 1963 Trade Cases (CCH) P*

---

[3] See generally Golbert & Bradford, The Act of State Doctrine: Dunhill and Other Sabbatino Progeny, 9 Sw.L.Rev. 1 (1977); Zander, The Act of State Doctrine, 53 Am.J.Int'l L. 826 (1959); Note, Sherman Act Jurisdiction and the Acts of Foreign Sovereigns, Supra.

70,600 (S.D.N.Y.1962), Order modified, *1965 Trade Cases (CCH) P 71,352 (S.D.N.Y.1965)*. **[**16]** See W. Fugate, Foreign Commerce and the Antitrust Laws 75-82 (rev. ed. 1973).

The defendant here contends that, whether valid or invalid, the grants of foreign patents could be accomplished only by affirmative governmental actions and therefore are acts of state which American courts are not free to examine. ***HN7***[] We are unable to accept the proposition that the mere issuance of patents by a foreign power **[*1294]** constitutes either an act of state, as that term has developed under case law, or an example of governments' compulsion.

There is no allegation of collusion with foreign governments in securing the patents, nor was the defendant compelled to refuse a license to the plaintiff. See, e. g., *Continental Ore Co. v. Union Carbide & Carbon Corp., supra, 370 U.S. at 706, 82 S. Ct. 1404*; *Occidental Petroleum Corp. v. Buttes Gas & Oil Co., 331 F. Supp. 92 (C.D.Cal.1971)*, Aff'd per curiam, *461 F.2d 1261* (9th Cir.), Cert. denied, *409 U.S. 950, 93 S. Ct. 272, 34 L. Ed. 2d 221 (1972)*. Thus, ***HN8***[] by issuance of the patents per se, the foreign governments did not force the defendant to exclude the plaintiff from the foreign markets and **[**17]** the defense of compulsion is not available.

The case Sub judice also fails to fall within the more traditional applications of the act of state doctrine. The grant of a patent is quite different from an act of expropriation by a government. See *Banco Nacional de Cuba v. Sabbatino, supra*; *American Banana Co. v. United Fruit Co., supra*; *Hunt v. Mobil Oil Corp., 550 F.2d 68* (2d Cir.), Cert. denied, *434 U.S. 984, 98 S. Ct. 608, 54 L. Ed. 2d 477 (1977)*. In those instances, moreover, the crucial acts occurred as a result of a considered policy determination by a government to give effect to its political and public interests matters that would have significant impact on American foreign relations. See Restatement (Second) of Foreign Relations Law, Supra § 41. Those situations may be distinguished from the failure to pay an ordinary commercial debt, *Alfred Dunhill of London, Inc. v. Republic of Cuba, 425 U.S. 682, 695-97, 96 S. Ct. 1854, 48 L. Ed. 2d 301 (1976)* (plurality opinion) or the determination of a security interest in litigation between private parties in a foreign nation's court. *Timberlane Lumber Co. v. Bank of America, supra at 605-08*. **[**18]** In each of the foregoing instances, an act of state defense was denied. [4] See also *United States **[***326]** v. Imperial Chemical Industries, Ltd., 100 F. Supp. 504 (S.D.N.Y.1951)* (patent rights).

[19]** The grant of patents for floor coverings is not the type of sovereign activity that would be of substantial concern to the executive branch in its conduct of international affairs. Although enforcement of a decree in the present litigation may possibly present problems of international relations, as will be discussed Infra, ***HN9***[] the granting of the patents per se, in substance ministerial activity, is not the kind of governmental action contemplated by the act of state doctrine or its correlative, foreign compulsion. We conclude, therefore, that the asserted act of state defense does not support dismissal of plaintiff's complaint and it does not apply to the patents issued in the foreign countries.

III

COMITY, ABSTENTION AND INTERNATIONAL REPERCUSSIONS

---

[4] The Foreign Sovereign Immunities Act of 1976, *28 U.S.C. §§ 1602-1611*, distinguishes between public acts and commercial dealings of foreign nations and excludes the latter from the scope of sovereign immunity in American courts. See also Kintner & Griffin, Supra at 237; Note, Sherman Act Jurisdiction and the Acts of Foreign Sovereigns, Supra at 1253-58; Comment, Extraterritorial Application of the Antitrust Laws: A Conflict of Laws Approach, Supra at 270-72. The legislation effectively narrows the scope of sovereign immunity, a step which was unable to command a majority of the court as to the act of state doctrine in *Alfred Dunhill of London, Inc. v. Republic of Cuba, supra.* Congressional opposition to the Sabbatino opinion, however, led to the adoption of the Hickenlooper amendment to the Foreign Assistance Act of 1964, *22 U.S.C. § 2370(e)(2)*, which severely restricts application of the doctrine Inter alia in the case of a foreign confiscation or taking after January 1, 1959 and in violation of the principles of international law, unless the President determines that the doctrine's application is required in a particular case and so indicates. See Golbert & Bradford, The Act of State Doctrine: Dunhill and Other Sabbatino Progeny, Supra at 27-33.

Having concluded that the act of state doctrine is not applicable in these circumstances and that there is subject matter jurisdiction, the question remains whether jurisdiction should be exercised. Cf. *SEC v. Kasser, 548 F.2d 109* (3d Cir.), Cert. denied, *431 U.S. 938, 97 S. Ct. 2649, 53 L. Ed. 2d 255* ***[*1295]*** *(1977)*; *Straub v. Vaisman & Co., 540 F.2d 591 (3d Cir. 1976)*. See also Beausang, **[**20]** The Extraterritorial Jurisdiction of the Sherman Act, 70 Dick.L.Rev. 187 (1966); Ongman, "Be No Longer A Chaos," supra.

Some analysis of the plaintiff's position is helpful in identifying the considerations bearing on this issue. Essentially, the plaintiff seeks to extend the doctrine of *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*, a case alleging a domestic patent antitrust violation, to an international setting. In Walker, the Supreme Court held that a company which had engaged in monopolistic activity was subject to Sherman Act liability when the conduct had been carried on under the shield of a patent obtained from the United States Patent Office by intentional fraud. The Court observed that ***HN10***[] a patent provides an exception to the general rule against monopolies but proof of knowing and wilful misrepresentation of facts to the patent office strips the patentee of its exemption. In that event, if the plaintiff can prove the other elements of a Sherman Act *§ 2* violation in addition **[**21]** to invalidity of the patent, then it is entitled to recover treble damages.

Mannington seeks to apply the same rationale here, although it is not attacking Congoleum's American patents but only its corresponding ones abroad. Mannington asserts that it need not prove the invalidity of the foreign patents under the issuing countries' laws. It argues that they were obtained by conduct considered fraudulent under American law and would expose Congoleum to antitrust liability in this country if domestic patents were at issue. Therefore, says Mannington, it is not necessary to examine the patent law of 26 foreign countries to determine if the Congoleum patents are valid there.

Walker, of course, did not go so far. It held only that a patent invalid under American law because of fraud may expose the defendant to American antitrust penalties. [5] Mannington urges that a patent, even **[***327]** though valid under the law of a foreign nation, cannot act as an exemption for antitrust liability if procured by conduct unacceptable by American standards. Mannington would hold Congoleum liable for its activity **[**22]** abroad that impaired plaintiff's foreign business or barred it from competition in a nation altogether. In short, Mannington presses us to apply the same reach to the Sherman Act as did the Court to the Lanham Act in *Steele v. Bulova Watch Co., supra.* In that case, an American company sued an American citizen in a United States court alleging that the use of a trademark registered in Mexico and imprinted there on articles, some of which found their way to the United States, violated United States law. Before the case reached the Supreme Court, however, the Mexican government nullified its registration. As the Court acknowledged:

[23]**

> "(T)here is thus no conflict which might afford petitioner a pretext that such relief would impugn foreign law. The question, therefore, whether a valid foreign registration would affect either the power to enjoin or the propriety of its exercise is not before us. Where, as here, there can be no interference with the sovereignty of another nation, the District Court in exercising its equity powers may command persons properly before it **[*1296]** to cease or perform acts outside its territorial jurisdiction." *Id. at 289, 73 S. Ct. at 257*.

If it be assumed that the foreign patents are invalid under the issuing countries' laws because of intentional fraud, then it would seem proper to extend Walker to cover the situation, at least in the absence of antitrust legislation in

---

[5] One commentator has suggested that a different approach may be appropriate in considering foreign statutes.

"Prevention of fraudulent acquisition of patent rights may be more important under United States law than under foreign law, because once the right is established we generally do not police profits, and we generally do not require licensing . . . . Since we do neither of those things, and thus essentially allow a monopoly return to the inventor of a product of commercial significance, it becomes very important to determine whether the patent was valid in the first place. Because of this, we have additional engraftings on the element of validity. One enlargement . . . is the doctrine that fraudulently obtaining a patent is an antitrust violation a monopolization or an attempt to monopolize." Davidow, United States Antitrust Laws and International Transfers of Technology The Government View, 43 Fordham L. Rev. 733, 735 (1975).

the foreign nation. But Mannington's position requires that we take as a premise that patents are enforceable in the foreign countries and that the fraud, perhaps because of irrelevance to foreign patent requirements or of inability to satisfy a "but for" test, See e.g., *Corning Glass Works v. Anchor Hocking Glass Corp., 253 F. Supp. 461 (D.Del.1966)*, Rev'd on other grounds, *374 F.2d 473* **[**24]** (3d Cir.), Cert. denied, *389 U.S. 826, 88 S. Ct. 65, 19 L. Ed. 2d 80 (1967)*, is insufficient under foreign law to constitute grounds for invalidity.

In addition to treble damages, Mannington asks that Congoleum be enjoined from enforcing these hypothetically valid patents in the foreign jurisdictions. Obviously, some potential for conflict with the policy of foreign nations is present in both forms of relief.

A judgment against Congoleum in this country would have direct and ripple effects abroad. It is not unusual for other nations to condition the issuance of patents upon certain requirements, E.g., that the article be manufactured in that country; that it be actively "worked"; or that licenses be restricted in various ways, or at the other extreme, be compulsory. It may be also that some nations might require that the patent be enforced. Nationals may be preferred over foreigners or patent laws may have been designed to develop the technical know-how of an underdeveloped country. See Wayman, Patent Protection in International Business Transactions, 45 Den. L.J. 64 (1968). Many of these policies could be frustrated by a decree of an American court **[**25]** which, in effect, declares the foreign patent invalid both by American standards and as it may affect American commerce.

This may, indeed, be a situation where the consequences to the American economy and policy permit no alternative to firm judicial action enforcing our antitrust laws abroad. But before that step is taken, there should be a weighing of competing interests.

The antitrust statutes enacted by Congress commit this country to the free enterprise system and the exercise of open competition. If an American company is excluded from competition in a foreign country by fraudulent conduct on the part of another American company, then our national interests are adversely affected. In a purely domestic situation, the right to a remedy would be clear. When foreign nations are involved, however, it is unwise to ignore the fact that foreign policy, reciprocity, comity, and limitations of judicial power are considerations that should have a bearing on the decision to exercise or decline jurisdiction. [6]

[26]** Some decisions of American courts have been criticized for failure to adequately **[***328]** assess these concerns. In *United States v. Imperial Chemical Industries, Ltd., 105 F. Supp. 215 (S.D.N.Y.1952)*, the court obtained personal jurisdiction over a British defendant, I.C.I., in an antitrust case. As part of the remedy, the court ordered I.C.I. to divest itself of certain patents which it had received from an American defendant, DuPont Company. However, I.C.I. was already under contract to grant exclusive licenses for these patents to another British company, British Nylon Spinners, Ltd., which was not before the American court. **[*1297]** The contract being legal and enforceable in England, a court there prohibited I.C.I. from parting with the patents and required it to keep its agreement with British Nylon Spinners, Ltd. In the course of its opinion, the British court commented pointedly:

> "Applied conversely, I conceive that the American courts would likewise be slow (to say the least) to recognise an assertion on the part of the British courts of jurisdiction extending, in effect, to the business affairs of persons and corporations in the United States." British Nylon Spinners, Ltd. v. Imperial Chemical Industries, Ltd., (1953) 1 Ch. 19, 24 **[**27]** (C.A.), Made permanent, (1955) 1 Ch. 37.

---

[6] The Antitrust Guide, Supra, takes the position that:

"(C)onsiderations of jurisdiction, enforcement policy, and comity often, but not always, lead to the same conclusion: ***HN11***[] the United States antitrust laws should be applied to an overseas transaction when there is a substantial and foreseeable effect on the United States commerce; and, consistent with these ends, it should avoid unnecessary interference with the sovereign interests of foreign nations." Antitrust Guide, Supra at 6-7, Quoted in Fugate, The Department of Justice's Antitrust Guide for International Operations, 17 Va.J.Int'l L. 645, 653 (1977).

In other cases, orders by American courts directed to foreign countries to produce their records in this country have provoked protest and specific prohibitory legislation from those nations. See *In re Grand Jury Subpoena Duces Tecum Addressed to the Canadian International Paper Co., 72 F. Supp. 1013 (S.D.N.Y.1947)*; Raymond, "Move with Circumspection Appropriate," supra; Cf. *Societe Internationale v. Rogers, 357 U.S. 197, 78 S. Ct. 1087, 2 L. Ed. 2d 1255 (1958)*; *Ohio v. Arthur Andersen & Co., 570 F.2d 1370* (10th Cir.), Cert. denied, *439 U.S. 833, 99 S. Ct. 114, 58 L. Ed. 2d 129 (1978)*; Note, Foreign Nondisclosure Laws and Domestic Discovery Orders in Antitrust Litigation, 88 Yale L.J. 612 (1979).

The decision in *Zenith Radio Corp. v. Hazeltine Research, Inc., supra*, caused serious misgivings in Canada. See Comment, American Antitrust Laws and Canadian Patent Rights, 118 U.Pa.L.Rev. 983 (1970).

Some courts have exhibited a greater sensitivity to principles of international comity. For example, in *United States v. General Electric Co., 82 F. Supp. 753 (D.N.J.1949)*, **[**28]** Opinion on remedies, *115 F. Supp. 835 (D.N.J.1953)*, then District Judge Forman inserted a savings clause in his order so as not to place the defendant in violation of laws in foreign countries where it carried on business. Cf. *Vanity Fair Mills, Inc. v. T. Eaton Co., 234 F.2d 633* (2d Cir.), Cert. denied, *352 U.S. 871, 77 S. Ct. 96, 1 L. Ed. 2d 76 (1956)* (court interpreted *Steele v. Bulova Watch Co., supra*, as applying to conduct of its citizens in foreign countries when the rights of other nations or their nationals are not infringed).

In eschewing a provincial approach, these latter cases, in our view, best reflect the realities of international commerce. Courts should not shrink from their duty because of an inability by the affected parties to reach a consensus. Enough has been said, however, to demonstrate the appropriateness of a recent commentary made in another context: "Perhaps the one point that deserves to be stressed for the future is that the substantive antitrust analysis must not be applied mechanically where foreign contacts are involved not even in the so called per se area. More subtlety is required . . . ." I P. Areeda **[**29]** & D. Turner, ***Antitrust Law*** § 240 at 278 (1978).

In *Timberlane Lumber Co. v. Bank of America, supra at 614-15*, the Court of Appeals for the Ninth Circuit adopted a balancing process ***HN12***[] in determining whether extraterritorial jurisdiction should be exercised, an approach with which we find ourselves in substantial agreement. The factors we believe should be considered include:

1. Degree of conflict with foreign law or policy;
2. Nationality of the parties;
3. Relative importance of the alleged violation of conduct here compared to that abroad;
4. Availability of a remedy abroad and the pendency of litigation there;
5. Existence of intent to harm or affect American commerce and its foreseeability;
6. Possible effect upon foreign relations if the court exercises jurisdiction and grants relief; [7]

[30]**

[*1298] 7. If relief is granted, whether a party will be placed in the position of being forced to perform an act illegal in either country or be under conflicting requirements by both countries;
8. Whether the court can make its order effective;
9. Whether an order for relief would be acceptable in this country if made by the foreign nation under similar circumstances;
10. Whether a treaty with the affected nations has addressed the issue.

---

[7] **[***329]** We note the suggestion in the concurring opinion that problems regarding the formulation of relief can be dealt with at a subsequent stage of the litigation. That may be possible in some cases. Once the trial court has had an opportunity to evaluate the effects of possibly countervailing interests and policies based on a record presented with a view toward addressing these issues, it may well determine that exercise of jurisdiction is appropriate and that a remedy tailored to meet incidental enforcement problems can be designed. But in our view, the record on this 12(b)(6) dismissal is inadequate to allow a reasoned decision on that issue as well as the others we have enumerated.

The record in this case is not adequate to allow a reasoned decision on these highly complex issues even if only one foreign nation were involved rather than 26. Moreover, we do not believe that the extensive inquiry required must yield the same answer in each instance. The legislation and policy of each nation is not likely to be the same, nor is it probable that the effect upon commerce in each instance will be as substantial as others. Although the plaintiff would prefer to have the matter resolved as a unitary one, that cannot be done when the individual interests and policies of each of the foreign nations differ and must be balanced against our nation's legitimate interest in regulating anticompetitive **[**31]** activity.

We conclude, therefore, that it was error to dismiss the plaintiff's complaint without preparation of a record which will allow an evaluation of the factors counseling for or against the exercise of jurisdiction.

IV

TREATY COUNT

In the third count of its complaint, the plaintiff alleges that treaties to which the United States is a party, the Paris Convention of March 20, 1883, as amended, and the Pan-American Convention of August 20, 1910, were violated by the defendant. Mannington asserts that it is a "person" enjoying rights under the treaties and has been harmed by the defendant's use of false claims of priority dates in prosecuting patents. The district court dismissed this count of the complaint on the ground that the treaties do not provide a private right of action.

A treaty of the United States is a contract with another nation which becomes the law of this country. *U.S.Const. art. VI, cl. 2*; *Dreyfus v. Von Finck, 534 F.2d 24, 29* (2d Cir.), Cert. denied, *429 U.S. 835, 97 S. Ct. 102, 50 L. Ed. 2d 101 (1976)*. Like private rights under **[**32]** law, a treaty may confer rights capable of enforcement. *Z. & F. Assets Realization Corp. v. Hull, 72 App.D.C. 234, 240, 114 F.2d 464, 470*, (D.C. Cir.) Aff'd on other grounds, *311 U.S. 470, 61 S. Ct. 351, 85 L. Ed. 288 (1941)*, but this is not the general rule. As the Court explained in Head Money Cases (Edye v. Robertson), *112 U.S. 580, 598-99, 5 S. Ct. 247, 254, 28 L. Ed. 798 (1884)*:

> "A treaty, then, is a law of the land as an act of Congress is, whenever its provisions prescribe a rule by which the rights of the private citizen or subject may be determined."

Thus, ***HN13***[] unless a treaty is self-executing, it must be implemented by legislation before it gives rise to a private cause of action. *Diggs v. Richardson, 180 U.S.App.D.C. 376, 555 F.2d 848 (D.C. Cir. 1976)*; *Dreyfus v. Von Finck, supra.*

Mannington has pointed to neither self-executing provisions of the treaty nor implementing legislation. On examining Article 17 of the Paris Convention, however, we find an expression contrary to the concept of a private **[**33]** right of action. It reads:

> "Every country party to this Convention undertakes to adopt, in accordance with its constitution, the measures necessary to insure the application of this Convention."
>
> **[*1299]** "It is understood that at the time an instrument of ratification or accession is deposited on behalf of a country, such country will be in a position under its domestic law to give effect to the provisions of this Convention." (1962) 13 U.S.T. 1, 41.

Similarly, Article IX of the Pan-American Convention states:

> "Persons who incur civil or criminal liabilities, because of injuries or damages to the rights of inventors, shall be prosecuted and punished, in accordance with the laws of the countries wherein the offense has been committed or the damage occasioned." 38 Stat. 1815.

Both treaties, therefore, are at odds with a contention that they are self-executing. Finding no indication that a private right of action was conferred by the treaties, we conclude that the district court did not err in dismissing Count III of the complaint.

Inasmuch **[**34]** as the state unfair competition claim was dismissed because no federal causes of action were found to exist, the district court should be free to reconsider that count if it decides it should exercise jurisdiction under the antitrust claims. Accordingly, **[***330]** the unfair competition count will also be remanded.

The judgment of the district court dismissing Count III of the complaint will be affirmed. The judgment dismissing Counts I and II will be vacated and the matter remanded to the district court for further proceedings consistent with this opinion. Both parties to bear their own costs.

Concur by: ADAMS

Concur

ADAMS, Circuit Judge, concurring.

I join in Parts II and IV of the majority opinion, which hold, respectively, that the act of state doctrine does not preclude adjudication of Mannington's antitrust claim and that the treaties of 1883 and 1910 do not provide Mannington a private right of action. The approach I take to Mannington's antitrust claim diverges substantially, however, from that taken by the majority and I therefore write separately on that matter.

My differences with the majority regarding Mannington's basic claim are threefold. First, I believe that the rationale **[**35]** of Walker Process is applicable to the fraudulent procurement of foreign patents and that therefore Mannington's complaint has set forth a claim upon which relief can be granted. Second, I do not agree that a court may conclude that it is invested with subject-matter jurisdiction under the Sherman Act but may nonetheless abstain from exercising such jurisdiction in deference to considerations of international comity; rather, it seems that those considerations are properly to be weighed at the outset when the court determines whether jurisdiction vel non exists, or in fashioning the decree. Third, it appears evident that notwithstanding the foreign elements involved, jurisdiction exists in the present case, and that possible repercussions abroad should be examined by the court when and if it formulates a remedy.

Apart from my disagreement on specific points, it appears that the majority is influenced to some extent by Congoleum's contention that this claim is really a conglomeration of twenty-six distinct, foreign patent fraud suits and that therefore Mannington should be relegated to the courts of the various foreign countries for vindication of its rights. Admittedly, Mannington's **[**36]** complaint presents a complex and novel problem regarding the proper accommodation between American antitrust and foreign patent laws as they relate to the fraudulent procurement of foreign patents. Conceivably Mannington could have sued in the courts of each country to invalidate Congoleum's patents, but it chose not to do so. Mannington does not denominate this lawsuit as one for patent fraud, nor does it seek to have any of the foreign patents declared invalid. Instead, its claim is grounded on an alleged infraction of *§ 2* of the Sherman Act, and it must therefore be treated as such.

Accordingly, Mannington's complaint should be analyzed, as I view it, by engaging in a dual inquiry into first, whether the challenged conduct affects "commerce . . . with foreign nations" so as to be within the **[*1300]** jurisdictional scope of the Sherman Act, and second, whether there is a monopolization or attempted monopolization of trade or commerce so as to be violative of the Act. Although these are separate questions, courts have generally recognized, albeit in other contexts, that a final determination as to the existence of subject-matter jurisdiction must often await some clarification **[**37]** of the substantive offense. [1] This interrelationship between the jurisdictional and substantive issues seems to be borne out in the present case, where an understanding of the substantive offense sheds light on whether jurisdiction exists.

---

[1] See, e. g., *Mortensen v. First Federal Savings and Loan Association, 549 F.2d 884, 890-98 (3d Cir. 1977)* (dismissal of suit charging violation *§ 1* of the Sherman Act for want of subject-matter jurisdiction was held to be premature because same facts are relevant for ascertaining jurisdiction as well as the substantive offense). See also Ongman, "Be No Longer a Chaos": Constructing a Normative Theory of the Sherman Act's Extraterritorial Jurisdictional Scope, 71 Nw.U.L.Rev. 733, 733-735 (1977).

In essence, Mannington alleges that Congoleum set out to monopolize the foreign trade relating to chemically embossed vinyl floor covering by fraudulently securing patents in twenty-six foreign countries, thereby giving Congoleum the power to prevent **[**38]** American competitors from shipping such material to purchasers in those countries. That Mannington's allegation states a claim under *§ 2* of the Sherman Act is, I believe, a necessary inference from *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp., 382 U.S. 172, 86 S. Ct. 347, 15 L. Ed. 2d 247 (1965)*. There, the Supreme Court addressed one facet of the tension that exists between the Sherman Act, which outlaws monopolies, and United States patent law, which creates "an exception to the general rule against monopolies and to the right to access to a free and open market." [2] Seeking to reconcile the differing **[***331]** policies of the patent and antitrust laws, the Court held that a patentee is stripped of its exemption from the antitrust laws when it obtains its patent by knowingly and willfully misrepresenting facts to the patent office. As explained by Justice Harlan in his concurring opinion,

> **[**39]** To hold, as we do, that private suits may be instituted under § 4 of the Clayton Act To recover damages for Sherman Act monopolization knowingly practiced under the guise of a patent procured by deliberate fraud, cannot well be thought to impinge upon the policy of the patent laws to encourage inventions and their disclosure. Hence, As to this class of improper patent monopolies, antitrust remedies should be allowed room for full play. [3]

Thus, the Supreme Court has declared that the fraudulent procurement of a patent may properly be viewed from the vantage point of antitrust regulation as well as from the perspective of possible patent invalidity, and that monopolistic conduct is not sheltered from the purview of the antitrust laws merely because it involves the fraudulent procurement of patent rights. This underlying rationale of Walker Process appears to be just as applicable to monopolization through the fraudulent acquisition of foreign patents as it is to monopolization through the fraudulent acquisition of **[**40]** United States patents. And, in the words of Justice Harlan, "as to this class of improper patent monopolies, antitrust remedies should be allowed room for full play." [4]

[41] [*1301]** With this understanding of the substantive offense charged, we may now turn to the question whether there is a monopolization of "trade or commerce . . . with foreign nations" so as to invest the federal courts with subject-matter jurisdiction. Although the test for subject-matter jurisdiction has traditionally been framed in terms of whether there is an actual or intended effect upon foreign commerce, [5] it has also been recognized that

---

[2] *Walker Process, supra, 382 U.S. at 177, 86 S. Ct. 347*, Quoting *Precision Instrument Mfg. Co. v. Automotive Maintenance Machinery Co., 324 U.S. 806, 816, 65 S. Ct. 993, 89 L. Ed. 1381 (1945)*.

[3] *382 U.S. at 179-80, 86 S. Ct. at 351*. (emphasis added).

[4] Id. Concededly, it may be that unlike fraudulently procured American patents, a number of foreign patents will remain valid under foreign law notwithstanding their fraudulent procurement. But that does not appear relevant to the question whether the holder of such a foreign patent has monopolized trade in violation of the Sherman Act. However, as discussed in the text Infra, the continued validity of a foreign patent may have some bearing on the formulation of an antitrust remedy.

The majority opinion appears to sidestep the question whether Walker Process applies to the fraudulent procurement of a foreign patent, but cites one commentator who suggests that Walker Process should be limited to situations involving United States patents. *Supra at pp. 1295-1296* & n. 5. The reason advanced for such a limitation is that American patents are unique in that it is very important to determine at the outset whether an American patent is valid, because we do not police profits or require licensing, thereby making it necessary to have "additional engraftings on the elements of validity," including "the doctrine that fraudulently obtaining a patent is an antitrust violation." Such an "engrafting" is unnecessary, it is asserted, with respect to foreign patents. It would seem, however, that this argument is flawed in that it subordinates the Sherman Act to patent law policies; it implies that Walker Process was a special enlargement of the antitrust laws designed to deal with the problem of identifying invalid patents, instead of recognizing that Walker Process merely removed the limited patent exception to the antitrust laws in those circumstances where a patent has been obtained by deliberate fraud.

"anything that affects the external trade and commerce of the United States also affects the trade and commerce of other nations, and may have far greater consequences for others than for the United States." [6] Thus, Judge Learned Hand, when first formulating the "effects" test, observed:

> **[**42]** (W)e are not to read general words, such as those in this Act, without regard to the limitations customarily observed by nations upon the exercise of their powers; limitations which generally correspond to those fixed by the "Conflict of Laws." We should not impute to Congress an intent to punish all whom its courts can catch, for conduct which has no consequence within the United States. [7]

A "jurisdictional rule of reason," [8] incorporating concepts from conflicts of laws, has therefore emerged, though admittedly this approach has not always been given explicit recognition in the cases. The appropriate approach has been articulated most precisely in *Timberlane **[***332]** Lumber Co. v. Bank of America, N. T. & S. A., 549 F.2d 597 (9th Cir. 1972)*:

> **[**43]** A tripartite analysis seems to be indicated. As acknowledged above, the antitrust laws require in the first instance that there be Some effect actual or intended on American foreign commerce before the federal courts may legitimately exercise subject matter jurisdiction under those statutes. Second, a greater showing of burden or restraint may be necessary to demonstrate that the effect is sufficiently large to present a cognizable injury to the plaintiffs and, therefore, a civil Violation of antitrust laws. *Occidental Petroleum, 331 F. Supp. at 102-03*; Beausang, The Extraterritorial Jurisdiction of the Sherman Act, 70 Dick.L.Rev. 187, 191 (1966). Third, there is the additional question which is unique to the international setting of whether the interests of, and links to, the United States including the magnitude of the effect on American foreign commerce are sufficiently strong, vis-a-vis those of other nations, to justify an assertion of extraterritorial authority. [9]

[44]** **[*1302]** The third leg of the jurisdictional test reflects, of course, the principle expressed in the Restatement (Second) of Foreign Relations Law of the United States § 40:

---

[5] See generally *Timberlane Lumber Co. v. Bank of America, N. T. & S. A., 549 F.2d 597, 609-12 (9th Cir. 1976)*; Kintner & Griffin, Jurisdiction Over Foreign Commerce Under the Sherman Antitrust Act, 18 B.C.Ind. & Comm.L.Rev. 199 (1977).

[6] *Timberlane, supra, 549 F.2d at 611*, Quoting Katzenbach, Conflicts on an Unruly Horse, 65 Yale L.J. 1087, 1150 (1956).

[7] *United States v. Aluminum Co. of America, 148 F.2d 416, 443 (2d Cir. 1945)*.

[8] See K. Brewster, Antitrust and American Business Abroad 446 (1958).

[9] *549 F.2d at 613*. See also *Pacific Seafarers, Inc. v. Pacific Far East Line, Inc., 131 U.S.App.D.C. 226, 236-37, 404 F.2d 804, 814-15 (1968)*, Cert. denied, *393 U.S. 1093, 89 S. Ct. 872, 21 L. Ed. 2d 784 (1969)*. The majority apparently is of the view that the existence of jurisdiction is to be determined solely under an "effects" standard, but that a court may then decline to exercise jurisdiction because of considerations of international comity. As I understand it, however, a court may not abstain where jurisdiction properly lies unless abstention is warranted under a recognized abstention doctrine. See, e. g., *McClellan v. Carland, 217 U.S. 268, 281, 30 S. Ct. 501, 54 L. Ed. 762 (1910)*; *Cohens v. Virginia, 19 U.S. (6 Wheat.) 264, 404, 5 L. Ed. 257 (1821)* ("It is most true, that this court will not take jurisdiction if it should not: but it is equally true that it must take jurisdiction, if it should. . . . We have no more right to decline the exercise of jurisdiction which is given, than to usurp that which is not given.") See generally P. Bator, P. Mishkin, D. Shapiro & H. Wechsler, Hart and Wechsler's The Federal Courts and the Federal System, 1258-59 (2d ed. 1973). And to my knowledge no abstention doctrine exists with respect to considerations of international comity. Rather, as Timberlane and Pacific Seafarers demonstrate, such considerations have been incorporated into an expanded jurisdictional test.

> Where two states have jurisdiction to prescribe and enforce rules of law and the rules they may prescribe require inconsistent conduct upon the part of a person, each state is required by international law to consider, in good faith, moderating the exercise of its enforcement jurisdiction, in the light of (various factors) . . . .

It is important to note, however, that this concern for international comity does not require that the Sherman Act, or any other statute, not be enforced extraterritorially whenever a party's conduct is also subject to regulation by a foreign government. It is only when foreign law requires conduct Inconsistent with that mandated by the Sherman Act that problems of international comity become significant. And even in such circumstances, it is recognized that extraterritorial jurisdiction may be asserted if the relevant factors, some of which are enumerated in the majority opinion, weigh in favor of the exercise of jurisdiction.

Relating this jurisdictional **[**45]** test to the present case, it is manifest that jurisdiction exists because there is no indication that Congoleum was conforming to a rule of conduct prescribed by foreign law when it allegedly undertook a scheme to monopolize trade with purchasers in twenty-six foreign nations by fraudulently procuring patents in those nations. Nor has it been suggested that Congoleum was compelled by foreign law to make materially false representations in connection with its patent applications. The dictate of the Sherman Act that Congoleum refrain from monopolizing foreign commerce is thus not at variance in this regard with the commands of any foreign nation. [10] In addition, Congoleum is an American company and is alleged to have masterminded and directed its monopolization scheme from its headquarters in Kearney, New Jersey, with the intention of affecting its American competitors' export markets. Given these alleged facts, there appears to be no reason why Congoleum should not be **[***333]** held accountable in the courts of the United States for monopolizing trade with foreign nations.

[46]** Problems may, of course, arise regarding the formulation of relief, but they do not appear to constitute a threshold jurisdictional barrier. Instead, they are matters that can be dealt with, if need be, at a subsequent stage of the litigation. Indeed, it would appear that there would not be any interference with the policies of foreign nations if relief were limited to treble damages, and the public interest in enforcing the antitrust laws, as well as the private interest of Mannington in obtaining a remedy, may be satisfied in large measure through such an award.

[*1303] Injunctive relief may also be utilized effectively if the district court deems such a remedy to be appropriate. Where, as here, the district court has personal jurisdiction over the defendant, there might well be no problem in ensuring compliance with its order, whether it prohibits Congoleum from prosecuting infringement suits or requires the licensing of competitors. Moreover, it is improbable that such an order would place Congoleum in the position of being forced to perform an act that is illegal in foreign countries, since patent rights primarily benefit the patent holder rather than the foreign **[**47]** government. At most, the omission to prosecute patent infringers or the unauthorized licensing of others may subject Congoleum to loss of its patent right, which in any event may well be invalid under foreign law because of its fraudulent procurement.

Thus, it is likely that the policies of most foreign nations will not be adversely affected by granting injunctive relief to Mannington. And if, for some reason, the patent laws and policies of one or two countries would be seriously affected a proposition that incidentally is nowhere suggested in the record the court can take these specific circumstances into account when fashioning its remedy, as other courts have done in the past. [11]

---

[10] In this respect, this case presents a less problematical situation for application of the Sherman Act than was presented in *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 89 S. Ct. 1562, 23 L. Ed. 2d 129 (1969)*, which was criticized in Note, American ***Antitrust Law*** and Canadian Patent Rights, 118 U.Pa.L.Rev. 983 (1970), for ignoring the fact that Canadian law apparently required the restrictive patent licensing policy that was under attack in that case. The present case is also readily distinguishable from those situations, referred to by the majority, where a litigant who has been ordered by an American court to produce records maintained in a foreign country would be in violation of foreign law if it complied with the American court order.

[11] See, e. g., *United States v. General Electric Co., 115 F. Supp. 835 (D.N.J.1953)*; *United States v. Imperial Chemical Industries, 105 F. Supp. 215 (S.D.N.Y.1952)* (in each case, savings clause included in order so as not to place defendant in violation of foreign laws). See generally Beausang, The Extraterritorial Jurisdiction of the Sherman Act, 70 Dick.L.Rev. 187, 194-95 (1966).

[48]** In sum, then, I would conclude that subject-matter jurisdiction exists over Mannington's antitrust cause of action and that Mannington has stated a claim upon which relief can be granted. Accordingly, I would remand the case to the district court for proceedings on the merits, at which time Mannington would be obligated to establish, as required under Walker Process, both that Congoleum procured the foreign patents through knowing and willful fraud and that such conduct constituted monopolization of a relevant market of the foreign trade of the United States.

Opinion by: ATKINS

Opinion

Order on Motions to Certify Class and Order Setting Trial

ATKINS, D.J.: This cause is before the Court on motions of Plaintiffs for class certification in an antitrust action alleging a customer allocation conspiracy. These two cases have been consolidated because they allege the same conspiracy, though Plaintiffs Fradette and Paquet (Fradette) seek certification for a smaller geographic area than Plaintiff A & P Bakery Supply and Equipment Company (A & P). The Court will treat the certification motions separately.

Fradette

HN1[] To maintain a class action, Plaintiff **[*2]** must demonstrate numerosity of class members, commonality of questions of law or fact, typicality of the representatives' claims or defenses, adequacy of the representation provided by the named Plaintiffs, and, in this case, that the common questions predominate and that the class method of adjudication is superior to other available methods. *Fed. R. Civ. P. 23*.

I. Numerosity

Fradette's class allegedly contains thousands of users. ***HN2***[] This is more than sufficient numbers to satisfy the numerosity requirement. See 3B Moore's Fed. Practice § 23.05 (1978).

II. Commonality & Predominance

This Court will consider the commonality of issues of law and fact and the predominance of common issues simultaneously. ***HN3***[] In a private antitrust action plaintiff must demonstrate (1) a violation of the ***antitrust law***, (2) damages, (3) a causal link between the violation and the damages. *Windham v. American Brands, Inc., 565 F. 2d 59, 65 (4th Cir. 1977)*. Customer allocation agreements are per se violations of the antitrust laws. *United States v. Topco Associates, 405 U.S. 596 (1972)*. Thus, in this action, individual issues of law or fact will not arise in the proof of the antitrust violation.

[*3] Defendants argue that because proof of causation (impact) is necessary, it must be proven as to each individual, and, therefore, common issues do not predominate. Defendants cite *Alabama v. Blue Bird Body Co., Inc., 573 F. 2d 309 (5th Cir. 1978)*. It is clear that Blue Bird denied nationwide certification only because of a lack of facts to demonstrate classwide proof. The case made it equally clear that ***HN4***[] the impact rule does not, as a matter of law, defeat class certification. *573 F. 2d at 328*. The existence of a conspiracy, the scope of the conspiracy and other facts of this case have been developed and presented in the criminal action on this conspiracy. See *United States v. Cadillac Overall Supply Co., 568 F. 2d 1078 (5th Cir. 1978)*.

The Blue Bird court stated that in some instances of price-fixing, certainty of impact may be proven by showing only proof of purchase. *573 F. 2d at 309, n. 34*. This action does not involve allegations of price-fixing, but ***HN5***[] there are no sound distinctions in the treatment of price-fixing and customer allocation cases, as is evidenced by the application of the per se rule to both types of cases. See L. Sullivan, Antitrust 224-29 (1977). Upon **[*4]** analysis of the facts of this case, as stated in the companion criminal action and as alleged in the complaint in this action, this Court concludes that, while it may be necessary to prove more than purchase, such additional proof will be very little and the common issues of violation and those common portions of causation predominate over uncommon issues. Damages may be shown to be proportional to purchases, and purchases can be proven through existing records or a form interrogatory to each class member. Because of the peculiar facts of this case, it may not be necessary to bifurcate this action, though the Court reserves this issue until the progress of the trial demonstrates the most sound course.

The remaining issues are irrelevant to the cause, or are insignificant or can be resolved through a form request, and therefore do not predominate. In light of these conclusions, the class form is the superior method of resolving this case.

III. Typicality

Defendants argue that named Plaintiffs Fradette and Pacquet are not representative because some supplier of the products in question approached Fradette and Pacquet with an offer to provide the service for a few pennies **[*5]** less. There is no evidence that this offer came from someone other than another Defendant. Moreover, the Court concludes as a matter of law that ***HN6***[] proof of the conspiracy and resulting supra-competitive prices renders a failure to change suppliers, when prices are a "few cents less," irrelevant to Fradette's cause of action. A conspiracy to allocate customers artificially changes supply and demand. The fact that the change in benefits may be so small as to not cause the recipient to alter its source in no way lessens the fact of damage. That is, the availability of lower priced products, even if they are identical, does not reduce or defeat the recovery of damages when the difference is small, because the damage still exists.

Plaintiffs Fradette and Pacquet assert claims typical of the class.

IV. Adequacy

The Court has reviewed the pleadings and memoranda filed by attorneys for Fradette and concludes that the capabilities, interest and resources are more than adequate.

For the above reasons the following class, with Fradette and Pacquet as named Plaintiffs, is certified:

All private users who have rented industrial garments and/or who have purchased industrial garment **[*6]** maintenance service from Defendants and/or their unnamed co-conspirators, in Monroe, Dade, Broward, Palm Beach and St. Lucie Counties, during the period of the combinations and conspiracies alleged in the amended complaint, (1960 -- September 1974).

The Plaintiffs shall submit to the Court by April 27, 1979, the proposed notice to the class, and Defendants shall respond, if desired, by May 4, 1979. The Court will issue an order setting a preliminary pretrial conference. This case is set for trial the two-week period beginning September 24, 1979, pretrial conference to be held on Wednesday, September 12, 1979, at 9:00 a.m., and calendar call to be held on Thursday, September 20, 1979. The parties shall comply with the requirements set forth in the enclosed form notice of trial.

A & P Bakery Supply & Equipment Co.

The Court notes that there are serious questions of standing raised by A & P's action. It is unnecessary to resolve those questions at this time because the Court concludes that A & P's counsel would not adequately represent the class it seeks to have certified. A & P's counsel has failed to answer interrogatories, has failed to obey a court order requiring A & **[*7]** P to answer interrogatories, and has failed to appear for a hearing on the certification issue. The motion to certify is denied. A & P's counsel will notify the Court within ten (10) days of this Order if he desires to continue to prosecute the action, and will confer with Fradette's counsel to see if some employees of A & P, or A & P itself, are members of Fradette's class. Both Plaintiffs' counsel shall file a status report by April 16, 1979, preferably a joint statement, advising the Court on how the attorneys desire to handle this facet of the case.

If questions of standing remain they may be raised at any time by any interest party.

Civil Procedure > Pleading & Practice > Pleadings > Rule Application & Interpretation

Civil Procedure > Dismissal > Involuntary Dismissals > Failure to State Claims

HN1[] **Motions to Dismiss, Failure to State Claim**

A motion to dismiss for failure to state a claim is the proper method for testing the legal sufficiency of a complaint. The motion should not be granted unless it appears beyond doubt that the plaintiffs could prove no set of facts in support of their claim which would entitle them to relief. In ruling on the motion, the court must construe the complaint liberally, taking the alleged facts as true and entitling the plaintiffs to all reasonable inferences in their favor that may be drawn from the alleged facts.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Governments > State & Territorial Governments > Claims By & Against

Antitrust & Trade Law > Sherman Act > General Overview

HN2[] **Exemptions & Immunities, Parker State Action Doctrine**

A state cannot give immunity to those who violate the Sherman Act, *15 U.S.C.S. § 1 et seq.*, by authorizing them to violate it, or by declaring that their action is lawful.

Antitrust & Trade Law > Sherman Act > General Overview

Governments > State & Territorial Governments > Claims By & Against

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN3[] **Antitrust & Trade Law, Sherman Act**

A state's subdivisions and agencies are not automatically exempt from application of the federal antitrust laws. This is not to say, however, that municipalities may not at any time avail themselves, as agents of the state, of the state action exemption set forth in Parker. They may do so when their anticompetitive conduct is engaged in pursuant to state policy to displace competition with regulation or monopoly public service and merely reflects such state policy. In addressing this more-limited state policy consideration, however, the United States Supreme Court makes it clear that the threshold inquiry in determining if an anticompetitive activity is state action of the type the Sherman Act, *15 U.S.C.S. § 1 et seq.*, was not meant to proscribe is whether the activity is required by the state acting as sovereign. It is not enough that anticompetitive conduct is prompted by state action; rather, anticompetitive activities must be compelled by direction of the state acting as a sovereign.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN4[] **Exemptions & Immunities, Parker State Action Doctrine**

Other considerations of special significance in Parker state action cases are whether or not the state policy requiring the anticompetitive restraint is specifically part of a comprehensive regulatory system and is clearly articulated, affirmatively expressed and actively supervised by the state as the policymaker.

Real Property Law > Zoning > Judicial Review

Real Property Law > Zoning > General Overview

HN5[] **Zoning, Judicial Review**

Although zoning statutes assuredly sometimes have anticompetitive effects, it is somewhat fatuous to contend that they inevitably reflect a state's clear and affirmative intent to displace competition with regulation or monopoly public service.

Business & Corporate Compliance > ... > Real Property Law > Zoning > Ordinances

Governments > Legislation > Interpretation

Real Property Law > Zoning > General Overview

HN6[] Zoning, Ordinances

The zoning statutes must be strictly construed.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Governments > State & Territorial Governments > Claims By & Against

HN7[] Exemptions & Immunities, Parker State Action Doctrine

Where the law and policy of a state as sovereign are not in express or implied conflict with the federal antitrust laws, the need to consider the applicability of the Parker exemption for that state's political subdivisions becomes in a sense moot.

Antitrust & Trade Law > Sherman Act > General Overview

HN8[] Antitrust & Trade Law, Sherman Act

No violation of the Sherman Act, *15 U.S.C.S. § 1 et seq.*, can be predicated upon mere attempts to influence the passage or enforcement of laws, even when such attempts arise from anticompetitive motives and purposes. In reaching this decision, the court made a point of distinguishing agreements jointly to seek legislation or law enforcement from those combinations normally held violative of the Sherman Act characterized by an express or implied agreement or understanding that the participants will help one another to take away the trade freedom of others through the use of such devices as boycotts, market-division agreements, and other similar arrangements.

Civil Procedure > ... > Responses > Defenses, Demurrers & Objections > Motions to Dismiss

Healthcare Law > Healthcare Litigation > Antitrust Actions > Facilities

HN9[] Defenses, Demurrers & Objections, Motions to Dismiss

In antitrust cases, where proof is largely in the hands of the alleged conspirators, dismissals prior to giving plaintiffs ample opportunity for discovery should be granted sparingly.

Counsel: [1]** Stephen J. Holtman, Simmons, Perrine, Albright & Ellwood, Cedar Rapids, Iowa, George F. Karch, Jr., Thomas J. Collin, Thompson, Hine & Flory, Cleveland, Ohio, for plaintiffs.

Opinion by: McMANUS

Opinion

[*739] ORDER

This matter is before the court on defendants' resisted joint motion to dismiss for failure to state a claim, filed January 15, 1979. Denied.

This action for injunctive relief and damages is predicated upon alleged antitrust violations. [1.] Plaintiffs are Mason City Center Associates (Center Associates), an Ohio limited partnership engaged in the organization and planning of a regional shopping center on the west side of Mason City, Cerro Gordo County, Iowa (West Side Center); and Beaver Farms, Inc. (Beaver Farms), an Iowa corporation owning title to the land upon which Center Associates plans to construct the aforementioned West Side Center. Defendants are the City of Mason City, a municipal corporation existing under the laws of the State of Iowa; Kew, DeVary, Romans, Shima, **[**2]** Pedelty, Jarvill, and Johnson each members of the Mason City City Council (Council); Holmen Development Co. (Holmen) and The Ericson Development Co., Inc. (Ericson), both Minnesota corporations engaged in the organization and planning of a regional shopping center in downtown Mason City (Downtown Center).

HN1[] A motion to dismiss for failure to state a claim is the proper method for testing the legal sufficiency of a complaint. 2A **[*740]** Moore's Federal Practice, P 12.08 at 2265-66 (2d ed. 1975). The motion should not be granted unless it appears beyond doubt that the plaintiffs could prove no set of facts in support of their claim which would entitle them to relief. *Cruz v. Beto, 405 U.S. 319, 322, 92 S. Ct. 1079, 31 L. Ed. 2d 263 (1972)*; *Haines v. Kerner, 404 U.S. 519, 520-21, 92 S. Ct. 594, 30 L. Ed. 2d 652 (1972)*; **[**3]** *Conley v. Gibson, 355 U.S. 41, 45-46, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957)*; *Stifel, Nicolaus & Co. v. Dain, Kalman & Quail, Inc., 578 F.2d 1256, 1260 (8th Cir. 1978)*; *Bramlet v. Wilson, 495 F.2d 714, 716 (8th Cir. 1974)*. In ruling on the motion the court must construe the complaint liberally, taking the alleged facts as true and entitling the plaintiffs to all reasonable inferences in their favor that may be drawn from the alleged facts. *Warth v. Seldin, 422 U.S. 490, 501, 95 S. Ct. 2197, 45 L. Ed. 2d 343 (1975)*; *Stifel, Nicolaus & Co. v. Dain, Kalman & Quail, Inc., supra.*

Plaintiffs' complaint alleges the following specifically relevant facts. Holmen and Ericson have entered into an agreement with the City to organize and plan the Downtown Center upon the express condition that the City prevent any person or firm from planning or constructing a regional shopping center that would compete with the Downtown Center. Plaintiff Center Associates seeks to construct its West Side Center on a 35-acre tract located on the west side and within the limits of Mason City. This tract is owned by Beaver Farms and is presently zoned "A-Agriculture and Mining."

The West Side Center development **[**4]** cannot be undertaken unless the Beaver Farms tract is rezoned to "G-Business." Beaver Farms applied for such a rezoning, which was denied by the Mason City Planning and Zoning Commission. The rezoning denial was affirmed by the City Council. Plaintiffs further allege that the Council members denied the rezoning pursuant to and in furtherance of their agreement with Holmen and Ericson to exclude competitive shopping center developments from Mason City, and that the agreement has effectively granted Holmen and Ericson "a perpetual veto power over all applications for rezoning of property in Mason City . . . intended to be used for a regional shopping center . . . in competition with the Downtown Center." As a result of these actions plaintiffs have been effectively prevented from pursuing their plan to build the West Side Center. Upon these and other allegations, [2.] **[**5]** plaintiffs base their contentions that defendants have violated federal and state antitrust statutes, and the Iowa common law relating to zoning. [3.]

[1.] Jurisdiction is premised upon sections 4 and 16 of the Clayton Act, *15 U.S.C. §§ 15* and *26*; *section 1337* of the Judiciary Code, *28 U.S.C. § 1337*; and the doctrine of pendent jurisdiction.

[2.] The other allegations are the usual ones generally necessary to state a claim under the federal antitrust laws; See generally *Stifel, Nicolaus & Co. v. Dain, Kalman & Quail, Inc., 430 F. Supp. 1234, 1238, 1242-1243 (N.D.Iowa 1977)*, Rev'd in part on other grounds, *578 F.2d 1256, 1259, 1262 (8th Cir. 1978)*; but are not directly material to the legal issues raised by defendants' motion to dismiss.

[3.] The complaint alleges a combination and conspiracy unreasonably restraining trade in the relevant market, a rule of reason violation of *section 1* of the Sherman Act, *15 U.S.C. § 1* (count 1); a group boycott, in per se violation of *section 1* (count 2); an unlawful attempt to monopolize the relevant market, in violation of *section 2* of the Sherman Act, *15 U.S.C. § 2* (count 3); a conspiracy to unlawfully monopolize the relevant market, also in violation of *section 2* (count 4); and violation of sections 4 and 5 of the Iowa Competition Law, *Iowa Code §§ 553.4, -.5* (1978) (count 5), and the Iowa zoning laws, See Iowa Code ch. 414 (1978) (count 6).

In moving for **[**6]** dismissal for failure to state a claim, defendants contend that their action in refusing to rezone is protected as a matter of law by the "state action" exemption to the federal antitrust laws, which the United States Supreme Court delineated in *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)* and its progeny. Additionally, they contend that to the extent the **[*741]** complaint alleges concerted efforts to induce governmental action resulting in a restraint of trade or in a monopoly, it nonetheless fails to state an actionable violation of the antitrust laws because of the "Noerr-Pennington" political-speech immunity doctrine. See, *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*. Finally, defendants seek dismissal of the pendent state law counts on grounds that the Iowa Competition Law must be construed in harmony with the federal antitrust laws and that the court should exercise its discretion under pendent jurisdiction and dismiss counts 5 and 6, Citing *United Mine Workers v. Gibbs, 383 U.S. 715, **[**7]** 725-26, 86 S. Ct. 1130, 16 L. Ed. 2d 218 (1966)* in support.

The court may assume for present purposes that defendants' actions as alleged would be sufficient to support a claimed violation of the antitrust laws if they were done by virtue of an agreement, combination or conspiracy involving Solely private parties. [4.] See, *Parker v. Brown, 317 U.S. 341, 350, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. Thus, the issue to be decided on defendants' motion is the legal one whether defendants are exempted or immune from any antitrust liability by virtue of the Parker "state action" doctrine or the Noerr-Pennington political activity doctrine. Upon the facts alleged the court finds that they are not and the motion will therefore be denied.

[8]** State Action

Parker v. Brown involved the validity of a California statute specifically authorizing the establishment of agricultural marketing programs expressly restricting competition among raisin growers and fixing the prices at which the growers could sell their product. The stated purpose of the statute was to conserve California's agricultural wealth and prevent economic waste in marketing the state's agricultural goods. See, *Parker v. Brown, 317 U.S., at 341, 63 S. Ct. 307, 87 L. Ed. 315* .

The United States Supreme Court assumed that the program would violate the Sherman Act if it had been the product of Private agreement. *Id., at 350, 63 S. Ct. 307*. In upholding the statute, and thereby delineating the so-called "state action" exemption to the Sherman Act, the Court stressed the fact that the program had been established under state legislation and was administered and supervised by a Commission, appointed by the governor and confirmed by the state senate, and of which a state official the Director of Agriculture was an ex-officio member. *Id., at 346, 63 S. Ct. 307*. Thus, the State of California directly involved itself As sovereign in what the Court construed was the **[**9]** state's legitimate sphere of regulation. See *id., at 350-52, 63 S. Ct. 307*. Indeed, the Court emphasized that it was not faced with a question "of the state or its municipality Becoming a participant in a private agreement or combination by others for restraint of trade." *Id., at 351-52, 63 S. Ct., at 314* (emphasis added). [5.]

As one United States Circuit Court of Appeals noted about the Parker decision, "the (Supreme) Court's emphasis on the extent of the state's involvement precludes the facile conclusion that action by any public official

---

There is no question that the defendants, including the City of Mason City, are "persons" within the meaning of the federal antitrust laws. E.g., *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 394-97, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)*; *Monell v. Dept. of Social Services, 436 U.S. 658, 690 n.55, 98 S. Ct. 2018, 56 L. Ed. 2d 611* (majority opinion), 707 n.3, *98 S. Ct. at 2044 n.3*. (Powell, J., concurring) (1978).

4. See notes 2 and 3 Supra. The court emphasizes that it construes the complaint to be claiming that the City's affirmative agreement to exclude all competing developers violates the antitrust laws. Thus, it is not the City's decision to deny Beaver Farm's zoning request, as such and without more, that is the allegedly offensive activity.

5. Thus, ***HN2***[] a state cannot "give immunity to those who violate the Sherman Act by authorizing them to violate it, or by declaring that their action is lawful." *317 U.S., at 351, 63 S. Ct., at 314*.

automatically confers exemption." *George R. Whitten, Jr., Inc. v. Paddock Pool Builders, Inc., 424 F.2d 25, 30* (1st Cir.), Cert. denied, *400 U.S. 850, 91 S. Ct. 54, 27 L. Ed. 2d 88 (1970)*. This point that ***HN3***[] a state's subdivisions and agencies are not Automatically exempt from application **[**10]** of the federal antitrust laws seems to have **[*742]** been seconded in subsequent Supreme Court opinions interpreting Parker. See *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 408, 411-13* & n.41, *98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)*. Compare *Goldfarb v. Virginia State Bar, 421 U.S. 773, 790-91, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975)* With *Bates v. State Bar of Arizona, 433 U.S. 350, 359-62, 97 S. Ct. 2691, 53 L. Ed. 2d 810 (1977)*.

This is not to say, however, that municipalities may not at any time avail themselves, as agents of the state, of the "state action" exemption set forth in Parker. They may do so when their anticompetitive conduct is engaged in "pursuant to state policy to displace competition with regulation or monopoly public service" and merely reflects such state policy. *City of Lafayette v. Louisiana Power & Light Co., supra, 435 U.S., at 413, 98 S. Ct. 1123*. In addressing this more-limited "state policy" consideration, however, the Supreme Court cases make it clear that:

> The threshold inquiry in determining if an anticompetitive activity is state action of the type the Sherman Act was not meant to proscribe is whether the activity is required **[**11]** by the State acting as sovereign. . . . It is not enough that . . . anticompetitive conduct is "prompted" by state action; rather, anticompetitive activities must be compelled by direction of the State acting as a sovereign.

Goldfarb v. Virginia State Bar, supra, 421 U.S., at 790-91, 95 S. Ct., at 2015. Accord *City of Lafayette v. Louisiana Power & Light Co., supra, 435 U.S. at 409-10, 98 S. Ct. 1123* (plurality opinion), 417, *98 S. Ct. at 1139, 55 L. Ed. 2d 364* (Marshall, J., concurring), 418, *98 S. Ct. at 1139* (Burger, C. J., concurring).

Additionally, ***HN4***[] other considerations of special significance are whether or not the state policy requiring the anticompetitive restraint is specifically part of a Comprehensive regulatory system ; and is Clearly articulated, affirmatively expressed and Actively supervised by the state as the policymaker. *City of Lafayette, supra, at 410, 98 S. Ct. 1123*. Compare *Bates v. State Bar of Arizona, 433 U.S., at 350 at 359-60, 362, 97 S. Ct. 2691, 53 L. Ed. 2d 810*, With *Cantor v. Detroit Edison Co., 428 U.S. 579, 591 n.24, 594* & n.32, *96 S. Ct. 3110, 49 L. Ed. 2d 1141 (1976)* And *Goldfarb v. Virginia State Bar, 421 U.S., at 773 at 790-91, 95 S. **[**12]** Ct. 2004, 44 L. Ed. 2d 572*.

In moving for dismissal, it is defendants' contention that the Iowa zoning law, Iowa Code ch. 414 (1978), constitutes or incorporates such a policy. The court disagrees. ***HN5***[] Although zoning statutes assuredly sometimes have anticompetitive effects, it is somewhat fatuous to contend that they inevitably reflect a state's clear and affirmative intent to displace competition with regulation or monopoly public service. See, e.g., *Skaggs-Albertson's v. ABC Liquors, Inc., 363 So.2d 1082, 1089 (Fla.1978)*; *Smith v. Zoning Board of Review, 103 R.I. 328, 237 A.2d 551, 554 (1968)*; *Glen Rock Realty Co. v. Board of Adjustment, 80 N.J.Super. 79, 192 A.2d 865, 871 (1963)*; *Pearce v. Village of Edina, 263 Minn. 553, 118 N.W.2d 659, 670-72 (1962)*; *Suburban Ready-Mix Corp. v. Village of Wheeling, 25 Ill.2d 548, 185 N.E.2d 665, 666-67 (1962)*; *In re Lieb's Appeal, 179 Pa.Super. 318, 116 A.2d 860, 865 (1955)*. Nor can it be said with any assurance that the Iowa zoning statute clearly and affirmatively reflects such an intent or policy. [6.]

[13]** ***HN6***[] The zoning statute must be strictly construed. E.g., *Anderson v. City of Cedar Rapids, 168 N.W.2d 739, 742 (Iowa 1969)*. With this standard of strict construction in mind, it is the court's interpretation of the statute that it does not clearly and affirmatively intend displacement of competition with the kind of regulation and monopoly service contemplated by the Supreme Court under the "state-action" doctrine.

[*743] In the first place, the Iowa zoning statute does not even require municipalities to set up zoning mechanisms. It merely permits and empowers them to do so should they choose to. *Iowa Code § 414.1* (1978). Second, where a municipality does elect to zone, the Iowa statute does not require or compel it to make zoning

---

6. The court's research of the relevant Iowa authorities does not indicate any interpretation of the Iowa zoning statute supporting the view that the Iowa legislature's intent and policy in enacting ch. 414 were anticompetitive in nature. Nor have the defendants referred the court to any.

decisions for the express or even implied purpose of excluding, restraining or otherwise limiting competition. Finally, the state statute does not set up any distinct agency or mechanism for active supervision of the cities' zoning procedures By the state as sovereign policymaker.

Nor can the court find as a further matter that in enacting its zoning statute the Iowa legislature even contemplated, much less mandated, that its municipalities would **[**14]** enter into anticompetitive agreements with private developers in connection with exercise of their zoning powers. See, *City of Lafayette, 435 U.S., at 415, 98 S. Ct. 1123* (plurality opinion), 425 n.6, *98 S. Ct. at 1143* (Burger, C. J., concurring); Cantor, 428 U.S., at 579 at 596-97, 96 S. Ct. 3110, 49 L. Ed. 2d 1141 . At best, the Iowa zoning law is totally neutral on the question whether the municipalities should or should not enter into such agreements, and then use their zoning powers in furtherance thereof, so as to exclude competitive elements from the relevant market. Indeed, the more probable view is that the State would intend its municipalities to exercise their zoning powers in a manner consistent with the bounds imposed by the federal antitrust laws and the strong national policy favoring competition those laws embody. Compare, *City of Lafayette, supra, at 398, 400, 403* & n.24, 405 n.31, 405-08 & n.38, *98 S. Ct. 1123* (majority opinion). Accord, *Whitworth v. Perkins, 559 F.2d 378 (5th Cir. 1977)*. See generally 1 P. Areeda & D. Turner, ***Antitrust Law***, P 214 (1978); The Supreme Court, 1977 Term, 92 Harv.L.Rev. 57, 282-83 (1978).

As a threshold matter, therefore, it is **[**15]** the court's conclusion that the Iowa zoning law does not even conflict with the federal antitrust laws because it does not compel or contemplate anticompetitive agreements on the part of Iowa municipalities. [7] And ***HN7***[] where the law and policy of a state as sovereign are not in express or implied conflict with the federal antitrust laws, the need to consider the applicability of the Parker exemption for that state's political subdivisions becomes in a sense moot. See, *City of Lafayette, 435 U.S., at 413, 98 S. Ct. 1123* (plurality opinion), 425, *98 S. Ct. at 1135* (Berger, C. J., concurring); *Goldfarb, 421 U.S., at 790, 95 S. Ct. 2004*.

[16]** Even if it could fairly be concluded that the Iowa zoning statute and its underlying policy Conflict with the Sherman Act because they compelled or possibly contemplated defendants' anticompetitive activities alleged here, the court would further have to find that the grant of a Parker "state action" exemption in favor of these defendants Is necessary in order to make the state's zoning statute work, and even then Only to the minimum extent necessary. See, *City of Lafayette, supra, at 425-26* & n.6, *98 S. Ct. 1123* (Burger, C. J., concurring); *Cantor, 428 U.S., at 579* & n.37, *96 S. Ct. 3110, 49 L. Ed. 2d 1141* . The court cannot so find upon the allegations set forth here. Clearly, the City of Mason City could adequately and effectively exercise its legislatively delegated zoning powers without entering beforehand into anticompetitive agreements with private entities. Denying the defendants any "state action" exemption to the Sherman Act under the circumstances alleged in **[*744]** this case will not extirpate the Iowa zoning statute.

In sum, to the extent defendants allegedly entered into an anticompetitive agreement, they cannot rely upon the Iowa zoning statute to exempt them **[**17]** from liability under the federal antitrust laws. The point is not that Mason City is subject to the Sherman Act simply because its zoning decisions have some anticompetitive effect. Rather, it is that the city is not necessarily and automatically exempt simply because it is exercising its state delegated zoning powers, especially when it is alleged that those zoning powers were exercised in furtherance of an unlawful anticompetitive agreement with private developers. See, *Whitworth v. Perkins, 559 F.2d 378 (5th Cir. 1977)*, Vacated and remanded sub nom. *City of Impact v. Whitworth, 435 U.S. 992, 98 S. Ct. 1642, 56 L. Ed. 2d 81 (1978)*, Opinion reinstated and case remanded per curiam sub nom. *Whitworth v. Perkins, 576 F.2d 696 (5th Cir. 1978)*, Cert. denied, *440 U.S. 911, 99 S. Ct. 1224, 59 L. Ed. 2d 460 (1979)*. Accord, *City of Fairfax v. Fairfax Hospital Ass'n, 562 F.2d 280 (4th Cir. 1977)*, Vacated and remanded, *435 U.S. 992, 98 S. Ct. 1642, 56 L. Ed. 2d 81*

---

[7] To say that the Iowa legislature may have foreseen that the zoning statute, when otherwise properly applied by the municipalities, might result in anticompetitive Effects is not to say that it therefore also affirmatively contemplated and approved direct anticompetitive Activity violative of the federal antitrust laws. See, e.g., *Goldfarb, 421 U.S., at 790-91, 95 S. Ct., at 2015* (". . . Although the (Virginia) Supreme Court's ethical codes mention advisory fee schedules they do not direct either respondent to supply them, or require the type of price floor which arose from respondents' activities. Although the State Bar apparently has been granted the power to issue ethical opinions, there is no indication in this record that the Virginia Supreme Court approves the opinions."). Accord, Cantor, 428 U.S., at 579 at 595-96, 96 S. Ct. 3110, 49 L. Ed. 2d 1141 .

(1978), Concurring opinion of Widener, J. adopted on remand, Unpublished Order, No. 76-1775 (4th Cir. June 13, 1978) *Kurek v. Pleasure Driveway & Park District, 557 F.2d 580 (7th Cir. 1977)*, Vacated and remanded, *435 U.S. 992, 98* ***[**18]*** *S. Ct. 1642, 56 L. Ed. 2d 81 (1978)*, Reinstated on remand, *583 F.2d 378 (7th Cir. 1978)*, Cert. denied *439 U.S. 1090, 99 S. Ct. 873, 59 L. Ed. 2d 57 (1979)*; *Duke & Co. v. Foerster, 521 F.2d 1277 (3d Cir. 1975)*. Thus, the court's decision here intends no diminution of Mason City's otherwise legitimate authority with respect to zoning. See, *City of Lafayette, 435 U.S., at 416-17, 98 S. Ct. 1123*; *Goldfarb, 421 U.S., at 773 at 792-93, 95 S. Ct. 2004, 44 L. Ed. 2d 572* . [8.] See generally The Supreme Court, 1977 Term, 92 Harv.L.Rev. 57, 277-88 (1978).

Noerr-Pennington

Noerr involved a suit by a group of trucking companies and their trade associations under the antitrust laws against a group of railroads, a railroad **[**19]** association and a public relations firm. The plaintiffs alleged that the railroads had engaged the public relations firm to conduct a publicity campaign designed to influence legislation injurious to competition from the trucking industry. They further alleged the sole motive for the publicity campaign was the railroads' desire to destroy truckers as competitors in the long-distance freight business. There were no allegations or evidence that any governmental entity had entered into any agreement with the private parties in restraint of trade, or had otherwise cooperated or become involved with the publicity campaign, although evidence did exist that some governmental action had been taken in political response to the campaign. *365 U.S. 127 at 129-35, 144, 81 S. Ct. 523, 5 L. Ed. 2d 464*.

In reversing the lower courts' judgments for the plaintiff truckers, the Supreme Court held that ***HN8***[] no violation of the Sherman Act can be predicated upon mere attempts to influence the passage or enforcement of laws, even when such attempts arise from anticompetitive motives and purposes. *365 U.S., at 138, 139-40, 81 S. Ct. 523, 5 L. Ed. 2d 464*. In reaching this decision the court made a point **[**20]** of distinguishing "agreement(s) jointly to seek legislation or law enforcement" from those "combinations normally held violative of the Sherman Act . . . characterized by an express or implied agreement or understanding that the participants will . . . help one another to take away the trade freedom of others through the use of such devices as . . . boycotts, market-division agreements, and other similar arrangements." *365 U.S., at 136, 81 S. Ct., at 529*.

The Noerr holding was essentially reiterated in the Pennington decision. [9.] *381 U.S.* ***[*745]*** *657, 669-72, 85 S. Ct. 1585, 14 L. Ed. 2d 626*. Again, there were no allegations or evidence that any governmental entity had specifically entered into the anticompetitive agreement with the private parties, although some governmental action was secured as a result of the private parties' activities. Indeed, in considering one issue in the case that damages could not be collected under the Sherman Act for injury resulting directly and only from the governmental actions of the Secretary of Labor the Court specifically noted that "the (governmental) action taken to set a minimum wage for government purchases of coal was the act of a **[**21]** public official Who is not claimed to be a coconspirator . . . ." *381 U.S., at 671, 85 S. Ct., at 1594* (emphasis added). [10.]

[8.] The same analysis would apply with respect to the Iowa Home Rule Statute, Ch. 364, Iowa Code (1978); which defendants intimate would possibly be pertinent here. See, Defendants' Brief in Resistance at p. 6, n.5, filed January 15, 1979. Cf., *City of Des Moines v. Lohner, 168 N.W.2d 779, 782 (Iowa 1969)*.

[9.] Pennington specifically involved an agreement between a union and large coal operator/employers that was in part intended to secure uniform labor standards throughout the coal industry. The Court held that to the extent the agreement had anticompetitive effects on segments of the industry outside the particular bargaining unit it was restricted by national antitrust policy. The Clayton and Norris LaGuardia labor exemptions to the Sherman Act would not apply. *381 U.S., at 661-668, 85 S. Ct. 1585, 14 L. Ed. 2d 626*. However, to the extent evidence adduced an agreement between private entities involving concerted effort merely to influence action by the Secretary of Labor, the agreement would not be in violation of the Sherman Act. *Id., at 669-72, 85 S. Ct. 1585*.

[10.] In California Motor Transport Co. v. Trucking Unlimited, 404 U.S., at 508 at 510-11, 92 S. Ct. 609, 30 L. Ed. 2d 642, the Supreme Court extended the Noerr-Pennington rule to attempts to influence administrative and judicial proceedings in addition to the legislative and executive actions specifically at issue in Noerr and Pennington. The Court, furthermore, clarified the Noerr-Pennington delineation of a "mere sham" exception. See, California Transport, id., at 511-12, 92 S. Ct. 609.

[22]** Thus, to the extent this case presents allegations that the private developers entered into an anticompetitive agreement With the City of Mason City and its Council permanently to exclude competing developers from the relevant market, it raises at least one important factual issue relating to defendants' possible intent or purpose to deprive plaintiffs of any meaningful access to the City's zoning mechanisms and procedures. See, e.g., *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 512, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)*. On that basis alone this case is distinguishable from Noerr and Pennington. See, *California Motor, supra.*

The court holds, therefore, that a more complete factual record needs to be developed before it can be ascertained whether Noerr-Pennington political-speech immunity to Sherman-Act liability is applicable. The court simply cannot at this time conclude as a matter of law that plaintiffs have failed to state a claim under any conceivable set of facts that could be proved. *Harman v. Valley National Bank of Arizona, 339 F.2d 564, 566 (9th Cir. 1964)* ("(T)he complaint alleges that the acts of the (Arizona) Attorney General were those of **[**23]** a participating conspirator."). Accord *Mark Aero, Inc. v. Trans World Airlines, Inc., 580 F.2d 288, 290 n.4, 292 n.12, 293 n.15, 296-97 (8th Cir. 1978)*. [11] See *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 513, 92 S. Ct. 609, 30 L. Ed. 2d 642* ("Conspiracy With a licensing authority to eliminate a competitor may also result in an antitrust transgression." (emphasis added)), 515-16, *92 S. Ct. at 613 (1972)*; *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 706-08, 82 S. Ct. 1404, 1414, 8 L. Ed. 2d 777 (1962)*; *Duke & Co. v.* **[*746]** *Foerster, 521 F.2d 1277, 1281 (3d Cir. 1975)*; *Israel v. Baxter Laboratories, Inc., 151 U.S.App.D.C. 101, 104-09, 466 F.2d 272, 275-80 (1972)*. Cf. *Kurek v. Pleasure Driveway & Park Dist., 557 F.2d, at 593-94*; *Metro Cable Co. v. CATV of Rockford, 516 F.2d 220, 222-24, 229-30* ("This is not a case in which the Agency of government Itself is alleged to be a part of the conspiracy . . . ." (emphasis added)) (7th Cir. 1975).

[24]** ***HN9***[] In antitrust cases, where proof is largely in the hands of the alleged conspirators, dismissals prior to giving plaintiffs ample opportunity for discovery should be granted sparingly. E.g., *Hospital Building Co. v. Trustees of Rex Hospital, 425 U.S. 738, 746, 96 S. Ct. 1848, 48 L. Ed. 2d 338 (1976)*; *Seasongood v. K & K Insurance Agency, 548 F.2d 729, 733 (8th Cir. 1977)*. Accord, *Mark Aero, 580 F.2d, at 296* & n.30.

Pendent State Law Counts

The court views counts 5 and 6 of the complaint as plaintiffs' alternative state law Theories in support of their one Claim. They are based upon the same allegations that undergird counts 1 through 4. The case as a whole involves a common group of operative facts. Counts 5 and 6, therefore, are properly before the court pursuant to the doctrine of pendent jurisdiction [12] and should not at this stage of the litigation be dismissed. See, e.g., *United Mine Workers v. Gibbs, 383 U.S. 715, 721-29, 86 S. Ct. 1130, 16 L. Ed. 2d 218 (1966)*.

[25]** It is therefore

ORDERED

Denied.

---

[11] A specific holding in Mark Aero, see *580 F.2d, at 297*, was that the allegations of the complaint did not come within the "mere sham" exception to Noerr-Pennington immunity the exception the Supreme Court delineated in its California Motor decision. There were no allegations in Mark Aero, as there are here, that the governmental entity was a partner in the anticompetitive agreement or conspiracy. Such allegations are sufficient to raise the reasonable inference that any meaningful access to Mason City's zoning procedures on plaintiffs' part was totally and permanently foreclosed. Unlike the Mark Aero case, the allegations here are sufficient to interject the "mere sham" exception as an issue requiring further factual elaboration. See, e.g., *Mark Aero, 580 F.2d, at 295* & n.28, 296 ("The fundamental question presented in each case involving the "sham' exception, whether argued in a nonadjudicative or an adjudicative setting, is the question of intent.").

[12] One plaintiff and some defendants are Iowa citizens. Federal diversity jurisdiction, therefore, is unavailing because complete diversity is lacking.

Labor & Employment Law > Collective Bargaining & Labor Relations > Judicial Review

HN4[] **Separation of Powers, Primary Jurisdiction**

The National Labor Relations Board (NLRB) has been designated by Congress as the tribunal of choice for the adjudication of unfair labor practices, and the doctrine of primary jurisdiction is a judicial recognition of the importance of that designation. Board decisions are subject to judicial review on all issues of law. Factual issues are reviewed by a substantial evidence standard, one at least as rigorous as that applied in reviewing non-jury judicial determinations, *Fed. R. Civ. P. 52(a)*, and a good deal more rigorous than is applied to jury verdicts. When a NLRB decision subject to such judicial review has become final it is not readily apparent that it should have any less issue preclusion effect than would judgments resulting from non-jury or jury trials.

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > ... > Preclusion of Judgments > Estoppel > General Overview

HN5[] **Estoppel, Collateral Estoppel**

Issue preclusion applies both as to issues of fact and as to issues of law, so long as the same transactions and legal principles are involved and there has been no subsequent change in the governing law. A prior determination of a mixed question of fact and law precludes relitigation of that issue, provided that the party to be estopped has "a full and fair opportunity" to present his claim in the prior litigation.

Civil Procedure > Judgments > Preclusion of Judgments > General Overview

Civil Procedure > Judgments > Preclusion of Judgments > Res Judicata

Environmental Law > Administrative Proceedings & Litigation > Judicial Review

HN6[] **Standards of Review, Deference to Agency Statutory Interpretation**

It is a settled principle of administrative law that the courts give considerable deference to the construction of statutes by those agencies charged with the primary responsibility for their enforcement. Thus it is arguable that the scope of judicial review of agency decisions on questions of law is narrower than would be appellate review of court decisions on legal issues. But that difference does not suggest that res judicata on legal issues should be less applicable to agency judgments, for the rule of deference to agency interpretations of governing statutes is binding not only on a court reviewing an agency decision, but also on a court deciding a legal issue in the first instance.

HN7[] Statute of Limitations, Borrowing Statutes

Which state statute is to be borrowed and how it is to be applied to a cause of action based on federal law are federal law questions, and are determined by federal statutory policy. Thus state choice of law rules can govern the choice of a statute of limitations for a § 303(b) of the National Labor Relations Act, *29 U.S.C.S. § 187*, claim only if reference to those rules furthers substantive federal policy.

HN8[] Types of Banks & Financial Institutions, National Banks

In a § 303(b) of the National Labor Relations Act, *29 U.S.C.S. § 187*, case the specific state statute of limitations that is adopted, and the manner of its adoption, are to be determined by the policies that underlie the federal regulatory statute.

Civil Procedure > ... > Federal & State Interrelationships > Choice of Law > General Overview

Labor & Employment Law > ... > Labor Arbitration > Judicial Review > General Overview

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

HN9[] Federal & State Interrelationships, Choice of Law

The choice of law rule to be applied to a § 303(b) of the National Labor Relations Act, *29 U.S.C.S. § 187*, cause of action must meet two criteria. It must produce results consistent with national labor policy, and it should, insofar as is possible, be relatively easy to administer. On both counts, application of a federal choice of law rule to determine the governing time bar is preferable. Federal labor policy may be thwarted by state limitations periods unduly short or discriminatory. State choice of law rules, geared as they are to geographical factors or state policy interests, may be insensitive to this federal concern.

Governments > Legislation > Statute of Limitations > Time Limitations

Labor & Employment Law > ... > Labor Arbitration > Judicial Review > General Overview

Civil Procedure > Preliminary Considerations > Federal & State Interrelationships > General Overview

Governments > Legislation > Statute of Limitations > General Overview

HN10[] Federal & State Interrelationships, Erie Doctrine

As a general rule the governing statute of limitations should be that of the state in which the federal court sits, unless a party can make a compelling showing that the application of that statutory time bar would seriously frustrate federal labor policy or work severe hardship to the litigants. Reference to the forum state's statute of limitations absent some such showing provides an efficient and readily administrable rule for the vast majority of § 303(b) of the National Labor Relations Act (NLRA), *29 U.S.C.S. § 187*, cases, while leaving leeway for the relatively rare instances in which the application of the forum state's statute would seriously distort the operation of the § 303 NLRA remedy.

HN11[] Defenses, Demurrers & Objections, Affirmative Defenses

The four elements of estoppel en pais are defined: (1) The party to be estopped must know the facts; (2) he must intend that his conduct must be acted upon or must so act that the party asserting the estoppel has a right to believe it is so intended; (3) the latter must be ignorant of the true facts; and (4) he must rely on the former's conduct to his injury.

Business & Corporate Compliance > ... > Contracts Law > Contract Conditions & Provisions > Conditions Precedent

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > General Overview

HN12[] Contract Conditions & Provisions, Conditions Precedent

The National Labor Relations Act does not permit the insistence, as a condition precedent to entering into a collective bargaining agreement, that the other party to the negotiations agree to a provision or take some action which is unlawful or inconsistent with the basic policy of the Act. Compliance with the Act's requirement of collective bargaining cannot be made dependent upon the acceptance of provisions in the agreement which, by their terms or in their effectuation, are repugnant to the Act's specific language or basic policy.

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

HN13[] Exemptions & Immunities, Labor

A union forfeits its exemption from the antitrust laws when it is clearly shown that it has agreed with one set of employers to impose a certain wage scale on other bargaining units. One group of employers may not conspire to eliminate competitors from the industry and the union is liable with the employers if it becomes a party to the conspiracy.

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

Business & Corporate Compliance > ... > Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Subjects

HN14[] **Exemptions & Immunities, Labor**

When a collective bargaining agreement imposes restraints upon the employer's product market, the most significant issue in determining the availability of the labor exemption is whether the restraint involves a mandatory subject of collective bargaining. The burden is on the union to demonstrate that the challenged product market restraint is in fact no broader than necessary to promote the union's interest in such a subject. Absent such a demonstration, the restraint must fall.

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > General Overview

HN15[] **Exemptions & Immunities, Labor**

The requirements for antitrust exemption are, first, that the market restraint advance a legitimate labor goal, and, second, that the agreement restrain trade no more than is necessary to achieve that goal.

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

Business & Corporate Compliance > ... > Labor & Employment Law > Collective Bargaining & Labor Relations > Bargaining Subjects

HN16[] **Exemptions & Immunities, Labor**

The court begins the antitrust exemption for labor inquiry by asking whether the subject matter of the challenged agreement is itself, or is clearly related to, a mandatory subject of collective bargaining. A finding that the rules were not a mandatory subject of bargaining effectively undercuts any contention that they so fall within the protection of the national labor policy, as to be completely exempt from antitrust scrutiny.

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Labor > Statutory Exemptions

HN17[] Collectives & Cooperatives, Clayton Act

Where an action seeks only declaratory or injunctive relief, a finding that an agreement violates § 8(e), *29 U.S.C.S. § 158(e)*, should always remove the antitrust exemption. Once it is clear that a § 8(e) violation has occurred, no labor policy is advanced by permitting ongoing operation of an illegal contract, and injunctive relief pursuant to *§ 16* of the Clayton Act, *15 U.S.C.S. § 15*, is appropriate.

Antitrust & Trade Law > Clayton Act > Claims

Labor & Employment Law > Collective Bargaining & Labor Relations > Unfair Labor Practices > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Labor > General Overview

Antitrust & Trade Law > ... > Private Actions > Remedies > General Overview

HN18[] Clayton Act, Claims

Where a collective bargaining agreement or conduct taken pursuant to it has been shown to be illegal under federal labor law, a secondary party injured in his business or property by either has made out a prima facie case under *§ 4* of the Clayton Act, *15 U.S.C.S. § 15*. At that point, the defendants may assert, first, that at the time they acted they could not reasonably have foreseen that the subject matter of the agreement being challenged would be held to be unlawful under § 8(b)(4) or § 8(e), *29 U.S.C.S. § 158*. A successful showing that the determination of illegality was not reasonably foreseeable is not alone enough to establish an exemption defense. The defendants must also demonstrate that the contract provisions and steps taken to implement them were "intimately related" to the object of collective bargaining thought at the time to be legitimate, and went no further in imposing restraints in the secondary market than was reasonably necessary to accomplish it.

Opinion

[*497] OPINION OF THE COURT

We here review an order denying plaintiffs' motion for partial summary judgment on issues of liability **[**2]** in a suit pleading causes of action under § 303 of the Labor Management Relations Act (LMRA), *29 U.S.C. § 187*, and *§ 4* of the Clayton Act, *15 U.S.C. § 15*. The order is before us on an interlocutory appeal pursuant to *28 U.S.C. § 1292(b)*. The district court, *452 F. Supp. 1024*, identified four controlling questions of law which in its view were worthy of interlocutory review, and a panel of this court granted leave to appeal. Before this court the parties have addressed those questions as well as other considerations which are urged in support of and in opposition to the district court's ruling. We reverse the court's order denying summary judgment on the § 303(b) claim. Because we conclude that material issues of fact may remain regarding the availability of the non-statutory labor exemption to the antitrust laws we affirm the denial of summary judgment on the antitrust claim.

[*498] I. THE FACTS

A. The Parties and their Businesses

The plaintiffs are Consolidated Express, Inc. (Conex) and Twin Express, Inc. (Twin). They are non-vessel owning common carriers engaged in the business of consolidating **[**3]** less than container load (LCL) or less than trailer load (LTL) cargo for shipment between Puerto Rico and the Port of New York (the Port). At their off-pier facilities, they pack the shipments of several customers into large containers which are then trucked to pierside facilities and loaded on board ship. The defendant New York Shipping Association (NYSA) is an association of employers who engage in various businesses related to the passage of freight through the Port. On behalf of its members NYSA conducts collective bargaining negotiations and enters into collective bargaining agreements with various labor organizations, including the defendant International Longshoremen's Association, AFL-CIO (ILA), a labor organization representing longshoremen in the Port. Defendants International Terminal Operating Co., Inc., John M. McGrath Corp., Pittston Stevedoring Corp., United Terminals Corp., and Universal Maritime Services Corp. (the stevedores) are members of NYSA and employers of ILA longshoremen. They provide stevedoring services to vessels in the Port. Defendants Sea-Land Service, Inc. and Seatrain Lines, Inc. (the vessel owners) are operators of vessels engaged in common carriage **[**4]** by water between the Port and Puerto Rico. Their vessels are designed for the accommodation of large containers. As a part of their business they furnish shippers with containers and trailers for use on board their ships, as well as terminal facilities. They also provide stevedoring services for cargo shipped on their vessels, and thus, like the stevedores, employ ILA longshoremen.

B. Pre-litigation History

Until shortly after World War II most dry cargo was crated by the shipper, delivered to the pier by rail or truck, and loaded into a vessel piece-by-piece by longshoremen. That method of cargo handling has now generally been replaced by the use of vessels specially designed to accommodate mammoth containers. The cargo of large volume shippers may fill one or more containers. That of lower volume shippers is consolidated with the cargo of others in a single container. Many of these containers, when removed from the vessel, serve as semi-trailers, and virtually all are readily shipped by truck. Thus they can be loaded or unloaded ("stuffed" or "stripped" in longshoreman parlance) at sites remote from the pier. This innovation has increased productivity in the movement of cargo by **[**5]** water, but has produced a decline in the demand for longshoreman labor.

When in 1958 ILA struck the members of NYSA, a central issue was the growing use of containers on the docks. The strike was not, however, successful in prohibiting their use, and in the ILA-NYSA contract adopted in 1959 ILA conceded that "any employer shall have the right to use any and all types of containers without restrictions." In the next decade fully containerized ships were introduced, and dockside work opportunities for ILA members declined still further. These developments led ILA to negotiate with NYSA, as a part of its 1969 collective bargaining agreement, the Rules on Containers (Rules). The Rules dealt specifically with the consolidation of LCL and LTL cargo. NYSA agreed that all consolidated LCL and LTL cargo lots originating from or to be shipped to a point within fifty miles of the dock would be stripped by longshoremen at dockside. Outbound cargo was to be restuffed into a container, while inbound cargo was to be left on the pier for pickup by the consignees. The Rules provided for a penalty against the employer of $ 250 for every such container which passed through the dockside without being **[**6]** stripped and stuffed. In 1970 the penalty was increased to $ 1000 per violation.

Shortly after the 1969 Rules became effective Intercontinental Container Transportation Corp. (ICTC), a consolidator with a business similar to that of Conex and Twin, brought an action in the Southern **[*499]** District of New York seeking injunctive relief and damages from NYSA and ILA on the ground that the Rules violated the Sherman Act. At the same time ICTC filed unfair labor practice charges before the NLRB. In the antitrust action, then District Judge Mansfield granted a preliminary injunction prohibiting the defendants from refusing to handle containers stuffed or stripped by the plaintiff. On appeal from that interlocutory order the Second Circuit reversed, holding that there was little likelihood of ultimate success on the merits, because the collective bargaining agreement of which the Rules were a part probably fell within the labor exemption to the antitrust laws. *Intercontinental Container Transp. Corp. v. New York Shipping Ass'n, 426 F.2d 884 (2d Cir. 1970)* (ICTC). In ICTC's unfair labor practice case, the Regional Director refused to issue a complaint on the ground that **[**7]** the Rules on Containers were a valid work preservation agreement, and the General Counsel denied the appeal. Joint App. 303a-305a.

The Rules on Containers were carried forward in the 1971-1974 collective bargaining agreement negotiated between ILA and the Council of North Atlantic Shipping Associations (CONASA), an employer bargaining unit composed of NYSA and employer associations in five other North Atlantic ports. But for reasons that are in dispute, the Rules were not consistently enforced. Conex and Twin were therefore able to continue in the business of consolidating LCL and LTL lots, using containers furnished by the vessel owners. Access to such containers was essential to the business of the consolidators, since the vessel owners' ships could carry only specially designed containers, and since prior to October, 1974, Sea-Land and Seatrain were two of only three container carriers operating between the Port and Puerto Rico. [1.]

[8]** The failure to enforce the Rules led to attempts to improve their effectiveness. On January 25-29, 1973, representatives of CONASA, acting for the employers it represented, met with representatives of ILA in Dublin, Ireland. There those parties negotiated and executed Interpretive Bulletin No. 1, generally known as the Dublin Supplement. The Dublin Supplement established new mechanisms for the enforcement of the Rules against consolidators. It provided that off-pier consolidators operating within fifty miles of the Port were to be considered as operating in violation of the Rules. Consolidators could not avoid application of the Rules by relocating their facilities beyond the fifty mile limit, because the agreement contained a so-called "evasion" or "runaway shop" provision. The Supplement also provided for the establishment and circulation to all carriers and stevedores of a list of such

---

1. The third shipper, Transamerica Trailer Transport, Inc. (TTT), is not a defendant in this action.

violators, and vessel owners were to be fined $ 1000 for each container furnished to them. The Dublin Supplement was to be policed by a joint ILA-NYSA Container Committee.

In February, 1973, the vessel owners, using ILA labor, commenced stripping and restuffing outbound LCL and LTL containers which **[**9]** had already been stuffed by employees of Conex and Twin at their off-pier facilities and trucked to the pier for shipment to Puerto Rico. Beginning in March, 1973, the three vessel owners operating in the Puerto Rican trade refused to furnish Conex and Twin with empty containers. On April 13, 1973, NYSA and ILA issued a joint statement to NYSA members, naming fourteen consolidators, including Conex and Twin, as operating in violation of the Rules. The notice activated the provision in the Dublin Supplement requiring all NYSA members to refuse containers to the listed companies. These actions had the effect of terminating the plaintiffs' business of freight consolidation for the New York-Puerto Rico trade.

On June 1, 1973, Conex, faced with the destruction of its business, filed charges with the National Labor Relations Board (NLRB). It alleged that by agreeing to the **[*500]** Rules and Dublin Supplement NYSA and ILA had violated § 8(e) [2.] of the Labor Management Relations Act (LMRA), and that by seeking to enforce that agreement ILA had violated § 8(b)(4)(ii)(B) of the Act. [3.] Thereafter the General Counsel of the NLRB, acting pursuant to § 10(L), of the Act, 28 U.S.C. § 160 **[**10]** (L), filed a complaint against ILA in the United States District Court for the District of New Jersey seeking preliminary injunctive relief pending final disposition of those charges by the Board. Judge Lacey conducted a hearing on the § 10(L) application at which an extensive record was compiled respecting the Rules, the Dublin Supplement, and their effect upon the business of Conex. In that hearing the General Counsel contended that the Conex containers had not historically been stripped and restuffed at the docks by longshoremen, and thus that the activity of which Conex complained was secondary, without a work preservation justification, and in violation of §§ 8(b)(4)(ii)(B) and 8(e). ILA made the opposite contention, and testimony was presented on the issue so drawn. The district court concluded that the General Counsel's theory was substantial and not frivolous. It therefore enjoined enforcement of the Rules against Conex, the charging party. *Balicer v. International Longshoremen's Ass'n, 364 F. Supp. 205* (D.N.J.), aff'd, *491 F.2d 748 (3d Cir. 1973)*. Following a separate hearing on substantially identical charges filed with the NLRB by Twin, the **[**11]** General Counsel later obtained a § 10(L) injunction prohibiting enforcement of the Rules against it. *Balicer v. International Longshoremen's Ass'n, 86 L.R.R.M. 2559* (D.N.J.1974).

Before the NLRB the Conex and Twin charges were consolidated for hearing. The parties stipulated that the record made before Judge Lacey in the § 10(L) case, as supplemented by affidavits submitted by intervenor International Brotherhood of Teamsters, Local 807, which represents Conex employees, and by additional affidavits submitted by ILA and NYSA, would constitute the record for the unfair labor practice proceedings. On the basis of that record an Administrative Law Judge found **[**12]** that the Rules and Dublin Supplement, and the resulting boycott of Conex and Twin, were addressed to the labor relations of the NYSA employer-members with their own employees. He therefore concluded that the boycott involved protected primary activity. The NLRB disagreed. The Board rejected the argument that the agreement was a valid effort by ILA to preserve for its members work which they had historically performed. In the Board's eyes, the "work in controversy" was the stuffing and stripping work performed by LCL and LTL consolidators at their off-pier facilities, not loading and unloading of ships at dockside by longshoremen. Thus the Rules could not be justified as a work preservation agreement, valid under the Supreme Court's interpretation of § 8(e) in *National Woodwork Manufacturers Ass'n v. NLRB, 386 U.S. 612, 87 S. Ct. 1250, 18 L. Ed. 2d 357 (1967)*. Moreover, even if ILA once had a valid claim to the work of stuffing and stripping containers, the Board concluded, that claim had been abandoned in the 1959 ILA-NYSA agreement authorizing the use of container vessels. It therefore held the agreement embodied in the Rules and Dublin Supplement to be a violation **[**13]** of § 8(e) because its object was to force NYSA members to cease doing business with the

---

[2.] *29 U.S.C. § 158(e)*. This section prohibits labor agreements by virtue of which an employer ceases to deal with another employer.

[3.] *29 U.S.C. § 158(b)(4)(ii)(B)*. This section forbids coercion the object of which is to force any employer to cease doing business with another employer.

consolidators. The NLRB also held that ILA's actions in enforcing the agreement were unfair labor practices under § 8(b)(4)(ii)(B). It entered an appropriate cease and desist order on December 4, 1975. *Consolidated Express, Inc., 221 N.L.R.B. No. 144 (1975)*.

NYSA and ILA petitioned for review to the United States Court of Appeals for the Second Circuit. The NLRB cross-petitioned for enforcement. Conex, Twin and Teamsters Local 807 intervened. The Second Circuit held that the Board's conclusion that **[*501]** the work in controversy was that historically performed by employees of the consolidators was supported by substantial evidence, and thus that its analysis of the § 8(b)(4) and § 8(e) issues was sound. [4.] It therefore enforced the Board's order and denied the NYSA and ILA petitions for review. *International Longshoremen's Ass'n v. NLRB, 537 F.2d 706 (2d Cir. 1976)*, cert. denied, *429 U.S. 1041, 97 S. Ct. 740, 50 L. Ed. 2d 753*, Reh. denied, *430 U.S. 911, 97 S. Ct. 1187, 51 L. Ed. 2d 589 (1977)*. A petition for reconsideration and **[**14]** recall of mandate was denied by the Second Circuit on December 16, 1977. A subsequent petition to the NLRB to reopen the unfair labor practice hearing was denied on August 12, 1978.

II. PROCEEDINGS IN THE DISTRICT COURT

Conex and Twin filed substantially identical complaints in the district court, and on April 22, 1977 the two actions were consolidated. In Count I the plaintiffs alleged that the defendants' enforcement of the Rules on Containers and Dublin Supplement constituted a group boycott of the plaintiffs that is Per se illegal under *§§ 1* and *3* of the Sherman Act. *15 U.S.C. §§ 1*, *3*. They sought treble damages pursuant to *§ 4* of the Clayton Act, *15 U.S.C. § 15*, for injury to their business or property resulting from that boycott. In Count III plaintiffs alleged that ILA committed unfair labor practices in **[**15]** violation of § 8(b)(4)(ii)(B) of the LMRA, that those violations injured plaintiffs in their business or property, and that ILA was liable for such damages under § 303(b) of the LMRA, *29 U.S.C. § 187(b)*. [5.] A jury trial was demanded. Thereafter Conex and Twin moved for partial summary judgment as to liability on Counts I and III. They contended that the decision of the NLRB, enforced by the Second Circuit, established all facts material to liability issues, and that the defendants were collaterally estopped from attempting to relitigate those issues. Thus, they urged, only the amount of damages remained for trial.

[16]** In response to that motion the defendants contended that the judgment in the Second Circuit should have no issue-preclusion effect; that the activities complained of were within the protection of the non-statutory labor exemption to the antitrust laws; that if non-exempt, those activities should be tested by the rule of reason; that there were material issues of fact as to certain defenses; and that the § 303(b) claim was time barred.

The district court, although it accepted the Conex-Twin contentions in several respects, nevertheless denied partial summary judgment on both counts. Recognizing, however, that the order involved controlling questions of law as to which there is a substantial ground for difference of opinion, and that if those questions were decided in plaintiffs' favor partial summary judgment on one or both of the counts in issue might have been proper, the court on February 22, 1978 amended the opinion to include the formal statement required by *28 U.S.C. § 1292(b)*. The plaintiffs filed a timely notice of appeal, and this court permitted it.

III. SCOPE OF REVIEW

The parties disagree as to what legal issues may be considered on this appeal. **[**17]** Both sides agree that the four questions of law certified by the district court are properly before us. [6.]

[4.] The court announced that it was "not similarly impressed" with the Board's other arguments in support of its position. *537 F.2d at 712*.

[5.] That section provides:

Whoever shall be injured in his business or property by reason of any violation of subsection (a) may sue therefor in any district court of the United States subject to the limitations and provisions of (section 301) hereof without respect to the amount in controversy, or in any other court having jurisdiction of the parties, and shall recover the damages by him sustained and the cost of the suit.

[6.] These are:

[*502] In supporting their motion to strike portions **[**18]** of the appellees' briefs, appellants suggest that since the defendants prevailed in the district court on the motion for summary judgment they may not raise issues of law decided adversely to them, or not decided at all. Absent a cross-appeal, which is unavailable to a prevailing party, they contend that these issues are not properly before this court. The appellees in turn argue that because the district court refused to identify as controlling questions several equitable defenses, those defenses may not be considered in a *§ 1292(b)* appeal. Neither view is correct. In *Katz v. Carte Blanche Corp., 496 F.2d 747* (3d Cir.) (en banc), Cert. denied, *419 U.S. 885, 95 S. Ct. 152, 42 L. Ed. 2d 125 (1974)*, the court stated the rule governing *§ 1292(b)* interlocutory appeals:

> (Once) leave to appeal has been granted the court of appeals is not restricted to a decision of the question of law which in the district judge's view was controlling.

496 F.2d at 754. Accord, *Link v. Mercedes-Benz of North America, Inc., 550 F.2d 860, 865 n. 2* (3d Cir.) (Seitz, C. J., concurring), Cert. denied, *431 U.S. 933, 97 S. Ct. 2641, 53 L. Ed. 2d 250 (1977)*; **[**19]** *Johnson v. Alldredge, 488 F.2d 820 (3d Cir. 1973)*, cert. denied, *419 U.S. 882, 95 S. Ct. 148, 42 L. Ed. 2d 122 (1974)*. This rule accords with fundamental principles of appellate review. An appeal pursuant to *§ 1292(b)*, like any other, is taken from the order of the district court, not from its opinion, and the court is "called upon not to answer the question certified but to decide an appeal." *Johnson v. Alldredge, supra, 488 F.2d at 823*. When an order or judgment is before a reviewing court, "(t)he prevailing party may . . . assert in a reviewing court any ground in support of his judgment, whether or not that ground was relied upon or even considered by the trial court." *Dandridge v. Williams, 397 U.S. 471, 475 n.6, 90 S. Ct. 1153, 1156 n. 6, 25 L. Ed. 2d 491 (1970)*; *Mills v. Electric Auto-Lite Co., 396 U.S. 375, 381 n.4, 90 S. Ct. 616, 24 L. Ed. 2d 593 (1970)*; See Note, Federal Jurisdiction and Procedure Review of Errors at the Instance of a Non-Appealing Party, 51 Harv.L.Rev. 1058, 1059-60 (1938).

In this case each argument advanced by the appellees would, if accepted, support the refusal to enter **[**20]** summary judgment of liability in favor of Conex and Twin on one or both counts. If, on the other hand, there are no genuine issues of material fact remaining to be tried, and the district court committed the legal errors of which appellants complain, we may correct those errors, and direct the entry of such a judgment. We could, of course, decline to consider all of the legal issues tendered once we found one which would sustain the denial of summary judgment. But ***HN1***[] considerations of judicial economy suggest that when a *§ 1292(b)* appeal is taken from the denial of summary judgment an appellate court should ordinarily consider all issues "properly put in dispute" bearing upon whether entry of judgment was appropriate. *Johnson v. Alldredge, supra, 488 F.2d at 823*. Thus the several motions to strike portions of the parties' briefs will be denied, and ***HN2***[] we will consider all grounds advanced in support of the grant of summary judgment and all grounds suggested for sustaining its denial.

IV. THE § 303 CLAIMS AGAINST ILA

[21]** ***HN3***[] Under § 303(a) of the National Labor Relations Act, *29 U.S.C. § 187(a)*, it is unlawful for a labor organization to engage in any activity or conduct defined as an unfair **[*503]** labor practice in § 8(b)(4) of the Act. Persons injured in their business or property by such a violation may bring suit for money damages against the labor organization which committed it. [7] Conex and Twin pointed out that the NLRB found that ILA had committed § 8(b)(4) unfair labor practices, and that the Second Circuit affirmed that finding. That determination, they suggest, is

---

1. Where plaintiff's business is conducted unlawfully, that is, where it operates as a freight forwarder having been refused a license by the Interstate Commerce Commission to so operate, has it suffered injury "in its business" which is compensable in an action under Section 303 of the Labor Management Relations Act?

2. Does the NLRB's finding of an unfair labor practice foreclose consideration of the labor exemptions, statutory or implied, to the antitrust laws?

3. Must the legality of the Rules on Containers be tested against a Per se rule of antitrust violation?

4. Where plaintiff's business is conducted unlawfully, that is, where it operates as a freight forwarder having been refused a license by the Interstate Commerce Commission to so operate, has it suffered injury to its business which is compensable under the Clayton Act?

[7] See note 3 Supra.

binding here, leaving nothing to be litigated except the determination of damages. The appellees resist this suggestion for reasons we now address.

A. Collateral Estoppel

The district court held that the NLRB's finding that the ILA had committed a § 8(b)(4) violation, made in a proceeding to which both ILA and the plaintiffs were parties, collaterally estops it from litigating its liability for damages on **[**22]** the § 303(b) count. ILA contends this holding was error.

First, ILA urges that the finding by the NLRB, an administrative agency, that the boycott complained of was illegal, is not entitled to res judicata effect. The cases relied upon in support of this contention [8.] were, however, decided before the Supreme Court's decision in *United States v. Utah Construction & Mining Co., 384 U.S. 394, 422, 86 S. Ct. 1545, 1560, 16 L. Ed. 2d 642*, (1966), which stated that:

[23]**

> When an administrative agency is acting in a judicial capacity and resolves disputed issues of fact properly before it which the parties have had an adequate opportunity to litigate, the courts have not hesitated to apply Res judicata to enforce repose.

Since Utah Construction courts in several circuits have held that prior NLRB unfair labor practice determinations were controlling on the issue of liability, as to both facts and law, in a subsequent § 303(b) damage action. E. g., *International Wire v. Local 38, IBEW, 475 F.2d 1078* (6th Cir.), cert. denied, *414 U.S. 867, 94 S. Ct. 63, 38 L. Ed. 2d 86 (1973)* (res judicata against charging party); *Texaco, Inc. v. Operative Plasterers & Cement Masons, 472 F.2d 594* (5th Cir.), Cert. denied, *414 U.S. 1091, 94 S. Ct. 721, 38 L. Ed. 2d 548 (1973)* (res judicata against charged party); *Painters District Council 38 v. Edgewood Contracting Co., 416 F.2d 1081 (5th Cir. 1969)*; *Eazor Express, Inc. v. General Teamsters Local 326, 388 F. Supp. 1264, 1266-67 (D.Del.1975)*. These holdings are undoubtedly sound. **[**24]** ***HN4***[] The NLRB has been designated by Congress as the tribunal of choice for the adjudication of unfair labor practices, and the doctrine of primary jurisdiction is a judicial recognition of the importance of that designation. See, e.g., *Meat Cutters v. Jewel Tea Co., 381 U.S. 676, 684-85, 85 S. Ct. 1596, 14 L. Ed. 2d 640 (1965)*. Board decisions are subject to judicial review on all issues of law. Factual issues are reviewed by a substantial evidence standard, one at least as rigorous as that applied in reviewing non-jury judicial determinations, *Fed.R.Civ.P. 52(a)*, and a good deal more rigorous than is applied to jury verdicts. When an NLRB decision subject to such judicial review has become final it is not readily apparent that it should have any less issue preclusion effect than would judgments resulting from non-jury or jury trials.

ILA next argues that even assuming applicability of collateral estoppel to issues of fact, the issues in this case are primarily legal, and on legal issues less deference to a prior decision is appropriate. The § 303(b) cases referred to above, giving res judicata effect to NLRB unfair labor **[**25]** practice judgments, recognize no such distinction. Moreover, both the Supreme Court and this circuit **[*504]** have rejected that approach. In *Commissioner of Internal Revenue v. Sunnen, 333 U.S. 591, 601-02, 68 S. Ct. 715, 92 L. Ed. 898 (1948)*, the Court made clear that ***HN5***[] issue preclusion applies both as to issues of fact and as to issues of law, so long as the same transactions and legal principles are involved and there has been no subsequent change in the governing law. See *Vanderveer v. Erie Malleable Iron Co., 238 F.2d 510, 514-15 (3d Cir. 1956)*, Cert. denied, *353 U.S. 937, 77 S. Ct. 815, 1 L. Ed. 2d 760 (1957)*. In *Scooper Dooper, Inc. v. Kraftco Corp., 494 F.2d 840, 844-45 & n.10 (3d Cir. 1974)*, which concerned the collateral estoppel effect of a prior judicial determination that a collective bargaining agreement fell within the labor exemption to the antitrust laws, we expressly recognized that a prior determination of a mixed question of fact

---

[8.] See, e.g., *Old Dutch Farms, Inc. v. Milk Drivers & Dairy Employees Union, 359 F.2d 598, 602-03 n. 7* (2d Cir.), Cert. denied, *385 U.S. 832, 87 S. Ct. 71, 17 L. Ed. 2d 67 (1966)*; *United Brick & Clay Workers of America v. Deena Artware, Inc., 198 F.2d 637 (6th Cir. 1952)*, Cert. denied, *345 U.S. 906, 73 S. Ct. 644, 97 L. Ed. 1342 (1953)*. In *Riverton Coal Co. v. UMW, 453 F.2d 1035, 1042* (6th Cir.), Cert. denied, *407 U.S. 915, 92 S. Ct. 2439, 32 L. Ed. 2d 690 (1972)*, the legal issues sought to be foreclosed on the basis of a prior agency decision had not been decided in prior NLRB proceedings involving the same parties. Hence that case is inapposite here.

and law precluded relitigation of that issue, provided that the party to be estopped **[**26]** had "a full and fair opportunity" to present his claim in the prior litigation. *Id. at 844*. [9.]

[27]** ***HN6***[] It is a settled principle of administrative law that the courts give considerable deference to the construction of statutes by those agencies charged with the primary responsibility for their enforcement. E.g., *Red Lion Broadcasting Co. v. FCC, 395 U.S. 367, 381, 89 S. Ct. 1794, 23 L. Ed. 2d 371 (1969)*. Thus it is arguable that the scope of judicial review of agency decisions on questions of law is narrower than would be appellate review of court decisions on legal issues. But that difference does not suggest that res judicata on legal issues should be less applicable to agency judgments, for the rule of deference to agency interpretations of governing statutes is binding not only on a court reviewing an agency decision, but also on a court deciding a legal issue in the first instance. E.g., *Zemel v. Rusk, 381 U.S. 1, 11-12, 85 S. Ct. 1271, 14 L. Ed. 2d 179 (1965)*. Moreover, in this case the decision of the NLRB was taken to the Court of Appeals for the Second Circuit which passed upon the legal issues involved.

Finally, ILA suggests that for two reasons it did not receive a "full and fair opportunity" to litigate before the NLRB. First, it contends that **[**28]** the Board's procedures provided inadequate opportunity for discovery against Conex and Twin. Had ILA been able to avail itself of the discovery provisions of the Federal Rules of Civil Procedure, it argues, it might have been able to establish that Conex and Twin had developed their "tradition" of off-pier consolidation by fraudulent avoidance of the 1969 Rules on Containers, and had such evidence been available it might well have led to a different result before the Board.

As a general rule, recognition of a judgment in a prior action between the same parties should be denied only upon a compelling showing of unfairness. See Restatement (Second) of Judgments (Tentative Draft No. 1, 1973) § 68.1 and Comment f. This is particularly true where, as here, the parties litigant were represented by expert lawyers who had every reason to expect that a defeat in the first action might lead to a second suit founded on the judgment. The Supreme Court has suggested, however, that in an appropriate case a district court may deny collateral estoppel effect on the ground of unfairness, even to a judgment in a prior action between the same parties, if there are "procedural opportunities available **[**29]** to the (defendant) that were unavailable in the first action of a kind that might be likely to cause a different result." *Parklane Hosiery Co. v. Shore,* ***[*505]*** *439 U.S. 322, 331, 99 S. Ct. 645, 652* & n. 15, *58 L. Ed. 2d 552 (1979)*. The court included discovery among the procedural devices the unavailability of which in the first action may militate against application of estoppel by judgment. Id. at n.15. On the record considered by the district court, however, ILA has made no showing of unfairness. It stipulated before the NLRB that the record in *Balicer v. ILA, 364 F. Supp. 205* (D.N.J.), aff'd, *491 F.2d 748 (3d Cir.1973)*, together with the supplemental affidavits submitted, sufficed for the decision of the unfair labor practice charges. When it made that stipulation ILA knew that Mr. Jacobs, a principal witness for the charging parties in Balicer, had previously testified before the Federal Maritime Commission regarding a pattern of payoffs on the docks which facilitated evasion of the 1969 Rules. Thus the parties before the Board were undoubtedly on notice of the likely existence of the same evidence they seek to introduce in this proceeding. **[**30]** Nevertheless, ILA stipulated to a more limited record, bypassing the opportunity to resort to the not insubstantial provisions for production and examination of witnesses and documents available in NLRB cases. See *29 C.F.R. §§ 102.30*, *102.31 (1977)*. Instead of probing the transactions described in the Jacobs testimony, ILA stipulated that "there (were) no material issues of credibility in the record before the (Board) for resolution requiring a formal hearing," and assured the ALJ that the unfair labor practice charges "(could) be fully resolved on the basis of the exhibits and transcripts of testimony entered in the (Balicer case)." Joint App. 209-10. Thus whatever the faults of the discovery procedures available before the Board, ILA's failure to discover additional evidence was not the consequence of those procedures, but of its own decision

---

[9.] ILA also argues against recognition of the judgment in the unfair labor practice case in that the NLRB's proceedings are directed toward vindication of "public" rights, while those asserted in the § 303(b) count are only private. It is true that the charging party in an unfair labor practice proceeding before the Board advances the public interest in a fair and orderly labor marketplace. But the typical charging party acts primarily in his own interest to halt conduct that is injuring him personally. Equally when resorting to a § 303(b) remedy the plaintiff, while acting primarily in his own interest, vindicates the public policy of the National Labor Relations Act prohibiting unfair labor practices. That public policy, as interpreted by the NLRB, should in the § 303(b) case determine whether or not there has been a violation. We are therefore unpersuaded that the differing object of proceedings before the NLRB should serve as a ground for reducing their collateral estoppel effect.

not to seek or present further evidence in the NLRB proceeding. It cannot rely on procedural inadequacies in the NLRB case which in no way affected its outcome.

ILA relies on *Hudson River Fishermen's Ass'n v. FPC, 498 F.2d 827 (2d Cir. 1974)*, for the proposition that collateral estoppel should not be applied where relevant evidence **[**31]** has come to light that could not have been discovered in the prior proceeding by the exercise of due diligence. That case involved an application to reopen a licensing proceeding before the Federal Power Commission in order to correct an error in a technical report which had been relied upon in that proceeding, which error could not have been discovered by the exercise of due diligence. The Second Circuit, reviewing the FPC's refusal to reopen the hearing, construed Section 313(b) of the Federal Power Act, *16 U.S.C. § 825L (b)*, as permitting reopening, and remanded for a hearing. *Id. at 833-34*. Assuming that a principle similar to that announced in the Hudson River case also applies in NLRB proceedings, this is not the proper forum for its application. For as that case suggests, if ILA has found new evidence, its appropriate remedy is to seek to reopen the unfair labor practice case either before the NLRB or the Second Circuit. We note that such attempts have been made and rejected. [10.]

[32]** Second, ILA argues that collateral estoppel is unfair because the Board's resolution of the unfair labor practice issue represented an abrupt and unanticipated change in the applicable legal doctrine. Prior to 1975, they argue, there were indications that the Rules on Containers were **[*506]** legal under both the antitrust laws and the Labor Act. [11.] ILA cites no authority for the proposition that collateral estoppel effect may be denied to a judgment because it reflects a change in the prior applicable law, and in the § 303 context such a rule appears unwarranted. A primary purpose of the § 303(b) remedy is to make the plaintiff whole for injury done to his business in violation of federal labor law. *Teamsters Local 20 v. Morton, 377 U.S. 252, 260, 84 S. Ct. 1253, 12 L. Ed. 2d 280 (1964)*. To allow the union a defense of belief in legality in § 303 cases would cast the burden of such losses upon innocent parties in direct contravention of that policy. While the unforeseeability of an unfair labor practice judgment may reduce the deterrent value of the § 303 sanction, Congress's essential compensatory purpose remains, and should not be thwarted. Even if such **[**33]** a rule were recognized it might not help ILA here, for the prior actions upon which it claims to have relied never resulted in a final determination that the Rules on Containers were legal. Moreover, both the ICTC cases were decided prior to the adoption and enforcement of the Dublin Supplement, a development which might well have changed the earlier tribunals' views of the problem. The claim of an unanticipated change in the law does not persuade us that the judgment in the NLRB case should not bind ILA.

B. The Statute of Limitations

ILA pleads that the § 303(b) claim is time-barred by the one year Puerto Rico statute of limitations, *P.R. Laws Ann. tit. 31, § 5298(2)*, because **[**34]** Conex and Twin are incorporated in that Commonwealth and each conducts one end of its freight consolidator business there. The district court rejected that contention, holding that the consolidators' § 303(b) claim was governed by New Jersey's six year statute of limitations for actions in contract, *N.J.Stat.Ann. § 2A:24-1* (West Supp. 1978), and thus was not time-barred. No federal statute imposes an express limitation upon actions brought under § 303(b) of the Labor Management Relations Act. The parties agree that in such a vacuum a federal court will apply the law of the state in which it sits. See, e.g., *United Auto Workers v.*

---

10. These rejections also may indicate that evidence of the manner in which Conex and Twin acquired the stuffing and stripping work would not have had any impact on the NLRB decision. It was the General Counsel's position in the § 10(L) case before Judge Lacey, and that of the charging parties before the Board, that regardless of how the latter acquired the work the Rules on Containers were an illegal work reacquisition agreement. The Board appears subsequently to have adopted that position. See *International Longshoremen's Ass'n (Dolphin Forwarding, Inc.), 236 N.L.R.B. No. 42*, 98 L.R.M.M. 1276, 1277 n.3 (1978). Because we hold that there was an adequate opportunity to litigate the work acquisition contention, however, it is not necessary to rest our holding on the probable irrelevancy of the tendered evidence to the unfair labor practice determination.

11. In *International Longshoremen's Ass'n, Local 1248 (U.S. Naval Supply Center), 195 N.L.R.B. 273 (1972)*, an attempt to enforce the Rules against an off-pier consolidator was held to be an unlawful secondary boycott. Thus a full year before the enforcement of the Dublin Supplement began the NLRB had questioned its legality.

Hoosier Cardinal Corp., 383 U.S. 696, 86 S. Ct. 1107, 16 L. Ed. 2d 192 (1966); *Cope v. Anderson, 331 U.S. 461, 67 S. Ct. 1340, 91 L. Ed. 1602 (1947)*. At this point they part company.

ILA argues that a federal court sitting in New Jersey on a § 303(b) case would look not to the most closely analogous New Jersey statute of limitations, but rather to New Jersey's choice of law rules. Under those rules, it suggests, New Jersey would apply not its own six year statute of limitations, but that of Puerto Rico. In advancing this argument **[**35]** ILA relies on the Rules of Decision Act, *28 U.S.C. § 1652*, as interpreted in *Klaxon Co. v. Stentor Electric Mfg. Co., 313 U.S. 487, 61 S. Ct. 1020, 85 L. Ed. 1477 (1941)*, and *Guaranty Trust Co. v. York, 326 U.S. 99, 65 S. Ct. 1464, 89 L. Ed. 2079 (1945)*. That statute and those authorities, however, deal with the law governing causes of action arising under state law. When, as in § 303(b) cases, the cause of action arises under federal law, they have no applicability. ***HN7***[] Which state statute is to be borrowed and how it is to be applied to a cause of action based on federal law are federal law questions, and are determined by federal statutory policy. *Holmberg v. Armbrecht, 327 U.S. 392, 395, 66 S. Ct. 582, 90 L. Ed. 743 (1946)*. Thus state choice of law rules can govern the choice of a statute of limitations for a § 303(b) claim only if reference to those rules furthers substantive federal policy. *Moviecolor, Ltd. v. Eastman Kodak Co., 288 F.2d 80, 83-84* (2d Cir.), Cert. denied, *368 U.S. 821, 82 S. Ct. 39, 7 L. Ed. 2d 26 (1961)*. **[**36]**

This principle has been recognized in § 303(b) cases. In *United Mine Workers v. Railing, 401 U.S. 486, 91 S. Ct. 991, 28 L. Ed. 2d 272* ***[*507]*** *(1970)*, a case presenting, as does this, both a § 303(b) claim and an antitrust claim against a labor organization, the Court remanded to the Fourth Circuit so that it could consider whether the state statute of limitations applicable to the § 303(b) claim should be construed to apply, with respect to accrual of the cause of action, in the same manner as *15 U.S.C. § 15b* had been construed in *Zenith Radio Corp. v. Hazeltine Research, Inc., 401 U.S. 321, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1970)*, as applying to an antitrust claim. On remand Judge Craven recognized that both § 303(b) and *§ 4* of the Clayton Act provided for recovery for injury to business or property, and concluded that the state statute of limitations governing the § 303(b) claim should be interpreted in the same manner as *15 U.S.C. § 15b*. Indeed he went further, suggesting to the district court that on remand it should consider whether to read into the state statute a tolling provision similar to **[**37]** *15 U.S.C. § 16(b)* (which tolls *§ 15b* for private antitrust actions during the pendency of government enforcement actions), to toll the time bar against the § 303(b) count during the pendency of unfair labor practice proceedings before the *NLRB. Railing v. United Mine Workers, 445 F.2d 353 (4th Cir. 1971)*; Cf. *Kreshtool v. International Longshoremen's Ass'n, 242 F. Supp. 551, 554 (D.Del.1965)*. See also *Kinty v. United Mine Workers, 544 F.2d 706, 723 (4th Cir. 1976)*, Cert. denied, *429 U.S. 1093, 97 S. Ct. 1107, 51 L. Ed. 2d 540 (1977)*; *Metropolitan Paving Co. v. International Union of Operating Eng'rs, 439 F.2d 300, 306* (10th Cir.), Cert. denied, *404 U.S. 829, 92 S. Ct. 68, 30 L. Ed. 2d 58 (1971)*. These cases are authority for the rule that ***HN8***[] in a § 303(b) case the specific state statute of limitations that is adopted, and the manner of its adoption, are to be determined by the policies that underlie the federal regulatory statute.

ILA argues that *Cope v. Anderson, 331 U.S. 461, 67 S. Ct. 1340, 91 L. Ed. 1602 (1966)*, **[**38]** indicates that state choice of law rules ought invariably to determine the limitations period for federal causes of action. In Cope, an action brought under the National Bank Act, 12 U.S.C. §§ 63, 64, the Court applied the forum state's "borrowing statute" to determine the limitations period under the Act. The explanation for this holding is obscure, and it is far from certain that the Cope rationale was intended to extend either to judge-made choice of law rules or to actions under § 303(b). Furthermore, in a more recent decision, *UAW v. Hoosier Cardinal Corp., 383 U.S. 696, 86 S. Ct. 1107, 16 L. Ed. 2d 192 (1966)*, the Court expressly reserved the issue whether state choice of law rules should be applied in determining the applicable statute of limitations under § 303(b). *Id. at 705 n.8, 86 S. Ct. 1107*. Cope cannot, therefore, be regarded as foreclosing that question, which is squarely before us.

We resolve it in favor of a federal rule. ***HN9***[] The choice of law rule to be applied to a § 303(b) cause of action must meet two criteria. It must **[**39]** produce results consistent with national labor policy, and it should, insofar as is possible, be relatively easy to administer. On both counts, we think, application of a federal choice of law rule to determine the governing time bar is preferable. Federal labor policy may be thwarted by state limitations periods unduly short or discriminatory. Cf. *UAW v. Hoosier Cardinal Corp., 383 U.S. 696, 707, n.9 16 L. Ed. 2d 192, 86 S. Ct. 1107 (1966)*. State choice of law rules, geared as they are to geographical factors or state policy interests, may be insensitive to this federal concern. From the viewpoint of ease of administration, state choice of law rules have an initial advantage. Already formulated, they are readily at hand. But their frequently complex calculus of contacts and interests may produce considerable difficulty in application and uncertainty of outcome without any corresponding improvement of result. A federal rule, in contrast, recognizing the more limited range of factors relevant under federal law, can be simplified.

While neither party has briefed the issue of the appropriate federal choice of law rule for § 303(b) cases, we conclude upon careful reflection **[**40]** that ***HN10***[] as a general rule the governing statute of limitations should be that of the state in which the **[*508]** federal court sits, unless a party can make a compelling showing that the application of that statutory time bar would seriously frustrate federal labor policy or work severe hardship to the litigants. Cf. *UAW v. Hoosier Cardinal Corp., 383 U.S. at 706, 86 S. Ct. 1107*. See Hill, State Procedural Law in Federal Nondiversity Litigation, 69 Harv.L.Rev. 66, 102-03 & n.64 (1955). Reference to the forum state's statute of limitations absent some such showing provides an efficient and readily administrable rule for the vast majority of § 303(b) cases, while leaving leeway for the relatively rare instances in which the application of the forum state's statute would seriously distort the operation of the § 303 remedy. How serious that distortion must be to displace the forum state's statute of limitations we need not resolve in this case. Here the district court applied that limitations period. Neither party suggests that its application endangers federal labor **[**41]** policy or creates any risk of unfairness to the litigants. Absent such danger or risk the district court's application of the New Jersey statute must be affirmed. [12.]

C. Illegality

ILA argues that even if it is collaterally estopped to contest the § 8(b)(4) violation, and even though the damage action was timely filed, its contention **[**42]** that Conex and Twin were operating at the time of the unfair labor practices without freight forwarder permits issued by the Interstate Commerce Commission (ICC), would, if such licenses were required, be a complete defense to the § 303(b) claim. [13.] Conex and Twin have always asserted that they are not freight forwarders within the meaning of Part IV of the Interstate Commerce Act, 49 U.S.C. § 1002(a)(5)(A), and that the operating authority granted them by the Federal Maritime Commission (FMC) sufficed. The district court, without determining whether or not ICC licenses were required, concluded that if ILA could establish that they were, a judgment in favor of Conex and Twin on the § 303(b) claim would be precluded.

The district court recognized that in an unfair labor practice proceeding before the Board the charging party's violation of an unrelated **[**43]** statute is not a defense to a charge of unlawful secondary boycott activity. See, e. g., *NLRB v. Springfield Building & Construction Trades Council, 262 F.2d 494 (1st Cir. 1958)*. But unlike an action before the Board, a damage action for injury to "business or property" under § 303(b), the district court held, was "purely compensatory," designed to return to plaintiffs only those losses to which they were legally entitled. If the plaintiffs' businesses were conducted without the required ICC permit, the court reasoned, they were "nonexistent in the eyes of the law, (and) entitled to no legal protection." *452 F. Supp. at 1034*.

This argument has a simplistic surface appeal reminiscent of the long discredited doctrine that a person driving without a license is a trespasser on the highway who may not recover for injury negligently inflicted upon him. See, e. g., *Potter v. Gilmore, 282 Mass. 49, 184 N.E. 373 (1933)*; Annotation, *87 A.L.R. 1462*. Like that doctrine the argument suffers from serious flaws. First, despite the fact that only compensatory damages may be recovered under § 303(b), e.g., *Teamsters Local 20 v. Morton, 377 U.S. 252, 260, 84 S. Ct. 1253, 12 L. Ed. 2d 280*

12. Because we hold that the choice of a governing limitations period, borrowed or otherwise, does not depend on New Jersey choice of law rules we need not decide whether, had we concluded New Jersey choice of law rules applied, the result would be different. We note, however, that since New Jersey Teamsters were employed by Conex and Twin in that state, and were deprived of employment there by the unfair labor practices complained of, it seems likely that New Jersey would apply its own statute of limitations. See *Schum v. Bailey, 578 F.2d 493 (3d Cir. 1978)*; *Allen v. Volkswagen of America, Inc., 555 F.2d 361, 364 (3d Cir. 1977)* (Seitz, C.J., concurring).

13. A similar illegality defense is raised with respect to the *§ 4* Clayton Act claim as well, and is discussed, Infra, Part V. C.

(1964), **[**44]** such actions, like the remedies available before the NLRB, serve an important deterrent purpose as well. Discussing the draft legislation that became **[*509]** § 303(b), Senator Taft, its sponsor, observed:

> . . . I think the threat of a suit for damages is a tremendous deterrent to the institution of secondary boycotts and jurisdictional strikes.

93 Cong.Rec. 5060; II Leg. Hist. of Labor Management Relations Act of 1947 at 1371, Cited in *Twin Excavating Co. v. Garage Attendants Local 731, 337 F.2d 437, 438 (7th Cir. 1964)*. Indeed, a secondary boycott is in the nature of a tort, and it is settled doctrine that almost all causes of action sounding in tort have deterrent as well as compensatory rationales. E.g., G. Calabresi, The Costs of Accidents (1970). Thus the effect of the proposed illegality defense is to sacrifice a recognized purpose of § 303(b), the deterrence of secondary boycotts in violation of federal labor policy, in the interest of encouraging compliance with an entirely unrelated federal policy of ICC licensing. The regulatory scheme enforced by the ICC has goals substantially unrelated to the federal policy against secondary boycotts, and **[**45]** its own independent set of statutory sanctions. See 49 U.S.C. § 1021. Absent contrary evidence, we assume that Congress felt these sufficient for the enforcement of the ICC regulatory scheme. The creation by judicial fiat of an additional sanction the withdrawal of the protection of § 303(b) because of a technical violation of an ICC licensing requirement must be viewed, as was the "trespasser on the highway" doctrine, as enforcing a punishment disproportionate to the crime. In short, the proposed defense would disrupt the balance struck by Congress between permissible and impermissible labor activities, with no discernible benefit, and perhaps some loss, to the ICC regulatory scheme.

Thus we hold that the district court erred in concluding that the absence of an ICC license would be a defense to liability under § 303(b) for the unfair labor practices found by the NLRB. We express no view on the question whether, in the trial on damages, evidence of the absence of such a license would bear upon the extent of injury to the business or property of Conex and Twin. **[**46]** That, we think, would depend upon the proof of such injury, and the relationship of that proof to the ability of Conex and Twin to carry on their business without a Part IV permit.

D. Equitable Defenses

ILA's equitable defenses tendered in opposition to summary judgment on liability were summarized by the district court as follows:

> ILA also argues estoppel En pais, laches, and equitable estoppel. These equitable theories are invoked based on ILA's claims that Conex intentionally avoided challenging the Rules on Containers when they were first implemented because, in fact, Conex thrived on their existence: watching the enforcement of the Rules drive its competitors out of business while developing techniques, including bribery of dock bosses and alteration of shipping documents, to evade the Rules' strictures.

452 F. Supp. at 1036. Without extended analysis the court ruled that a fuller development of the record was needed before it could rule on the sufficiency of the tendered defenses. Conex and Twin contend that this was error because the affidavits filed in support of the defenses were legally insufficient.

We start with the observation that the plaintiffs **[**47]** do not seek damages for any injury to their business or property occurring prior to the adoption of the Dublin Supplement in January, 1973. It was not until February, 1973, that the defendants commenced stripping and restuffing plaintiffs' containers. It was not until March, 1973, that plaintiffs were refused containers by the vessel owners. It was not until April, 1973, that they were blacklisted. In June, 1973, Conex filed an unfair labor practice charge with the NLRB. The record contains nothing suggesting that after January, 1973, Conex or Twin took or failed to take any action which could be the predicate for a defense of laches or of estoppel. Indeed ILA does not so argue. Thus we can eliminate from consideration any possibility **[*510]** that a § 303(b) cause of action which accrued in January, 1973, was barred by laches. Cf. *Falsetti v. Local 2026, UMW, 355 F.2d 658, 662 (3d Cir. 1966)*.

On appeal the ILA concentrates its equitable defense arguments on the period prior to the adoption of the Dublin Supplement. It points to two factors which it suggests are equitable bars to recovery for the post-Dublin Supplement injuries. First, Conex and Twin failed to file **[**48]** unfair labor practice charges between 1969, when the Rules were adopted, and 1973, when they were supplemented and finally enforced. Second, prior to 1973, while the

Rules were in effect, Conex and Twin managed to evade their enforcement. This conduct, ILA contends, gives rise to an estoppel En pais. It reasons that the plaintiffs knew they were targets of the Rules as early as July, 1969, and that they took steps, including forgery, bribery, and diversion of cargo to other ports, to make it appear they were in compliance. At the same time, the plaintiffs failed to bring an action before the Board to challenge the Rules on Containers. "Since appellees have always obeyed both the 10(L) injunction and the Board's cease-and-desist order, such timely challenge would have prevented any further violations of the Act and put an end to Appellant's (sic) damages while they were minimal." (ILA Brief at 33-34). The effect of these evasionary and dilatory tactics, ILA contends, was to persuade it (a) that the Rules were being enforced and (b) that they were not harmful. In reliance on those appearances, it proceeded to force the adoption of the Dublin Supplement. Since the plaintiffs' wrongful **[**49]** conduct induced the adoption of the Dublin Supplement, ILA contends, they cannot now claim compensation for injury resulting from its enforcement.

The defendants have not cited, and we have not found, any case in which the defense of equitable estoppel or estoppel En pais has been recognized in an action brought pursuant to § 303(b) of the Act. We need not decide whether such a defense should be recognized, however, because it is clear that even on the defendants' theory of estoppel En pais, the affidavits supporting the defense were insufficient to sustain it. In the case upon which ILA principally relies, ***HN11***[] the four elements of estoppel En pais are defined:

> (1) The party to be estopped must know the facts; (2) he must intend that his conduct must be acted upon or must so act that the party asserting the estoppel has a right to believe it is so intended; (3) the latter must be ignorant of the true facts; and (4) he must rely on the former's conduct to his injury.

United States v. Georgia Pacific Co., 421 F.2d 92, 96 (9th Cir. 1970) (quoting *Hampton v. Paramount Pictures Corp., 279 F.2d 100, 104* **[**50]** (9th Cir.), Cert. denied, *364 U.S. 882, 81 S. Ct. 170, 5 L. Ed. 2d 103 (1960))*. The relevant facts about the impact of the Rules apparently were known to the plaintiffs, and thus the first element of an estoppel exists. But there are no facts in the record to support any of the other three elements of the defense. ILA has cited no evidence for its implausible assertion that the consolidators' evasion of the Rules or failure to file an unfair labor practice charge was intended, or could reasonably have been believed to be intended, to induce it to bargain for the Dublin Supplement. The pleadings and affidavits indicate that the plaintiffs hoped that ILA would not respond at all, so that their evasion of the Rules could continue. Nor is the failure of Conex and Twin to bring an NLRB case prior to 1973 a fact which ILA had a "right to believe" was intended to induce the adoption of the Supplement. A rule that persons who failed to charge a continuing unfair labor practice at the first opportunity could for that reason later be barred from recovery, even when as in this case the severity of the practices drastically increased, would have dangerous consequences for national **[**51]** labor policy. Proceedings before the NLRB by a charging party involve substantial expense and often substantial risk of retaliation. Firms not yet seriously injured should not be compelled to risk a confrontation at the earliest possible moment for fear that if they do not they **[*511]** will thereafter be stripped of the protection of § 303(b).

ILA has also failed to suggest any facts indicating that it was in fact ignorant of the true state of affairs on the docks, or that it relied on an inaccurate version of events in adopting the Dublin Supplement. To the contrary, all of the evidence in the record suggests that ILA was very much aware that the Rules on Containers were Not enforced. [14.] Indeed, several sections of the Dublin Supplement are directed in so many words to the "evasion" or circumvention of the Rules on Containers. See Interpretive Bulletin No. 1, Interpretations 1.3-3, 1.6, 1.7, 1.8. ILA nowhere cites any information meeting the standards of *Fed.R.Civ.P. 56(c)* suggesting that it ever held, or acted upon, anything other than an accurate view of events.

[52]** Since there is no material issue of fact with respect to three of the four elements of an estoppel, we conclude that the equitable defense asserted by ILA would be legally insufficient to preclude the imposition of liability under § 303(b) and that the district court erred in denying summary judgment in order to explore it further.

---

14. See, e.g., Letter of Thomas W. Gleason (President of the ILA) to James Dickman (President of NYSA) May 11, 1972. Joint App. 321a.

We hold, then, that the order appealed from, insofar as it denied a summary judgment of liability on Count III of the Conex and Twin complaints must be reversed.

V. THE *§ 4* CLAYTON ACT CLAIM

In Count I of their complaints Conex and Twin charge that the Dublin Supplement and the steps taken to implement it are a concerted refusal to deal, and thus a Per se violation of the Sherman Act. While Count III seeks relief only against ILA, Count I joins both union and employer defendants, all of whom, admitting both the agreement and the steps taken to implement it, assert several defenses to the antitrust claim, which we now consider.

A. The Labor Exemption

The principal defense tendered in opposition to summary judgment is that both the Rules and the Dublin Supplement are collective bargaining arrangements falling within the labor exemption to the antitrust **[**53]** laws. The defendants concede that both agreements involved concerted action between the ILA and the employer defendants, and hence are ineligible for the statutory antitrust exemptions provided in the Clayton Act, *15 U.S.C. § 17*, *29 U.S.C. § 52*, and the Norris-LaGuardia Act, *29 U.S.C. §§ 104*, *105*, *113*. *UMW v. Pennington, 381 U.S. 657, 661-62, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; *United States v. Hutcheson, 312 U.S. 219, 232, 61 S. Ct. 463, 85 L. Ed. 788 (1941)*.

Thus the dispute is over the applicability of the so-called nonstatutory labor exemption, defined by the Supreme Court in the series of cases beginning with *Apex Hosiery v. Leader, 310 U.S. 469, 60 S. Ct. 982, 84 L. Ed. 1311 (1940)*, and culminating in *Connell Construction Co. v. Plumbers & Steamfitters Local 100, 421 U.S. 616, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)*. That dispute, in turn, presents two aspects: (1) whether the NLRB finding of violations of §§ 8(b)(4) (ii)(B) and 8(e) precludes relitigation of the illegality of the charged conduct as a matter of federal labor law; and (2) whether, **[**54]** assuming such illegality, the nonstatutory labor exemption should nevertheless be available.

1. The Preclusive Effect of the NLRB Judgment On Labor Law Issues

In Part IV. A., Supra, we held that ILA was estopped by the judgment in the NLRB unfair labor practice case from relitigating in the § 303(b) case the legality of the Dublin Supplement and the steps taken to implement it. To the extent that the undisputed facts and conclusions of law referred to in that Part are relevant on the availability of the labor exemption to ILA, our prior analysis is equally applicable. Moreover, NYSA, as the collective bargaining representative of the vessel owners and **[*512]** stevedores, was a party to the NLRB action, an appellant in the Second Circuit and an unsuccessful petitioner for certiorari in the Supreme Court. None of these defendants contend that they were so insufficiently represented before the Board that they should not be bound to the same extent as ILA by the resulting judgment. [15] Since both ILA and the employer defendants were represented before the NLRB and in the Court of Appeals in the Second Circuit, we hold that they are equally bound by the judgment, and **[**55]** estopped to contest the finding that their efforts to enforce the Rules were unfair labor practices. We reject, as well, appellees' contention that recognizing the issue preclusion effect of the NLRB decision deprives them of their *seventh amendment* right to a jury trial. *Parklane Hosiery Co. v. Shore, 439 U.S. at 332, 99 S. Ct. at 652* & n.19.

2. The Effect of the § 8(e) Violation upon the Availability of the Labor Exemption

We are faced, then, with the question whether a contract or combination, which has been adjudicated to be a violation of the prohibition in § 8(e) against contracts calling for secondary boycotts, can nevertheless be held to be within the nonstatutory antitrust exemption because it was negotiated as a part of a collective bargaining agreement.

---

[15] The stevedore defendants do contend that as a matter of ***antitrust law*** the record on summary judgment is legally insufficient to bind them. That contention is discussed at Part V. F., Infra.

Prior to 1959 it was an unfair labor **[**56]** practice under then § 8(b)(4)(A) of the National Labor Relations Act for a union to urge employees of an employer to refuse to perform work in order to compel their employer to cease doing business with a third party. That prohibition did not apply to employer refusals to deal that were embodied in collective bargaining agreements, however, and unions remained free to seek such agreements by collective bargaining, informational picketing or otherwise. See *Brotherhood of Carpenters v. NLRB, 357 U.S. 93, 78 S. Ct. 1011, 2 L. Ed. 2d 1186 (1958)* (Sand Door). Congress concluded that these "hot cargo" agreements gave unions too much leverage against secondary parties, and in 1959 it amended § 8(b)(4), to prohibit coercion directed not only at employees of the primary employer, but also against the employer himself. It also added in § 8(e) a prohibition upon contracts obligating employers to refrain from doing business with third parties. [16.] In *National Woodwork Manufacturers Ass'n v. NLRB, 386 U.S. 612, 87 S. Ct. 1250, 18 L. Ed. 2d 357 (1967)*, the Court narrowly construed the prohibitions in the 1959 amendments. *Distinguishing Allen Bradley Co. v. Local Union No. 3, IBEW, 325 U.S. 797, 65 S. Ct. 1533, 89 L. Ed. 1939 (1945)*, **[**57]** as a case involving secondary boycott activity, the Court held that while secondary activity aimed at acquiring for employers and union members work already being performed by third parties was prohibited, Congress did not intend the prohibition of work preservation clauses in collective bargaining agreements even though such clauses might fall within the literal terms of § 8(e). Indeed the Court explicitly recognized that the 1959 amendments made no change in the rule of *Fibreboard Paper Products Corp. v. NLRB, 379 U.S. 203, 85 S. Ct. 398, 13 L. Ed. 2d 233 (1964)*, that work preservation is a mandatory subject of collective bargaining. *386 U.S. at 642, 87 S. Ct. 1250*. The determination whether a given demand went beyond the legitimate primary area of work preservation and into the forbidden secondary boycott area was said to involve in each instance a factual inquiry into all the surrounding circumstances. *386 U.S. at 644, 87 S. Ct. 1250*. Here the forum of choice, the NLRB, has made that factual inquiry and has determined that the Rules are directed not at work preservation, but at acquiring work from the employees of a secondary employer. **[**58]**

[*513] One consequence of the NLRB's decision is to foreclose the argument that the object of the agreement ultimately reached is a mandatory subject of collective bargaining, for an agreement that violates § 8(e) cannot meet that standard. The NLRB has stated that:

> ***HN12***[] the Act does not permit . . . the insistence, as a condition precedent to entering into a collective bargaining agreement, that the other party to the negotiations agree to a provision or take some action which is unlawful or inconsistent with the basic policy of the Act. Compliance with the Act's requirement of collective bargaining cannot be made dependent upon the acceptance of provisions in the agreement **[**59]** which, by their terms or in their effectuation, are repugnant to the Act's specific language or basic policy.

National Maritime Union (Texaco Co.), 78 N.L.R.B. 971, 981-82 (1948), enf'd, *175 F.2d 686 (2d Cir. 1949)*, Cert. denied, *338 U.S. 954, 70 S. Ct. 492, 94 L. Ed. 589 (1950)*. See also *NLRB v. Wooster Div., Borg-Warner Corp., 356 U.S. 342, 360, 78 S. Ct. 718, 2 L. Ed. 2d 823 (1958)* (Harlan, J., concurring and dissenting).

A further consequence of the NLRB's factual determination, in the antitrust context, is suggested in Justice Brennan's National Woodwork discussion:

> In effect Congress, in enacting § 8(b)(4)(A) of the Act (the statutory predecessor of § 8(e)), returned to the regime of *Duplex Printing Press Co. and Bedford Cut Stone Co., supra*, and barred as a secondary boycott union activity directed against a neutral employer, including the immediate employer when in fact the activity directed against him was carried on for its effect elsewhere.

386 U.S. at 632, 87 S. Ct. at 1262. Justice Brennan's reference to *Duplex Printing Press Co. v. Deering, 254 U.S. 443, 41 S. Ct. 172, 65 L. Ed. 349 (1921)*, **[**60]** and *Bedford Cut Stone Co. v. Journeymen Stone Cutters' Ass'n, 274 U.S. 37, 47 S. Ct. 522, 71 L. Ed. 916 (1927)*, is to cases holding that despite § 20 of the Clayton Act a secondary boycott could be enjoined in a private action under the antitrust laws. The quoted dictum, although

---

[16.] Congress at the same time recognized that the special historical situation in the construction and apparel industries justified a limited exception to § 8(e) for those two industries. Those provisions are, of course, inapplicable here.

suggestive of the effect of a § 8(e) violation on the nonstatutory antitrust exemption, is not decisive. Both Duplex Printing and Bedford Cut Stone were decided on statutory exemption grounds prior to the full emergence of the nonstatutory exemption. But it must be kept in mind that §§ 8(b)(4) and 8(e), while housed in the National Labor Relations Act, are, like the Sherman Act, statutes reflecting the basic federal economic policy against restraints upon competition in the marketplace for goods and services as distinct from the labor market. Thus §§ 8(b)(4) and 8(e) reinforce rather than conflict with the basic policy of the antitrust laws, and suggest a cautious approach to the recognition of a nonstatutory antitrust exemption for conduct in violation of their prohibitions. [17.] Nonetheless there remains room for the argument that even though ILA achieved at the bargaining table an object **[**61]** that is unlawful under §§ 8(b)(4)(ii)(B) and 8(e), and thus not a mandatory subject of collective bargaining, the nonstatutory exemption should nevertheless apply.

The term nonstatutory exemption, commonly used in discussing the interface between the often conflicting national antitrust and labor policies, is a shorthand description of an interpretation of the Sherman Act, making that statute inapplicable to restraints imposed in the interest of lawful union monopoly power in the labor market. The opinion generally credited as originating that construction of the antitrust laws is that of Chief Justice Stone in *Apex Hosiery Co. v. Leader, 310 U.S. 469, 60 S. Ct. 982, 84 L. Ed. 1311 (1940)*. In that case, an organizational **[**62]** dispute erupted into a sit-in strike which stopped production, and halted the shipment of finished goods. The Court **[*514]** held this conduct exempt from the antitrust laws on two grounds. The union's goal, "elimination of price competition based on differences in labor standards . . .," was not "the kind of curtailment of price competition prohibited by the Sherman Act." *Id. at 503-04, 60 S. Ct. at 998*. Moreover, Justice Stone held, there was no showing that the challenged restraint was "intended to have or in fact ha(d)" an effect upon the product market. *Id. at 512, 60 S. Ct. at 1002*. The Court thus distinguished Duplex Printing Co. (a classic secondary boycott) and Bedford Cut Stone (involving a "refusal to handle" the primary's product) because in those cases the intent and effect of the conspiracy had been to restrain the product market by pressuring secondary parties to withdraw their patronage from the target manufacturer. *Id. at 505-06, 60 S. Ct. 982*. It would seem therefore that had such a secondary purpose and effect been shown, Sherman Act liability would have attached. See also *United States v. Hutcheson, 312 U.S. at 241-42, 61 S. Ct. 463* **[**63]** (Stone, C. J., concurring).

Apex Hosiery establishes two principles central to the subsequent development of the nonstatutory exemption. First, the rationale of the exemption is protection of the union's power to eliminate competition in the labor market over wages and working conditions. Restraints operating on that primary market are presumptively outside the scope of the Sherman Act. Second, restraints, like those in Duplex Printing Co. and Bedford Cut Stone, which are aimed at controlling a secondary product or service market are suspect, and are presumptively covered by the Sherman Act.

When the Court first had occasion to consider the application of the infant non-statutory exemption to a collective bargaining agreement, it might have taken the position that anything achieved as a result of collective bargaining with the primary employer was exempt from antitrust sanction. Such a course would have avoided many difficulties. In *Allen Bradley Co. v. Local No. 3, IBEW, 325 U.S. 797, 65 S. Ct. 1533, 89 L. Ed. 1939 (1945)*, however, the Court took a different turn, holding that the distinction between union efforts aimed at the labor market and those aimed at the product **[**64]** market applied even to a collective bargaining agreement. In that case a union successfully negotiated, by legitimate means, refusal-to-deal clauses with local electrical equipment manufacturers and contractors. The union's success in obtaining those agreements created a product market cartel in the New York area, which in time came to look not only "to terms and conditions of employment but also to price and market control." *Id. at 800, 65 S. Ct. at 1535*. The union had actively assisted in policing and protecting that cartel. When an excluded electrical manufacturer sued to enjoin union activities on behalf of the cartel, the union's participation in the illegal scheme was held to be an antitrust violation despite the collective bargaining context and despite the relationship of the restraints to wage and job stability. With the Allen Bradley decision faded any hope for a bright

---

[17.] The Supreme Court has recently cautioned that all exemptions from the antitrust laws, including the labor exemption, are to be narrowly construed. *Group Life & Health Insurance Co. v. Royal Drug Co., 440 U.S. 205, 229, 230, 99 S. Ct. 1067, 1082, 59 L. Ed. 2d 261 (1979)*.

line between union activities exempt from and subject to the antitrust laws based on the existence of a collective bargaining relationship. The opinion, however, strongly reaffirmed the suggestion in Apex Hosiery that secondary product or service market restraints must meet a higher standard **[**65]** of justification to claim the antitrust exemption. Cf. *National Woodwork Manufacturers Ass'n v. NLRB, 386 U.S. at 628-30, 87 S. Ct. 1250* (characterizing Allen Bradley as a secondary work acquisition scheme that would now be forbidden under § 8(e)).

Justice Black's opinion in Allen Bradley indicates that if a union coerced a refusal-to-deal clause, or some other clause having secondary market effects, solely in its own interest, and not in the interest of conspiring businessmen, the exemption applies. See *Allen Bradley Co. v. Local No. 3, IBEW, 325 U.S. at 809-10, 65 S. Ct. 1533*. Under that reading of Allen Bradley, collective bargaining agreements might have been held exempt from Sherman Act scrutiny, regardless of their impact on the nonlabor marketplace, absent a showing of an intent on the part of the union to join with **[*515]** employers in a larger Sherman Act conspiracy. And an appropriate test for whether the union was to be deemed to be acting solely in its own interest might well have been whether the subject matter of the agreement was a permissive or mandatory subject of collective bargaining.

In *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*, **[**66]** the Court considered a collective bargaining agreement with a multi-employer unit of coal producers in which the union agreed with the employers in that unit to impose the agreed-upon wage scale upon all coal producers with whom it had a collective bargaining relationship. The Union contended that since the agreement concerned wage standards, a quintessential labor market concern, it was exempt from the antitrust laws. Six Justices rejected that contention. Justice White, writing for three members of the Court, conceded that "wages lie at the very heart of those subjects about which employers and unions must bargain." *Id. at 664, 85 S. Ct. at 1590*. Recognizing that the union could unilaterally have adopted a uniform wage standard as a matter of bargaining policy, the Court held that the alleged agreement was not necessarily exempt. Justice White wrote:

> We think ***HN13***[] a union forfeits its exemption from the antitrust laws when it is clearly shown that it has agreed with one set of employers to impose a certain wage scale on other bargaining units. One group of employers may not **[**67]** conspire to eliminate competitors from the industry and the union is liable with the employers if it becomes a party to the conspiracy.

Id. at 665-66, 85 S. Ct. at 1591. He went on, however, to suggest that the unavailability of the exemption was not dependent upon a predatory intention on the part of the employers in the bargaining union.

> From the viewpoint of antitrust policy, moreover, all such agreements between a group of employers and a union that the union will seek specified labor standards outside the bargaining unit suffer from a more basic defect, without regard to predatory intention or effect in the particular case. For the salient characteristic of such agreements is that the union surrenders its freedom of action with respect to its bargaining policy. Prior to the agreement the union might seek uniform standards in its own self-interest but would be required to assess in each case the probable costs and gains of a strike or other collective action to that end and thus might conclude that the objective of uniform standards should temporarily give way. After the agreement the union's interest would be bound in each case to that of the favored **[**68]** employer group. It is just such restraints upon the freedom of economic units to act according to their own choice and discretion that run counter to antitrust policy.

Id. at 668, 85 S. Ct. at 1592.

Justice White's definition of the prohibited conduct is decidedly ambiguous. The first quoted excerpt seems to say that the antitrust evil is knowing union participation in an employer's conspiracy to eliminate competitors, a view consistent with some language in Allen Bradley. But the second passage suggests that the more serious evil, impinging upon both labor and antitrust policy, is the union's restriction of its freedom to deal with other competitor employers. That defect, Justice White suggested, remained "without regard to predatory intention or effect in the particular case." *Id. at 668, 85 S. Ct. at 1592*. This latter theme echoes the concern expressed in Apex Hosiery and Allen Bradley with agreements directed at secondary parties.

Citing Justice White's opinion, the plaintiffs argue that Pennington stands for the proposition that "an agreement which is tactically designed to achieve objectives outside the bargaining unit is not entitled to **[**69]** antitrust immunity." Plaintiffs' Brief at 38. This reads the Pennington holding too broadly. Although it is denominated the opinion of the Court, Justice White's Pennington opinion did not command a majority for his labor exemption discussion. In a concurring opinion Justice Douglas, writing for three Justices, expressly stated that as **[*516]** he read Justice White's opinion, it "reaffirms the principles of Allen Bradley . . . ." *Id. at 672, 85 S. Ct. at 1595*. He suggested that on remand, the jury should be instructed that in order to find an antitrust violation, they must conclude Both that the union agreed to press a wage scale that smaller employers could not pay, and that the agreement "was made for the purpose of forcing some employers out of business . . . ." *Id. at 672-73, 85 S. Ct. at 1595*. Elsewhere, he stressed that the "purpose" described earlier involves both "knowledge" that the minor manufacturers would be driven out of business, and "intent" to do so. *Id. at 675, 85 S. Ct. at 1585*. Since the three Justices who joined in the Douglas opinion would have upheld the union's claim of antitrust immunity absent a showing of predatory **[**70]** intent, and three others would have upheld the claim of immunity on broader grounds announced by Justice Goldberg, the Douglas opinion may well be read as limiting antitrust liability for agreements concerning subjects at the "very heart" of the collective bargaining process to cases where predatory intent can be shown. Accord, *Embry-Riddle Aeronautical Univ. v. Ross Aviation, Inc., 504 F.2d 896, 903 (5th Cir. 1974)* ("concerted purpose"); *Lewis v. Pennington, 400 F.2d 806, 814* (6th Cir.), Cert. denied, *393 U.S. 983, 89 S. Ct. 450, 21 L. Ed. 2d 444 (1968)* ("predatory intent"); Meltzer, Labor Unions, Collective Bargaining and the Antitrust Laws, 32 U.Chi.L.Rev. 659, 720-21 (1965); 1 P. Areeda & D. Turner, ***Antitrust Law***, P 229e at 211 (1977). Such a standard would tend to insulate collective bargaining over subjects like wages, which are at the core of legitimate union concern, from the disrupting effect of potential antitrust sanctions. See *Embry-Riddle Aeronautical Univ. v. Ross Aviation, Inc., 504 F.2d at 908*; 1 P. Areeda & D. Turner, Supra, P 229e at 209-11.

If Pennington were the controlling precedent the plaintiffs' **[**71]** motion for summary judgment should properly have been denied. Assuming Arguendo that the agreement here concerned a subject at the "very heart" of the collective bargaining process, the affidavits suggest that in determining the intent of ILA and the employer defendants issues of fact remain. ILA avers that the sole purpose of the Dublin Supplement was to protect union job opportunities. The vessel owners say that they did not really want the acquired business, and that they therefore lacked the predatory intent required by Pennington. We are mindful that summary judgment is generally inappropriate in antitrust cases "where motive and intent play leading roles." *Poller v. Columbia Broadcasting System, Inc., 368 U.S. 464, 473, 82 S. Ct. 486, 491, 7 L. Ed. 2d 458 (1962)*.

A second line of authority, however, permits the imposition of antitrust liability without a showing of predatory intent. On the same day that Pennington was decided the Court handed down *Meat Cutters v. Jewel Tea Co., 381 U.S. 676, 85 S. Ct. 1596, 14 L. Ed. 2d 640 (1965)*, which involved a multi-unit collective bargaining agreement in the food store industry. The agreement imposed on the **[**72]** entire bargaining unit a restriction on marketing hours, a direct restraint on the product market. Jewel Tea Company, a member of the unit, signed the agreement under protest but promptly brought an action for declaratory and injunctive relief against the union. It contended that the marketing hours restraint violated the Sherman Act because it limited the hours during which Jewel could compete with other meat retailers in the bargaining unit. The Court's judgment held that the agreement was exempt from the Sherman Act, but three opinions were filed, each receiving three votes. Justice White, announcing the judgment, in an opinion joined by Chief Justice Warren and Justice Brennan, said that for restraints on the product market, the test of exemption was whether the restraint:

> . . . is so intimately related to wages, hours and working conditions that the unions' successful attempt to obtain that provision through bona fide, arm's-length bargaining in pursuit of their own labor union policies, and not at the behest of or in combination with nonlabor groups, falls within the protection of the **[*517]** national labor policy and is therefore exempt from the Sherman Act.

[73]** *Id. at 689-90, 85 S. Ct. at 1602* (footnote omitted). But if a union demanded, and an employer agreed to, an anticompetitive restraint designed to protect an interest not a mandatory subject of bargaining, White "seriously doubt(ed)" that the antitrust exemption would apply. *Id. at 689, 85 S. Ct. 1596*. Relying on NLRB decisions holding that hours of work were a subject of mandatory bargaining, he then considered whether the restriction on hours of operation was justified by its close relationship to the union members' interest in avoiding night work. *Id. at 692, 85 S. Ct. 1596*. The trial court had found that such operations would threaten that protected interest. Since that finding was not clearly erroneous, Justice White said that the agreement was exempt. *Id. at 697, 85 S. Ct. 1596*.

Justice Goldberg, concurring in an opinion in which Justices Harlan and Stewart joined, proposed a test similar to, although somewhat broader than Justice White's. Goldberg would have held that "collective bargaining activity concerning mandatory subjects of bargaining under the Labor Act is not subject to the antitrust laws." *Id. at 710, 85 S. Ct. at 1614*. **[**74]** He also observed that "decisions of the Labor Board as to what constitutes a subject of mandatory bargaining are, of course, very significant in determination of the applicability of the labor exemption." *Id. at 710 n.18, 85 S. Ct. at 1614*.

The six Justices comprising the Jewel Tea majority were thus agreed that ***HN14***[] when a collective bargaining agreement imposed restraints upon the employer's product market, the most significant issue in determining the availability of the labor exemption was whether the restraint involved a mandatory subject of collective bargaining. Moreover Justice White's opinion suggests that the burden is on the union to demonstrate that the challenged product market restraint is in fact no broader than necessary to promote the union's interest in such a subject. Absent such a demonstration, the restraint must fall. *Ackerman-Chillingworth, Div. of Marsh & McLennan, Inc. v. Pacific Elec. Contractors Ass'n, 579 F.2d 484, 503 (9th Cir. 1978)* (Hufstedler, J., concurring and dissenting), Cert. denied, *439 U.S. 1089, 99 S. Ct. 872, 59 L. Ed. 2d 56 (1979)*. **[**75]**

The Court's most recent pronouncement on the application of the Sherman Act in the labor context, *Connell Construction Co. v. Plumbers & Steamfitters Local 100, 421 U.S. 616, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)*, is consistent with this analysis. In that case a labor organization coerced a general contractor into an agreement to hire only those subcontractors who had collective bargaining agreements with it. Like the Jewel Tea Company, the contractor sued to invalidate the agreement under the Sherman Act. The case did not involve a collective bargaining agreement, and so, as Justice Powell carefully noted, considerations peculiar to the collective bargaining context were absent. *Id. at 625-26, 95 S. Ct. 1830*. Nonetheless, the Court analyzed the restraint in terms similar to Jewel Tea's. It found that the goal of the agreement the organization of non-union employers was legitimate. But the agreement exacted in Connell, Powell held, reached too broadly, for it operated as a direct restraint upon the competition of non-union subcontractors, even if their competitive advantage was derived from efficiency rather than substandard wages and working conditions. **[**76]**

> This kind of direct restraint on the business market has substantial anticompetitive effects, both actual and potential, that would not follow naturally from the elimination of competition over wages and working conditions. It contravenes antitrust policies to a degree not justified by congressional labor policy, and therefore cannot claim a nonstatutory exemption from the antitrust laws.

Id. at 625, 95 S. Ct. at 1836. Despite its explicit distinction of the collective bargaining situation, the Connell mode of analysis is similar to that of the Jewel Tea majority. ***HN15***[] The requirements for antitrust exemption are, first, that the market restraint advance **[*518]** a legitimate labor goal, and, second, that the agreement restrain trade no more than is necessary to achieve that goal. In addition Connell clarifies the relationship between unfair labor practice remedies under § 8(e) and treble damage actions under the antitrust laws. Local 100 had argued that the unfair labor practice remedies under § 10(L) and § 303 of the Act were exclusive and precluded a suit **[**77]** in antitrust based on a § 8(e) violation. The Court rejected this contention, stating that such remedies were available despite and in addition to the availability of Labor Act remedies. *Id. at 633-34, 95 S. Ct. 1830*.

Were this an action for injunctive relief, we think that Jewel Tea and Connell would require a summary judgment rejecting the labor exemption. The anticompetitive effect of the enforcement of the Rules and the Dublin Supplement is on this record undisputed. By requiring that LCL and LTL containers be stripped at the dock, the Rules exerted a substantial upward pressure upon the price of container shipping. More important, the Boycott provisions of the Dublin Supplement led to the foreclosure of all LCL and LTL consolidators operating within the forbidden fifty mile range from the entire shipping market between the Port and Puerto Rico. This anticompetitive impact is significant and uncontested. These anticompetitive effects cannot now be justified by their advancement of legitimate labor goals. ***HN16***[] Six Justices in the Jewel Tea majority began the exemption inquiry **[**78]** by asking whether the subject matter of the challenged agreement was itself, or was clearly related to, a mandatory subject of collective bargaining. Whether one prefers the White or Goldberg formulations in Jewel Tea, under either a finding that the Rules were not a mandatory subject of bargaining effectively undercuts any contention that they so "fall within the protection of the national labor policy," as to be completely exempt from antitrust scrutiny. See *UMW v. Pennington, 381 U.S. at 665, 85 S. Ct. at 1596* (White, J.); *Jewel Tea, 381 U.S. at 689, 85 S. Ct. at 1596* (White, J.); *Id. at 706, 85 S. Ct. at 1596* (Goldberg, J., dissenting) (all suggesting that whether a particular union demand is a mandatory subject of bargaining central to a determination of the scope of the labor exemption). Here, the NLRB has held that the Rules and the Dublin Supplement violated §§ 8(b)(4) and 8(e) of the Labor Act. Hence the "direct and overriding interest of unions" in mandatory subjects of bargaining, *381 U.S. at 732, 85 S. Ct. 1596* (Goldberg, J., dissenting), is absent. Nor can it fairly be contended in the wake of that holding that the **[**79]** Rules are protected because they served a legitimate union interest. The NLRB has found that the object of the Rules was work acquisition, an activity that is condemned by national labor policy. *NLRB v. Enterprise Ass'n of Pipefitters, 429 U.S. 507, 529 n.16, 97 S. Ct. 891, 51 L. Ed. 2d 1 (1976)*. As we noted above, Apex Hosiery, Allen Bradley, and Nat'l Woodwork Manufacturers Ass'n all indicate that illegal secondary activity of this kind is subject to Sherman Act sanctions.

Although no court has yet had occasion to hold that an NLRB finding of an unfair labor practice precludes recognition of complete nonstatutory antitrust immunity, well reasoned decisions in other circuits support that conclusion. See *Mackey v. National Football League, 543 F.2d 606, 614 (8th Cir. 1976)* (Lay, J.), Cert. dismissed, *434 U.S. 801, 98 S. Ct. 28, 54 L. Ed. 2d 59 (1977)* ("federal labor policy is sufficiently implicated to prevail only where the agreement sought to be exempted concerns a mandatory subject of collective bargaining."); *Ackerman-Chillingworth, Div. of Marsh & McLennan, Inc. v. Pacific Electrical Contractors Ass'n, 579 F.2d 484, 503 (9th Cir. 1978)* **[**80]** (Hufstedler, J., concurring and dissenting), Cert. denied, *439 U.S. 1089, 99 S. Ct. 872, 59 L. Ed. 2d 56 (1979)*. That result is also consistent with this court's decisions in *International Ass'n of Heat & Frost Insulators v. United Contractors' Ass'n, 483 F.2d 384 (3d Cir. 1973)*, modified, *494 F.2d 1353 (3d Cir. 1974)*. Heat Insulators was an antitrust suit by AFL-CIO craft locals against a contractors' association and its assertedly "captive" union. Many of the charged antitrust violations, if proven, would also have been unfair **[*519]** labor practices. In the court's initial opinion, Judge Forman upheld the primary jurisdiction of the NLRB over those unfair labor practices. He stated that "if the allegations (of unfair labor practices) are true, then such acts would not be immune" under the labor exemption. *483 F.2d at 402*. When informed that the Board had already heard the plaintiff's unfair labor practice charges and determined there was no labor law violation, the court vacated its opinion requiring that the district court certify the labor issues to the Board. But it recognized that the NLRB holding that the agreements **[**81]** were legal under the Labor Act was "not conclusive" on the issue of their illegality under the antitrust laws. *494 F.2d at 1354*, Citing *Meat Cutters v. Jewel Tea Co., 381 U.S. 676, 85 S. Ct. 1596, 14 L. Ed. 2d 640 (1965)*. Taken together the two opinions in Heat Insulators suggest that conduct illegal under federal labor law can claim no immunity from antitrust sanctions.

In support of the contrary position the appellees rely principally upon *Commerce Tankers Corp. v. National Maritime Union, 553 F.2d 793* (2d Cir.), Cert. denied, *434 U.S. 923, 98 S. Ct. 400, 54 L. Ed. 2d 280 (1977)*. There, as here, a clause in a collective bargaining agreement had been held to be in violation of § 8(e) in a prior NLRB proceeding. There, as here, the injured party argued that the NLRB's finding of illegality eliminated the antitrust exemption. The district court rejected the antitrust claim on another ground, and thus did not reach the immunity issue. On appeal, the district court's ground of decision was rejected by the Second Circuit. That court, however, refused to rule that the § 8(e) violation eliminated the antitrust exemption, both because **[**82]** the district court had not considered the issue, and because only one party had briefed it on appeal. It did state in dictum that it did not think that the finding of a § 8(e) violation "necessarily determine(d)" the immunity issue, although it "le(nt) support to appellant's position." *Id. at 802*. The Commerce Tankers court's reasons for disposing of the exemption issue suggest that the holding does not have the force of a fully considered decision on the merits. Moreover, the Commerce Tankers opinion does not explain why the finding of a § 8(e) violation did not "necessarily determine" the exemption question. Judge Lumbard's cogent dissent, which argued a position similar to that adopted here, thus went unanswered. To the extent that Commerce Tankers may suggest the possibility that a § 8(e) violation may be completely exempt under the Sherman Act we find it unpersuasive.

Thus we hold that the enforcement of the Rules and Dublin Supplement was not exempt under the Sherman Act. Those agreements are illegal under § 8(e), and under the tests of Jewel Tea and Connell could be enjoined. If this were an action for injunctive relief brought pursuant to *§ 16* of the Clayton **[**83]** Act an injunction against their prospective operation plainly would be required. That does not end the inquiry, however, for this is an action, not for prospective relief, but for money damages. As we noted above, the term non-statutory exemption describes an interpretation of the antitrust laws. Both primary and secondary authorities discussing the nonstatutory exemption tend to assume that if a Sherman Act violation is shown, then all antitrust remedies are equally available. There is no a priori reason why this should be the case. If the Sherman Act itself can be interpreted to accommodate conflicting federal labor and antitrust policies Clayton Act *§ 4* can be similarly interpreted. We think that a distinction between injunctive and treble damages remedies is warranted.

HN17[] Where an action seeks only declaratory or injunctive relief, a finding that an agreement violates § 8(e) should always remove the antitrust exemption. Once it is clear that a § 8(e) violation has occurred no labor policy is advanced by permitting ongoing operation of an illegal contract, and injunctive relief pursuant **[**84]** to *§ 16* of the Clayton Act is appropriate. In considering the availability of *§ 4* relief, however, a more refined analysis is required. For while the agreement which resulted from **[*520]** the collective bargaining process may have been found to be illegal, it is possible that at the time when the negotiating session took place the parties reasonably believed that their agreement was directly related to the lawful goal of work preservation. That possibility raises a labor policy consideration which the Supreme Court has not yet addressed: the extent to which antitrust exemption should protect not only lawful labor agreements, but also the collective bargaining process. In our view, consideration of the competing public policies which may be implicated indicates the need to recognize a limited labor exemption defense to a claim for money damages under the Clayton Act for conduct which has been held to be illegal under federal labor law.

The decision in Allen Bradley not to exempt from antitrust remedies all collective bargaining agreements with a primary employer created a powerful potential sanction against both the union and the employer. Today this sanction provides both parties **[**85]** to the bargaining process with a strong incentive to take into account in their negotiations the public interest in competition in the secondary marketplace. Especially in oligopolistic industries and Atlantic shipping is one entirely removing antitrust incentives would place too much uncontrolled economic power in the hands of those at the bargaining table. But the question remains how much antitrust incentive is necessary to encourage the parties to the collective bargaining process to take into account anticompetitive injury to secondary parties. One possible answer is that the *§ 16* injunctive remedy, coupled with § 303 damage remedy against the union, and the NLRB's unfair labor practice jurisdiction is all the incentive that is required. We think not, however, for while those remedies may provide strong incentive for unions not to make excessive secondary demands, they provide very little incentive to employers to resist such demands. Employers may have no predatory purpose against secondary targets, but may nevertheless be quite willing to sacrifice in the bargaining process the interests of those targets in exchange for concessions on other bargaining issues. Since employers **[**86]** are not liable for damages under § 303, the only risk they would run from overwilling acquiescence in a bargained for § 8(e) violation would be that either in a § 10(L) or *§ 16* injunctive action they would be made to stop. That would give employers the best of all possible worlds at the collective bargaining table, since they would keep the benefit of the concessions bargained for on other issues, while the risk of economic injury to secondary targets would be borne by those targets and an often shallow pocket union. Complete removal from the bargaining equation of the *§ 4* incentive to employers to take into account injury to secondary targets would not, we think, be in the public interest.

Nor is there unfairness in requiring employers to resist excessive union claims. Employers are not, after all, without remedies against illegal demands. They can refuse to bargain and the Board will, we must presume, sustain that refusal to bargain. They can accede to the union demand, and then sue, as Jewel Tea Company and Connell Construction Company did, to invalidate the agreement under federal law. Or they can simply refuse to implement the agreement, once adopted, because it is in violation **[**87]** of § 8(e). Any resulting strike pressure might then be enjoined as in violation of § 8(b)(4). We recognize that these remedies may not, in the short run, be as conducive to labor peace as acquiescence. But this court and others have recognized that affirmative obligations imposed by nonlabor federal legislation may on occasion require an employer to resist illegal union demands even at the cost of a strike. See *Atlantic & Gulf Stevedores, Inc. v. OSHRC, 534 F.2d 541 (3d Cir. 1976)*.

On the other hand, we recognize that a damage remedy is effective as a deterrent only when its application to an agreement can be foreseen by the parties at the time they are engaged in collective bargaining. Moreover, since the *§ 4* remedy, while in part compensatory, has a strong punitive element, it may seem harsh to apply it to conduct which the parties had no reason to **[*521]** believe would ever be held to be illegal, and may even have reasonably believed to be legally compelled. Concern about the lack of meaningful deterrence is particularly relevant when the determination of illegality results from an unanticipated shift in NLRB policy. Antitrust policy may not be significantly **[**88]** advanced by giving retroactive effect, in a damage action, to such unanticipated shifts in interpretation of §§ 8(b)(4) and 8(e). Thus it seems to us that there is room for a defense to a *§ 4* damage claim that would not be available in a *§ 16* injunctive action or a government injunctive action.

Casting the issue in terms of an exemption defense to a *§ 4* damage action affords an opportunity to strike a balance between the interest of parties to the collective bargaining process, and those of secondary targets. If we eliminate entirely the element of foreseeability, and allow a *§ 4* treble damage recovery whenever the agreement is found to be illegal, the scales tilt too far away from the national interest in collective bargaining over arguably legitimate subject matters. If, on the other hand, we impose too low a burden on those asserting a lack of foreseeability defense, we risk slighting the national interest in deterring anticompetitive injury to secondary parties. The proper accommodation, we think, is recognition, in the collective bargaining context of a defense to *§ 4* damage recovery involving several elements. **[**89]** ***HN18***[] Where, as here, a collective bargaining agreement, or conduct taken pursuant to it, has been shown to be illegal under federal labor law, a secondary party injured in his business or property by either has made out a prima facie case under *§ 4*. At that point, to accommodate the labor policy favoring collective bargaining, the defendants may assert, first, that at the time they acted (here, the Dublin meeting and later) they could not reasonably have foreseen that the subject matter of the agreement being challenged would be held to be unlawful under § 8(b)(4) or § 8(e). If they fail to prove that the illegality determination was unforeseeable, the defendants should not be exempt from liability for damages under *§ 4*. A successful showing that the determination of illegality was not reasonably foreseeable is not alone enough to establish an exemption defense, however, for Jewel Tea suggest that the defendants must also demonstrate that the contract provisions and steps taken to implement them were "intimately related" to the object of collective bargaining thought at the time to be legitimate, and went no further in imposing restraints in the secondary market than was reasonably necessary **[**90]** to accomplish it. Thus our test for the collective bargaining exemption defense to *§ 4* liability is conjunctive, and objective, and the defendants have the burden on all elements of going forward and of persuasion. The limited *§ 4* exemption defense we now recognize obviously is unavailable to defendants shown to have acted with the predatory intent against secondary targets referred to in Pennington and Allen Bradley.

The district court did not consider the summary judgment record in light of the possible *§ 4* exemption defense we have posited. On this appeal it is inappropriate that we decide its availability, since neither the parties nor the district court focused on the fact issues possibly relevant to it. The defendants' burden of proving lack of foreseeability is formidable, considering the NLRB decision in *International Longshoremen's Ass'n, Local 1248 (U.S. Naval Supply Center), 195 N.L.R.B. 273 (1972)*, which held that the Rules were illegal over a year before the Dublin meeting. Nevertheless, they may be able to establish that a factfinder could believe that the Naval Supply Center warning should not have alerted reasonable collective bargainers to a § 8(b)(4) **[**91]** and § 8(e) risk. Moreover, while the provisions in the Dublin Supplement requiring the total withholding of containers from Conex and Twin seem overbroad when compared with the supposed ILA object of preserving the work of stuffing LCL and LTL freight originating with shippers close to the Port, it is at least conceivable that a convincing justification for all the boycott provisions of the Dublin Supplement can be successfully advanced. Thus a **[*522]** remand is required for the determination of the availability of the limited defense to *§ 4* liability which we have here announced. If the district court concludes that material issues of fact remain regarding both of its requirements, it may then proceed to a factual hearing. But whether the exemption defense to the *§ 4* claim is resolved summarily or after a hearing, it must be resolved in the first instance in the district court. A remand is therefore required.

B. The Claim of Per Se Illegality

If the Rules and Dublin Supplement are held to be nonexempt, the issue of the proper standard of antitrust liability will arise. Conex and Twin contend that if the nonstatutory exemption is unavailable they are entitled to a summary **[**92]** judgment that the Sherman Act was violated. The district court, treating the questions of the labor exemption and the Sherman Act violation as "inseparable," denied it. We hold that the proper method of analysis is to determine the issue of nonstatutory labor exemption separately, as we have done, and then to proceed with conventional antitrust scrutiny of the complaint. The district court also assumed that even if the labor exemption was inapplicable the Rules and steps taken to enforce them must be judged, for antitrust purposes, under a rule of reason standard rather than, as Conex and Twin suggest, as a Per se violation. The appellants argue that the Rules and Dublin Supplement comprised a Per se illegal group boycott directed against the LCL and LTL consolidators. We agree.

The defendants suggest that the trend in the case law is to apply the "rule of reason" to concerted refusals to deal. Not all concerted refusals to deal have been held Per se illegal. Yet in a core group of situations group boycotts have been held to be Per se violations of the Sherman Act. The Court has condemned as Per se violations: (1) horizontal combinations of traders at one level of distribution having **[**93]** the purpose of excluding direct competitors from the market, e.g., *Associated Press v. United States, 326 U.S. 1, 65 S. Ct. 1416, 89 L. Ed. 2013 (1945)*; *Eastern States Retail Lumber Dealers' Ass'n v. United States, 234 U.S. 600, 34 S. Ct. 951, 58 L. Ed. 1490 (1914)*; (2) vertical combinations, designed to exclude from the market direct competitors of some members of the combination, e.g., *Klor's, Inc. v. Broadway-Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*; and (3) coercive combinations aimed at influencing the trade practices of boycott victims. E.g., *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 71 S. Ct. 259, 95 L. Ed. 219 (1951)*; *Fashion Originators' Guild of America v. Federal Trade Commission, 312 U.S. 457, 61 S. Ct. 703, 85 L. Ed. 949 (1941)*. See generally, *E. A. McQuade Tours, Inc. v. Consolidated Air Tour Manual Committee, 467 F.2d 178 (5th Cir. 1972)*, Cert. denied, *409 U.S. 1109, 93 S. Ct. 912, 34 L. Ed. 2d 690 (1973)*; Note, Boycott: A Specific Definition Limits the Applicability of a Per Se Rule, 71 Nw. U.L. Rev. 818, 822-23 (1977). **[**94]**

The Rules and Dublin Supplement have horizontal, vertical, and coercive aspects. Under the Rules, the consolidators were required to accede to stuffing and stripping of their cargoes, and later were denied containers altogether. ILA, the vessel owners and the stevedores agreed to exclude the consolidators from providing services which compete directly with the stevedores and with those vessel owners who provide their own stevedoring services. The vessel owners and the stevedores have agreed with ILA to exclude from competition with ILA longshoremen the Teamster stuffers and strippers employed by the consolidators. The NLRB has determined that ILA's goal was "work acquisition." Where the work that the union seeks to acquire is being performed by the union's direct competitors, here the Teamsters, the union's efforts clearly were directed toward the elimination of Teamster competition. ILA, the vessel owners, and the stevedores agreed to coerce the consolidators into changing their method of operation by allowing their containers to be stuffed and stripped at the docks. In every aspect, the anticompetitive effect of this arrangement is clear. The Rules and the Dublin Supplement wholly **[**95]** **[*523]** bar the consolidators from providing their lower cost services to the shipping market between the Port and Puerto Rico. Nor is there any suggestion in the record that the application of the Rules will in the long run have procompetitive rather than anticompetitive effects. In sum, the Rules and Dublin Supplement are "agreements whose nature and necessary effect are so plainly anticompetitive that no elaborate study of the industry is needed to establish their illegality." *National Society of Professional Eng'rs v. United States, 435 U.S. 679, 98 S. Ct. 1355, 1365, 55 L. Ed. 2d 637 (1978)*.

The defendants also contend that a finding of Per se illegality is not possible on this record because there is "no showing that the defendants had an anticompetitive intent to exclude plaintiffs from the market or to accomplish any other anticompetitive purpose." NYSA Brief at 43. They point out that the record contains evidence that the consolidators were valued customers of the carrier defendants, and that those defendants made a serious effort to maintain business relations with Conex and Twin even in the face of ILA resistance. The appellees' argument, however, does **[**96]** not accurately reflect the role of intent in civil antitrust cases. If a Per se violation has been established, the court will already have found that "the nature and Necessary effect " of the challenged conduct is "plainly anticompetitive." *National Society of Professional Eng'rs v. United States, 435 U.S. at 690, 98 S. Ct. at 1364* (emphasis added). Once that fact has been established, all that need be shown is that the charged anticompetitive acts were in fact performed by the defendant. *United States v. United States Gypsum Co., 438 U.S. 422, 442, 98 S. Ct. 2864, 2876, 57 L. Ed. 2d 854 (1978)*. A showing of a specific intent to harm one's competitors or restrain competition need not be shown. *Times- Picayune Publishing Co. v. United States, 345 U.S. 594, 614, 73 S. Ct. 872, 97 L. Ed. 1277 (1953)*. Here the "necessary effect" of the container boycott was to drive the plaintiff consolidators from the New York to Puerto Rico shipping market. No further showing of intent is required.

In the alternative the appellees and the dissenting opinion urge that, at least in the context of labor agreements, the Per se approach should never be applied. **[**97]** The principal support for that view is Professor Handler's statement that "(a) fair reading of Jewel Tea (satisfied him) that the court intended that there be a full-scale rule of reason inquiry in every instance in which a non-exempt activity is claimed to be in violation of antitrust." Handler, Labor and Antitrust: A Bit of History, 40 Antitrust L.J. 233, 239-40 (1971). See also *Commerce Tankers v. National Maritime Union, 553 F.2d 793, 802 n.8* (2d Cir.), Cert. denied, *434 U.S. 923, 98 S. Ct. 400, 54 L. Ed. 2d 280 (1977)*; *Id. at 804 n.4* (Lumbard, J., concurring in relevant part). Mindful as we are of Professor Handler's expertise in both the labor and antitrust fields, we do not agree with his approach. Certainly we find no support for it in either the Jewel Tea or Pennington opinions. Indeed, the three groups of Justices in those cases, while they diverged widely on other issues, appear to have agreed that "settled antitrust principles" would be "appropriate and applicable" to activity found to be nonexempt. *United Mineworkers v. Pennington, 381 U.S. at 715, 85 S. Ct. 1585* (Goldberg, J., dissenting); *Meatcutters v. Jewel Tea, 381 U.S. at 693 n.6, 85 S. Ct. 1596* **[**98]** (White, J.); *Id. at 736-37, 85 S. Ct. 1596* (Douglas, J., dissenting). Those "settled" principles include the Per se rule, where the facts warrant its application. The Supreme Court's intimations thus do not support Professor Handler's view. Moreover, once a court has concluded that the labor exemption does not shield anticompetitive conduct, application of the rule of reason is redundant. The justification offered for application of the rule of reason is the need to recognize, in the antitrust context, labor's legitimate interest in the collective bargaining process. That interest, however, is precisely the same one that must be taken into account in determining the scope of the nonstatutory labor exemption. A holding that the exemption does not apply embodies a judgment that considerations of labor policy are outweighed **[*524]** by the anticompetitive dangers posed by the challenged restraint. The proposed use of the rule of reason would, therefore, simply be an invitation to the court or jury to reweigh under a different label the question of the non-statutory exemption. The appellees have suggested no reason why a second such inquiry is necessary or appropriate.

[99]** Further, we think that reliance upon broad "public interest" considerations like the advancement of labor policy as a ground for application of the rule of reason is barred by the view of that rule adopted by the Court in *National Society of Professional Eng'rs v. United States, 435 U.S. 679, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*. As the Court stated there:

> Contrary to its name, the Rule does not open the field of antitrust inquiry to any argument in favor of a challenged restraint that may fall within the realm of reason. Instead, it focuses directly on the challenged restraint's impact on competitive conditions.

Id. at 688, 98 S. Ct. at 1363 (emphasis added). Later in the opinion Justice Stevens repeated the same theme even more forcefully:

> (T)he purpose of both (rule of reason and Per se) analysis is to form a judgment about the competitive significance of the restraint; it is not to decide whether a policy favoring competition is in the public interest, or in the interest of the members of an industry. Subject to exceptions defined by statute, that policy decision has been made by the Congress.

Id. at 692, 98 S. Ct. at 1365 **[**100]** (footnote omitted). Since the labor policy arguments advanced to support the application of the rule of reason do not relate to the procompetitive impact of the Rules on Containers and the Dublin Supplement in the shipping market, they cannot remove this boycott from the category of Per se violations. [18]

---

18. Even if the rule of reason were to be applied here, the parties have suggested no procompetitive effects which would justify the challenged restraints under a rule of reason analysis.

Two additional points made by the dissent deserve comment. One is the suggestion that the Dublin Supplement is not a group boycott arrangement to which the Per se rule should apply because "the union is not a competitor of the shipping association or the stevedoring companies." Dissenting Opinion at 528. That suggestion assumes that the Per se ban on group boycotts applies only to horizontal competitors. *Klor's Inc. v. Broadway Hale Stores, Inc., 359 U.S. 207, 79 S. Ct. 705, 3 L. Ed. 2d 741 (1959)*, disposes of **[**101]** the question, since Broadway Hale, like the ILA here, was not a competitor of the wholesaler parties with whom it conspired. Like the stevedores, however, Broadway Hale was a competitor of the boycott target. The dissent's other point is that by applying a Per se rule to employee-labor union boycotts we are somehow giving the union lesser rights than political, religious, racial, or consumer groups which may try to advance their goals by boycott activity. Antitrust regulation of political or religious boycotts may raise important *first amendment* questions. See Note, Political Boycott Activity and the *First Amendment*, 91 Harv.L.Rev. 659 (1978). Those questions are absent here, just as they are absent when commercial organizations, which also have *first amendment* rights, step over the line drawn by Congress in the Sherman Act. In this case Congress has drawn the line between legitimate and illegitimate labor organization activities in §§ 8(b) and 8(e). We are not prepared to hold that those statutes violate the *first amendment*. Congress has made no similar statement of policy with respect to political or religious boycotts, and the application of a Per se rule here is in **[**102]** no way analogous to its application in those contexts.

Thus we hold that the district court erred in rejecting the contention of Conex and Twin that the enforcement of the Dublin Supplement, if nonexempt, was a group boycott and a Per se violation of the Sherman Act.

C. Election of Remedies

Faced with enforcement of the Dublin Supplement, Conex and Twin not **[*525]** only filed unfair practice charges with the NLRB, but also filed complaints with the Federal Maritime Commission (FMC) against the vessel owners seeking damages under § 22 of the Shipping Act of 1916, 46 U.S.C. § 821. The FMC complaints were voluntarily withdrawn without prejudice about the time the instant complaints were filed. [19.] **[**103]** The appellees now argue that the filing of complaints with the FMC concerning the enforcement of the Dublin Supplement was an irrevocable election of remedies which as a matter of law bars their claim under the Clayton Act. Nothing in either the Shipping Act or the Clayton Act so provides. [20.]

In support of their argument the defendants rely upon *Carnation Co. v. Pacific Westbound Conference, 383 U.S. 213, 224, 86 S. Ct. 781, 787-788, 15 L. Ed. 2d 709 (1966)*. There the Court held that although the FMC had jurisdiction over practices unlawful under the Shipping Act, that statute, unlike the Interstate Commerce Act, did not vest exclusive jurisdiction for reparations litigation in the administrative agency. The defendants in an antitrust suit had urged that by authorizing the FMC to approve conference shipping rates Congress had precluded the application of the antitrust laws to the shipping industry. The Court rejected this contention. Recognizing that a stay of the antitrust action might in some cases be appropriate while issues under the Shipping Act were litigated before the FMC, Chief Justice Warren wrote:

> Petitioner's failure to seek Shipping Act reparations does not affect its rights under the antitrust laws. The rights which petitioner claims under the antitrust laws are entirely **[**104]** collateral to those which petitioner might have sought under the Shipping Act. This does not suggest that petitioner might have sought recovery under both, but petitioner did have its choice.

Id. 86 S. Ct. at 787-788. The appellees would have us read the last quoted sentence as establishing a rule that the FMC filing was an irrevocable election of remedies. But Chief Justice Warren neither said nor suggested any such rule, and no considerations of policy support it. The purposes of an election of remedies prevention of double

---

19. Conex and Twin settled the FMC proceeding with TTT, the third vessel owner and dismissed the FMC complaint against it with prejudice. Twin settled its FMC complaint against Seatrain and dismissed its complaint with prejudice as to that defendant only. Whether Seatrain is entitled to a credit for whatever it paid in reparation for violations of the Shipping Act should Twin establish damage to its business or property is an issue not presented on this appeal.

20. Compare, e.g., The Interstate Commerce Act, 49 U.S.C. § 9.

recovery, forum shopping, and harassment of defendants by dual proceedings are adequately served by a rule that plaintiffs may not pursue both their Shipping Act and Clayton Act claims to a decision on the merits. Cf. *Abdallah v. Abdallah, 359 F.2d 170, 175 (3d Cir. 1966)*. It would be both formalistic and unfair to hold that the filing and voluntary dismissal without prejudice of a complaint seeking Shipping Act reparations is a bar to the *§ 4* Clayton Act remedy, and we decline to do so.

D. Illegality

The vessel owners and stevedores join ILA in the assertion that because Conex and Twin lacked ICC permits they cannot recover **[**105]** damages. The reasoning of Part IV. C., Supra, is applicable here, and will not be repeated. We do note, however, that the case for application of an illegality defense to the *§ 4* Clayton Act claim is by virtue of antitrust case law even weaker than that for its application under § 303(b). In *Perma Life Mufflers, Inc. v. Int'l Parts Corp., 392 U.S. 134, 88 S. Ct. 1981, 20 L. Ed. 2d 982 (1968)*, the Court held that ***HN19***[] the defense of Pari delicto was not a bar to an antitrust suit by distributors challenging restrictive provisions in agreements to which they were parties, except when it could be said that the plaintiffs, acting in their own self interest, were equally responsible with the defendants for the antitrust violations. While Perma Life dealt only **[*526]** with illegality alleged to be a concurrent violation of the antitrust laws, it has been understood to have abolished the defense of illegality even when the plaintiff's wrongdoing is unrelated to antitrust policy. E. g., *Lamp Liquors, Inc. v. Adolph Coors Co., 563 F.2d 425 (10th Cir. 1977)* (absence of **[**106]** a liquor license); *Adolph Coors Co. v. A & S Wholesalers, Inc., 561 F.2d 807 (10th Cir. 1977)* (absence of state and federal beer wholesaler permits); *Memorex Corp. v. IBM Corp., 555 F.2d 1379 (9th Cir. 1977)* (theft of trade secrets); *Health Corp. of America, Inc. v. New Jersey Dental Ass'n, 424 F. Supp. 931 (D.N.J. 1977)*, Mandamus denied without opinion sub nom. New Jersey Dental Ass'n v. Brotman, No. 77-1268 (3d Cir. Feb. 24, 1977), Mandamus denied, *434 U.S. 812, 98 S. Ct. 238, 54 L. Ed. 2d 162 (1977)* (violation of state health care regulations). Contra, *Cottonwood Mall Shopping Center, Inc. v. Utah Power & Light Co., 440 F.2d 36* (10th Cir.), Cert. denied, *404 U.S. 857, 92 S. Ct. 107, 30 L. Ed. 2d 99 (1971)*.

The authorities rejecting illegality defenses not directly related to the antitrust policy in issue in the plaintiff's case recognize the inappropriateness of requiring that the federal antitrust enforcement policy yield to unrelated regulatory policies, state or federal. The ICC permit requirements, which so often are administered to protect existing carriers from excessive competition, have **[**107]** nothing to do with the procompetitive policies of the antitrust laws. As we observed in Part IV. C., Supra, the ICC has sanctioning authority for the vindication of the public policies which are its responsibility. Additional enforcement at the expense of antitrust policy would not, in view of Perma Life, be appropriate. [21]

E. Equitable Estoppel

The vessel owners and stevedores join ILA in pleading equitable estoppel on the same theory that ILA asserts in defense to the § 303(b) count. For the reasons set forth in Part IV. D., Supra, we hold that it is not a legally sufficient defense to Count I.

VI. NONPARTICIPATION OF THE STEVEDORE DEFENDANTS

The final defense to summary judgment, advanced only by the stevedore defendants, is that they should not be held liable for the adoption and enforcement **[**108]** of the Dublin Supplement, even though they are members of NYSA and are parties to the collective bargaining agreement with ILA, because the record does not contain the clear proof of their complicity required by § 6 of the Norris-LaGuardia Act, *29 U.S.C. § 106*. Section 6, which applies both in civil and criminal actions, provides that:

> ***HN20***[] No officer or member of any association or organization, and no association or organization participating or interested in a labor dispute, shall be held responsible or liable in any court of the United States

---

[21] The appellees also rely on *Maltz v. Sax, 134 F.2d 2* (7th Cir.), Cert. denied, *319 U.S. 772, 63 S. Ct. 1437, 87 L. Ed. 1720 (1943)*. We do not believe that holding survives Perma Life.

> for the unlawful acts of individual officers, members, or agents, except upon clear proof of actual participation in, or actual authorization of, such acts, or of ratification of such acts after actual knowledge thereof.

The "clear proof" standard has been applied by the Supreme Court in an antitrust enforcement context. *Brotherhood of Carpenters v. United States, 330 U.S. 395, 67 S. Ct. 775, 91 L. Ed. 973 (1947)*.

We assume for purposes of this appeal that the acts complained of in Count I qualify **[**109]** as a labor dispute for purposes of § 6, and thus that the clear proof standard applies with respect to the authority of NYSA to act on behalf of the stevedores. As to other facts, such as the existence of a contract or combination, and the injury to the consolidators' business or property, the ordinary preponderance of the evidence test governs. *Ramsey v. United Mine Workers, 401 U.S. 302, 308-11, 91 S. Ct. 658, 28 L. Ed. 2d 64 (1971)*. But while § 6 binds the federal courts to a clear proof standard on the authority question, neither its text nor any judicial construction that has been called to our attention suggests that it precludes **[*527]** summary judgment on that question. Indeed the standard of *Fed.R.Civ.P. 56(c)* the absence of a genuine issue as to any material fact is higher than the clear proof standard imposed by § 6, which merely instructs the factfinder how to resolve genuine fact issues.

Contrary to the stevedores' argument, we find no genuine issue of material fact as to the authority of NYSA to act for them in negotiating and implementing the Dublin Supplement. All the stevedore defendants are members of NYSA and it bargains collectively on their **[**110]** behalf with ILA, which represents their longshoremen employees. The NYSA bylaws provide that any agreement negotiated by it is binding on all members unless within fourteen days members refuse to subscribe. The stevedores did not refuse to subscribe to, and thus became parties to, the Dublin Supplement. Any suggestion that they lacked knowledge of the charged group boycott is negated by the letter of April 13, 1973, directed to all NYSA members, including the stevedores, identifying Conex and Twin as violators of the Rules and activating the boycott provisions of the Dublin Supplement. No answering affidavits were submitted suggesting that either at the time of its execution or at the time of its implementation the stevedores took any action to disassociate themselves from the unlawful agreement to which they were parties. There is, therefore, no genuine issue of material fact as to the authority of NYSA to act for all its members, including the stevedores, in negotiating and implementing the contract undertaking a group boycott. The sole question is whether, having become a party to that contract with full knowledge of its contents, they are liable for the injury to the consolidators' **[**111]** business and property resulting from its implementation. We hold that they are.

VII. CONCLUSION

The order appealed from to the extent that it denied the motions of Conex and Twin for partial summary judgment of liability against ILA on Count III will be reversed, and the case remanded for the entry of such a judgment and for a trial on damages on that Count. Insofar as that order denied summary judgment on Count I against ILA, NYSA and the vessel owners it will be affirmed and the case will be remanded to the district court for further proceedings respecting the availability of the labor exemption defense to the *§ 4* Clayton Act claim which we have announced, and for a trial on damages on that Count if that defense should prove to be unavailing. Each party shall bear its own costs.

Dissent by: WEIS

Dissent

WEIS, Circuit Judge, concurring and dissenting.

Although I concur with the majority's disposition of most of the issues in this case, [1.] I am unable to agree that on remand, if the challenged conduct is found to be nonexempt, a per se approach would be proper. Determining the applicability of the labor exemption and choosing the appropriate level of antitrust scrutiny are discrete **[**112]** issues. Accordingly, if it is concluded that the exemption does not apply, consideration must then be given to utilizing a full rule of reason inquiry or applying the abbreviated per se approach.

The fact that the labor exemption **[**113]** does not insulate certain conduct does not make it a violation of the antitrust laws, but simply means that the activity is subject to scrutiny under those statutes. This has been made clear by the Supreme Court **[*528]** decisions discussing the labor exemption. In each instance, the Court has carefully separated the exemption inquiry from the ultimate liability determination. See *Connell Construction Co. v. Plumbers & Steamfitters Local 100, 421 U.S. 616, 637, 95 S. Ct. 1830, 44 L. Ed. 2d 418 (1975)*; *Local 189, Amalgamated Meat Cutters v. Jewel Tea Co., 381 U.S. 676, 693, 85 S. Ct. 1596, 14 L. Ed. 2d 640 (1965)* (opinion of White, J.); *United Mine Workers v. Pennington, 381 U.S. 657, 661, 669, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)* (opinion of White, J.).

I start with the basic proposition that the rule of reason is the prevailing standard of analysis. *Continental T.V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 49, 97 S. Ct. 2549, 53 L. Ed. 2d 568 (1977)*; *Sitkin Smelting & Refining Co. v. FMC Corp., 575 F.2d 440, 446 (3d Cir. 1978)*, and that the per se standard is applicable only in limited situations. As the **[**114]** Court explained in *Northern Pacific Railway v. United States, 356 U.S. 1, 5, 78 S. Ct. 514, 518, 2 L. Ed. 2d 545 (1958)*:

> "(T)here are certain agreements or practices which because of their pernicious effect on competition and lack of any redeeming virtue are conclusively presumed to be unreasonable and therefore illegal without elaborate inquiry as to the precise harm they have caused or the business excuse for their use."

The majority opinion correctly points out that some refusals to deal have been classified as per se violations. All of the cited cases, however, reviewed fact situations involving business competitors. The Supreme Court has never held that all boycotts, even those involving noncompetitors are per se violations, nor is there any present indication that that position will prevail. [2.] Indeed, in *De Filippo v. Ford Motor Co., 516 F.2d 1313, 1317-18 (3d Cir. 1975)*, we cautioned that a consequence of an overreliance on the "boycott" label would be the indiscriminate extension of the per se principle. The case at bar does not represent a classic commercial boycott because the union is not a competitor of the shipping association or of **[**115]** the stevedoring companies. Its aim was not the elimination of competition but work preservation or acquisition. Concededly, a boycott may include noncompetitors and be a violation of the Clayton Act, but that does not answer the question whether a per se violation is involved. See *St. Paul Fire & Marine Insurance Co. v. Barry, 438 U.S. 531, 98 S. Ct. 2923, 57 L. Ed. 2d 932 (1978)*. [3.]

[116]** A political, religious, racial, or consumer group that promotes a boycott of particular products to enforce its aims would not be guilty of a per se violation. In these cases, although the refusal to deal may be intended to inflict some injury upon the object of the boycott, the target is not a competitor of those who have actively urged the

---

1. I do not dispute that collateral estoppel, to the extent it establishes violations of §§ 8(b)(4) and 8(e), is applicable here. I do not, however, agree with all of the dictum in the majority opinion. I note particularly that in *International Bhd. of Teamsters v. Daniel, 439 U.S. 551, 99 S. Ct. 790, 58 L. Ed. 2d 808 (1979)*, the Supreme Court cautioned that the weight to be given an administrative agency's interpretation of the statute under which it operates must be limited by a court's obligation to honor the clear meaning of the legislation. I also read *Parklane Hosiery Co. v. Shore, 439 U.S. 322, 99 S. Ct. 645, 58 L. Ed. 2d 552 (1979)*, as permitting scrutiny of administrative procedures before according collateral estoppel effect to agency decisions.

2. *National Soc'y of Professional Eng'rs v. United States, 435 U.S. 679, 98 S. Ct. 1355, 55 L. Ed. 2d 637 (1978)*, though emphasizing the anti-competitive focus of the rule of reason, was interpreting that very precept, not announcing a new per se classification. That opinion, therefore, is of no relevance in determining as an initial matter which mode of antitrust analysis to employ. See generally Handler, Antitrust 1978, 78 Colum.L.Rev. 1363, 1364-74 (1978).

3. The courts of appeals have favored the rule of reason in noncompetitor boycott situations. See the cases collected in *Smith v. Pro Football, Inc., 193 U.S.App.D.C. 19, 593 F.2d 1173 (D.C. Cir. 1978)*.

restraint. See L. Sullivan, Antitrust § 92 (1977); Note, Boycott: A Specific Definition Limits the Applicability of a Per Se Rule, 71 Nw.U.L.Rev. 818, 830-32 (1977). See generally McCormick, Group Boycotts Per Se or Not Per Se, That is the Question, 7 Seton Hall L.Rev. 703 (1976).

The majority argues that permitting a rule of reason inquiry after a finding of no labor exemption would be redundant. But if a boycott by a political, religious, racial, or consumer group is to be subjected to rule of reason scrutiny, it is difficult to understand why that procedure should be denied a labor union simply because some but not necessarily all of the pertinent factors have been resolved in the labor exemption examination. The rule of reason analysis does not duplicate the exemption inquiry in its entirety and should not be **[**117]** forsaken **[*529]** merely because there might be some overlap. A union should not be singled out in a manner that would deny it all the opportunities for defense afforded other noncompetitor participants in similar boycotts. Indeed, I find myself in agreement with Professor Handler's view that an automatic finding of antitrust liability after a determination that union activity is nonexempt "would be a Per se approach with a vengeance." Handler, Labor and Antitrust: A Bit of History, 40 Antitrust L.J. 233, 239 (1971). Moreover, some consideration should be given to the other defendants' contentions that the restraint was forced upon them through union pressure and not through any desire of their own.

Perhaps none of the defendants can satisfy the rule of reason analysis, but it is premature on this record to decide whether the restraint violates the antitrust laws. That determination must be made initially by the district court after reviewing all relevant considerations. A shortcut is not appropriate in this case. Accordingly, I would remand to the district court with directions that if the labor exemption is not found to be applicable, the rule of reason should be **[**118]** applied to the antitrust claims.

In construing and applying the Sherman Act's ban against contracts, conspiracies, and combinations in restraint of trade, certain agreements or practices are so plainly anticompetitive, and so often lack any redeeming virtue, that they are conclusively presumed illegal without further examination under the rule of reason generally applied in Sherman Act cases. This per se rule is a valid and useful tool of antitrust policy and enforcement. And agreements among competitors to fix prices on their individual goods or services are among those concerted activities held to be within the per se category.

Lawyers' Edition Display

Decision

Blanket licensing for use of copyrighted musical compositions, held not to be per se illegal price fixing under Sherman Act (*15 USCS 1 et seq.*).

Summary

Two organizations serving as "clearinghouses" for copyright owners and users were sued in the United States District Court for the Southern District of New York for violation of the Sherman Act (*15 USCS 1 et seq.*) and copyright laws with respect to a system of blanket licensing whereby the organizations give licensees the right to perform any and all of the musical compositions owned by the organizations' members or affiliates as often as the licensees desire, for a stated term, in return for the licensees' payment of fees which do not directly depend on the amount or type of music used, but ordinarily reflect a percentage of total revenues or a flat dollar amount. The plaintiff, the operator of a national commercial television network holding blanket licenses from both organizations, alleged that the two organizations were unlawful monopolies and that the blanket licenses constituted illegal price fixing, unlawful tying arrangements, concerted refusals to deal, and misuse of copyrights. The District Court ultimately dismissed the complaint, rejecting a claim that the blanket licenses constituted price fixing that was a per se violation of the Sherman Act, and holding that since direct negotiation with individual copyright owners was available and feasible there was no undue restraint of trade, illegal tying, misuse of copyrights, or monopolization (*400 F Supp 737*). On appeal, the United States Court of Appeals for the Second Circuit reversed and remanded for consideration of an appropriate remedy, holding that the blanket licenses issued to television networks constituted a form of price fixing illegal per se under the Sherman Act, the determination as to price fixing settling the issue of liability under the Act and establishing copyright misuse (*562 F2d 130*).

On certiorari, the United States Supreme Court reversed and remanded. In an opinion by White, J., joined by Burger, Ch. J., and Brennan, Stewart, Marshall, Blackmun, Powell, and Rehnquist, JJ., it was held that the system of blanket licensing for the use of copyrighted musical compositions did not constitute a type of price fixing per se violative of the Sherman Act, and that in determining whether the system of blanket licensing violated the Sherman Act, the appropriate standard of examination was that of the rule of reason generally applied in Sherman Act cases, such standard of analysis being one for the Court of Appeals to utilize on remand if the issue of blanket licenses as employed in the television industry had been preserved in the Court of Appeals.

Stevens, J., dissenting, agreed with the Court's holding that the blanket licenses did not constitute a species of price fixing categorically forbidden by the Sherman Act, but would not have remanded the case, and instead would have affirmed the judgment of the Court of Appeals on the ground that the question whether the blanket licenses were unlawful under a rule of reason inquiry was properly before the court and should be answered affirmatively.

MONOPOLIES §16 > blanket licensing -- copyrighted musical compositions -- price fixing -- per se illegality -- rule of reason -- > Headnote:
LEdHN[1A][] [1A]***LEdHN[1B]***[] [1B]***LEdHN[1C]***[] [1C]

The system of blanket licensing whereby organizations operating as clearinghouses for copyright owners and users issue blanket licenses for the use of copyrighted musical compositions--which licenses give the licensees the right to perform any and all of the compositions owned by the organizations' members or affiliates as often as the licensees desire, for a stated term, in return for a fee which does not directly depend on the amount or type of music used, but ordinarily is based upon a percentage of total revenues or a flat dollar amount--does not constitute a type of price fixing that is illegal per se under the Sherman Act (*15 USCS 1 et seq.*), but rather, when such a system of blanket licensing is attacked as constituting price fixing under the Act, it should be subjected to examination under the federal ***antitrust law***'s rule of reason standard of analysis.

MONOPOLIES §9 > per se rule -- rule of reason -- > Headnote:
LEdHN[2][] [2]

Under the per se rule used in construing and applying the ban of the Sherman Act (*15 USCS 1 et seq.*) against contracts, conspiracies, and combinations in restraint of trade, certain agreements or practices are so plainly anticompetitive and so often lack any redeeming virtue that they will be conclusively presumed illegal without further examination under the rule of reason generally applied in Sherman Act cases.

MONOPOLIES §62 > price fixing -- blanket license -- copyrighted musical compositions -- per se illegality -- > Headnote:
LEdHN[3][] [3]

Although a system for the blanket licensing of copyrighted musical compositions through the joining together of the composers of musical compositions and publishing houses into an organization that sets a price for the blanket licenses sold by the organization might be "price fixing" in the literal sense, such does not alone establish that the licensing practice is one so plainly anticompetitive and so often lacking any redeeming virtue as to be conclusively presumed illegal under the Sherman Act (*15 USCS 1 et seq.*) without further examination under the rule of reason generally applied in Sherman Act cases.

COPYRIGHT §11 > MONOPOLIES §62 > blanket license -- musical composition -- > Headnote:
LEdHN[4A][] [4A]***LEdHN[4B]***[] [4B]

The mere fact that a broadcaster of television programs, as the licensee under a blanket license for the use of copyrighted musical compositions, pays a flat fee regardless of the amount of use it makes of copyrighted compositions under the agreement, and even though many of its programs contain little or no music, does not alone make out a violation of federal ***antitrust law*** or misuse of copyrights.

MONOPOLIES §37 > price fixing -- per se violation -- Sherman Act -- > Headnote:
LEdHN[5][] [5]

When two partners set the price of their goods or services they are literally "price fixing," but they are not per se in violation of the Sherman Act (*15 USCS 1 et seq.*).

MONOPOLIES §9 > federal antitrust laws -- per se violation -- > Headnote:
LEdHN[6][] [6]

It is only after considerable experience with a certain business relationship that such relationship will be classified as a per se violation of federal antitrust laws.

COPYRIGHT §15 > prior consent -- performance of copyrighted music -- > Headnote:
LEdHN[7A][] [7A]***LEdHN[7B]***[] [7B]

Under the copyright laws, those who publicly perform copyrighted music have the burden of obtaining prior consent.

MONOPOLIES §19 > per se rule -- effect and purpose of practice -- competition -- > Headnote:
LEdHN[8][] [8]

In characterizing conduct for purposes of the rule whereby certain agreements or practices that are so plainly anticompetitive and so often lacking any redeeming virtue are conclusively presumed illegal under federal ***antitrust law*** without further examination under the rule of reason generally applied in cases arising under the Sherman Act (*15 USCS 1 et seq.*), the inquiry must focus on whether the effect and, where the conduct tends to show effect, the purpose of the practice is to threaten the proper operation of the predominately free market economy--that is, whether the practice facially appears to be one that would always or almost always tend to restrict competition and decrease output, and in what portion of the market, or instead is one designed to increase economic efficiency and render markets more, rather than less, competitive.

MONOPOLIES §37 > agreements among competitors -- impact on price -- per se violation of Sherman Act -- > Headnote:
LEdHN[9][] [9]

Not all arrangements among actual or potential competitors that have an impact on price are per se violations of the Sherman Act (*15 USCS 1 et seq.*) or even unreasonable restraints; mergers among competitors eliminate competition, including price competition, but they are not per se illegal and many of them withstand attack under any existing antitrust standard; joint ventures and other cooperative arrangements are also not usually unlawful, at least not as price-fixing schemes, where the agreement on price is necessary to market the product at all.

ERROR §1537 > Court of Appeals' judgment -- reversal and remand by Supreme Court -- > Headnote:
LEdHN[10][] [10]

On certiorari to review the decision of a Federal Court of Appeals, which reversed and remanded as to a Federal District Court's dismissal of a complaint in an action brought by the operator of a television network alleging that blanket licenses under which the operator was licensed to use copyrighted musical compositions violated the Sherman Act (*15 USCS 1 et seq.*) and copyright laws because they constituted illegal price fixing, unlawful tying arrangements, concerted refusals to deal, and misuse of copyrights, the United States Supreme Court will--upon holding that the blanket licenses do not constitute a type of price fixing that is per se illegal under the Sherman Act but must be examined under the rule of reason--reverse the Court of Appeals' judgment that the blanket licenses constitute price fixing per se violative of the Sherman Act and also its judgment, dependent upon its holding regarding price fixing, that the blanket licenses constitute copyright misuse, and the Supreme Court will remand the case for further proceedings to consider any unresolved issues that the network operator might have properly brought to the Court of Appeals, including an assessment under the rule of reason of blanket licenses as employed in the television industry, if such issue had been preserved by the network operator in the Court of Appeals. (Stevens, J., dissented from this holding.)

ERROR §1087.5(2) > Court of Appeals' judgment -- affirmance despite error -- failure to raise point in petition for certiorari -- > Headnote:
LEdHN[11A][] [11A]***LEdHN[11B]***[] [11B]

On certiorari to review the decision of a Federal Court of Appeals, which reversed and remanded as to a Federal District Court's dismissal of a complaint in an action brought by the operator of a television network alleging that blanket licenses under which the network was licensed to use copyrighted musical compositions violated the Sherman Act (*15 USCS 1 et seq.*) and copyright laws as constituting illegal price fixing, unlawful tying arrangements, concerted refusals to deal, and misuse of copyrights, the United States Supreme Court--upon holding that the Court of Appeals had erred in ruling that the blanket licenses constituted a type of price fixing that is per se illegal under the Sherman Act--will not affirm the Court of Appeals' judgment on the ground that the blanket licenses constitute tying arrangements violative of the Sherman Act or on the ground that the licensors monopolized the relevant market contrary to the Sherman Act; the Supreme Court will leave undisturbed the Court of Appeals' judgment in respect to its rejection of the tying and monopolization arguments, particularly since the network operator did not file its own petition for certiorari challenging the Court of Appeals' failure to sustain the tying and monopolization claims.

Syllabus

[498] Respondent Columbia Broadcasting System, Inc. (CBS), brought this action against petitioners, American Society of Composers, Authors and Publishers (ASCAP) and Broadcast Music, Inc. (BMI), and their members and affiliates, alleging, *inter alia*, that the issuance by ASCAP and BMI to CBS of blanket licenses to copyrighted musical compositions at fees negotiated by them is illegal price fixing under the antitrust laws. Blanket licenses give the licensees the right to perform any and all of the compositions owned by the members or affiliates as often as the licensees desire for a stated term. Fees for blanket licenses are ordinarily a percentage of total revenues or a flat dollar amount, and do not directly depend on the amount or type of music **[****2]** used. After a trial limited to the issue of liability, the District Court dismissed the complaint, holding, *inter alia*, that the blanket license was not price fixing and a *per se* violation of the Sherman Act. The Court of Appeals reversed and remanded for consideration of the appropriate remedy, holding that the blanket license issued to television networks was a form of price fixing illegal *per se* under the Sherman Act and established copyright misuse.

Held: The issuance by ASCAP and BMI of blanket licenses does not constitute price fixing *per se* unlawful under the antitrust laws. Pp. 7-25.

(a) "It is only after considerable experience with certain business relationships that courts classify them as *per se* violations of the Sherman Act." *United States v. Topco Associates, Inc., 405 U.S. 596, 607-608*. And though there has been rather intensive antitrust scrutiny of ASCAP and BMI and their blanket licenses, that experience hardly counsels that this Court should outlaw the blanket license as a *per se* restraint of trade. Furthermore, the United States, by its *amicus* brief in the present case, urges that the blanket licenses, which **[****3]** consent decrees in earlier actions by the Government authorize ASCAP and BMI to issue to television networks, are not *per se* violations of the Sherman Act. And Congress, in the Copyright Act of 1976, has itself chosen to employ the blanket license and similar practices. Thus, there is no nearly universal view that the blanket licenses are a form of price fixing subject to automatic condemnation under the Sherman Act, rather than to a careful assessment under the rule of reason generally applied in Sherman Act cases. Pp. 7-16.

(b) In characterizing the conduct of issuing blanket licenses under the *per se* rule, this Court's inquiry must focus on whether the effect and, here because it tends to show effect, the purpose of the practice are to threaten the proper operation of a predominantly free-market economy. The blanket license is not a "naked [restraint] of trade with no purpose except stifling of competition," *White Motor Co. v. United States, 372 U.S. 253, 263*, but rather accompanies the integration of sales, monitoring, and enforcement against unauthorized copyright use, which would be difficult and expensive problems if left to individual users **[****4]** and copyright owners. Although the blanket license fee is set by ASCAP and BMI rather than by competition among individual copyright owners, and although it is a fee for the use of any of the compositions covered by the license, the license cannot be wholly equated with a simple horizontal arrangement among competitors and is quite different from anything any individual owner could issue. In light of the background, which plainly indicates that over the years, and in the face of available alternatives including direct negotiation with individual copyright owners, the blanket license has provided an acceptable mechanism for at least a large part of the market for the performing rights to copyrighted musical compositions, it cannot automatically be declared illegal in all of its many manifestations. Rather, it should be subjected to a more discriminating examination under the rule of reason. Pp. 16-24.

(c) The Court of Appeals' judgment holding that the licensing practices of ASCAP and BMI are *per se* violations of the Sherman Act, and the copyright misuse judgment dependent thereon, are reversed, and the case is remanded for further proceedings to consider any unresolved issues **[****5]** that CBS may have properly brought to the Court of Appeals, including an assessment under the rule of reason of the blanket license as employed in the television industry. Pp. 24-25.

Counsel: Amalya L. Kearse argued the cause for petitioners in No. 77-1578. With her on the briefs were George A. Davidson and Conley E. Brian, Jr. Jay Topkis argued the cause for petitioners in No. 77-1583. With him on the briefs were Bernard Korman, Simon H. Rifkind, Herman Finkelstein, and Allan Blumstein.

Alan J. Hruska argued the cause for respondents in both cases. With him on the briefs were John D. Appel and Robert M. Sondak.

Deputy Solicitor General Easterbrook argued the cause for the United States as amicus curiae urging reversal. With him on the briefs were Solicitor General McCree, Assistant Attorney General Shenefield, William Alsup, John J. Powers III, and Andrea Limmer. [+]

Opinion

[*4] **[***6]** **[**1554]** MR. JUSTICE **WHITE** delivered the opinion of the Court.

LEdHN[1A][] [1A]This case involves an action under the antitrust and copyright laws brought by respondent Columbia Broadcasting System, Inc. (CBS), against petitioners, American Society of Composers, Authors and Publishers (ASCAP) and Broadcast Music, **[499]** Inc. (BMI), and their members and affiliates. [1] The basic question presented is whether the issuance by ASCAP and BMI to CBS of blanket licenses to copyrighted musical compositions at fees negotiated by them is price fixing *per se* unlawful under the antitrust laws.

[**7]** I

CBS operates one of three national commercial television networks, supplying programs to approximately 200 affiliated stations and telecasting approximately 7,500 network programs per year. Many, but not all, of these

[+] Briefs of amici curiae urging reversal were filed by Irwin Karp for the Authors League of America, Inc.; by Philip Elman and Robert M. Lichtman for the Performing Right Society, Ltd., et al.; and by Robert H. Bork for Aaron Copland et al.

Briefs of amici curiae urging affirmance were filed by Ira M. Millstein for the All-Industry Television Music License Committee; by Clarence Fried for American Broadcasting Companies, Inc.; by David R. Hyde for National Broadcasting Company, Inc.; by John H. Midlen, Jr., for National Religious Broadcasters, Inc.; and by John L. Hill, Attorney General of Texas, David M. Kendall, First Assistant Attorney General, and Robert S. Bickerstaff and Susan Dasher, Assistant Attorneys General, for the Universities of the State of Texas et al.

Irving Moskovitz filed a brief for the All-Industry Radio Music License Committee as amicus curiae.

[1] The District Court certified the case as a defendant class action. *400 F.Supp. 737, 741 n. 2 (SDNY 1975)*.

programs make use of copyrighted music recorded on the soundtrack. CBS also owns television and radio stations in various cities. It is "'the giant of the world in the use of **[***7]** music rights,'" the "'No. 1 outlet in the history of entertainment.'" [2]

Since 1897, the copyright laws have vested in the owner of a copyrighted musical composition the exclusive right to perform the work publicly for profit, [3] but the legal right is not self-enforcing. In 1914, Victor Herbert and a handful of other composers organized ASCAP because those who performed **[****8]** **[*5]** copyrighted music for profit were so numerous and widespread, and **[**1555]** most performances so fleeting, that as a practical matter it was impossible for the many individual copyright owners to negotiate with and license the users and to detect unauthorized uses. "ASCAP was organized as a 'clearing-house' for copyright owners and users to solve these problems" associated with the licensing of music. *400 F.Supp. 737, 741 (SDNY 1975)*. As ASCAP operates today, its 22,000 members grant it nonexclusive rights to license nondramatic performances of their works, and ASCAP issues licenses and distributes royalties to copyright owners in accordance with a schedule reflecting the nature and amount of the use of their music and other factors.

BMI, a nonprofit corporation owned by members of the broadcasting industry, [4] was organized in 1939, is affiliated with or represents some 10,000 publishing companies and 20,000 authors and composers, and operates **[****9]** in much the same manner as ASCAP. Almost every domestic copyrighted composition is in the repertory either of ASCAP, with a total of three million compositions, or of BMI, with one million.

Both organizations operate primarily through blanket licenses, which give the licensees the right to perform any and all of the compositions owned by the members or affiliates as often as the licensees desire for a stated term. Fees for blanket licenses are ordinarily a percentage of total revenues or a flat dollar amount, and do not directly depend on the amount or type of music used. Radio and television broadcasters are the largest users of music, and almost all of them hold blanket licenses from both ASCAP and BMI. Until this litigation, CBS held blanket licenses from both organizations for its television network on a continuous basis since the late 1940's and **[****10]** had never attempted to secure any other form of **[*6]** license from either ASCAP [5] or any of its members. *Id., at 752-754*.

The complaint filed by CBS charged various violations of the Sherman Act [6] and the copyright laws. [7] CBS argued that ASCAP and BMI are unlawful monopolies and that the blanket license is illegal price fixing, an unlawful tying arrangement, **[***8]** a concerted refusal to deal, and a misuse of copyrights. The District Court, though denying summary judgment to certain defendants, ruled that the practice did not fall within the *per se* rule. *337 F.Supp. 394, 398 (SDNY 1972)*. After an 8-week trial, limited to the issue of liability, the court dismissed the complaint, rejecting again the claim that the blanket license was price fixing and a *per se* violation of *§ 1* of the Sherman Act, and holding that since direct **[****11]** negotiation with individual copyright owners is available and feasible there is no undue restraint of trade, illegal tying, misuse of copyrights, or monopolization. *400 F.Supp., at 781-783*.

---

[2] *Id., at 771*, quoting a CBS witness. CBS is also a leading music publisher, with publishing subsidiaries affiliated with both ASCAP and BMI, and is the world's largest manufacturer and seller of records and tapes. *Ibid*.

[3] Act of Jan. 6, 1897, 29 Stat. 481.

[4] CBS was a leader of the broadcasters who formed BMI, but it disposed of all of its interest in the corporation in 1959. *400 F.Supp., at 742*.

[5] Unless the context indicates otherwise, references to ASCAP alone in this opinion usually apply to BMI as well. See n. 20, *infra*.

[6] *15 U. S. C. §§ 1* and *2*.

[7] CBS seeks injunctive relief for the antitrust violations and a declaration of copyright misuse. *400 F.Supp., at 741*.

[500] Though agreeing with the District Court's factfinding and not disturbing its legal conclusions on the other antitrust theories of liability, [8] **[****12]** the Court of Appeals held that the blanket license issued to television networks was a form of price fixing illegal *per se* under the Sherman Act. *562 F.2d 130, 140 (CA2 1977)*. This conclusion, without more, settled the issue of liability under the Sherman Act, established copyright misuse, [9] and required reversal of the District **[**1556]** Court's **[*7]** judgment, as well as a remand to consider the appropriate remedy. [10]

[**13]** ASCAP and BMI petitioned for certiorari, presenting the questions of the applicability of the *per se* rule and of whether this constitutes misuse of copyrights. CBS did not cross petition to challenge the failure to sustain its other antitrust claims. We granted certiorari because of the importance of the issues to the antitrust and copyright laws. *439 U.S. 817 (1978)*. Because we disagree with the Court of Appeals' conclusions with respect to the *per se* illegality of the blanket license, we reverse its judgment and remand the cause for further appropriate proceedings.

[*9]** II

LEdHN[2][] [2]***HN1***[] In construing and applying the Sherman Act's ban against contracts, conspiracies, and combinations in restraint of trade, **[*8]** the Court has held that certain agreements or practices are so "plainly anticompetitive," *National Society of Professional Engineers v. United States, 435 U.S. 679, 692 (1978)*;*Continental T. V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 50 (1977)*, **[****14]** and so often "lack . . . any redeeming virtue," *Northern Pac. R. Co. v. United States, 356 U.S. 1, 5 (1958)*, that they are conclusively presumed illegal without further examination under the rule of reason generally applied in Sherman Act cases. This *per se* rule is a valid and useful tool of antitrust policy and enforcement. [11] **[****15]** And agreements among competitors to fix prices on their

---

[8] The Court of Appeals affirmed the District Court's rejection of CBS's monopolization and tying contentions but did not rule on the District Court's conclusion that the blanket license was not an unreasonable restraint of trade. See *562 F.2d 130, 132, 135, 141 n. 29 (CA2 1977)*.

[9] At CBS's suggestion, the Court of Appeals held that the challenged conduct constituted misuse of copyrights solely on the basis of its finding of unlawful price fixing. *Id., at 141 n. 29*.

[10] The Court of Appeals went on to suggest some guidelines as to remedy, indicating that despite its conclusion on liability the blanket license was not totally forbidden. The Court of Appeals said:

"Normally, after a finding of price-fixing, the remedy is an injunction against the price-fixing -- in this case, the blanket license. We think, however, that if on remand a remedy can be fashioned which will ensure that the blanket license will not affect the price or negotiations for direct licenses, the blanket license need not be prohibited in all circumstances. The blanket license is not simply a 'naked restraint' ineluctably doomed to extinction. There is not enough evidence in the present record to compel a finding that the blanket license does not serve a market need for those who wish full protection against infringement suits or who, for some other business reason, deem the blanket license desirable. The blanket license includes a practical covenant not to sue for infringement of any ASCAP copyright as well as an indemnification against suits by others.

"Our objection to the blanket license is that it reduces price competition among the members and provides a disinclination to compete. We think that these objections may be removed if ASCAP itself is required to provide some form of per use licensing which will ensure competition among the individual members with respect to those networks which wish to engage in per use licensing." *Id., at 140* (footnotes omitted).

[11] "This principle of *per se* unreasonableness not only makes the type of restraints which are proscribed by the Sherman Act more certain to the benefit of everyone concerned, but it also avoids the necessity for an incredibly complicated and prolonged economic investigation into the entire history of the industry involved, as well as related industries, in an effort to determine at large whether a particular restraint has been unreasonable -- an inquiry so often wholly fruitless when undertaken." *Northern Pac. R. Co. v. United States, 356 U.S. 1, 5 (1958)*.

See *Continental T. V., Inc. v. GTE Sylvania Inc., 433 U.S. 36, 50 n. 16 (1977)*; *United States v. Topco Associates, Inc., 405 U.S. 596, 609 n. 10 (1972)*.

individual goods or services are among those concerted activities that the Court has held to be within the *per se* category. [12] But easy labels do not always supply ready answers.

A

LEdHN[3][] [3]**LEdHN[4A]**[] [4A]**LEdHN[5]**[] [5]To the Court of Appeals and CBS, the blanket license involves "price fixing" in the literal sense: the composers and publishing houses have joined together into an organization that sets its price for the blanket license it sells. [13] **[****17]** But this **[*9]** is not a **[**1557]** **[501]** question simply of determining whether two or more potential competitors have literally "fixed" a "price." As generally used in the antitrust field, "price fixing" is a shorthand way of describing certain categories of business behavior to which the *per se* rule has been held applicable. The Court of Appeals' literal approach does not alone establish that this particular practice is one of those types or that it is "plainly anticompetitive" and very likely without "redeeming virtue." Literalness is overly simplistic and often overbroad. **HN2**[] **[****16]** When two partners set the price of their goods or services **[***10]** they are literally "price fixing," but they are not *per se* in violation of the Sherman Act. See *United States v. Addyston Pipe & Steel Co., 85 F. 271, 280 (CA6 1898)*, aff'd, *175 U.S. 211 (1899)*. Thus, it is necessary to characterize the challenged conduct as falling within or without that category of behavior to which we apply the label *"per se* price fixing." That will often, but not always, be a simple matter. [14]

LEdHN[4B][] [4B]

LEdHN[6][] [6]Consequently, as we recognized in *United States v. Topco Associates, Inc., 405 U.S. 596, 607-608 (1972)*,**HN3**[] "[it] is only after considerable experience with certain business relationships that courts classify them as *per se* violations . . . ." See **[*10]** *White **[****18]** Motor Co. v.United States, 372 U.S. 253, 263 (1963)*. We have never examined a practice like this one before; indeed, the Court of Appeals recognized that "[in] dealing with performing rights in the music industry we confront conditions both in copyright law and in ***antitrust law*** which are *sui generis*." *562 F.2d, at 132*. And though there has been rather intensive antitrust scrutiny of ASCAP and its blanket licenses, that experience hardly counsels that we should outlaw the blanket license as a *per se* restraint of trade.

B

---

[12] See cases discussed in n. 14, *infra*.

[13] CBS also complains that it pays a flat fee regardless of the amount of use it makes of ASCAP compositions and even though many of its programs contain little or no music. We are unable to see how that alone could make out an antitrust violation or misuse of copyrights:

"Sound business judgment could indicate that such payment represents the most convenient method of fixing the business value of the privileges granted by the licensing agreement. . . . Petitioner cannot complain because it must pay royalties whether it uses Hazeltine patents or not. What it acquired by the agreement into which it entered was the privilege to use any or all of the patents and developments as it desired to use them." *Automatic Radio Mfg. Co. v. Hazeltine Research, Inc., 339 U.S. 827, 834 (1950)*.

See also *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100 (1969)*.

[14] Cf., *e. g., United States v. McKesson & Robbins, Inc., 351 U.S. 305 (1956)* (manufacturer/wholesaler agreed with independent wholesalers on prices to be charged on products it manufactured); *United States v. Socony-Vacuum Oil Co., 310 U.S. 150 (1940)* (firms controlling a substantial part of an industry agreed to purchase "surplus" gasoline with the intent and necessary effect of increasing the price); *United States v. Trenton Potteries Co., 273 U.S. 392 (1927)* (manufacturers and distributors of 82% of certain vitreous pottery fixtures agreed to sell at uniform prices).

This litigation and other cases involving ASCAP and its licensing practices have arisen out of the efforts of the creators of copyrighted musical compositions to collect for the public performance of their works, as they are entitled to do under the Copyright Act. As already indicated, ASCAP and BMI originated to make possible and to facilitate dealings between copyright owners and those who desire to use their music. Both organizations plainly involve concerted action in a large and active line of commerce, and it is not surprising that, as the District Court found, "[neither] ASCAP nor BMI is a stranger to antitrust **[****19]** litigation." *400 F.Supp., at 743*.

The Department of Justice first investigated allegations of anticompetitive conduct by ASCAP over 50 years ago. [15] **[****20]** A criminal complaint was filed in 1934, but the Government was granted a midtrial continuance and never returned to the courtroom. In separate complaints in 1941, the United States charged that the blanket license, which was then the only license **[**1558]** offered by ASCAP and BMI, was an illegal restraint of trade and that arbitrary prices were being charged as the result of an illegal copyright pool. [16] The Government sought **[*11]** to enjoin ASCAP's exclusive licensing powers and to require **[***11]** a different form of licensing by that organization. The case was settled by a consent decree that imposed tight restrictions on ASCAP's operations. [17] Following complaints relating to the television industry, successful private litigation against ASCAP by movie theaters, [18] and a **[502]** Government challenge to ASCAP's arrangements with similar foreign organizations, the 1941 decree was reopened and extensively amended in 1950. [19]

Under the amended decree, which still substantially controls the activities of ASCAP, members may grant ASCAP only nonexclusive rights to license their works for public performance. Members, therefore, retain the rights individually to license public performances, along with the rights to license the use of their compositions for other purposes. ASCAP itself is forbidden to grant any license to perform one or more specified compositions in the ASCAP repertory unless both the user and the owner have requested **[****21]** it in writing to do so. ASCAP is required to grant to any user making written application a nonexclusive license to perform all ASCAP compositions, either for a period of time or on a per-program basis. ASCAP may not insist on the blanket license, and the fee for the per-program license, which is to be based on the revenues for the program on which ASCAP music is played, must offer the applicant a genuine economic choice between the per-program license and the more common blanket license. If ASCAP and a putative licensee are unable to agree on a fee within 60 days, the applicant may apply to the District Court **[*12]** for a determination of a reasonable fee, with ASCAP having the burden of proving reasonableness. [20]

[**22]** The 1950 decree, as amended from time to time, continues in effect, and the blanket license continues to be the primary instrument through which ASCAP conducts its business under the decree. The courts have twice construed the decree not to require ASCAP to issue licenses for selected portions of its repertory. [21] **[****23]** It also

[18] See *Alden-Rochelle, Inc. v. ASCAP, 80 F.Supp. 888 (SDNY 1948)*; *M. Witmark & Sons v. Jenson, 80 F.Supp. 843 (Minn. 1948)*, appeal dismissed *sub nom.* ***M. Witmark & Sons v. Berger Amusement Co., 177 F.2d 515 (CA8 1949)***.

[19] *United States* v. *ASCAP*, 1950-1951 Trade Cases para. 62,595 (SDNY 1950).

[20] BMI is in a similar situation. The original decree against BMI is reported as *United States* v. *BMI*, 1940-1943 Trade Cases para. 56,096 (ED Wis. 1941). A new consent judgment was entered in 1966 following a monopolization complaint filed in 1964. *United States v. BMI, 1966 Trade Cases para. 71,941 (SDNY*). The ASCAP and BMI decrees do vary in some respects. The BMI decree does not specify that BMI may only obtain nonexclusive rights from its affiliates or that the District Court may set the fee if the parties are unable to agree. Nonetheless, the parties stipulated, and the courts below accepted, that "CBS could secure direct licenses from BMI affiliates with the same ease or difficulty, as the case may be, as from ASCAP members." *400 F.Supp., at 745*.

remains true that the decree guarantees the legal availability of direct licensing of performance **[***12]** rights by ASCAP members; and the District Court found, and in this respect the Court of Appeals agreed, that there are no practical impediments preventing direct dealing by the television networks if they so desire. Historically, they have not done so. Since 1946, CBS and other television networks have taken blanket licenses from ASCAP and BMI. It was not until this suit **[**1559]** arose that the CBS network demanded any other kind of license. [22]

[*13] Of course, a consent judgment, even one entered at the behest of the Antitrust Division, does not immunize the defendant from liability for actions, including those contemplated by the decree, that violate the rights of nonparties. See *Sam Fox Publishing Co. v. United States, 366 U.S. 683, 690 (1961)*, which involved this same decree. But it cannot be ignored that the Federal Executive and Judiciary have carefully scrutinized ASCAP and the challenged conduct, have imposed restrictions on various of ASCAP's practices, and, by the terms of the decree, stand ready to provide further consideration, supervision, and perhaps invalidation of asserted anticompetitive practices. **[****24]** [23] In these circumstances, we have a unique indicator that the challenged practice may have redeeming competitive virtues and that the search for those values is not almost sure to be in vain. [24] Thus, although CBS is not bound by the Antitrust Division's actions, the decree is a fact of economic and legal life in this industry, and the Court of Appeals should not have ignored it completely in analyzing the practice. See *id., at 694-695*. That fact alone might not remove a naked price-fixing **[503]** scheme from the ambit of the *per se* rule, but, as discussed *infra*, Part III, here we are uncertain whether the practice on its face has the effect, or could have been spurred by the purpose, of restraining competition among the individual composers.

[**25]** After the consent decrees, the legality of the blanket license was challenged in suits brought by certain ASCAP members against individual radio stations for copyright infringement. The stations raised as a defense that the blanket license was a form of price fixing illegal under the Sherman Act. The parties **[*14]** stipulated that it would be nearly impossible for each radio station to negotiate with each copyright holder separate licenses for the performance of his works on radio. Against this background, and relying heavily on the 1950 consent judgment, the Court of Appeals for the Ninth Circuit rejected claims that ASCAP was a combination in restraint of trade and that the blanket license constituted illegal price fixing. *K-91, Inc. v. Gershwin Publishing Corp., 372 F.2d 1 (1967)*, **[***13]** cert. denied, *389 U.S. 1045 (1968)*.

The Department of Justice, with the principal responsibility for enforcing the Sherman Act and administering the consent decrees relevant to this case, agreed with the result reached by the Ninth Circuit. In a submission *amicus curiae* opposing one station's petition for certiorari in this Court, the Department **[****26]** stated that there must be "some kind of central licensing agency by which copyright holders may offer their works in a common pool to all who wish to use them." Memorandum for United States as *Amicus Curiae* on Pet. for Cert. in *K-91, Inc*. v. *Gershwin Publishing Corp*., O. T. 1967, No. 147, pp. 10-11. And the Department elaborated on what it thought that fact meant for the proper application of the antitrust laws in this area:

"The Sherman Act has always been discriminatingly applied in the light of economic realities. There are situations in which competitors have been permitted to form joint selling agencies or other pooled activities, subject to strict

---

[21] *United States v. ASCAP (Application of Shenandoah Valley Broadcasting, Inc.), 208 F.Supp. 896 (SDNY 1962)*, aff'd, *331 F.2d 117* (CA2), cert. denied, ***377 U.S. 997 (1964)***; *United States v. ASCAP (Application of National Broadcasting Co.), 1971 Trade Cases para. 73,491 (SDNY 1970)*. See also *United States v. ASCAP (Motion of Metromedia, Inc.), 341 F.2d 1003 (CA2 1965)*.

[22] National Broadcasting Co. did, in 1971, request an annual blanket license for 2,217 specific ASCAP compositions most frequently used on its variety shows. It intended to acquire the remaining rights to background and theme music through direct transactions by it and its program packagers. See *United States v. ASCAP (Application of National Broadcasting Co.), supra.*

[23] *1950-1951 Trade Cases para. 62,595, p. 63,756*.

[24] Cf. *Continental T. V., Inc. v. GTE Sylvania Inc., 433 U.S., at 50 n. 16*. Moreover, unthinking application of the *per se* rule might upset the balancing of economic power and of procompetitive and anticompetitive effects presumably worked out in the decree.

limitations **[**1560]** under the antitrust laws to guarantee against abuse of the collective power thus created. *Associated Press v. United States, 326 U.S. 1*; *United States v. St. Louis Terminal, 224 U.S. 383*; *Appalachian Coals, Inc. v. United States, 288 U.S. 344*; *Chicago Board of Trade v. United States, 246 U.S. 231*. This case appears to us to involve such a situation. The extraordinary number of users spread across the land, **[****27]** the ease with which a performance may be broadcast, the sheer volume **[*15]** of copyrighted compositions, the enormous quantity of separate performances each year, the impracticability of negotiating individual licenses for each composition, and the ephemeral nature of each performance all combine to create unique market conditions for performance rights to recorded music." *Id., at 10* (footnote omitted).

The Department concluded that, in the circumstances of that case, the blanket licenses issued by ASCAP to individual radio stations were neither a *per se* violation of the Sherman Act nor an unreasonable restraint of trade.

As evidenced by its *amicus* brief in the present case, the Department remains of that view. Furthermore, the United States disagrees with the Court of Appeals in this case and urges that the blanket licenses, which the consent decree authorizes ASCAP to issue to television networks, are not *per se* violations of the Sherman Act. It takes no position, however, on whether the practice is an unreasonable restraint of trade in the context of the network television industry.

Finally, we note that Congress itself, in the new Copyright Act, has **[****28]** chosen to employ the blanket license and similar practices. Congress created a compulsory blanket license for secondary transmissions by cable television systems and provided that "[notwithstanding] any provisions of the antitrust laws, . . . any claimants may agree among themselves as to the proportionate division of compulsory licensing fees among them, **[***14]** may lump their claims together and file them jointly or as a single claim, or may designate a common agent to receive payment on their behalf." 17 U. S. C. App. § 111 (d)(5)(A). And the newly created compulsory license for the use of copyrighted compositions in jukeboxes is also a blanket license, which is payable to the performing-rights societies such as ASCAP unless an individual copyright holder can prove his entitlement to a share. *§ 116 (c)(4)*. Moreover, in requiring noncommercial broadcasters to pay for their use of copyrighted music, Congress again provided that "[notwithstanding] **[*16]** any provision of the antitrust laws" copyright owners "may designate common agents to negotiate, agree to, pay, or receive payments." *§ 118(b)*. Though these provisions are not directly controlling, **[****29]** they do reflect an opinion that the blanket license, and ASCAP, are economically beneficial in at least some circumstances.

[504] There have been District Court cases holding various ASCAP practices, including its licensing practices, to be violative of the Sherman Act, [25] but even so, there is no nearly universal view that either the blanket or the per-program licenses issued by ASCAP at prices negotiated by it are a form of price fixing subject to automatic condemnation under the Sherman Act, rather than to a careful assessment under the rule of reason.

III

LEdHN[1B][] [1B] **[****30]** Of course, we are no more bound than is CBS by the views of the Department of Justice, the results in the prior lower court **[**1561]** cases, or the opinions of various experts about the merits of the blanket license. But while we must independently examine this practice, all those factors should caution us against too easily finding blanket licensing subject to *per se* invalidation.

A

As a preliminary matter, we are mindful that the Court of Appeals' holding would appear to be quite difficult to contain. If, as the court held, there is a *per se* antitrust violation whenever ASCAP issues a blanket license to a television network for a single fee, why would it not also be automatically illegal for ASCAP to negotiate and issue

[25] See cases cited n. 18, *supra*. Those cases involved licenses sold to individual movie theaters to "perform" compositions already on the motion pictures' soundtracks. ASCAP had barred its members from assigning performing rights to movie producers at the same time recording rights were licensed, and the theaters were effectively unable to engage in direct transactions for performing rights with individual copyright owners.

blanket licenses to **[*17]** individual radio or television stations or to other users who perform copyrighted music for profit? [26] Likewise, if the present network licenses issued through ASCAP on behalf of its members are *per se* violations, why would it not be equally illegal for the members to authorize ASCAP to issue licenses establishing various categories of uses that a network might have for **[***15]** copyrighted music and setting a standard **[****31]** fee for each described use?

Although the Court of Appeals apparently thought the blanket license could be saved in some or even many applications, it seems to us that the *per se* rule does not accommodate itself to such flexibility and that the observations of the Court of Appeals with respect to remedy tend to impeach the *per se* basis for the holding of liability. [27]

[**32]**

[*18] ***LEdHN[7A]***[] [7A]CBS would prefer that ASCAP be authorized, indeed directed, to make all its compositions available at standard per-use rates within negotiated categories of use. *400 F.Supp., at 747 n. 7*.[28] **[****33]** But if this in itself or in conjunction with blanket licensing constitutes illegal price fixing by copyright owners, CBS urges that an injunction issue forbidding ASCAP to issue any blanket license or to negotiate any fee except on behalf of an individual member for the use of his own copyrighted work or works. [29] Thus, we are called upon to determine that blanket licensing is unlawful across the board. We are **[505]** quite sure, however, that the *per se* rule does not require any such holding.

LEdHN[7B][] [7B]

B

[1562]** In the first place, the line of commerce allegedly being restrained, the performing rights to copyrighted music, exists at all only because of the copyright laws. Those who would use copyrighted music in public

---

[26] Certain individual television and radio stations, appearing here as *amici curiae*, argue that the *per se* rule should extend to ASCAP's blanket licenses with them as well. The television stations have filed an antitrust suit to that effect. *Buffalo Broadcasting Co*. v. *ASCAP*, 78 Civ. 5670 (SDNY, filed Nov. 27, 1978).

[27] See n. 10, *supra*. The Court of Appeals would apparently not outlaw the blanket license across the board but would permit it in various circumstances where it is deemed necessary or sufficiently desirable. It did not even enjoin blanket licensing with the television networks, the relief it realized would normally follow a finding of *per se* illegality of the license in that context. Instead, as requested by CBS, it remanded to the District Court to require ASCAP to offer in addition to blanket licensing some competitive form of per-use licensing. But per-use licensing by ASCAP, as recognized in the consent decrees, might be even more susceptible to the *per se* rule than blanket licensing.

The rationale for this unusual relief in a *per se* case was that "[the] blanket license is not simply a 'naked restraint' ineluctably doomed to extinction." *562 F.2d, at 140*. To the contrary, the Court of Appeals found that the blanket license might well "serve a market need" for some. *Ibid*. This, it seems to us, is not the *per se* approach, which does not yield so readily to circumstances, but in effect is a rather bobtailed application of the rule of reason, bobtailed in the sense that it is unaccompanied by the necessary analysis demonstrating why the particular licensing system is an undue competitive restraint.

[28] Surely, if ASCAP abandoned the issuance of all licenses and confined its activities to policing the market and suing infringers, it could hardly be said that member copyright owners would be in violation of the antitrust laws by not having a common agent issue per-use licenses. Under the copyright laws, those who publicly perform copyrighted music have the burden of obtaining prior consent. Cf. *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S., at 139-140*.

[29] In its complaint, CBS alleged that it would be "wholly impracticable" for it to obtain individual licenses directly from the composers and publishing houses, but it now says that it would be willing to do exactly that if ASCAP were enjoined from granting blanket licenses to CBS or its competitors in the network television business.

performances must secure consent from the copyright owner or be liable at least for the statutory damages for each infringement and, if the conduct is willful and for the purpose of financial gain, to criminal penalties. [30] Furthermore, nothing in the Copyright Act of 1976 indicates in the slightest that Congress intended **[***16]** to weaken the rights of copyright owners to control the public **[*19]** performance of musical compositions. Quite the contrary is true. [31] Although the copyright laws confer no rights on copyright owners **[****34]** to fix prices among themselves or otherwise to violate the antitrust laws, we would not expect that any market arrangements reasonably necessary to effectuate the rights that are granted would be deemed a *per se* violation of the Sherman Act. Otherwise, the commerce anticipated by the Copyright Act and protected against restraint by the Sherman Act would not exist at all or would exist only as a pale reminder of what Congress envisioned. [32]

[**35]** C

LEdHN[8][] [8]More generally, in characterizing this conduct under the *per se* rule, [33] our inquiry must focus on whether the effect and, here because it tends to show effect, see *United States v. United States Gypsum Co., 438 U.S. 422, 436 n. 13 (1978)*, the purpose of the practice are to threaten the proper operation of our predominantly free-market economy -- that is, whether the practice facially appears to be one that would always or **[*20]** almost always tend to restrict competition and decrease output, and in what portion of the market, or instead one designed to "increase economic efficiency and render markets more, rather than less, competitive." *Id., at 441 n. 16*; see *National Society of Professional Engineers v. United States, 435 U.S., at 688*;*Continental T. V., Inc. v. GTE Sylvania Inc., 433 U.S., at 50 n. 16*;*Northern Pac. R. Co. v. United States, 356 U.S., at 4*.

[**36]** The blanket license, as we see it, is not a "naked [restraint] of trade with no purpose except stifling of competition," *White Motor Co. v. United States, 372 U.S. 253, 263 (1963)*, but rather accompanies the integration of sales, monitoring, and enforcement against unauthorized copyright use. See L. Sullivan, Handbook of the Law of Antitrust § 59, p. 154 (1977). As we have already indicated, ASCAP and the blanket license developed together out of the practical situation in the marketplace: thousands of users, thousands of copyright owners, and millions of compositions. Most users want unplanned, **[***17]** rapid, and indemnified access to any and all of the repertory of compositions, **[**1563]** and the owners want a reliable method of collecting for the use of their copyrights. Individual sales transactions in this industry are quite expensive, as would be individual monitoring and enforcement, especially in light of the resources of single composers. Indeed, as both the Court of Appeals and CBS recognize, the costs are prohibitive for licenses with individual radio stations, nightclubs, and restaurants, *562 F.2d, at 140 n. 26*, and it was **[****37]** in that milieu that the blanket license arose.

A middleman with a blanket license was an obvious necessity if the thousands of individual negotiations, a virtual impossibility, were to be avoided. Also, individual fees for the use of individual compositions would presuppose an intricate schedule of fees and uses, as well as a difficult and expensive reporting problem for the user and policing

---

[30] 17 U. S. C. App. § 506.

[31] See Koenigsberg, The 1976 Copyright Act: Advances for the Creator, 26 Cleve. St. L. Rev. 515, 524, 528 (1977).

[32] Cf. *Silver v. New York Stock Exchange, 373 U.S. 341 (1963)*.

Because a musical composition can be "consumed" by many different people at the same time and without the creator's knowledge, the "owner" has no real way to demand reimbursement for the use of his property except through the copyright laws *and* an effective way to enforce those legal rights. See *Twentieth Century Music Corp. v. Aiken, 422 U.S. 151, 162 (1975)*. It takes an organization of rather large size to monitor most or all uses and to deal with users on behalf of the composers. Moreover, it is inefficient to have too many such organizations duplicating each other's monitoring of use.

[33] The scrutiny occasionally required must not merely subsume the burdensome analysis required under the rule of reason, see *National Society of Professional Engineers v. United States, 435 U.S. 679, 690-692 (1978)*, or else we should apply the rule of reason from the start. That is why the *per se* rule is not employed until after considerable experience with the type of challenged restraint.

task for the copyright owner. Historically, the market for public-performance rights organized itself largely around the single-fee blanket **[*21]** license, which gave unlimited access to the repertory and reliable protection against infringement. When ASCAP's major and user-created competitor, BMI, came **[506]** on the scene, it also turned to the blanket license.

With the advent of radio and television networks, market conditions changed, and the necessity for and advantages of a blanket license for those users may be far less obvious than is the case when the potential users are individual television or radio stations, or the thousands of other individuals and organizations performing copyrighted compositions in public. [34] But even for television network licenses, ASCAP reduces costs absolutely **[****38]** by creating a blanket license that is sold only a few, instead of thousands, [35] of times, and that obviates the need for closely monitoring the networks to see that they do not use more than they pay for. [36] ASCAP also provides the necessary resources for blanket sales and enforcement, resources unavailable to the vast majority of composers and publishing houses. Moreover, a bulk license of some type is a necessary consequence of the integration necessary to achieve these efficiencies, and a necessary consequence of an aggregate license is that its price must be established.

[**39]** D

This substantial lowering of costs, which is of course potentially beneficial to both sellers and buyers, differentiates the blanket license from individual use licenses. The blanket license is composed of the individual compositions plus the aggregating service. Here, the whole is truly greater than the **[*22]** sum of its parts; it is, to some extent, a different product. The blanket license has certain unique characteristics: It allows the licensee immediate use of covered compositions, without the delay of **[***18]** prior individual negotiations, [37] and great flexibility in the choice of musical material. Many consumers clearly prefer the characteristics and cost advantages of this marketable **[**1564]** package, [38] and even small performing-rights societies that have occasionally arisen to compete with ASCAP and BMI have offered blanket licenses. [39] **[****41]** Thus, to the extent the blanket license is a different product, ASCAP is not really a joint sales agency offering the individual goods of many sellers, but is a separate seller offering its blanket license, of which the individual compositions are raw material. [40] ASCAP, **[*23]** in short, made a market in which individual **[****40]** composers are inherently unable to compete fully effectively. [41]

---

[34] And of course changes brought about by new technology or new marketing techniques might also undercut the justification for the practice.

[35] The District Court found that CBS would require between 4,000 and 8,000 individual license transactions per year. *400 F.Supp., at 762*.

[36] To operate its system for distributing the license revenues to its members, ASCAP relies primarily on the networks' records of which compositions are used.

[37] See Timberg, The Antitrust Aspects of Merchandising Modern Music: The ASCAP Consent Judgment of 1950, 19 Law & Contemp. Prob. 294, 297 (1954) ("The disk-jockey's itchy fingers and the bandleader's restive baton, it is said, cannot wait for contracts to be drawn with ASCAP's individual publisher members, much less for the formal acquiescence of a characteristically unavailable composer or author"). Significantly, ASCAP deals only with nondramatic performance rights. Because of their nature, dramatic rights, such as for musicals, can be negotiated individually and well in advance of the time of performance. The same is true of various other rights, such as sheet music, recording, and synchronization, which are licensed on an individual basis.

[38] Cf. *United States v. Grinnell Corp., 384 U.S. 563, 572-573 (1966)*; *United States v. Philadelphia Nat. Bank, 374 U.S. 321, 356-357 (1963)*.

[39] Comment, Music Copyright Associations and the Antitrust Laws, 25 Ind. L. J. 168, 170 (1950). See also Garner, *United States* v. *ASCAP*: The Licensing Provisions of the Amended Final Judgment of 1950, 23 Bull. Copyright Soc. 119, 149 (1975) ("no performing rights are licensed on other than a blanket basis in any nation in the world").

[40] Moreover, because of the nature of the product -- a composition can be simultaneously "consumed" by many users -- composers have numerous markets and numerous incentives to produce, so the blanket license is unlikely to cause decreased

E

LEdHN[9][] [9]Finally, we have some doubt **[****42]** -- enough to counsel against application of the *per se* rule -- about the extent to which this practice threatens the "central nervous system of the economy," *United States v. Socony-Vacuum Oil Co., 310 U.S. 150, 226 n. 59 (1940)*, that is, competitive pricing as the free **[507]** market's means of allocating resources. Not all arrangements among actual or potential competitors that have an impact on price are *per se* violations of the Sherman Act or even unreasonable restraints. Mergers among competitors eliminate competition, including price competition, but they are not *per se* illegal, and many of them withstand attack under any existing antitrust standard. Joint ventures and other cooperative arrangements are also not usually unlawful, at least not as price-fixing schemes, where the agreement on price is necessary to **[***19]** market the product at all.

Here, the blanket-license fee is not set by competition among individual copyright owners, and it is a fee for the use of any of the compositions covered by the license. But the blanket license cannot be wholly equated with a simple horizontal arrangement among competitors. ASCAP does set the price for **[****43]** its blanket license, but that license is quite different from anything any individual owner could issue. The individual composers and authors have neither agreed not to sell individually in any other market nor use the blanket **[*24]** license to mask price fixing in such other markets. [42] Moreover, the substantial restraints placed on ASCAP and its members by the consent decree must not be ignored. The District Court found that there was no legal, practical, or conspiratorial impediment to CBS's obtaining individual licenses; CBS, in short, had a real choice.

LEdHN[1C][] [1C]With this background in mind, which plainly enough indicates that over the years, and in the face of available **[****44]** alternatives, the blanket license has provided an acceptable mechanism for at least a large **[**1565]** part of the market for the performing rights to copyrighted musical compositions, we cannot agree that it should automatically be declared illegal in all of its many manifestations. Rather, when attacked, it should be subjected to a more discriminating examination under the rule of reason. It may not ultimately survive that attack, but that is not the issue before us today.

IV

LEdHN[10][] [10] *LEdHN[11A]*[] [11A]As we have noted, n. 27, *supra*, the enigmatic remarks of the Court of Appeals with respect to remedy appear to have departed from the court's strict, *per se* approach and to have invited a more careful analysis. But this left the general import of its judgment that the licensing practices of ASCAP and BMI under the consent decree are *per se* violations of the Sherman Act. We reverse that judgment, and the copyright misuse judgment dependent upon it, see n. 9, *supra*, and remand for further proceedings to consider any unresolved **[****45]** issues that CBS may have properly brought to the Court of Appeals. [43] Of course, this will

---

output, one of the normal undesirable effects of a cartel. And since popular songs get an increased share of ASCAP's revenue distributions, composers compete even within the blanket license in terms of productivity and consumer satisfaction.

[41] Cf. *United States v. Socony-Vacuum Oil Co., 310 U.S., at 217* (distinguishing *Chicago Bd. of Trade v. United States, 246 U.S. 231 (1918)*, on the ground that among the effects of the challenged rule there "was the creation of a public market"); *United States v. Trenton Potteries Co., 273 U.S., at 401* (distinguishing *Chicago Bd. of Trade* on the ground that it did not involve "a price agreement among competitors in an open market").

[42] "CBS does not claim that the individual members and affiliates ('sellers') of ASCAP and BMI have agreed among themselves as to the prices to be charged for the particular 'products' (compositions) offered by each of them." *400 F.Supp., at 748*.

[43] It is argued that the judgment of the Court of Appeals should nevertheless be affirmed on the ground that the blanket license is a tying arrangement in violation of *§ 1* of the Sherman Act or on the ground that ASCAP and BMI have monopolized the relevant market contrary to *§ 2*. The District Court and the Court of Appeals rejected both submissions, and we do not disturb the latter's judgment in these respects, particularly since CBS did not file its own petition for certiorari challenging the Court of Appeals' failure to sustain its tying and monopolization claims.

include an assessment under **[*25]** the rule of reason of the blanket license as employed in the television industry, if that issue was preserved by CBS in the Court of Appeals. [44]

LEdHN[11B][] [11B]

[**46]** The **[***20]** judgment of the Court of Appeals is reversed, and the cases are remanded to that court for further proceedings consistent with this opinion.

It is so ordered.

Dissent by: STEVENS

Dissent

MR. JUSTICE STEVENS, dissenting.

The Court holds that ASCAP's blanket license is not a species of price fixing categorically forbidden by the Sherman Act. I agree with that holding. The Court remands the cases to the Court of Appeals, leaving open the question whether the blanket license as employed by ASCAP and BMI is unlawful under a rule-of-reason inquiry. I think that question is properly before us now and should be answered affirmatively.

There is ample precedent for affirmance of the judgment of the Court of Appeals on a ground that differs from its rationale, provided of course that we do not modify its judgment. [1] In this litigation, the judgment of the **[508]** Court of Appeals was **[*26]** not that blanket licenses may never be offered by ASCAP and BMI. Rather, its judgment directed the District Court to fashion relief requiring them to offer additional forms of license as well. [2] Even though that judgment may not be consistent with its stated conclusion that the blanket **[****47]** license is "illegal *per se"* as a kind of price fixing, it is entirely consistent with a conclusion that petitioners' exclusive all-or-nothing blanket-license policy violates the rule of reason. [3]

The **[**1566]** Court of Appeals may well so decide on remand. In my judgment, however, a remand is not necessary. [4] The record before this Court is a full one, reflecting extensive discovery and **[****48]** eight weeks of trial. The District Court's findings of fact are thorough and well supported. They clearly reveal that the challenged

---

[44] The Court of Appeals did not address the rule-of-reason issue, and BMI insists that CBS did not preserve the question in that court. In any event, if the issue is open in the Court of Appeals, we prefer that that court first address the matter. Because of the United States' interest in the enforcement of the consent decree, we assume it will continue to play a role in this litigation on remand.

[1] See *United States v. New York Telephone Co., 434 U.S. 159, 166 n. 8*; *Dayton Board of Education v. Brinkman, 433 U.S. 406, 419*; *Massachusetts Mutual Life Ins. Co. v. Ludwig, 426 U.S. 479, 480-481*; *United States v. American Railway Express Co., 265 U.S. 425, 435*.

[2] *562 F.2d 130, 140-141 (CA2 1977)*.

[3] See *ante*, at 17 n. 27 (describing relief ordered by Court of Appeals as "unusual" for a *per se* case, and suggesting that that court's decision appears more consistent with a rule-of-reason approach).

[4] That the rule-of-reason issues have been raised and preserved throughout seems to me clear. See *562 F.2d, at 134*. ("CBS contends that the blanket licensing method is not only an illegal tie-in or blockbooking which in practical terms is coercive in effect, but is also an illegal price-fixing device, a per se violation . . . "); *id., at 141 n. 29* ("As noted, CBS also claims violation of *§ 2* of the Sherman Act. We need not go into the legal arguments on this point because they are grounded on its factual claim that there are barriers to direct licensing and 'bypass' of the ASCAP blanket license. The District Court, as noted, rejected this contention and its findings are not clearly erroneous. The *§ 2* claim must therefore fail at this time and on this record"); Brief for Respondents 41.

policy does have a significant adverse impact on competition. I would therefore affirm the judgment of the Court of Appeals.

[**49]** I

In December 1969, the president **[***21]** of the CBS television network wrote to ASCAP and BMI requesting that each "promptly . . . grant a new performance rights license which **[*27]** will provide, effective January 1, 1970, for payments measured by the actual use of your music." [5] ASCAP and BMI each responded by stating that it considered CBS's request to be an application for a license in accordance with the provisions of its consent decree and would treat it as such, [6] **[****50]** even though neither decree provides for licensing on a per-composition or per-use basis. [7] Rather than pursuing further discussion, CBS instituted this suit.

Whether or not the CBS letter is considered a proper demand for per-use licensing is relevant, if at all, only on the question of relief. For the fact is, and it cannot seriously be questioned, that ASCAP and BMI have steadfastly adhered to the policy of only offering overall blanket or per-program licenses, [8] notwithstanding requests for more limited authorizations. Thus, ASCAP rejected a 1971 request by NBC for licenses for 2,217 specific compositions, [9] as well as an earlier request by a group of television stations for more limited authority than the blanket licenses which they were then **[*28]** purchasing. [10] Neither ASCAP nor BMI has ever offered to license anything less than its entire portfolio, even on an experimental basis. Moreover, if the response to the CBS letter were not sufficient to characterize their consistent policy, the defense of this lawsuit surely is. It is the refusal to license anything less than the entire repertoire -- rather than the decision to offer blanket licenses themselves -- that raises the serious antitrust questions **[****51]** in this case.

II

[1567]** Under our prior cases, there would be no question about the illegality of the **[****52]** blanket-only **[509]** licensing policy if ASCAP and BMI were the exclusive sources of all licenses. A copyright, like a patent, is a statutory grant of monopoly privileges. The rules which prohibit a patentee from enlarging his statutory monopoly by conditioning a license on the purchase **[***22]** of unpatented goods, [11] or by refusing to grant a license under one patent unless the licensee also takes a license under another, are equally applicable to copyrights. [12]

---

[5] *400 F.Supp. 737, 753 (SDNY 1975)*.

[6] ASCAP responded in a letter from its general counsel, stating that it would consider the request at its next board of directors meeting, and that it regarded it as an application for a license consistent with the decree. The letter from BMI's president stated: "The BMI Consent Decree provides for several alternative licenses and we are ready to explore any of these with you." *Id., at 753-754*.

[7] See *ante*, at 12, and n. 21.

[8] The 1941 decree requires ASCAP to offer per-program licenses as an alternative to the blanket license. *United States v. ASCAP, 1940-1943 Trade Cases para. 56,104, p. 404 (SDNY)*. Analytically, however, there is little difference between the two. A per-program license also covers the entire ASCAP repertoire; it is therefore simply a miniblanket license. As is true of a long-term blanket license, the fees set are in no way dependent on the quantity or quality of the music used. See *infra*, at 30-33.

[9] See *United States v. ASCAP (Application of National Broadcasting Co.), 1971 Trade Cases para. 73,491 (SDNY 1970)*.

[10] See *United States v. ASCAP (Application of Shenandoah Valley Broadcasting, Inc.), 208 F.Supp. 896 (SDNY 1962)*, aff'd, *331 F.2d 117 (CA2 1964)*, cert. denied, ***377 U.S. 997***.

[11] *Mercoid Corp. v. Mid-Continent Investment Co., 320 U.S. 661*; *Ethyl Gasoline Corp. v. United States, 309 U.S. 436*; *International Business Machines Corp. v. United States, 298 U.S. 131*; *United Shoe Machinery Corp. v. United States, 258 U.S. 451*.

[**53]** It is clear, however, that the mere fact that the holder of several patents has granted a single package license covering them all does not establish any illegality. This point was settled by *Automatic Radio Mfg. Co. v. Hazeltine Research, Inc., 339 U.S. 827, 834*, and reconfirmed in *Zenith Radio Corp.* ***[*29]*** *v. Hazeltine Research, Inc., 395 U.S. 100, 137-138*. The Court is therefore unquestionably correct in its conclusion that ASCAP's issuance of blanket licenses covering its entire inventory is not, standing alone, automatically unlawful. But both of those cases identify an important limitation on this rule. In the former, the Court was careful to point out that the record did not present the question whether the package license would have been unlawful if Hazeltine had refused to license on any other basis. *339 U.S., at 831*. And in the latter case, the Court held that the package license was illegal because of such a refusal. *395 U.S., at 140-141*.

Since ASCAP offers only blanket licenses, its licensing practices fall on the illegal side of the line drawn by the two *Hazeltine* cases. But there **[****54]** is a significant distinction: unlike Hazeltine, ASCAP does not have exclusive control of the copyrights in its portfolio, and it is perfectly possible -- at least as a legal matter -- for a user of music to negotiate directly with composers and publishers for whatever rights he may desire. The availability of a practical alternative alters the competitive effect of a blockbooking or blanket-licensing policy. ASCAP is therefore quite correct in its insistence that its blanket license cannot be categorically condemned on the authority of the blockbooking and package-licensing cases. While these cases are instructive, they do not directly answer the question whether the ASCAP practice is unlawful.

The answer to that question depends on an evaluation of the effect of the practice on competition in the relevant market. And, of course, it is well settled that a sales practice that is permissible for a small vendor, at least when no coercion is present, may be unreasonable when employed by a company that dominates the market. [13] We **[**1568]** therefore must consider **[*30]** what the record tells **[***23]** us about the competitive character of this market.

[**55]** III

The market for music at issue here is wholly dominated by ASCAP-issued blanket licenses. [14] Virtually every domestic copyrighted composition is in the repertoire of either ASCAP or BMI. And again, virtually without exception, the only means that has been used to secure authority to perform such compositions is the blanket license.

---

[12] Indeed, the leading cases condemning the practice of "blockbooking" involved copyrighted motion pictures, rather than patents. See *United States v. Paramount Pictures, 334 U.S. 131*; *United States v. Loew's Inc., 371 U.S. 38*.

[13] See *Tampa Electric Co. v. Nashville Coal Co., 365 U.S. 320, 334* (upholding requirements contract on the ground that "[there] is here neither a seller with a dominant position in the market as in *Standard Fashion [Co. v. Magrane-Houston Co., 258 U.S. 346]*; nor myriad outlets with substantial sales volume, coupled with an industry-wide practice of relying upon exclusive contracts, as in *Standard Oil [Co. v. United States, 337 U.S. 293]*; nor a plainly restrictive tying arrangement as in *International Salt [Co. v. United States, 332 U.S. 392]*"); *Times-Picayune Publishing Co. v. United States, 345 U.S. 594, 610-612* (upholding challenged advertising practice because, while the volume of commerce affected was not "'insignificant or insubstantial,'" seller was found not to occupy a "dominant position" in the relevant market). While our cases make clear that a violation of the Sherman Act requires both that the volume of commerce affected be substantial and that the seller enjoy a dominant position, see *id., at 608-609*, proof of actual compulsion has not been required, but cf. *Royster Drive-In Theatres, Inc. v. American Broadcasting-Paramount Theatres, Inc., 268 F.2d 246, 251 (CA2 1959)*, cert. denied, ***361 U.S. 885***; *Milwaukee Towne Corp. v. Loew's, Inc., 190 F.2d 561 (CA7 1951)*, cert. denied, ***342 U.S. 909***. The critical question is one of the likely practical effect of the arrangement: whether the "court believes it probable that performance of the contract will foreclose competition in a substantial share of the line of commerce affected." *Tampa Electric Co. v. Nashville Coal Co., supra, at 327*.

[14] As in the majority opinion, my references to ASCAP generally encompass BMI as well.

[510] The blanket all-or-nothing license is patently discriminatory. [15] The user purchases full access to ASCAP's entire **[*31]** repertoire, even though his needs could be satisfied by a far more limited selection. The price he pays for this access is unrelated either to the quantity or the quality of the music he actually uses, or, indeed, to what he would probably use in a competitive system. Rather, in this unique all-or-nothing system, the price is based on a percentage of the user's advertising revenues, [16] **[****57]** a measure that reflects the customer's ability to pay [17] but is totally unrelated **[****56]** to factors -- such as the cost, quality, or quantity of the product -- that normally affect price in a competitive market. The ASCAP system requires users to buy more music than they want at a price which, while not beyond their ability to pay and perhaps not even beyond what **[***24]** is "reasonable" for the access they are getting, [18] may well be far higher than what they would choose to spend for music in **[*32]** a competitive system. It is a classic example of economic discrimination.

The record plainly establishes **[****58]** that there is no price competition between separate musical compositions. [19] Under a blanket license, it is no more expensive for a network **[**1569]** to play the most popular current hit in prime time than it is to use an unknown composition as background music in a soap opera. Because the cost to the user is unaffected by the amount used on any program or on all programs, the user has no incentive to economize by, for example, substituting what would otherwise be less expensive songs for established favorites or by reducing the quantity of music used on a program. The blanket license thereby tends to encourage the use of more music, and also of a larger share of what is really more valuable music, than would be expected in a competitive system characterized by separate licenses. And since revenues are passed on to composers on a basis reflecting the character and frequency of the use of their music, [20] the tendency is to increase the rewards of the established composers at the expense of those less well known. Perhaps the prospect is in any event unlikely, but the blanket license does not present a new songwriter with any opportunity to try to **[*33]** break into the market **[****59]** by

---

[15] See Cirace, *CBS* v. *ASCAP*: An Economic Analysis of A Political Problem, 47 Ford. L. Rev. 277, 286 (1978) ("the all-or-nothing bargain allows the monopolist to reap the benefits of perfect price discrimination without confronting the problems posed by dealing with different buyers on different terms").

[16] For many years prior to the commencement of this action, the BMI blanket-license fee amounted to 1.09% of net receipts from sponsors after certain specified deductions. *400 F.Supp., at 743*. The fee for access to ASCAP's larger repertoire was set at 2.5% of net receipts; in recent years, however, CBS has paid a flat negotiated fee, rather than a percentage, to ASCAP. 23 Jt. App. in CA2 No. 75-7600, pp. E1051-E1052, E1135.

[17] See Cirace, *supra*, at 288:

"This history indicates that, from its inception, ASCAP exhibited a tendency to discriminate in price. A license fee based upon a percentage of gross revenue is discriminatory in that it grants the same number of rights to different licensees for different total dollar amounts, depending upon their ability to pay. The effectiveness of price discrimination is significantly enhanced by the all-or-nothing blanket license."

[18] Under the ASCAP consent decree, on receipt of an application, ASCAP is required to "advise the applicant in writing of the fee which it deems reasonable for the license requested." If the parties are unable to agree on the fee within 60 days of the application, the applicant may apply to the United States District Court for the Southern District of New York for the determination of a "reasonable fee." *United States v. ASCAP, 1950-1951 Trade Cases para. 62,595, p. 63,754 (SDNY 1950)*. The BMI decree contains no similar provision for judicial determination of a reasonable fee.

[19] ASCAP's economic expert, Robert Nathan, was unequivocal on this point:

"Q. Is there price competition under this system between separate musical compositions?

"A. No sir." Tr. 3983.

[20] See *562 F.2d, at 136 n. 15*. In determining royalties ASCAP distinguishes between feature, theme, and background uses of music. The 1950 amended decree requires ASCAP to distribute royalties on "a basis which gives primary consideration to the performance of the compositions." The 1960 decree provided for the additional option of receiving royalties under a deferred plan which provides additional compensation based on length of membership and the recognized status of the individual's works. See *United States v. ASCAP, 1960 Trade Cases para. 69,612, pp. 76,469-76,470 (SDNY 1960)*.

offering his product for sale at an unusually low price. The absence of that opportunity, however unlikely it may be, is characteristic of a cartelized rather than a competitive market. [21]

[**60]** The current state of the market cannot be explained on the ground that it could not operate competitively, or that issuance of more limited -- and thus less restrictive -- licenses by ASCAP is not feasible. The District Court's findings disclose no reason **[511]** why music-performing rights could not be negotiated on a per-composition or per-use basis, either with the composer or publisher directly or with an agent such as ASCAP. In fact, ASCAP now compensates composers and publishers on precisely those bases. [22] **[****61]** If distributions of royalties can be calculated **[***25]** on a per-use and per-composition basis, it is difficult to see why royalties could not also be collected in the same way. Moreover, the record also shows that where ASCAP's blanket-license scheme does not govern, competitive markets do. A competitive market for "synch" rights exists, [23] and after the use of blanket licenses in the motion picture industry was discontinued, [24] such a market promptly developed in that industry. [25] In sum, the record demonstrates that the market at issue here is one that could be highly competitive, but is not competitive at all.

[*34] IV

Since the record describes a market that could be competitive and is not, and since that market is dominated by two firms engaged in a single, blanket method of dealing, it surely seems logical to conclude that trade has been restrained unreasonably. ASCAP argues, however, that at least as to CBS, there has been no restraint at all since the network is free to deal **[****62]** directly with copyright holders.

[1570]** The District Court found that CBS had failed to establish that it was compelled to take a blanket license from ASCAP. While CBS introduced evidence suggesting that a significant number of composers and publishers, satisfied as they are with the ASCAP system, would be "disinclined" to deal directly with the network, the court found such evidence unpersuasive in light of CBS's substantial market power in the music industry and the importance to copyright holders of network television exposure. [26] Moreover, it is arguable that CBS could go further and, along with the other television networks, use its economic resources to exploit destructive competition among purveyors of music by driving the price of performance rights down to a far lower level. But none of this demonstrates that ASCAP's practices are lawful, or that ASCAP cannot be held liable for injunctive relief at CBS's request.

The fact that CBS has substantial **[****63]** market power does not deprive it of the right to complain when trade is restrained. Large buyers, as well as small, are protected by the antitrust laws. Indeed, even if the victim of a conspiracy is himself a wrongdoer, he has not forfeited the protection of the law. [27] Moreover, a conclusion that

---

[21] See generally 2 P. Areeda & D. Turner, ***Antitrust Law*** 280-281, 342-345 (1978); Cirace, *supra* n. 15, at 286-292.

[22] See n. 20, *supra*.

[23] The "synch" right is the right to record a copyrighted song in synchronization with the film or videotape, and is obtained separately from the right to perform the music. It is the latter which is controlled by ASCAP and BMI. See *CBS, Inc. v. ASCAP, 400 F.Supp., at 743*.

[24] See *Alden-Rochelle, Inc. v. ASCAP, 80 F.Supp. 888 (SDNY 1948)*.

[25] See *400 F.Supp., at 759-763*; 5 Jt. App. in CA2 No. 75-7600, pp. 775-777 (testimony of Albert Berman, managing director of the Harry Fox Agency, Inc.). Television synch rights and movie performance and synch rights are handled by the Fox Agency, which serves as the broker for thousands of music publishers.

[26] See *400 F.Supp., at 767-771*.

[27] See *Perma Life Mufflers, Inc. v. International Parts Corp., 392 U.S. 134, 138-140*; *Simpson v. Union Oil Co., 377 U.S. 13, 16-17*; *Kiefer-Stewart Co. v. Joseph E. Seagram & Sons, Inc., 340 U.S. 211, 214*.

excessive competition would cause one side of the market more harm than good may justify a legislative exemption from the antitrust laws, but does not **[*35]** constitute a defense to a violation of the Sherman **[***26]** Act. [28] Even though characterizing CBS as an oligopolist may be relevant to the question of remedy, and even though free competition might adversely affect the income of a good many composers and publishers, these considerations do not affect the legality of ASCAP's conduct.

[**64]** More basically, ASCAP's underlying argument that CBS must be viewed as having acted with complete freedom in choosing the blanket license is not supported by the District Court's findings. The District Court did not find that CBS could cancel its blanket license "tomorrow" and continue to use music in its programming and compete with the other networks. Nor did the District Court find that such a course was without any risk or expense. Rather, the District Court's finding was that within a year, during which it would continue to pay some millions of dollars for its annual blanket license, CBS would be able to develop the needed machinery and enter into the necessary contracts. [29] In other words, although the barriers to direct dealing by CBS as an alternative to paying for a **[512]** blanket license are real and significant, they are not insurmountable.

Far from establishing ASCAP's immunity from liability, these District Court findings, in my judgment, confirm the illegality **[****65]** of its conduct. Neither CBS nor any other user has been willing to assume the costs and risks associated with an attempt to purchase music on a competitive basis. The fact that an attempt by CBS to break down the ASCAP monopoly might well succeed does not preclude the conclusion that smaller and less powerful buyers are totally foreclosed from a competitive market. [30] Despite its size, CBS itself **[*36]** may not obtain **[**1571]** music on a competitive basis without incurring unprecedented costs and risks. The fear of unpredictable consequences, coupled with the certain and predictable costs and delays associated with a change in its method of purchasing music, unquestionably inhibits any CBS management decision to embark on a competitive crusade. Even if ASCAP offered CBS a special bargain to forestall any such crusade, that special arrangement would not cure the marketwide restraint.

[**66]** Whatever management decision CBS should or might have made, it is perfectly clear that the question whether competition in the market has been unduly restrained is not one that any single company's management is authorized to answer. It is often the case that an arrangement among competitors will not serve to eliminate competition forever, but only to delay its appearance or to increase the costs of new entry. That may well be the state of **[***27]** this market. Even without judicial intervention, the ASCAP monopoly might eventually be broken by CBS, if the benefits of doing so outweigh the significant costs and risks involved in commencing direct dealing. [31] But that hardly means that the blanket-licensing **[*37]** policy at issue here is lawful. An arrangement that

---

[28] See *National Society of Professional Engineers v. United States, 435 U.S. 679, 689-690*.

[29] See *400 F.Supp., at 762-765*.

[30] For an individual user, the transaction costs involved in direct dealing with individual copyright holders may well be prohibitively high, at least in the absence of any broker or agency routinely handling such requests. Moreover, the District Court found that writers and publishers support and prefer the ASCAP system to direct dealing. *Id., at 767*. While their apprehension at direct dealing with CBS could be overcome, the District Court found, by CBS's market power and the importance of television exposure, a similar conclusion is far less likely with respect to other users.

[31] The risks involved in such a venture appear to be substantial. One significant risk, which may be traced directly to ASCAP and its members, relates to music "in the can" -- music which has been performed on shows and movies already in the network's inventory, but for which the network must still secure performing rights. The networks accumulate substantial inventories of shows "in the can." And, as the Government has pointed out as *amicus curiae*:

"If they [the networks and television stations] were to discontinue the blanket license, they then would be required to obtain performance rights for these already-produced shows. This attempt would create an opportunity for the copyright owners, as a condition of granting performing rights, to attempt to obtain the entire value of the shows 'in the can.' It would produce, in other words, a case of bilateral monopoly. Because pricing is indeterminate in a bilateral monopoly, television networks would not terminate their blanket licenses until they had concluded an agreement with every owner of copyrighted music 'in the can' to produces marketwide price discrimination and significant barriers to entry unreasonably restrains trade even if the discrimination and the barriers have only a limited life expectancy. History suggests, however, that these restraints have an enduring character.

[**67]** Antitrust policy requires that great aggregations of economic power be closely scrutinized. That duty is especially important when the aggregation is composed of statutory monopoly privileges. Our cases have repeatedly stressed the need to limit the privileges conferred by patent and copyright strictly to the scope of the statutory grant. The record in this case plainly discloses that the limits have been exceeded and that ASCAP and BMI exercise monopoly powers that far exceed the sum of the privileges of the individual copyright holders. **[*38]** Indeed, ASCAP itself argues that its blanket license constitutes a **[513]** product that is significantly different from the sum of its component parts. I agree with that premise, but I conclude that the aggregate is a monopolistic restraint of trade proscribed by the Sherman Act.

allow future performance for an identified price; the networks then would determine whether that price was sufficiently low that termination of the blanket license would be profitable. But the prospect of such negotiations offers the copyrights owners an ability to misuse their rights in a way that ensures the continuation of blanket licensing despite a change in market conditions that may make other forms of licensing preferable." Brief for United States as *Amicus Curiae* 24-25.

This analysis is in no sense inconsistent with the findings of the District Court. The District Court did reject CBS's coercion argument as to music "in the can." But as the Government again points out, the District Court's findings were addressed essentially to a tie-in claim; "the court did not consider the possibility that the copyright owners' self-interested, non-coercive demands for compensation might nevertheless make the cost of CBS' dropping the blanket license sufficiently high that ASCAP and BMI could take this 'termination penalty' into account in setting fees for the blanket license." *Id.*, at 25 n. 23.

HN1[] **Types of Contracts, Settlement Agreements**

Settlement agreements are highly favored in the law and will be upheld whenever possible because they are a means of amicably resolving doubts and preventing lawsuits. In class actions this policy must be coupled with the two-fold requirement that there is no fraud or collusion in arriving at the settlement and the settlement is fair, adequate and reasonable.

HN2[] **Class Members, Absent Members**

In a class action the court is charged as an overseer of the rights of unnamed passive members of the class and must therefore evaluate settlement proposals with circumspection. *Fed. R. Civ. P. 23(e)*. The facets of the court's circumspection may be enumerated as: (1) the circumstances of the settlement; (2) the complexity, expense, and possible duration of the litigation; (3) the present stage of the proceedings; (4) the risks of establishing liability; (5) the risks of proving damages; (6) the risks of maintaining the action as a class action through trial; (7) the range of reasonableness of the settlement fund relative to the best possible recovery; (8) the range of reasonableness of the settlement fund relative to the risks posed in this litigation; (9) the ability of the defendants to withstand a greater judgment; and (10) the reaction of the class to the settlement proposal.

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN3[] **Settlements, Settlement Agreements**

The proponents of a settlement bear the burden of proving that the proposal should be approved. They should be put to a rigorous test but should not be required to stage a mini-trial on the merits, the event which settlement aims to preclude. The court's review need not reach ultimate conclusions of fact and law in the underlying action. Rather, the court's task is one of balancing probabilities and likelihoods in an evaluation of the settlement proposal. The court should be reluctant to interpose its business judgment for that of the settlors, but rather, the litigants should be encouraged to determine their respective rights between themselves.

Civil Procedure > Settlements > Settlement Agreements > General Overview

HN4[] **Settlements, Settlement Agreements**

The strength or weakness of a plaintiffs' case is crucial to a determination of the adequacy of a settlement.

Civil Procedure > ... > Costs & Attorney Fees > Attorney Fees & Expenses > General Overview

HN15[] Costs & Attorney Fees, Clayton Act

The Clayton Act, specifically *15 U.S.C.S. § 15*, provides for the recovery of attorneys' fees and expenses upon successful prosecution of a treble damage action. No statute expressly allows for recovery of these amounts upon settlement of antitrust litigation and the only authority for reimbursement derives from the equitable fund doctrine. The doctrine recognizes that class members who have benefited from counsel's efforts to create, increase, protect or preserve a recovery fund should contribute toward the costs of counsel's services. Just compensation should thus be subtracted from the claimants' recovery fund. The court, while calculating reasonable compensation, must maintain vigilant oversight of the unnamed class members' interests.

Antitrust & Trade Law > ... > Private Actions > Costs & Attorney Fees > General Overview

Civil Procedure > ... > Attorney Fees & Expenses > Basis of Recovery > American Rule

HN16[] **Private Actions, Costs & Attorney Fees**

Under the common fund doctrine, attorneys' fee awards must be made with moderation and a jealous regard to the rights of those who are interested in the fund.

Antitrust & Trade Law > ... > Private Actions > Costs & Attorney Fees > General Overview

HN17[] **Private Actions, Costs & Attorney Fees**

A just attorneys' fee award will only be entered after careful exercise of the court's role as overseer and after critical application of the factors for awarding attorneys' fees from an equitable fund. The court's charge is to continue as the guardian of the rights of absent class members, and to be assured that the expenses claimed are for efforts to create, increase, or protect the settlement fund. The touchstone is an evaluation of the actual effort made by the attorney to benefit the class. The petitioners for attorneys' fees hold the burden of demonstrating that their billed time and expenses served to benefit the fund.

Antitrust & Trade Law > ... > Private Actions > Costs & Attorney Fees > General Overview

Civil Procedure > ... > Costs & Attorney Fees > Attorney Fees & Expenses > Reasonable Fees

HN18[] **Private Actions, Costs & Attorney Fees**

Calculation of attorneys' fees requires a two-step review: first, the calculation of a customary fee from the identification and multiplication of an attorney's reasonable hourly rate times a compensable number of hours; and, second, the determination of whether an increase or reduction of these expenses is justified in light of the risk of litigation and the quality of work performed.

Antitrust & Trade Law > ... > Private Actions > Costs & Attorney Fees > General Overview

Civil Procedure > ... > Privileged Communications > Work Product Doctrine > General Overview

Criminal Law & Procedure > ... > Discovery by Defendant > Tangible Objects > Exclusions

HN19[] **Private Actions, Costs & Attorney Fees**

In calculating attorneys' fees, the trial judge should closely observe the attorney's work product, his preparation, and general ability before the court.

Antitrust & Trade Law > ... > Private Actions > Costs & Attorney Fees > General Overview

HN20[] **Private Actions, Costs & Attorney Fees**

The calculation of an attorneys' award on a contingent fee basis in equitable fund cases has been resoundingly rejected. Determination of the amount of attorneys' fees to be subtracted from an equitable fund is a decision in equity in the nature of a proceeding in quantum meruit, and it is not an action in contract for a percentage of the plaintiffs' recovery.

Opinion by: FREEMAN

Opinion

[*1362] ORDER

This multidistrict antitrust class action is presently before the court on plaintiffs' motion seeking approval of a proposed settlement of the litigation, *Rule 23(e), Fed.R.Civ.P.* Attendant to this evaluation, the State of California, a class member objecting **[*1363]** to the settlement proposal, has moved to reopen discovery on the issue of damages and has requested the court's appointment of an expert to aid resolution of conflicting economic opinion evidence. Additionally, in the event that settlement is approved, plaintiffs' counsel have filed a joint petition for recovery of fees and expenses. Also if the settlement were approved, the court would schedule preparation, briefing, and argument of a plan **[**5]** of distribution of the settlement fund. As preliminaries to our review and evaluation of the settlement, the court will offer: (1) a brief recapitulation of the proceedings to date; and (2) a short description of the affected industry.

I. FACTUAL AND PROCEDURAL BACKGROUND

On June 21, 1977, a federal grand jury sitting in the Northern District of Georgia returned indictments charging two corporations, Brink's, Inc. and Wells Fargo Armored Car Service Corp. and six corporate officers, with violation of *Section 1* of the Sherman Act, *15 U.S.C. § 1*. United States v. Brink's, Inc., et al., Cr. No. 77-207A (N.D.Ga.); United States v. Edgar A. Jones, et al., Cr. No. 77-208A (N.D.Ga.). In particular, the indictments charged the defendants with combining and conspiring during a period from early 1968 through August 1975 in order to allocate customers and to rig bids and price quotations. These violations, it was alleged, had the effect of restraining trade and artificially inflating prices of armored car services. On April 21, 1978, the defendants' pleas of Nolo contendere to the charges contained in the two indictments were accepted and approved. Defendant Wells Fargo appealed, but **[**6]** the Fifth Circuit affirmed the judgment, *United States v. Wells Fargo Armored Car Service Corp., 587 F.2d 782 (5th Cir. 1979)*.

On June 21, 1977, simultaneous with the return of the indictments, the Government filed a civil enforcement action against the two corporate defendants and thereby sought to enjoin defendants' continuing or future violations of the Sherman Act, United States v. Brink's, Inc., et al., C.A. No. 77-1027A (N.D.Ga.). [1.] **[**7]** Predictably, within sixty days of the Government's initiation of the criminal and civil enforcement actions several private parties and states attorneys general filed treble damage actions, *15 U.S.C. § 15*, against Brink's, Wells Fargo, and a third armored car service, Purolator Security, Inc. [2.] The civil complaints filed in this and other district courts tracked the language of the criminal indictment and charged defendants with unlawful market allocation and bid-rigging practices from 1968 through 1975. Many of the plaintiffs sought relief on behalf of a statewide or nationwide class of the defendants' customers.

Defendant Wells Fargo petitioned the Judicial Panel on Multidistrict Litigation for identification and transfer of all the civil actions to a single forum pursuant to *28 U.S.C. § 1407*. On November 16, 1977, the Judicial Panel granted the Wells Fargo petition and transferred all then pending actions to this court for coordinated or consolidated discovery and pretrial purposes. *In re Armored Car Antitrust Litigation, 441 F. Supp. 921 (Jud.Pan.Mult.Lit.1977)*. The instant litigation is the assembly of seventeen private treble damage actions either originally filed in or subsequently transferred to this district. [3.] **[**9]** The Government's **[**8]** civil **[*1364]** enforcement suit has proceeded at all times independent of the coordinated private actions. Sixteen of the seventeen private actions [4.] now seek the court's approval of their settlement.

Immediately before the First Principal Pretrial Conference in this litigation, See Manual for Complex Litigation, Part 1, § 1.00 (rev. ed. 1977), the parties entered settlement negotiations. After approximately two months of negotiating and caucusing, a bargain was struck, with the defendants offering $ 11.8 million (representing contributions of $ 5,653,333 from Brink's, $ 2,346,667 from Wells Fargo, and $ 3,800,000 from Purolator Security) in exchange for civil peace for a ten-year period from the plaintiffs.

The court, on April 3, 1978, entered Settlement Order No. 1 which tentatively approved the settlors' proposal, conditionally certified the class of claimants, and formally authorized notification **[**10]** of the class. The conditional class for settlement [5.] was defined as:

[1.] The Government's civil enforcement action against Brink's and Wells Fargo is nearing settlement. A consent judgment has been proposed and is currently published for comment pursuant to the Antitrust Procedures and Penalties Act, *15 U.S.C. § 16*.

[2.] Purolator Security, Inc. was named in the conspiracy but not indicted by the Atlanta Grand Jury. After investigations covering several cities and spanning three years, the Government filed an information accusing Purolator Security of antitrust violations in the city of Detroit with respect to certain customers for a ten-month period. This defendant tendered and the court, sitting in the Eastern District of Michigan, accepted a Nolo contendere plea to the information.

[3.] The seventeen consolidated actions are: Food Fair Stores, Inc., et al. v. Brink's, Inc., et al., C.A. No. 77-1246A; Raley's Corp. v. Brink's, Inc., et al., C.A. No. 77-1273A; L.D.C., Inc., et al. v. Brink's, Inc., et al., C.A. No. 77-1294A; Biscayne Bank, et al. v. Brink's, Inc., et al., C.A. No. 77-1363A; Liberty Coin Shop, Inc. v. Brink's Inc., et al., C.A. No. 77-1412A; Illinois v. Brink's, Inc., et al., C.A. No. 77-1733A; Weston L. Sampson, et al. v. Brink's, Inc., et al., C.A. No. 77-1874A; Sunshine Stores, Inc., et al. v. Brink's, Inc., et al., C.A. No. 77-1875A; Philadelphia Electric Co. v. Brink's, Inc., et al., C.A. No. 77-1876A; Sunnydale Farms, Inc. v. Brink's, Inc., et al., C.A. No. 77-1877A; Connecticut v. Brink's, Inc., et al., C.A. No. 77-1878A; Massachusetts v. Brink's, Inc., et al., C.A. No. 77-1879A; Hillman's Inc., et al. v. Brink's, Inc., et al., C.A. No. 77-1880A; People's Gas, Light & Coke Co., et al. v. Brink's, Inc., et al., C.A. No. 77-1881A; Missouri v. Brink's, Inc., et al., C.A. No. 77-2020A; Brazosport Bank of Texas v. Brink's, Inc., et al., C.A. No. 78-422A; and Maryland v. Brink's, Inc., et al., C.A. No. 79-133A. For convenience, all filings and entries which concern all seventeen cases have been made in a master file, In re Armored Car Antitrust Litigation, C.A. No. 78-139A (All cases). Pretrial Order No. 1, entered January 30, 1978.

[4.] Only Maryland v. Brink's, Inc., et al., C.A. No. 79-133A, has not joined in the motion to approve settlement. The State of Maryland previously sought to be excluded from the class of settling plaintiffs. Hillman's, et al. v. Brink's, Inc., et al., C.A. No. 77-1880A is proceeding to settlement but plaintiffs have retained their own counsel and are not represented by counsel for the class.

[11]**

> All plaintiffs and all purchasers from any armored car company (not limited to Brink's, Incorporated, Wells Fargo Armored Service Corporation or Purolator Security, Inc.) or its affiliates of armored car and related services, including coin sorting and wrapping, preparation and distribution of payrolls and air and ground courier services, from January 1, 1968 to February 21, 1978 (including banking institutions which have been furnished by others with armored car and said related services and which have legally recognizable claims against defendants based on the allegations and assertions in the consolidated actions which relate to alleged violations of Federal or State ***antitrust law*** in the provision of armored car or related services), excluding only the United States Government, its agencies, departments and instrumentalities, whether corporate or otherwise; the twelve Federal Reserve Banks, including **[*1365]** their branches; and the defendants, their affiliates, parents, and subsidiaries.

Although the settlement period runs from January 1, 1968 to February 21, 1978, the parties acknowledge a statute of limitations period from June 21, 1973 to August 31, 1975, absent **[**12]** a showing of fraudulent concealment (and no fraudulent concealment has been alleged).

On May 19, 1978, plaintiffs' representatives mailed 175,000 printed notices [6.] and entered advertisements in eleven newspapers across the country, announcing the settlement proposal. The notices identified the named plaintiffs and defendants, recited the complaint allegations, defined the conditional class, and described the amount and terms of settlement. [7.] **[**14]** The announcement scheduled a series of 4-6 week deadlines for filing: (i) requests for exclusion from the class, *Rule 23(b)(3), Fed.R.Civ.P.*; (ii) sworn statements of purchases, and (iii) notices of intention to appear and object at a hearing to review the settlement proposal. The court concluded in the April 1978 order that such notice was "the best notice practicable under the circumstances . . . " *Rule 23(c)(2), Fed.R.Civ.P. Mullane v. Central Hanover Bank & Trust Co., 339 U.S. 306, 70 S. Ct. 652, 94 L. Ed. 865 (1950)*. The noticed deadlines have now lapsed, the proponents and four objectors [8.] have filed written memoranda, and the court has

---

[5.] The court certified a conditional class pursuant to *Rule 23(c)(1), Fed.R.Civ.P.*, for settlement. Settlement Order No. 1, entered April 3, 1978. The Manual for Complex Litigation, Part 1, § 1.46 (rev. ed. 1977), recognizes tentative certification of classes as a growing practice in complex actions but recommends that the practice not be continued. The Manual's recommendation has, it appears, been more honored by breach than by compliance. See *City of Detroit v. Grinnell Corp., 495 F.2d 448, 466 (2d Cir. 1974)* and cases cited therein. See also Developments in the Law Class Actions, 89 Harv.L.Rev. 1318, 1555-60 (1976). The procedures set out in the Manual are not intractable rules but are suggestions for the orderly progress of complicated litigation. Manual for Complex Litigation, Foreword (rev. ed. 1977). The causes for not conditionally certifying a class for settlement (possibilities of collusion, of less than total representation of class members, of hasty and inadequate settlements by attorneys jockeying to earn a fee award) are not present herein. There have been no charges of collusion and no offers for settlement for less than the whole class, Cf. *In re General Motors Corp. Engine Interchange Litigation, 594 F.2d 1106, n. 38 (7th Cir. 1979)*. (subclass tentatively certified for settlement). Class counsel worked jointly through lead counsel to secure the proposed settlement conditions and terms. Conditional certification of the class for settlement was appropriate under the circumstances presented.

[6.] The notices were mailed to a list of potential class members. The master list was compiled from the defendants' records of customers, their suggestions of customers of competitors' services, their identification of the Governor, Secretary of State, and Attorney General of each of the fifty states, and from the plaintiffs' purchase from National Business Lists, Inc., mailing lists of: (a) banks, (b) savings and loan associations, (c) grocery stores with a net worth in excess of $ 75,000, (d) department and discount stores with a net worth in excess of $ 75,000, (e) city halls, (f) county seats, (g) stock and bond brokers, (h) universities and colleges, (i) junior colleges, and (j) school district headquarters.

[7.] The settlement amount of $ 11,800,000.00, deposited on April 3, 1978, bears interest at the prime rate. The fund reportedly totalled $ 12,931,991.65 on March 19, 1979. The notice stated that attorney fees and expenses and costs of administration of the fund, estimated not to exceed $ 1,750,000, would be subtracted from the settlement fund. The potential class members were notified that the settlement fund was offered in exchange for the dismissal with prejudice of all antitrust claims held against the three codefendants for the period January 1, 1968 to February 21, 1978. It further announced that the proportional shares of the claimants would be determined upon a plan of distribution to be presented to the claimants and court if the settlement proposal were approved.

convened two hearings to determine the fairness, adequacy, and reasonableness of the settlement proposal. **[**13]**

The first hearing, on September 18, 1978, was adjourned upon a finding that the proponents' "attempted support of the settlement was patently insufficient." Order entered September 20, 1978, at 1. See *In re Armored Car Antitrust Litigation, 462 F. Supp. 394, 395 (Jud.Pan.Mult.Lit.1978)*. The court cautioned that the settlement could not be approved without the tender of reliable economic data in justification of the proposal amount. See Manual for Complex Litigation, Part 1, § 1.46 (rev. ed. 1977).

Plaintiffs thereafter filed an economic supplement to their original memorandum. Included with **[**15]** the supplement were: Affidavit of Myer Rashish (plaintiffs' economic expert); Affidavit of David I. Shapiro (plaintiffs' counsel's account of the negotiations); Exhibit A sample customer price histories of the three defendants; Exhibit B sample customer contracts of three defendants; Exhibit C affidavits of selected officers of the three defendants; Exhibit D schedules of economic data tabulating or graphing defendants' revenues and profits on company-wide, local branch, and various competitive market bases; Exhibit E **[*1366]** report of federal and state regulation of the three defendants; Exhibit F report of the changing geographic markets of the three defendants over the settlement period; and Exhibit G balance sheets itemizing the net income and net worth of the three defendants. Defendant Purolator Security also filed a memorandum in support of approval of the settlement based on the economic data introduced in the affidavit of its president, William Steele, contained in Plaintiffs' Exhibit C. The State of California and the Atlantic Richfield Company, two of the four original objectors, renewed and amplified their opposition to the settlement proposal in light of plaintiffs' **[**16]** economic supplement. [9.]

The objections to the settlement may be grouped as charges: that the agreement was hasty and premature; that the notice to class members was inadequate; that the class is improperly drawn; that the proposal lacks reliable economic support; and that the settlement fund amount is insufficient. These objections will be considered in our review of the fairness, adequacy, and reasonableness of the settlement. Additional categories of objections have been lodged against the **[**17]** form, content, and amount of the attorneys' fee petition. These latter challenges will be entertained in our separate review of the fee petition, Infra.

Continuing the procedural history of this litigation, a second hearing on the proposed settlement was held on January 25, 1979. At the second hearing, exhibits of economic data and affidavits of economists, corporate officers, and lead counsel were proffered and admitted into evidence, expert testimony was elicited and cross-examined, and proponents' and objectors' arguments were heard. The primary matter of fairness, adequacy, and reasonableness of the settlement was taken under advisement upon announcement that the instant order, a final approval or disapproval of the settlement, would issue after thorough review of all the evidence and argument.

II. THE ARMORED CAR INDUSTRY

As a second predicate to our review, the settling parties have urged that a familiarity with the nature of the armored car industry will aid an appreciation of the settlement herein. At trial, plaintiffs would bear the burden of proving defendants' antitrust violations and the resultant injury which they suffered. Plaintiffs would also need to establish **[**18]** the difficult prerequisites of a class action, *Rule 23, Fed.R.Civ.P.*, in order to proceed on behalf of the intended nationwide class. It is argued that these tasks become formidable indeed when the affected industry is

---

[8.] The State of California, the Central Penn National Bank, and the Atlantic Richfield Company have filed objections to the settlement proposal and the joint petition for attorneys' fees. The State of Ohio (nominally joined by the State of Arizona) has filed objection to the attorneys' fee request.

The State of Missouri, a named settling plaintiff, apprised the court in timely fashion of its concern that the attorneys' fee position was excessive and noted belatedly its objection to the settlement.

[9.] The court might conclude that the State of Ohio's and the Central Penn National Bank's failure to renew their objections after the plaintiffs' submission of the economic supplement should be deemed an abandonment of their opposition. The court will not draw this conclusion but will consider Ohio's objection to the fee petition and Central Penn's objection to the notice, definition of the class, and attorneys' fees along with similar opposition raised by the State of California and the Atlantic Richfield Company.

the armored car trade because: a nonhomogeneous service rather than a fungible commodity is offered; a finely fragmented market is presented; and decentralized decision-making is common. Plaintiffs' Exhibit C: Affidavits of A. Schossow, Brink's general manager; T. Jordan, Wells Fargo assistant vice-president; and W. Steele, Purolator Security president. All of these characteristics so complicate the trade as to make proof of violation and impact through comparative price data arguably insurmountable.

The service offered by the defendants is tailored to fit individual customer needs. Customizing the service includes considerations of: the amount and type of valuable to be transported, the level of liability coverage to be assumed, the hour and frequency of pick-ups, and the need for additional assistance (such as, coin sorting and wrapping, check cashing, or safe rental and installation). See Plaintiff's Exhibits A and B (prices paid and contracts executed). As **[**19]** the terms of individual service vary, so too do the prices charged on each account. Comparisons of accounts and invoices therefore provide no meaningful measures of liability or damage.

[*1367] Prices vary as a function of the constellation of services requested but they also vary to reflect the status and health of the defendants in a given market. Within a single market locale, the price charged different customers, and even the same customer owning several branches, may vary depending on the density and profitability of the defendants' service routes. If several customers line a single route, the fixed costs of labor, fuel, and vehicle use may be shared. But if a customer or a particular branch office is not convenient to an existing service route and a new route must be mapped, the fixed costs will be borne by the customer and the armored car company. Attempts at price comparisons within a single market then become useless gestures.

As the price charged varies within a given market, it also varies among markets. The local labor conditions or collective bargaining agreements may greatly affect prices charged from market to market. Brink's alone was signatory to 124 **[**20]** separate collective bargaining agreements in 1977. The geography and demography of a market may influence costs and pricing. State public service commissions, while not regulating armored car service prices, do regulate entry of providers into local markets and thus affect competition. Plaintiffs' Exhibit E. Finally, the autonomy of local service centers may account for further variations in pricing. In 1976 Brink's maintained 160 branch offices, Wells Fargo divided into 103 branches, and Purolator Security had 55 profit centers. The managers and sales representatives in these terminal centers held nearly free rein to negotiate customer contracts and to set service prices.

This catalogue of variables, all characteristic of the industry, arguably render usual price comparisons meaningless and tend to confound plaintiffs' prima facie proof of antitrust liability and impact. In light of the above-described progress in this litigation and mindful of the industry's idiosyncracies, the court may now begin the review of the proposed settlement.

III. FAIRNESS, ADEQUACY, AND REASONABLENESS OF THE SETTLEMENT

> ***HN1***[] Settlement agreements are "highly favored in the law and will be upheld **[**21]** whenever possible because they are a means of amicably resolving doubts and preventing lawsuits." . . . In class actions this policy must be coupled with the two-fold requirement that (1) there is no fraud or collusion in arriving at the settlement and (2) the settlement is fair, adequate and reasonable . . . .

Miller v. Republic National Life Insurance Co., 559 F.2d 426, 428-29 (5th Cir. 1977). ***HN2***[] In a class action the court is charged as an overseer of the rights of unnamed passive members of the class and must therefore evaluate settlement proposals with circumspection. *Rule 23(e), Fed.R.Civ.P.* The facets of our circumspection may be enumerated as: (1) the circumstances of the settlement; (2) the complexity, expense, and possible duration of the litigation; (3) the present stage of the proceedings; (4) the risks of establishing liability; (5) the risks of proving damages; (6) the risks of maintaining the action as a class action through trial; (7) the range of reasonableness of the settlement fund relative to the best possible recovery; (8) the range of reasonableness of the settlement fund relative to the risks posed in this litigation; (9) the ability of the defendants **[**22]** to withstand a greater judgment; and (10) the reaction of the class to the settlement proposal. *Miller v. Republic National Life Insurance Co., supra*; City of Detroit v. Grinnell Corp. ("Grinnell I"), *495 F.2d 448 (2d Cir. 1974)*. See Manual for Complex Litigation, Part 1, § 1.46 (rev. ed. 1977).

HN3[] The proponents of the settlement, of course, bear the burden of proving that the proposal should be approved. Grunin v. International House of Pancakes, 513 F.2d 114, 123 (8th Cir. 1975), Cert. denied, *423 U.S. 864, 96 S. Ct. 124, 46 L. Ed. 2d 93 (1975)*. They should be put to a rigorous test but should not be required to stage a mini-trial on the merits, the event which settlement aims to preclude. Newman v. Stein, 464 F.2d 689, 692 (2d Cir. 1972).

[*1368] The court's review need not reach ultimate conclusions of fact and law in the underlying action, Grinnell I, 495 F.2d at 456, 462; rather, our task is one of balancing probabilities and likelihoods in an evaluation of the settlement proposal. Young v. Katz, 447 F.2d 431 (5th Cir. 1971). See also Protective Committee v. Anderson, 390 U.S. 414, 88 S. Ct. 1157, 20 L. Ed. 2d 1 (1968). Similarly, we should be reluctant to interpose **[**23]** our business judgment for that of the settlors; rather, "(the) litigants should be encouraged to determine their respective rights between themselves." Cotton v. Hinton, 559 F.2d 1326, 1331 (5th Cir. 1977). See Florida Trailer & Equipment Co. v. Deal, 284 F.2d 567, 571 (5th Cir. 1960). Mindful of these principles, the court's review of the proponents' and objectors' evidence and argument may proceed Seriatim through the sometimes overlapping fairness criteria.

1. Circumstances of the Settlement. Our review under this first criterion investigates whether the settlement negotiations were conducted in an adversarial or collusive manner. No objector charges any fraud or collusion. Atlantic Richfield argues that the negotiations may have been hasty and premature, and California suggests that the plaintiffs' bargainers may have opened the negotiations lower than they should have. In essence, the objectors contend that a more favorable compromise might have otherwise been struck. Our evaluation of the settlement proposal is a measurement of fairness, adequacy, and reasonableness, not of optima. The court acknowledges the extensive experience of counsel for plaintiffs and defendants **[**24]** in antitrust litigation and must accede to their business judgment in this review. Flinn v. FMC Corp., 528 F.2d 1169 (4th Cir. 1975).

The proponents of the settlement have detailed a chronology of proposals, bargaining, caucuses, and counter-proposals throughout the negotiations. Affidavit of David I. Shapiro. See also Plaintiffs' Exhibit C, Affidavit of William Steele, Pres. of Purolator Security. Plaintiffs argue that the timing of their settlement overtures just prior to the court's first pretrial conference was critical. It was speculated that the court at the preliminary conference would direct discovery on the limited issue of class certification and that plaintiffs' initial investigation [10] revealed that the strength of their bargaining position would diminish after such discovery. They thereupon contend that a deferral of the negotiations would have lessened the settlement prospects and amount.

[25]** Plaintiffs' opening offer, $ 19 million, approximated 5% Of defendants' sales during the June 21, 1973 to August 31, 1975 statute of limitations period. Counsel had studied a correlation of settlement amount to percentage of sales in a number of similar antitrust cases and chose an ample starting figure which would allow room for later bargaining. When an agreement was finally executed, the settlement fund of $ 11.8 million represented 3.88% Of defendants' sales for the limitations period and thus fell among the more generous recoveries counsel had studied.

While the proponents of the settlement have not persuaded nor even attempted to persuade the court in the preeminence or efficacy of any particular strategy, they have established the fact that the negotiations were conducted at arms length and in the best interests of the plaintiff class. The objectors' challenges have been investigated, Cf. In re General Motors Corp. Engine Interchange Litigation, 594 F.2d 1106 (7th Cir. 1979) (abuse of discretion not to review conduct of and hear objections to the settlement negotiations), and have been answered.

2. Complexity, expense, possible duration of the litigation : The few objectors **[**26]** must concede that this multidistrict antitrust **[*1369]** litigation will require complicated, expensive, and lengthy prosecution. If this litigation progressed to its full term, it would daresay outlive many of us. The costs of litigation might very well consume any final recovery, earning only a Pyrrhic victory for the survivors. If the litigation could not proceed on behalf of a

---

[10] Before the settlement agreement was executed plaintiffs' counsel reviewed thousands of documents, those produced by defendants pursuant to Grand Jury subpoena and those produced in discovery in this litigation, in order to verify defendants' negotiation representations of the structure and economics of the industry and the nature of the violations charged. Counsel also interviewed their named plaintiff clients for a customer's view of these matters. Affidavit of D. Shapiro.

nationwide class and was instead split into 50 state-wide actions, or 500 market locale prosecutions, or 5-50,000 individual plaintiff lawsuits, the burden on the judiciary and the time taken from all others before the court would be enormous. See *Grinnell I, 495 F.2d at 467*. These factors all favor acceptance of the settlement proposal.

3. Stage of the proceedings : The litigation is in its infancy and the greatest savings of time and expense relative to full-term prosecution are now recoverable. However, as the objectors argue, this is also the time when the least is known about the prospects of full-term litigation. The objectors charge that the settlement was hastily entered into and was precipitously foisted upon the unwary class. They assail any settlement before an opportunity for formal **[**27]** discovery.

Plaintiffs' initial discovery attempts were stayed by our order entered October 13, 1977, pending a decision on transfer of the cases by the Judicial Panel for Multidistrict Litigation. They were also slowed in their investigation by the magistrate's sealing of the Bill of Particulars in the criminal actions. Once settlement was proposed and before an agreement was executed, teams of plaintiffs' counsel reviewed the mass of Grand Jury documents. Further, once we adjourned the first fairness hearing for want of supporting economic data, the parties engaged in extensive informal and cooperative discovery. The objectors are not satisfied but seek wider and more formal discovery.

We now have a compendium of documentary evidence and a selection of testimonial evidence upon which to evaluate the settlement. The fact that this material was produced informally and cooperatively is not a failing but is a recommendation for the settlement. See *Cotton v. Hinton, 559 F.2d 1326, 1332 (5th Cir. 1977)*. [11] This material, under protective seal upon defendants' motion, See Order entered October 20, 1978, has been made accessible and available to the objectors. The fact that this **[**28]** material was compiled informally or cooperatively does not alter its reliability or thoroughness. Although these antitrust actions are in their infancy, "the desired quantum of information necessary to achieve a settlement. . . ." *Cotton v. Hinton, 559 F.2d at 1332*, has been reached. Because this stage of the litigation affords the greatest returns and yet, under the circumstances, does not compromise the necessary amount of supportive data, settlement appears to be favored.

[29]** **[*1370]** 4. Risks of establishing liability : ***HN4***[] The strength or weakness of plaintiffs' case is of course crucial to a determination of adequacy of a settlement. *Protective Committee v. Anderson, 390 U.S. 414, 88 S. Ct. 1157, 20 L. Ed. 2d 1 (1968)*. Assaying the strength of the claims requires a consideration of the required proof in a treble damage action. ***HN5***[] While proof under *Section 1* of the Sherman Act, *15 U.S.C. § 1*, requires only proof of a violation of the Act, civil recovery under Section 4 of the Clayton Act, *15 U.S.C. § 15*, demands 2-part proof of liability and damages. To establish liability under Section 4, the civil plaintiff must prove: (1) a violation and (2) an impact on plaintiff. *State of Alabama v. Blue Bird Body Co., 573 F.2d 309, 317 (5th Cir. 1978)*. The "impact", sometimes referred to as the "fact of damage" or "causal link", Id., has been declared "the Sine qua non for stating

[11] The court is reminded of similar circumstances raised in this appellate review of a trial court's approval of the settlement of an employment discrimination action:

It is true that very little Formal discovery was conducted and that there is no voluminous record in the case. However, the lack of such does not compel the conclusion that insufficient discovery was conducted.

At the outset, we consider this an appropriate occasion to express our concern over the common belief held by many litigators that a great amount of formal discovery must be conducted in every case. Often has this Court reviewed records of cases which attest to this commonly held fallacy. We have often seen cases which were "over discovered." In addition to wasting the time of this Court, the parties and their attorneys, it often adds unnecessarily to the financial burden of litigation and may often serve as a vehicle to harass a party. Discovery in its most efficient utilization should be totally extra-judicial. The Court should rarely be required to intervene. Being an extra-judicial process, informality in the discovery of information is desired. It is too often forgotten that a conference with or telephone call to opposing counsel may often achieve the results sought by formal discovery.

In the instant case, Judge Pointer specifically requested the plaintiffs and defendants to conduct discovery on an informal basis. Counsel proceeded to do just that. The attorneys for plaintiffs and defendants indicated to the trial judge that they had achieved the desired quantum of information necessary to achieve a settlement. The Court was informed of the results of their discovery in several conferences.

Cotton v. Hinton, 559 F.2d at 1332.

a cause of action." *Shumate & Co. v. National Association of Securities Dealers, Inc., 509 F.2d 147, 152 (5th Cir. 1975)*. Plaintiffs contend that while proof of a violation by a nationwide conspiracy would be difficult, proof of nationwide impact would be nearly impossible. California, **[**30]** as an objector, responds contending that plaintiffs protest too much and that from local, limited investigation violation and impact are readily apparent.

At the outset the court notes that plaintiffs herein are not armed with prima facie proof of defendants' violation of the federal antitrust laws. A similar circumstance was presented in *Lindy Bros. Builders, Inc. v. American Radiator & Standard Corp., 382 F. Supp. 999 (E.D.Pa.1974)*, Vacated and remanded, *540 F.2d 102 (3d Cir. 1976)*:

> Thus, this was not a case where plaintiffs received from the government on a silver platter the evidence necessary to prove their claims against the three convicted defendants, much less against the thirteen which had entered pleas of Nolo contendere. Substantial problems of proof were present as to both liability and damages.

382 F. Supp. at 1016. Brinks and Wells Fargo pleaded Nolo contendere to conspiracy charges of market allocation and bid-rigging from 1968 through 1975. These charges were echoed in plaintiffs' civil complaints. Purolator Security pled Nolo contendere to similar charges but limited to a conspiracy in the city of Detroit for a 10-month period, 1974-75. ***HN6***[] The Nolo contendere **[**31]** pleas, unlike guilty pleas or verdicts, are not accorded the status of prima facie evidence of a violation in subsequent civil actions, *15 U.S.C. § 16(a)*. Lindy Brothers Builders, Inc. v. American Radiator & Standard Sanitary Corp. ("Lindy I"), *487 F.2d 161 (3d Cir. 1973)*. Lacking this automatic proof, plaintiffs would have to adduce their own evidence to build proof of a Sherman Act violation. Plaintiffs do not contend that the proof of a pervasive conspiracy would be impossible, merely difficult, in light of the fragmented market and discontinuous violations, and thus a risk of litigation which would have to be countenanced. Defendant Purolator Security argues that proof of a violation would be impossible. Cf. *Liebman v. J. W. Petersen Coal & Oil Co., 73 F.R.D. 531, 535 (N.D.Ill.1973)* (prima facie case readily established and probability of liability was substantial). The court need delve no further into this first part of the liability proof than to ascertain that some risk is involved, as the second part of plaintiffs' proof, by all appearances, would be decidedly difficult.

Plaintiffs must establish in the second part of their liability proof that defendants' violation **[**32]** of the Sherman Act caused them harm. ***HN7***[] In a casebook instance of price-fixing involving a fungible product peddled in the same or similar markets to standardized categories of consumers, the proof of impact can nearly be presumed from the overcharge. See e.g., *In re Sugar Industry Antitrust Litigation, 73 F.R.D. 322 (E.D.Pa.1976)*. Here, however, the charges are of market allocation and bid-rigging in the sale of a service in variant markets to nonhomogeneous buyers. The circumstances created by the very nature of the industry do not lend themselves to a generalized proof; rather, regional or individual evidence of impact might ultimately be required. See *State of Alabama v. Blue Bird Body Co., 573 F.2d at 322 (5th Cir. 1978)*; **[*1371]** *Windham v. American Brands, Inc., 565 F.2d 59 (4th Cir. 1977)* (class certification to be denied upon a finding that neither the products nor the purchasers were fungible). California, as an objector, points to the apparent uniformity of bids and prices submitted to its political subdivisions and predicts that similar patterns may emerge in other markets. The court has previously ruled that the conspiracy causing artificially inflated prices in **[**33]** California appears to be a different conspiracy from the one here in issue as it allegedly involves only codefendant Brink's acting in concert with other armored car services not parties to this litigation. Order entered December 4, 1978. [12.] Therefore, plaintiffs' proof of liability may not be impossible, as defendants would boast, but it is, upon our review, uncertain.

---

12. The court notes that a federal grand jury sitting in the Central District of California has recently returned criminal indictments: (1) charging Armored Transport, Inc. and two of its corporate officers with engaging in a conspiracy to allocate customers and to rig bids and price quotations; and (2) charging Loomis Armored Car Service, Inc. with engaging in an unlawful combination to submit rigged and collusive bids and price quotations. These conspiracies are alleged to have restrained trade in the armored car industry in the State of California and the Los Angeles area, respectively. Brink's, Inc. is named, but not charged in both indictments. California's Further Authority in Opposition to the Class Settlement, filed March 15, 1979. These indictments lend support to our determination that California may have been injured as a result of an unrelated conspiracy. California should be free to pursue any antitrust claims it holds against Armored Transport and Loomis.

[34]** 5. Risk of establishing damages : If, as we have found, plaintiffs face a substantial risk in proving defendants' liability, that is, in demonstrating "violation" and "impact," they then must also admit to an uncertainty in establishing damages. This uncertainty results from the apparently sporadic conduct of the alleged conspiracy and from the idiosyncracies of the armored car industry itself. The wages of the conspiracy may have ebbed and flowed with the entry or exit of other competitors in a particular market area. See Plaintiffs' Exhibit F (Defendants' market expansion and contraction during the pertinent period). Prices of armored car services, See Part II, Infra, are functions of multiple variables rendering market-to-market and even customer-to-customer comparisons meaningless. Establishing damages might therefore require difficult temporal and individualized proof of injury. ***HN8***[] While damages need not be established with precision, they may not be merely speculated. *Bigelow v. RKO Radio Pictures, Inc., 327 U.S. 251, 264, 66 S. Ct. 574, 90 L. Ed. 652 (1946)*. The risk and expense in establishing damages must therefore also be countenanced in evaluation of the settlement.

[35]** 6. Risks of maintaining action as a class action : The questions of whether plaintiffs could have certified a nationwide class of customers and, if so, whether such certification could have survived the litigation are not easily answered. Assuming plaintiffs could satisfy the requirements of numerosity, commonality, typicality, and representativeness of *Rule 23(a)*, they would still face the rigorous test of demonstrating the predominance of common questions of law and fact in the action and the superiority of proceeding as a class rather than individually in the action, *Rule 23(b)(3), Fed.R.Civ.P.* The predominance of issues and the manageability of the action must be determined upon an application of relevant law to the unique circumstances presented in any action. In private antitrust actions charging price fixing in the trade of a fungible product, See e.g., *In re Sugar Antitrust Litigation, 73 F.R.D. 322 (E.D.Pa.1976)*, the superiority and manageability of the action as a class action may be more readily apparent. But in antitrust actions charging other violations, or involving nonfungible products, or concerning disparate consumers, the fitness of a class action becomes less **[**36]** certain. For example, in *Windham v. American Brands, Inc., 565 F.2d 59 (4th Cir. 1977)* (en banc), the trial court's refusal to certify a class was held not abusive of discretion when it appeared that sales of various grades of tobacco at several markets over four marketing seasons would require minitrials or individualized proof of impact and **[*1372]** damage. See also *Chestnut Fleet Rentals, Inc. v. Hertz Corp., 72 F.R.D. 541 (E.D.Pa.1976)* (class certification denied as "fact of damage" would have to be established on an airport-by-airport basis); *In re Transit Co. Antitrust Litigation, 67 F.R.D. 59 (W.D.Mo.1975)* (class certification denied as five defendants and 1400 leasing agreements were involved). *Yet in In re Master Key Antitrust Litigation, 70 F.R.D. 23 (D.Conn.)*, Appeal dismissed, *528 F.2d 5 (2d Cir. 1975)*, the sale of building lock and key hardware to numerous government entities in variant markets did not pretermit class certification as generalized impact and injury could be presumed from the alleged overcharges. See also *Shelter Realty Corp. v. Allied Maintenance Corp., 75 F.R.D. 34 (S.D.N.Y.1977)* (class certification granted in an antitrust action charging market **[**37]** allocation and bid-rigging of building maintenance services when court noted a fungibility of the providers, if not of the services, and a possibility of formulary damages). See generally Developments in the Law Class Actions, 89 Harv.L.Rev. 1318, 1362-65 (1976).

Plaintiffs would attempt to draw analogies from the latter line of cases and to disassociate themselves from the former. This admittedly difficult task has recently been greatly encumbered. After the proposed settlement agreement had been executed and the court's first settlement order had issued, the Fifth Circuit reversed a trial court's certification of a class in a contagiously similar private antitrust action, *Alabama v. Blue Bird Body Co., 573 F.2d 309 (5th Cir. 1978)*. The plaintiffs in Blue Bird charged the defendants with violative price fixing and market allocation in the school bus manufacturing industry. The trial court had certified a nationwide and a statewide class of claimants. The appellate court reversed the nationwide certification and remanded the case, opining that the lack of any nationwide impact evidence precluded prosecution on such basis. In strikingly apt terms, the court described the peculiarities **[**38]** of the case and the affected industry:

> (T)his particular litigation might not fit into the category of a "classic" antitrust price-fixing conspiracy where all legal and factual issues relating to the conspiracy are uniformly related to all those allegedly harmed. Rather, in this case neither the products involved nor the purchasers appear to be standardized. The plaintiffs' class includes different sizes of governmental buyers, operating under different conditions throughout the United States, and the products involved, while commonly known as school bus bodies, apparently differ in many respects and have been marketed under various arrangements at different times. (footnote omitted)

573 F.2d at 322. In re Armored Car Litigation shares many of the peculiar attributes cited in Blue Bird. See Plaintiffs' Exhibits B (sample contracts), C (affidavits of defendants' officers), and D (schedules of defendants' revenues and profits). The plaintiffs would, of course, seek to distinguish the facts and holding in Blue Bird from the circumstances presented herein. They would argue that a nationwide conspiracy was practiced in the armored car industry and that its impact although **[**39]** sporadic and uneven was felt in all markets. The proof would be difficult, if not impossible as defendants portend.

The objectors have argued that if maintenance of the action as a class action would be so problematic then perhaps it should proceed in subclasses or separate individual actions. Perhaps this would, in fact, be the result if the litigation proceeded and did not stop short at settlement. But at this moment and upon all the arguments and facts presented, the court perceives no individual injustice if the action is settled on the basis of the nationwide class which was conditionally certified, Settlement Order No. 1, entered April 3, 1978. California as an objector claiming substantial injury had maintained that its recovery would be unfairly diminished by a forced sharing of the fund with less seriously injured class members. The court, however, has already found that the special plight of the State of California was more probably caused by an unrelated West Coast conspiracy. Order entered December 4, 1978, at 3. California's claims under such a conspiracy may **[*1373]** not be compromised by the settlement herein. Id. See *Zenith v. Hazeltine Research, Inc., **[**40]** 401 U.S. 321, 342-48, 91 S. Ct. 795, 28 L. Ed. 2d 77 (1971)*. Upon all the foregoing considerations, it appears that plaintiffs' risks of maintaining the action as a class action throughout the litigation would be great and that settlement at this time would be opportune.

7. Range of reasonableness of the settlement fund in light of the best possible recovery : In order to assess the adequacy of a particular settlement fund, the court needs some idea of the relative bounds, first, of best possible recovery and, second, of probable recovery with regard to the risks inherent in the litigation. Measuring these bounds does not imply that they set the limits of permissible recovery in settlement.

> ***HN9***[] The fact that a proposed settlement may only amount to a fraction of the potential recovery does not, in and of itself, mean that the proposed settlement is grossly inadequate and should be disapproved.

Grinnell I, 495 F.2d at 455. See Harry Lewis v. Great American Mortgage Investors, et al., C.A. No. 75-591 and W. R. Morgan, et al. v. Great American Mortgage Investors, et al., C.A. No. 75-769 (N.D.Ga. May 11, 1978) (Freeman, J.) (approving class action settlement paying 1% Of claims); **[**41]** *Helfand v. New America Fund, Inc., 64 F.R.D. 86 (E.D.Pa.1974)* (approving class action settlement granting payment of 5% Of claims); *In re Four Seasons Securities Laws Litigation, 58 F.R.D. 19 (W.D.Okla.1972)* (approving class action settlement affording approximately 8% Recovery on claims); Sunrise Toyota v. Toyota Motor Co., (1973-1) Trade Cases (CCH) P 74,398, at 93,821 (S.D.N.Y.1973) (approving class action settlement authorizing no damage award). Instead, these estimated ranges of possible recovery merely serve as reference points in the court's evaluation of the presented settlement offer.

The court requires reliable economic data in order to assay the fairness, adequacy, and reasonableness of the settlement proposal. ***HN10***[] No single formula of damage calculation is prescribed or possible in antitrust actions. What is necessary is " "a just and reasonable estimate of the damage(s) based on relevant data.' " *Hobart Brothers Co. v. Malcolm T. Gilland, Inc., 471 F.2d 894, 902 (5th Cir. 1973)* Quoting from *Bigelow v. RKO Pictures, Inc., 327 U.S. 251, 264, 66 S. Ct. 574, 90 L. Ed. 652 (1946)*. "The essential thing is that the plaintiff develop a theory about how the amount of injury can **[**42]** be measured and introduce the data necessary to make the estimate." L. Sullivan, Handbook of the Law of Antitrust 786 (1977).

Plaintiffs have now supplied and introduced into evidence reams of economic data; their economic expert has analyzed the data and has projected an estimate of damages. Plaintiffs postulate a range of $ 8,523,032 to $ 16,741,670 (with an average of $ 11,871,366) in damages for the statute of limitations period, June 21, 1973-August 31, 1975. The settlement fund of $ 11,800,000 falls comfortably within this projected possible damage range. The Atlantic Richfield Company, a class member, has indirectly objected to plaintiffs' damage projection by complaining that it is not grounded upon any "formal" discovery. The State of California objects: (i) to the use of profits rather than prices as a basis for plaintiffs' estimate of damages; (ii) to the methodology of the profit analysis; and (iii) to the computation employed in this analysis. Plaintiffs' estimates and the objectors' challenges have been thoroughly considered by the court; the estimates have been deemed reliable and the challenges have been found wanting. A brief overview of plaintiffs' derivation **[**43]** of the ranges of possible damage and of their answers to the objectors' charges, however, is warranted in this final order.

The plaintiffs' economic expert, Myer Rashish, perused sample contracts, Plaintiffs' Exhibit A, and purportedly representative price histories, Plaintiffs' Exhibit B, of defendants' customers. These contracts had been selected at random from categories of defendants' customers, the categories assigned by the size of the account, Plaintiffs' Exhibit C. Mr. Rashish concluded and the objectors concede that **[*1374]** this "price data" is meaningless and unuseable. Because of the very nature of the industry, a sale of an individualized service subject to local negotiations under variable market conditions, See Part II, Supra, a classic comparison of conspiracy and nonconspiracy prices to estimate damages was not practicable in plaintiffs' expert's opinion. [13.] The plaintiffs thereupon sought to determine whether an estimate of damages could be projected from a different base of information. Although plaintiffs conceded that price comparisons would be necessary in a proof of damages at trial, they theorized that some other analysis might provide the requisite **[**44]** range of damage estimates for settlement approval. Profit information was readily available and upon initial and continued examination, plaintiffs postulated that profit data could serve as the surrogate for the lacking price information. This hypothesis of a close but not exact relationship of profit and price assumes that anticompetitive conspiracies are entered into and maintained for the purpose of turning greater profits and that the increase in profits roughly reflects the injury suffered by a class of customers. The court finds the hypothesis sound and the assumption trustworthy in formulating an estimate of damages for review of a settlement proposal.

[45]** California objects and adamantly argues that only prices may form the basis for an estimate of damages. California unrealistically adheres to this objection in the face of insupportable odds. Meaningful price data have simply been unavailable in this industry. The objector proposes that the search for the data has been incomplete and suggests that a proper analysis might require collection and tabulation of price histories of every customer in every village, hamlet, and town. Testimony of Robert Springer, January 25, 1979, hearing, Tr. at 57. The objector predicts, however, that a thorough compilation of this data in a few cities may produce statistics that would suggest a pattern of price increase which could be extrapolated to other cities. But even a detailed collection of price histories for some cities would be a monumental and costly undertaking. It can only be assumed that a substantial portion, if not all, of the settlement fund would be consumed in such an effort. Common sense demands that a reliable substitute, if available as herein, must be pursued to ensure protection of the class of claimants. California's theoretical dissatisfaction with a profit study to estimate **[**46]** damages must be quelled in the best interests of the class. California's motion to reopen discovery on the issue of damages must accordingly be DENIED.

Proceeding then to a review of the profit study, plaintiffs' economist sought in four separate analyses to compare the during and post-conspiracy profit margins. [14.] In his four approaches, he sought to isolate that portion of the profit margin differential which could be attributed to the conspiracy rather than to unrelated variables. Plaintiffs' expert does not pretend that these analyses are precise but instead suggests that they will produce a reliable range of possible damages, the reliability commensurate with the roughness of the available data.

[47]** California, upon its own expert's review of the plaintiffs' four approaches, objects again to the use of profits rather than prices as a base, and also to the methodology and computation of plaintiffs' analyses. **[*1375]** The objector urges that profits will underestimate damages in a conspiracy because the costs of policing the conspiracy

---

13. ***HN11***[] Damages conventionally would be estimated by internal comparisons of the conspirators' prices during and after the conspiracy or by external comparisons of the conspirators' prices with those of a nonconspiring competitor or in an unaffected market, See e.g., City of New York v. Darling-Delaware, Inc., 1976 Trade Cases (CCH) P 60,812 (S.D.N.Y.1976). Upon a review of the data compiled by defendants from random accounts and price histories, the plaintiffs' expert concluded that a classic study and projection of damages could not be done. The traditional internal and external comparisons were not possible and prices, the currency of comparisons, were not available in the instant litigation.

14. Plaintiffs' expert expressed the comparison of during and post conspiracy profits as a differential in profit margins, I. e., the percentage profit margin during the conspiracy minus the percentage profit margin after the conspiracy. These differentials were adjusted to isolate the effect of the conspiracy from other known market and economic variables.

will deflate profits and because noncompetitive trading is a "narcotic" to efficiency and profit-making, See *United States v. Aluminum Co., 148 F.2d 416, 427 (2d Cir. 1945)*. California's expert has opined that with these alleged errors damages may be twice (Objector's Response to the Economic Supplement, at 15), four times (Objector's Response to Plaintiffs' Reply, at 2), or even ten times (January 25, 1979 Hearing, Testimony of R. Springer, at Tr. 51) the $ 11.8 million reached by plaintiffs' analyses.

California asked the Court to appoint its own expert to review the analyses and criticisms. ***HN12***[] The Manual for Complex Litigation, Part 1, § 3.40 (rev.ed.1977), specifically allows court appointment of an expert when:

> the parties' experts have offered conflicting or irreconcilable opinions or when any well-recognized school of thought is not **[**48]** represented in the opinions proposed to be offered or when a court-appointed expert would facilitate understanding of the technical issues involved or under circumstances in which a court-appointed expert might be necessary or desirable.

See also *Rule 706, Fed.R.Evid.* The Manual suggests that although appointment of a court's expert should be "the exception rather than the rule . . .," the appointment exception may lie when the parties' experts disagree on the theory, as opposed to the factual basis, for their opinions. This exception, it is argued, is presented in the dispute at hand because while California may object to alleged errors of plaintiffs' profits analysis, it primarily assails plaintiffs' choice of profits as a measure to assay the settlement fund. The plaintiffs challenged California's request as unprecedented, Plaintiffs' Reply, at 4; defendant Purolator Security opposed the request as unnecessarily delaying, Purolator Memorandum, at 32.

The court concludes that a court-appointed expert will not be necessary or desirable in this instance. Although California has attempted to obscure simple calculations with clouds of algebra, our task is clear and is not **[**49]** complex. The court at this juncture need only be assured by reliable economic data that the settlement proposal is fair, adequate, and reasonable. The court has already rejected California's challenge to the use of price comparisons. The proponents need only supply an educated estimate of damage ranges. We are convinced that has been done and will not authorize decimation of the settlement fund in order to pinpoint the claimed injury. The objector's challenges to the method and calculation, See infra, are found similarly wanting. A court-appointed expert would not be helpful under these circumstances. California's request should therefore be DENIED.

The challenged approaches of plaintiffs' expert, Myer Rashish, may be briefly reviewed. In his study of profits, Mr. Rashish performed four different analyses of the profit data, Plaintiffs' Exhibit D, with each analysis stated in terms of a profit differential comparing conspiracy and post-conspiracy profits. Assuming, but not accepting, profits as the currency of the study, the objector has proceeded to challenge each of the four phases of plaintiffs' expert's analysis as both invalid in theory and flawed in execution.

Rashish **[**50]** Analysis # 1

An examination of the average profit margins of the three defendants in the fifty largest cities in the United States during the 1968-75 conspiracy years was compared with the similar average for the 1976-77 post-conspiracy years. The examiner noted a marked decline in the profit margin in the post-conspiracy years. The differential, expressed as a percentage of sales, was approximately 3.0, unweighted, and 6.0, weighted. "Weighting" considers each profit margin in light of the volume of business done by each conspirator in each of the fifty cities, that is, it determines whether the market was shared equally (1/3, 1/3, 1/3) or unequally by the three codefendants and then "weights" the profit according to the market share. The examiner selected the midpoint, 4.5, between the unweighted 3.0 and weighted 6.0 (not knowing which more **[*1376]** accurately reflected the profit differential in this industry) and multiplied 4.5 times $ 304,394,000, defendants' total sales to class members for the two year statute of limitations period June 21, 1973 August 31, 1975. The conclusion drawn from this approach estimates damages between $ 9,131,820 and $ 18,263,640, or at an **[**51]** average of $ 13,697,730. California challenges this result contending that only the 6.0% Weighted profit differential has meaning and that the unweighted figure will tend to understate damages. California, using this 6% Figure, estimates that damages for the statute of limitations period should be approximately $ 18,000,000.

Rashish Analysis # 2

The overall profits of the three defendants in the conspiracy and post-conspiracy years were studied, making an adjustment for any profit trend attributable to other variables, such as a predictable profit decline associated with a generally faltering national economy. The examiner identified a general downward trend in profits in 1972-75 during the conspiracy. He expressed this trend as an average decline for the years, -1.2%, and then projected this trend line for two years beyond the conspiracy, giving an expected profit margin of 8.9% In the non-conspiracy years. The actual average profit margin for the non-conspiracy years was 6.1%. Thus a differential of 2.8% Of sales might hypothetically represent profits due to the conspiracy alone. This differential was translated into an estimate of damages of $ 8,523,032 for the statutory **[**52]** period.

California complained that the data have been unfairly manipulated to leave out the peak year 1971. Using this year, the objector arrived at a differential of 4.9% And damages of $ 14,920,000. Mr. Rashish replied that he was not unjustly manipulating the figures but was instead attempting to spot trends. He reran his analysis using an average profit margin decline derived from a study of all the conspiracy years, 1968-75, and arrived at a differential of 2.7% Or damages of $ 8,228,638 for the limitations period.

Rashish Analysis # 3

A comparison was made between the armored car industry and the trucking industry, a close but not perfect analogy, to determine damages during the conspiracy period. To account for the differences in the industries, a comparison was first drawn between the average trucking profit margins, 5.0%, and the defendants' average profits in the post-conspiracy years, 7.5%, revealing a 2.5% Profits margin difference between the two industries. The expert then examined the average defendants' profit margin for the conspiracy years, 13.0%, subtracted the trucking industry profit margin, 5.0%, and adjusted this figure by the 2.5% Difference attributable **[**53]** to industry differences (I. e., (13%-5.0%) 2.5%) to arrive at 5.5% As a statement of defendants' ill-gotten gains during the conspiracy years. This percentage equalled an estimated $ 16,741,670 in damages for the fourteen-month period.

California challenged the choice of the trucking industry, a highly regulated business, as an analog for a comparative analysis. Further, the objector noted that the benefits of the conspiracy were not completely purged in the post-conspiracy years. Because all effects were not purged, these years would not provide a perfect competitive norm, and therefore use of profit margin differences for these years would arguably tend to understate damages. California suggested that the best use of a bad analog would be an unadjusted comparison of defendants' armored car conspiracy profits, 13%, and trucking industry profits, 5%. This comparison resulted in an 8% Profit margin differential and yielded estimated aggregate damages of $ 24,350,000.

Rashish Analysis # 4

A comparison was studied of conspiracy and post-conspiracy profit margins in markets in which defendants competed with each other and in markets where they did not. Such an analysis predicts **[**54]** that the profit margin differential will be greater in those categories of markets where more than one defendant did business because it **[*1377]** was in those markets where they could conspire to allocate routes and customers or to rig bids. Comparing the during and post-conspiracy profit margin differentials for the two categories of markets in which more than one defendant did business resulted in an average differential of 4.5% Or estimated damages of $ 13,697,730.

California challenged the meaning of this comparison, contending that weighted and unweighted data had been carelessly mixed. California made no estimate of damages of its own under this approach. Mr. Rashish replied, showing that only weighted averages were used, and then performed an additional calculation comparing profit margin differentials in markets with other defendants with those from markets with no competition from a codefendant. This calculation was an attempt to adjust the previous result for variables attributable to something other than the conspiracy. Comparing these sets of market categories resulted in a new identification of the profit margin due to the conspiracy, 2.9%, or an estimated $ 8,827,427 **[**55]** in damages for the statute of limitations period.

A tabular summary of the estimated damages for the statute of limitations period, using the four Rashish approaches, reveals:

TABLE

Plaintiffs' average estimated best possible recovery for the statute of limitations period equals approximately $ 13.7 million or approximately $ 11.8 million when Rashish Analysis # 4 is recalculated. The objector's range of estimates runs from $ 15 to $ 24 million. The settlement fund of the proposal is set at $ 11.8 million plus interest. If the plaintiffs' attempt to produce a reliable economic estimate of best possible recovery were accepted, the settlement proposal amount would fall comfortably within considerations of fairness, adequacy, and reasonableness.

The court concludes that plaintiffs have finally supplied reliable economic data justifying the settlement amount. We state no opinion as to whether these are the best available data and the most reliable analyses, only that they are acceptable and rational means of estimating damages under the circumstances presented. On the basis that these estimates of the optimum recovery coincide with the proposal offer, settlement of the litigation **[**56]** is clearly favored.

8. Range of reasonableness of the settlement fund in light of the risks posed in litigation : If the settlement fund falls comfortably within a range of estimates of the best possible recovery, it must A fortiori fall within or beyond the bounds of likely recovery under the circumstances of the litigation. ***HN13***[] In a review of a settlement proposal "(t)he most important factor is the strength of the case for plaintiffs on the merits, balanced against the amount offered in settlement." *West Virginia v. Charles Pfizer & Co., 440 F.2d 1079, 1085 (2d Cir. 1971)*. See *Protective Committee v. Anderson, 390 U.S. 414, 424-25, 88 S. Ct. 1157, 20 L. Ed. 2d 1 (1968)*; *Young v. Katz, 447 F.2d 431, 434 (5th Cir. 1971)*; *Florida Trailer & Equipment Co. v. Deal, 284 F.2d 567, 571 (5th Cir. 1960)*. We have previously determined that the risks of prosecuting this action, if not insurmountable, are at least severe. The estimates of likely recovery would therefore be mere fractions of the $ 8-16 million range of best possible recovery. If all of California's doomsaying were realized, that is, that plaintiffs' estimates understate damages two, four, or even ten-fold, the settlement fund **[**57]** of $ 11.8 million would still appear more than ample in the face of these substantial risks. The court again reminds that the test is of fairness, adequacy, and reasonableness of an amount offered today in the early stages of litigation, and that:

> there is no reason, at least in theory, why a satisfactory settlement could not amount to a hundredth or even a thousandth part of a single percent of the potential recovery.

[*1378] *Grinnell I, 495 F.2d at 455 n.2*. Under such scrutiny, the settlement offer is certainly sufficient.

9. The ability of the defendants to withstand a greater judgment : The Second Circuit in Grinnell I explained the importance and underpinnings of this consideration.

> Appellants have cited no authority for the proposition that the defendants' ability to pay is an improper consideration when approving a settlement offer. Likewise, we are unable to find any such authority. Common sense seems to dictate the necessity, to say nothing of the propriety, of such a consideration. In fact, all available authority defies appellants' analysis. According to the United States Supreme Court: ***HN14***[] "Further, the judge should form an educated estimate of the **[**58]** complexity, expense and likely duration of such litigation, The possible difficulties of collecting on any judgment which might be obtained, and all other factors relevant to a full and fair assessment of the wisdom of the proposed compromise." *Protective Committee v. Anderson, supra, 390 U.S. at 424-25, 88 S. Ct. at 1163*.

495 F.2d at 467 (emphasis in original). A settlement amount which would plunge the defendants into immediate bankruptcy would not serve the best interests of the class of claimants. [15.] Although a defendant should be

[15.] If defendants were thrust into bankruptcy, plaintiffs would likely recover only a small part of their claimed damages when defendants' assets were apportioned among an array of scheduled creditors. Also if defendants, three of the largest suppliers in the trade, were forced out of business, the cost of armored car services predictably would climb. Either result would disserve the interests of the class of claimants.

compelled to disgorge his ill-gotten gains for violation of the federal antitrust laws, See *Liebman v. J. W. Petersen Coal & Oil Co., 73 F.R.D. at 536*, this mandate becomes less forceful when questions of violation and gain go unanswered. The court then looks to the defendants' ability to pay in weighing the strengths of the case and the potential bounds of injury.

[59]** An officer of defendant Brink's testified that the Brink's contribution to the settlement fund and the criminal fines previously imposed approximate its 1977 corporate earnings and equal one and one-half years' shareholders' dividends. Plaintiffs' Exhibit G, Affidavit of A. Tolan. The Wells Fargo contribution exceeds its 1977 net operating income. Plaintiffs' Exhibit G. Purolator Security's president declares that its share in the fund together with the costs of satisfying the civil and criminal charges greatly exceeds the company's net profit for 1975, 1976, and 1977 combined. Id., Affidavit of W. Steele. The codefendants' balance sheets, Plaintiffs' Exhibit G, affirm these declarations and suggest that the fund approaches the limit of their ability to pay.

10. Reaction of the class to the settlement proposal : A report and supplemental report on the interim administration of the proposed settlement relate that in response to the approximately 175,000 notices of settlement and to the ten national newspaper announcements, a total of 7,952 claims and 213 requests for exclusion from the class have been filed. Of the four objections originally lodged against the settlement, one, **[**60]** the objection of the State of Ohio, challenged only the attorneys' fee petition, and another, that of the Central Penn National Bank, was not renewed after the plaintiffs' submission of their economic supplement to their original memorandum in support of the settlement. Upon these reports, 99.975% Of the class of claimants may be viewed as supporting the settlement and thereby favoring the court's approval of the proposal. Cf. *Cotton v. Hinton, 559 F.2d at 1331* (settlement proposal approved although more than half of the class appeared to object to the proposal).

The court, however, must be reluctant to place undue reliance on the claimants' apparent acquiescence. In some cases, class acquiescence may be explained either as the individual members' unwillingness to expend the time and money necessary to file and pursue objections or as a failure of the settlement notice adequately to describe the terms and conditions of the proposal. The court finds that these explanations should not be presumed herein and that silence should be deemed consent.

[*1379] The members of the instant class, customers of armored car services, are predominately governmental subdivisions or large **[**61]** private corporations, such as banks, department stores, and grocery store chains. They are not private individuals, such as hotel guests or automobile or fuel purchasers. Compare *State of West Virginia v. Chas. Pfizer & Co., 314 F. Supp. 710 (S.D.N.Y.1970)*, aff'd, *440 F.2d 1079 (2d Cir.)*, cert. denied, *404 U.S. 871, 92 S. Ct. 81, 30 L. Ed. 2d 115 (1971)* (class composed of public and private institutions which purchased antibiotics) *With In re Hotel Charges, 500 F.2d 86 (9th Cir. 1974)* (class composed of hotel guests improperly surcharged for telephone calls); *In re General Motors Corp. Engine Interchange Litigation, 594 F.2d at 1106* (class claimants were individual car purchasers); *And Liebman v. J. W. Petersen Coal & Oil Co., 63 F.R.D. 684 (N.D.Ill.1974)* (class members were individual purchasers of coal in the Chicago area). The instant plaintiff class members are expected to be capable of marshalling the resources necessary for an objection. [16.] Failure to interpose objections may then be read as affirmance of the settlement proposal.

[62]** The court has already concluded that the notice published in this litigation was appropriate and adequate. Settlement Order No. 1, entered April 3, 1978, at 5. The notice described the foundations of the litigation, detailed the terms of settlement, and set the deadlines for claims and opt-outs. The timetable established in the notice (4-6 weeks for responses) was not inconsistent with the deadlines governing similar litigation. See e.g., *Miller v. Republic National Life Insurance Co., 559 F.2d at 429* (4 weeks); *Grunin v. International House of Pancakes, 513*

---

16. The court does not deprecate the stern adversarial role which the State of California has assumed in this litigation. The state attorney general is charged with scrutinizing such settlements in the public interest. The objector has satisfied this weighty assignment herein. The court notes, however, that this is not an antitrust conspiracy directly affecting private individuals of modest means; rather it is a conspiracy which allegedly tended to injure large public and private institutions that had occasion to use armored car services. These behemoths need not rely upon one attorney general but may assert their own objections. Their silence in this case should therefore be read as acquiescence instead of inadequacy.

F.2d at 121 (19 days); United Founders Life Insurance Co. v. Consumers National Life Insurance Co., 447 F.2d 647, 652 (7th Cir. 1971) (25 days). The notice could have been more thorough and could have suggested an estimated range of damages and recovery; the settlement proposal could have been stalled, allowing more time for discovery. These possible faults are not fatal; the notice was adequate. The court therefore concludes that the class has tacitly but solidly affirmed the settlement proposal.

In similar manner the court finds that the conditional certification of a class of claimants for settlement purposes may now **[**63]** be granted final certification. The class is not unduly restrictive, Cf. *In re General Motors Engine Interchange Litigation, 594 F.2d at 1106* (certification of only a subclass of claimants for settlement purposes), but includes all customers of armored car companies except the Federal Reserve Banks. The class is not overly broad, as the allegation of a nationwide conspiracy has been reasonably posited. Although the effects of the conspiracy might have been felt intermittently in various markets, the fact of a nationwide conspiracy, adamantly denied by the defendants, has been adequately suggested by the proponents. [17.] Plaintiffs' Exhibit D (schedules of economic data tabulating or graphing defendants' revenues and profits on company-wide, local branch, and various competitive market bases). Plaintiffs' proof of a **[*1380]** nationwide conspiracy at trial would be demanding, if not impossible, but plaintiffs' proffer for purposes of class certification for settlement is adequate. Accord, *Wainwright v. Kraftco Corp., 58 F.R.D. 9, 12 (N.D.Ga.1973)*; *In re Four Seasons Securities Laws Litigation, 58 F.R.D. 19, 31, 39 (W.D.Okl.1972)*; *Philadelphia Housing Authority v. American Radiator* ***[**64]*** *& Standard Sanitary Corp., 323 F. Supp. 364, 372 (E.D.Pa.1970)*. The *Rule 23(a)* requirements of numerosity, commonality, typicality, and representativeness shall be deemed satisfied for the limited purposes of settlement of this litigation. The conditional class, *Rule 23(c)(1)*, as detailed in Settlement Order No. 1 entered April 3, 1978, and as published in the notice to class claimants, [18.] may now be deemed the final class for settlement.

[65]** Upon all of the foregoing, the review of the settlement in light of the ten chosen criteria, the court concludes that the proponents of the settlement have carried their burden. The settlement on behalf of the denominated class of armored car services purchasers may be APPROVED as fair, reasonable, and adequate. *Rule 23(e)*.

IV. ATTORNEYS' FEES AND EXPENSES

Having announced our final approval of the settlement, we may now consider the joint petition for attorneys' fees and expenses submitted by counsel for the named plaintiffs. ***HN15***[] The Clayton Act provides for the recovery of attorneys' fees and expenses upon successful prosecution of a treble damage action, *15 U.S.C. § 15*. No statute expressly allows for recovery of these amounts upon settlement of antitrust litigation and the only authority for reimbursement derives from the "equitable fund doctrine," See *Sprague v. Ticonic National Bank, 307 U.S. 161, 59 S. Ct. 777, 83 L. Ed. 1184 (1938)*; *Central Railroad & Banking Co. v. Pettus, 113 U.S. 116, 5 S. Ct. 387, 28 L. Ed. 915 (1885)*; *Trustees v. Greenough, 105 U.S. 527, 26 L. Ed. 1157 (1882)*. The doctrine recognizes that class members who have benefited from counsel's efforts to "create, **[**66]** increase, protect or preserve. . . ." *Lindy II, 540 F.2d 102 at 111*, a recovery fund should contribute toward the costs of counsel's services. Just compensation

---

[17.] California objects that it has been more severely injured from the alleged conspiracy than other claimants yet must share with them in the fund. First, the court has already concluded that California's damages may have been aggravated by an unrelated conspiracy and that its rights against the West Coast conspirators are unaffected herein. Order entered December 4, 1978. See note 12, Supra. Further, any plan of distribution (a scheme of equal shares or weighted shares) has yet to be presented and argued. California may wish to renew its objections if a later proposed plan does not appear to satisfy its interests.

[18.] The notice did not offer a take-it-or-leave-it choice to potential class members. Instead the recipients were notified of the options: (i) of tendering claims to participate in the settlement proposal, (ii) of opting out of the class and pursuing individual remedies, or (iii) of remaining in the class but objecting to the settlement terms. No cognizable rights were compromised upon a decision to be excluded from the settlement class or upon the choice to remain in the class but object to the settlement. Compare *In re General Motors Engine Interchange Litigation, 594 F.2d 1106 (7th Cir. 1979)* (subclass members were compelled to waive their federal right of action upon a decision to opt out) *With Philadelphia Housing Authority v. American Radiator & Standard Sanitary Corp., 323 F. Supp. 364, 373 (E.D.Pa.1970)* (tentative class members' rights were not determined by the mere submission of the settlement proposal for approval as the proposal allowed opportunities for exclusion from class and objection to the settlement).

should thus be subtracted from the claimants' recovery fund. The court, while calculating reasonable compensation, must maintain vigilant oversight of the unnamed class members' interests. *Trustees v. Greenough, 105 U.S. at 536*; *Grunin v. International House of Pancakes, 513 F.2d at 123*. The tension that results is the subject of petitioning counsel's and the objectors' continuing argument.

The petitioners seek an award of $ 1,127,500 in aggregate attorneys' fees and more than $ 160,000 in disbursements. A single attorneys' fee award is sought upon the understanding that they will later apportion the award pursuant to an agreement among the twenty petitioning law firms here of record. [19.] Supplemental Memorandum of Objections of the State of Ohio, filed July 11, 1977, Exhibits A and B. The applicants contend that they have worked in concert as one law firm in this litigation **[*1381]** and thus a joint award is warranted. See Miller v. Fisco, (1978)Fed.Sec. (CCH) P 96,348 (E.D.Pa.1978). They argue in support of the **[**67]** amount of the fee request that it equals slightly less than 10% Of the principal, which would be substantially less than a contingent fee award. The amount reflects a multiplication of their customary fee (calculated as attorney hours times usual hourly rate) by a factor of approximately three, See *Wolf v. Frank, 555 F.2d 1213, 1218 (5th Cir. 1977)*; *Grinnell I, 495 F.2d at 471*; *Lindy II, 540 F.2d 102 at 118*. This multiplication produces an overall hourly rate for the petitioners of about $ 300 per hour.

Petitioners submit that considerations which should influence the court's **[**68]** evaluation of their request include: the generous result obtained, the contingent nature of the fee, the customary contingent fee, the unusual skill requisite to perform legal services so promptly, and counsel's experience, reputation, and ability. *Grinnell I, 495 F.2d at 470-71*; *Johnson v. Georgia Highway Express Co., 488 F.2d 714, 717-19 (5th Cir. 1974)*. They supply a narrative of their litigation efforts and claim that it is

> doubtful that any other set of lawyers would have been sufficiently imaginative to approach the litigation in this manner, or if they had been inclined to do so, would have had the standing and the ability to dispose of it in this fashion . . .

Joint Application for Counsel Fees, filed May 26, 1978, at 15-16, and that

> (t)his settlement was obtained only because plaintiffs' lead counsel had the experience, the ability and the standing and were known to the distinguished defense counsel . . . to be capable of conducting, and to be willing to conduct this litigation to a conclusion.

Id., at 18.

In addition to the narrative and argument, applicants have submitted summaries of individual counsel's experience and credits, schedules of attorney **[**69]** time and regular billing rates, schedules of out-of-pocket expenses, and affidavits of each firm's senior counsel attesting to the truth and veracity of the fees and expenses claimed. The schedules, they argue, afford the necessary detail of how many hours were devoted to which tasks by whom for the court's review and assessment. See *Lindy I, 487 F.2d at 167*. They note that the claims of the few objectors to the petition represent less than one-third of one percent of the claims to the fund and that the major claimants have interposed no opposition to the amount of the requested award. Similarly, they remark that their $ 1,127,500.00 fee request might be almost fully paid out of the interest which has and will accrue to the deposited fund. Upon all of these contentions and support, they urge that their joint application is eminently fair and reasonable.

Objections to the joint application have been filed by the States of California and Ohio (with the State of Arizona concurring) and the Penn Central National Bank. [20.] These challengers contend that the petitioners' request is excessive and that it is inadequately documented, overinclusive, and impermissibly calculated and presented.

[19.] Twenty law firms or groups have submitted claims in the joint application for attorneys' fees. The Office of Attorney General for the State of Connecticut has been listed among counsel of record in Connecticut v. Brink's, Inc., C.A. No. 77-1878, but seeks no share in the award. Counsel has been separately retained in Hillman's, Inc. v. Brink's, Inc., C.A. No. 77-1880; See Note 4, Supra, and has not joined the united petition.

[20.] The Atlantic Richfield Company appeared to second the objectors' complaints with the joint fee petition at the fairness hearing on January 25, 1979. Tr. at 82, 91.

[70]** The State of Missouri, a settling plaintiff, in an apparent stroke of conscience, has affirmed the objectors' charges before the court.

We announced at the fairness hearing on January 25, 1979 that a decision on the attorneys' fee request could be rendered upon the documentary evidence and written arguments which had been submitted by the petitioners and objectors. No opposition was voiced to this method of proceeding.

The court is now faced with what appears from all the circumstances of this litigation to be an embarrassingly exorbitant attorneys' fee request. We are disappointed and even sorely discouraged that an application of this magnitude has been tendered in the instant actions. The applicants have regretfully fulfilled the most dire predictions of wary courts and commentators. See *Grinnell II, 560 F.2d at 1098-99*; In re Sugar **[**71]** Industry Antitrust Litigation, M.D.L. No. 201, slip op. at 16 (N.D.Cal. May 10, **[*1382]** 1978); *Illinois v. Harper & Row Publishers, Inc., 55 F.R.D. 221, 224 (N.D.Ill.1972)*; Dawson, Lawyers and Involuntary Clients in Public Interest Litigation, 88 Harv.L.Rev. 849 (1975); Computing Attorney's Fees in Class Actions: Recent Judicial Guidelines, 16 B.C.Ind. & Com.L.Rev. 630 (1975). What might be overlooked as naive exuberance among fledgling attorneys is not easily forgiven when accomplished in the name of such experienced officers of the court. Having thus commented, we will proceed with our review and will seek to determine a reasonable hourly rate and to identify reimbursable categories of time.

HN16[] The Supreme Court, in inaugurating the common fund doctrine, cautioned that these attorneys' fee awards must be "made with moderation and a jealous regard to the rights of those who are interested in the fund." *Trustees v. Greenough, 105 U.S. at 536*. Heedless of this warning, attorneys have requested and courts have granted seemingly "windfall" awards, *Grinnell I, 495 F.2d at 473*, and have suffered the criticism and scorn of the general public. See *Free World Foreign Cars, Inc. v. Alfa **[**72]** Romeo, 55 F.R.D. 26, 30 (S.D.N.Y.1972)*. The court's task, then, is difficult but unavoidable:

> We said in the beginning that the question was delicate and embarrassing and this is so not only because we recognize the ability of the attorney who rendered the services but also because of the high standing and character of the three lawyers who testified in support of the allowance. And we might also add this is so because of our respect for the ability and integrity of Judge Barnes, who fixed the allowance. Notwithstanding, the fabulous amount allowed is shocking to our sense of reason and justice.
>
> And we are disturbed because in our sober judgment this exorbitant allowance, if it should become a precedent, is calculated to bring both the bar and the bench into public disrepute. More than that, the possibility that the anti-trust laws might develop into a racketeering practice should not be enhanced by the allowance of exorbitant and unreasonable attorney fees.

Milwaukee Towne Corp. v. Loew's, Inc., 190 F.2d 561, 569-70 (7th Cir. 1951), Cert. denied, *342 U.S. 909, 72 S. Ct. 303, 96 L. Ed. 680 (1952)*, *Quoted in Grinnell II, 560 F.2d at 1099*.

There are two incidents **[**73]** which epitomize the cause for the court's impatience with petitioners' request: the first, self-revelatory and the second, disclosed by settling plaintiff, State of Missouri. At the time this court authorized settlement negotiations and again at the time we entered Settlement Order No. 1, counsel were put on the clearest, sternest notice that a settlement proposal would have to be solidly supported and roundly justified before settlement could be approved. Plaintiffs' counsel acknowledged our admonition, assured us that our demand would be met, and verified a schedule of briefing. On September 18, 1978, at the first hearing convened to determine the fairness, adequacy, and reasonableness of the settlement, the court had before us two submissions from plaintiffs and the filings of the four objectors. The two plaintiff submissions were: a 21-page memorandum in support of the settlement and an over 200-page (including exhibits and supplements) joint petition for attorneys' fees. The memorandum attached no evidentiary material but consisted solely of a recapitulation of the settlement terms, arguments, and the author's suggestion that price comparisons of the conspiracy and post-conspiracy **[**74]** years were inconclusive. The fee petition was neatly bound, carefully indexed, and professionally presented. It had been faithfully supplemented up to the moment of the hearing. The harmful presumption was clear.

The memorandum in support of the settlement was patently insufficient and counsel were dispatched with a list of economic analyses which might prove helpful to the court. Order entered September 20, 1978, at 1, 2. Counsel returned to a hearing on January 25, 1979 with the evidentiary support vital to the court's review of the settlement. The then proffered analyses and **[*1383]** arguments were thorough, instructive, and grounds for approval of the settlement. But the previous presumption could not be dispelled.

The second tainted incident was marked when the Attorney General for the State of Missouri objected to the fee petition as excessive and forwarded to the court a copy of a letter previously sent to lead counsel detailing Missouri's objections. The Attorney General charted the various firms' fee requests compared with the fee customarily earned. The chart revealed that while in some cases counsel expected fees based on the announced multiplier of 2.8-3.0, **[**75]** in other cases the award would be more than four, five, or even six times the hourly rate. The state's attorney urged that such recovery would be unfair and not in the best interests of the class.

At the January fairness hearing the State of Missouri renewed its objection to the form and the amount of the fee petition. The state's representative remarked that under the present scheme the Attorney General's Office would receive $ 15,000 for $ 4,000 worth of lawyer time, while its client, the State of Missouri, would receive no more than $ 6,000 from the claimants' fund. January 25, 1979 hearing, Tr. 97-98. Petitioners have never directly countered the force of these damaging comparisons.

These two incidents deny the petitioners' claim to a munificent award. ***HN17***[] A just award will only be entered after careful exercise of our role as overseer and after critical application of the factors for awarding attorneys' fees from an equitable fund.

Our charge is to continue as the "guardian of the rights of absent class members. . . . " *Grunin v. International House of Pancakes, 513 F.2d at 123*, and to be assured that the expenses claimed are for efforts to create, increase, or protect the **[**76]** settlement fund. See Manual for Complex Litigation, Part 1, § 1.47 (rev.ed.1977); Dawson, Lawyers and Involuntary Clients: Attorney Fees from Funds, 87 Harv.L.Rev. 1597, 1626 (1974). The "touchstone" then is an evaluation of "the actual effort made by the attorney to benefit the class." *Grinnell II, 560 F.2d at 1099*. [21] The petitioners hold the burden of demonstrating that their billed time and expenses served to benefit the fund. *Johnson v. Georgia Highway Express, Inc., 488 F.2d at 720*. The court will measure the petitioners' efforts against the standards of Johnson, see also ABA Code of Professional Responsibility, DR2-106, and will assay the various categories of work according to recent guidelines.

[77]** In Johnson, the Fifth Circuit enunciated a series of twelve factors for the trial court's consideration in awarding attorney's fees. Although Johnson was a civil rights action, the factors have been adopted and applied in a multitude of other suits including antitrust treble damage actions, See e.g., *Wynn Oil Co. v. Purolator Chemical Corp., 391 F. Supp. 522 (M.D.Fla.1974)*. The Johnson factors, when coupled with the criteria for augmenting an award under exceptional circumstances, *Wolf v. Frank, 555 F.2d 1213, 1218 (5th Cir. 1977)*, parallel the process of determining a "lodestar" amount and a "multiplier" employed by other courts, See *Grinnell II, 560 F.2d at 1098*; *Lindy I, 487 F.2d at 167*. ***HN18***[] Johnson, Grinnell, and Lindy require a two-step review: first, the calculation of a customary fee from the identification and multiplication of an attorney's reasonable hourly rate times a compensable number of hours; and, second, the determination of whether an increase or reduction of these expenses is justified in light of the risk of litigation and the quality of work performed.

[*1384] As a predicate to this two-step review, the court must consider the propriety of petitioners' "joint" **[**78]** form of fee application. The joint application attempts to evade the necessary scrutiny of our review by disguising

---

[21] Courts have also been guided in determining attorneys' fee awards by a need "to stimulate the motive for representation of classes . . . ." Manual for Complex Litigation, Part 1, § 1.47(a) (rev.ed.1977). This need has been apparent in some civil rights actions. See *NAACP v. Button, 371 U.S. 415, 443, 83 S. Ct. 328, 9 L. Ed. 2d 405 (1963)*; *Johnson v. Georgia Highway Express, Inc., 488 F.2d 714, 719 (5th Cir. 1974)*. Nationwide antitrust class actions appear more desirable among the organized bar and the need to stimulate representation is less evident. The court therefore will rely more heavily on the principle of benefit to class than upon consideration of encouraging class representation in fashioning this attorneys' fee award.

the rate, hours, and multiplier of individual attorneys in an undifferentiated mass. See Letter from Assistant Attorney General, State of Missouri, to the court, dated January 19, 1979. The applicants submit in support of this form of fee request that they have performed as a single law firm and that one award is justified. The schedules of hours, however, suggest such duplication of effort, that if they acted as a single firm, the firm stands as a monument to inefficiency. For example, out of a total of 85 attorneys from the 20 firms seeking reimbursement in this litigation, 54 attorneys worked on pleadings and 34 entered court appearances. No private law firm could survive on such redundancy. Treating petitioners as a single law firm entitled to an aggregate fee would reward inefficiency and duplication of effort and thus would be unfair to the class of claimants. A joint award will not be granted. The court, however, will seek to determine reasonable mixed hourly rates [22.] on a firm-by-firm basis. Instead of one large aggregate award or eighty-five separate **[**79]** fees, the court will grant twenty law firm awards. Having dispensed with these preliminaries, the court may now proceed with a review of the Johnson criteria, *488 F.2d 714 at 717-19*.

A. The Johnson Factors

(1) The time and labor required. The number of hours claimed by plaintiffs' counsel is the first area of review. We must not blindly accept the petitioners' statement of hours expended without reference to the time required for such tasks as seen from our experience and vantage point. *Id. at 717*; In re Sugar Industry Antitrust Litigation, slip op. at 28. We find the applicants' number of claimed hours generally overstated. Part of this overstatement derives from the severe duplication of effort endemic in this litigation. The court will attempt to correct for the petitioners' inefficiency by limiting the compensable time for court appearances **[**80]** and preparation of pleadings. Many of the hours charged are for tasks, such as settlement administration, which are more clerical than legal, and, while allowable, must be reimbursed at lesser rates. See *In re Penn Central Securities Litigation, 416 F. Supp. at 922*. Other hours claimed for repeated client conferences accorded limited, if any, benefit upon the class of claimants and must also be proportionally reduced.

(2) The novelty and difficulty of the questions. This litigation, settled at such an early stage of the proceedings, presented no questions of first impression. Had the actions gone to trial, plaintiffs would have encountered enormous difficulties of proof and of persuasion. But the actions did not proceed to trial and the attorneys' assignments and work were more mundane than masterful. The petitioners listed the techniques they pioneered in previous multidistrict antitrust litigation (E. g. "global" settlements; procedures for class certification by motion, memorandum, and affidavit with a minimum of discovery; the form and manner of class notice), Joint Application for Counsel Fees, at 18, and hoped that "(t)he novel settlement procedure developed in this litigation **[**81]** . . . may likewise become customary." *Id., at 19*. The court is left to speculate on what that novel procedure might be: settlement amount based on a percentage of sales, settlement proposed without any economic justification, or something else. We must simply conclude that novelty and difficulty were not encountered prior to settlement.

(3) The skill requisite to perform the legal service properly. ***HN19***[] "The trial judge should closely observe the attorney's work product, his preparation, and general ability before the court." *Johnson v. Georgia Highway Express, Inc., 488 F.2d at 718*. On the one hand, the pleadings and early motions in this litigation demanded little skill from the petitioners. The civil complaints merely rehearsed the charges of the criminal **[*1385]** indictments and the original discovery consisted of a review of the Grand Jury documents. The early pretrial proposals for case management and handling were adaptations of previous multidistrict litigation housekeeping rules and did not tax petitioners' legal prowess.

On the other hand, settlement at such an early juncture reflects forceful and effective use of bargaining skills. The lead counsel's experience and **[**82]** reputation may have influenced defendants' early capitulation. The petitioners' first attempt to support and seek approval of the settlement was woefully inadequate. Their second attempt has proven successful. The compilation and presentation of persuasive arguments and evidentiary support favoring a settlement are refinements of general case preparation and briefing skills. Balancing the first disaster with the second success, the court concludes that petitioners' labor and skill in this area were adequate.

[22.] The "mixed hourly rate" averages the reasonable rates of senior and novice attorneys and recognizes a variety of legal tasks, from complex to routine.

(4) The preclusion of other employment by the attorney due to acceptance of the case. We have no indication from any of the twenty law firms representing the class claimants that they were precluded from other work by this litigation. Lead counsel were heavily but not completely committed to the progress of these actions; adjunct counsel devoted even less substantial time to the proceedings.

(5) The customary fee. Courts have recently awarded these and similarly able lead counsel mixed hourly rates of $ 72/hour, *Entin v. Barg, 412 F. Supp. 508, 517 n. 18 (E.D.Pa.1976)*, $ 73/hour, Barr v. WUI/TAS, Inc., (1976-1) Trade Cases (CCH) P 60,725 at 68,119 (S.D.N.Y.1976), and $ **[**83]** 75/hour, *In re Penn Central Securities Litigation, 416 F. Supp. at 924 n. 52*. But see City of Detroit v. Grinnell Corp., (1976-1) Trade Cases (CCH) P 60,913 at 68,982 (S.D.N.Y.1976), rev'd, *560 F.2d 1093, 1102 (2d Cir. 1977)* (mixed hourly rate for Berger firm which we have calculated at $ 74/hour, allowed excessive individual fees and could not stand). [23.] **[**84]** The mixed hourly rate is an average computed from the reasonable hourly fees of senior and junior attorneys in a firm fulfilling a variety of legal tasks. The court concludes that a customary mixed hourly fee for lead counsel law firms should not exceed $ 80/hour. [24.] The customary fee for adjunct law firms should reflect a lesser degree of decision-making and a reduced level of responsibility. The court concludes that the mixed hourly fee for these firms should not exceed $ 65/hour to fall within community standards. [25.]

(6) Whether the fee is fixed or contingent. ***HN20***[] The calculation of an attorneys' award on a contingent fee basis in equitable fund cases has been resoundingly rejected. *Lindy II, 540 F.2d 102 at 119-20*; *Grinnell I, 495 F.2d at 470-71*. Determination of the amount of attorneys' fees to be subtracted from an equitable fund is a decision in equity in the nature of a proceeding in Quantum meruit, and it is not an action in contract for a percentage of the plaintiffs' recovery. Id. Petitioners appear to forget these principles when they urge in support of their $ 1,127,500 request that this aggregate fee "is substantially less than the customary contingent fee. . **[**85]** . . (and) is slightly less than ten percent of the principal amount of the settlement . . . ." Joint Application for Counsel Fees, at 10. The court will not review this request on a percentage basis of recovery, but only upon an evaluation of compensable benefit rendered **[*1386]** to the class of claimants. This sixth Johnson criterion is thus not pertinent to the instant review.

(7) Time limitations imposed by the client or circumstances. No deadlines were imposed by the class of claimants or by the factual circumstances of the action. The petitioners identified a procedural deadline, that settlement should be attempted before a class certification decision was rendered, in order to enhance their bargaining position. This deadline was one of strategy more than compulsion and did not constrain petitioners in the prosecution of the litigation.

(8) The amount involved and the results obtained. The settlement bargain, an $ 11.8 million fund in exchange for ten years of civil peace for the three codefendants, has been shown to be more than adequate in light of the risks of litigation. This generous amount was obtained early in the litigation, thus saving the expense and time **[**86]** of a prolonged antitrust debacle. The amount and speed with which it was obtained are to the credit of petitioners.

(9) The experience, reputation, and ability of the attorneys. The senior counsel of the lead and adjunct law firms have been distinguished members of the bar for many years. Their names appear repeatedly as counsel of record

---

[23.] On remand from *Grinnell I, 495 F.2d 448 (2d Cir. 1974)*, the district court allowed an hourly rate of $ 125 for Mr. David Berger. On appeal, the Second Circuit set this award aside on grounds that the hourly rate was excessive. *Grinnell II, 560 F.2d 1093, 1102 (2d Cir. 1977)*. In the instant litigation 22 attorneys have claimed hourly rates of $ 125 and above. Lead counsel seek the following: David Berger, $ 250/hour; David I. Shapiro, $ 200/hour; Harold E. Kohn, $ 250/hour; and John E. Burke, $ 110/hour.

[24.] The finding of a mixed hourly lead law firm rate of $ 80/hour is calculated by setting senior counsel rates at $ 125/hour, proportionally reducing junior and associate counsel fees, and calculating a weighted average.

[25.] The mixed hourly adjunct law firm rate of $ 65/hour derives from setting senior counsel rates at $ 100/hour and scaling down junior personnel fees accordingly. A weighted average hourly rate is then computed.

in the annals of multidistrict antitrust and securities litigation. It is likely that the defendants weighed petitioner's reputation and experience in the settlement fund calculus.

The acknowledged experience of counsel, however, is a two-edged sword. On the one side, it may account in part for the admirable speed and terms of settlement. On the other, it renders most pretrial matters in this litigation routine and it pretermits any excuses for the first ill-prepared and undocumented memorandum in support of the settlement.

(10) The "undesirability" of the case. The court noticed nothing undesirable in the representation of this class of claimants. On the contrary, the fact of sixteen different actions with twenty-two different law firms as counsel of record and with some actions listing as many as four law firms in representation, attests **[**87]** to the financial attractiveness of nationwide antitrust class actions.

(11) The nature and length of the professional relationship with the client. This Johnson criterion is not applicable to the class representation undertaken in this litigation. Most of the claimants have simply acquiesced pursuant to the class notice in the petitioners' prosecution of their interests. No client-counselor relationship has ever been established.

(12) Awards in similar cases. A strict comparison of total awards in other cases would not be meaningful herein. This litigation was settled earlier in the proceedings than any multidistrict antitrust action we have studied. While the Grinnell litigation lasted for ten years and the various Lindy actions struggled for six to eight years before settlement, the instant parties reached an agreement within months of the original filings and transfer to this court. Settlement was proposed in Barr v. WUI/TAS, Inc., (1976-1) Trade Cases (CCH) P 60,725 (S.D.N.Y.1976), within fourteen months of initiation of the antitrust actions, but as the court noted:

> unquestionably, plaintiffs' attorneys have struggled long and hard against the determined opposition **[**88]** of defense counsel.

at 68, 119. Comparisons of awards in those lengthy and hard-fought cases with what might be requested in this short-lived and undemanding litigation must be cautiously approached. Mindful of this caution, examples of final attorneys' fee award include: Grinnell $ 333,000.00; In re Penn Central Securities, $ 1,295,000.00; and Barr v. WUI/TAS, Inc., $ 78,500.

More meaningful than a comparison of total awards is a comparison of hourly rates. Based on a consideration of all twelve Johnson criteria, placing heavy reliance on the limited time, labor, and skill required in the beginning stages of this well-mapped litigation and on the generous result which counsel are credited with effecting, we hold to our finding of a reasonable mixed hourly rate for lead counsel law firms as $ 80 per hour and for adjunct law **[*1387]** firms as $ 65 per hour. Upon this scale, paralegals and law students will be reimbursed at $ 20 per hour. We draw no distinction between private firm and public employer rates for attorneys, paralegals, and law students. Cf. In re Sugar Industry Antitrust Litigation, slip op. at 31. The court must now proceed to assay what lawyering **[**89]** tasks are compensable and must determine whether augmentation of the attorneys' fees is suggested.

B. Compensable Hours

Some categories of work are not reimbursable on general principles of equitable fund recovery and other categories should not be recompensed under the circumstances of this litigation. These two classes of hours must be identified and subtracted from the petitioners' request.

Included in the first categories of nonreimbursable time are the hours counsel have spent in preparation of the fee petition. *Grinnell II, 560 F.2d at 1102*; *Lindy II, 540 F.2d 102 at 111*; *Computer Statistics, Inc. v. Blair, 418 F. Supp. 1339, 1350 (S.D.Tex.1976)*. The attorneys' efforts in preparation of the joint fee request neither created nor protected the settlement fund to the benefit of the class. This time was, if anything, antagonistic to the claimants' recovery and cannot be repaid under equitable fund theories.

Working hours identified in only vague and meaningless terms, such as "general," "miscellaneous," or "special services," should not be charged to an involuntary class of claimants. In re Sugar Industry Antitrust Litigation, slip.

op. at 28. Indefinite documentation might **[**90]** be acceptable in the understandings developed over years of extended lawyer-client relationships but may not be allowed under the equitable fund theory of this nationwide class action.

Similarly, time expended in client conferences reasonably benefited the individual named plaintiffs but could not greatly assist the passive members of the class. The court will allow a total of two hours consultation time per client to account for any generalized investigation which may have assisted the class. If several firms represented the same client and billed for client conference time the two hour maximum will be divided among them equally. If counsel are willing to detail their client conference time and to explain what benefits may have accrued to the class, the court will consider augmenting this category in individual cases. These details and explanations must be FILED with the court by May 1, 1979 to be considered.

Settlement administration hours will be reimbursed, but at a lower hourly rate. These hours were spent at more ministerial then legal tasks and should be compensated accordingly. "Such non-legal work may command a lesser rate. Its dollar value is not enhanced just because **[**91]** a lawyer does it." *Johnson v. Georgia Highway Express, Inc., 488 F.2d at 717*. The court will reimburse settlement administration hours at the rate of $ 50 per hour. See *In re Penn Central Securities Litigation, 416 F. Supp. at 922*.

Finally, in an attempt to adjust for the severe duplication of effort in this litigation, the court will limit the total number of hours claimed by the twenty law firms for preparation of pleadings and briefs and for court appearances. There is no reason or excuse for penalizing the class claimants for counsel's inefficiency. The complaints filed were simple parrotings of the criminal indictment; the early briefs were mere arguments against extensions of time. The proposed Settlement Order No. 1 was an adaptation of clerical and management procedures devised and employed in prior similar multidistrict actions. The briefs in support of settlement were, at first, "patently insufficient," Order entered September 20, 1978, and only on a second try, proved persuasive. The "court, using its own firsthand knowledge of the nature of these tasks, has reduced and/or apportioned duplicative time." In re Sugar Industry Antitrust Litigation, slip op. at 28. See **[**92]** *Johnson v. Georgia Highway Express, Inc., 488 F.2d at 717*. The court finds that the pleadings and briefs filed in this action in aid of the class reflect approximately 280 hours of attorney work. The four lead counsel firms **[*1388]** shall recover no more than 50 hours each and adjunct firms no more than 5 hours each for these filings.

In like manner, the court will reduce the totals of court appearance time claimed. We have spent no more than 6 hours in court in this litigation and have cause to wonder how some individual petitioners propose to bill in excess of 92 hours for this category of work. Joint Application for Counsel Fees, Exhibit G-17 and Supplement. The court will grant lead counsel some time for preparation for appearances in court and will allow each firm to be reimbursed for 20 hours. We will limit adjunct firms to 6 hours each for these appearances. [26.]

[93]** C. Augmentation of the Fee

Once a reasonable hourly rate has been established and a compensable number of hours identified, the attorneys' fee can be calculated. In special circumstances courts have augmented or multiplied the calculated fee when the risks of undertaking the litigation were great and the quality of work evinced was superior. *Wolf v. Frank, 555 F.2d at 1218*; *Lindy II, 540 F.2d 102 at 117*.

> Perhaps the foremost of these factors is the attorney's "risk of litigation," I. e., the fact that, despite the most vigorous and competent of efforts, success is never guaranteed. The greater the probability of success, of either ultimate victory on the merits or of settlement, the less this consideration should serve to amplify the basic hourly fee. The tangible factors which compromise the "risks of litigation" might be determined by asking the following questions: has a relevant government action been instituted or, perhaps, even successfully

26. The court may be overindulgent in allowing adjunct counsel who did not participate in the court proceedings to recover for this time. Counsel were more likely guarding their individual clients' interests than benefiting the class by attendance at these hearings. See In re Sugar Industry Antitrust Litigation, M.D.L. No. 201, slip op. at 28 and n.29 (N.D.Cal. May 10, 1978).

> concluded against the defendant; have related civil actions already been instituted by others; and are the issues novel and complex or straightforward and well worn?

Grinnell I, 495 F.2d at 471. Upon this analysis, no multiplier **[**94]** is suggested. The contours of this litigation were previously drawn by the Government's actions. Petitioners "could not have been in suspense for any appreciable length of time. . . ." Grinnell II, 560 F.2d at 1101, as settlement was reached with all three codefendants before the first pretrial conference. A notable risk of litigation, the obstacle to maintaining the action as a class action, was not felt, as the Court of Appeals did not announce Alabama v. Blue Bird Body Co., see Part III, supra, until after the settlement agreement was executed. No novel or complex issues were faced prior to settlement. The contingency factors which have justified a multiplier in other actions were absent from this litigation.

The second part of an augmentation consideration, that is, the exceptional quality of the work performed, is also lacking herein. Counsel will be duly rewarded for their experience, reputation, and ability in the mixed hourly rates that we have established. Enhancement of those rates is only authorized when the work is of a superior quality. Lindy II, 540 F.2d 102 at 118; Wolf v. Frank, 555 F.2d at 1218. As the court and, presumably, the class of claimants are still **[**95]** reeling from the grossly inadequate first attempt to support the settlement, we are not inclined to allow an extraordinary award. Upon both parts of the test, therefore, petitioners' request for a multiplier of their customary fees must be denied.

D. Expenses

The court will reimburse the out-of-pocket expenses of the petitioners from the settlement fund. The affidavits of expenses are sufficient for all but the travel, meals, and lodging requests. We find those claims to be excessive and will not authorize reimbursement without further documentation. As a premise the petitioners should **[*1389]** assume their class clients have agreed to pay modest to moderate travel and per diem costs when the trip served their beneficial interests. Petitioners should not expect to recover from their involuntary clients for unnecessary or extravagant travel and related expenses. Overstaffing at meetings, conferences, or court appearances will not be rewarded, See In re Sugar Industry Antitrust Litigation, slip op. at 28-29, lavish dining (E. g., $ 75 meal for one, Joint Application for Counsel Fees, Exhibit H-6) will not be underwritten. As time spent in conferences with individual clients **[**96]** has been reduced, so too will travel expenses to meet with these clients.

As documentation, the court will require a statement for each claimed trip of: when, where, why (E. g., meeting, conference, appearance), and with whom (with which attorneys from the same and from other law firms). The court will expect the submission: of copies of receipts for economy air fare, moderately-priced hotel rooms and meals; of statements of ground transportation costs; and of details of any related expenses. If counsel lacks the pertinent records, an explanation of their unavailability may be tendered along with an estimate of expenses for the court's review. All documented travel and attendant expenses incurred to date shall be FILED with the court on or before May 1, 1979 or they will be deemed abandoned.

E. The Petitioners' Award

The court has charted the requests, the reimbursable and nonreimbursable claims, and the presently payable expenses for the twenty petitioning law firms. The charts appear as the Appendix to this order. The petitioners' awards are summarized in the following table:

TABLE

[*1390] V. OUTSTANDING MATTERS

A. The Distribution Plan

Having approved the settlement **[**97]** and established the attorneys' fee award and partial expenses, the court may now schedule the sequence of distribution planning and presentation. Lead counsel shall FILE a plan for distribution of the settlement fund by May 8, 1979. The court will then review the plan and determine whether it is acceptable for submission to members of the class who filed claims against the fund. If deemed acceptable, the plan and notice of a hearing on distribution shall be mailed to all claimants by May 15, 1979. The notice shall announce that a hearing on the distribution plan is scheduled for 10:00 A.M., Monday, June 11, 1979, in the United States Courthouse, Room 324, 56 Forsyth Street, N.W., Atlanta, Georgia. The notice shall also state that anyone wishing to object to the proposed plan must file a written objection with the court by June 4, 1979 and must file a statement of an intent to appear at the hearing if the objector also wishes to present his arguments in person, by the same date.

B. The State of Maryland Civil Action

Because the court has approved the settlement of the sixteen civil actions, retention in this district of the seventeenth action, the recently transferred State of **[**98]** Maryland v. Brink's, Inc., C.A. No. 79-133, appears inadvisable. The convenience of the parties and witnesses and the interests of justice, See *28 U.S.C. § 1404(a)*, will be better served by retransfer of this seventeenth action to the site of original filing, the District of Maryland. Investigations of the alleged conspiracy's impact and damage will require discovery from state agency files and defendants' local branch offices. These and other pretrial matters can be better monitored in the home state, Maryland, than in this forum. Once settlement of the sixteen other actions was approved, most ties to this district were effectively broken and the reason for original transfer was lost. The court will RETRANSFER the State of Maryland action to the District of Maryland within ten (10) days of the date of this order. Any objections to retransfer must be filed within that period to be considered.

Accordingly, the court hereby: (1) APPROVES the settlement of In re Armored Car Antitrust Litigation, C.A. No. 78-139, and all the civil actions included therein with the exception of State of Maryland v. Brink's, Inc., C.A. No. 79-133; (2) DENIES the motion of the State of California to **[**99]** reopen discovery on the issue of damages; (3) DENIES the request of the State of California for a court-appointed expert; (4) GRANTS plaintiffs' counsel's application for attorneys' and paralegals' fees and for out-of-pocket expenses in the following amounts:

TABLE

[*1391] (5) ORDERS plaintiffs' counsel to file by May 1, 1979, the described documentation of any unrewarded client conference time and/or of any travel and related expenses; failure timely to file the ordered documentation will effectively waive these requests; (6) ORDERS lead counsel to file by May 8, 1979, a proposed plan of distribution of the settlement fund and a proposed notice to all claimants of the plan, hearing, and opportunity to file objections and statements of intended appearance; and (7) ORDERS RETRANSFER within ten (10) days of this date of State of Maryland v. Brink's, Inc., C.A. No. 79-133, to the District of Maryland, the district of original filing, subject to timely objection.

IT IS SO ORDERED, this 18th day of April, 1979.

HN1[] **Clayton Act, Jurisdiction**

Venue over corporate defendants in antitrust actions may be established under the special antitrust venue provisions contained in the Clayton Act, *15 U.S.C.S. §§ 15*, *22*, or under the general federal venue provisions, *28 U.S.C.S. § 1391*.

HN2[] Venue, Agents

The Clayton Act (Act), *15 U.S.C.S. §§ 15*, *22*, provides for venue in any district in which the defendant resides, is found, or has an agent. A corporation resides in a district only if it is incorporated or licensed to do business in the state in which the district lies, is actually doing business in that state, or has its principal place of business there. The Act permits venue in any district in which a corporation is an inhabitant, may be found, or transacts business. A corporation is said to be an inhabitant of the state of its incorporation. A corporation is found where it has presence and continuous local activities within the district.

HN3[] Clayton Act, Jurisdiction

The Clayton Act, *15 U.S.C.S. §§ 15*, *22*, permits a corporation to be sued in any district in which it "transacts business." This standard was enacted to enlarge the jurisdiction of the federal courts with respect to venue by substituting practical, business conceptions for the previous hair-splitting legal technicalities encrusted on the found present carrying-on-business sequence. "Transacting business" has a meaning independent of definitions which district courts have given the same phrase in construing other statutes. The test is whether the corporation is doing business in the district of any substantial character, even if its business is entirely interstate in character and is transacted by agents who do not reside within the district. Whether a defendant has transacted business is largely a factual question to be determined in each case. In making this determination, district courts look for tangible manifestations of doing business.

HN4[] Business & Corporate Law, Foreign Corporations

When a parent and its subsidiary are joined as defendants in an antitrust action, venue over the parent may be based on the local activities of its subsidiary if the relationship between the parent and the subsidiary is such that the subsidiary may be considered the agent or the alter ego of the parent. When the subsidiary maintains a separate legal identity, its presence in the district will not be sufficient to bring the foreign parent corporation within the ambit of the Clayton Act, *15 U.S.C.S. §§ 15*, *22*. Mere ownership of stock in a subsidiary corporation transacting business in a district does not establish venue against the parent corporation. In order for the parent corporation to be amenable to suit, it must exercise a control relationship over its subsidiary. This concept of control is a method of determining whether the ownership of the subsidiary is a mere investment or is an alternative means of transacting business by the parent corporation.

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > Preliminary Considerations > Venue > Corporations

HN5[] Antitrust & Trade Law, Clayton Act

The essential element required before a district court can find that one corporate entity was transacting business through an alter ego is control over the conduct that allegedly violated the antitrust laws.

Admiralty & Maritime Law > ... > Jones Act > Procedural Matters > Venue

Antitrust & Trade Law > Clayton Act > Jurisdiction

Civil Procedure > Preliminary Considerations > Venue > Corporations

Antitrust & Trade Law > Clayton Act > General Overview

Civil Procedure > Preliminary Considerations > Venue > General Overview

Civil Procedure > Preliminary Considerations > Venue > Individual Defendants

Civil Procedure > Preliminary Considerations > Venue > Special Venue

HN6[] Procedural Matters, Venue

A method of establishing venue in antitrust actions is under *28 U.S.C.S. § 1391* of the general federal venue statutes. *28 U.S.C.S. § 1391(b)* is an important section for private antitrust plaintiffs because it allows them to establish venue in the judicial district in which the claim arose, a choice of venue not afforded under the venue provisions of the Clayton Act, *15 U.S.C.S. § 15*. In determining whether a particular jurisdiction is actually the district in which the claim arose, it is necessary to consider whether the parties had a significant relationship to the district. This depends upon the occurrence in the district of events such as sales, injury, conspiratorial meetings, or overt acts pursuant to such meetings. (These provisions are available absent contrary statutory restrictions.) In making this determination, a "weight of contacts" test should be used. This requirement can be satisfied if significant sales causing substantial injury to plaintiffs occurred in the district or if some other overt act took place that was a "significant and substantial" element of the offense.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Governments > Public Improvements > General Overview

Real Property Law > Subdivisions > State Regulations

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

HN7[] **Exemptions & Immunities, Parker State Action Doctrine**

Municipalities, like other state instrumentalities, are not exempt from application of the antitrust laws simply by virtue of their status as governmental entities. The Parker doctrine exempts only anticompetitive conduct engaged in as an act of government by the state as sovereign, or, by its subdivisions, pursuant to state policy to displace competition with regulation or monopoly public service.

Antitrust & Trade Law > Sherman Act > Scope > Exemptions

Governments > Federal Government > US Congress

Antitrust & Trade Law > Exemptions & Immunities > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

HN8[] **Scope, Exemptions**

There is a two-fold inquiry that must guide the district court in applying the Parker doctrine. The first consideration is whether the state, acting as sovereign, has required its agency or instrumentality to engage in the particular form of anticompetitive conduct. This is not to suggest that the Parker doctrine permits each state legislature to determine the extent to which a particular government agency under its control should be exempt from the antitrust laws. A state does not give immunity to those who violate the Sherman Act by authorizing them to violate it, or by declaring that their action is lawful. In a dual system of government in which, under the constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress.

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > Scope

Governments > Local Governments > Claims By & Against

Antitrust & Trade Law > Exemptions & Immunities > Parker State Action Doctrine > General Overview

Governments > State & Territorial Governments > General Overview

HN9[] **Exemptions & Immunities, Parker State Action Doctrine**

In order for Parker to apply, it is not necessary for a state legislature to direct its instrumentality to perform a specific anticompetitive act. The threshold requirement for Parker immunity is satisfied if the legislature directs its instrumentality to engage in a particular type of activity. While a subordinate governmental unit's claim to Parker immunity is not as readily established as the same claim by a state government sued as such, an adequate state mandate for anticompetitive activities of cities and other subordinate governmental units exists when it is found from the authority given a governmental entity to operate in a particular area, that the legislature contemplated the kind of action complained of.

Antitrust & Trade Law > Sherman Act > General Overview

International Law > Authority to Regulate > Anticompetitive Activities

HN10[] **Antitrust & Trade Law, Sherman Act**

Sections 1 and *2* of the Sherman Act are applicable only to "trade or commerce among the several states." 15 U.S.C.S. § 1-2. *Section 3* of the Sherman Act applies to contracts, combinations, or conspiracies in restraint of trade or commerce in any territory of the United States or of the District of Columbia, or in restraint of trade or commerce between any such territory and another, or between any such territory or territories and any state or states or the District of Columbia, or with foreign nations, or between the District of Columbia and any state or states or foreign nations. *15 U.S.C.S. § 3*.

Antitrust & Trade Law > Sherman Act > General Overview

HN11[] **Antitrust & Trade Law, Sherman Act**

It is not enough that anticompetitive conduct is prompted by state action; rather, anticompetitive activities must be compelled by direction of the state acting as a sovereign.

Opinion

[*713] MEMORANDUM

This is an action to recover treble damages for alleged violations of *sections 1*, *2*, and *3* of the Sherman Antitrust Act. [1.] The basis of the complaint is an alleged conspiracy by twelve private and governmental entities to create a monopoly in ocean transportation between the East Coast and Gulf ports of the United States and the ports of Puerto Rico. Presently before the Court are the motions of ten defendants to dismiss the complaint on grounds of improper venue and lack of personal jurisdiction, and the motions of nine defendants for summary judgment on the ground that their conduct is immunized from antitrust liability under the state action doctrine recognized in *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. For the reasons discussed below, the **[**2]** Court concludes that defendants' motions should be granted.

---

1. *15 U.S.C. §§ 1-3 (1976)*.

FACTUAL BACKGROUND

Plaintiff Caribe Trailer Systems, Inc. ("Caribe") is a Puerto Rico corporation with its principal place of business in Washington, D. C. Plaintiff John R. Immer is the principal owner and chairman of the board of Caribe. Caribe was organized for the purpose of engaging in ocean transportation between East Coast and Gulf ports of the continental United States and the ports of Puerto Rico, but its activities never became operational. Plaintiffs contend that because of defendants' alleged antitrust violations, plaintiffs were unable to obtain financing to commence their operations and therefore were prevented from competing in the Puerto Rico trade. They seek a permanent injunction against defendants' activities as well as treble damages, costs, and attorneys fees.

Each defendant named in this lawsuit had some involvement in the creation or operation of the Puerto Rico Maritime Shipping Authority ("PRMSA"), **[**3]** a government agency organized by the Commonwealth of Puerto Rico in 1974 to operate Puerto Rico's maritime transportation system. Because of its small size, insular position, and limited natural resources, Puerto Rico has difficulty in maintaining a self-sufficient economy and is dependent on external trade for **[*714]** economic and social development. Ocean transportation carries more than ninety-eight percent of its external trade and as a result, ocean freight costs exert a potentially disruptive influence of all aspects of Puerto Rico's economy. Trade between East Coast and Gulf ports represents the major avenue of traffic between Puerto Rico and the mainland United States and accounts for approximately eighty-five percent of all dry cargo transported and over seventy percent of Puerto Rico's total external trade.

Because of the island's dependence on ocean transport, the Governor of Puerto Rico in 1973 established a commission to determine whether the Commonwealth should take steps to acquire the vessels then employed by commercial steamship companies in the Puerto Rico trade. This acquisition was intended to assure the availability of vessels and to maintain price stability **[**4]** with respect to transportation costs. Following negotiations with the three major carriers, the commission proposed legislation that would establish a nonstock public corporation to own or lease the vessels and equipment necessary to conduct the Mainland-Puerto Rico trade. On June 10, 1974, the Commonwealth legislature enacted this proposal as Act 62 and created the Puerto Rico Maritime Shipping Authority as a governmental instrumentality to operate Puerto Rico's maritime transportation system. [2.]

PRMSA, which is incorporated in Puerto Rico, consists of a governing board of seven members, all of whom are residents of Puerto Rico, appointed by the Governor with the advice and consent of the Puerto Rico Senate. Its operations are exempt from taxation and from all fees required for the prosecution of judicial proceedings. The Statement of Motives contained **[**5]** in Act 62 expresses the intent of the Puerto Rico legislature that PRMSA acquire and operate shipping lines and terminal facilities as a public service and, in doing so, that it not be subject to the antitrust laws or any other limitations that would hinder its legislative goal. [3.]

Following its organization, PRMSA acquired the rights to eleven ships and to various marine transportation facilities from the three major carriers that served the Puerto Rico trade: Seatrain, Inc., [4.] and defendants Sea-Land Service, Inc. ("Sea-Land"), and Transamerican Trailer Transport, Inc. ("TTT"). The acquisition of these assets occurred in the following manner. Defendant American Union Transport, Inc. ("AUT"), a 63.3% Shareholder in TTT, and defendant Sun Shipbuilding & Dry Dock Co. ("Sun Ship"), a 30% Shareholder, directly conveyed their interests in TTT to PRMSA. TTT has since become a dormant **[**6]** corporation because PRMSA operates its assets under PRMSA's own name and its officers and directors are the same as PRMSA's.

The vessels owned by Sea-Land were transferred through a similar transaction. Sea-Land and Gulf-Puerto Rico Lines ("GPRL") are both wholly owned subsidiaries of defendant McLean Industries, Inc. ("McLean"). McLean is a holding company which in turn is wholly owned by defendant R. J. Reynolds Industries ("Reynolds"). McLean and Reynolds conveyed their interests in Sea-Land to PRMSA.

---

2. Act of Puerto Rico Maritime Shipping Authority, Act No. 62 (June 10, 1974), See Exh. A in Appendix to Puerto Rico Defendants' Motion to Dismiss the Complaint.

3. Id. See also Affidavit of Roberto Jugo D'Acosta in support of Puerto Rico Defendants' Motion to Dismiss the Complaint, at P 2.

4. Seatrain is not named as a defendant to this action.

Before these transfers were effected, the Commonwealth of Puerto Rico sought a business review letter from the Antitrust Division of the Department of Justice with respect to PRMSA and the proposed acquisition. [5.] **[**7]** Although the acquisition would give PRMSA control over ninety percent of then-existing ocean shipping services, the **[*715]** Antitrust Division granted favorable clearance on July 22, 1974. [6.]

PRMSA has an ongoing contractual relationship with defendant Puerto Rico Marine Management, Inc. ("PRMMI"), a Delaware corporation that provides operational direction for PRMSA's vessels and is responsible for manning, husbanding, docking, loading and unloading, and booking and soliciting cargo. PRMMI is paid a management fee for these services. PRMMI was organized in 1974 as a wholly owned subsidiary of McLean. On January 15, 1976, McLean entered into a stock purchase agreement with defendant TKM Corporation (TKM) under which TKM acquired all the stock of PRMMI. Defendant Trans Ocean Transportation Executive Management, Inc. ("TOTEM") also has managed cargo vessels on behalf of PRMSA.

The final defendant named in this action is the Puerto Rico Ports Authority ("PRPA"), an agency of the Puerto Rico government with broad responsibility for maritime matters. [7.] One of the major functions of the PRPA is to supervise the port of San Juan, the second largest containership port in the **[**8]** world, by assigning vessels to suitable berths, entering into terminal leases with steamship operators, and managing dock facilities. A director of PRPA headed the commission that recommended creation of PRMSA.

On March 13, 1978, plaintiffs instituted the present lawsuit, charging each of the twelve defendants with conspiracy, monopoly, and restraint of trade in violation of *sections 1*, *2*, and *3* of the Sherman Antitrust Act, *15 U.S.C. §§ 1-3*. Specifically, plaintiffs allege that defendants secretly discussed and determined that maritime transportation between Puerto Rico and the mainland should be operated as a monopoly and devised a plan **[**9]** for achieving this goal, which included formation of PRMSA. [8.]

Presently before the Court are motions to dismiss for improper venue and lack of personal jurisdiction filed by defendants, Reynolds, McLean, GPRL, PRMSA, PRPA, TTT, PRMMI, TKM, AUT, and TOTEM. All defendants with the exception of Reynolds, McLean, and GPRL have joined in a motion to dismiss, or in the alternative for summary judgment [9.] originally filed by PRMSA, PRPA, and TTT (the "Puerto Rico defendants"). The governmental entities seek dismissal on the ground that their actions were immune from liability for antitrust violations under the Parker doctrine. The private defendants have moved to dismiss on the ground that their actions were compelled by the Commonwealth of Puerto Rico and therefore also exempt from liability under Parker.

[10]** VENUE

Although this complaint alleges that the defendants have engaged in a "combination and conspiracy" in violation of the Sherman Act, plaintiffs must establish venue as to each defendant separately. 15 Wright, Miller & Cooper, Federal Practice & Procedure § 3818, at 116 (1969); See *Philadelphia Housing Authority v. American Radiator & Standard Sanitary Corp., 291 F. Supp. 252, 262 (C.D.Pa.1968)*. In the present case, plaintiffs attempt to establish venue in the District of Columbia on the alternative grounds that defendants transacted business in this district and that the cause of action arose in this district.

---

5. Motion of Defendant Sun Shipbuilding & Dry Dock Co. to Dismiss Complaint, Exh. B.

6. Id., Exh. C, Letter of Thomas E. Kauper, Assistant Attorney General, Antitrust Division, Department of Justice.

7. PRPA was created by an act of the Puerto Rico Legislature on May 7, 1942. ***P.R.Laws Ann. tit. 23, §§ 331 Et seq.*** (1955). Its purpose, as set out in its enabling statute, is ". . . to develop and improve, own, operate, and manage any and all types of transportation facilities and air and marine services in, to, and from the Commonwealth of Puerto Rico . . .." Id. § 336.

8. See More Definite Statement of Paragraph 22 of Plaintiffs' Complaint.

9. Because the motions to dismiss are supported by affidavits and other exhibits, the Court will treat them as motions for summary judgment under *Fed.R.Civ.P. 56*.

HN1[] Venue over corporate defendants in antitrust actions may be established under the special antitrust venue provisions contained **[*716]** in sections 4 and 12 of the Clayton Act [10.] or under the general federal venue provisions. [11.] Each of the moving defendants claims that none of the bases for venue contained in these statutes are satisfied in the present case.

[11]** *HN2*[]

Section 4 provides for venue in any district in which the defendant resides, is found, or has an agent. A corporation resides in a district only if it is incorporated or licensed to do business in the state in which the district lies, is actually doing business in that state, or has its principal place of business there. 14 Von Kalinowski, Antitrust Laws and Trade Reg. § 104.04(4) (1978). The affidavits submitted by the moving defendants in support of their motions to dismiss establish that none of these defendants are incorporated or licensed to do business in the District of Columbia, nor do they directly conduct business or have their principal place of business here.

Section 12 permits venue in any district in which a corporation is an inhabitant, may be found, or transacts business. A corporation is said to be an inhabitant of the state of its incorporation. *Aro Mfg. Co. v. Automobile Body Research Corp., 352 F.2d 400, 404 (1st Cir. 1965)*, Cert. denied, *383 U.S. 947, 86 S. Ct. 1199, 16 L. Ed. 2d 210 (1966)*. A corporation is found where it has "presence and "continuous local activities' within the district." *Fox-Keller, Inc. v. Toyota Motor Sales, U.S.A., Inc., 338 F. Supp.* ***[**12]*** *812, 815 (E.D.Pa.1972)*. The moving defendants do not satisfy either of these requirements.

HN3[] Section 12 also permits a corporation to be sued in any district in which it "transacts business." This standard was enacted to enlarge the jurisdiction of the federal courts with respect to venue by substituting "practical, business conceptions for the previous hair-splitting legal technicalities encrusted on the "found' "present' "carrying-on-business' sequence . . .." *United States v. Scophony Corp., 333 U.S. 795, 808, 68 S. Ct. 855, 862, 92 L. Ed. 1091 (1948)*. "Transacting business" for the purpose of section 12 has a meaning independent of definitions which courts have given the same phrase in construing other statutes. The test is whether the corporation is doing business in the district of any substantial character, even if its business is entirely interstate in character and is transacted by agents who do not reside within the district. *Id. at 807, 68 S. Ct. 855*; *Eastman Kodak Co. v. Southern Photo Materials Co., 273 U.S. 359, 372-73, 47 S. Ct. 400, 71 L. Ed. 684 (1927)*.

Whether a defendant has transacted business is largely a factual question to be determined in each case. In making **[**13]** this determination, courts look for tangible manifestations of doing business. [12.] **[**14]** Such manifestations are absent here. None of the moving parties has officers, employees, or agents within the district. [13.] None has offices or owns property here, nor do they maintain corporate records, telephones, telephone listings, or

---

10. *15 U.S.C. §§ 15*, *22 (1976)*.

11. *28 U.S.C. § 1391 (1976)*.

12. E.g., *Brandt v. Renfield Importers, Ltd., 278 F.2d 904, 909-11 (8th Cir.)*, Cert. denied, ***364 U.S. 911, 81 S. Ct. 274, 5 L. Ed. 2d 226 (1960)*** (being subject to state regulation, licensing, or taxes constitutes doing business); *Frey & Son v. Cudahy Packing Co., 228 F. 209, 212-13 (D.Md.1915)* (maintaining tangible property within the state, such as real estate, inventory, bank accounts, or corporate records constitutes doing business); *Magnetic Eng'r & Mfg. Co. v. Dings Magnetic Separator Co., 86 F. Supp. 13, 16 (S.D.N.Y.1949)*, *Modified, 178 F.2d 866 (2d Cir. 1950)* (employing persons within the district constitutes doing business).

13. Plaintiffs argue that various defendants retained economic and marine consultants, attorneys, and law firms in Washington, who assisted in the creation of PRMSA. The Court concludes that these independent contractors were not employees or agents for venue purposes and contracting for legal and economic consultation services does not constitute "transacting business" in a jurisdiction. *Control Data Corp. v. Carolina Power & Light Co., 274 F. Supp. 336 (S.D.N.Y.1967)* (North Carolina corporation's engaging engineering and technical consultants in New York, negotiating with investment houses, and retaining legal counsel did not constitute "doing business").

bank accounts. Plaintiffs' complaint does not suggest any other **[*717]** activity of a similar nature that might bring defendants within the transacting business standard.

Some courts have held that a corporation may be found to be transacting business for venue purposes in the district in which coconspirators were found and where the conspiracy had its impact. [14.] In Giusti v. Pyrotechnic Industries, Inc., [15.] the United States Court of Appeals for the Ninth Circuit held that because all conspirators are agents for each other, the presence of one defendant in a district can subject his coconspirators to suit **[**15]** in that district as their agent. This theory, however, has been rejected by other courts [16.] and this Court concludes that its application here would be contrary to the principle that venue must be established for each defendant separately. See 15 Wright, Miller & Cooper, Federal Practice and Procedure § 3818.

[16]** With respect to defendants Reynolds, McLean, and GPRL, plaintiffs do not contend that these entities directly transact business in this district but instead argue that venue is properly laid against them here because of their relationship with defendant Sea-Land. There is no dispute that venue exists in the District of Columbia for Sea-Land because it is licensed to do business here. Sea-Land and GPRL are wholly owned subsidiaries of McLean, a holding company, which in turn is wholly owned by Reynolds. Plaintiffs allege that the management and business operations of these four defendants are so commingled and integrated that venue laid against Sea-Land lies against the moving defendants. In support of this argument, plaintiffs have attempted to detail the various degrees of participation by Reynolds, Sea-Land, McLean, and GPRL in the sale of Sea-Land's assets to PRMSA. [17.]

[17]** ***HN4***[]

When a parent and its subsidiary are joined as defendants in an antitrust action, venue over the parent may be based on the local activities of its subsidiary "if the relationship between the parent and the subsidiary is such that the subsidiary may be considered the agent or the alter ego of the parent." Audio Warehouse Sales, Inc. v. U.S. Pioneer Electronics Corp., 1975-1 Trade Cas. P 60,213 (D.D.C.1975). Generally when the subsidiary maintains a separate legal identity, its presence in the district will not be sufficient to bring the foreign parent corporation within the ambit of section 12. *Phillip Gall & Son v. Garcia Corp., 340 F. Supp. 1255, 1259 (E.D.Ky.1972)*.

It is also generally accepted that mere ownership of stock in a subsidiary corporation transacting business in a district does not establish venue against the parent corporation. See, e.g., *O. S. C. Corp. v. Toshiba America, Inc., 491 F.2d 1064, 1066 (9th Cir. 1974)*. In order for the parent corporation to be amenable to suit, it must exercise a control relationship over its subsidiary. See *Tiger Trash v. Browning-Ferris Indus., Inc., 560 F.2d 818, 822 (7th Cir. 1977)*, Cert. denied, *434 U.S. 1034, 98 S. Ct. 768, 54 L.* ***[**18]*** *Ed. 2d 782 (1978)*. This concept of control is a method of determining whether the ownership of the subsidiary is a mere investment or is an alternative **[*718]** means of transacting business by the parent corporation. [18.]

Atlantic Coast Football League, 359 F. Supp. 666, 672 (S.D.Ind.)*, Aff'd mem., ***478 F.2d 1405 (7th Cir. 1973)***; *Occidental Petroleum Corp. v. Buttes Gas & Oil Corp., 331 F. Supp. 92, 96-97 (C.D.Cal.1971)*, Aff'd per curiam, ***461 F.2d 1261 (9th Cir.)***, Cert. denied, ***409 U.S. 950, 93 S. Ct. 272, 34 L. Ed. 2d 221 (1972)***. See also *Bankers Life & Cas. Co. v. Holland, 346 U.S. 379, 384, 74 S. Ct. 145, 98 L. Ed. 106 (1953)*.

17. See Plaintiffs' Opposition to Motion to Dismiss Complaint filed by R. J. Reynolds Indus., Inc., McLean Indus., Inc., and Gulf Puerto Rico Lines, Inc., at 4-7 and Exh. A-B.

18. See *Hitt v. Nissan Motor Co., 399 F. Supp. 838, 841 (S.D.Fla.1975)* (100% Ownership by parent, exchange of officers and employees, and common directors supported finding that parent controlled subsidiary for venue purposes).

Plaintiffs here have alleged that Reynolds, McLean, Sea-Land and GPRL represent an integrated and interlocked management scheme so that the three moving defendants were transacting business in this jurisdiction through their relationship with Sea-Land. Applying the principles discussed above to the facts of this case makes it clear that the transacting business requirement is not satisfied. ***HN5***[] The essential element required before a court can find that one corporate entity was transacting business through an alter ego is control over the conduct that allegedly violated **[**19]** the antitrust laws. *Call Carl, Inc. v. B. P. Oil Corp., 391 F. Supp. 367, 371 (D.Md.1975)*; See *Grappone, Inc. v. Subaru of America, Inc., 403 F. Supp. 123, 131 (S.D.N.Y.1975)*. With respect to GPRL, which along with Sea-Land is a cosubsidiary of McLean, there has been not even a suggestion of how GPRL could exercise the required control relationship.

Even though Sea-Land is a wholly owned subsidiary of McLean, which is owned by Reynolds, the separate identities of the subsidiaries are maintained and the evidence indicates that each carries on its activities without having daily business affairs controlled by the parent. See *In re Chicken Antitrust Litigation, 407 F. Supp. 1285 (N.D.Ga.1975)*. There has been no evidence that the parent exerted the required degree of control over its subsidiary or was involved directly in its operations and policy decisions. See Dobbins v. Kawasaki Motors Corp., 1974-1 Trade Cas. P 75,100 (D.Or.1974). Although there is some interlocking management between the three entities, [19.] the Court concludes that the control relationship is absent and venue over GPRL, McLean, and Reynolds cannot be predicated on the existence of venue in this jurisdiction over **[**20]** Sea-Land.

The final ***HN6***[] method of establishing venue in antitrust actions is under *section 1391* of the general federal venue statutes. *Section 1391(b)* is an important section for private antitrust plaintiffs because it allows them to establish venue in the judicial district in which the claim arose, a choice of venue not afforded under the venue provisions of the Clayton Act. [20.] In determining whether a particular jurisdiction is actually the district in which the claim arose, it is necessary to consider whether the parties had a significant relationship to the district. This depends **[**21]** upon the occurrence in the district of events such as "sales, injury, conspiratorial meetings, (or) overt acts pursuant to such meetings." *Philadelphia Housing Authority v. American Radiator & Standard Sanitary Corp., 309 F. Supp. 1053, 1056 (E.D.Pa.1969)*.

In making this determination, a "weight of contacts" test should be used. 14 Von Kalinowski, Antitrust Laws & Trade Reg. § 104.04(2) (1978). This requirement can be satisfied, for example, if significant sales causing substantial injury to plaintiffs occurred in the district or **[**22]** if some other overt act took place that was a "significant and substantial" element of the offense. *Philadelphia Housing Authority v. American Radiator & Standard Sanitary Corp., 291 F. Supp. 252, 261 (E.D.Pa.1968)*.

[*719] Plaintiffs attempt to satisfy the weight of contacts test by alleging that a number of conspiratorial meetings took place in the District of Columbia and that certain legal documents relating to the sale of assets to PRMSA were drafted here. [21.] Some courts have held that conspiratorial meetings may be sufficient to establish venue under *section 1391* as to each defendant who was present there. See *Ohio-Sealy Mattress Mfg. Co. v. Kaplan, 429 F.*

[19.] For example, Malcolm McLean, the president of McLean, also serves as Chairman of the Board of Sea-Land and as a member of the Board of Directors of Sea-Land. Stock ownership and interlocking directorates, however, have been found insufficient to establish venue under the transacting business standard when control over daily business activities is lacking. See *Hayashi v. Sunshine Garden Prod., Inc., 285 F. Supp. 632 (D.Wash.1967)*.

[20.] Although there has been some judicial uncertainty whether the general federal venue statute expands special venue provisions, it is now generally recognized that these provisions are available absent contrary statutory restrictions. See *Pure Oil Co. v. Suarez, 384 U.S. 202, 207, 86 S. Ct. 1394, 16 L. Ed. 2d 474 (1966)* (Jones Act venue provision expanded by later general venue statute *28 U.S.C. § 1391* so that corporation may also be sued in district where it does business).

[21.] See affidavit of John R. Immer, Exh. C to Plaintiffs' Opposition to Defendant's Motion to Dismiss or, in the Alternative, for Summary Judgment. Plaintiffs also describe meetings and other contacts between various defendants and the Federal Maritime Commission but such governmental contacts by federally regulated industries do not constitute "transacting business" in the *District of Columbia. Fandel v. Arabian American Oil Co., 120 U.S.App.D.C. 193, 345 F.2d 87 (1965)*.

Supp. 139 (N.D.Ill.1977). Before such a rule can be applied, however, it is necessary to find that such meetings took place, that they involved a violation or an attempted violation of the antitrust laws, and that each of the moving defendants participated in them. *ABC Great States, Inc. v. Globe Ticket Co., 310 F. Supp. 739, 743 (N.D.Ill.1970)*.

[23]** Such findings cannot be made here. Although some defendants met with counsel in this jurisdiction and had other contacts here, the Court concludes that such meetings, even if viewed in the light most favorable to plaintiffs, did not represent a violation or attempted violation of the antitrust laws. To the extent that such meetings sought to achieve the passage of Act 62, they were exempted from antitrust liability under the Noerr-Pennington doctrine. [22.] To the extent they were related to the sale of assets to PRMSA, the state action exemption discussed below would preclude liability.

As a final argument, plaintiffs urge that their claim arose within the meaning of *section 1391* because they suffered financial injury in this jurisdiction. At least one court has rejected the weight **[**24]** of the contacts test and held that venue can be established under *section 1391* in the judicial district in which the injured plaintiff operated. *Iranian Shipping Lines, S. A. v. Moraites, 377 F. Supp. 644 (S.D.N.Y.1974)*; *Albert Levine Assoc. v. Bertoni & Cotti, S.P.A., 314 F. Supp. 169 (S.D.N.Y.1970)*.

To hold that a cause of action necessarily arose in the district in which the plaintiff was injured is a "simplistic rationale to which antitrust actions are not susceptible." *Redmond v. Atlantic Coast Football League, 359 F. Supp. 666, 669 (S.D.Ind.)*, Aff'd mem., *478 F.2d 1405 (7th Cir. 1973)*. The Court agrees with this conclusion and holds that plaintiff's allegations of injury in this district will not support a finding of venue here. To hold otherwise would be tantamount to extending venue under *section 1391* to any district in which the plaintiff resides, a result clearly not contemplated by the rules. *Philadelphia Housing Authority v. American Radiator & Standard Sanitary Corp., 291 F. Supp. 252, 260 (E.D.Pa.1968)*.

After careful review of the facts of this case, the Court concludes that, despite their vigorous efforts, plaintiffs have failed to establish that venue exists in this **[**25]** jurisdiction over defendants Reynolds, McLean, and GPRL. Although venue is also probably deficient with respect to the other moving defendants, in the interests of judicial economy and achieving a resolution on the merits, the Court will not address these motions but will instead consider the alternative motions for summary judgment based on the state action exemption to the antitrust laws.

STATE ACTION EXEMPTION

The governmental and remaining private defendants have moved for summary judgment [23.] on the ground that the conduct at **[*720]** issue in this lawsuit is immune from liability under the state action exemption to the antitrust laws. Because the immunity of private parties derives from a determination that the conduct of the state entities is so immunized, it is first necessary to consider the applicability of the state action exemption to Puerto Rico defendants.

[26]** The principle that state action is beyond the scope of federal antitrust laws stems from the decision of the *Supreme Court in Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*. In Parker the Court rejected a producer's claim that a state agricultural marketing program established pursuant to statute violated the Sherman Act. Noting that the state had adopted the program to restrict competition and maintain prices, the Court held that Congress intended the Sherman Act to restrain private anticompetitive conduct and not actions taken by a state or its agencies in furtherance of a legislative mandate. There is no dispute that Puerto Rico is a state for purposes of applying the Parker doctrine. *International Tel. & Tel. Corp. v. General Tel. & Elec. Corp., 351 F. Supp. 1153, 1229 (D.Hawaii 1972)*, Mod. on other grounds, *518 F.2d 913 (9th Cir. 1975)*.

[22.] *Eastern R. R. Presidents Conference v. Noerr Motor Freight, 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*; *United Mine Workers v. Pennington, 381 U.S. 657, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*; See page 725 infra.

[23.] Defendant Sea-Land has moved for partial summary judgment on any issues of antitrust liability arising out of its sale of certain operational assets to PRMSA.

Defendants argue that the actions of a state instrumentality mandated by clear legislative authority are immune from antitrust liability under Parker. [24.] They note that in this case the Puerto Rico legislature specifically mandated its instrumentality, PRMSA, to take over and operate the shipping trade between the East Coast **[**27]** and Gulf ports of the United States and Puerto Rico. PRMSA carried out the mandate by acquiring and operating ships in this trade, and defendants argue that as a result, the PRMSA acquisition and operation of the steamships are immune from antitrust liability.

A. State Instrumentalities.

After a long period of silence, the Supreme Court in recent years has given renewed attention to the scope of the Parker doctrine **[**28]** [25.] **[**29]** and its decisions have been the subject of extensive legal commentary. [26.] The most recent case involving the doctrine is *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)*, in which the Court held municipalities could not invoke the Parker doctrine in a suit for antitrust violations allegedly committed by them in connection with ownership of public utilities.

In refusing to find antitrust immunity, a plurality of the Court held that ***HN7***[] municipalities, like other state instrumentalities, are not exempt from application of the antitrust laws simply by virtue of their status as governmental entities. *Id. at 413, 98 S. Ct. 1123, 1137*. The plurality stated: "We therefore conclude that the Parker doctrine **[*721]** exempts only anticompetitive conduct engaged in as an act of government by the State as sovereign, or, by its subdivisions, pursuant to state policy to displace competition with regulation or monopoly public service." Id. [27.]

[30]** City of Lafayette thus establishes ***HN8***[] a two-fold inquiry that must guide the Court in applying the Parker doctrine. The first consideration is whether the state, acting as sovereign, has required its agency or instrumentality to engage in the particular form of anticompetitive conduct. This is not to suggest that the Parker doctrine permits each state legislature to determine the extent to which a particular government agency under its control should be exempt from the antitrust laws. As the Court in Parker indicated, "a state does not give immunity to those who violate the Sherman Act by authorizing them to violate it, or by declaring that their action is lawful." *317 U.S. at 351, 63 S. Ct. at 314*. The decision did recognize, however, the overriding policy of federalism, namely, that "(i)n a dual system of government in which, under the Constitution, the states are sovereign, save only as

---

[24.] The terms "state action exemption" and "antitrust immunity" are frequently used to refer to the Parker doctrine, but these terms are less than accurate in view of the Supreme Court's statement that "(t)he Sherman Act makes no mention of the state as such, and gives no hint that it was intended to restrain state action." *317 U.S. at 351, 63 S. Ct. at 313*, See *Kurek v. Pleasure Driveway & Park Dist., 557 F.2d 580, 587 n.5 (7th Cir. 1977)* (Sherman Act was not intended to apply to state-mandated activities but courts nonetheless utilize single-word shorthand references of "exemption" or "immunity").

[25.] See *City of Lafayette v. Louisiana Power & Light Co., 435 U.S. 389, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978)*; *Bates v. State Bar of Arizona, 433 U.S. 350, 97 S. Ct. 2691, 53 L. Ed. 2d 810 (1977)*; *Cantor v. Detroit Edison Co., 428 U.S. 579, 96 S. Ct. 3110, 49 L. Ed. 2d 1141 (1976)*; *Goldfarb v. Virginia State Bar, 421 U.S. 773, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975)*. Prior to these decisions there had been a 32-year period in which the Supreme Court consistently declined to review cases involving the Parker doctrine. See, e.g., *George R. Whitten, Jr., Inc. v. Paddock Pool Builders, Inc., 424 F.2d 25 (1st Cir.)*, Cert. denied, *400 U.S. 850, 91 S. Ct. 54, 27 L. Ed. 2d 88 (1970)*; *E. W. Wiggins Airways, Inc. v. Massachusetts Port Auth., 362 F.2d 52 (1st Cir.)*, Cert. denied, *385 U.S. 947, 87 S. Ct. 320, 17 L. Ed. 2d 226 (1966)*.

[26.] E.g., Handler, The Current Attack on the Parker v. Brown State Action Doctrine, 76 Colum.L.Rev. 1 (1976); Kennedy, Of Lawyers, Lightbulbs, and Raisins: An Analysis of the State Doctrine under the Antitrust Laws, 74 Nw.U.L.Rev. 31 (1979); Verkuil, State Action Doctrine, Due Process and Antitrust: Reflections on Parker v. Brown, 75 Colum.L.Rev. 328 (1975); Note, Anti-Trust Law and Municipal Corporations, 65 Geo.L.J. 1547 (1977).

[27.] Chief Justice Burger, who provided the fifth vote for affirmance of the Fifth Circuit's decision in City of Lafayette, did not join in this portion of the opinion but his concurrence indicates that he regarded the plurality's approach as the minimum to be required of a state instrumentality, which he felt should demonstrate that it is acting in a proprietary capacity before it is allowed the protection of *Parker. 435 U.S. at 418, 98 S. Ct. 1123* (Burger, C. J., concurring); See *Star Lines Ltd. v. Puerto Rico Maritime Shipping Authority, 451 F. Supp. 157, 165 (S.D.N.Y.1978)*.

Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress." Id.

HN9[] In order for Parker to apply, it is not necessary for a state legislature to direct its instrumentality to **[**31]** perform a specific anticompetitive act. The threshold requirement for Parker immunity is satisfied if the legislature directs its instrumentality to engage in a particular type of activity. As the plurality opinion in City of Lafayette stated:

> While a subordinate governmental unit's claim to Parker Immunity is not as readily established as the same claim by a state government sued as such, we agree with the Court of Appeals that an adequate state mandate for anticompetitive activities of cities and other subordinate governmental units exists when it is found "from the authority given a governmental entity to operate in a particular area, that the legislature contemplated the kind of action complained of."

435 U.S. at 415, 98 S. Ct. at 1138.

In this case, there is no dispute that PRPA and PRMSA are agencies of the Commonwealth of Puerto Rico. [28.] The Statement of Motives of Act 62, which established PRMSA, contains a clear expression of legislative intent:

[32]**

> The Legislature of Puerto Rico intends that this instrumentality acquires and operates shipping lines and terminal facilities as a public service, and that in doing so, it shall not be subject to the antitrust laws nor any other limitation that could hinder the effective discharge of the endeavor that this act has imposed on the public instrumentality hereby established.

In addition, section 25 of the Act repeats the intention of the legislature that PRMSA, in carrying out its mandate to provide efficient, reliable, and economic maritime services, not be subject to antitrust laws:

> Conflicting Laws Inapplicable. Insofar as the provisions of this act are in conflict with the provisions of any other law, or parts thereof, the provisions of this act shall prevail. Specifically, and without otherwise limiting the generality of the foregoing, it is intended by this act that the Antitrust Laws shall not be applicable to any action of the Authority taken pursuant to the provisions hereof.

A recent case construed this statute under the criteria set out by the Supreme Court in City of Lafayette. In *Star Lines, Ltd. v. Puerto Rico Maritime Shipping Authority,* ***[*722]*** ***[**33]*** *451 F. Supp. 157 (S.D.N.Y.1978)*, a Liberian corporation sued PRMSA for alleged antitrust violations arising from the short-term lease of a PRMSA vessel not needed in the Puerto Rico trade to plaintiff's competitor in the Persian Gulf. In denying PRMSA's motion to dismiss the complaint for failure to state a claim upon which relief can be granted, the district court held that the transaction in question leasing a ship to others to operate in foreign trade unrelated to Puerto Rico was not performed pursuant to any governmental policy to displace competitive market forces in the area. *Id. at 166*. It found that "the connection between the legislative grant of power to PRMSA and its use of that power under the facts of this case is simply "too tenuous to permit the conclusion that the entity's intended scope of activity included such conduct.' " *Id. at 167* (Quoting *City of Lafayette v. Louisiana Power & Light Co., 532 F.2d 431, 434 (5th Cir. 1976)*, *Aff'd 435 U.S. 389, 98 S. Ct. 1123, 55 L. Ed. 2d 364 (1978))*.

The Court noted, however, that if the challenged conduct were such that it could reasonably have been contemplated by the legislature as necessary to ensure complete and reliable carrier **[**34]** service or proper maintenance of port facilities, it could withstand attack under the antitrust laws. It stated:

> Certainly if the conduct being challenged here were that PRMSA had reduced competition in the Puerto Rican-East Coast trade by acquiring a majority of those vessels suitable for engaging in that trade, or that PRMSA had contracted with a single private company to control Puerto Rico's port facilities, PRMSA's claim to antitrust immunity would be on much stronger ground.

Id. (footnotes omitted).

[28.] See ***P.R. Laws Ann., tit. 23, § 333(b)*** (1955); Act, Supra note 2, § 4.

Plaintiffs do not deny that the Puerto Rico legislature not only intended, but in fact authorized and mandated, state control of all shipping lines operating between Puerto Rico and the Eastern and Gulf ports of the United States. Neither do they dispute that the legislature intended to immunize the acquisition and operation of the shipping lines from federal antitrust laws. [29.] Instead they urge that the Parker doctrine is inapplicable to this situation because the immunized state conduct consisted of acts outside the territory over which the state had legislative jurisdiction.

[35]** In support of this argument, plaintiffs rely on one of the few cases to raise this issue, *Ladue Local Lines, Inc. v. Bi-State Development Agency, 433 F.2d 131 (8th Cir. 1970)*. Ladue involved a political entity created by the legislatures of Illinois and Missouri to acquire and operate a public transit system in eastern Missouri and western Illinois. Plaintiff, a private company that engaged in bus transportation in the same area, brought an antitrust action alleging that defendant's monopolistic control of the public transportation market had destroyed its business by precluding it from bidding on and servicing schools and school systems. *Id. at 132*.

Affirming the district court's dismissal of the action, the court of appeals held that when a political body created by the legislatures of Illinois and Missouri was acting under Congressionally-approved authorization [30.] to operate bus transportation facilities and that authorization was granted pursuant to a legislative policy that public interest would best be served by a unified public transportation system, the activity was not subject to the antitrust laws even though a monopoly was created. *Id. at 137*. Plaintiffs urge that in **[**36]** the absence of such interstate agreement, any unilateral attempt by one sovereign to displace competition **[*723]** in another jurisdiction will not survive scrutiny under federal antitrust laws and seek to apply this argument to the situation here.

To the extent that plaintiff's argument suggests that a state's immunity under the antitrust laws is limited to its own territory, it ignores a central truth of the Parker doctrine. A necessary element of any violation of the federal antitrust laws is an effect on interstate commerce. [31.] As commentators have noted, in **[**37]** a unitary economic system such as ours, jurisdiction under the Sherman Act should be presumed on the ground that every restraint "has the inherent tendency to affect interstate resource allocation and the interstate movement of goods and services in our national economy." [32.]

The exemption created in Parker v. Brown for state **[**38]** action must be coextensive with the scope of the Sherman Act, and thus is applicable to the interstate effects of a particular form of state action. Parker v. Brown itself supports this analysis, for that case involved action by the State of California to raise and stabilize the price of raisins, ninety-five percent of which were sold outside the state. *317 U.S. at 345, 63 S. Ct. 307*. Plaintiffs' "extraterritoriality" argument is in direct conflict with the fundamental message of Parker that the entire Sherman Act, including its extraterritorial coverage, was never intended to restrain state action undertaken pursuant to a proper legislative mandate to displace competition.

In summary, the most recent judicial interpretations of the state action doctrine require that the anticompetitive conduct engaged in by a state instrumentality be undertaken pursuant to a governmental policy to displace competition with regulation or monopoly public service. Here the Puerto Rico legislature, in an attempt to ensure

29. See Plaintiffs' Opposition to the Motion to Dismiss the Complaint by the Puerto Rican Defendants, at 2.

30. Bi-State was organized pursuant to a compact entered into by the states of Illinois and Missouri. The consent of Congress to such compacts is required by *Article I, Section 10, Clause 3 of the Constitution*, which states in part: "No State shall, without the Consent of Congress . . . enter into any Agreement or Compact with another State . . . ." The Bi-State compact was approved by the Act of August 31, 1950, Pub.L.No.81-743, 64 Stat. 568.

31. ***HN10***[] *Sections 1* and *2* of the Sherman Act are applicable only to "trade or commerce among the several States." *15 U.S.C. §§ 1*, *2*. *Section 3* of the Sherman Act applies to contracts, combinations, or conspiracies "in restraint of trade or commerce in any Territory of the United States or of the District of Columbia, or in restraint of trade or commerce between any such Territory and another, or between any such Territory or Territories and any State or States or the District of Columbia, or with foreign nations, or between the District of Columbia and any State or States or foreign nations . . . ." *15 U.S.C. § 3*.

32. P. Areeda and D. Turner, 1 ***Antitrust Law*** P 232a, at 229-30 (1978).

adequate carrier and passenger service between Puerto Rico and the mainland, specifically mandated its instrumentality PRMSA to take over and operate the shipping trade. PRMSA carried **[**39]** out that mandate by acquiring and operating the steamships in such trade. This conduct, which is the subject of plaintiffs' complaint, is immune from antitrust liability under the state action doctrine.

PRPA acted under a similar legislative mandate to operate the transportation facilities of Puerto Rico and to establish rules and regulations for their use. This conduct was also undertaken in the exercise of a valid governmental function and is similarly immune from antitrust liability. See *E. W. Wiggins Airways, Inc. v. Massachusetts Port Authority, 362 F.2d 52, 55 (1st Cir.)*, Cert. denied, *385 U.S. 947, 87 S. Ct. 320, 17 L. Ed. 2d 226 (1966)*.

B. Private Defendants.

The issue of the antitrust immunity of private parties did not arise in Parker because that case involved an equity suit against state officials. *317 U.S. at 344, 63 S. Ct. 307*. Although there has been some judicial uncertainty regarding the reach of the Parker doctrine, it seems clear that a majority of the present Supreme Court believes that Parker is equally applicable to suits against private parties whose actions are compelled or regulated by the state. [33.] The correctness of this interpretation becomes apparent **[**40]** by considering the facts of the original Parker case. In that instance, **[*724]** if the federal government or a private litigant could have enforced the antitrust laws against the raisin producers, effectuation of state policy would have been thwarted just as if the state action immunity were never granted. P. Areeda & D. Turner, 1 ***Antitrust Law***, P 212b, at 69 (1978); See Trans-World Assoc. v. Denver, 1974-2 Trade Cas. P 75,293 (D.Colo.1975).

In the present action the nongovernmental defendants maintain that their conduct is immune from antitrust liability because of the state action immunity applicable to PRMSA. The Court agrees with this interpretation, for it would be anomalous to hold that PRMSA, the state-sanctioned **[**41]** mechanism for acquiring control of the island's ocean transportation, was immune as the buyer of the assets of certain carriers and simultaneously to withhold such immunity from the selling carriers. Similarly defendants PRMMI, TKM, and TOTEM, whose involvement in this lawsuit arises from their operation and management of cargo vessels on behalf of PRMSA, cannot be held liable under the antitrust laws if PRMSA's conduct in operating the ships was immunized.

A similar conclusion regarding the immunity of private parties engaged in business enterprises with state instrumentalities has been reached by other courts. In Trans-World Assoc., Inc. v. Denver, supra, plaintiff sought to operate a rent-a-car concession at the city airport, but its application was denied on the ground that it was city policy to permit only five concessionaires to operate at any one time. The city and the existing concessionaires were named as defendants in an action alleging conspiracy and attempt to monopolize the airport car rental business. The Court dismissed the causes of action involving the city of Denver on the basis of the state action exemption and further held that "since the city is privileged to **[**42]** enter into negotiations and agreements, which might otherwise violate the Sherman Act, those with whom the cities contract are similarly entitled to anti-trust immunity." Id. at 97,900. [34.]

Plaintiffs also appear to suggest that the actions of the private defendants in lobbying and advising the Puerto Rico government and legislature regarding the desirability and organization of a state shipping authority precludes any claim that their actions were compelled and that, in the absence of such compulsion, defendants cannot claim

[33.] *Cantor v. Detroit Edison Co., 428 U.S. 579, 603, 96 S. Ct. 3110, 49 L. Ed. 2d 1141 (1976)* (Burger, C. J., concurring in part); *Id. at 605, 613 n.5, 97 S. Ct. 2691* (Blackmun, J., concurring in judgment); *Id. at 614-15, 97 S. Ct. 2691* (Stewart, Powell and Rehnquist, JJ., dissenting).

[34.] See also *Padgett v. Louisville & Jefferson City Air Bd., 492 F.2d 1258 (6th Cir. 1974)* (per curiam); *Saenz v. University Interscholastic League, 487 F.2d 1026 (5th Cir. 1973)*; *E. W. Wiggins Airways, Inc. v. Massachusetts Port Auth., 362 F.2d 52 (1st Cir.)*, Cert. denied, ***385 U.S. 947, 87 S. Ct. 320, 17 L. Ed. 2d 226 (1966)***; *Metro Cable Co. v. CATV of Rockford, 375 F. Supp. 350 (N.D.Ill.1974)*.

immunity under Parker. Two recent Supreme Court cases have raised the possibility that a **[**43]** private party's right to antitrust immunity may depend upon whether the challenged actions were compelled by a state. In Goldfarb v. Virginia State Bar, the Court refused to extend antitrust immunity to Bar Association minimum fee schedules and offered as one of its reasons: ***HN11***[] "It is not enough that . . . anticompetitive conduct is "prompted' by state action; rather, anticompetitive activities must be compelled by direction of the State acting as a sovereign." *421 U.S. 773, 791, 95 S. Ct. 2004, 2015, 44 L. Ed. 2d 572 (1975)*. Similar sentiments were expressed in *Cantor v. Detroit Edison Co., 428 U.S. 579, 96 S. Ct. 3110, 49 L. Ed. 2d 1141 (1976)*. A program for providing light bulbs was originally proposed by the utility but was made mandatory by the state utility commission. Concluding that the option to have the program was the utility's and was not imposed by the commission, the Court determined that the defendant "exercised sufficient freedom of choice" for the Court to find that compulsion was absent. *Id. at 593, 96 S. Ct. 3110*.

The role that compulsion should play in determining antitrust immunity is left unclear by these cases, which involve different forms of state action than **[**44]** the ones presented here. In Goldfarb and Cantor the Court recognized that neither adequate supervision nor state intent to displace antitrust **[*725]** enforcement could be demonstrated. It has been suggested that the presence or absence of compulsion is important because it provides evidence of state intent. [35.] Compulsion establishes that the state intends to displace the antitrust laws for otherwise the compulsion would be without purpose and effect. Similarly lack of compulsion suggests that intent to provide immunity does not exist. In this case there is clear independent evidence in Act 62 itself that antitrust immunity is intended. It is therefore unnecessary to look to the presence or absence of compulsion as evidence of intent.

Earlier Supreme Court decisions also establish that a court cannot require the absence of initiative or lobbying by a defendant before granting him immunity. The Parker case itself is proof to the contrary, for there, **[**45]** raisin producers initiated the procedure leading to state restrictions. Their representatives formulated the plan reviewed and approved by the California legislature and the plan took effect only upon a favorable referendum among raisin producers.

Plaintiffs' argument that compulsion is required is also refuted by the Supreme Court's decision in *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc., 365 U.S. 127, 81 S. Ct. 523, 5 L. Ed. 2d 464 (1961)*, in which the Court held that, regardless of anticompetitive purpose or intent, a concerted effort by persons to influence lawmakers to enact legislation beneficial to themselves or detrimental to competitors was not within the scope of the antitrust laws. This decision is based on two principles. The first is that a contrary holding would impede the communication between citizens and their lawmakers, without which a representative democracy could not function. The second element is the threat to the constitutionally protected right of petition that would result from a contrary construction. *Id. at 137-38, 31 S. Ct. 523*. [36.] Thus the actions of some private defendants in lobbying the Puerto Rico government prior to the formation **[**46]** of PRMSA does not preclude their claim to exemption from antitrust liability under the state action exemption.

[47]** PRMSA and PRPA have established that they are governmental agencies acting pursuant to a legislative mandate to displace competition with a public monopoly. As such, their actions in acquiring vessels and operating them in the United States-Puerto Rico trade, which form the basis of this complaint, are exempt from antitrust liability under the Parker doctrine. The conduct of the private defendants in selling vessels to PRMSA or in

[36.] See also *United Mine Workers v. Pennington, 381 U.S. 657, 669-72, 85 S. Ct. 1585, 14 L. Ed. 2d 626 (1965)*. Pennington held that, regardless of the anticompetitive purpose or effect on small competing mining companies, the joint action of certain large mining companies and labor unions in lobbying the Secretary of Labor for legislation establishing a minimum wage for employees of contractors selling coal to the Tennessee Valley Authority and in lobbying the TVA to avoid coal purchases exempted from the legislation was not subject to antitrust attack. Cases subsequent to Pennington have emphasized that any contrary construction would pose a serious threat to *first amendment* freedoms. See *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 707-08, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*; *California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508, 516, 92 S. Ct. 609, 30 L. Ed. 2d 642 (1972)* (Stewart, J., concurring in judgment).

operating them on behalf of PRMSA is similarly immunized. Accordingly, the moving parties' motions for summary judgment are granted and this action is dismissed.

HN1[] **US Department of Justice Actions, Criminal Actions**

A court reviewing convictions under *15 U.S.C.S. § 1* is to determine whether, within applicable principles of law, the evidence was sufficient, when viewed in the light most favorable to the Government, to support the jury's finding that defendants' activities were proven to be sufficiently related to interstate commerce to support convictions under the Sherman Act, *15 U.S.C.S. § 1*.

HN2[] **Sherman Act, Defenses**

A sufficient relationship to interstate commerce is both a critical jurisdictional fact and an element of the substantive offense charged under the Sherman Act, *15 U.S.C.S. § 1*. Facts sufficient for the one are sufficient for the other, and vice versa. Existence of the jurisdictional fact may be attacked independently, or in conjunction with the defense on the merits.

HN3[] **Interstate Commerce, Prohibition of Commerce**

Jurisdictional reach of the Sherman Act, *15 U.S.C.S. § 1* is coterminous with Congress' power to regulate interstate commerce. Where conspiracy is charged, it must be shown that it has a sufficient nexus with interstate commerce, but this does not require proof that each charged defendant's activities had the requisite effect. The existence of a sufficient nexus is to be determined on a practical rather than theoretical basis. This means that the determination involves not only raw fact finding but evaluation of the facts by the trier of fact. Accordingly, the results in particular cases are likely to turn on their peculiar facts rather than on legal standards generally applicable to particular categories of business, professional, or trade activities.

Antitrust & Trade Law > Sherman Act > General Overview

HN4[] **Antitrust & Trade Law, Sherman Act**

There are two general lines of inquiry in analyzing the requisite nexus with interstate commerce. One inquires whether activities alleged to be under illegal restraint lie directly in the flow of interstate commerce; the other, whether though intrastate in nature, they nevertheless have so great an impact on interstate commerce that they substantially affect it. These are not bright line, mutually exclusive tests. Particular activities may fall within both patterns. Activities directly in flow of interstate commerce need have but minimal impact upon commerce to affect it, since by definition they are a very part of the stream. Activities not in flow of interstate commerce, i.e., intrastate in basic nature, may only be found to affect interstate commerce if their impact upon it is substantial. Under either test, impact must be upon an identifiable stream of commerce, and not simply upon particular business that may be engaged in interstate commerce.

Antitrust & Trade Law > Sherman Act > General Overview

HN5[] **Antitrust & Trade Law, Sherman Act**

A test of interstate commerce relationship simply is whether as a matter of law or practical necessity the services were an integral part of an interstate transaction.

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > Elements

Antitrust & Trade Law > Sherman Act > General Overview

Criminal Law & Procedure > ... > Inchoate Crimes > Conspiracy > General Overview

HN6[] **US Department of Justice Actions, Criminal Actions**

Proof of a conspiracy under the Sherman Act, *15 U.S.C.S. § 1* need not be direct. Acceptance by competitors of an invitation to participate in a plan, the necessary consequence of which, if carried out, is a restraint of commerce, is sufficient to establish an unlawful conspiracy under the Sherman Act, where each competitor knew that cooperation was essential to successful operation of the plan. While such evidence does not compel a finding of conspiracy, it does permit such a finding.

HN8[] Criminal Actions, Sherman Act

A criminal conspiracy prosecution under the Sherman Act, *15 U.S.C.S. § 1* must include proof that the defendants acted with knowledge that their conduct would affect prices.

Constitutional Law > ... > Fundamental Rights > Procedural Due Process > General Overview

Criminal Law & Procedure > Criminal Offenses > Acts & Mental States > General Overview

HN9[] Fundamental Rights, Procedural Due Process

In the area of commercial regulation due process does not require more at the outside than that a defendant shall have acted with knowledge of the anticipated consequences of his action.

Criminal Law & Procedure > Defenses > General Overview

Evidence > Admissibility > Character Evidence

Criminal Law & Procedure > ... > Jury Instructions > Particular Instructions > Reasonable Doubt

Criminal Law & Procedure > ... > Jury Instructions > Particular Instructions > Theory of Defense

HN10[] Criminal Law & Procedure, Defenses

In a proper case where a defendant who puts on substantial evidence of good character, the circuit courts have split on whether the defendant is entitled to an instruction that such evidence alone may create reasonable doubt. Two circuits hold that the word "alone" must be included. The United States Court of Appeals for the Tenth Circuit holds that "alone" must be included if good character is the only defense raised and perhaps in other circumstances, but does not require it in all cases. The other circuits do not require that the word be included in the charge, at least where good character is not the only defense. The United States Court of Appeals for the Fourth Circuit holds that the word "alone" need not be included in a charge.

Judges: Before WINTER, Circuit Judge, COWEN *, Senior Judge and PHILLIPS, Circuit Judge.

Opinion by: PHILLIPS

Opinion

* Honorable Wilson Cowen, Senior Judge, United States Court of Claims, sitting by designation.

[*1326] Six corporate and three individual defendants appeal their felony convictions for conspiracy to fix real estate commissions in Montgomery County, Maryland in violation of *§ 1* of the Sherman Act, *15 U.S.C. § 1*. Finding no error, we affirm.

[*1327] During the critical period in question all the defendants were realtors engaged as competitors in the business of "reselling" houses. When a person desired to sell his house in Montgomery County he listed it with a realtor, provided he did not decide to attempt to sell it directly. The listing provided that when the house was sold a fixed percentage of the sales price would be paid as a commission to the realtor. This commission was divided **[**3]** among the firms involved in the sale, a portion going to the firm that obtained the listing, another portion to the firm that produced the buyer. To facilitate the operation of this shared commission arrangement, each of the defendants belonged to the Montgomery County Board of Realtors, a trade association that operated a multiple listing service. In the case of almost all houses listed with a member realtor, the member sent a card to the listing service containing a picture of the house and certain pertinent information, including the commission. Thus all member realtors had available a fairly comprehensive list of houses on the market in the county.

During the summer of 1974, and for some time before, the prevailing commission rate in Montgomery County was six percent of the sales price. A few houses were listed at seven percent, but additional services were apparently provided for the higher rate. At this time the real estate brokerage business in the county was in difficult straits. While the number of houses listed with brokers for resale had continued to rise as it had for several previous years, the number of sales had fallen, mortgage funds were in short supply and increasing **[**4]** costs of stationery, telephone service, advertising and gasoline had reduced the profit margin.

On September 5, 1974, defendant John Foley, the president of defendant Jack Foley Realty, Inc., hosted a dinner party at the Congressional Country Club in Bethesda, Maryland. The guests were nine of the leading realtors in Montgomery County, including each of the three individual defendants and one representative of each of the corporate defendants in this appeal. [1] Following the meal, Foley arose and, after making some other remarks, announced that his firm was raising its commission rate from six percent to seven percent. A discussion about the rate change ensued. Within the following months each of the corporate defendants substantially adopted a seven percent commission rate.

[5]** A United States grand jury for the district of Maryland indicted the nine defendants on April 1, 1977. Following a number of preliminary motions, the only one of which is of interest to this appeal being the denial of a motion to dismiss for lack of subject matter jurisdiction, a nine day jury trial was held in September 1977 before Judge Stanley Blair. All defendants were found guilty and this appeal ensued.

Several issues are presented by the appeals. Part I of the opinion addresses the contention that the district court lacked subject matter jurisdiction because of an insufficient nexus between defendants' conduct and interstate commerce. Part II evaluates the sufficiency of the evidence that a conspiracy was formed and that each defendant participated in it. Part III deals with several objections to the jury instructions. Finally, Part IV discusses a number of evidentiary issues. Additional facts will be developed as pertinent to the several issues.

I. INTERSTATE COMMERCE

The defendants contend that their activities were not proven to be sufficiently related to interstate commerce to support their convictions under *15 U.S.C. § 1*. **[**6]** ***HN1***[] Our review is to determine whether, within applicable principles of law, the evidence was sufficient, when viewed in the light most favorable to the *Government, United*

Carruthers, Jr.; defendant, Shannon & Luchs Co. was represented by William Ellis; defendant Schick & Pepe Realty, Inc. was represented by Allyn Rickman; defendant Bogley, Inc. was represented by defendant Robert W. Lebling; and defendant Robert L. Gruen, Inc. was represented by Robert L. Gruen.

States **[*1328]** v. Sherman, 421 F.2d 198, 199 (4th Cir. 1970) (per curiam), to support the jury's finding on this issue. [2]

[7]** We start with the applicable legal principles. **HN3**[] Jurisdictional reach of the statute is coterminous with Congress' power to regulate interstate commerce. Gulf Oil Corp. v. Copp Paving Co., 419 U.S. 186, 194, 95 S. Ct. 392, 42 L. Ed. 2d 378 (1974); United States v. South-Eastern Underwriters Association, 322 U.S. 533, 558 & n.46, 64 S. Ct. 1162, 88 L. Ed. 1440 (1944); Greenville Publishing Co. v. Daily Reflector, Inc., 496 F.2d 391, 395 (4th Cir. 1974). Where conspiracy is charged, it must be shown that it has a sufficient nexus with interstate commerce, but this does not require proof that each charged defendant's activities had the requisite effect. E. g., United States v. Wilshire Oil Co., 427 F.2d 969, 974 (10th Cir. 1970). The existence of a sufficient nexus is to be determined on a practical rather than theoretical basis. E. g., Swift & Co. v. United States, 196 U.S. 375, 398, 25 S. Ct. 276, 49 L. Ed. 518 (1905). This means that the determination involves not only raw fact finding but evaluation of the facts by the **[**8]** trier of fact. Accordingly, the results in particular cases are likely to have turned, quite appropriately, on their peculiar facts rather than on legal standards generally applicable to particular categories of business, professional, or trade activities. Thus, the cases that have considered the relationship of particular real estate brokerage activities to commerce are in hopeless disarray so far as their raw results are concerned. See McLain v. Real Estate Board of New Orleans, Inc., 583 F.2d 1315, 1319-20 (5th Cir. 1978), cert. granted, -- - U.S. -- , *99 S. Ct. 2159, 60 L. Ed. 2d 1043 (1979)* (collecting cases). This means that the guiding legal principles must be sought at a more general level than any keyed to the particular nature of the real estate brokerage business, and that detailed efforts to reconcile the disparate results in particular real estate brokerage cases are likely to be bootless.

HN4[] The traditional mode of analysis seeks the requisite nexus along one or both of two general lines of inquiry unrelated in terms to particular categories of **[**9]** commercial activities. One inquires whether the activities alleged to be under illegal restraint lie directly in the flow of interstate commerce; the other, whether though intrastate in nature, they nevertheless have so great an impact on interstate commerce that they substantially affect it. See, e. g., Greenville Publishing Co. v. Daily Reflector, Inc., 496 F.2d at 395 (articulating and discussing the two tests). Obviously these are not bright line, mutually exclusive tests and it is quite possible to analyze a particular pattern of activities without express reliance upon either. [3] Each, after all, strives **[*1329]** for answers to the more general question, whether the activities under alleged restraint have a sufficient nexus with interstate commerce. Particular activities may fall within both patterns. Activities directly in the flow of interstate commerce need have but minimal

---

[2] **HN2**[] A sufficient relationship to interstate commerce is both a critical jurisdictional fact and an element of the substantive offense charged under 15 U.S.C. § 1. Facts sufficient for the one are sufficient for the other, and vice versa. Existence of the jurisdictional fact may be attacked independently, or in conjunction with the defense on the merits. Cf. McLain v. Real Estate Board of New Orleans, Inc., 583 F.2d 1315, 1323-24 (5th Cir. 1978), cert. granted, -- - U.S. -- , ***99 S. Ct. 2159, 60 L. Ed. 2d 1043*** (discussing comparable procedures in civil actions). In this case, all the defendants but Schick & Pepe Realty, Inc. made a jurisdictional attack by pre-trial motion to dismiss the indictments under Fed.R.Crim.P. 12. The district court denied this motion, assessing the facts as charged in the indictments. When the case then proceeded to trial, the substantive interstate commerce issue was submitted to the jury and found against the defendants. Defendants' attack is therefore upon the jury's finding on this issue as it was necessarily subsumed within the general verdict of guilty. No challenge having been made to the district court's instruction on the issue, we assume its correctness. The only remaining basis for challenge is therefore to the sufficiency of the evidence to support the implicit jury finding on this issue, and it is this we review. Because there is no suggestion of variance between indictment and proof, review of the sufficiency of the evidence on the substantive issue necessarily reviews the sufficiency of the facts as found to support the court's jurisdiction. The jury's findings on the evidence thus in effect supersede the district court's jurisdictional finding on raw factual averments in the indictments.

[3] It may be questioned whether, in any event, these two "tests" will withstand logical scrutiny as discretely different frameworks for close legal analysis. Courts quite frequently conduct searching interstate commerce relationship analyses without express reliance upon them. See, e. g., Goldfarb v. Virginia State Bar, 421 U.S. 773, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975). Significantly on the point, while both sides and the district judge in this case assumed that Goldfarb was a "local but affecting" case, a distinguished constitutional scholar in a recent analysis assumed without elaboration that it was an "in-commerce" type. Strong, Court vs. Constitution: Disparate Distortions of the Indirect Limitations in the American Constitutional Framework, 54 N.C.L.Rev. 125, 137-40 (1976).

impact upon the commerce to "affect" it, since by definition they are a very part of the stream. See, e. g., *Swift & Co. v. United States, 196 U.S. at 398-99, 25 S. Ct. 276, 49 L. Ed. 518* . Activities not in the flow of interstate commerce, I. e., intrastate in basic nature, **[**10]** may only be found to affect interstate commerce if their impact upon it is substantial. Compare, e. g., *Mandeville Island Farms, Inc. v. American Crystal Sugar Co., 334 U.S. 219, 68 S. Ct. 996, 92 L. Ed. 1328 (1948)* (substantial), With, e. g., *Apex Hosiery Co. v. Leader, 310 U.S. 469, 60 S. Ct. 982, 84 L. Ed. 1311 (1940)* (unsubstantial). Under either test and in all events, the impact must be upon an identifiable stream of "commerce," and not simply upon a particular business that may be engaged in interstate commerce. See *McLain v. Real Estate Board of New Orleans, Inc., 583 F.2d at 1318-19*.

[11]** In *Goldfarb v. Virginia State Bar, 421 U.S. 773, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975)*, on facts closely analogous in many respects to those presented in the instant case, the Supreme Court articulated a test of interstate commerce relationship in which these two traditional tests may be thought to have coalesced, although neither was drawn upon in express terms. Because both sides on this appeal and the district judge in his rulings below perceived as we do the critical relevance of Goldfarb to this case, the test there stated bears emphasis here before the evidence is analyzed. In finding a sufficient nexus between the title search activities of certain Virginia lawyers and an identifiable stream of interstate real estate financing transactions, the Goldfarb Court stated the ***HN5***[] test simply as "(whether) as a matter of law or practical necessity (the) services (were) an integral part of an interstate transaction." *Id. at 785, 95 S. Ct. at 2012*. Certain critical aspects of the context in which the lawyers were observing a minimum fee schedule for their services **[**12]** were emphasized by the Court. These were that lending institutions routinely required title insurance as an incident to making mortgage loans in the Virginia county in question; that this in turn required title examinations; that state regulatory authority required that this service be performed only by licensed lawyers; that the lawyers thus favored were observing a minimum fee schedule promulgated by their professional association; and that a considerable volume of the loans involved were funded by out-of-state lending institutions, insured by out-of-state insurance companies, and guaranteed by out-of-state federal agencies. From this combination of factors, the Court concluded that the title examination service for which fixed fees were being charged was "an integral part of an interstate transaction," and that "(g)iven the substantial volume of commerce involved, and the inseparability of this particular legal service from the interstate aspects of real estate transactions . . . interstate commerce has been substantially affected. *Id. at 785, 95 S. Ct. at 2012* (footnote omitted).

In this case, as in Goldfarb, the evidence was quite sufficient to permit the trier **[**13]** of fact to determine that the activities in question, here those of real estate brokers, were as a matter of practical necessity an integral part of an identifiable stream of interstate real estate transactions. The charged conspirators here were shown to be engaged in a business that consisted essentially of bringing together prospective buyers and sellers of residences in Montgomery County, Maryland, and then facilitating in various ways the consummation of resulting sale-purchase agreements between sellers **[*1330]** and buyers. Montgomery County is a suburban area contiguous to the District of Columbia, and the brokers in question consciously and understandably capitalized upon the highly transient nature of this particular real estate market. A quite considerable volume of the total of brokered sales in which they participated involved purchasers coming into the state and sellers leaving the state. [4] **[**16]** Extensive advertising of the brokerage services was placed by various ones of the defendants in out-of-state media, including military and civil service personnel journals. [5] Some of the brokers participated in national "relocation" services [6] and

---

[4] Distinguishing this case factually from those wherein real estate brokerage activities were not shown to have involved any considerable volume of out-of-state buyers and sellers. E. g., *Diversified Brokerage Services, Inc. v. Greater Des Moines Board of Realtors, 521 F.2d 1343, 1346 (8th Cir. 1975)*. While it may generally be correct to say that "the mere movement of individuals from one state to another in order to utilize particular services does not transform those services into interstate services within the meaning of the Sherman Act," Id., that hardly describes the factual situation presented here. A more apposite principle for the facts of this case is the congressional determination upheld in *Heart of Atlanta Motel, Inc. v. United States, 379 U.S. 241, 85 S. Ct. 348, 13 L. Ed. 2d 258 (1969)*, that even "local" businesses that provide services to substantial numbers of persons traveling across state lines may affect interstate commerce. Here, as the analysis in the body of our opinion shows, there was much more of an interstate character to defendants' activities than merely awaiting passively the chance descent of out-of-state customers and then providing these with purely "local" services.

extensively used interstate **[**14]** channels of communications [7] in developing and servicing the out-of-state clientele. A considerable amount of the financing for brokered purchases came from out-of-state lending institutions and substantial numbers of the purchase loan mortgages were guaranteed by federal agencies headquartered in the District of Columbia. [8] While the charged brokers did not participate directly in the interstate lending and loan guarantee transactions incident to their brokered sales, they clearly held out as part of their brokerage services their ability to facilitate these. [9] The overall picture that emerges is one of a substantial stream of interstate commerce in which these brokers' activities were not only an "integral part," but in practical effect the dominant factor in first creating a substantial interstate market by utilizing interstate advertising and referral services, and then drawing in interstate funding and loan guarantees for the resulting purchase money mortgages. While there are of course differences between the lawyers' activities in Goldfarb and the brokers' in the instant case, most suggest a more, not less, substantial impact on interstate commerce for the brokers' activities **[**15]** than for the lawyers'. Defendants emphasize that the brokers' services here were not undergirded by legal compulsion as were those of the lawyers in Goldfarb. While that is true, the practical necessity for utilizing a local broker's services, particularly for out-of-state purchasers and sellers, was substantially equal on the evidence presented, hence quite as integral and "inseparable **[*1331]** " a part in the final analysis. And on the other hand, while the lawyers in Goldfarb took no specific part in creating the critical interstate market of specific buyers and sellers necessary to generate their fees, the brokers in the instant case played a dominant part in creating the specific interstate market that ultimately provided their commissions.

[17]** The impact of the charged restraint on the brokerage services demonstrably had a substantial effect on interstate commerce. Since the conspiracy as charged raised the price of the critical service of bringing together the home sellers and buyers, this affected the need for financing "as a matter of practical economics." *Hospital Building Co. v. Trustees of Rex Hospital, 425 U.S. 738, 745, 96 S. Ct. 1848, 1852, 48 L. Ed. 2d 338 (1976)*; See *id. at 744-47, 96 S. Ct. 1848*. Similarly, increased prices resulting from increased brokerage commissions must, as a matter of practical economics, confront every purchaser wishing to buy a Montgomery County residence. Therefore, as in Goldfarb, the numerous out-of-state purchasers of these residences could not as a practical matter escape the effect of these commissions.

Whether analyzed as being in the flow of interstate commerce, as local but substantially affecting interstate commerce, or as being by practical necessity an "integral part" of identifiable interstate transactions, the evidence here adequately supported the jury's finding of a sufficient nexus between the brokers' activities and interstate commerce, **[**18]** and of a substantial effect of the restraint charged upon that commerce.

II. CONSPIRACY AND PARTICIPATION

Defendants next contend that there was insufficient evidence, although considered in the light most favorable to the government, to allow a jury to find the existence of a conspiracy and the participation of each defendant in it beyond a reasonable doubt. Their related contention that guilt beyond a reasonable doubt can only exist if all other

---

[5] This included advertising in Washington, D.C., newspapers and radio stations (App. 111, 998, 1003), the Foreign Service Journal, and the Army, Navy, Air Force Times (App. 1020-21). At least one defendant advertised its use of a "Military Transfer Department" and a "Corporate Referral Department" which enabled it to identify potential buyers and sellers among military and business transferees (App. 1042-43); offered to military personnel a "Free Relocation Kit" (App. 187-88); and invited collect telephone calls from prospective home purchasers coming into the Washington, D.C., area (App. 1039).

[6] Incident to which they paid commissions directly to out-of-state brokers who found purchasers for their listings, and received commissions directly from out-of-state brokers to whom they referred clients. (App. 998-99, 1004, 1014, 1020).

[7] See *American Power & Light Co. v. SEC, 329 U.S. 90, 98-99, 67 S. Ct. 133, 91 L. Ed. 103 (1946)*; *North Am. Co. v. SEC, 327 U.S. 686, 694-95, 66 S. Ct. 785, 90 L. Ed. 945 (1946)*.

[8] App. 970-95, 997-99, 1003-04, 1019-23, 1062.

[9] One advertised that potential purchasers should consult a broker because he could "guide you in getting a loan," and will "be able to negotiate the best available financing." (App. 1046).

reasonable hypotheses are negated has been rejected. United States v. Bobo, 477 F.2d 974, 989 (4th Cir. 1973). A final suggestion that our review on this point should be more stringent because this is a felony, rather than a misdemeanor, prosecution is also without merit. Neither the classification of the offense nor the extent of the possible punishment in any way affects the question whether there was sufficient evidence of each element of an offense. Our review of the evidence leads to the conclusion that under applicable standards of review the evidence was sufficient to sustain the jury findings on these issues.

A. The Evidence of Conspiracy

HN6[] **[**19]** Proof of a § 1 conspiracy need not be direct. "Acceptance by competitors of an invitation to participate in a plan, the necessary consequence of which, if carried out, is a restraint of commerce, is sufficient to establish an unlawful conspiracy under the Sherman Act, where each competitor knew that cooperation was essential to successful operation of the plan." 3 P. Areeda & D. Turner, ***Antitrust Law***: An Analysis of Antitrust Principles and Their Application P 841a, at 361-62 (1978). While such evidence does not compel a finding of conspiracy, *Theatre Enterprises, Inc. v. Paramount Film Distributing Corp., 346 U.S. 537, 74 S. Ct. 257, 98 L. Ed. 273 (1954)*, it does permit such a finding, *Interstate Circuit, Inc. v. United States, 306 U.S. 208, 59 S. Ct. 467, 83 L. Ed. 610 (1939)*; *Esco Corp. v. United States, 340 F.2d 1000, 1007 (9th Cir. 1965)*. Within this principle, we find ample evidence to permit the finding of a conspiracy involving each of the defendants.

In the months preceding the September 5 dinner, several of the defendants were contemplating a change in commission rate, but were concededly afraid to undertake such a move for fear **[**20]** that they would be unable successfully to compete with firms still at six percent. Schick & Pepe had previously attempted to go to a seven percent rate and had failed because of competition. It was in this general climate of concern about competitive constraints that **[*1332]** Foley called the meeting of September 5. At the dinner Foley rose, made some prefatory remarks and then stated that his firm was in dire financial condition. Saying that he did not care what the others did, he then announced that his firm was changing its commission rate from six percent to seven percent. Testimony as to what was said by various persons in the ensuing discussion is greatly in conflict, but there was evidence from which the jury could find that each of the individual defendants and a representative of each corporate defendant not represented by one of the individual defendants expressed an intention or gave the impression that his firm would adopt a similar change. The discussion also included reference to the earlier unsuccessful effort by Schick & Pepe to adopt a seven percent policy, from which the jury could conclude that defendants knew that their cooperation was essential. Evidence presented **[**21]** in the form of detailed charts with explanation by an economist qualified as expert witness showed that in the months following each defendant did in fact begin to take substantial numbers of seven percent listings. Moreover, the jury heard testimony of a number of instances in which members of the conspiracy sought after the September 5 dinner to hold their fellows to the "agreement." Details of these events will be developed more fully in the following discussion of the connection of each defendant to the conspiracy.

B. Connection of Each Defendant to the Conspiracy

(1) Jack Foley Realty, Inc. and John P. Foley, Jr.

Jack Foley hosted the September 5 dinner, inviting in addition to a few realtors who were close personal friends, those he regarded as the most active members of his profession. He had previously announced the commission change to his staff and on September 15 mailed a notice concerning it to all local realtors. By early October, Foley, Inc. had thirty percent of its listings at the higher rate; by December, the figure was in excess of seventy percent and remained in that neighborhood throughout 1975.

Allyn Rickman, vice president of Schick & Pepe and a guest at the **[**22]** September 5 dinner, testified that after Schick & Pepe took some six percent listings, Foley called him and told him that was a "mistake" because if they all did not hold the line none of them could get seven percent.

Before the policy change, Foley's firm had accepted a house at a six percent listing. When the listing was renewed after the policy change, still at six percent, Foley, Inc. sent a card to the listing service which was in turn distributed to all the local realtors. A listing card was then received anonymously in the mail by Foley with a question mark on it. When the house was again relisted, the contract and the listing with the service were both at seven percent. John O'Keefe, a vice president at Foley, Inc., however, wrote a letter to the homeowner/seller informing him that Foley would reimburse him for the extra one percent. [10] The letter contained the following explanation:

> "The reason I don't want **[**23]** (the listing) to go through showing 6% Is our Firm was one of the leading Firms in changing from 6% To 7% And with Mr. Foley being the President of the Board of Realtors, I just don't want any unjust criticism of him or our Company for taking your listing at less than 7%."

(2) Colquitt-Carruthers, Inc. and John T. Carruthers, Jr.

John T. Carruthers of Colquitt-Carruthers, Inc. attended the dinner. The testimony conflicts on whether he said he was already at seven percent, or whether he was going to go to seven percent. His accountant testified that a policy change occurred between September 10 and September 24. Effective September 24, all listings other than at seven percent had to be accompanied by explanation; after November 1, they would not be accepted at less than **[*1333]** seven percent. By October 1974, Colquitt-Carruthers had sixty percent of its listings at the new rate and through the end of 1975 the figure was generally in excess of eighty percent.

There was testimony that Carruthers made several attempts to ensure the cooperation of other firms. William Ellis, vice president of Shannon & Luchs Co., a firm that delayed implementation of the seven percent policy, **[**24]** testified that Carruthers called him on three occasions. Around January 1, 1975, Carruthers called and asked about Ellis' "considerations." Ellis replied "You know I can't make the decision." Carruthers then offered to call the man who could make the decision. Later in January, Carruthers again called, this time explicitly asking about the change. Upon being told that Shannon & Luchs had adopted a seven percent policy, but had set no date for its implementation, Carruthers "threatened" Ellis with the loss of his job. In April when Shannon & Luchs' Gaithersburg, Maryland office took some six percent listings, Carruthers again called Ellis to complain.

Allyn Rickman, vice president of Schick & Pepe Realty, Inc., also testified that Carruthers called him to complain about some six percent listings that Schick & Pepe had accepted. [11] He quoted Carruthers as saying "if we do not stay at seven percent, then it would be a slide back and . . . no one could get seven percent, because the competition would hurt us." There was also testimony that Carruthers complained to Robert Dorsey, a vice president at Bogley, Inc., about that firm having taken more six than seven percent listings.

[25]** (3) Bogley, Inc. and Robert W. Lebling

Robert Lebling, the president and seventy percent owner of Bogley, Inc., attended the September 5 dinner. The testimony is in conflict whether he said he would go to a seven percent rate, or that he would do so if it were to his advantage. On September 27, Bogley, Inc. adopted a policy of seeking seven percent but not losing any listings over the attempt. At least one version of the meeting at which that decision was made places the initiative for the proposal with Lebling. Bogley, Inc. had no seven percent listings from June through September 1974, but nearly fifty percent of the listings in October and November 1974 were at the higher rate and in December seventy percent were at the new rate. The percentage of seven percent listings fluctuated between forty and sixty-five percent until April, then settled at around thirty percent. Since ***HN7***[] the agreement itself, not its performance, is the crime of conspiracy, *United States v. Trenton Potteries Co., 273 U.S. 392, 402, 47 S. Ct. 377, 71 L. Ed. 700 (1927)*; *Plymouth Dealers' Association v. United States, 279 F.2d 128, 132 (9th Cir. 1960)*, **[**26]** the partial non-performance of Bogley does not preclude a finding that it joined the conspiracy.

(4) Schick & Pepe Realty, Inc.

---

[10] Foley and Foley, Inc. object to the admissibility of that letter. See Part IV Infra.

[11] Carruthers and Colquitt-Carruthers contend this testimony should not have been allowed. See Part IV Infra where we conclude that there was no error in its admission.

Allyn Rickman, vice president of Schick & Pepe Realty, attended the dinner. He testified that he stated at that time that his firm would adopt a seven percent policy. On October 4, 1975, it did adopt such a policy and by November had well over eighty percent of its listings at the higher rate. Rickman testified that but for the dinner the firm would not have changed its policy. In August, the firm had considered such a change, but decided against it because of fear that it would be unable to compete for listings. There was also evidence that Rickman complained to Robert Dorsey, vice president of Bogley, Inc., about Bogley's failure to take only seven percent listings.

(5) Shannon & Luchs Co.

Shannon & Luchs did not officially adopt a seven percent policy until January 1975. At the dinner, its vice president, William Ellis, stated that they should not be discussing a rate increase and said that his firm was always the first to be investigated **[*1334]** when something like this happened as it was the county's largest. He also stated that Shannon & Luchs **[**27]** would probably go to seven percent at a later date; Allyn Rickman remembered a possible mention of the first of the year. On September 9, Ellis told his managers not to turn down any seven percent listings they had an opportunity to get. In fact, the percentage of seven percent listings taken by Shannon & Luchs crept toward thirty percent by January 1975. Early in January, John T. Carruthers called Ellis and asked about his "considerations." Ellis told him that he, Ellis, did not make those decisions and Carruthers then offered to telephone the man who did; Ellis replied that he did not need help. On January 15, at Ellis' suggestion, Shannon & Luchs adopted a policy of taking seven percent listings unless some other rate were beneficial to the firm or otherwise appropriate. Although the new policy was not implemented until March 1, by that time forty percent of Shannon & Luchs' listings were at seven percent. By early April, the figure was about sixty-five percent and throughout 1975 it stood between eighty and ninety. In response to a comment from Carruthers in April, Ellis acknowledged that he had a "problem" in his Gaithersburg, Maryland office in implementing the policy. Shannon **[**28]** & Luchs did not adopt a seven percent policy for its offices in northern Virginia because of the threat of competition.

(6) Robert L. Gruen, Inc.

Robert Gruen attended the Congressional Country Club dinner. While Allyn Rickman's testimony is in conflict as to Gruen's statements at that dinner, on more than one occasion he testified that Gruen said he was going to go to seven percent. Louise Lewis, a Gruen sales agent, testified that the Gruen policy as early as June 1974 was at least to seek seven percent listings, but acknowledged that she sought no seven percent listings before September.

Gruen had one listing at seven percent out of a total of seven in August 1974 and none in September, but took three of eleven at the higher rate in October. By early 1975, the firm consistently had eighty percent or more of its listings at seven percent.

Gruen makes much of the fact that it had seven listings at seven percent from March to August 1974 and also had seven such listings from September to December. Put in percentages, however, that apparent continuity evaporates: the March to August figure represents only ten percent of Gruen's listings; there were no seven percent listings in September; **[**29]** and from October to December, Gruen had thirty-five percent at a seven percent commission. These figures are sufficient to allow the jury, in connection with Rickman's testimony, to conclude that Gruen also adopted a higher commission rate following the September 5 dinner and that that adoption was part of the alleged conspiracy.

C. Conclusion

We conclude that this evidence, here merely summarized and highlighted from a much more detailed body of proof adduced by the Government, was sufficient to permit the jury to find as it did against each of the defendants on the conspiracy issue. Defendants of course offered explanatory and exculpatory evidence, and on this appeal urge that the proper inferences to be drawn from all the evidence relieve their actions of criminal implications. Among these arguments is the interesting one that only by graceless refusals to accept Foley's invitation to dinner or by equally graceless withdrawals from it once its purpose was revealed could they have avoided the factual inferences required to implicate them in the conspiracy, and that to sustain their convictions will impose intolerable burdens on businessmen confronted with like dilemmas. This, with **[**30]** other arguments about the proper inferences to be drawn from the evidence, was undoubtedly presented to the jury by able counsel for the defendants. A properly composed jury of defendants' peers rejected this factual argument as well as others in reaching its verdict of guilty. That to sustain the jury finding on this issue may have the inhibitory effect on the **[*1335]** conduct of others that is urged by defendants does not speak to the force of the evidence supporting the jury's finding in this case.

III. JURY INSTRUCTION

Defendants complain that the court failed to instruct the jury that it had to find that defendants acted with specific intent before it could find them guilty beyond a reasonable doubt. While this contention is none too plainly developed, it apparently comes to the suggestion that to be convicted of a felony violation of *§ 1* they had to conspire with the specific intent to accomplish a restraint of trade. [12]

[31]** *Section 1* had traditionally been interpreted to define a strict liability offense, E. g., *United States v. Patten, 226 U.S. 525, 543, 33 S. Ct. 141, 57 L. Ed. 333 (1913)*, until in June 1978, the Supreme Court held that ***HN8***[] a criminal conspiracy prosecution under *§ 1* must include proof that the defendants acted with knowledge that their conduct would affect prices. *United States v. United States Gypsum Co., 438 U.S. 422, 98 S. Ct. 2864, 2877, 57 L. Ed. 2d 854 (1978)*. Gypsum involved a misdemeanor case, the indictment having been brought prior to the effective date of the 1974 amendment making *§ 1* a felony provision. From this, defendants contend that the scienter requirement imposed in Gypsum is not necessarily as stringent as that required for the now felony offense. [13]

[32]** While certain conduct may not be made criminal without including as an element of the offense a certain degree of scienter, we do not believe the 1974 amendment of the Sherman Act, Antitrust Procedures and Penalties Act, Pub.L. No. 93-528, § 3, 88 Stat. 1706, 1708 (1974), mandates that specific intent in the sense apparently suggested by defendants be made an element of a *§ 1* conspiracy. Although in most cases particular scienter requirements seem to be based simply on statutory construction, See *Morissette v. United States, 342 U.S. 246, 72 S. Ct. 240, 96 L. Ed. 288 (1952)*, there are undoubtedly due process restrictions on the legislature's power to define certain conduct as criminal absent particular scienter requirements. E. g., *Lambert v. California, 355 U.S. 225, 228, 78 S. Ct. 240, 2 L. Ed. 2d 228 (1957)*; *Holdridge v. United States, 282 F.2d 302 (8th Cir. 1960)* (Blackmun, J.). We think neither the amended statute nor the Constitution require the specific intent apparently contended for by defendants here.

In increasing the penalties for violating *§ 1* and redefining the offense as a felony, Congress did not intend to change the **[**33]** elements of the offense. E. g., 120 Cong.Rec. 36,340 (1974); See *United States v. Continental Group, Inc., 456 F. Supp. 704, 717 (E.D.Pa.1978)*; United States v. Noll Manufacturing Co., 1977-2 Trade Cas. P 61,712 (N.D.Cal.1977). Hence, we consider the Gypsum rule, so far as statutory interpretation is concerned, still to apply to *§ 1* offenses.

Neither do we find merit in the argument that constitutional considerations require proof of "specific intent" in the sense urged by defendants. While intent of the specificity apparently urged by defendants may be constitutionally mandated with respect to offenses impinging highly protected realms of conduct such as speech, See *Smith v. California, 361 U.S. 147, 154, 80 S. Ct. 215, 4 L. Ed. 2d 205 (1959)* (reserving question), ***HN9***[] in the area of commercial regulation due process does not require more at the outside than that a defendant shall have acted with knowledge of the anticipated consequences of his action. *United States v. United States Gypsum Co., 98 S. Ct. at 2878*.

[*1336] We thus **[**34]** find no error in Judge Blair's instructions in which he told the jury in substance that it must find beyond a reasonable doubt that defendants must have known that their agreement, if effectuated, would have

---

[12] Some defendants may contend for an even more specific intent: to denigrate or mock the law in the sense apparently of intending specifically to violate the Sherman Act. Because we find even the less stringent requirement without support, we do not address this one.

[13] Gypsum also involved a rule of reason offense rather than a per se violation of *§ 1* such as the price fixing here alleged. While the Court's analysis is in part dependent on the relative lack of notice provided by rule of reason offenses, the rule announced is framed in terms of all *§ 1* criminal prosecutions.

an effect on prices; that they knowingly joined a conspiracy whose purpose was to fix prices; and that in joining they intended to further that purpose.

Defendant Shannon & Luchs also complains of the following instruction, asserting that it required too little connection with the conspiracy:

> (The requirement that the evidence show beyond a reasonable doubt that the Defendants knowingly participated in the unlawful plan with the intent to further or advance some object or purpose of the conspiracy) is satisfied if the evidence shows beyond a reasonable doubt a knowing assistance of any kind in effectuating the objective of the conspiracy.

Without deciding whether this particular portion of the charge required too little connection, we conclude that the charge as a whole did require a sufficient involvement by each defendant. For example, within paragraphs of the allegedly deficient instruction, the following was charged:

> A Defendant may be found guilty of a conspiracy **[**35]** only if the Defendant understood that he had joined the single overall conspiracy that is charged. If any Defendant was not a party to that overall agreement or conspiracy, you must find that Defendant not guilty even if he participated in isolated or subsidiary actions or events which aided the ends of the conspiracy.

Robert Lebling, Bogley, Inc., John T. Carruthers and Colquitt-Carruthers, Inc. complain that the court failed to instruct that proof of good character Alone can create reasonable doubt. Judge Blair gave substantially the charge requested, but refused to include the word "alone." Defendants rely on *Michelson v. United States, 335 U.S. 469, 69 S. Ct. 213, 93 L. Ed. 168 (1948)*, for the proposition that this refusal was error.

Michelson, an opinion dealing with the admissibility of character evidence, does include dictum that ***HN10***[] in a proper case a defendant who puts on substantial evidence of good character is entitled to an instruction that such evidence alone may create reasonable doubt, *Id. at 476, 69 S. Ct. 213*, but the Circuits have split on **[**36]** whether such an instruction must be given. Two circuits hold that the word "alone" must be included. *United States v. Lewis, 157 U.S.App.D.C. 43, 482 F.2d 632, 637 (1973)*; *United States v. Donnelly, 179 F.2d 227, 233 (7th Cir. 1950)*. The Tenth Circuit holds that "alone" must be included if good character is the only defense raised and perhaps in other circumstances, *Oertle v. United States, 370 F.2d 719, 726-27 (10th Cir. 1966)*, but does not require it in all cases, *Swingle v. United States, 389 F.2d 220, 222 (10th Cir. 1968)*; See *United States v. Tijerina, 407 F.2d 349, 356 (10th Cir. 1969)* (semble). The other circuits do not require that the word be included in the charge, at least where good character is not the only defense. *United States v. Fontenot, 483 F.2d 315, 323 (5th Cir. 1973)*; *United States v. Lachmann, 469 F.2d 1043, 1046 & n. 3 (1st Cir. 1972)*; *United States v. Fayette, 388 F.2d 728, 737 (2d Cir. 1968)*; *United States v. Brown, 353 F.2d 938, 939-40 (6th Cir. 1965)*; *Carbo v. United States, 314 F.2d 718, 746-47 (9th Cir. 1963)*; **[**37]** *Black v. United States, 309 F.2d 331, 343-44 (8th Cir. 1962)*; See *United States v. Klass, 166 F.2d 373, 378-80 (3d Cir. 1948)*. In 1944 this Circuit held that the word "alone" need not be included in a charge. *Mannix v. United States, 140 F.2d 250, 253-54 (4th Cir. 1944)*.

In Michelson, the Supreme Court relied on the case of *Edgington v. United States, 164 U.S. 361, 366, 17 S. Ct. 72, 41 L. Ed. 467 (1896)*. That case disapproved an instruction to the effect that character evidence should be considered only if the other evidence created doubt. It did not hold that character evidence is so highly probative that it must always be singled out as potentially exculpatory standing "alone." *Carbo v. United States, 314 F.2d at 746*. We believe the better view, which we think **[*1337]** not foreclosed by Michelson, continues to be that expressed by this court in Mannix and followed by a majority of the circuits. We need not hold that an "alone" instruction could in no circumstances be a matter of right to find it not required in this case. Here defendants did not rely on character evidence alone for their defense. The instructions **[**38]** properly allowed the jury to consider it along with other evidence, and clearly did not suggest that the jury might not find in the character evidence "alone" a basis for reasonable doubt.

IV. EVIDENTIARY ISSUES

Defendants John Foley and Jack Foley Realty, Inc. assert that the district court erred in admitting into evidence a letter written from a Foley vice president, John O'Keefe, to a homeowner whose house had been relisted at seven percent. [14]

During the grand jury investigation some of the records of Foley, Inc. were subpoenaed. While this letter was covered by the subpoena it was not produced. Shortly before trial, an attorney in a civil suit involving the same conspiracy called the United States Attorney and told him about the letter. The government asked the attorney for a copy of the letter, but since it was subject to a protective order in the civil suit, the attorney asked that the government obtain the letter directly from defendants. The letter was then **[**39]** so obtained. In ruling on the objection to the admission of the letter, Judge Blair assumed that it had been obtained in violation of the protective order. We make the same assumption.

HN11[] The government is not precluded from introducing improperly obtained evidence so long as it did not participate in the impropriety. *Burdeau v. McDowell, 256 U.S. 465, 476, 41 S. Ct. 574, 65 L. Ed. 1048 (1921)*; *United States v. Francoeur, 547 F.2d 891, 893 (5th Cir. 1977)*. [15] Judge Blair found that the government had not participated in the assumed violation of the protective order; that finding is not clearly erroneous.

[40]** Defendants seek to analogize the protective order to *47 U.S.C. § 605*, a provision of the Federal Communications Act which they assert has been interpreted to prohibit the admission of communications seized in violation of its terms even absent government complicity. Assuming that defendants' construction were correct, a proposition which we do not accept save for the purposes of argument, See *Bubis v. United States, 384 F.2d 643 (9th Cir. 1967)* (allowing admission of communication seized in violation of *§ 605*), we reject the analogy. *Section 605* was obviously intended to further broader policies than is a protective order of the type here involved. No suggestion is made that the government has engaged in impermissible discovery, that defendants' privilege against self-incrimination has been violated [16] or that the admission of the letter occasioned prejudicial publicity. The letter was subject to a subpoena and should have been produced during the grand jury investigation. To allow its admission in a situation where the government did not act improperly would not frustrate any valid policy.

[41]** Defendants object to the admission of a series of charts, designated Government Exhibits Numbers 39 through 51. Numbers 39 through 50 summarized the number of listings filed by each realtor with the multiple listing service and portrayed the percentage of those listings which were at the higher, seven percent **[*1338]** commission rate. These charts were compiled by a Justice Department economist from data obtained from the multiple listing service. Defendants were apprised that the government intended to use a compilation of such data well before trial and the documents were available for inspection at the Justice Department throughout May and June 1977. Defendants complain, however, that the charts themselves were not made available until the weekend before trial.

HN12[] *Fed.R.Evid. 1006* provides: "The contents of voluminous writings . . . which cannot conveniently be examined in court may be presented in the form of a chart, summary or calculation. The originals, or duplicates, shall be made available for examination or copying, or both, by other parties at reasonable time and place." The **[**42]** data upon which these charts were based came from defendants' own listing service, the documents were made available to defendants at the Justice Department well before trial and the charts themselves were

---

[14] See text accompanying note 4 Supra.

[15] This rule has developed in cases involving alleged constitutional improprieties so it may be said to be predicated on a lack of state action. On the other hand, the notion that the mere fact of impropriety should preclude admissibility has not been accepted. See *Burdeau v. McDowell, 256 U.S. at 476-77, 41 S. Ct. 574* (Brandeis, J., dissenting). If impropriety of a constitutional dimension does not preclude admissibility absent Government complicity, a more stringent rule in a non-constitutional setting would be inappropriate.

[16] The letter was neither the personal property of nor in the possession of Mr. Foley; Foley, Inc. has no privilege against self incrimination. *United States v. White, 322 U.S. 694, 698-99, 64 S. Ct. 1248, 88 L. Ed. 1542 (1944)*.

provided the weekend before trial. Defendants complain that the charts should have been made available longer in advance of trial, relying on the last sentence of *Rule 1006*. That sentence refers to making available the original documents, not the charts themselves. 5 J. Weinstein & M. Berger, Weinstein's Evidence P 1006(04), at 1006-8 (1975). The charts themselves are not misleading and we cannot say Judge Blair abused his discretion in allowing their admission.

Government Exhibit No. 51 summarized the percentage of houses sold by each defendant that were purchased with loans guaranteed by the Veterans Administration or the Federal Housing Administration. Defendant Foley and his firm complain that the base data for this chart was never made available to them. The chart was compiled from data contained in machine-readable "diskettes" provided by the multiple listing service. The diskettes were not made available to defendants, but a computer print-out of the information they contained **[**43]** was and the diskettes themselves only contained data that was provided to defendants themselves by their multiple listing service in the normal course of business. The ***HN13***[] computer print-outs qualify as duplicates of the diskettes within the meaning of *Rule 1006*. *Fed.R.Evid. 1001(4)*. In any event, defendants conceded that substantial out-of-state funds were used to purchase houses they brokered. Thus, the admission of the chart, if erroneous, would seem to be harmless error.

Father Henry O'Meara testified to a number of versions of a conversation he had with John T. Carruthers concerning Robert Lebling's reluctance to take seven percent listings. Carruthers and Colquitt-Carruthers, Inc. contend that the trial court erred in failing to strike the testimony, apparently on the ground that the potential for confusion, due to the inconsistencies in the several versions as to what actually was said, outweighed any relevance the testimony had. ***HN14***[] The decision to strike testimony on grounds of lack of relevance **[**44]** is committed to the district judge. We cannot say he abused that discretion in this instance.

The same two defendants also object to the trial court's allowing Allyn Rickman to refresh his recollection concerning a conversation he had with Carruthers with a transcript of his previous grand jury testimony. [17] We cannot say that Judge Blair abused his discretion in concluding that Rickman's memory was exhausted, that the grand jury transcript would be helpful in refreshing it or that it was in fact refreshed.

Finally, Robert L. Gruen, Inc. complains that the government interfered with its cross-examination of Rickman by withholding discoverable information. Gruen was provided with the information that Rickman had told the government that he could not recall Robert Gruen saying at the dinner that his firm would go to seven percent. Gruen was not given the notes **[*1339]** taken by a government attorney of the interview nor was it told that Rickman had said that he had **[**45]** the Impression from the dinner that Gruen would go to seven percent. When Rickman testified that Gruen had said his firm would go to seven percent, Gruen attempted to impeach him with the prior inconsistent statement. Rickman stated that he could not recall having made the statement to the government. Gruen then sought production of the interview notes, but the government refused to allow the statement that Rickman could not recall Gruen saying he would go to seven percent to be used unless the statement that Rickman had the impression Gruen would go to seven percent was also admitted. In the end, the jury was apprised of both statements.

The interview notes were not verbatim nor had they been approved by Rickman. Thus they were not discoverable under the Jencks Act, *18 U.S.C. § 3500*. Without reaching the question whether the failure to make a full disclosure of Rickman's statements violated the principle of *Brady v. Maryland, 373 U.S. 83, 83 S. Ct. 1194, 10 L. Ed. 2d 215 (1963)*, we conclude that under the circumstances any error in this regard was harmless beyond a reasonable doubt. In the trial court's final working out of the awkwardness, **[**46]** the jury was apprised of the possibility that Rickman had given different versions of his recollection on the critical point. The essential impeachment purpose was thus served, and defendant's hurt is thus reduced essentially to tactical discomfiture of limited duration and impact. While even this could have been avoided by a more fully forthcoming disclosure by the Government, we cannot find in it error requiring reversal of these convictions.

---

[17] See text accompanying note 5 Supra.

Having carefully considered the record, the briefs and the oral arguments of all the parties we conclude that no reversible error has been made in the trial of this difficult and complicated case. The convictions of the nine defendants therefore are affirmed.

AFFIRMED.

HN1[] **Dispute Resolution, Act of State Doctrine**

The act of state doctrine is a means of determining the appropriateness of adjudicating in a United States court a dispute which in some manner involves a foreign government. Every sovereign state is bound to respect the independence of every other sovereign state, and the courts of one country will not sit in judgment on the acts of the government of another, done within its own territory.

HN4[] **Dispute Resolution, Act of State Doctrine**

The touchstone of the act of state doctrine, the potential for interference with U.S. foreign relations, is the crucial element in determining whether deference should be accorded in any given case. American courts wish to avoid passing on the validity of foreign acts. Similarly, American courts do not wish to challenge the sovereignty of another nation, the wisdom of its policy, or the integrity and motivation of its action. On the other hand, the less important the implications of an issue are for U.S. foreign relations, the weaker the justification for exclusivity in the political branches

Judges: Before JONES, CLARK and INGRAHAM, Circuit Judges.

Opinion by: CLARK

Opinion

[*49] The sole issue in this appeal is whether the act of state doctrine precludes a trial of plaintiffs' antitrust action. [1] Plaintiffs claim damages from Mitsui & Co., Ltd., a Japanese corporation, and its American subsidiary, Mitsui & Co. (U.S.A.), Inc., for violations of *Sections 1* and *2* of the Sherman Act, *15 U.S.C.A. §§ 1* & *2*, and *Section 73* of the Wilson Tariff Act, *15 U.S.C.A. § 8*. The complaint appended state law claims of tortious interference with contractual relations against these defendants and a breach of contract charge against the Indonesian defendant, P. T. Telaga Mas Kalimantan Co. Following extensive discovery, the district court granted defendants' motion for summary judgment. Defendants **[**2]** urged their motion on five grounds: (1) plaintiffs lack standing since they

[1] The named plaintiffs in this action are Industrial Investment Development Corporation (an American Corporation) and its two Hong Kong corporate subsidiaries, Indonesia Industrial Investment Corporation, Ltd., and Forest Products Corporation, Ltd. They are collectively referred to as Industrial Investment or plaintiffs throughout this opinion.

have incurred only derivative damage as shareholders; (2) the extraterritorial reach of American antitrust laws cannot grasp this case; (3) plaintiffs are not within the "target area" of ***antitrust law*** protection; (4) forum non conveniens; (5) act of state doctrine. The district court's decision was based solely on the ground that the act of state doctrine prevented judicial review of the federal claims. [2.] Because of its ruling on the federal claims, the district court exercised its discretion to dismiss the pendent state claims. [3.]

[3]** The district court's invocation of the act of state doctrine in this case was in error. Although the regulations of a foreign state, Indonesia, formed part of the background to the activities alleged, neither the validity of those regulations nor the legality of the behavior of the Indonesian government is in question here. The mere fact that members of the Indonesian government were to play a part in the alleged scheme does not insulate defendants' accountability for conduct which might prove to be prohibited by our antitrust laws.

The present dispute evolves from plaintiffs' desire to enter the logging and lumber products business in East Kalimantan (Borneo), Indonesia. Late in the 1960's, the government of Indonesia began developing a plan for encouraging and regulating foreign private capital investment. The consequent Foreign Capital Investment Act provided for restrictions of private investment in certain fields, required the development of Indonesian manpower, and required opportunities for Indonesian co-ownership. Thus a foreign company could not conduct business within that country until it joined with a local company, and they together organized an independent limited **[**4]** liability company under Indonesian law. Known as P.T.'s (Perseroan Terbatas), these companies, which are closely analogous to American corporations, must have their organization approved by the government before they become effective.

Land use is also subject to regulation under the Act. A properly organized P.T. cannot harvest timber from the state-controlled land until it has been granted a concession and cutting license by the Department of Forestry pursuant to an application for forestry exploitation rights. The procedure contemplates preliminary surveys and negotiations between the applicant and the Director General of Forestry resulting in tentative concession rights embodied in a Forestry Agreement. The Agreement, accompanied by an Application Letter drafted by the P.T., is then to be submitted to the Minister of Agriculture within one month. Delay in submitting the Application Letter is considered grounds for revoking the Forestry Agreement. The Agreement and Letter must be channeled through the Department. **[*50]** Following approval and payment of a concession fee, the Director General of Forestry issues a formal concession decree and a license which establishes the new **[**5]** company and authorizes its logging operations, subject to revocation for failure to carry out its obligations under the Forestry Agreement. Harvesting cannot begin until the license has been issued. [4.]

In 1970 Industrial Investment [5.] signed a joint venture agreement with Telaga Mas to harvest logs from a timber concession which had been granted to Telaga Mas in a government forest in Borneo. Under the agreement, Industrial Investment was to provide equipment, capital requirements and management, and supervisory and technical personnel. In exchange, Telaga Mas expressly agreed to cooperate in obtaining the necessary approvals for establishing the P.T. and securing the formal concession decree and cutting license.

[6]** Throughout the first six months of 1971 plaintiffs and Telaga Mas jointly negotiated with the Indonesian government for its approval of the proposed business. As a result, a Forestry Agreement was signed by the two companies and the Director General of Forestry on July 1, 1971. The Agreement set forth the capital, organization, and administrative requirements to be completed by the two firms before payment of the concession fee to the government and issuance of the cutting license to the newly formed P.T. The Agreement also contained provisions

---

2. We express no opinion on the merits of assertions (1)-(4).

3. Plaintiffs argue that independent diversity jurisdiction exists for the state claims. Because we find the federal claims justiciable, we need not resolve the dispute over the proper interpretation of the federal diversity statute, *28 U.S.C.A. § 1332*.

4. See generally, Republic of Indonesia, Invest in Indonesia (January 1972).

5. Forest Products Corporation of Delaware, a predecessor company of Industrial Investment, conducted the initial negotiations. For clarity we refer to the American company as Industrial Investment throughout.

relating to the operation of the joint concession. More importantly, it reserved to the Department of Forestry the right to cancel for failure of the joint venture partners to cooperate or carry out their duties, and provided that cancellation of the joint venture agreement prior to the issuance of the license certificate would automatically terminate any rights of the parties to conduct lumbering operations. No license ever issued.

The district court refused to consider plaintiffs' allegations of a Sherman Act conspiracy since in its opinion the absence of an authorizing license governed the disposition of the case. Plaintiffs allege that **[**7]** the Mitsui defendants infiltrated and usurped control of the Telaga Mas management for the purpose of destroying plaintiffs' interest in the proposed logging concession. The complaint intricately details a plot, spawned from a 1972 increase in the price of timber, in which the Mitsui companies, past purchasers and creditors of Telaga Mas, decided first to eliminate Industrial Investment and then to protect its competitive edge by secretly taking direct supervision and control of the Telaga Mas operations for its own profit. Implementation of the scheme began when a shareholder group led by Harianto, a Telaga Mas official who was secretly backed by Mitsui, challenged the authority of Telaga Mas official, Sadjarwo, to execute the Forestry Agreement on behalf of Telaga Mas. Separate competing shareholder meetings were held by Harianto and Sadjarwo, each affirming the corporate authority of the leader of its respective faction. Eventually an Indonesian court declared Harianto's group to be properly in power and nullified the joint venture agreement.

When the news reached the Director General of Forestry, he sent a letter to plaintiffs and to Telaga Mas in which he "cancelled and affirmed **[**8]** invalid" the Forestry Agreement. In the same letter, he invited plaintiffs and Telaga Mas under its newly declared leadership to execute a new agreement. The cancellation, plaintiffs argue, was the natural operation of the Agreement's automatic termination provisions.

In a separate action, a second Indonesian court subsequently held that Industrial Investment was not bound by the nullification order since it was not a party to that action. Harianto continued to rule Telaga Mas, however, and refused to honor or participate in the joint venture with plaintiff.

[*51] Industrial Investment contends that defendants' poisoning of the joint venture caused the cancellation of the Forestry Agreement which in turn caused the government to deny the concession. The district court found that the act of state doctrine prohibited such a "two-step inquiry." It concluded: "Once it is established that the harm complained of was ultimately caused by a governmental act, the motivation behind the act, no matter how unscrupulous, is beyond judicial review."

HN1[] The act of state doctrine has arisen as a means **[**9]** of determining the appropriateness of adjudicating in a United States court a dispute which in some manner involves a foreign government. As classically stated:

> Every sovereign state is bound to respect the independence of every other sovereign state, and the courts of one country will not sit in judgment on the acts of the government of another, done within its own territory.

Underhill v. Hernandez, 168 U.S. 250, 18 S. Ct. 83, 42 L. Ed. 456 (1897).

Early application of this doctrine was often muddled with the doctrine of sovereign immunity or principles of conflicts of law. [6.] **[**12]** Since *Banco Nacional de Cuba v. Sabbatino, 376 U.S. 398, 84 S. Ct. 923, 11 L. Ed. 2d 804 (1964)*, however, the doctrine has emerged as independently based on concerns of separation of powers. The Sabbatino Court, cautious of judicial interference in executive affairs, refused to adjudicate the validity of expropriation by the

---

6. In Underhill, for instance, the defendant Hernandez was acting as an agent for the sovereign in which the alleged torts occurred. Thus the result could be said to rest on the personal immunity of foreign sovereigns. Note, The Act of State Doctrine: Antitrust Conspiracies to Induce Foreign Sovereign Acts, 10 Int'l Law and Politics 495 (1978). See *Oetjen v. Central Leather Co., 246 U.S. 297, 38 S. Ct. 309, 62 L. Ed. 726 (1918)*; *American Banana Co. v. United Fruit Co., 213 U.S. 347, 29 S. Ct. 511, 53 L. Ed. 826 (1909)*. See also, *Alfred Dunhill of London v. Republic of Cuba, 425 U.S. 682, 705 n. 18, 96 S. Ct. 1854, 1866-67 n. 18, 48 L. Ed. 2d 301 (1976)*. There is some authority that the doctrine still reflects conflicts of laws principles. This position assumes the validity of a foreign state's acts under the laws of that state. Applying the foreign laws to those acts, therefore, precludes an inquiry by American courts into their validity. See Note, Sherman Act Jurisdiction and the Acts of Foreign Sovereigns, 77 Colum.L.Rev. 1247 (1977).

Cuban government of property within its own territory owned by American nationals. [7] Its decision was based on several factors which pointed to the executive branch as the more appropriate tribunal to deal with the sensitive political issues. All **[**10]** related to the possible adverse consequences of an American court attempting to resolve the validity of title to property not within its jurisdiction or to judge a foreign state's power to expropriate the property of aliens. Of significance is the Court's express refusal to lay down "an inflexible and all-encompassing rule" of judicial abstention in every case not totally isolated to this country. *376 U.S. at 428, 84 S. Ct. at 940*. Instead, it declared a less brittle doctrine, one with the "capacity to reflect the proper distribution of functions between the judicial and political branches of the Government on matters bearing upon foreign affairs." *376 U.S. at 427-28, 84 S. Ct. at 940*. Relying on traditional political question reasoning, it found that the doctrine was not constitutionally compelled but that it rested on " "constitutional' underpinnings. It arises out of the basic relationships between branches of government in a system of separation of powers." *376 U.S. at 423, 84 S. Ct. at 938*. [8] Sabbatino's **[*52]** "proper distribution" depended on several factors, which concerned the ramifications of judicial intervention on executive **[**11]** conduct of international relations or of inconsistent judicial and executive behavior.

The Supreme Court has recently reaffirmed this policy of balancing executive and judicial **[**13]** concerns in *Alfred Dunhill of London v. Republic of Cuba, 425 U.S. 682, 96 S. Ct. 1854, 48 L. Ed. 2d 301 (1976)*. Because the Court "decline(d) to extend the act of state doctrine to acts committed by foreign sovereigns in the course of their purely commercial operations," Dunhill has become known as the "commercial exception" to the act of state doctrine. Dunhill had mistakenly made an overpayment to Cuba for cigars purchased from expropriated cigar businesses. The Court permitted adjudication of his claim of debt against Cuba:

> Subjecting foreign governments to the rule of law in their commercial dealings presents a much smaller risk of affronting their sovereignty than would an attempt to pass on the legality of their governmental acts. In their commercial capacities, foreign governments do not exercise powers peculiar to sovereigns. . . . Subjecting them in connection with such acts to the same rules of law that apply to private citizens is unlikely to touch very sharply on "national nerves."

425 U.S. at 703-04, 96 S. Ct. at 1866 (footnote omitted). Industrial Investment has urged application of this "commercial exception" to the Indonesian **[**14]** licensing structure. We need not reach the merits of this contention. [9]

Situations have arisen in which the Supreme Court has found the involvement of a foreign state to be too insignificant to invoke the act of state doctrine. For instance, ***HN2***[] the instigation of foreign governmental involvement **[**15]** does not mechanically protect conduct otherwise illegal in this country from scrutiny by the American courts. In *United States v. Sisal Sales Corp., 274 U.S. 268, 47 S. Ct. 592, 71 L. Ed. 1042 (1926)*, a conspiracy which affected United States commerce was held not to be immune from judicial review of Sherman Act claims even though its success was due in part to procurement of discriminatory foreign legislation. The Court

---

[7] Although Sabbatino's bar against claims based on the asserted invalidity of Cuban confiscations has been legislatively overruled by the "Hickenlooper Amendment," Foreign Assistance Act § 301(d)(4), *22 U.S.C.A. § 2370(e)(2) (1970)*, the case is still the leading authority on the act of state doctrine.

[8] Recently this circuit refused to rule on an act of state defense in a suit presenting conflicting claims to oil extracted from the Persian Gulf. Occ. of Umm al *Qaywayn v. A Certain Cargo, 577 F.2d 1196 (5th Cir. 1978)*. Because the action required a determination of sovereignty over the well area, the case was dismissed as a non-justiciable political question. In a brief discussion of the source of the act of state doctrine, we noted that the "better view would be that the doctrine is constitutionally compelled by the concept of separation of powers and placement of plenary foreign relations powers in the executive." *577 F.2d at 1200-01 n. 4*.

[9] A majority of the Court never supported a broad "commercial act" exception to the act of state doctrine. Justice Stevens specifically omitted this part in his concurrence to Justice White's majority opinion, and it was rejected by the four dissenters. However, the Second Circuit, at least in dictum, has treated a commercial exception as firmly established. *Hunt v. Mobil Oil Co., 550 F.2d 68* (2d Cir.), Cert. denied, ***434 U.S. 984, 98 S. Ct. 608, 54 L. Ed. 2d 477 (1977)***. See Rationalizing the Federal Act of State Doctrine and Evolving Judicial Exceptions, 46 Fordham L.Rev. 295 (1977).

distinguished an earlier antitrust case, *American Banana Co. v. United Fruit Co., 213 U.S. 347, 29 S. Ct. 511, 53 L. Ed. 826 (1909)*, in which the act of state doctrine was held to bar adjudication of claims that defendants had influenced Costa Rica to seize plaintiff's property. American Banana also held that the Sherman Act could not be applied against conspiracies occurring outside this country. That latter rule of law has been repudiated. Sherman Act jurisdiction now depends upon a showing of anticompetitive effects within the *United States. Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*; *United States v. Sisal Sales Corp., supra, 274 U.S. 268, 47 S. Ct. 592, 71 L. Ed. 1042*; **[**16]** *United States v. Aluminum Co. of America, 148 F.2d 416 (2d Cir. 1945)*.

The conspiracy in American Banana took place outside the United States and resulted in Costa Rica's seizure of plaintiff's property there. The seizure was valid in costa Rica and the Court held that its validity could not be challenged in American courts. The Sisal conspiracy, by comparison, allegedly destroyed plaintiff's sisal exportation business, not by government expropriation, but by the American corporate defendants' takeover aided by foreign legislation. The Sisal Court was not interested in the validity of the legislation but was concerned with redressing the anticompetitive effects on American commerce caused by the conspiracy.

HN3[] **[*53]** Similarly, a stage fortuitously set by existing foreign legislation cannot automatically be invoked to shield conspiracies to restrain United States trade. In *Continental Ore Co. v. Union Carbide & Carbon Corp., 370 U.S. 690, 82 S. Ct. 1404, 8 L. Ed. 2d 777 (1962)*, defendants were charged with conspiring to monopolize the American vanadium industry **[**17]** by currying the favor of a private Canadian corporation designated as exclusive purchasing agent of vanadium by the Canadian government. Drawing from the authority of Sisal, the Court rejected the defense that the Canadian law permitted discriminatory purchasing by the authority having power to designate purchasing agents. It was enough that plaintiff claimed that the loss of its business was caused by defendants' actions. The Court was careful to note that the Canadian government itself was not a defendant in the action and that the validity of its legislation was not in issue.

The participation of the Indonesian government in the context of the present analysis cannot prevent Industrial Investment from having its claims adjudicated by the district court. There are no special political factors which outbalance this country's legitimate interest in regulating anticompetitive activity both here and abroad. [10] As in Sisal and Continental Ore, the complaint charges parties subject to the court's jurisdiction with conduct occurring within this country and elsewhere which violates United States law. To determine whether there has been a violation of American ***antitrust law*** it is not necessary **[**18]** to resolve the propriety of Indonesia's failure to issue a cutting license. To protect American antitrust policies, an American court need not embark on an adjudication of the validity of that government's behavior. The Ninth Circuit recently stated:

> ***HN4***[] **[**19]** The touchstone of Sabbatino the potential for interference with our foreign relations is the crucial element in determining whether deference should be accorded in any given case. We wish to avoid "passing on the validity" of foreign acts. *Sabbatino, 376 U.S. at 423, 84 S. Ct. 923, 11 L. Ed. 2d 804* . Similarly, we do not wish to challenge the sovereignty of another nation, the wisdom of its policy, or the integrity and motivation of its action. On the other hand, repeating the terms of Sabbatino, *id. at 428, 84 S. Ct. at 940*, "the less important the implications of an issue are for our foreign relations, the weaker the justification for exclusivity in the political branches."

Timberlane Lumber Co. v. Bank of America, 549 F.2d 597, 607 (9th Cir. 1976).

---

[10] In cases dealing with the enforcement of antitrust laws in the face of state action, we note that the approach of the courts has been to weigh the relative interests of the state and federal governments to determine whether the anticompetitive harm of the activity outweighs the benefits of state regulation. *Bates v. State Bar of Ariz., 433 U.S. 350, 97 S. Ct. 2691, 53 L. Ed. 2d 810 (1977)*; *Cantor v. Detroit Edison Co., 428 U.S. 579, 96 S. Ct. 3110, 49 L. Ed. 2d 1141 (1976)*; *Goldfarb v. Virginia State Bar, 421 U.S. 773, 95 S. Ct. 2004, 44 L. Ed. 2d 572 (1975)*; *Parker v. Brown, 317 U.S. 341, 63 S. Ct. 307, 87 L. Ed. 315 (1943)*.

The government of Indonesia is not a named co-conspirator here. Its right to withhold a cutting license is not questioned. This is the major factor distinguishing this case from right to ownership cases such as American Banana and Sabbatino. For instance, in *Occidental Petroleum Corp. v. Buttes Gas & Oil Co., 331 F. Supp. 92 (D.C.Cal.1971)*, *Aff'd, 461 F.2d 1261 (9th Cir. 1972)*, **[**20]** the plaintiffs, holders of a Middle East oil concession from one of the Trucial States, charged the defendants with inducing an adjacent sheikdom in the Persian Gulf, Sharjah, to grant them a conflicting concession covering the same area. The court invoked the act of state doctrine to avoid having to adjudicate which of the two competing sheikdoms had superior authority to grant the concession. It was found that, to establish their claim as pleaded, plaintiffs had to prove that Sharja's concession was fraudulently issued. Passing upon such foreign governmental acts was considered more appropriate for the executive branch in its handling of foreign relations. By comparison, resolution of the charges made by Industrial Investment does not require a determination of plaintiffs' right **[*54]** to receive a cutting license from the Indonesian government. Unlike Occidental where plaintiffs' asserted claim arose through rights granted by a foreign government, Industrial Investment's interest in its business venture with Telaga Mas may be protected from disruptive conduct of competitors by United States antitrust laws.

The only connection which the government of Indonesia has with this **[**21]** action is through application of its Foreign Investment Act, the validity of which is not questioned. The challenge is that a commercial endeavor failed by virtue of external disruptive forces acting on the contractual relationship between private citizens. We need not decide whether, had Telaga Mas not refused to cooperate, the license would have issued as a certainty. It is enough that plaintiffs have offered proof to show that defendants conspired to cause its potential to exploit the Borneo concession to die aborning. *Story Parchment Co. v. Paterson Parchment Paper Co., 282 U.S. 555, 51 S. Ct. 248, 75 L. Ed. 544 (1931)*; *H & B Equipment Co., Inc. v. International Harvester, 577 F.2d 239 (5th Cir. 1978)*; *Heatransfer Corp. v. Volkswagenwerk, A.G., 553 F.2d 964 (5th Cir. 1977)*, Cert. denied, *434 U.S. 1087, 98 S. Ct. 1282, 55 L. Ed. 2d 792 (1978)*. Whether the Indonesian government would have issued a cutting license is relevant only to the value of the destroyed joint venture, not to liability for its destruction.

But the Mitsui defendants argue (and the district court agreed) that the damage complained of stems directly from **[**22]** the denial of the government concession to cut timber. In order to establish therefore that defendants' behavior caused the injury, it would be necessary for the court to investigate the Director of Forestry's motivation in cancelling the agreement. This they say amounts to a prohibited inquiry into the validity of governmental activity. However, plaintiffs' complaint does not limit their allegation of injury from the antitrust cause of action to the inability to harvest Indonesian timber. They assert: "The wrongful acts of Defendants and their co-conspirators have deprived it of its contract and concession rights, of its ability to enter and compete in the market, and of the profits it would have derived from such operations." They insist here that even before it was known whether a license would issue, these rights had a substantial value which they could have proven. Plaintiffs are entitled to recover damages for injury to these "business or property" interests if they are caused by antitrust violations. *15 U.S.C.A. § 15*. All the injuries contended for may potentially satisfy that description. *North Texas Producers Association v. Young, 308 F.2d 235 (1962)*, **[**23]** Cert. denied, *372 U.S. 929, 83 S. Ct. 874, 9 L. Ed. 2d 733 (1963)*. See *Hunt v. Mobil Oil Corp., 410 F. Supp. 10 (S.D.N.Y.1976)*, Rev'd on other grounds, *550 F.2d 68* (2d Cir.), Cert. denied, *434 U.S. 984, 98 S. Ct. 608, 54 L. Ed. 2d 477 (1977)*.

The authority asserted to support Mitsui's position is *Hunt v. Mobil Oil Corp., 550 F.2d 68* (2d Cir.), Cert. denied, *434 U.S. 984, 98 S. Ct. 608, 54 L. Ed. 2d 477 (1977)*, and *Occidental Petroleum Corp. v. Buttes Gas & Oil Co., 331 F. Supp. 92 (C.D.Cal.1971)*, *Aff'd, 461 F.2d 1261 (9th Cir. 1972)*. Both cases involved expropriation by a foreign state of plaintiffs' properties. This distinction alone is of major significance. The Hunt court itself, refusing to apply the precedent of Sisal, stated:

> (Sisal) considered the assistance of the sovereign through the mechanism of favorable legislation engineered by the defendants to be of considerably less moment than the expropriation by the state of the plaintiff's properties in (American Banana).

550 F.2d at 75. Furthermore, separation of powers consideration in **[**24]** Hunt strongly counselled against the court's interference. [11.] Despite these distinctions, the Hunt **[*55]** opinion broadly states that in order to prove damages an antitrust plaintiff must show that But for the conspiracy the foreign government would not have acted as it did. This, the court continues, requires an inquiry into the motivation of the foreign state and "that inevitably involves its validity." 550 F.2d at 77.

[25]** This broad language in Hunt has been criticized for encouraging use of the act of state doctrine as a shield by private conspirators who are able to include some foreign governmental act in their anticompetitive scheme. [12.] We do not agree that, in establishing a causal relation between the private violations alleged and the injuries suffered, the plaintiffs must prove that defendant's acts were the sole cause of the injury. Of course, plaintiffs must show a causal relationship between defendants' anticompetitive actions and the harm suffered. *Radiant Burners, Inc. v. Peoples Gas, 364 U.S. 656, 81 S. Ct. 365, 5 L. Ed. 2d 358 (1961)*. However, inquiry beyond the fact of some damage flowing from the unlawful conspiracy relates only to the amount and not the fact of damage. *Zenith Radio Corp. v. Hazeltine Research, Inc., 395 U.S. 100, 114 n. 9, 89 S. Ct. 1562, 1571, 23 L. Ed. 2d 129 (1969)*; *Story Parchment Co. v. Paterson Parchment Paper Co., supra, 282 U.S. 555, 51 S. Ct. 248, 75 L. Ed. 544*; *E & B Equipment Co., Inc. v. International Harvester, supra, 577 F.2d 239*; *Heatransfer v. Volkswagenwerk, A.G., supra, 553 F.2d 964*. **[**26]** Furthermore, we disagree that motivation and validity are equally protected by the act of state rubric. See, e. g., *Continental Ore Co. v. Union Carbide & Carbon Corp., supra, 370 U.S. 705, 82 S. Ct. 1404*; *Timberlane Lumber Co. v. Bank of America, supra, 549 F.2d 597*. Precluding all inquiry into the motivation behind or circumstances surrounding the sovereign act would uselessly thwart legitimate American goals where adjudication would result in no embarrassment to executive department action. Industrial Investment must only question that government's motivation to the extent of measuring its damage. No ethical standard is set by which the propriety of its decision is tested. Surely the limited nature and effect of determining the proportional cause of plaintiffs' damage allocable to defendants' conduct does not trigger the type of special political considerations protected by the act of state doctrine.

[27]** The objective sought by passage of the Sherman Act is preservation and maintenance of effective competition in this country. *United States v. Aluminum Co. of America, 148 F.2d 416 (2d Cir. 1945)*. To provide an act of state shield to business entities whose activities happen to reach beyond United States soil would thwart this objective. The courts are an important forum for protection against competitive restraints. Although the act of state doctrine is a vital rule of judicial abstention in the **[*56]** field of foreign relations, it does not apply in this case.

REVERSED and REMANDED.

[11.] The complaint by Hunt, an independent oil producer holding oil concessions in Libya, charged defendants, the seven major oil companies, with fraudulently inducing Hunt to be uncooperative in pricing negotiations with Libya. Hunt did so, and Libya retaliated by nationalizing Hunt's properties thus totally eliminating Hunt from the field of competition. Libya was incensed. It loudly proclaimed its purpose to give the United States "a big hard blow in the Arab area on its cold, insolent face." *550 F.2d at 73* Quoting Statement of the State Department, Hearings before the Subcomm. on Multinational Corporations of the Senate Comm. on Foreign Relations, 93d Cong., 2d Sess., pt. 6, at 316-17 (1974). In response, the United States government wrote the Libyan government and characterized the expropriation as "political reprisal against the United States Government and coercion against the economic interests of certain other U.S. nationals in Libya." *550 F.2d at 73*, Quoting, A. Rovine, Digest of United States Practice in International Law 1973 at 335. The Second Circuit refused to upset the executive's identification of Libya's motivation by another inquiry which "could only be fissiparous, hindering or embarrassing the conduct of foreign relations which is the very reason underlying the policy of judicial abstention expressed in the doctrine in issue." *550 F.2d at 77-78*.

The court found that, even if the Department of State had not openly expressed its position, the political and diplomatic dimensions were too burdensome for resolution by the judiciary: "The action taken here is obviously only an isolated act in a continuing and broadened confrontation between the East and West in an oil crisis which has implications and complications far transcending those suggested by appellants." *550 F.2d 78*. No such "implications and complications" hinder a resolution of Industrial Investment's antitrust claims here.

[12.] Note, Sherman Act Jurisdiction and the Acts of Foreign Sovereigns, 77 Colum.L.Rev. 1247 (1977); Note, the Act of State Doctrine: Anti-Trust Conspiracies to Induce Foreign Sovereign Acts, 10 Int'l Law and Politics 495 (1978).

Dissent by: JONES

Dissent

JONES, Circuit Judge, dissenting:

The district court's decision as succinctly and accurately stated in the majority opinion, is "that the damage complained of stems directly from the denial of the government concession to cut timber." I am like minded. If the statement be true then the Act of State doctrine requires a dismissal of the action.

LexisNexis® Headnotes

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN1[] **Private Actions, Standing**

The scope of antitrust protection extends to those persons who are either directly or indirectly injured by antitrust violations, and whose injury is of the kind the antitrust laws were written to guard against.

Antitrust & Trade Law > ... > Private Actions > Standing > General Overview

Civil Procedure > ... > Justiciability > Standing > General Overview

HN2[] **Private Actions, Standing**

The standing doctrine narrows this class of injured persons to a subclass of plaintiffs who are best situated, because of their market position, to serve the twin goals of providing compensation for injuries and preserving a competitive market structure.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN3[] **Price Fixing & Restraints of Trade, Tying Arrangements**

A tying arrangement is the sale of one item (the tying product) only on condition that the buyer take a second item (the tied product) from the same source. Such arrangements are Per se unreasonable, and therefore violative of the antitrust laws, if 1) the tie-in involves two distinct products, 2) the defendant has sufficient economic power in the tying market to impose significant restraints in the tied product market and 3) a "not insubstantial" amount of commerce in the tied product market is affected.Once those elements are demonstrated, plaintiff need not specifically show that defendants' practices produced an unreasonably anticompetitive effect.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Per Se Rule & Rule of Reason > General Overview

HN4[] **Price Fixing & Restraints of Trade, Per Se Rule & Rule of Reason**

The doctrine of Per se illegality is only applied to those agreements or practices which have a pernicious effect on competition and lack any redeeming virtue.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN5[] **Price Fixing & Restraints of Trade, Tying Arrangements**

The common core of the adjudicated unlawful tying arrangements is the forced purchase of a second distinct commodity with the desired purchase of a dominant tying product, resulting in economic harm to competition in the tied market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN6[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Tying arrangements are an object of anti-trust concern for two reasons they may force buyers into giving up the purchase of substitutes for the tied product, and they may destroy the free access of competing suppliers of the tied product to the consuming market.

Antitrust & Trade Law > ... > Price Fixing & Restraints of Trade > Tying Arrangements > General Overview

HN7[] **Price Fixing & Restraints of Trade, Tying Arrangements**

Where the major or exclusive use of the tying product is in connection with the tied product, and the defendant possesses overwhelming power in one of those markets, control of one can lead to control of the other.

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > General Overview

HN8[] Federal Unfair Competition Law, Lanham Act

Section 43(a) of the Lanham Trademark Act provides, in pertinent part, that: Any person who shall use in connection with any goods or services any false description or representation and shall cause such goods or services to enter into commerce shall be liable to a civil action by any person who believes that he is or is likely to be damaged by the use of any such false description or representation.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

Trademark Law > ... > Federal Unfair Competition Law > False Advertising > General Overview

Trademark Law > ... > Unfair Competition > Federal Unfair Competition Law > General Overview

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > General Overview

HN9[] Federal Unfair Competition Law, Lanham Act

Despite its broad language and arguably catholic scope, §43 (a) of the Lanham Trademark Act does not have unlimited application to all deceptive trade practices or to all claims of unfair competition. Instead, it is directed only against a certain kind of advertising false representation of goods or service in interstate commerce.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > False Designation of Origin > Palming Off

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > General Overview

Trademark Law > ... > Unfair Competition > Federal Unfair Competition Law > General Overview

Trademark Law > ... > Federal Unfair Competition Law > False Advertising > General Overview

Trademark Law > ... > Federal Unfair Competition Law > False Designation of Origin > General Overview

HN10[] False Designation of Origin, Palming Off

The § 43 of the Lanham Trademark Act is not limited to false advertising which compares a defendant's product to a plaintiff's. It proscribes misrepresentations about the quality of defendant's own goods, even where the misrepresentations do not tend to confuse (his) goods with those of a competitor or otherwise misstate the origin of the goods.

Business & Corporate Compliance > ... > Federal Unfair Competition Law > Lanham Act > Scope

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > General Overview

HN11[] Federal Unfair Competition Law, Lanham Act

Section 43(a) of the Lanham Trademark Act reaches a seller who exaggerates the scope of his patents, thereby creating a false impression that it is the exclusive source of a product, even though there is no misbranding or mislabelling of the article and no misrepresentation of its inherent attributes.

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > General Overview

Trademark Law > ... > Unfair Competition > Federal Unfair Competition Law > General Overview

***HN12*[ ] Federal Unfair Competition Law, Lanham Act**

§ 43(a) of the Lanham Trademark Act covers a publisher of a controlled circulation magazine who falsely inflates the size of his audience and thereby causes reduced advertising revenues to a competing publisher, even though the misrepresentations did not refer in any way to plaintiff's magazine or otherwise expressly take aim at an identifiable competitor.

Trademark Law > ... > Similarity of Marks > Appearance, Meaning & Sound > General Overview

Trademark Law > Conveyances > General Overview

Trademark Law > ... > Federal Unfair Competition Law > Lanham Act > General Overview

***HN13*[ ] Similarity of Marks, Appearance, Meaning & Sound**

The Lanham Trademark Act should be read, at minimum, to protect competitors from misrepresentations which a defendant makes about its own products and which relate to the principal bases of competition among sellers.

Opinion by: MARSHALL

Opinion

[*451]** **[*396]** MEMORANDUM DECISION

Plaintiff Westinghouse Electric Corporation has moved to dismiss various counterclaims filed by seven defendants Atlas Corporation, Anaconda Company, Kerr-McGee Corporation, Homestake Mining Company, Western Nuclear, Inc., Getty Oil Company, and Utah International, Inc. Westinghouse's motions fall into three categories. First, it challenges the standing of five counterclaimants Atlas, Anaconda, Kerr-McGee, Getty and Homestake to allege that Westinghouse has violated Section 2 of the Sherman Act by unlawfully monopolizing, attempting to monopolize or conspiring to monopolize markets for nuclear steam supply systems ("NSSS" or "reactors") and nuclear fuel assemblies ("fabricated fuel") for those systems. Second, it attacks the standing of all seven counterclaimants to allege that Westinghouse has violated Section 1 of the Sherman Act and Section 3 of the Clayton Act by unlawfully offering predatorily low-priced uranium as a tying product to induce electric utilities to purchase Westinghouse's fabricated fuel and reactors the tied products. Both of these **[**4]** motions are based on the theory that the counterclaimants have suffered no legally **[*397]** cognizable injury since they neither buy fabricated fuel or reactors, nor compete with Westinghouse in those markets. Third, Westinghouse has moved to dismiss Utah's counterclaim under Section 43(a) of the Lanham Trademark Act, *15 U.S.C. § 1125(a)*, which alleges that Westinghouse deceived its utility customers by falsely representing "that it had the capability to carry through its commitments to make future deliveries of uranium to the utilities." Westinghouse contends that this claim is beyond the scope of § 43(a), which only prohibits trademark misuse or similar misconduct. This argument raises a question of statutory construction, and can be evaluated independently of the other motions. To analyze the standing arguments surrounding the tying and monopolization claims, we must make a detailed inquiry into the alleged market position of each of the parties, and then apply the tests of antitrust standing to the peculiar factual matrix which is presented.

All the antitrust counterclaimants complain that Westinghouse utilized various anticompetitive practices, including predatory pricing, **[**5]** short-selling, fraudulent representations, tying arrangements and forced combination sales, to restrain trade and monopolize or attempt to monopolize commerce in markets for uranium, fabricated fuel and reactors. [1] Each of these products is sold at a different level of the nuclear power industry. Counterclaimants generally operate only on the uranium level, by producing and then selling uranium to electric utility customers and

---

1 Counterclaimants have also defined several relevant submarkets, but both sides have not attached any additional significance to those submarkets for the purposes of the present motions.

others. Westinghouse operates on all three levels, selling uranium, fabricated fuel and reactors to the same consumers. Westinghouse's motions essentially seek to confine counterclaimants' antitrust challenges to the uranium market. Because its motions are premised on a perceived economic separation between those markets, we must describe the relationships between uranium, fabricated fuel and reactors in the nuclear power industry. [2]

[6]** Nuclear power plants are used by electric utility companies to generate electricity. The energy source for these plants is uranium. Uranium must be processed in several ways before it is suitable for use as nuclear fuel. It begins as mined uranium ore, which is milled to extract uranium concentrates (U 3O 8), which are known in the industry as "yellowcake." Yellowcake is then converted to uranium hexafluoride (UF 6). Uranium hexafluoride is then enriched through a gaseous diffusion process to increase the concentration of the fissionable U-235 isotope. The enriched UF 6 is then chemically converted into uranium dioxide powder (UO 2). After the powder is compressed and shaped into **[***452]** pellets, it is ready for use in a nuclear reactor.

In this country, different entities perform these steps in the fuel process. All counterclaimants have active mining and milling operations, and sell yellowcake to electric utilities (Atlas P 25, Anaconda P 121, Getty P 130, Homestake P 7, Kerr-McGee P 4, Utah P 2, Western Nuclear P 127). Conversion of yellowcake to uranium hexafluoride is performed by Allied Chemical Company, a non-party, and by Kerr-McGee. (Kerr-McGee P 10(b)). All three domestic **[**7]** enrichment plants are owned by the federal government, which provides enrichment services to private parties on a contractual basis. None of the counterclaimants allege that they presently convert enriched UF 6 into UO 2 powder or pellets. But Kerr-McGee did offer these services between 1965 and 1975. (Kerr-McGee P 4).

After it has reached the pellet form, the uranium is ready to enter the fuel fabrication process. The pellets are placed inside zirconium alloy or stainless steel tubes. Many thousands of these fuel rods are then arranged in clusters to form a fuel assembly. The number and arrangement of fuel **[*398]** rods are individually engineered for each reactor design. From 1966 through 1975, in addition to reactor manufacturers, several non-reactor companies produced fuel assemblies, including Kerr-McGee, Nuclear Fuel Service Corporation, United Nuclear Corporation, Exxon Nuclear Company, Inc., and Nuclear Materials and Equipment Corporation. At the present time, however, Exxon (a non-party) is the only remaining independent fabricator which competes with Westinghouse and the other reactor manufacturers for fuel fabrication business (Kerr-McGee P 13, Utah P 7). Besides **[**8]** Kerr-McGee, none of the other counterclaimants claim any past or present stake in the fuel fabrication market.

After fabrication into fuel assemblies, the uranium is ready to be housed in the power-generating equipment of the nuclear power plant, which is known as the Nuclear Steam Supply System (NSSS). The NSSS consists principally of a reactor enclosed within a steel pressure vessel, as well as other standard electrical generating equipment. The fuel assembly is placed into the reactor and surrounded by water. The heat created by the nuclear fission reaction creates steam, which causes turbines to rotate, which in turn generate electricity. The United States market for nuclear reactors is supplied by five manufacturers. Westinghouse is the largest manufacturer with about 39% Of the market; General Electric is next with about 31%; Combustion Engineering Inc. and Babcock & Wilcox Co. have about 15% And 12%, respectively, and General Atomic, Inc. has an insignificant share based on sporadic sales in two or three years over the last decade. (Kerr-McGee P 9, Western Nuclear P 137). None of the counterclaimants manufacture or sell nuclear reactors.

The first fuel assemblies used **[**9]** in a reactor are usually fabricated and sold to the utility customer by the reactor manufacturer at the time the reactor is purchased. (Kerr-McGee P 11). After a reactor operates for twelve to eighteen months, some of the fissionable uranium becomes depleted. Consequently, some of the original fuel assemblies must be replaced and others rearranged. Thereafter, one third of the fuel core must be replaced annually. The replacement fuel assemblies are called reloads. Reload fabrication is performed by a reactor manufacturer or an independent fuel fabricator. (Kerr-McGee P 12, Western Nuclear P 130).

---

[2] This description is drawn from allegations in the counterclaims. See also *United Nuclear Corp. v. Combustion Engineering, Inc., 302 F. Supp. 539 (E.D.Pa.1969)*.

A variety of contractual methods have been used by utilities and fuel fabricators to allocate responsibility for procuring fuel for initial fuel cores and reloads. In some cases, the fuel fabricator is responsible for obtaining the yellowcake and for obtaining services for the conversion and enrichment of the yellowcake. In other cases, obtaining one or both of these services is the responsibility of the utility. In still other instances, the yellowcake is obtained by the utility, but one or both of the services is the responsibility of the fuel fabricator. (Kerr-McGee P 14). Counterclaimants **[**10]** all allege that they sell yellowcake, but some are silent on whether they sell or offer to sell yellowcake to utilities, fuel fabricators, or both. (Atlas P 125, Homestake P 7, Kerr-McGee P 4, Western Nuclear P 127). Others allege that they have sold uranium to reactor manufacturers and to electric utilities (Anaconda P 121), to electric utilities and "others" (Getty P 130), or to electric utilities and "intermediaries" (Utah P 2). All allege that the effect of Westinghouse's alleged antitrust violations has been to deprive them of potential uranium sales to electric utilities.

Counterclaimants allege that Westinghouse participates vigorously in all three markets uranium, fuel fabrication and reactor manufacture. Westinghouse is the largest single reactor manufacturer in the United States. It has sold more than one hundred reactors in the United States, giving it a 38-40% Market share. In 1971 its reactors accounted for about 40% Of the generating capacity of commercial nuclear power plants supplied by U.S. manufacturers **[***453]** . (Anaconda P 123, Homestake P 9, Western Nuclear P 136). Westinghouse is presently one of a very few commercial fabricators of fuel assemblies in this country. **[**11]** Its estimated market share in the **[*399]** United States for fuel assemblies sold to date is between 35% And 40%. (Homestake P 9, Atlas PP 43, 27, Utah P 7, Kerr-McGee P 13). Since the mid-1960's Westinghouse has sold large quantities of yellowcake to electric utility customers for long-term delivery at various times up through the end of this century. By 1975, Westinghouse had agreed to deliver some eighty million pounds of yellowcake to utilities during this period. (Anaconda P 125(f), Kerr-McGee P 23, Utah P 11, Western Nuclear P 139). At the beginning of 1976, Westinghouse's commitments represented about 20% Of commercial uranium commitments by all producers to all buyers for contracts through 1994. (Kerr-McGee P 23, Western Nuclear P 141). Estimates of Westinghouse's present orders for yellowcake range as high as one hundred fifteen million pounds. (Atlas P 127, Homestake P 9). Although Westinghouse has a wholly-owned subsidiary engaged in uranium exploration and mining, and has subscribed to several joint ventures engaged in uranium exploration and mining (Atlas P 28, Homestake P 10, Utah P 4), some counterclaimants seem to allege that Westinghouse has no ability **[**12]** to meet any of its contractual obligations from its own production, and will have to rely entirely on purchases of yellowcake from other sources. (Kerr-McGee P 23, Anaconda P 125(a)). All counterclaimants agree that Westinghouse has no uranium available in its inventory to meet the large majority of its uranium commitments. (See, e.g. Western Nuclear PP 140-41). Thus, Westinghouse's alleged position as a major yellowcake Supplier is not buttressed by a concomitant position as a major yellowcake Producer. Westinghouse's productive capacity and dominance instead lies in its reactor and fabricated fuel operations.

With this industry background in mind, we proceed to outline the challenged actions of defendants' counterclaims. Westinghouse attacks counterclaimants' standing to press two claims: 1) that Westinghouse monopolized or attempted to monopolize the fabricated fuel or reactor markets and 2) that Westinghouse used uranium as a tying product to coerce electric utilities to purchase fabricated fuel or reactors from Westinghouse. Westinghouse does not contend that counterclaimants lack standing to pursue their other claims: 1) that Westinghouse monopolized or attempted to monopolize **[**13]** the uranium market or 2) that Westinghouse used reactors or fabricated fuel as a tying product to coerce utilities to purchase tied uranium from it; or 3) that Westinghouse bundled together its sales of uranium, fabricated fuel and reactors, requiring utilities to purchase these products in a package, with the result that competitors in all three markets were injured. (Westinghouse Response, filed 1/17/79, at 5).

I. Tying Counterclaims

We will first describe the challenged tying claim. Although each counterclaim has individual variations in language and form, the essential content of the allegations is the same. Westinghouse allegedly offered to sell yellowcake to its electric utility customers, at prices below the prevailing market, on the condition that the utilities also buy Westinghouse's reactors, fabricated fuel, or both. (Atlas P 37, Anaconda P 125(b), Getty P 133(b), Homestake P 18, Kerr-McGee PP 18-20, Utah P 12, Western Nuclear P 138). Low-cost yellowcake was thus used as a tying product to coerce utilities to buy tied reactors or fabricated fuel. At least one counterclaimant alleges that

Westinghouse was able to maintain its tie-ins by cross-subsidization, that is, **[**14]** by using its profits from its sale of reactors and fabricated fuel to underwrite its predatorily low-priced uranium. [3] (Kerr-McGee P 18).

As a result of its tie-ins, and of other allegedly illegal conduct, such as exclusive dealing contracts, predatory pricing, short-selling and fraudulent misrepresentations, Westinghouse acquired contracts to sell utilities over eighty million pounds of uranium, which was about 20% Of the market. **[*400]** In making these contracts, Westinghouse agreed to provide uranium it did not have and to provide it at unreasonably low prices. Westinghouse also fraudulently misrepresented that it was able to supply the agreed quantities of yellowcake. It then failed to cover its contractual obligations, leaving it short some sixty-five million pounds of uranium. (Kerr-McGee PP 23-26, Western Nuclear PP 139-140).

Westinghouse's conduct had the effect of creating **[**15]** a serious supply-demand imbalance in the yellowcake market. Westinghouse's sales of large amounts of yellowcake, which were at least partially induced by its use of uranium as a tying product, led many utilities which had contracted **[***454]** with Westinghouse to refrain from purchasing from other uranium suppliers, including counterclaimants. This lowered demand for counterclaimants' yellowcake and caused them to accept depressed prices for contracts they were able to make. This demand-price reduction was an artificial one, however, because Westinghouse did not possess the large quantities of yellowcake due for supply under the contracts. The "phantom" uranium was in reality held by other producers, or was in as-yet undeveloped mines or properties. This fact was fraudulently concealed by Westinghouse. Believing that no strong market for their uranium existed, counterclaimants had no incentive to make capital investments to develop new or existing uranium sources. When the illusory nature of Westinghouse's supplies was exposed, counterclaimants were suddenly confronted with demands for the shortfall. However, the depressed prices and reduced capital investment of the preceding years **[**16]** left them unprepared to capitalize on these new sales opportunities, resulting in the loss of substantial revenue and profits. Counterclaimants conclude that Westinghouse's tying arrangement resulted in a lessening of competition in the markets for uranium, fabricated fuel and reactors, and, more specifically, in injury to their position as producers and sellers of uranium. (See Atlas P 41; Anaconda PP 126-127; Getty P 134; Homestake PP 18, 29; Kerr-McGee PP 20, 26-28; Utah PP 18-19, Western Nuclear PP 140-143).

Westinghouse's motion to dismiss these counterclaims is based on the proffered theory that, to have standing to attack an alleged tie-in, a private antitrust plaintiff must be either a purchaser of the tied product (reactors and fabricated fuel) or a competitor of the defendant in the market for the tied product. None of the counterclaimants alleges that it satisfies this test. The purchasers are the utility companies, and the affected competitors are the reactor and fabricated fuel manufacturers. [4] Instead, counterclaimants all allege that they compete with Westinghouse in the market for uranium, the tying product, and that their businesses are injured in that market. **[**17]** Westinghouse contends that the alleged impact on counterclaimants' business in that market is too remote, speculative and indirect to support a private antitrust claim.

In response, counterclaimants argue that the case law does not support a denial of standing to a fixed category of antitrust plaintiffs, without additional consideration of the directness of their injury. They contend that even competitors in the tying product market may sue if they were directly and foreseeably injured by the tie-in device. By their analysis, counterclaimants suffered such an injury here, because Westinghouse's "tying uranium obtained its tying power from its unreasonably low price," and that price was made possible solely by Westinghouse's cross-subsidization of its uranium losses by its profits in the reactor and fabricated fuel markets. The greater the success of the tie-in, **[**18]** the more uranium sales which were diverted from counterclaimants. Furthermore, the injury was foreseeable because counterclaimants are Westinghouse's direct competitors in the sale of uranium to utilities which use Westinghouse's reactors and fabricated fuel. They are not remote links in the chain of distribution, nor are they only indirectly or **[*401]** derivatively affected by competitive injury to others.

---

[3] In their memorandum opposing Westinghouse's motion to dismiss, all counterclaimants adopt the cross-subsidization theory.

[4] In its memo, Kerr-McGee does not place itself in the latter category, even though it competed in the fabricated fuel market from 1965 to 1975.

We find some merit in the arguments by both Westinghouse and counterclaimants, and think that their contrary conclusions are the product of the doctrinal confusion which has characterized the law of antitrust standing. The confusion arises from the failure to distinguish between the scope of antitrust standing and the scope of protection under the antitrust laws. See Berger & Bernstein, An Analytical Framework for Antitrust Standing, 86 Yale L.J. 809, 835 (1977). ***HN1***[] The scope of antitrust protection extends to those persons who are either directly or indirectly injured by antitrust violations, and whose injury is "of the kind the antitrust laws were written to guard against." *Lupia v. Stella D'Oro Biscuit Co., Inc., 586 F.2d 1163, 1168 (7th Cir. 1978)*. ***HN2***[] The standing doctrine **[**19]** narrows this class of injured persons to a subclass of plaintiffs who are best situated, because of their market position, to serve the twin goals of providing compensation for injuries and preserving a competitive market structure. Applying this analysis, we conclude that counterclaimants are not protected by the doctrine of Per se illegality which normally attaches to the antitrust prohibition against tying arrangements, but nevertheless are within the scope of protection and standing to challenge those practices under a rule of reason analysis. [5]

[*455]** **[**20]** ***HN3***[] A tying arrangement is the sale of one item (the tying product) only on condition that the buyer take a second item (the tied product) from the same source. Such arrangements are Per se unreasonable, and therefore violative of the antitrust laws, if 1) the tie-in involves two distinct products, 2) the defendant has sufficient economic power in the tying market to impose significant restraints in the tied product market and 3) a "not insubstantial" amount of commerce in the tied product market is affected. *Fortner Enterprises, Inc. v. United States Steel Corp., 394 U.S. 495, 499, 89 S. Ct. 1252, 22 L. Ed. 2d 495 (1969)* (Fortner I), quoting *Northern Pacific Ry. Co. v. United States, 356 U.S. 1, 5-6, 78 S. Ct. 514, 2 L. Ed. 2d 545 (1958)*. Once those elements are demonstrated, plaintiff need not specifically show that defendants' practices produced an unreasonably anticompetitive effect.

HN4[] The doctrine of Per se illegality is only applied to those agreements or practices which have a pernicious effect on competition and lack any redeeming virtue. *Northern Pacific Ry. Co., supra, 356 U.S. at 5, 78 S. Ct. 514*. In placing tie-ins in this category, the Supreme Court has focussed exclusively **[**21]** on the anticompetitive impact of tie-ins on the market for the tied, not the tying, product. In *Times Picayune Publishing Co. v. United States, 345 U.S. 594, 614, 73 S. Ct. 872, 883, 97 L. Ed. 1277 (1953)*, the Court stated that

> ***HN5***[] The common core of the adjudicated unlawful tying arrangements is the forced purchase of a second distinct commodity with the desired purchase of a dominant "tying' product, resulting in economic harm to competition in the "tied' market.

In *United States v. Loew's Inc., 371 U.S. 38, 44-45, 83 S. Ct. 97, 102, 9 L. Ed. 2d 11 (1962)*, the Court said ***HN6***[] tying arrangements

> . . . are an object of anti-trust concern for two reasons they may force buyers into giving up the purchase of substitutes for the tied product, . . . and they may destroy the free access of **[*402]** competing suppliers of the tied product to the consuming market . . . .

Justice Black reiterated in Northern Pacific Ry. Co. that:

> Where such (tie-in) conditions are successfully exacted competition on the merits With respect to the tied product is inevitably curbed. . . . (Tying arrangements) deny competitors free access to the market For the tied product, not because **[**22]** the party imposing the tying requirements has a better product or a lower price but

---

[5] We have struggled to fashion what we believe is an appropriate test because recent Seventh Circuit decisions have created a doctrinal void in this area. In its most recent decision expressly adopting a standing test, the Seventh Circuit seemed to use both the "zone of interests" and "target area" tests. *Illinois v. Ampress Brick Co., 536 F.2d 1163, 1164, 1167 (7th Cir. 1976)*. That decision was reversed by the Supreme Court in an opinion which expressly refrained from addressing the standing issue. *Illinois Brick Co. v. Illinois, 431 U.S. 720, 728 n.7, 97 S. Ct. 2061, 52 L. Ed. 2d 707 (1977)*. The Seventh Circuit's most recent opinion on standing admits that, because of the Supreme Court reversal, the legal foundation of its standing analysis in Ampress Brick now requires reconsideration, but then finds it unnecessary to select or reject any of the various standing and injury doctrines. *Lupia, supra, 586 F.2d at 1169*.

> because of his power or leverage in another market. At the same time buyers are forced to forego their free choice between competing products.

356 U.S. at 6, 78 S. Ct. at 518 (emphasis added). Justice White, in his dissenting opinion in Fortner I, adopts the same perspective:

> There is general agreement in the cases and among commentators that the fundamental restraint against which the tying proscription is meant to guard is the use of power over one product to attain power over another, or otherwise To distort freedom of trade and competition in the second (tied) product.

394 U.S. at 512, 89 S. Ct. at 1263 (emphasis added). The Courts of Appeals echo these sentiments with statements that "(t)he evil of a tying agreement is the restraint of competition in the tied product." Holleb & Co. v. Produce Terminal Cold Storage Co., 532 F.2d 29, 32 (7th Cir. 1976); Southern Concrete Co. v. United States Steel Corp., 535 F.2d 313, 316-17 (5th Cir. 1976).

These cases clearly indicate that the judicial doctrine of Per se unreasonableness in tying arrangements was only designed to protect **[**23]** competitors and purchasers in the market for the tied product, where the major anticompetitive effects are felt. An extension of that doctrine to protect competitors in the tying market would be justified only if tying arrangements "inevitably curbed" competition in that market as well. We know too little about the actual impact of the challenged tie-in to justify such an extension at this stage. And we are skeptical that evidence could be introduced to support that step here. Professors Areeda and Turner have noted in their recent treatise that, "with some exceptions, tying arrangements do not reinforce the firm's market power in the tying product. . . . Ordinarily, the adverse effects, if any, are on competition in the tied item." P. Areeda and D. Turner, ***Antitrust Law*** P 733 at p. 258 (1978). **[***456]**

The allegations in the counterclaims do not convince us that Westinghouse's practices would have such an inherently pernicious effect on competition in the tying market so as to warrant a conclusive presumption of illegality. First, Westinghouse's alleged market power in uranium was illusory. Westinghouse sold large quantities of uranium, but lacked the productive capacity to supply **[**24]** it. It masked its short-selling scheme by falsely misrepresenting its ability to cover. Second, Westinghouse's alleged degree of control in the tied product markets (reactors and fabricated fuel) is not great enough to conclusively infer that it possessed sufficient leverage to extend its economic power to the tying product market (uranium). In some situations, ***HN7***[] where the major or exclusive use of the tying product is in connection with the tied product, and the defendant possesses overwhelming power in one of those markets, control of one can lead to control of the other. See Areeda & Turner, Supra, P 733 at pp. 259-60; United States v. United Shoe Machinery Corp., 110 F. Supp. 295, 325 (D.Mass.1953), Aff'd per curiam, 347 U.S. 521, 74 S. Ct. 699, 98 L. Ed. 910 (1954). Some courts have defined tying arrangements in such broad terms, theoretically expanding their Per se prohibition to cover all extensions of economic power from one market to another. See, e.g., Spartan Grain & Mill Co. v. Ayers, 581 F.2d 419, 425 (5th Cir. 1978). Here Westinghouse's alleged 40% Share of the reactor and fabricated fuel markets is insufficient to draw a conclusive presumption of illegal leveraging.

[25]** Although counterclaimants' alleged injury is not of the kind the doctrine **[*403]** of Per se unreasonableness was intended to guard against, it is within the scope of protection afforded by the antitrust laws against arrangements which unreasonably restrain trade (s 1 of the Sherman Act) or which substantially lessen competition or tend to create a monopoly (s 3 of the Clayton Act). The allegations of the counterclaims invoke these more general standards of the antitrust laws. We also hold that counterclaimants' alleged injury is sufficient to give them standing to sue. They allege that Westinghouse's tie-in practice reduced demand and lowered prices for uranium, causing them to lose sales and profits to Westinghouse and to delay capital investment needed to meet the actual demand. The sales diversion and investment inhibition were caused by Westinghouse's predatorily-low pricing of the tying product, which in turn was made possible by Westinghouse's cross-subsidization of those low prices by profits earned through its domination or monopolization of the tied products. Westinghouse's alleged predation and tie-in weakened competition in the uranium market by artificially limiting **[**26]** the opportunities of rivals and new entrants. Because counterclaimants sold uranium in direct competition with Westinghouse, their injury does not have the indirect quality which is characteristic of chain-of-distribution cases. See, e.g., Illinois Brick Co. v. Illinois, *supra.* The injury is immediate and severe. This case also does not raise any risk of duplicative recoveries, since counterclaimants only seek recovery for damages incurred in the uranium market, not for those suffered by Westinghouse's competitors or customers in the reactor and fabricated fuel markets. Counterclaimants fit within the class of ". . . those who have been injured by (alleged) restraints imposed by defendant on competitive forces in the economy." *Lupia, supra, 586 F.2d at 1168*. We conclude that counterclaimants have standing under the general standards of Section 1 of the Sherman Act and Section 3 of the Clayton Act to challenge Westinghouse's alleged use of uranium as a tying product to coerce utilities and others to purchase its reactors and fabricated fuel. They are entitled to an opportunity to prove an antitrust violation "on the basis of a more thorough examination of the purposes and effects **[**27]** of the practices involved . . ." *Fortner I, supra, 394 U.S. at 500, 89 S. Ct. at 1257*. Westinghouse's motion to dismiss these counterclaims is denied.

II. Section 2 Counterclaims

Five defendants Atlas, Anaconda, Getty, Homestake, and Kerr-McGee have accused Westinghouse of Section 2 violations in the markets for reactors, fabricated fuel and uranium. The supporting factual allegations are the same as or very similar to those underlying the tying claims.

Westinghouse offered and made package deals with electric utilities to provide them with nuclear reactors, fabricated fuel, and uranium. The actual mechanics behind those deals are variously described in the counterclaims. Westinghouse required utilities to buy all three products together for a total combination price, without regard to the true value of each of the component products. Or Westinghouse sold uranium to utilities at unreasonably low prices, on condition that they also buy Westinghouse's reactor and fabricated fuel. Or Westinghouse used its low-priced uranium as a "loss leader" to induce **[***457]** utilities to buy reactors and fabricated fuel from Westinghouse. Westinghouse's ability to make these deals stemmed from its **[**28]** dominance in the reactor and fabricated fuel markets, and its ability to subsidize its uranium losses with profits on sales in those markets.

In offering these package deals, Westinghouse falsely misrepresented that it could supply all of its purchasers' uranium requirements and could service their full nuclear needs, when in fact Westinghouse had neither the ability nor the intent to cover its sales. By its conduct, Westinghouse successfully induced utilities to enter into long-term exclusive dealing contracts covering all or almost all their uranium requirements. Westinghouse's short-selling program was intended to artificially manipulate the yellowcake market. Westinghouse first seized a sizeable percentage of long-term **[*404]** uranium demand by offering very low prices, then delayed its arrangements with uranium producers to cover its sales, apparently hoping the depressed market would produce a price low enough to protect its short position. As we noted earlier with the tying allegations, Westinghouse's conduct had the effect of diverting uranium sales from counterclaimants to Westinghouse, of diminishing market demand and prices for uranium, of curtailing the forward **[**29]** supply of uranium and of discouraging capital investment and market expansion by competing uranium producers. (Atlas PP 44-45, Anaconda PP 125-127, Getty PP 133-137, Homestake PP 25-26, Kerr-McGee PP 18-28).

Counterclaimants allege that Westinghouse has used its market power in uranium, reactors and fabricated fuel in an anticompetitive and monopolistic manner in violation of Section 2 of the Sherman Act. However, the various counterclaimants diverge in enumerating the specific Section 2 offenses. Atlas and Homestake claim that Westinghouse has monopolized, attempted to monopolize, and conspired to monopolize the reactor and fabricated fuel markets, but has only attempted and conspired to monopolize the yellowcake market. (Atlas PP 46-47, Homestake PP 27-28). Getty and Anaconda claim that Westinghouse has monopolized and attempted to monopolize all three markets. (Getty P 138, Anaconda P 124). In addition, Western Nuclear states that it intends to amend its counterclaim to come within this category, although its present allegations only charge monopolization and attempted monopolization of the uranium market. (Western Nuclear P 150). Kerr-McGee claims that Westinghouse has **[**30]** monopolized, attempted to monopolize, and conspired to monopolize all three markets, as well as various submarkets. (Kerr-McGee P 38).

Westinghouse has moved to dismiss the five counterclaims "to the extent that counterclaimants seek damages or injunctive relief for injury to their business or property or threatened loss or damage resulting from Westinghouse's alleged monopolization, attempted monopolization, or conspiracy to monopolize the markets for reactors or fabricated nuclear fuel." (Westinghouse Supp. Memo p. 14). Westinghouse theorizes that counterclaimants lack standing to complain of monopolization in reactors and fabricated fuel because they are neither consumers nor competitors in those markets. Instead, they are "mere suppliers" of uranium to those market participants. Westinghouse views this connection as too attenuated to confer standing.

In response, counterclaimants argue that they are more than "mere suppliers" to the two markets, and that certain suppliers can have standing to assert claims for injuries caused by actual or attempted monopolization of a market in which they do not directly compete. They recognize that suppliers may lack standing if their injury **[**31]** is only a ripple effect from an antitrust violation in a distant market. But counterclaimants view their injury as more than the loss of sales of uranium to participants in the reactor and fabricated fuel markets because of Westinghouse's monopolistic restraints on the businesses of those participants. Their injury on the uranium level of the industry is not merely the fallout from Westinghouse's violations on the fabricated fuel and reactor levels, but instead is part of the bomb crater caused by a unified attack on all three markets. They contend that Westinghouse is a vertically integrated company which has monopolized or attempted to monopolize multiple levels of the nuclear power industry by bundling together sales of reactors, fabricated fuel and uranium. Westinghouse excluded, or attempted to exclude, competition from all three markets as part of a single comprehensive scheme. They conclude that "whether its true purpose was to monopolize uranium for its own sake, or to leverage its market power there to exclude competitors in fabrication and reactors, Westinghouse took aim at the counterclaimants and should not be shielded from liability because the end of its scheme was **[**32]** monopolization of a "downstream' market." (Counterclaimants' Memo, p. 4). **[***458]**

[*405] In reply, Westinghouse emphasizes that it does not seek to immunize itself from antitrust liability, since it has not challenged counterclaimants' standing to recover damages for alleged Section 2 violations in the uranium market. Counterclaimants compete with Westinghouse for the sale of that product, and are clearly injured by Westinghouse's alleged attempts to cover that market. Westinghouse's motions instead "seek to prevent counterclaimants from asserting that Westinghouse violated the antitrust laws in markets in which they have never been engaged reactors and fabricated fuel." (Westinghouse Reply Memo, p. 4). Westinghouse views the monopolization claims as separable and distinct, and rejects counterclaimants' arguments that Westinghouse's alleged cross subsidization of profits and leveraging of power from its reactor and fabricated fuel markets can tie all three together. Westinghouse urges that if it used the fruits of its monopoly power to engage in predatory pricing or tying arrangements in the uranium market, counterclaimants' proper remedy is a claim for antitrust violations in that **[**33]** market alone.

We think counterclaimants have the better arguments. They have accused Westinghouse with monopolization or attempted monopolization of multiple levels of the nuclear power industry through the exercise of large amounts of market power. Two lines of antitrust violations are involved. One line is created by counterclaimants' allegations that Westinghouse has Vertically integrated all three nuclear markets, thereby causing an overall constriction of uranium buyers and a resulting monopsonistic injury to uranium suppliers. For example, Atlas claims that Westinghouse used low-priced yellowcake

> . . . to entice utilities to buy their full nuclear power needs, including nuclear reactors, fabricated fuel assemblies, and yellowcake, from Westinghouse, for the purpose and with the effect of entrenching Westinghouse's dominant position in the nuclear reactor and fabricated fuel assembly markets, and enhancing its position in the yellowcake market. (P 37).

As part of its package deal to provide for the utilities' fuel nuclear needs, Westinghouse offered

> . . . to act as agent for electric utility company customers in their purchases of yellowcake, with the intent **[**34]** to control such purchases only from or through Westinghouse, to the exclusion of competing yellowcake purchasers. (P 45(f)).

Another line of antitrust violations, economically perpendicular to the first, is created by counterclaimants' allegations that Westinghouse has Horizontally monopolized or attempted to monopolize the three nuclear markets, thereby simultaneously harming its competitors in the primary markets and also increasing its leverage through package sales in upstream or downstream markets, causing injury to competitors in those secondary markets.

Thus, for example, Atlas alleges that Westinghouse has used package deals As a vehicle for achieving dominance in the three markets, and has also been able to use package deals successfully As a consequence of its dominance in those same markets, with market power thus serving as both a means and an effect. (PP 44(a), 45(a)). The counterclaims therefore describe a situation where the same acts of Westinghouse (i. e., its combination sales) have caused two geometrically related lines of antitrust violations.

Westinghouse tries to dissect those two lines, viewing the counterclaims as a complex of several separable **[**35]** antitrust violations. However, we agree with counterclaimants that their pleadings describe a single massive antitrust violation throughout an industry, causing a synergistic continuum of injury to market participants. At this stage of the pleadings, we see no way to segregate issues of proof and injury by market level. Counterclaimants are entitled to recover for their injuries which flow from Westinghouse's anticompetitive conduct in all three levels of the industry.
